Alaska Victimization Survey Questions

Intimate Partner Violence

Now I'm going to ask you some questions about times when any romantic or sexual partner has physically hurt you. Remember that you can skip questions you don't want to answer and you can stop at any time. How many of your romantic or sexual partners have…

1. Made threats to physically harm you?
2. Slapped you?
3. Pushed or shoved you?
4. Hit you with a fist or something hard?
5. Kicked you?
6. Hurt you by pulling your hair?
7. Slammed you against something?
8. Tried to hurt you by choking or suffocating you?
9. Beaten you?
10. Burned you on purpose?
11. Used a knife or gun on you?

Alcohol or Drug Involved Sexual Assault

Sometimes sex happens when a person is unable to consent to it or stop it from happening because they were drunk, high, drugged, or passed out from alcohol, drugs, or medications. This can include times when they voluntarily consumed alcohol or drugs or they were given drugs or alcohol without their knowledge or consent. Please remember that even if someone uses alcohol or drugs, what happens to them is not their fault. When you were drunk, high, drugged, or passed out and unable to consent, how many people have…

1. Had vaginal sex with you? By vaginal sex, we mean that a man or boy put his penis in your vagina.
2. Made you receive anal sex, meaning they put their penis into your anus?
3. Made you perform oral sex, meaning that they put their penis in your mouth or made you penetrate their vagina or anus with your mouth?
4. Made you receive oral sex, meaning that they put their mouth on your vagina or anus?

Forcible Sexual Assault

Some people are threatened with harm or physically forced to have sex when they don't want to, for example, by being pinned or held down, or by the use of violence. How many people have used physical force or threats to physically harm you to…

1. Make you have vaginal sex?
2. Make you receive anal sex?
3. Make you perform oral sex?
4. Make you receive oral sex?
5. Put their fingers or an object in your vagina or anus?
6. Try to have vaginal, oral, or anal sex with you, but sex did not happen?

Weighted Proportions of Alaskan Women Reporting Intimate Partner Violence

Measures of Intimate Partner Violence	Past 12 Months	Lifetime
Partner(s) made threats to physically harm you	5.8%	31.0%
Partner(s) slapped you	3.1%	27.2%
Partner(s) pushed or shoved you	7.9%	39.3%
Partner(s) hit you with a fist or something hard	2.9%	22.2%
Partner(s) kicked you	2.0%	13.3%
Partner(s) hurt you by pulling your hair	2.1%	17.3%
Partner(s) slammed you against something	4.2%	25.4%
Partner(s) tried to hurt you by choking or suffocating you	1.5%	13.8%
Partner(s) beat you	2.0%	17.1%
Partner(s) burned you on purpose	0.6%	2.9%
Partner(s) used knife or gun on you	0.9%	9.7%
Intimate partner violence (composite with all items)	9.4%	47.6%
Physical violence (composite without threats)	8.6%	44.8%

Note. CI = confidence interval.

Weighted Proportions of Alaskan Women Reporting Sexual Violence

Measures of Sexual Violence	Past 12 Months	Lifetime
While intoxicated[a] and unable to consent…		
Someone had vaginal sex with you	2.0%	18.3%
Someone made you receive anal sex	1.0%	6.9%
Someone made you perform oral sex	1.7%	11.5%
Someone made you receive oral sex	1.6%	8.4%
Alcohol or drug involved sexual assault (composite)	3.6%	26.8%
With physical force or threats of physical harm…		
Someone made you have vaginal sex	1.5%	17.9%
Someone made you receive anal sex	0.4%	3.3%
Someone made you perform oral sex	0.9%	7.7%
Someone made you receive oral sex	0.9%	5.3%
Someone put fingers or an object in your vagina/anus	0.9%	9.4%
Someone tried to have vaginal/oral/anal sex with you	1.2%	13.0%
Forcible sexual assault (composite)	2.5%	25.6%
Sexual violence (composite)	4.3%	37.1%

Note. CI = confidence interval.

[a] Includes being drunk, high, drugged, or passed out from alcohol, drugs, or medications.

CDVSA
Council on Domestic Violence & Sexual Assault

Presentation Overview

- Update on recent statistics from Uniform Crime Reports
- 2009 Senate Judiciary Committee recommendation for victimization survey
- FY10 Alaska Victimization Survey
- FY11 Alaska Victimization Surveys

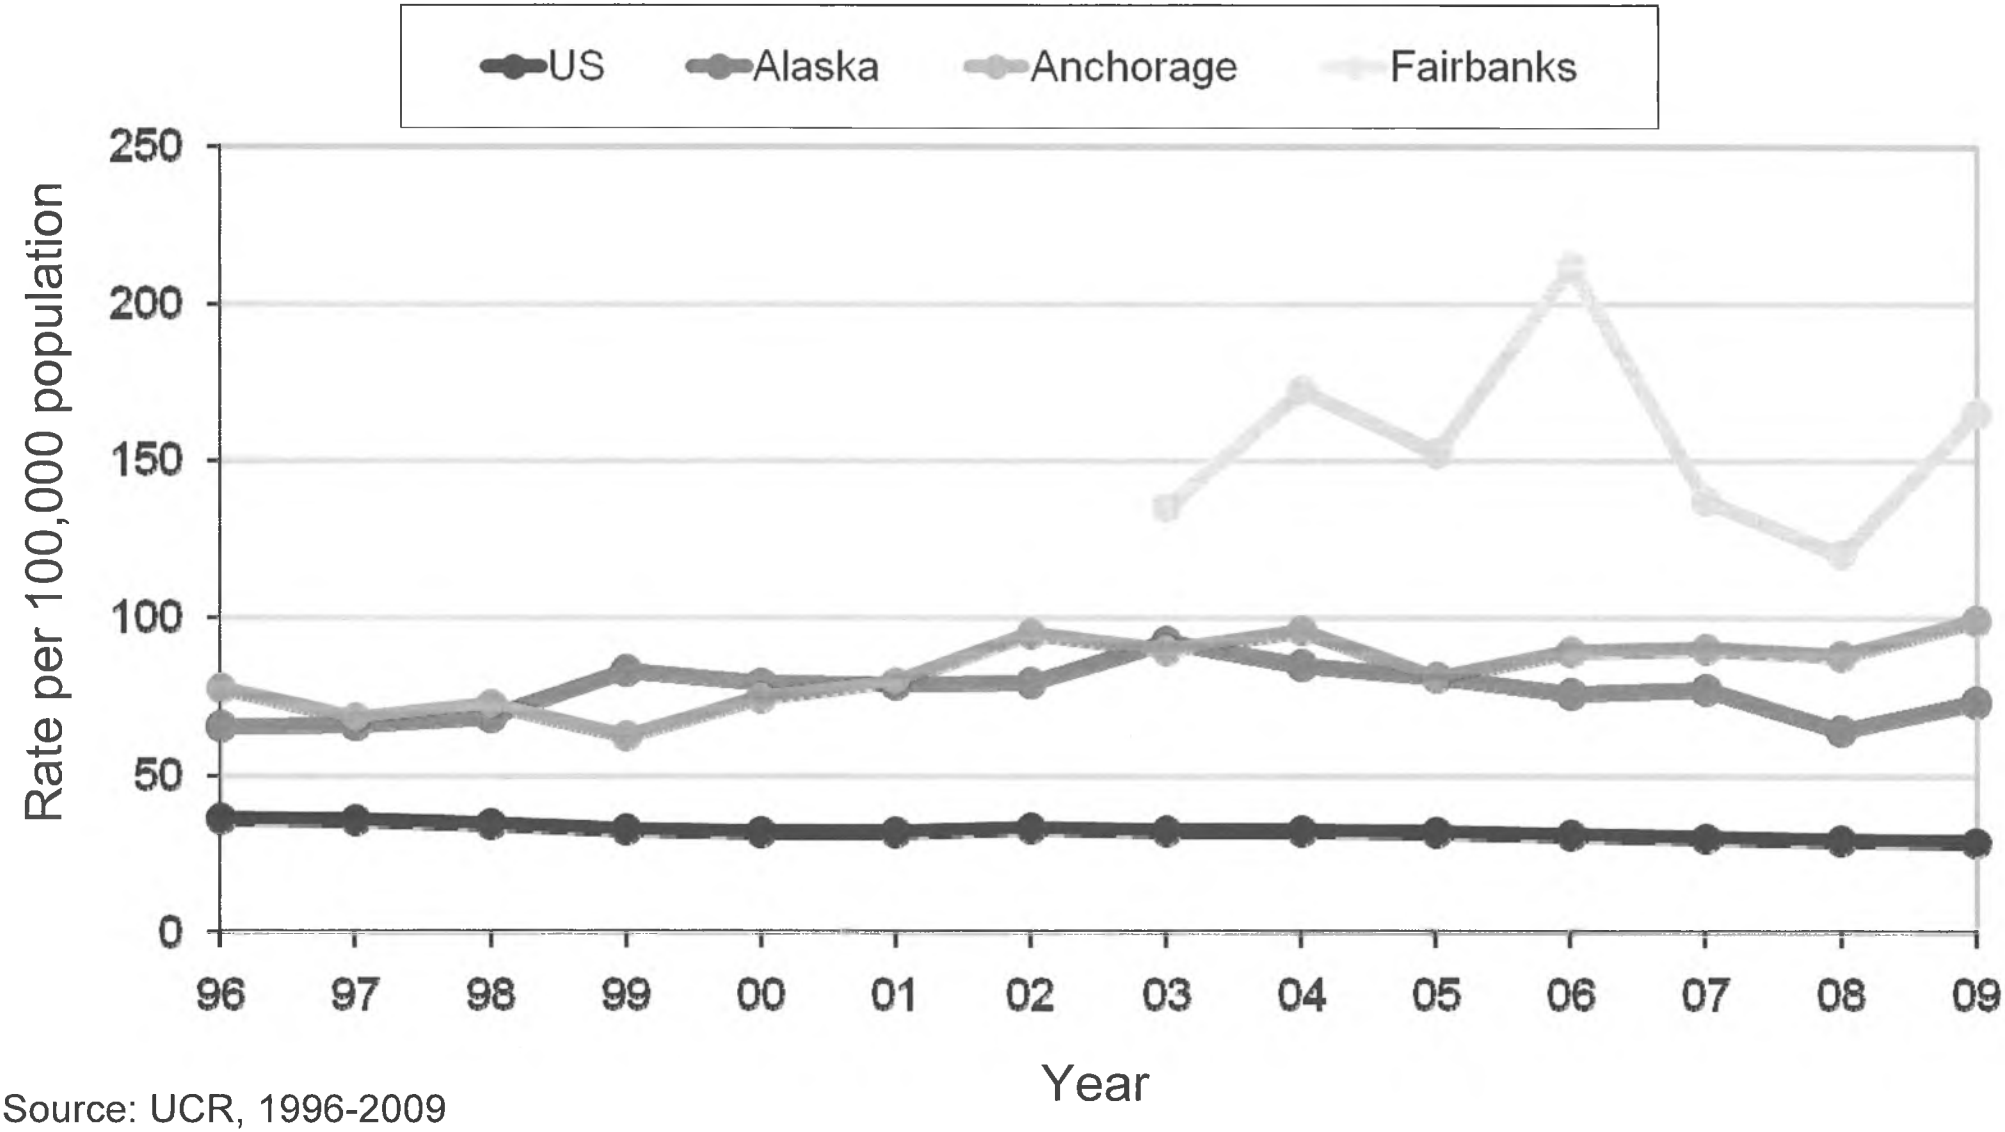
CDVSA
Council on Domestic Violence & Sexual Assault

Forcible Rape in Uniform Crime Reports

- **Forcible rape is defined as the carnal knowledge of a female forcibly and against her will**
- **UCR statistics show the number of forcible rapes reported to police each year**
- **Important limitations:**
  - Not all police agencies participate in the UCR program
  - These statistics only include rapes reported to police
  - These statistics exclude:
    - Statutory rapes
    - Incapacitated rapes
    - Rapes with male victims
    - Other sex offenses
    - Rapes with more serious offenses (e.g., homicide)

CDVSA
Council on Domestic Violence & Sexual Assault

UCR Forcible Rape Statistics: 1996-2009



Source: UCR, 1996-2009

CDVSA
Council on Domestic Violence & Sexual Assault

UCR Forcible Rape Statistics

	2007 to 2008	2008 to 2009
U.S.	-2.3%	-2.1%
Alaska	-16.9%	+12.3%
Anchorage	-2.7%	+11.6%
Fairbanks	-12.5%	+27.1%

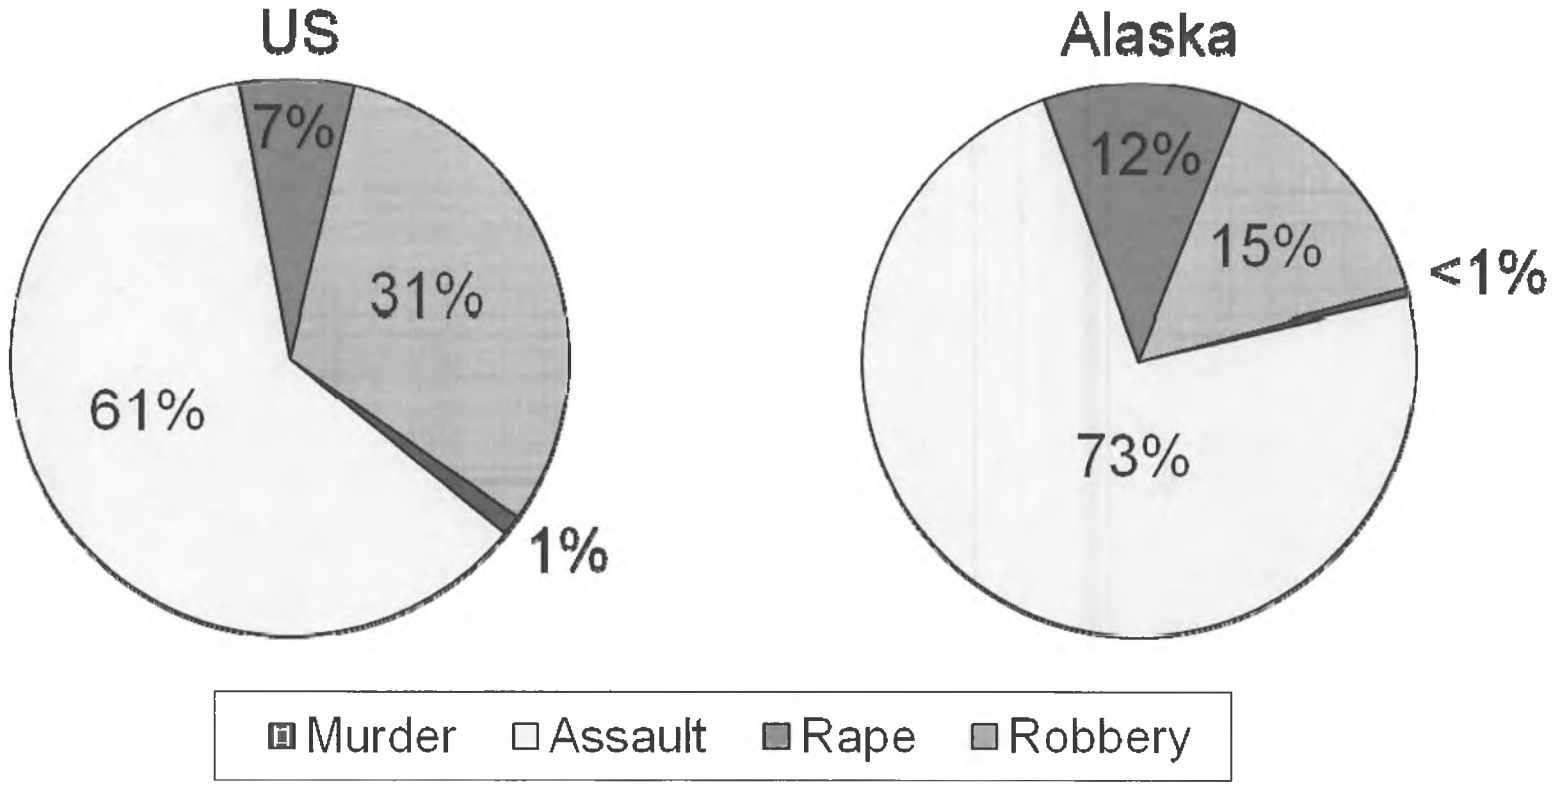
- Changes in UCR forcible rape statistics may be attributable to:
  - Changes in victimization rates,
  - Changes in reporting,
  - Changes in both victimization rates and reporting.

Source: UCR, 2007-2009

CDVSA
Council on Domestic Violence & Sexual Assault

Composition of Violent Crime: 2009

Forcible rape is still a more common form of violent crime in Alaska than in the U.S.



Source: UCR, 2009; Interpretation: 7% of violent crime reported to police in the US is attributable to rape; 12% of violent crime reported to police in Alaska is attributable to rape.

Council on Domestic Violence and Sexual Assault

Council Vision:

Alaska, free from domestic and sexual violence

Council Mission:

Provide safety for Alaskans victimized or impacted by domestic Violence and sexual assault through a system of statewide crisis intervention, perpetrator accountability and prevention services.

CDVSA
Council on Domestic Violence & Sexual Assault

FY10 Alaska Victimization Survey

- Designed to establish a baseline with statewide intimate partner and sexual violence estimates.
- Modeled after the National Intimate Partner and Sexual Violence Surveillance System (CDC, NIJ, DoD) and administered by RTI.
- Utilized a statewide random digit dial dual frame phone survey (both land and cell phone lines).
- Maximized respondent safety and confidentiality.

CDVSA
Council on Domestic Violence & Sexual Assault

Alaska Victimization Survey Questions

- Begin with less sensitive questions
- Use behaviorally specific questions:
  - *Avoid terms which respondents must define: "victim," "rape," "sexual assault," or "domestic violence." Instead, ask about behaviors and define when necessary. Example: "by vaginal sex, we mean that a man or boy put his penis in your vagina."*
- Attribute behaviors to perpetrators rather than respondents:
  - *Avoid asking "did you have vaginal sex with others? Instead, ask "did others have vaginal sex with you?"*
- Respondents were thankful for the survey (94% completed the entire 25 min. survey).

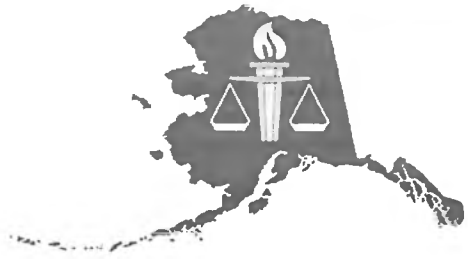
CDVSA
Council on Domestic Violence & Sexual Assault

Survey Respondents

- Survey respondents were limited to English-speaking adult women residing in a household with at least one land or cell phone line.
- Includes 871 adult women throughout Alaska, surveyed in May/June 2010.
- Sample provides an excellent representation of the Alaska population of adult women.
- Sampling weights were used to control for selection, non-response, and coverage.

CDVSA
Council on Domestic Violence & Sexual Assault

Survey Respondents



- Average age = 46 (ranges from 18 to 80+)
- 72% White, 15% Alaska Native
- 5% Hispanic
- 49% were married
- 35% had a high school degree or less
- 56% reported a household income <$50,000
- Geographically representative (68% are from Anchorage Municipality, Fairbanks North Star Borough, Matanuska-Susitna Borough)

CDVSA
Council on Domestic Violence & Sexual Assault

Intimate Partner Violence Definitions

- Intimate partner violence includes two measures:
  - *A – Threats of physical violence.*
  - *B – Physical violence.*
  - *Both include intimate partners only, defined as romantic or sexual partners.*
  - *Measures are then combined into a single 'intimate partner violence' composite.*
- Threats of physical violence by intimate partners:
  - *Have your romantic or sexual partners made threats to physically harm you?*

CDVSA
Council on Domestic Violence & Sexual Assault

Intimate Partner Violence Definitions

- Physical violence by intimate partners:
  - *Have your romantic or sexual partners…*
    - *Slapped you?*
    - *Pushed or shoved you?*
    - *Hit you with a fist or something hard?*
    - *Kicked you?*
    - *Hurt you by pulling your hair?*
    - *Slammed you against something?*
    - *Tried to hurt you by choking or suffocating you?*
    - *Beaten you?*
    - *Burned you on purpose?*
    - *Used a knife or gun on you?*

CDVSA
Council on Domestic Violence & Sexual Assault

Intimate Partner Violence Estimates

Lifetime Estimates	Estimated %	Estimated N (out of 247,238)
Intimate Partner Violence[1]	47.6%	117,685
A. Threats	31.0%	76,644
B. Physical Violence	44.8%	110,763

1 – Includes both threats of physical violence and physical violence by intimate partners.

- *47.6% of adult women in Alaska (or 117,685) experienced intimate partner violence in their lifetime,*
  - *31.0% (or 76,644) experienced threats of physical violence,*
  - *44.8% (or 110,763) experienced physical violence.*

CDVSA
Council on Domestic Violence & Sexual Assault

Intimate Partner Violence Estimates

Past Year Estimates	Estimated %	Estimated N (out of 247,238)
Intimate Partner Violence[1]	9.4%	23,240
A. Threats	5.8%	14,340
B. Physical Violence	8.6%	21,262

1 – Includes both threats of physical violence and physical violence by intimate partners.

- *9.4% of adult women in Alaska (or 23,240) experienced intimate partner violence in the past year,*
  - *5.8% (or 14,340) experienced threats of physical violence,*
  - *8.6% (or 21,262) experienced physical violence.*

CDVSA
Council on Domestic Violence & Sexual Assault

Sexual Violence Definitions

- Sexual violence includes two measures:
  - *A – Alcohol or drug involved sexual assault.*
  - *B – Forcible sexual assault.*
  - *Measures are not limited to intimate partners.*
  - *Measures are then combined into a single 'sexual violence' composite.*
- Alcohol or drug involved sexual assault:
  - *When you were alcohol or drug intoxicated and unable to consent, has anyone…*
    - *Had vaginal sex with you?*
    - *Made you receive anal sex?*
    - *Made you perform oral sex?*
    - *Made you receive oral sex?*

CDVSA
Council on Domestic Violence & Sexual Assault

Sexual Violence Definitions

- Forcible sexual assault:
  - *Has anyone used physical force or threats to physically harm you to…*
    - *Make you have vaginal sex?*
    - *Make you receive anal sex?*
    - *Make you perform oral sex?*
    - *Make you receive oral sex?*
    - *Put their fingers or an object in your vagina or anus?*
    - *Try to have vaginal, oral, or anal sex with you?*

CDVSA
Council on Domestic Violence & Sexual Assault

Sexual Violence Estimates

Lifetime Estimates	Estimated %	Estimated N (out of 247,238)
Sexual Violence[1]	37.1%	91,725
A. Alcohol or Drug Involved Sexual Assault	26.8%	66,260
B. Forcible Sexual Assault	25.6%	63,293

1 – Includes both alcohol or drug involved sexual assault and forcible sexual assault.

- *37.1% of adult women in Alaska (or 91,725) experienced sexual violence in their lifetime,*
  - *26.8% (or 66,260) experienced at least one alcohol or drug involved sexual assault,*
  - *25.6% (or 63,293) experienced at least one forcible sexual assault.*

CDVSA
Council on Domestic Violence & Sexual Assault

Sexual Violence Estimates

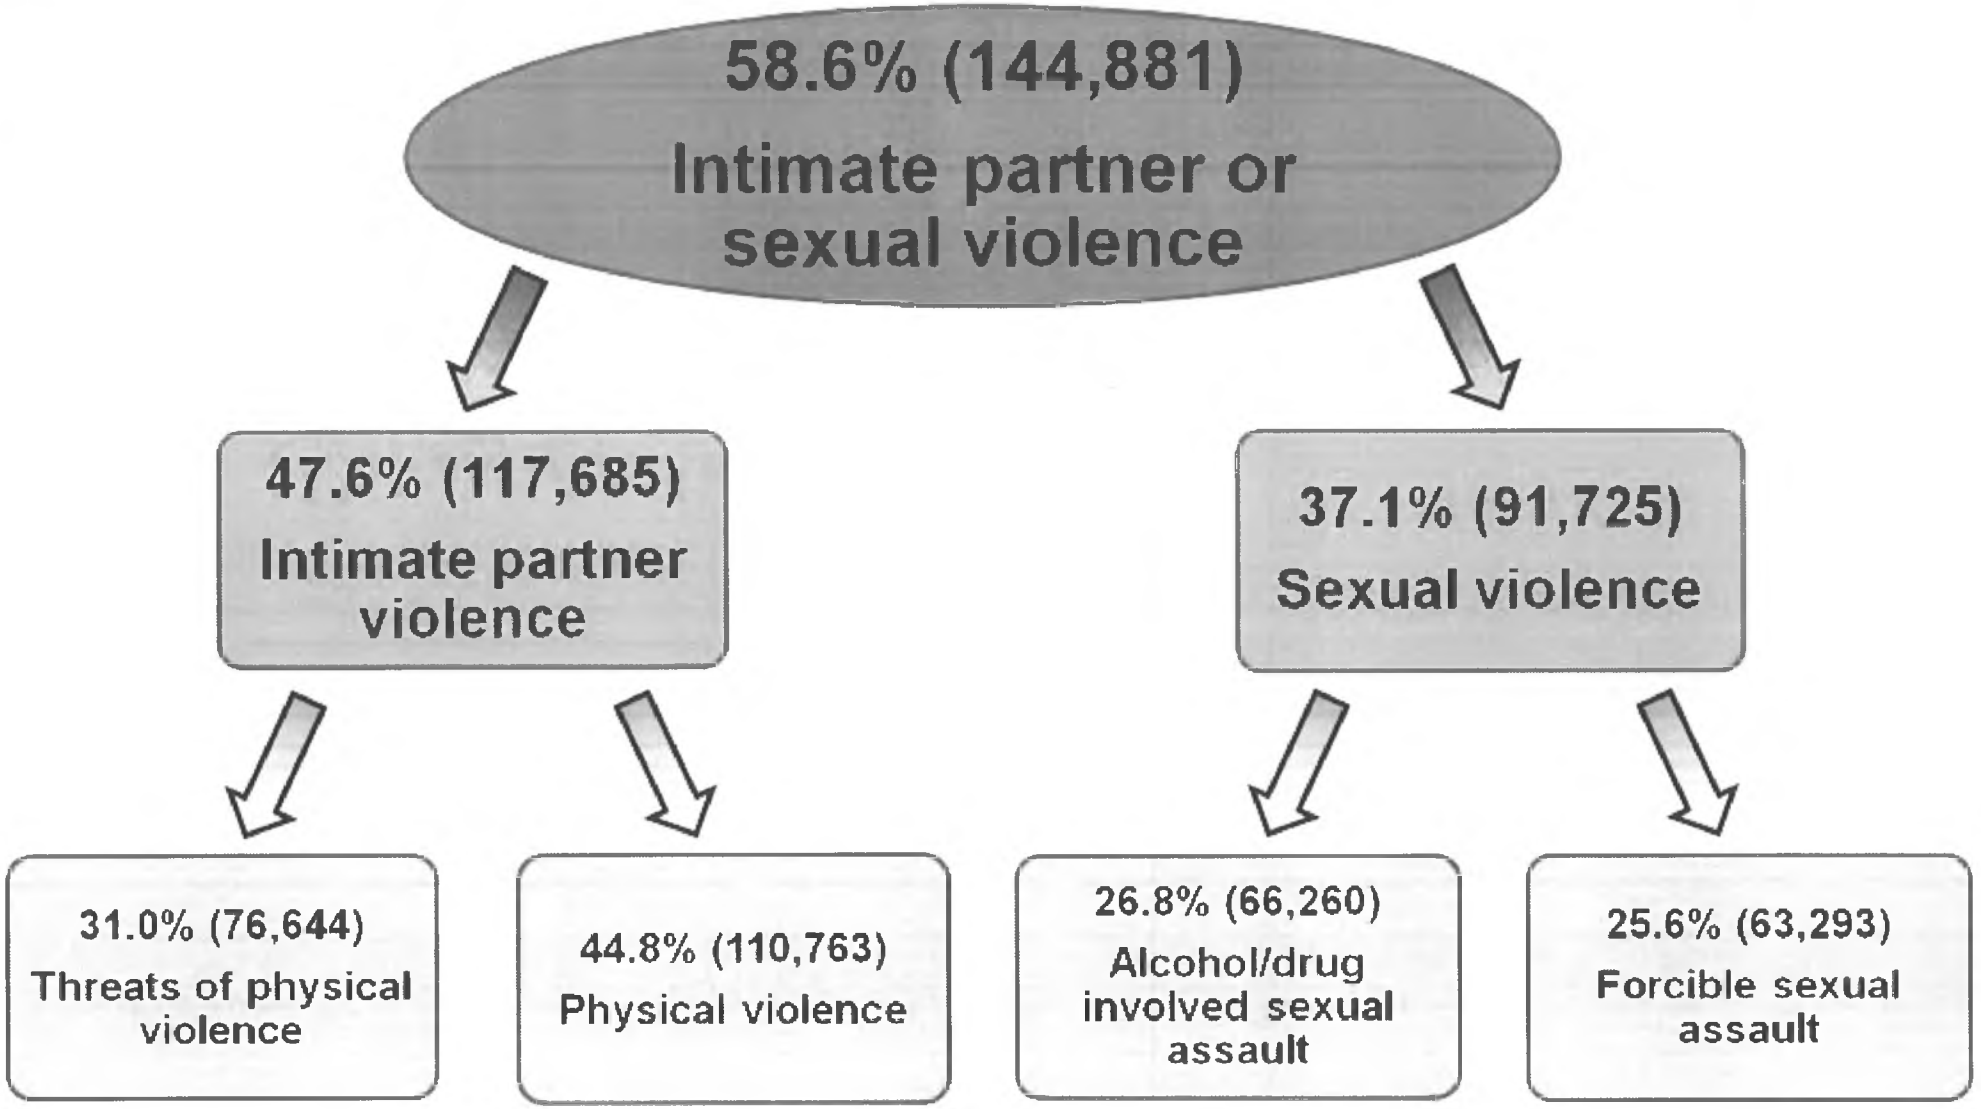
Past Year Estimates	Estimated %	Estimated N (out of 247,238)
Sexual Violence[1]	4.3%	10,631
A. Alcohol or Drug Involved Sexual Assault	3.6%	8,901
B. Forcible Sexual Assault	2.5%	6,181

1 – Includes both alcohol or drug involved sexual assault and forcible sexual assault.

- *4.3% of adult women in Alaska (or 10,631) experienced sexual violence in the past year,*
  - *3.6% (or 8,901) experienced at least one alcohol or drug involved sexual assault,*
  - *2.5% (or 6,181) experienced at least one forcible sexual assault.*

CDVSA
Council on Domestic Violence & Sexual Assault

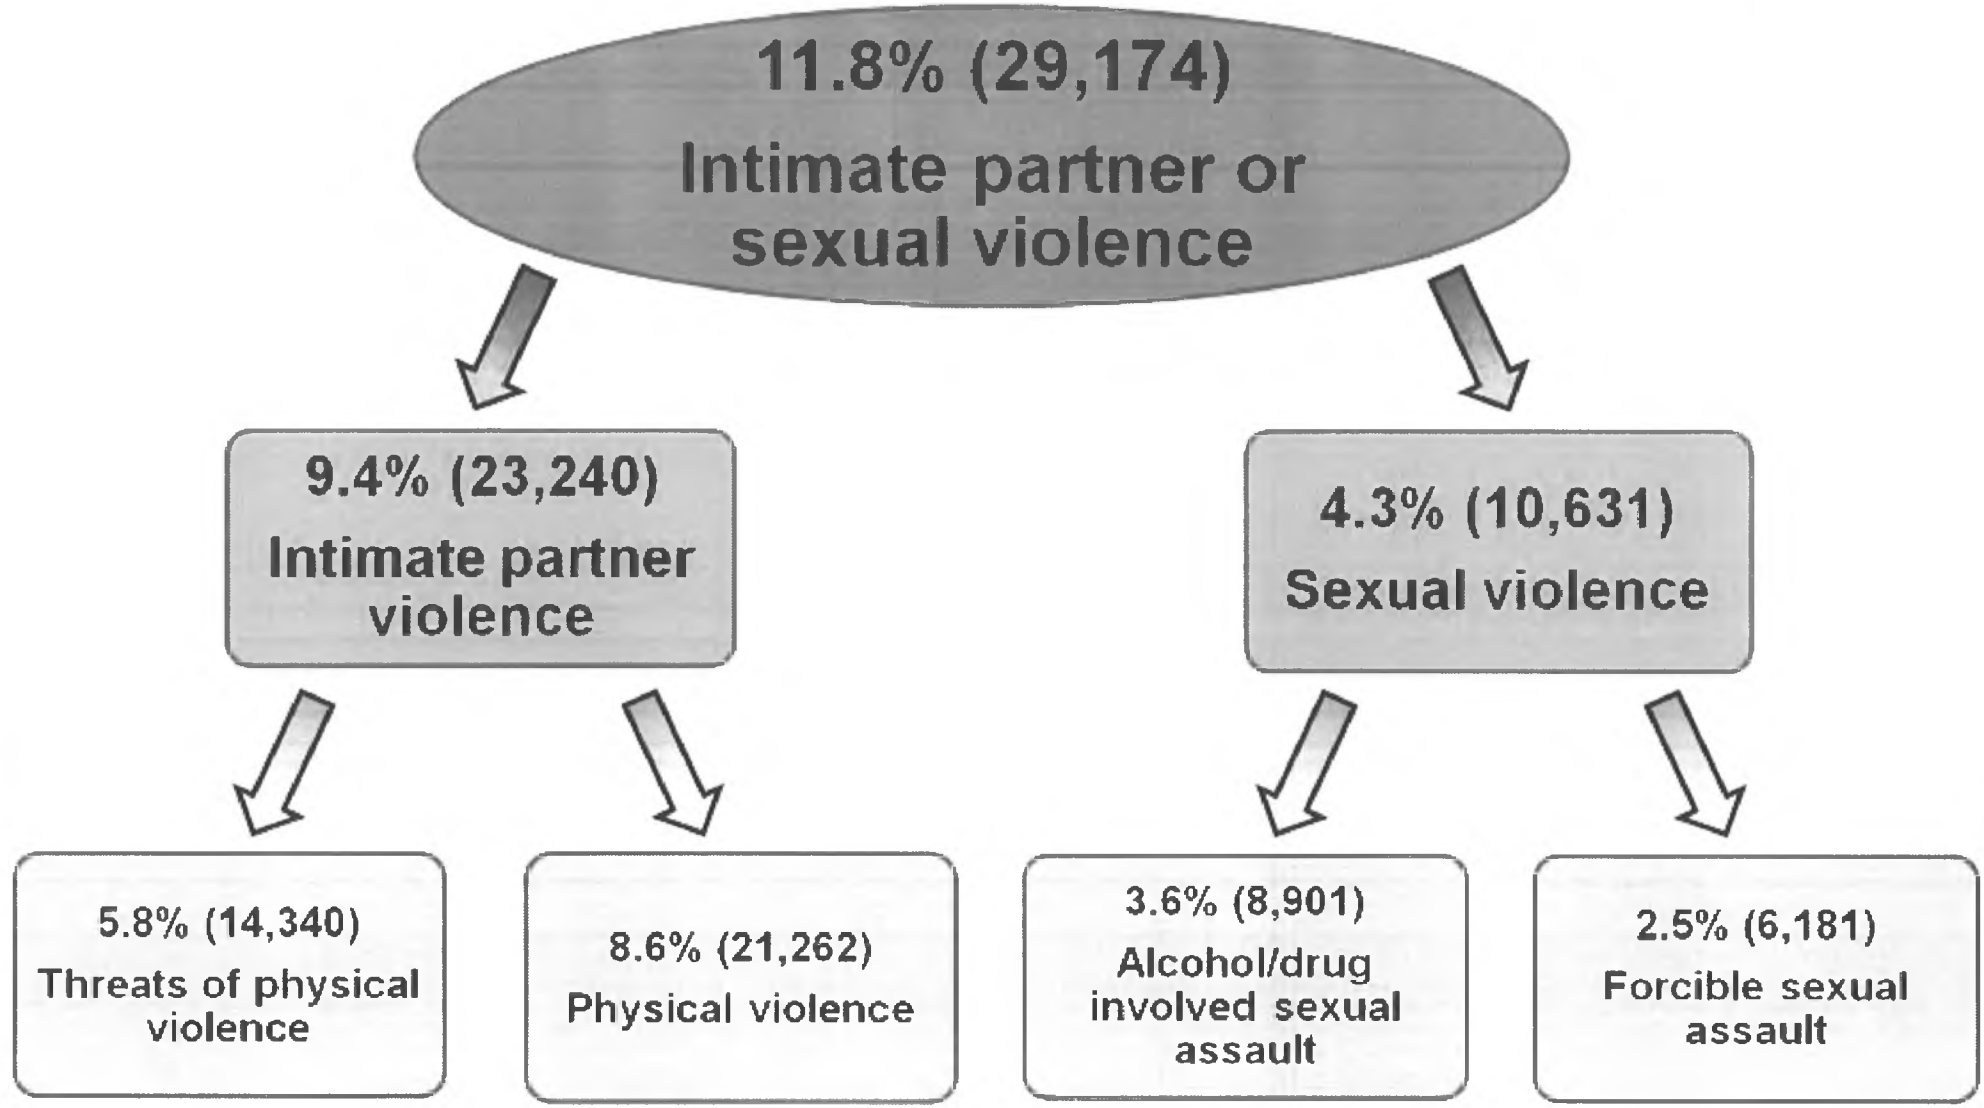
Summary of Lifetime Estimates



Note: percentages do not sum because some respondents experienced multiple victimizations.

CDVSA
Council on Domestic Violence & Sexual Assault

Summary of Past Year Estimates



Note: percentages do not sum because some respondents experienced multiple victimizations.

CDVSA
Council on Domestic Violence & Sexual Assault

Important Limitations

- Survey only provides a statewide average and masks regional differences. Regional estimates may vary significantly.
- Survey excluded non-English speaking women, women without phone access, and women not living in a residence (e.g., shelters, hospitals, homeless, prisons). Estimates may be significantly higher among women excluded from the survey.

CDVSA
Council on Domestic Violence & Sexual Assault

Important Limitations

- Measured *number of victims*, not *number of victimizations*. The number of victimizations is higher than the number of victims.
- Survey did not measure all forms of intimate partner violence or sexual violence. Estimates are therefore conservative.
- Estimates may also be conservative because of the continuing stigma of reporting intimate partner and sexual violence.

CDVSA
Council on Domestic Violence & Sexual Assault

A Special Thank You!

We sincerely thank the women who invested time and effort to participate in the 2010 Alaska Victimization Survey.

They re-lived horrendous experiences – experiences no one should be subjected to – to help the rest of us understand the extent of intimate partner and sexual violence in Alaska. Thank you!

CDVSA
Council on Domestic Violence & Sexual Assault

FY10 Alaska Victimization Survey

- Survey provides the first statewide, comprehensive, and behaviorally specific measures of violence against Alaskan women
- Establishes a new baseline for Alaska that can be repeated to monitor progress and document change
- National comparisons and comparisons with other states will soon be available
- Results will be used to guide policy and practice

CDVSA
Council on Domestic Violence & Sexual Assault

FY11 Alaska Victimization Surveys

- Surveys will soon begin in Anchorage and Fairbanks
- Surveys will include at least one rural location
- FY11 surveys will include two new questions:
  - Location of victimization (in/out of Alaska)
  - Child witnesses to violence
- FY11 surveys are again funded by the Council on Domestic Violence and Sexual Assault
- Continuing funding is needed and requested in the FY12 Governor's budget

Sexual Assaults Reported to Alaska State Troopers

André B. Rosay, Greg Postle, Darryl S. Wood, and Katherine TePas

Originally published in the *Alaska Justice Forum* 25(1–2): 1, 6–9 (Spring-Summer 2008).
http://justice.uaa.alaska.edu/forum/25/1-2springsummer2008/d_ast.html

For other articles and publications related to sexual violence and violence against women, see:
http://justice.uaa.alaska.edu/vaw/

Abstract: *This study examined 989 cases with a sexual assault or sexual abuse of a minor charge reported to Alaska State Troopers in 2003 and 2004, and excluded any sexual assault cases reported to local or municipal departments.*

- *Forty-eight percent of reports came from C Detachment (Western Alaska - Kodiak to Kotzebue), and 58% were reported from communities off the road system.*
- *In 69% of cases, the identity of at least one suspect was known. While most suspects (87%) were adults, most victims (73%) were juveniles. Sixty-one percent of victims were Alaska Native and 38% were White. Intra-racial victimizations were much more prevalent than inter-racial victimizations. The most common suspect was a friend or acquaintance of the victim, followed by a relative. Forty-three percent of suspects and 27% of victims had used alcohol.*
- *Sexual penetration occurred in 60% of assaults. Weapons were very rarely used. Most assaults occurred inside private residences. Nineteen percent of victims experienced general physical pain and 10% suffered bruising or swelling. Most victimizations were reported quickly to Troopers and Troopers were quick to respond. Ninety-six percent of victims were interviewed, with 48% interviewed on the day of the report and 80% interviewed within one week of the report.*
- *Forty-six per cent of reported cases were referred for prosecution, 60% of referred cases were accepted for prosecution, and 80% of accepted cases resulted in a conviction. Overall, however, only 22% of reported cases resulted in a conviction. In some cases, the conviction may be for a non-sexual offense. The highest level of attrition occurred from report to referral.*

Most research on sexual assault and the sexual abuse of minors in the state of Alaska has been focused on Anchorage; little has been known about the characteristics of these problems in other communities. The Justice Center, working with the Alaska State Troopers and the Alaska Department of Law, has completed the first thorough review of sexual assault incidents reported to Troopers in 2003 and 2004. The results delineate a first draft of the problem in Alaska's smaller communities, for the population primarily served by the Troopers.

The final sample in this study included 989 cases with a sexual assault or sexual abuse of a minor charge, reported to Troopers in 2003 and 2004, and closed by the time of the study. It is important to note that this study did not include any sexual assault cases reported to local or municipal departments. In addition, this study did not include cases specific to child pornography or online enticement of minors.

Report Characteristics

Almost half of the reports included in the study (48%) came from C Detachment, which covers western Alaska, from Kotzebue to Kodiak (Table 1). The C Detachment headquarters is in Anchorage, with the remaining posts in Aniak, Bethel, Dillingham, Emmonak, King Salmon, Kodiak, Kotzebue, Nome, and St. Mary's. The Bethel post handled 17 percent of all sexual assault and sexual abuse of minor cases reported to Troopers in 2003 and 2004. Thirty percent of the reports came from the Alaska Bureau of Investigation (ABI), whose Major Crime Unit is responsible for investigating sexual assaults and other person offenses statewide. The Alaska Bureau of Investigation has posts in Anchorage, Palmer, Fairbanks, and Soldotna. ABI posts in Palmer and Fairbanks handled 16 percent of all sexual assault and sexual abuse of minor cases reported to Troopers in 2003 and 2004. Together, C Detachment and ABI handled 78 percent of all reports. Forty-two percent of the reported cases originated in communities connected to the State of Alaska highway system, and 58 percent were reported from communities off the road system.

Most reports (86%) were made directly to troopers. The remaining 14 percent were reported to Village Police Officers, Village Public Safety Officers, or Tribal Police Officers. Few of the initial complaints (21%) were made by the victims themselves. Most initial reports to law enforcement (79%) were made by a third party. In over two-thirds of the cases (69%), the identity of at least one suspect was known.

The 989 cases in this study included a total of 1,645 sexual assault charges and 258 non-sexual assault charges (Table 2). The most common sexual assault charges were second degree sexual abuse of a minor, first degree sexual assault, second degree sexual assault, and first degree sexual abuse of a minor—all felonious assaults (Unclassified or Class B). Together, these four offenses accounted for 81 percent of all sexual assault charges. The most common non-sexual assault charges included assaults (in the

second, third, or fourth degree), burglary (in the first or second degree) and kidnapping. Together, these three offenses accounted for 50 percent of all non-sexual assault charges.

Despite the geographical distance that is often present between victims and Troopers, most victimizations were reported quickly to Troopers, and Troopers were quick to respond. Sixty-two percent of cases were reported within 72 hours, which, at the time of the study, was the benchmark for initiating a call to the Sexual Assault Response Team (SART) and collecting evidence with a sexual assault evidence kit. Seventy-seven percent of suspects were interviewed by Troopers (recall that the identity of the suspect was known in 69% of cases). Fifty-seven percent of suspect interviews occurred within one week of the report. Ninety-six percent of victims were interviewed, with 48 percent interviewed on the day of the report and 80 percent interviewed within one week of the report. Ninety-one percent of victim interviews were conducted in-person. On average, cases were closed 18 weeks after they were reported (Table 3). More specifically, 30 percent of cases were closed within three weeks, 50 percent were closed within eight weeks, and 75 percent were closed within 24 weeks.

Table 3. Case Closure Codes

Column percentages.

Closure code		Reports N	%
CA	Closed by arrest	316	32.0 %
CR	Closed, referred	255	25.7
CI	Closed by investigation	232	23.5
CU	Closed, unfounded	150	15.2
CD	Closed, declined	29	2.9
CE	Closed, exception	7	0.7
	Total	**989**	

Source of data: *AST data (2003–2004)*

A majority of cases (61%) were closed and referred for prosecution. These included cases closed by arrest (32%), closed and referred (26%), and closed but declined (3%). The remaining cases were closed after investigation (23%), closed as unfounded (15%), or closed by exception (1%). These latter groups of cases (excluding those closed by exception) were all closed without a suspect being arrested and in some cases without a suspect being identified. Cases that were closed as unfounded were more likely to be reported by third parties who were concerned that a sexual assault may have occurred.

Suspect and Victim Characteristics

From the 989 reports included in this study, we gathered information on 1,050 suspects and 1,082 victims. Most suspects (97%) were male and most (87%) were adults. Conversely, most victims (89%) were female and most (73%) were juveniles. The average age of suspects—29.2—was 13 years greater than the average age of victims—16.2 (Table 4).

Figure 1 displays the number of victim-suspect combinations on the horizontal axis, by victim age on the vertical axis, for five different suspect age groups, in horizontal bars. The top five age group combinations were (1) suspects 31 years old or older and victims 0 to 12 years old (N=137); (2) 16 to 20-year-old suspects and 13 to 15-year-old victims (N=113); (3) 21 to 30-year-old suspects and 13 to 15-year-old victims (N=89); (4) suspects 31 years old or older and victims 31 years old or older (N=76); and (5) suspects 31 years old or older and 13 to 15-year-old victims (N=75). Together, these five age group combinations accounted for 48 percent of the assaults for which both the age of the suspect and victim were known.

Source of data: *AST data (2003–2004)*

Most suspects were Native (59%) or White (37%) and most victims were also Native (61%) or White (38%) (Table 4). Intra-racial victimizations were much more prevalent than inter-racial victimizations, with 91 percent of Native victims assaulted by Native suspects and 84 percent of White victims assaulted by White suspects. Slightly less than half (43%) of the suspects had used alcohol; few (7%) had used drugs. Substance use was most frequent among suspects age 21 to 30, followed by suspects age 31 to 40 and suspects age 16 to 20. Among victims, 27 percent had used alcohol and 5

Source of data: *AST data (2003–2004)*

percent had used drugs. Substance use was most frequent among victims age 13 to 15, followed by victims age 21 to 30 and victims age 31 or older.

Most victims (all but one) were not homeless, nor were most suspects (99%). Most victims (71%) were not living with the suspect at the time of the assault, but overwhelmingly, the victims reported knowing the suspect in some fashion (98%) (Table 5). Only 2 percent of all victim-suspect relationships involved complete strangers. Nearly half (46%) involved friends or acquaintances, 35 percent involved relatives, 12 percent involved current or past intimate partners (including married couples), and 4 percent involved suspects that were in a position of authority over their victims. Together, friends, relatives, and intimate partners accounted for 94 percent of the victim-suspect relationships in the study sample.

The nature of the victim-suspect relationship varied substantially by the age of the victim. In particular, minor victims were substantially more likely be assaulted by relatives than adult victims. While only 17 percent of adult victims were assaulted by relatives, 41 percent of minor victims were assaulted by relatives. Minor victims were slightly less likely to be assaulted by friends or acquaintances (43%) than adult victims (57%) and slightly less likely to be assaulted by current or former partners (10%) than adult victims (17%).

Assault Characteristics

The five most common ways that victims and suspects came into contact with each other prior to the assault were by living together (32%); the suspect inviting the victim somewhere (20%); the suspect attacking the victim indoors (15%); the victim inviting the suspect somewhere (10%); and the victim and suspect meeting up with each other at a party (9%). Together, these five pickup methods were used in 86 percent of the assaults (Table 6).

The five most common pickup and assault locations were identical, differing only in terms of rank. These locations included mutually shared residences (25% of pickups and 25% of assaults), the suspect's residence (25% of pickups and 30% of assaults), the victim's residence (20% of pickups and 17% of assaults), someone else's residence (14% of pickups and 14% of assaults), and outdoors (10% of pickups and 7% of assaults). Private residences accounted for 84 percent of pickup locations and 87 percent of assault locations (Table 7).

The reported use of weapons by suspects was very rare in this sample of sexual assault cases. The one major exception, however, was suspects' use of their hands and/or arms to restrain or strike their victims during the assaults. In slightly less than one-third of the incidents, suspects used their hand and/or arms to restrict victims' movement or to assault victims physically beyond the sexual assault. Other weapons such as knives, guns, drugs, or blunt objects were reported to have been used in less than 1 percent of the incidents.

Sexual penetration, as defined by Alaska law, was documented in 60 percent of the assaults. On average, suspects engaged in just over two sexual acts (2.16) per assault (Table 8).

As a result of the assault, 19 percent of victims experienced general physical pain. In addition, 10 percent suffered bruising or swelling. Lacerations, bite marks, and bone fractures were rarely reported or documented (less than 3% of victims). Overall, very few victims received any type of emergency medical treatment for injuries suffered as a result of the sexual assault. Only 4 percent of victims received emergency medical care for genital injuries; 2 percent received emergency medical care for non-genital injuries; and less than 1 percent received emergency medical care for alcohol or drug intoxication.

Source of data: *AST data (2003–2004)*

of evidence, including physical evidence, electronic data, and photographic documentation.

Physical evidence from the victim (e.g., clothing) and victim sexual assault evidence collection kits were the most commonly collected types of evidence, gathered in 22 percent and 20 percent of cases respectively (Table 9). Suspect sexual assault kits were collected in only 7 percent of cases, and physical evidence from the suspect was gathered in only 13 percent of cases. In the majority of cases, there was no physical evidence recovered from the scene (84% of cases) and in 87 percent of cases, the scene was not photographed. Search warrants were obtained in 36 percent of cases. The most common warrants were for the victims' medical records (26% of cases) and glass warrants (13% of cases). Forensic exams of evidence were requested in only 16 percent of cases, with forensic DNA exams the most commonly requested (14% of cases).

Photographs of suspect injuries and the recovery of a weapon were the least common types of evidence collected (also the least available) during investigations.

Overall, evidence collection appeared to be somewhat low, although the statistics represent only what was included in the reports (Table 10). This is an important limitation with this study because evidence was counted as collected only if it was included in the report. This is particularly problematic with photographs. In some cases, photographs were taken, but were kept separately from the report (i.e., stored electronically but not printed to include with the report). In these cases, we counted the evidence as not collected because it was not found within the report. The statistics reported here therefore underestimate how frequently evidence was collected by Troopers.

Future analyses will be necessary to determine how these types of evidence impact legal resolutions. Two main factors determine the applicability and availability of evidence: one, the nature, or severity, of the reported incident; two, the timeliness of the report. Both factors impact what evidence is applicable and what evidence is available to be collected.

Legal Resolutions

We examined data from the Alaska Department of Law (DOL) to determine the legal resolution for cases in the study which were referred to DOL. We did not examine referrals to other agencies, such as the Division of Juvenile Justice. From the sample of 989 reported cases, 46 percent (N = 452) were referred to DOL for prosecution. Sixty percent of the cases referred to DOL (N = 273) had at least one charge accepted and filed with the court for prosecution (Table 11). Of those cases with at least one charge accepted by DOL, 80 percent resulted in a conviction. The highest level of attrition occurred from report to referral. Once cases were referred, the likelihood of at least one charge being accepted and resulting in a finding of guilt was quite high.

Additional analyses showed that attrition was less likely in cases with one or more

witnesses than in cases without witnesses and was less likely among rural cases than among urban cases (rural cases were defined as those emerging from locations not connected to the State of Alaska highway system). (See "Case Attrition of Sexual Violence Offenses: Empirical Findings" in this issue.)

From the 989 reports, a total of 1,171 charges were referred to DOL. Sixty-six percent of these charges were accepted by DOL. Thirty-one percent were declined with a required dismissal and 3 percent were declined without a required dismissal. The most frequently cited reasons for not accepting charges as referred were evidentiary reasons, with the two most common evidentiary reasons being inadequate corroboration and insufficient evidence.

Because evidentiary reasons were the most common reasons for not accepting charges that were referred and because evidence collection was somewhat low, it is imperative that we improve the capacity to collect evidence, when it is available. In "Sexual Assault Nurse Examinations in Alaska," also in this issue of the *Forum*, the importance of documenting non-genital injuries is discussed. In this study, victim injury photos were taken in only 55 percent of applicable cases. Again, this estimate may be low because some victim injury photos are kept separately from the reports. Nonetheless, there is room for improving evidence collection and resources should be provided for these improvements.

The findings presented here constitute a first look at the problem of sexual assault in smaller communities across the state—those served predominately by the Troopers. Further research will undoubtedly provide a more detailed picture.

http://justice.uaa.alaska.edu/vaw/

Abstract: *This report examined the legal resolutions for 1,184 contact sexual violence cases reported to Alaska State Troopers in 2003 and 2004, and excluded results from other law enforcement agencies. We determined whether cases were founded with an identifiable suspect, were referred to the Alaska Department of Law for prosecution, were accepted for prosecution, and if the case resulted in a conviction. We only examined whether any conviction on any charge was obtained. In some cases, the conviction may be for a non-sexual offense.*

- *Seventy-five percent of cases were founded with at least one identifiable suspect, 51% of founded cases were referred to the Alaska Department of Law for prosecution, 60% of referred cases were accepted for prosecution, and 80% of accepted cases resulted in a conviction on at least one charge. The greatest point of attrition was from the founding to the referral decision.*
- *For the most part, cases of Alaska Native victims were as likely, or even more likely, to be processed by the criminal justice system relative to the cases of non-Native victims.*
- *Cases of sexual violence in the most rural portions of Alaska had an equal or greater chance of being subject to legal sanction when compared with cases from Alaska's less rural areas, and were as likely or more likely to receive full enforcement and prosecution. Unfortunately, the percentage of founded cases that resulted in a conviction never exceeded 30%.*

The State of Alaska's response to violence in Alaska Native villages has faced increased scrutiny over the past decade, with criticism coming from a number of sources, including the Alaska Advisory Committee to the U.S. Commission on Civil Rights, the Alaska Inter-Tribal Council (in *AITC v. Alaska*, 110 P.3d 947, 2005), and, most recently, Amnesty International. In general, allegations have been made that the state discriminates on a geographic and racial basis in the provision of criminal justice services to Alaska Native villages that are isolated from the main road system. For example, in *AITC v. Alaska* (2005), plaintiffs argued that their equal protection rights were violated by the state's deployment of police resources in a discriminatory fashion that favored those living along the main highway system. Similarly, in a 2007 report on police and court responses to violence against American Indian and Alaska Native women (*Maze of Injustice: The Failure to Protect Indigenous Women from Sexual Violence in the USA*), Amnesty International singled out Alaska for what it considers to be a discriminatory, two-tiered deployment of police into the isolated areas of the state, said to be indicative of the state's "failing to exercise due diligence when it comes to sexual violence against . . . Alaska Native women." Amnesty International argued that with this two-tiered deployment of police resources, villages without a trooper post receive less effective police response than villages with a trooper post.

The evidence put forth in the many critical reports is based primarily upon the written and oral testimony of criminal justice agency personnel as well as Alaska Native crime victims, political leaders, and legal advocates. Although compelling, the case made against the state is largely anecdotal, failing to demonstrate a *systematic* lack of criminal justice system response to sexual violence against Alaska Natives. In this article we consider information gathered from the case files of the Alaska State Troopers (AST) and the Alaska Department of Law (DOL) to determine if there is an empirical basis for claims of unequal enforcement of sexual violence statutes. Specifically, we consider multiple decision-making points within the criminal justice process to compare the outcomes of cases involving Alaska Native victims with cases of non-Native victims.

The results presented below allow for an examination of case attrition of instances of sexual violence reported to AST and prosecuted by DOL. *Case attrition* is a term used to describe the process by which only a portion of offenses reported to the police are eventually dealt with through criminal prosecution. At each specific decision-making point the number of cases deemed worthy of official attention is reduced, with some cases carried forward for additional processing while others are no longer subject to prosecution.

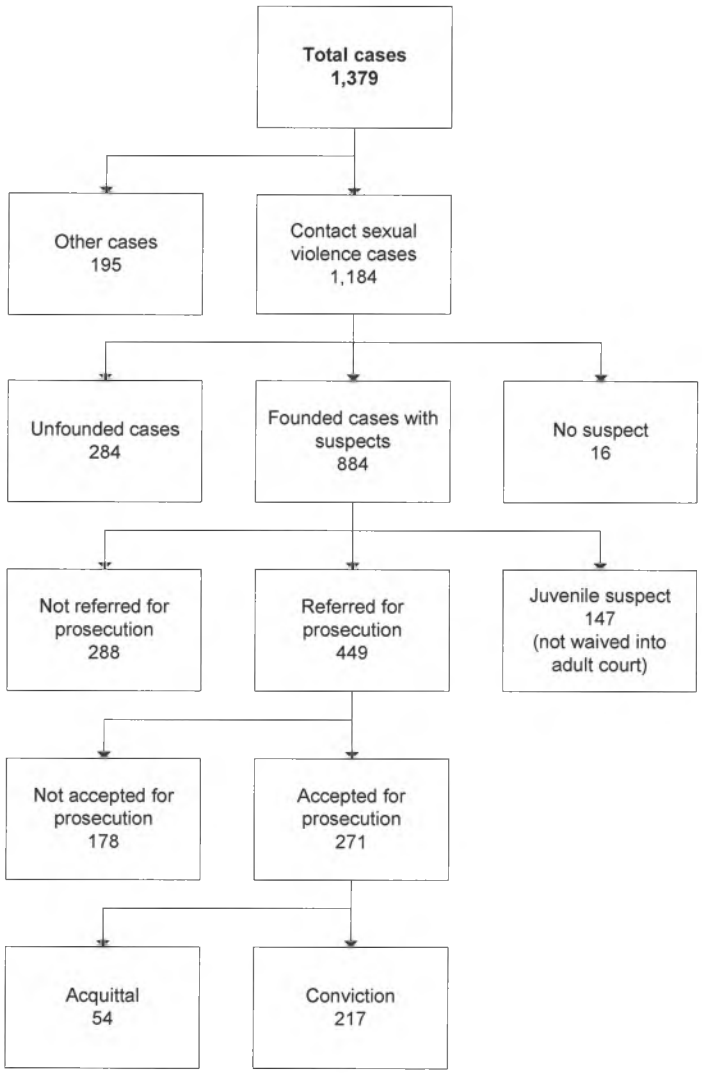
The attrition of sexual violence cases reported to AST in 2003 and 2004 is shown in Figure 1. Overall, there were 1,379 reports of sexual offenses made to AST during those two years. Of those original reports, 1,184 were contact sexual violence cases involving forcible rape, sexual assault, or sexual abuse of a minor. Among the other 195 cases were offenses that occurred outside of AST's geographic area of responsibility, offenses that occurred before 2003, offenses committed by children too young to form criminal intent, and non-contact sexual offenses such as indecent exposure or possession of child pornography.

In the next step in the process the police decide if the reported offense is *founded* (i.e., that it actually occurred) and if there is a suspect responsible for the offense to be subject to prosecution. Roughly three-fourths (74.7%) of the 1,184 reported contact sexual violence cases were deemed by AST to have occurred and to have at least one identifiable suspect.

After the police decide that an offense has indeed occurred and also identify a suspect, the next decision is whether to refer the case for prosecution in criminal court. Half (50.8%) of the 884 founded cases with identified suspects were referred to DOL for prosecution in adult criminal court. The

© 2009 Justice Center, University of Alaska Anchorage

Figure 1. Processing of Sexual Violence Cases Reported to the Alaska State Troopers, 2003–2004



cases excluded from the analysis at that point included those juvenile cases that were not waived into adult court (a sixth—16.6%—of founded cases with suspects) and those that were not referred for reasons such as a lack of evidence or uncooperative victims (a third—32.6%—of founded cases with suspects).

Once referred by the police, prosecutors decide which cases to prosecute; three-fifths (60.4%) of contact sexual violence cases referred by AST to DOL were accepted for prosecution. Cases that are prosecuted eventually result either in a conviction or an acquittal. Of the cases of sexual violence accepted for prosecution by DOL, most (80.1%) resulted in a conviction. Ultimately, only 18 percent of reported cases, 25 percent of founded cases with suspects, and 48 percent of cases referred by AST to prosecution resulted in a conviction—i.e., guilty plea or conviction at trial.

Apart from this general consideration of the winnowing of reported sexual violence offenses as they proceed through the system, it is also possible to examine relative case attrition of offenses involving Alaska Natives versus those of non-Natives. Doing so allows for a determination of the extent to which there is systematic under-enforcement of laws against contact sexual violence in cases with Alaska Native victims. Greater degrees of attrition of Alaska Native victims' cases when compared to that for non-Native victims would lend credence to the anecdotal evidence used in reports critical of the state's provision of policing and prosecution to Alaska Native communities.

Comparisons of attrition of cases of sexual violence are made on a number of levels. First, case attrition for offenses involving Alaska Native victims is compared with attrition of non-Native victims' cases. Next, case attrition in communities located in the rural regions of Alaska is compared with case attrition in communities located outside of the state's rural regions. Finally, the attrition of cases that occurred in isolated villages is compared with the attrition of cases that occurred in less-isolated locations. At each of these levels comparisons are made on the basis of the total of all contact sexual violence offenses, and for rape/sexual assault and sexual abuse of a minor (SAM) separately. Four different decisions are considered: the Troopers' decision on whether reported cases are founded; the Troopers' decision to refer founded cases for prosecution; the prosecutors' decision

to accept referred cases for prosecution; and the final court decision in cases accepted for prosecution—i.e., whether a conviction was obtained. These results are presented as a comparison between Alaska Native and non-Native victims in terms of the number and percentage of cases that were chosen to be carried forward in the criminal justice process. The results of chi-square tests of statistical significance—a test which measures the likelihood that differences in the percentage of cases carried forward are the result of chance alone and not indicative of an underlying association—are also provided.

Differences in the processing of cases involving Alaska Native and non-Native victims are shown in Table 1. For the most part, these results indicate that the cases of Alaska Native victims are as likely, or are even more likely, to be processed by the criminal justice system relative to the cases of non-Native victims. For the total of all sexual violence offenses, cases involving Alaska Native victims were just as likely as cases with non-Native victims to be founded or to result in a conviction and they were more likely to be referred by AST to prosecutors and to be accepted by DOL for prosecution. Considering only cases involving the offenses of rape and sexual assault, there were statistically significant differences between Alaska Native and non-Native victims at the founding decision and at the decisions to refer cases and accept cases for prosecution; at each of these decision-making points the cases of Alaska Native victims *were more likely* to be carried forward. In terms of SAM cases, those cases involving Alaska Native victims were less likely to be founded. Otherwise, none of the differences in the processing rates of Alaska Native and non-Native victims' SAM cases were statistically significant.

A second set of analyses was conducted to consider the processing of cases occurring in the largely Alaska Native communities of the most rural areas of the state. The dichotomy for these analyses was drawn between cases occurring either inside or outside of what the Department of Health and Social Services in its Alaska Behavioral Risk Factor Surveillance System has termed the "Bush Stratum"—comprising the boroughs and census areas north and west of the Railbelt. Comparisons of case processing from these bush communities with cases from non-bush communities are reported in Table 2. These results indicate that cases of sexual violence that occur in the most rural portions of Alaska have, depending upon the decision, an equal or greater chance of being subject to legal sanction when compared with cases from Alaska's less rural areas. Similar to what was found when comparing attrition in Alaska Native victims' cases versus non-Native victims' cases, victims from bush communities of sexual violence in general and of rape/sexual assault *were more likely* to have their cases referred to prosecutors by AST and to have DOL accept those cases for prosecution.

The final set of analyses considers attrition of cases coming from the most isolated villages compared to places that are less isolated. For these analyses a village was considered isolated if it lacked a local AST post or if Troopers were unable to reach the village by automobile. The premise of this dichotomy is that travel to villages that cannot be reached by highway is more difficult and, because of that hindrance, it could be expected that conducting investigations would be more difficult—thus increasing case attrition. From the perspective behind the allegations against the state, it is in these disconnected villages that lack a locally-posted police agency certified by the Alaska Police Standards Council where the greatest disparities in the enforcement and prosecution of cases of sexual violence would be expected to occur.

The results comparing attrition of cases occurring in villages defined as isolated with cases occurring in places more easily reached are presented in Table 3. As with the previously discussed comparisons of cases, case attrition in isolated villages is no more prevalent than in places that are better connected to AST posts. The results presented in Table 3 indicate that cases from isolated villages are instead *actually more*

Table 3. Attrition of Sexual Violence Cases Reported to Alaska State Troopers, Isolated vs. Non-Isolated Communities, 2003-2004

	Total sexual violence					Rape/sexual assault					Sexual abuse of a minor				
	Isolated		Non-Isolated			Isolated		Non-Isolated			Isolated		Non-Isolated		
Decision	N	%	N	%		N	%	N	%		N	%	N	%	
Founded	437	76.4 %	463	75.7 %		230	81.9 %	200	74.9 %	*	207	71.1 %	263	76.5 %

likely to receive full enforcement. Cases of rape/sexual assault in isolated villages *were more likely to be founded, more likely to be referred for prosecution by AST, and more likely to be accepted for prosecution by DOL.* Likewise, across the total of all sexual violence offenses, cases from isolated villages were referred and accepted for prosecution at a rate *greater than* cases from non-isolated locations. No differences were found in the attrition of SAM cases.

Overall, the results presented in this article provide little empirical support for allegations of discrimination in the processing of sexual violence cases by AST or DOL on a racial or geographic basis. With the exception of SAM cases against Alaska Native victims being less likely to be founded, *cases of sexual violence against Alaska Native victims were just as likely or actually more likely to receive full enforcement and prosecution when compared with cases against non-Native victims.* On the basis of geography, cases occurring in locations with predominately Alaska Native populations believed to be underserved by AST were actually more likely to be dealt with by AST or DOL when compared with cases from outside those geographic areas. Our results indicate that the anecdotal evidence found in reports critical of the state's response to sexual violence against Alaska Natives does not accurately reflect the actual processing of cases of rape, sexual assault, and SAM reported to AST and prosecuted by DOL. Ultimately, these results do not support claims of unequal enforcement by the state in response to the victimization of the Alaska Native population. However, Alaska continues to experience high rates of forcible rape, and the prosecution of sexual violence continues to be difficult: the percentage of AST-founded cases that resulted in a conviction never exceeded 30 percent.

Revisiting Alaska's Sex Offender Registration and Public Notification Statute

Deborah Periman

In Alaska and throughout the country sex offender registration requirements have become more inclusive. Almost all convicted sex offenders now must register for very extended periods; the registry is available over the Internet; and more details on the current status of the offender are available to the public. The intent of the registries is to protect the public from convicted offenders, but it can be argued that the increasingly stringent demands placed on offenders may, in fact, be counterproductive. The severity of the registration requirements may prohibit the rehabilitation of offenders and their reintegration into the community, and the increasing burden on law enforcement to monitor and maintain very broad registries may prevent police from focusing on the more serious sexual predators.

Abstract: *This article examines the background and judicial interpretation of Alaska's sex offender registration and public notification statute, the new federal requirements for state sex offender registries and public notice under the Adam Walsh Child Protection and Safety Act, and weaknesses in both Alaska's existing system and the enhanced requirements of the new federal legislation. These weaknesses include:*

- *Absence of incentives for offenders to seek therapy or treatment;*
- *Failure to provide for individualized risk assessment that would differentiate between those offenders who pose a negligible or very low risk of re-offending from those who pose a continuing public risk – a failure that causes unwarranted marginalization of low risk offenders and diminishes the overall effectiveness of the public notification system;*
- *Public notice provisions so broad as to substantially impede offenders' reintegration into their families, their community, and the workforce, and potentially chilling family reporting;*
- *Internet posting requirements associated with severe stigmatization and public harassment, and concomitant emotional destabilization and isolation of offenders – factors that may actually increase the risk of recidivism and community harm.*

Because the Walsh Act conditions state receipt of Byrne Grant funds on compliance with its enhanced registration and notice requirements, there is little Alaska can do to remedy the above weaknesses and still remain eligible for Byrne funds. However, the article concludes with a recommendation for limited changes to our statute that would minimize, to the extent possible, its adverse effect on offenders' ability to find employment; omit the lowest risk offenders from internet posting requirements; and provide those incentives for treatment permissible under the Walsh Act.

Author's Note

This is an extremely abbreviated look at a complex federal initiative and at how specified aspects of the initiative relate to weaknesses in Alaska's sex offender registry. Issues of federalism and due process are not addressed, nor does this piece attempt to identify how the statutory elements of sex and kidnapping offenses under Alaska's code fit within the Walsh Act offender tiers. Finally, the reader should draw no inferences regarding Alaska's overall level of compliance with the Walsh Act requirements. A longer version of this piece, with complete legal citations, is available on the Justice Center website at http://justice.uaa.alaska.edu/workingpapers/.

Background

The Alaska Sex Offender Registration Act, which was enacted in the wake of extensive publicity over the tragic rape and murder of Megan Kanka in New Jersey, rests on specific legislative findings that (1) "sex offenders pose a high risk of reoffending after release from custody" and (2) release of information about sex offenders to the public "will assist in protecting public safety" (1994 Alaska Sess. Laws 41, § 1).

The state legislature's findings were premised on testimony reflecting the commonly held belief that sex offenders as a class are different from other offenders—that they will inevitably reoffend and that they are not receptive to treatment. In light of this testimony, the legislature did not attempt to distinguish among types of offenders or to evaluate which offenders were most likely to recidivate. Instead, it simply divided all offenders into two groups, aggravated and nonaggravated offenders, based on the severity of the offense. These two categories cover offenders ranging from the 18-year-old who has consensual sex with a 14-year-old to the perpetrator of a violent rape and murder.

The registration statute that emerged was, at the time of its enactment, one of the most stringent in the country. In a 2003 case closely watched by state and federal lawmakers, the U.S. Supreme Court upheld its terms against an *ex post facto* challenge. Justice John Paul Stevens, dissenting, summarized the statute's effect:

> In Alaska, an offender who has served his sentence for a single, nonaggravated crime must provide local law enforcement authorities with extensive personal information—including his address, his place of employment, the address of his employer, the license plate number and make and model

© 2009 Justice Center, University of Alaska Anchorage

> of any car to which he has access, a current photo, identifying features, and medical treatment—at least once a year for 15 years. If one has been convicted of an aggravated offense or more than one offense, he must report this same information at least quarterly for life. Moreover, if he moves, he has *one* working day to provide updated information. Registrants may not shave their beards, color their hair, change their employer, or borrow a car without reporting those events to the authorities. Much of this registration information is placed on the Internet. In Alaska, the registrant's face appears on a webpage under the label "Registered Sex Offender." His physical description, street address, employer address, and conviction information are also displayed on this page. (*Smith v. Doe,* 538 U.S. 84, 111 (2003))

At the time of its passage, Alaska's statute far exceeded the minimum requirements imposed on the states by the federal Jacob Wetterling Act. This legislation, adopted in 1994, required every state to enact a sex offender registration program meeting certain minimum guidelines or face a reduction in federal grant funding for law enforcement (42 U.S.C.A. § 14071 (West 2008)).

Unlike Alaska, many states attempted to tailor the reach of their registration statutes to the actual risk posed by individual offenders. The Connecticut legislature, for example, adopted a system using individualized clinical assessment to determine which offenders would be subject to registration requirements. Offenders were required to register only if such assessment demonstrated that they were found to pose a high risk of recidivism. This type of classification system has come to be known as an *offender-based* system, reflecting the emphasis on the individual. Alaska's system, in contrast, is *offense-based*, with classification resting solely on the conviction and no individual risk assessment undertaken.

Alaska was one of the relatively few states to require Internet dissemination of registration information for all offenders. Other states attempted to strike a balance between the stigmatization and collateral consequences of public notification and the risk of recidivism. New Jersey, for example, classified its offenders by risk and required no public disclosure for those who posed the least risk of reoffending, a percentage estimated at 45 percent of the entire sex offender class. Widespread disclosure was required only for those at the highest risk of reoffending (approximately five percent) of the whole.

Some of the flexibility afforded states under the original Wetterling Act was reduced through subsequent amendment; the flexibility to utilize individualized risk assessments will disappear almost completely as the provisions of the Adam Walsh Child Protection and Safety Act, PL 109-248, become binding on the states. This act represents an extensive revision and expansion of federal sex offender legislation. One of its many purposes is to standardize and increase minimum registration requirements nationwide. It imposes on the states highly detailed requirements for sex offender registration and public notification—requirements the states must in general implement by July 27, 2009. A state's failure to meet the implementation deadline will trigger a mandatory ten percent reduction in Byrne Justice Assistance Grant funding.

Key provisions of the Walsh Act include broadening the classes of sex offenses for which registration is required and extending it to cover juvenile offenses; requiring covered offenders to consistently remain registered in any jurisdiction in which they live, work, or attend school; expanding the scope of registration information required; imposing a national requirement for periodic in-person appearances by registrants; standardizing the required duration of registration; and widening the availability of information concerning registrants available to the public through required Internet posting. The act adopts an offense-based, three-tiered classification for offenders. It does not authorize the states to implement an offender-based classification using individualized risk assessment, nor, with limited exceptions, does it authorize the states to implement ameliorative programs that would allow offenders to avoid or shorten registration based on treatment and rehabilitation. The net effect of the new federal legislation will be to bring all cooperating states closer to Alaska's registration and publication requirements.

Alaska's Statute and its Federal Counterpart Rest on Disproved Assumptions

The myth of the incorrigible sex offender, all but guaranteed to reoffend, has been largely refuted. A study by the Alaska Justice Statistical Analysis Center of sex offenders released from Alaska corrections facilities in 2001 found that non-sex offenders were more likely to be rearrested than sex offenders. (See "Recidivism of Alaska Sex Offenders Released from Corrections Facilities in 2001" in this issue of the *Forum*.) With respect to sex crimes specifically, the study found no statistically significant difference between the rates at which sex offenders were rearrested for a new sex crime and the rates at which non-sex offenders were arrested for a first sex crime. These patterns are consistent with the results of studies elsewhere finding that sex offenders as a class are somewhat less likely than other categories of offenders to re-offend.

Moreover, recent studies conclude that treatment programs are, in fact, effective in reducing the overall rate of recidivism for many offenders. A Canadian study published in late 2007, for example, found that high-risk sex offenders who participated in a community-based treatment project had lower rates of reoffending of any type than did offenders who did not participate (Wilson, et al., 2007). Although sex offender treatment remains a controversial issue, these results are consistent with the general findings of studies conducted over the last decade or so—studies that refute the earlier belief that sex offenders are impervious to treatment.

The foregoing is particularly true with respect to juvenile offenders. Although offenders as young as 14 are subject to registration and public notification requirements under the Walsh Act, research establishes that recidivism rates for juvenile sex offenders are substantially lower than the rates for other types of juvenile offenders. Juvenile offenders have, in addition, proven highly amenable to treatment.

Problems with the Existing System

The Walsh Act and its antecedents rest on the premise that state registration and notification systems advance public safety, but empirical evidence disproves this premise. Studies show that after more than ten years of national registration and public notice, sex offender registries have made no discernable difference in sex offender recidivism rates (Tewksbury & Lees, 2007). (Although the registries have not curbed the commission of sex offenses, it should be noted that law enforcement officials in Alaska do view the offender database as a useful investigatory tool after an offense occurs.)

The weaknesses of Alaska's registration and notice system are well documented. Supreme Court Justice Ruth Bader Ginsberg, in a dissenting opinion in *Smith v. Doe,* 538 U.S. 84, 116–117 (2003), put it simply—the statute is excessive in relation to its purpose:

> The Act applies to all convicted sex offenders, without regard to their future dangerousness. And the duration of the reporting requirement is keyed

> not to any determination of a particular offender's risk of reoffending, but to whether the offense of conviction qualified as aggravated." Moreover, "the Act makes no provision whatever for the possibility of rehabilitation: offenders cannot shorten their registration or notification period, even on the clearest demonstration of rehabilitation or conclusive proof of physical incapacitation. However plain it may be that a former sex offender currently poses no threat of recidivism he will remain subject to long-term monitoring and inescapable humiliation.

Of course, no matter how excessive the reach of the statute in relation to its goals, many would argue that the disabilities imposed on low-risk or rehabilitated offenders are warranted if the system serves to protect even one child. The difficulty, however, is that Alaska's registration and notification system, and others like it, do not demonstrably make the public safer. To the contrary, they are likely to trigger a host of consequences antithetical to the public interest.

Unemployment, Instability and Enhanced Risk of Recidivism

After ten-plus years of national experimentation with sex offender registries, the destabilizing effects of being listed on a sex offender registry are well understood. They include profound humiliation and social isolation, loss of employment and housing, and destruction of family ties. Registrants and their families have experienced vigilantism in the form of harassment, threats of violence, physical attacks and arson.

In *Doe v. State*, 92 P.3d 398, 410 (Alaska 2004), the Alaska Supreme Court made note of the severity of these consequences. Citing examples of Alaska registrants who had lost their jobs, been forced to move their residences, and received threats of violence, the Court observed that "the potentially destructive practical consequences that flow from registration and widespread governmental distribution of disclosed information" are grave. "[O]utside Alaska, there have been incidents of suicide by, and vigilantism against, offenders on state registries, and offenders listed on registries often have unique difficulties locating places to reside and work. Offenders are sometimes subjected to protests and group actions designed to force them out of their jobs and homes." Registrants have suffered neighborhood rallies staged to protest their presence, bricks thrown through windows, and harassing calls to employers.

Of these negative consequences, employment difficulties are perhaps most significant. The Ninth Circuit Court of Appeals concluded that Alaska's system of putting offenders' employment information on the Internet is likely to make registrants "completely unemployable" (*Doe v. Otte*, 259 F.3d 979, 988 (9th Cir. 2001), *rev'd.*, *Smith v. Doe*, 538 U.S. 84 (2003)). The system "creates a substantial probability that registrants will not be able to find work, because employers will not want to risk loss of business when the public learns that they have hired sex offenders." The court cited the experience of one Alaska business owner who suffered community hostility and damage to his business after print ads from the Alaska sex offender registry web site were publicly distributed and posted on a bulletin board.

It may be tempting to dismiss these adverse consequences as the just result of the offender's own conduct, but these consequences also disserve the community in several important ways. First, study after study has identified stress as one of the antecedents to sex offender relapse. Chronic torment and hostility from the public, fractured social relationships, lack of stable housing, and unemployment are likely to cause the registered offender heightened stress, anxiety and resentment, all of which may erode an offender's self-restraint (Cohen & Jeglic, 2007). Lack of social support, in particular, and the accompanying stress on the offender has been identified as a key trigger in sex offense recidivism (Levensen & Cotter, 2005).

These problems are particularly acute for juvenile offenders. Young persons subject to registration have been harassed at school; some have dropped out. The stigma associated with the public notice system causes a loss of social networks, which in turn increases the risk of anti-social behaviors.

The extreme length of the registration period may exacerbate these problems. Under the Walsh Act, states must require a minimum of 25 years registration for mid-level offenses and lifetime registration for the most serious offenses. Studies show, however, that offenders who view punishment as too severe or inescapable may be more likely to reoffend and that many offenders subject to the lifetime registration requirement feel states have opened the door to endless harassment and stigmatization.

The majority of offenders surveyed report that they have experienced first-hand social or psychological effects resulting from the public registries. The consequent shame, isolation, fear, and hopelessness all interfere with an offender's reintegration and recovery.

Lifetime Registration as a Disincentive to Therapy or Recovery

In Alaska, a sex offender "cannot escape the [registration] Act's grasp no matter how clearly he may demonstrate that he poses no future risk to anyone, and no matter how final the judicial determination that he has been successfully rehabilitated..." (*Otte*, 259 F.3d at 994). Alaska's failure to provide any avenue for relief from or mitigation of the registration requirement is one of its statute's failings.

In a recent sampling of individual sex offender perceptions, several offenders observed that the ability to have a risk evaluation completed while on the registry would provide an incentive and motivation "to pursue treatment, to avoid problematic situations, and . . . [maintain] a crime free lifestyle" (Tewksbury & Lee, 2007, p. 400). Another study looking at the social and psychological effects of registration on sex offenders found many experiencing feelings of despair and hopelessness in the absence of individualized assessment. One respondent stated, "no one believes I can change, so why even try?" (Levensen & Cotter, 2005, p. 52).

As written, the statute fails to recognize the possibility of rehabilitation and provides offenders considering treatment no hope that their efforts might eventually reduce the stigma associated with the registry's public notification system.

Mandatory Internet Publication and Chilled Reporting

The inability to avoid publication of an offender's personal information on the internet and the ensuing social obloquy may also discourage family members of some offenders from reporting offenses. The spouse of an offender, particularly of an offender who may be the family's primary source of economic support, faces a terrible dilemma in reporting: While the report may protect the spouse herself or himself, or a child, the report may consign the entire family to a lifetime of poverty, to loss of the family home if the offender is evicted, and to shared shame and harassment once the offender's personal information is placed on the Internet. Studies suggest that reporting may be equally difficult for the parent or sibling of an offender. Thus, to the extent that mandatory Internet publication acts as a disincentive to reporting intra-family offenses, Alaska's notification statute ill-serves Alaska's abused children and spouses.

Obfuscation of More Dangerous Offenders

The extraordinarily broad reach of

Alaska's publication requirement has ramifications beyond its collateral consequences to the offender and his or her family. Indiscriminate posting of information on all offenders tends to obscure from the public pertinent information relating to very dangerous sexual predators. Including low-risk offenders also places an unnecessary administrative burden on state officials responsible for establishing and maintaining the posting, with a concomitant increase in public expense. In addition, the greater the number of postings, the more difficult and expensive it is for the state to ensure accuracy and respond to noncompliant offenders.

Possible Changes

During the 2008 session, the Alaska legislature passed and the governor signed into law CSSB 185, which extends the reach of existing sex offender registration requirements. The new law adds the requirement that offenders provide the Department of Corrections with every email or instant messaging address or other Internet communication identifier they use—information mandated by the Walsh Act. This type of legislative fine-tuning, however, will not solve the most fundamental problems with the statute—overbreadth and the absence of treatment incentives.

Recent data show that those states whose legislation is most narrowly drawn to focus on the highest-risk offenders are most likely to achieve their legislative goals. A sex offender registration system is most effective where it uses actuarial risk-assessment measures to ascertain which sex offenders are at the highest risk of reoffending, distinguishes among offenders based on risk, and imposes the disabilities of registration and publication only on those most likely to recidivate. This type of registration and publication system allows the public to readily identify the most dangerous individuals and allows law enforcement to focus its resources on the most likely threats to the community (Cohen & Jeglic, 2007).

Unfortunately, the Walsh Act, with its offense-based tier structure, has foreclosed to a significant extent the states' ability to implement a true risk assessment scheme and retain eligibility for full Byrne Grant funding. There are, however, a few windows left open for small improvements to Alaska's statute.

Minimize the impact on employment. For reasons stated above, Internet publication of an employer name and address is one of the consequences of registration most likely to de-stabilize an offender socially and psychologically. The risk of consigning an offender to a lifetime of unemployment may also be a factor in deterring some family reporting.

The public interest associated with making employment available to released offenders is implicitly recognized under the new federal guidelines. The Walsh Act authorizes the states to exclude from their websites the name (though not the address) of a sex offender's employer. To facilitate offender reintegration and to protect the economic welfare of offenders' families, Alaska could avail itself of this option. While it is argued that knowing the name of an offender's employer enhances public safety, there is no empirical evidence to support this claim.

Omit the lowest risk offenders from internet publication. Another option granted the states under the new federal guidelines pertains to offenders classified under the statute as "Tier I Sex Offenders." Tier I offenders include those whose registration offense is not punishable by imprisonment for more than one year, whose offense is receipt or possession of child pornography, or whose offense is a sexual assault against an adult that involves sexual contact only.

The Walsh Act provides the states discretion to omit offenders in this category (other than those convicted of specified offenses against a minor) from placement on the state sex offender web site. With respect to this grant of discretion, Alaska legislators should do one of two things: Either adopt an individualized risk assessment program for offenders within this category and exclude from web publication those deemed to pose a low community risk or simply exclude these offenders as a class. The first approach would strike the optimal balance between the competing goals of providing adequate public notice and promoting offender reintegration and rehabilitation. It would also be much more expensive to administer, leaving the second approach a reasonable alternative with respect to these low-level offenders.

Include the limited treatment incentives authorized under the Walsh Act. The new federal requirements also offer states some latitude to include treatment incentives in their registration statutes. The Walsh Act generally requires the states to register Tier I offenders for 15 years, Tier II offenders for 25 years, and Tier III offenders for life. However, Section 115(b) provides that Tier I offenders' registration periods may be reduced by five years if they maintain a clean record within the statutory definition of that term, which includes successful completion of an approved treatment program. No reduction is authorized for offenders classified as Tier II or Tier III (73 Fed. Reg. at 38068). (Tier III offenders whose conviction stemmed from a delinquency proceeding are eligible for a reduction in term. In Alaska, however, a conviction triggering registration is defined as a conviction of an adult or a juvenile charged as an adult (AS 12.63.100(3).)

This window of opportunity for offering reduction of the registration period as a treatment incentive is very small. Nevertheless, in light of recent data showing that treatment is often effective in deterring future offenses, Alaska should take advantage of this limited opportunity to encourage released offenders to seek treatment.

Conclusion

There are ways to refine the current sex offender registration system to ensure that it better protects the public. The revulsion and anger that most of us feel toward those convicted of sex crimes should not blind us to the safety interest served by affording released offenders treatment incentives and the opportunity to live stable and socially productive lives. Within the confines of the federal funding mandates, Alaska can strike a more effective balance between warning the public of the most dangerous sexual predators and promoting the reintegration and rehabilitation of the larger class of offenders.

Sexual Assaults in Anchorage

Originally published in the *Alaska Justice Forum* 22(4): 2-3 (Winter 2006).

For other articles and publications related to sexual assault and violence against women, see:
http://justice.uaa.alaska.edu/vaw/

Abstract: *This study examined the characteristics of all sexual assaults reported to the Anchorage Police Department from 2000 through 2003. Key descriptive findings are summarized.*

- *Victims tended to be young and female, with Native women victims in over 45% of reported sexual assaults.*
- *In a majority of the assaults – over 62% - the assailant was not a stranger to the victim. The most common non-stranger relationships included friends and acquaintances.*
- *A majority of the assaults occurred indoors, with 45% taking place at the residence of one or both of those involved.*
- *Sixty-five percent of victims had used alcohol prior to the assault and 74% of suspects had also.*
- *While assaults occurred all over the Municipality of Anchorage, they happened with more frequency in Spenard, Fairview, and Downtown.*

Information from four years of police files shows that the problem of sexual assault in Anchorage has discernible contours: most assaults take place indoors, between people who are not strangers to each other, with either or both parties having consumed alcohol. The attached tables, figures and map provide an overview of reported sexual assaults in the city from 2000 through 2003. The data come from a recently-completed report by the Justice Center that updates an earlier study released in 2003. The new study was undertaken by the Center in collaboration with the Anchorage Police Department.

The Justice Center study revealed that victims have tended to be young and female, with Native women victims in over 45 percent of reported sexual assaults. In a majority of the assaults—over 62 percent—the assailant was not a stranger to the victim. A majority of the assaults occurred indoors, with 45 percent taking place at the residence of one or both of those involved. Over 65 percent of the victims had used alcohol prior to the assault and close to 74 percent of suspects had also. While assaults occurred all over the city, they happened with more frequency in certain areas of town—particularly in Spenard, Fairview, and Downtown.

The data presented here are already two years old, but figures released by the FBI's Uniform Crime Reporting (UCR) program indicate that the rate of reported forcible rape (a more tightly defined offense than that reflected in the tables presented here) in the Municipality of Anchorage was 96.1 per 100,000 people in 2004. The national rate was only 32.2. These UCR figures are not directly comparable to those presented in the Justice Center study, but they show that the

Table 1. Race of Victims in Sexual Assaults Reported to Anchorage Police, 2000-2003

Race	Percentage of Anchorage population, 2001[1]	Sexual assault victims N	%	Rate per 1,000 population[2]

sexual assault rate in Anchorage continues to be extremely high. With the problem of sexual assault, it is also important to note that national data show that many assaults are not reported to the police, so it is possible that the figures collected represent only a limited picture of the problem.

André Rosay of the Justice Center was the principal investigator for the study. The complete results from this recent update can be found at http://justice.uaa.alaska.edu/research/2000/0107sxassaultupdate/index.html. The earlier study is available at http://justice.uaa.alaska.edu/ research/2000/0107sxassault/. A lengthier article on the 2003 study, "Forcible Rapes and Sexual Assaults in Anchorage," appeared in the Winter 2004 issue of the *Alaska Justice Forum*.

http://justice.uaa.alaska.edu/vaw/

Abstract: *This study examined the outcomes of sexual assault cases reported to the Anchorage Police Department between January 2000 and December 2003. The data include 1,052 cases involving one suspect and one victim (85% of all reported sexual assaults). Cases and charges were tracked through the Alaska Department of Law to determine what was referred, accepted, and convicted.*

- *Overall, 18% of cases were referred for prosecution. The most common referred charge was a sexual assault in the first degree. Seventy-nine percent of referred charges were sexual assault charges.*
- *Overall, 12% of cases were accepted for prosecution. The greatest point of attrition was from report to referral. Once referred, 68% of cases were accepted for prosecution. Sixty-eight percent of charges were accepted by the Department of Law as referred. The most common reasons for not accepting a charge as referred were evidentiary reasons. The most common accepted charge was also a sexual assault in the first degree. Seventy-five percent of accepted charges were sexual assault charges.*
- *Overall, 11% of cases resulted in a conviction. Once accepted, 87% of cases resulted in a conviction. Although convictions were common in accepted cases, accepted charges were often dismissed. While 87% of accepted cases resulted in a conviction, 59% of accepted charges were dismissed. Ninety percent of guilty findings were a result of plea bargaining. With plea bargaining, some charges were dismissed but a conviction was still secured. Fifty-six percent of convicted charges were sexual assault charges. The most common convicted charge was for assault, followed by sexual assault in the second degree.*

A recent Justice Center examination of sexual assault case processing shows that close to 60 percent of cases referred by the Anchorage Police Department to the Alaska Department of Law result in a conviction on some charge—although not necessarily the original charge. The number of cases referred, however, is less than 20 percent of those reported.

Anchorage has a very high incidence of reported rape. Between 2000 and 2003, the rate of reported forcible rape in Anchorage was 163 percent higher than in the U.S. as a whole. Over the past twenty years, Anchorage has been consistently at or near the top of U.S. metropolitan statistical areas for rates of reported forcible rape.

The Justice Center examined the outcomes of all sexual assaults involving one suspect and one victim reported to the Anchorage Police Department (APD) between January 2000 and December 2003. In this article we summarize how the Alaska Department of Law disposed of these reported assaults, detail case and charge outcomes and discuss the reasons given by prosecutors for these outcomes.

Overall, 1,235 sexual assaults were reported to APD from January 2000 through December 2003. We sampled all 1,074 sexual assaults committed by one suspect against one victim (87.0% of all sexual assaults reported from January 2000 to December 2003). Data were collected on 1,052 (98%) of these reports. Of these 1,052, 188 (17.9%) were referred for prosecution and had reached final disposition prior to data collection. Offenses in these 1,052 reports included sexual assaults, forcible rapes, attempted sexual assaults, and attempted forcible rapes. As defined by the Federal Bureau of Investigation's Uniform Crime Reports, forcible rape is "the carnal knowledge of a female forcibly and against her will." Sexual assault is a less restrictive state-defined offense that does not consider the gender of the parties involved and does not require carnal knowledge.

For this article, we consider three stages of prosecution: referral, acceptance, and conviction. These stages can be thought of as formal decision points at which prosecutors record what has transpired with the case, and why that outcome resulted. Referral is the forwarding of charges by APD to the DOL. This is the initial stage of prosecution and the first stage at which prosecutors officially become aware of a report. Once a case has been referred to the DOL, it is screened for acceptance. More specifically, prosecutors will screen each charge within each case for acceptance. The prosecutor's initial screening decision for each charge is recorded with a screening disposition code which indicates in what fashion the charge did or did not move forward. At this decision point, in addition to disposition codes, reason codes are given to charges that are not accepted as referred by law enforcement. The reason code indicates the formal reason that prosecutors gave for the disposition of the charge in that manner.

Acceptance can be considered the second stage of prosecution, or the second formal prosecutorial decision point. At this stage prosecutors formally agree to move forward with criminal prosecution. Once a final outcome has been established, a final disposition code and potentially a reason code are attached to each individual accepted charge within a case. The final disposition code indicates the final outcome of an accepted charge. The reason code associated with this final disposition reflects the prosecutor's reason for the final disposition of the charge. A conviction is an accepted charge result-

Accepted	127	12.1	67.6	100.0 %
Convicted	111	10.6	59.0	87.4

Source of data: Alaska Department of Law

ing in a finding of guilt. A finding of guilt can occur through plea bargaining or being found guilty beyond a reasonable doubt by either judge or jury.

Table 1 describes the number of cases reported, referred, accepted, and convicted. Of the 1,052 reported cases, 188 (17.9%) were referred to DOL and 127 (67.6%) were accepted. Finally, 111 (87.4%) of these 127 cases resulted in a conviction. Obviously, the point with the greatest attrition is from report to referral.

For the purposes of this article, two separate levels of analysis are used: a case-level analysis and a charge-level analysis. For case-level analysis, a case as a whole is the unit of analysis. With this level of analysis, we are concerned only with the most serious outcome at a particular stage. The second level of analysis, at the charge level, considers individual charges within a case, using the individual charge as the unit of analysis. Using this level of analysis, we are concerned with all charges at each decision point, not simply the single charge that received the most serious outcome. This distinction is important for understanding many of the results of this project.

From referral to acceptance, there is often cross-movement of charges within a case. While it is necessary that at least one charge be referred for any case to be accepted, the number of charges within a case need not be static from referral to acceptance or from acceptance to conviction. Law enforcement may refer many charges to prosecutors, but upon review of the case, prosecutors agree to move forward with prosecution on a subset of the referred charges (i.e., the number of accepted charges is less than the number referred). Similarly, it is possible that when law enforcement refers only a single charge to prosecutors, upon review, prosecutors feel that additional charges are appropriate (i.e., they create an accepted charge that was not referred).

Table 2. Referred Charges

Charge	N	%
Sexual assault 1	180	41.5 %
Sexual assault 2	99	22.8
Sexual assault 3	11	2.5
Sexual abuse of a minor 1	20	4.6

Class A misdemeanor	35	8.1
Class B misdemeanor	4	0.9
Non-classified violation	1	0.2
Total	**434**	

Source of data: Alaska Department of Law

Referral

As mentioned earlier, of the 1,052 reported sexual assault cases, 188 (17.9%) resulted in a referral to the DOL. Fewer than half (41.5%) of the referred cases included one charge; 76.5 percent had three or fewer charges. Overall, the 188 referred cases contained 434 referred charges. Table 2 shows the distribution of these 434 referred charges by charge type. One hundred and eighty (41.5%) of the referred charges were sexual assaults in the first degree. Further, 290 (66.8%) of the 434 referred charges were sexual assaults of some degree. Fifty-two (12.0%) of the referred charges were for sexual abuse of a minor; 38 (8.8%) were assault charges; 17 (3.9%) were kidnapping charges; and 37 (8.5%) were other charges. Examples of other charges included contributing to the delinquency of a minor, driving under the influence, and possession of child pornography.

Table 4. Disposition of Referred Charges

Disposition	N	%
Accepted as referred	296	68.2 %
Accepted—same class	7	1.6
Accepted—higher level	19	4.4
Accepted—lesser felony	6	1.4
Accepted—lesser misdemeanor	2	0.5
Prosecution declined—dismissal required	9	2.1
Prosecution declined—no dismissal required	95	21.9
Total	**434**	

Source of data: Alaska Department of Law

Table 3 is a breakdown of referred charges by class. Over 90 percent (n = 394) of the referred charges were felonies. Almost half of the charges (48.6%) were referred as unclassified felonies, that is, the gravest crimes under Alaska statutes, carrying with them the harshest penalties. Under the statutes, sexual assault is taken very seriously. Further, when a report results in a referral, the charges referred for prosecution are at a high level of class severity and carry with them some of the most significant penalties exacted by the justice system.

All charges referred to the DOL receive screening disposition codes. Table 4 indicates the disposition codes that were attached to the 434 referred charges. Prosecutors agreed to prosecute 68.2 percent of charges as referred by law enforcement. "Prosecution declined" disposition codes were attached to 24.0 percent (n=104) of

Table 5. Reason for Not Accepting Charge as Referred

Source of data: Alaska Department of Law

referred charges. Interestingly, 92.2 percent (n=400) of charges were either accepted as referred by law enforcement or declined.

Here we make claims about charges, not cases. As stated earlier, a majority of cases (58.5%) have more than one charge. It is therefore possible that at least one charge in a case progresses forward, while others are dismissed.

Only charges that were not accepted as referred receive reason codes. Thus, in our sample, the 138 charges not accepted as referred received reason codes. Reasons for not accepting charges as referred are shown in Table 5. What is important to note is the proportion of reasons, by type, given by prosecutors for a charge not being accepted as referred. At this stage, evidentiary reasons were the most typical reasons (45.7%) for not accepting a charge as referred. Discretionary reasons were the second most common reasons for not accepting a charge as referred—32.6 percent.

Transition between Referral and Acceptance

Of the 434 charges that were referred for prosecution, 330 (76.0%) were accepted, either as referred or as a different charge, while the remaining 104 (24.0%) were dropped. Also, 83 new charges were created by prosecutors from referral to acceptance. This means that there were a total of 517 charges at some stage of prosecution within these 188 cases (see Table 6).

We now briefly focus on the 104 charges that were declined for prosecution and the 83 new charges that were added by prosecutors. Half (n=52) of the 104 charges not accepted by the DOL were sexual assaults in the first degree and an additional 21.2 percent (n=22) were sexual assaults in the second degree. Over half of the charges that were not accepted by prosecutors were unclassified felonies and an additional 27.9 percent were class B felonies. Of the 83 charges added by prosecutors, 32 (38.6%) were sexual assault charges, 20 were sexual abuse of a minor charges, 6 were assault charges, 2 were kidnapping charges, and 23 were other charges. New charges added by prosecutors were most commonly class B felonies or unclassified felonies.

Acceptance

We now turn our attention to the 413 charges that moved forward from referral to acceptance. Within the case-level analysis, 127 cases of the original 188 moved forward from referral to acceptance (see Table 1). Stated differently, prosecutors agreed to move forward on 67.6 percent of the cases referred to them. Of the 127 accepted cases, 28.3 percent contained one charge and 70.8 percent contained three or fewer charges. Overall, 413 charges moved forward between referral and acceptance. Table 7 shows the charge type of these 413

Source of data: Alaska Department of Law

charges. As with referral, the most common accepted charge was sexual assault in the first degree—36.6 percent (n=151) of the accepted charges. Further, 58.8 percent of all accepted charges were sexual assaults in some degree.

Table 8 shows exactly how charges moved from the referral stage to the accepted stage, for the 330 charges which were both referred and accepted. What is interesting here is the remarkable consistency with which charges fall on the table's diagonal: A charge referred and accepted as the same charge type will fall on a diagonal line from the upper-left to lower-right corners. We see that the vast majority of charges (92.4%) fall on this diagonal.

Table 9 provides the charge class frequencies for the 413 charges that were accepted by the DOL. Most charges were accepted as unclassified felonies. Furthermore, 86.9 percent of the charges in our sample were accepted at the felony level. Knowing that the vast majority of charges are accepted as referred, we could reasonably expect charge class to remain relatively constant from referral to acceptance—as Table 10 shows. For charges that were both referred and accepted, there is a great degree of class congruency between referral and acceptance.

Table 11. Disposition of Accepted Charges

Disposition	N	%
Jury trial—guilty as charged	10	2.4 %
Jury trial—not guilty	17	4.1
Pled as charged	52	12.6

Dismissed by prosecutor	243	58.8
Dismissed by court	9	2.2
Probation/SIS revoked	4	1.0
No true bill	3	0.7
Final disposition outstanding	3	0.7
Total	**413**	

Source of data: Alaska Department of Law

Final Disposition

Once a final outcome has been determined for a charge, prosecutors attach a final disposition code. Table 11 shows the final disposition codes that were attached to the 413 accepted charges in our sample. What is immediately apparent is the large of proportion of charges that are dismissed by prosecutors. Of the 413 accepted charges, 243 (58.8%) were dismissed by prosecutors. Taken as a whole, 61.7 percent of accepted charges were later dismissed, including those for which no true bill was returned. Another point becomes clear from Table 11: For 124 of the 138 accepted charges that resulted in a finding of guilt, the conviction was a result of plea bargaining. This means that plea agreements were responsible for 89.9 percent of guilty findings in our sample. To state this differently: Only 10 percent of guilty findings were a result of court action.

Charges that were dismissed by prosecutors or charges for which prosecutors allowed a plea to an amended charge are given a final disposition reason code. These reasons are shown in Table 12. The most striking result in Table 12 is the degree to which discretionary reasons are cited by prosecutors. Of the reasons given by prosecutors for dismissing a charge or allowing a plea to an amended charge, 70.5 percent were discretionary in nature. Among discretionary reasons for charge dismissal can be the choice of another charge as more accurate, the consolidation of charges, or the suspect pleading to the essence of the offense.

Table 12. Reason for Accepted Charges Being Dismissed or Allowing Plea to an Amended Charge

Reason	N	%
Witness reason	53	16.8 %
Evidentiary reason	34	10.8
Discretionary reason	222	70.5
Procedural/other reason	6	1.9
Total	**315**	

Source of data: Alaska Department of Law

Conviction

Of the 127 cases that were accepted by DOL, 16 cases (12.6%) resulted in no conviction. Most cases (87.4%) resulted in a conviction on at least one charge. When examining the charge-level analysis, 138 (33.4%) of the 413 accepted charges resulted in a finding of guilt. Table 13 is a frequency table of convicted charge types. Table 14 presents the changes in the types of charges between acceptance and conviction. We see much more variation about the diagonal than we did in earlier crosstabulations.

Table 13. Convicted Charges

This is an indication that charge types are shifting between acceptance and conviction. Given that a large proportion of cases are disposed of by plea bargaining, this is not surprising.

There is a shift in charge class similar to the shift in charge type we observed between acceptance and conviction. Table 15 presents the convicted charge class, and Table 16 demonstrates the way charge class shifted between acceptance and conviction.

Sexual assaults in some degree formed 60.8 percent of charges that were accepted but failed to result in a conviction.

Conclusions

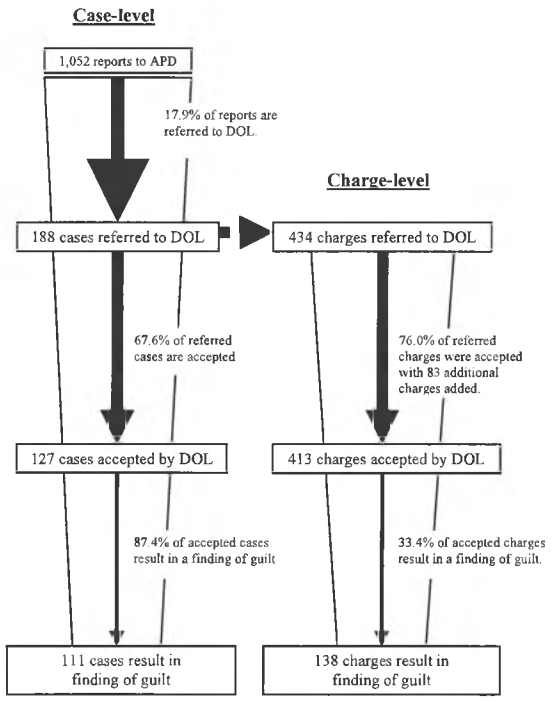
As we have seen, the picture of sexual assault case processing that emerges depends, in large part, on the level of analysis. Conclusions about the prosecution of sexual assaults by the DOL vary substantially depending on which level of analysis we consider. Figure 1 succinctly illustrates the points and rates of attrition for sexual assault cases and charges at the three formal prosecutorial decision points considered in this project. Figure 1 shows that a higher proportion of charges than offenders are being removed from the system at each decision point. Furthermore, results indicate that most offenders whose cases reach prosecutors are being held accountable in some degree; that is, they receive criminal sanctions. Another fact becomes clear when looking at Figure 1: The point of highest attrition is prior to prosecutorial involvement, with 82.5 percent of reported sexual assaults not referred for prosecution. This is by far the largest filtering that occurs at any formal decision point studied in this research. However, determining what precisely is happening between report and referral is beyond the scope of the present project.

In addition to the rates of attrition shown in Figure 1, there is a substantial change in the types of charges that flow through the three decision points examined in this research (Tables 8, 10, 14, and 16). The distribution of charges by type is relatively constant from referral to acceptance, but there is a demonstrable shift in the distribution between acceptance and conviction. The most dramatic shift is observed for the sexual assault in the first degree charges. At referral, charges for sexual assault in the first degree constitute 41.5 percent of all charges. At acceptance, this proportion is relatively unchanged at 36.6 percent. However, sexual assault in the first degree constitutes only 8.7 percent of convicted charges.

Upon first inspection, this result may be startling, but it becomes readily explainable when viewed in light of previous results. We stated earlier that the vast majority (89.9%) of convictions in our sample are a result of plea bargaining, which commonly results in convictions on less serious charges. We could therefore reasonably expect that many charges in our sample would result in convictions on charges that are less severe than those originally referred or accepted.

While the reason codes may not capture all possible reasons for charge dispositions, they offer useful insight into prosecutorial decision making. A comparison of reason codes between those given from referral to acceptance (Table 7) and those given from acceptance to conviction (Table 12) shows that there is a perceptible shift in the reasons attached to case dispositions at the respective decision points. From referral to acceptance, evidentiary reasons account for 47.5 percent of reasons given for a referred charge not being accepted as referred. From acceptance to conviction, this proportion drops substantially to 10.8

Figure 1. Case and Charge Movement Between Decision Points



Source of data: Alaska Department of Law

percent of reasons given by prosecutors. The opposite happens for the proportion of total reasons that are discretionary in nature. Between referral and acceptance, discretionary reasons account for 32.6 percent of the reasons given by prosecutors. This proportion jumps to 70.5 percent of reasons given for a dismissal or plea agreement to an amended charge.

Overall, we began with a total 1,074 sexual assaults reported to the Anchorage Police Department between January 2000 and December 2003 involving one suspect and one victim. Data were collected on 1,052 (98%) of these 1,074 reports. These 1,052 reports to APD resulted in the referral of 188 cases and 434 charges to DOL. These 188 referred cases resulted in the acceptance of 127 cases that included 413 charges. Prosecutors obtained convictions in 111 cases on 138 charges. Thus, the majority of cases resulted in a conviction on at least one charge. For referred cases, a majority of respondents were held accountable for their actions to some degree.

It remains true, however, that a heavy majority of reported sexual assaults are not referred for prosecution. More examination of this point in case processing—between reporting and referral—is urgently needed.

Since the greatest source of case and charge attrition is from report to referral, enhancing offender accountability may depend on increasing the proportion of reported sexual assaults that are referred to the Department of Law.

G. Matthew Snodgrass is a researcher in an ongoing study of sexual assaults in Anchorage. *The study is being directed by André Rosay of the Justice Center. Forcible Rapes and Sexual Assaults in Anchorage

André Rosay

Abstract: *This study examined the characteristics of all sexual assaults reported to the Anchorage Police Department from 2000 through 2003. Key descriptive findings are summarized.*

- *Victims tended to be young and female, with Native women victims in over 45% of reported sexual assaults.*
- *In a majority of the assaults — over 62% — the assailant was not a stranger to the victim. The most common non-stranger relationships included friends and acquaintances.*
- *A majority of the assaults occurred indoors, with 45% taking place at the residence of one or both of those involved.*
- *Sixty-five percent of victims had used alcohol prior to the assault and 74% of suspects had also.*

Alaska generally, and Anchorage specifically, have been plagued by a high incidence of forcible rapes and sexual assaults. For the first time, solid data on victim and suspect characteristics, time and location of assaults and other details have been assembled and studied. These data contradict some of the more common assumptions regarding Anchorage's rape problem.

The data are important to designing effective rape prevention efforts. The Anchorage Police Department has recently secured new funding sources directed at reducing the occurrence of forcible rapes and sexual assaults: a $2 million federal grant and a $500,000 municipal grant. The question now is how to best allocate these resources. As discussed in the criminological literature, problem-oriented policing offers a promising approach.

Problem-oriented policing is a strategy in which police (1) define the problems to be solved, (2) diagnose these problems to identify their causes, (3) develop and implement interventions that address these causes, and (4) assess the efficacy of their interventions.

As defined in the Federal Bureau of Investigation's Uniform Crime Reporting (UCR) Program, forcible rape is "the carnal knowledge of a female forcibly and against her will." Attempted forcible rapes are also included in the UCR's measure. Figure 1 displays the rates of forcible rape reported to police from 1982 to 2002 for the United States, Alaska, and Anchorage. In 2002, the state of Alaska had the highest rate of reported forcible rape among the 50 states (79.4 per 100,000) and Anchorage had the second highest rate of reported forcible rape among metropolitan statistical areas in the U.S. (95.0 per 100,000). In 2002, the rates of reported forcible rape were 141 percent higher in Alaska and 188 percent higher in Anchorage than in the U.S.

In addition to forcible rapes, Anchorage also has a high rate of reported sexual assaults (although national comparisons are not available). The definition of a sexual assault is less restrictive than that of a forcible rape: sexual contact with another person, male or female, without the consent of that other person. In 2002, there were 254 forcible rapes and 85 sexual assaults reported to the Anchorage Police Department, for a total of 339 forcible rapes and sexual assaults. Furthermore, according to analysis done by Callie Marie Rennison for the Bureau of Justice Statistics, national statistics indicate that only 36 percent of forcible rapes, 34 percent of attempted forcible rapes, and 26

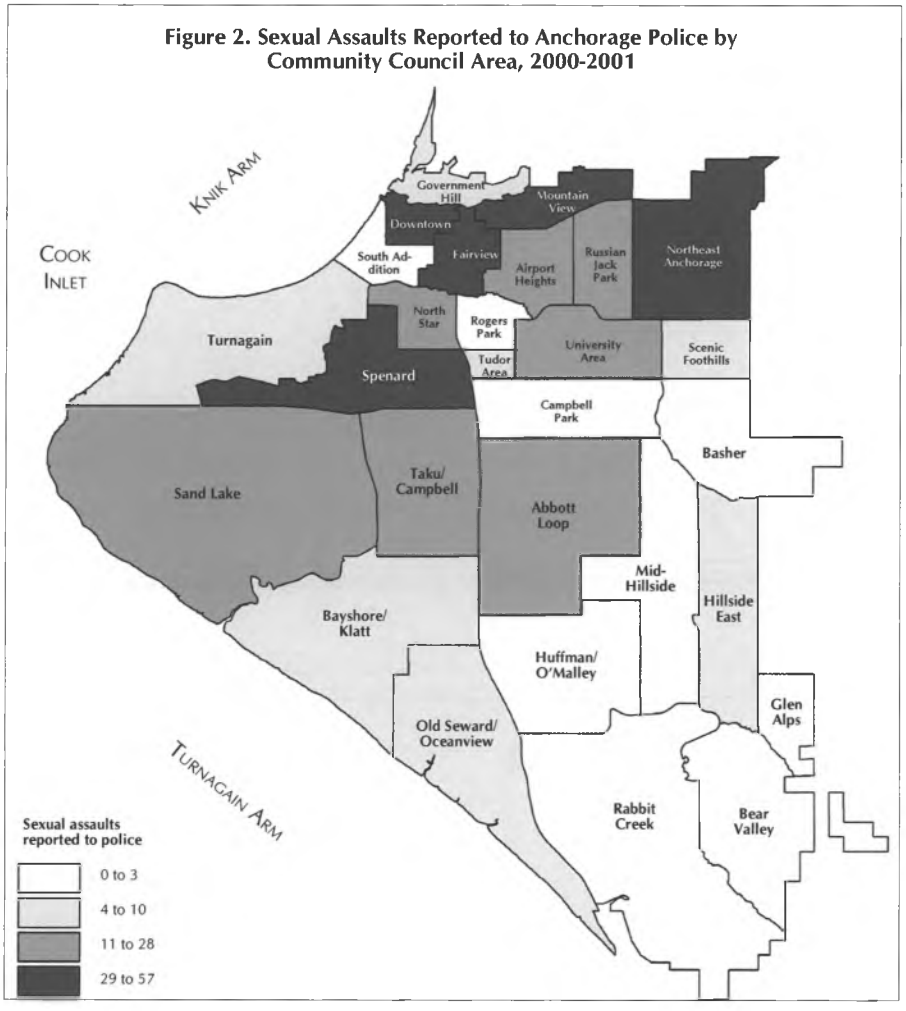
Figure 2. Sexual Assaults Reported to Anchorage Police by Community Council Area, 2000-2001



percent of sexual assaults are reported to the police. In light of this, the forcible rape and sexual assault problem in Anchorage is probably worse than that indicated by police statistics.

A joint project of the UAA Justice Center and the Anchorage Police Department has focused on gaining a better understanding of the parameters of the rape problem in Anchorage. Researchers collected data from all sexual assaults and rapes reported to the Anchorage Police Department in 2000 and 2001. These data contain detailed information on the assaults, victims, and suspects. The findings presented here reflect a quantitative perspective on those assaults that have been reported. It is important to note again that many sexual assaults go unreported.

The key findings from this study suggest that interventions will be successful in Anchorage only insofar as they take into account:

- Geographical and temporal concentration of reported sexual assaults and rapes;
- Demographic characteristics of victims and suspects;
- Types of victim-suspect relationships;
- Locations of assaults; and
- Use of alcohol.

Like all criminal activity, sexual assaults and rapes are neither geographically nor temporally random. In the data studied, reported sexual assaults and rapes were most likely to occur in five community council areas—Downtown, Fairview, Spenard, Mountain View, and, to a lesser extent, Northeast Anchorage (see Figure 2). More specifically, 10.1 percent of the sexual assaults and rapes reported in 2000 and 2001 occurred Downtown, 10.1 percent in Fairview, 13.4 percent in Spenard, 10.1 percent in Mountain View, and 9.0 percent in Northeast. Of the 424 assault locations reported in 2000 and 2001, 52.7 percent were in these five community council areas. Temporally, reported sexual assaults and rapes were most likely to occur on the weekends and from 10 PM to 6 AM. More precisely, 49 percent of sexual assaults and rapes reported in 2000 and 2001 occurred on weekends and 60 percent occurred between 10 PM and 6 AM.

Knowing where and when sexual assaults

[2] Detail adds to greater than total N because suspects may be of more than one race.
[3] Includes both males and females (99.4% of suspects were male).
[4] Base population includes both males and females.
Source of data: *2000 and 2001 data (N = 539); U.S. Census Bureau, 2001 Supplementary Survey (Anchorage, AK MSA) <www.census.gov/acs/www/Products/Profiles/Single/2001/SS01/Tabular/380/38000US03801.htm>.*

and rapes occur is an important step in defining the problem to be solved. These results provide reliable evidence of the geographical and temporal concentration of sexual assaults and rape—rather than unreliable evidence based on hunches, experience, or common sense. This evidence suggests that police efforts to combat sexual assaults and rape ought to be concentrated on the weekends from 10 PM to 6 AM in Downtown, Fairview, Spenard, Mountain View, and Northeast.

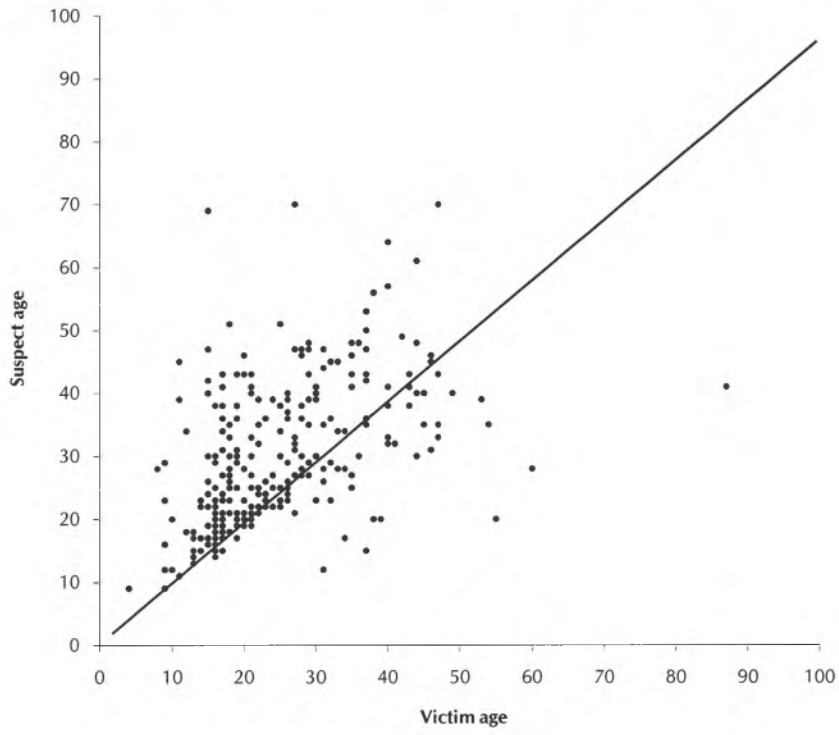
At the same time, police efforts to combat sexual assault and rape need to take into consideration the demographic characteristics of both victims and suspects. The vast majority (95.5%) of victims were female, with most (93.2%) residing in Anchorage. Almost all suspects (99.4%) were male and, again, most (94.3%) resided in Anchorage. Most victims were Caucasian or Native, with Native victims vastly overrepresented (see Table 1). For reported sexual assaults and rapes, Natives were 7.6 times more likely than others to be a victim.

Suspects were more racially diverse than victims (see Table 2). Most suspects were Caucasian, but Native and African-American suspects were overrepresented in proportion to the general population.

The age of victims and suspects is shown in Figure 3. On average, victims were 5 years younger than suspects. For victims, the highest rate of reported sexual assault and rape was for 15-to-19-year-olds (6.76 per 1,000) while for suspects, the highest rate of reported sexual assault and rape was for 20-to-24-year-olds (3.75 per 1,000).

Figure 3. Victim and Suspect Age in Sexual Assault Cases Reported to Anchorage Police, 2000-2001

Analysis includes only those cases with one victim and one suspect (N = 264).



With these demographics characterizing those involved in sexual assaults, interventions should primarily focus on Anchorage residents rather than visitors. Furthermore, it is clear that victim-focused interventions must occur at an earlier age than suspect-focused interventions. The daily routines of 15-to-19-year-olds are substantially different than those of 20-to-24-year-olds. In particular, 15-to-19-year-olds are likely to be in school during the week, making schools an attractive intervention partner for victim-focused interventions. Developing suspect-focused interventions in schools, however, makes little sense as most suspects are beyond school age.

It would also make little sense to develop interventions without considering the relationships between victims and suspects. These relationships are described in greater detail in Table 3. According to the 2002 National Crime Victimization Survey, only 32.5 percent of sexual assaults nationwide and rapes are stranger assaults. In Anchorage, however, stranger assaults are far more common. In 2000 and 2001, 44.3 percent of victims who reported a sexual assault or rape to police did not know the offender beforehand. Among non-stranger assaults, the most common were assaults between casual acquaintances (30.4%) and those between well-known friends (27.1%). Unfortunately, little is known about the differences between stranger and non-stranger assaults. Consequently, the implications of this important finding are still unclear. It is likely, however, that important differences between stranger and non-stranger assaults do exist, requiring separate approaches to reduce occurrence. For example, it is possible that non-stranger assaults are more likely to occur in private places than stranger assaults.

Though we have not yet investigated these differences, our analyses clearly reveal that most sexual assaults reported to police (over 67.7%) occurred indoors (see Table 4). The most common indoor locations included the victim's residence and the suspect's residence. Of the sexual assault locations, 45.3 percent were the victim's residence or suspect's residence (or both), and an additional 9.9 percent took place in some other residence. In comparison, fewer sexual assaults occurred outdoors (22.0%). Common outdoor locations included fields, woods, parks, roads, streets, and parking lots. Few assaults occurred in vacant lots (5.3%), city parks (1.9%), or along park trails (0.5%). Overall, our data show that

Table 3. Victim-Offender Relationship in Incidents of Sexual Assault Reported to Anchorage Police, 2001

Suspect's relationship to victim	N	% of total	% of non-stranger
Total non-stranger	**181**	**55.7 %**	**100.0 %**

Boy/girlfriend	22	6.8	12.2
Ex-spouse	5	1.5	2.8
Employer	1	0.3	0.6
Otherwise known	17	5.2	9.4
Stranger	**144**	**44.3 %**	**–.–**
Total	**325**		

only 4.3 percent of reported sexual assaults *originated* in parks, fields, or woods and that only 7.3 percent *occurred* in these places. Most of these places were vacant lots. Moreover, while only one assault was reported as occurring in a bar, the original pick-up in 54 cases (13.6%) occurred in a bar—a finding that should be seen in relation to the figures on alcohol involvement in sexual assaults.

Consequently, strategies that target outdoor places, particularly ones that target parks or trails, will not appreciably affect the rates of sexual assault and rape in Anchorage. Although the municipality's Trail Watch Program instituted in September 2003 may reduce the fear of crime among trail users (and may reduce other forms of crime), it will probably have negligible effects, if any, on the occurrence of sexual assaults and rapes if these patterns continue. Different strategies must be used to lower the rates of sexual assault and rape in Anchorage, since most rapes occur indoors, in residences.

Finally, interventions must take into account that alcohol use was very frequent among both suspects and victims. During 2000 and 2001, 76.2 percent of suspects and 59.9 percent of victims had used alcohol. Table 5 displays victim and suspect alcohol use for 176 cases (cases with only one victim and one suspect and cases where both victim and suspect alcohol use was known). Both the suspect and the victim had used alcohol in 59.7 percent of these cases. Only the suspect had used alcohol in 13.1 percent of these cases. Only the victim had used alcohol in 1.7 percent of these cases and neither the suspect nor the victim used alcohol in 25.6 percent of these cases. Stated differently, almost 75 percent of these cases involved alcohol—either by the suspect, the victim, or both.

Overall, we have come a long way towards defining the problems to be solved, diagnosing these problems, and identifying their causes. Though the analyses are neither finished nor definitive, we nonetheless now have some reliable information that can be used to enhance the success of community and police rape prevention efforts. We ought to make sure that all interventions take into consideration that:

- Reported sexual assaults and rapes occur mostly on the weekends from 10 PM to 6 AM in Downtown, Fairview, Spenard, Mountain View, and Northeast;
- The highest victimization rates are for 15-to-19-year-olds while the highest offending rates are for 20-to-24-year-olds;
- 44.3 percent of victims are assaulted by strangers;
- 59.6 percent of known assault locations are private residences; and
- Alcohol use is very frequent among both suspects and victims.

It must be understood that police alone cannot solve the sexual assault and rape problem that has plagued Anchorage for well over 20 years. The data suggest that effective solutions to this problem need to be both suspect-focused and victim-focused (as well as event-focused). Many have dismissed the idea of victim-focused interventions for fear that it leads to victim blaming. The reality, however, is that we can educate about sexual assault and rape without blaming victims for sexual assault and rape: we educate homeowners about burglary prevention without blaming them for burglaries and we educate business owners about shoplifting without blaming them for shoplifting.

ALASKA JUSTICE FORUM
REPRINTS

March 2009 JUSTICE CENTER ♦ UNIVERSITY of ALASKA ANCHORAGE No. 9

Disposition of Sexual Assault Cases

It is not possible to correlate the figures on reported sexual assaults in Anchorage in 2000-2001 presented in the first article in this issue of the *Alaska Justice Forum* with figures on felony case processing as examined in the Judicial Council felony study, but the Judicial Council felony case study does contain figures specifically related to cases involving sexual offenses that give an idea of how these cases are handled.

According to the Judicial Council study, a sexual offense constituted the most serious charge in 12 percent of the cases studied. Table 1 shows the dispositions for these cases. The data reveal that disposition charges are often lower, sometimes at the misdemeanor level. A majority of all cases, however, resulted in a conviction on a felony charge—and on a sexual offense charge, a disposition that results in placement on the sexual offender registry.

The statistical analysis presented in the Judicial Council study shows that cases involving sexual offenses were handled even-handedly, with no effects associated with ethnicity in charge reduction, pre-disposition incarceration or sentence. Some disparities did appear in association with case location and with type of attorney.

See table on page 2.

http://justice.uaa.alaska.edu/vaw/

Abstract: *This article summarizes findings on cases involving sexual offenses from the Alaska Judicial Council study* ***Alaska Felony Process: 1999*** *(February 2004). (The full Judicial Council report is available online at http://www.ajc.state.ak.us/reports/Fel99FullReport.pdf.) The study examined the original single most serious charge and determined its final disposition. Twelve percent of felony cases included a sexual offense as the original single most serious charge. Charges for sexual abuse of a minor were more likely to be convicted as sexual offenses than sexual assault charges (and were less likely to be convicted as misdemeanors).*

- *The most frequent original single most serious charges included sexual abuse of a minor in the second degree (Class B felony), sexual assault in the second degree (Class B felony), sexual assault in the first degree (Unclassified felony), and sexual abuse of a minor in the first degree (Unclassified felony).*
- *Eighty-one percent of charges for sexual abuse of a minor in the second degree were convicted as sexual offense charges. Forty-one percent were convicted as sexual abuse of a minor in the second degree. Thirteen percent were convicted as misdemeanors.*
- *Fifty-five percent of charges for sexual assault in the second degree were convicted as sexual offense charges. Seventeen percent were convicted as sexual assault in the second degree. Thirty-four percent were convicted as misdemeanors.*
- *Fifty percent of charges for sexual assault in the first degree were convicted as sexual offense charges. Nine percent were convicted as sexual assault in the first degree. Twenty-two percent were convicted as misdemeanors.*
- *Eighty-four percent of charges for sexual abuse of a minor in the first degree were convicted as sexual offense charges. Twenty-one percent were convicted as sexual abuse of a minor in the first degree. Five percent were convicted as misdemeanors.*

Predicting Legal Resolutions in Domestic Violence Cases

Marny Rivera, André B. Rosay, Darryl S. Wood, and Katherine TePas

Introduction

The adoption of such policies as mandatory arrest, pro-arrest, and no-drop prosecution has changed the arrest and prosecution practices in domestic violence cases. Pro-arrest refers to arrest being preferred, but not required. No-drop prosecution allows the prosecutor, with or without the cooperation of the victim, to decide if the evidence merits going forward. Prosecution and conviction practices were the focus of a meta-analysis by Joel Garner and Christopher Maxwell in *Criminal Justice Review* 34(1) in 2009. They looked at 135 published reports emphasizing prosecution and/or conviction of intimate partner and other forms of domestic violence. These researchers found that 34 percent of reports to law enforcement of intimate partner violence (IPV) were prosecuted, and 59 percent of arrests for IPV were prosecuted. Overall, 51 percent of prosecuted cases resulted in conviction. They concluded that prosecution for IPV was not rare, but acknowledged that prosecution rates varied considerably across jurisdictions. They also acknowledged that the data in their 2009 study did not provide enough information to identify factors that predict prosecution and conviction of IPV. Identification of such predictive factors is important because these factors may explain jurisdictional variation in the prosecution of domestic violence cases, and may also suggest policies and practices for enhancing prosecution rates.

HIGHLIGHTS INSIDE THIS ISSUE

- An examination of attrition in criminal justice processing of cases of intimate partner violence against women (page 2).
- A summary of two sets of recommendations to reduce violence against women in Alaska (page 5).
- A look at the relationship between animal abuse and domestic violence (page 6).
- A comparison between leading causes of death in the U.S. and Alaska among different age groups (page 7).

Table 1. Number of Cases by Stage, for Cases with only One Suspect and One Victim

Stage	N	% of reported	% of referred	% of accepted
Reported	1,095	100.0 %	—	—
Referred	874	79.8	100.0 %	—
Accepted	753	68.8	86.2	100.0 %
Convicted	591	54.0	67.6	78.5

Source of data: *Alaska State Trooper data (2004)*

A recent analysis of prosecution for assaults in domestic violence incidents reported to Alaska State Troopers (AST or Troopers) found that prosecution rates in Alaska were even higher than the national average prosecution rates reported by Garner and Maxwell. Data from the study of assaults in domestic violence incidents reported to AST included detailed characteristics associated with these incidents, as well as prosecution data from the Alaska Department of Law. These data allowed for the computation of prosecution and conviction rates, as well as an analysis of characteristics predicting prosecution of domestic violence assaults. The results of those analyses are presented here following a summary of domestic violence statutes in Alaska and descriptive statistics for the characteristics examined as predictors of prosecution and conviction.

Summary of Alaska's Assault Statutes

The findings here come from a study of 1,281 Trooper reports (not including reports to local or municipal police) of assaults in domestic violence incidents in 2004 that resulted in at least one assault charge. Alaska's criminal code defines assault in terms of first, second, third, and fourth degrees (Alaska Statutes §§11.41.200, 11.41.210, 11.41.220, and 11.41.230). First, second, and third degree assault are class A, B, and C felonies, respectively, and fourth degree assault is a class A misdemeanor. The main distinctions between the degrees of assault relate to the level of intent and seriousness of resulting physical injury.

In this study we focus on assaults in domestic violence incidents between household members. *Household member*, as broadly defined in Alaska Statue §18.66.990, includes adults or minors who are current or former spouses, living together or who have lived together, dating or who have dated, engaging in or who have engaged in a sexual relationship, related to each other up to the fourth degree of consanguinity, related or formerly related by marriage, or who have a child together. Unrelated individuals residing together as roommates, and live-in caregivers, also fall under this definition.

The Sample

A subsample of 1,095 cases involving one victim and one suspect was used to conduct analyses to predict legal resolutions. Of the 1,095 cases, 874 (80%) were *referred* for prosecution and 753 (86% of referred cases) were *accepted* for prosecution. The conviction rate was 54 percent for reported cases, 68 percent for referred cases, and 79 percent for accepted cases. (See Table 1.)

Report Characteristics

Several report characteristics were examined as predictors of prosecution: time between the assault incident and the report

*Please see **DV cases**, page 8*

Table 2. Coding for and Frequencies of Report Characteristics Predicting Legal Resolutions

Variables	Reports N	Reports %	Variables	Reports N	Reports %
Time to report			**Time to case closure**		
One or more days = 0	175	16.1 %	Twenty or more days = 0	538	49.2 %
Zero days (day of incident) = 1	914	83.9	Zero through median of 19 days = 1	555	50.8
Person reporting the assault			**Total charges per report**		
Victim = 0	639	58.4 %	One = 0	659	60.2 %
Other = 1	456	41.6	More than one = 1	436	39.8
Detachment			**Number of witnesses per report**		
Other (A, E, or I) = 0	190	17.4 %	Zero = 0	464	42.4 %
B, C, or D = 1	905	82.6	One or more = 1	631	57.6
First agency notified					
AST = 0	870	79.5 %			
VPSO, VPO, local police or other = 1	225	20.5

DV cases

(continued from page 1)

of the incident to law enforcement, person reporting the assault, Trooper detachment area receiving the report, agency reported to, time to case closure, total charges per report, and number of witnesses per report. The majority of cases (84%) were reported on the same day as the incident and the victim reported the incident in 58 percent of cases. Most reports (83%) were made in Trooper detachments B (Southcentral Alaska), C (Western Alaska), or D (Interior Alaska). In 80 percent of cases, AST was the first agency notified of the domestic violence assault. In the remaining 21 percent of cases the report was most often received by a Village Public Safety Officer (VPSO) or Village Police Officer (VPO), and less often by a local police department. (Percentages may total to more than 100% due to rounding.) Over half (51%) of the cases were closed between zero and 19 days (the median time to closure for all cases). The majority of domestic violence assaults (60%) involved a single charge, and in 58 percent of cases there was only one witness. (See Table 2).

Table 3. Coding for and Frequencies of Victim Characteristics Predicting Legal Resolutions

Variables	Reports N	Reports %	Variables	Reports N	Reports %
Race of victim			**Present upon Trooper arrival**

Victim used alcohol or drugs			**Victim suffered injuries**		
No = 0	687	66.1 %	No = 0	439	40.1 %
Yes = 1	353	33.9	Yes = 1	656	59.9
Victim consulted someone prior to assault					
No = 0	794	73.1 %			
Yes = 1	292	26.9			

Source of data: *Alaska State Trooper data (2004)*

Victim Characteristics

In over half of the cases, the victim was Caucasian (52%) and under 32 years of age (52%). The victim was female in 73 percent of the cases. Most victims (66%) did not use alcohol or drugs prior to the assault in domestic violence incident. Seventy-three percent of the victims contacted no one prior to reporting the assault to law enforcement. In the majority of cases (96%), the victim was present upon Trooper arrival. The victim was interviewed in 97 percent of cases, and most victims (86%) cooperated with the AST investigation. In 60 percent of cases victims suffered documented injuries as a result of the assault in domestic violence incident, but in 40 percent of cases victims did not suffer injuries or their injuries were not documented in the report. (See Table 3.)

Suspect Characteristics

Just over half of the suspects (52%) were Caucasian. Seventy-nine percent were male and 52 percent were in the 12 to 32 years age group. Fifty-eight percent of suspects used alcohol or drugs prior to the assault. Most suspects (77%) were present upon the Trooper's arrival at the scene and were interviewed as part of the Trooper's investigation. The suspect admitted guilt or gave a full confession in 57 percent of cases. In 7 percent of cases the suspect was known to have violated a Domestic Violence Protection Order (DVPO), conditions of release, or conditions of probation. (See Table 4.)

Victim-Suspect Characteristics

In terms of victim-suspect relationship, 67 percent of assaults in domestic violence

Table 4. Coding for and Frequencies of Suspect Characteristics Predicting Legal Resolutions

Variables	Reports N	Reports %	Variables	Reports N	Reports %

Table 5. Coding for and Frequencies of Victim-Suspect Characteristics Predicting Legal Resolutions

Variables	Reports N	Reports %
Nature of relationship		
Other family = 0	357	32.7 %
Intimate partners = 1	763	67.3
Living arrangements		
Common = 0	802	75.3 %
Separate = 1	263	24.7
Victim suspect race combination		
Intraracial = 0	925	84.6 %
Interracial = 1	169	15.4
Victim suspect age combination		
Intraage group = 0	447	41.2 %
Interage group = 1	638	58.8

Source of data: *Alaska State Trooper data (2004)*

incidents involved intimate partners while 33 percent involved other family members. Victims and suspects shared common living arrangements in 75 percent of cases. Most assaults in domestic violence incidents (85%) were intraracial—that is between a victim and a suspect of the same race—and 15 percent of cases were interracial—between persons of different races. In 59 percent of cases the victim and suspect were in a different age group. (See Table 5.)

Incident Characteristics

A number of incident characteristics were examined as predictors of prosecution. In 64 percent of cases the victim and suspect came into contact by invitation (either from the victim or the suspect) while in 36 percent of cases the suspect made a forced entry. In 41 percent of cases, a child was present at the time of the assault in domestic violence incident. Suspects used a weapon in five percent of cases. Twenty-eight percent of victims responded aggressively to the domestic violence assault. Victims remained at the scene following 75 percent of assaults in domestic violence incidents. Alcohol and/or drug use was a reported precipitating factor that led to the assault in domestic violence incident in 22 percent of cases, and jealousy was a reported precipitating

*Please see **DV cases**, page 10*

Table 6. Coding for and Frequencies of Incident Characteristics Predicting Legal Resolutions

Variables	Reports N	Reports %	Variables	Reports N	Reports %
Method of contact			**Precipitating factors 1**		
By invitation = 0	93	63.7 %	Not alcohol or drugs = 0	743	77.9 %

DV cases

(continued from page 9)

factor in 14 percent of cases. The majority of assaults in domestic violence incidents (87%) took place in a private location and involved physical assaults (89%). Stalking behavior was reported in 7 percent of cases. (See Table 6.)

Predicting Legal Resolutions

Several characteristics of domestic violence incidents were examined as potential predictors of referral, acceptance for prosecution, and conviction: reports to law enforcement of the domestic violence incident, suspects, victims, victim-suspect relationships, and incidents. The analyses involved a three-phase procedure for each type of legal resolution (referral, acceptance, and conviction). In the first phase, individual characteristics within each category were analyzed as predictors of the three legal resolutions using bivariate logistic regression. In the second phase, significant individual predictors of legal resolutions in each category (reports, suspects, victims, etc.) were analyzed using multivariate logistic regression. In the third phase, characteristics found to be significant predictors from phase two, were analyzed across all five categories using multivariate logistic regression to produce a full model of predictors.

Referral

Characteristics that did not predict referral of cases for prosecution. The full model used to predict referral of cases for prosecution included several predictor characteristics found to be significant when analyzed with other characteristics from their respective categories (i.e., reports, suspect, victims, etc.), but not all of these were found to be significant predictors of referral when examined individually and included in the full model. Characteristics analyzed in the full model that did not significantly predict referral of cases for prosecution included: the person who reported the incident (victim or other), the first agency notified (AST, VPSO, VPO, or local police department), the total number of charges associated with the report (one or more than one), victim use of alcohol or drugs, victim injuries, the racial combination of the victim and suspect (intraracial or interracial), the victim's response characteristic (stayed or left the scene), the type of assault (physical or not physical), and precipitating factors to the assault in domestic violence incident (did or did not involve alcohol and/or drugs, did or did not involve jealousy).

Characteristics significantly predicting referral of cases for prosecution. The characteristics predicting referral of domestic violence incidents for prosecution are presented in order of greatest impact to least impact on referral. Each of these characteristics was found to significantly predict referral of domestic violence incidents for prosecution when the other predictive characteristics included in the model were held constant. Cases where the victim was interviewed by a Trooper were 5.8 times more likely to be referred for prosecution than cases where the victim was not interviewed by a Trooper. Cases involving domestic violence incidents that took place between a suspect and victim who were intimate partners were 2.9 times more likely to be referred for prosecution than cases where the victim and suspect were not intimate partners (i.e., family members such as siblings, parent/child, or extended family, etc.). When the suspect was reported to have used alcohol or drugs prior to the domestic violence incident, cases were 2.5 times more likely to be referred for prosecution than in cases with no report of a suspect's use of alcohol and/or drugs. Cases that were closed relatively quickly (less than or equal to a median of 19 days) were 2.3 times more likely to be referred for prosecution than cases that took longer to close. Cases in which the victim and suspect lived together were 2.1 times more likely to be referred for prosecution than cases where the victim and suspect were not cohabiting. Cases with relatively older suspects (older than the mean of 32 years) were two times more likely to be referred for prosecution than cases with younger suspects. (See Table 7.)

Table 7. Characteristics Significantly Predicting Referral for Prosecution

Variable	b	SE(b)	P	Exp(b)
Victim was interviewed	1.757	0.603	0.004	5.794
Intimate partner relationship	1.071	0.205	0.000	2.918
Suspect used alcohol or drugs	0.905	0.226	0.000	2.473
Time to case closure less than or equal to median	0.826	0.199	0.000	2.284
Common living arrangement	0.722	0.239	0.003	2.058
Suspect 33 years or older	0.707	0.203	0.000	2.028

Log Likelihood = 621.10; χ^2 = 117.10; $p < .05$.

Source of data: *Alaska State Trooper data (2004)*

Acceptance

Characteristics that did not predict acceptance of cases for prosecution. Characteristics analyzed in the full model that did not significantly predict acceptance of cases for prosecution included: the time between the incident and the report (one or more days or the same day on which it occurred), the first agency notified (AST, VPSO, VPO, or local police department), the suspect's use or non-use of alcohol or drugs, the victim's gender (female or male), the victim's race (minority or Caucasian), the victim and suspect relationship (intimate partners or other family), the victim and suspect's living arrangement (common or separate), and a precipitating factor to the assault in domestic violence incident (did or did not involve alcohol and/or drugs, did or did not involve jealousy).

Characteristics significantly predicting acceptance of cases for prosecution. The characteristics that significantly predicted whether cases were referred for prosecution were *not* the same characteristics that predicted whether referred cases were *accepted* for prosecution. Each of the following characteristics was found to significantly predict acceptance of domestic violence incidents for prosecution when the other predictive characteristics included in the model were held constant. One of the strongest predictors of acceptance

Table 8. Characteristics Significantly Predicting Acceptance for Prosecution

Variable	b	SE(b)	P	Exp(b)
Suspect admitted guilt or gave a full confession	0.784	0.327	0.003	3.114
Total charges greater than one	0.988	0.351	0.005	2.686
Person reporting was not the victim	0.841	0.351	0.017	2.318
Victim suffered injury	0.839	0.324	0.010	2.315
Child was present	0.825	0.354	0.020	2.282
Suspect male	1.136	0.381	0.016	2.191

Log Likelihood = 243.91; χ^2 = 64.02; $p < .05$.

Source of data: *Alaska State Trooper data (2004)*

for prosecution was whether the suspect admitted guilt or gave a full confession. Cases where suspects admitted guilt or gave a full confession were 3.1 times more likely to be accepted for prosecution, and cases with relatively more charges (cases with more than one charge) were 2.7 times more likely to be accepted for prosecution than cases with only a single charge. When the initial report of domestic violence was made by a person other than the victim, cases were 2.3 times more likely to be accepted for prosecution. Cases in which the victim suffered injury were 2.3 times more likely to be accepted for prosecution than cases in which the victim did not suffer injury. Cases in which a child was reportedly present were 2.3 times more likely to be accepted for prosecution than cases with no report of a child's presence. If the suspect was male, the case was 2.2 times more likely to be accepted for prosecution than if the suspect was female. (See Table 8.)

Table 9. Characteristics Significantly Predicting Conviction

Variable	b	SE(b)	P	Exp(b)
Reported to VPSO, VPO, or other	0.862	0.363	0.018	2.367
Suspect used alcohol or drugs	0.841	0.230	0.000	2.319
Total charges greater than one	0.584	0.237	0.014	1.794
Suspect admitted guilt or gave a full confession	0.561	0.228	0.014	1.752

Log Likelihood = 93.21; χ^2 = 33.57; $p < .05$.

Source of data: *Alaska State Trooper data (2004)*

Conviction

Characteristics that did not predict conviction. One characteristic analyzed in the full model that did not significantly predict conviction was the suspect's age (12 to 32 years *or* 33 years and older).

Characteristics significantly predicting conviction. The characteristics that predicted conviction in cases of domestic violence incidents included some characteristics that predicted referral and acceptance. It is important to note that the term "conviction" used in this article refers to *any* conviction for *any* charge (not necessarily a domestic violence charge), and includes plea bargains, guilty pleas, and convictions resulting from a bench or jury trial. Each of the following characteristics was found to significantly predict conviction of domestic violence incidents when the other predictive characteristics included in the model were held constant. Cases first reported to a VPSO, a VPO, or a local police department were 2.4 times more likely to result in a conviction than cases first reported to AST. Cases in which the suspect was reported to have used alcohol or drugs prior to the domestic violence incident were 2.3 times more likely to result in conviction than cases with no report of a suspect's alcohol or drug use. Cases were 1.8 times more likely to result in a conviction if there was more than one charge involved, or if the suspect admitted guilt or gave a full confession. (See Table 9.)

Conclusion

Based on our analyses, a number of report, victim, suspect, victim-suspect, and incident characteristics predict prosecution of assaults in domestic violence incidents reported to AST. The identification of these characteristics creates an opportunity to modify policy and/or practice in a way that enhances prosecution of these types of assaults. In the development of policy and/or practice changes, the impact of characteristics predicting prosecution at *each level* (referral, acceptance, and conviction) is equally important to consider: cases must progress through the initial stages of prosecution in order to result in conviction. Therefore, the majority of characteristics that predicted conviction also predicted acceptance or referral of cases.

The presence of certain characteristics seemed to increase the gravity of a case and heighten the likelihood of prosecution. Cases more likely to be prosecuted include those in which the victim was injured, there was more than one charge, and/or the report to law enforcement was made by someone other than the victim. Policies for investigation of assaults in domestic violence incidents should ensure extensive documentation of victim's injuries, corroboration of the victim's description of events, and discovery of all associated, justified charges. A victim's injuries and a report by someone other than the victim can corroborate the victim's description of events. Victim interviews and suspect admission of guilt also made prosecution more likely. Rates of victim interviews by Troopers were high (97%), but additional efforts could be made to interview a larger percentage of known suspects. (77% of suspects were interviewed.) It is important to train law enforcement officers to conduct thorough suspect interviews and interrogations and to employ reliable interviewing techniques that encourage suspects to admit guilt or give a full confession.

Other cases more likely to result in prosecution involved suspects who used alcohol or drugs prior to the assault in domestic violence incident. Therefore, it is essential for Troopers to document suspects' substance use every time it is indicated. Also, cases involving male suspects and assaults between intimate partners who live together were more likely to be prosecuted than other cases. As noted previously, the definition of domestic violence in Alaska statute covers a range of relationships. Troopers make arrests for assaults in domestic violence incidents where the victim-suspect relationship is one of several identified in the statute. However, it is more likely that domestic violence assaults between intimate partners who live together will be prosecuted than assaults between persons involved in other statutorily defined relationships. This may suggest a tendency on the part of prosecutors to view intimate partner domestic violence as an offense warranting more urgent prosecution

DV cases

(continued from page 11)

than other forms of domestic violence.

In terms of conviction, assaults in domestic violence incidents that took place in communities with a VPSO or a VPO had a greater likelihood of resulting in conviction than other cases. This supports similar findings identifying predictors of prosecution and conviction in sexual assault cases reported to AST, as well as findings noted by Wood, et al. (see "Attrition in Cases of Violence Against Women Reported to the Alaska State Troopers" in this issue), and findings by Wood and Rosay (see "Case Attrition of Sexual Violence Offenses: Empirical Findings" in the Spring/Summer 2008 issue of the *Alaska Justice Forum*). Increased likelihood of prosecution and conviction for cases first reported to a VPSO or a VPO highlights the importance of the VPSO and VPO programs. This finding suggests that the resources provided by these first responders (i.e., reduced response time and enhanced investigation) increases conviction of assaults in domestic violence incidents. The impact of VPSO and VPO programs on conviction, as well as factors that make intimate partner violence different from other forms of domestic violence, should be examined further. Additional studies could assist in better understanding the variation in prosecution of domestic violence assault cases and the policies and practices that enhance prosecution and conviction rates.

Attrition in Cases of Violence Against Women Reported to the Alaska State Troopers

Darryl S. Wood, André B. Rosay, Marny Rivera, and Katherine TePas

The statutory requirement that arrests be made for all crimes involving domestic violence (Alaska Statute 18.65.530) is an important dimension of the state's efforts to reduce violent victimization occurring among intimate partners. This policy is rooted in research that suggests mandatory arrest has a specific deterrent effect in cases of misdemeanor assault committed by males against their female intimate partners. Although there is reason to believe mandatory arrest may reduce re-victimization in its own right, the impact of the policy upon further criminal justice system intervention is largely unknown. On the one hand, it is possible that caseload pressures make it difficult for prosecutors to continue with zero-tolerance in intimate partner violence (IPV) cases. But it is also possible that mandatory arrest sets the tone for continual rigorous enforcement of IPV assault cases throughout the remainder of the criminal justice process. In this article we consider police, prosecutor, and court decision-making about IPV cases initially dealt with by the Alaska State Troopers (AST or Troopers) in 2004.

Information gathered from AST and Alaska Department of Law (DOL) case files was analyzed for this article to examine IPV assault case processing decisions. Two basic types of analyses were conducted. We first charted the processing of IPV assault cases as they made their way from the Troopers through the court system. We also used commonly employed categories (i.e., Alaska Native vs. Non-Native and isolated location vs. non-isolated location) to determine if there were variations in the processing of IPV cases relative to the victims' race or geographic location. Together, these analyses allow us (1) to understand how likely it is that IPV assault cases from the Troopers' area of responsibility are fully prosecuted, and (2) to begin to determine if particular aspects of the criminal justice environment have an impact upon the likelihood that IPV assault cases are dealt with fully.

The results presented in this article allow us to consider the attrition of cases of IPV assault reported to the Troopers and prosecuted by the DOL. For our purposes here, *case attrition* refers to the manner in which criminal cases are screened out of the criminal justice process as they are considered at successive decision making points. By definition, for a specific offense type, the number of cases resulting in conviction is smaller than the number of prosecutions which, in turn, is smaller than the number of arrests. Put another way, the greater the proportion of cases screened out of the process, the higher the rate of case attrition.

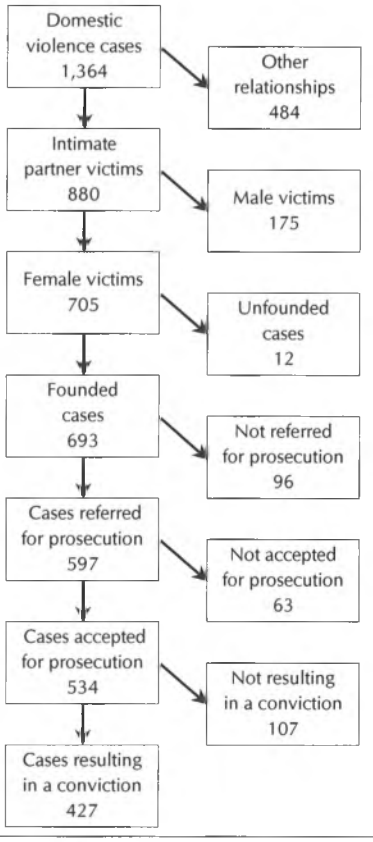
This article focuses upon IPV rather than *domestic violence* because the former is more indicative of the particularly pernicious power-based relationship violence that police and prosecutors have perpetually struggled against and that has served as the impetus for mandatory arrest policies. Under Alaska state law (§18.66.990), domestic violence is inclusive of all violent offenses committed by one household member against another household member where *household members* are broadly defined to include individuals who are related to one-another through common ancestry or marriage, unrelated individuals who are roommates or live-in caretakers, and individuals who are or were intimate partners (i.e., suspects and victims involved together in marital, dating, and/or sexual relationships). From a conceptual standpoint, it makes sense to consider IPV assault separately because it is qualitatively different compared to other types of violence that fall under the umbrella of domestic violence (e.g., child abuse, elder abuse, teenage brothers engaged in fisticuffs) in terms of its etiology and in terms of the nature and severity of official responses.

Likewise, the results presented below focus only on assault cases involving female victims because of the dissimilarities in the IPV assault committed against men compared to that committed against women. (IPV is not a purely heterosexual phenomenon. The analyses presented below include the cases of three women who reported being assaulted by their female partners.) Even though both women and men are violent toward one another when in intimate relationships, the character of women's violence against their male partners is substantially different than men's violence against their female partners in terms of its purpose and its potential for physical harm. Generally speaking, men are much more likely than women to employ physical violence in an instrumental fashion, using it as one method among many to maintain power and control over an intimate partner. Furthermore, the likelihood of physical harm is substantially higher in IPV assault against female victims relative to that of male victims because of the physiological differences between the sexes in terms of size and strength. Given these differences we would expect the victim's sex to have a differential impact on the probability that cases would be screened out during the criminal justice process.

Overall Attrition of IPV Cases

In Figure 1 we consider IPV assault cases reported to AST in 2004 as they made their way through the criminal justice process. First, we see that IPV assault cases made up a majority of the assaults classified as domestic violence. Roughly two-thirds of reported domestic violence cases (65%) involved an assault by one member of an intimate relationship against another member. The remainder of the domestic violence cases included victims and suspects that were connected by some other form of

Figure 1. Processing of Cases of Intimate Partner Violence Against Women Reported to the Alaska State Troopers, 2004



household membership. Of the IPV assault cases reported to police, the large majority (80%) involved a female victim.

Nearly all of the IPV assault cases against female victims that came to the Troopers' attention were *founded* (i.e., deemed to have actually occurred and classified as "crimes known to the police"). Less than two percent of the time was an IPV assault case against a female victim classified as unfounded after further investigation by AST. Some comparison figures are found in Alaska Department of Public Safety data, *Crime Reported in Alaska, 2004*. When compared to the founding rates for all assault cases reported to AST in 2004 regardless of victim-suspect relationship, IPV assault cases against female victims were more likely than simple assaults to be founded (87%) and just as likely as aggravated assaults to be founded (97%).

After establishing that an assault did occur, the next two steps in the process involve decisions about carrying a case forward for prosecution. An investigating Trooper first has to decide whether to refer the case to DOL and then, once referred, a DOL attorney has to choose to accept the case and proceed with prosecution. We see in Figure 1 that a large majority (86%) of IPV assault cases that were known to AST were referred to DOL for prosecution and a slightly larger proportion of those referred cases were accepted by DOL attorneys for further adjudication. Ultimately, of the cases that DOL attorneys accepted for prosecution, most (80%) resulted in a conviction.

To put these rates of prosecution and conviction into context, comparisons can be drawn with similar rates found for other U.S. jurisdictions as published in a recent meta-analysis by Joel Garner and Christopher Maxwell in *Criminal Justice Review* 34(1) in 2009. By any measure, it appears that there is substantially *less* case attrition for IPV assaults reported to AST than any other place in the U.S. where it has been studied. For example, across the studies considered by Garner and Maxwell, the proportion of IPV assault cases known to the police that were not accepted for prosecution was 72 percent. In comparison, only 23 percent of the IPV assault cases known to AST in 2004 were not accepted for prosecution. When the basis of comparison is acquittals per prosecutions, we see that DOL attorneys were much less likely to lose IPV assault cases than what has been reported elsewhere; only 20 percent of the IPV assault cases prosecuted by DOL resulted in acquittal while, on average, half of the cases prosecuted elsewhere in the U.S. did not result in conviction. Overall, of the IPV assaults known to the police, the cases dealt with by AST and DOL were much more likely to result in conviction than what has been found in other U.S. jurisdictions. In 2004, 61 percent of all IPV assault cases known to AST ultimately resulted in a conviction whereas the average conviction rate for founded cases in Garner and Maxwell's meta-analysis was 14 percent. Comparatively speaking, the AST/DOL conviction rate in 2004 was four times greater than is typical in the U.S. With such an extreme difference, it is no wonder that the prosecution and conviction rates shown in Figure 1 rank among or above the highest rates found in individual studies reviewed by Garner and Maxwell. While the DOL rate of prosecuted cases resulting in conviction was surpassed in a few jurisdictions, the AST/DOL rate of prosecutions per founded case and the AST/DOL rate of convictions per founded case were higher than what was reported in any of the American studies considered by Garner and Maxwell. Based upon these comparisons, it is fair to say that the case attrition rate of IPV assaults dealt with by AST and DOL in 2004 was among the lowest anywhere in the U.S.

Comparisons of Attrition by Victim Race and Location

To consider disparities in prosecution rates, we made comparisons of case attrition in terms of the victims' race and in terms of the geographic location where the IPV assault took place. Given the scrutiny placed on the State of Alaska's response to violence against Alaska Native women in rural villages (e.g., *AITC v. Alaska,* 110 P.3d 947, 2005 or Amnesty International's *Maze of Injustice*), these comparisons were made between the cases of Alaska Native and non-Native victims and between the cases that occurred in isolated villages versus cases that occurred in places that are less remote. These results have been used to argue that there is unequal enforcement by the State of Alaska in cases of IPV assault against Alaska Native women.

To test this assertion, we first examined the differences in case attrition of cases of Alaska Native victims compared to cases of non-Native victims. The first two rows of figures in Table 1 allow comparisons between the cases of female Alaska Native and non-Native IPV assault victims in terms of the proportion of all cases reported that were founded, that were referred for prosecution, that were accepted for prosecution, and that resulted in a conviction. With a lack of statistically significant differences between the two groups, it appears that Alaska Native victims' reports of IPV assault are just as likely as non-Native victims' reports of IPV assault to be founded and referred for prosecution by AST, to be accepted for prosecution by DOL, and to result in conviction in state court. In the third and fourth rows of Table 1 the two groups are compared in terms of the proportion of founded cases that resulted in referral for prosecution, acceptance for prosecution, and conviction. Although there was little difference between the referral and acceptance rates for founded cases reported by the two groups of victims, founded IPV assault cases against Alaska Native victims were actually more likely to result in a conviction relative to founded IPV

*Please see **Attrition**, page 4*

Table 1. Attrition of Cases of Intimate Partner Assault Against Women Reported to the Alaska State Troopers, Alaska Native vs. Non-Native Victims, 2004

Total possible cases		Number & percent founded		Number & percent referred		Number & percent accepted		Number & percent convicted	
Alaska Native	Non-Native	Alaska Native	Non-Native	Alaska Native	Non-Native	Alaska Native	Non-Native	Alaska Native	Non-Native
All cases reported									
333	372	325	368	275	322	251	283	213	214
100.0%	100.0%	97.6%	98.9%	82.6%	86.6%	75.4%	76.1%	64.0%	57.5%
Founded cases									
325	368			275	322	251	283	**213**	**214**
100.0%	100.0%			84.6%	87.5%	77.2%	76.9%	**65.5%**	**58.2%**
Referred cases									
275	322					251	283	**213**	**214**
100.0%	100.0%					91.3%	87.9%	**77.5%**	**66.5%**
Accepted cases									
251	283							**213**	**214**
100.0%	100.0%							**84.9%**	**75.6%**

Note: **Bold** type indicates difference between Alaska Native and non-Native victims is statistically significant at the $p < .05$ level.

Attrition

(continued from page 3)

assault cases against non-Native victims. The fifth and sixth rows of figures in Table 1 let us compare the rates of acceptance for prosecution and conviction for those cases that were referred by AST to DOL for prosecution. Once again, the difference in the acceptance rates of referred cases was not statistically significant whereas the conviction rates of the referred cases of Alaska Native victims was higher than the referred cases of non-Native victims. A similar result is found in the bottom two rows of Table 1 in which a greater proportion of cases of Alaska Native victims that were accepted for prosecution resulted in conviction when compared to the corresponding proportion for non-Native victims. Overall, the results of Table 1 indicate that Alaska Native and non-Native IPV assault victims' cases are processed at similar rates and that the only exception is that IPV assault cases are more likely to result in a conviction when the victim is Alaska Native.

Table 2. Attrition of Cases of Intimate Partner Assault Against Women Reported to the Alaska State Troopers, Victims from Isolated vs. Non-Isolated Communities, 2004

Total possible cases		Number & percent founded		Number & percent referred		Number & percent accepted		Number & percent convicted	
Isolated	Non-isolated	Isolated	Non-isolated	Isolated	Non-isolated	Isolated	Non-isolated	Isolated	Non-isolated
All cases reported									
221	484	215	478	179	418	170	364	**149**	**278**
100.0%	100.0%	97.3%	98.8%	81.0%	86.4%	76.9%	75.2%	**67.4%**	**57.4%**

Accepted cases									
170	364							**149**	**278**
100.0%	100.0%							**87.6%**	**76.4%**

Note: **Bold** type indicates difference between victims from isolated and non-isolated communities is statistically significant at the $p < .05$ level.

To consider the effect of geographic isolation on case attrition, we made comparisons in terms of whether the IPV assault occurred in a village that was difficult for AST to reach to conduct an investigation. Villages were considered isolated if they did not have a local AST post or if they could not be reached by the Troopers from a post via automobile. The results of these comparisons are made in Table 2. In many ways, the results for an isolated/non-isolated comparison mirror the results presented in Table 1 regarding the differences in the processing of Alaska Native and non-Native victims' cases. First, the results indicate that isolation did not have an effect on the proportion of cases that were founded or that were referred for prosecution. In other words, it appears that the difficulty of reaching a village to make an investigation did not make it less likely that an IPV assault case would be carried forward by AST to DOL for prosecution. Next, there is some indication that DOL is more likely to accept IPV assault cases that occurred in isolated villages as compared to those cases that occurred in non-isolated locales; we see in Table 2 that there was a statistically significant difference in the proportion of cases referred by AST that were accepted for prosecution and that it was the cases from the isolated villages that were least likely to be screened out at that point. Finally, the results in Table 2 indicate that the conviction rate for cases that occurred in isolated villages was higher than for cases from non-isolated villages for all possible bases of calculation (i.e., convictions per reported case, convictions per founded case, convictions per case referred for prosecution, and convictions per case accepted for prosecution). Taken as a whole, it appears that the isolation of a village where an IPV assault occurs does not increase the likelihood of case attrition. If anything, these results indicate that IPV assault cases from isolated villages are not neglected by the State of Alaska but are instead more likely to be fully prosecuted.

Conclusion

Although Alaska's mandatory arrest law is the only policy specifically requiring official response to IPV cases, it appears that the law's spirit of full-enforcement guided other decisions regarding IPV cases as they continued through the criminal justice process in 2004. And while attrition still occurred in the IPV cases handled by AST and the DOL, it happened at a rate that was substantially less than what has been found outside of Alaska. By most standards, the fact that at any given decision point there was less than a one-in-five chance that a case would be screened out of the criminal justice process is an indication that IPV is taken seriously in rural Alaska and that AST and the DOL are willing and able to deal with the cases brought to their attention. Furthermore, this appears to be as true for Alaska Native victims as it is for non-Native victims and it does not seem to be affected by the difficulties of travel to conduct investigations.

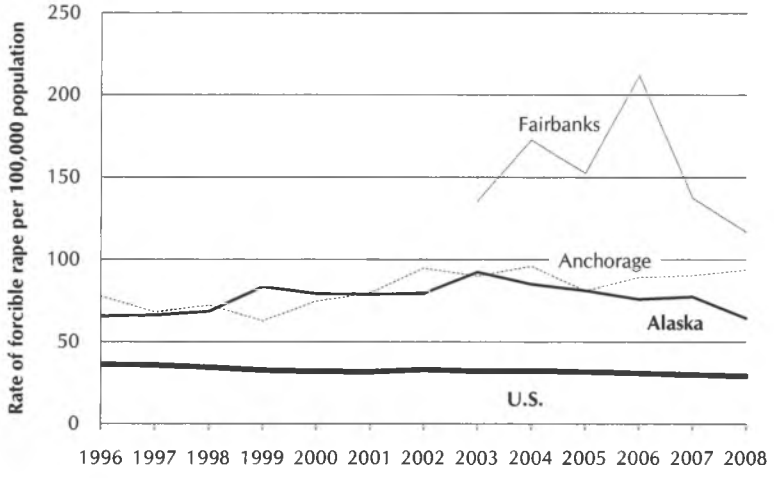
Reducing Violence Against Women in Alaska

Alaska has long been plagued by astonishingly high rates of violence against women. National statistics on forcible rapes reported to law enforcement provide one example. Relative to the average U.S. rate from 2003 to 2008, the average Alaska rate was 2.6 times higher, the average Anchorage rate was 2.9 times higher, and the average Fairbanks rate was 5.0 times higher. Alaska has the highest rate of forcible rape reported to law enforcement out of all U.S states. While changing these trends is a daunting task, several initiatives are currently being considered. In chronological order, they include recommendations from the Alaska Senate Judiciary Committee and initiatives from Governor Sean Parnell.

Figure 1. Rates of Forcible Rape Reported to Law Enforcement in the U.S., Alaska, Anchorage, and Fairbanks, 1996–2008



Source of data: *Uniform Crime Reports, 1996–2008*

Alaska Senate Judiciary Committee Recommendations to Reduce Sexual Assault in Alaska

Four major areas are outlined in the recommendations: (1) getting better data on sexual assault, (2) increasing the number of successful prosecutions, (3) addressing the alcohol and sexual assault nexus, and (4) reducing recidivism by known sex offenders.

A brief summary of the recommendations follows:

- Improve data systems to track sexual assault cases statewide from report to conviction.
- Fund a victimization study to determine the actual rates of both reported and unreported sexual assaults.
- Increase the number of villages with local law enforcement through the Village Public Safety Officer (VPSO) program.
- Consider grant funding for local hospitals to provide qualified Sexual Assault Nurse Examiners (SANEs) and continue to support the cost of existing programs.
- Review ways to increase the State Crime Lab's ability to process DNA evidence in a timely way.
- Continue to support, as a state, programs and policies to reduce alcohol consumption.
- Address alcohol use specifically, and its potential negative impact on personal safety, in education programs about sexual assault awareness and prevention.
- Continue to fund and expand Alaska sex offender management programs.
- Expand Alaska's Internet Crimes Against Children Task Force which locates offenders who are looking for victims using the internet.

Governor Sean Parnell's Initiative to Reduce Domestic Violence and Sexual Assault

Three major areas are outlined in the initiative: (1) putting abusers behind bars, (2) helping victims heal, and (3) preventing abuse.

A brief summary of the recommendations follows:

- Launch a public education campaign encouraging Alaska's men to "Choose Respect."
- Increase law enforcement presence in every community that desires it, with new Village Public Safety Officers (VPSOs) and Alaska State Troopers.
- Fund specialized domestic violence/sexual assault training across multiple disciplines.
- Toughen penalties for sexual assault crimes, and toughen guidelines for prosecutors.
- Strengthen sex offender registry requirements.
- Expand prisoner re-entry programs to reduce recidivism among offenders.
- Increase support for victims of abuse including funding for shelters and the availability of *pro bono* legal services.
- Create a position within the Alaska Department of Law to coordinate state, federal, tribal, and non-profit domestic violence and sexual assault programs.
- Work with youth, community leaders, private sector, and religious organizations to raise awareness and develop prevention strategies.

For additional information, see the UAA Justice Center's violence against women webpage: (http://justice.uaa.alaska.edu/vaw/), the Alaska Senate Judiciary Committee's "Report and Recommendations: Reducing Sexual Assault in Alaska" (http://www.aksenate.org/french/101609_Senate_Judiciary_report_on_sexual_assault.pdf), and Governor Sean Parnell's "Choose Respect" Initiative (http://gov.state.ak.us/pdf/DVSA%20Fact%20Sheet%20final.pdf).

Visiting Faculty

Dr. Adrienne Freng, Associate Professor in the Department of Criminal Justice at the University of Wyoming, joins the Justice Center as Visiting Faculty for the Spring 2010 semester. Dr. Freng received her Ph.D. in sociology from the University of Nebraska-Lincoln. Her research areas include juvenile justice, gangs, Native American justice issues, and research methods. Dr. Freng's experience includes serving as a counselor in a group home for delinquent boys and as an intern probation officer.

Animal Abuse and Domestic Violence

Concern that acts of animal abuse are connected with or are predictors of domestic violence prompted a number of specific research studies in the 1990s. This early work focused on describing interviews with women in battered women's shelters and highlighted the frequency with which women reported abuse of pets by their partners. The interviews documented a high rate of pet abuse and appeared to indicate that animal abuse in the home and concern for pets affected *if* and *when* a woman sought assistance at a shelter—particularly because shelters did not normally accept pets.

As more attention was given to animal abuse and its impact in the context of domestic violence assaults, additional studies were undertaken. Frank Ascione discussed the limitations of some of these past studies in his article, "Emerging Research on Animal Abuse as a Risk Factor for Intimate Partner Violence" in the Civic Research Institute's 2007 publication, *Intimate Partner Violence*. He noted that although twelve different studies found (1) a high rate of pet ownership by domestic violence victims in shelters, (2) a substantial rate of children's exposure to pet abuse, and (3) clear indications that domestic violence victims' concern for pets affected their decision to stay in or leave a relationship with a batterer, more research is needed that includes women in domestic violence situations who have not chosen to go to a shelter, in addition to women in shelters. In response to the concern expressed by battered women for their pets, many areas developed "safe haven" programs for free fostering of pets of victims of domestic violence. Anchorage is currently the only area in Alaska with a "safe haven" program. It is administered by Friends of Pets, a local nonprofit animal welfare group, in collaboration with the Abused Women's Aid in Crisis (AWAIC) shelter. Another local nonprofit, the Eva Foundation Pet's Program, provides post-shelter transition services to domestic violence victims and their pets.

In addition, since 2006 ten states have enacted domestic violence protective orders covering pets: California, Colorado, Connecticut, Illinois, Louisiana, Maine, Nevada, New York, Tennessee, and Vermont.

Research involving a larger sample population of women was reported by Ascione, et al. in 2007 in *Violence Against Women*, "Battered Pets and Domestic Violence: Animal Abuse Reported by Women Experiencing Intimate Partner Violence and Nonabused Women." The findings of this study agreed with earlier research about the high rate of pet abuse reported by victims of intimate partner violence (IPV). Responses showed that women in domestic violence shelters were nearly 11 times more likely to report that their partner had engaged in pet abuse than women who said they had not experienced intimate partner violence. This study again stressed the need for further research on co-occurring pet abuse and IPV with larger and more diverse populations, i.e., urban, suburban, and rural victims of intimate partner violence, as well as non-victims of IPV.

Catherine Simmons and Peter Lehman addressed some of these issues in a 2007 *Journal of Interpersonal Violence* article, "Exploring the Link Between Pet Abuse and Controlling Behaviors in Violent Relationships." In their study of 1,283 women who owned pets and were sheltered at an urban domestic violence center in Texas between 1998 and 2002, they concluded that "[m]en who abuse the family pet appear to be more dangerous than men who do not." The authors did not find that pet abuse was always a form of controlling behavior in incidents of domestic violence assault. However, they did conclude:

> Despite the limitations of this study, it is clear that animal cruelty is an important factor for domestic violence workers to address in assessment and treatment of both victim and perpetrator populations. Batterers who also abuse their pets are both more controlling and use more dangerous forms of violence than batterers who do not. Therefore, addressing whether pet abuse has occurred in the home can help workers in the domestic violence field better understand the behavior of the batterer and the overall risk they present to their partner.

Animal abuse is one factor in the complex dynamic of intimate partner violence, and can be used by law enforcement and domestic violence advocates in assessing risk. In 2008, the Anchorage Police Department (APD) began a program to target animal abuse and to look at its connection to domestic violence. Detective Jackie Conn was assigned as the liaison to the Anchorage Animal Care and Control Center and received training from the Law Enforcement Training Institute National Cruelty Investigations School and from the First Strike program developed by the Humane Society of the United States to raise awareness about the connection between animal cruelty and other violent crime. Detective Conn now trains APD personnel in recognizing animal abuse, and relating it to the possible presence of other types of abuse in the home. She works closely with Alaska Department of Law Assistant District Attorney Joan Wilson who is regularly assigned the prosecution of animal abuse

cases. For the period 2002–2009, 121 misdemeanor animal cruelty cases under Alaska Statute 11.61.140 and 11.61.145 were referred and 94 prosecuted. During the same period, one felony case was referred and prosecuted. Case statistics are also being compiled to better understand the relationship between domestic violence and animal abuse.

Leading Causes of Death

A look at recent data on leading causes of death in Alaska and the U.S. shows that malignant neoplasms (cancer) and heart disease rank as the top two causes. Although intentional self-harm (suicide) and assault (homicide) do not rank in the U.S. top ten leading causes of death, they have ranked as leading causes of death in Alaska for many years. A comparison of rankings of suicide and homicide as causes of death for specific age groups in Alaska and the U.S. reveals some similarities in trends.

In 2008 in Alaska, suicide was ranked number 6 among the top ten causes of death for the entire population. Suicide has been ranked number 5 or 6 consistently for the past decade. Homicide has been reported as the number 8 cause of death in 1999, number 10 in 2001, and number 10 again in 2007. The rankings for the leading causes of death by specific age group in Alaska show that suicide and homicide are in the top five for each age group up to the age of 44. In Alaska, and the nation as a whole, people aged 15–34 are more likely to die in an accident, at the hands of another, or by suicide, than by cancer or heart disease. For the period 2005–2007, suicide and homicide were the second and third leading causes of death for both 15–24 and 25–34 year olds. Suicide was the second leading cause of death for 35–44 year olds, and homicide was fifth. Among 45–54 year olds, suicide was the fourth leading cause of death.

Nationally, suicide and homicide are not among the ten leading causes of death according to the most current final data available: 2006. However, suicide ranked number 11 in causes of death for the overall population for 2006; homicide ranked 15.

In the U.S. in 2006, homicide and suicide were the second and third leading causes of death, respectively, for 15–24 year olds, while for 25–34 year olds, suicide ranked second and homicide third. Suicide was the fourth leading cause of death for 35–44 year olds, and the fifth leading cause for 45–54 year olds. These rankings mirror those of Alaska for those aged 15–44, where both suicide and assault were in the top five leading causes of death. Suicide was one of the top five causes of death for 45–54 year olds.

This high ranking of suicide as a cause of death for 15–44 year olds is also seen globally. According to the World Health Organization, suicide is among the top three leading causes of death in 15-44 year olds. For the worldwide population, the top two leading causes of death are coronary heart disease, and stroke and other cerebrovascular diseases.

The leading causes of death for the overall population continue to be related to diseases of the body; however, the growing rate of suicide among young people and the suicide rate among other age groups, as well as the rate of homicide, are the focus of national and international study and prevention programs.

Abstract: *This study examined 1,281 cases with an assault charge involving domestic violence reported to Alaska State Troopers in 2004, and excluded any cases reported to local or municipal departments.*

- *Eighty-two percent of reports were handled by three detachment areas: 32% in C – Western Alaska, 29% in D – Interior Alaska, and 22% in B – Southcentral Alaska. Troopers received 80% of the reports, while 20% were received by Village Police Officers, Village Public Safety Officers, or Tribal Police Officers. Eighty-one percent of the assault charges were in the fourth degree. Eighty-four percent of assaults were reported within 24 hours, and 89% of victims and 81% of suspects were interviewed on the day of the report.*
- *Seventy-six percent of suspects were male and 24% were female. On average, suspects were 33 years old and victims were 32 years old. The majority of assaults in domestic violence incidents (86%) were intra-racial. Fifty-seven percent of suspects and 32% of victims used alcohol. Overall, alcohol was involved in 59% of domestic violence incidents reported to Troopers.*
- *Most assaults in domestic violence incidents (75%) occurred between victims and suspects who were staying or living together. The most common forms of violence (disclosed by victims and documented by officers) included pushing, grabbing, or shoving the victim (in 48% of incidents), punching the victim (in 29%), and slapping or hitting the victim (in 28%). Weapons such as knives or guns were rarely used. The most common injuries included bruising (for 38% of victims), lacerations or bite marks (for 27%), bloody nose or lips (for 10%), and black or swollen eyes (for 10%). Forty-three percent of incidents occurred in the presence of children.*
- *Eighty percent of cases were referred to the Alaska Department of Law for prosecution, 68% were accepted for prosecution, and 54% resulted in a conviction. Overall conviction rates were slightly lower for female suspects, but conviction rates were generally not affected by victim gender or victim-suspect relationship.*

Researchers, criminal justice system professionals, victim advocates, and policymakers agree that domestic violence is an undeniable urban and rural problem in Alaska and the nation. Detailed data on domestic violence incidents in the state are sparse, except for ongoing data collection by the Municipality of Anchorage. Now, a recent joint study by the Justice Center, the Alaska State Troopers, and the Alaska Department of Law looks for the first time at reports of assaults in domestic violence incidents made to Troopers for populations outside of Anchorage. Focusing on reports made in 2004 from communities served primarily by the Troopers, the study reviews a final sample of 1,281 cases with an assault charge involving domestic violence. Only reports to the Troopers were included in this study; reports to local or municipal police were not reviewed.

Some preliminary findings mirror national and Anchorage statistics: the majority of domestic violence assault incidents occur between victims and suspects of the same race, and the victim's home is the most common location of the domestic violence incident. On the other hand, both Anchorage data and the data from this study show a much higher use of alcohol by suspects and victims in Alaska than is reported nationally.

Report Characteristics

The majority of reports to Troopers (82%) were handled by three detachment areas: C—Western Alaska (32%), D—Interior Alaska (29%), and B—Southcentral Alaska (22%) (Table 1). While fifty-eight units received at least one report in 2004, over 90 percent of reports came from roughly 18 units or geographic areas (Table 2). Fairbanks Alaska State Trooper (AST) Enforcement and Investigation Units received the highest number of reports (23%) with Palmer AST Enforcement and Investigation Units and Soldotna AST Enforcement and Investigation Units having the second and third highest percentage of reports (19% and 9% respectively). Units in Nome received seven percent of reports while units in Bethel, Aniak, Kotzebue, and Kodiak each received four or five percent of all reports.

Troopers received 80 percent of reports while the remaining 20 percent were received by Village Police Officers, Village Public Safety Officers, or Tribal Police Officers. Reports of assaults in domestic violence incidents were most likely to come from victims (57%), though third parties, including family members, friends, officials, strangers and others, initiated 43 percent of reports.

The 1,281 cases in this study included a total of 1,803 assault charges and 604 other

charges. The most common assault charges (81%) were for fourth degree assaults and fewer charges were leveled for third through first degree felony assaults. Thirty-one percent of cases involved other charges. The most common other charges included interfering with a report of a crime involving domestic violence, criminal mischief, reckless endangerment, misconduct involving a weapon, DUI/reckless driving, resisting arrest, misconduct involving a controlled substance, and criminal trespass.

The time interval between the incident, the report to Troopers, and the Troopers' response was short, even with transportation and distance issues. The majority of reports (84%) were made the day of the domestic violence assault incident and 97 percent of reports were made within one week.

Suspect and Victim Characteristics

From the 1,281 cases included in this study, we gathered information on 1,356 suspects and 1,523 victims, though information was not always available for every suspect or every victim. Over three-quarters of the suspects were male while only 24 percent were female. Victim ages ranged from under one year to eighty-four years old. Most victims were in the following age groups: 21–30 years (26%), 31–40 years (22%), and 41–50 years (19%). Suspect ages ranged from 10 years old to eighty-eight years old. The majority of suspects were adults (94%). Starting with the group of suspects 21 or older, the number of suspects in each age group decreased as age increased. More specifically, 21–30 year olds made up 31 percent of suspects, 31–40 year olds made up 28 percent of suspects, 41–50 year olds made up 19 percent of suspects, and suspects 51 years or older made up 7 percent of suspects. Most suspects were White (50%) or Native (47%) and most victims were also White (51%) or Native (47%) (Table 3).

The average age of suspects (33) was quite similar to the average age of victims (32). Thirty-nine percent of assaults in domestic violence incidents took place between suspects and victims in the same age group while 61 percent took place between suspects and victims in different age groups. The age groups most commonly shared by suspects and victims involved in assaults in domestic violence incidents included 21 to 30 year olds (38%), 31 to 40 year olds (27%) and 41 to 50 year olds (19%).

In contrast to the age groups of suspects and victims, the majority of assaults in domestic violence incidents (86%) were intraracial (occurring between suspects and victims of the same race). Of all intraracial assaults in domestic violence, 51 percent occurred between White suspects and White victims and 48 percent occurred between Native suspects and Native victims.

We examined alcohol and substance use among victims. Over a third of female victims (35%) and 27 percent of male victims used alcohol prior to the assault in domestic violence incident, but only two percent of female victims and less than one percent of male victims used illicit drugs (Table 4). We also examined alcohol and substance use among suspects. Fifty-eight percent of male suspects and 54 percent of female suspects used alcohol prior to the assault. Only three percent of male suspects and two percent of female suspects used an illicit drug prior to the assault. Overall, alcohol was involved in 59 percent of domestic violence incidents reported to Troopers. Nationally, for the period 2001–2005, 42 percent of victims reported the presence of alcohol or drugs during a domestic violence incident, while in Anchorage for the period 1989–2002 there was documented involvement of alcohol in 49 percent of the reported cases.

Many of the suspects (79%) remained at the location of the assault. Specifically, 76 percent of male suspects and 86 percent

Source of data: *Alaska State Troopers (2004)*

of female suspects were still at the scene of the assault when Troopers arrived. Troopers were able to interview 76 percent of male suspects and 89 percent of female suspects.

Eighty-one percent of suspects were interviewed on the day of report. Ninety-six percent of all suspect interviews occurred within one week of the report. Troopers interviewed 95 percent of the victims, with 89 percent being interviewed on the day of the report, and 98 percent of the interviews being completed within one week.

The total number of charges per suspect (including both assault and other charges), the number of assault charges, and the number of other charges are summarized in Table 5. On average, each suspect received a total of 1.78 charges, including an average of 1.33 assault charges and 0.45 other charges. Of the 1,356 suspects, 200 (15%) had multiple assault charges and 401 (29%) had at least one other charge. As a result, 580 (43%) of the suspects therefore had a total number of charges greater than one. Overall, the 1,356 suspects generated a total of 2,407 charges, including 1,803 assault charges and 604 other charges.

Table 6. Suspects with Domestic Violence Protection Orders or who Violated Conditions of Release or Probation

Row percentages.

	No		Yes		
Characteristic	N	%	N	%	Total
DVPO for this victim	1,330	98.7 %	17	1.3 %	**1,347**
Violated conditions of release	1,320	97.9	28	2.1	**1,348**
Violated conditions of probation	1,280	95.6	59	4.4	**1,339**

Source of data: *Alaska State Troopers (2004)*

Despite the number and types of offenses suspects were charged with as a result of the assaults in domestic violence incidents, few suspects (just over 1%) had an existing domestic violence protection order filed against them by the victim at the time of the offense (Table 6). Likewise, few suspects were violating conditions of release or probation. Specifically, two percent of suspects were documented as violating a condition of release with their current charges. Another four percent of suspects violated documented conditions of their probation with the current charges. It is important to note that the percentage of suspects violating conditions of release may be greater than those reported here, because these conditions are not always documented in APSIN (Alaska Public Safety Information Network) and are not readily available to Troopers, or for our analysis.

Incident Characteristics

The presence of children during a domestic violence incident continues to be a serious concern. In this study, the victim's or suspect's children under the age of 18 were witnesses to 43 percent of the incidents (Table 7). In Anchorage during 1999–2002, 42 percent of domestic violence incidents occurred with children under the age of 18 present. Nationwide, in 43 percent of the incidents with female victims during 2001–2005, children under the age of 12 were residing in the household where the incident took place. Studies discussed by John L. Worrall in *Crime Control in America: An Assessment of the Evidence* highlight concern regarding children who are present during domestic violence. Exposure to such violence is associated with both child abuse and later delinquency.

Most assaults in domestic violence incidents (75%) occurred between victims and suspects who were staying or living together at the time of the incident. For the remaining quarter of incidents that occurred between suspects and victims who did not stay or live together, 34 percent occurred between victims and suspects who met in a

Table 7. Presence of Children During Assault

Source of data: *Alaska State Troopers (2004)*

public place, and 32 percent resulted from invitation by the suspect or victim. In 25 percent of incidents (where suspects and victims were not living together) the suspect was uninvited or forced entry, and in nine percent of these incidents the suspect entered through an open window or unlocked door.

The use of a traditional weapon such as a knife or a gun was extremely rare; each weapon was used in fewer than four percent of assaults in domestic violence incidents. While still fairly infrequent, suspects were more likely to throw something at the victim (9% of incidents) or hit the victim with an object (10%) rather than use a traditional weapon. Nationwide in 2001–2005, 19 percent of domestic violence incidents with a female victim reported a traditional weapon present, while 31 percent of incidents with a male victim reported a weapon.

We also gathered information about the presence of nine specific violent acts and seven types of threats in the assaults in domestic violence incidents. Only forms of violence that were documented as a result of victim disclosure or officer inquiry, rather than all forms of violence that occurred, were included for analysis. The three most common forms of violence disclosed by victims or documented as a result of officer inquiry included pushing, grabbing or shoving the victim (48%), punching the victim (29%), and slapping or hitting the victim (28%). Documented sexual assault of the victim occurred in only one percent of the cases.

Documented injuries to victims and emergency medical treatment data were also collected and analyzed. The percentage of victims who sustained the most common types of documented injuries included the following: bruising (38%), lacerations or bite marks (27%), bloody nose or lips (10%) and black or swollen eyes (10%). Overall, few victims (12%) received any type of emergency medical treatment for their injuries.

Legal Resolutions

Mandatory arrest in domestic violence cases has been in effect in Alaska since 1996. This law places additional requirements on law enforcement when investigating a domestic violence report and provides criteria for assessing whom to arrest if there are cross complaints "arising from the same incident." (See "Mandatory Arrest in Domestic Violence Cases" accompanying this article.)

Most of the cases (96%) were closed and referred for prosecution including cases that were closed by arrest (79%), and those closed and referred (13%). The remaining cases were closed after investigation (2%) or closed as unfounded (2%) in cases where a suspect was not arrested. On average, it took 6.30 weeks to close a case after it was reported, and 87 percent of cases were closed within 90 days.

An important component of this study involved tracking assaults in domestic

Mandatory Arrest in Domestic Violence Cases

Alaska's mandatory arrest statute was passed as part of the Domestic Violence Prevention and Victim Protection Act of 1996 with the support of prosecutors, law enforcement, and advocates for domestic violence victims in the state. Alaska Statute 18.65.530, "Mandatory arrest for crimes involving domestic violence, violation of protective orders, and violation of conditions of release," sets out conditions for arrest and minimum sentencing requirements. A law enforcement officer is required to make an arrest with or without a warrant:

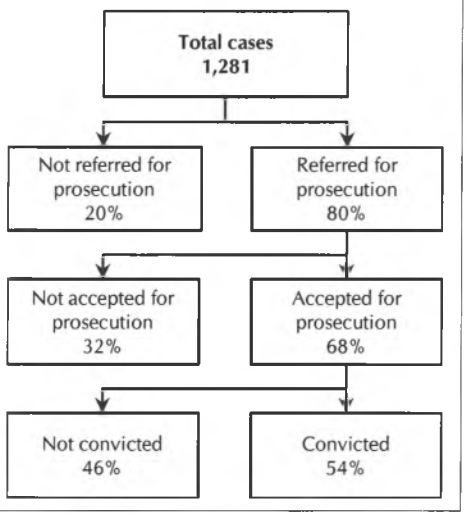
> if the officer has probable cause to believe the person has, either in or outside the presence of the officer, within the previous 12 hours, (1) committed domestic violence, except an offense under AS 11.41.100-11.41.130, whether the crime is a felony or misdemeanor; (2) committed the crime of violating a protective order in violation of AS 11.56.740; (3) violated a condition of release imposed under AS 12.30.025, 12.30.027, 12.30.029....

The statute provides criteria for an officer to use when determining who is the "principal physical aggressor." A "principal physical aggressor" evaluation must be made in domestic violence cases if there are cross complaints "arising from the same incident." In rare circumstances, an officer may determine that no arrest should be made. An "authorization not to arrest" must first be granted by a prosecutor from "the jurisidiction in which the offense under investigation arose," and the officer must later report in writing why an arrest was not made. A prosecuting attorney is on call and available by phone to law enforcement in all parts of the state to provide an officer with an authorization, if needed.

Under Alaska law, there is a 20-day minimum sentence if the defendant is in violation of a domestic violence protection order, a 30-day minimum sentence if the defendant has a prior conviction for assault or domestic violence assault, and a 60-day minimum sentence if the defendant "has been previously convicted two or more times of a crime against a person or a crime involving domestic violence, or a combination of those crimes." Aggravating factors that can increase the length of the normal minimum sentence required by the statute include the presence of a child under the age of 16 during a felony crime involving domestic violence, as well as a domestic violence offense committed at a shelter or facility providing services to domestic violence and sexual assault victims. In addition, recent legislative changes have upgraded certain misdemeanor assaults to a Class C felony and have added a new provision to the animal cruelty statute dealing with "intent to intimidate, threaten or terrorize another person." Some domestic violence convictions also carry federal legal consequences. Under federal law it is "unlawful to sell or dispose of a firearm" to a person convicted of a qualifying domestic violence misdemeanor.

The terms "domestic violence and "crime involving domestic violence" have a broad meaning under AS 18.66.990(3) & (5). "Acts of domestic violence" as defined under the statute go beyond physical assault; acts of domestic violence also include burglary, criminal trespass, arson or criminally negligent burning, criminal mischief, terrorist threatening, violating a protective order, and harassment. In addition, the statute defines domestic violence as an offense committed "by [one] household member against another household member." The definition of household member encompasses more than persons living in the same residence. It includes many people who do not live together: "adults or minors who are current or former spouses, adults or minors...who have lived together, adults or minors who are dating or have dated, adults or minors who are engaged in or who have engaged in a sexual relationship, adults or minors who are related to each other up to the fourth degree of consanguinity..., adults or minors who are related or formerly related by marriage, persons who have a child of [their] relationship, and minor children in a relationship that is described [in the statute]."

Figure 1. Processing of Domestic Violence Cases Reported to Alaska State Troopers, 2004



violence incidents from reports to Troopers through case resolution by the Department of Law. Because we only examined referrals to the Department of Law (and excluded, for example, referrals to the Division of Juvenile Justice), the following statistics are not directly comparable to the ones reported in the previous paragraph.

When examining case processing with Department of Law data, we find that after Troopers close a case, the next decision is whether to refer the case for prosecution. Results show that 80 percent of the 1,281 cases reported to Troopers were referred for prosecution, 68 percent were accepted for prosecution, and 54 percent resulted in a conviction (Figure 1). Once cases were referred for prosecution, they had a high likelihood of being accepted for prosecution. Specifically, 84 percent of referred cases (N=1,030) were accepted for prosecution, and 67 percent resulted in a conviction (Table 8). Cases accepted for prosecution (N=869) had an 80 percent conviction rate.

In addition to examining case resolution rates for all assaults in domestic violence incidents reported to Troopers, we reviewed case resolution rates separately for male and female suspects comparing cases that had at least one male suspect to cases that had at least one female suspect. In our sample of 1,281 cases, 974 cases included at least one male suspect and 259 included at least one female suspect. Cases with at least one female suspect were slightly less likely to be referred for prosecution, to be accepted for prosecution, and to result in a conviction than cases with at least one male suspect. Of the 259 reported cases with at least one female suspect, 75 percent were referred for prosecution (versus 82% with a male suspect), 56 percent were accepted for prosecution (versus 73% with a male suspect), and 44 percent resulted in a conviction (versus 58% with a male suspect) (Figure 2).

Once referred for prosecution, 89 percent of cases with at least one male suspect (N=707) and 76 percent of cases with at least one female suspect (N=146) were accepted for prosecution. Once accepted for prosecution, the likelihood of cases resulting in a conviction did not vary greatly by suspect gender. Upon acceptance for prosecution, 80 percent of cases with at least one male suspect (N=568) and 78 percent of cases with at least one female suspect (N=114) resulted in a conviction (Table 9).

In addition to examining case resolution rates separately for male and female suspects, we examined case resolution rates separately for male and female victims. In our sample of 1,281 cases, 352 cases included at least one male victim and 925 included at least one female victim. Cases with at least one female victim were as likely to be referred for prosecution, as likely to be accepted for prosecution, and as likely to result in a conviction as cases with at least one male victim. Of the 925 reported cases with at least one female victim, 80 percent were referred for prosecution (versus 81% with a male victim), 59 percent were accepted for prosecution (versus 65% with a male victim), and 54 percent resulted in a conviction for both female and male victims (Figure 3 and Table 10). Although cases involving male suspects had higher case processing and conviction rates, case processing rates were quite similar for victims of both genders. No discernable pattern was found in case processing rates for domestic violence victims based on their gender.

Another variable examined in relation to case processing of assaults in domestic violence incidents was the relationship between the victim and the suspect. We examined the relationship between the victim and suspect separately for male and female victims. Most of the assaults in domestic violence incidents occurred between intimate partners. The most likely relationship identified was current or former intimate partner as seen in 67 percent of assaults in domestic violence incidents with female victims and 38 percent with male victims. The next most likely relationship was parents or children comprising 16 percent of the assaults in domestic violence incidents with female victims and 25 percent with male victims. Another 12 percent of assaults in domestic violence incidents with female victims and 22 percent with male victims took place between other

Source of data: *Alaska State Troopers (2004) and Alaska Department of Law*

family members (including siblings and extended family). Six percent of assaults in domestic violence incidents with female victims and 13 percent with male victims took place between roommates. Overall, most assaults occurred between intimate partners, and this was particularly true for female victims.

An examination of case processing for the different relationship types revealed some differences in the earlier stages of case processing. Regarding referral rates for assaults in domestic violence incidents, 88 percent of cases involving roommates, 86 percent of cases involving intimate partners, 72 percent of cases involving other family members, and 63 percent of cases involving parents or children were referred for prosecution (Table 11). Cases involving victims and suspects who were roommates or intimate partners were more likely to be referred for prosecution than cases involving other family members or parents and children. Of all referred cases, 87 percent of cases involving intimate partners, 82 percent of cases involving parents or children, 81 percent of cases involving other family members, and 74 percent of cases involving roommates were accepted for prosecution. Referred cases involving intimate partners were most likely to be accepted for prosecution, and cases involving roommates were least likely to be accepted for prosecution. Although some differences were found in referral and acceptance rates for different relationship types in assaults in domestic violence incidents, conviction rates for accepted cases were remarkably similar. Eighty-one percent of cases involving intimate partners, 81 percent of cases involving other family members, 80 percent of cases involving parents or children, and 77 percent of cases involving roommates resulted in a conviction, once accepted for prosecution. Despite differences in referral and acceptance rates for assaults in domestic violence incidents involving various relationships between victims and suspects, conviction rates for accepted cases were similar across the different relationship types.

In another examination of assaults in domestic violence incidents, we assessed the combined influence of gender and relationship on case processing. In this examination, cases were classified as intimate partner violence or non-intimate partner violence incidents. Incidents of intimate partner violence were defined as taking place between intimate partners and involving a male suspect and a female victim. Non-intimate partner violence incidents included all other combinations of suspect and victim gender and the various relationship types. (Few cases—1.5%—involved same-sex intimate partner violence. The characteristics of these cases will be included in a future study.) Results showed higher case processing rates for intimate partner violence incidents in the earlier stages of case processing. Specifically, 85 percent of intimate partner violence incidents and 75 percent of non-intimate partner violence incidents were referred for prosecution (Table 12). Once referred, 90 percent of intimate partner violence incidents and 79 percent of non-intimate partner violence incidents were accepted for prosecution. Again, no discernable differences were found in conviction rates for intimate partner and non-intimate partner violence incidents once they were accepted for prosecution. Eighty-one percent of accepted cases involving intimate partner violence incidents resulted in a conviction, and 79 percent of accepted non-intimate partner violence incidents resulted in a conviction. Conviction rates based on the total number of reports to Troopers of intimate partner violence incidents were

Source of data: *Alaska SANE data and Alaska Department of Law*

higher (62%) than for all reported cases to Troopers of non-intimate partner violence incidents (47%).

A more detailed examination of legal resolutions explored differences in case processing rates for male and female victims in various relationships with suspects. Just as cases with male suspects tended to have higher case processing rates at each stage of prosecution, male victims tended to experience higher case processing rates across different relationship types. One exception to this trend was higher rates of acceptance for referred cases involving intimate partners with female victims (76%) relative to male victims (67%). Similarly, cases involving intimate partners with female victims had higher conviction rates (61% of accepted cases) than cases with male victims (53% of accepted cases) (Table 13). In sum, cases of assaults in domestic violence incidents investigated by Troopers had relatively high referral, acceptance and conviction rates overall, despite variation in rates by gender of the suspects and victims and relationships between them.

The findings presented in this article provide an initial description of case processing and conviction rates for assaults in domestic violence incidents in smaller communities across the state of Alaska. The full report containing more detailed descriptive analyses is published on the Justice Center website. Future studies may focus on comparisons of the data from the Anchorage analysis, this study, and nationwide reports. An important area to examine in more depth is factors affecting legal resolutions. More complex analyses involving multiple predictor variables are required to understand the many influential factors in case processing and conviction of assaults in domestic violence incidents. A growing body of data about domestic violence incidents will enable policymakers to focus on improving ways to deal with this critical issue.

Research Overview

January 2011 No. 11

Stalking Victimization: Comparisons between Alaska and U.S. Data

This research overview presents information on stalking victimization in the United States. Alaska-specific data include Alaska State Trooper cases from 1994–2005 as published in the *Alaska Justice Forum* in 2007. Nationwide data are from the U.S. Bureau of Justice Statistics (BJS) 2009 "Special Report on National Crime Victimization Survey (NCVS), Stalking Victimization in the United States"; the survey was conducted in 2006. It is important to note that Alaska does not yet have stalking victimization estimates. This research overview looks at data that are currently available for Alaska and notes contrasts and similarities with nationwide data. Only adult cases were considered for this purpose.

It is also important to emphasize that Alaska data are only from stalking victimizations that were reported to law enforcement. By comparison, the national NCVS data are from all stalking victimizations, those reported to law enforcement and those not reported to law enforcement. Finally, it is important to emphasize that the Alaska data are only from stalking victimizations reported to Alaska State Troopers (the data do not include victimizations reported to municipal or other law enforcement agencies in Alaska).

Gender of Victim and Offender

- Alaska data show that 89% of stalking victims were female and 11% were male while 88% of offenders were male and 9% were female. In comparison, NCVS data show that nationally 74% of stalking victims were female and 26% male (Table 1).

Table 1. Gender of Victims and Offenders

Column percentages

	Victims		Offenders	
	Alaska	U.S.	Alaska	U.S.
Male	10.6 %	26.0 %	88.0 %	60.2 %
Female	89.4	74.0	9.3	28.4
Don't know	—	—	2.8	11.3

Note: Percentages exceed 100% due to rounding errors.

- In Alaska, nearly 90% of female stalking victims and 74% of male stalking victims were victimized by male offenders. According to the NCVS, nationally, 67% of female victims and 41% of male victims were victimized by male offenders (Table 2).

Table 2. Gender of Stalking Offender, by Victim Gender

Column percentages except where noted.

	Victim gender					
	Alaska			U.S.		
Offender gender	Male	Female	**All offenders**	Male	Female	**All offenders**
Male	73.9 %	89.6 %	**88.0 %**	41.3 %	66.9 %	**60.3 %**
Female	26.1	7.3	**9.3**	42.5	23.5	**28.4**
Don't know	0.0	3.1	**2.8**	16.1	9.6	**11.3**
All victims	**10.7 %**	**89.4 %**		**25.96 %**	**74.02 %**	
	(row percentages)			(row percentages)		

Note: Percentages may not total to 100% due to rounding.

Age of Victim and Offender

- In Alaska, the most common age group for both stalking victims (39%) and offenders (34%) was 30–39 years. NCVS data show that nationally, the most common age group for stalking victims (28%) was 21–29 years while the most common age of offenders (22%) was 30–39 year-olds (Table 3).

Table 3. Ages of Victims and Offenders

Column percentages.

	Victims		Offenders	
	Alaska	U.S.	Alaska	U.S.
18-20	9.4 %	9.3 %	4.4 %	7.3 %
21-29	20.4	27.7	20.4	21.7
30-39	39.2	22.2	33.7	22.3
40-49	23.8	21.2	30.4	18.7
50 and older	7.2	19.5	11.0	15.7
Unknown	0.0	0.0	0.0	14.3

- NCVS data show that stalking victims are most likely to be victimized by an offender in their own age group (Table 4).
- Victims in Alaska, similarly to victims nationwide, are most likely to be victimized by offenders in the same age group. However, in Alaska, victims aged 50 years and older are most likely to be victimized by an offender in the 30–39 year-old age group (Table 4).

Table 4. Age of Stalking Offender, by Victim Age

Column percentages except where noted.

	Victim age					
Offender age	18-20	21-29	30-39	40-49	50 or older	All offenders

40-49	7.5	7.8	21.2	**34.9**	19.1	**18.7**
50 or older	2.7	5.9	10.1	22.1	**35.3**	**15.7**
Unknown	11.2	8.9	14.2	14.0	24.1	**14.3**
All victims	**9.3 %**	**27.7 %**	**22.2 %**	**21.2 %**	**19.5 %**	
			(row percentages)			

Race of Victim and Offender

- Overall, nearly 86% of all Alaska victims were White and 13% were Alaska Native/American Indian. NCVS data show that nationally 84% of stalking victims were White (Table 5).
- Offenders in the Alaska cases were most likely to be White (79%) or Alaska Native (20%). Nationally, offenders were most likely to be White (73%) or Black (12%) in stalking cases (Table 5).

Table 5. Race of Victims and Offenders

Column percentages

	Victims		Offenders	
	Alaska	U.S.	Alaska	U.S.
White	86.0 %	84.1 %	78.7 %	73.3 %
Black	1.0	10.7	1.0	12.2
Alaska Native/American Indian	12.6	—	20.3	—
Some other race	0.5	5.2	—	9.2
Unknown	—	—	—	5.2

Note: Due to rounding errors, percentages may not total 100.

— Alaska data identified Alaska Native as an individual cateogory. NCVS data includes "Alaska Native/American Indian" data with "Some other race."

- Alaska stalking victims are more commonly stalked by offenders of the same race. NCVS data show that, like in Alaska, Whites are more likely to be victimized by White offenders and Blacks are more likely to be victimized by Black offenders (Table 6).
- NCVS data show that victims of other races were most commonly victimized by White (45%) offenders (Table 6).

Table 6. Race of Stalking Offender, by Victim Race

Column percentages except where noted.

	Victim race								
	Alaska					U.S.			
Offender race	White	Black	Native	Other	**All offenders**	White	Black	Other	**All offenders**
White	**88.2 %**	0.0 %	19.2 %	100.0 %	**78.7 %**	82.8 %	12.5 %	45.4 %	**73.3 %**
Black	0.0	**100.0**	0.0	0.0	**1.0**	5.2	65.6	16.0	**12.2**
Alaska Native/ American Indian	11.8	2.0	**80.8**	0.0	**20.3**	—	—	—	—
Some other race	—	—	—	—	—	7.6	11.8	29.8	**9.2**

All victims	**86.0 %**	**1.0 %**	**12.6 %**	**0.5 %**		**84.1 %**	**10.71 %**	**5.22 %**	
		(row percentages)					(row percentages)		

Note: Percentages may not total to 100% due to rounding.

— Alaska data identified Alaska Native as an individual cateogory. NCVS data includes "Alaska Native/American Indian" data with "Some other race."

Victim-Offender Relationship

- Alaska stalking victims most commonly were victimized by ex-boy/girlfriends (30%), acquaintances (29%), and current spouses (16%). NCVS data show that nationally most stalking victimization was committed by an acquaintance (20%), friend (16%), or ex-boy/girlfriend (13%) (Table 7).
- In Alaska, 8% of stalking victims had unknown relationships with the offender. Nationwide, 10% of victims had unknown relationships with their offenders.

Stalking Behaviors

- Alaska stalking victims were most likely to be stalked by offenders showing up at places and/or waiting for the victim (64%), receiving unwanted phone calls and text messsages (51%), and/or by being followed or spied upon (Table 8).
- NCVS data show that the most common types of stalking behaviors were unwanted phone calls and text messages (66%), spreading rumors (36%), and following or spying upon victims (34%) (Table 8).

Table 7. Relationship Between Victims and Offenders

	Alaska	U.S.
Stranger	7.5 %	9.7 %
Current spouse	15.5	5.6
Ex-spouse	6.5	8.4
Current boy/girlfriend	2.5	3.2
Ex-boy/girlfriend	29.5	13.1
Other family	3.5	9.0
Friend	6.5	16.4
Acquaintance	28.5	19.7

Note: Fifteen percent of NCVS data represent unknown relationships between the victim and offender.

Table 8. Nature of Stalking Behaviors Experienced by Victims

	Alaska	U.S.
Unwanted phone calls and text messages	50.5 %	66.2 %
Unwanted letters and email	16.7	30.6
Spreading rumors	2.7	35.7
Following or spying	39.6	34.3
Showing up at places	64.0	31.1
Waiting for victim	64.0	29.0
Leaving unwanted presents	9.9	12.2

Note: "Showing up at places" and "Waiting for victim" were combined for Alaska due to data detail limitations. Percentages may total more than 100% because multiple behaviors may have been reported.

Stalking in Alaska

André B. Rosay, Greg Postle, Katherine TePas, and Darryl Wood

Originally published in the *Alaska Justice Forum* 24(1): 1, 7–12 (Spring 2007).

For other articles and publications related to stalking and violence against women, see:
http://justice.uaa.alaska.edu/vaw/

Abstract: *This study examined 267 cases with a stalking charge reported to Alaska State Troopers from 1994 to 2005, and excluded any cases reported to local or municipal departments. We also examined the legal resolutions for cases that were reported from1999-2004.*

- *Over 50% of reports occurred in B detachment (Southcentral Alaska) and D detachment (Interior Alaska). Three units (Fairbanks AST Enforcement, Palmer AST Enforcement, and Soldotna AST Enforcement) handled 49% of reports. Thirty-five percent of the charges were for stalking in the first degree and 65% were for stalking in the second degree.*
- *Most suspects (91%) were male and most victims (89%) were female. Most suspects (78%) were White and most victims (86%) were also White. On average, suspects were 36 years old while victims were 33 years old. Twenty percent of suspects had used alcohol, but only 2% of victims had used alcohol. Fifty-four percent of suspects were, or had been, in a romantic relationship with the victim. An additional 35% of suspects were friends or acquaintances of the victim.*
- *The most common forms of stalking included standing outside or visiting the victim's home (in 54% of charges), making unsolicited phone calls to victims (in 51% of charges), following the victim (in 39% of charges), threatening to physically assault the victim (in 36% of charges), harassing the victim's family and friends (in 28% of charges), trying to communicate with the victim in other ways (in 27% of charges), standing outside or visiting the victim's work (in 20% of charges), physically assaulting the victim (in 19% of charges), sending the victim unsolicited mail (in 15% of charges), and vandalizing the victim's home (in 13% of charges). Forty-five percent of behaviors occurred primarily at the victim's home, while 27% occurred primarily in cyberspace.*
- *Seventy-five percent of the cases reported between 1999-2004 were referred for prosecution, 55% were accepted for prosecution, and 40% resulted in a conviction on at least one charge. Cases with suspects who violated protective orders were 20% more likely to be referred for prosecution, were 19% more likely to be accepted, and were 41% more likely to result in a conviction.*

Although the available data are limited, a recent Justice Center examination of Alaska State Trooper case files has revealed that the crime of stalking is probably greatly underreported by victims as well as under-recognized by law enforcement and hence not charged often enough in Alaska. A charge of stalking can be applied in a wide range of situations, and its parameters as a crime can be somewhat ambiguous for both victims and law enforcement. The available data show that a stalking charge is often made in conjunction with other charges, particularly when there has been a prior relationship—which is often the case, with stranger stalking fairly rare.

Stalking, by its nature and its legal definition, induces fear. Statistics from the National Violence Against Women Survey showed that even after the stalking ended, 68 percent of victims thought their personal safety had gotten worse, 42 percent were very concerned about their personal safety, 30 percent were very concerned about being stalked, and 45 percent carried something to defend themselves. Psychological counseling was sought by 30 percent of female victims and 20 percent of male victims.

Moreover, other studies have shown links between stalking and intimate partner homicide among female victims. For example, according to an analysis published in *Homicide Studies* in 1999, 76 percent of female intimate partner homicide victims had been stalked by their intimate partner in the past. Furthermore, 89 percent of female intimate partner homicide victims that were physically abused had also been stalked by their intimate partner in the past. Of all female intimate partner homicide victims, 54 percent had previously contacted police to report they were being stalked.

With funding from the National Institute of Justice, the Justice Center is working with the Alaska State Troopers and the Alaska Department of Law to learn more about the characteristics of stalking in Alaska.

In the first quantitative examination of the crime, data from all stalking incidents reported to Alaska State Troopers from 1994 to 2005 were collected to gather descriptive information. The research provides a first overview of a specific crime whose characteristics are not widely known beyond the justice community. The Alaska statutes defining the crime of stalking are presented on page 5.

Methodology

To conduct this study, Justice Center researchers examined the total 267 cases with a stalking charge reported to Alaska State Troopers from 1994 to 2005. (Alaska stalking statutes went into effect in 1993.) The final sample for analysis comprised 210 cases (Table 1) covering a total of 222 stalking charges, 211 suspects, and 216 victims. Case outcome data were gathered directly

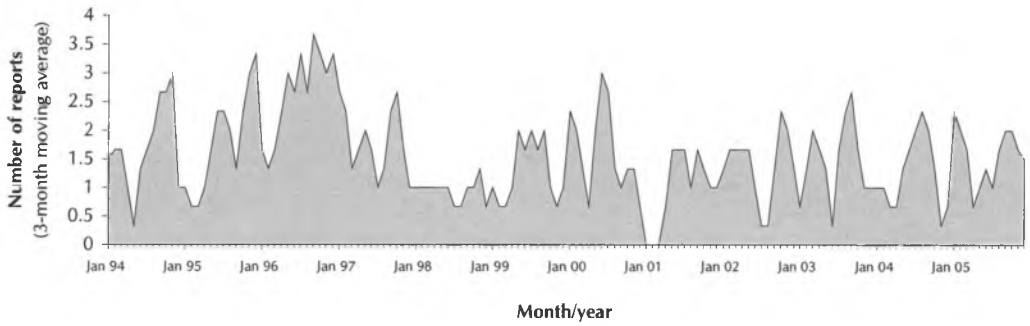
3-month moving average



Source of data: *Anchorage State Troopers data (1994–2005)*

from the Alaska Department of Law for a sub-sample of the stalking cases—only those reported from 1999 to 2004 ($N = 92$).

Results

For the first four years included in this investigation (1994 to 1997), the number of reports averaged 22 per year. After that, the average number of reports dropped significantly, to 15 per year. Figure 1 displays the trend of reporting over time, from January 1994 to December 2005, using a three-month moving average. Seasonal variations from January to December in the trend of reporting were not quite statistically significant, but 23 percent of the reports were made in the months of June and October.

Over 50 percent of reports occurred in B and D detachments. B detachment includes five Alaska State Trooper posts (Wasilla, Palmer, Glennallen, Big Lake, and Talkeetna) while C detachment includes nine Alaska State Trooper posts (Coldfoot, Galena, Fairbanks, Nenana, Healy, Cantwell, Delta Junction, Tok, and Northway; see Figure 2). The units with the highest number of stalking reports included Fairbanks AST Enforcement (with 19% of reports), Palmer AST Enforcement (with 18% of reports), and Soldotna AST Enforcement (in E Detachment, with 12% of reports). Together, these three units had 49 percent of all stalking reports. Additional details are shown in Table 2.

Most cases (67%) were closed by arrest, meaning that at least one person was criminally charged, by a physical arrest, summons, warrant, or criminal complaint (see Table 1). Other cases (10%) were closed with a referral to the district attorney for a charging decision. Sixteen percent of cases were closed after the investigation because there were no suspects or because evidence was lacking. Only four percent of cases were closed unfounded (because there appeared to be no basis for the complaint). Finally, only three percent of cases were closed because the prosecution declined to pursue the case, even though a suspect was known.

The 210 stalking incidents reported to troopers from 1994 to 2005 included a total of 222 stalking charges. Seventy-seven (35%) of the 222 stalking charges were for stalking in the first degree (AS §11.41.260) and 145 (65%) were for stalking in the second degree (AS §11.41.270). For each stalking charge, thirty different forms of behavior were examined, shown in Table 3. On average, four forms of stalking behaviors were found per charge. The most common forms of stalking behaviors included standing outside or visiting the victim's home (found in 54% of charges), making unsolicited phone calls to victims (found in 51% of charges), following the victim (found in 39% of charges), threatening to physically assault the victim (found in 36% of charges), harassing the victim's family and friends (found in 28% of charges), trying to communicate with the victim in other ways (found in 27% of charges), standing outside or visiting the victim's work (found in 20% of charges), physically assaulting the victim (found in 19% of charges), sending the victim unsolicited mail (found in 15% of charges), and vandalizing the victim's home (found in 13% of charges).

The primary location for stalking behaviors was most often the victim's residence. As shown in Table 4, 45 percent of stalking behaviors occurred primarily at the victim's home. Cyberspace was also a common location for stalking behavior, with 27 percent of charges occurring primarily in cyberspace. An additional 10 percent of charges occurred primarily on public roads and parking lots.

The 210 stalking incidents reported to troopers from 1994 to 2005 included a total of 211 suspects and 216 victims. Most suspects (91%) were male and most victims (89%) were female. As shown in Table 5, most suspects (78%) were white and most victims (86%) were also white. On average, suspects were 36 years old while victims were 33 years old; with 13 percent of suspects and 20 percent of victims under 21, 18 percent of suspects and 22 percent of victims between 21 and 30, 37 percent of suspects and 33 percent of victims between

Relationships between suspects and victims are shown in Table 7. Half (54%) of the suspects were, or had been, in a romantic relationship with the victim, as an ex-boyfriend or ex-girlfriend (29%) or current spouse (15%). In addition, 35 percent of suspects were friends or acquaintances of the victim, with acquaintances as the more prominent category. Very few suspects (4%) were currently living with the victim. Slightly over half of the relationships (55%) had ended prior to the stalking, and 58 percent had ended by the time the stalking was reported to law enforcement (these statistics were not calculated for strangers or family members).

Most suspects (55%) were not charged solely with a stalking offense. Stalking charges were often accompanied by other charges (Tables 8 and 9). On average, suspects had a total of 2.32 charges, including an average of 1.05 stalking charges and an average of 1.27 other charges. Overall, the 211 suspects were charged with 489 offenses (i.e., 222 stalking offenses and 267 non-stalking offenses). The most common additional non-stalking charges included assault, violating a protective order, and harassment. In addition to these additional charges, 38 percent of suspects had at least one aggravating factor (Table 10). The most common aggravating factors included violating protective orders and prior arrests for stalking the victim—present for 20 percent and 12 percent of suspects respectively. In addition, 22 percent of suspects had a prior arrest for stalking, assaulting, or harassing the victim. More specifically, 12 percent of suspects had a prior arrest for stalking the victim, 8 percent had a prior arrest for assaulting the victim, and 5 percent had a prior arrest for harassing the victim. Almost three quarters (74%) of the victims had previously contacted law enforcement to report harassing behavior by the suspect (e.g., to seek a protective order).

Overall, 75 percent of the 92 cases reported between 1999 and 2004 were referred; 55 percent were accepted; and 40 percent resulted in a conviction (Table 11). The likelihood of referring, accepting, and convicting varied substantially by legal factors (Table 12)—whether suspects violated protective orders, violated conditions of release, violated conditions of probation, had prior arrests for assaulting the victim, had prior arrests for harassing the victim, had multiple stalking charges, or had additional non-stalking charges. In general, these legal factors enhanced the likelihood of referral, acceptance, and conviction.

In particular, violating protective orders and having additional non-stalking charges were important legal factors. Cases with

Stalking Cases

The following individual case summaries, drawn from the sample studied in the accompanying article "Stalking in Alaska" illustrate a range of situations and circumstances in which the Alaska State Troopers issued a stalking charge. The details were taken from the AST case file. The initials of those involved have been changed.

B.W. reported receiving phone calls from S.M.; she reported being frightened for herself and for her family. S.M. had previously pled "no contest" to harassment charges and had been ordered to have no contact with her. At the time of the reported phone calls, he was on probation for the previous harassment offense. During the phone calls, S.M. stated that he was in trouble and needed B.W., that he loved her and found her perfect. In response to this report, the troopers charged him with first degree stalking.

***

T.K. reported that she was being stalked and harassed by her boyfriend's ex-wife, M.D. An order forbidding contact between M.D. and her former husband, P.D., was in place, but there was no provision forbidding contact with the girlfriend T.K. The two former spouses were involved in a child custody case.

T.K. reported that M.D. was making threatening phone calls; that she had destroyed T.K.'s personal property—including cutting up clothes—and had followed T.K. and P.D. to a mall and attempted to force her way into their vehicle. On another occasion she had followed the couple on a berry-picking trip.

M.D. was charged with second-degree stalking, criminal mischief involving personal property and misdemeanor assault.

***

N.C. called the troopers to report that P.M., her ex-boyfriend, was in her home yelling and causing a disruption. Another man, who was spending the night, and two of N.C.'s children were present in the house at the time P.M. arrived. She also reported that P.M. had been following her to her workplace and other locations. She had reported to the troopers at least once before. She said she had previously obtained protective orders against P.M. but had let them drop.

N.C.'s employer and a co-worker confirmed that P.M. would regularly appear at the workplace.

N.C. stated that she had made it clear that she no longer wanted a relationship with P.M. He maintained that they still had an active sexual relationship and that he often came to her house late at night. The two have a child together.

P.M. was charged with third degree assault, fourth degree criminal trespass, and second degree stalking.

L.K. reported that her ex-husband S.K. had telephoned her several times that day, leaving threatening messages on her voice mail. He had been served with a protective order two days previously. L.K stated that S.K. could be violent and that he had been trying to obtain a gun.

When contacted by AST, S.K. said he had only been trying to contact his daughter. He was charged with violating a protective order and stalking in the second degree.

***

E.R. called to report that her ex-boyfriend V.L. was pounding on her door and refused to leave. He ran off just before the troopers arrived and was caught shortly afterward.

He had been previously arrested for a crime involving domestic violence against E.R., stalking and criminal trespass. She had had several protective orders against him. She stated that he was violent when drinking and had assaulted her in the past.

The couple had lived together off and on for nine years but not for three years prior to this incident, although they had recently been sexually intimate and he had done work on her property. She stated she had told him she did not want a relationship with him.

For this incident, V.L. was charged with fourth degree assault and second degree stalking.

***

I.W. reported to the VPSO that she was being harassed and threatened by her ex-boyfriend J.T. He had been sending her obsessive letters for some time and was threatening to kill her. (*Copies of some of the letters are in the AST file.)* The two have two children together. They had last lived together three years previously, and she had indicated she no longer wanted a relationship with him.

It appeared that he had followed her from one community to another over a period of time. There had been previous incidents in other towns, including at least one in which the local police were called when J.T. attempted to take one of the children from I.W.

A witness confirmed that J.T. had made threats to kill others if I.W. would not be intimate with him again.

J.T. was charged with second degree stalking.

and were 139 percent more likely to result in a conviction. In other words, cases that included additional non-stalking charges were 2.4 times more likely to result in a conviction than cases that did not include additional non-stalking charges.

It is important not to over-interpret these results because some categories are represented by extremely low sample sizes (e.g., only two suspects had a prior arrest for harassing the victim). Nonetheless, it is interesting to see the variation in the likelihood of cases being referred, accepted, and convicted. For example, although only six cases had suspects who had a prior arrest for stalking the victim, all six were referred for prosecution, all six were accepted, and all six resulted in a conviction. By comparison, only 34.6 percent of other cases resulted in a conviction. When suspects had a prior arrest for stalking the victim, they were 2.9 times more likely to be convicted.

Comparisons with National Data

Few national statistics on stalking are available. The current primary source of information on the offense is the National Violence Against Women Survey (NVAWS). While the numbers are not directly comparable, in looking at the NVAWS statistics and the Alaska figures presented here, we can note several points. First, stalking seems even more underreported and, possibly, underrecognized by law enforcement in Alaska than in the country as a whole. Second, it is likely that this is particularly true among Alaska Natives. Third, it is likely that the prosecution of stalking is more effective in Alaska than nationally.

Based on NVAWS results, an estimated 2.2 percent of men and 8.1 percent of women in the United States have been stalked at some point in the past (for a total of over two million men and over eight million women). Annual stalking estimates (rather than lifetime estimates) are obviously much lower, with 1.0 percent of women and 0.4 percent of men stalked per year. Nationally, this equates to over one million women and over 370,000 men stalked in a given year. Although we must do so with great caution, we can use these statistics to estimate the prevalence of stalking in Alaska.

Using the annual NVAWS statistics that 1.0 percent of women and 0.4 percent of men are stalked (derived from a sample of 8,000 women and 8,000 men), and assuming that annual rates in Alaska would be similar to annual rates in the U.S., we can estimate that around 2,100 adult women and 900 adult men are stalked in Alaska in a given year (see Table 13). Further NVAWS estimates suggest that nationally 55 percent of female stalking victims and 48 percent of male stalking victims report to law enforcement. If similar reporting patterns emerged in Alaska, around 1,100 women and over 530 men in Alaska would report a stalking incident in a given year (see Table 14). Alaska's numbers are much lower than those for the rest of the country, something that may be a factor of underreporting by victims or underrecognition by law enforcement.

More accurate estimates of stalking prevalence and reporting patterns will be available only through additional research; nonetheless, even in the absence of this additional research, it is clear that stalking is greatly underreported in Alaska. In 2005, only 17 stalking incidents were reported to the Alaska State Troopers, and statewide from all jurisdictions only 30 stalking cases were referred to the Alaska Department of Law.

The underreporting may be particularly true among Alaska Natives. NVAWS statistics show that "American Indian/Alaska Native women reveal significantly more stalking victimization than women of other racial and ethnic backgrounds." While 8.2 percent of white women reveal being stalked at some point in their lifetime, 17.0 percent of American Indian/Alaska Native women revealed being stalked at some point in their lifetime. American Indian/Alaska Native women (and men) were the most likely persons to indicate having been stalked at some point in their lifetime—over two times more likely than for whites. This was true for both women and men. (It is important to note that the NVAWS figures do not represent actual reports to law enforcement, but rather self-disclosure of incidents that may or may not have been reported to the police.) By comparison, according to the study, the rates of stalking reported to Alaska State Troopers were 6.6 times higher for white women than for Native women and were 9.1 times higher for White men than for Native men (see Table 15)—rates contradicting national figures. Although these statistical extrapolations are fraught with untested assumptions, it is nonetheless clear that stalking is under-

reported in Alaska, particularly for Alaska Natives.

But, while stalking may be underreported in Alaska, prosecution seems to be somewhat more effective. The Alaska Department of Law secured convictions in the cases accepted more often than occurred nationally: while NVAWS results showed that 54 percent of accepted cases resulted in a conviction, 72 percent of the 51 cases accepted by the Alaska Department of Law between 1999 and 2004 resulted in a conviction.

Reporting and Early Intervention

While we do not have any data on why stalking is so underreported, law enforcement hypothesizes that stalking may be underrecognized by victims. NVAWS statistics show other factors may also come into play. Of the victims that did not report to police, 20 percent believed it was not a police matter, 17 percent believed that police could not help, and 16 percent were afraid of reprisal from the stalker. Of the victims that did report to police, 50 percent were not satisfied with police actions and 46 percent thought that police actions did not improve the situation.

Law enforcement might be trained to capitalize on opportunities for early recognition of stalking patterns. Efforts might also be undertaken to raise public awareness of stalking as a crime and report it as such and to further train law enforcement to recognize the signs of stalking. This will increase the likelihood that suspects who violate stalking statutes are reported to law enforcement and are appropriately charged.

1/26/11 OVERVIEW: DEPARTMENT OF CORRECTIONS

<TARGET><BILL></BILL><SUBJECT>1-26-11 OVERVIEW DEPARTMENT OF CORRECTIONS</SUBJECT><COMM>SJUD27</COMM></TARGET>

Summary of the Alaska Department of Correction's Presentation to the Senate Judiciary Committee, January 26, 2011.

Cost Effective Justice: What's at Stake for Alaska?

The Alaska Department of Corrections (ADOC) is committed to providing for the secure confinement of offenders and providing for their rehabilitative programming and supervised community reentry. The ADOC 's overarching mission is to improve public safety while being a sound steward of state resources.

Alaska has the 11th fastest growing prison population in the United States. [1]

From 2000 to 2007, the Alaska prison population increased by 106 prisoners per 100,000 residents. Only Kentucky and West Virginia had a greater increase in per capita prison population. During that same period of time, the per capita prison population of twelve states actually decreased, while nationally the rate of incarceration increased by only 28 prisoners per 100,000 residents.[2] Alaska's prison growth has greatly exceeded its population growth.

From 2004 to 2009 the ADOC's total bookings have increased.

Year	CY 2004	CY 2005	CY 2006	CY 2007	CY 2008	CY 2009
Total Admissions	35,472	35,328	36,715	37,688	37,655	38,897

From 2004 to 2009, the number of prisoners occupying a state paid custodial bed or on Electronic Monitoring has steadily increased.

Year	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Daily annual average of state prisoners	4,769	4,805	4,999	5,204	5,383	5,320	5,602

[1] The PEW Center on the States, One in 31, the Long Reach of American Corrections, at 43, March 2009.
[2] Bureau of Justice Statistics, United States Department of Justice, Prisoners in 2007.

The January 2009, ISER Research Summary report, "The Cost of Crime" requested by the Senate Judiciary Committee found that, with no change in the level of intervention and prevention programs in place at the time of the study, Alaska's prison population was projected to grow to 10,513 by 2030. Such an increase in Alaska's prison population would require the state to fund an unsustainable number of new prisons, not to mention the costs of substantial increases in the state court system, and prosecution, defense, and public safety departments to handle Alaska's growing number of offenders.

95% of Alaska's prisoners are eventually released from prison.

As the number of prisoners grows so does the number of prisoners released. In 2000, there were 2,427 prisoners admitted into an Alaskan correctional facility and 2,599 released. In 2008, there were 3,635 prisoners admitted and 3,741 released. [3]

- In 2009, the ADOC released, on average, **295 convicted felons every month, up from 289 per month in 2008.**
- Of the 3,436 prisoners released in 2008, approximately 1,735 were released to Anchorage, 290 to Fairbanks and 106 to Juneau.

In summary, as of 2009, 1 out 36 Alaskans was under the jurisdiction of the ADOC.[4]

Year	1982	2007	2009
# of Alaskans under ADOC jurisdiction	1 out of 90	1 out of 38	1 out of 36

The question is: Are Alaskans getting good value for the criminal justice dollars spent? As of 2008, the state is doing better, but we could do better yet.

- In 2011, ADOC expects to spend $136.00 per day to incarcerate a prisoner or $49,800 per year per individual.
- In FY 2010, ADOC's annual budget was $261,160,400.[5]
- Yet, 2 out of 3 former prisoners return to prison within the first 3 years of release for either a probation violation or for the alleged commission of a new crime.[6]

---

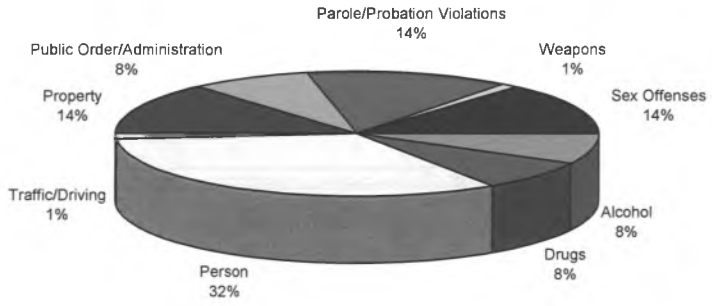
[5] Departmental FY2010 FINAL Authorized (ADOC Management Plan with Supplemental)
[6] 2007 Alaska Judicial Council Recidivism Study.

As the pie chart below reflects, a snapshot of the ADOC's prison population in 2009 shows that less than 50% of offenders committed crimes against the person or a sex offense.[7]

Institutional Offenders
by Offense Class
December 31, 2009



Yet, 8% of its population consisted of offenders who had committed Public Order/Administration offenses. The majority of offenses in this category included bail condition violations, failure to appear and contempt of court. These are offenses that certainly require consequences, but, at what cost to the state, and is it possible to create less expensive alternatives that will serve to reaffirm societal norms and protect the public?

What's at stake for Alaska?

Currently, the ADOC is constructing the Goose Creek Correctional Center (GCCC) which will have a maximum capacity of 1536 prisoners. The cost to build this facility is approximately $250 million and the annual operating budget is estimated to be approximately $50 million per year.

The ADOC's goal, along with its other stakeholder partners, is to employ cost-effective measures that will promote public safety, reduce Alaska's prison growth rate and successfully reintegrate newly released prisoners back into their communities.

---

[7] ADOC Offender Profile 2009, page 18 available at:
http://www.correct.state.ak.us/corrections/admin/docs/profile2009final.pdf

If Alaska expands recent efforts to reduce recidivism, and employs best practice measures that have been proven successful in other states, it stands the greatest chance to slow its prison system growth while improving public safety.

Collaboration and the identification of a leader is the key to success.

Current collaborative efforts are:

- The Criminal Justice Work Group
    - Sub-group: The Alaska Prisoner Reentry Task Force
    - Alaska's Five-Year Prisoner Reentry Strategic Plan, 2011-2016, Purpose is to identify approaches to reduce recidivism in Alaska.
- Probationer Accountability with Certain Enforcement (PACE), Superior Court Pilot Project in Anchorage, July 2010 to the present.[8]
- The National Governor's Association Cross-Governmental Sentencing & Corrections Policy Forum in Annapolis Maryland, Summer 2010.
- The September 18, 2010, Cost Effective Justice Forum, Anchorage, Alaska
    - Pew Public Safety Project
    - National Governor's Association

The Texas Experience

In 2007, the famously "tough on crime" Texas legislature took dramatic, bipartisan action to control crime and corrections costs. This initiative was led by Republican Jerry Madden who was appointed by the majority leader as Chairman of the Corrections Committee. The then speaker of the house instructed Rep. Madden to develop new approaches to slow Texas' rapid prison growth. "Don't build new prisons. They cost too much".[9] With that directive in mind, Rep. Madden, an engineer and graduate from West Point, gathered the data and the facts to develop a systematic approach to break the cycle of crime.

In 2007, Texas' prison population exceeded 100,000 persons.[10]At the start of 2007, the state's corrections department projected a shortfall of 17,000 prison beds over the next five years and recommended the construction of 4,000 new beds at a cost of more than $900 million. Texas legislators requested assistance from the Pew Center on the States' Public Safety Performance Project and its partner, the Council of State Governments Justice Center (CSG), to identify options to avert prison growth while protecting public safety.

Based on their nonpartisan research and the menu of policy options they prepared, the 2007 Texas legislature approved a plan that provided an historic investment of

---

[8] For more information on the probation model go to: http://akdocpio.wordpress.com/

[9] Anchorage Daily News editorial, *Be tough, be smart*, September 19, 2010.

[10] Recent & Projected Growth of the Texas Prison Population, Justice Center (2007), The Council of State Governments, found at: http://justicereinvestment.org/files/texas-growth.pdf

just over $241 million in treatment and diversion facilities and substance abuse treatment services (just over a quarter of what was being requested to build new prisons) both behind prison walls and in community-based programs.

The components of Texas' new approach included:

- Funding for probation officers to use for outpatient substance abuse treatment for offenders.
- Funding for a mental health Pre-Trial Diversion Program
- Expansion of in-custody substance abuse Therapeutic Communities (like ADOC's RSSAT program).
- A prison dedicated to providing DWI offenders with intensive substance abuse treatment.
- Use of Intermediate sanction facilities for probationers who violate probation conditions.
- Early school intervention programs
- The Nurse Family Partnership program

With these and other measures, the Texas legislature successfully averted construction of all of the previously planned prison beds through 2012.[11]

According to Rep. Madden, who spoke at the September Cost-Effective Justice Forum held in Anchorage, the Texas prison population completely leveled off as a result of these initiatives. No shortfall in capacity is predicted until 2013, when the system may need a relatively small number of prison beds compared to the previously predicted need for eight prisons. Moreover, following the adoption of these reforms, Texas' crime rate did not increase, but continued to fall.

Summing it up:

The Texas experience is illustrative of what Alaska is clearly able to accomplish with leadership, vision and commitment to invest wisely today in best practices that have been shown to reduce prison growth, cut state corrections spending and serve to make Alaska's community safer and healthier places to live. This is the Cost-Effective justice approach.

---

[11] The Texas "justice reinvestment" approach was a dramatic turn in Texas' criminal justice policies. The state legislature committed to ensuring accountability and the continued success of these new measures. Accordingly, the Texas legislature established the Criminal Justice Legislative Oversight Committee to monitor and evaluate the implementation of the new policies and programs and to evaluate their impact on state prison populations.

RESEARCH SUMMARY
Institute of Social and Economic Research
University of Alaska Anchorage • January 2009
R.S. No. 71

The Cost of Crime: Could The State Reduce Future Crime and Save Money by Expanding Education and Treatment Programs?

By Stephanie Martin and Steve Colt

Alaska's prison population is among the fastest-growing in the U.S., with five times more inmates in 2007 than in 1981. Spending for the state justice system has nearly doubled since 1981—but the crime rate has dropped only about 30%.

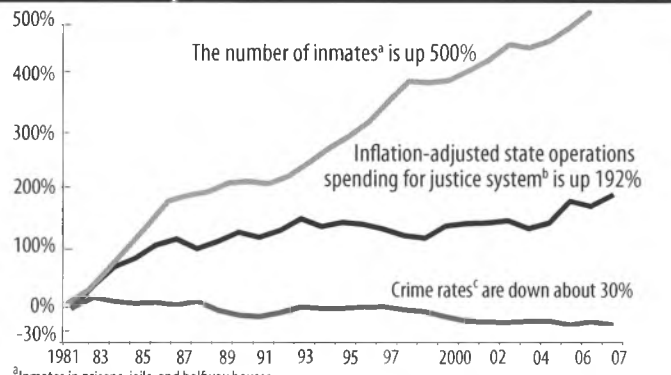
Here's the dilemma for the state, given the pattern shown in Figure 1: what can it do to hold down the number of inmates and stem the rising costs—while at the same time keeping the public safe and using tax dollars effectively?

Senator Hollis French asked ISER to project growth in the number of Alaska inmates and the associated costs—and then evaluate whether the state could reduce that growth by expanding intervention and prevention programs for people already in prison or at risk of ending up there. Alaska currently spends about $17 million a year for such programs, but they aren't available to many of those who might benefit from them.

There are a wide range of such programs. But it is programs for adults who are already in prison or jail that have the most potential to save money and reduce crime in the next 20 years. That's because they can reach the most people.

We know that without any intervention, about two-thirds of those who serve their sentences and are released commit new crimes. Stopping at least some of them from committing more crimes would not only help improve public safety but also reduce growth in both the number of inmates and in spending.

Figure 1. Percentage Changes in Alaska Crime Rate, Spending for Justice System, and Number of Inmates, 1981-2007

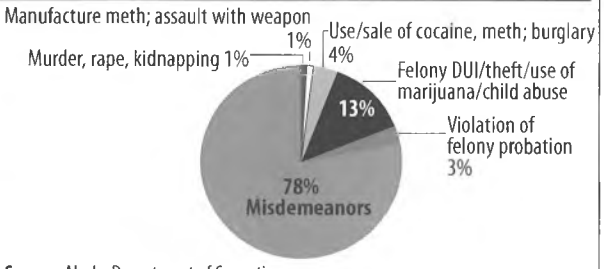


[a]Inmates in prisons, jails, and halfway houses
[b]Spending for Departments of Corrections, Public Safety, and Law; court system; Division of Juvenile Justice; Public Defender Agency; and Office of Public Advocacy. Does not include capital spending or payment on debt.
[c]Rates per 100,000 for murder, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft.
Sources: U.S. Department of Justice; state budget documents; Alaska Department of Corrections

Also, most of those released committed misdemeanors (Figure 2). Those who commit the most serious crimes serve long sentences and make up a small share of those released in any given year.

To analyze which programs have the most potential to reduce crime *and* save the state money, we worked with the Alaska Criminal Justice Working Group and the Washington State Institute of Public Policy. That institute did a similar analysis for Washington state and provided us with data it collected from program evaluations nationwide (see back page). What did our study show?

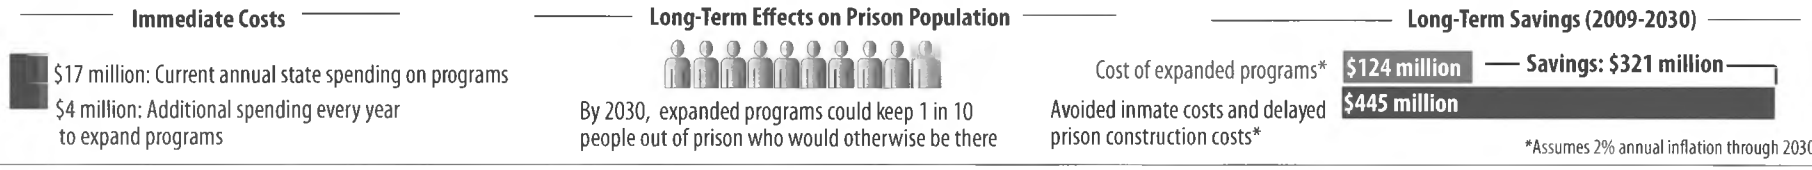
Figure 2. Who Gets out of Jail or Prison in Alaska?
(Total Releases, 2002-2007: 82,339)



Source: Alaska Department of Corrections

- *With no change in policies, the number of Alaska inmates is likely to double by 2030,* from 5,300 to 10,500.
- *If the state spent an additional $4 million a year to expand programs it already has, the prison population in 2030 might be 10% smaller* than projected—about 1,050 fewer inmates.
- *The state would spend about $124 million for expanded programs through 2030 but would avoid $445 million in costs—a savings of $321 million.* It would save money by incarcerating fewer people and by delaying prison construction costs. (Figures 3 and 8).
- *Education and substance-abuse treatment programs—in prison, after prison, and instead of prison—save the state two to five times* what they cost and reach the most people. Programs for teenagers are also very effective at reducing crime and saving money, but they reach fewer people.

Figure 3. Potential Effects, Costs of, and Savings from Expanded Prevention or Intervention Programs



Why Consider Expanding Programs?

In 1980, 2 in 1,000 Alaskans were behind bars; today that share is approaching 10 in 1,000. The sharp increase started in the 1980s, when the state government began collecting large oil revenues. The state used some of that money to expand police agencies, courts, and other parts of the criminal justice system statewide. Also in the 1980s, it made sentencing for the most serious felonies more uniform and stiffened sentences.

The crime rate in Alaska has declined since the 1980s. But the number of Alaskans in prisons, jails, and halfway houses has increased much faster, as have costs for the state justice system. Alaska's prisons are full, and the 1,500-bed prison scheduled to open in 2012 is projected to be full soon after it opens.

Locking people up is expensive, whether their crimes are major or less serious. Alaska spends on average $44,000 a year per inmate in prisons, jails, and halfway houses. Adjusted for inflation, that's actually less than in the 1980s—but it's still a lot (Figure 4).

Studies in other states have shown that some intervention and prevention programs can help cut both costs and crime, either by keeping people who have served their sentences from committing new crimes after they're released, or preventing some people from going to prison in the first place.

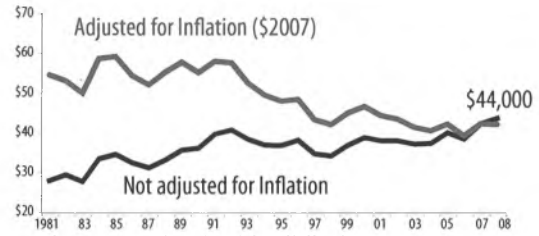
What Programs Did We Analyze?

The Alaska Criminal Justice Working Group gave us a list of programs to analyze. We looked for programs with the biggest potential payoff for the state—those that could reduce growth in both numbers of inmates and in spending for corrections, at a reasonable cost for the state.

Alaska already has a number of programs in place, and we found that expanding some of those would be most cost-effective. Table 1 lists the programs in our final analysis. As a guideline for what was a "reasonable" expansion, we used 10% to 20% of the eligible people not already served—except for very small programs that can't easily be expanded that much.

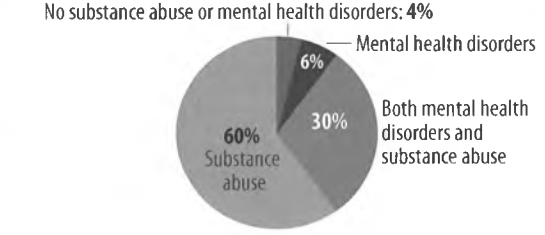
These programs would serve inmates, at-risk juveniles, and young children. They are all intended to reduce future crime in some way. Programs that treat substance-abuse or mental heath disorders have been shown to reduce recidivism—and as Figure 5 shows, almost all current inmates have those disorders.

Figure 4. Annual State Costs Per Inmate,* 1981-2008
(In Thousands of Dollars)



*Average cost of incarcerating people in prisons, jails, and halfway houses.
Source: Alaska Department of Corrections

Figure 5. How Many Alaska Inmates Have Substance Abuse or Mental Health Disorders?



Sources: Alaska Department of Corrections; Alaska Mental Health Trust

Table 1. Current Size and Potential Expansion of Intervention and Prevention Programs[a]

Programs	Currently serve	Reasonable expansion	Potentially eligible (2008)
Prison-based programs			
Education (adult basic; vocational)	More than 1,000	500	Almost all inmates (4,500)
Substance-Abuse (residential; intensive outpatient)	Close to 500	500	90% of inmates (approximately 4,000)
Sex-offender treatment[b]	0	50	10% of 500 eligible inmates
Transition from prison			
Transition for inmates with mental health disorders (Institutional Discharge Project)	70	100	36% of inmates (1,600)
Alternatives to Incarceration	500	500	Approximately 5,000[c]
Mental health, drug, alcohol courts; electronic monitoring; residential substance-abuse treatment			
Juvenile offenders	Approximately 500	1,000	Approximately 3,000
Aggression replacement training; family therapy; residential treatment; institutional transition			
Prevention	3,025	450	Approximately 8,000[e]
Head Start for 3- and 4-year olds from low-income families[d]			

[a] Programs included in our final analysis are those for which we found evidence that expansion would have significant pay-offs for the state at a reasonable cost. We evaluated additional programs not included here, either because there wasn't sufficient evidence to assess their effectiveness or because they weren't feasible to implement in Alaska at this time.

[b] To effectively reduce crime, sex offender treatment programs need to be offered in both prison and the community. Treatment is currently available only in the community, so the number served in prison is currently zero—but there are proposals to add treatment in prison.

[c] People facing low-level charges and with substance-abuse problems.

[d] Head Start is a federal program, but the state supplements federal money and Governor Sarah Palin has proposed additional state funding.

[e] We assume all children from families with up to double the poverty-level income would be eligible.

We looked at but excluded other programs from our final analysis. The criminal justice working group decided that a few programs, while effective elsewhere, wouldn't be feasible to implement in Alaska at this time. For other programs, there wasn't enough available evidence to judge how effective they were in saving money or reducing crime, or the available evidence showed them to be largely ineffective.

How Do the Programs Compare?

As Figure 3 (front page) shows, expanding programs to serve more of the eligible people would save the state about $321 million and reduce the projected number of inmates 10% by 2030. Figures 6 and 7 show how the various programs contribute to costs, savings, and reductions in the number of Alaskans behind bars.

- *Education and substance-abuse treatment programs for inmates save two to four times what they cost*, reduce recidivism by about four percentage points, and can reach the most people.

- *Intervention programs for juveniles who have committed crimes are very effective* at saving money and reducing recidivism, but they serve a much smaller number of people.

- *Programs that set up transition services for inmates with mental-health disorders* coming out of prison are among the most effective—but they can't readily be expanded to serve the many people who could benefit from them.

- *Alternatives to prison for some people charged with lesser offenses save the state money right away, and almost all reduce recidivism*. The exception is electronic monitoring, which is inexpensive but hasn't been shown to reduce future crime.

- *Treatment programs for sex offenders do reduce crime*, but they are very expensive and so don't save the state money.

- *Programs that prevent future crime by helping very young at-risk children are the most effective*. But the effects of spending for those programs aren't apparent until many years later.

Figure 6. How Effective Are Various Programs at Saving Money and Reducing Crime?

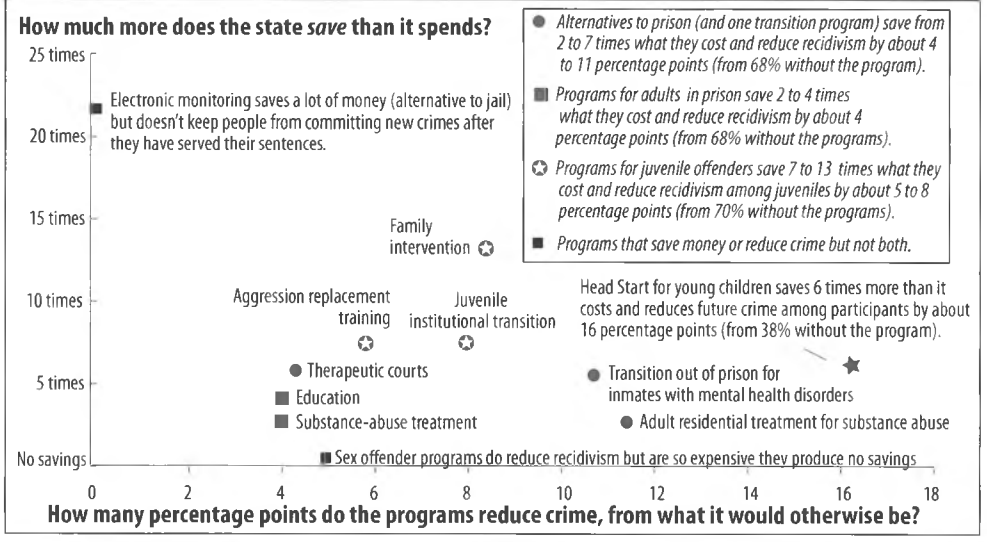


Figure 7. How Would Expanding Specific Programs Contribute to Reducing Growth in Numbers of Inmates?

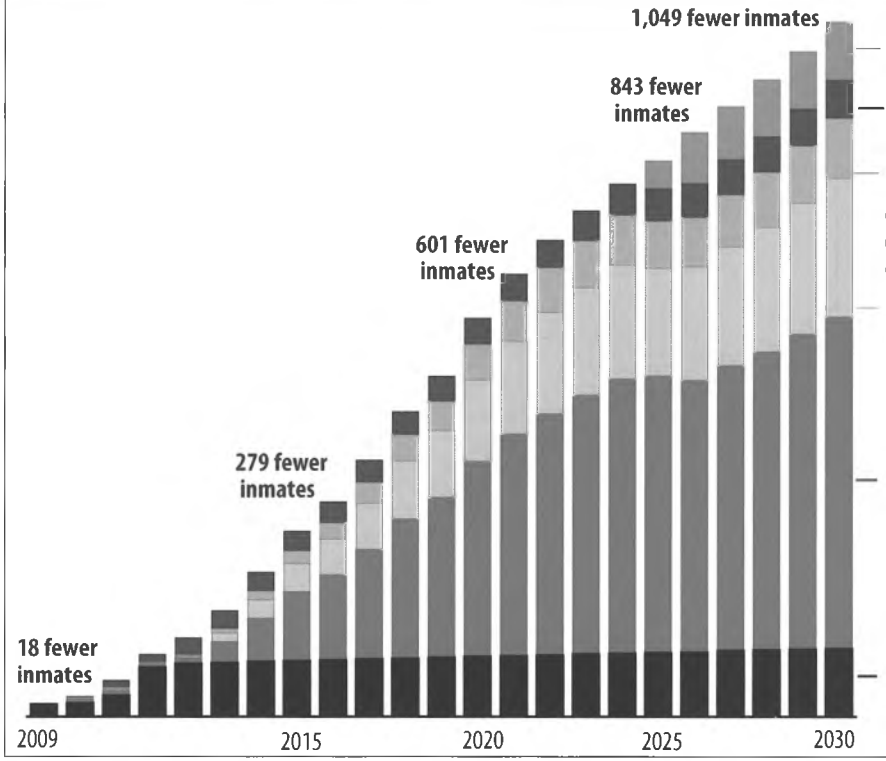


Pre-school programs for at-risk children cost about $1,000 per child but save many times that much, by reducing future crime. The effects of the spending aren't apparent for years, until the children grow up.

Programs for juveniles offenders cost an average of about $2,500 per person, but save almost 10 times that much by keeping kids out of prison. They serve only a subset of the population of 12- to-17-year-olds.

Transition programs for people with mental health disorders are extremely effective, add about $2,000 per person to inmate costs, and save about four times that much. But the programs currently serve very few people and can't readily be expanded to serve large numbers.

Programs that treat inmates for substance abuse add about $2,000 a person to inmate costs, but over time save about twice as much. They are effective, but can't readily be expanded to reach all the people who need them.

Education and job training programs in prison add about $1,000 to inmate costs, but they reach the most people and save about four times more than they cost. Because they are offered in every facility, they can easily be expanded and can reach more people. (Reductions in the number of inmates as a result of the sex-offender treatment program are also included here, but are only one or two people a year.)

Programs that keep people out of prison save the state money right away, because they cost much less than the $44,000 per person the state spends to lock people up. They include therapeutic courts for substance abuse and mental health disorders, electronic monitoring, and residential substance-abuse treatment.

Conclusion

In conclusion, Figure 8 shows how Alaska's corrections system got where it is and where it's likely to go—if intervention and prevention program are kept at their current levels, and if the most effective programs are expanded to serve more of the eligible people.

We found that the state could both reduce the number of Alaskans in prison or jail and save considerable money over the next 20 years, by adding about $4 million a year to the $17 million it currently spends to keep people from returning to prison— or prevent them from ever going there at all.

Spending more for these programs even as oil prices and state revenues are falling may not seem like a good idea. But Alaska also needs to look to the future—and over time the benefits of strategically expanding those programs that reduce crime and keep more Alaskans out of prison far outweigh the costs.

Method of Analysis

Our job was to assess whether specific programs could reduce long-term state spending for corrections by reducing growth in the number of inmates. As a starting point, we needed evaluations of how effective various programs are at reducing future crime.

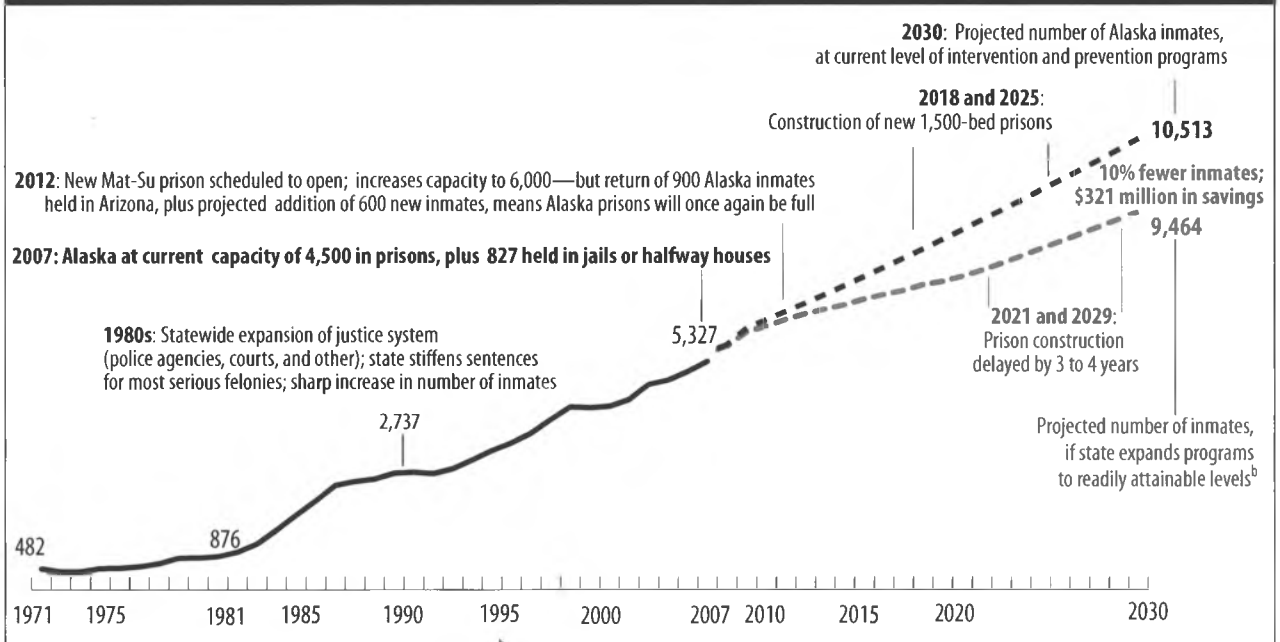
But except for some of the therapeutic court programs, most programs in Alaska have not been rigorously evaluated. Therefore, we used results of a Washington state assessment that systematically reviewed 571 program evaluations from around the country.

To be included, evaluations had to have carefully designed control groups, replicable results in multiple settings, and long-lasting effects. This method is evidence-based public policy, which merges research and practice. It is similar to clinical trials in medicine. Keep in mind that this is a new field, and only about 10% of programs in place nationwide have been evaluated at this standard.

With data from rigorous evaluations, the Washington State Institute of Public Policy created a model that estimated the effects of programs on recidivism—and then combined those results with a cost-benefit analysis to estimate the long-term effects on state spending and inmate populations.

We combined the institute's estimates of recidivism with Alaska data on program costs, eligible groups, and state population to estimate long-term effects on crime and state spending.

Figure 8. Average Number of Alaska Inmates,[a] 1971-2007, and Projected Number, 2008-2030



[a]Average daily number of people in prisons, jails, and halfway houses. [b]The number of people who could be readily added to program rolls varies considerably by program; see Table 1.

The authors thank the members of the Alaska Criminal Justice Working Group for their help in identifying programs to evaluate and for comments on drafts of this publication. The Alaska Legislature funded this group in 2007 and authorized the Alaska Judicial Council to act as its staff.

The group is chaired by a justice of the Alaska Supreme Court and Alaska's lieutenant governor. Other members include top policymakers from the departments of Corrections, Public Safety, Health and Social Services, and Law, as well as the Alaska Mental Health Trust Authority; the heads of the Alaska Public Defender Agency and the Office of Public Advocacy; the administrative and deputy directors for the Alaska Court System; the executive director of the Judicial Council, the U.S. attorney, and Anchorage's police chief.

This group meets monthly to talk about long-term justice issues, as well as to resolve any inter-branch issues that come up among the many agencies and organizations that deal with aspects of Alaska's justice system.

The authors also thank Elizabeth Drake and Steve Aos of the Washington State Institute of Public Policy for developing the methods and models we used and for helping us apply them to Alaska. For more information go to www.wsipp.wa.gov.

This research summary and many other publications on a wide range of topics are available on ISER's Web site:

Senate Judiciary Committee

From: Carmen Gutierrez, Deputy Commissioner
Department of Corrections

Re: Response to Questions – SJUD February 9, 2011

During a recent senate hearing held on February 9, 2011, in conversation with the Department of Corrections, two questions were posed:

What would it take to build capacity within the Substance Use Disorder (SUD) treatment service array that provides immediate access to assessment and services?
Assumptions:

- The estimated unmet need was developed using conservative synthetic prevalence estimates based on low-income household population. It is important to note that the State has historically only funded SUD treatment services based on low-income. Individuals with the financial means typically obtain SUD treatment services from private, not state funded service providers. Therefore these estimates reflect only low income households.
    - This establishes an unmet need of service capacity for 4,246 persons. However, we know many people are not motivated and will not avail themselves to seek treatment.
    - Of this total of unmet need, it is estimated that 40% will successfully engage services.
- These estimates do not address any "opportunity costs" associated with bricks and mortar
- These estimates to not address related issues associated with workforce development

Cost of Providing Unmet Substance Abuse Services To Low Income Persons

	Persons Served FY10	Percent Served FY10	Estimated Unmet Need	40% Engaged	Cost per Person*	Total Estimated Cost
Regular Outpatient Treatment	3,549	60%	2,568	1,027	$ 2,743	$ 2,817,061
Intensive Outpatient Treatment	866	15%	627	251	$ 3,810	$ 2,247,900
Methadone Maintenance Treatment	150	3%	109	43	$ 5,944	$ 255,592
Short Term Residential Treatment	552	9%	399	160	$ 6,706	$ 1,072,960
Long Term Residential Treatment	751	13%	543	217	$ 10,364	$ 2,248,988
Sum	5,868	100%	4,246	1,698		$ 8,642,501

**Source: Physician's Leadership on National Drug Policy (PLNDP) 1998 prorated to 2012*

- Multiple studies conclude that every dollar spent on treatment results in an average of $7 in returned benefits.
- The greatest economic savings associated with treatment are in the form of averted criminal activity followed by decreased utilization of health services.

Secondly you inquired as to the number of additional qualified sex offender treatment providers required to meet the current demand.

In the community we currently have the following providers:

Anchorage: 65 offenders receiving treatment with four providers
Palmer: 10 offenders with one provider
Ketchikan: 10 offenders with one provider
Fairbanks: 20 offenders with two providers
Bethel: 30 with two providers
Total served: 135 by 10 providers

The current statewide waiting list state is approximately 150 individuals with court-ordered treatment.

We need approximately 11 more providers. Ed Webster, the ADOC criminal justice planner responsible for the ADOC's sex offender treatment programs, believes he could probably meet the demand of the waiting list with eight providers as long as they were full-time and took on a full caseload of 20 offenders. Currently we have some providers only doing 10 or so because of other obligations or they are new to the profession.

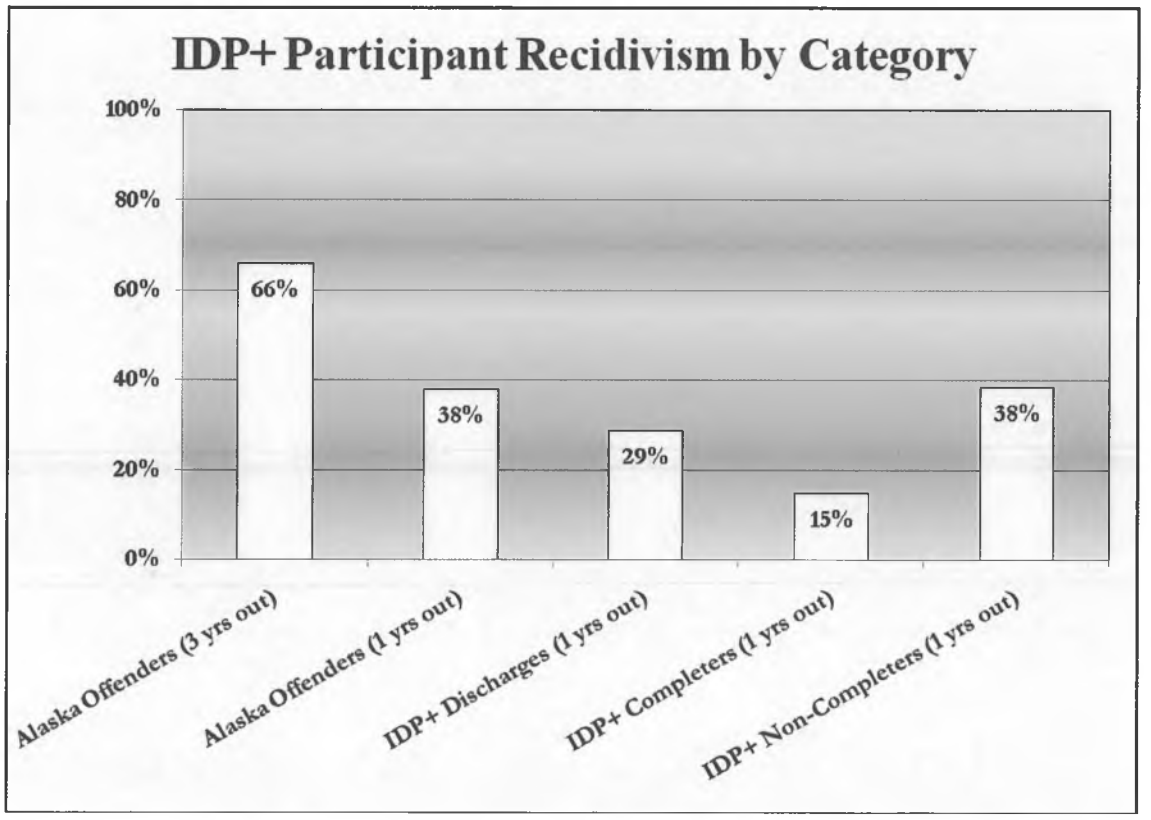
Presentation, February 9, 20100

I. DOC Reentry Programs for the Mentally Ill

a. *Institutional Discharge Project Plus (IDP+)*

Since 2002 the Department of Corrections has operated the IDP+ program, a special program that targets felony prisoners with a psychotic disorder who are being released to probation or parole to Alaskan communities. An ADOC mental health clinician, in conjunction with a probation officer and other community behavioral health or other identified agency representatives, develops a treatment and monitoring plan for the releasing prisoner. The current caseload for this clinician is 77. There are also an additional 10 to 15 individuals in IDP+ in locations around the state at any given time. Based upon ADOC clinician experience, the caseload for a single IDP+ clinician should not exceed 30.

Although the IDP+ program as a whole has not been formally evaluated by an outside entity, ADOC internally tracks outcome data on participants. In 2008, the ADOC asked Hornby Zeller Associates to conduct a sample study (n=125) of IDP+ participants. The sample included individuals who were actively being monitored by the IDP+ program, had successfully completed the IDP+ program, or were discharged from the IDP+ program. The sample study found that of those who completed the program, 15 percent recidivated after one year. This is in comparison with the state recidivism rate of 38 percent after one year.



There are several program components that are key to a participant's success and to ensuring public safety, including but not limited to:

1. A trained mental health clinician working actively and collaboratively with probation and community service agency staff to develop, monitor, and adjust community release plans for probationers and parolees that address treatment services and appropriate housing;
2. A reduced probation caseload to compensate for individual mental health, substance abuse, and other complexities that are inherent to participants of this reentry program; and,
3. The ability to respond quickly if an individual is having problems with the release plan or if a community agency has concerns about the individual's compliance with the release plan.

b. Assess, Plan, Identify and Coordinate (APIC)

This program, based on a national evidence-based model, links offenders with mental illness reentering the Alaskan communities of Anchorage, Fairbanks, Juneau and the Mat-Su Valley with needed community services to ensure public safety and success for the individual. This program is available to both felony and misdemeanor offenders who are in custody at the time of referral.

The goal of the program is to link individuals to community treatment services, medication and to secure government benefits to which they are entitled. The APIC program has funding available to pay community agencies under an APIC contract for services up to 90 days before release for release planning and for direct treatment services up to 60 days after release with the possibility of extension in certain cases. This allows time to obtain federal Social Security Administration and Alaska Division of Public Assistance benefits if eligible and for services to be provided at a more intense level to aid reentry. Through this program, the ADOC has succeeded in securing social security disability (primarily SSI) benefits for all ADOC applicants in this program, referring participants to needed community-based support services which has resulted in reduced recidivism rates for this population.

Although the APIC program as a whole has not been formally evaluated by an outside entity, ADOC internally tracks outcome data on participants. In FY10, data on 143 participants in the program showed the following:

1. 100 percent of the participants had been connected to identified community treatment providers on release from an ADOC facility;
2. 89 percent of the participants had an admission for services intake within 10 days of release from an ADOC facility;
3. 55 percent of the participants were released from an ADOC facility to supervised or supported housing, and 39 percent into non-supervised housing; and,
4. As of June 30, 2010, 59 percent of those who completed the program prior to March 31, 2010 had not been re-incarcerated.

There are several program components that are essential to a participant's success and ensuring public safety, including but not limited to:

1. Having dedicated ADOC staff to assist the identified offenders develop a reentry plan;
2. Establishing connections and to identify community services prior to the offenders release;
3. Facilitating a "warm transition" or hand-off of the offender to the community service(s) provider;

4. Ensuring medication regimes for identified offenders are not disrupted during the reentry transition; and,
5. Having 60 days or more for identified cases of ADOC and case coordination to ensure the offender is connected and receiving identified community treatment services and supports.

c. DOC Discharge Incentive Grant for Housing and Related Supports

The ADOC and the DHSS/DBH coordinated Trust funds to provide transitional housing and supports to 53 individuals with complex mental disorders in FY10. Each agency managed a portion of the funds to assist these individuals to successfully transition from jail or prison to a community setting. The ADOC reported FY10 length of stay and recidivism data for the 43 individuals for whom the ADOC managed funding for housing placements. The ADOC has reported the number of jail days in the 12 months prior to Trust funded housing placement, the number of days while in Trust funded housing, and the number of days in jail in FY10 after Trust funded housing ended.

The ADOC authorized Trust funds to pay for a cumulative total of 2,416 days of housing for 43 individuals, ranging from 2 to 30 days in an assisted living facility and 5 to 172 days in a supervised board and care transitional housing setting. In the 12 months prior to housing, the 43 mentally disabled individuals had spent of total of 9,059 days in jail, ranging from one individual who spent no time in a jail bed to 13 individuals who each had 365 jail bed days housing. These 43 individuals spent a cumulative total of 81 days in jail, with 36 having no jail bed days and only one individual jailed for 25days, while in ADOC-managed Trust housing. After the Trust funded housing ended, these same individuals subsequently spent a cumulative total of 1,235 additional days in jail in FY10.The time spent in jail during this period ranged from no jail bed days for 27 to one individual who had 273 days in jail. **The reduction in 7,824 jail bed days** clearly demonstrates that housing contributes strongly to beneficiary success and a reduction in legal recidivism.

The DOC Discharge Incentive Grant improved beneficiary quality of life, enhanced participation in beneficiary participation in community based treatment, improved personal and public safety, and showed dramatic reduction in legal recidivism.

II. PACE – Probationer Accountability with Certain Enforcement

In July 2010, the Anchorage Superior Court, in collaboration with a number of criminal justice partners, started the PACE (Probationer Accountability with Certain Enforcement) pilot project modeled after Hawaii's Project HOPE. [1] Under the model, when a probationer violates probation by testing positive for drugs or alcohol or

[1] Those partners are the Anchorage Police Department, the State Public Defender's Office, the Office of Public Advocacy, Anchorage District Attorney's Office, and the ADOC.

missing an appointment with the probation officer, the probationer is arrested immediately and is brought to court within two business days. During one single hearing, which would normally take at least three court hearings over a six-month period, the probationer is arraigned, counsel appointed, adjudicated on the petition to revoke probation, and sentenced to a short term of incarceration.

Data collected after Honolulu's HOPE program started in 2004 showed that within three months, the rate of positive drug tests for probationers on HOPE dropped by half. More than half of the probationers never missed a drug test or appointment after their first warning meeting with the judge, and of those who did miss, 40 percent missed only once. A randomized study of Project HOPE found that after one year in the program, 9 percent of the HOPE probationers had not appeared for an appointment, as compared to 23 percent of the control group. Only 13 percent of the Project HOPE probationers had positive urine tests, as compared to 46 percent of the control group. Only 21 percent of the HOPE probationers had been rearrested (for any reason), compared to 47 percent of the control group.

The PACE pilot project began after Alaska criminal justice leaders studied HOPE and met Judge Steven Alm who founded it. PACE started out with 29 probationers in Anchorage Superior Court and will increase to 70 probationers by the end of February 2011. Three months after the Anchorage pilot project began, a preliminary report showed early results in Anchorage match the trends found with Project HOPE. The data, as of mid-October, showed the following:

- Thirteen of the 29 probationers originally assigned to PACE have gone for two months with no violations, and have had the frequency of their random urine analysis testing reduced.
- Of the probationers rearrested and sanctioned, most have only been rearrested once. Two probationers are being held on new charges, and probation is working to get at least one other (who has failed several tests) into residential treatment.

The ADOC and its collaborative partners on this project see great promise in the PACE model. Should the PACE trends continue, the goal is to expand the model to other state courts. Significantly, Project HOPE has shown in Honolulu that 50 percent of the probationers with significant drug and alcohol problems were able to stop using solely with the threat of swift and certain sanctions. Accordingly, the limited community-based substance treatment programs can then be made available to those who have demonstrated through their behavior the necessity of treatment.

III. Alaska's Five-Year Strategic Reentry Plan (2011-2016) Recommendations

The recommendations of the Alaska Prisoner Reentry Task are:

1. **Continue the collaborative process.**

State and local agencies, non-profits, local partners and concerned citizens are involved in a number of collaborative processes that address the shared goal of reducing criminal recidivism. These collaborative efforts should be encouraged by the Executive Branch, Legislature, Courts and other policymakers whenever possible. Collaboration increases accountability and the ability of state and local governments and community organizations to deploy resources effectively on the same population.

As part of this continued collaborative process, an existing workgroup should be charged with ongoing tracking and identification of the specific factors contributing to recidivism, and Alaska's rapid prison population growth. Without identification of these factors, policymakers will be less successful in selecting the best practices to reduce recidivism and slow Alaska's prison growth.

2. **Expand the ADOC's institutional substance abuse treatment programs.**

The ADOC currently operates the RSAT and LSSAT substance abuse treatment programs in its institutions. These programs have the capacity to provide treatment to approximately 1,000 prisoners per year of the more than 5,600 prisoners incarcerated. The ADOC is in the process of evaluating these programs. Those programs, or program elements, shown to be effective should be expanded. Those programs, or program elements, shown to be less effective should be modified to become more effective or replaced with more promising programming.

3. **Expand Probationer Accountability with Certain Enforcement (PACE).**

Implemented by a collaborative team, (courts, law, defense and local police and state troopers), the Anchorage PACE pilot project has demonstrated sufficient success to warrant expansion to other judicial districts where core team members are committed to following the model with fidelity, and are able to implement an initial pilot project without additional state resources.

4. **Expand the Electronic Monitoring Program (EMP) in the Mat-Su Valley.**

Operating in seven communities statewide, the EMP has proven to be a cost-effective system of monitoring offenders in the community without

compromising public safety. Information on EMP participant outcomes in Alaska indicates significant reductions in recidivism, as well as immediate savings in incarceration costs.

The Mat-Su Valley EMP cannot be expanded beyond its current capacity without additional state resources: one probation officer, a criminal justice technician and other infrastructure supports. With this expansion, the Mat-Su Valley could accommodate 60 more qualified offenders who would otherwise occupy a prison bed and not be supporting themselves and their families.

5. **Improve the state's ability to collect, analyze and disseminate criminal justice data.**

    a) Alaska should continue to work with the National Governors' Association to obtain technical assistance to help the state to identify and fill in gaps in its data collection systems and improve training and supervision of state employees responsible for data collection, entry and analysis.
    b) The ADOC should seek technical assistance to improve its ability to collect and report on a more comprehensive set of data elements.
    c) The state should investigate establishing an entity that would aggregate criminal justice data across agency lines. This entity would be responsible for producing reports that would provide the context and foundation for policy decisions throughout the state.

6. **Improve former prisoners' access to affordable housing.**

    a) Address the blanket presumption of guilt often used by public and private landlords to automatically preclude individuals with criminal records from being considered as tenants.
    b) As suggested by AHFC CEO/Executive Director Dan Fauske at the last Alaska Council on the Homeless meeting (12/1/10), convene a high level workgroup with a member from AHFC, The Trust, the ADOC, DHSS, and real estate owners and developers to discuss how Alaska may increase the statewide stock of available and affordable housing.
    c) Improve housing information available in the state's 211 system.
    d) Increase the use of subsidized housing programs, recognizing that these programs cost substantially less than incarcerating a recidivist at $136.00 per day or $49,800 per year.

7. **Improve the ADOC's ability to identify and provide for the behavioral health needs of its inmates.**

a) Implement a statewide, on-line health record database system that is standardized and would allow entry of specific types of information pertaining to an offender's health, mental health, and substance abuse screening and treatment.
b) Assess the ability for the ADOC and DHSS to electronically share specifically identified and pertinent information from individual databases (i.e. AK AIMS)
c) Increase the staff capacity of ADOC to manage the APIC and IDP+ programs for offenders reentering Alaskan communities.
d) Work with APIC community providers to enhance their workforce and program capacity to treat and support offenders reentering communities (i.e. peer supports/mentoring).

8. **Reduce the number of misdemeanor offenders recycling in and out of jails.**

a) Identify the laws, rules, policies and practices that lead to the incarceration of individuals who pose no substantial risk to public safety.
b) Expand prosecutorial diversion programs for misdemeanor offenses.
c) Expand the ADOC Electronic Monitoring Program for misdemeanants.
d) Make good use of halfway house stays by assessing sentenced misdemeanants for behavioral health and criminogenic risks and needs.
e) Make good use of halfway house placements by screening sentenced misdemeanants for behavioral health and criminogenic risks and needs and assessing and referring for services as appropriate.
f) Expand therapeutic courts and other problem-solving courts for misdemeanants such as the Mental Health and Addiction Therapeutic Courts, Operating Without License (OWL) Courts, and Anchorage adjudication/disposition courts.

9. **Expand Treatment Services and Housing Options for Sex Offenders.**

a) Determine the effectiveness of the sex offender treatment programs offered by the ADOC with appropriate performance measures.
b) Upon substantiation of their effectiveness, increase the ADOC institutional sex offender treatment program capacity.
c) Increase the number of state approved community sex offender treatment providers.
d) Create a sex offender treatment program for women.

e) Expand the Y-K Delta sex offender treatment model to other communities that need and will embrace the program.
f) Remove counterproductive residential restrictions on housing.

10. **By order of the Governor, require all state agencies to:**

a) Inventory state employment restrictions related to criminal offenders. Consolidate this information in a unified document specifying restricted occupations and the substance and nature of the restrictions making relevant information readily accessible to the public.
b) Analyze the necessity of these restrictions to public safety, identify possible mechanisms to provide relief from the restrictions (time limitations/waivers), and amend and simplify as appropriate.
c) Compile baseline data on:
    i. The number of people affected by restrictions,
    ii. The number of jobs that are restricted,
    iii. The impact of relief mechanisms.

11. **Expand state support for the ADOC chaplaincy program.**

a) Expand the mentoring program including the number of volunteer mentors, recognize the need for better screening, training of and supervision of mentors.
b) Support the efforts of the State Chaplain and Alaska Correctional Ministries (ACM) to develop the Healing Communities model in Alaska. Building this model will bring more support and mentors to those in prison and coming home.
c) Support the hiring of state-paid chaplains for the prisons. The volunteer chaplaincy efforts are laudable, but the role is too important and carrying too many responsibilities to be left to under-paid staff hired by ACM and volunteers.
d) Support the continued expansion of programs such as prison Transformational Living Communities and the transitional community residences.

Recidivism in Alaska's Felony Therapeutic Courts

Executive Summary

The Alaska Judicial Council found that graduates of the Anchorage Felony Driving Under the Influence, Anchorage Felony Drug, and Bethel Therapeutic Courts were rearrested and re-convicted far less frequently than comparison offenders. The Council followed graduates for one year after they completed their program and tracked comparison offenders for one year after they were released from serving their sentence. Therapeutic court graduates were also re-arrested far less frequently than a baseline sample of Alaskan offenders charged with felonies in 1999, discussed in the Council's January 2007 report, *Criminal Recidivism in Alaska*. Findings included:

- The longer the participants stayed in the program, the less likely they were to recidivate even if they did not graduate.
- 54% of the participants in these project graduated.
- 13% of graduates were re-arrested within one year after completing a therapeutic court program compared to a 32% re-arrest rate for comparison offenders and a 38% re-arrest rate for offenders charged with felonies in 1999.
- Participants who were discharged from the programs or who left voluntarily had about the same rate of recidivism as the offenders charged with felonies in 1999.
- Older participants were less likely to be re-arrested than younger participants.
- Participants in the Anchorage Felony DUI Court were less likely to be re-arrested than those in the Anchorage Felony Drug Court and the Bethel Therapeutic Court.
- No participants in the programs who were re-convicted within the first year were convicted of an offense at a more serious level than the one on which they entered the therapeutic courts. None were convicted of a Drug or Sexual offense. In contrast, 3% of the comparison offenders were convicted of offenses at a more serious level. In the Council's companion report on recidivism among 1999 offenders, about 15% of most types of offenders were convicted of offenses at a more serious level.
- Native participants responded as well to the therapeutic court programs as did Caucasian participants. Blacks and other ethnicities did not do as well as Caucasian participants.
- The Council recommended that the state should develop further information about the costs and benefits of therapeutic court programs; should explore the reasons for the relative success of Native participants in the programs; and should determine why ethnic groups other than Natives and Caucasians did not do as well in the programs.

Introduction

In 2001, the legislature created two new therapeutic courts for defendants with alcohol problems: one for felony Driving Under the Influence cases in Anchorage, and one for defendants with alcohol problems in Bethel. At the request of the legislature in its original bill, HB172, the Judicial Council evaluated the two projects in 2005,[1] with funding from the state's Department of Health and Social Services.[2] At the same time, the Council evaluated the Anchorage Felony Drug Court. The present report looks at the recidivism rates for the 117 offenders who participated in the therapeutic courts, and compares them with matched groups of 97 offenders who did not participate in the therapeutic courts.[3] This analysis also compares these groups with the baseline recidivism rates for 1999 offenders,[4] reported by the Judicial Council in *Criminal Recidivism in Alaska*.[5]

[1] EVALUATION OF THE OUTCOMES IN THREE THERAPEUTIC COURTS, Alaska Judicial Council, April 2005. Available on the Judicial Council's website, www.ajc.state.ak.us, under "Publications."

[2] Funding for this report, and the companion report, CRIMINAL RECIDIVISM IN ALASKA, cited below, also came from the Alaska Department of Health and Social Services.

[3] The methodology used in this report is described in Appendix A. Also see below, footnotes 9, 19, and 34.

[4] The offenders included in the report on criminal recidivism had been included in the earlier Council report, ALASKA FELONY PROCESS: 1999, Alaska Judicial Council, February 2004. The report is available from the Council's web site, www.ajc.state.ak.us, under "Publications."

[5] Alaska Judicial Council, CRIMINAL RECIDIVISM IN ALASKA, January 2007. Available from the Council's web site at www.ajc.state.ak.us, under "Publications."

Part 1

Measures of Recidivism

The Council compiled the number of new arrests and convictions[6] for each of the offenders who participated in one of the therapeutic justice projects, and for other defendants who did not participate.[7] The information reported here includes offenders who had been out of the program for at least one year. The comparison group included those who had finished serving any sentence imposed, and had been out of custody for at least one year. The offenders were grouped into three categories:

- All offenders who graduated from one of the programs ("graduates");
- All offenders who were in one of the programs, but were discharged before finishing the program ("discharged");[8] and
- Offenders with similar characteristics to the participants who did not participate in one of the programs ("comparison").[9]

The Council also compared the recidivism of each of the therapeutic court groups to the recidivism of convicted Alaska offenders charged with felonies in 1999.[10]

---

[6] The data for new arrests and new convictions came from the Department of Public Safety.

[7] The Council also collected information about the numbers of new cases filed in Alaska courts, using Court system data. There was very little difference in the rates of recidivism between re-arrests and new cases filed. For simplicity and comparability to other reports, only the re-arrest and re-conviction rates are included in this report. Information about cases filed is available from the Judicial Council on request.

[8] The term "discharged" included all participants who did not complete the therapeutic court program for any reason. Some participants "opted out;" that is, they chose to not complete the program. Others were asked to leave the program for a variety of reasons. Most who were asked to leave either had frequent relapses into substance abuse, or had committed new offenses that could not be handled within the context of the therapeutic courts.

[9] The comparison groups were selected separately for each of the three therapeutic courts, by program staff. They were matched on age, ethnicity, gender, offense of conviction, and prior record of convictions. The Anchorage Felony Drug Court had 19% of the comparison offenders, the Anchorage DUI Court had 52%, and the Bethel Court had 29%. The most noticeable difference between the comparison groups and the participant groups was that the comparison offenders had slightly less severe prior records. Analysis showed that the differences did not matter significantly in the recidivism between the groups.

[10] See note 4, above.

Part 2

Amount and timing of recidivism during one year after release

Table 1 shows the recidivism rates for the first six months and the first year after offenders graduated from therapeutic courts; or from serving their sentences, in the cases of the discharged participants, the comparison offenders and the1999 felony report offenders.[11]

Table 1
Recidivism rates for therapeutic court graduates, discharged, comparisons, and baseline offenders, during first six months and first year[12] after end of program

	Graduated[13]	Discharged[14]	Comparison Offenders[15]	1999 Felony Report Offenders (baseline)[16]
% arrested, 1st 6 months	8%	26%	18%	26%
% arrested, 1st year	13%	39%	32%	38%
% convicted, 1st 6 months	4%	10%	8%	13%
% convicted, 1st year	6%	26%	23%	28%

Alaska Judicial Council *February 2007*

[11] All of the offenders had been released for at least one year. When comparing the different groups, it is useful to remember that all of the participants in the therapeutic courts were there because they had serious alcohol or drug abuse problems. The comparison group offenders also had substance abuse issues. Of the 1999 felony offenders, 68% had alcohol problems, and 48% had drug problems.

[12] The analysis used 214 offenders who were released from incarceration or the program for at least a year.

[13] Offenders who completed a therapeutic court program.

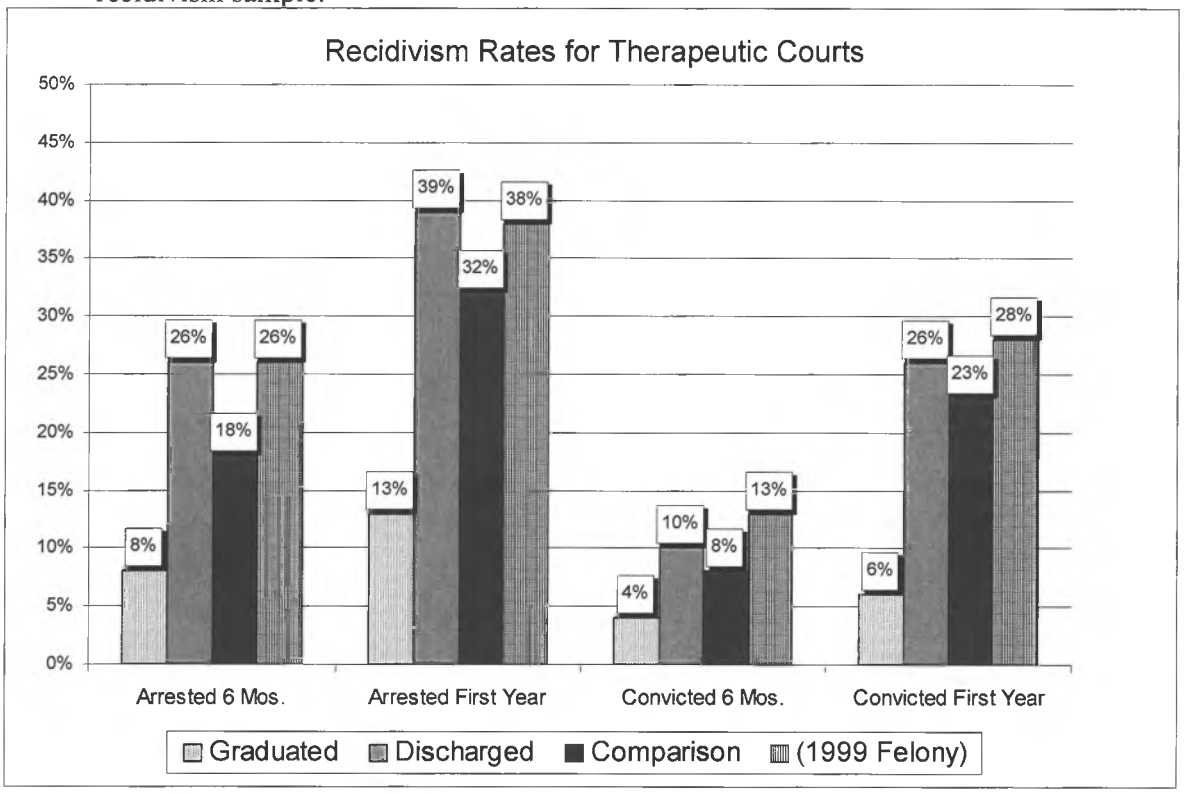
[14] Offenders who were in a therapeutic program but who opted out or were discharged.

[15] Offenders who had characteristics similar to the therapeutic court participants but who did not participate in a therapeutic court program.

[16] Two-thirds sample of all Alaskan offenders charged with a felony in 1999 and convicted of an offense.

Findings

- Graduates of the therapeutic court programs re-offended far less frequently than did any of the other groups measured.[17]
- 13% of the graduates were re-arrested in the first year, a rate about one-third of that for the other groups. 6% of the graduates were convicted of a new offense in the first year, a rate about one-quarter of that for the other groups.
- Participants in the program who were discharged did about as well as offenders in the 1999 recidivism sample.[18]



Alaska Judicial Council *February 2007*

[17] Graduates had significantly fewer new arrests than the other two groups in the first six months, and in the first year, and significantly fewer convictions in the first year. There were no significant differences between graduates and other groups for convictions during the first six months after release, probably because there were few convictions during this period. The differences between the discharged group and the comparison group were not statistically significant. The differences between the therapeutic court groups and the 1999 felony recidivism group could not be tested statistically in this report.

[18] Comparison group results were slightly, but not significantly, better than the results for discharged participants. The combined group of graduates and discharged program participants had slightly lower recidivism rates than the comparison group (the differences were not statistically significant), and substantially lower recidivism rates than the 1999 offenders. Graduated and discharged combined rates were: 16% re-arrested in first six months; 25% re-arrested in first year; 7% re-convicted in first six months; 15% re-convicted in first year.

Part 3

Description of Participants

The offenders described here included all of the participants, graduated and discharged, in the three programs reviewed in this report, Anchorage Felony DUI, Anchorage Felony Drug, and Bethel Therapeutic Court.[19]

A. Demographics

1. Gender

- 29% of the graduates were female; as were 24% of the discharged participants.
- Men and women graduated at similar rates.

2. Ethnicity

Overall, about 45% of participants in the program were Caucasians, 44% were Alaska Native, and 11% were "Other" (Black, Hispanic and Asian/Pacific Islander).

- 49% of the graduates were Caucasian; as were 41% of the discharged participants;
- 39% of the graduates were Native; as were 48% of the discharged participants;[20]
- 12% of the graduates were Black and Other ethnicities; as were 11% of the discharged participants.

[19] The total number of offenders in the analysis was 214. Of these, 97 were comparison offenders, 63 were graduates of one of the three programs, and 54 were discharged after participating in one of the programs. The demographic descriptions give data only for the graduates of the programs, and those who were discharged. The descriptive analyses relied on cross-tabulations of the data, or bi-variate analyses. A multivariate analysis, showing which of the variables were independently statistically significant, taking into account all of the other information about offenders, is reported below in Part 4.

[20] Almost all of the Bethel participants and comparison group offenders were Native. The Anchorage felony courts had a mix of ethnicities.

A separate analysis showed that Caucasians, Natives, and "Other" ethnicities did not differ in any statistically significant way in the chances that they would graduate or be discharged.[21]

- Of the Caucasian participants, 57% graduated and 43% were discharged.
- Of the Native participants in the programs, 48% graduated and 52% were discharged.
- Of the "Other ethnicity" participants, 54% graduated and 46% were discharged.

3. Age

The offender's age was not significantly related to the chance that an offender would graduate or be discharged.

- 43% of the graduates were aged 40 and over; as were 33% of the discharged participants.
- 19% of the graduates were between the ages of 18 and 30, as were 35% of the discharged participants.[22]

4. Indigency (type of attorney)

One indicator of an offender's socioeconomic status at the time of admission to the therapeutic court was whether an attorney had been appointed for the offender at public expense.[23] Offenders had to meet specific guidelines to show that they could not afford to employ their own attorneys. Their lack of ability to afford an attorney showed that they had less income and fewer resources than offenders who used a private attorney to represent them.[24]

- 89% of the graduates and 96% of the discharged participants had a public attorney.

---

[21] The multivariate analysis, below in Part 4, showed that the chances of re-arrest, which was a different question than likelihood of finishing the program, were statistically significantly greater for "Other" ethnicity offenders.

[22] The multivariate analysis showed that older participants were significantly more likely to have low recidivism rates after they left the program than younger participants. See Part 4, below. 68% of the discharged participants between 18 and 30 had a new arrest, and 37% had a new conviction in the first year. 14% of the discharged offenders and 4% of the graduates aged 40 and over had a new arrest. The Council's companion recidivism report, note 5, above, also showed that younger offenders were significantly more likely to be re-arrested.

[23] Information about the participants' incomes was not consistently available from any source.

[24] Much of the early work in designing and setting up the therapeutic courts was done with the close cooperation of the Public Defender Agency. Public Defender clients may have had a better chance of participation during the early days of the programs. Private attorneys have been encouraged to work with the therapeutic courts also.

B. Criminal history

- 60% of the graduates had at least one prior felony, as did 51% of the discharged participants.

C. Location

- 23% of the participants were in the Anchorage Felony Drug Court, 46% were in the Anchorage DUI Court, and 31% were in the Bethel Court.
- Of the 117 participants in the programs, 54% graduated and 46% were discharged from the program. The rates varied slightly by the programs, with 50% of Bethel participants graduating, 56% of the Anchorage Felony Drug Court participants, and 56% of the Anchorage Felony DUI participants.

D. Type of conviction that brought offender to therapeutic court

All of the offenders entering these three therapeutic courts had an alcohol or drug abuse problem. Some courts also had restrictions on the types of offenses that the offenders had committed. The Anchorage DUI court took only persons convicted of felony Driving Under the Influence (DUI).[25] The Anchorage Felony Drug Court took offenders with a drug abuse problem, who had no violent offenses on their records. The Bethel Therapeutic court took a mix of offenders, both felonies and serious misdemeanors, including some who were convicted of Violent offenses.

- 6% of the graduates had a Violent conviction when they entered the therapeutic court, as did 9% of those discharged from a therapeutic court;
- 11% of the graduates had a Property conviction when they entered the therapeutic court; as did 24% of those discharged;
- 13% of the graduates had a Drug Conviction when they entered the therapeutic court; as did 7% of those discharged;
- 67% of the graduates had a Driving conviction when they entered the therapeutic court, as did 56% of those discharged.
- This analysis suggested that offenders with a Property conviction in the case that brought them to therapeutic court were more likely to be in the discharged group, rather than the graduated group. Driving and Drug offenders were disproportionately represented in the graduated group.

[25] Offenders might also have been convicted of felony refusal of a blood alcohol test.

- All of the Violent offenders were in the Bethel court, either as participants or comparisons.[26]
- Most of the offenders in the three courts had been convicted of a Class C Felony at the time of their admission to the therapeutic programs. A handful had been convicted of Class B offenses, and a small number had been convicted of misdemeanor offenses.[27]

[26] The Bethel court had more leeway to take a variety of offenders. The Anchorage Felony Drug Court was initially limited by the terms of the federal grant that funded it to take only non-violent offenders. The Anchorage DUI Court was limited by the terms of its state legislative mandate to take only felony offenders convicted of DUI and related felonies. The Bethel court worked with alcohol addicted offenders.

[27] All of the misdemeanor offenders were in Bethel.

Part 4

Recidivism rates related to offender characteristics[28]

- Participants in the Anchorage DUI program had fewer re-arrests and new convictions during the first year after release than participants in the other two programs.
- The longer an offender participated in a program, the less likely that participant was to be re-arrested.[29]
- Native and Caucasian participants had about the same chance of being re-arrested after their time in the program.[30] Black and Other participants (combined) were more likely to be re-arrested and re-convicted in the first year. The data are not detailed enough to allow any hypothesis about this finding.
- Older participants were less likely to be re-arrested and re-convicted than younger participants.

---

[28] Details of the survival (multivariate) analysis that produced these findings are available from the Council. The findings listed on this page were all statistically significant in the survival analysis. Gender, indigency, prior history of convictions, seriousness of the underlying conviction, a participant's mental health status, and the amount of time incarcerated before trial were all not statistically significantly related to the chance of re-arrest and re-conviction for participants.

[29] There was not enough information about convictions to analyze the relationship between length of time in program and convictions.

[30] The Council's companion report on recidivism (see note 5, above) showed that Natives were significantly more likely to be rearrested after release than were Caucasians. This report's findings that Natives had about the same re-arrest rates as Caucasians, all other things being equal, is even more significant in the context of general information about the relationships between ethnicity and recidivism.

Part 5

Type and Seriousness of New Convictions

A. New convictions by type of conviction that brought offender to therapeutic court

The percentages of offenders in the therapeutic courts who had a new conviction during the first year varied by the type of the original offense with which they entered the therapeutic court.

- 33% of the offenders with a new conviction had been convicted of a Property offense.[31]
- 33% had been convicted of a Driving offense.
- 22% of the participants who were convicted of a new offense had originally been convicted of a Violent offense.
- 11% had been convicted of an "Other" offense.
- None had been convicted of a Drug or Sexual offense.

B. Type of new convictions

To see how often repeat offenders committed the same type of offense as the one they had been convicted of earlier, the Council compared the new convicted offense with the offense of which the offender was convicted in the earlier report. An offender could have been convicted of more than one new type of offense.

- No single group of offenders (e.g., Violent, Property) was more likely than any other group to be convicted of the same type of offense.[32]
- An "Other" conviction was the most common type of new conviction, particularly for those originally convicted of Violent and Driving offenses.[33]

---

[31] The Council's baseline recidivism report showed that more Property offenders had a new conviction than did other types of offenders. See CRIMINAL RECIDIVISM IN ALASKA, see note 5, above, at page 3.

[32] The number of graduates and discharged offenders, combined, during the first year out of the program was too small to draw any conclusions about statistical significance. The earlier recidivism report, *id.* at page 6, showed that Driving offenders were the most likely group to be convicted of a new offense in the same category as their earlier offense, but that does not seem to be the case in this group of offenders.

[33] "Other" offenses included perjury, weapons, violation of court orders, escape, and public order offenses.

C. Seriousness of new convictions

- Within the first year after their release from the program,[34] none of the program participants (graduates and discharged) were convicted of an offense at a more serious level than the one for which they were admitted to a therapeutic court.[35] In contrast, about 15% of most types of offenders in the companion recidivism report, and 3% of the comparison offenders in this therapeutic court analysis were convicted of an offense at a more serious level than their 1999 offense.[36]

[34] For graduates, release from the program was measured from their date of graduation. For participants who were discharged from the program or left voluntarily, release was measured from the date on which they were released from serving any sentence that was imposed.

[35] A graduate of one of the therapeutic courts was alleged to have committed a more serious crime two years after graduation from the therapeutic court. Although the Council did not extend its data collection to more than one year out, because of the limited number of cases available, this case is mentioned for the sake of completeness.

[36] CRIMINAL RECIDIVISM IN ALASKA, see note 5, above, at page 6. 18% of Violent offenders, 16% of Driving offenders, 15% of Property offenders, and 14% of Other offenders were convicted of an offense more serious than their 1999 case. 4% of Drug offenders and no Sexual offenders were convicted of more serious offenses.

Part 6
Findings and Recommendations

Findings

1. 54% of the participants in these programs graduated. Within one year of graduating, these graduates were less than half as likely to be re-arrested than comparison offenders with similar characteristics and about one-third as likely to be re-arrested than felony offenders charged in 1999. Therapeutic courts promote public safety by reducing recidivism of felony offenders who have alcohol and drug problems and who graduate from a therapeutic court program.

2. Recent national reports provide support from other programs, showing that many therapeutic programs reduce recidivism and have benefits that exceed costs by as much as ten-to-one ratios.[37]

3. Native groups have urged state agencies to provide treatment programs that are responsive to the differences between Native and Western cultures. This report found that Native and Caucasian participants do about equally well in therapeutic courts.

4. Offenders of other ethnicities (Blacks, Hispanics and Asian/Pacific Islanders were grouped together for this analysis because of the small numbers of each ethnicity) participated in the therapeutic courts in smaller proportions. Participants in these combined ethnic groups were re-arrested at higher rates than Native or Caucasian participants.

Recommendations

1. To build on the success of the therapeutic courts, sponsoring agencies should do additional work on the costs and benefits of this approach.

2. The state should explore the reasons for good response to the therapeutic courts for Native participants. It would be useful to talk with participants and staff, particularly in Bethel, to determine the reasons for these successes.

3. The state should explore possible reasons for the differences among ethnic groups in recidivism rates.

---

[37] Aos, Miller and Drake, EVIDENCE-BASED PUBLIC POLICY OPTIONS TO REDUCE FUTURE PRISON CONSTRUCTION, CRIMINAL JUSTICE COSTS, AND CRIME RATES, October 2006, Washington State Institute for Public Policy, Exhibit 4, page 9, shows a variety of treatment and monitoring programs including therapeutic courts from around the country that have been shown to reduce recidivism. Costs and benefits of many of the programs are shown on the chart.

Appendix A

Appendix A

Therapeutic Court Recidivism Methodology

This Appendix describes the procedures that the Judicial Council used to select the subjects and carry out the analyses for the report

Sample

The Council published *Evaluation of the Outcomes in Three Therapeutic Courts*[38] in April 2005. The report included 154 program participants and 104 comparison offenders.[39] Comparison offenders were selected by program staff, after discussion with the Council. Subsequent analyses showed that they matched the participants on age, gender, ethnicity, and type of offense.

At the time of the 2005 report, requested by the legislature in HB 172, 41% of the participants were still active in the programs. The Alaska Department of Health and Social Services funded this follow-up report to find the outcomes for these offenders and the comparison groups one full year after the offenders had completed the therapeutic programs, or had been discharged and completed serving their sentences, or had finished their sentences. Of the original 258 offenders, 214 met the criteria for inclusion in the present report.

Data about release and subsequent recidivism

The Department of Public Safety, the Department of Corrections, and the Alaska Court System provided access to data about the selected offenders. The format of each data set varied among the agencies. More detailed information is available from the Judicial Council.

---

[38] EVALUATION OF THE OUTCOMES IN THREE THERAPEUTIC COURTS, Alaska Judicial Council, April 2005. Available on the Judicial Council's website, www.ajc.state.ak.us, under "Publications."

[39] The report included 154 program participants and 104 comparison offenders. The research used matched comparison offenders, the usual methodology for evaluations such as this one. Randomized control groups are rarely used in this type of research because of ethical concerns, sample size issues, and statistical problems. See, letter from Dr. John Roman, The Urban Institute to Chief Justice Fabe and Judicial Council members, February 6, 2007, available from the Judicial Council. Dr. Roman noted that "the numbers of people eligible to participate in an experimental program are small." He also noted that "when small samples are randomized, researchers are often unable to detect a positive program effect even if there was one. Empirical studies have found that a well-matched comparison will yield results that are nearly identical to a randomized design.

Program end and release dates

Each offender had a program end or release date. For participants in the therapeutic courts, the program end date was either the date on which the offender was shown as officially completing the program, or (if the offender was discharged or left the program voluntarily) the date on which the offender finished serving the sentence imposed after discharge from the therapeutic court. For the comparison offenders, the release date was defined as the date on which they were released from incarceration for the sentence they were serving. The time frame for the report was the first twelve months (one year) after the program end or release date. Offenders who had not been out of incarceration or released from a program for at least one year were not included in the analyses.

Arrest and conviction data

The Department of Public Safety provided the Council with a database that included only the offenders' arrests and convictions on or after the date of program end or release. The information included the dates and charges for which the offenders were arrested or convicted. Staff recorded the date of the first arrest for any reason after the release date, the total number of charges and arrests after the release or program end date, the date of the first conviction, and the total number of convicted charges and cases after the release or program end date. The nature of each charge also was recorded.

Database

The Council and its contractor, the Institute for Social and Economic Research (ISER) at the University of Alaska Anchorage, created a database of the 214 offenders who met the criteria for inclusion in this analysis. The database contained details about the offenders in the 2005 therapeutic court evaluation data set: gender, age, type of offense, proceedings in the therapeutic court, type of attorney and other information. The Council added the data from the Department of Public Safety about new arrests and convictions. This new database was used for the analyses in this report.

Analyses and Report

The Council modeled this report and the analyses of therapeutic court recidivism after the companion report, CRIMINAL RECIDIVISM IN ALASKA.[40] The Institute for Social and Economic Research at the University of Alaska Anchorage conducted the analysis. Statistical techniques used included bivariate analyses (cross-tabulations) and survival (multivariate) analyses. The Council also conducted some bivariate analyses in-house.

The Council prepared this report about the data and analyses. Results of significance tests, and greater detail about the data and methods are available by contacting the Council.

✓

8

Criminal Division

- Carries out core function of Protecting Alaskans
  - **13 District Attorney's Offices** - Ketchikan to Kodiak to Kenai to Kotzebue, Barrow to Bethel, Anchorage, Dillingham, Palmer, Fairbanks, Nome and Sitka
  - **Office of Special Prosecutions** – Cold cases; Medicaid, welfare, PFD and insurance and workers' compensation fraud; cybercrimes; fish and game crimes; environmental crimes; alcohol interdiction; criminal non-payment of child support; violations of state tax law
  - **Appeals**
  - **Rural Prosecution Unit** – assists rural offices when work load demands outstrip available prosecutor resources

9

I. Protecting Alaskans Criminal Division

- *State v. Lepping*
  - Fish and Game prosecutor Andrew Peterson tried and convicted Wasilla guide Keith Lepping on 23 counts of fishing and hunting violations including bear baiting
    - Lepping jailed for almost a year, forfeited a C-206 and Super Cub, fined $85,500, lost his guide and transporter licenses
- *State v. Torian*
  - Cold case prosecutor Paul Miovas charged former Anchorage resident with murder in 2000 stabbing death of Genevieve Tetpon
    - One of a series of alleged murders involving Alaska Native women in 1999 and 2000

10

Prosecutors in Statewide Offices

11

How the Civil Division Supports the Department of Law's Four Core Missions

12

Assistant AG's in Statewide Offices

13

I. Protecting Alaskans Civil Division

- Child Protection (23 attorneys)
- Commercial and Fair Business (18 attorneys)
- Human Services (9 attorneys)
- Regulatory Affairs and Public Advocacy (3 attorneys)
- Environmental (10 attorneys)
- Labor and State Affairs (19 attorneys)

14

I. Protecting Alaskans
Child Protection Section

- Child Protection attorneys represent the Office of Children's Services when the welfare of a child is at risk
  - 3,000 Child in Need of Aid cases yearly
    - 2,000 cases ongoing at any time
  - Child protection attorney case load is 113 per attorney—exceeding the recommended national average of 100 cases

15

I. Protecting Alaskans
Child Protection Section

- Prevailed in **all eleven recent Alaska Supreme Court appeals** of superior court orders terminating parental rights, thereby freeing children for adoption by safe families

16

I. Protecting Alaskans Commercial and Fair Business Section

- Consumer Protection Unit suits or settlements
  - Publishers Clearing House, DIRECTV, Dannon Yogurt, "Average Wholesale Price" Drug litigation
  - Local auto dealer making illegal advertisments about "guaranteed trade in allowances"
  - Juneau jewelers falsely advertising "40-75% off" sales

17

I. Protecting Alaskans Commercial and Fair Business Section

- 2010 Department of Law Fuel Price study
  - Why are rural fuel costs so high?
    - Small volumes
    - Remote locations
    - Difficult weather
  - No evidence of price-fixing
    - ISER concurred in separate Western Alaska report

Rural Alaska fuel storage tanks

18

I. Protecting Alaskans

Human Services Section, Labor and State Affairs Section
Commercial and Fair Business Section

- *Patient Protection and Affordable Care Act (PPACA)*
  - Litigating constitutionality with 25 other states
- Ongoing advice to DHSS and Divisions of Insurance and Retirement and Benefits on how PPACA—if constitutional -- will affect Alaska
  - AlaskaCare, the state health care plan
  - Insurance exchange
  - Medicaid expansion

ALASKACARE

19

I. Protecting Alaskans
Human Services Section

- Defending State DHSS in lawsuits for program payments
  - Medicaid
  - Foster care
  - Public assistance
- Representing DHSS in facilities licensing investigations and enforcement actions
  - Hospitals
  - Nursing homes
  - Assisted living facilities
  - Child Care centers
  - Foster homes
- Representing DHSS in Medicaid overpayments
  - Independent auditor said provider service charges excessive
  - Potential recoupment $1.9 million+

20

I. Protecting Alaskans Environmental Section

- *State v. BP Exploration Alaska (BPXA)*
  - Suit to recover civil assessments and revenue losses from the 2006 Prudhoe Bay pipeline shutdown due to corrosion

Leak and spill

Sludge buildup prevented corrosion detection equipment from working

21

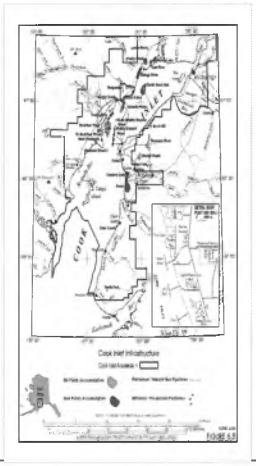
I. Protecting Alaskans Environmental Section

- *Cruise Ship Initiative*
- HB 134 regulating wastewater discharges allows cruise ship owners and operators until 2016 to fully comply with new water quality standards
  - State defending lawsuit challenging DEC's new permit

22

I. Protecting Alaskans
Regulatory Affairs and Public Advocacy Section

- RAPA advocates public interests in regulated utility matters before the Regulatory Commission of Alaska (RCA)
  - *Cook Inlet Natural Gas Storage Alaska* (CINGSA)
    - RCA's decision approving underground gas storage facility issued January 31, 2011



23

I. Protecting Alaskans
Regulatory Affairs and Public Advocacy Section

- *Enstar* Billing Error Refunds
  - RCA ordered Enstar to pay $5.7 in refunds
  - RAPA monitoring to assure refunds paid to eligible customers

ENSTAR
Natural Gas Company

24

I. Protecting Alaskans Civil and Criminal Division

- Played a key role in developing the 10-year Sexual Assault/Domestic Violence Initiative
- Collaborating with agencies and non-profits to support the Initiative
- Coordinated PSA's for the "Choose Respect" campaign
- Sponsored pro-bono summits

25

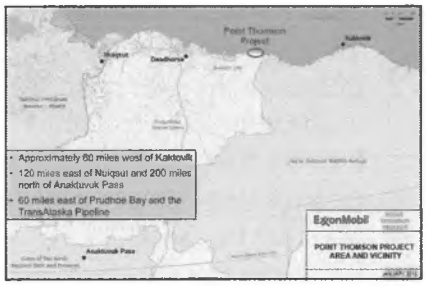
II. Fostering Responsible Development

- Oil Gas and Mining (14 attorneys)
- Transportation and Public Facilities (8 attorneys)
- Environmental (10 attorneys)
- Natural Resources (13 attorneys)

26

II. Fostering Responsible Development
Oil Gas and Mining Section

- *Point Thomson litigation*
  - Continuing to pursue resolution with ExxonMobil



27

II. Fostering Responsible Development
Transportation and Public Facilities Section

- Advising DOTPF and defending state on building projects
  - Goose Creek Prison
  - Alaska Marine Highway System HQ and Ketchikan dry dock expansion
  - Juneau Access Road
  - Knik Arm Crossing
  - In-state gas pipeline and propane projects

28

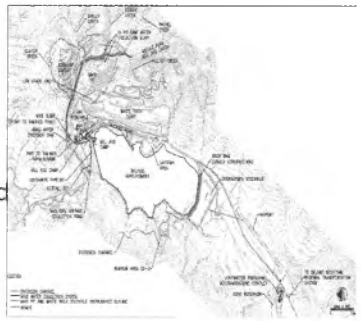
II. Fostering Responsible Development Environmental Section

- Joined Couer Alaska and defended Army Corps of Engineers Clean Water Act permit authorizing disposal of mine tailings
- Prevailed in the United States Supreme Court, allowing **Kensington Mine** to open
- **Mine opening created and preserved hundreds of jobs**

29

II. Fostering Responsible Development Environmental Section

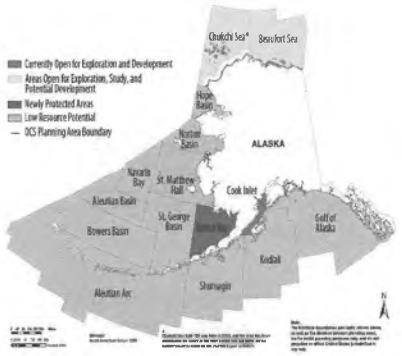
- Red Dog Mine
  - EPA withdrew key components of water pollution discharge permit
  - Assisted DEC in promulgating new regulations
    - Incorporated into a revised Clean Water Act permit
  - Mine operations continued
  - Jobs preserved



30

II. Fostering Responsible Development
Oil Gas and Mining Section

- **Defended Outer Continental Shelf (OCS) leases in court challenges**
  - Opposed a challenge to Interior's grant of Lease 193 to lessees
    - Court clarified that injunction on Lease Sale 193 pending further Interior review did not enjoin seismic testing
  - Defended Interior's approval of Shell's Beaufort and Chukchi Sea OCS exploration plans in lawsuits in federal courts
  - Filed an amicus brief in support of Interior's approval of OCS 5-year plan

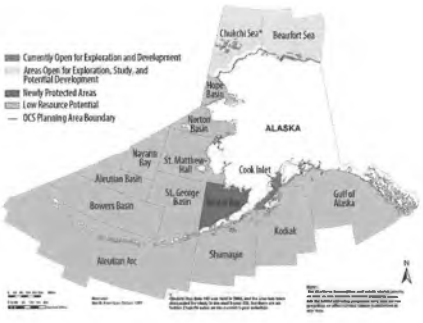


April 6, 2010 Department of Interior Outer Continental Shelf Strategy

31

II. Fostering Responsible Development
Oil Gas and Mining Section

- Challenged Interior's purported imposition of a "moratorium" on development in Alaska OCS
  - In *Alaska v. Salazar,* based on Interior's unequivocal denial of a "moratorium," clarity achieved



32

II. Fostering Responsible Development Natural Resources Section

- **Tongass Timber**
  - State partners with U.S. Forest Service in management of Tongass National Forest
    - State intervenes to defend timber sales where appropriate
      - Supported "Tongass Exemption" to USFS "Roadless Rule"
      - Supported Forest Service authorization of Logjam sale

33

II. Fostering Responsible Development Natural Resources Section

- **Endangered Species Act Developing Comprehensive Strategy**
  - Challenging unwarranted listings
  - Challenging unwarranted critical habitat designations
- Listings and designations can affect shipping, transportation, oil and gas development, mining, commercial, sport and subsistence fishing and hunting

34

II. Fostering Responsible Development Natural Resources Section

- **Endangered Species Act**
  - Listing petitions
    - Polar bears
    - Beluga whales in Cook Inlet
    - Steller sea lions
    - Humpback whales
    - Pacific walrus
    - Seals (ringed and bearded)
    - SE Alaska Pacific herring

  - Critical Habitat Designations
    - Polar bear
    - Cook Inlet Beluga whale

35

II. Fostering Responsible Development Natural Resources Section

- **Endangered Species Act**
  - Pending Lawsuits and appeals
    - Polar bear
    - Beluga whales
    - Steller sea lions
    - Humpback whales
    - Ribbon seal

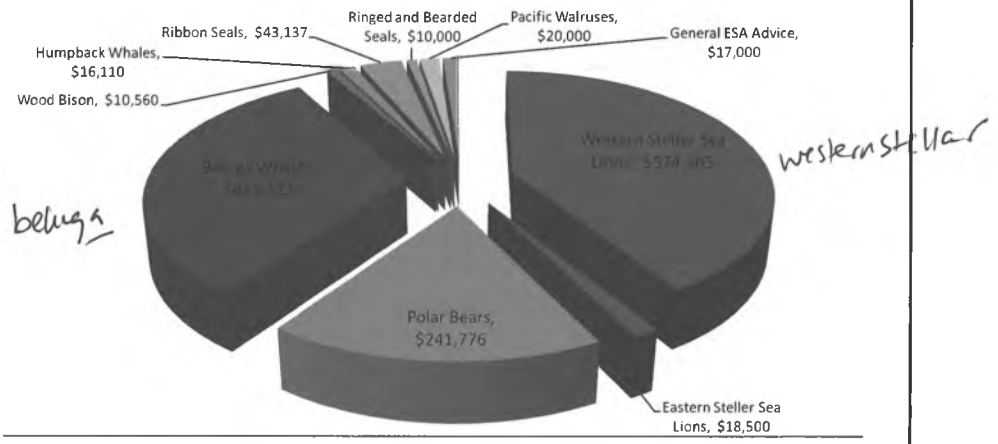
36

II. Fostering Responsible Development
Natural Resources Section

- **Endangered Species Act**
  - Threatened lawsuits
    - State's notice of intent to sue to challenge 187,000 square miles of critical habitat designation for polar bear

37

ESA
FY11 Budget Expenditures
($1,396,875)



38

II. Fostering Responsible Development Oil Gas and Mining Section

- Assisting DNR and DEC in requesting prompt federal review of challenges to petroleum exploration in the **National Petroleum Reserve-Alaska** (NPR-A)
  - Clean Water Act wetlands fill permit for CD-5 project

39

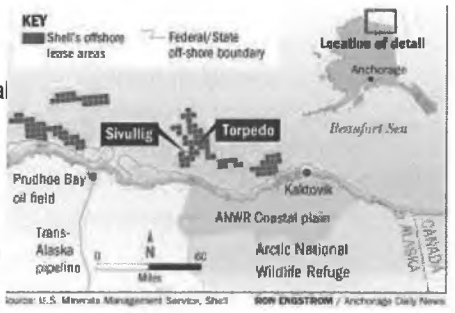
II. Fostering Responsible Development Natural Resources Section

- Advising DNR on response to BLM Wilderness and "Wild Lands" designations
  - Interior Secretary Salazar ordered the evaluation of 72 **million+ acres of federal land in Alaska for wilderness characteristics, potentially** allowing federal government to create de-facto wilderness in Alaska without congressional oversight
  - Affects permitting and right of way determinations
    - Changes the multiple use mandate otherwise applicable to BLM lands
  - U.S. Fish and Wildlife Service revisions to the Arctic National Wildlife Refuge (ANWR) Comprehensive Conservation Plan, evaluating wilderness
    - Dept. of Law provided legal advice to Governor who wrote President Obama urging him to respect ANILCA

40

II. Fostering Responsible Development
Environmental Section

- Assisting DEC's request for prompt EPA action on Shell's Clean Air Act permit application after Environmental Appeals Board (EAB) remanded application for further work
  - EAB questioned EPA's analysis of impacts of nitrogen dioxide emissions from drill ships
  - Shell now postponing plans to drill exploratory wells this summer



41

II. Fostering Responsible Development
Environmental and Natural Resources Sections

- Clean Water Act 404(c)
  - EPA by MOA with Corps of Engineers may invoke 404(c) to veto some Corps permit decisions
    - EPA usually exercises veto authority sparingly (only 13 time since 1972)
  - Southwest Alaskans asking EPA to invoke 404(c) process before companies at Pebble prospect apply for development permits on state mining claims
  - Assisting DEC and DNR in evaluating response to EPA's agreement to review

42

II. Fostering Responsible Development
Environmental Section

- *Nunamta Aulukestai v. State*: Defending the State in a suit alleging constitutional violations in statutes and regulations that authorize temporary land and water use permits for mineral exploration at the Pebble project

II. Fostering Responsible Development
Natural Resources Section

- Defending Alaska's Fisheries Management
  - *In Upper Cook Inlet Drift Association v. Locke*, state intervened (with U.S.) in lawsuit where UCIDA wanted to preempt *state* management of salmon fisheries in Cook Inlet (state waters)
  - UCIDA and U.S. settlement requires UCIDA to submit allocation proposals to state Board of Fisheries
- ADF&G request exclusive management

III. Protecting Fiscal Integrity

- Collections and Support (8 attorneys)
- Oil Gas and Mining (14 attorneys)
- Labor and State Affairs (19 attorneys)
- Torts and Workers' Compensation (15 attorneys)

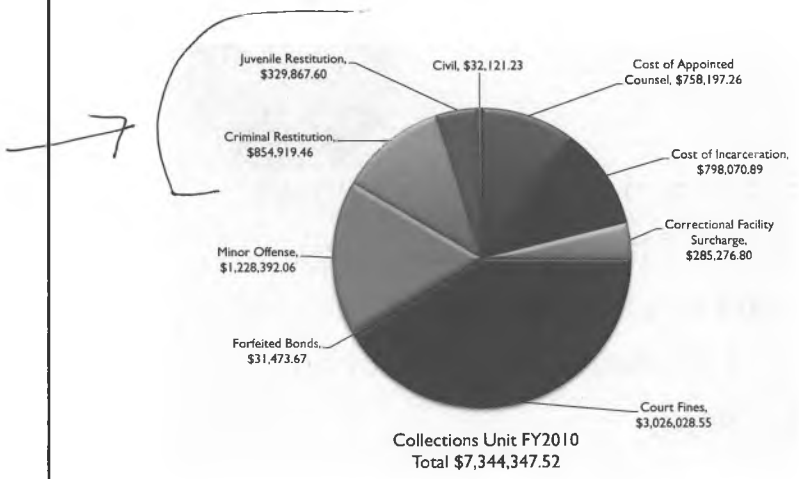
45

III. Protecting Fiscal Integrity
Collections and Support Section

- Collects criminal fines and surcharges owed the State and restitution owed to 3rd parties
  - Collected $7.3 million in FY 10, of which $1.1 million was for victim restitution

46

Collections and Support Recoveries FY 10



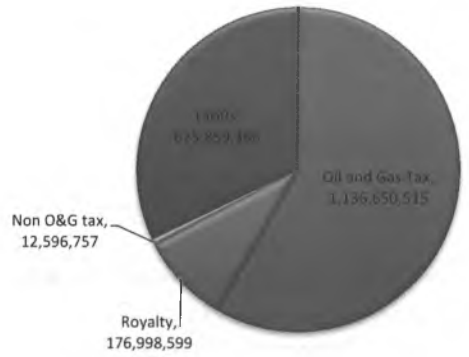
47

III. Protecting Fiscal Integrity Oil Gas & Mining Section

- Oil and Gas Royalties and Taxes - Summary
  - State operating revenues come from oil and gas corporate income taxes, production taxes, property taxes and royalties on Alaska North Slope crude oil
- Collected nearly $82 million in additional taxes and royalties in *calendar* year 2010
- Collected $95.9 million in FY 11 through February 8, 2011

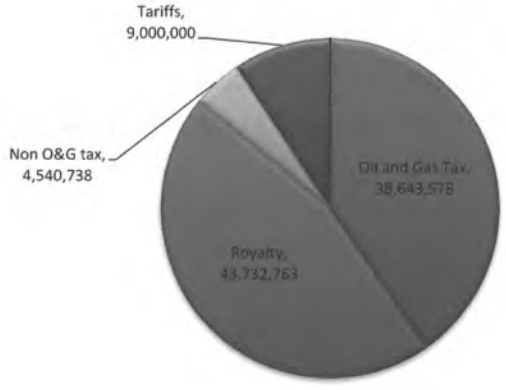
48

Oil, Gas and Mining Decisions and Settlements FY00-FY10 ($1.95 billion)



49

Oil, Gas and Mining Decisions and Settlements FY11 Though February 8, 2011 ($95.9 million)



50

III. Protecting Fiscal Integrity
Oil Gas and Mining Section

- TAPS Tariff Litigation
  - State protested TAPS tariff rates for 2005 and following years before the Federal Energy Regulatory Commission (FERC) and Regulatory Commission of Alaska (RCA)
  - TAPS Strategic Reconfiguration case concurrently before FERC and the RCA
    - State challenge to TAPS' Owners inclusion of hundreds of millions of dollars in imprudently incurred capital project expenditures in the tariffs.
    - Eight-week hearing before the FERC and RCA scheduled for November 2011

51

III. Protecting Fiscal Integrity
Oil Gas and Mining Section

- TAPS Property Tax Litigation
  - Represented Dept of Revenue in Superior court trial on 2006 TAPS property tax valuation
  - Court said State Assessment Review Board (SARB) methodology correct
  - Outcome increased property tax revenues for affected municipalities and state
    - TAPS Owners appealed
      - assessment too high
    - Municipalities also appealed
      - assessment too low

52

III. Protecting Fiscal Integrity
Oil Gas and Mining Section

- More TAPS Property Tax litigation
  - Representing Dept of Revenue in Superior Court appeals from SARB's 2007-2009 TAPS property tax assessments
  - Eight-week trial in September 2011

53

III. Protecting Fiscal Integrity
Commercial and Fair Business and Labor and State Affairs Sections

- Cruise Ship Initiative Passenger Tax
  - Cruise ship initiative made income from cruise ship water activities subject to Alaska Net Income Tax and imposed a gambling tax and a "head" tax of $46
  - Cruise industry sued state over the "head tax"
  - Defended Dept of Revenue and assisted in negotiating a settlement
  - Legislature passed new law reducing the tax rate to $34.50
  - Preserves payment of about $34 million per year to defray costs of services and facilities to accommodate passenger visits

54

III. Protecting Fiscal Integrity
Labor and State Affairs Section

- State lawsuit against Mercer, actuary for state pension plans (PERS) and (TERS)
  - Lawsuit settled
  - Mercer paid $500 million

55

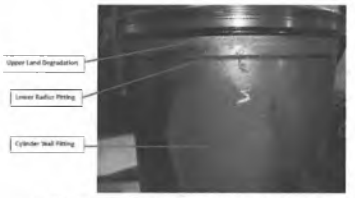
III. Protecting Fiscal Integrity
Natural Resources Section

- *Carlson v. State*
  - 26 year old lawsuit by non-resident fishermen
    - They sought refunds of commercial fishing permit fees
      - Nonresident fees used to be 3x higher than resident fees
  - Court ruled against state
    - Judgment is $12 million in principal
      - $82.3 million total
      - Much of it due to 11% prejudgment interest compounded quarterly
      - plus attorney's fees
  - Case on appeal to Supreme Court
  - Successful outcome could be worth $60 million in savings

56

III. Protecting Fiscal Integrity
Transportation Section

- State suing the boat builder and the manufacturer of the state's two fast ferries (*M/V Fairweather* and *M/V Chenega*) for engine defects
- Engine defects have cost the state hundreds of thousands of dollars in repairs
- *M/V Fairweather* still out of service



57

III. Protecting Fiscal Integrity
Tort and Workers' Compensation Defense Section

- In 2010, Department successfully defended over 200 tort claims with **no adverse judgments** against the state

58

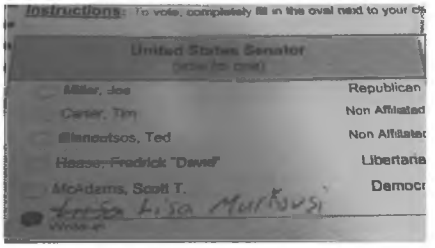
IV. Promoting Good Governance

- Natural Resources (13 attorneys)
- Opinions, Appeals and Ethics (11 attorneys)
- Labor and State Affairs (19 attorneys)

59

IV. Promoting Good Governance
Labor and State Affairs Section

- Defended Federal Elections (November 2010) lawsuits
  - Write-in candidate's name lawsuit
  - Miller public records lawsuit
  - Miller federal lawsuit (part 1)
  - Miller state lawsuit
  - Miller federal lawsuit (part 2)
  - Other lawsuits
    - Voting Rights Act lawsuit
    - Fairbanks suit filed 1/10/11 (state moved to dismiss as untimely)
- Law advised and defended Division of Elections



60

IV. Promoting Good Governance
Labor and State Affairs Section

- *Nick v. State*
  - Defended and settled elections lawsuit in Western Alaska
  - Enhancements to language assistance for Yup'ik speaking voters will be available at elections in Bethel area

61

IV. Promoting Good Governance
Opinions, Appeals and Ethics, Labor and State Affairs Sections

- Defending the Initiative Process
  - *Planned Parenthood v. Campbell*
    - State defended lawsuit to overturn certification of ballot initiative to require parental notification of minor daughter's abortion
      - Alaska Supreme Court ruled initiative should appear on the ballot
      - Alaska voters enacted parental notification law by initiative in 2010
        - Constitutionality of that law now being challenged in *Planned Parenthood v. State*
  - *Natural Right to Life (10NRTL)*
    - Department opined initiative should not be certified because proposal "clearly unconstitutional" under federal and state law

62

IV. Promoting Good Governance
Opinions, Appeals and Ethics Section

- *Executive Branch Ethics Act* advice and enforcement
  - Adopted new regulations, including standards governing state reimbursement of attorneys fees incurred by state officers exonerated in an ethics complaint proceeding
    - Similar to Rep. Gruenberg's HB 14 authorizing state reimbursement only after exoneration
  - Ethics training for senior managers and boards
  - Advisory opinions and investigations

63

IV. Promoting Good Governance
Opinions, Appeals and Ethics Section

- Public Records Requests
  - 26,500 pages of former Governor Palin's emails
    - Legal review to be completed by 3/31/11
    - Governor's Office review to be completed by 5/31/11
  - In 2010, Department of Law
    - Addressed 43 separate voluminous public records requests directed to Law
    - Provided privilege reviews for records requests to other state agencies

64

CHALLENGES AND OPPORTUNITIES

WHAT'S AHEAD FY 12 AND BEYOND

65

- Continue to Advance Core Services
- State-Federal Relations
  - Areas where state and federal cooperation is working well
  - Areas where a core state interest requires federal challenge

66

General Examples where State-Federal Cooperation is Working Well

- Department of Environmental Conservation's (DEC) air permitting program
- DEC assumption of National Pollutant Discharge Elimination System (NPDES) permit program under the federal Clean Water Act
- Cleanups at federal facilities under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and other federal and state laws

67

Specific Examples of State Cooperation with Federal Programs

- Defended Army Corps of Engineers Clean Water Act permit authorizing disposal of mine tailings, allowing Kensington Mine to open
- Worked with EPA to incorporate revised DEC regulations into Red Dog Mine Clean Water Act permit
- Intervened on side of U.S. in *Point Hope v. Salazar* and *Center for Biological Diversity v. U.S.*
  - Outer Continental Shelf cases
    - challenging the OCS 5-year plan
    - challenging to OCS Lease Sale 193 (Chukchi Sea)
    - Challenging Shell's Beaufort and Chukchi Sea OCS exploration plans
- Supported U.S. Forest Service authorization of Logjam timber sale

68

Areas Where a Core State Interest Requires Challenge Because of Federal Overreach

- **Endangered Species Act**
  - U.S. Fish and Wildlife Service
    - Species listings
    - Critical habitat designations
- **Clean Water Act**
  - Environmental Protection Agency
    - Wetlands fill permit 404(c) elevated scrutiny
      - CD-5
      - Tanana River Bridge
    - Pre-permit scrutiny
      - Pebble prospect
- **Clean Air Act**
  - Environmental Protection Agency
    - Offshore oil and gas exploration
      - Shell Beaufort Sea drilling plans
- **Wilderness and "Wild Lands" designations**
  - Bureau of Land Management
    - Designations could tighten permit requirements
- **Patient Protection and Affordable Care Act**
  - Constitutionality

69

Challenges and Opportunities

- Support--as legally appropriate--**responsible resource development**
  - Develop a comprehensive long term development strategy
    - Endangered Species Act
      - Unwarranted listings
      - Unwarranted designations of critical habitat
    - Outer Continental Shelf exploration
      - Challenges when warranted
    - Clean Air and Water Acts
      - Challenges when warranted

70

Challenges and Opportunities

- Develop a 5-year **interdepartmental** plan
- Coordinate and cooperate
  - Legislative and executive branches of state government
  - All executive agencies
    - Department of Natural Resources
    - Department of Environmental Conservation
    - Department of Commerce Community and Economic Development
    - Department of Law
    - Department of Fish and Game

71

Challenges and Opportunities

- Cooperate and coordinate with stakeholders **outside** *and* **inside** state government
  - Municipalities
  - Boroughs
  - Native corporations and tribes
  - Other states
    - Washington and Oregon joined to de-list the Stellar sea lions
  - Allies like National Association of Attorneys General and Association of Fish and Wildlife Agencies

72

- Thank you

Attorney General Designee
John J. Burns

3/16/11 CONFIRMA-TION HEARING: ATTORNEY GENERAL JOHN BURNS

<TARGET><BILL></BILL><SUBJECT>3-16-11 CONFIRMATION HEARING ATTORNEY GENERAL JOHN BURNS</SUBJECT><COMM>SJUD27</COMM></TARGET>

SENATE
CONFIRMATION COMMITTEE REPORT

Date: 3/16/11

In accordance with AS 39.05.080, the Judiciary Committee reviewed the following and recommends the appointment be forwarded to a joint session for consideration:

Attorney General – Department of Law
John. J. Burns

This does not reflect an intent by any of the members to vote for or against the confirmation of the individual during any further sessions.

Signature:	Printed Last Name
	PASKVAN
	Wielechowski
	Coghill
Chair:	French

Please return to the Senate Secretary's Office (Room 213).

Memorandum

TO: Senator French, Chair
Judiciary Committee

FROM: Kirsten Waid
Secretary of the Senate

DATE: February 2, 2011

SUBJECT: Confirmation of Governor's Appointment

Pursuant to AS 39.05.080, the President has referred the following name for legislative confirmation to your committee for a hearing, recommendation and report:

State of Alaska Attorney General
John Burns
Appointed: 11/30/2010

Resume(s) will be transmitted electronically.

KW:jcs
gl #2

Burns, John
State of Alaska Attorney General

John J. Burns

John J. Burns is Governor Parnell's appointee as Alaska's twenty-second Attorney General. Burns, age 51, is a life-long Alaskan, who grew up in Nome and Fairbanks, where his father was a marine mammal biologist with the Alaska Department of Fish and Game and his mother worked in the airlines industry. Burns graduated from West Valley High School in Fairbanks in 1976 and from the University of Alaska Fairbanks in 1982 with degrees in history and philosophy. In 1986, Burns received his JD degree from University of Puget Sound School of Law in Tacoma, Washington.

Burns spent the summer months of his high school, college, and law school years working as a fisheries technician for the Alaska Department of Fish and Game throughout Western Alaska and in Prince William Sound.

Burns was admitted to the Alaska Bar in 1986 and to the U.S. District Court of Alaska in 1987. He was a judicial extern for Justice Jay Rabinowitz of the Alaska Supreme Court and a law clerk for the Fairbanks Superior Court. Burns entered private practice with the law firm Birch Horton Bittner and Cherot in their Fairbanks office. In 1999, Burns and partner Cory Borgeson formed Borgeson and Burns, PC, providing a full range of legal services, including business law and litigation, public utility practice, property law, insurance defense, estate planning, and family law. Burns' practice focused primarily on business transactions and commercial litigation.

In addition to his legal practice, Burns commercial fished for a number of years in Bristol Bay and taught business law classes for 12 years as an adjunct professor at the University of Alaska Fairbanks. Burns was a member of the Fairbanks Chamber of Commerce, serving as its past president, and he has been active in many other community service organizations, including the Fairbanks Rotary Club, the University's Chancellor Advisory Committee, and Hospice of Alaska.

Attorney General Burns and his wife Christi have been married for twenty-four years. Together they have two daughters, Alissa, a senior at the University of Arizona, and Kate, a high school junior who is currently studying in Poland on a Rotary exchange fellowship.

UPS

1. Describe your law school experience. Where and when did you attend law school? Did you receive any honors? Did you participate in your school's law review? Moot court? Legal aid clinic? Any other details about that time in your life?

2. Describe your legal employment after law school. What subject areas have you practiced in? How many other lawyers did you practice with? How many jury trials have you completed? How many appearances have you made before the Alaska Supreme Court? Before the Ninth Circuit Court of Appeals? Have you published in any legal journals?

6-10 jury trials

3. Which US President do you admire most? Why?

4. What do you see as the primary mission of the Attorney General?

5. What is the biggest challenge facing the civil division? What actions do you plan to take in reaction to that challenge?

6. What is the biggest challenge facing the criminal division? What actions do you plan to take in reaction to that challenge?

7. Are you satisfied with the turnover rates in the criminal division? If not, what actions do you plan to take to lower the turnover rates?

"new blood"

8. Alaska suffers from some of the highest sex assault and sex abuse rates in the nation. Are prosecutions of this crime increasing? Are trials on these charges increasing? Please provide some statistics on this subject. What actions do you plan to take in this area?

Kresyle : More

9. What will be your Department's approach to the issues of tribes and tribal sovereignty in Alaska? Please discuss the ruling in the recent "Tanana" case.

10. Regarding health care reform, please be prepared to discuss your advice to the Governor that Judge Vinson's ruling was "binding law" in Alaska. Please review the Legislative Legal memo from Dennis Bailey and be prepared to respond to his points.

MEMORANDUM

State of Alaska
Department of Law

TO: John Burns
Attorney General
State of Alaska

DATE: March 15, 2011

SUBJECT: *Impact of decision In Florida v. United States, DHHS*, 3:10-cv-91

FROM: Joanne Grace
Alaska Department of Law

This memorandum addresses the issue of whether Judge Vinson's summary judgment ruling in *Florida v. United States, DHHS* is "binding law" in Alaska. It also responds to the points made in the Legislative Legal memo from Dennis Bailey.

Background. On January 31, 2011, Judge Roger Vinson of the United States District Court for the Northern District of Florida granted summary judgment to the 26 state plaintiffs challenging the Patient Protection and Affordable Care Act. Judge Vinson's order found unconstitutional the "individual mandate" provision of the Affordable Care Act, which would require that everyone, with certain limited exceptions, purchase federally-approved health insurance or pay a penalty. Judge Vinson held that the individual mandate is not severable from the rest of the Act, and he therefore declared the entire Act void.

Answer. Alaska is a party—a plaintiff—in the case, and the parties are bound by the court's judgment that the Act is void. That is black-letter law. As agents of the state, state officials must abide by the decision. For this reason, Dennis Bailey's point that Judge Vinson's order has precedential or stare decisis effect only "in the limited territory" of the Northern District of Florida is irrelevant. By filing this lawsuit, Alaska submitted to the jurisdiction of the court and must follow the court's decision. Thus, to the extent that the Affordable Care Act requires any action or implementation by the State of Alaska, it is "binding law" as to the State of Alaska. The state could not re-

challenge the constitutionality of the Act in either a state or federal court in Alaska or elsewhere.[1]

Of course, the case is stayed pending a decision on appeal, so the parties are relieved of the injunctive effect of the decision until the Eleventh Circuit decides the appeal.

Response to points by Dennis Bailey.

Mr. Bailey reviewed three legal principles that he believed "may affect the application of the decision of the Florida…Court":

1. The principles of claim preclusion or issue preclusion.

I disagree with Mr. Bailey's conclusion that the Florida district court decision would not have preclusive effect in another lawsuit between the same litigants pending appeal in this case. "District court decisions … are binding on the parties unless a stay pending appeal is granted." *Mylan Pharmaceuticals, Inc. v. Shalala*, 81 F.Supp.2d 30, 37 n.10 (D.D.C. 2000) (citing *Pharmacia & Upjohn Co. v. Mylan Pharmaceuticals, Inc.*, 170 F.3d 1373, 1381 (Fed. Cir. 1999) and *Deering Milliken, Inc. v. FTC,* 647 F.2d 1128-29 (D.C. Cir. 1978)). An undecided appeal does not otherwise affect a judgment's finality, which is still binding upon the parties while an appellate court reviews that order. "The established rule in the federal courts is that a final judgment retains all of its res judicata consequences pending decision of the appeal." *Jaffree v. Wallace*, 837 F.2d 1461 (11th Cir. 1988) (quoting 18 C. Wright, A. Miller, & E. Cooper, *Federal Practice and Procedure* § 4433, at 308. (1987 & Supp.); *see also Ross ex rel. Ross v. Board of Educ. of Tp. High School Dist. 211*, 486 F.3d 279, 284 (7th Cir. 2007) ("[T]he fact that an appeal was lodged does not defeat the finality of the judgment."); *Collin v. D.R. Horton, Inc.*, 505 F.3d 874, 882 (9th Circ. 2007) (holding that a final judgment retains its

---

[1] Mr. Bailey relies on *Totemoff v. State*, 905 P.2d 954 (Alaska 1995) to suggest that Alaska could relitigate the same issue in another court. That case would not apply to a second case challenging the constitutionality of the Affordable Care Act, however. In *Totemoff*, the state relitigated the issue of whether navigable waters are "public lands" under ANILCA, which had earlier been decided by the Ninth Circuit. The Alaska Supreme Court found that the state was not precluded from litigating the issue again—against a different party—because it was a pure question of law and the subject matter of the second case (a criminal prosecution) was "substantially unrelated" to that of the first case (a declaratory judgment action). Thus, the holding of *Totemoff* is limited to a legal issue litigated in a second case in the context of substantially different facts than those in the first case.

collateral estoppel effect pending appeal).[2]

For this reason, I do not concur with Mr. Bailey's conclusion that the Florida district court decision would not have preclusive effect in another lawsuit between the same litigants pending appeal in this case. And Judge Vinson's clarification order made clear that the parties were legally required to follow the order immediately, and that they did not have discretion to ignore it pending appeal—until he issued a stay.

2 & 3. The doctrine of full faith and credit and the precedential effect of a decision.

Mr. Bailey's other points—that the Florida decision is not available for enforcement under the Full Faith and Credit Clause and would not have precedential effect in a different federal district court or state court in a case between other parties—have no relevance to the Florida Affordable Care Act litigation. It is clear that the Florida District Court will not have the final word on the constitutionality of the Act, as the United States has appealed the case to the Eleventh Circuit. It is therefore irrelevant whether another court would give "full faith and credit" to the decision while it is on appeal; the plaintiffs states will not attempt to enforce the judgment in a different court while the Eleventh Circuit or the Supreme Court reviews the district court decision. It also is irrelevant that a decision by one district court is not binding on another; in fact several district courts have considered the constitutionality of this Act and have rendered inconsistent decisions. This is one of the reasons why the issue is likely to be decided ultimately by the Supreme Court. The fact that a different court in a different case—brought by different parties—might decide the case differently does not relieve that parties in *this* case from the force of the judgment made by the Florida court.

---

[2] Mr. Bailey suggests that because claim preclusion and issue preclusion require a final judgment, courts will "most likely, require that the appeal process be exhausted." In fact, the Eleventh Circuit follows the majority view that "[w]hen a judgment has been subjected to appellate review, the appellate court's disposition of the judgment generally provides the key to its continued force as res judicata and collateral estoppel. A judgment that has been vacated, reversed, or set aside on appeal is thereby deprived of all conclusive effect, both as res judicata and as collateral estoppel." *See Jaffree*, 837 F.2d at 1466 (quoting 1B *Moore's Federal Practice* Para. 0.416[2], at 517 (1984)).

MEMORANDUM February 25, 2011

SUBJECT: Effect of Florida federal district court decision on Alaska (Work Order No. 27-LS0536)

TO: Senator Hollis French
Attn: Cindy Smith

FROM: Dennis C. Bailey DCB
Legislative Counsel

You have asked for an opinion with respect to the legal effect on the State of Alaska of the recent decision by the Florida Federal District Court that declared the Patient Protection and Affordable Care Act unconstitutional. Florida v. U.S. Dept. Health and Human Svcs., No. 3:10-cv-91 RV/EMT (ND Fla. Jan 31, 2011). The court stated that the decision was the functional equivalent of an injunction but did not issue an injunction. The decision in the Florida case has not been appealed, but the government has expressed its intent to do so. The federal government has filed a motion to clarify the effect of the decision during appellate review. Defendants' Motion to Clarify, Feb. 17, 2011. [Docket No. 156].

This memorandum focuses on the question of the effect of the Florida District Court decision before a ruling by an appellate court. After appellate review is exhausted, the precedential or binding effect of an appellate decision may differ.

This memorandum describes, in broad terms, three closely related legal principles that may affect the application of the decision of the Florida Supreme Court: the doctrine of Full Faith and Credit, the principles of claim preclusion or issue preclusion, and the precedential effect of a decision. The decisions interpreting these principles are not necessarily consistent, and raise questions concerning the application of the principles to reach a definitive conclusion with respect to how they may be applied to the Florida decision. However, based on the following discussion, it is my opinion that the Florida decision is not available for enforcement under the Full Faith and Credit Clause, nor does it have preclusive effect in another litigation between the same litigants until the appeal process has been exhausted or the time limit for appeal has expired. The decision of a federal district court does not establish legal precedent, although decisions of an appeals court may establish broader legal precedent, and a decision of the United States Supreme Court has national effect.

FULL FAITH AND CREDIT

The Full Faith and Credit Clause of the Constitution, U.S. Const. art. IV, § 1, and its implementing statute, 28 U.S.C. § 1738, as well as interstitial federal common law, dictate that courts in the United States, both state and federal, must recognize and give effect to valid judgments rendered by other courts in the United States, including state and federal courts.[1,2] Recognition of judgments requires both (1) the application of the doctrines of issue and claim preclusion and (2) the enforcement of judgments. 18-130 Moore's Federal Practice - Civil § 130.01. In order to qualify for full faith and credit, a judgment must be final, valid, and "on the merits." A "final judgment" is one that is conclusive of the proceeding before the court. Some courts read 28 U.S.C. § 1963 to require an appellate decision or expiration of the time for appeal before a judgment is considered final for purposes of registration in another court.[3] Finality of a judgment is ascertained based on the law of the jurisdiction in which the judgment was rendered. 18-130 Moore's Federal Practice - Civil § 130.04. The Eleventh Circuit, which covers the State of Florida, requires that a judgment must be final by appeal or the expiration of the time for appeal. Urban Industries, Inc. v. Thevis, 670 F.2d 981 (11th Cir. 1982).

Although 28 U.S.C. 1963 only applies to judgments for the recovery of money or property, the Supreme Court has made it clear that the availability of full faith and credit does not depend on the form of relief sought. Thus, full faith and credit must be extended to actions for damages and for equitable relief. 18-130 Moore's Federal Practice - Civil § 130.07.[4]

---

[1] Article IV, § 1 of the U.S. Constitution provides:

> Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

[2] Title 28 U.S.C. § 1738, in relevant part, provides:

> The records and judicial proceedings of any court of any . . . State, Territory or Possession . . . shall have the same full faith and credit in every court within the United States and its Territories and Possessions as they have by law or usage in the courts of such State, Territory or Possession from which they are taken.

[3] Cf., Conopco, Inc. v. Roll Int'l, 231 F.3d 82, 90 (2d Cir. N.Y. 2000), rejecting the proposition that a trial court's final judgment must have been upheld on appeal (or the time for appeal must have passed) before it will be entitled to full faith and credit.

[4] See Baker v. General Motors Corp., 522 U.S. 222, 234, 118 S. Ct. 657, 139 L.Ed.2d 580 (1998) (We see no reason why the preclusive effects of an adjudication on parties and those "in privity" with them, i.e., claim preclusion and issue preclusion (res judicata and collateral estoppel), should differ depending solely upon the type of relief sought in a civil action.).

In essence, the decision of the Florida federal district court is probably not entitled to full faith and credit in other courts until the decision is final on appeal, i.e., when the appeal process has been exhausted (probably to the U.S. Supreme Court) or the time for appeal has occurred without an appeal being filed.

CLAIM PRECLUSION AND ISSUE PRECLUSION

The legal principles of claim preclusion (res judicata) or issue preclusion (collateral estoppel) prevent claims or issues from being relitigated after the claim or issue is finally decided. Claim and issue preclusion address the concerns of preserving the finality of a judgment. A court enforcing a judgment under the full faith and credit clause will apply claim preclusion and issue preclusion principles.

Claim Preclusion

The doctrine of claim preclusion, also referred to as res judicata, means that a final judgment on the merits of an action prohibits the parties or their privies from initiating subsequent litigation arising out of the same transaction or series of transactions. 3-30 Moore's Manual--Federal Practice and Procedure § 30.02. The denial of a summary judgment motion may be an adequate basis for claim preclusion if the litigation of a particular issue has reached such a stage that a court sees no really good reason for permitting it to be litigated again. Kay-R Elec. Corp. v. Stone & Webster Constr. Co., 23 F.3d 55, 59 (2d Cir. 1994).

Issue Preclusion

The doctrine of issue preclusion, also referred to historically as collateral estoppel, essentially provides that when an issue of fact or law has been determined by a valid and final judgment, that issue may not again be litigated between the same parties in any subsequent legal action. 3-30 Moore's Manual--Federal Practice and Procedure § 30.02. Issue preclusion generally applies when the prior determination is based on a motion for summary judgment. 18-132 Moore's Federal Practice - Civil § 132.03, fn. 43.

The doctrine of full faith and credit discussed above involves the enforcement of a judgment in a different court than the court issuing the judgment. Claim preclusion or issue preclusion apply to both the court issuing a judgment and to a court where the full faith and credit of the judgment of another court is recognized. Both doctrines involve the enforcement of a valid final judgment. The effect of both doctrines is upon the parties involved. A party to an action is precluded from re-litigating a claim or issue if the party was a participant in the original litigation. Both require that the judgment in the original claim be a final judgment, which, in order to be considered a final judgment will, most likely, require that the appeal process be exhausted.

ESTABLISHING PRECEDENT / STARE DECISIS

Organization of the federal court system

The legal effect of a federal district court ruling depends, in part, on the authority of the court issuing the ruling within the structure of the federal court system. Federal courts are organized in three levels. Federal districts courts are the trial courts in the federal system, the 13 federal circuit courts of appeal are the intermediate appellate courts, and

the Supreme Court is the court of final appeal. The jurisdiction of each of 12 of the circuits and the district courts within each circuit is designated geographically. (The Federal Circuit Court of Appeal differs from the 12 geographic circuits. It is not limited geographically, but is limited by the subject and type of case it may consider.) Alaska is located in Ninth Circuit Court of Appeals. Florida is located in the Eleventh Circuit. The U.S. Supreme Court may hear cases appealed from a decision of any circuit court of appeals. One of the reasons the Supreme Court grants certiorari and hears a circuit court case is when decisions of different circuit courts of appeal conflict. A decision of the U.S. Supreme Court deciding questions of federal law is binding in federal and state courts located in all of the federal circuits.

Binding effect of a federal district court

A decision of a federal district court judge is not binding precedent in either a different judicial district, the same judicial district, or even upon the same judge in a different case. 18-134 Moore's Federal Practice - Civil § 134.02 fn. 22. Further, a decision of a district court or a federal circuit court of appeal in one circuit does not have binding effect in another circuit. The decisions of the court of appeals for one circuit are not binding upon the courts of appeal for other circuits. 18-134 Moore's Federal Practice - Civil § 134.02 fn. 19.1. Frequently, the decisions of a district court or circuit court of appeal in one circuit conflict with similar decisions in another circuit.

The legal principle that defines the binding effect of a federal district court decision is described by one court as follows:

> Stare decisis does not mandate that a district court in this circuit follow the decision of a district court in another circuit. According to Moore's Federal Practice,
>
> > Stare decisis, briefly stated, makes each judgment a statement of the law, or precedent, binding in future cases before the same court or another court owing obedience to its decisions.
>
> 1B JAMES WM. MOORE ET AL., MOORE'S FEDERAL PRACTICE P 0.401 (2d ed. 1996). . . .
>
> Moore goes on to explain how stare decisis operates in the federal system:
>
> > The court of appeals in one circuit owes no obedience to decisions of a court of appeals in another circuit, though of course it may find the reasons given for such a decision persuasive, or may be influenced by the accumulation of authority. This freedom of the circuits to come each to its own conclusion is not only tolerated, but is an important feature in the operation of the Supreme Court's certiorari practice. The district courts, like the courts of appeals, owe no obedience to the decisions of their counterparts in other

> districts, nor to the decisions of the courts of appeals in other circuits.

Id. P 0.402. Circuit precedent is consistent with this rule.

Northwest Forest Resource Council v. Dombeck, 107 F.3d 897, 900 (D.C. Cir. 1997).

The Alaska Supreme Court affirmed that it is not required to follow a federal district court decision in the context of a case involving Native rights, stating that it not bound by decisions of federal courts other than the United States Supreme Court on questions of federal law. Totemoff v. State, 905 P.2d 954 (Alaska 1995), citing In re F.P., 843 P.2d 1214, 1215 n.1 (Alaska 1992), cert. denied, 113 S. Ct. 2441 (1993). In In re F.P. the court said:

> Where a federal question is involved, the courts of Alaska are not bound by the decisions of a federal court other than the United States Supreme Court. The converse is also true; federal courts in Alaska are not bound by decisions of Alaska state courts on questions of federal law. . . .

Id. at 1215, citing Harrison v. State, 791 P.2d 359 (Alaska App. 1990).

In short, a ruling of a federal district court, the trial court, and the lowest level court in the federal system is not binding precedent in either a different judicial district, the same judicial district, or even upon the same judge in a different case. Further, the decision of a federal district court only has precedential effect in the limited territory. If it is appealed to the circuit court of appeals, a decision of the court of appeals is only enforceable within the territory of the circuit where the decision was issued. Only a decision of the U.S. Supreme Court is binding outside of the circuit where a decision is issued.

Following the above analysis it is implausible that the decision of the federal district court in Florida would have a binding precedential or binding effect on the state when appellate review has not been exhausted.

If I may be of further assistance, please advise.

Parnell seeks advice on how to proceed on health care overhaul

The Associated Press
(02/05/11 23:42:15)

JUNEAU -- Gov. Sean Parnell is asking his attorney general to advise him on whether implementing the federal health care overhaul would put Parnell in violation of his oath of office.

A federal judge in Florida this week struck down the law as unconstitutional in a case joined by 26 states, including Alaska. A major point of contention is a provision requiring citizens to buy health insurance.

While Parnell concedes the issue is expected to be decided by the U.S. Supreme Court, he says he has a duty to uphold the law and wants the attorney general to advise him.

Alaska to implement health care overhaul after losing $1 million

By ERIKA BOLSTAD
Anchorage Daily News
(03/05/11 00:22:17)

WASHINGTON -- After allowing the application deadline to pass for $1 million in federal health care assistance, Gov. Sean Parnell said Thursday he will begin implementing the new health care law after all, now that a Florida judge has told the states to do just that.

That same lower court Judge, U.S. District Judge Roger Vinson of Pensacola, Fla., had earlier found part of the new federal health care law unconstitutional, a decision cited by Parnell as justification for walking away from the federal money to assist the uninsured get health insurance. But Vinson stayed his order Thursday to give the Obama Administration time to appeal, leaving Parnell no choice but to begin putting the law into effect in Alaska.

"We will begin moving forward with state funds, rather than federal funds," said Parnell's spokeswoman, Sharon Leighow.

Federal judges in other jurisdictions have upheld the 2010 Affordable Care Act. But in any event, according to a legal analysis by the Alaska Legislature's legal division, neither Vinson's original ruling nor the rulings of any of the other lower court judges would have any force in Alaska.

State Sen. Hollis French, an Anchorage Democrat who sought the legal analysis, said Parnell should attempt to seek a waiver for his missed deadline.

Alaska, one of 26 states challenging the law's constitutionality, had held back on putting in place some aspects of health care, including turning down federal money to help set up a state insurance exchange. Alaska was the only state to refuse the money, which funds the preparations for an online exchange. Failing to apply for the grant also meant Alaska would be ineligible for an Exchange Establishment Grant, which would fund the exchange's operations through 2014.

In his order Thursday, Vinson reiterated his decision that it's unconstitutional for the law to mandate that individuals buy insurance. But Vinson also said that states must go forward with implementation, as long as the Justice Department files an appeal of his decision within seven days. Nearly everyone, including Vinson, believes the case will be decided by the Supreme Court.

"It would be extremely disruptive and cause significant uncertainty" to stop implementation of the health care act, the judge wrote. "The sooner this issue is finally decided by the Supreme Court, the better off the entire nation will be."

Parnell said Thursday in a statement that his administration "will treat the federal health care law as being in place, as we are directed by the judge in the lawsuit to which our state was a party."

The Justice Department had asked Vinson to clarify his ruling so that states would know whether they should proceed with the Affordable Care Act. A spokeswoman said they will promptly appeal Vinson's ruling.

Alaska appeared to be the only state that was deliberately holding off on implementation, and many questioned the legal backing for Parnell's move. Democrats in the Alaska legislature asked for a legal opinion on the matter; they were told Monday that a court decision by a federal judge in Florida was not binding in Alaska, which is in a different judicial circuit.

French was elated by the Florida judge's latest ruling.

"This is a good day for Alaska," said French, who like Parnell is an attorney. "The Governor can no longer evade the issue." He said it was time for Parnell to help the estimated 115,000 Alaskans who don't have health insurance.

"I hope the governor takes the opportunity to work with his administration and the legislature to implement what are some very good insurance reforms," French said.

Earlier this week, Parnell said he has moved to implement some aspects of the federal health care law into health insurance plans for state employees, including the requirement that children up to age 26 be allowed to stay on their parents' insurance policy.

But he wouldn't say whether he would pursue waivers for Alaska to design its own health care program, an option that opened up to all states earlier this week. On Monday, President Barack Obama told Parnell and other governors at their winter meeting in Washington that he supports a move to let states use waivers to design their own health care systems starting in 2014. Those state systems must meet the goals of the president's health care law, which previously wouldn't allow state waivers until 2017.

Parnell on Monday said he wouldn't apply for waivers because that would be an acknowledgment that the "the law is currently in place."

But Thursday, he said that Alaska will make decisions on a case-by-case basis about how to proceed with health-care reform. That means he'll decide whether the state "will undertake with our own money or with federal money how to implement the provisions of the law," Parnell said.

"My sole responsibility is to act in Alaska's best interests and we will do so," he said. "I continue to strongly prefer to use state resources for state-based health care solutions to increase access and improve affordability, rather than become more entangled."

Parnell won't implement federal health overhaul in Alaska

By BECKY BOHRER
The Associated Press
(02/18/11 15:37:29)

JUNEAU -- Gov. Sean Parnell took a defiant stand Thursday against the federal health care overhaul Congress passed last year, declaring that he will refuse to implement a law he views as blatantly unconstitutional.

Parnell is the latest Republican governor to lash out against the law as the courts weigh the constitutionality of the overhaul. More than half of all states, including Alaska, have sued or joined lawsuits against the government over the health care plan pushed by President Barack Obama.

It's not immediately clear what impact Parnell's move will have on Alaskans, an estimated 14 percent of whom are uninsured year-round.

Several experts believe Parnell is on shaky legal ground and that his comments are little more than symbolic. The law won't fully take effect until 2015 — just after his first term will have ended — and the constitutionality question will not get settled until the U.S. Supreme Court decides it.

Until then, in Parnell's view the decision by a federal district judge in Florida, striking down the law as unconstitutional, "is the law of the land, as it pertains to Alaska."

Alaska was one of 26 states party to that case. On Thursday, the Justice Department asked the Florida judge to clarify his ruling and tell states that they must continue to enact the Obama administration's health care overhaul while appeals are pending. Alaska Attorney General John J. Burns said Thursday he had not yet seen the filing and could not immediately comment on it.

The Florida court isn't the only one that is looking at the constitutionality of the new health law.

Two other federal judges have upheld the law and another judge ruled a provision requiring citizens to buy health insurance or face penalties — a major point of contention in the Florida case — is unconstitutional but did not strike down the rest of the law.

"This is one renegade judge that has reached this decision," said Timothy S. Jost, a professor at the Washington and Lee University School of Law. He called the opinion "extremist" and likely to be reversed on appeal. In refusing to participate in the law, he said, Alaska "is really the outlier" among states.

PARNELL SHUNS FEDERAL MONEY

Parnell sought Burns' advice on whether enforcing and enacting the law would violate his oath to uphold the state and U.S. constitutions.

Parnell disputed the contention by Jost and others that any refusal by the states to participate in the law is an invitation to the federal government to step in and implement it for them. He reads

U.S. District Judge Roger Vinson's decision as a court order blocking implementation. Vinson is the Florida judge.

"The state of Alaska will not pursue unlawful activity to implement a federal health care regime that has been declared unconstitutional by a federal court," Parnell told the Juneau Chamber of Commerce, to applause, Thursday.

Parnell said the state will pursue lawful, market-based solutions of its own. That includes looking at the potential for a health insurance exchange without the "shiny but poisonous apple" of federal dollars and mandates "that create federal dependency and control."

He faced a Friday deadline for applying for federal funds to help set up an exchange and faced pressure from seven Democratic state senators to do so. He refused.

LAWMAKERS CRITICIZE

Parnell said several of the state lawmakers who petitioned him are attorneys like he is and considering the Florida ruling, they should know better.

Sen. Bill Wielechowski, an attorney from Anchorage who signed the letter, said 49 other states accepted the federal funding for a program that he said is meant to allow for residents to get lower-cost insurance.

"For the governor to stake his flag in the ground and say, 'This is the fight I want,' over this provision, which is really a conservative provision, indicates to me that the governor, I think, is maybe placing politics over what's best for Alaskans," Wielechowski said.

Sen. Hollis French, a supporter of the federal overhaul who has introduced legislation to establish a health benefit exchange, questioned whether Parnell would be open to "meaningful reform."

Parnell said there were four areas of the law where, before the judge's decision, he had taken action. Those areas include setting up a state-run high-risk pool providing a coverage option for Alaskans previously denied insurance for pre-existing conditions. He said about 28 people are on the program list, and he believes the state should continue funding.

Alaska will work to provide more affordable, accessible health care "as a matter of state policy, not as a mandate of the federal government," he told The Associated Press.

Ron Pollack, executive director of Families USA, said currently states have an "enormous amount of discretion" in how they implement provisions of the law. If the governor refuses to exercise that, the federal government will have the say, he said.

Neither he nor Jost knew of any other state taking action similar to Parnell.

Department of Law Determines Alaska Not Required to Follow Health Care Legislation

Mon, February 14, 2011
Posted in Alaska News, Alaska Politics, Top Stories

Dave Donaldson, APRN – Juneau

The Department of Law has advised Governor Sean Parnell that Alaska is not required to follow the national Health Care legislation that went into effect last year.

The governor plans to follow that advice.

Last month, a Florida federal district court found the act unconstitutional, and Attorney General-designee John Burns told House and Senate Judiciary Committees Monday that he has advised the governor that – unless overturned by the U.S. Supreme Court – the Florida decision is binding in Alaska.

Burns argues the decision leaves compliance up to the states.

But Senate Judiciary Chairman Hollis French disagreed with Burns' advice, saying that without an injunction from the Florida Court, or a confirming opinion by the U.S. Supreme Court, the decision leaves the law in place.

The governor's staff says in an e-mail response, "The governor will not implement a law that has been ruled unconstitutional. He is committed to working to find ways to increase accessibility and improve affordability of health care for Alaskans."

The Florida case has not yet been appealed to the U.S. Supreme Court, however the Justice Department – and the state's challenging the law – have indicated that a national decision is needed.

Fla. judge strikes down health care overhaul; Alaska one of 26 states in lawsuit

by Christopher Eshleman / ceshleman@newsminer.com
01.31.11 - 11:48 am
• AUDIO: Gov. Parnell reaction to health care ruling

JUNEAU — Gov. Sean Parnell, emboldened by a federal judge's order Monday, has asked federal agencies to pause health care reform.

Parnell's request came hours after the state found itself on the winning side of the court decision, which called last year's health care reform unconstitutional.

The reform law, which requires all able U.S. citizens to obtain health insurance, has been rejected twice and upheld twice in the lower courts. All sides say it'll fall to the U.S. Supreme Court to decide.

"Because the authority of Congress to enact the mandatory health insurance provisions has been ruled unconstitutional, I urge the federal government to voluntarily suspend all efforts to implement these provisions until the U.S. Supreme Court decides the issue," said Parnell.

Critics have accused the governor of dragging his feet in implementing the reforms and on Monday said he was throwing stones rather than offering solutions.

Rep. David Guttenberg, D-Fairbanks, said escalating drug and medical costs threaten to injure the state's relatively healthy financial position. Guttenberg, who has pitched a handful of bills aimed at lowering prescription drug costs here, challenged Parnell to take a more constructive approach toward health care issues at the state and national levels.

"All I've seen is, 'We don't want national health care reform,'" he said. "I want to know when he's going to tackle that problem" — high health care costs — "because as far as I can tell he's not doing it."

The governor said while he was "concerned about rising health care costs, solutions have to be constitutional."

Parnell announced last April the state would join others in the lawsuit. He called the issue a key point in the historic debate about the power-sharing relationship between states and Washington, D.C.

Parnell called the individual mandate a case of inappropriate "federal encroachment."

Florida's U.S. District Judge Roger Vinson, in his decision Monday, said he "reluctantly" rejected Congress' decision to mandate insurance. The mandate is a

linchpin of the 2010 health care reform.

"At a time when there is virtually unanimous agreement that health care reform is needed in this country, it is hard to invalidate and strike down a statute titled 'The Patient Protection and Affordable Care Act,'" Vinson wrote.

U.S. Sen. Lisa Murkowski said in a statement the ruling "confirms what many of us have been saying about the constitutionality of the individual mandate in the law. Clearly, this is not the final word on the matter, and ultimately the U.S. Supreme Court will be the final arbitrator."

Alaska filed suit with 20 other states in April 2010, and six more joined later.

The Alaska Department of Law, in a 49-page memorandum on April 19, said the state should reject Congress' decision to "shortcut" the federal separation of powers through its insurance mandate.

Vinson's decision said the mandate applied the federal government's power to regulate commerce too broadly. He pointed to the states' argument that "not even in the context of insurance under the National Flood Insurance Program did Congress mandate that all homeowners buy flood insurance directly from a private company."

A judge in Virginia also rejected the mandate, but two judges in other states have upheld it.

In his ruling, Vinson went further than the Virginia judge and declared the entire health care law unconstitutional, The Associated Press reported Monday.

"This is obviously a very difficult task. Regardless of how laudable its attempts may have been to accomplish these goals in passing the act, Congress must operate within the bounds established by the Constitution," Vinson wrote in his 78-page ruling.

At issue is whether the government is reaching beyond its constitutional power to regulate interstate commerce by requiring citizens to purchase health insurance or face tax penalties.

Attorneys for President Barack Obama's administration argued the health care system was part of the interstate commerce system. They said the government can levy a tax penalty on Americans who decide not to purchase health insurance because all Americans are consumers of medical care.

But attorneys for the states said the administration was essentially coercing the states into participating in the overhaul by holding billions of Medicaid dollars hostage. The states also said the federal government is violating the Constitution by forcing a mandate on the states without providing money to pay for it.

Florida's former Republican Attorney General Bill McCollum filed the lawsuit just minutes after Obama signed the 10-year, $938 billion health care bill into law

in March. He chose a court in Pensacola, one of Florida's most conservative cities. The nation's most influential small business lobby, the National Federation of Independent Business, also joined.

Other states that joined the suit are Alabama, Arizona, Colorado, Georgia, Indiana, Idaho, Iowa, Kansas, Louisiana, Maine, Michigan, Mississippi, Nebraska, Nevada, North Dakota, Ohio, Pennsylvania, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin and Wyoming.

The Associated Press contributed to this report.

The Washington Post

Judge clears way for implementation of health-care law in states that are challenging it

By N.C. Aizenman
Washington Post Staff Writer
Thursday, March 3, 2011; 9:22 PM

A federal judge in Florida who earlier ruled the new health-care law unconstitutional said Thursday that implementation can proceed in the 26 states that mounted the legal challenge while the Obama administration pursues an appeal.

However, U.S. District Court Judge Roger Vinson attached two conditions to the "stay" of his ruling: The administration must file its appeal within seven days and it must request an expedited review from either the Court of Appeals or the Supreme Court.

"Almost everyone agrees that the Constitutionality of the Act is an issue that will ultimately have to be decided by the Supreme Court of the United States," Vinson wrote. "It is very important to everyone in this country that this case move forward as soon as practically possible."

Justice Department spokeswoman Tracy Schmaler said the administration would seek fast-track consideration from the 11th Circuit, just as it has with other challenges to the law that have reached circuit courts.

However, a direct appeal to the Supreme Court is highly unlikely. The administration has opposed an effort by Virginia to do so in a similar but separate case. And the states party to the Florida suit have made clear they do not intend to pursue that avenue, either.

The suit is one of 20 pending against the law. Vinson's original Jan. 31 decision was one of two to rule against it. Like the judge in Virginia's suit, Vinson found the law's requirement that virtually all Americans obtain health insurance beginning in 2014 to be unconstitutional.

But Vinson, who like the Virginia judge was a Republican appointee, went a step further, ruling that the insurance mandate was so inextricably linked to the rest of the law that the entire statute should be invalidated.

Three other federal judges, all Democratic appointees, have upheld the law, most

The Washington Post

Judge clears way for implementation of health-care law in states that are challenging it

recently Judge Gladys Kessler in the District of Columbia.

Technically, the administration had not requested a stay of Vinson's order voiding the law, but rather a clarification of whether he had intended to halt the law's rollout pending appeals.

The confusion stemmed from Vinson's decision not to formally enjoin the law in his original order; instead he suggested that it was "the functional equivalent" of an injunction because it's presumed the federal government automatically complies with such judgements.

This formulation provoked a flurry of conflicting interpretations from lawyers for both sides as well as among legal scholars.

Republican governors and attorneys general of three states party to the suit - Alaska, Florida and Wisconsin - immediately declared that in their states, at least, the law is now "dead."

In the weeks since, they have also returned some state planning funds provided through the law. But they have kept other funds, and they did not take steps to undo provisions of the law that had already taken effect.

By contrast, governors of several other states that are also part of the challenge said they believed that until the appeals process is completed, the statute remains in effect and they must comply with it.

In his opinion Thursday, Vinson rebuked the administration for suggesting that his original order was ambiguous, writing that he clearly meant for it to have the "practical" effect of an injunction that could only be lifted if the government requested a stay.

"It was not expected that [the government] would effectively ignore the order and declaratory judgement for two-and-one-half weeks, continue to implement the Act, and only then file a belated motion to 'clarify,' " the judge wrote.

In an example of scathing language he employed throughout the decision, Vinson added that the administration's claim that its delay was due to the need for careful

The Washington Post

Judge clears way for implementation of health-care law in states that are challenging it

analysis, "seems contradictory to media reports that the White House declared within hours after entry of my order that 'implementation will proceed apace.' " And, at another point he wrote that one of the administration's arguments "borders on misrepresentation."

Still, since administration lawyers had made clear that if the judge responded that they needed a stay, they intended to request one, Vinson said he would "save time" by treating the government's motion for clarification as one also requesting a stay.

In granting it, the judge pointed to the other cases pending against the law and the conflicting opinions from other courts.

Alaska Gov. Sean Parnell (R) issued a statement saying that although he now considers the law back in effect, he would still be reluctant to apply for federal implementation funds.

"I continue to strongly prefer to use state resources for state-based health-care solutions to increase access and improve affordability, rather than become more entangled," he said.

Judge asked to clarify health ruling

By MELISSA NELSON
The Associated Press
(02/17/11 16:31:55)

PENSACOLA, Fla. -- The Justice Department asked a federal judge in Florida on Thursday to tell states that they must continue to enact the Obama administration's health care overhaul despite the judge's ruling that the law is unconstitutional.

In a motion to clarify, administration attorneys asked U.S. District Judge Roger Vinson to make clear that states cannot ignore the new health care laws while his ruling is being appealed.

At stake, according to the government's motion, are provisions of the new law that would create chaos if ignored by the states.

Those provisions include 2011 changes in Medicare payment rates. Delaying those changes "could cause major delays and errors in the payment of the roughly 100 million Medicare claims processed each month," the motion states.

Florida, Alaska and 24 other states filed the lawsuit that said Congress exceeded its authority by requiring all citizens to purchase health insurance or face tax penalties.

Vinson agreed, ruling on Jan. 31 that President Barack Obama's entire health care overhaul law is unconstitutional. The broad challenge seems certain to be resolved only by the Supreme Court.

He declared the law "a plain case of judicial overreaching." Some states, citing Vinson's ruling, have refused to cooperate with the health care law.

For example, earlier Thursday in Alaska, Gov. Sean Parnell said he would not implement the new law because Vinson ruled it was unconstitutional.

"The state of Alaska will not pursue unlawful activity to implement a federal health care regime that has been declared unconstitutional by a federal court," Parnell told the Juneau Chamber of Commerce, to applause.

Parnell said the state would pursue lawful, market-based solutions of its own. That includes planning for a health insurance exchange, meant to offer a choice of health plans, without the "shiny but poisonous apple" of federal dollars and mandates "that create federal dependency and control."

A spokeswoman for Florida Attorney General Pam Bondi said Vinson's ruling indeed does mean the states need not move forward with the health overhaul.

Vinson "clearly stated" that the order equaled an injunction, Jennifer Meale said in an e-mailed statement. An injunction legally halts or forbids something.

But in the filing, the Justice Department said the opposite.

Even though Vinson declared the law unconstitutional, all states in the lawsuit already have an obligation to comply with all the provisions of the Affordable Care Act while the case is being appealed, Justice lawyers argued.

"We believe it is important to put to rest any doubts about the ability of states and other parties to continue to implement these critical programs and consumer protections provided under this statute," said Justice Department spokeswoman Tracy Schmaler.

The issue is expected to be resolved by the Supreme Court. Two other U.S. district judges previously upheld the law, both Democratic appointees to the federal bench.

A Republican appointee in Virginia also ruled against the law. Vinson's ruling is considered the most sweeping against the health overhaul. He was appointed by Republican President Ronald Reagan.

For nearly 25 years, my practice with the law firms Borgeson & Burns and, prior to that, Birch Horton Bittner and Cherot focused on commercial litigation, business transactions, property law and insurance defense on behalf of financial institutions, corporations and private clients.

Prior to forming Borgeson & Burns, P.C., partner Cory Borgeson and I formerly staffed the Fairbanks office of Birch Horton Bittner and Cherot, which at that time was a full service law firm with offices in Anchorage, Juneau, and Washington D.C. Birch Horton Bittner and Cherot specialized in government relations, public utilities, construction law, complex litigation, commercial transactions and real estate. My general practice areas while with Birch Horton Bittner and Cherot focused on business law, property law, insurance defense, and related litigation.

Ballot proposal to ban abortion in Alaska ruled unconstitutional

Sean Cockerham | The Anchorage Daily News

last updated: January 12, 2011 06:42:43 AM

Alaska attorney general John Burns has found unconstitutional a proposed ballot initiative that was essentially seeking to outlaw abortion in Alaska.

"The proposed bill meets the 'clearly unconstitutional' standard because it would supersede a woman's constitutional right to privacy," said the opinion, released late Monday. "This right is a federal constitutional right recognized by the U.S. Supreme Court in Roe v. Wade."

Burns, who started work as the new attorney general last month, is recommending that the lieutenant governor refuse to certify the "Natural Right to Life" initiative.

The initiative tries to make it Alaska law that "the natural right to life and body of the unborn child supersedes the statutory right of the mother to consent to the injury or death of her unborn child."

MEMORANDUM February 25, 2011

SUBJECT: Effect of Florida federal district court decision on Alaska (Work Order No. 27-LS0536)

TO: Senator Hollis French
Attn: Cindy Smith

FROM: Dennis C. Bailey
Legislative Counsel

You have asked for an opinion with respect to the legal effect on the State of Alaska of the recent decision by the Florida Federal District Court that declared the Patient Protection and Affordable Care Act unconstitutional. Florida v. U.S. Dept. Health and Human Svcs., No. 3:10-cv-91 RV/EMT (ND Fla. Jan 31, 2011). The court stated that the decision was the functional equivalent of an injunction but did not issue an injunction. The decision in the Florida case has not been appealed, but the government has expressed its intent to do so. The federal government has filed a motion to clarify the effect of the decision during appellate review. Defendants' Motion to Clarify, Feb. 17, 2011. [Docket No. 156].

This memorandum focuses on the question of the effect of the Florida District Court decision before a ruling by an appellate court. After appellate review is exhausted, the precedential or binding effect of an appellate decision may differ.

This memorandum describes, in broad terms, three closely related legal principles that may affect the application of the decision of the Florida Supreme Court: the doctrine of Full Faith and Credit, the principles of claim preclusion or issue preclusion, and the precedential effect of a decision. The decisions interpreting these principles are not necessarily consistent, and raise questions concerning the application of the principles to reach a definitive conclusion with respect to how they may be applied to the Florida decision. However, based on the following discussion, it is my opinion that the Florida decision is not available for enforcement under the Full Faith and Credit Clause, nor does it have preclusive effect in another litigation between the same litigants until the appeal process has been exhausted or the time limit for appeal has expired. The decision of a federal district court does not establish legal precedent, although decisions of an appeals court may establish broader legal precedent, and a decision of the United States Supreme Court has national effect.

FULL FAITH AND CREDIT

The Full Faith and Credit Clause of the Constitution, U.S. Const. art. IV, § 1, and its implementing statute, 28 U.S.C. § 1738, as well as interstitial federal common law, dictate that courts in the United States, both state and federal, must recognize and give effect to valid judgments rendered by other courts in the United States, including state and federal courts.[1,2] Recognition of judgments requires both (1) the application of the doctrines of issue and claim preclusion and (2) the enforcement of judgments. 18-130 Moore's Federal Practice - Civil § 130.01. In order to qualify for full faith and credit, a judgment must be final, valid, and "on the merits." A "final judgment" is one that is conclusive of the proceeding before the court. Some courts read 28 U.S.C. § 1963 to require an appellate decision or expiration of the time for appeal before a judgment is considered final for purposes of registration in another court.[3] Finality of a judgment is ascertained based on the law of the jurisdiction in which the judgment was rendered. 18-130 Moore's Federal Practice - Civil § 130.04. The Eleventh Circuit, which covers the State of Florida, requires that a judgment must be final by appeal or the expiration of the time for appeal. Urban Industries, Inc. v. Thevis, 670 F.2d 981 (11th Cir. 1982).

Although 28 U.S.C. 1963 only applies to judgments for the recovery of money or property, the Supreme Court has made it clear that the availability of full faith and credit does not depend on the form of relief sought. Thus, full faith and credit must be extended to actions for damages and for equitable relief. 18-130 Moore's Federal Practice - Civil § 130.07.[4]

---

[1] Article IV, § 1 of the U.S. Constitution provides:

> Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

[2] Title 28 U.S.C. § 1738, in relevant part, provides:

> The records and judicial proceedings of any court of any . . . State, Territory or Possession . . . shall have the same full faith and credit in every court within the United States and its Territories and Possessions as they have by law or usage in the courts of such State, Territory or Possession from which they are taken.

[3] Cf., Conopco, Inc. v. Roll Int'l, 231 F.3d 82, 90 (2d Cir. N.Y. 2000), rejecting the proposition that a trial court's final judgment must have been upheld on appeal (or the time for appeal must have passed) before it will be entitled to full faith and credit.

[4] See Baker v. General Motors Corp., 522 U.S. 222, 234, 118 S. Ct. 657, 139 L.Ed.2d 580 (1998) (We see no reason why the preclusive effects of an adjudication on parties and those "in privity" with them, i.e., claim preclusion and issue preclusion (res judicata and collateral estoppel), should differ depending solely upon the type of relief sought in a civil action.).

In essence, the decision of the Florida federal district court is probably not entitled to full faith and credit in other courts until the decision is final on appeal, i.e., when the appeal process has been exhausted (probably to the U.S. Supreme Court) or the time for appeal has occurred without an appeal being filed.

CLAIM PRECLUSION AND ISSUE PRECLUSION

The legal principles of claim preclusion (res judicata) or issue preclusion (collateral estoppel) prevent claims or issues from being relitigated after the claim or issue is finally decided. Claim and issue preclusion address the concerns of preserving the finality of a judgment. A court enforcing a judgment under the full faith and credit clause will apply claim preclusion and issue preclusion principles.

Claim Preclusion

The doctrine of claim preclusion, also referred to as res judicata, means that a final judgment on the merits of an action prohibits the parties or their privies from initiating subsequent litigation arising out of the same transaction or series of transactions. 3-30 Moore's Manual--Federal Practice and Procedure § 30.02. The denial of a summary judgment motion may be an adequate basis for claim preclusion if the litigation of a particular issue has reached such a stage that a court sees no really good reason for permitting it to be litigated again. Kay-R Elec. Corp. v. Stone & Webster Constr. Co., 23 F.3d 55, 59 (2d Cir. 1994).

Issue Preclusion

The doctrine of issue preclusion, also referred to historically as collateral estoppel, essentially provides that when an issue of fact or law has been determined by a valid and final judgment, that issue may not again be litigated between the same parties in any subsequent legal action. 3-30 Moore's Manual--Federal Practice and Procedure § 30.02. Issue preclusion generally applies when the prior determination is based on a motion for summary judgment. 18-132 Moore's Federal Practice - Civil § 132.03, fn. 43.

The doctrine of full faith and credit discussed above involves the enforcement of a judgment in a different court than the court issuing the judgment. Claim preclusion or issue preclusion apply to both the court issuing a judgment and to a court where the full faith and credit of the judgment of another court is recognized. Both doctrines involve the enforcement of a valid final judgment. The effect of both doctrines is upon the parties involved. A party to an action is precluded from re-litigating a claim or issue if the party was a participant in the original litigation. Both require that the judgment in the original claim be a final judgment, which, in order to be considered a final judgment will, most likely, require that the appeal process be exhausted.

ESTABLISHING PRECEDENT / STARE DECISIS

Organization of the federal court system

The legal effect of a federal district court ruling depends, in part, on the authority of the court issuing the ruling within the structure of the federal court system. Federal courts are organized in three levels. Federal districts courts are the trial courts in the federal system, the 13 federal circuit courts of appeal are the intermediate appellate courts, and

the Supreme Court is the court of final appeal. The jurisdiction of each of 12 of the circuits and the district courts within each circuit is designated geographically. (The Federal Circuit Court of Appeal differs from the 12 geographic circuits. It is not limited geographically, but is limited by the subject and type of case it may consider.) Alaska is located in Ninth Circuit Court of Appeals. Florida is located in the Eleventh Circuit. The U.S. Supreme Court may hear cases appealed from a decision of any circuit court of appeals. One of the reasons the Supreme Court grants certiorari and hears a circuit court case is when decisions of different circuit courts of appeal conflict. A decision of the U.S. Supreme Court deciding questions of federal law is binding in federal and state courts located in all of the federal circuits.

Binding effect of a federal district court

A decision of a federal district court judge is not binding precedent in either a different judicial district, the same judicial district, or even upon the same judge in a different case. 18-134 Moore's Federal Practice - Civil § 134.02 fn. 22. Further, a decision of a district court or a federal circuit court of appeal in one circuit does not have binding effect in another circuit. The decisions of the court of appeals for one circuit are not binding upon the courts of appeal for other circuits. 18-134 Moore's Federal Practice - Civil § 134.02 fn. 19.1. Frequently, the decisions of a district court or circuit court of appeal in one circuit conflict with similar decisions in another circuit.

The legal principle that defines the binding effect of a federal district court decision is described by one court as follows:

> Stare decisis does not mandate that a district court in this circuit follow the decision of a district court in another circuit. According to Moore's Federal Practice,
>
> > Stare decisis, briefly stated, makes each judgment a statement of the law, or precedent, binding in future cases before the same court or another court owing obedience to its decisions.
>
> 1B JAMES WM. MOORE ET AL., MOORE'S FEDERAL PRACTICE P 0.401 (2d ed. 1996). . . .
>
> Moore goes on to explain how stare decisis operates in the federal system:
>
> > The court of appeals in one circuit owes no obedience to decisions of a court of appeals in another circuit, though of course it may find the reasons given for such a decision persuasive, or may be influenced by the accumulation of authority. This freedom of the circuits to come each to its own conclusion is not only tolerated, but is an important feature in the operation of the Supreme Court's certiorari practice. The district courts, like the courts of appeals, owe no obedience to the decisions of their counterparts in other

> districts, nor to the decisions of the courts of appeals in other circuits.

Id. P 0.402. Circuit precedent is consistent with this rule.

Northwest Forest Resource Council v. Dombeck, 107 F.3d 897, 900 (D.C. Cir. 1997).

The Alaska Supreme Court affirmed that it is not required to follow a federal district court decision in the context of a case involving Native rights, stating that it not bound by decisions of federal courts other than the United States Supreme Court on questions of federal law. Totemoff v. State, 905 P.2d 954 (Alaska 1995), citing In re F.P., 843 P.2d 1214, 1215 n.1 (Alaska 1992), cert. denied, 113 S. Ct. 2441 (1993). In In re F.P. the court said:

> Where a federal question is involved, the courts of Alaska are not bound by the decisions of a federal court other than the United States Supreme Court. The converse is also true; federal courts in Alaska are not bound by decisions of Alaska state courts on questions of federal law. . . .

Id. at 1215, citing Harrison v. State, 791 P.2d 359 (Alaska App. 1990).

In short, a ruling of a federal district court, the trial court, and the lowest level court in the federal system is not binding precedent in either a different judicial district, the same judicial district, or even upon the same judge in a different case. Further, the decision of a federal district court only has precedential effect in the limited territory. If it is appealed to the circuit court of appeals, a decision of the court of appeals is only enforceable within the territory of the circuit where the decision was issued. Only a decision of the U.S. Supreme Court is binding outside of the circuit where a decision is issued.

Following the above analysis it is implausible that the decision of the federal district court in Florida would have a binding precedential or binding effect on the state when appellate review has not been exhausted.

If I may be of further assistance, please advise.

THE SUPREME COURT OF THE STATE OF ALASKA

STATE OF ALASKA, JOEL GILBERTSON in his official capacity as Alaska Commissioner of Health & Social Services, MARCIA KENNAI, in her official capacity as Deputy Commissioner of the Office of Children's Services, PHILLIP MITCHELL, in his official capacity as Chief of the Alaska Bureau of Vital Statistics, and GREGG RENKES, in his official capacity as Attorney General, Appellants, v. NATIVE VILLAGE OF TANANA, DAN SCHWIETERT, THERESA SCHWIETERT, NULATO VILLAGE, VILLAGE OF KALSKAG, AKIAK NATIVE COMMUNITY, VILLAGE OF LOWER KALSKAG, and KENAITZE INDIAN TRIBE, Appellees.	Supreme Court No. S-13332 Superior Court No. 3AN-04-12194 CI OPINION No. 6542 - March 4, 2011

Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, John Suddock and Sen K. Tan, Judges.

Appearances: Peter K. Putzier, Assistant Attorney General, Anchorage, Talis J. Colberg, Attorney General, Juneau, for

Appellants. Heather Kendall-Miller, Native American Rights Fund, Anchorage, Lloyd B. Miller, Sonosky, Chambers, Sachse, Miller & Munson, LLP, Anchorage, and Andy Harrington, Alaska Legal Services Corporation, Fairbanks, for Appellees.

Before: Carpeneti, Chief Justice, Fabe, Winfree, and Christen, Justices. [Stowers, Justice, not participating.]

WINFREE, Justice.

I. INTRODUCTION

In this case we revisit ripeness and tribal sovereignty decisions intersecting in a dispute between the State of Alaska and a number of Alaska Native tribes. Procedurally, we are asked whether the narrowed view of ripeness announced in *Brause v. State, Department of Health & Social Services*[1] and recently applied in *State v. ACLU of Alaska*[2] requires dismissal of this case without reaching its merits. Substantively, we are asked (1) whether the inherent sovereign jurisdiction of Alaska Native tribes recognized over a decade ago in *John v. Baker*[3] includes the initiation of "child custody proceedings" as that term is used in the Indian Child Welfare Act (ICWA), and (2) if so, whether tribal court judgments in those proceedings are entitled to full faith and credit by the State.

We conclude that this dispute is ripe for a limited decision, acknowledging that further refinements and qualifications must arise from future adjudications based on specific factual scenarios. Today we decide that (1) federally recognized Alaska Native tribes are not necessarily precluded from exercising inherent sovereign jurisdiction to

---

[1] 21 P.3d 357 (Alaska 2001).

[2] 204 P.3d 364 (Alaska 2009).

[3] 982 P.2d 738 (Alaska 1999).

initiate "child custody proceedings" as ICWA defines that term, and (2) judgments issued in those proceedings may be entitled to full faith and credit by the State under ICWA. But lack of specific facts precludes us from defining the extent of any individual Alaska Native tribe's inherent sovereign jurisdiction to initiate "child custody proceedings" or the standards for determining which judgments would be entitled to full faith and credit by the State.

II. PROCEEDINGS

Native Village of Tanana (Tanana), Nulato Village (Nulato), Akiak Native Community (Akiak), Village of Kalskag (Kalskag), Village of Lower Kalskag (Lower Kalskag), and Kenaitze Indian Tribe (Kenaitze) are recognized as Indian tribes by the United States Department of the Interior,[4] and all but Kenaitze are listed as "Alaska Native villages" under the Alaska Native Claims Settlement Act (ANCSA).[5] In this opinion, we refer to the tribal appellees collectively as "the Tribes."[6]

The Tanana Tribal Court, the Nulato Tribal Council, and the Kenaitze Tribal Court all hear children's proceedings initiated by their tribes or transferred from state court, and they issue decrees establishing protection, guardianship, and custody of

Reg. 54,364, 54,368-69 (Oct. 21, 1993) (listing federally recognized tribes); Indian Entities Recognized and Eligible to Receive Services from the United States Bureau of Indian Affairs, 68 Fed. Reg. 68,180, 68,183-84 (Dec. 5, 2003) (same).

[5] 43 U.S.C. §§ 1602(c), 1610(b) (2000).

[6] The individual appellees, Dan and Theresa Schwietert, adopted a special-needs Alaska Native child through the Tanana Tribal Court in June 2004 and received a birth certificate from the State. Although plaintiffs below, the Schwieterts participated in the litigation in a collateral supporting role to the Tribes, and the final judgment does not mention the Schwieterts.

children.[7] Akiak's Quanerceraarviat Tribal Court hears children's cases, including tribally initiated child protection cases, and issues orders and adoption decrees. The Kalskag Traditional Council initiates child protection proceedings. The Lower Kalskag Tribal Court hears matters involving allegations of child abuse or neglect.

In late October 2004 the Tribes[8] sued the State of Alaska and — in their official capacities — the Attorney General and heads of the Office of Children's Services (OCS), Bureau of Vital Statistics (BVS), and Department of Health and Social Services (DHSS), collectively "the State." The Tribes alleged that based on an October 1, 2004 opinion letter from then-Attorney General Gregg Renkes (2004 Attorney General Opinion), the State adopted a policy and began taking official action to interfere with tribal rights under ICWA and to deny full faith and credit to tribal adoption decrees and orders issued in tribally initiated child protection cases. The Tribes sought declaratory relief recognizing that Alaska Native tribes "possess inherent and concurrent jurisdiction to adjudicate children's proceedings and issue tribal court decrees" and injunctive relief forcing "the [S]tate and its agencies to grant full faith and credit to tribal court decrees as required by law."

In late December 2004 the State moved to dismiss the suit on ripeness grounds. In response the Tribes moved for leave to file an amended complaint in early January 2005, which the State opposed on ripeness and futility grounds. The superior court granted the Tribes' motion in early March 2005 and accepted the amended

---

[7] ICWA defines "tribal court" in relevant part as "a court with jurisdiction over child custody proceedings and which is . . . established and operated under the code or custom of an Indian tribe, or any other administrative body of a tribe which is vested with authority over child custody proceedings." 25 U.S.C. § 1903(12) (2000).

[8] The original five plaintiff tribes were Tanana, Nulato, Kalskag, Akiak, and Lower Kalskag. The Tribes amended their complaint twice to add plaintiffs: first to add the Schweiterts and second to add Kenaitze.

complaint. After oral argument Superior Court Judge John Suddock subsequently denied the State's dismissal motion from the bench, stating in part:

> [A]s the pleading[] says, the tribal courts are behaving as if they have original jurisdiction in these matters. They are actually adjudicating them and they are placing children based on them and the [S]tate is here saying . . . ["]that's void. Those courts are [a] nullity. Any of those parents could go get those children back and not be in violation of a binding court order because it's void ab initio.["] Strikes me that that's a bad situation, that there is a very ripe question for a review: whether or not the Attorney General ever put pencil to paper . . . there is a network of tribal courts out there that has assumed a jurisdiction beyond . . . what the [S]tate contends is proper. Ordinary citizens are being affected. Children are being affected. It seems to me that there is a ripe question for declaratory judgment.

In November 2005 the Tribes moved for partial summary judgment on the legal issue of Alaska Native tribes' "inherent sovereign authority . . . to adjudicate children's proceedings." The State opposed the Tribes' motion and cross-moved for summary judgment, arguing that the 2004 Attorney General Opinion accurately interpreted existing Alaska case law and that the Tribes "do not possess the inherent authority to initiate child protection cases."

Superior Court Judge Sen K. Tan granted the Tribes' motion for partial summary judgment in May 2007, ruling that "tribes retain concurrent jurisdiction to legislate, to initiate, and to adjudicate [child in need of aid] cases in tribal courts." Upon the State's urging that the partial summary judgment granted the Tribes all the relief requested in their amended complaint, Judge Tan issued a final judgment on August 26, 2008.

The relevant language from the declaratory judgment portion of the final judgment is as follows:

> 1. [The Tribes] possess inherent [sovereign] jurisdiction to initiate child custody proceedings. . . . The [Tribes] share concurrent jurisdiction with the State . . . over child custody proceedings as the term is defined by the ICWA[,] 25 U.S.C. § 1903.
>
> 2. [The Tribes] are entitled to access . . . confidential reports and other documents in the possession of [OCS] concerning their member children.
>
> 3. [The Tribes] are entitled to full faith and credit under 25 U.S.C. § 1911(d) for their public acts, records, and judicial proceedings to the same extent that the State . . . gives full faith and credit to the public acts, records[,] and judicial proceedings of any other [s]tate.

The final judgment also enjoined the State from: (1) implementing the 2004 Attorney General Opinion by adopting policies or regulations; (2) relying on, enforcing, or carrying out any mandate based on the 2004 Attorney General Opinion that is contrary to the superior court's decision; (3) denying full faith and credit to the Tribes' determinations in ICWA-defined child custody proceedings; (4) refusing to notify the Tribes of reports of harm and provide such reports of harm for investigation; and (5) denying the Tribes information they otherwise are entitled to receive under ICWA.

The State appeals.

III. STANDARD OF REVIEW

We evaluate de novo the issue of ripeness.[9] We evaluate de novo the scope of tribal jurisdiction and the meaning of federal statutes.[10] Under de novo review, we

---

[9] *ACLU of Alaska*, 204 P.3d at 367-68 (clarifying standard of review and rejecting abuse of discretion standard suggested in earlier decisions).

[10] *John v. Baker*, 982 P.2d at 744.

apply "the rule of law that is most persuasive in light of precedent, reason, and policy."[11]

IV. DISCUSSION

Today's decision requires a review of: ICWA; Alaska and federal decisions regarding Alaska Native tribal sovereignty over ICWA-defined "child custody proceedings"; *John v. Baker*; and the State's reaction to *John v. Baker* both prior to and after October 1, 2004. This backdrop provides the necessary context for us to address both the procedural ripeness and substantive sovereignty questions before us.

A. ICWA And Relevant Authorities

1. Relevant ICWA provisions

In 1978 Congress enacted ICWA with the goal of:

> protect[ing] the best interests of Indian children and . . . promot[ing] the stability and security of Indian tribes and families by the establishment of minimum Federal standards for the removal of Indian children from their families and the placement of such children in foster or adoptive homes which will reflect the unique values of Indian culture, and by providing for assistance to Indian tribes in the operation of child and family service programs.[12]

Congress found "that there is no resource . . . more vital to the continued existence and integrity of Indian tribes than their children"[13] and "that an alarmingly high percentage

[12] Indian Child Welfare Act, Pub. L. No. 95-608, § 3, 92 Stat. 3069 (1978) (codified at 25 U.S.C. § 1902 (2000)); *accord A.B.M. v. M.H.*, 651 P.2d 1170, 1172 (Alaska 1982).

[13] 25 U.S.C. § 1901(3) (2000); *see also John v. Baker*, 982 P.2d at 747 ("[T]he statute 'seeks to protect the rights of the Indian child as an Indian and the rights of the Indian community and tribe in retaining its children in its society.' " (quoting H.R. Rep. No. 95-1386, at 23 (1978), *reprinted in* 1978 U.S.C.C.A.N. 7530, 7546)).

of Indian families are broken up by the removal, often unwarranted, of their children from them by nontribal public and private agencies and that an alarmingly high percentage of such children are placed in non-Indian foster and adoptive homes and institutions."[14] Congress further found that when "exercising their recognized jurisdiction over Indian child custody proceedings" states "have often failed to recognize the essential tribal relations of Indian people and [their] cultural and social standards."[15]

In short, ICWA "constructs a statutory scheme to prevent states from improperly removing Indian children from their parents, extended families, and tribes."[16] "Its most important procedural elements include establishing tribal courts as the required or preferred forum for adjudication of Indian child custody proceedings."[17] The United States Supreme Court declared over 20 years ago that "Congress was concerned with the rights of Indian families and Indian communities vis-à-vis state authorities. More specifically, [ICWA's] purpose was, in part, to make clear that in certain situations the state courts did *not* have jurisdiction over child custody proceedings."[18]

ICWA § 1911, titled "Indian tribe jurisdiction over Indian child custody

JONES, MARK TILDEN & KELLY GAINES-STONER, THE INDIAN CHILD WELFARE ACT HANDBOOK 5 (2d ed. 2008) (hereinafter ICWA HANDBOOK) (identifying one of ICWA's primary objectives as "encourag[ing] tribal court adjudication of child custody proceedings involving Indian children").

[18] *Miss. Band of Choctaw Indians v. Holyfield*, 490 U.S. 30, 45 (1989) (emphasis in original) (footnote omitted).

proceedings," limits state jurisdiction over ICWA-defined child custody proceedings in two ways.[19] First, § 1911(a) provides that Indian tribes have exclusive jurisdiction of child custody proceedings involving Indian children residing or domiciled in Indian country, unless federal law otherwise vests jurisdiction in the state.[20] Tribes also retain exclusive jurisdiction over tribal court wards regardless of residence or domicile.[21]

---

[19] 25 U.S.C. § 1911 (2000). For ICWA's purposes, "child custody proceeding" means and includes foster care placements, actions to terminate parental rights, preadoptive placements, and adoptive placements. 25 U.S.C. § 1903(1). ICWA generally does not apply to divorce or divorce-like child custody proceedings. *See id.*; *John v. Baker*, 982 P.2d at 746-47; INDIAN LAW DESKBOOK, note 17, above, at 574-75; ICWA HANDBOOK, note 17, above, at 27-28.

[20] "Indian child" means "any unmarried person who is under age eighteen and is either (a) a member of an Indian tribe or (b) is eligible for membership in an Indian tribe and is the biological child of a member of an Indian tribe." 25 U.S.C. § 1903(4).

An "Indian tribe" is "any Indian tribe . . . recognized as eligible for the services provided to Indians by the [Secretary of the Interior]," including "any Alaska Native village" defined in 43 U.S.C. § 1602(c) of ANCSA. *Id.* § 1903(8), (11).

The term "reservation" in ICWA means, in pertinent part, "Indian country" as defined in 18 U.S.C. § 1151. 25 U.S.C. § 1903(10). "Indian country" is defined as "(a) all lands within the limits of any Indian reservation . . . , (b) all dependent Indian communities within the borders of the United States . . . , and (c) all Indian allotments, the Indian titles to which have not been extinguished." 18 U.S.C. § 1151 (2000).

[21] 25 U.S.C. § 1911(a). Although "ward" is not defined in ICWA,

> and there is very little guidance in the legislative history or [Bureau of Indian Affairs] guidelines as to its import[,] . . . [t]he most commonly accepted understanding of wardship is that when a tribal court, or a tribal governing council, has exercised legitimate jurisdiction over an Indian child in a child custody proceeding and continues to exercise that jurisdiction, a state court's exercise of jurisdiction is precluded, except, of course, on an emergency basis.

(continued...)

Second, § 1911(b) provides that state courts must transfer foster care placement and parental right termination proceedings involving Indian children not residing or domiciled within Indian country to tribal courts upon petition, except in specific circumstances.[22]

ICWA § 1918(a) provides that "[a]ny Indian tribe which became subject to [s]tate jurisdiction pursuant to the provisions of . . . any . . . [f]ederal law, may reassume jurisdiction over child custody proceedings."[23] To reassume jurisdiction, a tribe must petition the Secretary of the Interior and provide a suitable plan for exercising jurisdiction.[24]

ICWA § 1911(d) provides that states "shall give full faith and credit to the public acts, records, and judicial proceedings of any Indian tribe applicable to Indian

---

ICWA HANDBOOK, note 17, above, at 58 (footnote omitted).

[22] 25 U.S.C. § 1911(b). Section 1911(b) "creates three checks on tribal transfer jurisdiction": (1) either parent's objection; (2) the tribe's declination of jurisdiction; and (3) the state court's finding of good cause to deny transfer. *In re C.R.H.*, 29 P.3d 849, 853 (Alaska 2001); *see generally* ICWA HANDBOOK, note 17, above, at 59-69. ICWA does not address tribes' power to receive adoptive or preadoptive cases, "nor is there much discussion of this apparent discrepancy in case law." *Id.* at 60.

[23] 25 U.S.C. § 1918(a) (2000).

[24] 25 U.S.C. §§ 1903(11), 1918(a). Of Alaska's approximately 230 federally recognized tribes, only two have successfully petitioned to reassume jurisdiction: Native Village of Barrow and Native Village of Chevak both reassumed exclusive jurisdiction over child custody proceedings involving member children residing or domiciled within their respective villages by petition in 1999. Approval of Petition for Reassumption of Exclusive Jurisdiction for Native Village of Chevak, 64 Fed. Reg. 36,391 (July 6, 1999); Approval of Petition for Reassumption of Exclusive Jurisdiction for Native Village of Barrow, 64 Fed. Reg. 36,391 (July 6, 1999); Indian Entities Recognized and Eligible to Receive Services from the United States Bureau of Indian Affairs, 73 Fed. Reg. 18,553, 18,556-57 (Apr. 4, 2008).

child custody proceedings to the same extent that such entities give full faith and credit to the public acts, records, and judicial proceedings of any other entity."[25]

2. Early Alaska precedent regarding ICWA and Alaska Native tribal sovereignty

In our 1986 decision *Native Village of Nenana v. State, Department of Health & Social Services*, we held that Public Law 280 (P.L. 280) divested Alaska Native tribes of any jurisdiction under ICWA § 1911(a) and (b).[26] *Nenana* concerned a superior court's denial of Native Village of Nenana's petition for transfer of a child protection proceeding to its jurisdiction.[27] Because ICWA § 1918(a) specifically mentions P.L. 280 as a federal law that extends state jurisdiction over some Indian tribes, we concluded that "Congress intended that [P.L.] 280 give certain states, including Alaska, exclusive [rather than concurrent] jurisdiction over matters involving the custody of Indian children, and that those states exercise such jurisdiction until a particular tribe petitions to reassume jurisdiction . . . and the Secretary of the Interior approves [the] tribe's petition."[28] We also noted that § 1911(b) transfer jurisdiction "may actually grant Indian tribes greater authority than they had prior to the Act" because "[r]egardless of whether [P.L.] 280 vests exclusive or concurrent jurisdiction in the applicable states, *prior* to [ICWA], Indian tribes may not have had jurisdiction over custody proceedings . . . where the child

---

[28] *Id.* at 221.

was domiciled off the reservation."[29]

In 1987[30] and again in 1992[31] we confirmed *Nenana*'s holding that Alaska Native tribes could not exercise jurisdiction under ICWA § 1911(a) or (b) until they had successfully petitioned for reassumption.

Our 1987 decision *In re K.E.* concerned the superior court's denial of a tribe's request for § 1911(b) transfer of a parental rights termination proceeding from state court to tribal court.[32] The tribe argued it had exclusive § 1911(a) jurisdiction based on the child's domicile "within the dependent [I]ndian community of Nenana,"[33] a reference to "Indian country."[34] We recognized *Nenana* as "controlling authority" and held that regardless of whether an Indian child resides or is domiciled in Indian country, the tribe must successfully petition to reassume jurisdiction over child custody proceedings before it can exercise § 1911(a) or § 1911(b) jurisdiction.[35]

Our 1992 decision *In re F.P.* concerned tribal jurisdiction under § 1911(a).[36] After DHSS took emergency protective custody of three Indian children, Native Village of Circle unsuccessfully argued to the superior court that the state court proceeding should be dismissed in light of the tribe's exclusive § 1911(a) jurisdiction over the

children as tribal court wards.[37] On appeal Circle asked us to review *Nenana* and *K.E.* in light of then-recent Ninth Circuit Court of Appeals cases, particularly one in which the Ninth Circuit concluded that if the two Alaska Native villages involved "were 'modern day successors to sovereign historical bands of [N]atives,' " then those villages had concurrent jurisdiction in child custody matters because they were "entitled to 'the same rights and responsibilities as . . . sovereign bands of [N]ative Americans in the continental United States.' "[38] We concluded the Ninth Circuit opinion was contrary to our prior holding that "Congress intended that most Alaska Native groups not be treated as sovereigns" and held that *F.P.* was controlled by *Nenana*.[39] We reiterated *Nenana*'s holding that ICWA § 1918(a) indicated Congress intended P.L. 280 to give Alaska and certain other states exclusive and not concurrent jurisdiction over matters involving custody of Indian children, unless tribes successfully petitioned to reassume jurisdiction.[40] Chief Justice Rabinowitz was persuaded by the Ninth Circuit's analysis and dissented, asserting that *Nenana* and *K.E.* should be overruled because P.L. 280 is not a divestiture statute, but rather an extension of states' jurisdiction to be exercised concurrently with tribes.[41]

3. Federal precedent regarding ICWA and Alaska Native tribal

sovereignty

As we observed in *F.P.*, Ninth Circuit case law has held that Alaska Native tribes can have inherent sovereign jurisdiction concurrent with the State in ICWA-defined child custody matters.[42] The 1991 decision *Native Village of Venetie I.R.A. Council v. Alaska* concerned the State's refusal to recognize two adoption decrees issued by Native Villages of Venetie and Fort Yukon.[43] The Ninth Circuit analyzed two substantive issues in resolving the dispute: "whether the [N]ative [V]illages are inherently sovereign, at least insofar as domestic relations or child-custody issues are concerned"; and, if so, "whether Congress has stripped the [V]illages of that aspect of sovereign authority which encompasses child-custody determinations."[44] As to inherent sovereignty, the Ninth Circuit determined "to the extent that Alaska's [N]atives formed bodies politic to govern domestic relations, to punish wrongdoers, and otherwise to provide for the general welfare," then "modern-day successors to [those] sovereign historical bands of [N]atives . . . are to be afforded the same rights and responsibilities as are sovereign bands of [N]ative Americans in the continental United States."[45] As to whether Congress stripped Alaska Native tribes of their inherent sovereignty over domestic relations and child-custody issues, the Ninth Circuit rejected the divestiture interpretation of P.L. 280 and held neither ICWA nor P.L. 280 "prevent[ed] [sovereign Alaska Native villages] from exercising concurrent jurisdiction."[46]

The Ninth Circuit directed that if on remand the district court determined

---

42 *Venetie*, 944 F.2d at 558-59, *cited in In re F.P.*, 843 P.2d at 1215.

46 *Id.* at 559-62.

either Native Village was "the modern-day successor[] to an historical sovereign band of [N]ative Americans," then the State of Alaska must afford "full faith and credit to adoption decrees issued by [that Native Village's] tribal courts."[47] On remand the District Court for the District of Alaska determined that Venetie was "a sovereign tribe as a matter of law" exercising adoption authority over its members, and accordingly that "the State of Alaska must afford full faith and credit to adoption decrees issued by [its]

---

[47] *Id.* at 562. The Ninth Circuit recently relied on *Venetie*'s holding in *Kaltag Tribal Council v. Jackson*, an unpublished opinion. 344 Fed. Appx. 324 (9th Cir. 2009), *cert. denied*, 131 S. Ct. 66 (2010). There the Ninth Circuit relied on *Venetie* in affirming that under ICWA § 1911(d) the State must accord full faith and credit to an adoption decree issued by the Native Village of Kaltag's tribal court. *Id.* at 325. The Ninth Circuit stated that "[r]eservation status is not a requirement of jurisdiction because '[a] [t]ribe's authority over its reservation or Indian country is incidental to its authority over its members.' " *Id.* (quoting *Venetie*, 944 F.2d at 559 n.12). The Ninth Circuit further held that "neither the ICWA nor [P.L.] 280 prevented the Kaltag court from exercising jurisdiction." *Id.*

Even more recently, the District Court for the District of Alaska treated *Venetie* as persuasive authority. In *S.P. v. Native Village of Minto*, the district court concluded P.L. 280 did not divest Native Village of Minto's concurrent inherent sovereign jurisdiction to make a former village resident's child a tribal court ward and to terminate the parents' rights. No. 3:09-cv-0092-HRH, slip op. at 4-5, 12, 14 (D. Alaska Dec. 2, 2009) ("The Native Village of Minto has never petitioned the Secretary to reassume exclusive jurisdiction over Indian child custody proceedings; but the fact that the Native Village . . . does not have exclusive jurisdiction over child custody matters of Indian children who are wards of the tribe does not preclude concurrent jurisdiction with the [S]tate."). The district court relied on *Venetie* and the *Kaltag Tribal Council* district court order in reaching this conclusion. *Id.* at 12-14 (discussing *Venetie*, 944 F.2d at 550, 555-56, 561-62; *Kaltag Tribal Council v. Jackson*, No. 3:06-cv-0211-TMB, slip op. at 10-11 (D. Alaska Feb. 22, 2008)). The district court expressly rejected the argument that tribal courts cannot initiate child custody proceedings as ICWA uses that term. *Id.* at 14-16 (relying in part on *Kaltag Tribal Council*, No. 3:06-cv-0211-TMB, at 7-8). Based in part on its jurisdiction ruling, the district court ultimately dismissed the case on abstention grounds. *Id.* at 16-18.

tribal courts."[48] According to a subsequent Ninth Circuit opinion, the State "later stipulated that Fort Yukon could also meet the requirements for tribal status."[49]

B. *John v. Baker* And Its Aftermath

1. *John v. Baker*

In our September 1999 *John v. Baker* decision, issued when *Nenana*, *F.P.*, and *K.E.* still controlled, we recognized concurrent inherent tribal jurisdiction outside the confines of Indian country to adjudicate non-ICWA child custody disputes between tribal members.[50] In *John v. Baker* a Northway Village member unsuccessfully sought sole custody of his children in the Northway Tribal Court before bringing an identical custody suit in superior court.[51] The children's mother moved to dismiss the superior court case based on the tribal court proceeding, but the superior court awarded the father primary custody of the children.[52] In an amicus brief filed in the ensuing appeal, the State urged us to hold that "Alaska tribes retained concurrent jurisdiction with the [S]tate over civil matters involving the domestic relations of their members" even after the enactment of P.L. 280.[53] The State expressed an interest in "cooperat[ing] more closely with tribes, avoiding duplicative programs and stretching . . . combined resources further than . . .

could [be] manage[d] separately, particularly in the under-served regions of Alaska."[54]

We examined the Department of the Interior's 1993 list of federally recognized tribes, which "included Northway Village and most of the other Native villages in Alaska," and the list's preamble that the "villages and regional tribes listed . . . have the same governmental status as other federally acknowledged Indian tribes by virtue of their status as Indian tribes with a government-to-government relationship with the United States."[55] We also looked to the Federally Recognized Tribe List Act of 1994, which directs the Department to publish annual lists of tribes eligible for special programs and services because of their status as Indians,[56] and to the recognition in that act's text and legislative history of these tribes' "sovereignty,"[57] "quasi-sovereign status,"[58] and "government-to-government relationship [with] the United States . . . as . . . domestic dependent nation[s]."[59] We noted the Department lists published for 1995 through 1998 all included Alaska Native villages such as Northway.[60] In deference to recognition by Congress and the Executive Branch that particular Native American groups are sovereign tribes, we recognized that "Alaska Native tribes, by virtue of their

[60] *Id.*

inherent powers as sovereign nations," possess "inherent, non-territorial sovereignty allowing them to resolve domestic disputes between their own members."[61] Because "villages like Northway presumably do not occupy Indian country," we held "Northway's jurisdiction to adjudicate child custody disputes between village members" was concurrent with that of state courts.[62]

Although ANCSA extinguished all aboriginal title and claims to Alaska land and revoked all existing Indian reservations except for that of the Metlakatla Indian Community on the Annette Islands,[63] we held that ANCSA's elimination of nearly all Indian country in Alaska did not divest Alaska Native villages of their sovereign powers to adjudicate child custody disputes between village members.[64] We employed "the established principle under federal law that 'Indian tribes retain those fundamental attributes of sovereignty . . . which have not been divested by Congress or by necessary implication of the tribe's dependent status.' "[65] We then noted that "internal functions involving tribal membership and domestic affairs" are within the "core set of sovereign powers that remain intact even though Indian nations are dependent under federal law."[66]

66 *Id.* (citing *Montana v. United States*, 450 U.S. 544, 564 (1981); *United States v. Wheeler*, 435 U.S. 313, 326 (1978), *superseded on other grounds by* Act of Nov. 5, 1990, Pub. L. No. 101-511, § 8077(b)-(d), 104 Stat. 1856, 1892-93 *and* Act of Oct. 28, (continued...)

We acknowledged that "the character of the power that the tribe seeks to exercise, not merely the location of events," determines "whether tribes retain their sovereign powers."[67] We determined that ANCSA did not "express any intent to force Alaska Natives to abandon their sovereignty," particularly "their powers to adjudicate domestic disputes between members,"[68] and that post-ANCSA congressional actions, including passage of ICWA seven years later, indicated Congress did not intend ANCSA to prevent Alaska Natives from continuing to regulate their internal affairs.[69] We concluded that "federal tribes derive the power to adjudicate internal domestic matters, including child custody disputes over tribal children, from a source of sovereignty independent of the land they occupy."[70]

Because we concluded that neither ICWA nor P.L. 280 applied,[71] we

[67] *Id.* at 752.

[68] *Id.* at 753.

[69] *Id.* at 753-54 (discussing Federally Recognized Tribe List Act of 1994; ICWA; and Indian Tribal Justice Act of 1993, Pub. L. No. 103-176, 107 Stat. 2004 (codified at 25 U.S.C. §§ 3601-31).

[70] *Id.* at 754; *see also id.* at 748-49.

[71] We held ICWA did not apply because child custody disputes between parents fall under ICWA's divorce exception, even if the parents never married. *Id.* at 746-47; *see* note 19, above.

We held rulings interpreting P.L. 280 did not apply because P.L. 280's text states that it applies only to Indian country and because Northway Village, like most Alaska Native land, ceased to qualify for the "dependent Indian community" definition of Indian country after ANCSA extinquished most Indian country in Alaska. *John v. Baker*, 982 P.2d at 747-48 (quoting 18 U.S.C. § 1151 and citing *Native Vill. of Venetie* (continued...)

determined it was "neither necessary nor appropriate . . . to reach the question of whether *Nenana* and its progeny were wrongly decided."[72] Although we recognized that "generally, Indian nations possess greater powers in Indian country than they do outside it" and that we would "create[] a disjunction in Indian law jurisprudence" by recognizing that Northway had greater powers outside Indian country than the tribal community inside Alaska's only reservation, we concluded "this inconsistency d[id] not create a justification to address issues . . . not squarely before us."[73]

Chief Justice Matthews, joined by Justice Compton, dissented, concluding that "inherent tribal jurisdiction over custody applies only to cases arising within Indian country."[74] Chief Justice Matthews looked to what he termed the "allocative principle"[75] and *Nenana* and *F.P.* in concluding that "if Alaska has exclusive jurisdiction to decide private custody cases which arise in Indian country, it has, by necessary implication, exclusive jurisdiction to decide private custody cases which arise outside of Indian country."[76]

language indicating that P.L. 280 gave certain states full jurisdiction over Indian country to the exclusion of tribal jurisdiction. *Id.* at 808-09 (discussing *California v. Cabazon Band of Mission Indians*, 480 U.S. 202, 208 (1987); *Solem v. Bartlett*, 465 U.S. 463, 465 n.2 (1984); *Washington v. Confederated Bands & Tribes of the Yakima Indian Nation*, 439 U.S. 463, 475, 488-89 n.32, 498 (1979); *Bryan v. Itasca Cnty.*, 426 U.S. 373, 383 (1976); *Organized Vill. of Kake v. Egan*, 369 U.S. 60, 74 (1962)). He also determined that the 1970 amendment to § 2 of P.L. 280, which the House Report explained was intended to "permit[] the Metlakatla Indian [C]ommunity on the Annette Islands in Alaska to exercise jurisdiction over minor offenses concurrent with . . . Alaska," indicated that prior to 1970 the State exercised criminal jurisdiction exclusive of tribal jurisdiction in all Indian country in Alaska. *Id.* at 808, 810 (quoting H.R. Rep. No. 91-1545 (1970), *reprinted in* 1970 U.S.C.C.A.N. 4783, 4783). The chief justice noted that the 1970 amendment also added language to § 2(c) of P.L. 280 referring to the § 2(a) areas of Indian country as "areas over which the several States have *exclusive jurisdiction*." *Id.* at 810 (emphasis added in dissenting opinion). The chief justice concluded that the amendment demonstrated the 91st Congress's belief that P.L. 280 granted states exclusive jurisdiction. *Id.* at 810-11. Based on parallel language in §§ 2 and 4 of P.L. 280, the chief justice extended the divestiture determination to the civil realm, stating "it is impossible to conclude that Congress intended to confer on the states exclusive criminal jurisdiction, but only concurrent civil jurisdiction." *Id.* at 810.

[77] Administrative Order No. 186 (Sept. 29, 2000); *see generally* DAVID S. CASE & DAVID A. VOLUCK, ALASKA NATIVES AND AMERICAN LAWS 430-31 & n.409 (2d ed. 2002) (hereinafter CASE & VOLUCK) (describing Governor Knowles's actions and noting change from former Governor Walter J. Hickel's Administrative Order No. 125 (Aug. 16, 1991), generally opposing tribal sovereignty expansion, which in turn had overturned former Governor Steve Cowper's Administrative Order No. 123 (Sept. 10, 1990), recognizing existence of Alaska Native tribes).

government in the future"[78] and "foster[ing] a constructive and harmonious relationship between the [t]ribal and State governments."[79] He acknowledged the value of the "services that Alaska's [t]ribes contribute to the state's economic and social well-being by virtue of their direct [t]ribal authority and responsibility for the delivery of social, economic, cultural, and other programs and services."[80] The governor explained that in December 1999 he had invited Alaska Native tribes "to enter into a government-to-government dialogue with the State for the purpose of establishing a framework for ongoing State-[t]ribal relations."[81] In furtherance of the "promot[ion] and enhance[ment] [of] [t]ribal self-government . . . and social, cultural, spiritual, and racial diversity," among other things, Governor Knowles committed the State "to working with [t]ribes to further strengthen Alaska's ability to meet the needs of Alaska's communities and families."[82]

In April 2001 Governor Knowles and various federally recognized Alaska Native tribes signed the Millennium Agreement, "a framework for the establishment of lasting government-to-government relationships and an implementation procedure to assure that such relationships are constructive and meaningful and further enhance cooperation between the parties."[83] This agreement reflects the State's recognition that

83 Millennium Agreement between the Federally Recognized Sovereign Tribes of Alaska and the State of Alaska ¶ 2, Apr. 11, 2001. Although the Millennium Agreement did not address substantive issues, *id.* at ¶ 10, ICWA authorizes agreements (continued...)

"[e]ach [signatory] [t]ribe has its own independent form of government and exercises inherent sovereign authority."[84] In turn, the signatory tribes acknowledged that "[t]he State of Alaska has a major responsibility to provide for the health, safety, and welfare of all Alaskans."[85]

In August 2001, two years after our *John v. Baker* decision, we decided *In re C.R.H.*[86] That case concerned the denial of a request by Native Village of Nikolai to transfer a child protection proceeding from superior court to tribal court.[87] The State, while defending against Native Village of Nikolai's appeal in *C.R.H.*, urged us to overturn *Nenana* and its progeny.[88] The State pointed to the conflict between (1) the Ninth Circuit's *Venetie* holding that some Alaska Native tribes have concurrent inherent authority over child protection matters affecting their members, undivested by P.L. 280, and (2) our *Nenana* holding that Alaska Native tribes may not assert jurisdiction over child protection matters unless they formally reassume jurisdiction over those matters

under ICWA § 1918(a) because they were divested of it by P.L. 280.[89] The State explained that it "felt compelled" to oppose the tribe's request for transfer because of *Nenana* and its progeny, but it was "in an untenable position" because *Nenana* and *Venetie* were irreconcilable.[90] The State argued in part that we should reexamine and overrule *Nenana* in light of *John v. Baker*'s holdings that Alaska's federally recognized tribes have " 'inherent power [to] regulat[e] their internal and social relations,' including adjudicatory authority over child custody matters" and that P.L. 280 did not divest that authority outside of Indian country.[91]

We compared ICWA § 1911(a), which provides that tribes lack exclusive Indian country and wardship jurisdiction "where such jurisdiction is otherwise vested in the State by existing Federal law," with § 1911(b), which does not contain a parallel limiting provision for transfer jurisdiction.[92] We concluded that "Congress intended P.L. 280 to affect tribes' exclusive jurisdiction under subsection 1911(a), but did not intend P.L. 280 to affect transfer jurisdiction under subsection 1911(b)."[93] We therefore held that federally recognized tribes in Alaska may accept transfer of ICWA cases under § 1911(b) without formal reassumption of jurisdiction, and we overruled *Nenana*, *F.P.*, and *K.E.* to the extent they were inconsistent with that holding.[94] But having concluded that Congress gave tribes § 1911(b) transfer jurisdiction regardless of their P.L. 280

status, we found it unnecessary to reconsider whether Alaska Native tribes affected by P.L. 280 retained initiating jurisdiction under § 1911(a) concurrent with the State.[95]

DHSS subsequently requested an opinion from then-Attorney General Bruce Botelho on *C.R.H.*'s effect.[96] In the responsive memorandum, the Attorney General's office acknowledged that "no tribe in Alaska [could] exercise exclusive jurisdiction over its children based on either residency or domicile within the tribe's reservation" because the only tribe occupying a reservation, Metlakatla Indian Community, exercises concurrent jurisdiction.[97] The memorandum also acknowledged Native Village of Barrow's and Native Village of Chevak's successful petitions to reassume exclusive jurisdiction over matters involving their children.[98] As to Alaska's other tribes, the memorandum stated that before a child custody proceeding's initiation, a tribe and the State shared concurrent jurisdiction and either could take steps to protect a member child or membership-eligible child.[99] The memorandum explained that a tribe could exercise exclusive jurisdiction over a child either by (1) initiating a tribal court proceeding regarding an Indian child not already within the State's custody and declaring

---

[95] *Id.* at 852. One early commentator noted that "[r]ead together with *John v. Baker*, *C.R.H.* confirms tribal concurrent ICWA jurisdiction as well." CASE & VOLUCK, note 77, above, at 430 n.406.

[96] Memorandum from Assistant Att'y Gen. Donna Goldsmith for Jay Livey, Dep't of Health & Soc. Srvs. Comm'r (Mar. 29, 2002) (No. 441-00-0005) *revoked by* 2004 FORMAL OP. ATT'Y GEN. 135.

[99] *Id.* at 2.

the child a tribal court ward or (2) receiving transfer of a case initiated in state court.[100] According to the memorandum, the State lacked authority to investigate a report of harm concerning an Indian child it knew was a tribal court ward, but the State could forward risk of harm information to the tribe.[101] Finally, the memorandum advised DHSS that in addition to recognizing cultural adoptions under ICWA § 1911(d), the State was required to "recognize tribal court adoption orders to the extent that it recognize[d] such orders from sister states and other foreign orders" because "*C.R.H.* removed all impediments that historically prevented [recognition of] tribal court adoptions."[102]

3. The State's position after October 1, 2004

On October 1, 2004, then-Attorney General Gregg Renkes issued a direction-changing advisory opinion regarding tribal jurisdiction and ICWA-defined child custody proceedings.[103] The 2004 Attorney General Opinion, based on *C.R.H.* and the *Nenana* remnants left in place after *C.R.H.*, and without acknowledging *John v. Baker*'s implications, concluded that:

> Alaska state courts have exclusive jurisdiction over child custody proceedings involving Alaska Native children unless (1) the child's tribe has successfully petitioned the Department of Interior to reassume exclusive or concurrent jurisdiction under the Indian Child Welfare Act (ICWA), 25 U.S.C. § 1918 or (2) a state superior court has transferred jurisdiction of the child's case to a tribal court in accordance

103 2004 FORMAL OP. ATT'Y GEN. 135.

with 25 U.S.C. § 1911(b) and the tribal court is exercising its jurisdiction.[104]

OCS then revised its Policy and Procedure Manual, citing the 2004 Attorney General Opinion as authority. The manual still recognizes Native Village of Barrow, Native Village of Chevak, and Metlakatla Indian Community as having exclusive or concurrent ICWA jurisdiction in their specified territories. But the manual redefines the meaning of "concurrent" jurisdiction exercisable by the remaining tribes: the 2002 edition states that until a child custody proceeding is initiated, "the tribe and the [S]tate simultaneously share authority and either government may take the steps necessary to protect a child who may be at risk"; the 2004 edition removed that provision and otherwise limited concurrent jurisdiction to cases transferred from state court.

OCS also changed the way it shared information with tribes. Before 2004 OCS contacted a child's tribe "[a]s soon as possible, and if possible prior to the assignment for investigation" to ascertain whether the tribe already had custody of the child or wanted to take jurisdiction over a child protection proceeding. The 2004 Attorney General Opinion advised that OCS was authorized "to release information concerning minor children for whom state court proceedings have not been initiated" to a "tribe properly exercising jurisdiction over a child protection proceeding involving the tribe's member child," but that "OCS must promulgate regulations governing the release of this information." On March 21, 2005, OCS proposed new regulations for releasing information to tribes "if such a release is in the best interests of the child . . . and the child is not [the subject of a child in need of aid] case where the child's tribe is not a party" or "to assist in an investigation of a report of harm."

One OCS supervisor described actual changes in OCS policy following the 2004 Attorney General Opinion as follows:

---

104 *Id.* at 3.

> Policies have changed recently regarding when we contact the tribe in investigations. . . . [W]e don't share information regarding investigations unless the investigation is underway. In other words, . . . the tribe can't have access to allegations that are made unless I have releases from my clients. They can't get copies of Reports of Harm unless . . . the parent in the Report of Harm has signed a release. Until [the tribes] have intervened legally in a [child in need of aid] case. In which case, then, they get all that.

BVS also changed its policies based on the 2004 Attorney General Opinion. The 2004 Attorney General Opinion stated that "the [S]tate retains exclusive jurisdiction over Alaska Native adoption proceedings unless a tribe has reassumed jurisdiction" but the State's "longstanding policy" of "ratif[ying] Indian adoptions that occur under tribal custom as a matter of equity under state law" is unchanged. According to a letter from BVS to the Kaltag Tribal Council, BVS began refusing to accept tribal court adoption paperwork in October 2005 unless it was from Native Village of Barrow, Native Village of Chevak, or Metlakatla Indian Community, and began processing only cultural adoptions for the remaining tribes.

C. Ripeness Analysis For This Case

As noted earlier, the State moved to dismiss the Tribes' suit on ripeness grounds. It contended the Tribes had alleged no actual harm, but rather presented nothing more than an abstract disagreement with an opinion by the Attorney General. The State pointed out the lawsuit was filed shortly after the 2004 Attorney General Opinion was issued and no actual controversy regarding implementation had yet arisen. Relying primarily on our 2001 decision *Brause v. State, Department of Health & Social Services*,[105] the State argued that in the absence of specific facts regarding actual

---

[105] 21 P.3d at 358-60 (discussing federal law and affirming, under abuse of discretion standard, superior court's dismissal on ripeness grounds of action for (continued...)

governmental action to provide context, the case was not ripe and there was no need for the superior court to act.

The Tribes opposed the State's dismissal motion, arguing that (1) the State had taken action well beyond the mere issuance of an Attorney General's opinion, including changes in department manuals and actual dealings with tribes, and (2) then-existing Alaska case law on standing, including the concept of ripeness, required only the threat of future injury. Judge Suddock agreed with the Tribes.

During the briefing for this appeal we issued our decision in *State v. ACLU of Alaska*.[106] In that case we continued *Brause*'s new emphasis on federal ripeness law with respect to a narrow line of cases — those involving pre-enforcement constitutional challenges to statutes.[107] We stated that "the constitutionality of a statute generally may not be challenged as an abstract proposition" and looked to see if the plaintiffs had presented the basis for an exception to that general rule.[108] We then noted the similarity of our earlier cases warning against advisory opinions and resolving abstract questions of law to the Ninth Circuit's recent decision in *Alaska Right to Life Political Action*

---

[105] (...continued)
declaratory relief in connection with constitutional challenge to statute precluding same-sex marriage because plaintiffs had not alleged any specific denial of rights associated with marriage).

[106] 204 P.3d 364 (Alaska 2009).

[107] *See id.* at 366 (concerning "pre-enforcement challenge to a newly amended statute that prohibits the possession and use of marijuana"); *id.* at 368 (looking to federal law); *see also Brause*, 21 P.3d at 358 (concerning request for declaration that statute denying same-sex marriages recognition is unconstitutional where challengers did not allege they had been denied any specific benefits); *id.* at 358-60 (relying in part on 13A CHARLES ALAN WRIGHT ET AL., FEDERAL PRACTICE AND PROCEDURE § 3532, at 112, 114-15 (2d ed. 1984)).

[108] *ACLU of Alaska*, 204 P.3d at 366.

Committee v. Feldman.[109] We stated: "While pure legal questions that require little factual development are more likely to be ripe, a party bringing a pre[-]enforcement challenge must nonetheless present a concrete factual situation."[110] Looking back to *Brause* and its reliance on federal law, we reiterated the practical formulation for ripeness of pre-enforcement constitutional challenges to statutes: balancing the need for decision against the risks of decision.[111]

The plaintiffs in *ACLU of Alaska* had challenged a newly enacted statute criminalizing the possession of small amounts of marijuana, arguing that the statute was unconstitutional under *Ravin v. State*.[112] We first determined that because the plaintiffs faced federal prosecution for marijuana possession regardless of state law, the threat of the new law did not really create a hardship to them.[113] We then determined that concrete facts regarding the State's enforcement of the new statute might aid in our decision.[114] We also considered the litigation's high-profile nature, with interest by both the legislative and executive branches, and that deference to the legislative branch prohibits us from declaring statutes unconstitutional unless "squarely faced with the need to do

---

[110] *ACLU of Alaska*, 204 P.3d at 368 (quoting *Feldman*, 504 F.3d at 849) (internal quotation marks omitted).

[111] *Id.* at 369.

[112] *Id.* at 366; *see Ravin,* 537 P.2d 494, 504, 511 (Alaska 1975) (holding Alaskans have fundamental right to privacy in their homes and allowing possession of small amounts of marijuana in home by adults for personal and private use).

[113] *ACLU of Alaska*, 204 P.3d at 369-70.

[114] *Id.* at 372-73.

so."[115] Because of these factors, we concluded that the decisional risks outweighed the need for decision and that the plaintiffs therefore were not entitled to an exception from the general rule against pre-enforcement constitutional challenges to statutes.[116] We vacated the superior court's judgment in the plaintiffs' favor and dismissed the proceedings.[117]

The State and the Tribes disagree on *ACLU of Alaska*'s application here. The State implicitly characterizes this case as a pre-enforcement challenge to the 2004 Attorney General Opinion and asserts that the Tribes are asking "for a sweeping decision" despite the "factual vacuum of this case." The State argues the Tribes have not demonstrated a need for a decision, but the risk of decision is high because "jurisdictional analysis depends on [a variety of different] factual circumstances." The State points to a number of hypothetical fact patterns raising difficult questions and leading to differing results in the jurisdictional analysis, including if only one parent is a tribal member, if the parents are members of different tribes, and if one or both of the parents do not consent to tribal jurisdiction. It concludes that considering the tribal jurisdiction question raised here in the absence of concrete facts "invites an inaccurate[,] broad[,] and unqualified jurisdictional ruling."

The Tribes respond that the State's argument rings hollow because the State contends that no Alaska Native tribe possesses *any* jurisdiction to initiate ICWA-defined child custody proceedings unless the tribe has reassumed jurisdiction under ICWA § 1918. The Tribes assert that this case does not raise an issue about tribal jurisdiction and authority over non-members and expressly ask us to refrain from addressing that issue.

---

115 *Id.* at 373.

116 *Id.* at 371-74.

117 *Id.* at 374.

The Tribes point to the existence of tribal court systems and specific examples of the 2004 Attorney General Opinion's effect on tribal jurisdiction and powers,[118] and argue that there is a real case and controversy ripe for decision.

The Tribes distinguish *ACLU of Alaska* by observing that "the [c]ourt in *ACLU* was most influenced by the fact that the actions the plaintiffs sought to engage in, even if protected from criminalization under Alaska law, still remained criminal under federal law" and "[n]o analogue is present here." The Tribes also point out that "the [c]ourt in *ACLU* found that the plaintiffs' declarations did not indicate that the statute at issue would [a]ffect their conduct, or that they would be the subjects of enforcement," while "[h]ere, it is clear . . . that the State is enforcing its new policies vigorously." The Tribes further note that "in *ACLU* a 'narrowing construction' of the new marijuana statute was possible, thus making adjudication of individual cases more appropriate; here, by contrast, the State's position is monolithic, barring *all* child protection proceedings from being initiated in tribal courts absent . . . reassumption . . . and barring [recognition of] *all* tribal court adoption proceedings." (Emphasis in original.) The final distinction drawn by the Tribes is that "in *ACLU* due respect for the legislative branch required some hesitance on the [c]ourt's part before declaring an enacted statute unconstitutional," but "[h]ere, in contrast, state officials are taking actions based upon their interpretation of

---

[118] The Tribes point out that based on the 2004 Attorney General Opinion, OCS changed its policy on recognizing existing tribal child custody proceedings, and that the record reflects one application of the new policy involving a member child of the Kenaitze Tribe. The child had been: (1) the subject of several emergency petitions before the Tribe; (2) the subject of multiple reports of harm OCS had transferred to the Tribe for follow-up; and (3) held by a state court to be under the tribal court's jurisdiction. OCS disregarded this previous activity and reopened its investigation, requesting a state court order compelling the child's attendance at an interview regarding allegations the Tribe had already investigated and found unsubstantiated. The Tribes also point out that BVS stopped issuing birth certificates for children adopted in tribal courts shortly after the 2004 Attorney General Opinion was issued.

Alaska Supreme Court case law — a subject on which this [c]ourt is in the best position, and has an obligation, to decide."

The Tribes have the better argument. The State's actions in response to the 2004 Attorney General Opinion go beyond enacting a statute that might be challenged as facially unconstitutional. Indian children may be at risk of harm because of the State's refusal to coordinate and cooperate with tribes regarding reports of harm; Indian children, as well as their natural and putative adoptive parents, may be held in legal limbo by the State's refusal to give full faith and credit to tribal adoption decrees; and both the State and tribal courts need to understand the extent to which tribal court orders in "child custody proceedings," as that term is defined in ICWA, are entitled to full faith and credit. We agree with Judge Suddock: families and children are being affected; State and tribal relations are being affected; the State and Alaska Native tribes, as well as State and tribal courts, are being affected. Under our approach to ripeness in cases not involving pre-enforcement constitutional challenges to statutes, the Tribes have readily established the injury and threat of injury necessary to support this suit.[119]

We conclude that the legal issue before us has been sufficiently narrowed by our previous cases and the conflicting Ninth Circuit cases. There are enough facts before us to resolve the parties' fundamental jurisdictional dispute in limited fashion: We will decide whether — absent formal reassumption of jurisdiction under ICWA § 1918 — Alaska Native tribes have inherent sovereign jurisdiction, concurrent with the

---

[119] *See generally ACLU of Alaska*, 204 P.3d at 375-76 (Carpeneti, J., dissenting) ("We interpret standing, and by extension ripeness, leniently in order to facilitate access to the courts: 'The basic idea . . . is that an identifiable trifle is enough for standing to fight out a question of principle.' " (quoting *State v. Planned Parenthood of Alaska*, 35 P.3d 30, 34 (Alaska 2001))); *Brause*, 21 P.3d at 360-61 (Bryner, J., dissenting) ("This court's standing jurisprudence indicates a willingness to adjudicate claims where the injury claimed is but 'an identifiable trifle.' " (quoting *Bowers Office Prods., Inc. v. Univ. of Alaska*, 755 P.2d 1095, 1097 (Alaska 1998))).

State, to initiate ICWA-defined child custody proceedings. We therefore affirm Judge Suddock's decision denying the State's motion to dismiss the Tribe's suit and we decline to vacate the superior court judgment and dismiss this appeal on ripeness grounds.

D. Today's Holding Regarding Alaska Native Tribal Sovereignty And ICWA

John v. Baker is foundational Alaska authority regarding Alaska Native tribal jurisdiction over the welfare of Indian children, notwithstanding the sharpness of the debate or the division of the court in reaching its ultimate conclusion.[120] Notably, the State does not ask that *John v. Baker* be overruled.

Having thoroughly outlined *John v. Baker*'s tribal jurisdiction analysis, we reiterate only the following four points from that decision to set the stage for our consideration of the State's arguments here. First, unless and until its powers are divested by Congress, a federally recognized sovereign Indian tribe has powers of self-government that include the inherent authority to regulate internal domestic relations among its members.[121] Second, ANCSA's elimination of nearly all Indian country in Alaska did not divest federally recognized sovereign Alaska Native tribes of their

---

[120] The debate continued among commentators after the decision. *See, e.g.*, David M. Blurton, John v. Baker *and the Jurisdiction of Tribal Sovereigns Without Territorial Reach*, 20 ALASKA L. REV. 1, 26 (2003) (criticizing *John v. Baker*'s holding and interpreting United States Supreme Court cases to be "highly indicative . . . that tribes, without Indian country, do not have inherent sovereign powers and lack criminal, civil adjudicatory, and regulatory authority"); Andy Harrington, *Exclusive of What? The Historical Context of the 1970 "Metlakatla" Amendment to PL 280*, 23 ALASKA L. REV. 1, 7-9, 30-32, 38-49 (2006) (criticizing *John v. Baker* dissent's conclusion that 1970 amendment indicates P.L. 280 divested Alaska Native tribes of jurisdiction and taking position that (1) amendment was intended to supercede federal case law holding Metlakatla Reservation was not in Indian country and (2) "exclusive" in P.L. 280 § 2(c) does not mean exclusive of tribal jurisdiction, but instead means exclusive of federal jurisdiction under the General Crimes and Major Crimes Acts, 18 U.S.C. §§ 1152, 1153).

[121] *John v. Baker*, 982 P.2d at 751.

authority to regulate internal domestic relations among their members.[122] Third, we "must resolve ambiguities in statutes affecting the rights of Native Americans in favor of Native Americans" and "we will not lightly find that Congress intended to eliminate the sovereign powers of Alaska tribes."[123] Fourth, "Congress's purpose in enacting ICWA reveals its intent that Alaska Native villages retain their power to adjudicate child custody disputes" and "ICWA's very structure presumes both that the tribes . . . are capable of adjudicating child custody matters . . . and that tribal justice systems are appropriate forums for resolution of child custody disputes."[124]

The State contends that ICWA § 1911 constitutes a "complete jurisdictional scheme" limiting a tribe's initiating jurisdiction to child custody proceedings in Indian country under § 1911(a), but allowing, under certain conditions, transfer jurisdiction for those proceedings outside of Indian country under § 1911(b). According to the State, this scheme "reflects Congress'[s] reasonable balancing of tribal rights, parental rights off-reservation, and state rights off-reservation." The State argues that the superior court's acknowledgment of inherent sovereign jurisdiction to initiate child custody proceedings: (1) "fundamentally upend[s] ICWA's delicate balance of parental, state, and tribal interests"; (2) circumvents transfer jurisdiction limitations; (3) allows tribes to exercise jurisdiction over non-members; and (4) magnifies the disjunction in Indian law that P.L. 280 may have divested Alaska Native tribal powers inside Indian country but not outside

---

122 *Id.* at 753.

123 *Id.* at 752-53 (citing *In re F.P.*, 843 P.2d at 1219).

124 *Id.* at 753-54 (citing 25 U.S.C. § 1911).

it — as noted in *John v. Baker*, "generally, Indian nations possess greater powers in Indian country than they do outside it."[125]

The Tribes respond that: (1) ICWA was intended to give tribes more, not less, power and authority to protect the best interests of their children; (2) this case does not present the issues the State raises concerning tribal jurisdiction over non-members; and (3) the remaining vestige of *Nenana*'s divestiture interpretation of P.L. 280 should be overruled, thereby eliminating the alleged jurisdictional disjunction.

We agree with the Tribes. ICWA creates limitations on states' jurisdiction over ICWA-defined child custody proceedings, not limitations on tribes' jurisdiction over those proceedings.[126] And we acknowledge that in the nearly 25 years since our *Nenana* decision, our view of P.L. 280's impact on tribal jurisdiction has become the minority view — other courts and commentators have instead concluded that P.L. 280 merely gives states concurrent jurisdiction with tribes in Indian country.[127] What remains of

---

[125] *Id.* at 748 n.46.

[126] *See Holyfield*, 490 U.S. at 44-45 (stating ICWA's purpose was "to make clear that in certain situations the state courts did *not* have jurisdiction over child custody proceedings" because "Congress was concerned with the rights of Indian families and Indian communities vis-à-vis state authorities" (emphasis in original)); COHEN'S HANDBOOK, note 16, above, at § 11.01[1], 820 n.2 ("This conclusion is inescapable from a reading of the entire statute, the main effect of which is to curtail state authority."); ICWA HANDBOOK, note 17, above, at 5 (observing ICWA was intended, in part, "to encourage tribal adjudication of child custody proceedings involving Indian children").

[127] *See Kaltag Tribal Council*, 344 Fed. Appx. at 325 ("[N]either the ICWA nor [P.L.] 280 prevented the Kaltag court from exercising jurisdiction."); COHEN'S HANDBOOK, note 16, above, §6.04[3][c], at 560-61 ("The nearly unanimous view among tribal courts, state courts and lower federal courts, state attorneys general, the Solicitor's Office for the Department of the Interior, and legal scholars, is that [P.L.] 280 left the inherent civil and criminal jurisdiction of Indian nations untouched." (footnotes omitted)); ICWA HANDBOOK, note 17, above, at 34 ("It has become clear . . . that the

(continued...)

Nenana must now be overruled. We adopt the view that P.L. 280 did not divest tribes of all jurisdiction under § 1911(a), but rather created concurrent jurisdiction with the State.

Accordingly, in light of our foundational decision *John v. Baker*, ICWA, federal case law regarding Alaska Native tribal sovereignty, and the absence of express contrary Congressional intent, we hold that federally recognized Alaska Native tribes that have not reassumed exclusive jurisdiction under § 1918(a) still have concurrent jurisdiction to initiate ICWA-defined child custody proceedings, both inside and outside of Indian country. Necessarily, federally recognized Alaska Native tribes are entitled to all of the rights and privileges of Indian tribes under ICWA, including procedural safeguards imposed on states[128] and § 1911(d) full faith and credit with respect to ICWA-defined child custody orders to the same extent as other states' and foreign orders.[129]

---

[127] (...continued)
retrocession provisions . . . permit Indian tribes to reassume exclusive jurisdiction over their children domiciled in Indian country, but these tribes can exercise concurrent jurisdiction over their children along with state courts and can exercise transfer jurisdiction under § 1911(b) . . . ."); CASE & VOLUCK, note 77, above, at 394 ("[I]t is now generally agreed that [P.L. 280] does not deprive tribes of concurrent jurisdiction."); *id.* at 390 n.134 ("Retrocession does not seem to be required for tribal courts to exercise concurrent jurisdiction over child custody matters, because such jurisdiction was not surrendered to the state under P.L. 280.").

[128] *See, e.g.*, 25 U.S.C. § 1912(a) (2000) (requiring notice to Indian tribes); 25 U.S.C. § 1911(b) (providing Indian tribes with right to petition for transfer to tribal court); *id.* at § 1911(c) (providing Indian tribes with right to intervene); *see generally* ICWA HANDBOOK, note 17, above, at 83-111.

[129] *See John v. Baker*, 982 P.2d at 761-62 ("ICWA requires courts to extend full faith and credit to tribal court decisions involving 'child custody proceedings' as that term is defined by [ICWA]."). This case does not present a specific full faith and credit dispute and we do not need to discuss potential limitations on § 1911(d) full faith and (continued...)

We do not have before us sufficient facts to make determinations about specific limitations on inherent tribal jurisdiction over ICWA-defined child custody proceedings. The nature and extent of tribal jurisdiction in any particular case will depend upon a number of factors, including but not limited to: (1) the extent of the federal recognition of a particular tribe as a sovereign; (2) the extent of the tribe's authority under its organic laws; (3) the tribe's delegation of authority to its tribal court; and (4) the proper exercise of subject matter and personal jurisdiction. Among the many issues we are not deciding today are: (1) whether, parallel to ICWA § 1911(b) transfer jurisdiction limitations, parents of Indian children might have the right to object to tribal jurisdiction; (2) the extent of tribal jurisdiction over non-member parents of Indian children; and (3) the extent of tribal jurisdiction over Indian children or member parents who have limited or no contact with the tribe. We therefore do not need to address the varied hypothetical situations posited by the State as creating difficult jurisdictional questions — we leave those for later determinations under specific factual circumstances.

E. Our Decision's Impact On The Judgment For Declaratory And Injunctive Relief

Our ruling is more limited than the declaratory relief entered by Judge Tan, and we therefore vacate that portion of the declaratory judgment going beyond today's decision. Today's decision should clarify any confusion about jurisdiction that may be held by federally recognized Alaska Native tribes to initiate ICWA-defined child custody proceedings. We are confident the State's agencies will follow our clarifying ruling without the need for further injunctive relief, and out of respect for the executive branch

[129] (...continued)
credit. *See, e.g.*, *Starr v. George*, 175 P.3d 50, 55-58 (Alaska 2008) (discussing due process requirement for orders afforded § 1911(d) full faith and credit).

we therefore vacate that portion of the judgment entering such relief (but without prejudice to the right of the Tribes to seek future relief if deemed necessary).

V. CONCLUSION

The superior court's judgment is AFFIRMED in part and VACATED in part, as set forth above.

5

IN THE SUPERIOR COURT FOR THE STATE OF ALASKA
FIRST JUDICIAL DISTRICT AT JUNEAU

RUSSELL PETERSON, JR.,

Plaintiff,

v.

STATE OF ALASKA,

Defendant.

Case No. 1JU-10-569 CI

SUBPOENA FOR TAKING DEPOSITION
DUCES TECUM

To: **Jim Duncan, Business Manager**
Alaska State Employees Association
Address: **1577 C Street, Anchorage, AK 99501**

You are commanded to appear in this office to testify under oath in the above case at:

Date and Time: November 3, 2010 @ 9:00 a.m.
Location: Attorney General's Office
1031 W. 4th Ave, Suite 200, Anchorage, AK, 99501

Notice, as required by Civil Rule 45(d), has been served upon Doug Mertz, counsel for Plaintiff on September 29, 2010.

You are ordered to bring with you: the entire ASEA file pertaining to Russell J. Peterson Jr. (DOB: 2/18/64); including but not limited to all written correspondence between ASEA and Mr. Peterson's legal counsel, Doug Mertz, or any other individual providing legal representation to Mr. Peterson.

Date: 10/1/10 Deputy Clerk

Subpoena issued at request of:
AAG John M. Ptacin
Attorney for State of Alaska
1031 W. 4th Avenue, Suite 200
Anchorage, AK 99501
Telephone: (907)269-6612
Fax: (907) 269-4978

Before this subpoena may be issued, the above information must be filled in and proof must be presented to the clerk that notice of deposition has been served upon opposing counsel.

APPENDIX 2

PETITION FOR REVIEW

Statement of the Facts

The petitioner, a former State employee, filed an action for unjust termination against the State. Before filing the court case, he exhausted his administrative remedies by filing a grievance through his union, as required. Under the Collective Bargaining Agreement with the State, only a union representative was allowed to represent the employee in the grievance process; his private attorney could not participate on behalf of the member. After the grievance process ended and the employee filed suit, the State's attorney demanded all the union's records related to the member and the grievance, including all private communications, notes, and files related to the grievance and all communications from the employee's private attorney to the union. The Petitioner objected that these documents should be considered privileged as the union representative was acting in the role of an attorney when no attorney was allowed, and that to allow one side in litigation to have access to all the private factual and strategic communications between the opposing party and his legal representative would violate due process. On March 1, 2011, the trial court ruled that the State could obtain all the union records because the attorney/client privilege applies only to attorney representation, not to a non-lawyer advocate performing the same function. Petitioner contends that it is a fundamental violation of due process to permit one side in litigation to discover private communications, opinions, and strategies between the other party and his legal advocate. There had

been a trial date but the court took it off the calendar so the State could pursue its discovery claims.

Statement of the Question

When a litigant has gone through a mandatory administrative process before filing suit, and was represented in that process by a non-lawyer because the State allows only the union to represent union members, may the State, in subsequent litigation, discover all internal documents, communications, and files of the union, including all communications with the member and all communications with the member's private attorney working on the same matter? Does an advocate-client privilege apply when the party is not allowed to have his attorney represent him?

Why this Petition Should be Granted

This petition should be granted for these reasons:

1. Postponement of consideration of this point until a post-trial appeal will cause great hardship because matters on which the Petitioner has a legitimate reasonable expectation of privacy – his private communications with his own legal representative in an administrative proceeding – would be completely open to discovery, and his own representative in those proceedings could even be called to testify against him.

2. This is an issue of first impression in this court, on which there is substantial disagreement among courts in other states. If left in place, even for a short duration, it will affect many ongoing employment grievances files with the State and other

public employers, and has serious implications for the privacy of negotiations on collective bargaining agreements.

3.This issue is likely to evade review as in this employment action, the probability is that there will be either a settlement or a plaintiff's verdict, in either of which case there will be no appeal in which to address it. The State would then be free to continue this tactic and thereby jeopardize the rights of union members to fair and effective representation in the administrative grievance process.

Why the Ruling Below was Erroneous

This issue is new to this court, and we believe it is new to any Alaska trial court. It also relates to a new tactic by the State: Never before has the State invaded an opposing party's expectation of privacy by attempting to obtain the files of a union representative created in the grievance phase of the litigation. If the State's tactic is successful, it would create a fundamental imbalance in which one side could discover all the materials normally privileged in litigation while the other side maintains a privileged status for its own litigation records.

The union, ASEA, is recognized by the state as the sole legal representative of its members in grievances; both the state and the union refuse to permit a member's private attorney to take part or even observe any proceedings between the union and the state.[1] The union representative (sometimes called a business agent) performs the

---

[1] The restriction to a union representative and the exclusion of private attorneys in the administrative phase is found in the contract between the State of Alaska and the General Government Unit (GGU), Section 103, which reads:

The Employer will not negotiate or handle

functions that an attorney would in court: He or she makes arguments, presents evidence to the other side, negotiates settlements, and if a matter goes to arbitration, presents and cross-examines witnesses and delivers arguments to an arbitrator, in exactly the same way an attorney would if one were permitted. In this case the union representative communicated and met numerous times with the plaintiff on strategy and on negotiation goals in the proceedings against the state. The union also received informal advice from the member's private attorney on strategy.

The grievance process failed to resolve the issue, and having exhausted his administrative remedies, the plaintiff filed suit.

Now, the state has subpoenaed *all* the union's records involving the plaintiff, including *all* communications between the union representative and the plaintiff, and between the union representative and the undersigned acting as the plaintiff's attorney. The subpoena is sweeping:

> All union records pertaining to Russell Peterson, Jr. (DOB: 2/28/64), including but not limited to all written correspondence between ASEA and Mr. Peterson's legal counsel, Doug Mertz, or any other individual providing

---

> grievances with any individual or employee organization other than the Union with respect to terms and conditions of employment of bargaining unit members in the GGU. When individuals or organizations other than the Union request negotiations or seek to represent bargaining unit members in grievances or to otherwise represent bargaining unit members in Employer/employee matters, the Employer shall advise them that the Union is the exclusive representative for such matters. Similarly, the Union will so advise individuals or organizations making such requests.

legal representation to Mr. Peterson.[2]

This is an outrageous attempt to invade a privilege and to gain materials showing the opposing side's litigation strategy to which the state is not entitled. This attempt should not be countenanced, for these reasons:

1. The State's attorney is attempting to do what he could never do, legally or ethically, if the State had allowed the plaintiff to have attorney representation in the administrative phase. It is beyond denial that the State could not invade the attorney/client privilege by directly seeking communications between the plaintiff and his lawyer or otherwise seek to learn the thought processes and strategies of the lawyer;[3] yet here, the State seeks exactly those things. The State's theory seems to be that since the union business agent -- the plaintiff's legal representative in the administrative phase – was not a lawyer, the State is entitled to all his communications with the client/member, and all the communications of the legal representative with the party's private lawyer who offered assistance in the administrative proceeding.

The following points are incontrovertible: The plaintiff was entitled to legal representation in the administrative phase; the State itself, through the collective bargaining agreement, restricted that representation to a union representative, refusing to deal with a retained attorney; and now the State seeks all private

---

[2] Appendix 2.

[3] Ak. Evidence Rule 503, Commentary to Rule 503.

communications between the client and the union legal representative, and between the union legal representative and the client's private attorney who was simultaneously advising the client in different phases of the same cause. So all the client's confidential communications – about legal strategy, about witnesses and evidence, about settlement negotiations and positions, would become open to the State. There is no justification for such an egregious violation of basic privileges.

2. There is no direct case law on this issue by the Alaska Supreme Court. But the court has made a clear analysis of the importance of privileges that should apply here. Moreover, courts elsewhere have dealt with the issue, and although the results are varied, there is a clear consensus that when the employee is restricted to representation by a union representative who is not a lawyer, it would be unfair if not unconstitutional to allow the employer to invade the confidentiality of the employee's relationship with his legal advisors.

a) Alaska law. The Alaska Supreme Court has held that the attorney-client privilege extends to client communications with a non-lawyer,[4] in certain circumstances. Although the facts of that case differ from this case, the court made certain points that matter here:

> ...the very heart of the common-law privilege was to protect the facts given by the client to his attorney. The privilege was based on the necessity that an attorney have

[4] American Nat. Watermattress Corp. v. Manville, 642 P.2d 1330, 1333-1334 (Alaska 1982).

the full disclosure of the facts from his client. [5]

The court has also noted the important public policy purpose of the privilege:

> Other jurisdictions have held, however, that lawyer-client privilege is more than just a testimonial exclusion. "The privilege against disclosure is essentially a means for achieving a policy objective of the law. The objective is to enhance the value which society places upon legal representation by assuring the client full disclosure to the attorney unfettered by fear that others will be informed.... If client and counsel must confer in public view and hearing, both privilege and policy are stripped of value." The Sacramento Newspaper Guild v. Sacramento County Bd. of Supervisors, 263 Cal.App.2d 41, 53-54, 69 Cal.Rptr. 480 (1968) (since superseded by statute).[6]

The court has stated that the attorney-client privilege is entitled to "greater solicitude" than the physician-patient privilege.[7] This makes relevant the court's treatment of the physician-patient privilege. In Allred v. State, 554 P.2d 411 (Alaska 1976), the court found that a common law psychotherapist-patient privilege exists, based on consideration of the following factors that apply to all claims of privilege:

> Professor Wigmore has proposed four canons to be used as a basis for determining whether, for any particular relationship, a common law privilege is desirable. These are:
>
> (1) The communications must originate in a confidence that they will not be disclosed.
>
> (2) This element of confidentiality must be essential to

---

[5] id. at 1334, citations omitted.

[6] Cool Homes, Inc. v. Fairbanks North Star Borough, 860 P.2d 1248, n. 23 (Alaska, 1993).

[7] Lewis v. State, 565 P.2d 846 (Alaska 1977) at note 4.

> the full and satisfactory maintenance of the relation between the parties.
>
> (3) The relation must be one which in the opinion of the community ought to be sedulously fostered.
>
> (4) The injury that would inure to the relation by the disclosure of the communications must be greater than the benefit thereby gained for the correct disposal of litigation. 8 J. Wigmore, Evidence, § 2285. (Emphasis in original) [8]

The court found that the need for confidentiality is essential in order to make the relationship work,. The most compelling statement of the need in the context of union representation came from the California Supreme Court in denying a claim that there was no privilege attached to the union-member relationship,

> As Justice Broussard noted at oral argument, the Legislature could not have intended that the only sound advice the authorized [union] representative could give was, "Don't talk to me."[9]

In short, the privilege here – between the union legal representative and the member, which the State itself has required be substituted for the attorney–client relationship, fits all the factors listed above in Wigmore for a common law privilege. It is directly analogous to the attorney-client privilege and most likely should be a necessary extension of it in the circumstances of mandated union representation.

b) Other jurisdictions. Where private attorneys are prohibited, as here, from representing a member, several courts and agencies have had no problem in finding

---

[8] 554 P.2d at 417.

[9] Welfare Rights Org. v. Crisan, 190 Cal. Rptr. 919, 923 n. 3, 33 Cal. 3D 776, 771 661 P.2d 1073 (Cal. 1983).

that the communications between member and union representative is privileged. For example, in Seelig v. Shepard, 578 N.Y.S. 2D 965 (Supr. Ct. 1991), the court held:

> ...there arises, in the context of rules regulating relations between management and labor, a species of privilege for labor union leaders. If unions are to function, leaders must be free to communicate with their members about the problems and complaints of union members without undue interference. Members must be able to have confidence that what they tell their representatives on such subjects cannot be pried out of the representatives by an over-zealous governmental agency. Union members must know and be secure in feeling that those whom they elect from among their ranks will be their spokespersons and representatives, not the unwilling agents of the employer. The union leadership councils must be free to confer among themselves, exchange views, make plans and arrive at negotiating strategies without intrusion from the organs of official power.[10]

The California Supreme Court has held that the privileges that would otherwise be applicable to an attorney-client relationship apply to the lay relationship as well when the Legislature has created a system of lay representation. In Welfare Rights Organization v. Crisan, Welfare Rights Org. v. Crisan, 190 Cal. Rptr. 919, 923, 33 Cal. 3D 766, 771, 661 P.2d 1073 (Cal. 1983), the court stated:

> [T]he considerations which support the privilege are so generally accepted that the Legislature must have implied its existence as an integral part of the right to representation by lay persons. Otherwise that right would, in truth, be a trap by inducing confidential communications and then allowing them to be used against the claimant. We do not attribute such a sadistic intent to the Legislature.

[10] Accord, City of Newburgh v. Newman, 421 N.Y.S.2d 673 (App. Div. 1979).

33 Cal.3d at 771.[11]

The same result has been reached by administrative tribunals. In Cook Paint and Varnish Co., 258 NLRB 1230, 1231-1232 (1981), the National Labor Relations Board ruled that the employer committed an unfair labor practice by questioning a union steward, who had been involved in an employee's grievance arbitration, and by threatening to discipline the steward if he didn't turn over his notes:

> Such consultation between an employee potentially subject to discipline and his union steward constitutes protected activity in one of its purest forms. To allow Respondent here to compel the disclosure of this type of information under threat of discipline manifestly restrains employees in their willingness to candidly discuss matters with their chosen, statutory representatives. Such actions by Respondent also inhibit stewards in obtaining needed information from employees since the steward knows that, upon demand of Respondent, he will be required to reveal the substance of his discussions or face disciplinary action himself. In short, Respondent's probe into . . . protected activities has not only interfered with the protected activities of those two individuals but has also cast a chilling effect over all of its employees and their stewards who seek to candidly communicate with each other over matters involving potential or actual discipline. [258 NLRB at 1232].[12]

---

[11] Other courts have noted that this privilege does not extend to immunizing factual information imparted by the union member, see American Airlines, Inc. v. Superior Court, 8 Cal. Rptr. 3d 146 (Cal. App. 2004); Walker v. Huie,142 F.R.D. 497, 500 (D.Utah 1992). The defendants here have gone well beyond a discovery request for factual information.

[12] See also Berbiglia, Inc., 233 NLRB 1476, 1495 (1977); New Hampshire Troopers Association v. New Hampshire Department of Safety, Division of State Police, New Hampshire PELRB Decision No. 94-74 (August 31, 1994); IBEW, Local 77, No. 15544-U-00-3932, 2003 WL 21658695 (Wash. Pub. Employment Relations Comm'n 2003) and see Teamsters Local 391 v. Terry, 494 U.S. 558, 567, 110 S.Ct. 1339, 108 L.Ed.2d 519 (1990) (union has fiduciary duty to protect members' interests. Forcing the union to reveal what it has learned in confidence

In summary, there is solid support for the proposition that the State may not violate the spirit of the rules regarding attorney-client privilege and obtain materials to which it is not entitled, by the device of subpoenaing documents and notes in the possession of a union official, especially when the State has itself required that the member be represented by a union official instead of a lawyer.

3. It should also be obvious that if the union legal representative has a duty to withhold materials that are privileged, that also extends to materials sent to or from a private attorney who is simultaneously representing the same person in regard to the same actions by the State. If that were not the case, the State could in effect prevent

---

would breach that relationship of trust by converting it into management's agent for the collection and transmittal of information that employees might not otherwise choose to reveal.) A labor relations privilege has been recognized in several cases.See Int'l Union v. Garner, 102 F.R.D. 108 (M.D. Tenn. 1984); Ill. Educ. Labor Relations Bd. v. Homer Cmty. Consol. Sch. Dist., 547 N.E.2d 182 (Ill. 1989); Labor Relations Bd. v. Chi. Transit Auth., 793 N.E. 2d 730 (Illinois App. Ct. 2003); Children's Village v. Greenburgh Eleven Teachers' Union Fed'n of Teachers, 648 N.Y.S.2d 152 (N.Y. App. Div. 1996) (citing Seelig, op. cit., with approval); cf. Alhambra Police Officers Ass'n v. City of Alhambra Police Dep't., 113 Cal. App. 4th 1413, 1422 (Cal. Ct. App. 2003) (recognizing privilege based upon California statute that privileges police officers from having to disclose information disclosed to another officer in non-criminal matters).

On the other hand, a full labor relations privilege has been rejected by some courts. See Patterson v. Heartland Indus. Partners, 225 F.R.D. 204 (N.D. Ohio 2004) (rejecting labor relations privilege under labor principles, but accepting the proposition that Freedom of Association principles would prevent the disclosure of confidential labor relations information); Ahearn v. Rescare W. Va., 208 F.R.D. 565 (S.D. Va. 2002); In Re Grand Jury Subpoenas Dated Jan. 20, 1998, 995 F. Supp. 332 (E.D.N.Y. 1998); EEOC v. People's Gas, Light and Coke Co., 1981 WL 2332 (N.D. Ill. 1981),appeal dismissed, 1992 WL 20019 (7th Cir. 1982) (supporting policy for protecting confidentiality but finding it not applicable in that case.)

The most extensive commentary on this issue is in Rubinstein, "Is a Full Labor Relations Evidentiary Privilege Developing?," 29 Berkeley Journal of Employment & Labor Relations Law 1.

all cooperation among allied co-counsel working on what is essentially the same effort. To allow such handicapping of a litigant would amount to a critical denial of his due process rights.

4. The subpoena would also violate Evidence Rule 408, by revealing one side's negotiation strategy, including private discussions of what settlements may be acceptable to the plaintiff. The Rule (and the commentary to it) literally relate to admissibility of statements made settlement negotiations. However it is clear from the commentary that the court's concern in promulgating the rule (which codified a common law privilege) was to protect the settlement process and not discourage settlement discussions. In this case, the broad subpoena demands any document communicating between the plaintiff and his union legal representative regarding settlement, what the State was likely to offer, what the plaintiff was willing to accept, and what the plaintiff may be willing to offer. This obviously invades an area which is forbidden to discovery.

5. The trial court's ruling on this issue acknowledged that a number of courts have recognized either a union-member privilege[13] or a privilege in situations in which a statute authorizes lay representation.[14] But the judge ultimately concluded that

---

[13] Seelig v Shepard, 578 N.Y.S. 965 (N.Y. Sup. Ct. 1991), which has been relied in several other New York decisions recognizing a privilege, Dist. No. 1-PCD v. Apex Marine Ship Mgmt. Co., 745 N.Y.S. 2D 522, 526-27, n. 2 (N.Y. App. Div. 2002); children's Vill. v. Greenburgh Eleven Teachers' Union, 648 N.R.S.2d 152, 153 (N.Y. App. Div. 1996); In re Suffolk County Ethics Comm'n, 909 N.Y.S.2d 339, 343-44 (N.Y. Sup. Ct. 2010). See also Illinois Educ. Labor Relations Bd. v. Homer Cmt. Consol. Sch. Distr., 547 N.E.182, 185 (Ill. 1989).

[14] Welfare Rights Organization v. Crisan, 190 Cal. Rptr. 919, 923, 33 Cal. 3D 766, 771, 661 P.2d 1073 (Cal. 1983).

Evidence Rule 501 prevents a court from recognizing a new privilege unless it is compelled by court rule, by the U.S. Constitution, the Alaska Constitution, or by an Alaska statute. The judge did not confront our reasoning that protection of such records is required by the due process provisions of the U.S. and Alaska Constitutions in order to provide basic fairness in an adversarial proceeding, or that it is required by the act of the State itself in making a mandatory provision in the collective bargaining agreement that only a union representative will be recognized in the administrative process, i.e., an action that tilts the playing field just as much as if it were a statute, unless the union representative also has a right to keep communications confidential.

6. We note that the cases from other jurisdictions also provide critical information on other misuses that could result if a privilege of confidentiality is not recognized here. For example, if the State can obtain the union's records of internal communications with a member regarding a grievance proceeding, it can also depose the union representative to obtain even more information, and even call the union rep as a witness against his own client. Even further, if there is no union-member confidentiality, the State can, in any dispute over interpreting the collective bargaining agreement, subpoena all union records regarding internal discussions within the union among the members of the union's bargaining team. In short, the State's eagerness to obtain communications that are ordinarily treated as confidential can open a pandora's box by giving the State free access to many areas in which confidentiality is critical to the rights of organized labor and its members.

7. Finally, we note that nothing in our argument would prevent a litigant from using

discovery to obtain factual information relevant to the dispute. In this case the State can and has used interrogatories, requests for production, and depositions to dig into all possible facts concerning the Petitioner and his claim. The only things that would come within a privilege are the communications between the member and his union representative and between the member's private attorney and the union representative, including litigation preparation materials and work product; no privilege would extend to any underlying facts that would otherwise be discoverable.

Relief Requested

We request the court to rule that in these circumstances – an administrative proceeding in which a litigant is required to be represented by a union official, not by a lawyer – the records and files of the union official are entitled to the same confidentiality as would apply to the records and files of an attorney, if one had been allowed to participate.

Conclusion

As the California Supreme Court said,

> [Without a privilege], that right [to a non-lawyer representative] would, in truth, be a trap by inducing confidential communications and then allowing them to be used against the claimant. We do not attribute such a sadistic intent to the Legislature.
> . . . .the Legislature could not have intended that the only sound advice the authorized representative could give was, "Don't talk to me."[15]

[15] Welfare Rights Organization v. Crisan, 33 Cal.3d 766, 771, 190 Cal. Rptr. 919, 923, 661 P.2d 1073 (1983).

This case is of such importance to labor relations and to litigation over employment causes that this court should intervene now and recognize that in the circumstances of this case, the private communications of both sides in litigation should remain private.

Attorney for the Petitioner

4/29/11 PRESENTATION ACES - AN ASSESSMENT OF ITS EFFECTIVE-NESS

<TARGET><BILL></BILL><SUBJECT>4-29-11 PRESENTATION ACES - AN ASSESSMENT OF ITS EFFECTIVENESS</SUBJECT><COMM>SJUD27</COMM></TARGET>

ACES: Is it Working?

Senator Bill Wielechowski

April 29, 2011

1

A Little History

- In **2006**, the legislature overhauled the state's outdated oil and gas tax system.
- Under the old system, called "ELF," **15 out of 19 oil fields on the North Slope paid no production tax at all.**

2

Alaska's Constitution Requires:

- "The legislature shall provide for the utilization, development and conservation of all natural resources belonging to the State for the maximum benefit of its people." (Art. VIII, § 2)

The consensus was that Alaska was not receiving the maximum benefit of the wealth generated from its own resources.

3

Petroleum Profits Tax (2006)

- The new tax system, called the "Petroleum Profits Tax" or "PPT" taxed net profits, not gross earnings.
- Concerns lingered that the tax deductions were too generous and Alaska was still not getting the "maximum benefit" for its resources

4

Alaska's Clear and Equitable Share

As a result, the legislature re-considered PPT in 2007 and, after much deliberation, replaced it with "Alaska's Clear and Equitable Share" (ACES) to ensure that Alaskans received the maximum benefit for our resources.

5

ACES: Is it working?

- Only 3.5 years have passed since ACES was adopted, but already there are calls for major changes to this system.
- What do the facts say about the effects ACES has had and whether immediate changes are needed?

6

8 Ways to Measure Effectiveness

1. Revenues generated for Alaskans
2. How do we compare?
3. Level of industry investment
4. New exploration and development
5. Number of industry jobs
6. New interest in Alaska
7. Industry profits
8. Oil production levels

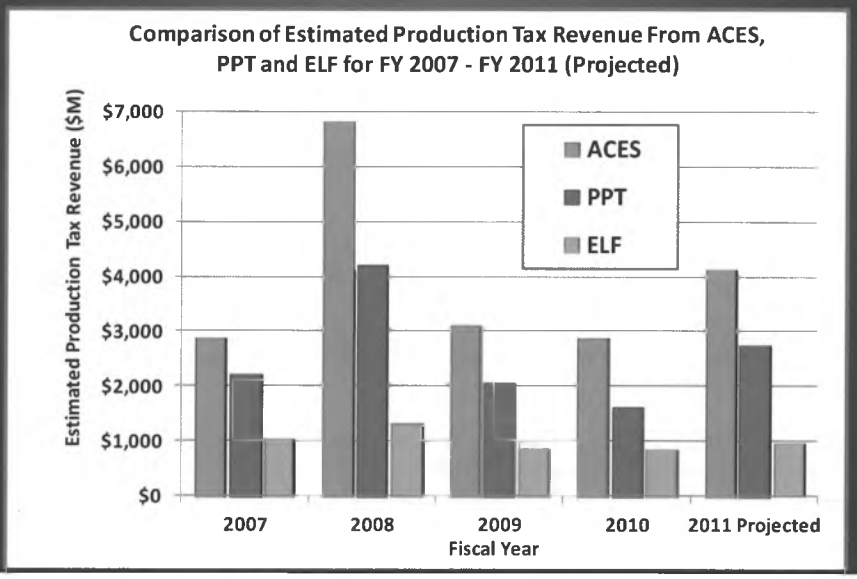
7

Measure #1

How has ACES affected the revenues Alaskans receive for our oil?

8

ACES has generated about $15 billion more than ELF would have.



Source: DOR

Increased Revenue for Alaskans

This has enabled the state to invest more in infrastructure, create jobs, and fund critical state services, dampening the effect of the worldwide recession in Alaska.

10

Biggest Savings Account in the Nation

It has also allowed lawmakers to **pay back a $5.5 billion loan** used to cover prior budget shortfalls and to grow Alaskans' **savings account**, now the **largest in the nation at about $15 billion**.

CBR

11

Measure #2

How do our tax rates compare with other jurisdictions?

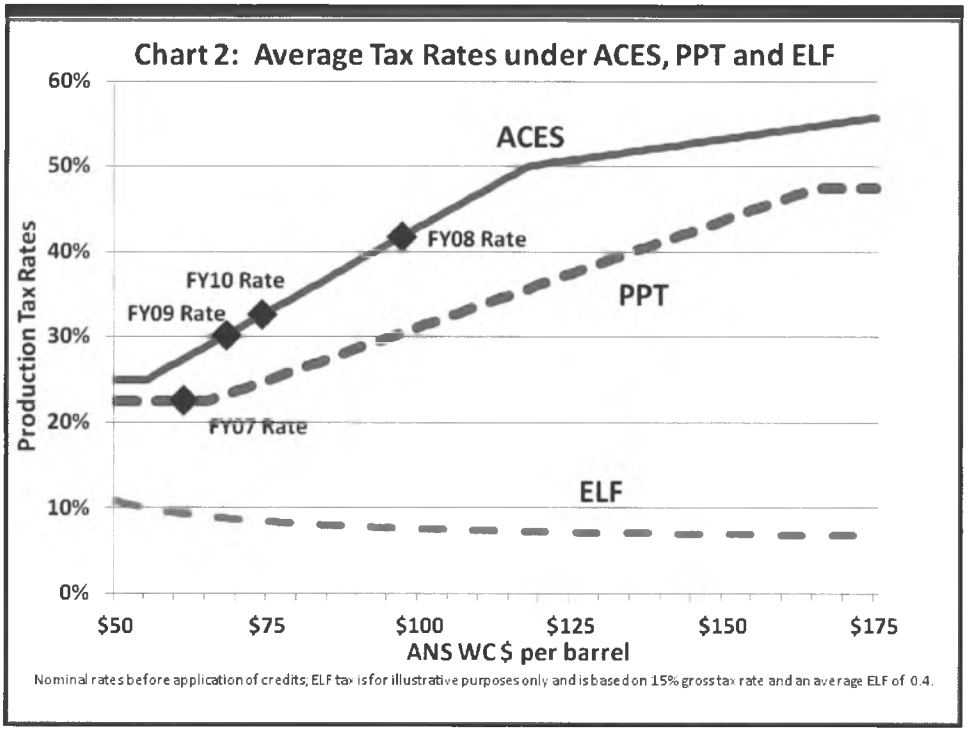
Are we competitive?

12

Alaska's Taxes: Fair or Excessive?

- Some critics of ACES talk about tax rates as high as 90%.
- However, in the 4 years since PPT and ACES passed, the average production tax rate has been 32%, according to the Parnell Administration. This is before generous tax credits are factored in, lowering taxes significantly.

13



Calculating Tax Rates under ACES

No production taxes are paid until a profit is made. It costs about $26 to get a barrel of oil out of the ground and to market. The base tax rate is 25%. After $30 of profit, .4% is added for every dollar increase per barrel.

15

For Example

At $56/barrel oil, the tax rate is 25%. At $57/barrel, the tax rate is 25.4% because the oil company has made over $30 in profit. At $58/barrel, the rate is 25.8%.

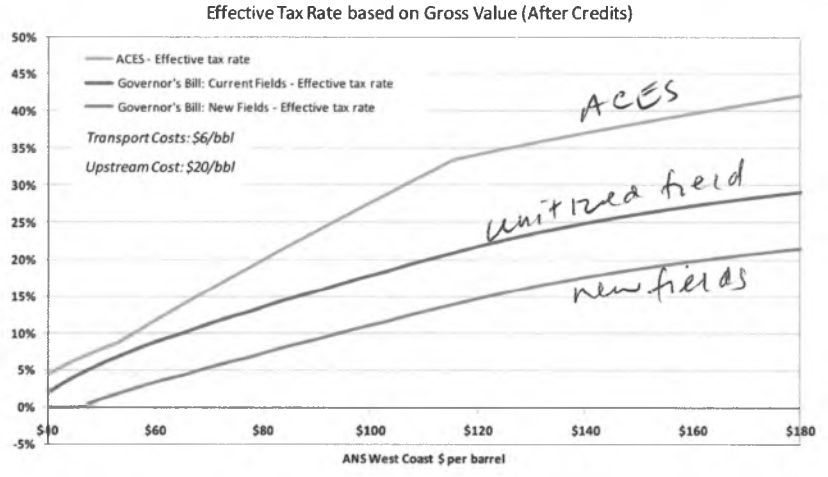
16

Under the Governor's Proposal, Alaska will Lose Billions

- The Governor's bill will lower taxes significantly , costing Alaskans an estimated $8.2 billion over the next five years.
- As the following chart shows, if the Governor's bill passes, Alaska's actual production tax rate will be between 15% and 25% on industry profits at today's prices.

17

Effective Tax Rates on Gross Current law and HB 110



What is the Tax Rate Elsewhere?

- **Is this multi-billion dollar reduction necessary or reasonable?**
- How do our taxes compare with taxes in other world class oil basins?

19

Alaska Is Competitive

- The following slide, developed by Chevron, shows the government take in even more countries.
- As this slide illustrates, governments have generally been increasing their taxes to ensure that their **citizens are fairly reimbursed for selling their non-renewable oil resources.**

20

Capturing "Fair Share"

Assessment of Oil and Gas Jurisdictions is Complex and Continuous

5. Iran
6. Florida
7. Kuwait
8. Kazakhstan
9. Algeria
10. Iraq
11. Ecuador
12. Argentina

* According to the Frasier Institute Global Petroleum Survey

22

What Would this Loss of Revenue Mean for Alaskans?

- **Depletion of** our Rainy Day **savings account**
- **Future deficits**
- **Drastically reduced spending** on infrastructure and job-creating capital projects
- **Cuts to revenue sharing** and operating budgets with associated **job and service losses and increased local property taxes**

23

In Return?

- **Governor Parnell hopes industry will invest more in Alaska.**
- **However HB 110 and SB 49 require no assurances of increased investment or job creation.**
- **Is this a reasonable gamble to take? Let's look at more facts.**

24

Measure #3

Has industry investment decreased or increased since the passage of ACES?

25

According to the Alaska Department of Natural Resources:*

- **"Alaska is successfully encouraging investment from companies that are new to the state, with the number of petroleum companies doing business in the state almost doubling from 2006 to 2008."**
- **"Legacy producers on the North Slope are investing in their own assets, leaving room for new players…"**

"Alaska: We're Open for Business!"

*State of Alaska ad in the Petroleum News

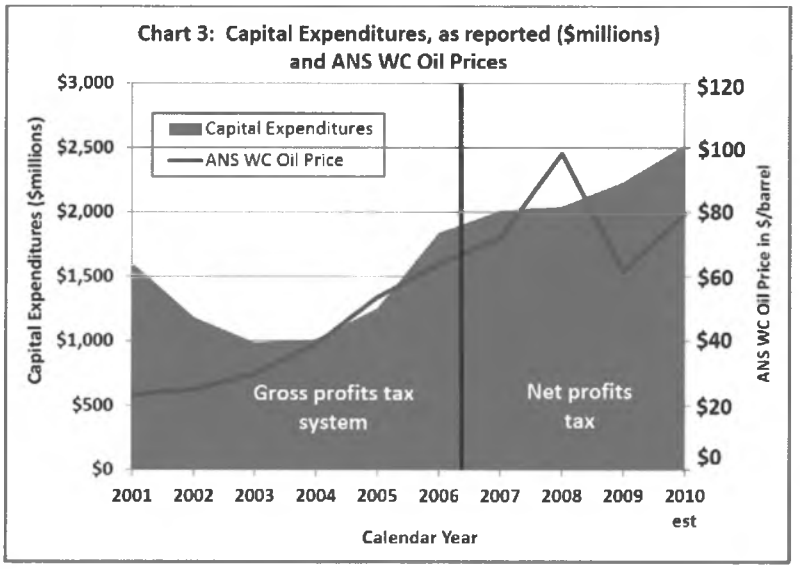
26

Industry Investment: On the rise

In the years since ACES passed, capital expenditures have increased consistently to all-time highs each year, as shown in red on the next chart.

27

Capital expenditures from 2001-2010



Both operating and capital spending are up since ACES went into effect

	FY2007	FY2008	FY2009	FY2010
Operating Expenditures (million $)	2,081	1,881	2,085	2,270
Capital Expenditures (million $)	1,578	1,967	2,212	2,389
Total Capex/Opex (million $)	**3,659**	**3,848**	**4,297**	**4,659**

Source: Revenue Source Books, Alaska Department of Revenue - Fall 2007, Fall 2008, Fall 2009 and Fall 2010

29

And investment is forecast to increase this year and next.

	FY2011 Forecast	FY 2012 Forecast
Operating Expenditures (million $)	2,553	2,558
Capital Expenditures (million $)	2,572	2,937
Total Capex/Opex (million $)	**5,125**	**5,495**

30

Oil
CoS
#s

Are increased investments on the North Slope due to maintenance?

In 2010, the Parnell Administration examined this issue. The following slide was presented by the Administration to the Legislature in February 2010.

31

Are the Increasing Spending Levels due to Maintenance Costs?

21

CAPEX- Capital expenditures ("CAPEX") on pipeline repairs at Prudhoe Bay increased after corrosion incidents in 2006. However, the majority of growth in capital expenditures since 2007 is attributable to drilling, seismic and other production related projects.

OPEX - Since 2007, the proportion of total operating expenditures ("OPEX") related to major repairs does not appear to be the key driver in the growth of total operating expenditures

Alaska Department of Revenue 2/4/2010

Many Factors (Including the Economy) Affect Spending Decisions

- In 2009, ConocoPhillips announced that it planned to **layoff 4% of its workforce** and **cut capital spending by 12.6%**.
- "We are **positioning ourselves in the current business environment to live within our means** …" said James Mulva, chief executive of the nation's third-largest oil company.
  (Houston Chronicle, 1/16/09)

33

Taxes Are Just One Factor

- As John Minge, BP's Alaska President, recently said: **"It's not always only about taxes."**
- The worldwide recession, tightening capital markets, fluctuating oil and gas prices, environmental regulations, access to infrastructure, availability of skilled labor and many other factors affect investment decisions.

34

Measure #4

How has ACES affected exploration and development?

35

Stimulating investment

- ACES encourages new investment through tax credits and deductions for exploration and development.
- According to Parnell Administration consultants, these credits and deductions are among the most generous in the world.
- Alaska has paid out over $2 billion in tax credits since ACES passed.

36

New Development Wells On the North Slope

2006: 137 wells
2007: 153 wells
2008: 139 wells
2009: 132 wells
2010: 164 wells – highest # in 5 years

Source: Alaska oil and Gas Conservation Commission

37

Increases in exploration

"The good news is we are seeing a lot of increase in oil exploration."

– Karen Rehfeld, Director of the Governor's Office of Management and Budget, in testimony before House Finance Committee on January 19, 2011, a week before the Governor introduced his bill.

38

Investment is increasing

- Since 2006, the number of applications for exploration tax credits and the amount of qualifying expenditures has generally increased.
- It hit an all-time high under ACES, peaking in 2009.

39

Measure #5

How has ACES affected jobs in the oil and gas industry?

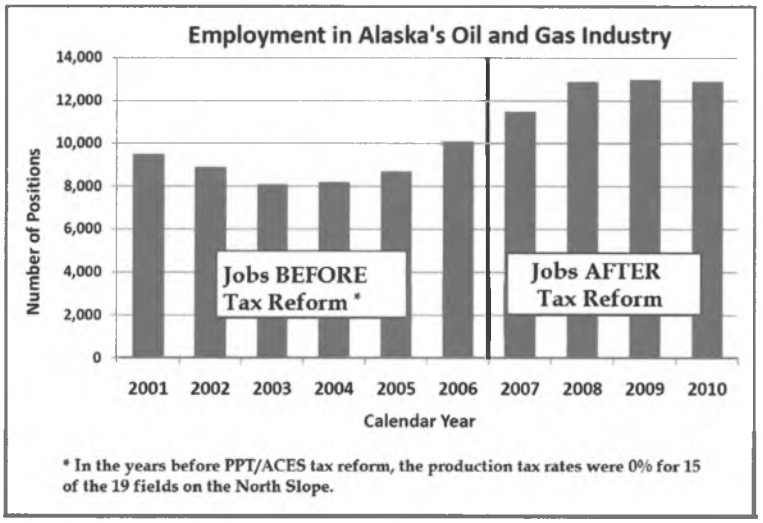
40

Jobs on the rise

- Employment in the oil and gas industry has **increased** since ACES was implemented.
- These are high paying jobs, with average wages of $14,000 per month, according to the Department of Labor.

41

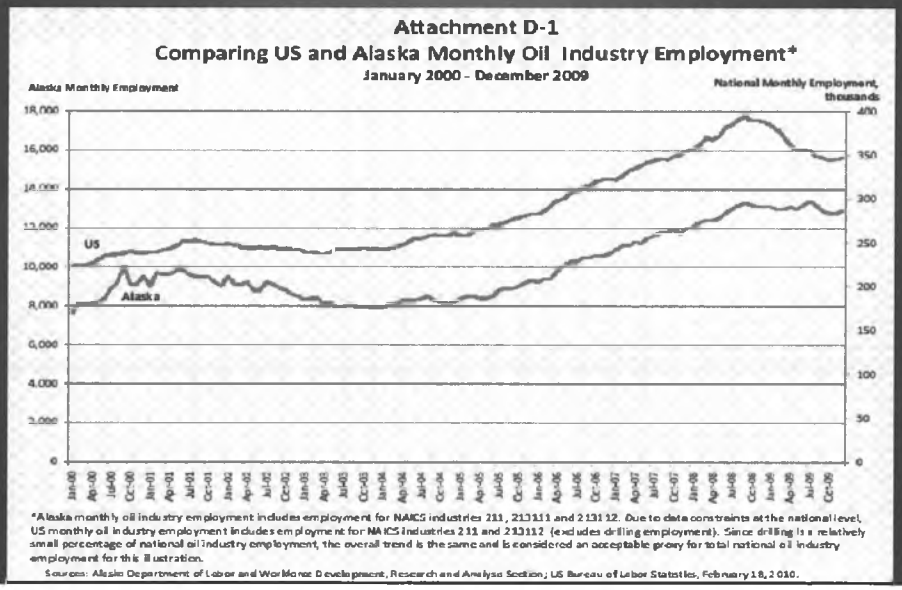
New Jobs in the Oil Patch



42

"up 70%" year over year

Oil Industry Jobs – Alaska Versus U.S.



oil & gas

Who's Getting the New Jobs?

- **According to the Alaska Department of Labor, unemployment claims for Alaskan resident oil and gas workers increased 160% from 793 in 2006 to 2,058 in 2010.**
- **In 2009, roughly 50% of all new oil and gas hires were non-residents.**

44

Measure #6

How has ACES affected industry interest in Alaska?

45

New Companies to Alaska

- The state has seen **new entrants** into Alaska's oil and gas industry since ACES passed.
- At the most recent lease sale in October 2010, a company new to Alaska (Great Bear Alaska) **bid on over 500,000 acres** and **paid more than $9 million** in bonus bids.

46

More companies doing business

- In 2006, the first year that tax filings were made under the net profit tax, **19** companies filed annual returns.
- In 2007, this grew to **26**.
- In 2008, it grew to **36**, and in 2009, **39** companies filed returns.

47

DOR

Recent News

- **In early March, the large Spanish oil company Repsol announced plans to begin exploring in Alaska next winter.**
- **The company hopes to spend at least $768 million under a "broad-reaching exploration and development program."**
- **"The North Slope of Alaska is an especially promising area for Repsol as it has already shown to be oil-rich and carries low exploratory risk," Repsol said.**

48

ACES is Particularly Attractive to "Independent" Oil Companies

"... a lot of the prospects that are readily drillable are **not large enough for the majors** to chase, but for us, they are intriguing," said Greg Vigil, executive vice president at Savant Alaska LLC.

2009

Source: Article, Alaska Business Monthly, December 2009

49

ACES is all about incentives

"One of the big things is to let independent oil and gas companies know is that Alaska is open for business and a big incentive is the ACES legislation,"

Vigil said.

Source: Article, Alaska Business Monthly, December 2009

50

ACES Rewards
New Investment

- The state actually pays for much of the cost of exploration and development activities.
- This fact is generally not highlighted by those who claim Alaska's share of profits is too high.
- Let's look at examples prepared by the Parnell Administration in 2010.

51

Credit Example 1: New Entrant

14

- A new entrant with no current production pursues an exploration project requiring $200 million in investment
- Company receives a 20% - 40% investment credit (depending on location), worth $40 - $80 million
- Company also receives an additional 25% credit for its "tax loss" or "net operating loss (NOL)", worth up to $50 million

Credit Example 1: New Entrant (*cont.*)

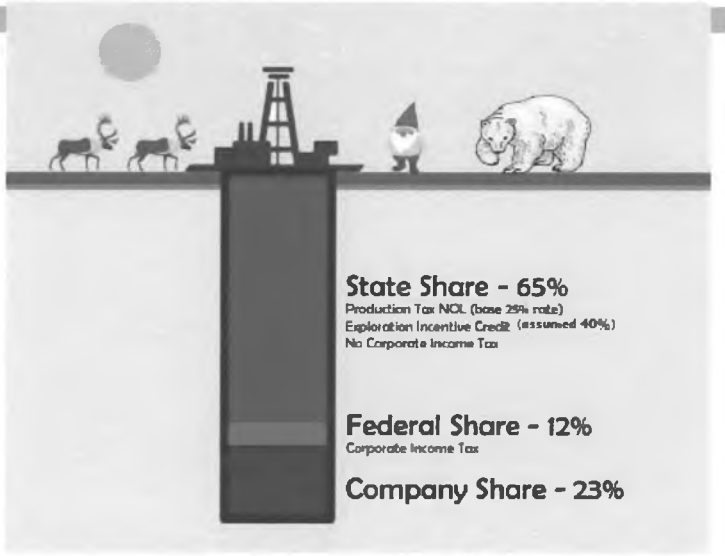
5

- The total credits of $90 - $130 million, can be:
  - Directly recouped (cash) from the state
  - Transferred to a person that does pays tax, so that the Transferee pays $90 - $130 million less in tax
- Either way, State pays $90 - $130 million for the exploration; company pays $70 - $110 million.
- If the exploration effort fails, the state never recoups this money.

  The state bears the risk for failure as does the new entrant

Exploration Dry Hole – New Entrant

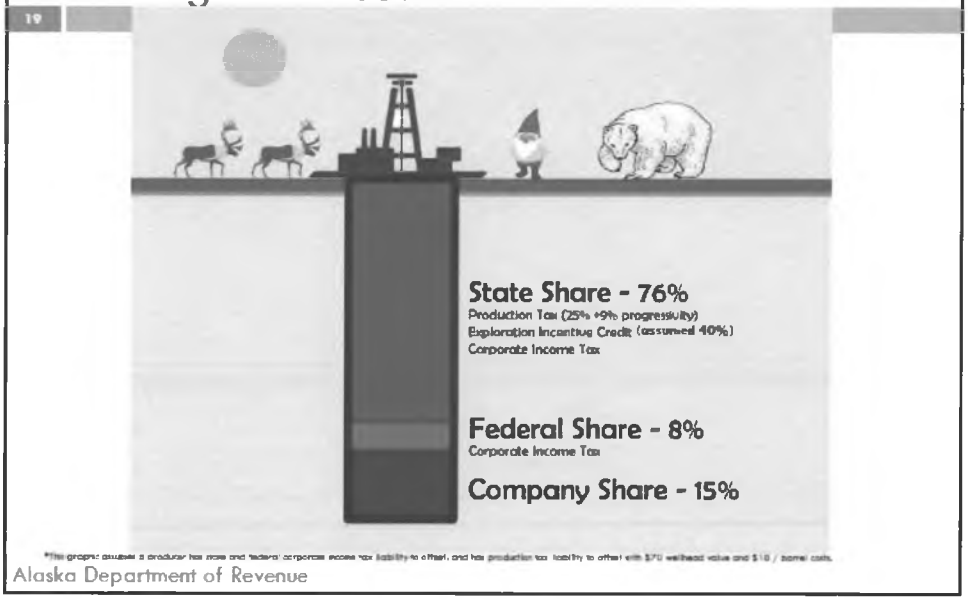
16



*This graphic assumes a producer has federal corporate income tax liability to offset for its state corporate income tax, and does not have other production tax liability to offset.

Alaska Department of Revenue

Unsuccessful Development Project – Existing Producer



Alaska Department of Revenue

Alaska's Clear and Equitable Share

- Given this level of state investment, it is appropriate that Alaskans share in the profits that are sometimes generated.
- Alaskans are major investors in oil exploration and development and as such should reap some of the rewards.

Measure #7

How has ACES affected company profits?

57

Profits Are Strong

From ConocoPhillips Consolidated Income Statements:

US E&P Net Income	2008	2009	2010
Alaska	2.3 Billion	1.5 Billion	1.7 Billion
Lower 48	2.7 Billion	-37 Million	1.0 Billion

58

Alaska Profits vs. World Profits

From Petroleum News (8/16/2009)

Alaska O&G production makes up about **12%** of ConocoPhillips' worldwide output. In the 1st quarter of this year, Alaska operations earned the company $240 million, or **29%** of its worldwide exploration and production income.

ConocoPhillips' acknowledges that **Alaska production tax credits are a significant component in the company's profit.**

In the 2nd quarter, ConocoPhillips had $725 million in E&P worldwide earnings, **more than 55% of that,** $404 million, **came from its Alaska business.**

59

Healthy Rates of Return

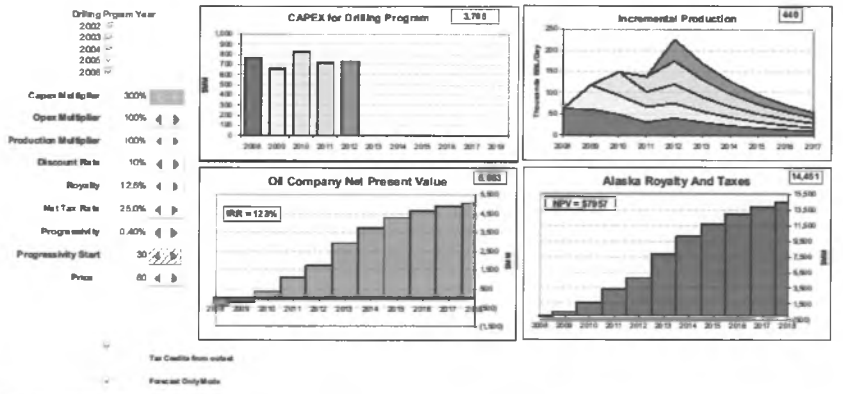
- On 3/23/11, ConocoPhillips executives said Alaska had "strong cash margins" and "very good rates of return"
- In 2007, consultants hired by the Legislature modeled the rate of return an oil company receives when investing in Prudhoe Bay.
- The following slide, developed by internationally recognized oil consultants Gaffney and Cline, estimates **returns at 123%** when oil sells at $80 a barrel.

60

Senate CS – Forecast Mode, $80 oil

- IRR = 123%, NPV10 = $5.375 billion

Modeling the Prudhoe Success contained in AOGA/BP Testimony



Gaffney, Cline & Associates

09 November 2007

Measure #8

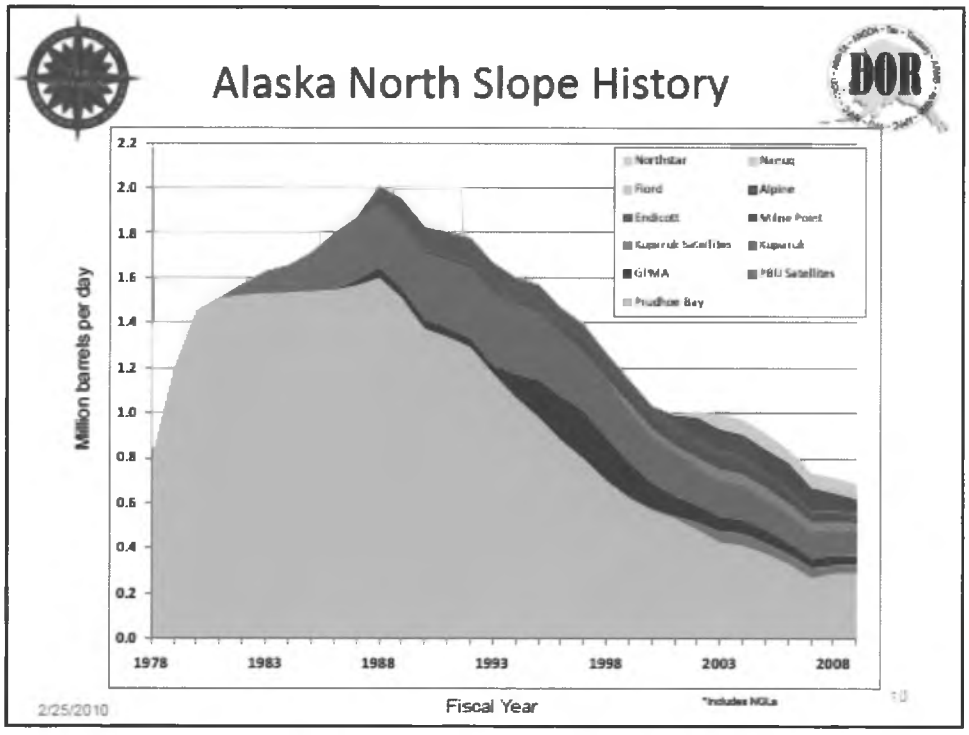
How has ACES affected oil and gas production levels?

62

Declining production

- Oil production on the North Slope has been declining steadily since the late 80s.
- It declined under ELF, when production taxes were zero on most fields, and it has continued to decline under ACES, as the following chart shows.

63



Decline, Year by Year, of North Slope Oil Production

Year	Decline	Year	Decline	Year	Decline
1989	-7%	1996	-6%	2003	-1%
1990	-5%	1997	-7%	2004	-6%
1991	1%	1998	-9%	2005	-5%
1992	-5%	1999	-11%	2006	-14%
1993	-8%	2000	-7%	**2007**	**-2%**
1994	-2%	2001	-1%	**2008**	**-5%**
1995	-5%	2002	2%	**2009**	**-5%**

Average since 1989: -5.2%

Source Data from EIA Crude Oil Production - Alaska North Slope Crude Oil Production

Decline percentage is calculated by comparing one year of production to the preceding year of production.

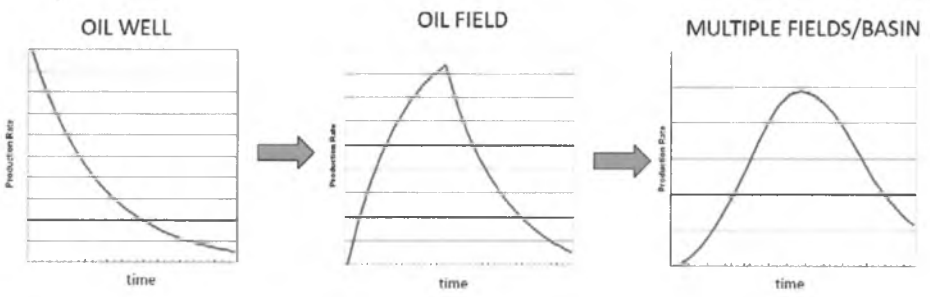
65

Decline is natural as fields mature

- **This pattern of decline is a natural feature of oil fields around the globe, as the following charts show.**
- **The Parnell Administration has calculated that the throughput decline will decrease to about 2% per year.**

66

Typical Production Profile



Production increases at first, reaches a peak, then declines. The decline rate typically levels off in later years.

The field's geology, operator's development plan, and commercial factors, all influence the shape of the curve.

2/25/2010 7

Is the Trans-Alaska Pipeline Going to Shut Down?

- BP Alaska told the SEC they expect continued production in Prudhoe Bay "until the year 2065."
- BP, Conoco & Exxon agreed that TAPS would operate through 2042 and presented evidence in a recent trial that TAPS could function down to 200,000 barrels a day.
- A judge recently determined TAPS will operate at least through 2047.

68

Closing Thoughts

- **Just last year, the Parnell Administration told the legislature that ACES does not appear to be having a negative effect on the oil and gas industry.**

69

Conclusions from the Analysis

28

In general, the information does not indicate that changes in the tax system have had a direct negative impact on industry activity in the state

In fact, the data would indicate that the investment incentive provisions of ACES are contributing to increased levels of expenditure

Alaska Department of Revenue 2/4/2010

What do others think?

- From 12/20/2009 Petroleum News:
- **"Parnell also said that he has already discussed ACES with 10 oil companies. Of those, he said, "four to five" thought the tax system was "just fine," while "two or three" thanked the state for the tax credit program, and two companies wanted to see ACES changed."**

71

Alaska Taxes: Not a Deterrent to Investment

- These informal findings are consistent with a recent global survey of oil and gas industry executives conducted by the Frasier Institute.
- **40% said Alaska's oil taxes "encourage production,"** while **another 34% say** our oil tax regime **"does not deter investment."**
- Only 9% of the 645 executives surveyed said Alaska's oil taxes are a "strong deterrent to investment" or would cause them not to invest in Alaska.

72

Conclusions

- We had a 20+ year experiment in Alaska to see if 0% taxes encouraged investment and created more Alaskan jobs.
- Under ELF, with most fields paying 0% in production taxes, jobs declined, investment declined and production declined.

73

Conclusions

- Under ACES, investment and jobs are at all-time highs, the number of companies doing business has doubled, and profits are strong.

74

1/24-1/25/12 CRIME SUMMIT (FILE 1)

<TARGET><BILL></BILL><SUBJECT>1-24-1-25-12 CRIME SUMMIT (FILE 1)</SUBJECT><COMM>SJUD27</COMM></TARGET>

2012 CRIME SUMMIT

REPORT AND RECOMMENDATIONS

2012 CRIME SUMMIT REPORT AND RECOMMENDATIONS

"I don't think we're going to arrest our way out of some of these problems"
Chief Mark Mew, Anchorage Police Department

Introduction

On January 24-25, 2012, the Senate Judiciary Committee convened a Crime Summit, bringing together the principal criminal justice agencies in the state. Leaders from each agency were asked to report on progress and challenges within their area of expertise, and to give the legislature insights into how we can help in their efforts.

This year's summit built on what was learned from a summit held in 2008, when the Judiciary Committee hosted two days of hearings which featured testimony from police, prosecutors, researchers, court system officials and many other professionals in the criminal justice system. That hearing featured Mr. Steve Aos from the Washington State Institute of Public Policy, who told the committee about the Washington legislature's efforts to implement evidence-based programs to reduce crime and to reduce the costs of imprisonment.

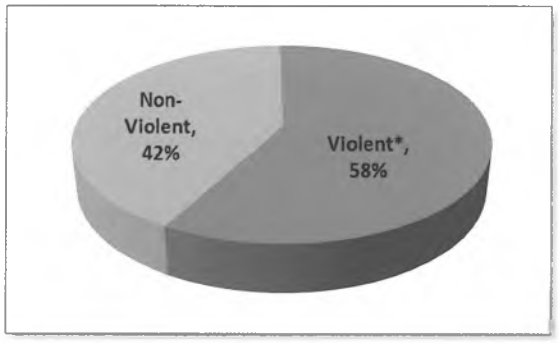
Mr. Aos's testimony led to a study conducted by Alaska's Institute of Social and Economic Research to help policy makers identify Alaska programs that work toward the same end. Since then, many efforts have been undertaken employing evidence-based models, and the legislature began to address programs and policy changes that have been shown to work to increase public safety and reduce criminal offenses.

The focus of this year's summit was on early childhood education as a way to reduce long term crime rates. The opening of the new Goose Creek Prison at a cost of $238 million and annual operating costs of $68 million illustrates the fiscal implications of not taking action.

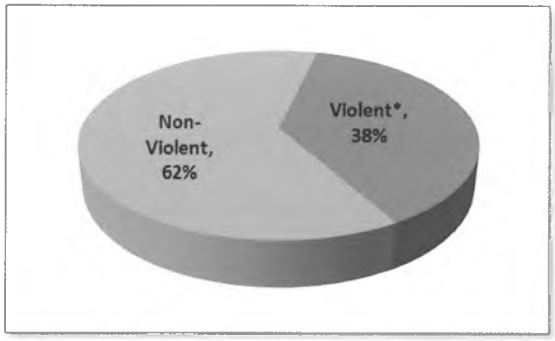
As Senate Judiciary Chairman Hollis French pointed out in his opening remarks, "I am perfectly okay with sending deserving individuals to prison for long periods of time, but we ignore these costs at our peril."

Indeed, the long term trend in Alaska is toward imprisoning more and more nonviolent offenders (see chart below).

PRISON POPULATION BY TYPE OF OFFENSE



2002



2011

The graph on the left indicates that in 2002, almost 60% of prisoners had been convicted of violent offenses, while just over 40% were nonviolent offenders; by 2011 those numbers had reversed, and now over 60% of prisoners are serving time for nonviolent offenses.

As Anchorage District Attorney Adrienne Bachman pointed out, the proportion of crimes her office sees has been relatively constant: about 40% are crimes against a person while 60% are nonviolent offenses.

The Impact of Early Childhood Programs

> "Early childhood education programs consistently increase standardized test scores, increase high school graduation rates, and they reliably decrease crime rates later in the youth's life – and that's fascinating, because that's not an intended impact of these programs but it is definitely an impact."
> Annie Pennucci, Washington State Institute for Public Policy

Guest speaker Annie Pennucci from the Washington State Institute of Public Policy discussed the long term benefits shown in multiple studies of children who attend pre-kindergarten programs.

Penucci explained that she analyzed the findings from 11 individual studies that directly measure crime outcomes and plotted the effect sizes to summarize whether there was more or less crime from the preschool students versus the non-preschool students and if so, the level of the decrease in crime. The students were followed for years (sometimes into adulthood) to see if they had been arrested or convicted of offenses. On average crime went down for low-income preschool students by about 20%, as compared to low-income

students who had not been to preschool. This held true for the students at age 16 as well as into their 30s.

Study after study shows that, as these children grow up, they are more likely to complete high school, more likely to have higher paying jobs and much less likely to end up in the criminal justice system. Pennucci reported that, although it is a front-loaded investment, early childhood education programs are shown to save the state far more money than they cost as the children move through school and into adult life. She noted that the programs have some surprising positive effects: in addition to reducing crime rates, the programs reduce costs in special education and reduce grade repetition. Moreover, the programs lead to lowered health care costs and lowered rates of child abuse and neglect.

Ms. Pennucci said that her analysis of the 11 studies that she examined led her to the conclusion that pre-kindergarten returns $3 in economic value for every $1 dollar invested. The largest economic returns to society are in lower crime rates and to the individual who attends pre-kindergarten in increased earning power.

Ms. Pennucci's report was consistent with the work done by ISER. The 2009 "Cost of Crime" report by ISER showed that Head Start programs save the state six times more money than they cost, and reduce future crime among participants by about 16 percentage points.

Crime Update

"When I was chief of police, if there was a community that was in disorder within the Anchorage area, it was because the people in that neighborhood were not committed to their neighborhood. As long as something didn't happen within their doors after they closed them, they were OK with whatever happened outside the doors."

"**Getting people involved is probably the most effective police force you can have in any community**,"

Walt Monegan, President/CEO, Alaska Native Justice Center

For the most part, police and prosecutors reported flat or declining reports of crime. A notable exception to this was in Palmer, where population growth is pushing crime rates, but where rates of assault and sexual assault seem to be higher than can be accounted for by the population growth.

Agencies are working on a number of projects that improve public safety through improved interagency communications and through proactive efforts to reduce or prevent offenses. One is the "Step Up" program, which provides full-day individualized education services for long-term suspended or expelled teens in order to keep them in school through graduation.

Another is the Municipality of Anchorage's 24/7 sobriety monitoring project, where alcohol offenders are required to take breath tests. The court system is focusing on better tracking of case delays, and on expanding its use of electronic filings to speed up the exchange of information between the prosecution and the defense.

Several projects are being piloted in communities to more closely monitor offenders released on bail. The Department of Corrections is using evidence-based models in providing substance abuse treatment and is piloting a new probation program for offenders leaving jail called PACE (Probationer Accountability with Certain Enforcement) which is initially showing very positive results.

Many agencies pointed out the continued problems of domestic violence and sexual assault. Dr. Andre Rosay from the University of Alaska's Justice Center presented data from the regional victimization surveys done with Alaska's women. These regional surveys, modeled on the National Center for Disease Control's survey, continue to document extremely high rates of violence against women throughout the state.

> "Intimate partner violence is a serious problem throughout the state in every location we've examined so far."
>
> "Unfortunately it's hard to find hope in these numbers. They clearly show that in every location we've examined so far, the rates of violence – both physical violence and sexual violence – are unacceptably high here in Alaska."
>
> Dr. Andre Rosay, Director, UAA Justice Center

The Municipality of Anchorage has been leading the way in making bail conditions electronically available to police officers in the field, thus allowing for better enforcement of court orders. The Municipality of Anchorage's Domestic Violence Prevention program has been successful at holding offenders accountable by providing compliance checks on offenders, victim safety checks, and making arrests for violations of conditions of release.

In Palmer, the Children's Place, the local child advocacy center, was cited as an important partner in helping victims of child abuse.

The special problems confronting rural communities were also discussed by presenters. The importance of Village Public Safety Officers was discussed, with participants citing the finding by the UAA Justice Center showing that having a VPSO involved resulted in reduced injuries to victims and a significantly increased likelihood of prosecution. Increasing numbers of Village Public Safety Officers in communities have helped to provide some law enforcement presence. However, many other communities in Bush Alaska still lack a VPSO, and almost all lack any consistent court presence.

A proposal for a pilot program for tribal community courts was outlined, and other efforts to provide mentoring and leadership by the Public Safety Employees Association were also discussed.

> "I'm an Aleut from Bristol Bay. When I became a trooper, there was another friend of mine – we both graduated from Mt. Edgecumbe High School in the 80's and he's a trooper. He's from Bristol Bay, he's Yupik from Ekwok. And he and I began talking about some of the challenges that were facing our communities since we've left. In my particular situation, I have a family in which over 50% of the women have been sexually assaulted. And I've seen high rates of suicide, violent crimes – I grew up around it, he grew up around it, we both saw it. We began talking about how it was we made choices not to fall into that trap and end up on a different path... how did we become troopers? And that led us to talk about what it is we're going to do from here. "
>
> Trooper Terrence Shanigan, discussing the Public Safety Employee's Association PAWS "People are Worth Saving" community mentorship program.

How the Legislature Can Help

Presenters discussed the following needs:

- **Need for more or better community-based intervention and prevention efforts**

  Pre-kindergarten and early childhood education programs are needed in most communities in Alaska. The Alaska Native Justice Center proposed pilot programs for community/tribal courts in rural communities that have no access to the court system. The "Step Up" program to graduate high-risk kids and trauma-informed care programs for children who are witnesses to family violence were recommended. Aggression Replacement Training for youth, use of Youth Courts, misdemeanor diversion programs and more aggressive use of electronic monitoring for offenders were all suggested by participants.

- **Need to address alcohol abuse, substance abuse and the ongoing levels of domestic violence and sexual assault**

  Participants spoke to the need for increased substance abuse treatment and programs like the 24/7 Sobriety monitoring project in Anchorage; dealing with over-service of alcohol at bars; and using Karluk manor and other "Housing First" initiatives to safely house homeless alcoholics. The Anchorage Domestic Violence Prevention Program (ADVPP), which monitors compliance with bail terms and other court orders, and the Court System's Fairbanks bail project were mentioned as important steps in ensuring offender accountability. Sexual assault response

teams (SART) and Child Advocacy Centers were cited as a critical piece of victim support and case-building, and several law enforcement agencies mentioned the need for more prosecutors. The need for affordable housing was important both for victims of crime and for offenders returning to society after they serve their sentences.

- **Need for faster, more integrated communication and technology systems**

  From law enforcement agencies, communications needs ranging from radio and laptop upgrades, inter-agency electronic information sharing and computer forensic capabilities were all listed as needs. The importance of immediate information delivery from the court on bail conditions, restraining orders, etc., was emphasized: projects are underway in Anchorage and Fairbanks to make more of this information electronically accessible to patrol officers. However, outside these urban areas bail conditions are not generally available to police officers. Consistent data collection and definitions, coordinated data project design and improvement, and other related issues were mentioned by participants. The Court System's MAJIC project is working to connect criminal justices agencies' data platforms. The University Justice Center is in discussions with agencies to explore an integrated justice information center.

Funds or Services Requested:

1. Anchorage Domestic Violence Prevention Project	$1,670,198
2. Anchorage SART matching funds	$350,000
3. 24/7 Sobriety Monitoring Project	$70,000
4. AWARN and Fire Dept radio upgrades	$2,300,000
5. ALEISS upgrades and funding	$126,000
6. Additional prosecutor Palmer/other communities	$150,000
7. CARE program and Child Advocacy Centers	$230,000
8. PACE and other Corrections rehab programs	$200,000
9. Tribal/community pilot project (2 years)	$460,000
10. Pre-K: voluntary pre-K for Alaska	$35,000,000
11. Court e-filing project	$1,985,000
12. Victimization Survey	$400,000

Good Morning and Welcome to the 2012 Crime Summit

Committee members present

Other legislators present --

Thank you coming. I know how busy you are. We are going to make this meaningful.

The Judiciary Committee is here to learn. We have invited you to bring us information from the entire spectrum of the criminal justice system. Prosecutors, police and troopers, the court system, defense attorneys, victim's advocates will all testify. We are dependent on you to give us the unvarnished truth.

My thinking around this summit has been shaped by two graphs:

The first was brought to my attention during the Smart Justice Summit that Senator Ellis put on this fall.

Here's the graph:

In ten years we have significantly changed the population of our prisons. We are incarcerating more and more nonviolent offenders.

Here's why it's an issue: Goose Creek prison, which will begin opening this year, cost $238.5 million to construct.

That's four brand new high schools we did not build.

It will cost $50.5 million to run every year. That's nearly another brand new high school per year we could build, except that the money is going to run a prison.

And as sad as it seems, that's the good news. The bad news is that DOC will be overcapacity by July 2015.

We can't just keep building prisons. I'm still a prosecuting attorney at heart. I'm OK with sending deserving individuals to prison for long periods of time. But we ignore these costs are our peril.

So how do we bend the curve? How do we push that overcapacity date further into the future?

We had a crime summit in 2008. We heard from Steve Aos from the Washington Institute of Public Policy on evidence based rehabilitation systems. His work prompted the Legislature to appropriate $50,000 to have ISER do a similar study looking at programs that are offered here in Alaska.

Here's what they told us:

Graph two: ISER slide

What does this suggest? Education may pay the biggest dividends.

We will see. Our featured presenter will give us more information. Annie Pennuci is here from the Washington Inst. Of Public Policy to tell us about her analytic work in this area.

I'll close by saying this is collaborative work. No single one of us can solve the problem. One collaborator, one ally, is the Governor. He has raised public awareness on the subject through his choose respect campaign. He has also put money in the budget for more VPSOs. I appreciate that.

There's a lot of experience and talent in this room. Share your talent and insights with us.

Prison Population & Crime Type

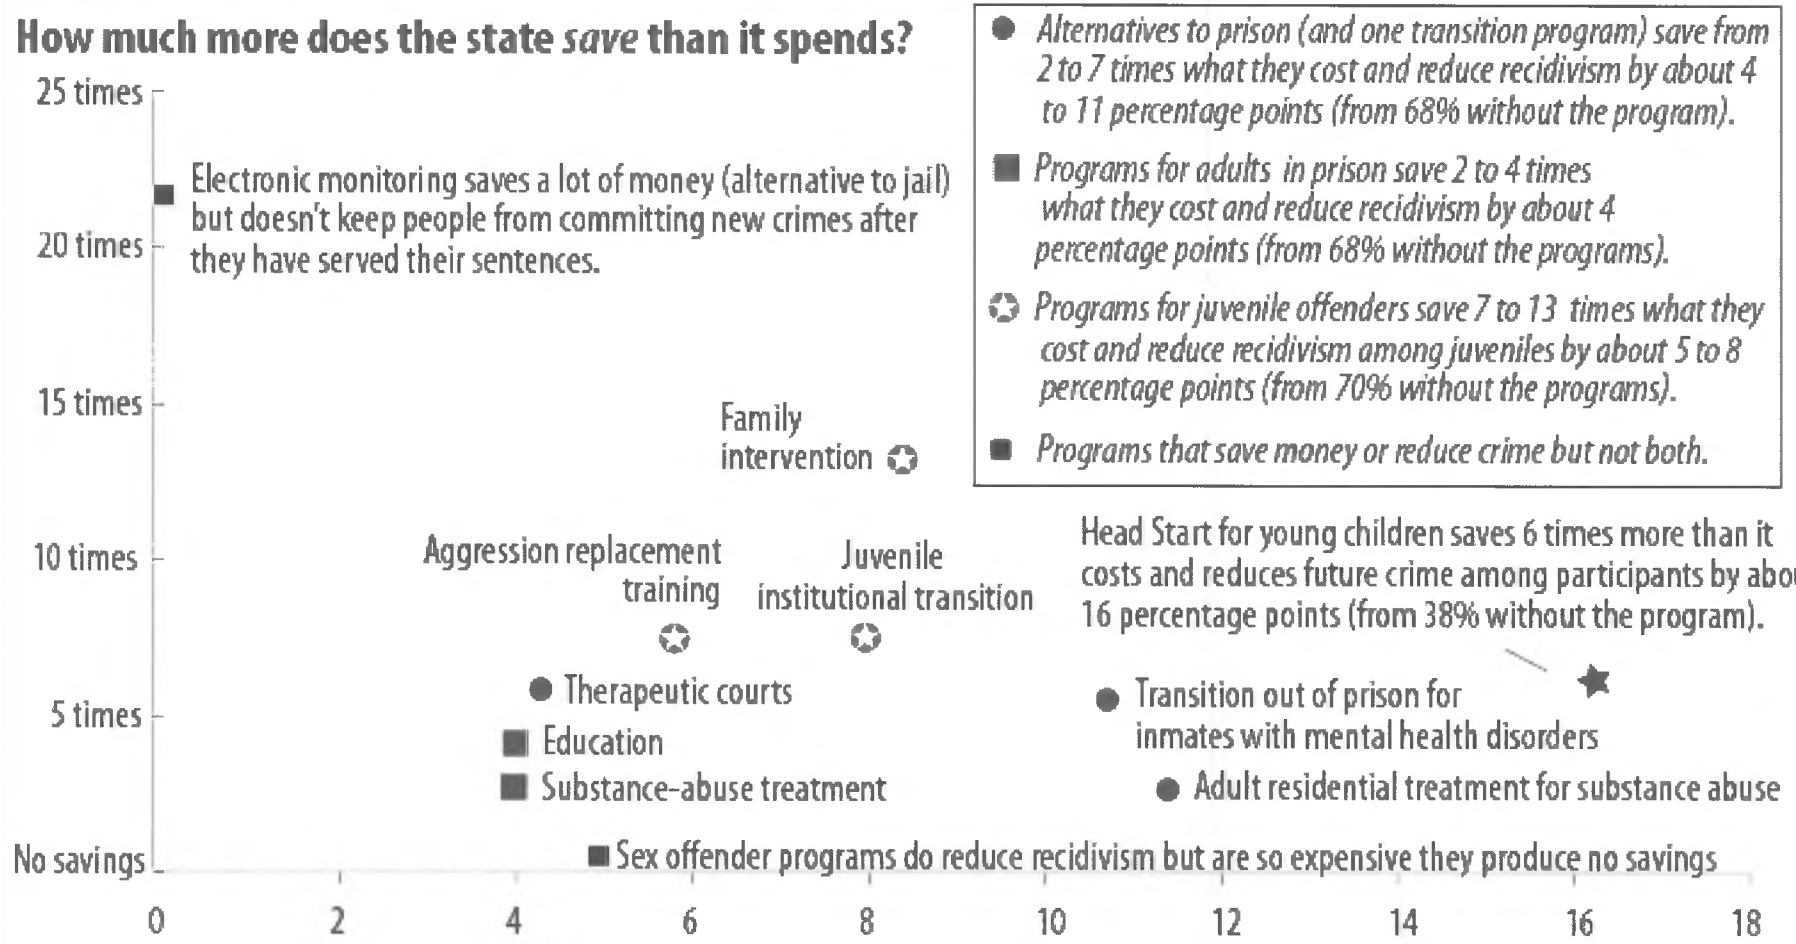
How Effective Are Various Programs at Saving Money and Reducing Crime?



Source: Stephanie Martin and Steve Colt, *The Cost of Crime: Could the State Reduce Future Crime and Save Money by Expanding Education and Treatment Programs?* Institute of Social and Economic Research, University of Alaska Anchorage, January 2009

2012 Crime Summit

Speaker Bios

Day 1

1) Annie Pennucci, Senior Research Associate,
Washington State Institute for Public Policy

More Education, Less Crime: Research Evidence and Policy Implications

- Has conducted research at the Washington State Institute for Public Policy for 10 years
- Specializes in education topics spanning early childhood, K12, and higher education
- Has experience as a staffer in the Washington State House of Representatives
- Has experience as an evaluator for a nonprofit that provides support services to recently released criminal offenders

BREAK for lunch (1 hour)

2) Karen Loeffler, United States Attorney, District of Alaska

- Appointed U.S. Attorney in October of 2009
- Moved to Anchorage in 1985, worked briefly as an Assistant Attorney General in the Oil and Gas Section of the Attorney General's Office
- Accepted a position as an Assistant U.S. Attorney, a job she has held for 21 years until her appointment as U.S. Attorney
- As an Assistant U.S. Attorney, she has tried a wide variety of cases, including fish and wildlife prosecutions, drugs, homicide, bank robbery, and violations of the marine resource laws, but has specialized, throughout her career, in complex white collar prosecutions

3) a. Rick Svobodny, Acting Attorney General, Department of Law

- Permanent position is Deputy Attorney General for the Criminal Division of the Department of Law
- Has been a prosecutor for the State for the vast majority of his career
- This year marks 35 years of service with the Department of Law

3) b. Adrienne Bachman, District Attorney, 3rd Judicial District (Anchorage), Department of Law

- 25 year prosecutor and has been District Attorney for 4 ½ years
- Tried over 130 cases in 13 communities in our state
- Prosecuted in southeast, the west coast, in the Pribliofs and all over southcentral Alaska

4) Cynthia Franklin, Municipal Criminal Prosecutor, Municipality of Anchorage

- Prosecuted for 17 years in Texas before moving to Alaska in 2007
- Has been with the Anchorage Municipal Prosecutor's Office since early 2008
- Hired as a Domestic Violence prosecutor and became Municipal Prosecutor in December of 2010
- Office prosecutes misdemeanor offenses occurring in the City of Anchorage

5) a. Commissioner Joseph Masters, Department of Public Safety

- Raised in Unalaska
- Worked in law enforcement for more than 24 years, began as a VPSO in Unalakleet and later became a police officer
- Majority of his career in law enforcement was within the ranks of the Alaska State Troopers beginning in 1986
- In 1999 he transferred to the Division of Fish and Wildlife Protection, rose to rank of Captain
- Promoted to deputy director of the Alaska State Troopers in June of 2003 and held this position until his retirement in May of 2005

5) b. Colonel Keith Mallard, Director, Alaska State Troopers

- Director since December 2010
- 15-year veteran of the Troopers
- He's a graduate of both the FBI National Academy and the DEA Drug Unit Commanders' Academy
- Before joining the troopers in 1996, he was a municipal police officer and a deputy sheriff

BREAK (15 minutes)

6) Chief Greg Browning, Alaska Association of Chiefs of Police

- Moved to Juneau, Alaska in 2000 after a 21-year career with the Amarillo, Texas Police Department
- He was the JPD Assistant Chief from 2000 to May 2006 when he was promoted to Chief
- Currently serving as treasurer of the Alaska Association of Chiefs of Police

7) Chief Mark Mew, Anchorage Police Department

- Appointed January 25, 2010
- Retired from the Anchorage Police Department in 2003, as Deputy Chief, after 20 years of service
- While at the APD, worked in patrol, detectives, SWAT, and at various administrative posts
- Through much of his career he was responsible for implementing new police communications and technology systems

8) Sergeant Lance Ketterling, Palmer Police Department

- Currently serving as a Detective Sergeant
- Worked in one capacity or another at PPD for the last 15 years
- Investigates major crime cases

9) Dennis Johnson, Program Director, Alaska Pretrial Services

- Lifelong Alaskan, raised in Fairbanks
- Left Alaska in 1988 and worked in California as a Deputy Sheriff Paramedic in both Los Angeles and Kern Counties
- Returned to Alaska in 1995 and worked as a Paramedic with Division of Emergency Services in the villages of Allakaket and Huges Alaska on the Koyokuk River Flood with FEMA
- Was involved in an off duty shooting in Anchorage in 2010 where his cousin was shot and killed and the shooter attempted to shoot and kill him while he was out on bail for another crime and not supervised
- Has since devoted his energy and efforts into developing a Pre-Trial program in Alaska that provides both public and victim safety in metropolitan and rural Alaska while a defendant is out on bail.

2012 Crime Summit

Speaker Bios

Day 2

1) **Erin Patterson-Sexson, Lead Advocate Direct Services Coordinator, Standing Together Against Rape (STAR)**

- Supervises direct service on-call advocates
- Supervises crisis line volunteer coordinator
- Provides extensive training in Anchorage and across the state

2) **A. Nancy Meade, General Counsel, Alaska Court System**

- Formerly the Court Rules Attorney, a position she held from 2004 through 2011
- Has lived and practiced law in Alaska since 1987 (mostly in the Attorney General's Office doing Oil and Gas tax litigation and Environmental law), when she came here to clerk for Supreme Court Justice Ed Burke

B. Diane Schenker, Project Coordinator, Fairbanks Electronic Bail Conditions Project

- Nancy will introduce

C. Helen Sharratt, Integrated Justice Coordinator

- Nancy will introduce

3) **A. Quinlan Steiner, Director, Public Defender Agency**

- Volunteered at the Public Defender Agency prior to law school as an investigator and during law school as a legal extern
- Started as an Assistant Public Defender in 1998
- Worked in the trial unit and the appellate unit until 2005, when he was appointed to the position of Public Defender.
- **B. Richard Allen, Director, Office of Public Advocacy**
- Born and raised in Fairbanks, AK
- Spent a year as a public defender on the Nez Perce Indian Reservation in Idaho
- Then worked in a general law practice in Houston,TX for several years before moving back to Alaska in late 2003
- Was employed as an assistant district attorney in the Palmer office for over seven years before becoming statewide director of the Office of Public Advocacy in April 2011

4) **Walt Monegan, President/CEO, Alaska Native Justice Center**

- Worked 33 years for the Anchorage Police Department
- Retired as the Chief of Police
- Followed by his appointment as Alaska's Commissioner of the Department of Public Safety
- Sat on ANJC Board of Directors for 10 years prior to being President/CEO

5) **Jake Metcalfe, Executive Director, Public Safety Employees Association (PSEA)**

- Fourth generation Alaskan born in Juneau
- Beginning in 1990, launched a legal career focused on public safety and union labor law
- Began his legal career as a state prosecutor in Bethel
- Served as DA for Bethel region
- In 1997, worked as associate general counsel for IBEW then as general counsel in 2004
- With PSEA since 2008

6) **A. Commissioner Joe Schmidt, Department of Corrections**

- Began his career with DOC as a correctional officer in 1998
- After a few years and several prisons, promoted to Sergeant, then Assistant Superintendent and then Superintendent of the Point Mackenzie Correctional Farm
- Named commissioner in January of 2007
- Previously led the effort to unify the Cook Inlet Pretrial Facility and the Anchorage Jail into the Anchorage Correctional Complex.

B. Deputy Commissioner Carmen Gutierrez, Department of Corrections

- Spent 24 years practicing law in Alaska as a criminal defense attorney, working in the state and federal defender's office and in her own private practice
- Has been the Department of Corrections for the last two and a half years
- Responsible for prisoner rehabilitative programs and successful prisoner reentry

C. Deputy Commissioner Sam Edwards, Department of Corrections

- Began his career with DOC in 1980 as a Correctional Officer I at the Anchorage Jail
- Retired in 2003 as Deputy Director of Institutions
- In 2006 he was asked to return as Deputy Commissioner for Operations and Population Management, where his focus continues to be on the optimum and efficient delivery of services and to effecting a seamless transition from institutions to community supervision
- Was one of the original six Correctional Officers assigned to the Alaska State Troopers SERT team and from 2003-06 he served as security captain at the Port of Anchorage

7) **Dr. Andre Rosay, Director, University of Alaska Anchorage Justice Center**

- Has tremendous expertise in both quantitative and community-based participatory research to impact policy and practice
- Works very closely with community partners throughout urban and rural Alaska to study violence against women
- Recipient of multiple state and federal grant awards
- Has published numerous reports on sexual assault, domestic violence, and stalking
- Has been recognized by public and private entities for his contributions to the justice and research community

8) **Jeff Jessee, CEO, Alaska Mental Health Trust Authority**

- Has served as the CEO of The Trust since its creation 16 years ago
- Represents The Trust as a member of the state's Criminal Justice Working Group
- Active on several non-profit and philanthropic boards

9) **Janet McCabe, Chair, Partners for Progress**

- Co-founder
- In 1999, Janet and Anchorage Judge, Jim Wanamaker coordinated to create the Anchorage Wellness Court, Alaska's first "drug court"
- Many years of work experience with state and federal agencies leading interagency, intergovernmental projects

10) **A. Barbara Henjum**, Director, Division of Juvenile Justice

-

B. Dean Williams, Superintendent, McLaughlin Youth Center

-

Alaska State Legislature

Senator Hollis French, Chair
State Capitol, Room 417
Juneau, Alaska 99801
Phone: (907) 465-3892
Fax: (907) 465-6595

Committee Members:
Senator Bill Wielechowski
Senator Lesil McGuire
Senator Joe Paskvan
Senator John Coghill

Senate Judiciary Committee

Crime Summit Agenda

January 24th and 25th, 2012
Butrovich Room, State Capitol

Tuesday, January 24th

10:30 AM	introduction and brief overview
10:45	**Annie Pennucci**, Senior Research Associate Washington State Institute for Public Policy ***More Education, Less Crime: Research Evidence and Policy Implications***
12:00 PM	Lunch break (on your own)
1:00	**Karen Loeffler**, United States Attorney, District of Alaska
1:45	**Rick Svobodny**, Acting Attorney General, Department of Law **Adrienne Bachman**, District Attorney, 3rd Judicial District, Department of Law
2:30	**Cynthia Franklin**, Municipal Criminal Prosecutor, Municipality of Anchorage
2:45	**Commissioner Joseph Masters**, Department of Public Safety **Colonel Keith Mallard**, Director, Alaska State Troopers
3:15	Short break
3:30	**Chief Greg Browning**, Alaska Association of Chiefs of Police
3:45	**Chief Mark Mew**, Anchorage Police Department
4:15	**Sergeant Lance Ketterling**, Palmer Police Department
4:30	**Dennis Johnson**, Program Director, Alaska Pretrial Services

Tuesday, January 24th (continued)

5:00 Adjourn

5:30 - 7:30 Reception at Silverbow Inn, downtown Juneau - *hors d'oeuvres and a no-host bar*

Wednesday, January 25th

8:30 AM	**Erin Patterson-Sexson**, Lead Advocate Direct Services Coordinator Standing Together Against Rape (STAR)
9:00	**Nancy Meade**, General Counsel, Alaska Court System **Diane Schenker**, Project Coordinator, Fairbanks Electronic Bail Conditions Project **Helen Sharratt**, Integrated Justice Coordinator
9:45	**Quinlan Steiner**, Director, Public Defender Agency **Richard Allen**, Director, Office of Public Advocacy
10:15	**Walt Monegan**, President/CEO, Alaska Native Justice Center
10:45	**Jake Metcalfe**, Executive Director, Public Safety Employees Association (PSEA)
11:00	Short break
11:15	**Commissioner Joe Schmidt**, Department of Corrections **Deputy Commissioner Carmen Gutierrez**, Department of Corrections **Deputy Commissioner Sam Edwards**, Department of Corrections
12:00 PM	Working lunch (provided) **Dr. Andre Rosay**, Director, University of Alaska Anchorage Justice Center
1:15	**Jeff Jessee**, CEO, Alaska Mental Health Trust Authority
1:45	**Janet McCabe**, Chair, Partners for Progress
2:00	**Barbara Henjum**, Director, Division of Juvenile Justice **Dean Williams**, Superintendent, McLaughlin Youth Center
2:30	Closing comments
3:00	Adjourn

More Education, Less Crime:

Research Evidence and Policy Implications

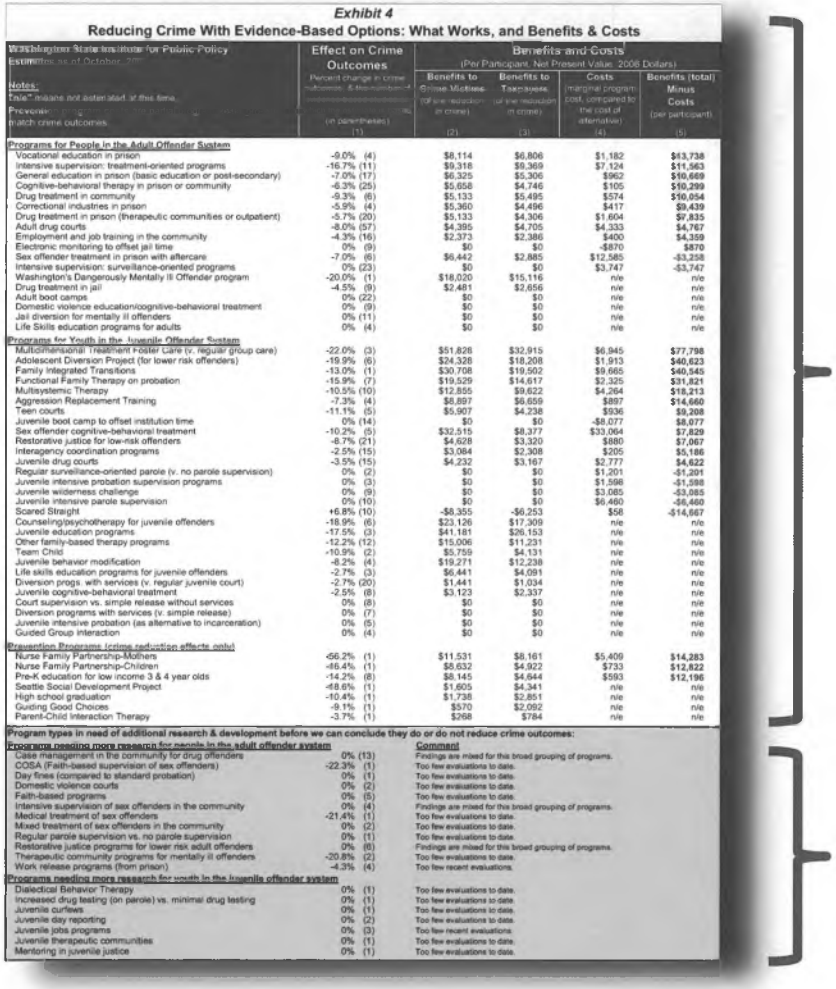

Exhibit 4

Reducing Crime With Evidence-Based Options: What Works, and Benefits & Costs

Washington State Institute for Public Policy
Estimates as of October 2011

Notes:
Table* indicates not asterisked at this time.
Prevents:
(match crime outcomes)

	Effect on Crime Outcomes: Percent change in crime outcomes, & the number of studies (in parentheses) (1)	Benefits and Costs (Per Participant, Net Present Value, 2008 Dollars): Benefits to Crime Victims (if one reduction in crime) (2)	Benefits to Taxpayers (if one reduction in crime) (3)	Costs (marginal program cost, compared to the cost of alternative) (4)	Benefits (total) Minus Costs (per participant) (5)
Programs for People in the Adult Offender System					
Vocational education in prison	-9.0% (4)	$8,114	$6,806	$1,182	$13,738
Intensive supervision: treatment-oriented programs	-16.7% (11)	$9,318	$9,369	$7,124	$11,563
General education in prison (basic education or post-secondary)	-7.0% (17)	$6,325	$5,306	$962	$10,669
Cognitive-behavioral therapy in prison or community	-6.3% (25)	$5,658	$4,746	$105	$10,299
Drug treatment in community	-9.3% (6)	$5,133	$5,495	$574	$10,054
Correctional industries in prison	-5.9% (4)	$5,360	$4,496	$417	$9,439
Drug treatment in prison (therapeutic communities or outpatient)	-5.7% (20)	$5,133	$4,306	$1,604	$7,835
Adult drug courts	-8.0% (57)	$4,395	$4,705	$4,333	$4,767
Employment and job training in the community	-4.3% (16)	$2,373	$2,386	$400	$4,359
Electronic monitoring to offset jail time	0% (9)	$0	$0	-$870	$870
Sex offender treatment in prison with aftercare	-7.0% (6)	$6,442	$2,885	$12,585	-$3,258
Intensive supervision: surveillance-oriented programs	0% (23)	$0	$0	$3,747	-$3,747
Washington's Dangerously Mentally Ill Offender program	-20.0% (1)	$18,020	$15,116	n/e	n/e
Drug treatment in jail	-4.5% (9)	$2,481	$2,656	n/e	n/e
Adult boot camps	0% (22)	$0	$0	n/e	n/e
Domestic violence education/cognitive-behavioral treatment	0% (9)	$0	$0	n/e	n/e
Jail diversion for mentally ill offenders	0% (11)	$0	$0	n/e	n/e
Life Skills education programs for adults	0% (4)	$0	$0	n/e	n/e
Programs for Youth in the Juvenile Offender System					
Multidimensional Treatment Foster Care (v. regular group care)	-22.0% (3)	$51,828	$32,915	$6,945	$77,798
Adolescent Diversion Project (for lower risk offenders)	-19.9% (6)	$24,328	$18,208	$1,913	$40,623
Family Integrated Transitions	-13.0% (1)	$30,708	$19,502	$9,665	$40,545
Functional Family Therapy on probation	-15.9% (7)	$19,529	$14,617	$2,325	$31,821
Multisystemic Therapy	-10.5% (10)	$12,855	$9,622	$4,264	$18,213
Aggression Replacement Training	-7.3% (4)	$8,897	$6,659	$897	$14,660
Teen courts	-11.1% (5)	$5,907	$4,238	$936	$9,208
Juvenile boot camp to offset institution time	0% (14)	$0	$0	-$8,077	$8,077
Sex offender cognitive-behavioral treatment	-10.2% (5)	$32,515	$8,377	$33,064	$7,829
Restorative justice for low-risk offenders	-8.7% (21)	$4,628	$3,320	$880	$7,067
Interagency coordination programs	-2.5% (15)	$3,084	$2,308	$205	$5,186
Juvenile drug courts	-3.5% (15)	$4,232	$3,167	$2,777	$4,622
Regular surveillance-oriented parole (v. no parole supervision)	0% (2)	$0	$0	$1,201	-$1,201
Juvenile intensive probation supervision programs	0% (3)	$0	$0	$1,598	-$1,598
Juvenile wilderness challenge	0% (9)	$0	$0	$3,085	-$3,085
Juvenile intensive parole supervision	0% (10)	$0	$0	$6,460	-$6,460
Scared Straight	+6.8% (10)	-$8,355	-$6,253	$58	-$14,667
Counseling/psychotherapy for juvenile offenders	-18.9% (6)	$23,126	$17,309	n/e	n/e
Juvenile education programs	-17.5% (3)	$41,181	$26,153	n/e	n/e
Other family-based therapy programs	-12.2% (12)	$15,006	$11,231	n/e	n/e
Team Child	-10.9% (2)	$5,759	$4,131	n/e	n/e
Juvenile behavior modification	-8.2% (4)	$19,271	$12,238	n/e	n/e
Life skills education programs for juvenile offenders	-2.7% (3)	$6,441	$4,091	n/e	n/e
Diversion progs. with services (v. regular juvenile court)	-2.7% (20)	$1,441	$1,034	n/e	n/e
Juvenile cognitive-behavioral treatment	-2.5% (8)	$3,123	$2,337	n/e	n/e
Court supervision vs. simple release without services	0% (8)	$0	$0	n/e	n/e
Diversion programs with services (v. simple release)	0% (7)	$0	$0	n/e	n/e
Juvenile intensive probation (as alternative to incarceration)	0% (5)	$0	$0	n/e	n/e
Guided Group Interaction	0% (4)	$0	$0	n/e	n/e
Prevention Programs (crime reduction effects only)					
Nurse Family Partnership-Mothers	-56.2% (1)	$11,531	$8,161	$5,409	$14,283
Nurse Family Partnership-Children	-16.4% (1)	$8,632	$4,922	$733	$12,822
Pre-K education for low income 3 & 4 year olds	-14.2% (8)	$8,145	$4,644	$593	$12,196
Seattle Social Development Project	-18.6% (1)	$1,605	$4,341	n/e	n/e
High school graduation	-10.4% (1)	$1,738	$2,851	n/e	n/e
Guiding Good Choices	-9.1% (1)	$570	$2,092	n/e	n/e
Parent-Child Interaction Therapy	-3.7% (1)	$268	$784	n/e	n/e

Program types in need of additional research & development before we can conclude they do or do not reduce crime outcomes:

Programs needing more research for people in the adult offender system		Comment
Case management in the community for drug offenders	0% (13)	Findings are mixed for this broad grouping of programs.
COSA (Faith-based supervision of sex offenders)	-22.3% (1)	Too few evaluations to date.
Day fines (compared to standard probation)	0% (1)	Too few evaluations to date.
Domestic violence courts	0% (2)	Too few evaluations to date.
Faith-based programs	0% (5)	Too few evaluations to date.
Intensive supervision of sex offenders in the community	0% (4)	Findings are mixed for this broad grouping of programs.
Medical treatment of sex offenders	-21.4% (1)	Too few evaluations to date.
Mixed treatment of sex offenders in the community	0% (2)	Too few evaluations to date.
Regular parole supervision vs. no parole supervision	0% (1)	Too few evaluations to date.
Restorative justice programs for lower risk adult offenders	0% (6)	Findings are mixed for this broad grouping of programs.
Therapeutic community programs for mentally ill offenders	-20.8% (2)	Too few evaluations to date.
Work release programs (from prison)	-4.3% (4)	Too few recent evaluations.
Programs needing more research for youth in the juvenile offender system		
Dialectical Behavior Therapy	0% (1)	Too few evaluations to date.
Increased drug testing (on parole) vs. minimal drug testing	0% (1)	Too few evaluations to date.
Juvenile curfews	0% (1)	Too few evaluations to date.
Juvenile day reporting	0% (2)	Too few evaluations to date.
Juvenile jobs programs	0% (3)	Too few recent evaluations.
Juvenile therapeutic communities	0% (1)	Too few evaluations to date.
Mentoring in juvenile justice	0% (1)	Too few evaluations to date.

A "Consumer Reports" List:

What works?

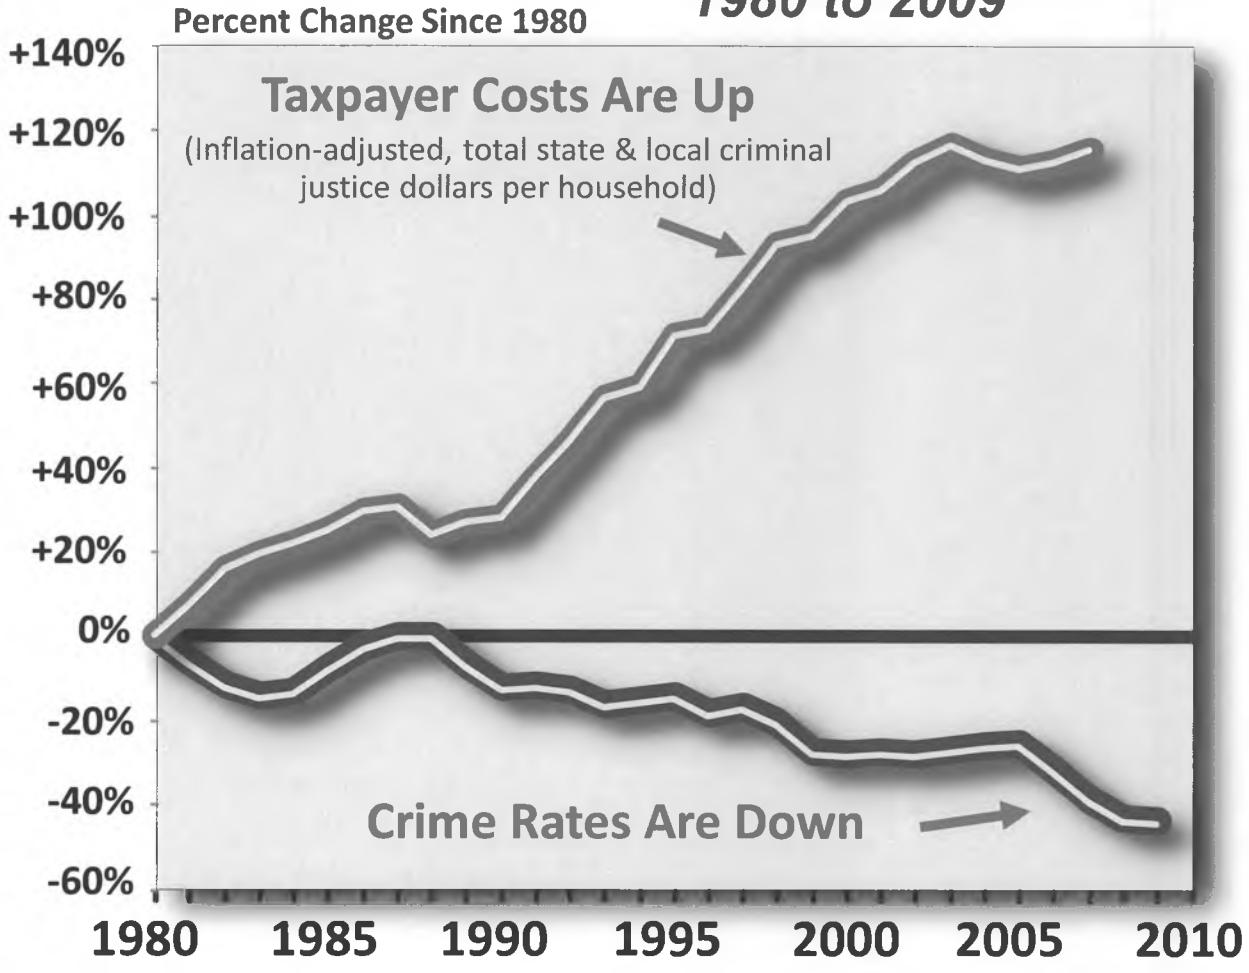
What doesn't?

What can give Washington taxpayers a good return on their money?

Given the current level of rigorous research, what don't we know?

Crime: The Big Picture

Keeping Track of Crime Rates & Taxpayer Costs in Washington: 1980 to 2009



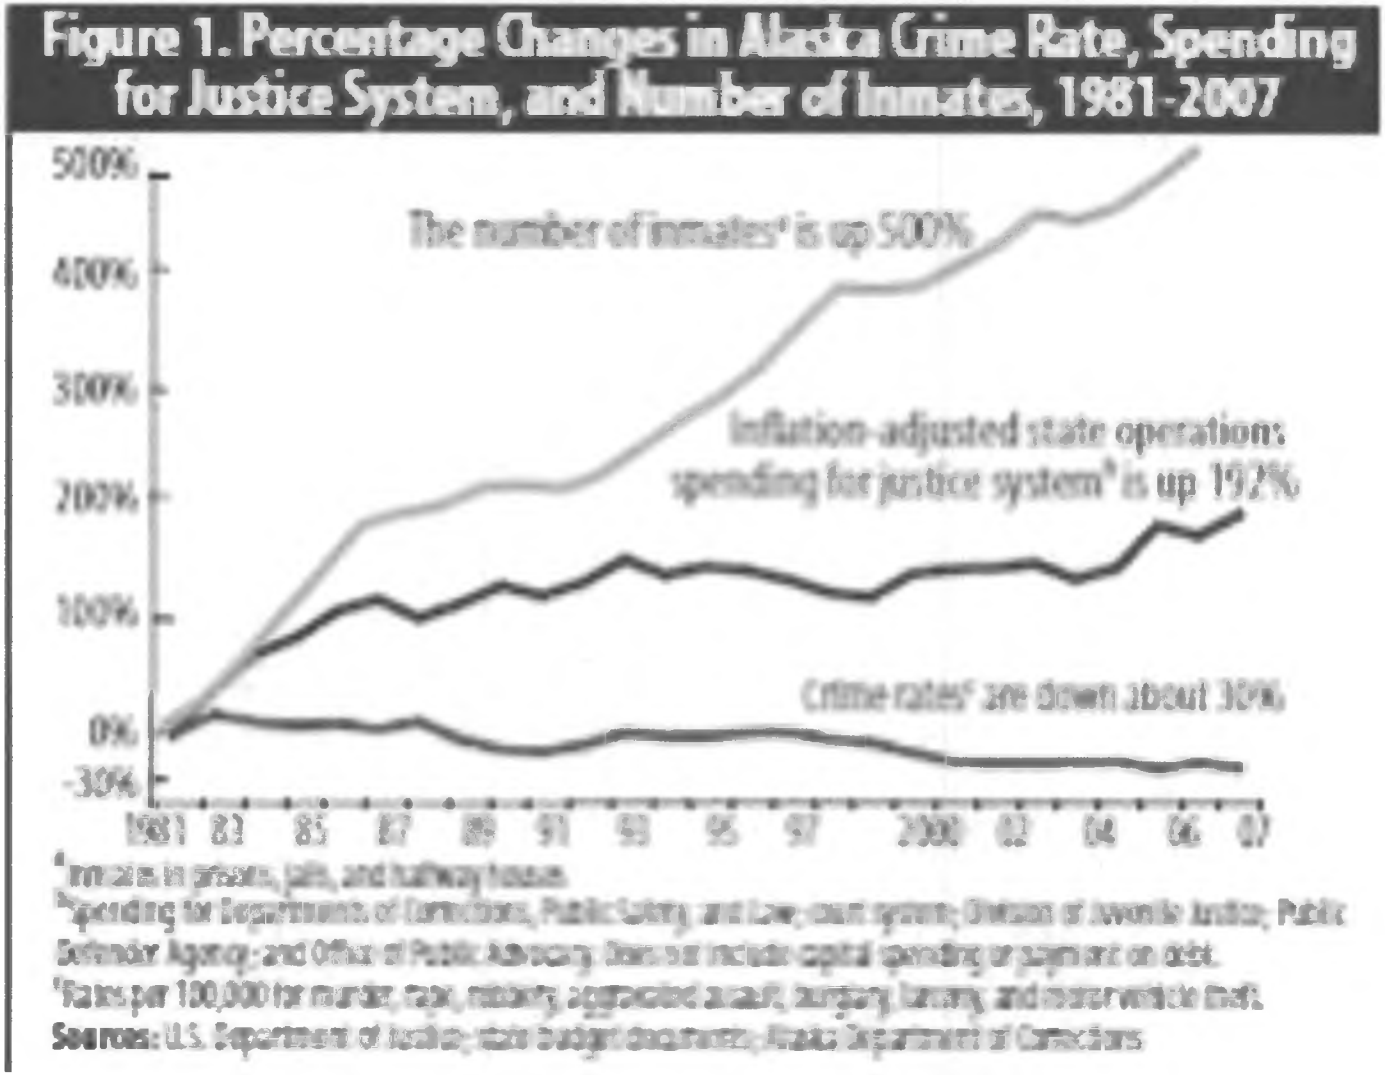
In 1980, taxpayers spent $575 per household on the criminal justice system in WA.

Today they spend $1,250 per year.

A 117% increase.

In 2009, crime rates were 43% lower than they were in 1980.

Source: Washington State Institute for Public Policy. Data are for Washington State. Monetary values in 2008 dollars. Crime rates cover major felony crimes as reported to police.



From: Martin, S. & Colt, S. (2009). *The Cost of Crime: Could The State Reduce Future Crime and Save Money by Expanding Education and Treatment Programs?* Institute of Social and Economic Research, University of Alaska Anchorage, R.S. No. 71.

Are There Evidence-Based Policy Options That Improve Public Outcomes and Save Money?

Our 3-Step Research Approach

1. **What works (to improve outcomes); what doesn't?**

   We analyze all, rigorous evaluations of real world ways to improve the key public outcomes.

2. **What are the economics?**

   We compute benefits and costs to the people of Washington using a consistent approach.

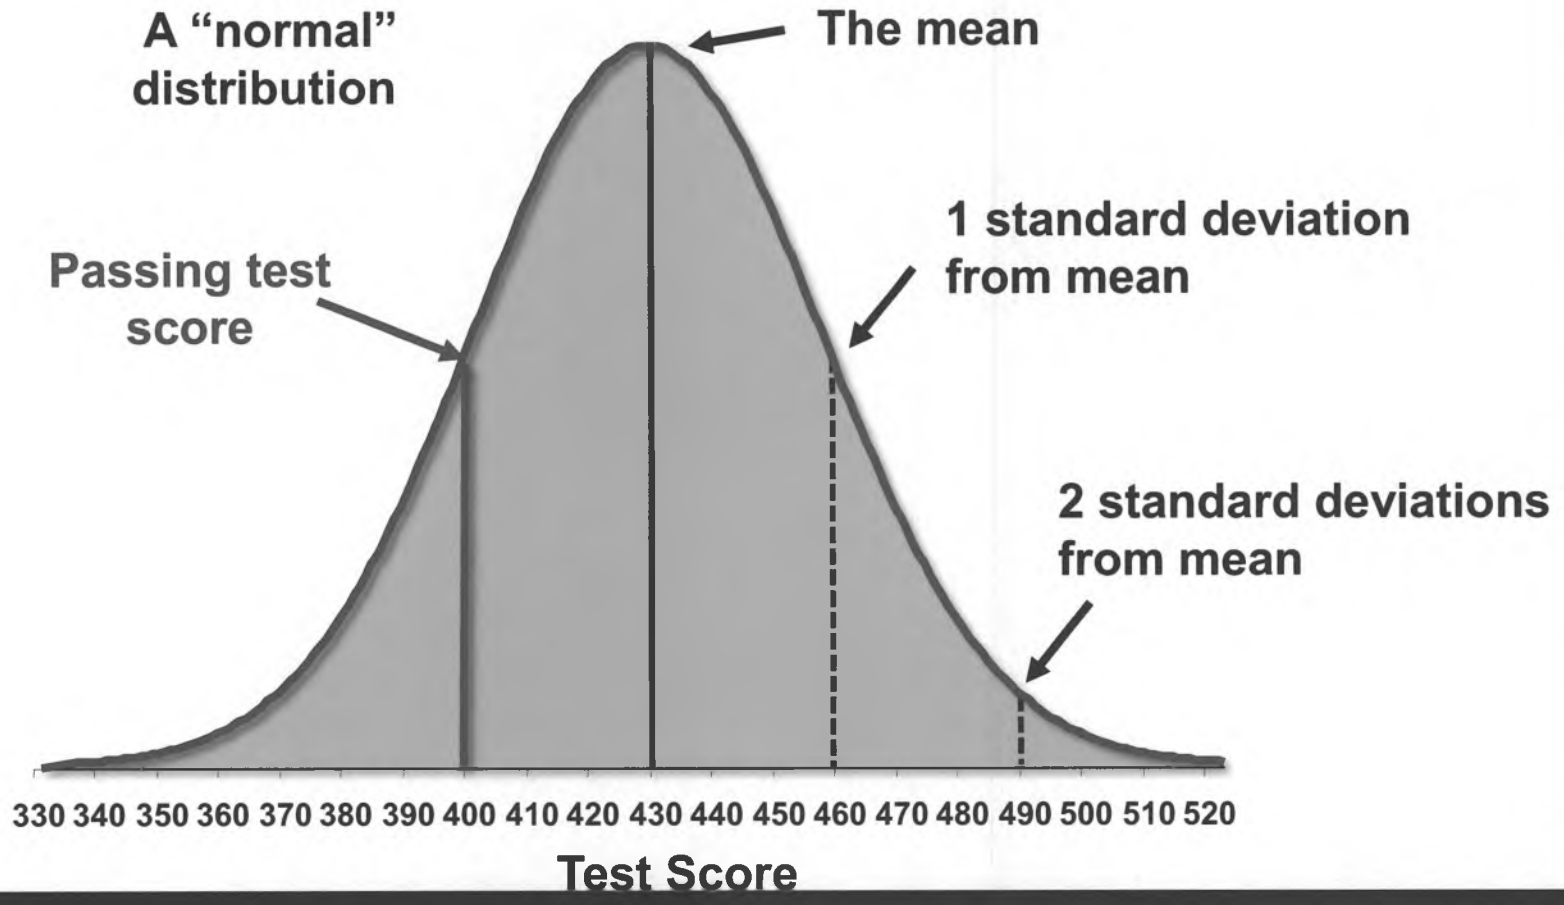
3. **What is the risk of success/failure?**

How Do We Determine What Works?

1. **We gather all the studies we can locate on a topic**
2. **We apply "standards of evidence" to identify the high quality studies**
3. **We analyze all of the higher quality studies to estimate an average effect**

Average Effect = Effect Sizes

- ✓ **Standard deviation = average distance of values from the mean.**
- ✓ **Effect sizes = impacts expressed in magnitude of standard deviations.**



What are the Long-Term Economics?

- **What is the magnitude and timing for each measured outcome (effect size)?**
- **Does the measured outcome have a causal link to another, unmeasured outcome?**
- **What are the long-term impacts on:**
  1. **The participant**
     - ✓ Increased education
     - ✓ Reduced abuse/neglect
  2. **The taxpayer**
     - ✓ Avoided incarceration costs
     - ✓ Avoided child welfare system costs
  3. **Other people in society**
     - ✓ Reduced victimization

Road Map: Overview of WSIPP Benefit-Cost Model

1. Compute Effect Sizes (from 2 literatures)

Program Evaluations: What Works?

Method: Meta-analytic reviews

Example: Does Early Childhood Education reduce crime?

ES & SE

Linkages Between Two Outcomes

Method: Meta-analytic reviews

Example: Does more high school graduation cause reduced crime rates?

ES & SE

2. Compute Unit Changes (from "Base" Info)

Example:

Obtain base crime probability for this population

Compute unit change in crime probability:

ECE on crime: (crimeΔ)

ECE on HSGrad: = ECEΔ X HSGradΔ

HSGrad on Crime: (CrimeΔ)

Compute unit change in Crimeprobability: (via Dcox and RR)

Obtain base HSGrad probability for pop.

3. Apply Monetary Valuation (to Unit Changes)

Direct Monetization of Benefits, Example:

Effect of crime unit change on:

1. Crime victim costs
2. Criminal justice system costs

PV $

Indirect Monetization Example:

Effect of change in HSGrad probability:

1. Lifetime labor market earnings
2. Taxes paid

PV $

4. Compute Benefit-Cost Statistics

Additional Information

1. Cost of program
2. Discount rates
3. Dead-weight costs
4. Tax rates
5. Inflation index

Convert all nominal dollars to base year.

Arrange cash flows from investment year.

Compute:

1. Net Present Value,
2. Benefit-Cost Ratio
3. Internal Rate of Return

Perform Monte Carlo Simulation:

1. Vary all inputs randomly, run the model many times
2. Compute risk: the odds that an investment will <u>not</u> break-even.

NPV $ or IRR

An Example of Prevention: Early Childhood Education (ECE) For Low-income 3 & 4 Year-Olds

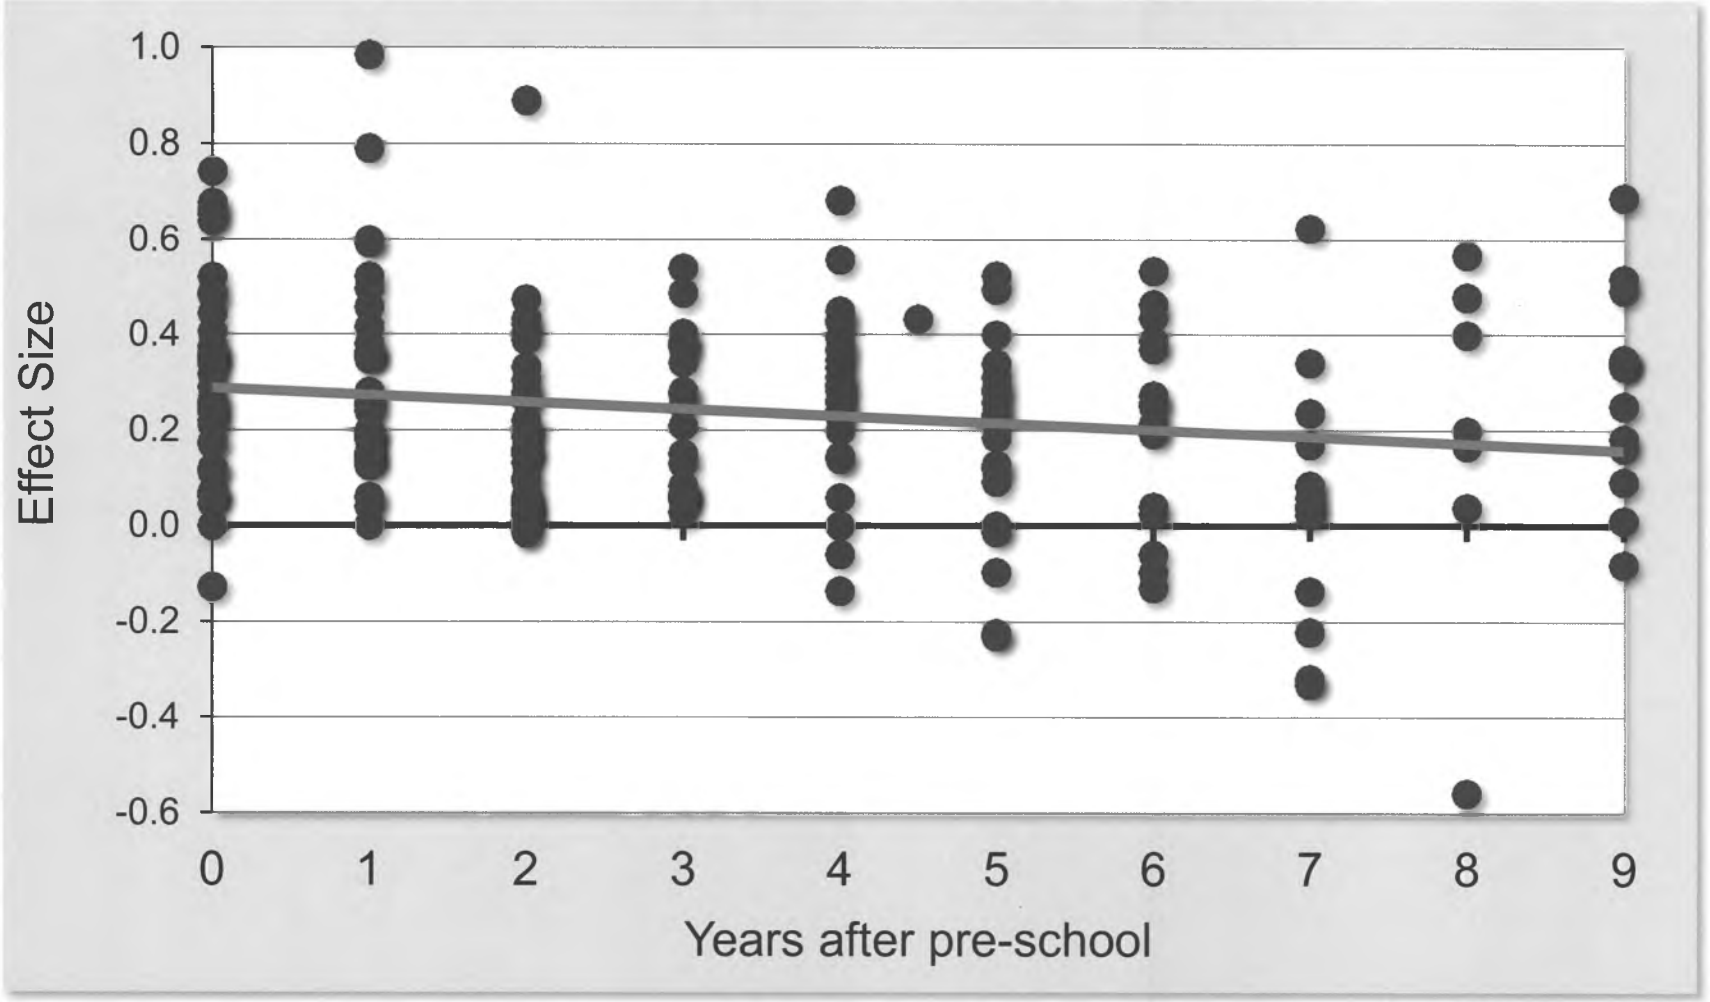
- **66 studies included in the meta-analysis**
- **Population: low-income 3 & 4 year-olds**
- **Range of programs: federal Head Start, state pre-school programs, Perry Preschool, Abecedarian, Chicago Parent Child Centers**
- **Comparison: in program vs. no program**
- **Follow-up period of students: immediately after program to age 40**

An Example of Prevention: ECE For Low-income 3 & 4 Year-Olds

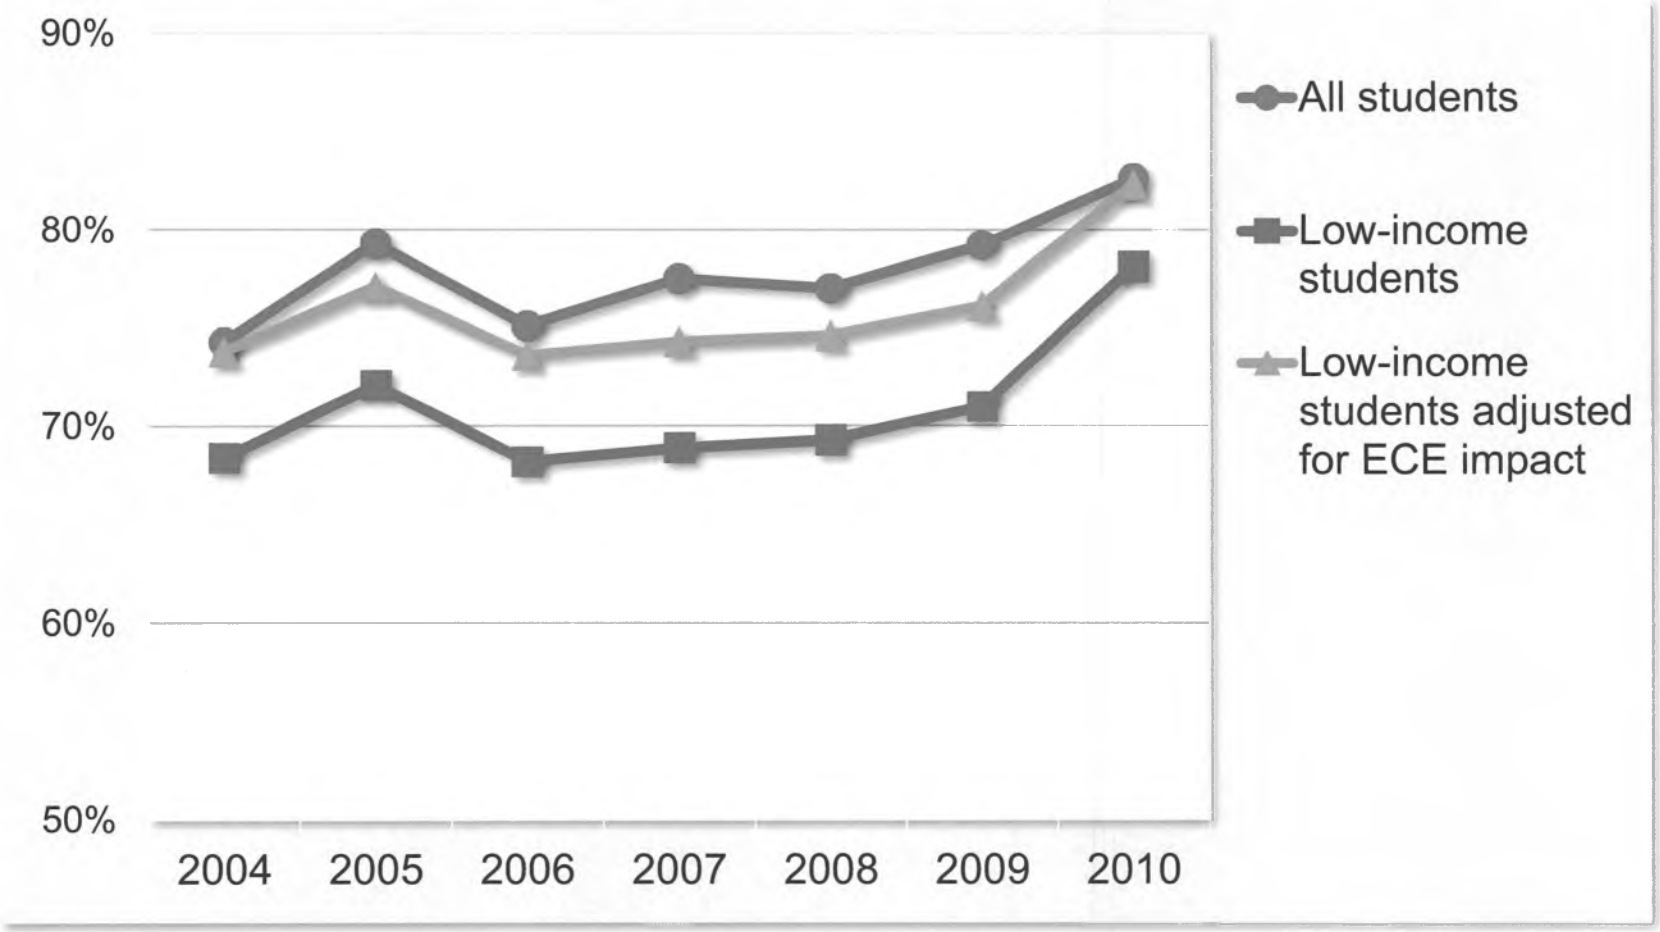
Does Early Childhood Education for 3 & 4 Year-old Low-income Children Affect These Outcomes?	Statistically Significant Impacts
Standardized Test Scores	Increase
High School Graduation	Increase
Crime Rates Later in the Youth's Life	Decrease
K-12 Special Education Placement	Decrease
K-12 Grade Repetition	Decrease
Child Abuse and Neglect	Decrease
Out-of-home Placement	Decrease

Also measured but insufficient data to draw conclusions:
use of public assistance, teen births, college attendance, employment rates

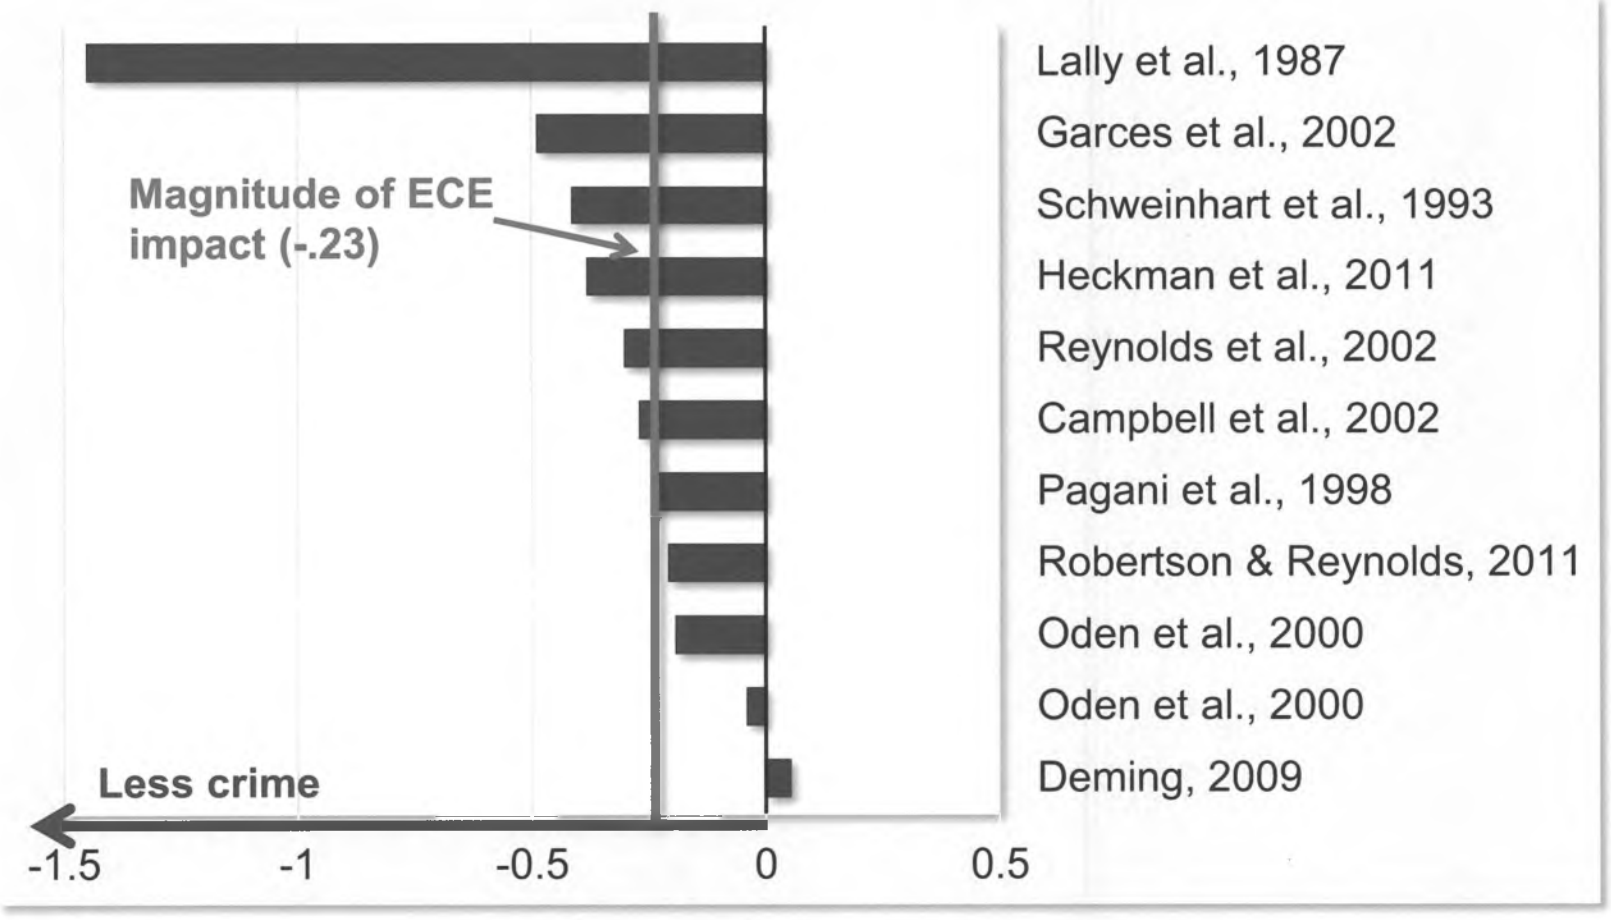
ECE for Low-income 3 & 4 Year-olds: Test Score Impacts and "Fadeout"



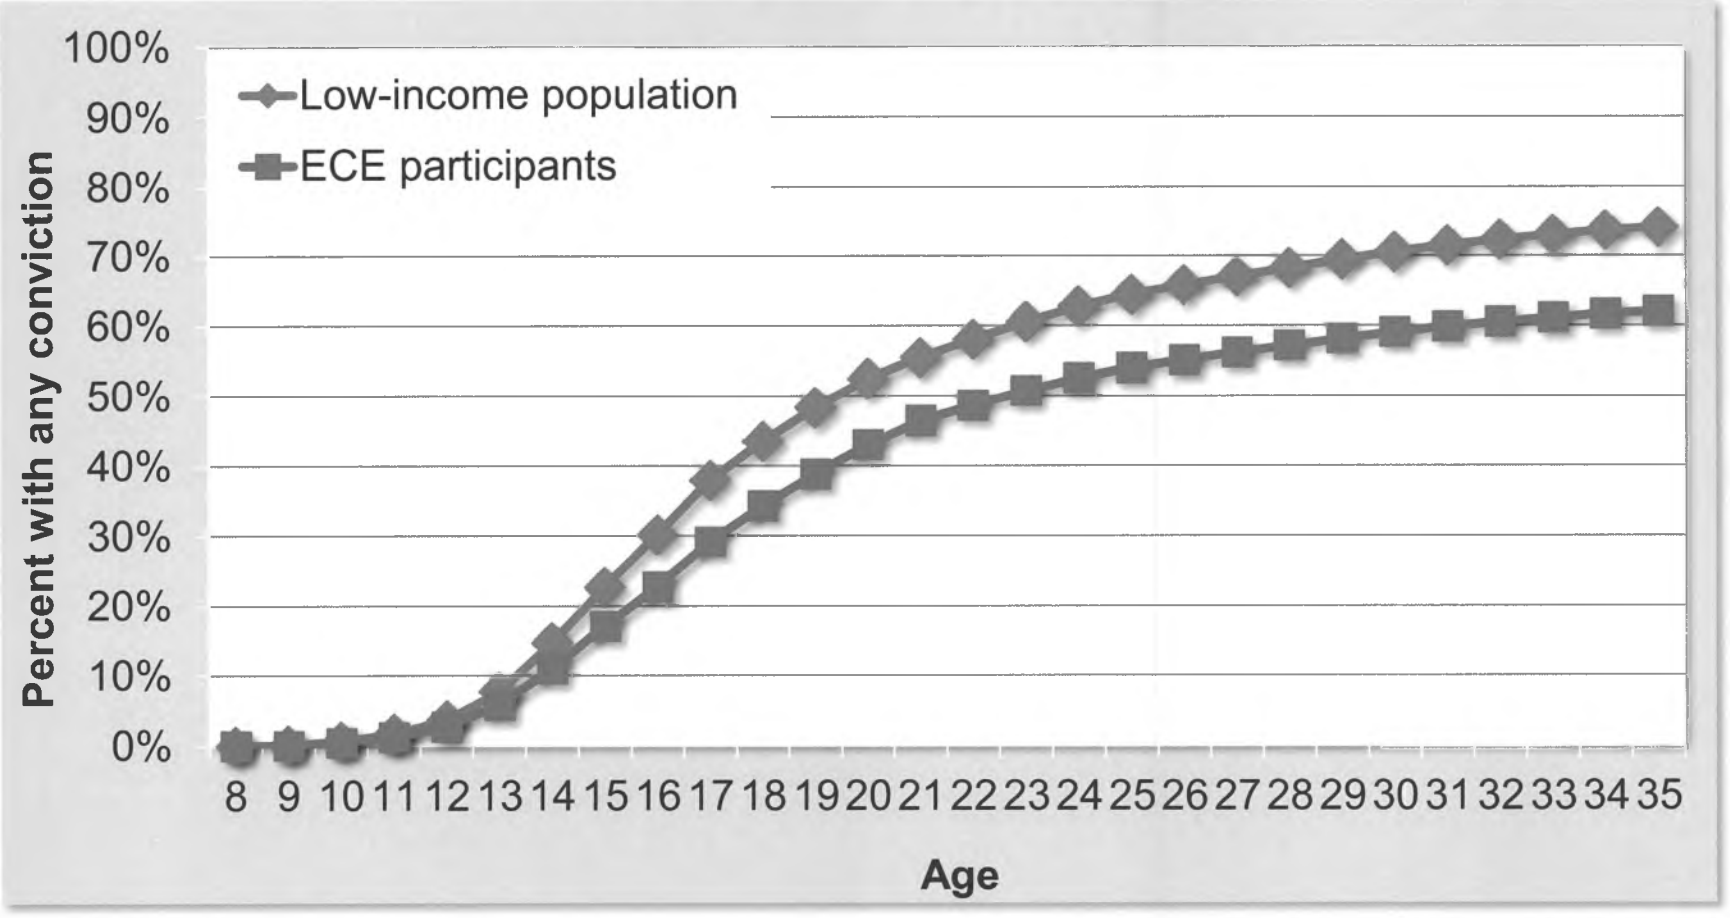
ECE for Low-income 3 & 4 Year-olds: Washington State High School Graduation Rates



ECE for Low-income 3 & 4 Year-olds: Crime Impacts



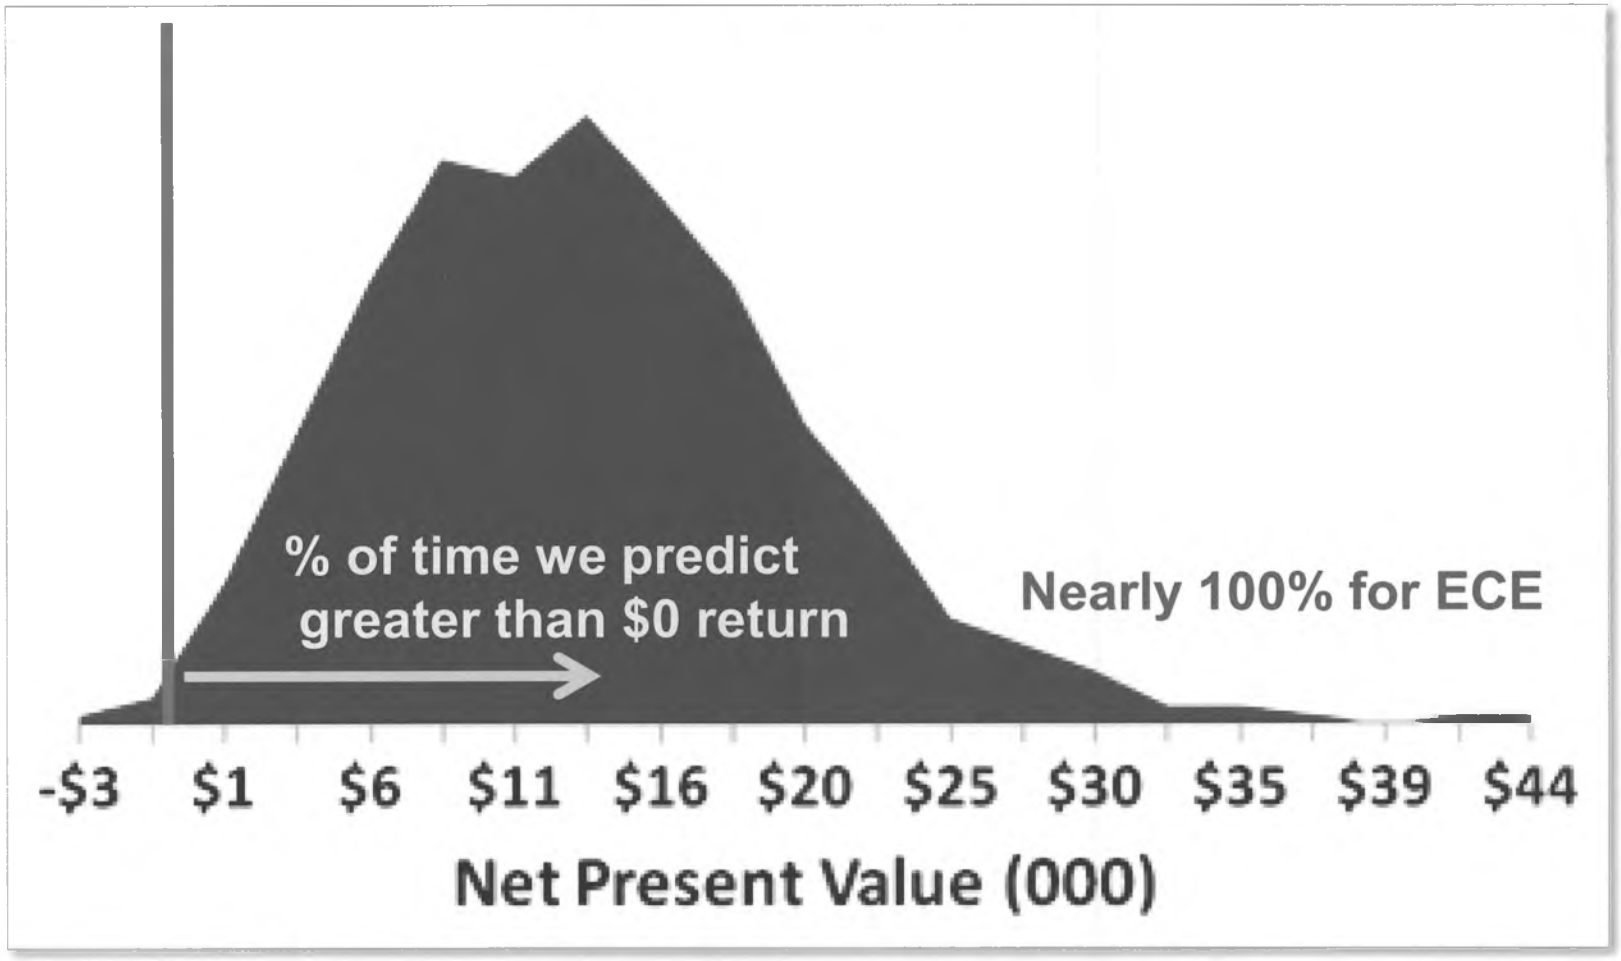
ECE for Low-income 3 & 4 Year-olds: Expected Crime Rates



ECE for Low-Income 3 & 4 Year-Olds: Return on Investment

Benefits Per Individual		**Main Source of Benefits**
Reduced crime	$6,066	**Lower CJ / victim costs**
Educational gains	$9,887	**Increased earnings**
Special ed reduction	$1,098	**Lower K-12 costs**
Grade repetition reduction	$310	**Lower K-12 costs**
Less child abuse & neglect	$637	**Lower CW / victim costs**
Fewer out-of-home placements	$379	**Lower CW / victim costs**
Lower health care system costs	$662	**Lower Medicaid enroll.**
Total Benefits Per Individual	**$21,667**	
Cost Per Individual	**$7,295**	
Benefits Per Dollar of Cost	**$3.01**	**(= 6% ROI)**

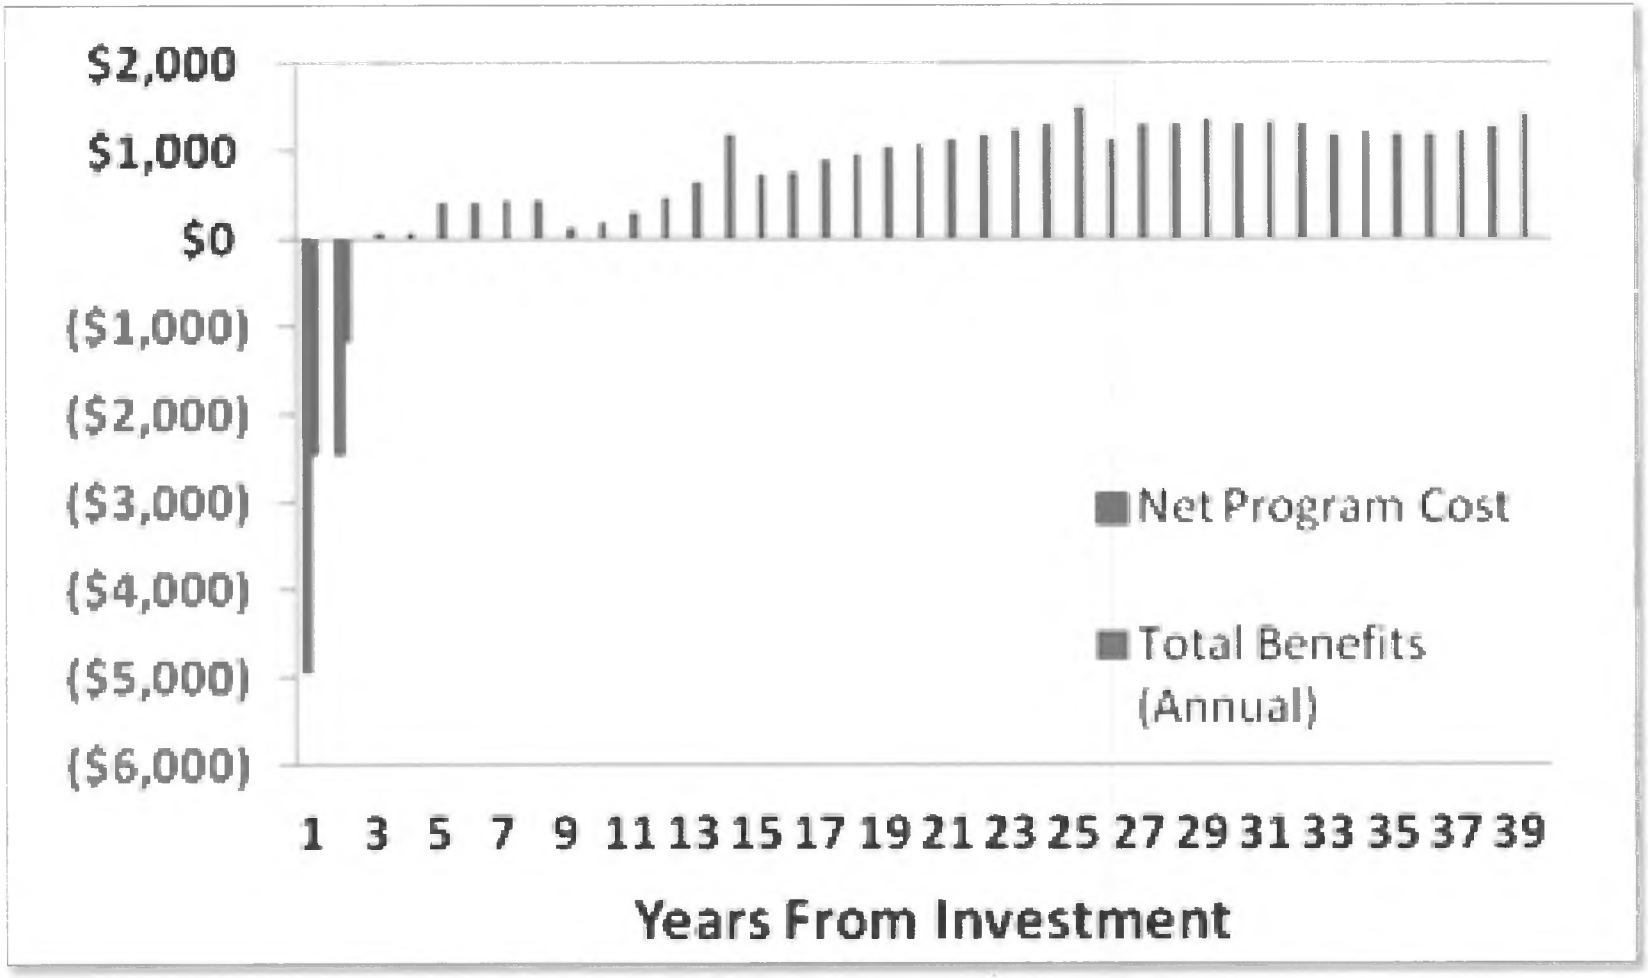
ECE for Low-Income 3 & 4 Year-olds: Investment Risk



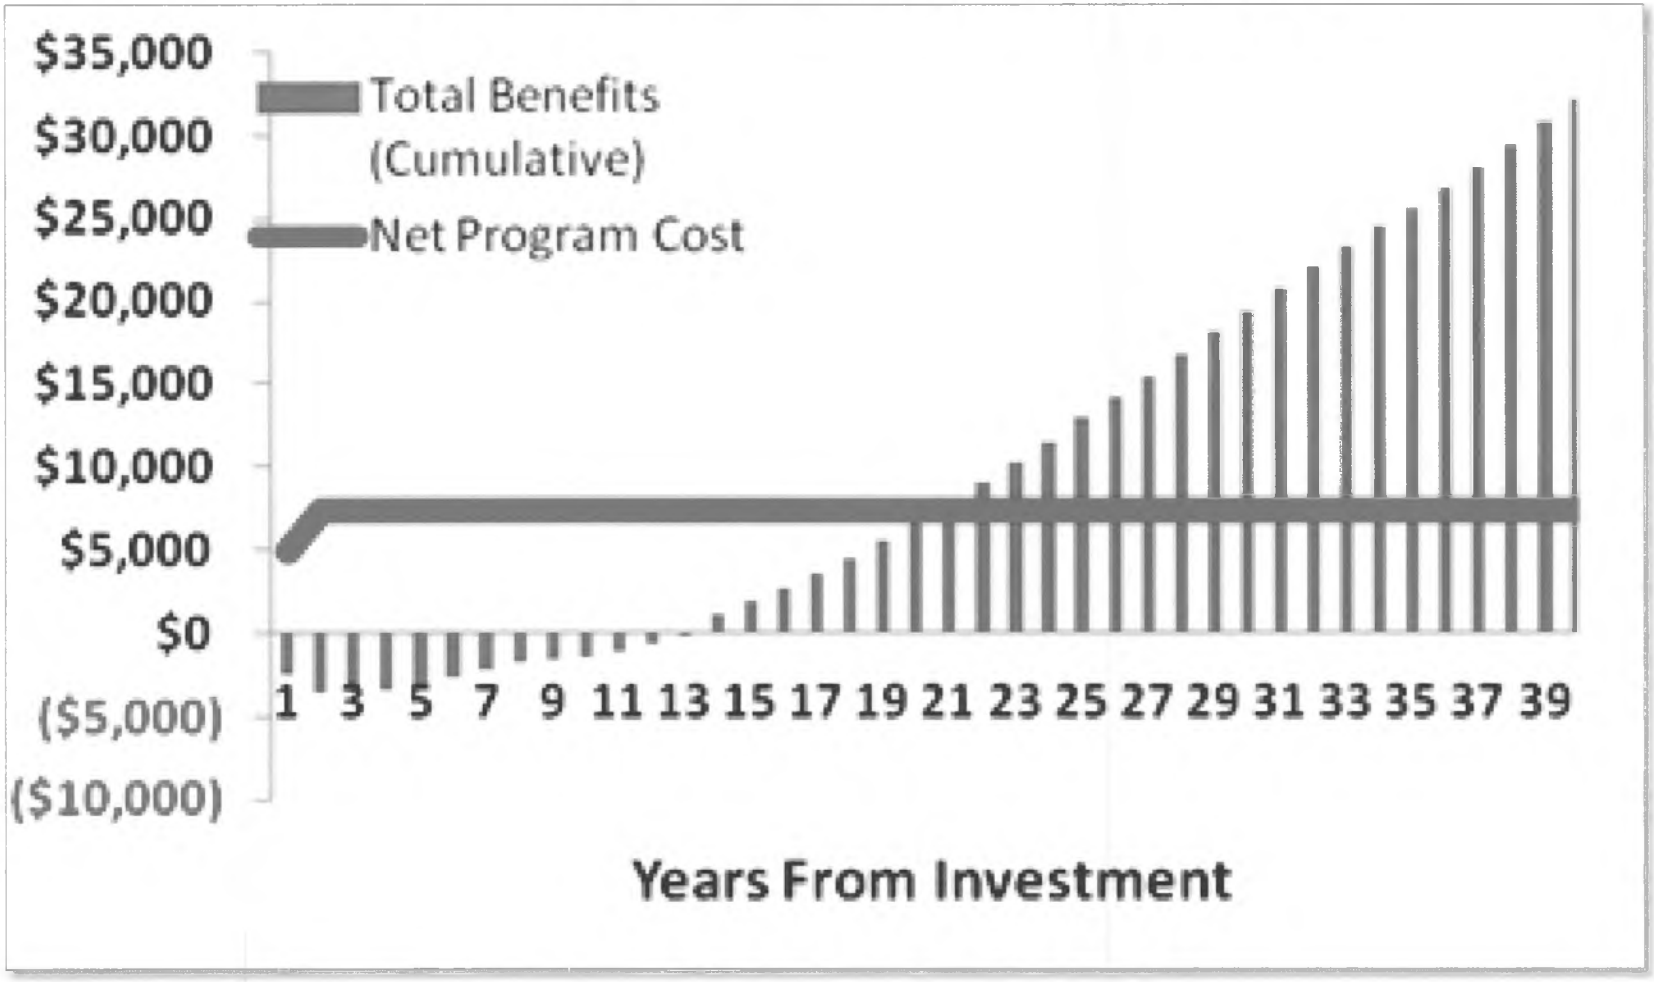
ECE for Low-Income 3 & 4 Year-olds: Estimates of Benefits

Benefit	To participant	To taxpayers	To others	Other indirect	Total
Crime	$0	$1,352	$4,031	$683	**$6,066**
Earnings via hsgrad	$1,431	$527	$0	$265	**$2,223**
Earnings via test scores	$6,353	$2,342	$0	$1,182	**$9,887**
Health care costs via hsgrad	-$136	$1,059	-$792	$532	**$662**
Special education	$0	$730	$0	$368	**$1,098**
Grade repetition	$0	$206	$0	$103	**$310**
Child abuse & negl.	$854	$131	$0	$66	**$1,051**
Out-of-home plcmt.	$0	$251	$0	$128	**$379**

ECE for Low-Income 3 & 4 Year-olds: Investment Returns, Annual



ECE for Low-Income 3 & 4 Year-olds: Investment Returns, Cumulative



ECE for Low-Income 3 & 4 Year-olds: Summary

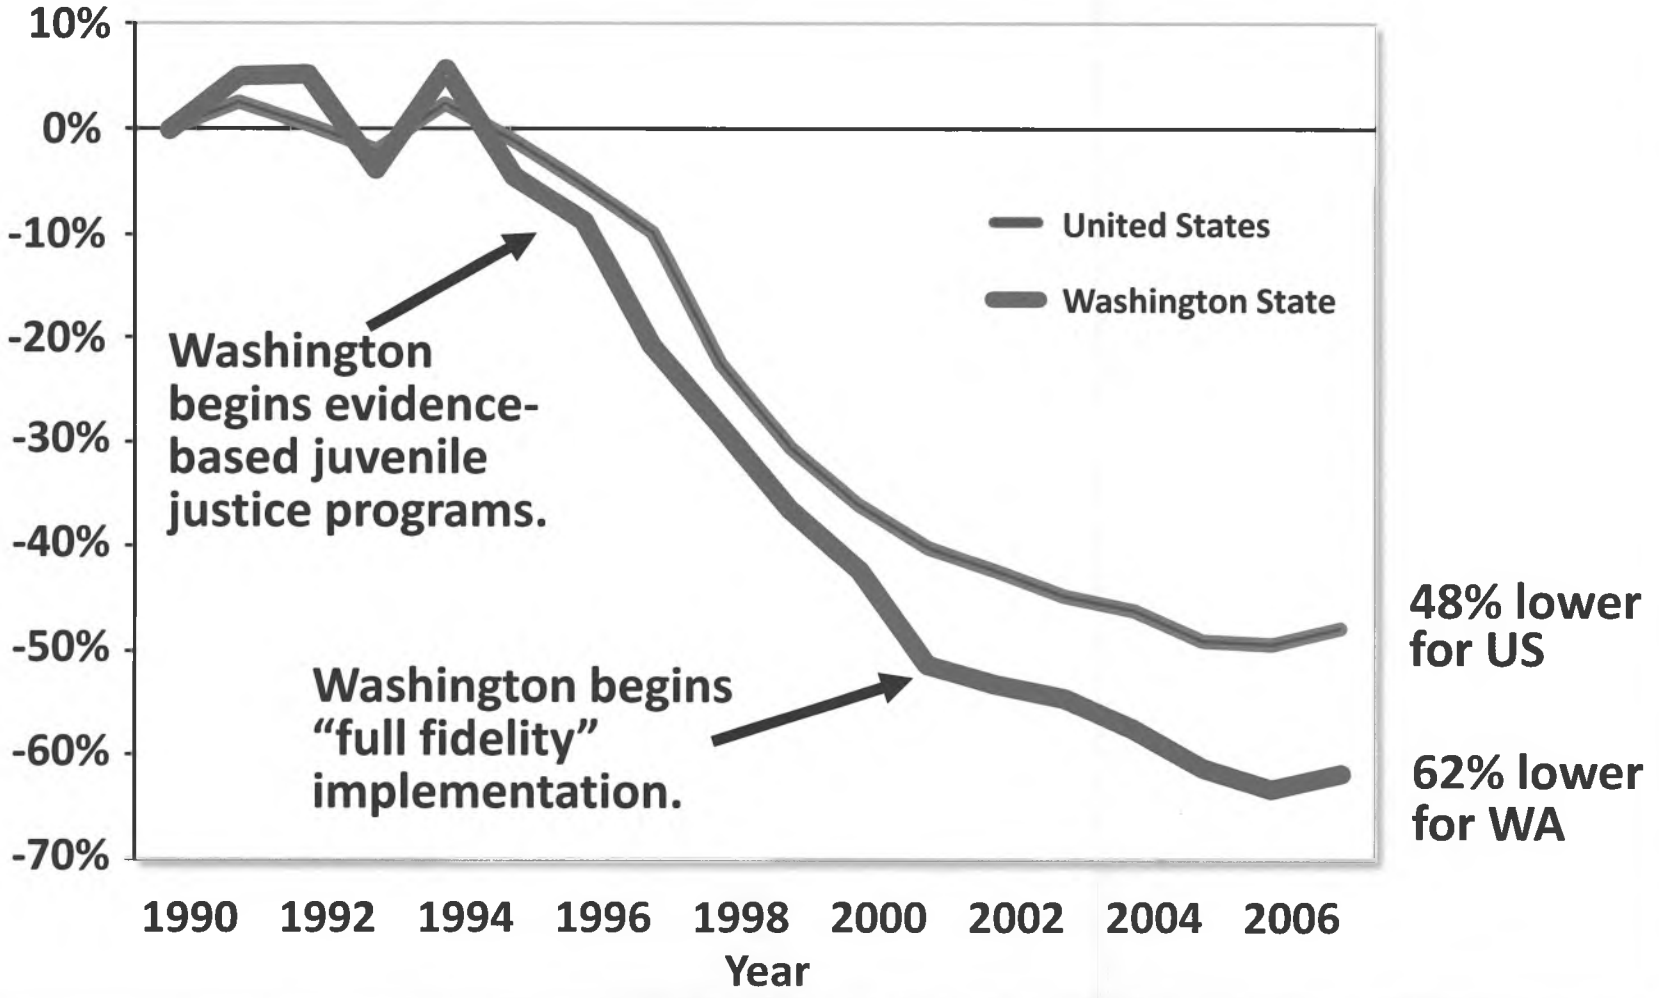
- **The evidence: ECE improves outcomes across multiple dimensions (education, crime, child welfare, health care).**
  - Crime rates among participants are reduced by 20 percent;
  - Earlier educational interventions (preschool vs. high school) have stronger impact on crime.
- **The economics: ECE pays off ($3 per $1 investment).**
- **The risk = low. ECE nearly always breaks even.**

Some Major Washington Legislative Actions

- ✓ **Began funding several evidence-based juvenile justice programs in late 1990s and early 2000s.**
- ✓ **2002 Legislature cut prison sentences (for drug offenders) and diverted some of the fiscal savings to drug courts (from the WSIPP list).**
- ✓ **2007 Legislature funded a portfolio of evidence-based criminal justice programs in adult and juvenile corrections, and prevention.**
- ✓ **2006-present: Early childhood education passes the economic test and the legislature has taken steps to include it as part of Washington's basic education program.**

Keeping Track of Results: Juvenile Arrest Rates

The change since 1990 in the United States and in Washington (WA) State



Three Implementation Issues

- ✓ **Formal Assessment Process (Tools)**
  to align participants with the right programs,
  and to focus resources on higher-risk populations

- ✓ **State-Funded Quality/Fidelity System**
  to assure better adherence to the:
  — assessment system, and
  — the intervention program models

- ✓ **Funding Formulas with the Right Incentives**
  to encourage interest, adherence, and innovations
  in evidence-based programs

Early Childhood Education in Washington State: Recent Developments

- **Department of Early Learning (created 2006)**
- **State-funded voluntary ECE: full phase-in by 2018**
- **WaKIDS: pilot kindergarten assessment**
- **2011 Race to the Top $60 million grant to:**
  - Implement Quality Rating and Improvement System
  - Expand WaKIDS
  - Provide professional development incentives
  - Strengthen data system

MOA Prosecution

- Division of MOA Department of Law
- Misdemeanors Only
- Process 10,000-12,000 cases per year
- 14 attorneys, 18 staff
- Cases filed in District Court (People's Court)

MOA Misdemeanor Case Counts

Cases	2009	2010	2011
Received	11436	10693	10347
Filed	8169	7372	6632
Declined	2638	2658	2424
Diverted	629	663	1291

Declines v. Dismissals

Dismissal = Case filed with Court System, later dismissed

Decline = Case never filed with Court System

Percentage of Total Cases	2009	2010	2011
Dismissals	20.66%	21.09%	18.70%
Declines	23.96%	22.95%	25.90%

Accomplishments

- ADVPP (Anchorage Domestic Violence Prevention Project)
  - MPO has only dedicated DV unit in the State of Alaska
- DV Victim Safety and Bail Condition Enforcement
  - Multi-agency team includes APD, MOA Prosecution, MOA DHHS, AWAIC
- Grant Funded
  - Federal Money ended last year
  - Edward Byrne grant keeping project alive
  - Lack of funding may create gap before SOA E-Bail comes to Anchorage (and E-bail lacks victim piece)
- Anticipate adding Felony DV bail conditions in 2012

Other Successes

- PSN Federal Grant
  - Municipal Prosecutor cross-designated to prosecute in Federal District Court
    - Emphasis on drug and weapons cases
- Technology Upgrades/Streamlining Processes
  - Heading into a paperless future
  - Creating more consistency in filing decisions and contact with victims

Challenges

- Municipal assault ordinance deemed inadequate for State recidivist assaults
  - Rewrote ordinance to match State's A4
  - Must start over in building convictions on many offenders, particularly DV
  - Anchorage DA's Office and APD pulled together with MOA to create smoothest transition possible
- Substance Abuse, especially alcohol

Relationships with Other Criminal Justice Agencies

- Criminal Justice Working Group
- Other inter-agency groups
  - MAJIC (Multi Agency Judicial Information Consortium)
  - Prisoner Reentry Task Force
  - ACPRTF (Anchorage Community Police Relations Task Force)
  - Violent Crime Working Group
  - Anchorage DV and Sexual Assault Caucus, Fatality Review Team, Criminal Rules Committee

Inter-Agency Projects

- ADVPP
- 24/7 Sobriety Monitoring Pilot Project
- PSN grant with US Attorneys Office
- Crime Victims Rights Week
- DVAM (Dom Violence Awareness Month)

Community Prosecution

Prosecutors have a responsibility not only to prosecute cases but to:

- Solve Public Safety Problems
- Prevent Crime
- Improve Public Confidence in the Justice System

MOA and Community Prosecution

- Cooperation of APD who is ramping up Community Policing in tandem with us
- "Nuisance Crimes" lend themselves to community prosecution models
  - Example: Neighborhood Accountability Panels
- Other MOA departments can be brought to bear on problems
  - Code Compliance, Licensing

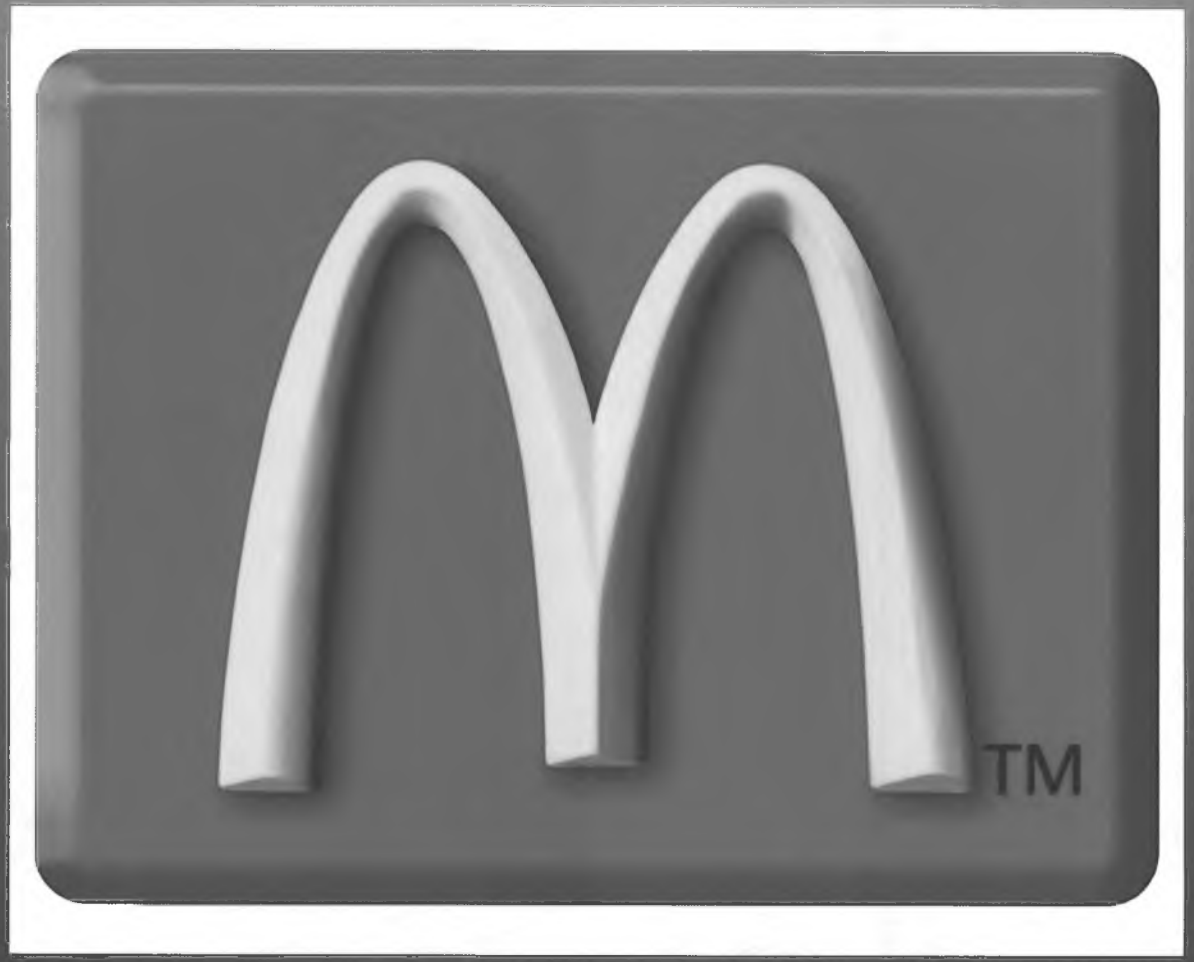
Community Prosecution- Next Steps for MOA Prosecution

- Align case assignments with APD districts, creating prosecutor assignments for 6 areas
- Begin getting community input on justice issues
- Work on specific problems like truancy

What Can Legislature Do?

- Give preference to funding inter-agency or multi-disciplinary projects that incorporate proven alternatives to incarceration
- Fund ADVPP program to avoid a gap in services to victims and loss of extremely effective tool in DV cases
- Fund other programs that can serve as tools across agencies and programs, such as 24/7

Thanks For Listening



MUNICIPALITY OF ANCHORAGE

Department of Health and Human Services 907-343-6718

Mayor Dan Sullivan

Anchorage Domestic Violence Prevention Project
December 2006 – November 2011

The Anchorage Domestic Violence Prevention Project (ADVPP) is a partnership between the Municipal Department of Health and Human Services (DHHS), the Municipal Prosecutor's Office (MPO), the Anchorage Police Department (APD), and the Abused Women's Aid In Crisis, Inc. (AWAIC). ADVPP goals are to: 1) increase offender accountability, and 2) increase victim safety. Serving victims throughout the entire state of Alaska, ADVPP uses Jaqueline Campbell's *Danger Assessment* matrix, and will evaluate the project as a prevention tool.

In 2002 DHHS was awarded **$599,035** by the U.S. Department of Justice, Office on Violence Against Women, to create a management information system to allow law enforcement to share information concerning domestic violence cases. Since then DHHS, on behalf of ADVPP, has received almost **$5,000,000** in federal dollars, culminating most recently (2011) in an **$889,607** grant from the Alaska Department of Public Safety, with Bureau of Justice Assistance funds, which ends in February 2013.

These monies have supported two (2) police detectives, three (3) MPO clerks, a victim advocate at AWAIC and a data analyst/project manager at DHHS. ADVPP is highly successful in meeting its goals:

- Since December 2006 ADVPP has tracked 10,152 misdemeanor domestic violence cases.
- Sixty-four percent (64%) of defendants are males; thirty-six percent (36%) are females.
- Charges and arrests for violations of conditions of release increased 77.5 %.
- ADVPP police detectives conducted 2,613 compliance checks. Compliance increased 21.9 % over the course of the grant; noncompliance decreased 28.2 percent. (Unknowns remained relatively stable.)
- Recidivism during the project period decreased 46.8 percent.
- A total of 7,124 victims have been served through ADVPP from 34 communities across the state: 1,936 victims by AWAIC, and 5,188 victims by the MPO. Over $380,000 in emergency financial assistance has been distributed to enhance victim safety, and 53 victims have been relocated to escape potentially lethal situations.
- The number of domestic violence homicides decreased 54.7 percent between 2000 and 2009, a statistically significant difference. The 5-year average number of domestic violence homicides decreased significantly between 2000-2004 and 2005-2009 (during which time ADVPP operated) (t-test; $p<.05$).
- In August 2010 the Police Executive Research Forum recognized ADVPP as a policing "best practice."[1]

Anchorage Domestic Violence Prevention Project II: Summary of Findings

November 2009

Municipality of Anchorage
Department of Health and Human Services
Human Services Division
Safety Links Program
(907) 343-6589
Published May 2010
Revised August 2010

Funding

Funding for the Anchorage Domestic Violence Prevention Project II was awarded to the Municipal Department of Health and Human Services by U.S. Department of Justice, Office on Violence against Women, Grant # 2005-WF-AX-0103. The project period was October 2005 to December 2009. This publication meets reporting requirements for the grant to provide data of the project.

Printing made possible by funding from the Municipal Department of Health and Human Services, Safety Links Program, May 2010.

AWAIC, Inc. Acting Director

A Letter from the ADVPP Partners

At the Municipality of Anchorage, we work hard to ensure the health and welfare of citizens. The Municipal Department of Health and Human Service (DHHS), Anchorage Police Department (APD) and Municipal Prosecutor's Office (MPO), along with the Abused Women Aid in Crisis, Inc. (AWAIC), have been working together for more than 20 years to address the problem of violence.

We acknowledge that domestic violence is both a serious public health issue and public safety concern. To address this issue, DHHS, APD, and MPO created the Anchorage Domestic Violence Prevention Project (ADVPP), made possible through grants from the U.S. Department of Justice, Office on Violence Against Women (OVW). This partnership includes AWAIC, the state's largest domestic violence shelter. ADVPP is a community level intervention and prevention strategy founded on data, research, public input, and collaboration with other public and private agencies.

ADVPP II combines the specialized services from each department and now, more than ever, victims of domestic violence can be assured that safety, support and resources are available in Anchorage.

This report presents finding from the successful ADVPP project. We are confident that the community, including policy makers and service providers, will find it a useful tool for sustaining and expanding upon the contributions that ADVPP has made to improve the criminal justice system.

We look forward to continuing to make a difference.

Executive Summary

The Municipal Department of Health and Human Services (DHHS) Safety Links Program provides this report on findings of the Anchorage Domestic Violence Prevention Project II (ADVPP II). ADVPP II is a partnership between DHHS, Anchorage Police Department (APD), the Municipal Prosecutor's Office (MPO), and Abused Women's Aid in Crisis, Inc. (AWAIC). The project design increases offender accountability through the criminal justice system and enhances victim advocacy. The project design is based on the public health model which creates and documents system change, analyzes data to determine success, and reports findings to the public. Data presented in this report covers from May 1, 2006 through October 31, 2009.

The ADVPP II system of service offers:

1. Two DHHS positions to administer the grant, create and maintain a database, collect and analyze data on the project, and report findings;

2. Two APD compliance officers housed at MPO who monitor offender compliance, make arrests, and issue arrest warrants;

3. Three MPO clerks who enter bail conditions and judgments into a database that is accessed by compliance officers, APD dispatch, and MPO attorneys; and,

4. One AWAIC case manager who provides information, referral, and emergency financial assistance to victims of domestic violence.

Data reflects the success of the ADVPP II design:

- The average number of arrest warrants served per month ***increased*** 123.7 percent;
- The number of days to serve an arrest warrant ***decreased*** 92.4 percent, from an average of 38 to 8 days;
- Defendants were 54.7 percent ***less likely*** in October 2009 to have a prior assault charge than defendants in October 2006;
- Arrests for violations of conditions of release (VCRs) ***increased*** 139.3 percent for compliance officers and 496.8 percent for all other officers;
- The average length of time to process a domestic violence case at MPO ***decreased*** 56.5 percent;
- The number of cases with convictions ***increased*** 27.1 percent;
- Defendants with protective orders ***increased*** from 1.8 percent to 5.5 percent;

- MPO clerks made 6,161 victim contacts with 2,361 victims (an average of 2.6 contacts per victim) to inform victims if the defendant was going to be out of jail or when hearings would occur; and,
- AWAIC assisted 1,264[1] victims of domestic violence and provided $181,135 in emergency financial assistance.

Demographics

Domestic violence cases were most likely to have a male defendant and female victim. The average age of defendants and adult victims was comparable to the average age of adults in Anchorage: 34 years for males and 32 for females. Child victims, however, tended to be much younger than children citywide. Also disproportionate was the race and ethnicity of defendants and victims when compared to the race and ethnicity of the general population. For example, only 7.8 percent of Anchorage is Alaska Native but a significant percentage of female defendants and victims were Alaska Native. Demographics are highlighted below.

Defendants in MPO cases:

- 64.7 percent male
- Repeat offenders were three times more likely male than female
- 40.4 percent white, 37.2 percent Alaska Native, 12.4 percent black
- White defendants were 69.8 percent male
- Alaska Native defendants were 51.5 percent male
- Black defendants were 79.9 male
- Mean age of 34 years

Adult victims in MPO cases:

- 59.2 percent female
- 41.6 percent white, 36.4 percent Alaska Native, 8.0 percent black
- White victims were 64.3 percent female
- Alaska Native victims were 74.8 percent female
- Black victims were 65.5 percent female
- Mean age of 31.0 years

[1] By December 31, 2009, the end of the grant term, the total number of victims served was 1,482, and a total of $212,236 emergency financial assistance was dispensed.

Child victims in MPO cases:

- 28.1 percent white, 43.4 percent Alaska Native, and 10.7 percent black
- Mean age of 6.2 years

Victims at AWAIC tended to have different demographic characteristics than victims in MPO cases:

- 96.3 percent female
- 51.7 percent white,16.6 percent Alaska Native, 12.6 percent black
- 64.6 percent were over 31 years of age
- 56.4 percent of children were over six years of age

Furthermore, a majority of victims at AWAIC also recorded that they were abused by their current or former intimate partner, had six or more incidents of domestic violence prior to the currently reported incident, and were victimized in their own home.

Recommendations

ADVPP II partners reviewed the ADVPP II system of services and offer the following recommendations:

- Seek funding to maintain this effective design of service.
- Provide compliance checks on felony domestic violence cases.
- Prioritize electronic dissemination of judicial orders and flagging in the Alaska Public Safety Information Network (APSIN) to ensure information is always current.
- Standardize protocols for 'no contact orders' by magistrates.
- Analyze felony domestic violence and sexual assault cases to capture trends.
- Analyze domestic violence cases that include sexual assault.
- Pursue funding to monitor compliance with judgments and related effectiveness of various treatment programs.
- Research elder abuse in Anchorage by analyzing APD reports and MPO cases, invite collaboration with the Alaska Adult Protective Services to enhance the understanding of risk factors.
- Evaluate relationship of interpersonal violence with alcohol and drug abuse.

Section I: Project Background and Partners

This section provides an overview of the ADVPP project.

- **Project Background**

  ADVPP I

  ADVPP II

  Special Note on ADVPP III

- **ADVPP Partners & Roles**

Project Background

The Anchorage Domestic Violence Prevention Project (ADVPP) is the result of a long partnership between the Department of Health and Human Services (DHHS) Safety Links Program, Anchorage Police Department (APD), Municipal Prosecutor's Office (MPO), Anchorage Women's Commission (AWC), and Abused Women's Aid in Crisis, Inc. (AWAIC).

In particular, the close working relationship with APD resulted in three domestic violence reports that yielded rich information to respond more effectively to domestic violence in Anchorage. The first report, ***Analysis of Anchorage Police Department Policy and Characteristics of Reported Domestic Violence: 1989-1992***, is one of the first in the nation that assessed officer response and factors leading to an arrest in domestic violence cases. The report also offered demographic information, a comprehensive review of the victim and offender within the context of the relationship and living situation, an assessment of children identified at the scene, types of injury, and the presence of alcohol. The second report, ***Analysis of Police Action and Characteristics of Reported Domestic Violence in Anchorage, Alaska Ten Year Study, 1989-1998***, continued the review of officer response, victim and offender demographics, and incident information. The third report, released in 2006, ***Domestic Violence Analysis, Incidents Reported to Police in Anchorage, AK, Fourteen Year Study, 1989-2002,*** revealed critical information related to child victims and offenders.

The DHHS Safety Links Program also has a long working relationship with AWAIC. In 1996 the program applied for and still receives U.S. Housing and Urban Development monies for the Moving Forward Program. The Moving Forward Program provides case management services and financial assistance to bridge victims from the shelter to safe and secure housing. This partnership with AWAIC allows both agencies to maintain an understanding of victims needs, particularly in regards to homelessness and financial assistance.

Other historical landmarks include a DHHS partnership with the Anchorage Women's Commission (AWC) in 2001 that established a Special Committee on Domestic Violence. The committee brought together local and state interpersonal violence prevention practitioners, criminal justice officials, policymakers, health and human service providers, survivors of interpersonal violence, and concerned citizens. The result of the Special Committee's work was ***The Domestic Violence Action Plan*** (DVAP). Safety Links worked with AWC, APD, MPO, and AWAIC to apply for grant monies to establish the Anchorage Domestic Violence Prevention Program. In 2002, the **Anchorage Domestic Violence Prevention Project I (ADVPP I)** was made possible through funding from the Office of Justice, Office on Violence Against Women Office.

In April 2003, in collaboration with community agencies, DHHS released the ***Action Plan for Interpersonal Violence Prevention*** summarizing the progress of DVAP

initiatives and including new initiatives related to sexual violence. One recommendation of this report was to create an interpersonal violence prevention data analyst position to continue data collection and analysis. With monies provided by APD an analyst position was established at DHHS but eliminated in 2006 as a result of budget cuts. Grant funding has supported all ADVPP data analysis.

ADVPP I

ADVPP I was implemented from September 1, 2002, through June 30, 2005. The primary goals of ADVPP were to hold domestic violence offenders accountable and to increase victim safety. ADVPP I provided an opportunity to assess how the system of services in Anchorage could improve to serve domestic violence victims. ADVPP I staff surveyed 123 victims to determine need and gaps in services. Focus groups were held with AWAIC to confirm the survey findings. ADVPP I offered recommendations to create an integrated system of service. These recommendations were implemented through ADVPP II in a partnership with public health, police, law enforcement, and victim advocacy.

ADVPP I research included quantitative data (survey findings) and qualitative data (focus groups). Identified risk factors included:

- Defendants not complying with bail conditions;
- Law enforcement working with no or outdated information on bail conditions;
- Law enforcement having insufficient staff to monitor offender compliance;
- Domestic violence victims lacking financial resources for emergency housing, medical care, food, or relocation to safety;
- Victims in court cases frequently recanting their testimony against the defendant;
- Victims seldom attending court hearings due to fear, lack of transportation, child care, or notification to attend the hearing; and,
- Administrative staffing insufficient to research and analyze data, track service needs of victims, related system changes, and strategy implementation.

ADVPP II

Based on ADVPP I recommendations and new data analysis from APD records, DHHS applied for and received funding for ADVPP II. The project was active from May 1, 2006, through December 31, 2009, and created a new system of service. This system added a database, resources in the criminal justice and victim advocacy systems, and an analysis of the system of service.

ADVPP II created a comprehensive system of service by adding:

1. Two DHHS positions to administer the grant and collect and analyze data on the project;

2. Two APD officers housed at MPO to monitor offender compliance;

3. Three MPO clerks at the Prosecutor's Office to enter bail conditions and judgment information into a database for APD dispatch, compliance officers, and MPO victim support staff; and,

4. One AWAIC case manager to provide emergency financial assistance to victims of domestic violence.

ADVPP II has been very successful holding domestic violence offenders accountable and increasing victim safety within the Municipality of Anchorage. It is important to integrate and expand the system throughout Alaska for three reasons. One, according to the State Council on Domestic Violence and Sexual Assault STOP Implementation Plan, "Our rural communities endure an unacceptable level of violent crime, which is exacerbated by many rural factors, making it more difficult for rural women to escape abusive relationships." Two, because ADVPP II is located within the jurisdiction of the Municipality, it addresses solely misdemeanor cases. Similar protocols for more serious felony cases are critical to reducing all domestic violence. Third, integrating project objectives with a statewide program enables combining state and local resources through economies of scale.

Special Note on ADVPP III

To address the concept of replicating ADVPP statewide, partners created ADVPP III and received $750,000 from the Office on Violence Against Women's FY 2008 Grants to Encourage Arrest Policies and Enforcement of Protection Orders Program. ADVPP III is a collaboration with the Multi-Agency Justice Integration Consortium (MAJIC) and the Alaska Court System. It works to centralize handling of domestic violence cases and expand the system statewide. Included would be current conditions of release (CORs), judgments, and protective orders for *all* defendants in domestic violence cases, both misdemeanor and felony. Eventually the database will be expanded to include other crimes besides domestic violence. ***Unfortunately, federal funding for ADVPP III expires August 31, 2010, and to date no revenues have been identified to pick up the system of service.***

Through ADVPP III, AWAIC assists domestic violence victims statewide with information, referral, and financial assistance. Many victims come from across the state to the city of Anchorage to access critical care and emergency services. Communities that have received assistance include Anchor Point, Bethel, Chivak, Dillingham, Fairbanks, Homer, Juneau, Kenai, Ketchikan, Net Island, Sand Point and Scammon Bay.

ADVPP Partners and Roles

The strategy for service relies on a strong partnership between agencies. The partner agencies work under ADVPP II to: 1) create and maintain a databank that connects law enforcement and prosecution to court conditions; 2) monitor defendant compliance with court orders; 3) provide victims with emergency support and financial assistance; and 4) monitor the success of the project. ADVPP is a complex project in which each component compliments and supports each other element. The collaborative approach allows each agency to accomplish more than they could with each solitarily agency pursuing their individual missions.

Each partner agency provides a unique role to accomplish the goals of the project as outlined in Table 1. Those partners include:

- Department of Health and Human Services (DHHS)
- Anchorage Police Department (APD)
- Municipal Prosecutor's Office (MPO)
- Abused Women's Aid In Crisis (AWAIC)

Figure 1: Interagency Coordination of ADVPP II

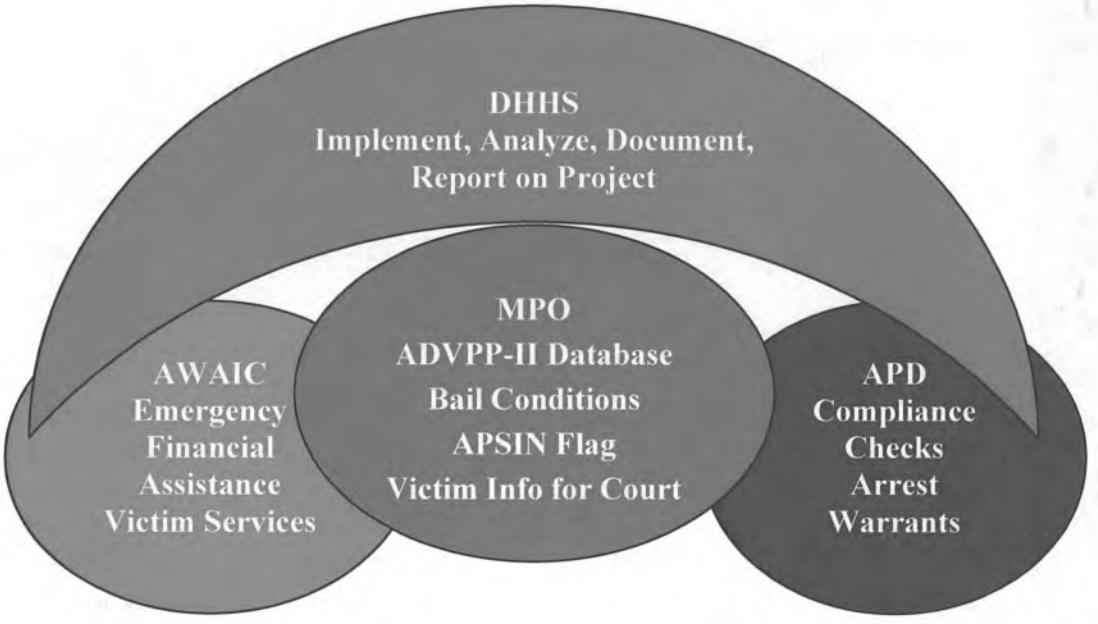

Table 1: Partnerships for ADVPP II

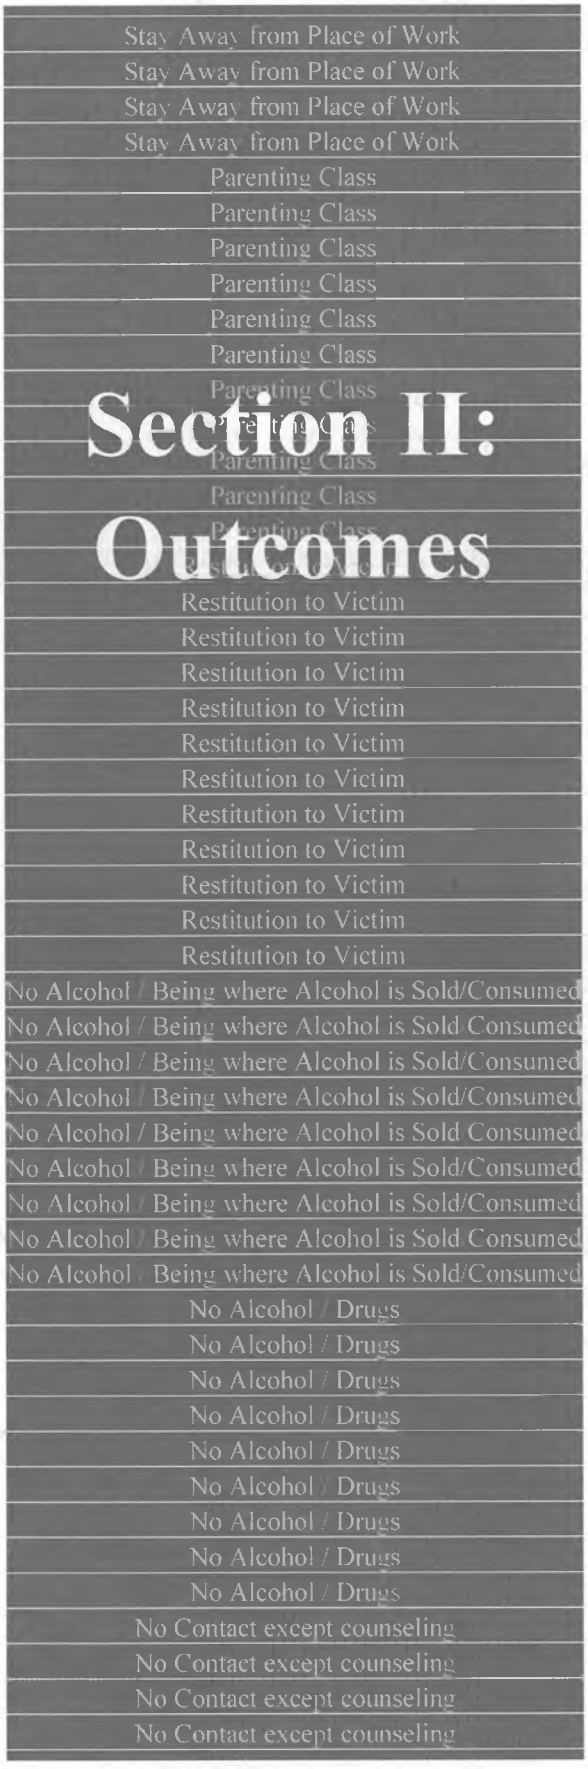
	DHHS	APD	MPO	AWAIC
Agency Role	Public Health Model (Prevention)	Law Enforcement	Criminal Justice System	Victim Advocacy
Objectives	Design, Coordinate, Implement, Data Collection, Report on Systems & Strategies	Compliance and Enforcement of Orders, Issue Warrants and Make Arrests	Maintain Databank, Enter Data to Track Defendants' Court Orders, Support Victims in Hearings	Provide Information & Referral, Emergency Financial Assistance for Victims
Positions	1.0 FTE Project Coordinator 1.0 FTE Data Analyst	2.0 FTE Domestic Violence Compliance Officers	3.0 FTE Court Clerks	1.0 FTE Intake Specialist/Emergency Financial Assistance Funds
Budget	$216,781/year	$286,210/year	$261,452/year	$150,923/year $68,134/year emergency financial assistance
Total Award	$781,335 (includes administrative costs)	$661,654	$504,241	$452,770
Accomplishments	Wrote/ managed $4 million ADVPP grants, designed a tracking database, developed a communication system for law enforcement, working to bring project statewide.	Performed 1,393 compliance checks, arrested 215 defendants in VCRs.	Tracked 5,110 misdemeanor domestic violence cases that involved 22,569 court hearings, 3,890 defendants, and 7,642 victims.	Gave direct support to 1,482 individuals, 362 comprehensive needs assessments and $204,402 in emergency financial aid. by December 31, 2009.



Section II: Outcomes

This section provides an overview of agency function and outcomes.

  - **Intensive Case Management Services**
  - **Emergency Assistance**
  - **Demographics**

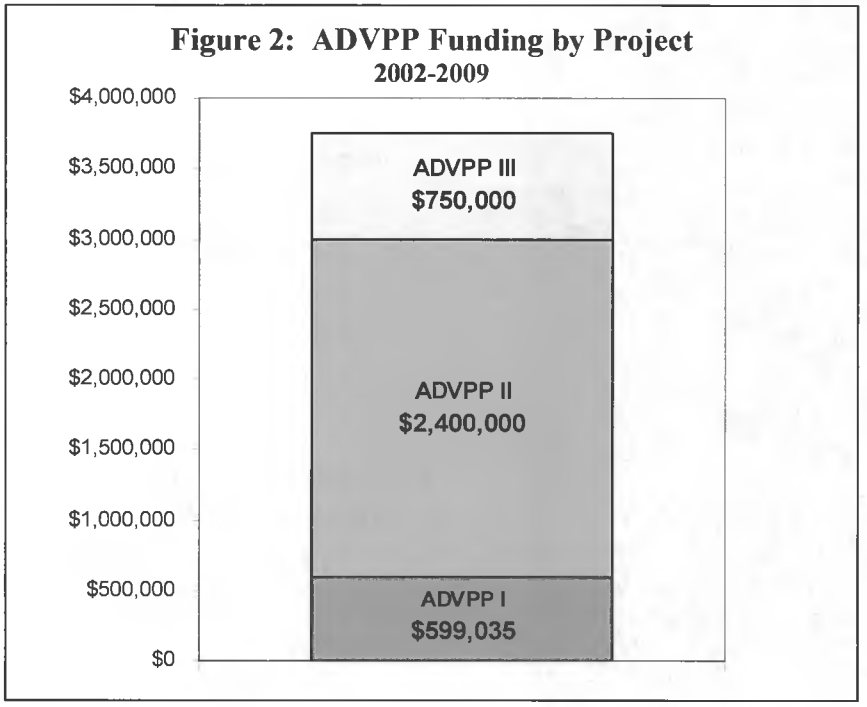
Department of Health and Human Services (DHHS) Strategies

The role of DHHS is to convene partners and facilitate collaboration between agencies with differing missions. For example, AWAIC works to safeguard victims from contact with the perpetrator whereas MPO desires victim participation in court proceedings against the perpetrator to enhance prosecution. Through joint discussions and collaborative project design, individual and collective missions are accomplished under this project.

DHHS Safety Links program has been successful applying for and receiving federal funds to implement ADVPP. To date, Safety Links has brought close to $4 million into Anchorage for domestic violence prevention programming (Figure 2).

DHHS is now collaborating with the Multi-Agency Justice Integration Consortium (MAJIC) and the Alaska Court System to automate and expand Anchorage's successful data management system throughout the State of Alaska.

Figure 2: ADVPP Funding by Project
2002-2009



Project Coordination

DHHS provided oversight of ADVPP to ensure timely and effective project development and completion. In creating ADVPP, DHHS worked with partners to assess needs, set goals and objectives, develop operational budgets, plan work calendars, and coordinate schedules. In managing the project, DHHS monitored, reviewed, and evaluated progress; coordinated and attended meetings; and established and maintained internal and external

contacts. DHHS kept ADVPP project records and maintained all accounting and reporting files. As the lead agency for ADVPP, DHHS served as a liaison between agencies and served as a resource by providing advice, research, analysis, and reporting.

DHHS created interagency agreements with each of the agencies to ensure clarification of roles and funding. DHHS worked with MPO to design the ADVPP II database to capture information on victims, offenders, relationships, children, type of offense, charges, weapons, location of offense, and data fields for judicial conditions (See Appendix A). A close working relationship with the state Department of Public Safety was initiated to create an Alaska Public Safety Notification (APSIN) flag for defendants. A field test was used for three months to ensure ADVPP compliance officers, APD dispatch, patrol officers, and prosecution were receiving accurate and up-to-date information from the database.

The project coordinator works with the Safety Links Program Manager to facilitate all parts of ADVPP and ensure the goals of the project are being met. The coordinator prepares all records of project activities, oversees and ensures timely processing and delivery of required materials, verifies and analyzes the accuracy of data and information generated by the project, and resolves any discrepancies or problems. The data analyst provides analytical project review to support evidence based practices. The analyst also compiles, analyzes and describes data to document project outcomes. The project is housed under the Safety Links Program with staff experience spanning over twenty years in the field of interpersonal violence prevention.

Project Outcomes

DHHS collected, analyzed, disseminated, and monitored ADVPP data. Quantitative and qualitative data provided the background for the prevention model, supported grant funding opportunities, and allowed for project expansion. A key element of ADVPP was a database—designed by DHHS in collaboration with partner agencies—to be used as a tool for MPO and APD to track defendants and for DHHS to monitor project objectives and outcomes. The data fields, as provided in Appendix A, were shared with the Alaska Court System as part of ADVPP III.

DHHS reported project outcomes, such as those found in this report, by using ACCESS, Excel, and SPSS data systems. For the analysis of data from the ADVPP database, ACCESS queries linked MPO and APD information as needed. Data was exported into Excel to be cleaned and coded. Unduplicated data was then exported into SPSS to be statistically analyzed, for example cross-tabulations and frequencies. Statistical results from SPSS were exported back into Excel to be graphed and tabulated for this report. Regression analysis will analyze relationships between gender, ethnicity, offense, and sentencing in the subsequent report.

Project Data

DHHS received project data from MPO, APD and AWAIC, with the ADVPP II database as the primary data source. The database contained 100-percent datasets for all municipal misdemeanor domestic violence cases, charges, defendants, hearings, conditions, sentences, compliance checks, and involved individuals (such as victims and witnesses). AWAIC datasets were monthly aggregates for demographics, incidents, victim needs, and program results. APD officers also provided a separate Excel spreadsheet regarding compliance checks on incarcerated offenders.

The data run for this report was performed on November 18, 2009 to encapsulate data from May 1, 2006 through October 31, 2009. In this report, the date range for MPO, APD, and AWAIC data is generally noted as 2006 to 2009 for ease of readability. However, the datasets vary slightly by month from which the project started for each partner agency. For example, AWAIC's Intake Specialist began serving clients in May 2006, MPO began recording cases in October 2006, and APD officers began compliance checks in December 2006.

Confidentiality

A strict protocol was followed to ensure the confidentiality of the report materials. All data collected from MPO and APD are maintained on a password protected computer system only available to the Safety Links Program domestic violence analysts. Outcomes in this report are presented in aggregate form and do not provide specific information related to an individual person, case, officer or action in each case in conformance with the 2005 reauthorization of Public Law 103-322: *The Violence Against Women Act of 1994 (VAWA)*, Title IV, sec. 40001-40703 of the Violent Crime Control and Law Enforcement Act of 1994 HR 3355.

The Safety Links Program Manager, and ADVPP II coordinator, clerks, and analyst were required to pass an extensive background check conducted by APD prior to access to data, similar to APD's background check for non-sworn personnel. Individual names, characteristics of a case, or personal information related to victims or suspects were not shared with anyone outside the approved research staff.

Anchorage Police Department (APD) Enforcement

In most cases, APD dispatch receives a call concerning domestic violence and notifies a police officer to respond on scene. The responding officer assesses the incident for probable cause and makes an arrest if a domestic violence offense occurred. The officer then transports the arrestee to jail, where a magistrate delivers bail requirements and CORs. The officer issues an arrest warrant if the offender has left the scene.

ADVPP II is initiated when court conditions are outlined for the defendant. MPO clerks enter this data into a databank which is accessed by two full-time compliance officers who conduct compliance checks on defendants out on bail with CORs. Such defendants often have court orders such as no contact with the victim, staying away from alcohol, remaining in the presence of a third party custodian, and attending life skills classes. The officers prioritize compliance checks according to the risk of violations of conditions of release (VCRs), using information from MPO and their own investigative experience. They visit homes and other places at unexpected hours in unmarked cars wearing street clothes. The officers also serve outstanding arrest warrants when possible.

Aside from the two compliance officers, APD dispatch also has access to information in the database and routinely informs patrol officers of the offenders' court conditions. This is outlined more fully in the MPO section.

ADVPP II offers critical information to victims through APD. As required by Alaska Statute (AS) 18.65.520, officers read domestic violence victims their rights and provide the *Anchorage Community: Emergency and Advocacy Resources*, also referred to as the *Little Blue Booklet (LBB, s*ee Appendix B). The LBB, created by DHHS and APD, contains information on victims' rights along with other information about essential services, resources, and phone numbers for assistance within Anchorage. On the back page of the booklet is the contact information for ADVPP II's Intake Specialist at AWAIC.

DHHS has also made available, through ADVPP II funding, the statutory information in Spanish, Samoan, Hmong, Tagalog and Korean. The result was the ADVPP Language Line and the Little Green Booklet (LGB, Appendix B), a bi-lingual companion resource. The Language Line provides statutory information orally through a telephone recording service. The LGB contains the mandated statutory information as well as additional information on key services for victims of domestic violence including domestic violence protective orders and immigrant issues.

Domestic Violence Reports and Cases

Between 1999 and 2009, APD received over 44,000 reports of domestic violence, at an average of 4,000 reports per year or over 12 reports per day.

Between 2008 and 2009 the annual number of reports increased 46.4 percent (Trend 1). Factors related to the economic conditions of increased unemployment and homelessness probably account for much of this increase, as APD reports no changes in the categorization of cases.

Trend 1: Number and Rate of Domestic Violence Reports 1999-2009

Year	Number of Reports	% Change from Prior Year	Rate: Reports per 100,000 Population	% Change from Prior Year	ADVPP/MPO Cases	% Change from Prior Year
1999	4,097	-	1,592	-	-	-
2000	3,981	-2.8%	1,535	-3.6%	-	-
2001	3,925	-1.4%	1,482	-3.5%	-	-
2002	4,091	4.2%	1,527	3.0%	-	-
2003	3,906	-4.5%	1,431	-6.3%	-	-
2004	3,582	-8.3%	1,290	-9.9%	-	-
2005	3,710	3.6%	1,335	3.5%	-	-
2006	3,816	2.9%	1,349	1.0%	-	-
2007	3,955	3.6%	1,393	3.3%	1,788	-
2008	3,659	-7.5%	1,310	-6.0%	1,978	10.6%
2009	5,355	46.4%	1,843	40.7%	2,723	37.7%

Source: Number of Reports from the APD Records Management System; Population data from Alaska Department of Labor and Workforce Development.

In 2007, 45.2 percent of reports to APD led to misdemeanor domestic violence cases processed by MPO. This increased to 54.1 percent of reports in 2008 and 50.8 percent of reports in 2009. Cases are discussed further in the following section on the Municipal Prosecutor's Office (MPO).

Compliance Checks (N=1,858)

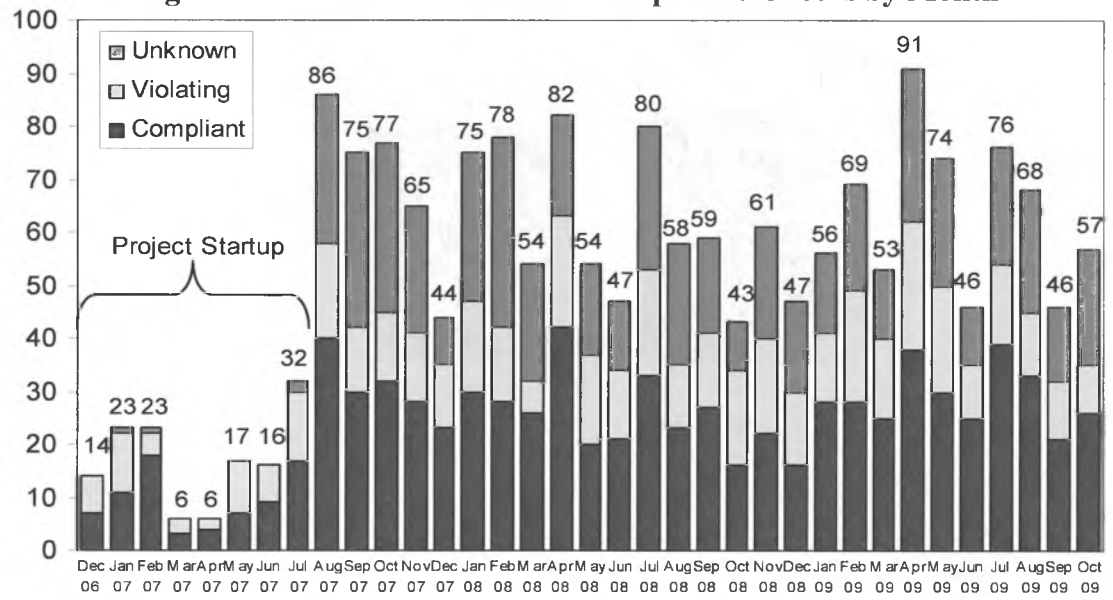
Compliance checks are part of a new system of domestic violence prevention and enforcement service in Anchorage. The period from December 2006 to July 2007 reflects preliminary procedures during which time APD officers developed protocols for conducting compliance checks and coordinating with MPO. Accurate trends are available beginning in August 2007 (Trend 2).

Trend 2: Compliance Checks by Project Period

Project Period	Dates	# Compliance Checks	Average Checks per Month
Startup	December 2006-July 2007	137	17.1
Year 1	August 2007-July 2008	817	68.1
Year 2	August 2008-July 2009	733	61.1
Year 3	August 2009-October 31, 2009	171	57.0
Total	December 2006-October 31, 2009	1,858	53.1

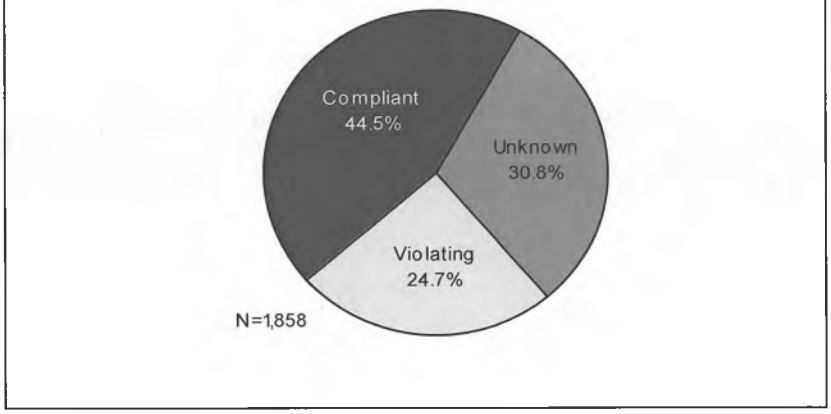
Two officers performed 1,858 compliance checks involving 1,176 defendants. Excluding the startup period, officers made an average of 64 checks per month (Figure 3).

Figure 3: Number and Status of Compliance Checks by Month



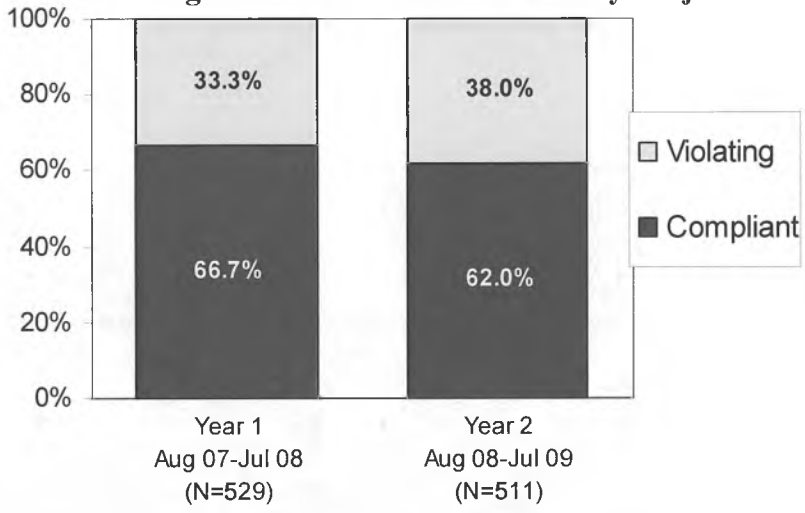
Compliance checks were performed in 1,018 municipal cases, averaging 1.5 checks per case. Figure 4 shows almost half (44.5 percent) of checks had defendants who were compliant, 24.7 percent had defendants who were violating CORs and 30.8 percent had defendants with an unknown compliance status (nobody home, no answer at the door, or residence vacated).

Figure 4: Violation Status by Type



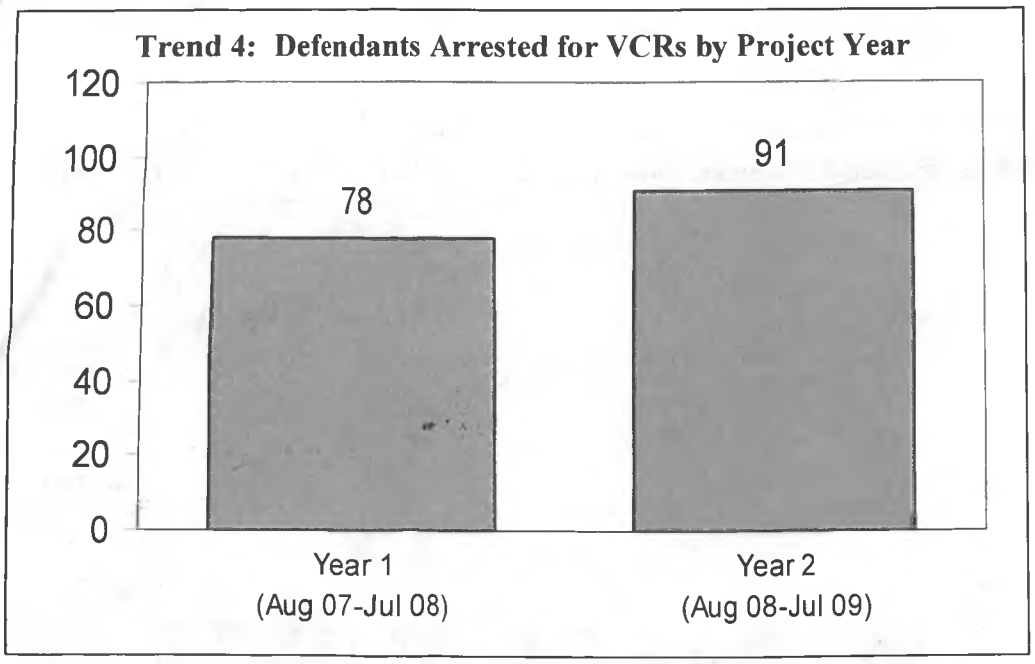
ADVPP compliance officers were increasingly able to locate defendants who were violating their CORs. Of all compliance checks where the victim and/or defendant was home (compliance was known) officers found 33.3 percent violating. During the second year, officers found 38.0 of defendants with known compliance status violating (Trend 3).

Trend 3: Change in Known Violation Status by Project Year

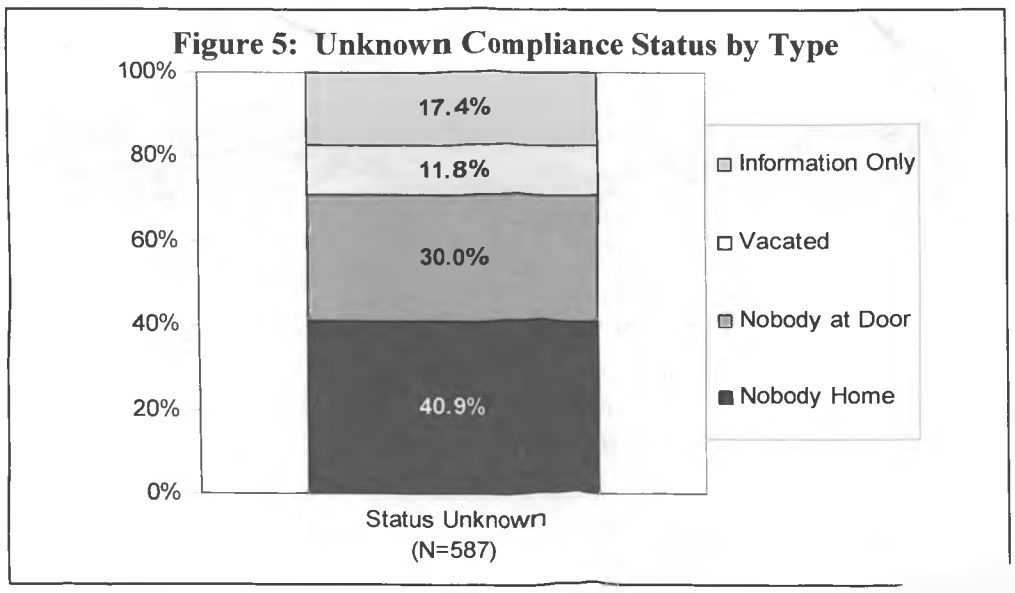


During compliance checks, the ADVPP officers directly arrested 233 defendants for VCRs, issued 11 warrants for arrest, and sent 20 notices of non-compliance to the

tor. Arrests increased 16.7 percent between Year 1 and Year 2 of the project, 8 arrests to 91 arrests (Trend 4).



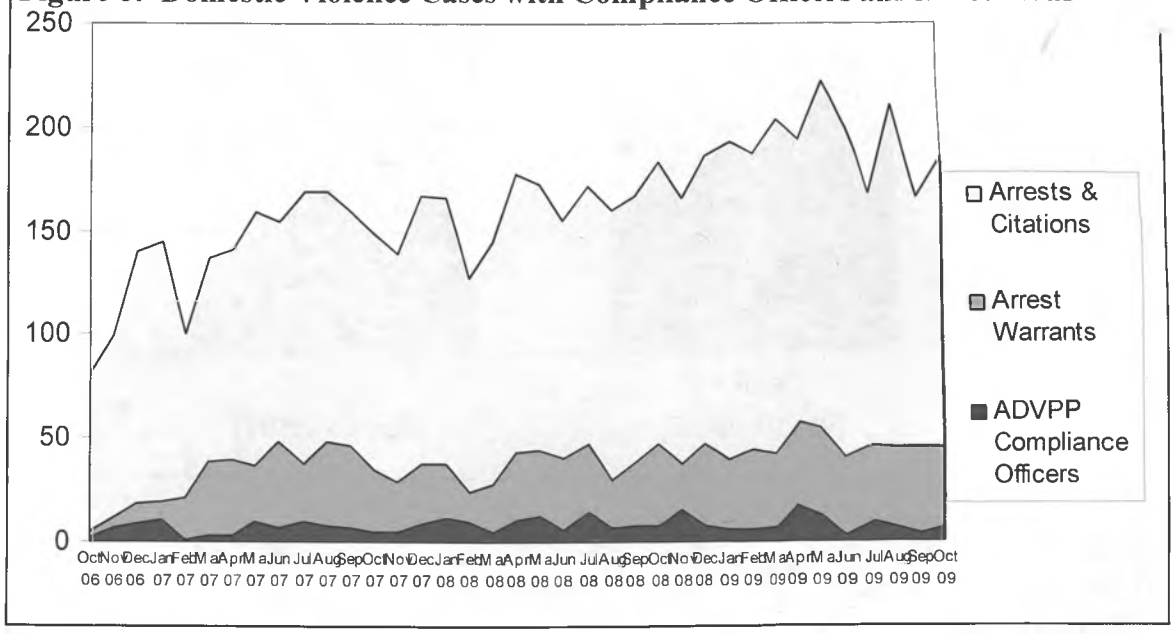
One-third of all checks had an unknown status. Of these, 40.9 percent had no one home, 30.0 percent had no answer at the door but an appearance that someone was at home, and 11.8 percent had moved from the residence (Figure 5). More dangerous offenders often move the victim out of an apartment to evade compliance checks. There was a slight increase in vacated properties over time that may be, in part, due to the increase in publicity and awareness of compliance checks.



Warrant Service (N=1,124)

ADVPP compliance officers increased the number of MPO cases, both through apprehending defendants who were violating their bail conditions and by serving more arrest warrants more quickly (Figure 6).

Figure 6: Domestic Violence Cases with Compliance Officers and Arrest War

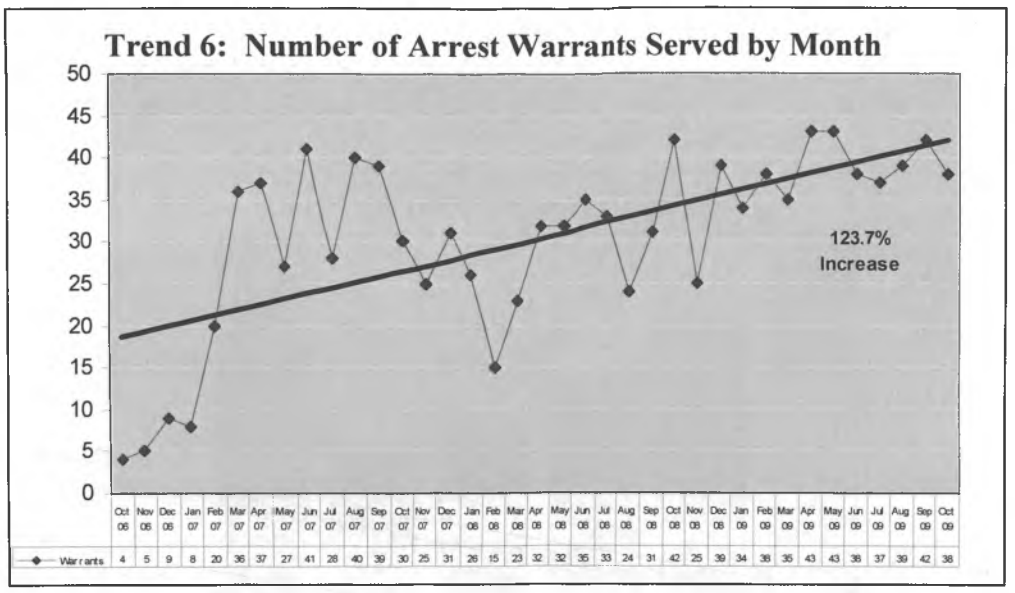


During the startup of ADVPP, officers served 215 warrants at an average of 38.6 days per warrant. During the second year of the project, officers served 429 warrants at an average of 18.1 days. By October 2009, it took only an average of 8.4 days to serve a warrant (Trend 5).

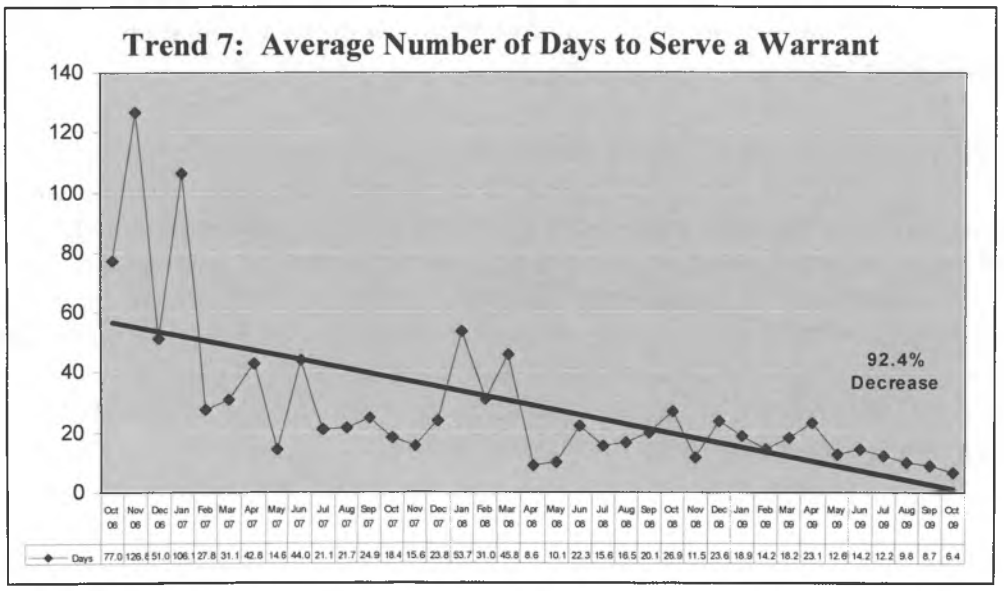
Trend 5: Arrest Warrants by Project Year

Project Period	Dates	Arrest Warrants	Average Days to Serve Warrant
Startup	October 2006-July 2007	215	38.6
Year 1	August 2007-July 2008	361	23.0
Year 2	August 2008-July 2009	429	18.1
Year 3	August 2009-October 2009	119	8.4
Total	October 2006-October 2009	1,124	22.6

The average number of warrants served per month increased 123.7 percent from October 2006 through October 2009 (Trend 6).

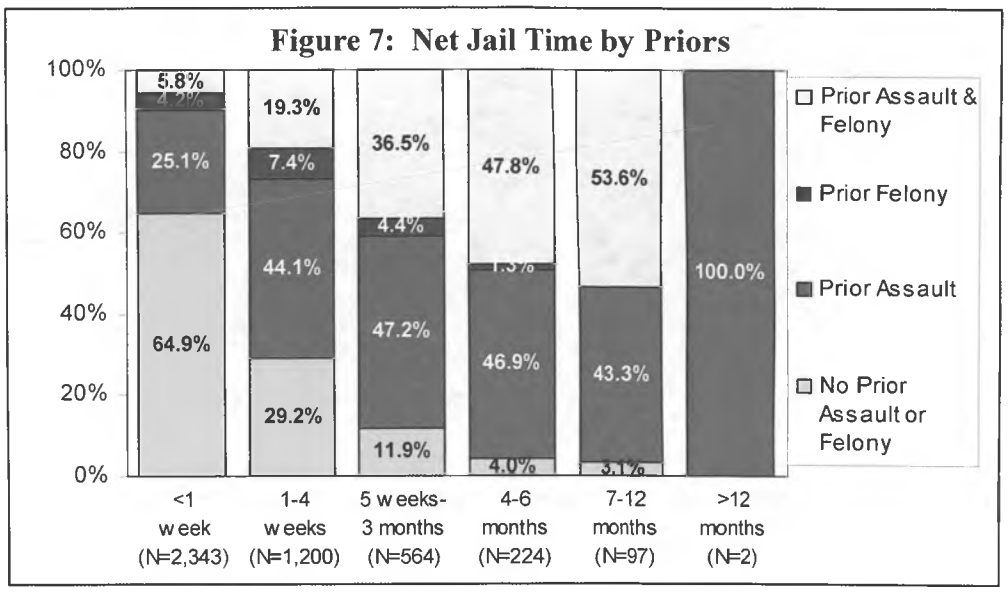


There was a 92.4 percent decrease in the average number of days APD took to serve a warrant in domestic violence cases, from an average of 39 days to 8 days (Trend 7). Specifically, after the startup period, arrest warrants went from an average of 38 days to 23 days the first year, 18 days the second year, and 8 days the third year.



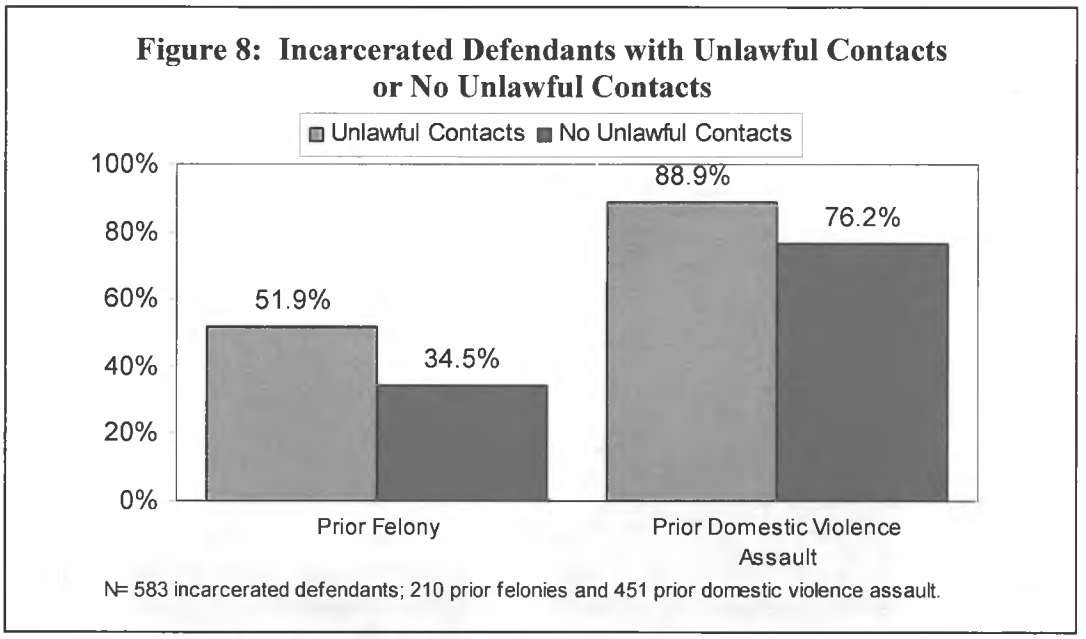
Incarcerated Offenders

More serious offenders (as evidenced by previous felony or domestic violence assault cases) received longer jail sentences. The longer the net jail time received (sentenced minus suspended jail time), the higher the percentage of prior domestic violence assault and felonies (Figure 7). This pattern held for both male and female defendants.



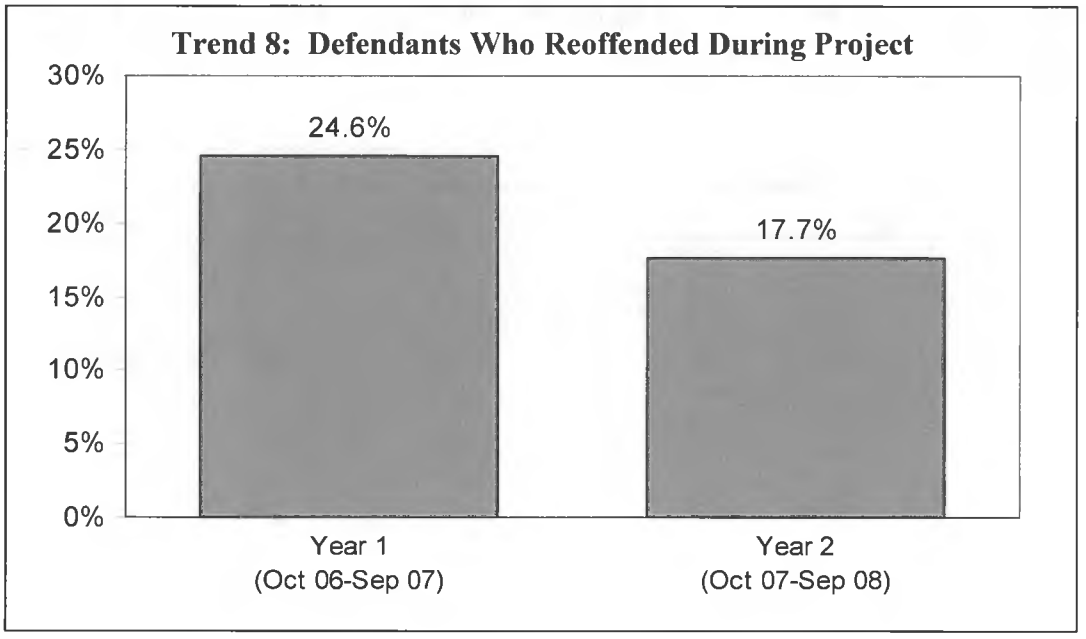
Incarcerated defendants with histories of violence (felonies and/or prior domestic violence assaults) were more likely to have unlawful contact (violating a "no contact' order) with their victims.

Unlawful contacts occurred via telephone calls or visitation at the jail by the victim. Incarcerated defendants who had unlawful contacts with their victims had higher percentages of prior felonies or prior charges of domestic violence assault than those who did not make unlawful contacts. Over half, or 51.9 percent, of incarcerated defendants who made unlawful contacts had prior felonies compared to 34.5 percent of incarcerated defendants who did not make unlawful contact. Similarly, 88.9 percent of incarcerated defendants who made unlawful contacts had prior domestic violence assault charges whereas only 76.2 percent of incarcerated defendants who did not have unlawful contacts had prior domestic violence assault charges (Figure 8).



Impacts on Domestic Violence

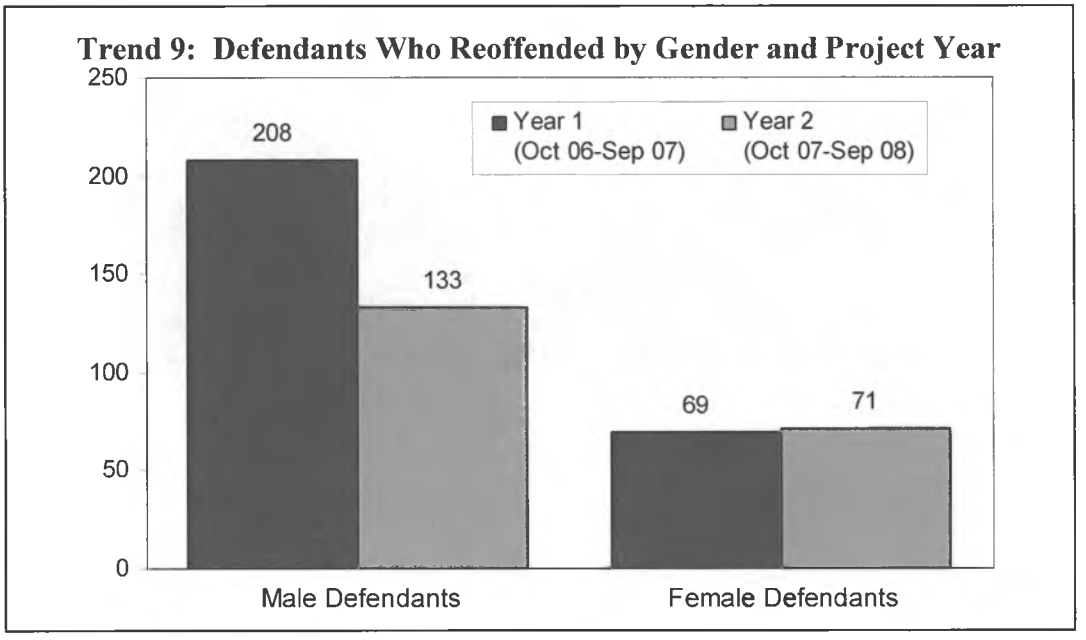
One quarter of defendants who offended during the first year would offend at least one more time during the project term. During the second year, the rate of those who would reoffend dropped to 17.7 percent of defendants (Trend 8).[2]



Those who did not offend again were male defendants. The number of males who would reoffend decreased 36.1 percent—from 208 defendants to 133 defendants—while the

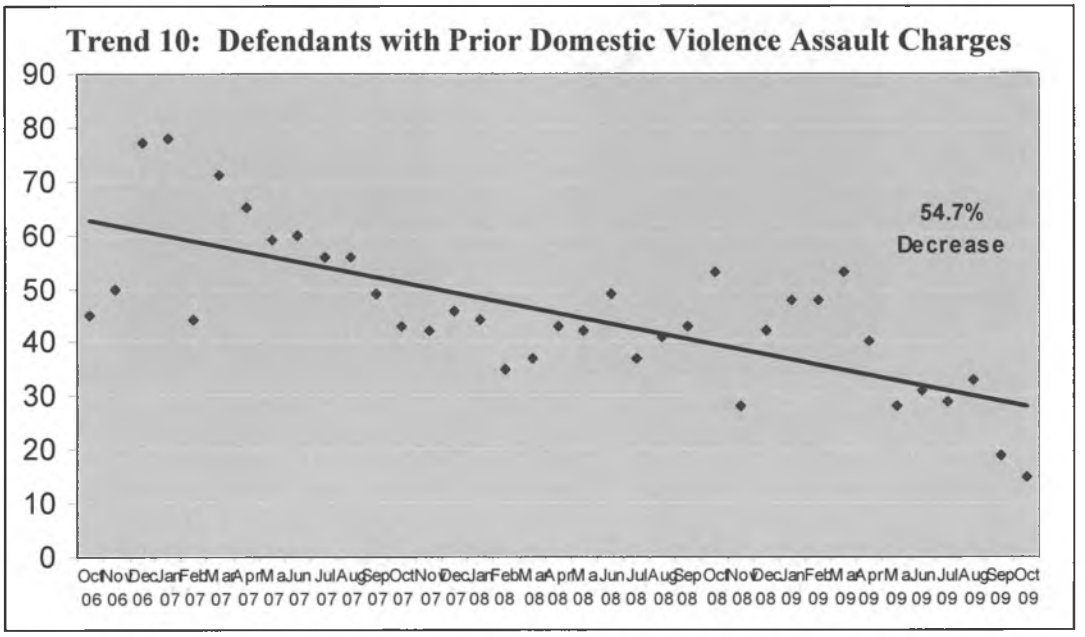
[2] Data range ends September 2008 as data shows most ADVPP defendants will reoffend in one year.

number of females who would reoffend remained at around 70 defendants each year (Trend 9).



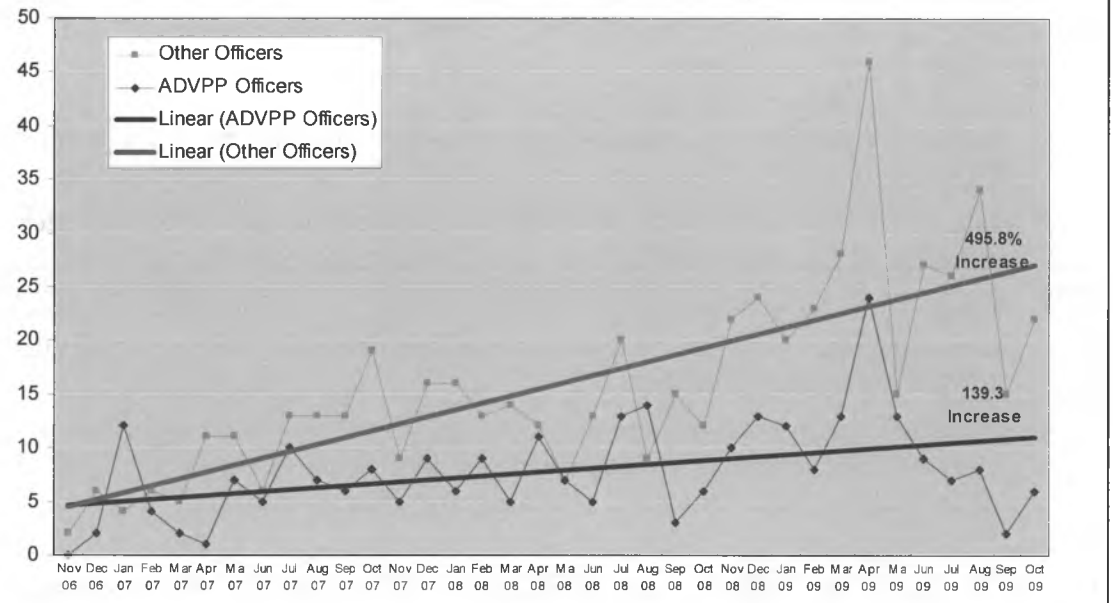
Prior Assault Charges

On average defendants with prior domestic violence assault charges made up 48.9 percent of all defendants. However ***in October 2009 defendants were 54.7 percent less likely to have a prior assault charge than were defendants in October 2006, the beginning of the grant (Trend 10).***



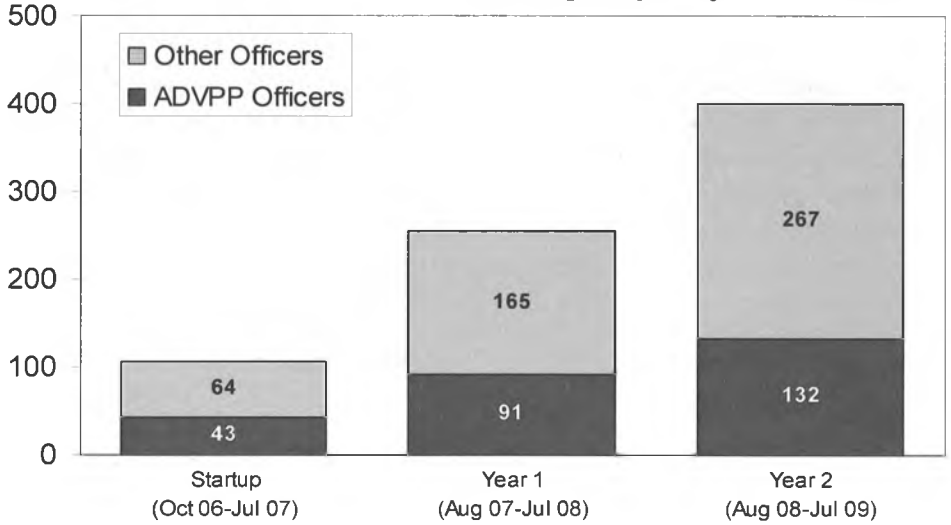
ADVPP II officers and the APSIN flagging system provided for an increase of arrests with charges for VCRs. ***Between 2006 and 2009, compliance officers saw a 139.3 percent increase from around five violations per month to over 10 violations per month. APSIN provided for an increase of 495.8 percent in arrests for VCRs by officers other than ADVPP compliance officers (Trend 11).***

Trend 11: Number of VCRs per Month Charged by ADVPP and Other Officers



Arrests for VCRs increased from 107 arrests during the startup period to 299 arrests two years later (Trend 12).

Trend 12: Number of VCRs Charged by Project Year



Municipal Prosecutor's Office (MPO) Track Defendants and Bail Conditions

The backbone of criminal justice service is housed at MPO through a databank of offender information accessible by law enforcement and municipal prosecution. MPO clerks attended municipal domestic violence hearings and entered case information into the ADVPP II database to include bail conditions and defendant and victim demographics. The MPO clerks:

- Tracked all hearings for misdemeanor domestic violence offenses and document CORs.
- Entered CORs into the ADVPP II database and a flag into APSIN to alert law enforcement that defendants are out on bail from municipal court.
- Along with prosecutors, provided the ADVPP II compliance officers with information regarding cases, defendants, CORs and potential violations to assist with their compliance checks.
- Contacted victims to inform them of their rights, pass on information from attorneys, and respond to inquiries regarding court hearings and procedures, transportation issues, childcare, visitation, and other queries.

The clerks flagged the defendant in APSIN, the database used by all law enforcement throughout Alaska to run background checks on any suspect, whether for a speeding violation or homicide. If police apprehend the defendant for any reason—domestic violence or otherwise—the flag notifies the officer that the defendant has an open domestic violence case in Anchorage. The officer then calls APD dispatch for further information and related CORs. If the defendant is violating his or her CORs, such as being with the victim when there is a "no contact" order, the police arrest and remand the defendant into custody.

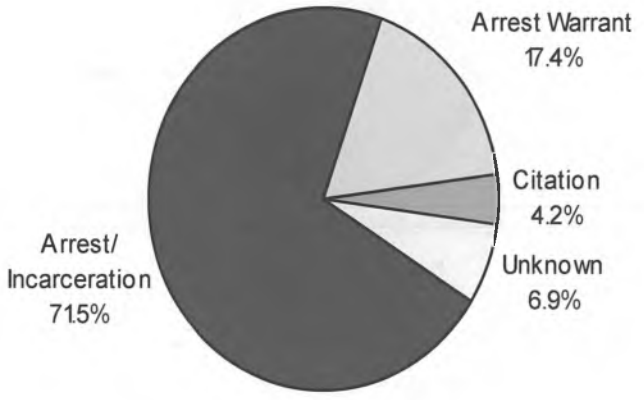
MPO clerks communicated with victims regarding their cases and rights, and passed victim information to their assigned attorneys. Clerks referred clients to AWAIC, the Alaska Women's Resource Center, the State Office of Victims' Rights, the Violent Crimes Compensation Board and Victim Information and Notification Everyday. Clerks also communicated with the Department of Corrections and informed victims when a suspect was released on bail or a sentence had been served.

The following sections provide data regarding the 6,015 cases, 25,803 hearings, 9,686 charges, 7,642 victims, and 3,887 defendants that ADVPP II clerks entered into the database system.

Cases (N=6,015)

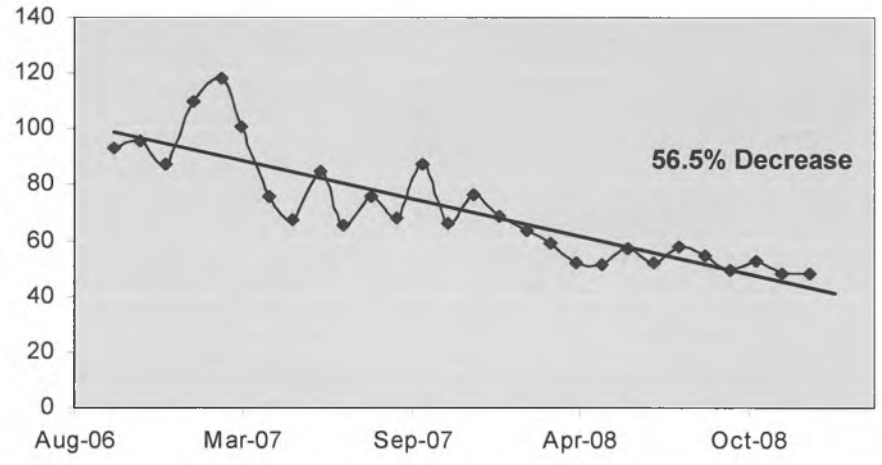
MPO entered and tracked a total of 6,015 cases. Two-thirds of cases entered the court system through the arrest and incarceration of the defendant. In 17.4 percent of cases the defendant received an arrest warrant and 4.2 percent received a citation (Figure 9).

Figure 9: Cases by Arrest Type



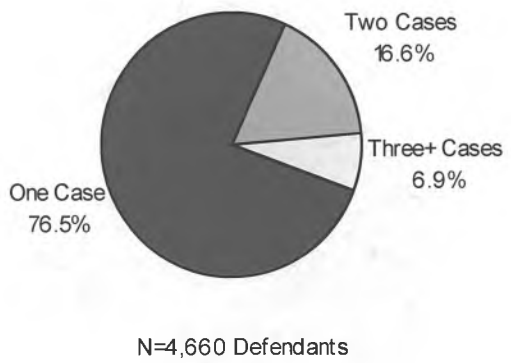
The length of cases with judgments was determined by the number of days between the first and last hearing. The average length of cases during the first year of the project (October 2006 to October 2007) was 87 days, with longest case at 118 days. ***The average length of time to process a case decreased 56.5 percent over the project period (Trend 13.*** To avoid biasing trend analyses with disproportionate numbers of short cases near the end of the sample period, data from the last four months (February to May 2009) were excluded.

Trend 13: Average Length of Cases with Judgments (N=4,434 Cases)



Most defendants (76.5 percent) had only one case during the project period; 16.6 percent had two cases (Figure 10). ***Approximately 326 individuals, or 6.9 percent, had three or more cases.***

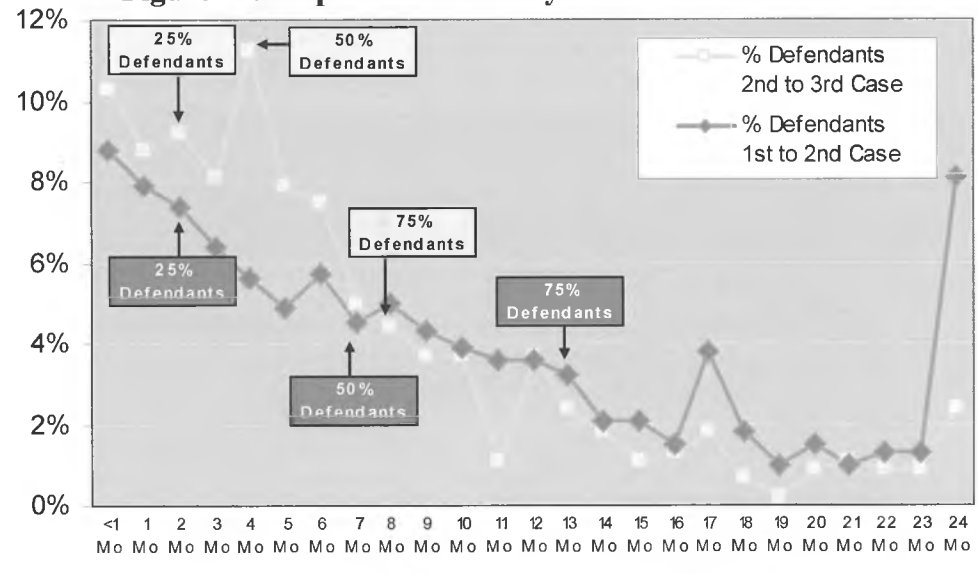
Figure 10: Number of Cases per Defendant



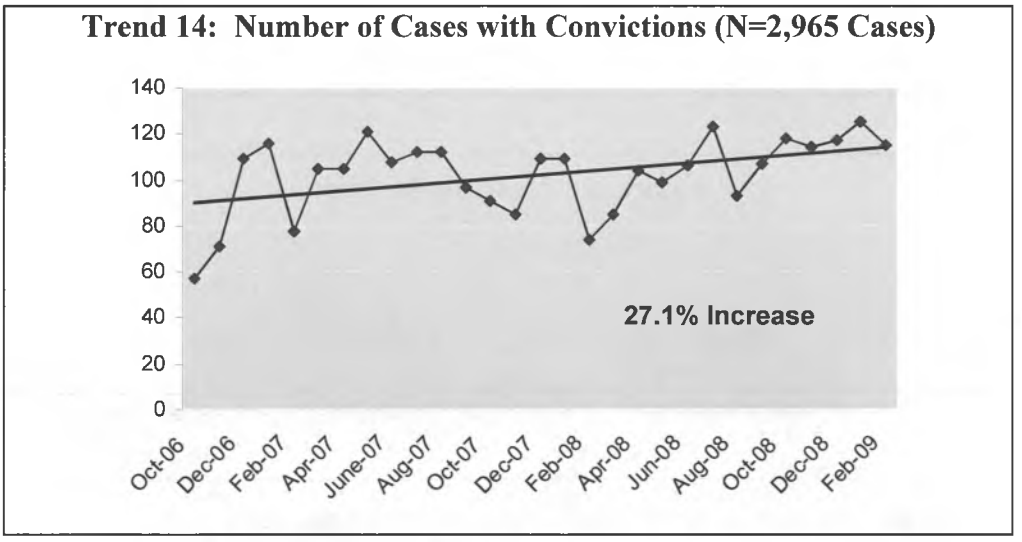
N=4,660 Defendants

Of defendants with more than one case, half offended the second time within six months of their first case and seventy-five percent re-offended a second time within a year (Figure 11). For defendants with three or more cases half offended again within four months of their second case and seventy-five percent reoffended a third time within 8 months of their second offense.

Figure 11: Repeat Offenders by Months Between Cases



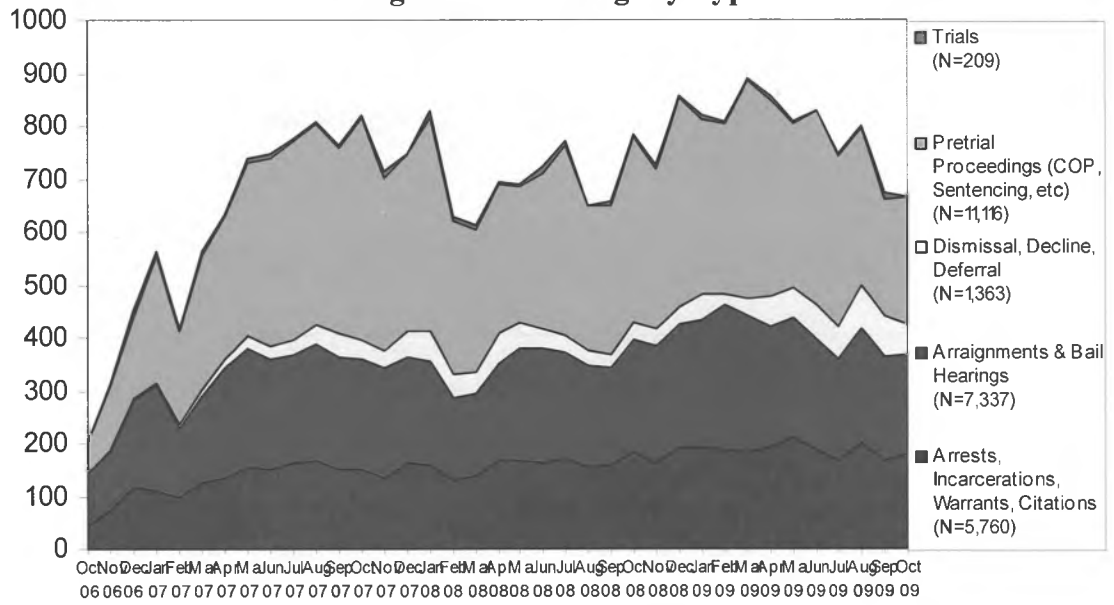
The number of cases with convictions increased by 27.1 percent over the project period (Trend 14). Again, to avoid biasing trend analyses near the end of the sample period, data from the last four months (February to May 2009) were excluded.



Hearings (N=25,803)

Between 2006 and 2009, MPO averaged 697 court proceedings per month for domestic violence cases. Of the 25,803 hearings, 5,760 (22.3 percent) were arrests and incarcerations, 7,337 (28.5 percent) were arraignments or bail hearings, and 11,116 (43.1 percent) were pretrial proceedings, mostly change of plea. Only 1,363 (5.3 percent) were dismissal, declined, or deferral hearings and 209 (0.8 percent) were trials (Figure 12).

Figure 12: Hearings by Type



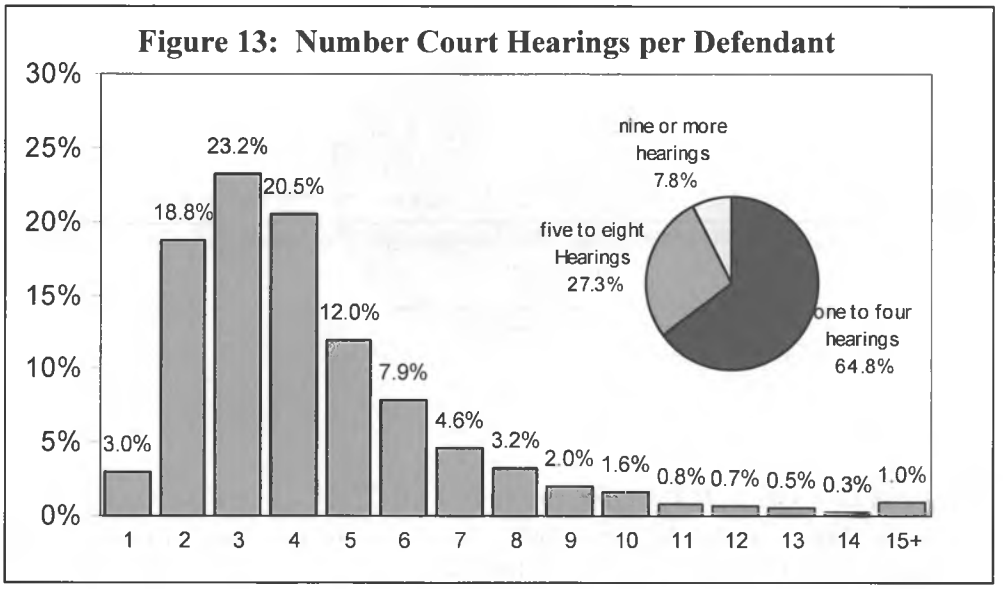
From the first year to the third year of the grant, hearings for arrests, warrants, citations, and incarcerations increased 2.5 percentage points (Trend 15). Arraignment and bail hearings decreased two percentage points; dismissal, declined, and deferral hearings increased 3.6 percentage points; and pretrial hearings decreased three percentage points.

Trend 15: Court Proceedings by Type and Project Year

Court Proceeding	Year 1 Oct 06-Oct 07 (N=7,811)	Year 2 Nov 07-Oct 08 (N=8,505)	Year 3 Nov 08-Oct 09 (N=9,487)	% Point Change Y1 toY3
Arrests, Warrants, Citations, Incarcerations	21.0%	22.3%	23.5%	2.5
Arraignment & Bail Hearings	30.2%	27.2%	28.1%	-2.1
Dismissals, Declines, Deferrals	3.1%	5.7%	6.7%	3.6
Pretrial Proceedings	24.2%	23.3%	21.2%	-3.0
Change of Plea	20.5%	20.7%	19.8%	-0.7
Trials	1.0%	0.8%	0.7%	-0.3

On average, defendants had four court contacts with incarceration and arraignment hearings the most frequent first two contacts (Figure 13). At the arraignment hearing, if the defendant pleads guilty or no contest, the magistrate will convict and sentence with fines, rehabilitation programs, probation, and community service and/or jail time. If the defendant pleads not guilty, the court schedules a trial. Four percent of all cases during the grant period went to trial, 64 percent had a change of plea before the trial (most likely changing to a guilty plea in order to avoid going to trial) and 10 percent of cases were dismissed.

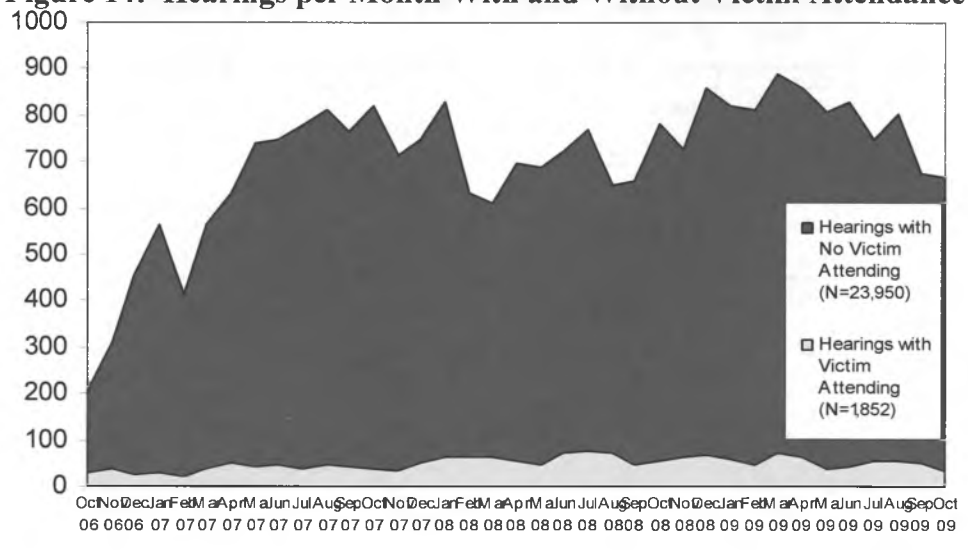
Figure 13: Number Court Hearings per Defendant



Victims Attending Hearings

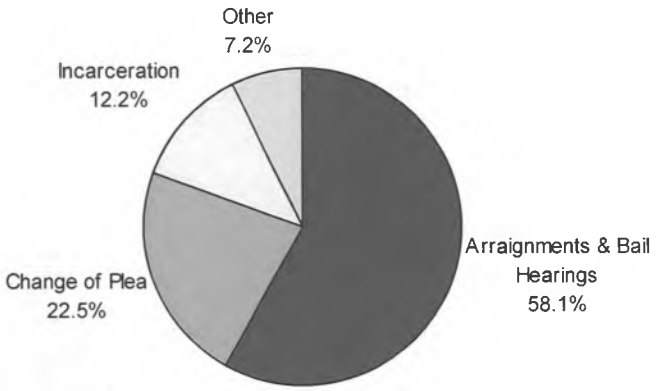
Between 2006 and 2009, 7.2 percent of all hearings were attended by the victim at an average of 50 hearings per month (Figure 14).

Figure 14: Hearings per Month With and Without Victim Attendance



Most victims attended only one hearing. Arraignment or bail hearings were most likely to be attended, at 58.1 percent of all hearing types. One quarter of victims who attended hearings attended the change of plea proceedings and 12.2 percent attended incarceration hearings (Figure 15).

Figure 15: Type of Hearing Victims Attend



The MPO clerks made 6,161 victim contacts with 2,361 victims for an average of 2.6 contacts per victim. The majority of contacts were to inform victims of notifications from the Department of Corrections, the defendant's release from jail, and the dates of hearings (Table 2).

Table 2: MPO Clerk Contacts with Victims by Type

TOTAL	**6,161**

Charges (N=9,686)

A total of 9,686 charges in 6,069 cases were entered into the ADVPP II database. Of all charges, 51.9 percent were for assault, 15.8 percent were for family violence, 9.0 percent were for VCRs, 6.9 percent were for child neglect, and 6.3 percent were for the malicious destruction of property (Table 3).

Table 3: Charges by Type

Rank	Charges	N	% Total
1	Assault	5,026	51.9%
2	Family Violence	1,526	15.8%

Defendants (N=3,887)

A total of 3,887 defendants in 5,110 cases were entered into the database system (Table 4). The average defendant was male, white or Alaska Native, and 34.1 years old.

Table 4: Demographic Summary of Defendants

	Male	%	Female	%	Total	%	Ratio of Males to Females
Defendants	2,515	64.7	1,372	35.3	3,887	100.0	2:1

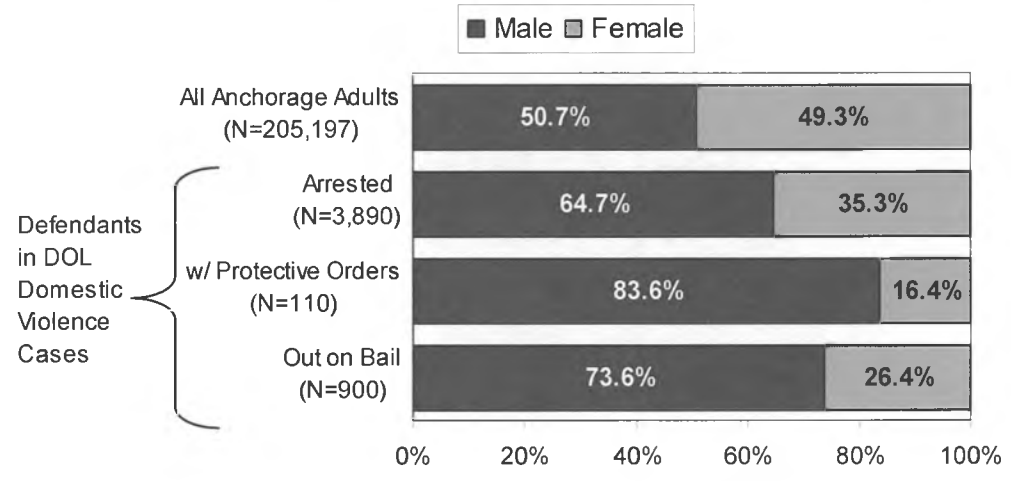
Mean Age	34.1		32.3		33.5		

Gender

The Anchorage adult population in 2007 was 50.7 percent male. For domestic violence defendants, males made up 64.7 percent of arrests, 83.6 percent of defendants with protective orders, and 73.6 percent of defendants out on bail (Figure 16).

Figure 16: Gender of Anchorage and Defendants by Type



Source: Anchorage adult population, US Bureau of the Census, 2007 Estimate.

Gender and Charges

Males received over two thirds of all charges except child neglect which was 66.7 percent female and abuse of a third party appointment which was 56.0 percent female (Table 5). Almost 70 percent of assault and family violence—the top two charges—were committed by male defendants. To note, family violence is the charge given when children are at home during the domestic violence incident.

Table 5: Charges by Defendant Gender

Charges	Males	%	Females	%	Total	%
Assault	2,899	70.3	1,225	29.7	4,124	51.5

TOTAL	**5,447**	**68.1**	**2,552**	**31.9**	**7,999**	**100.0**

Male defendants were three times more likely than female defendants to have prior assault charges. Males were eight times more likely to be felons, two times more likely to have other Alaska convictions and five times more likely to have a protective order filed against them (Table 6).

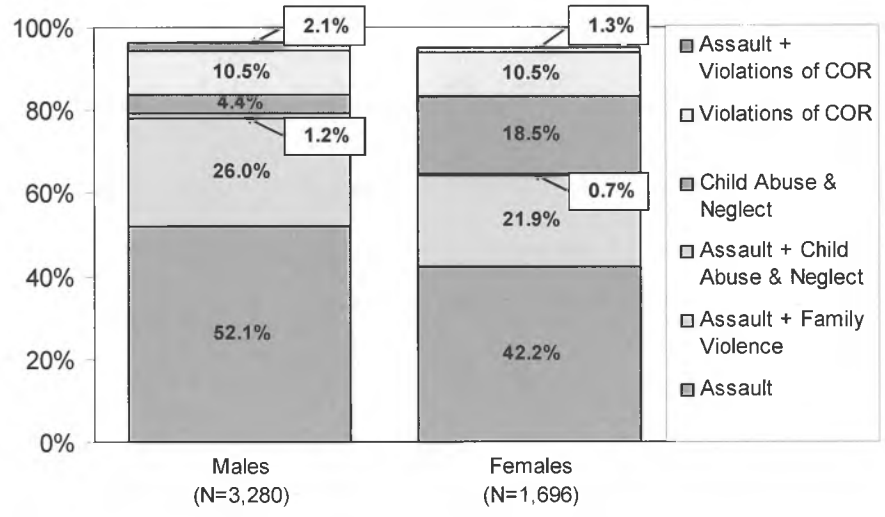
Table 6: Prior Convictions and Protective Orders by Defendant Gender

	Male	%	Female	%	Ratio of Males to Females
Prior Assault Charge	1,215	77.6	349	22.3	3:1
Prior Felony Charges	617	8.5	80	11.5	8:1
Prior Alaska Convictions	1,266	67.8	600	32.2	2:1
Protective Orders	92	83.6	18	16.4	5:1

Gender and Cases

For all cases with male defendants, 81.4 percent had at least one assault charge. For all cases with female defendants, 66.1 percent had at least one assault charge. The percentage of assaults for female defendants was lower compared to male defendants because 18.5 percent of cases with female defendants were for child abuse and/or neglect charges (Figure 17). Child abuse and neglect were charged when the defendant hurt a child or placed a child in a situation with the potential of harm such as driving with a child while under the influence. Serious harm, such as burning, assaulting, or killing a child, involves felony charges.

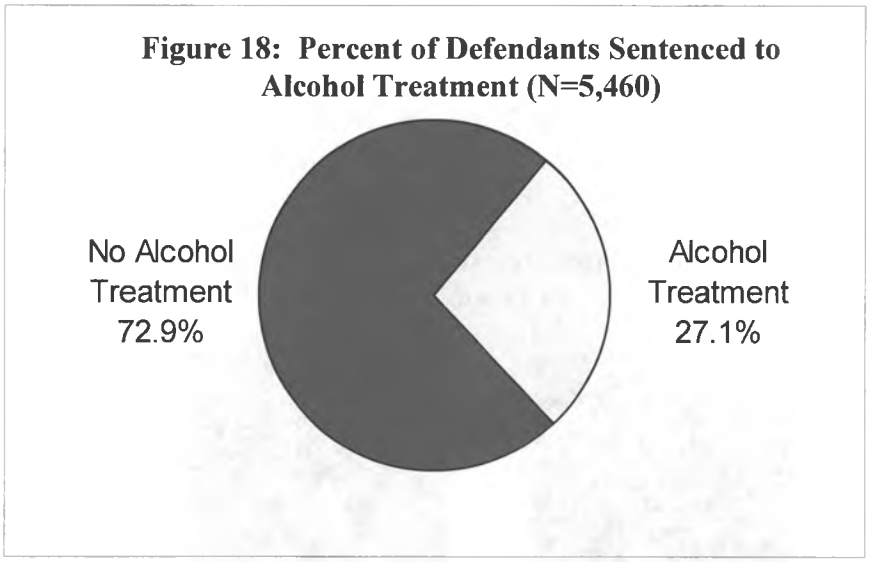
Figure 17: Defendant Gender and Case Types



Gender and Alcohol

For defendants with rendered judgments, 27.1 percent received alcohol treatment conditions; 72.9 percent did not (Figure 18 on page 38). Unfortunately the ADVPP database does not track alcohol use at the time of the incident. However, for a sample of domestic violence police reports between 1999 and 2002 (N=2,417), 40.0 percent indicated alcohol use by the suspect. It is unlikely this percentage has decreased since then. Thus there appears to be a discrepancy between the number of suspects consuming alcohol at the time of the incident and the number sentenced to alcohol treatment. The reasons for this warrant further study.

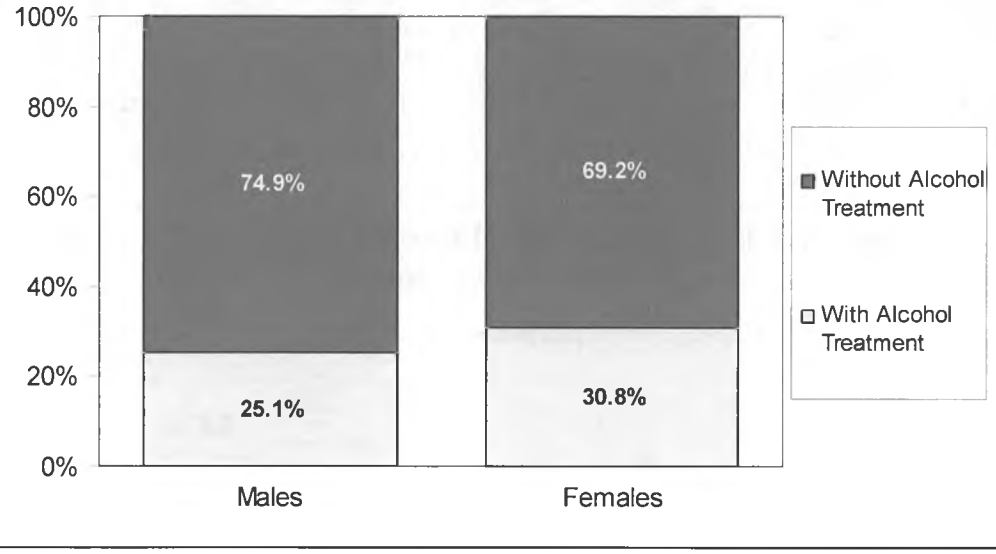
Figure 18: Percent of Defendants Sentenced to Alcohol Treatment (N=5,460)



A total of 5,450 defendants received sentences for their cases: 1,872 females and 3,588 males.

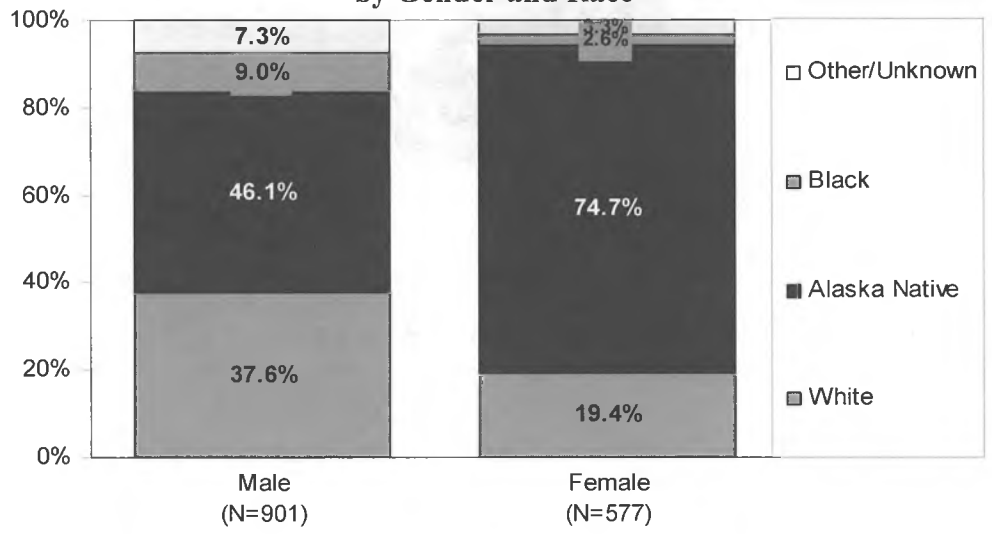
Almost 31 percent (30.8%) of female defendants were sentenced to alcohol treatment, whereas only 25.1 percent of male defendants received alcohol treatment sentences (Figure 19).

Figure 19: Percent of Defendants Sentenced to Alcohol Treatment by Gender



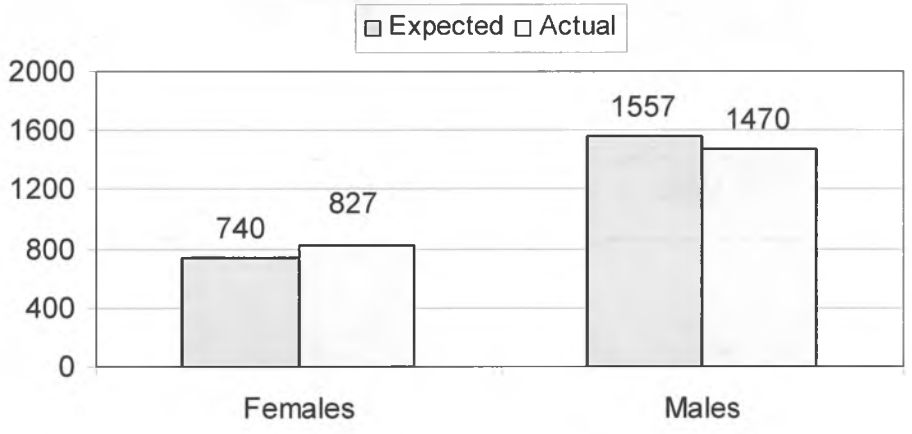
Alaska Native male and female defendants received a disproportionate percentage of alcohol treatment sentences. Alaska Native males made up 46.1 percent of male defendants receiving alcohol sentences compared with 29.8 percent of male defendants. Alaska Native females made up 74.7 percent of females receiving alcohol sentences compared with 51.3 percent of female defendants (Figures 20 and 24).

Figure 20: Defendants Receiving Alcohol Treatment Sentences by Gender and Race



Female defendants received 32.2 percent of all sentence conditions (N=8,030). Assuming no gender bias in the distribution of alcohol treatment conditions (N=2,297), females would be expected to receive 32.2 percent of these sentences as well, or 740 alcohol treatment sentences. Females actually received 827 sentences, which is 11.8 percent more than expected. Males, on the other hand, received 87 (5.6 percent) fewer alcohol treatment sentences than expected (Figure 21).

Figure 21: Expected and Actual Number of Alcohol Treatment Sentences by Gender



Age

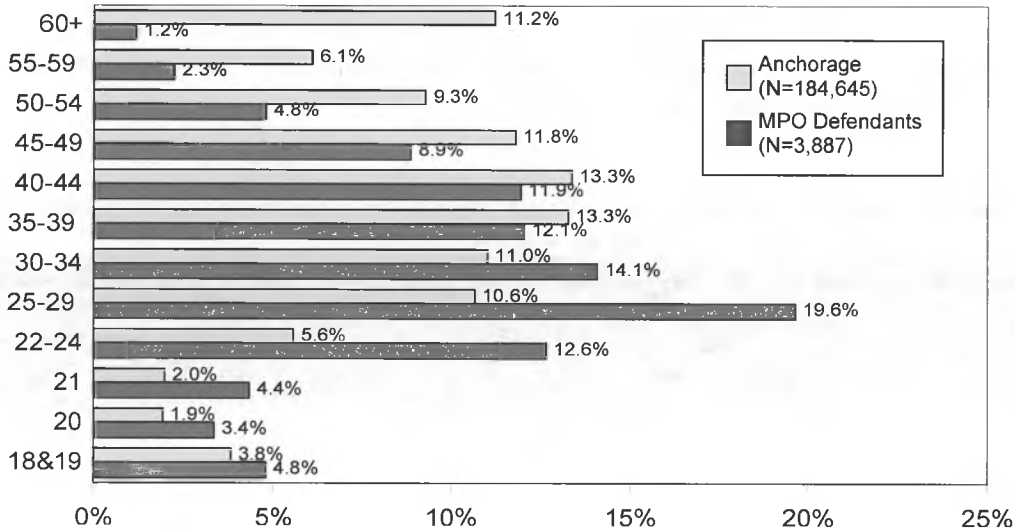
The median (middle) age of defendants was 31 years: 30 years for females and 32 years for males. The mean (average) age was slightly older at 33 years: females at 32 years and males at 34 years (Table 7).

Table 7: Defendant Age by Gender

	Median	Mean
Male	32	34.1
Female	30	32.3
Total	**31**	**33.5**

The majority, or 58.4 percent, of MPO domestic violence cases had defendants aged 22 to 39 years. Defendants between the ages of 22 and 29 were at twice the percentage of the Anchorage population of the same age range (Figure 22).

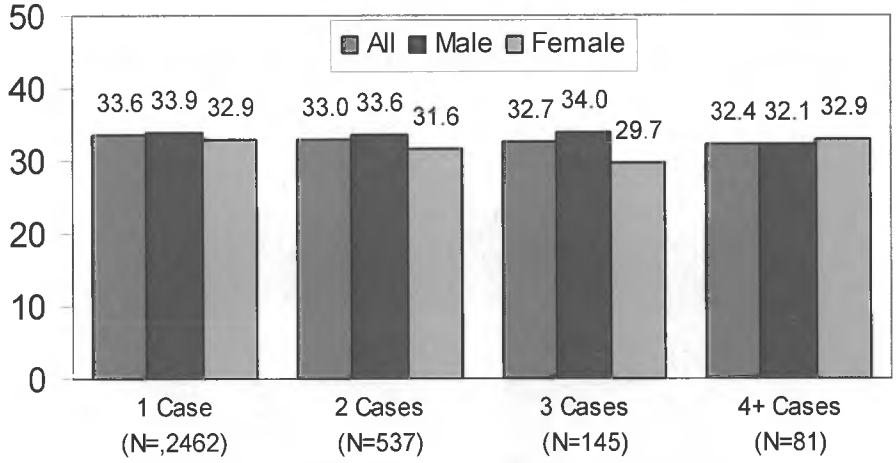
Figure 22: Anchorage and Defendant Population by Age Group



Source: Anchorage Population, US Bureau of the Census, Census 2000

Male defendants averaged 34 years of age regardless of the number of cases per defendant (Figure 23). The exception was males with four or more cases, who averaged 32 years of age. Female defendants on the other hand decreased in age as the number of cases per defendant increased. Those with one case averaged 33 years and those with three cases averaged 30 years. Female defendants with four or more cases also had an average age of 33 years of age.

Figure 23: Defendant Age by the Number of Cases per Defendant



Note: Data through 12/ 31/ 08 .

Half of defendants had no prior charges of domestic violence assault. As the age of the defendants increased, so did the likelihood that they would have prior domestic violence assault charges (Table 8). For defendants 18 and 19 years old, 10.1 percent had a prior domestic violence assault charge. The percentage steadily increased until it peaked at 52.5 percent for defendants who were ages 40 to 44 years old.

Assault charges were most prevalent in cases with defendants ages 18 and 19 years, with assault making up 79.7 percent of these cases. Cases with defendants over 50 years had over 78 percent of cases with an assault charge.

Table 8: Defendant Age and Current and Prior Domestic Violence Assault Charges
(Above Average Bolded)

Age Group	# Defendants	% Defendants with Prior Domestic Violence Assault Charges	# Domestic Violence Cases	% Domestic Violence Cases with at least One Assault Charge
18&19	168	10.1%	194	**79.7%**
20-24	793	26.8%	1,031	**76.4%**
25-29	744	38.2%	1,011	72.2%

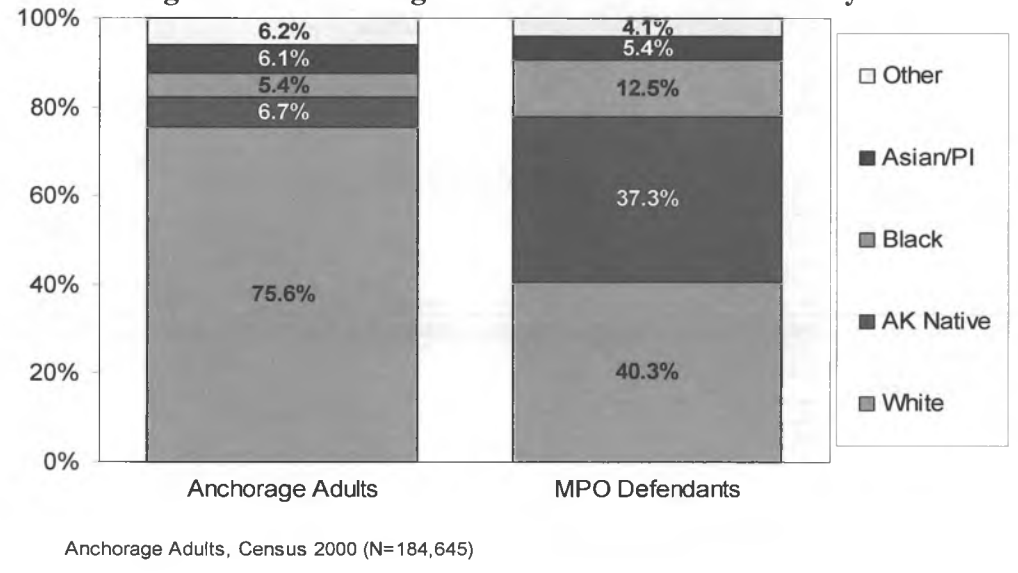
45-49	343	**50.9%**	456	**75.5%**
50-54	196	45.8%	251	**78.1%**
55+	134	42.5%	159	**78.7%**
Total	**3,857**	**48.9%**	**5,094**	**74.3%**

Race/Ethnicity

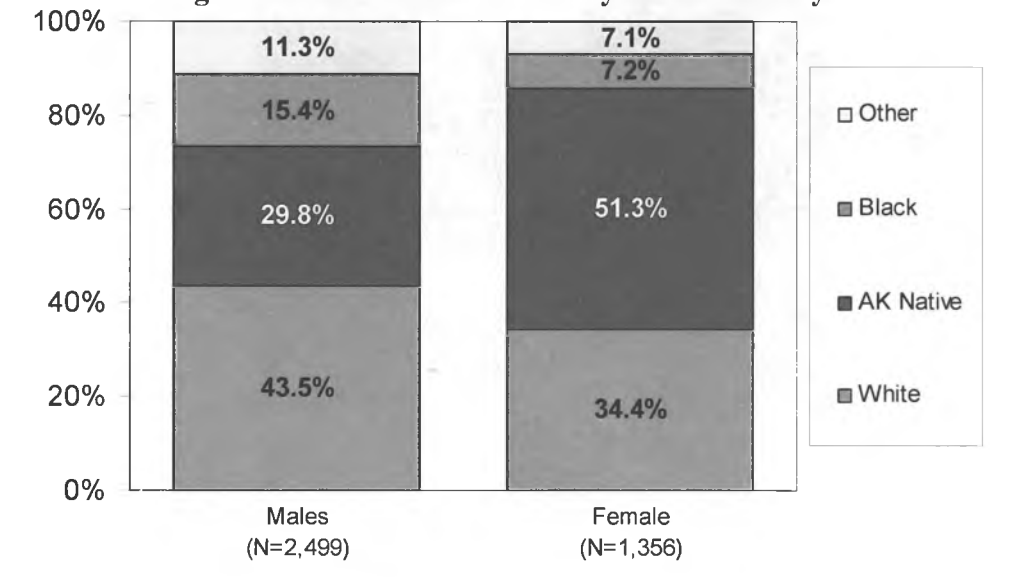
Defendants were mostly white (40.3 percent), Alaska Native (37.3 percent), or black (12.5 percent) while Anchorage adults (2000) were mostly white (75.6 percent), black (6.7 percent), or Alaska Native (5.4 percent), as seen in Figure 24.

Figure 24: Anchorage and Defendant Race/Ethnicity



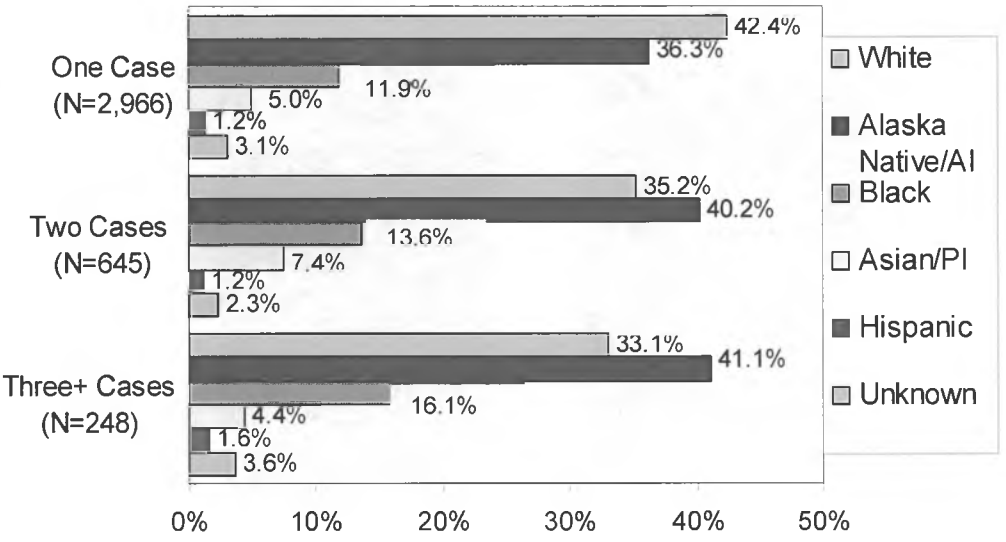
The race/ethnic representation of defendants was disproportionate to the Anchorage population. Alaska Native defendants represented six times the percentage of the Alaska Native population citywide. Alaska Native females were especially overrepresented, making up half of all female defendants. The percentage of Alaska Native female defendants was twice the percentage of Alaska Native male defendants (Figure 25).

Figure 25: Defendant Gender by Race/Ethnicity



The percentage Alaska Native and black defendants increased four percentage points as the number of cases per defendant increased from one case to three or more cases (Figure 26). The percentage of white defendants decreased nine points.

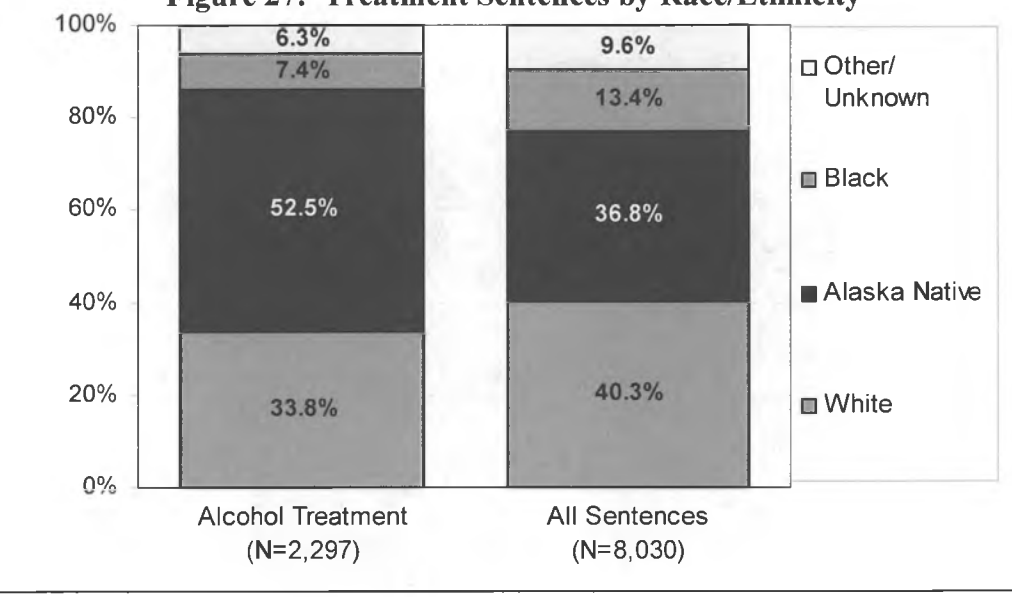
Figure 26: Number of Cases per Defendants by Race/Ethnicity



Race/Ethnicity and Alcohol

All treatment sentences by race/ethnicity paralleled the percentage of MPO defendants (compare to Figure 24). However, alcohol treatment conditions, at 52.5 percent, were disproportionately sentenced to the Alaska Native population (Figure 27).

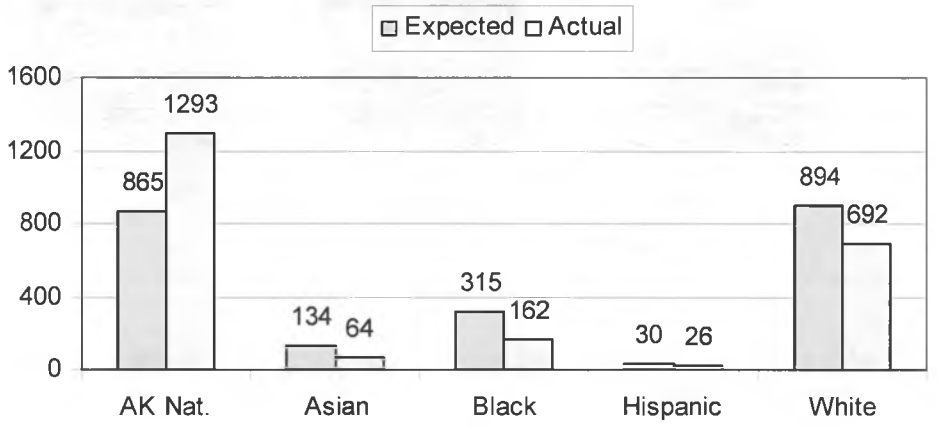
Figure 27: Treatment Sentences by Race/Ethnicity



Defendants with known racial/ethnic identities received a total of 7,781 sentence conditions. Of these, populations who were Alaska Native received 38.7 percent, Asian 6.0 percent, black 14.1 percent, Hispanic 1.3 percent, and white 39.9 percent.

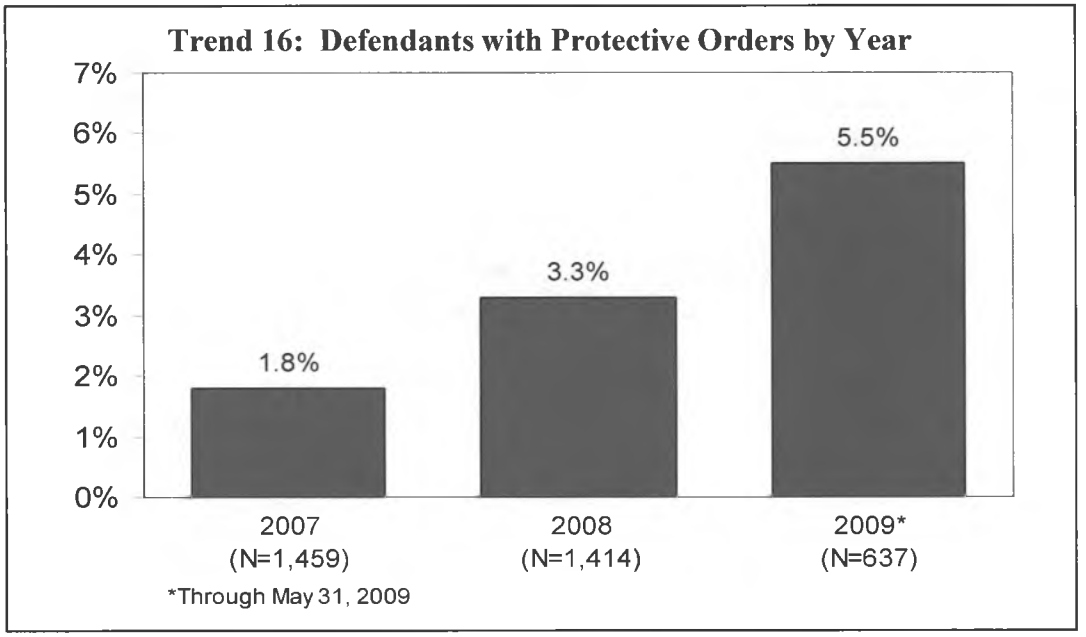
A total of 2,237 alcohol treatment conditions were sentenced. Assuming no racial bias in the distribution of alcohol treatment conditions, Alaska Native populations would be expected to receive 865 conditions; they actually received 1,293 alcohol conditions, 49.5 percent more than expected. People who were Asian received 52.2 percent fewer, black received 48.6 percent fewer, Hispanic received 13.3 percent fewer and white received 22.6 percent fewer alcohol treatment conditions than expected (Figure 28).

Figure 28: Expected and Actual Numbers of Alcohol Treatment Conditions by Race/Ethnicity

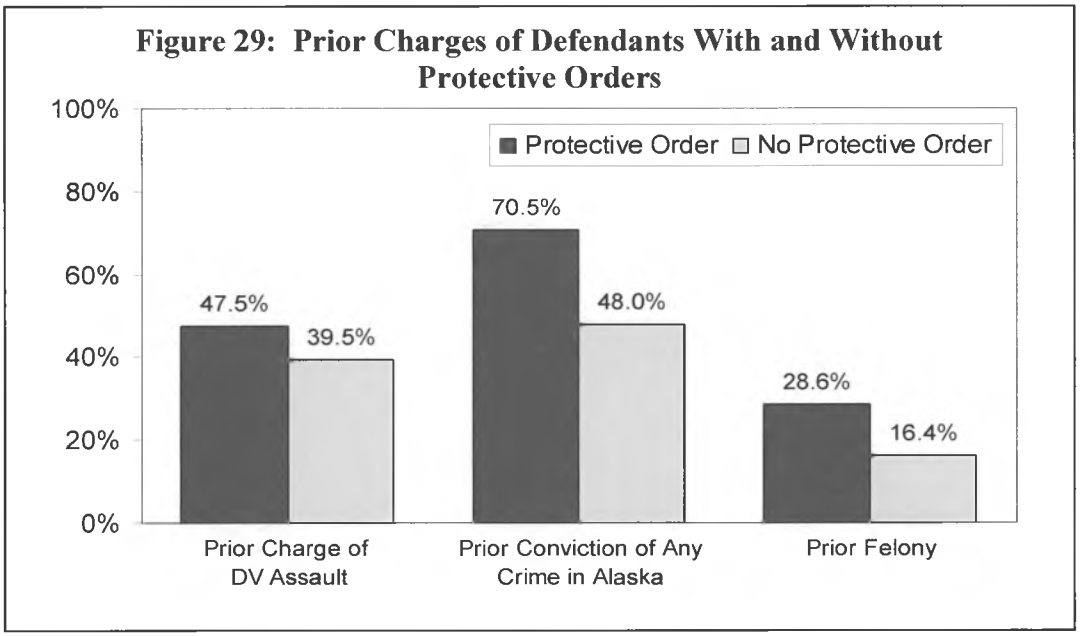


Defendants with Protective Orders

The percentage of defendants with protective orders, as tracked by ADVPP II, steadily increased over the grant period. In 2007, an average of 1.8 percent had protective orders. In 2008, the average was 3.3 percent and during the first six months of 2009, the average was 5.5 percent (Trend 16).

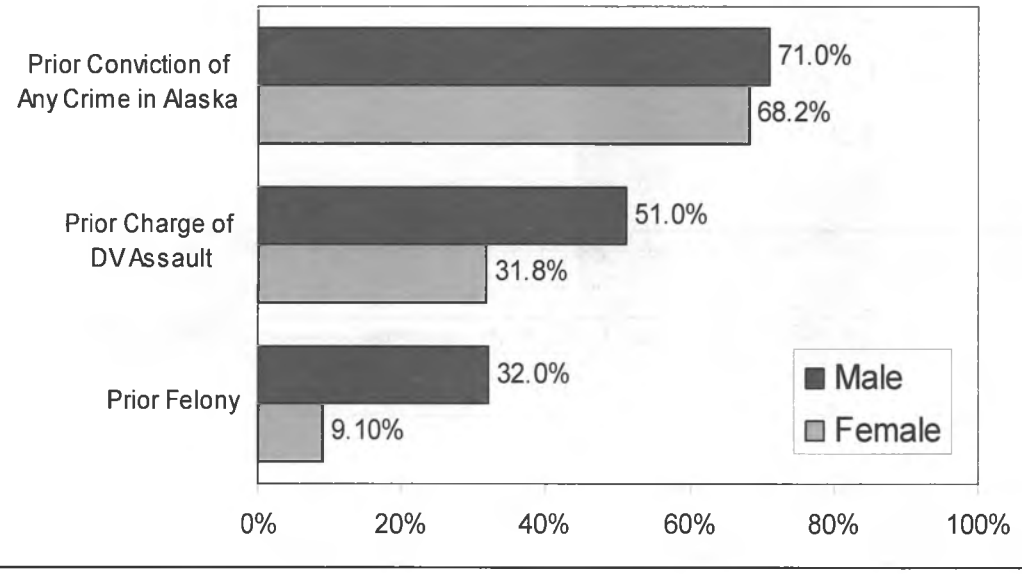


Defendants with protective orders were more likely than defendants without protective orders to have prior criminal charges: domestic violence assaults were 8.0 percentage points higher, previous convictions recorded in Alaska were 22.5 percentage points higher, and prior felonies were 12.2 percentage points higher (Figure 29).



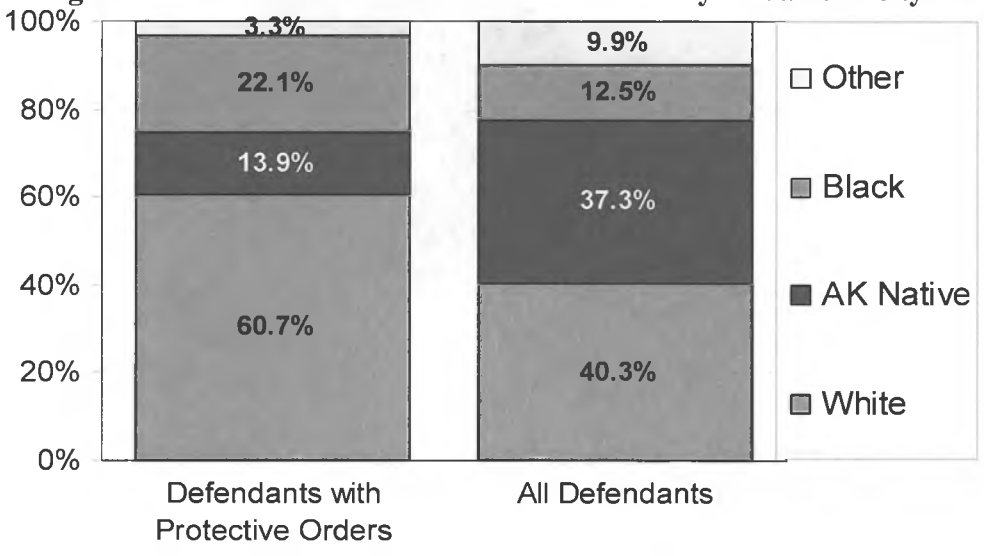
Male defendants with protective orders, when compared with female defendants with protective orders, were slightly more likely to have any prior conviction in Alaska: 71.0 percent for males compared to 68.2 percent for females (Figure 30). Defendants with protective orders were 1.5 times more likely to be male if there were previous charges of assault (51.0 percent male to 31.8 percent female) and three times more likely to be male if there was a felony record (32.0 percent male to 9.1 percent female).

Figure 30: Defendants with Protection Orders by Gender and Priors



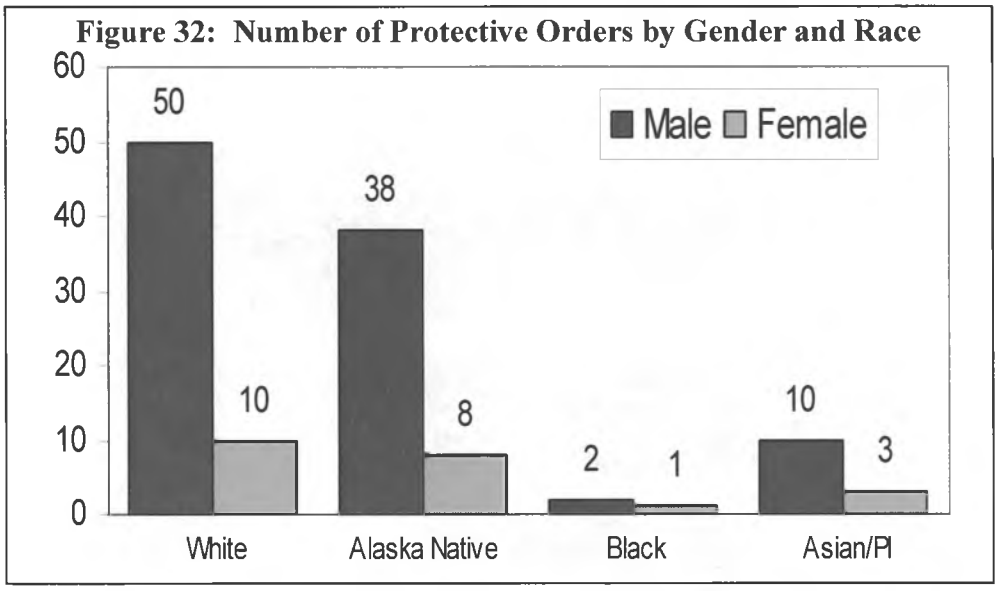
Almost two thirds of defendants with protective orders were white. Compared to all defendants, those with protective orders were one and a half time more likely to be white, twice as likely to be black and half as likely to be Alaska Native (Figure 31).

Figure 31: Defendants with Protective Orders by Race/Ethnicity



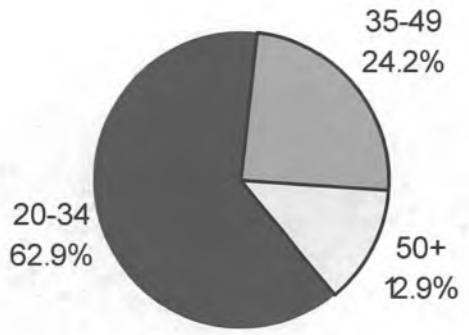
Males were four times more likely to have a protection order filed against them than were females: 100 males to 22 females. White and Alaska Native males were five times more likely to have protective orders than white and Alaska Native females (Figure 32).

Figure 32: Number of Protective Orders by Gender and Race



Younger males were more likely to have a protective order filed against them. Males between the ages of 20 and 34 years accounted for 62.9 percent of all defendants with protective orders, whereas males in this age group accounted for half of all defendants (Figure 33).

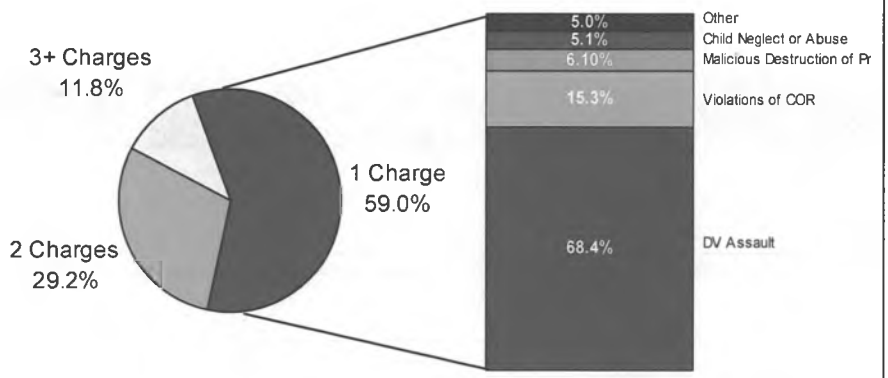
Figure 33: Male Defendants with Protective Orders by Age



Defendants with protective orders had an average of 1.5 cases whereas defendants without protective orders had an average of 1.3 cases.

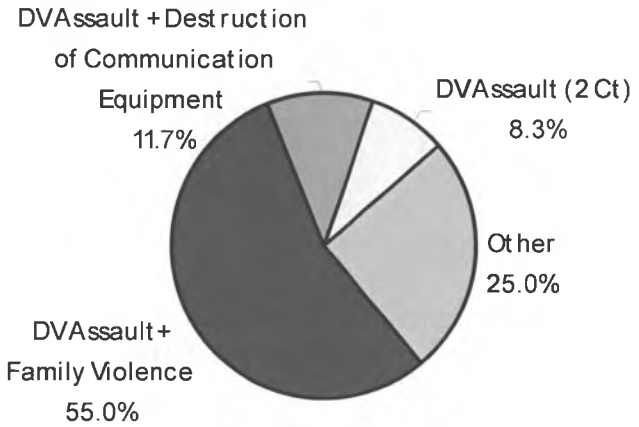
The majority, or 59.0 percent, of defendants with protective orders were in court on a single charge of domestic violence. Almost 68.4 percent of single charges against defendants with protective orders were for assault and 15.3 percent were for VCRs (Figure 34).

Figure 34: Defendants with Protective Orders by Number of Charges and Type



As the number of charges against defendants with protective orders increases from one to two, family violence becomes a significant percentage of the charges. One third of all defendants with protective orders were in court on two charges, and 55.0 percent of those had charges of domestic violence assault with family violence (Figure 35).

Figure 35: Types of Charges for Defendants with Protective Orders and Two Charges



Additional information on Protective orders is provided in Appendix C.

Victims (N=7,551)

The victim profile analyzes the demographics of victims in Anchorage misdemeanor domestic violence cases.

MPO tracked 7,551 victims, as detailed in Table 9, and the average defendant had two victims per case.

Table 9: Demographics of Victims

# Individuals	Male	%	Female	%	Unknown Gender	%	Total	%

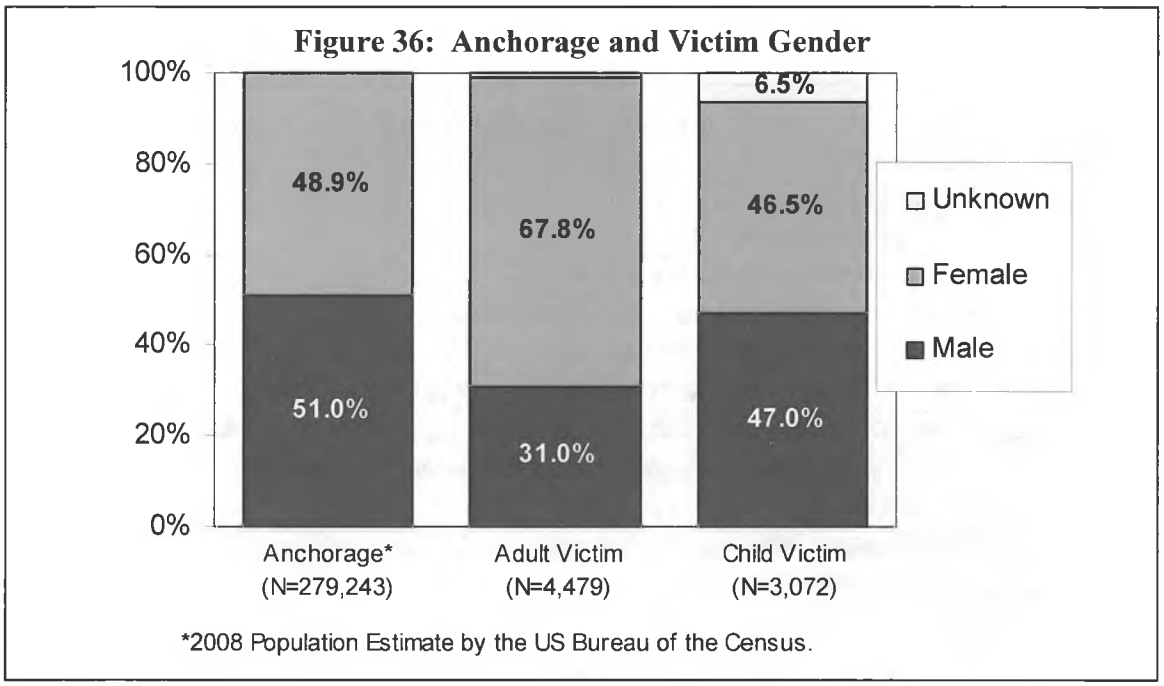
Gender

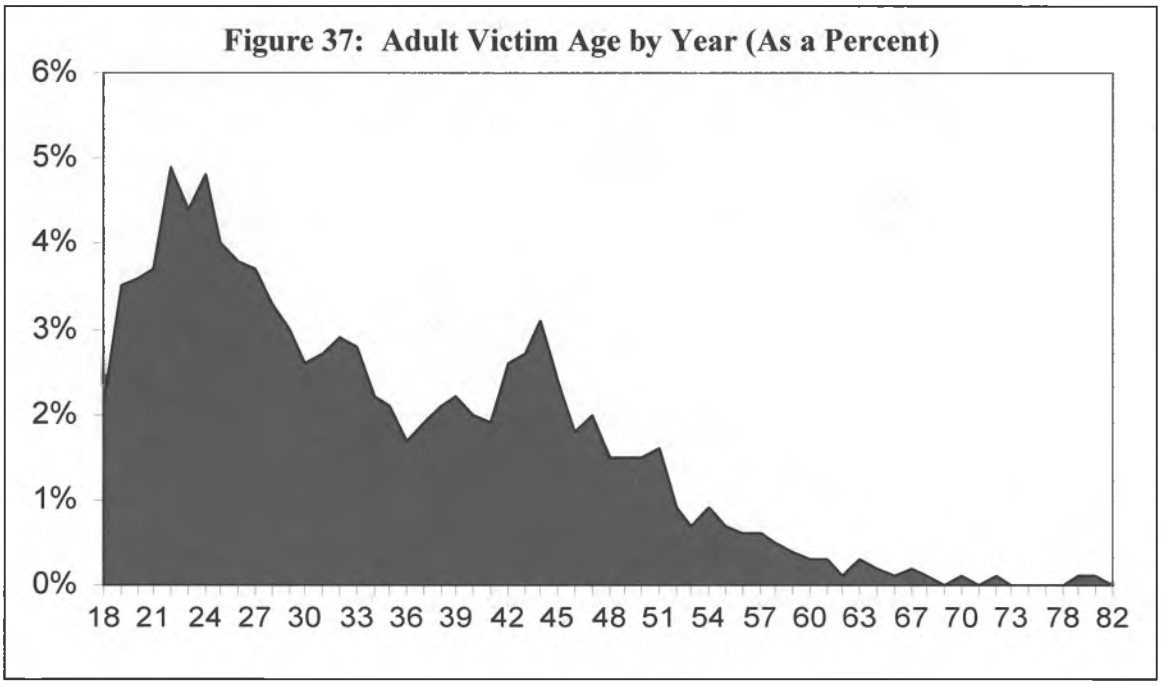
Anchorage's adult and child populations were equally male and female. Child victims in MPO cases were proportionally similar to the general population in gender. Adult victims of domestic violence differed significantly from the general population at 67.8 percent female for MPO cases compared with 48.9 percent female citywide (Figure 36).



Age

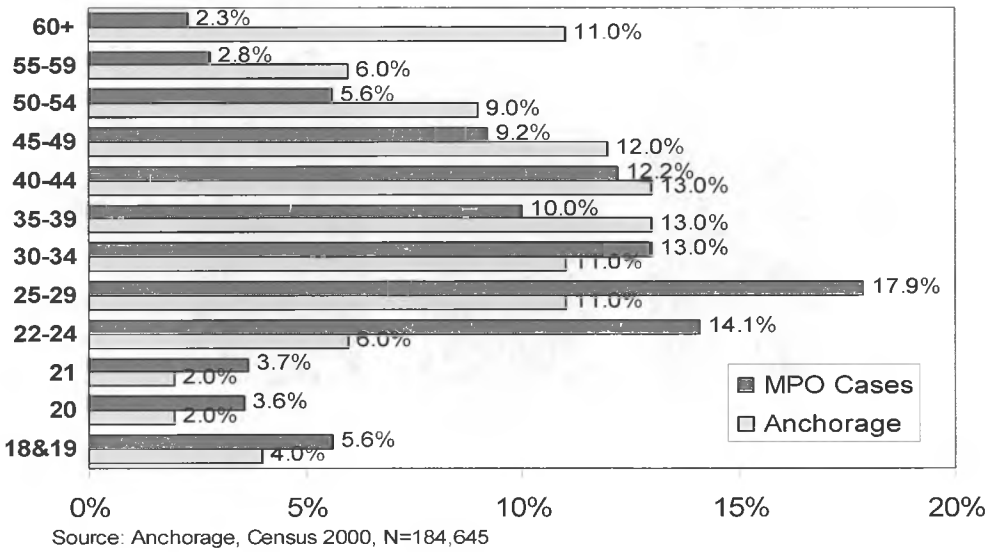
Adults (18 years old and older) represented 59.3 percent of victims; children 40.7 percent.

Adult Victims (N=4,479): Victims of domestic violence in MPO cases tended to be younger than 45 years of age (Figure 37).



Victims who were ages 22 to 29 were most overrepresented when compared to the same age group citywide (Figure 38).

Figure 38: Anchorage and Victim Adults by Age Group



Source: Anchorage, Census 2000, N=184,645

Children (N=3,072): Of all victims in MPO cases, 40.7 percent were children. Children five years and younger made up 53.8 percent of child victims and were twice the percentage of children five years and younger citywide. Children who were one year old were 3 times greater the percentage of children citywide who were one year old (Figure 39).

Figure 39: Anchorage and Victim Children by Age (As a Percent)

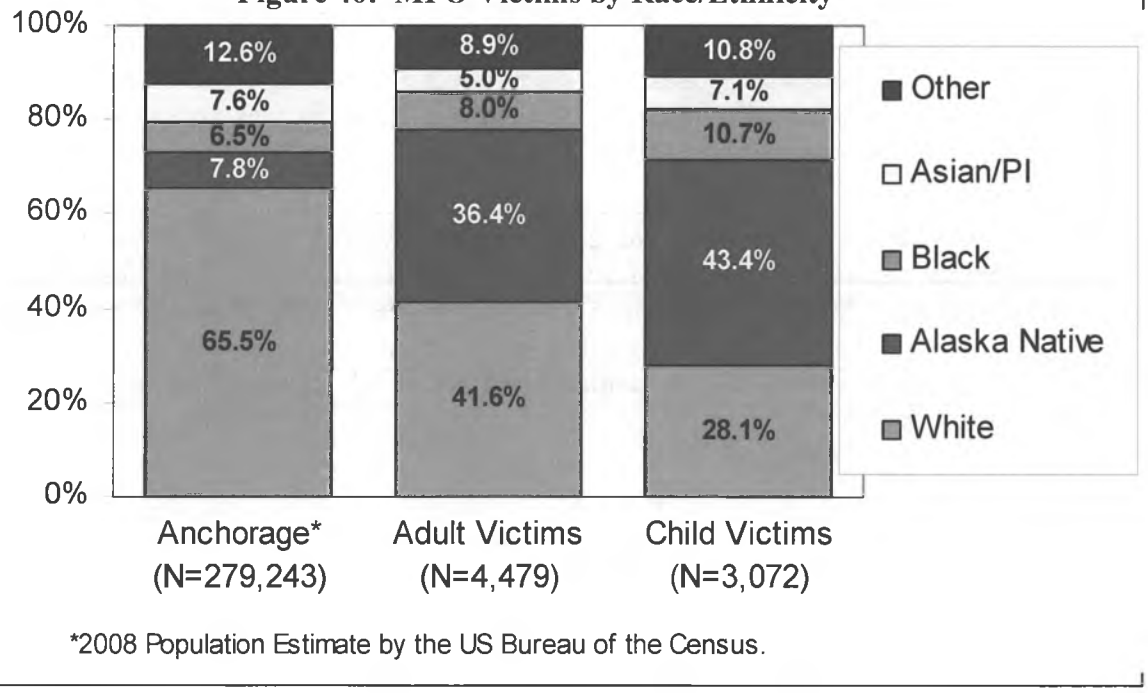
Anchorage 2000 population from the US Bureau of the Census, Census 2000 (N=75,638)

Race/Ethnicity

Victims were significantly overrepresented by the Alaska Native population, especially children. Alaska Native children made up 43.4 percent of all child victims in MPO cases compared with 7.8 percent citywide. Child victims who were white made up 28.1 percent of all child victims compared with a 65.5 percent white population citywide (Figure 40).

Figure 40: MPO Victims by Race/Ethnicity



*2008 Population Estimate by the US Bureau of the Census.

Victims, in general, tended to be of the same race as the perpetrator (Table 10).

Table 10: Number of Charges Based on Race/Ethnicity of Victims and Defendants

	Victim Race

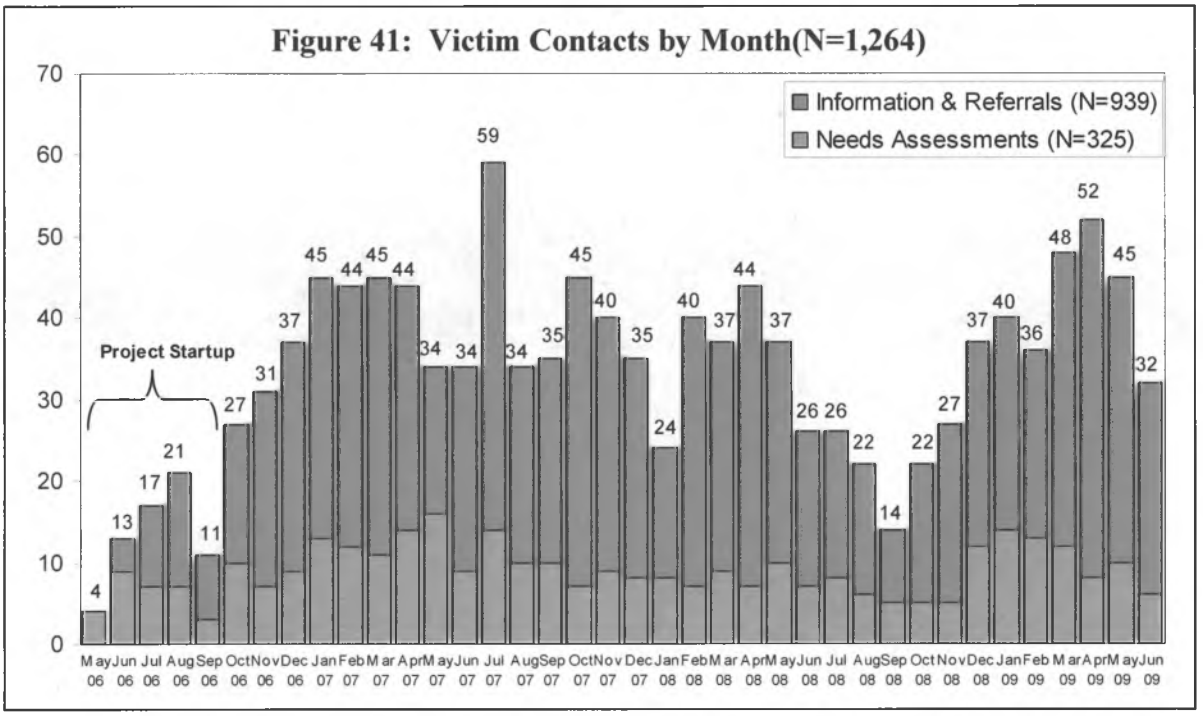
Abused Women in Crisis, Inc (AWAIC) Victim Assistance

The AWAIC Intake Specialist was implemented in May 2006. Victims contact the Intake Specialist through the contact number on the Little Blue Booklet (See Appendix B), MPO, or other referrals. The specialist then works with victims to remove risk factors such as financial dependance to the abuser. The specialist also advocates for the vicims in court; encourages the victim's participation in the criminal justic process (such as attending court hearings); coordinates referrals to the Violent Crimes Victim Compenstion program; and provides financial asistance for rent and utility deposits, transportation, relocation expenses, and other needs. Due to increased needs based on economic stress in the community, a second intake specialist was assigned at AWAIC from August 1 to December 31, 2009.

AWAIC assisted 1,264 victims of domestic violence through ADVPP II (an average of 33 victims per month), as illustrated in Figure 41. Of these, AWAIC provided intensive case management for 325 victims and $181,135 in emergency financial assistance to 294 victims. The majority of victim needs is for rental assistance, medical care, utility deposits, security system, and relocation. A total of 42 women were relocated with ADVPP monies.

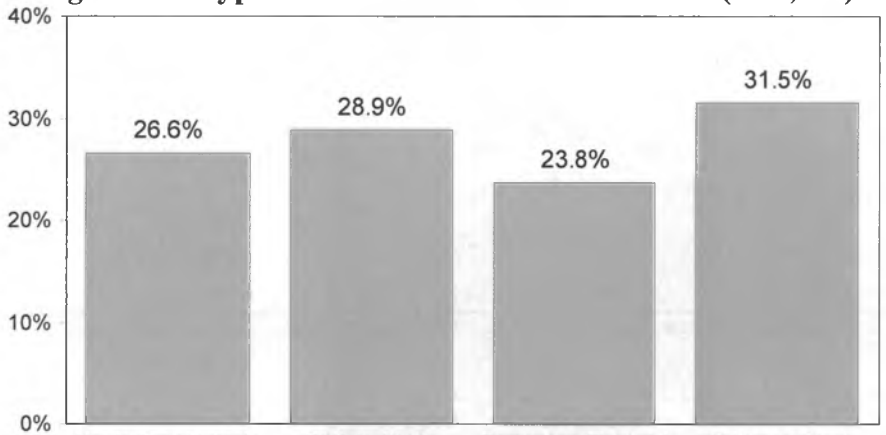
ADVPP allowed AWAIC to reach out to victims who did not want emergency shelter services but did need case management, legal guidance, and emergency financial assistance.

Figure 41: Victim Contacts by Month(N=1,264)



The Intake Specialist gave all victims information and referral services. Moreover, 26.6 percent received case management services, 28.9 percent were encouraged to participate in the criminal justice process, 23.8 percent were given emergency financial assistance, and 31.5 percent received follow-up case management services.

Figure 42: Types of Services Provided to Victims (N=1,264)



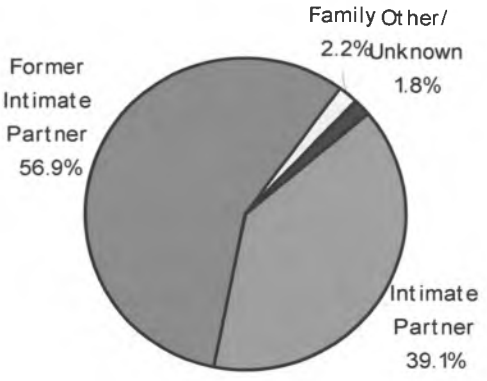
Intensive Case Management Services (N=325)

There were 325 individuals who qualified for intensive case management services out of the 1,264 victims who received information and referrals.

Incidents

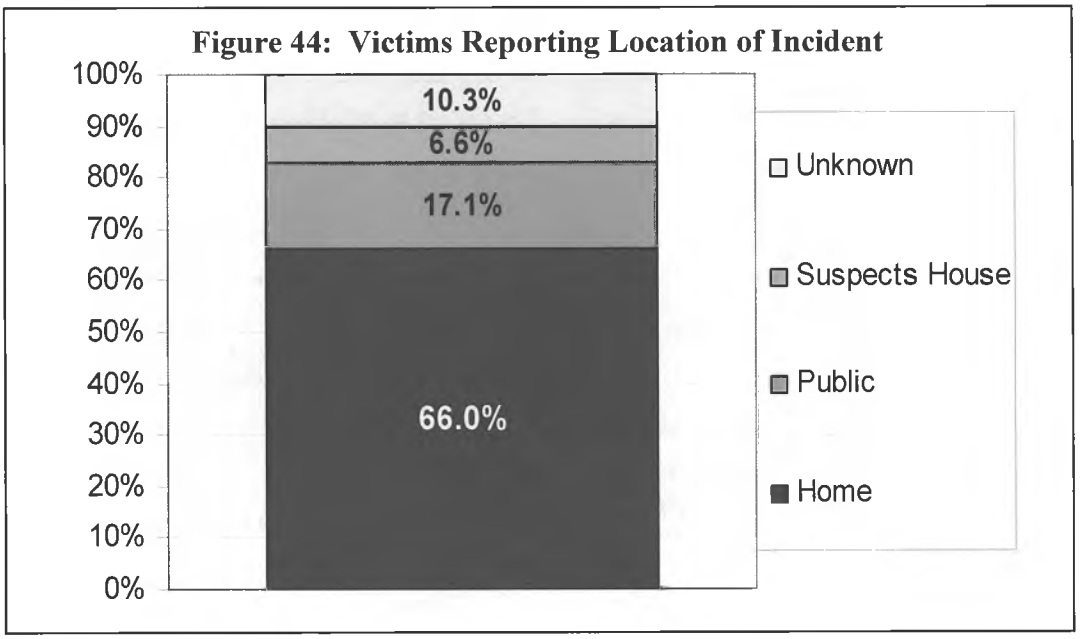
The victim's current or former intimate partner was the abuser in almost all AWAIC cases: 56.9 percent were former intimate partners and 39.1 percent were current intimate partners (Figure 43). Two percent said they were abused by a family member.

Figure 43: Relationship of Abuser to Victim



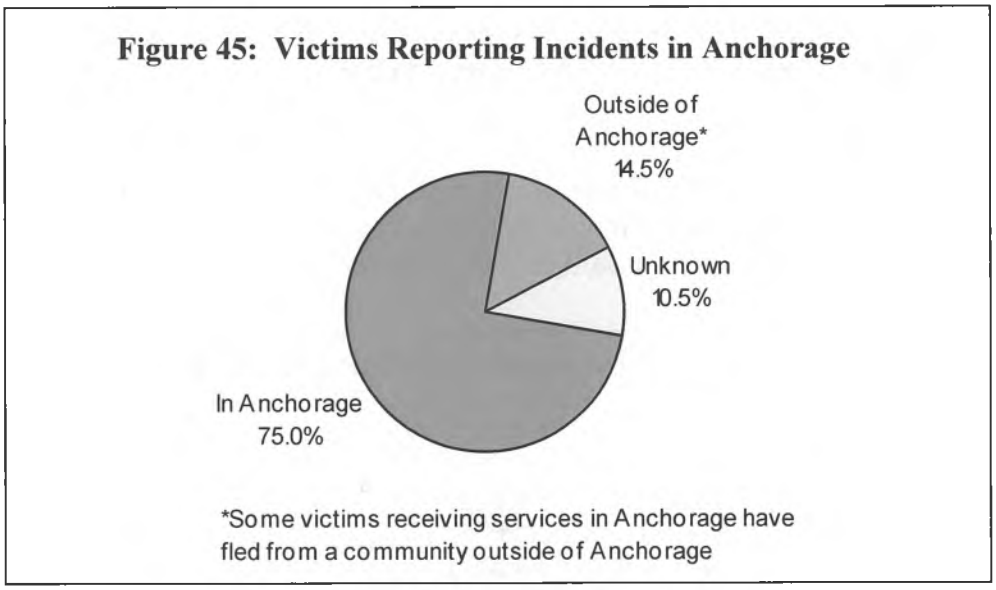
Two thirds of victims reported that the domestic violence incident occurred in their home and 17.1 percent reported the incident occurred in a public place (Figure 44).

Figure 44: Victims Reporting Location of Incident



Three quarters of victims experienced the domestic violence incident in Anchorage; 14.5 percent indicated the incident occured outside of Anchorage or Alaska (Figure 45).

Figure 45: Victims Reporting Incidents in Anchorage



The 325 victims reported an aggregate of 608 incidents of abuse, averaging two incidents of abuse per victim. For example, a victim reporting assault and stalking. Almost half of incidents, or 46.1 percent, involved physical assault, 17.9 percent were threats, 9.4 percent were VCRs, 6.5 percent were stalking, 5.8 percent were for malicious destruction

of property, and 5.3 percent were for sexual assault. Also reported were child abuse, burglary, disconnecting phone equipment, and arson.

The majority of incidents reported to AWAIC were for assault (46.1 percent), similar to charges made against male defendants in MPO cases (53.2 percent assault) as shown in Table 11. Victims were more likely to report threats and stalking than charged against defendants in midemeanor domestic violence cases. Victims were less likely to report family violence than was charged against male defendants in MPO cases.

Table 11: Types of Incidents Reported to AWAIC Compared with Types of Charges Against Male Defendants in MPO Cases

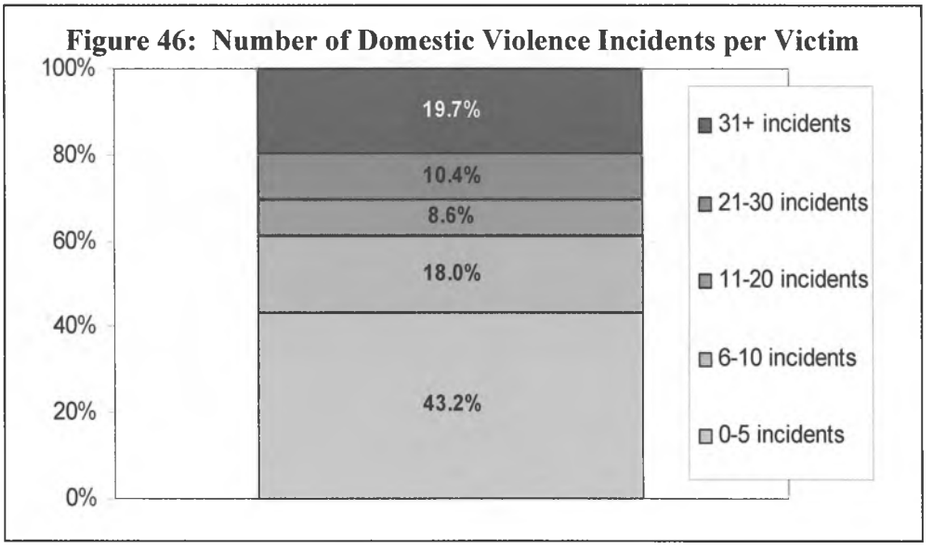
Incident Types	Incidents Reported at AWAIC (N=608)	Charges Against Male Defendants in MPO Cases (N=5,447)	Difference
Assault	46.1%	53.2%	-7.1%
Threats	17.9%	0.0%	17.9%
VCRs	9.4%	8.9%	0.5%
Stalking	6.5%	0.1%	6.4%
Malicious Destruction of Property	5.8%	7.1%	-1.3%
Sexual Assault	5.3%	N/A*	-
Family Violence	2.5%	16.7%	-14.2%
Child Abuse	2.2%	1.1%	1.1%
Burglary	1.7%	0.0%	1.7%
Disconnect of Phone Equipment	0.5%	5.1%	-4.6%
Arson	0.3%	0.0%	0.3%
Other Unknown	1.8%	7.8%	-6.0%
Total	**100.0%**	**100.0%**	**0.0%**

*Sexual Assault is a felony charge

Previous Incidents

Most victims had previous incidents of domestic violence. Over half reported having six or more incidents of abuse prior to the incidents they were currently reporting (Figure 46).

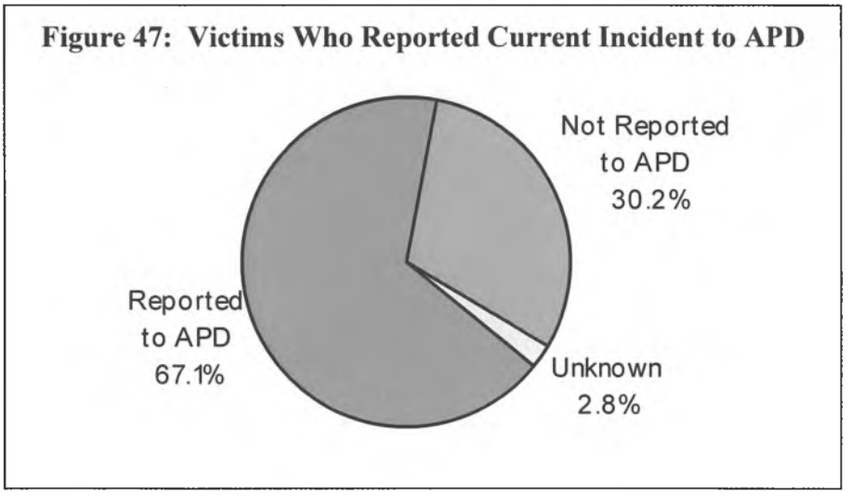
Figure 46: Number of Domestic Violence Incidents per Victim



Reporting to Enforcement

One third of victims did not report their current domestic violence incident to APD (Figure 47).

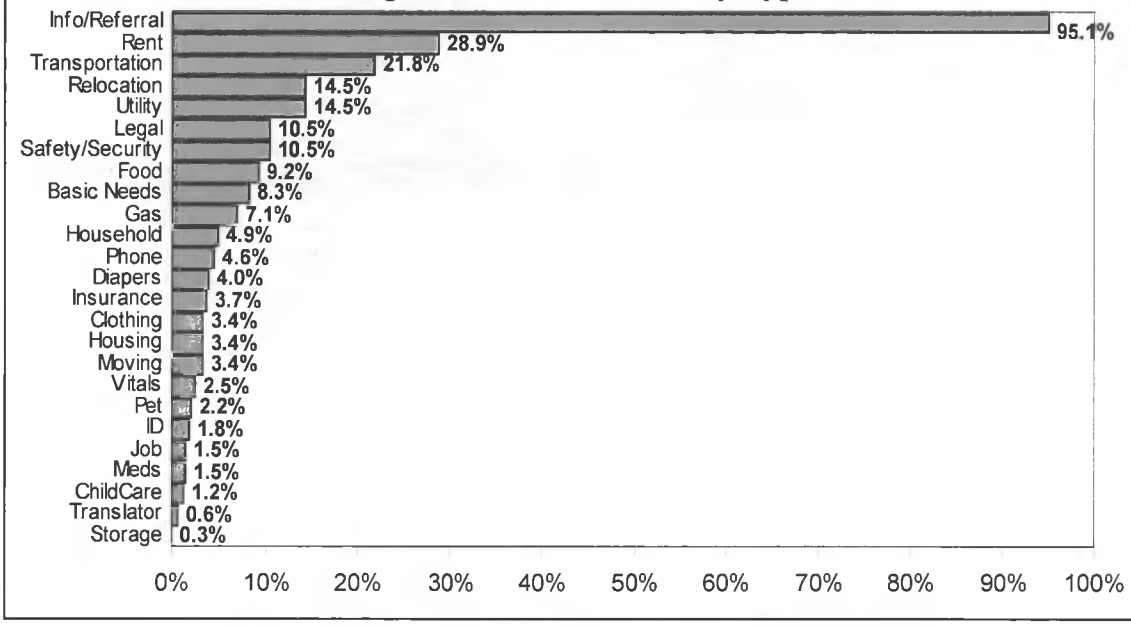
Figure 47: Victims Who Reported Current Incident to APD



Emergency Assistance

Almost all victims stated the need for information and referrals, 28.9 percent needed help with rent, 21.8 percent needed help with transportation, 14.5 percent needed relocation assistance, and 14.5 percent needed utility assistance (Figure 48). Other needs included safety, food, gas, household supplies, phones, identification, help with pet, storage services, diapers, jobs, gas, and insurance.

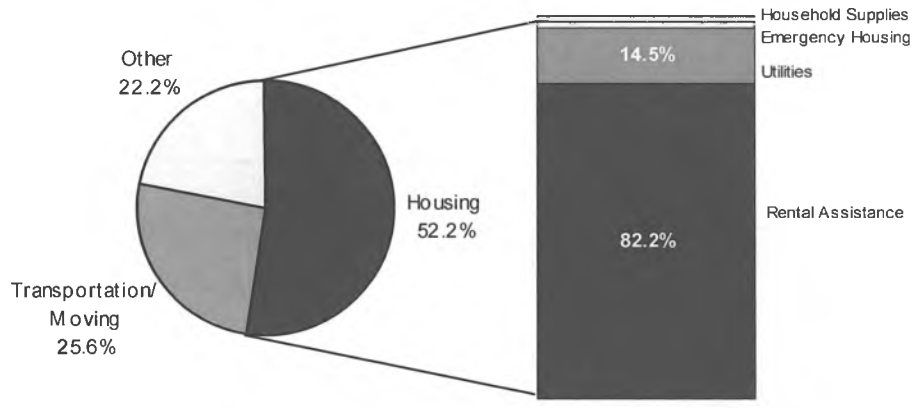
Figure 48: Victim Needs by Type



AWAIC provided $181,135[3] in emergency financial assistance through ADVPP II to aid 294 individuals and families. Housing assistance was the greatest need, at 52.2 percent of all needs (Figure 49). This helped victims with startup or short-term rent and utiltiy payments to prevent homelessness resulting from domestic violence. One quarter of assistance went to transportation and moving expenses, including bus passes, gas cards, cab fare, vehicle insurance, car loan payments, vehicle registration, IM certificates, and ID/Driver's Licenses.

[3] By December 31, 2009 (the end of the grant term), the total number of victims served was 1,482, and a total of $212,236 emergency financial assistance was dispensed.

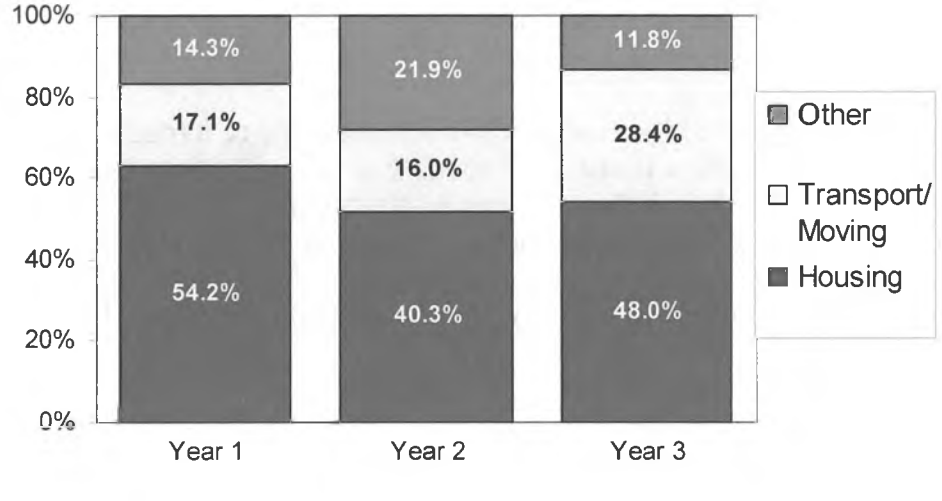
Figure 49: Housing Assistance by Type



Note: "Emergency Housing" means funding assistance for transitional housing or hotels; rental assistance means funding assistance for permanent housing.

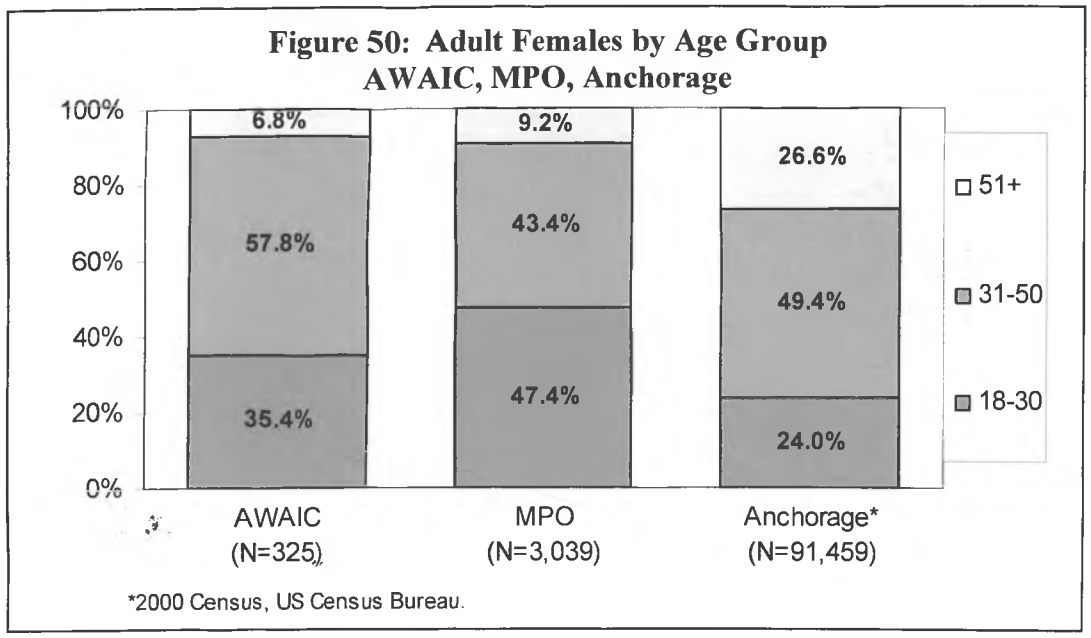
Over the grant period, housing remained nearly half of the need for financial assistance. The need for transportation increased from 17.1 percent ot 28.4 percent of financial assistance (Trend 17).

Trend 17: Financial Assistance by Project Year

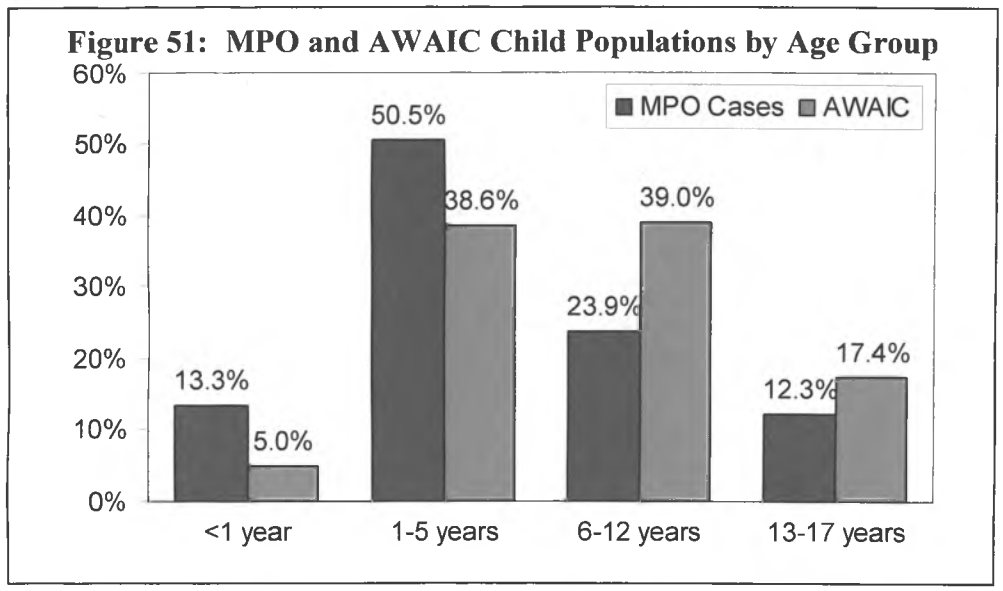


Demographics

AWAIC clients tended to be older than victims in MPO cases and the gene[illegible]. Individuals aged 31 to 50 years accounted for 57.8 percent of clients at AWAIC. comparison, individuals 31 to 50 years made up 49.4 percent of the general population and 43.4 percent of victims in MPO cases (Figure 50).



Children of AWAIC clients tended to be older than child victims in MPO cases: 56.4 percent were over five years old. In comparison, children over five made up 68.6 percent of children citywide and 46.2 percent of child victims in MPO cases (Figure 51).



...be Alaska Native, one and a half times more likely
...es more likely to be Hispanic compared to adult victims in
...12).

Table 12: Female Adult Victims by Race/Ethnicity AWAIC and MPO

	AWAIC (N=325)	MPO Cases (N=3,039)
White	51.7%	39.4%
Alaska Native	16.6%	40.1%

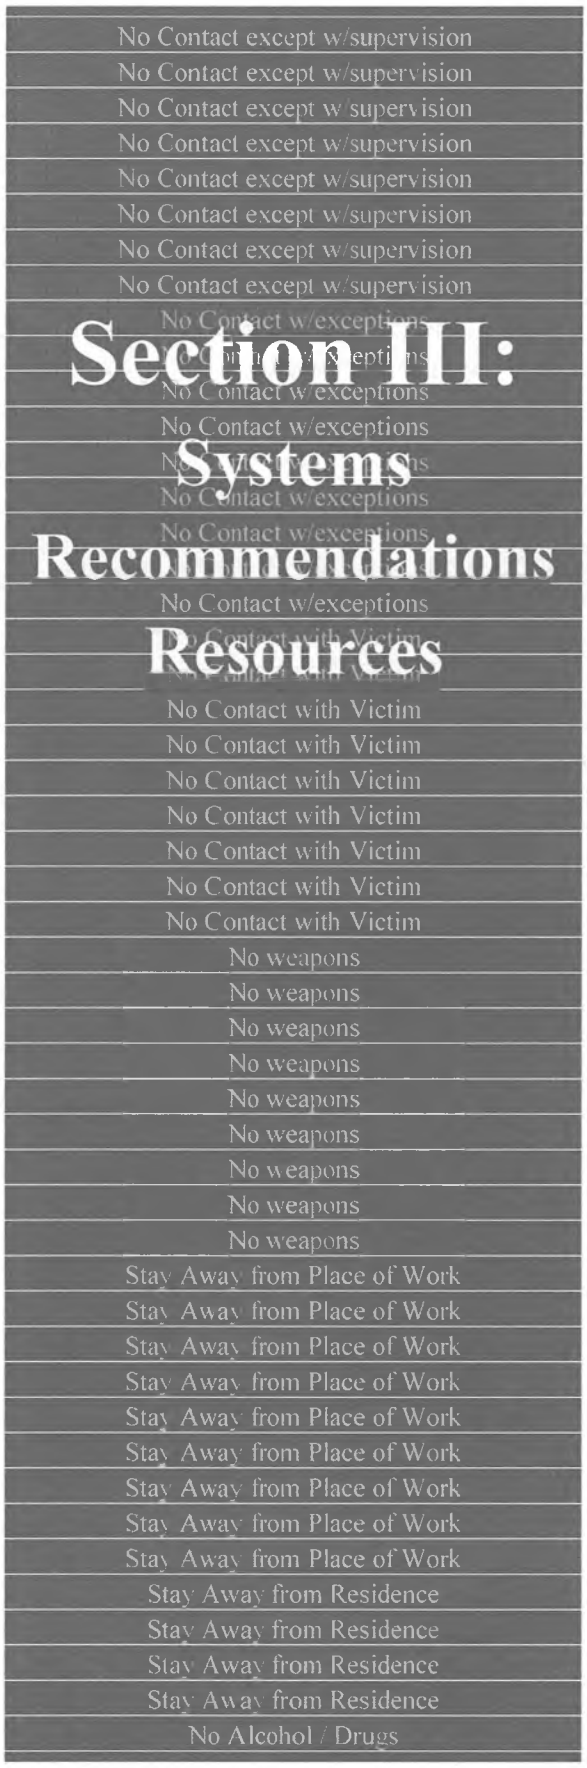
Hispanic	8.3%	0.8%
Other	9.6%	6.5%
Total	100.0%	100.0%



Section III: Systems Recommendations Resources

This section provides further information on domestic violence issues as follows:

- **Public Health Model**
- **Batterer Typology**
- **Staff Recommendations**
- **Community Resources**

Criminal Justice and Public Health Models

Domestic violence has traditionally been viewed as a criminal justice issue in which law enforcement investigates a crime in order to bring a suspect to trial. Over the last ten years, the response to domestic violence has evolved to include the public health model, which adds *prevention* to the criminal justice system. The public health model evaluates the links between the individual, the behavior, and the social and physical context of interpersonal violence.

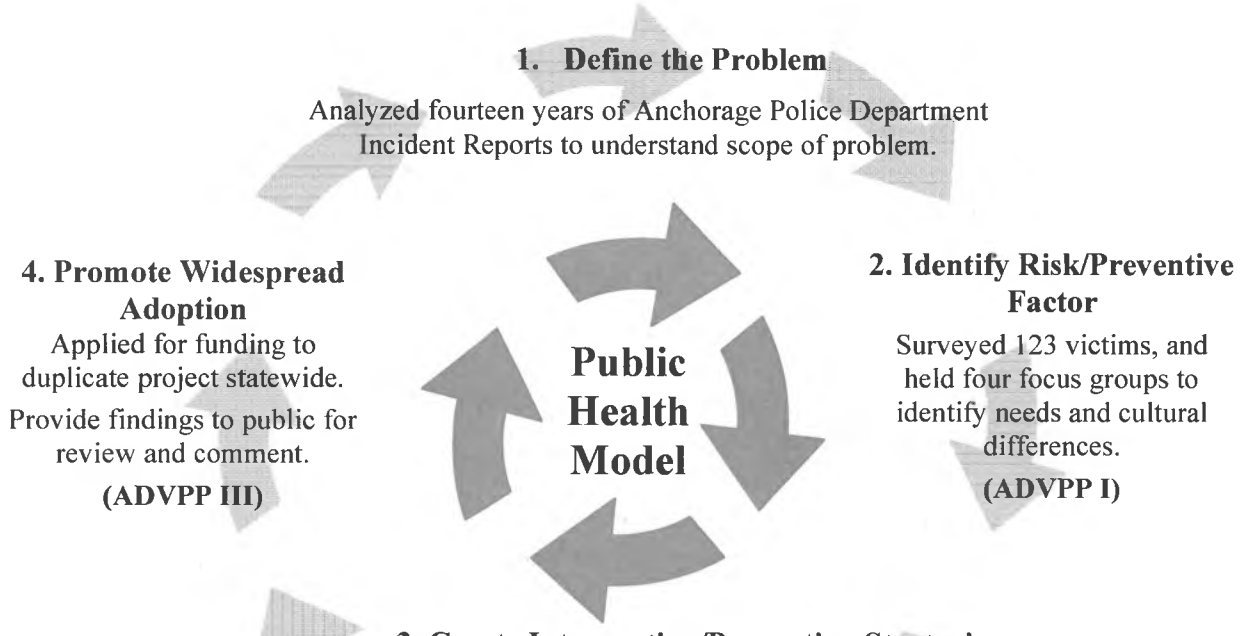
The public health model is a process in which evidence-based practices create population-based strategies. There are four stages to the model: 1) define the problem, 2) identify the risk and protective factors, 3) develop and test the prevention strategies, and 4) ensure widespread adoption. DHHS Safety Links Program follows the public health model in the development and implementation of programs, including ADVPP II.

To define the problem, DHHS Safety Links Program performed a fourteen year study of APD incident reports from 1989 to 2002. The study characterized the high rate of domestic violence in Anchorage. It also provided the foundation for a comprehensive research project (ADVPP I) that identified risk and protective factors through the use of victim surveys, focus groups, agency interviews, and professional literature review.

DHHS was able to identify the risk and protective factors at each level, or domain, for domestic violence. The domains were the strata where the opportunities existed for prevention or intervention: with victims, abusers, enforcement, courts, emergency services, and the community

Identifying risk and protective factors resulted in the creation of ADVPP II, an effective and successful prevention and intervention strategy for domestic violence in Anchorage. This report follows the model, by providing data analysis and feedback to the public on the design of services.

Figure 52: ADVPP II, A Case Study of the Public Health Model



Batterer Typology

There is growing evidence that domestic violence is not a unitary phenomenon and that a number of distinctions should be considered within the context of the violence such as motivation, gender symmetry, per-couple frequency of incidents, average severity of violence and level of injury, among others. Failure to distinguish typologies confuses efforts to assess potential lethality, risk of escalation and recidivism and the criminal justice system's ability to determine appropriate and effective adjudication of domestic violence cases.

DHHS submitted a proposal to the National Institute of Justice (NIJ) to investigate this topic but did not receive finding. Nevertheless, batterer typologies remain a significant issue impacting criminal justice adjudication and treatment, and DHHS will explore other opportunities to conduct this research.

The proposed project to NIJ would develop a "criminal triage" assessment tool using police incident reports to identify different typologies of domestic violence offenders. A review of recent literature revealed a number of different systems for classifying intimate partner violence (IPV) using demographic information, criminal histories, substance abuse data and mental health disorders. There is substantial overlap and convergence between many of these schemas. However, the terminology and conceptual framework that appeared to most closely reflect the variability observed in APD reports was Johnson's (1995) 'Coercive Controlling Violence (CCV)' and 'Situational Couple Violence (SCV).' CCV is what most people think of when they hear "domestic violence": one person, generally male, seeks to exercise universal power and control over his partner through a variety of tactics, of which violence is only one. The Duluth Model, or 'Power and Control Wheel,' describes this type of violence. SCV, on the other hand, is not embedded in a pervasive pattern of power and control. Rather, violence erupts as a response to a particular conflict or situation. While control may be temporarily involved (e.g. to win an argument), the violence doesn't serve a general interest in completely controlling one's partner. Eventually Johnson added two more categories: Violent Resistance (VR), which is a response (by women) to CCV, and Mutual Controlling Violence (MCV), which, as the name suggests, involves two coercive, controlling and violent partners (Johnson 2006).

A criminal triage assessment tool would expedite criminal case processing by enabling prioritization based on predicted risk of lethality, recidivism, escalation etc. Prioritization can help improve decision-making regarding case screening and disposition. For example, classic domestic violence offenders who seek power and control over their victims are more likely to re-offend, escalate in frequency and violence, and need long-term intensive interventions to impact their behaviors. Although appropriate treatment programs for batterers is a much debated topic, there may be defendants, e.g. female defendants and those whose violence is not embedded in power and control, for whom anger management and/or communication classes may be more appropriate and effective. Matching offenders to specific treatment interventions is efficient, cost-effective and

improves the quality of services and successful outcomes within existing programs (Triage and Placement in Treatment Services, 2005). However, it requires reliable screening and assessment to distinguish offender types in order to refer them to appropriate treatment services. Other outcomes will be improved prosecution statistics and adjudication measures and increased victim safety.

Staff Recommendations

While implementing ADVPP II partners reviewed the system of services and offer the following recommendations:

- Seek funding to maintain this effective design of service.
- Provide compliance checks on felony domestic violence cases.
- Prioritize electronic dissemination of judicial orders and flagging in the Alaska Public Safety Information Network (APSIN) to ensure information is always current.
- Standardize protocols for 'no contact orders' by magistrates.
- Analyze felony domestic violence and sexual assault cases to capture trends.
- Analyze domestic violence cases that include sexual assault.
- Pursue funding to monitor compliance with judgments and related effectiveness of various treatment programs.
- Research elder abuse in Anchorage by analyzing APD reports, MPO cases and inviting the State Adult Protective Services to enhance the understanding of risk factors.
- Evaluate relationship between interpersonal violence and alcohol and drug abuse.

Appendix C.
Protective Order Information

Victims seeking protection from aggressors can obtain a protective order in two ways: through the police if they are involved in a criminal case, or through the court for civil matters. Several types of protective orders—also called restraining orders—are available: 1) domestic violence, 2) stalking, and 3) sexual assault. The Domestic Violence Restraining Order (DVRO) is for victims who have or have had a household relationship with the aggressor, for example a spouse, intimate partner, roommate, or relative. Restraining Orders for Stalking (SRO) and Sexual Assault (SARO) are for victims who do not have a household relationship with the aggressor: for example friends, co-workers, neighbors, or someone unknown to the victim.

Protection orders cover varying lengths of time. An *emergency order* provides 72 hours of protection; an *ex parte* order lasts 20 days; and a *long term* order covers 6 months for SROs and SAROs or one year for DVROs. After the court grants the victim a protective order, an APD officer delivers a copy of the order, for aggressors in Anchorage.

Enforcement of protective orders is generally the responsibility of the victim. If the defendant violates the protective order, the victim must report the violation to authorities. Violations that present potential or real harm to the victim, such as the aggressor following the victim's car, calling the victim's house or assaulting the victim, are to be reported immediately to the police. All other violations, such as failure to pay child support, are to be reported to the judge.

Appendix D.
Anchorage and Alaska Laws Related to Domestic Violence

Note: Please refer to the Alaska Statutes for repeals, additions, or revisions.

AMC 8.10.050 Family violence.

A. It is unlawful for any person to commit the crime of family violence.
B. A person commits the crime of family violence when the person commits the crime of assault as defined in AMC 8.10.010 with knowledge or reckless disregard of the presence of a child or children in the home.
C. In this section, the word "child" means a person under the age of 16 years.(AO No. 2000-95, § 5, 10-16-00; AO No. 2003-73, § 3, 4-22-03)

AMC 8.20.040 Destruction or disconnect of communication equipment

A. It is unlawful for any person to disconnect, injure, or destroy any communication equipment, regardless of whether owned by such person, with the intent to prevent a family member, as defined by subsection.C.2, from communicating with emergency service agencies or others.
B. Violation of this section shall, upon conviction, be punished by a fine of not more than $2,000.00 or imprisonment for not more than six months, or both such fine and imprisonment.

to another person by means of a dangerous instrument;
(2) that person recklessly causes serious physical injury to another person; or
(3) that person recklessly causes serious physical injury to another by repeated assaults, even if each assault individually does not cause serious physical injury.
(b) Assault in the second degree is a class B felony.
Section 220. **Assault in the Third Degree**.

AS 11.41.220. Assault in the Third Degree.

(a) A person commits the crime of assault in the third degree if that person
(1) recklessly
(A) places another person in fear of imminent serious physical injury by means of a dangerous instrument;
(B) causes physical injury to another person by means of a dangerous instrument; or
(C) while being 18 years of age or older
(i) causes physical injury to a child under 10 years of age and the injury reasonably requires
medical treatment;
(ii) causes physical injury to a child under 10 years of age on more than one occasion;
(2) with intent to place another person in fear of death or serious physical injury to the person or the person's family member makes repeated threats to cause death or serious physical injury to another person;
(3) while being 18 years of age or older, knowingly causes physical injury to a child under 16
years of age but at least 10 years of age and the injury reasonably requires medical treatment; or
(4) with criminal negligence causes serious physical injury under AS 11.81.900(b)(56)(B) to another person by means of a dangerous instrument.
(b) In a prosecution under (a)(3) of this section, it is an affirmative defense that, at the time of the alleged offense, the defendant reasonably believed the victim to be 16 years of age or older, unless the victim was under 13 years of age at the time of the alleged offense.

...s family member" means
..., grandchild, parent, grandparent, sibling, uncle, aunt, nephew, or
...,
of the person, whether related by blood, marriage, or adoption;
(2) a person who lives or has lived, in a spousal relationship with the person;
(3) a person who lives in the same household as the person; or
(4) a person who is a former spouse of the person or is or has been in a dating, courtship, or engagement relationship with the person.
(d) Assault in the third degree is a class C felony
Section 230. **Assault in the Fourth Degree.**

AS 11.41.230. Assault in the Fourth Degree.

(a) A person commits the crime of assault in the fourth degree if
(1) that person recklessly causes physical injury to another person;
(2) with criminal negligence that person causes physical injury to another person by means
of a dangerous instrument; or
(3) by words or other conduct that person recklessly places another person in fear of imminent physical injury.
(b) Assault in the fourth degree is a class A misdemeanor.
Section 250. **Reckless Endangerment**.

AS 11.41.250. Reckless Endangerment.

(a) A person commits the crime of reckless endangerment if the person recklessly engages
in conduct which creates a substantial risk of serious physical injury to another person.
(b) Reckless endangerment is a class A misdemeanor.

AS 11.51.100. Endangering the Welfare of a Child in the First Degree.

(a) A person commits the crime of endangering the welfare of a child in the first degree if,
being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person
(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;
(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person
(A) is registered or required to register as a sex offender under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;
(B) has been charged by complaint, information, or indictment with a violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or
(C) has been charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; or
(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child.
(b) In this section, "physically mistreated" means
(1) having committed an act punishable under AS 11.41.100 - 11.41.250; or
(2) having applied force to a child that, under the circumstances in which it was applied, or considering the age or physical condition of the child, constitutes a gross deviation from the standard of conduct that a reasonable person would observe in the situation because of the substantial and unjustifiable risk of
(A) death;
(B) serious or protracted disfigurement;
(C) protracted impairment of health;
(D) loss or impairment of the function of a body member or organ;
(E) substantial skin bruising, burning, or other skin injury;

bleeding or subdural hematoma;
(G) bone fracture; or
(H) prolonged or extreme pain, swelling, or injury to soft tissue.
(c) Endangering the welfare of a child in the first degree under (a)(1) or (2) of this section is a class C felony.
(d) Endangering the welfare of a child in the first degree under (a)(3) of this section is a
(1) class B felony if the child dies;
(2) class C felony if the child suffers sexual contact, sexual penetration, or serious physical injury; or
(3) class A misdemeanor if the child suffers physical injury.

AS 11.51.110. Endangering the Welfare of a Child in the Second Degree.

(a) A person commits the crime of endangering the welfare of a child in the second degree if the person, while caring for a child under 10 years of age,
(1) causes or allows the child to enter or remain in a dwelling or vehicle in which a controlled substance is stored in violation of AS 11.71; or
(2) is impaired by an intoxicant, whether or not prescribed for the person under AS 17.30, and there is no third person who is at least 12 years of age and not impaired by an intoxicant present to care for the child.
(b) In this section,
(1) "impaired" means that a person is unconscious or a person is physically or mentally affected so that the person does not have the ability to care for the basic safety or personal needs of a child with the caution characteristic of a sober person of ordinary prudence;
(2) "intoxicant" has the meaning given in AS 47.10.990 .
(c) Endangering the welfare of a child in the second degree is a violation.

AS 12.30.027. Release in Domestic Violence Cases.

(a) Before ordering release before or after trial, or pending appeal, of a person charged with or convicted of a crime involving domestic violence, the court shall consider the safety of the alleged victim or other household member. To protect the alleged victim, household member, and the public and to reasonably assure the person's appearance, the court may impose bail and any of the conditions authorized under AS 12.30.020 , any of the provisions of AS 18.66.100(c)(1) - (7) and (11), and any other condition necessary to protect the alleged victim, household member, and the public, and to ensure the appearance of the person in court, including ordering the person to refrain from the consumption of alcohol.
(b) A court may not order or permit a person released under (a) of this section to return to the residence of the alleged victim or the residence of a petitioner who has a protective order directed to the person and issued or filed under AS 18.66.100 - 18.66.180.
(c) If the court imposes CORs under (a) of this section, it shall
(1) issue a written order specifying the conditions of release;
(2) provide a copy of the order to the person arrested or charged; and

(3) immediately distribute a copy of the order to the law enforcement agency that arrested the person.
(d) When a person is released from custody under (a) of this section,
(1) from a correctional facility, the correctional facility shall notify the prosecuting authority and the prosecuting authority shall make reasonable efforts to immediately notify the alleged victim of the release, and to furnish the alleged victim with a copy of the order setting any conditions of release;
(2) from other than a correctional facility, the arresting authority shall make reasonable efforts to immediately notify the alleged victim of the release, and to furnish the alleged victim with a copy of the order setting any conditions of release.
(e) A person arrested for a crime involving domestic violence may not be released from custody until the person has appeared in person before a judicial officer or telephonically for arraignment.
(f) A person may not bring a civil action for damages for a failure to comply with the provisions of this section.
(g) In this section, "crime involving domestic violence" has the meaning given in AS 18.66.990 .

AS 18.65.510. Domestic Violence Training.

(a) Each established police training program in the state shall provide training that acquaints police officers with
(1) laws relating to substantive crimes and rules of criminal procedure applicable in cases involving domestic violence;
(2) techniques for handling incidents of domestic violence that promote the safety of the victim and the officer and that reduce the likelihood of recurrence;
(3) the investigation and management of cases involving domestic violence and report writing for those cases;
(4) organizations in the state that offer aid or shelter to victims of domestic violence;
(5) procedures applicable in the prosecution of cases involving domestic violence;
(6) orders that may be issued by or filed with a court under AS 18.66.100 - 18.66.180;
(7) the notification to be given to victims of domestic violence under AS 18.65.520 ; and
(8) the subjects set out in AS 18.66.310 (d).
(b) In providing a training program under this section, each agency or institution offering an established police training program shall consult with the Council on Domestic Violence and Sexual Assault and interested individuals and organizations providing assistance to victims of domestic violence.

AS 18.65.515. Duties of Peace Officer in a Crime Involving Domestic Violence.

(a) A peace officer investigating a crime involving domestic violence shall protect the victim and any member of the victim's family and prevent further violence by
(1) transporting an adult victim and any member of the victim's family from the place of the offense or the place of contact, to a location within the community where the offense

occurred that is a shelter, a safe home, or another location in the community requested by the victim;
(2) assisting the victim in removing from the residence essential items belonging to the victim, such as clothing, vehicles, medication, personal records, and legal documents;
(3) assisting the victim and any member of the victim's family in obtaining medical treatment necessitated by the offense, by contacting emergency medical services or by transporting the victim to a local medical facility, if available in the community where the offense occurred; and
(4) providing notice of the rights of victims and services available to victims of domestic violence as provided in AS 18.65.520 .
(b) If a peace officer investigating a crime involving domestic violence determines that it is necessary to protect the victim or the victim's family from domestic violence or to protect the officer or the public during the investigation, the officer may (1) seize a deadly weapon in plain view of the officer, and (2) if a deadly weapon was actually possessed during or used in the domestic violence, seize all deadly weapons owned, used, possessed, or within the control of the alleged perpetrator. If the weapon is not needed as evidence in a criminal case, the law enforcement agency having custody of the weapon, within 24 hours of making the determination that the weapon is not needed as evidence in a criminal case, shall make the weapon available for pickup by the owner of the weapon during regular business hours.

AS 18.65.520. Notification to Victims of Domestic Violence.

(a) A peace officer investigating a crime involving domestic violence shall orally and in writing inform the victim of the rights of victims of domestic violence and the services available to them. The notice must be in substantially the following form: If you are the victim of domestic violence and you believe that law enforcement protection is needed for your physical safety, you have the right to request that the officer assist in providing for your safety, including asking for an emergency protective order. You may also request the officer to assist you in obtaining your essential personal belongings and locating and taking you to a safe place, including a designated meeting place or shelter, the residence of a household member or friend, or a similar place of safety. In some places in Alaska there are organizations that provide aid and shelter to victims of domestic violence. The nearest organization is located at _____ . If you are in need of medical treatment, you may request that the officer assist you in obtaining medical treatment. You may obtain information about whether the prosecuting attorney will file a criminal complaint about the domestic violence. Additionally, the victim/witness assistance program of the Department of Law may be able to help you. This information is available from the district attorney's office, which is located at _____ . You also have the right to file a petition in court requesting a protective order that may include any of the following provisions:
(1) prohibit your abuser from threatening to commit or committing further acts of domestic violence;
(2) prohibit your abuser from stalking, harassing, telephoning, contacting, or otherwise communicating with you, directly or indirectly;
(3) remove your abuser from your residence;

(4) order your abuser to stay away from your residence, school, place of employment, or any other specified place frequented by you or another designated household member;
(5) prohibit your abuser from entering your vehicle or a vehicle you occupy;
(6) prohibit your abuser from using or possessing a deadly weapon if the court finds your abuser was in the actual possession of or used a weapon during the commission of your abuse;
(7) direct your abuser to surrender any firearm owned or possessed by that person if the court finds your abuser was in the actual possession of or used a firearm during the commission of your abuse;
(8) request a peace officer to accompany you to your residence to ensure your safe possession of the residence, vehicle, or other items, or to ensure your safe removal of personal items from the residence;
(9) award temporary custody of a minor child to the petitioner and may arrange for visitation with a minor child if the safety of the child and the petitioner can be protected;
(10) grant you possession and use of a vehicle and other essential personal effects;
(11) prohibit your abuser from consuming controlled substances;
(12) require your abuser to pay support for you or a minor child in your care if there is an independent legal obligation of your abuser to support you or the child;
(13) require your abuser to reimburse you for your expenses caused by domestic violence, including medical bills, or for your costs in getting a protective order;
(14) order your abuser to participate in an intervention program for batterers; and
(15) other relief the court determines to be necessary for your safety.
The forms you need to obtain a protective order are available from the nearest court. It is not necessary to have an attorney to obtain a protective order, but you may consult an attorney if you choose. If you would like help obtaining a protective order, you may contact the nearest domestic violence program located at _____. The program can also tell you about other resources available in this community for information about domestic violence, treatment of injuries, and places of safety and shelter.
You may also qualify for compensation from the Violent Crimes Compensation Board. The board may be contacted at _____ .
(b) If the victim of domestic violence does not understand English, the police officer shall make reasonable efforts to inform the victim of the services and rights specified in (a) of this section in a language the victim understands.
(c) [Repealed, Sec. 72 ch 64 SLA 1996].

AS 18.65.530. Mandatory Arrest For Crimes Involving Domestic Violence, Violation of Protective Orders, and Violation of Conditions of Release.

(a) Except as provided in (b) or (c) of this section, a peace officer, with or without a warrant, shall arrest a person if the officer has probable cause to believe the person has, either in or outside the presence of the officer, within the previous 12 hours,
(1) committed domestic violence, except an offense under AS 11.41.100 - 11.41.130, whether the crime is a felony or a misdemeanor;
(2) committed the crime of violating a protective order in violation of AS 11.56.740 (a)(1);
(3) violated a condition of release imposed under AS 12.30.027 .

(b) If a peace officer receives complaints of domestic violence from more than one person arising from the same incident, the officer shall evaluate the conduct of each person to determine who was the principal physical aggressor. If the officer determines that one person was the principal physical aggressor, the other person or persons need not be arrested. In determining whether a person is a principal physical aggressor, the officer shall consider
(1) prior complaints of domestic violence;
(2) the relative severity of the injuries inflicted on each person;
(3) the likelihood of future injury from domestic violence to each person; and
(4) whether one of the persons acted in defense of self or others.
(c) A peace officer is not required to make an arrest under (a) of this section if the officer has received authorization not to arrest from a prosecuting attorney in the jurisdiction in which the offense under investigation arose.
(d) When investigating a crime involving domestic violence, a peace officer may not threaten or suggest the possible arrest of all persons involved in the same incident in a manner that would have a tendency to discourage requests for intervention by law enforcement in incidents involving domestic violence.
(e) In addition to the contents of any other report, a peace officer who does not make an arrest after investigating a complaint of domestic violence, or who arrests two or more persons based on the same incident, shall describe in writing the reasons for not making an arrest or for arresting more than one person.
(f) A person may not bring a civil action for damages for a failure to comply with the provisions of this section.

AS 18.65.540. Central Registry of Protective Orders.

(a) The Department of Public Safety shall maintain a central registry of protective orders issued by or filed with a court of this state under AS 18.66.100 - 18.66.180. The registry must include for each protective order the names of the petitioner and respondent, their dates of birth, and the conditions and duration of the order. The registry shall retain a record of the protective order after it has expired.
(b) A peace officer receiving a protective order from a court under AS 18.66.100 - 18.66.180, a modified order issued under AS 18.66.120 , or an order dismissing a protective order, must take reasonable steps to ensure that the order, modified order, or dismissal is entered into the central registry within 24 hours after being received.
(c) A petitioner or respondent who is the subject of a protective order may request the Department of Public Safety to correct information about the order in the central registry. The person requesting the correction has the burden of proving that the information is inaccurate or incomplete. The person may appeal an adverse decision to the court under applicable court rules for appealing the decision of an administrative agency. On appeal, the appellant has the burden of showing that the department's action was an abuse of discretion. An appeal filed under this subsection may not collaterally attack a protective order, challenge the grounds upon which the order was based, or challenge the evidence submitted in support of the order.
(d) The Department of Public Safety may adopt regulations to implement this section.
(e) A person may not bring a civil action for damages for a failure to comply with the

provisions of this section.

AS 18.66.100. Protective Orders: Eligible Petitioners; Relief.

(a) A person who is or has been a victim of a crime involving domestic violence may file a petition in the district or superior court for a protective order against a household member. A parent, guardian, or other representative appointed by the court under this section may file a petition for a protective order on behalf of a minor. The court may appoint a guardian ad litem or attorney to represent the minor. Notwithstanding AS 25.24.310 or this section, the office of public advocacy may not be appointed as a guardian ad litem or attorney for a minor in a petition filed under this section unless the petition has been filed on behalf of the minor.
(b) When a petition for a protective order is filed, the court shall schedule a hearing and provide at least 10 days' notice to the respondent of the hearing and of the respondent's right to appear and be heard, either in person or by an attorney. If the court finds by a preponderance of evidence that the respondent has committed a crime involving domestic violence against the petitioner, regardless of whether the respondent appears at the hearing, the court may order any relief available under (c) of this section. The provisions of a protective order issued under (1) (c)(1) of this section are effective until further order of the court; (2) (c)(2) - (16) of this section are effective for six months unless earlier dissolved by court order.
(c) A protective order under this section may
(1) prohibit the respondent from threatening to commit or committing domestic violence, stalking, or harassment;
(2) prohibit the respondent from telephoning, contacting, or otherwise communicating directly or indirectly with the petitioner;
(3) remove and exclude the respondent from the residence of the petitioner, regardless of ownership of the residence;
(4) direct the respondent to stay away from the residence, school, or place of employment of the petitioner or any specified place frequented by the petitioner or any designated household member;
(5) prohibit the respondent from entering a propelled vehicle in the possession of or occupied by the petitioner;
(6) prohibit the respondent from using or possessing a deadly weapon if the court finds the respondent was in the actual possession of or used a weapon during the commission of domestic violence;
(7) direct the respondent to surrender any firearm owned or possessed by the respondent if the court finds that the respondent was in the actual possession of or used a firearm during the commission of the domestic violence;
(8) request a peace officer to accompany the petitioner to the petitioner's residence to ensure that the petitioner
(A) safely obtains possession of the petitioner's residence, vehicle, or personal items; and
(B) is able to safely remove a vehicle or personal items from the petitioner's residence;
(9) award temporary custody of a minor child to the petitioner and may arrange for visitation with a minor child if the safety of the child and the petitioner can be protected; if visitation is allowed, the court may order visitation under the conditions provided in

AS 25.20.061;
(10) give the petitioner possession and use of a vehicle and other essential personal items, regardless of ownership of the items;
(11) prohibit the respondent from consuming controlled substances;
(12) require the respondent to pay support for the petitioner or a minor child in the care of the petitioner if there is an independent legal obligation of the respondent to support the petitioner or child;
(13) require the respondent to reimburse the petitioner or other person for expenses associated with the domestic violence, including medical expenses, counseling, shelter, and repair or replacement of damaged property;
(14) require the respondent to pay costs and fees incurred by the petitioner in bringing the action under this chapter;
(15) order the respondent, at the respondent's expense, to participate in (A) a program for the rehabilitation of perpetrators of domestic violence that meets the standards set by, and that is approved by, the Department of Corrections under AS 44.28.020 (b), or
(B) treatment for the abuse of alcohol or controlled substances, or both; a protective order under this section may not require a respondent to participate in a program for the rehabilitation of perpetrators of domestic violence unless the program meets the standards set by, and that is approved by, the Department of Corrections under AS 44.28.020(b);
(16) order other relief the court determines necessary to protect the petitioner or any household member.
(d) If the court issues a protective order under this section, it shall
(1) make reasonable efforts to ensure that the order is understood by the petitioner and by the respondent, if present; and
(2) have the order delivered to the appropriate local law enforcement agency for expedited service and for entry into the central registry of protective orders under AS 18.65.540 .
(e) A court may not deny a petition for a protective order under this section solely because of a lapse of time between an act of domestic violence and the filing of the petition.

AS 18.66.400. Domestic Violence Fatality Review Teams.

(a) The commissioner of public safety may establish domestic violence fatality review teams in areas of the state. A municipality may establish a domestic violence fatality review team in a municipality. When the investigation of fatal incidents of domestic violence and incidents of domestic violence involving serious physical injury has been completed or adjudicated by law enforcement or at an earlier appropriate time, a domestic violence fatality review team may review those incidents for the purpose of preventing domestic-violence-related fatalities, improving the response of law enforcement and other agencies to domestic violence, and providing consultation and coordination for agencies involved in the prevention and investigation of domestic violence. The review may include a review of events leading up to the domestic violence incident, available community resources, current laws and policies, actions taken by agencies and persons related to the incident and persons involved in the incident, and other information the team determines to be relevant to the review. The confidential and other records of a

department or agency of the state or a municipality relating to the domestic violence incident may be examined by the domestic violence fatality review team or a member of the team. The domestic violence fatality review team and each member of the team shall preserve the confidentiality of any records examined. In this subsection, "serious physical injury" has the meaning given in AS 11.81.900.
(b) The membership of a domestic violence fatality review team shall be determined by the commissioner of public safety or the municipality, as appropriate. Membership may include representatives from
(1) law enforcement agencies within the area or municipality;
(2) the district attorney for the area or municipality and municipal prosecutor if created by a municipality;
(3) the office of the chief medical examiner;
(4) the Department of Corrections;
(5) employees of the Department of Health and Social Services who deal with domestic violence;
(6) local agencies and organizations involved with crime victim and domestic violence protection, reporting, and counseling and assistance;
(7) other organizations, departments, and agencies determined to be appropriate.
(c) The victims' advocate under AS 24.65 is an ex officio member of each domestic violence fatality review team created under this section and may attend any meeting and review any information available to or considered by a team.
(d) Except for a public report issued by a domestic violence fatality review team that does not contain confidential information, records or other information collected by a team or any member of a team related to duties under this section is confidential and not subject to public disclosure under AS 40.25.100 and 40.25.110. Meetings of a domestic violence fatality review team are closed to the public and are not subject to the provisions of AS 44.62.310 and 44.62.312.
(e) The determinations, conclusions, and recommendations of a domestic violence fatality review team or its members are not admissible in a civil or criminal proceeding. A member may not be compelled to disclose a determination, conclusion, recommendation, discussion, or thought process through discovery or testimony in a civil or criminal proceeding. Records and information collected by the team are not subject to discovery or subpoena in connection with a civil or criminal proceeding.
(f) Notwithstanding (e) of this section, an employee of a state or a municipal agency may testify in a civil or criminal proceeding concerning cases reviewed by a domestic violence fatality review team even though the agency's records were reviewed by a team and formed the basis of that employee's testimony and the team's report.
(g) A person who serves on a domestic violence fatality review team is not liable for damages or other relief in an action brought by reason of the performance of a duty, function, or activity of the team.

AS 18.66.990. Definitions.

In this chapter,
(1) "council" means the Council on Domestic Violence and Sexual Assault;

(2) "crisis intervention and prevention program" means a community program that provides information, education, counseling, and referral services to individuals experiencing personal crisis related to domestic violence or sexual assault and to individuals in personal or professional transition, excluding correctional half-way houses, outpatient mental health programs, and drug or alcohol rehabilitation programs;
(3) "domestic violence" and "crime involving domestic violence" mean one or more of the following offenses or an offense under a law or ordinance of another jurisdiction having elements similar to these offenses, or an attempt to commit the offense, by a household member against another household member:
(A) a crime against the person under AS 11.41;
(B) burglary under AS 11.46.300 - 11.46.310;
(C) criminal trespass under AS 11.46.320 - 11.46.330;
(D) arson or criminally negligent burning under AS 11.46.400 - 11.46.430;
(E) criminal mischief under AS 11.46.475 - 11.46.486;
(F) terrorist threatening under AS 11.56.807 or 11.56.810;
(G) violating a domestic violence order under AS 11.56.740 ; or
(H) harassment under AS 11.61.120 (a)(2) - (4);
(4) "domestic violence program" means a program that provides services to the victims of domestic violence, their families, or perpetrators of domestic violence;
(5) "household member" includes
(A) adults or minors who are current or former spouses;
(B) adults or minors who live together or who have lived together;
(C) adults or minors who are dating or who have dated;
(D) adults or minors who are engaged in or who have engaged in a sexual relationship;
(E) adults or minors who are related to each other up to the fourth degree of consanguinity, whether of the whole or half blood or by adoption, computed under the rules of civil law;
(F) adults or minors who are related or formerly related by marriage;
(G) persons who have a child of the relationship; and
(H) minor children of a person in a relationship that is described in (A) - (G) of this paragraph

Alaskan-Owned and Operated

Alaska Pretrial Services

Third Party Custodian and Defendant Monitoring

Alaska Pretrial Services was founded as a tool to assist the criminal justice system with accurate pre-release information, provide innovative programs and services as tools to judicial officers for pretrial release decisions, and to improve public safety through effective compliance monitoring of defendants in a pretrial environment.

APS Defendant Compliance Management includes a variety of other services and incorporates many other compliance management tools to ensure that the defendant is complying with court-ordered pretrial conditions of release.

1. Random Home & Work Visits
2. Phone and In-Office Check-in by Defendants
3. Management of Drug & Alcohol Monitoring Services
4. Agency Coordination with other criminal justice services
5. Implementation of Safety Plans designed to protect alleged victims and the public
6. Continued Verification of Residence
7. Waiver & Consent for Search of defendant, defendant residence, or any vehicle the defendant is in or has control of for the presence of prohibited or illegal items.
8. Curfew Monitoring & Verification
9. Compliance Reporting for courts and prosecuting attorneys.

Defendant Compliance Management functions as the basic monitoring service that APS programs are built upon.

ALASKA PRETRIAL SERVICES

January 24, 2012

Alaska State Judiciary Committee
and Distinquished Guests
2012 Crime Summit
Alaska State Capitol
Juneau, Alaska

Re: Alaska Pretrial Services Project

Committee Members and Guests,

The Alaska Pretrial Services Project is a defendant funded, privately ran pre-trial third party custodian release option. The program was developed as a solution to fill in the gaps in the current Alaska bail statute with regard to third party custodians and defendant supervision.

On February 27, 2010, my family member was shot and killed, and the suspect attempted to shoot and kill me. The suspect is currently in custody with the Alaska Department of Corrections awaiting trial for murder in the first, attempted murder and reckless endangerment. The defendant was out on bail at the time of the shooting and not under supervision.

Alaska Pretrial Services provides the Alaska Criminal Justice System with current and accurate pre-release information on defendants, family members and any employment. This information is used by prosecution and the judiciary to assist in making the safest decision in the interest of public safety and risk of flight on a defendant's pre-trial release. Our programs then continue in active monitoring and supervising defendants while on bail to assure court-ordered compliance and public safety.

This program is currently being run privately throughout Alaska and has provided a tool to allow supervision and compliance in both rural Alaska and the metropolitan areas while a defendant is on bail.

You will find the information contained in this presentation to be both a public safety solution and an option for potential cost savings platform for the State of Alaska and its residents.

Thank you for the honor of being able to share my passion and commitment to public safety and the community that I have called home my entire life.

Sincerely,

Dennis H. Johnson
Program Director, Alaska Pretrial Service

ALASKA PRETRIAL SERVICES

Third Party Custodian Solutions

ALASKA PRETRIAL SERVICES

..... is a privately ran, defendant funded Pre-Trial Defendant Monitoring Program that was founded in 2009 and developed in 2010 as a tool to assist the Alaska Criminal Justice System with accurate pre-release information. APS provides innovative programs and services as tools to Judicial Officers for pre-trial release decisions. Most importantly it is an avenue to improve both public and victim safety through effective compliance monitoring of defendants in a pre-trial environment.

SecureAlert, Inc. Is Awarded Alaska Pretrial Services Contract .....

ReliAlert™ XC
One-Piece GPS Offender Monitoring Device

ReliAlert™ XC sets the standard for reliability and performance in the offender monitoring industry. Advanced features enable agencies to effectively track offender movements and communicate directly with offenders via on-board two/three-way voice communication technology, all in real-time. ReliAlert™ XC offers multiple monitoring options for agencies – collecting and reporting data as frequently as every 15 seconds during a violation to ensure critical information is available when needed. Working in conjunction with SecureAlert's 24/7/365 live Monitoring Center and TrackerPAL™ monitoring software, ReliAlert™ XC acts as a "force multiplier," providing officers with extra eyes, ears and voice in the monitoring of offenders – increasing productivity and offering peace of mind.

Two/Three-Way Voice Communication allows SecureAlert operators and agency officers to call the offender via the ReliAlert™ XC device at any time – providing real-time violation intervention and reducing the effort spent by officers attempting to communicate with offenders.

Onboard 95-db Siren is a unique feature on the ReliAlert™ XC device that can be activated by the SecureAlert Monitoring Center as part of a violation protocol. The siren alerts victims and the public to an offender violation, helps safely assist officers with offender recovery and improves public safety.

SecureCuff™ is an optional, patent-pending, hardened steel encased security cuff for high-risk offenders. The SecureCuff™ provides valuable, extra response time for officers when offenders are attempting to abscond. When used in conjunction with live voice intervention, ReliAlert™ XC becomes the premier GPS solution for monitoring challenging offender populations.

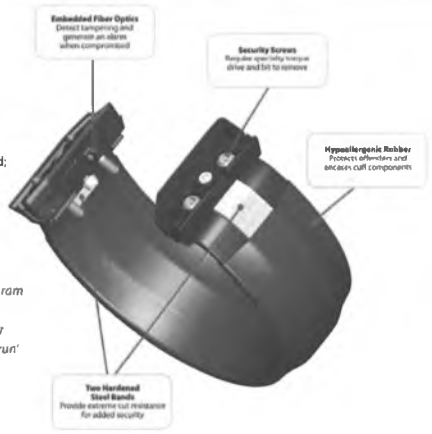
SECUREALERT
Reliability. Peace of Mind.

SecureCuff™
For High-Risk Offenders

SecureAlert's patent pending SecureCuff™ is the only security cuff in the industry specifically made for high-risk offenders. It has encased, hardened steel bands designed to be highly cut resistant and provide officers an additional 10-15 minutes to be on-site before an offender can abscond. The SecureCuff™ includes a fiber-optic technology strap for tampering notification and specialized security screws to secure the strap to the device. The SecureCuff™ solution helps address the critical "strap cut" issue so prevalent in juveniles and high-risk adult offenders. It serves to significantly reduce the number of officer response hours attempting to locate offenders who have absconded and is not offered by any other offender monitoring company.

SecureCuff™ Specifications

- ***Encased, Hardened Steel Bands:*** each hardened steel band is 1/2" wide and 1/16" thick
- ***Anti-Tamper Features:*** extreme cut-resistant, dual steel bands; embedded fiber optics; security screws for installation/removal
- ***Sizing:*** measurement tool provided; multiple, pre-cut sizes available
- ***GPS Device:*** utilized with ReliAlert™ and ReliAlert™ XC



"The reliability of the SecureCuff™ provides peace of mind for our program and the community; and avoids the uncertainty that a defendant's 'spur of the moment decision to 'cut and run' is no longer an available choice."

-Dennis Johnson, Director
Alaska Pretrial Services

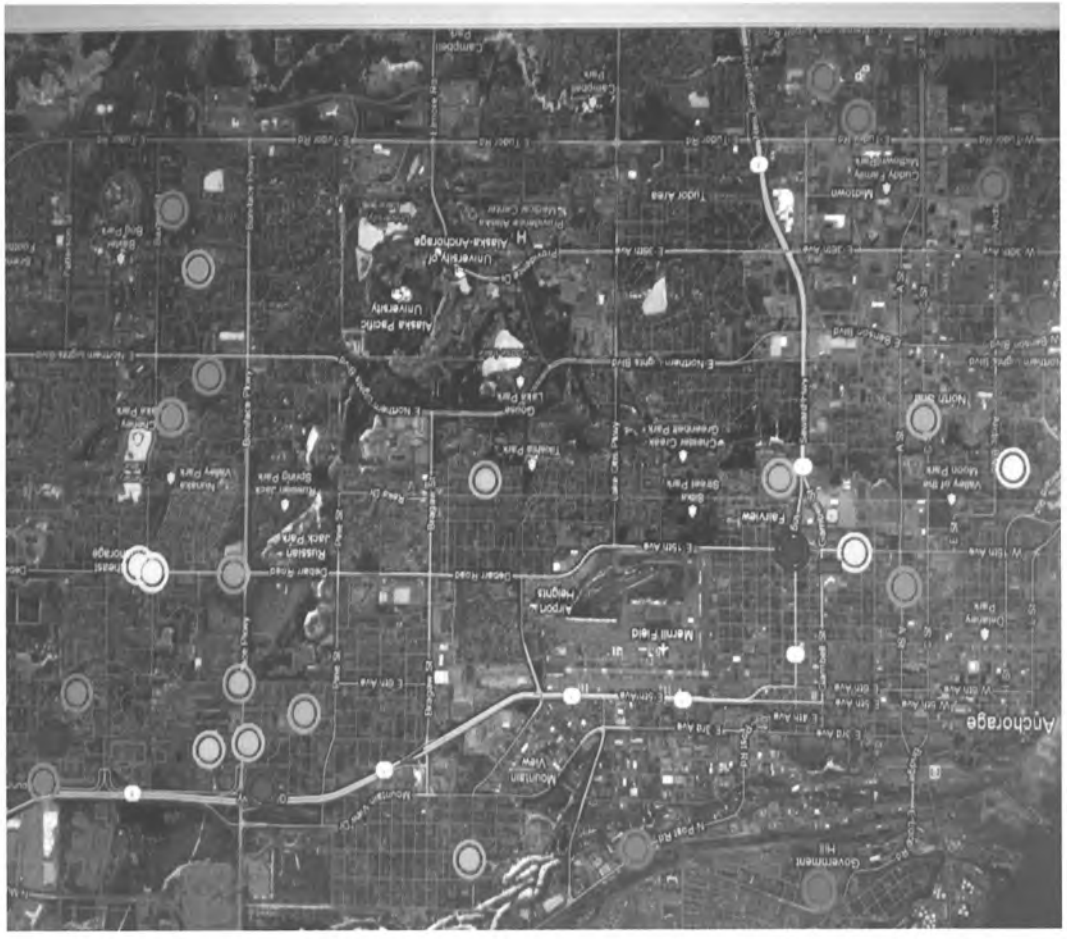
Law Enforcement Crime Scene Reporting

***photo taken January 13, 2012**

Alaska Pretrial Service's Program can provide Law Enforcement Personnel with the exact location of Defendants under our supervision in the area where a crime has occurred. This information can be sorted by different categories to assist the investigation with possible suspects.



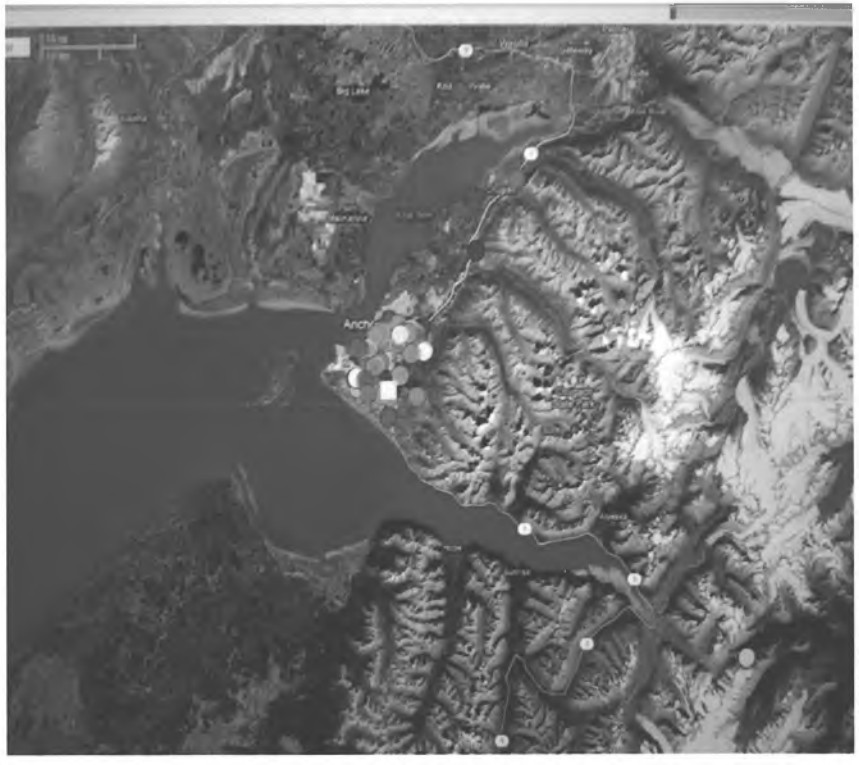
STATE OF ALASKA average cost of incarceration per day per Offender

$134.90*

*2011 Alaska Legislative Session

ALASKA PRETRIAL SERVICES operates at 62.5% less per day at a private level.

… As a defendant funded elective program this is a cost savings to Alaskans of $18,751.10 per day based on the 139 Offenders currently assigned to ALASKA PRETRIAL SERVICES for supervision. (60 day average pre-trial incarceration cost of $1,125,066.00)



2011 ALASKA PRETRIAL SERVICES PROJECT

- From 2011 to date APS has been approved / provided supervision for 236 pre-trial defendants as a Third Party Custodian Entity.
- Of the 236 defendants APS remanded 41 defendants for violations of bail conditions.
- 19 of the defendants received additional felony charges as a direct result of the APS violation remands.
- 5 of the violations were direct immediate threats to domestic violence victims or involved no contact order violations.
- 4 defendants attempted to tamper and remove the device and were remanded by APS back to DOC with bail being revoked.
- 18 defendants were remanded for alcohol violations while out on DUI / OUI charges.
- 56 defendants completed pre-trial supervision successfully without any violations and have been released.

ALASKA PRETRIAL SERVICES

This was accomplished with .....

- 4 Compliance Officers in our Anchorage Main Office
- 2 Compliance Officers in our Fairbanks Office
- 2 Compliance Officers in our Kenai Office
- 3 Full Time administrative assistants

..... 3 of the personnel above on this project are full time volunteers, including myself.

All my staff and I are committed to providing a means of continued public safety while providing a cost effective way to supervise those entitled to fair and reasonable bail.

Dennis Johnson, Director

Company Solutions

Electronic Monitoring and Services

SecureAlert Delivers a Full Product and Services Portfolio

A Cost Effective Solution To Meet Every Need

ReliAlert™ GPS solutions are designed to match the level of risk of the offender and your budget. Solutions range from cost-effective monitoring of nonviolent offenders and juveniles to specialized solutions for high-risk offenders like gang members, domestic violence and sex offenders. In addition to 30+ hours of battery life, all solutions include:

- Improved Tamper Resistance
- Better Communications Capability
- Easier Access to Critical Reports and Information
- Tracking Accuracy
- 24 x 7 Real-time Monitoring Center Support

ReliAlert™ MAX features our patented, stainless steel, laminated SecureCuff, Watch-dog Services and Live Monitoring Center Intervention for maximum offender visibility and violation intervention.

ReliAlert™ Premium Solutions are effective when budget constraints limit options, but a high level of offender supervision and real-time notification is still required. Premium Solutions report violations as they occur through our cellular communications network and Monitoring Center Intervention is available.

ReliAlert™ Standard Solutions are also active monitoring solutions, but do not include the Live Monitoring Center Intervention and three-way voice communication.

ReliAlert™ Passive Solution works when minimal offender supervision and immediate response to violations is not required. Information is provided on a delayed basis.

ReliAlert™ GPS Device

Watchdog Monitoring Services is part of the ReliAlert™ MAX solution and gives priority in terms of monitoring to ensure a more vigilant resolution to customer-defined protocols.

ReliAlert™ GPS Solutions

This quick reference chart is designed to help you select the SecureAlert Solution that best suits your needs based on each offender's risk profile. Transitioning from one ReliAlert™ solution to another is easy. No equipment change is required for this seamless transistion – a real time savings for your officers.

Remote Alcohol Solutions

Remote Alcohol Solutions Monitoring Systems

TrueDetect MEMS 3000 remote alcohol monitoring system from Elmo Tech is available in landline and cellular versions to manage offenders with alcohol compliance requirements. TrueDetect MEMS 3000 utilizes court approved test methodology used by law enforcement agencies worldwide. The TrueDetect MEMS 3000 enables agencies to accurately monitor an individual's alcohol levels as an independent measure or in combination with a restrictive home detention schedule. The system requires minimal training of staff and program participants.

TrueDetect MEMS 3000 offers a broad array of features including:

- Quick enrollment process with fast, reliable test results
- Support of an unlimited number of tests: scheduled, random, or on-demand tests with automatic re-testing
- Customizable testing frequency
- Sessions take no longer than one-minute to complete
- Immediate report to multiple remote locations

Reliable identification using color picture verification and multiple tamper and malfunction alerts.

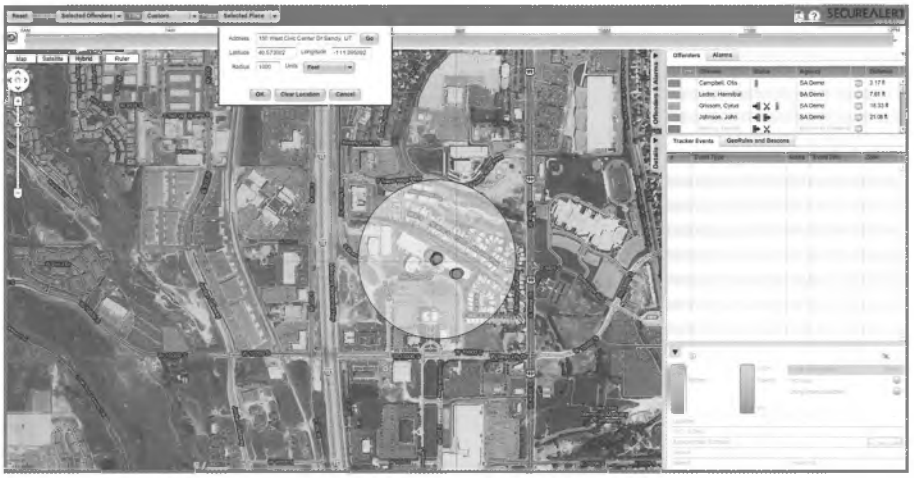
Reliably Delivering Peace of Mind *SecureAlert offers a full line of electronic monitoring solutions that includes GPS, RF, and alcohol complemented by a wide range of Professional Services. We work closely with agencies to streamline offender monitoring program workflows; thereby addressing budgetary constraints and increasing officer productivity. ▲ Agencies must be able to rely on the electronic monitoring products and services they choose . With an out-of-box reliability of 99.9%, our ReliAlert™ GPS device provides agencies with peace of mind knowing that they have made the right choice to effectively monitor offenders and ensure community safety. We are committed to offering products and services that make your job easier, as evident with our integration of Google Maps™ into our software interface.*

SecureCuff

Electronic monitoring has been plagued by high-risk offenders that cut straps and run – until now. SecureCuff's patent-pending design gives officers more time to respond to strap tamper alarms. The SecureCuff has a laminated fiber optic tamper alarm cable between two hardened stainless steel bands. If an offender cuts through the first stainless steel band, the fiber optic cable triggers an alarm. The offender still needs more time to cut through the second band, giving officers to time to successfully respond to and prevent a potential "cut and run".

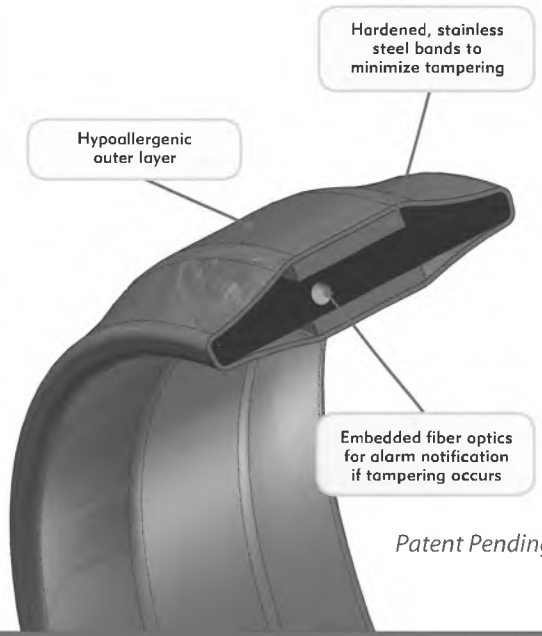


Crime Scene review is simple. Enter the time, address, and radius; then select "OK."

Crime Scene Software

For ease of use, the SecureAlert Crime Scene software seamlessly integrates into our main mapping application through a single dropdown box. Users find that it is "instantaneous" (response within a second or two) vs. running a multi-hour/multi-day batch job.

The map above shows a circle centered on the address entered and displays all offenders that were in the location within the pre-defined timeframe. To make it even easier, the application sorts the list of offenders in order of their nearest approach to the address point.



Patent Pending SecureCuff

Innovation

From our beginnings, SecureAlert has been committed to continuous improvement and delivering industry-leading innovations like:

- ▲ Patent-pending SecureCuff that reduces potential for strap cuts
- ▲ Patented ActiveTrace that immediately increases tracking capability when an alarm is triggered
- ▲ Two-way and Three-way voice communications via the ReliAlert™ GPS device
- ▲ RF HomeAware Beacon that integrates with our ReliAlert™ GPS device

Home Detention Solutions to Meet Your Needs

HomeAware Beacon (Cellular) is a low-cost, easy to install RF transmitting device electronically tethered to the ReliAlert™ GPS device. This solution communicates via cellular technology, therefore no land line is required. The Beacon's internal battery provides more than one year of service. This is an effective solution for reliably monitoring offenders with low risk profiles and confinement requirements.

HomeAware E3 RF is a presence monitoring system from Elmo Tech that features: high reliability land line or cellular communications, shock resistant and waterproof monitoring unit, with a 48 hour back up battery, multiple tamper alerts, flexible schedule options and range settings. Multiple monitoring capabilities of up to 50 offenders are possible. HomeAware E3 RF Drive-By allows officers to reliably monitor offenders using available mobile field tools. Officers can simply drive by offenders homes to determine if the offender is present.

HomeAware Beacon

E3 RF and E3 RF-Cell Monitors
This low-cost, easy-to-install system reliably monitors offenders with low-risk profiles and confinement requirements. The solution is designed to provide the presence accuracy that ensures community safety and peace of mind.

Our customers receive outstanding monitoring and customer service.

Our training sessions provided via webinars or onsite training.

SecureAlert Monitoring Center

Another difference you will note when choosing SecureAlert as your electronic monitoring service provider is our Monitoring Center. Our customers receive outstanding monitoring and customer service from our highly-qualified staff of operators that are available 24/7/365 via a toll-free number. Consider SecureAlert's live Monitoring Center as an "extension" of your organization. Our highly-trained personnel can assist or even intervene on behalf of your officers, based on their pre-established protocols.

Customer Service

In addition to providing you with reliable products and services that are easy to use, we strive to exceed your expectations. When issues are brought to our attention we don't stop until they are resolved. Services are delivered by three service groups:

- **Technical Support Desk:** In operation 24 hours per day, 7 days per week, 365 days per year to ensure full resolution of technical issues and trouble-free device operation.

- **Monitoring Center:** Operators provide real-time alarm notification to your officers based on the level of support they have selected and the protocols they have established.

- **Account Management:** Account Managers handle all operational issues including: device orders, replacement/ repair requests, and returns. If they are unable to answer or resolve your question; you are immediately escalated to our Technical Help Desk.

Keeping Your Data Secure

SecureAlert's entire network infrastructure features a high security, self- sustained, fully-redundant Class One rated datacenter. The Monitoring Center and its Data Production Center have four layers of power generation redundancy to ensure uninterrupted power and backup Monitoring Center capabilities in case of emergency.

SecureAlert Training

We have a reputation for being an industry-leader in training. Our comprehensive set of offerings are designed to meet the needs of both beginners and users familiar with SecureAlert devices. Remote training sessions via webinars, onsite training and the web-based SecureAlert University means that your personnel will be knowledgeable on the most effective ways to monitor their offenders.

Standing Together Against Rape

Sexual Assault Victimization

Erin Patterson-Sexson, Lead Advocate
Standing Together Against Rape

The Numbers

FY 2011

- 1143 Clients served
- 900 Hospital/SART/CAC responses
- 259 Adult SART Cases
- 13 Anonymous Victim Report

Standing Together Against Rape

The Numbers

FY 2011

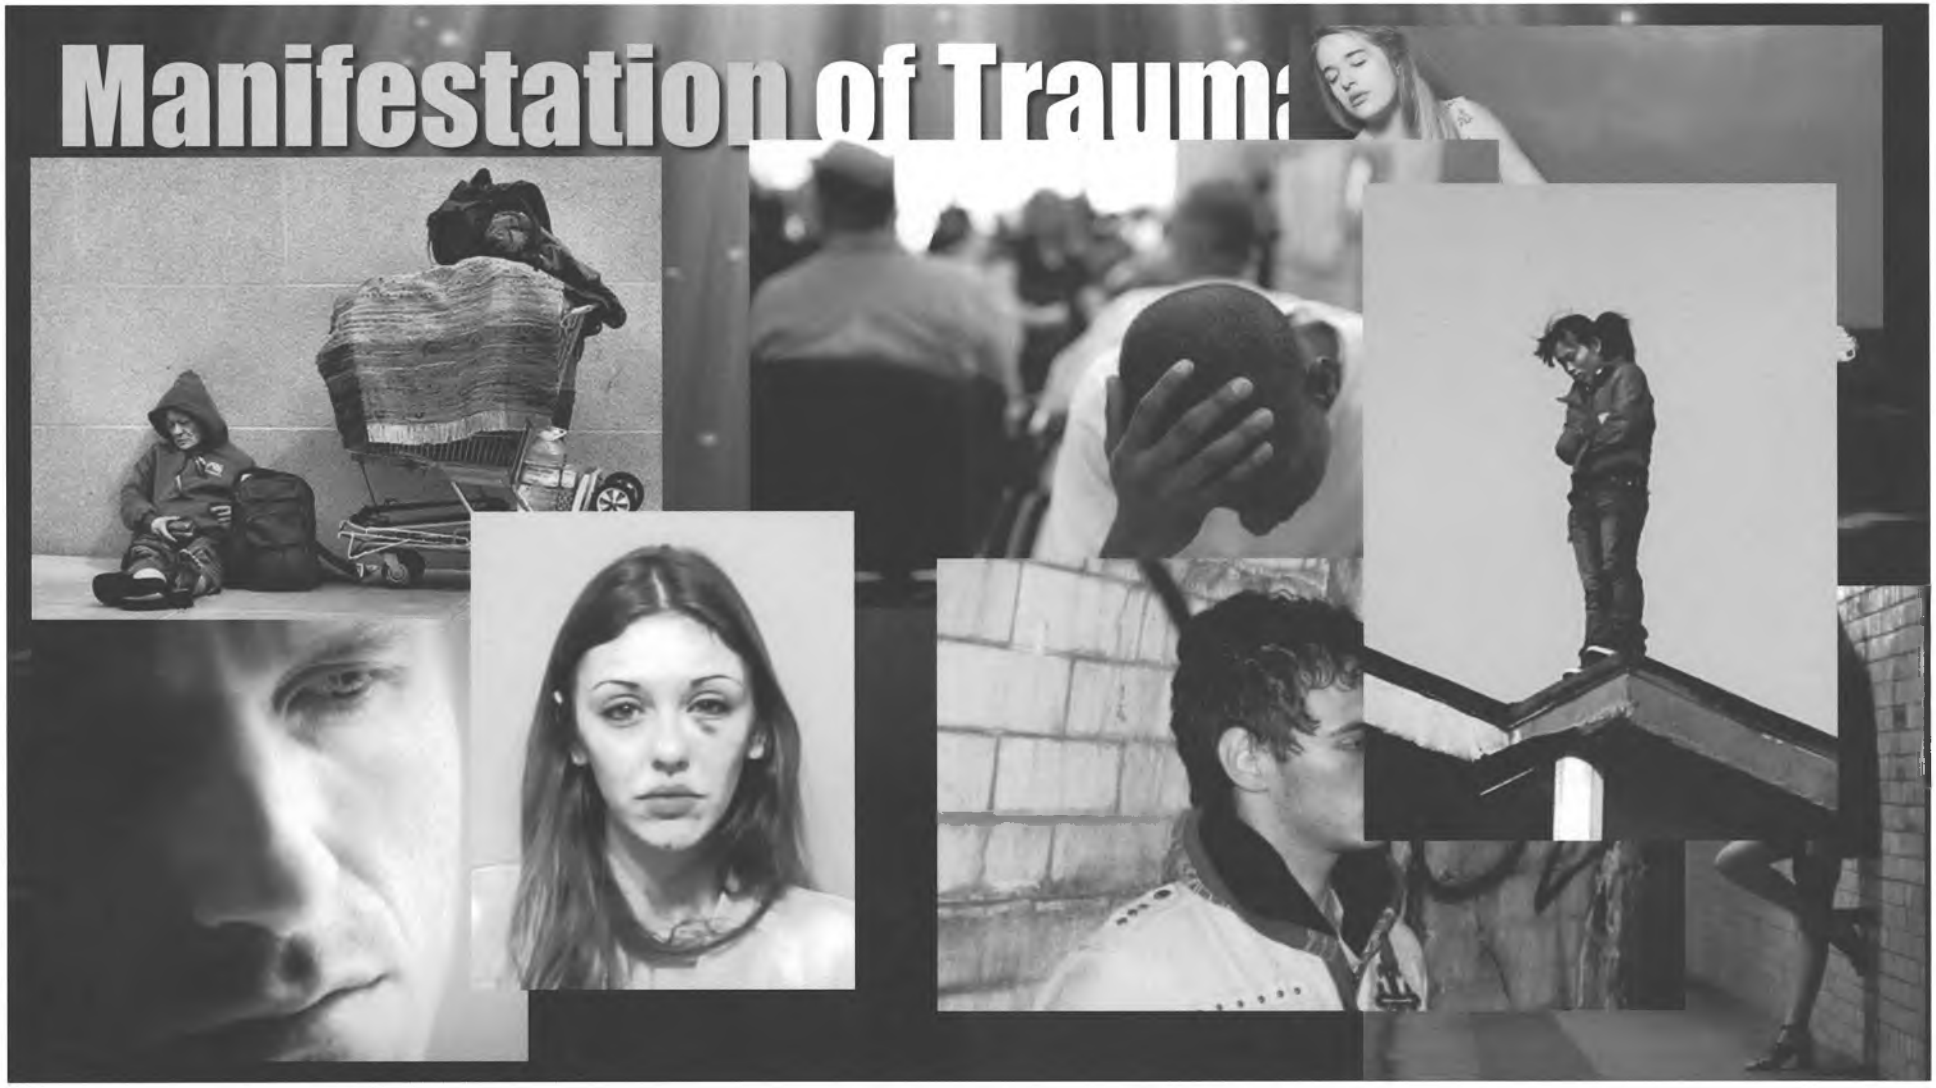
- 5% under 6 years old
- 38% 6-18 years old
- 51% 19-59 years old
- 6% 60 years and older
- 16% are male

The Numbers

FY 2011

- 39% acquaintance
- 31% family member
- 16% stranger
- 14% intimate partner

Standing Together Against Rape

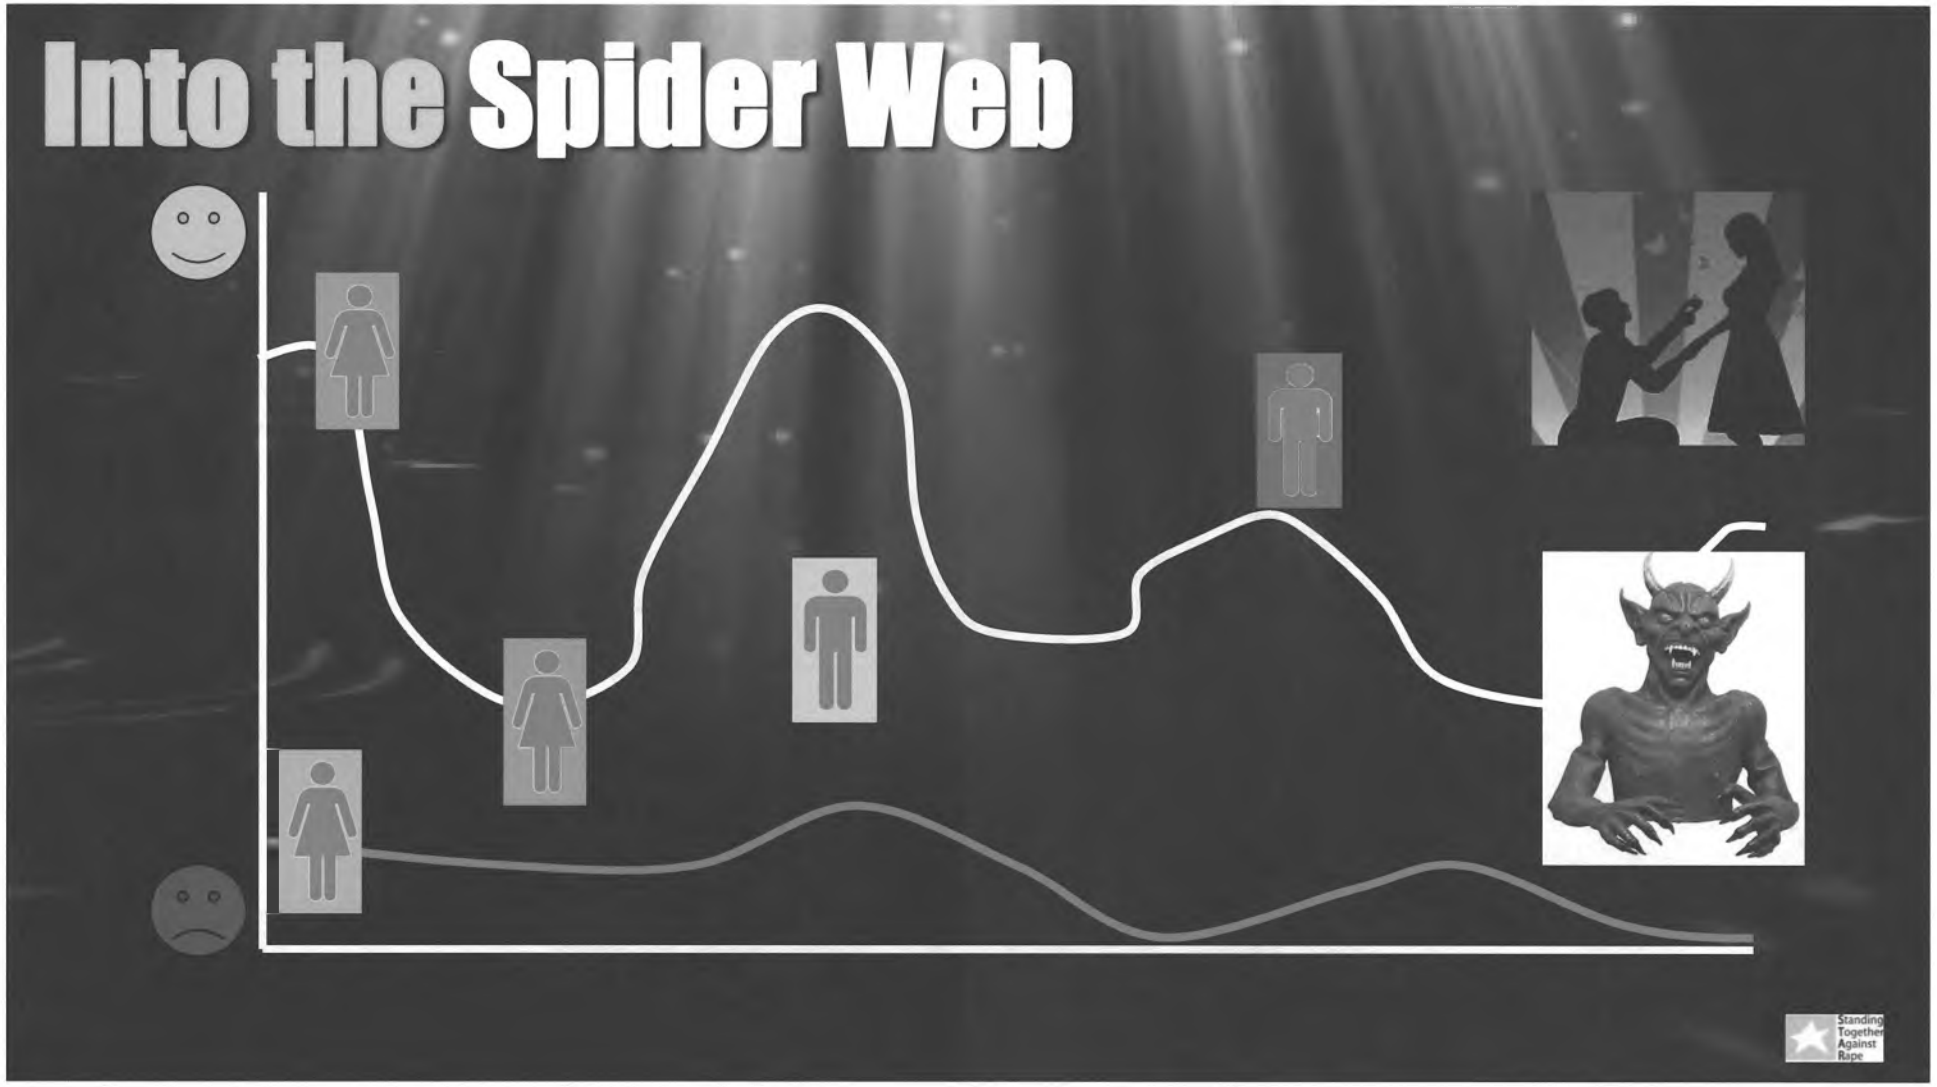


Manifestation of Traum

The Offender looks for...

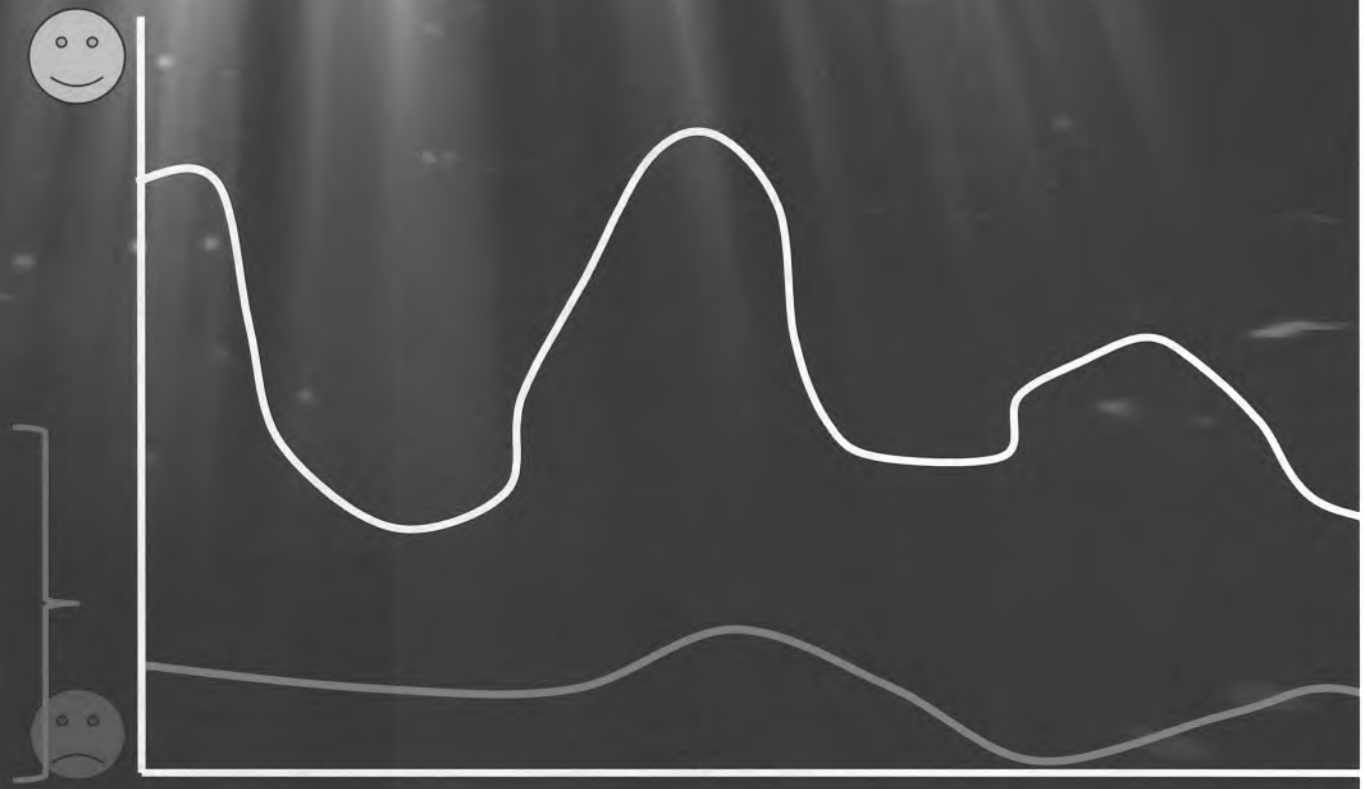
- **Vulnerability**
  - Age. Disability, Intoxication, Distracted, Naive, Innocent
- **A person with a marginalized lifestyle**
  - Questionable credibility, criminal history or behaviors
- **Opportunity**
  - Isolation, in need of assistance, lonely

Standing Together Against Rape



Into the Spider Web
Standing Together Against Rape

Focusing Victim Services



Social Service and Public Safety efforts must be continuously and constantly focused on this population

Standing Together Against Rape

Many victim survivors

- **Lack a safe place to live**

  Homeless, substandard housing, share housing

- **They have no money, no power and at the highest risk for revictimization.**

Our Dilemma

- Many offenders have numerous victims before a crime is reported, investigated, prosecuted and the offender sentenced.
- We release untreated convicted sex offenders to our streets also with no place to go, they end up at homeless shelters and in homeless camps.
- The cycle continues. Victims are victimized and their trauma is magnified.

Standing Together Against Rape

What 's needed?

- Safe, reliable respectful places to go for services.
  - Time to heal
- Less blame and more support.
  - Educated juries
  - Community awareness beyond the myth
- To be believed, to be seen and to be heard.
- To have real and sustainable options.
  - Housing
  - Child Care
  - Treatment
  - Employment
  - Education

Standing Together Against Rape

Trends

- Increased violent/lethal assaults
- More homeless
- Complex issues
  - Immigration
  - Custody
- Internet used to
  - Drawn in
  - Harass
  - Stalk
- Revictimization

But also…

- Increased prosecution in Anchorage
- Greater public awareness
- An exceptional SVU
- Dynamic SART Team

Standing Together Against Rape

Thank you.

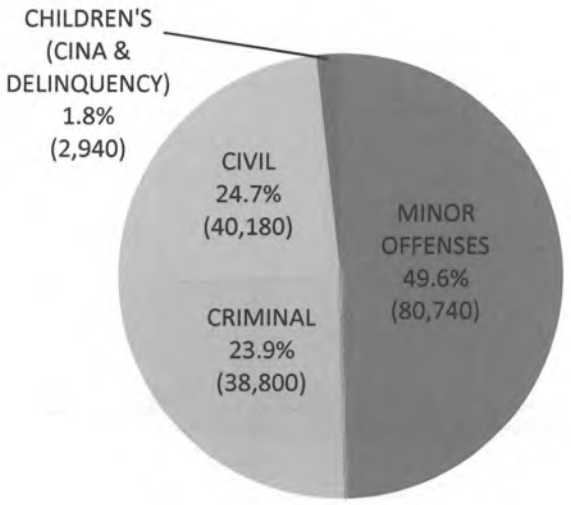
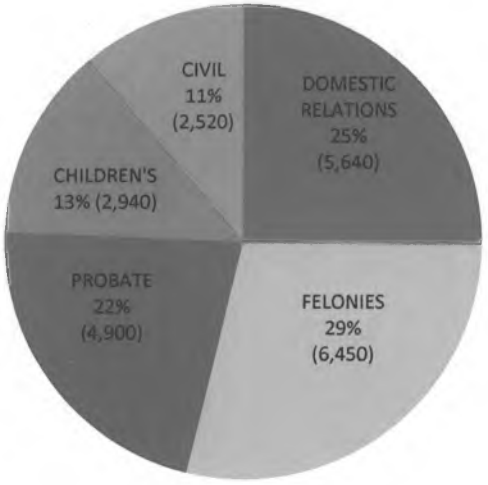
FY11 FILINGS STATEWIDE

SUPERIOR AND DISTRICT COURTS COMBINED

(162,647 total trial court cases filed in FY11)

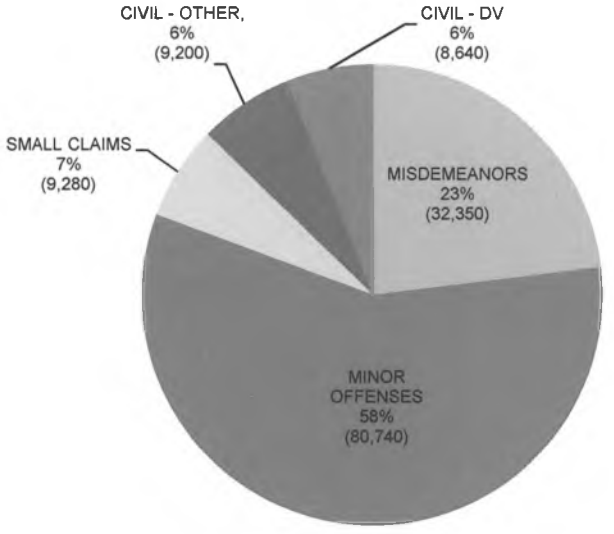


SUPERIOR COURT FILINGS (42 judges)
(22,440 superior court cases filed in FY11)



[In addition to 6450 new felony case filings, superior courts handled 4500 felony PTRPs in FY11]

DISTRICT COURT FILINGS (23 judges & 43 magistrates and masters; 140,207 district court cases filed in FY11)



[31% of MO citations statewide were filed electronically]

Numbers of case filings rounded to nearest ten; percentages rounded to the nearest whole percent in superior and district court pie charts.

Bail Conditions Repository – Phase 2 (Fairbanks Pilot)

September 2010 - June 2012
Responsible Agency: Alaska Court System

Problem

No one can readily determine if a person is subject to bail conditions of release because there is no statewide, electronic repository of bail orders.

Purpose

Demonstrate the feasibility of making bail orders electronically accessible to law enforcement and the public.

Expected Outcomes/Performance Measures

1. Electronic bail orders are created in the courtroom without unreasonably delaying proceedings.
2. All active Fairbanks bail orders (date forward) are in the electronically accessible repository.
3. Expired/inactive bail orders are never erroneously shown in the repository as "active".
4. The bail repository is developed, managed and supported with existing court system resources.

Scope

Phase 1: Bail order "smart" form developed as a proof of concept; in use in Fairbanks since 8/10.
Phase 2: Refine form, create repository (for Fairbanks orders) with on line access
Phase 3+: Expand to all courts.

Accomplished To Date

- ✓ Issued RFP, awarded contract to 4Point (Dec 2010)
- ✓ Gathered requirements from judges, clerks, administrative staff and other agencies (Feb 2011)
- ✓ Set up court IT infrastructure (software, hardware, training) (Mar 2011)
- ✓ Wrote business requirements and system specifications (May 2011)
- ✓ Delivered new bail form and repository for testing (Nov 2011)

Expected within the next 3 months:

- _ Complete testing – outside of courtroom
- _ Train trial court staff
- _ Go live - in courtrooms
- _ Build/test interface with APSIN
- _ Build/test web page for public

Expected within the next 6 months:

- _ Complete live-court acceptance testing
- _ Implement APSIN interface to make repository available to law enforcement
- _ Make repository available to public on court system's web page

What is Needed from Other Agencies?

1. DPS: Implement interface between the bail repository and APSIN.

Related Projects (💣 = critical to the success of this project)

1. APSIN ID (MAJIC): APSIN ID for all defendants in court criminal case records (in progress) 💣
2. APSIN Redesign (DPS): Migrate from legacy/mainframe to modern platform (in progress) 💣
3. DV Bail Conditions Database (Muni of Anchorage): Manually flag bail conditions in APSIN

MAJIC Data Standards Relevant to the Project

1. APSIN ID Number - for law enforcement queries of the repository
2. Uniform Offense Citation Table (UOCT) - for offense codes/descriptions on the form
3. Arrest Tracking and Charge Tracking Numbers - for charge information on the form
4. U.S. Dept. of Justice National Information Exchange Model (NIEM) for systems interface

Tribal Courts

2012 Crime Summit | Our Silent Partner | Alaska Native Justice Center

GOAL –

To **reduce crime and recidivism** through the use of local control and earlier intervention by tribal courts; and to **save money** in part by relieving a portion of the misdemeanor caseload from District Courts, District Attorney's Office, Public Defender Agency, Division of Juvenile Justice, and Corrections. The length of this pilot is two years, followed by an evaluation for its effectiveness in attaining these goals.

PLAN -

Seek slight re-alignment of misdemeanor case budget funding from each of the Department of Corrections (DOC), Department of Law (DOL), Department of Administration (DOA), Department of Health & Social Services, and the Courts respective budgets to fund three selected tribal courts to handle misdemeanor cases within their respective communities. Ask the Governor's Office to contribute to round out the amount and as a symbol of unifying support.

- Department of Public Safety – Alaska Wildlife Troopers can also contribute in the transportation of equipment and personnel for training to selected villages and/or hub centers.
- University of Alaska Anchorage Justice Center can be engaged for an objective review of this pilot meeting stated goals; with a proposed cost for evaluation that is $25K.

The budget re-allocation is $45K a year from each DOC, DOL, DOA, DHHS, and the Courts and $5K from the Governor's Office, giving an annual budget of **$230K @ year**; with a two year pilot total of $460K.

IMPLEMENTATION –

Select three ready functioning tribal courts from different geographical areas of the state and annually fund each approximately $ 67K that will be allocated in two phases; after funding equipment & training.

- Phase One – Provide updated technological **equipment**, software, and training for court recording; and refresher **training** to selected tribal courts from (choice of)
  - Kevin Illingworth, UAF; Interior Aleutians Campus, or
  - Lisa Jaeger, Tanana Chiefs Conference, or
  - Magistrate Mike A. Jackson, State of: Alaska Court System, Kake District Court;
  - and the assigned district attorney, public defender, court clerk, for that geographical area

- Phase Two – The balance of funds would provide stipends for judges and court clerk @ case.

Suggested village tribal courts list may include: Chevak; Kake; Minto; Kenaitze; Barrow; but can include others. This pilot however would be limited to three and should be geographically dispersed.

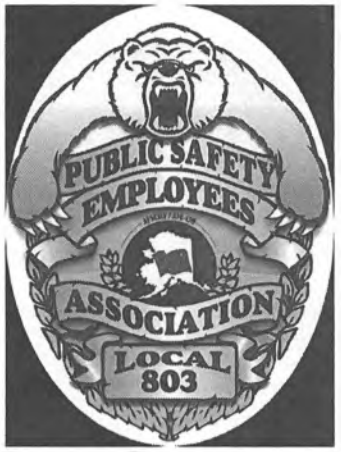
SUMMARY –

This proposal is not asking for an increase in our overall state budget; rather a re-allocation of a slight amount from several key departments who should all realize a reduction in their current workload.

This has been somewhat pioneered by our Youth Courts, where there has been realized reductions and cost savings; albeit through some screening of cases accepted. Also sought is the State's recognition of the contribution tribal courts can have at the local level. Finally, amongst all the crime fighting strategies that exist, the most effective police force any community can have are its own citizens who feel both empowered and encouraged to become involved; let's invest in and engage our communities.

All that is at risk is only a small amount of money; all that can be realized is so much more.

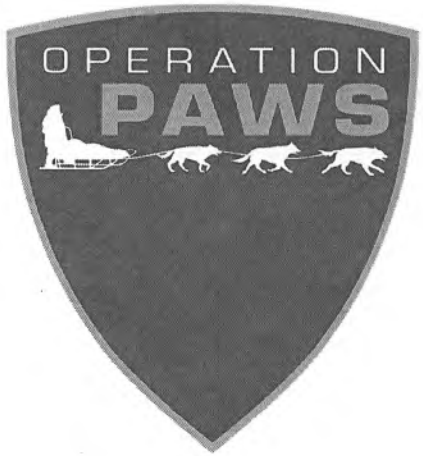
Walt Monegan 793-3551 wmonegan@anjc.net

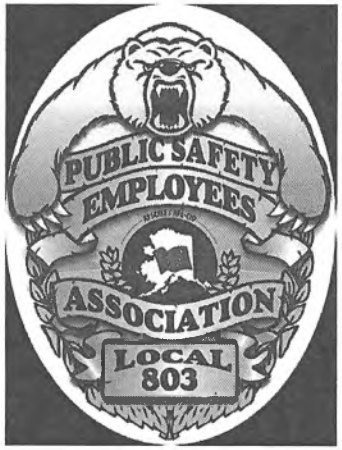


PSEA

The Champions of Public Safety

NON-PROFIT FOUNDATION





P.A.W.S.

People Are Worth Saving

A project aimed at helping to reduce suicide, substance abuse and violent crime in rural Alaska.

P.A.W.S.

A tool aimed at prevention and intervention of suicide, substance abuse and violent crime among Alaska's rural residents and the Alaska Native population. Off-Duty, Alaska Native, LEO's provide proactive versus reactive education, training, mentorship, and leadership. The basis for PAWS is the delivery of the program through traditional dog mushing expeditions.

ELEMENTS OF PAWS

- Humanitarian Mission
- Choices
- Leadership & Team Building
- Public Relations & Recruitment
- Expeditions

WHAT WE DO MATTERS, AND DOES MAKE A DIFFERENCE TO SOMEONE!

CHALLENGES

- Geography
- Weather
- Distance
- Manpower
- Resources
- Communication
- Transportation
- Underreporting

BENEFITS OF PAWS

- Proactive, prevention focused approach to issues
- Unique rapport building using off-duty LEO's
- Alaska Native LEO's establishing and developing trust relationships with rural Alaskans
- Provides tools, strategies, training, and education framework to solve crime issues at a local level
- Shared Values (Pride, Culture, Heritage & Loyalty, Integrity, Courage)

NOT A RACE TO A FINISH...

DEPARTMENT OF CORRECTIONS

CRIME SUMMIT 2012

MISSION STATEMENT

The Alaska Department of Corrections enhances the safety of our communities. We provide secure confinement, reformative programs, and a process of supervised community reintegration.

DOC AT A GLANCE

- **1509 staff**: 806 are COs, 483 population management, 153, inmate health care, 58 administrative support, & 10 offender habilitation
- 12 facilities statewide plus one out of state facility at Hudson Correctional Center in Hudson, Colorado
- Alaska is one of six states in the U.S. that operates a unified correctional system.
- 15 contract regional jails
- As of Jan. 20, 2012, **5953** offenders are in prison, a CRC or on EM
- In 2010, DOC booked **38,000** offenders into its facilities
- 13 field probation offices
- FY11, 5934 on probation, expected to climb to 6118 in FY12
- 789 Community Residential Center (CRC) beds statewide
- 354 Offenders on Electronic Monitoring (EM)

DOC'S GOALS

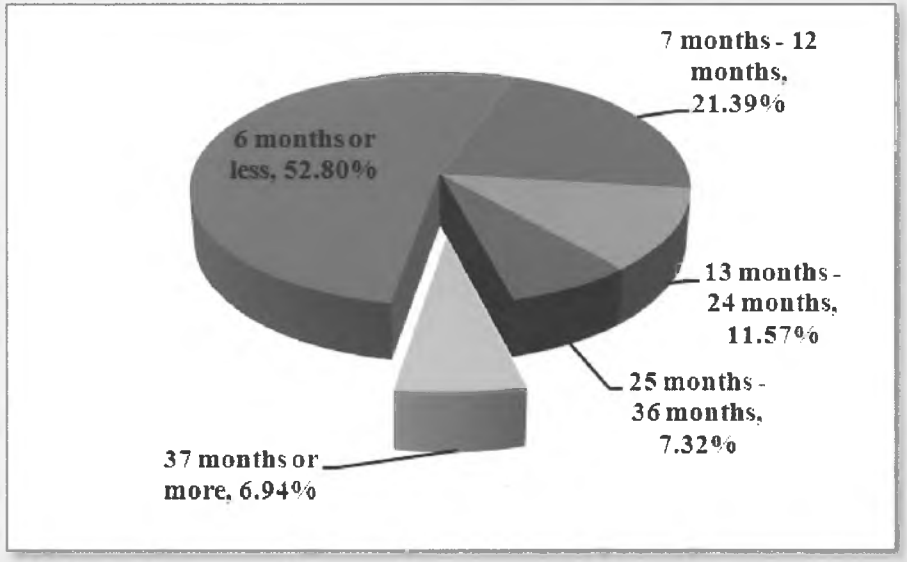
- To protect the public
- To reduce recidivism
- To delay the need for the construction of a new prison for sentenced offenders
- To ensure that incarcerated offenders spend their time in custody productively
- To work collaboratively with outside stakeholders to achieve these goals.

HOW DID WE GET HERE?

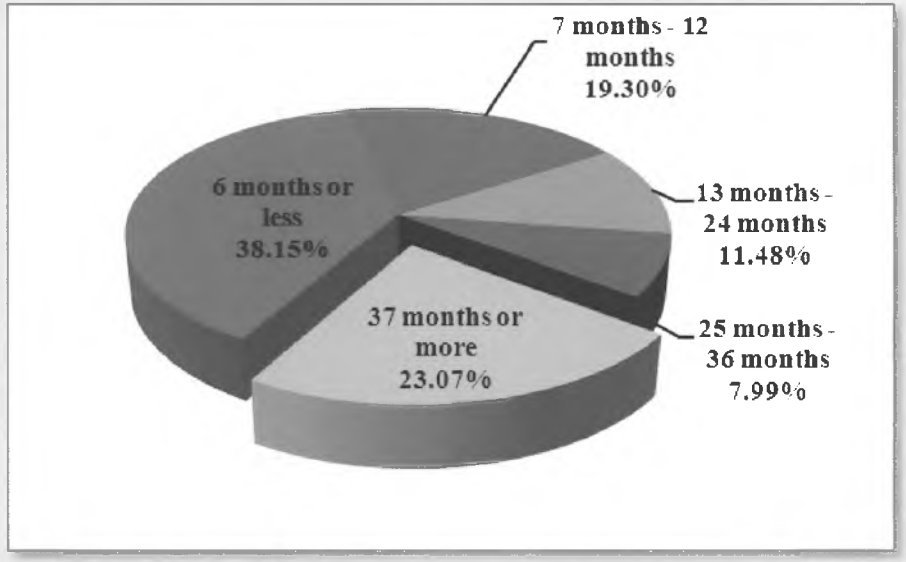
Recidivism, **recidivism**, **recidivism . . .**

PERCENT OF OFFENDERS BY LENGTH OF STAY FROM ADMISSION

As of December 31, 2002

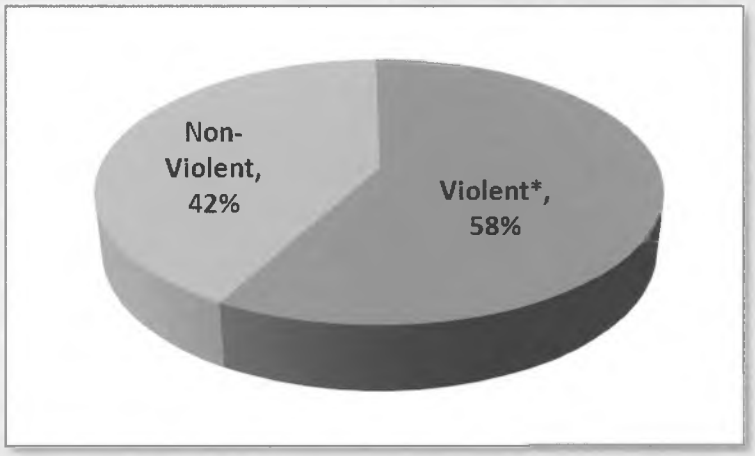


As of December 31, 2011

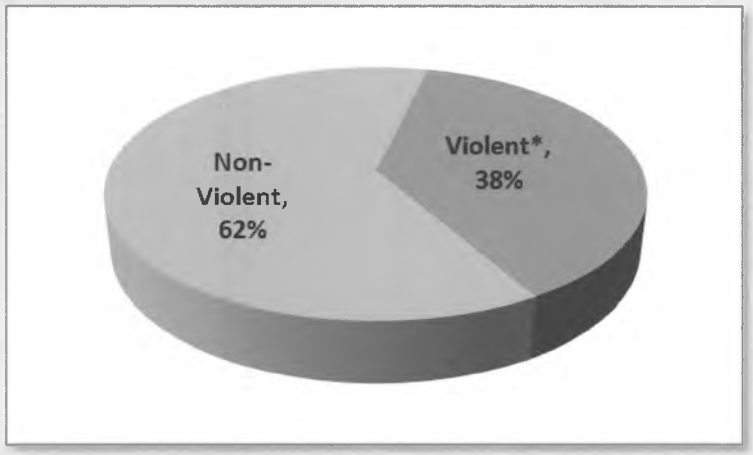


STANDING POPULATION & CRIME TYPE

December 31, 2002

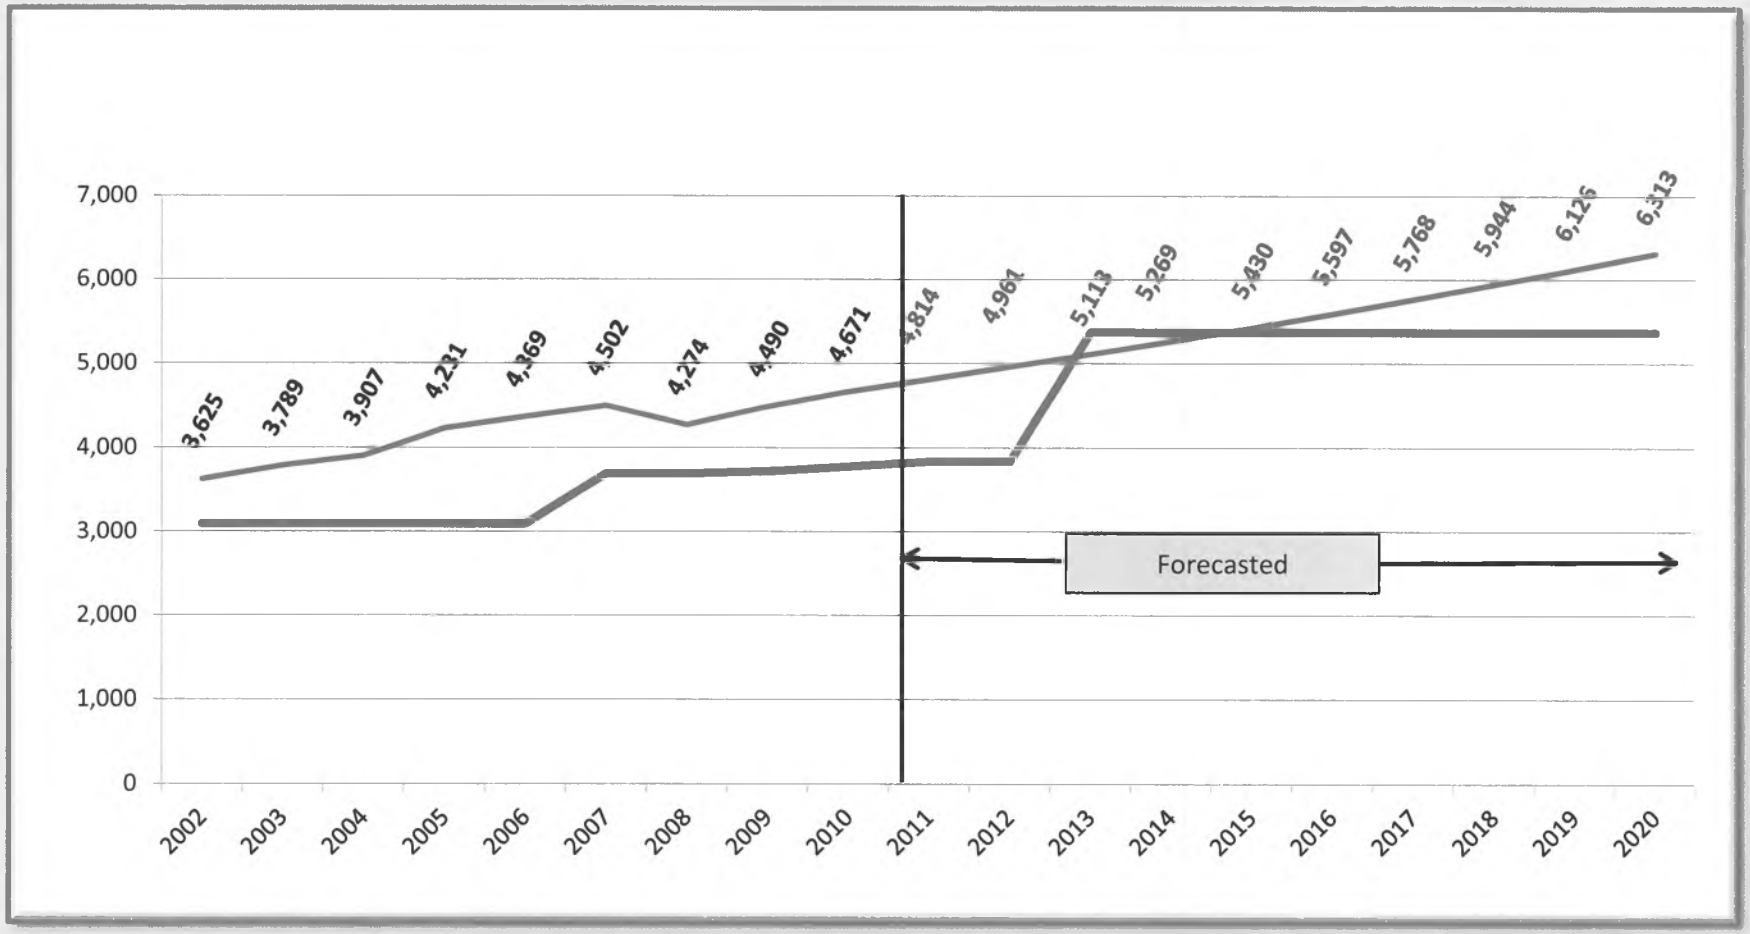


December 31, 2011



* Violent Crimes include all crimes against a person and also includes registerable sex offenses.

INSTITUTIONAL INMATE POPULATION: 2002-2020



From 2002 to 2010, the annual average inmate population grew slightly more than 3% per year. Based on that growth rate, it is estimated inmate population will reach 6,313 by 2020.

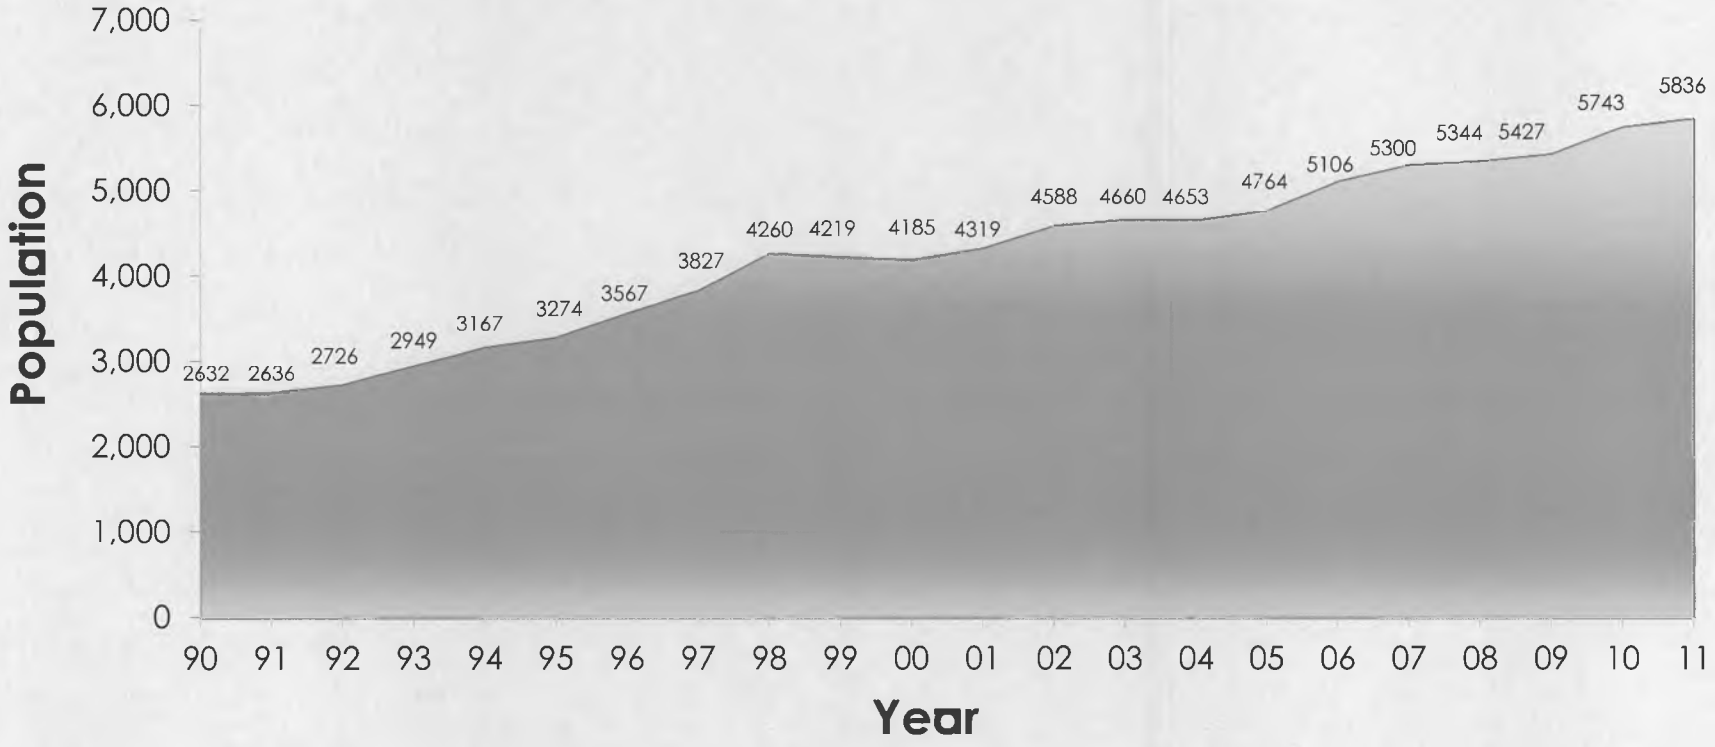
MEDICAL

- Over the past decade, medical care costs in Anchorage have increased by 46%, compared to 27% nationwide. *(Alaska Economic Trends, May 2011)*
- Increases in chronic health issues and an aging inmate population has led to higher acuity and increased need for higher medical care.
- DOC developed a process for early identification & regular review of high cost inmates to determine more cost effective placements.

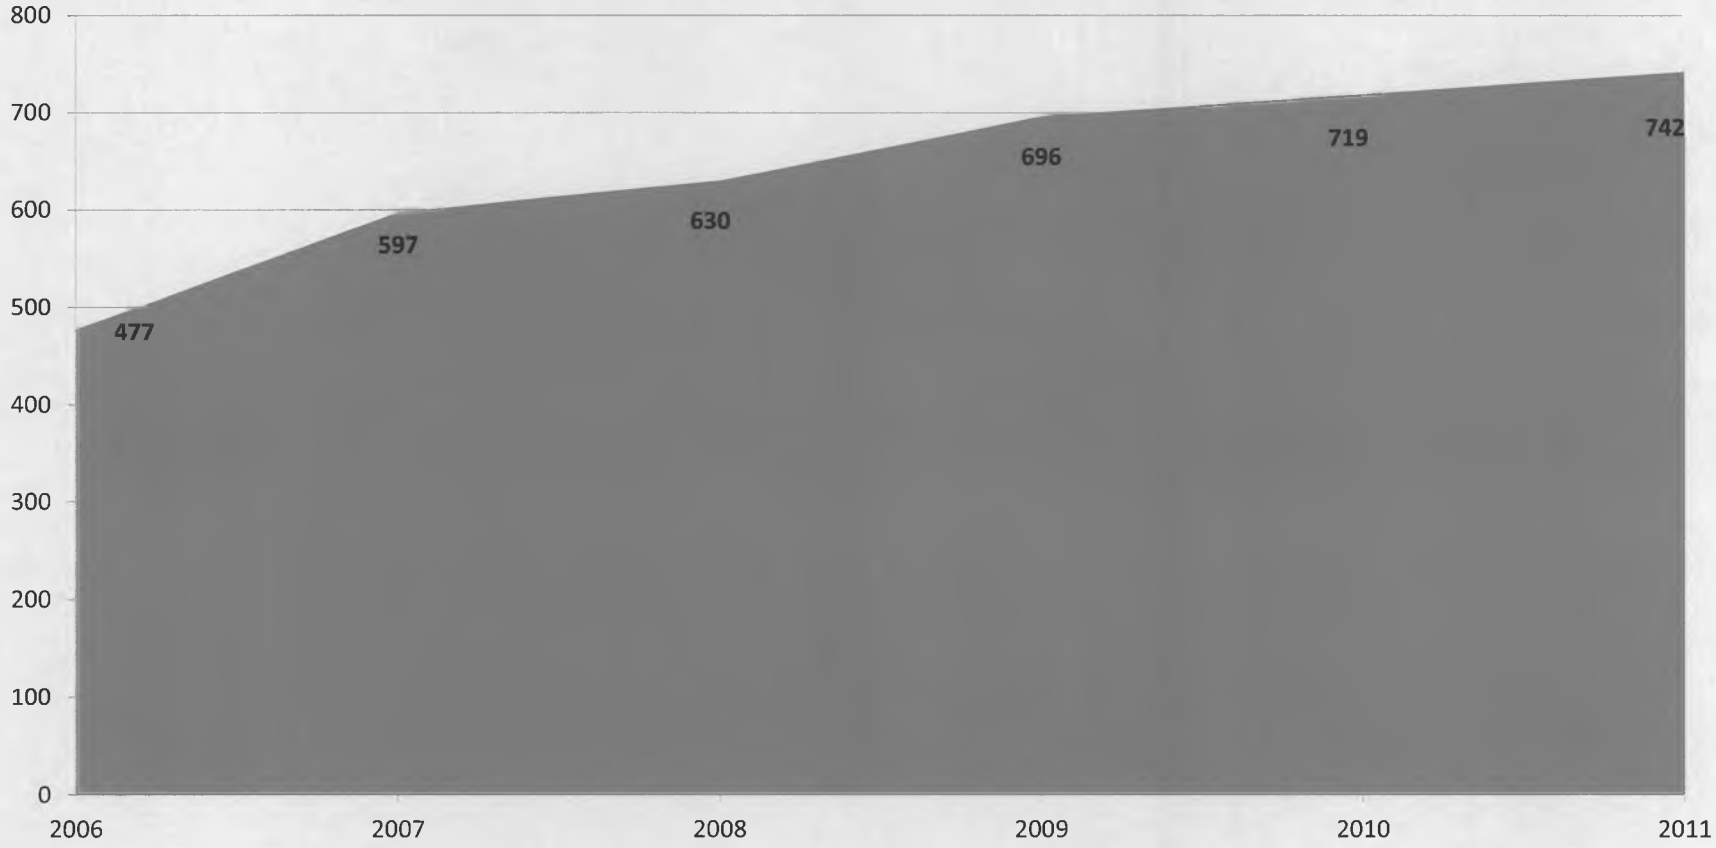
OFFENDER STANDING POPULATION FOR ALL INSTITUTIONS

(INCLUDING CRC'S AND EM)

1990 - 2011

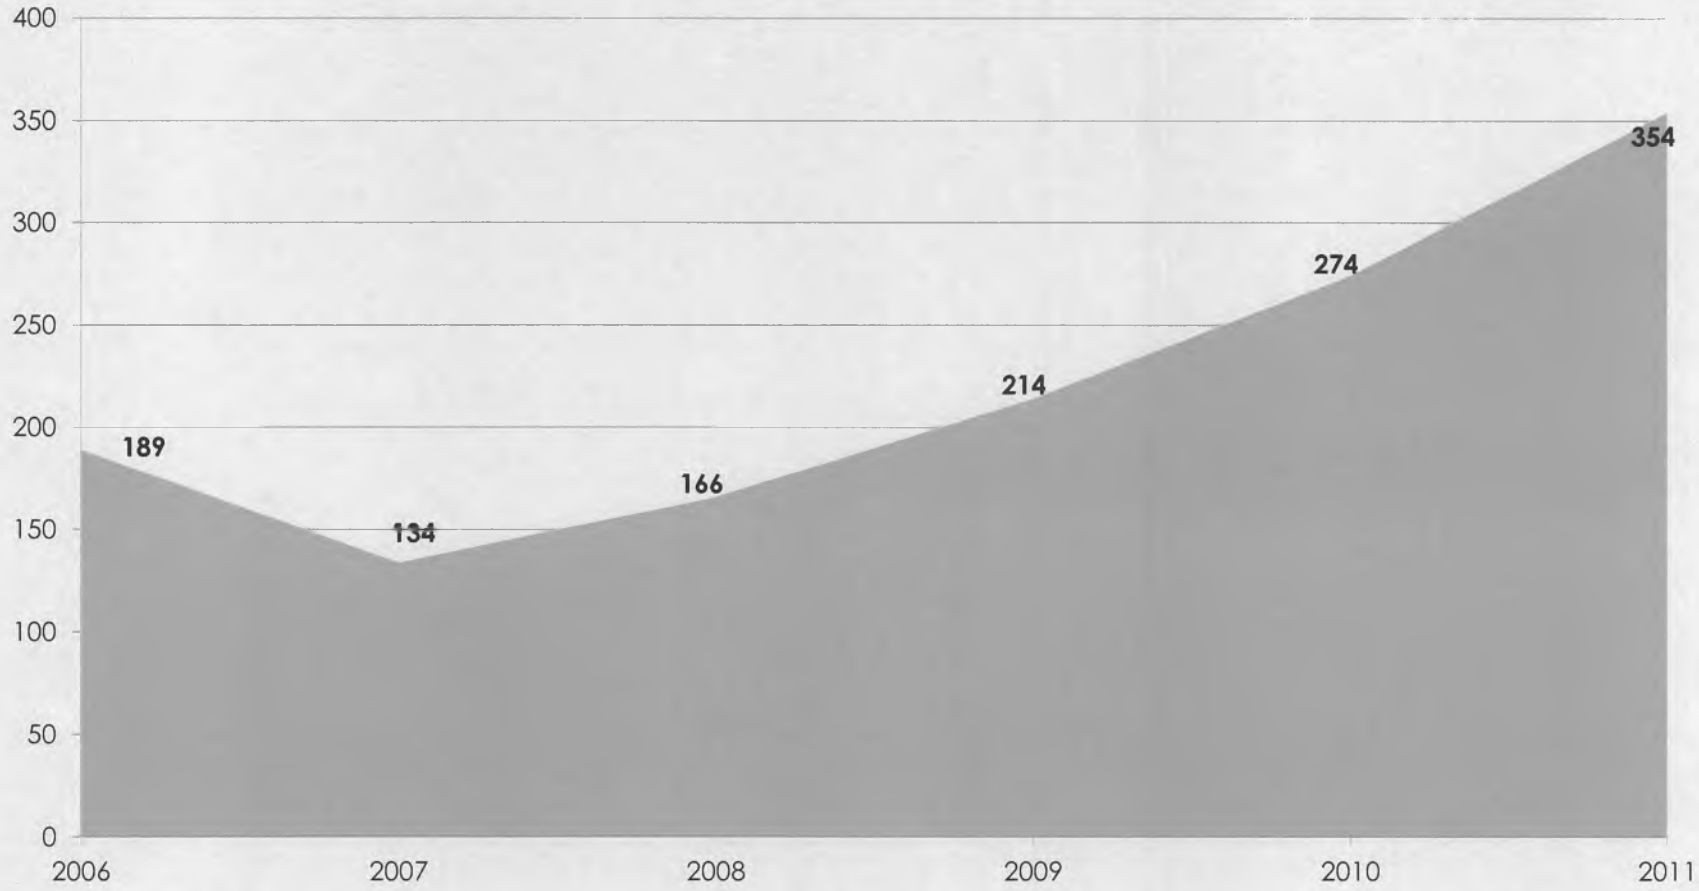


ALASKA COMMUNITY RESIDENTIAL CENTER COUNTS: 2006-2011



From 2006 to 2011, the number of offenders in Community Residential Centers has grown by slightly more than 55 percent (55.55%)

ELECTRONIC MONITORING COUNTS 2006-2011



ELECTRONIC MONITORING

- Electronic Monitoring population has risen significantly since 2007
  - 2007 – 134 on Electronic Monitoring
  - Latest numbers in 2012 show – 354 on Electronic Monitoring
- Electronic Monitoring coverage areas have grown
  - Anchorage
  - Fairbanks
  - Juneau *
  - Kenai
  - Ketchikan
  - Mat-Su *
  - Sitka *
    - Expanding to **Barrow** within the next couple of months.
- Cost Savings and Comparisons
  - Institutional Bed Cost Per Day - $134.90
  - Community Residential Centers (CRC's) - $80.17
  - Electronic Monitoring (EM) - $22.00
- Recidivism & Success Rates on Electronic Monitoring
  - Latest statistics from 2008 show an 86.69% success rate.
  - Latest statistics from 2008 show a 13.31% recidivism rate, while still on EM.
    - Most are for probation violations

* *Year 2008 is the most recent reportable year due to the need to allow for a 3 year recidivism monitoring period.*

DEPARTMENT OF CORRECTIONS RECRUITMENT

- DOC maintained an institutional vacancy rate of 2.6% in FY11
- Actively recruiting at multiple locations:
  - Alaska State Fair
  - Anchorage Daily News Job Fair
  - Annual Alaska Federation of Natives Convention
  - Veterans and spouses of military personnel
  - Kenai Job Fair
  - Great Alaskan Sportsman Show
  - Knik Tribal Council Summer Picnic
  - Military Spouse Job Fair
  - Women in Law Enforcement
  - Oxygen and Octane Expo
  - Job Fairs in Juneau, Mat-Su, Bethel, Kenai, Anchorage & Fairbanks

DEPARTMENT OF CORRECTIONS ACADEMY

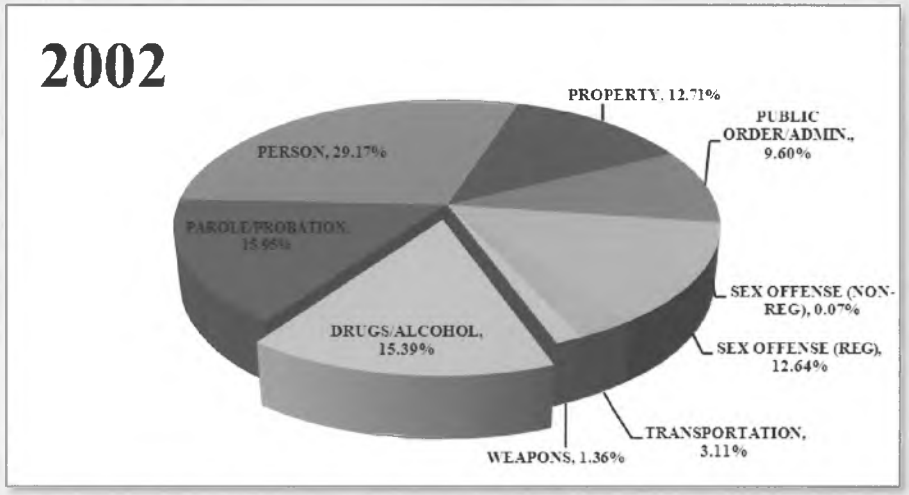
- Six-week curriculum that prepares a candidate to become certified as a Correctional Officer under Alaska Police Standards.

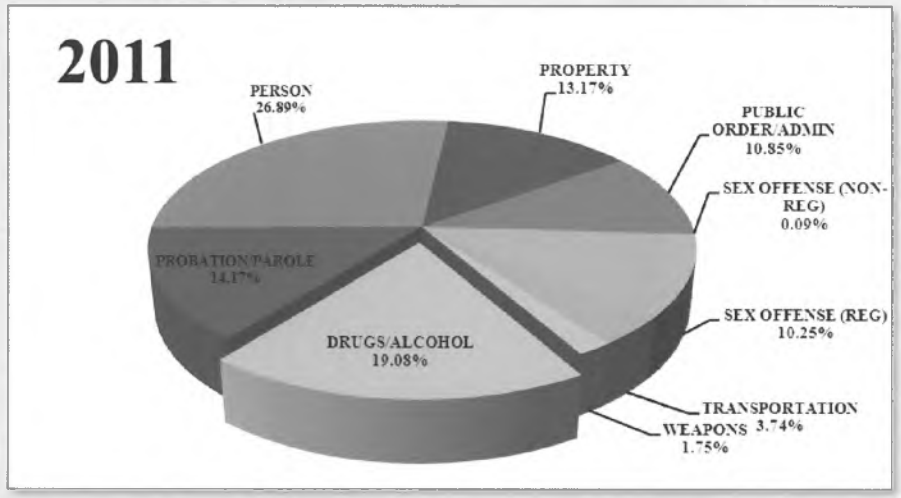
- Performs training that covers the skills and knowledge base an officer needs to effectively and safely perform the duties of a Correctional Officer.
    - Department Policies
    - Communications
    - Civil Law
    - First Aid/CPR
    - Defense Tactics
    - Firearms
    - Officer Survival
    - Searches
    - Restraints

CLASSIFICATION POLICY

- DOC Classification Policies have been updated to emphasize behavioral incentives that encourage compliance with programming and other expectations.
- The updated policies are designed to provide timely and accurate custody designation.
- DOC Offender Reentry policy provides a guide to the process which moves an offender from initial screening to an integrated transition to Supervision upon release.
- New system also includes an Offender Management Plan (OMP), which is the road map for the prisoner to determine what programs are needed and will provide a means of measuring a prisoner's readiness for re-entry into the community.

PERCENT OF STANDING OFFENDER POPULATION BY OFFENSE CLASS





In 2002, 15.39% of Offenders in Alaska were incarcerated for drug or alcohol offenses.

By 2011, Offenders in Alaska incarcerated for drug or alcohol offenses increased to 19.08%.

SUBSTANCE ABUSE TREATMENT PROGRAMS

Purpose: To reduce criminal recidivism

Strategy: To employ evidence-based substance abuse programs to higher risk offenders.

- Life Success Substance Abuse Treatment (LSSAT): A cognitive behavioral, minimum three months medium intensity treatment program.
  - In 8 of our 12 institutions.
  - Capacity 800 offenders per year

- Residential Substance Abuse Treatment (RSAT): An intensive inpatient treatment program using a cognitive behavioral approach. Minimum of six months participation required.
  - Hudson Colorado HCC Facility
  - Eagle River HMCC
  - Capacity at least 140 offenders per year.

- Aftercare: Community based aftercare program designed to complement the offender's custodial treatment. Length of program and program requirements dependent on individual needs.
  - Anchorage
  - Fairbanks
  - Combined capacity over 280 offenders per year.

SUBSTANCE ABUSE TREATMENT PROGRAMS

FY10 Performance Measures (2 years out):

	Count	Returned	**Recidivism Rate***
FY2010 Control Group	2077	1203	57.92%
Participated in and Completed Program	334	122	36.53%

**Percent of offenders returning to incarceration within two years of discharge.*

FY11 Performance Measures (1 year or less out):

	Count	Returned	**Recidivism Rate***
FY2011 Control Group	1877	692	36.87%
Participated in and Completed Program	421	38	9.09% **

**Percent of offenders returning to incarceration within one year of discharge.*
*** The majority of these individuals have been out of custody for one year or less. The recidivism rate will rise. Given these results, it appears that the state is on the road to match or exceed the 9 to 12% national average for recidivism reduction.*

PROBATIONER ACCOUNTABILITY WITH CERTAIN ENFORCEMENT (PACE)

Background:

- Under the leadership of DOC, the PACE pilot program began in Anchorage Superior Court in July 2010.
- The goal is to provide swift, certain and proportionate sanctions to **70 high risk felony** probationers who had an established pattern of noncompliance with court ordered conditions of probation
- The program required the collaboration and cooperation among courts, law enforcement, prosecution, defense and DOC.

PERFORMANCE MEASURES:

RESULTS OF THE ALASKA JUDICIAL COUNCIL'S SEPTEMBER 2011 PRELIMINARY EVALUATION OF PACE

- PACE appears to be successful at reducing positive drug tests.
- Nearly two-thirds of the PACE probationers had no positive drug tests during their first three months on PACE.
- In contrast, prior to their enrollment in PACE, only one-fifth of those probationers were free of positive drug tests.
- These outcomes pattern the results achieved by the original Hawaii HOPE program.

EXPANSION OF PACE

- Fairbanks PACE Misdemeanor Domestic Violence Pilot Project started January 2012.
    - *The goal is through formal probation supervision to hold DV misdemeanor offenders accountable for completion of their court ordered conditions of probation.*
- Palmer Superior Court is moving forward to start the PACE model in their area.

SEX OFFENDER MANAGEMENT PROGRAM

Purpose: Enhance community safety and promote recidivism reduction

Strategies:

- **Polygraph testing**

	FY 07	FY 08	FY 09	FY10	FY11
# of offenders participating	52	247	208	402	442
# of new sex assault convictions	-	1	1	1	1

  - Data shows that probation officers are intervening before the commission of new sexual assault offenses.
  - During FY11, the use of polygraph examinations expanded statewide to all Probation/Parole Offices that supervise sex offenders.

- **Community based treatment:**
  - DOC increased sex offender treatment slots statewide by 15% by adding new providers and increasing contracts with existing providers.
  - DOC increased the number of offenders that pay for their own treatment by 10% statewide
  - DOC contracted with a provider to obtain substance abuse treatment for cognitively disabled sex offenders.

- **Performance Measures:**
  - DOC began a state wide data collection project to track sex offenders released to the community to monitor recidivism rates.

EDUCATION

Goal: To reduce recidivism

Strategies:

- Core Education Curriculum:
  - GEDs (General Education Development) diplomas issued:

FY08	**182**
FY09	**239**
FY10	**247**
FY11	**254**

  - CAP (Criminal Attitudes Program) graduates:

FY 10	**106**
FY 11	**463**

  - Parenting Program

FY 10	**339**
FY 11	**393**

  - Prisoner Reentry Program: Utilizing the Alaska Reentry manual, inmates prepare for reintegration and transition back into the community.
    - In FY 11 411 inmates completed the program.

ALASKA PRISONER RE-ENTRY TASK FORCE 2011 ACCOMPLISHMENTS

MARCH 2011-JANUARY 2012

- Completed the State's first ever Five-year Prisoner Reentry Plan, 2011-2016
- With support of the AK Mental Health Trust Authority and the AK Judicial Council, a project coordinator was hired to facilitate the work of the TF.
- Plan action steps accomplished to date:
  - APSIN ID project: to develop the capacity to accurately track criminal justice data for the purpose of evaluation and statistical monitoring.
  - Special Needs Housing Grant funds: The Alaska Council on the Homelessness approved the use of 1.6 million un-allocated housing grant funds for a prisoner transitional housing program.
  - With DOC support, The Returning Citizens' Center in Anchorage continues to serve former offenders.
  - DOC added an additional Institutional Discharge Project Plus (DP+) counselor
  - DOC is in the process of implementing an electronic medical records system.
  - Under the leadership of Partner's for Progress, the Sobriety 24/7 program was implemented in cooperation with Anchorage Court, APD, Municipal Prosecutor's office and the law firm of Gordon and Logue.
  - Beginning a process to Inventory all state statutes and regulations that provide legal barriers to people with criminal convictions. Alaska has 492 such statutes and regulations.
  - The Alpha Ministries mentoring program was implemented at the Kenai Wildwood institution.
  - Formation of regional Prisoner Reentry Coalitions

RELATIONSHIPS WITH OTHER CRIMINAL JUSTICE AGENCIES

- Criminal Justice Working Group
- Prisoner Re-Entry Task Force
- DOC, DPS & Law work together on community panels in rural areas of Alaska.
- Work with Law, Police Departments and the Courts on expansion of PACE.

HOW CAN THE LEGISLATURE ASSIST?

- Continuing open lines of communication.
- Continuing to hold meetings and allow for forums to discuss department priorities, issues and challenges.
  - Allowing free flowing dialogue
- Encourage joint state department presentations on key public safety issues among.
  - Many state agencies play a role in reducing recidivism and prison population growth including DHSS, Labor, and Education.

THANK YOU!

Fiscal Year 2011 Return on Investment Report

UAA Justice Center

The UAA Justice Center, established by the State Legislature in 1975, has a mandate to provide statewide justice-related education, research, and service. The Justice Center is an interdisciplinary unit that provides undergraduate, graduate, and professional education; conducts research in the areas of crime, law, and justice; and provides service to government units, justice agencies, and community organizations throughout urban and rural Alaska to promote a safe, healthy, and just society.

RETURN ON INSTRUCTION

During fiscal year 2011, the State of Alaska invested $491,415 for instruction. With that investment, the UAA Justice Center:

- Instructed 517 Justice and Paralegal Certificate majors and pre-majors
- Awarded 27 Bachelor of Arts in Justice degrees and 8 American Bar Association approved Paralegal Certificate degrees
- Generated a total of 4,344 credit hours of instruction in Justice and Paralegal courses
- Generated $765,125 in tuition dollars

For every dollar the state invested in instruction,
the UAA Justice Center generated $1.56 in tuition revenue.

RETURN ON RESEARCH

During fiscal year 2011, the State of Alaska invested $401,051 for research. With that investment, the UAA Justice Center:

- Secured and/or maintained 14 externally funded research projects, originally funded for a total of $1,158,766
- Spent a total of $888,684 from externally funded projects
- Generated $74,126 in indirect costs
- Published 7 peer reviewed articles
- Published 15 *Alaska Justice Forum* articles, the UAA Justice Center quarterly research publication
- Published 11 research reports
- Published 2 research overviews
- Made 30 presentations at professional meetings

For every dollar the state invested in research,
the UAA Justice Center spent $2.21 in external funding.

The full FY11 Return on Investment Report is available online: http://justice.uaa.alaska.edu/news/roi_fy11_report.pdf.

RETURN ON SERVICE

During fiscal year 2011, the State of Alaska invested $296,377 for service. With that investment, the UAA Justice Center:

- Hosted 8 major conferences, workshops, and events
- Served on 54 University committees
- Served on 5 editorial boards
- Reviewed manuscripts and grant applications for 6 different journals and agencies
- Participated in 23 different professional associations
- Collaborated with 79 different community partners
- Advanced its public education efforts with 6 media interviews/mentions and 16 online and print mentions
- Furthered its outreach efforts with 6 events, each involving a different educational/youth organization
- Received 4 awards in recognition of current and former faculty contributions to the justice profession and the community
- Generated 173 entries on the UAA Justice Center blog

FY 2005-2011 SUMMARY

From FY 2010 to FY 2011, the UAA Justice Center's return on instruction decreased by 4.9% and the Center's return on research increased by 49.3%. The FY11 return on instruction was the second greatest return from FY05 to FY11 (down slightly from FY10). The FY11 return on research was the greatest return from FY05 to FY11.

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

2012 Alaska Dashboard

Key Issues Impacting

Domestic Violence and Sexual Assault in Alaska

Some of the data below are based on self-disclosures to survey questions on domestic violence (DV) and sexual assault (SA). These estimates are conservative (actual rates are much higher). As the stigma of reporting violence lessens and as we increase victim safety, those experiencing violence will be more likely to report and seek help. Certain estimates may increase over time (e.g., reports of harm, utilization of services, and reports to law enforcement).

Key Population Indicators for Alaska	**Previous AK Data**	**Current AK Data**	**Percent Change**	**Progress**
Childhood Exposure to Domestic Violence				
1. Percent of adults exposed to intimate partner violence of parent (BRFSS)	19.1%	19.2%	+1%	○
2. Percent of mothers whose 3 year old child saw violence or physical abuse (CUBS)	4.0%	7.2%	+80%	●
Child and Youth Victimization				
3. Percent of students experiencing physical dating violence in past year (YRBS)	13.3%	12.0%	-10%	●
4. Percent of students experiencing sexual violence in lifetime (YRBS)	10.1%	9.2%	-9%	●
Reports of Harm (Child and Youth)				
5. Rate of reported child abuse and neglect per 10,000 (US DHHS)	190.1	150.8	-21%	●
6. Rate of reported child sexual maltreatment per 10,000 (OCS)	5.8	6.5	+12%	●
Adult and Elder Victimization				
7. Percent of women experiencing physical intimate partner violence in past year (AVS)	N/A	9.4%	N/A	○

Progress: ● Progress Satisfactory ○ Progress Uncertain ● Progress Needs Improvement

Percent change is relative to previous data. See definition on page 3. Percent changes may or may not be statistically significant.

Definitions for each population indicator and dates for current and previous data are found starting on page 3.

Alaska Dashboard, January 2012. State of Alaska, Council on Domestic Violence and Sexual Assault, http://dps.alaska.gov/cdvsa/.

2012 Alaska Dashboard

Key Issues Impacting Domestic Violence and Sexual Assault in Alaska

National Comparisons

National data for comparison purposes are only available for a few of the population indicators on the Alaska dashboard for key issues impacting domestic violence and sexual assault in Alaska. Few of the data sources on the Alaska dashboard are available nationally or in other states. When they are available, data are rarely directly comparable. In particular, different states have different definitions for domestic violence and sexual assault. Listed below are the few indicators that are directly comparable to national data.

Key Population Indicators for Alaska	**Previous AK Data**	**Current AK Data**	**U.S. Data**
Child and Youth Victimization			
3. Percent of students experiencing physical dating violence in past year (YRBS)	13.3%	12.0%	9.8%
4. Percent of students experiencing sexual violence in lifetime (YRBS)	10.1%	9.2%	7.4%
Reports of Harm (Child and Youth)			
5. Rate of reported child abuse and neglect per 10,000 (US DHHS)	190.1	150.8	92.2
Reports to Law Enforcement			
15. Rate of forcible rape reported to law enforcement per 10,000 (UCR)	7.3	7.5	2.8

Percent of students experiencing physical dating violence in the past year (YRBS)
In 2009 (previous AK data), the percentage of Alaska high school students experiencing physical dating violence in the past year was 13.3%, compared to 9.8% of high school students in the U.S. The percentage of high school students experiencing physical dating violence in the past year was 1.4 times higher in Alaska than in the U.S.

Percent of students experiencing sexual violence in lifetime (YRBS)
In 2009 (previous AK data), the percentage of Alaska high school students experiencing sexual violence in their lifetime was 10.1%, compared to 7.4% of high school students in the U.S. The percentage of high school students experiencing sexual violence in their lifetime was 1.4 times higher in Alaska than in the U.S.

Rate of reported child abuse and neglect per 10,000 (US DHHS)
In 2010 (current AK data), the rate of reported and substantiated child abuse and neglect was 150.8 per 10,000 children (ages 0 to 17) in Alaska, compared to 92.2 per 10,000 children in the U.S. The Alaska rate was 1.6 times higher than the U.S. rate.

Rate of forcible rape reported to law enforcement per 10,000 (UCR)
In 2010 (current AK data), the rate of forcible rape reported to law enforcement was 7.5 per 10,000 in Alaska, compared to 2.8 per 10,000 in the U.S. The Alaska rate was 2.7 times higher than the U.S. rate.

Forthcoming Indicators

Reports to Law Enforcement
1. Number of sexual assaults reported to law enforcement (DPS)
2. Number of sexual abuses of minors reported to law enforcement (DPS)
Offender Accountability
3. Percent of juvenile sex offenders who recidivate (DJJ)
4. Percent of adult sex offenders who recidivate (DOC)
Primary Prevention and Protective Factors
5. Percent of students who feel connected to their school (SCCS)

2012 Alaska Dashboard

Key Issues Impacting Domestic Violence and Sexual Assault in Alaska

Percent Change

Percent change is the increase or decrease in the current Alaska data relative to the previous Alaska data. It is not an absolute difference in percent. For example, indicator #2 has increased from 4.0% to 7.2%. The absolute difference in percent is 3.2, but the percent change from the previous to the current Alaska data is 80%, because 3.2 is 80% of the previous Alaska data. Percent changes may or may not be statistically significant since some change randomly occurs from year to year.

$$\text{Percent Change is } \frac{\text{Current AK data - Previous AK data}}{\text{Previous AK data}} \times 100$$

Dashboard Indicator Definitions

Childhood Exposure to Domestic Violence
1. Percent of adults exposed to intimate partner violence of parent Behavioral Risk Factor Surveillance System (BRFSS). Approximately every third year, 2,500 adults in Alaska are asked "As a child, did you ever see or hear one of your parents or guardians being hit, slapped, punched, shoved, kicked or otherwise physically hurt by their spouse or partner?" Most current Alaska data are from 2009 and previous Alaska data are from 2006.
2. Percent of mothers whose 3 year old child saw violence or physical abuse Childhood Understanding Behaviors Survey (CUBS). Each year, over 1,000 mothers of three year old children are asked "Has your child ever experienced seeing violence or physical abuse in person?" Most current Alaska data are from 2010 and previous Alaska data are from 2009.

Child and Youth Victimization
3. Percent of students experiencing physical dating violence in past year Youth Risk Behavior Survey (YRBS). Every two years, over 1,000 students in traditional high schools are asked "During the past 12 months, did your boyfriend or girlfriend ever hit, slap, or physically hurt you on purpose?" Most current Alaska data are from 2011 and previous Alaska data are from 2009.
4. Percent of students experiencing sexual violence in lifetime Youth Risk Behavior Survey (YRBS). Every two years, over 1,000 students in traditional high schools are asked "Have you ever been physically forced to have sexual intercourse when you did not want to?" Most current Alaska data are from 2011 and previous Alaska data are from 2009.

Reports of Harm (Child and Youth)
5. Rate of reported child abuse and neglect per 10,000 US Department of Health and Human Services (US DHHS). Rate of unique victims of reported and substantiated child abuse and neglect per 10,000 children ages 0-17. Child abuse and neglect is defined as any recent act or failure to act on the part of a parent or caretaker which results in death, serious physical or emotional harm, sexual abuse or exploitation; or an act or failure to act which presents and imminent risk of serious harm. Most current Alaska data are from 2010 and previous Alaska data are from 2009. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.
6. Rate of reported child sexual maltreatment per 10,000 Office of Children's Services (OCS). Rate of non-duplicated children per 10,000 (ages 0-17) that are referred to the Office of Children's Services for substantiated incidents of sexual maltreatment. Sexual maltreatment includes sexual abuse (sexual assault, sexual abuse of a minor, incest, online enticement of a minor, unlawful exploitation of a minor, indecent exposure), sexual exploitation (allowing, permitting, or encouraging child prostitution), and prostitution or promoting prostitution. Most current Alaska data are from 2010 and previous Alaska data are from 2009. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.

Adult and Elder Victimization

7. Percent of women experiencing intimate partner violence in past year

Alaska Victimization Survey (AVS). In 2010, over 800 adult women were asked if in the past year, an intimate partner (a) "Made threats to physically harm you?" (b) "Slapped you?" (c) "Pushed or shoved you?" (d) "Hit you with a fist or something hard?" (e) "Kicked you?" (f) "Hurt you by pulling your hair?" (g) "Slammed you against something?" (h) "Tried to hurt you by choking or suffocating you?" (i) "Beaten you?" (j) "Burned you on purpose?" or (k) "Used a knife or gun on you?" Most current Alaska data are from 2010.

8. Percent of women experiencing sexual violence in past year

Alaska Victimization Survey (AVS). In 2010, over 800 adult women were asked "When you were drunk, high, drugged, or passed out and unable to consent" in the past year, has anyone (a) "Had vaginal sex with you?" (b) "Made you receive anal sex?" (c) "Made you perform oral sex?" or (d) "Made you receive oral sex?" and has anyone in the past year "used physical force or threats to physically harm you to" (a) "Make you have vaginal sex" (b) "Make you receive anal sex?" (c) "Make you perform oral sex?" (d) "Make you receive oral sex?" (e) "Put their fingers or an object in your vagina or anus?" or (f) "Try to have vaginal, oral, or anal sex with you, but sex did not happen?" Most current Alaska data are from 2010.

9. Percent of pregnant women experiencing intimate partner physical abuse

Pregnancy Risk Assessment Monitoring System (PRAMS). Each year, one of every six women who delivered a live-born infant is asked "During your most recent pregnancy, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in any other way?" Most current Alaska data are from 2010 and previous Alaska data are from 2009.

Reports of Harm (Adult and Elder)

10. Number of vulnerable adults reporting abuse or neglect

Adult Protective Services (APS). Number of vulnerable adults with a substantiated allegation of abuse or neglect reported to Adult Protective Services. Vulnerable adults are people 18 years of age or older who, because of physical or mental impairment, are unable to meet their own needs or to seek help without assistance. Abuse includes the willful, intentional, or reckless nonaccidental, and nontherapeutic infliction of physical pain, injury, or mental distress; or sexual assault in the first or second degree. Neglect includes the intentional failure by a caregiver to provide essential care or services necessary to maintain the physical and mental health of the vulnerable adult (self-neglect is not included). Most current Alaska data are from 2011 and previous Alaska data are from 2010. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.

11. Number of vulnerable elders reporting abuse or neglect

Adult Protective Services (APS). Number of vulnerable elders with a substantiated allegation of abuse or neglect reported to Adult Protective Services. Vulnerable elders are people 65 years of age or older who, because of physical or mental impairment, are unable to meet their own needs or to seek help without assistance. Abuse includes the willful, intentional, or reckless nonaccidental, and nontherapeutic infliction of physical pain, injury, or mental distress; or sexual assault in the first or second degree. Neglect includes the intentional failure by a caregiver to provide essential care or services necessary to maintain the physical and mental health of the vulnerable adult (self-neglect is not included). Most current Alaska data are from 2011 and previous Alaska data are from 2010. For the purpose of the dashboard, this indicator is not used to measure rates of victimization. It is used to measure rates of reporting harm.

Primary Prevention and Protective Factors

Primary prevention includes approaches before violence has occurred to prevent initial perpetration or victimization

12. Percent of pregnant women whose health provider talked to them about DV

Pregnancy Risk Assessment Monitoring System (PRAMS). Each year, one of every six women who delivered a live-born infant is asked "During any of your prenatal care visits, did a doctor, nurse, or other health care worker talk with you about physical abuse to women by their husbands or partners?" Most current Alaska data are from 2010 and previous Alaska data are from 2009.

13. Percent of students comfortable seeking help from 3 or more adults

Youth Risk Behavior Survey (YRBS). Every two years, over 1,000 students in traditional high schools are asked "Besides your parents, how many adults would you feel comfortable seeking help from if you had an important question affecting your life?" Most current Alaska data are from 2011 and previous Alaska data are from 2009.

14. Percent of schools implementing Fourth R healthy relationship curriculum

Department of Education & Early Development (DEED). Percentage of public secondary schools that have teachers trained in the Fourth R healthy relationship curriculum. Secondary schools include public high schools, middle schools, and alternative schools. Most current Alaska data are from FY12 and previous Alaska data are from FY11.

Reports to Law Enforcement

15. Rate of forcible rape reported to law enforcement per 10,000

Uniform Crime Reports (UCR). Rate of forcible rape reported to most law enforcement agencies in Alaska per 10,000 population. Forcible rape is defined as the carnal knowledge of a female forcibly and against her will. Attempted forcible rapes are included, regardless of the age of the victim. Statutory offenses (no force used – victim under age of consent) are excluded. To obtain rates per 100,000, multiply the rates per 10,000 by 10. Most current Alaska data are from 2010 and previous Alaska data are from 2009.

16. Number of domestic violence related homicides reported to law enforcement

Alaska Department of Public Safety (DPS). Number of homicides (willful nonnegligent killings) known to law enforcement that occurred in Alaska where the homicide was committed by a household member against another household member. Household members include adults or minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, who are related or formerly related by marriage, who have a child of the relationship. Household members also include children of a person in any of these relationships. In some cases, the relationship of the victim to the offender is unknown. These cases are not included in the number of domestic violence related homicides. Most current data are from 2010 and previous Alaska data are from 2009.

17. Number of elderly victims reporting DV-related sexual/physical assaults to AST

Alaska Department of Public Safety (DPS). Number of elderly victims (age 60 or older) who reported an assault involving domestic violence or a sexual assault involving domestic violence to Alaska State Troopers. This is the unduplicated count of victims, not the count of offenses or cases. In addition, each victim is counted only once per year. This number does not include offenses reported to local or municipal police departments. This number also does not include other domestic violence offenses (other crimes against the person, burglary, criminal trespass, arson or criminally negligent burning, criminal mischief, terrorist threatening, violating a protective order, and harassment). Crimes are domestic violence related if they occur between household members (i.e., adults or minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, or who are related or formerly related by marriage; persons who have a child of the relationship; and minor children of a person in any of these relationships). Most current data are from 2010 and previous Alaska data are from 2009.

Utilization of Services

18. Rate of children evaluated by child advocacy centers per 10,000

Alaska Children's Alliance (ACA). Number of children evaluated at a child advocacy center (duplicated count) per 10,000 children ages 0-17. Children are evaluated at child advocacy centers for allegations of child sexual abuse or assault, child physical abuse, drug endangerment, witnessing violent events in the home where they are present, and neglect or medical failure to thrive. Most current Alaska data are from state fiscal year 2010 and previous Alaska data are from state fiscal year 2009.

19. Rate of adults utilizing services for domestic violence per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated adults per 10,000 adults (age 18 and older) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being a primary victim of domestic violence. Primary victims are adults who are directly harmed, either physically or emotionally, by the actions of another. Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

20. Rate of children with adults in domestic violence services per 10,000

Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated minors per 10,000 minors (ages 0-17) who utilized services from a CDVSA-funded domestic violence or sexual assault service agency, and who were recorded as being a secondary victim of domestic violence. Secondary victims are minors beyond the immediate victim who have been affected by the repercussions of an event or events. These may include child witnesses who although not the direct target of abuse, have been affected. This number does not include minors who were primary victims of domestic violence (even if they were also secondary victims). Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

21. Rate of adults utilizing services for sexual assault per 10,000
Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated adults per 10,000 adults (age 18 and older) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being primary victims of sexual assault. Primary victims are adults who are directly harmed, either physically or emotionally, by the actions of another. Sexual assault includes both assaults committed by offenders who are strangers to the program participants and assaults committed by offenders who are known to, related by blood or marriage to, or in a dating relationship with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

22. Rate of youth utilizing services for domestic violence per 10,000
Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated youth per 10,000 youth (ages 12-17) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being a primary victim of domestic violence. Primary victims are youth who are directly harmed, either physically or emotionally, by the actions of another. Domestic violence is defined as any pattern of coercive behavior that is used by one person to gain power and control over a current or former intimate partner. Domestic violence includes dating violence, which is violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

23. Rate of youth utilizing services for sexual assault per 10,000
Council on Domestic Violence and Sexual Assault (CDVSA). Number of unduplicated youth per 10,000 youth (ages 12-17) who utilized services from a CDVSA-funded domestic violence and sexual assault service agency, and who were recorded at that agency as being primary victims of sexual assault. Primary victims are youth who are directly harmed, either physically or emotionally, by the actions of another. Sexual assault includes both assaults committed by offenders who are strangers to the program participants and assaults committed by offenders who are known to, related by blood or marriage to, or in a dating relationship with the program participant. Most current Alaska data are from state fiscal year 2011 and previous Alaska data are from state fiscal year 2010.

Offender Accountability

24. Percent of reported forcible rapes resulting in an arrest
Alaska Department of Public Safety (Crime Reported in Alaska). Number of offenses cleared by arrest or exceptional means per actual offenses reported or known to law enforcement. Unfounded complaints are excluded. Most current Alaska data are from 2010 and previous Alaska data are from 2009.

25. Rate of juveniles referred for sex offenses per 10,000
Alaska Division of Juvenile Justice (DJJ). Rate of non-duplicated juveniles per 10,000 (ages 11-17) that are referred to the Alaska Division of Juvenile Justice for sexual assault in the first to fourth degree or sexual abuse of a minor in the first to fourth degree. Most current Alaska data are from FY11 and previous Alaska data are from FY10.

26. Rate of juveniles referred for a DV-related assault per 10,000
Alaska Division of Juvenile Justice (DJJ). Rate of non-duplicated juveniles per 10,000 (ages 11-17) that are referred to the Alaska Division of Juvenile Justice for domestic violence related assault in the first to fourth degree. An assault is domestic violence related if it occurred between household members (i.e., minors who are current or former spouses, who live together or who have lived together, who are dating or who have dated, who are engaged in or who have engaged in a sexual relationship, who are related to each other up to the fourth degree of consanguinity, or who are related or formerly related by marriage; persons who have a child of the relationship; and minor children of a person in any of these relationships). Most current Alaska data are for FY11 (these were extrapolated from data that were available from 2/23/11 to 6/30/11). These data were not collected prior to 2/23/11.

27. Number of sexual assault cases accepted for prosecution
Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with a sexual assault charge in the first, second, third, or fourth degree. A case is accepted for prosecution when the district attorney's office, after reviewing the file and evidence, determines that there is sufficient credible evidence to convict a specific person of the particular crime. Most current Alaska data are from 2009 and previous Alaska data are from 2008.

28. Percent of accepted sexual assault cases with a conviction
Alaska Department of Law (DOL). Percent of sexual assault cases accepted for prosecution that resulted in a conviction. Percentage is based on the number of cases accepted for prosecution with a sexual assault charge in the first, second, third, or fourth degree. A conviction is an accepted charge resulting in a finding of guilt (on any charge). A finding of guilt can occur through plea bargaining or being found guilty beyond a reasonable doubt by either a judge or jury. Most current Alaska data are from 2009 and previous Alaska data are from 2008. Conviction data were retrieved on 11/10/11. Data across years are not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

29. Number of abuse of minor cases accepted for prosecution
Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with a sexual abuse of a minor charge in the first, second, third, or fourth degree. A case is accepted for prosecution when the district attorney's office, after reviewing the file and evidence, determines that there is sufficient credible evidence to convict a specific person of the particular crime. Most current Alaska data are from 2009 and previous Alaska data are from 2008.

30. Percent of accepted sexual abuse of minor cases with a conviction
Alaska Department of Law (DOL). Percent of sexual abuse of minor cases accepted for prosecution that resulted in a conviction. Percentage is based on the number of cases accepted for prosecution with a sexual abuse of a minor charge in the first, second, third, or fourth degree. A conviction is an accepted charge resulting in a finding of guilt (on any charge). A finding of guilt can occur through plea bargaining or being found guilty beyond a reasonable doubt by either a judge or jury. Most current Alaska data are from 2009 and previous Alaska data are from 2008. Conviction data were retrieved on 11/10/11. Data across years are not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

31. Number of domestic violence cases accepted for prosecution
Alaska Department of Law (DOL). Number of cases referred to the Alaska Department of Law that were accepted for prosecution with an assault charge in the first, second, third, or fourth degree involving domestic violence. Most current Alaska data are from 2009 and previous Alaska data are from 2008.

32. Percent of accepted domestic violence cases with a conviction
Alaska Department of Law (DOL). Percent of assault cases involving domestic violence accepted for prosecution that resulted in a conviction for an assault involving domestic violence. Percentage is based on the number of cases accepted for prosecution with an assault charge in the first, second, third, or fourth degree involving domestic violence. Most current Alaska data are from 2009 and previous Alaska data are from 2008. Conviction data were retrieved on 11/10/11. Data across years are not directly comparable because recent cases are more likely to be pending prosecution at the time of the data retrieval than older cases.

Intimate Partner Violence and Sexual Violence in the State of Alaska:

Key Results from the 2010 Alaska Victimization Survey

Out of every 100 adult women who reside in the State of Alaska:

48 experienced intimate partner violence (IPV):

37 experienced sexual violence:

59 experienced intimate partner violence, sexual violence, or both:

These lifetime estimates come from a 2010 survey of adult women in the State of Alaska.
Source: UAA Justice Center, Alaska Victimization Survey, http://justice.uaa.alaska.edu/avs.

Purpose of the Survey

Every human being has the right to be safe and free from violence in their own homes, in their relationships, and in their community. Intimate partner violence and sexual violence are endemic problems. Up until now, comprehensive statewide data were not available to guide planning and policy development or to evaluate the impact of prevention and intervention services. This study provides the first definitive measures of intimate partner violence and sexual violence for the State of Alaska. The survey was designed to establish a baseline for the State. Results can be used to support prevention and intervention efforts that reduce violence against women.

Methodology

A total of 871 adult women in Alaska participated in the survey. Respondents were randomly selected by phone (using both land lines and cell phones) in May and June of 2010. Respondents were asked behaviorally specific questions about intimate partner violence (both threats and physical violence). Intimate partners included romantic and sexual partners. Respondents were also asked about sexual violence (both alcohol or drug involved sexual assault and forcible sexual assault). These questions were not limited to intimate partners. Procedures were designed to maximize the safety and confidentiality of all respondents. The survey was approved by multiple institutional review boards and was supported by the Alaska Council on Domestic Violence and Sexual Assault.

Acknowledgments

We sincerely thank the 871 adult women in Alaska who invested time and effort to participate in this victimization survey. They re-lived horrendous experiences, experiences that no one should be subjected to, to help the rest of us understand the extent of intimate partner and sexual violence in Alaska. Funding for this project was provided by the Alaska Council on Domestic Violence and Sexual Assault. The survey was administered by RTI International. Data were analyzed by the UAA Justice Center.

Intimate Partner Violence and Sexual Violence in the State of Alaska: Key Results from the 2010 Alaska Victimization Survey

Key Estimates

The following table shows the percentage and number of adult women in the State of Alaska who experienced each form of violence. All estimates were weighted to control for selection, non-response, and coverage. Estimates show that 58.6% of adult women in Alaska (or 144,881) experienced sexual violence, intimate partner violence, or both, in their lifetime; and 11.8% (or 29,174) experienced these forms of violence in the past year.

Measures of Violence	Lifetime		Past Year	
	%	N	%	N
Intimate partner violence (composite)	47.6%	117,685	9.4%	23,240
Threats of physical violence	31.0%	76,644	5.8%	14,340
Physical violence	44.8%	110,763	8.6%	21,262
Sexual violence (composite)	37.1%	91,725	4.3%	10,631
Alcohol or drug involved sexual assault	26.8%	66,260	3.6%	8,901
Forcible sexual assault	25.6%	63,293	2.5%	6,181
Any Violence (composite)	**58.6%**	**144,881**	**11.8%**	**29,174**

Intimate Partner Violence Estimates:

The intimate partner violence composite includes both threats of physical violence and physical violence.

- 47.6% of adult women (or 117,685) experienced intimate partner violence in their lifetime, with:
  - 31.0% (or 76,644) experiencing threats of physical violence, and
  - 44.8% (or 110,763) experiencing physical violence.
- 9.4% of adult women (or 23,240) experienced intimate partner violence in the past year, with:
  - 5.8% (or 14,340) experiencing threats of physical violence, and
  - 8.6% (or 21,262) experiencing physical violence.

Sexual Violence Estimates:

The sexual violence composite includes both alcohol or drug involved sexual assault and forcible sexual assault.

- 37.1% of adult women (or 91,725) experienced sexual violence in their lifetime, with:
  - 26.8% (or 66,260) experiencing at least one alcohol or drug involved sexual assault, and
  - 25.6% (or 63,293) experiencing at least one forcible sexual assault.
- 4.3% of adult women (or 10,631) experienced sexual violence in the past year, with:
  - 3.6% (or 8,901) experiencing at least one alcohol or drug involved sexual assault, and
  - 2.5% (or 6,181) experiencing at least one forcible sexual assault.

Important Limitations

The survey excluded non-English speaking women, women without phone access, and women not living in a residence. Estimates may be higher among women excluded from the survey. Estimates may also be conservative because of the continuing stigma of reporting victimization. This survey measured the number of *victims*, not the number of *victimizations*. In addition, not all forms of intimate partner violence or sexual violence were measured.

National, statewide, and local resources for domestic violence, sexual assault, stalking, and teen dating abuse can be found online at: http://gov.alaska.gov/parnell/priorities/choose-respect/links-to-organizations.html.

Intimate Partner Violence and Sexual Violence in the Municipality of Anchorage:

Key Results from the 2011 Alaska Victimization Survey

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

Out of every 100 adult women who reside in the Municipality of Anchorage:

42 experienced intimate partner violence (IPV):

30 experienced sexual violence:

51 experienced intimate partner violence, sexual violence, or both:

These lifetime estimates come from a 2011 survey of adult women in the Municipality of Anchorage.
Source: UAA Justice Center, Alaska Victimization Survey, http://justice.uaa.alaska.edu/avs.

Purpose of the Survey

Every human being has the right to be safe and free from violence in their own homes, in their relationships, and in their community. Intimate partner violence and sexual violence are endemic problems. Up until now, regional data were not available to guide planning and policy development or to evaluate the impact of prevention and intervention services. This study provides the first definitive measures of intimate partner violence and sexual violence for the Municipality of Anchorage. The survey was designed to establish a baseline for the Municipality of Anchorage. Results can be used to support prevention and intervention efforts that reduce violence against women.

Methodology

A total of 710 adult women from the Municipality of Anchorage participated in the survey. Respondents were randomly selected by phone (using both land lines and cell phones) from April 2011 to June 2011. Respondents were asked behaviorally specific questions about intimate partner violence (both threats and physical violence). Intimate partners included romantic and sexual partners. Respondents were also asked about sexual violence (both alcohol or drug involved sexual assault and forcible sexual assault). These questions were not limited to intimate partners. Procedures were designed to maximize the safety and confidentiality of all respondents. The survey was approved by multiple institutional review boards and was supported by Standing Together Against Rape (STAR) and Abused Women's Aid in Crisis (AWAIC).

Acknowledgments

We sincerely thank the 710 adult women in the Municipality of Anchorage who invested time and effort to participate in the Alaska victimization survey. They re-lived horrendous experiences, experiences that no one should be subjected to, to help the rest of us understand the extent of intimate partner and sexual violence in the Municipality of Anchorage. We also thank STAR and AWAIC. Funding for this project was provided by the Alaska Council on Domestic Violence and Sexual Assault, with additional funding from the Governor's Choose Respect Initiative to end the epidemic of domestic violence and sexual assault in Alaska. The survey was administered by RTI International. Data were analyzed by the UAA Justice Center.

Intimate Partner Violence and Sexual Violence in the Municipality of Anchorage: Key Results from the 2011 Alaska Victimization Survey

Key Estimates

The following table shows the percentage and number of adult women in the Municipality of Anchorage who experienced each form of violence. All estimates were weighted to control for selection, non-response, and coverage. Estimates show that 50.9% of adult women in the Municipality of Anchorage (or 54,313) experienced sexual violence, intimate partner violence, or both, in their lifetime; and 8.5% (or 9,070) experienced these forms of violence in the past year.

Measures of Violence	Lifetime		Past Year	
	%	N	%	N
Intimate partner violence (composite)	42.2%	45,030	8.2%	8,750
Threats of physical violence	22.8%	24,329	3.6%	3,841
Physical violence	41.6%	44,390	8.1%	8,643
Sexual violence (composite)	29.6%	31,585	1.4%	1,494
Alcohol or drug involved sexual assault	18.0%	19,207	1.2%	1,280
Forcible sexual assault	22.8%	24,329	0.4%	427
Any Violence (composite)	**50.9%**	**54,313**	**8.5%**	**9,070**

Intimate Partner Violence Estimates:

The intimate partner violence composite includes both threats of physical violence and physical violence.

- 42.2% of adult women (or 45,030) experienced intimate partner violence in their lifetime, with:
  - 22.8% (or 24,329) experiencing threats of physical violence, and
  - 41.6% (or 44,390) experiencing physical violence.
- 8.2% of adult women (or 8,750) experienced intimate partner violence in the past year, with:
  - 3.6% (or 3,841) experiencing threats of physical violence, and
  - 8.1% (or 8,643) experiencing physical violence.

Sexual Violence Estimates:

The sexual violence composite includes both alcohol or drug involved sexual assault and forcible sexual assault.

- 29.6% of adult women (or 31,585) experienced sexual violence in their lifetime, with:
  - 18.0% (or 19,207) experiencing at least one alcohol or drug involved sexual assault, and
  - 22.8% (or 24,329) experiencing at least one forcible sexual assault.
- 1.4% of adult women (or 1,494) experienced sexual violence in the past year, with:
  - 1.2% (or 1,280) experiencing at least one alcohol or drug involved sexual assault, and
  - 0.4% (or 427) experiencing at least one forcible sexual assault.

Important Limitations

The survey excluded non-English speaking women, women without phone access, and women not living in a residence. Estimates may be higher among women excluded from the survey. Estimates may also be conservative because of the continuing stigma of reporting victimization. This survey measured the number of *victims*, not the number of *victimizations*. In addition, not all forms of intimate partner violence or sexual violence were measured. All of these limitations may vary across regions. As a result, the validity of regional comparisons remains unknown.

For additional information on the Alaska Victimization Survey, please visit http://justice.uaa.alaska.edu/avs, or contact André Rosay with the UAA Justice Center (907-786-1821) or Lauree Morton with the Council on Domestic Violence and Sexual Assault (907-465-5503). STAR provides options, support, and information to Alaskans affected by sexual violence. Their crisis line is 1-800-748-8999. AWAIC offers safe shelter and intervention to those affected by domestic violence. Their crisis line is 907-272-0100.

Intimate Partner Violence and Sexual Violence in the City of Fairbanks: Key Results from the 2011 Alaska Victimization Survey

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

Out of every 100 adult women who reside in the City of Fairbanks:

50 experienced intimate partner violence (IPV):

31 experienced sexual violence:

57 experienced intimate partner violence, sexual violence, or both:

These lifetime estimates come from a 2011 survey of adult women in the City of Fairbanks.
Source: UAA Justice Center, Alaska Victimization Survey, http://justice.uaa.alaska.edu/avs.

Purpose of the Survey

Every human being has the right to be safe and free from violence in their own homes, in their relationships, and in their community. Intimate Partner Violence and Sexual Violence in the City of Fairbanks: Key Results from the 2011 Alaska Victimization Survey

Key Estimates

The following table shows the percentage and number of adult women in the City of Fairbanks who experienced each form of violence. All estimates were weighted to control for selection, non-response, and coverage. Estimates show that 57.0% of adult women in the City of Fairbanks (or 6,142) experienced sexual violence, intimate partner violence, or both, in their lifetime; and 11.5% (or 1,239) experienced these forms of violence in the past year.

Measures of Violence	Lifetime		Past Year	
	%	N	%	N
Intimate partner violence (composite)	49.5%	5,334	10.8%	1,164
Threats of physical violence	30.2%	3,254	6.8%	733
Physical violence	48.8%	5,258	10.3%	1,110
Sexual violence (composite)	31.4%	3,383	2.7%	291
Alcohol or drug involved sexual assault	18.0%	1,940	2.5%	269
Forcible sexual assault	25.3%	2,726	1.4%	151
Any Violence (composite)	**57.0%**	**6,142**	**11.5%**	**1,239**

Intimate Partner Violence Estimates:

The intimate partner violence composite includes both threats of physical violence and physical violence.

- 49.5% of adult women (or 5,334) experienced intimate partner violence in their lifetime, with:
  - 30.2% (or 3,254) experiencing threats of physical violence, and
  - 48.8% (or 5,258) experiencing physical violence.
- 10.8% of adult women (or 1,164) experienced intimate partner violence in the past year, with:
  - 6.8% (or 733) experiencing threats of physical violence, and
  - 10.3% (or 1,110) experiencing physical violence.

Sexual Violence Estimates:

The sexual violence composite includes both alcohol or drug involved sexual assault and forcible sexual assault.

- 31.4% of adult women (or 3,383) experienced sexual violence in their lifetime, with:
  - 18.0% (or 1,940) experiencing at least one alcohol or drug involved sexual assault, and
  - 25.3% (or 2,726) experiencing at least one forcible sexual assault.
- 2.7% of adult women (or 291) experienced sexual violence in the past year, with:
  - 2.5% (or 269) experiencing at least one alcohol or drug involved sexual assault, and
  - 1.4% (or 151) experiencing at least one forcible sexual assault.

Important Limitations

The survey excluded non-English speaking women, women without phone access, and women not living in a residence. Estimates may be higher among women excluded from the survey. Estimates may also be conservative because of the continuing stigma of reporting victimization. This survey measured the number of *victims*, not the number of *victimizations*. In addition, not all forms of intimate partner violence or sexual violence were measured. All of these limitations may vary across regions. As a result, the validity of regional comparisons remains unknown.

Intimate Partner Violence and Sexual Violence in the City and Borough of Juneau: Key Results from the 2011 Alaska Victimization Survey

Key Estimates

The following table shows the percentage and number of adult women in the City and Borough of Juneau who experienced each form of violence. All estimates were weighted to control for selection, non-response, and coverage. Estimates show that 55.4% of adult women in the City and Borough of Juneau (or 6,521) experienced sexual violence, intimate partner violence, or both, in their lifetime; and 12.6% (or 1,483) experienced these forms of violence in the past year.

Measures of Violence	Lifetime		Past Year	
	%	N	%	N
Intimate partner violence (composite)	47.1%	5,544	12.1%	1,424
Threats of physical violence	23.2%	2,731	7.0%	824
Physical violence	45.2%	5,320	10.4%	1,224
Sexual violence (composite)	35.3%	4,155	1.0%	118
Alcohol or drug involved sexual assault	22.1%	2,601	0.5%	59
Forcible sexual assault	23.4%	2,754	0.6%	71
Any Violence (composite)	**55.4%**	**6,521**	**12.6%**	**1,483**

Intimate Partner Violence Estimates:

The intimate partner violence composite includes both threats of physical violence and physical violence.

- 47.1% of adult women (or 5,544) experienced intimate partner violence in their lifetime, with:
  - 23.2% (or 2,731) experiencing threats of physical violence, and
  - 45.2% (or 5,320) experiencing physical violence.
- 12.1% of adult women (or 1,424) experienced intimate partner violence in the past year, with:
  - 7.0% (or 824) experiencing threats of physical violence, and
  - 10.4% (or 1,224) experiencing physical violence.

Sexual Violence Estimates:

The sexual violence composite includes both alcohol or drug involved sexual assault and forcible sexual assault.

- 35.3% of adult women (or 4,155) experienced sexual violence in their lifetime, with:
  - 22.1% (or 2,601) experiencing at least one alcohol or drug involved sexual assault, and
  - 23.4% (or 2,754) experiencing at least one forcible sexual assault.
- 1.0% of adult women (or 118) experienced sexual violence in the past year, with:
  - 0.5% (or 59) experiencing at least one alcohol or drug involved sexual assault, and
  - 0.6% (or 71) experiencing at least one forcible sexual assault.

Important Limitations

The survey excluded non-English speaking women, women without phone access, and women not living in a residence. Estimates may be higher among women excluded from the survey. Estimates may also be conservative because of the continuing stigma of reporting victimization. This survey measured the number of *victims*, not the number of *victimizations*. In addition, not all forms of intimate partner violence or sexual violence were measured. All of these limitations may vary across regions. As a result, the validity of regional comparisons remains unknown.

For additional information on the Alaska Victimization Survey, please visit http://justice.uaa.alaska.edu/avs, or contact André Rosay with the UAA Justice Center (907-786-1821) or Lauree Morton with the Council on Domestic Violence and Sexual Assault (907-465-5503). AWARE provides comprehensive intervention and prevention, outreach and education regarding domestic violence, sexual assault and child abuse (www.awareak.org). The Juneau crisis line is 907-586-1090. The toll-free crisis line is 1-800-478-1090.

Intimate Partner Violence and Sexual Violence in Bristol Bay:

Key Results from the 2011 Alaska Victimization Survey

CDVSA
Council on Domestic Violence & Sexual Assault
Safety ★ Prevention ★ Accountability

Out of every 100 adult women who reside in the Bristol Bay region:

44 experienced intimate partner violence (IPV):

31 experienced sexual violence:

52 experienced intimate partner violence, sexual violence, or both:

These lifetime estimates come from a 2011 survey of adult women in the Bristol Bay region.
Source: UAA Justice Center, Alaska Victimization Survey, http://justice.uaa.alaska.edu/avs.

Purpose of the Survey

Every human being has the right to be safe and free from violence in their own homes, in their relationships, and in their community. Intimate partner violence and sexual violence are endemic problems. Up until now, regional data were not available to guide planning and policy development or to evaluate the impact of prevention and intervention services. This study provides the first definitive measures of intimate partner violence and sexual violence for the Bristol Bay region. The survey was designed to establish a baseline for the Bristol Bay region. Results can be used to support prevention and intervention efforts that reduce violence against women.

Methodology

A total of 374 adult women from the Dillingham Census Area, the Bristol Bay Borough, and the Lake and Peninsula Borough participated in the survey. Respondents were randomly selected by phone (using both land lines and cell phones) from April 2011 to June 2011. Respondents were asked behaviorally specific questions about intimate partner violence (both threats and physical violence). Intimate partners included romantic and sexual partners. Respondents were also asked about sexual violence (both alcohol or drug involved sexual assault and forcible sexual assault). These questions were not limited to intimate partners. Procedures were designed to maximize the safety and confidentiality of all respondents. The survey was approved by multiple institutional review boards and was supported by the Bristol Bay Native Association and Safe and Fear-Free Environment, Inc. (SAFE).

Acknowledgments

We sincerely thank the 374 adult women in the Bristol Bay region who invested time and effort to participate in the Alaska victimization survey. They re-lived horrendous experiences, experiences that no one should be subjected to, to help the rest of us understand the extent of intimate partner and sexual violence in the Bristol Bay region. We also thank the Bristol Bay Native Association and Safe and Fear-Free Environment, Inc. (SAFE). Funding for this project was provided by the Alaska Council on Domestic Violence and Sexual Assault. Additional funding was provided through the Governor's Choose Respect Initiative to end the epidemic of domestic violence and sexual assault in Alaska. The survey was administered by RTI International. Data were analyzed by the UAA Justice Center.

Intimate Partner Violence and Sexual Violence in Bristol Bay: Key Results from the 2011 Alaska Victimization Survey

Key Estimates

The following table shows the percentage and number of adult women in the Bristol Bay region who experienced each form of violence. All estimates were weighted to control for selection, non-response, and coverage. Estimates show that 51.7% of adult women in the Bristol Bay region (or 1,246) experienced sexual violence, intimate partner violence, or both, in their lifetime; and 14.4% (or 347) experienced these forms of violence in the past year.

Measures of Violence	Lifetime		Past Year	
	%	N	%	N
Intimate partner violence (composite)	44.2%	1,066	12.3%	297
Threats of physical violence	23.7%	571	3.2%	77
Physical violence	43.7%	1,054	12.2%	294
Sexual violence (composite)	31.2%	752	4.4%	106
Alcohol or drug involved sexual assault	22.0%	530	3.7%	89
Forcible sexual assault	22.4%	540	2.0%	48
Any Violence (composite)	**51.7%**	**1,246**	**14.4%**	**347**

Intimate Partner Violence Estimates:

The intimate partner violence composite includes both threats of physical violence and physical violence.

- 44.2% of adult women (or 1,066) experienced intimate partner violence in their lifetime, with:
  - 23.7% (or 571) experiencing threats of physical violence, and
  - 43.7% (or 1,054) experiencing physical violence.
- 12.3% of adult women (or 297) experienced intimate partner violence in the past year, with:
  - 3.2% (or 77) experiencing threats of physical violence, and
  - 12.2% (or 294) experiencing physical violence.

Sexual Violence Estimates:

The sexual violence composite includes both alcohol or drug involved sexual assault and forcible sexual assault.

- 31.2% of adult women (or 752) experienced sexual violence in their lifetime, with:
  - 22.0% (or 530) experiencing at least one alcohol or drug involved sexual assault, and
  - 22.4% (or 540) experiencing at least one forcible sexual assault.
- 4.4% of adult women (or 106) experienced sexual violence in the past year, with:
  - 3.7% (or 89) experiencing at least one alcohol or drug involved sexual assault, and
  - 2.0% (or 48) experiencing at least one forcible sexual assault.

Important Limitations

The survey excluded non-English speaking women, women without phone access, and women not living in a residence. Estimates may be higher among women excluded from the survey. Estimates may also be conservative because of the continuing stigma of reporting victimization. This survey measured the number of *victims*, not the number of *victimizations*. In addition, not all forms of intimate partner violence or sexual violence were measured. All of these limitations may vary across regions. As a result, the validity of regional comparisons remains unknown.

For additional information on the Alaska Victimization Survey, please visit http://justice.uaa.alaska.edu/avs, or contact André Rosay with the UAA Justice Center (907-786-1821) or Lauree Morton with the Council on Domestic Violence and Sexual Assault (907-465-5503). SAFE provides shelter, advocacy, and safety for victims and their families of violence in Bristol Bay. To contact SAFE, call the office at 907-842-2320 or the Crisis line at 1-800-478-2316 (http://www.besafeandfree.org).

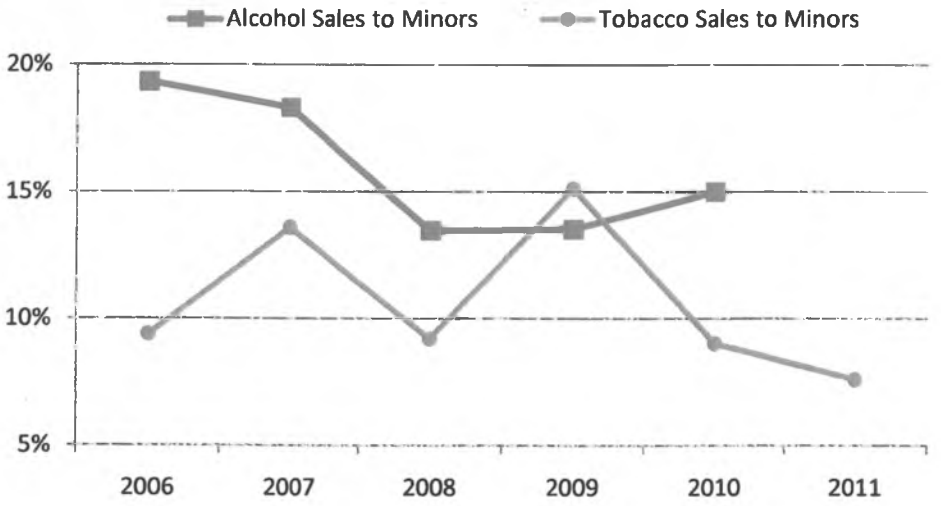
Alaska Alcohol vs. Tobacco Sales to Minors

SFY2006 - 2011

SFY	Alcohol Sales to Minors			Tobacco Sales to Minors *
	A	B	C	
	# Vendor Checks	# Sales	Violation Rate (B / A)	
2006	874	169	19.3%	9.4%
2007	1,037	190	18.3%	13.6%
2008	609	82	13.5%	9.2%
2009	614	83	13.5%	15.1%
2010	700	105	15.0%	9.0%
2011	n/a	n/a		7.6%



* Alaska tobacco sales to minors are represented by the Synar Retailer Violation Rate (RVR). (The federal Synar Amendment requires states to conduct investigations related to the sale of tobacco to minors.)

Synar investigations cross state fiscal years. For instance, the 2011 RVR reflects investigations conducted between June 1 and September 30, 2010. The 2011 RVR is provisional, pending federal approval.

Remarks at Crime Summit
Senate Judiciary Committee – January 25, 2012
Janet McCabe, Chair, Partners for Progress

Thanks for Focusing on Cost-Effective Justice!

Thank you for recognizing the value Cost-Effective Justice at this summit. I feel very optimistic that under the effective leadership of Carmen Gutierrez in her role as Chair of the Reentry Task Force, the Legislature, Administration, Court System, and the Private Sector have all been actively involved in achieving Smart Justice. Collaboration is the key to "turning the curve" by reducing criminal recidivism and increasing public safety.

This month Senator French sent his constituents a message asking what we thought should be done about crime in Alaska. My answer is: Keep up the pressure to achieve Cost-Effective Justice. Reducing recidivism will take a lot of ongoing attention by the Legislature. It will mean looking at the unintended consequences of some existing laws. Cost-Effective or Smart Justice is more difficult than putting people in jail, but it is the only way to reduce recidivism and cut prison costs in a lasting way. The ripple effects of success are huge, in terms of the wellbeing of families, children, employers and the safety of the community at large.

Commuity Role – How 24/7 Sobriety Monitoring Fits In

There is a growing appreciation of the role and responsibility of the community in achieving Smart Justice goals. Community non-profits and the business sector need to provide reasonable opportunities for housing and employment for returning citizens, and the general public needs to support these efforts.

To build community support, people need to see effective systems in place that protect them against alcohol-induced crime during the period of transition from prison to community, particularly protection against DUI. 24/7 Sobriety Monitoring is a powerful tool for meeting this goal. Partners for Progress opened Anchorage's 24/7 Sobriety Monitoring site last July. The project was designed by a stakeholders' committee led by Anchorage Police Chief Mark Mew, that included AWAIC , DMV and DOC, as well as Municipal and State representatives. The Municipal Prosecutor and I met with Jeff Jessee and he expressed his support. Anchorage Mayor, Dan Sullivan also supports the program, and has included 24/7 as a proposed operating fund item in Anchorage's FY 13 "blue book".

24/7 Participants: The Anchorage Police Department and Municipal Prosecutor proposed that the new program start with a test group of misdemeanants charged with domestic violence, child abuse and neglect having a nexus in alcoholism. The goal was to find offenders who are not abusive or neglectful except when they are drinking. The committee endorsed this proposal as an excellent choice, appropriate for Anchorage, but also because

they thought 24/7 sobriety monitoring of this population would have statewide applicability.

24/7 Program: The municipal prosecutor and public defender select prospective participants for the program. They are offered dismissal of charges at program completion as an inducement to join 24/7. A strong additional motivator is often their desire not to lose custody of their children. If prospective participants accept the offer, they are court-ordered into the program during a session for municipal cases. New participants are enrolled in 24/7 by the Program Manager while still at the courthouse. They start testing that same night.

The 24/7 site is located in a mid-town Anchorage in a commercial building with plenty of parking and bus access. Since July 23rd the site has been open and testing participants every day, morning and evening, regardless of weather. Our site manager is a retired DOC Sergeant.

The program follows the model that was developed in South Dakota and uses the same software and equipment. Under court order, participants must appear at the site between 7 and 9 in the morning and evening. It takes about 45 seconds to give them a breath test. Results are shown to them and recorded in a remote data base. The cost is $2 per test. Spacing of the tests is sufficient to assure absolute sobriety. Incidents of noncompliance are reported from the site to the Municipality and the Court, and sanctions are prompt.

24/7 Results: Data show that the program is effective in keeping people sober. As of Sunday night (1/22/12), 1450 tests had been conducted and 1448 (99.9 %) of those showed no indication of drinking. The program's first participant who entered at the start on July 23 has completed her six-month program with no failed tests. Her charge of child neglect was dismissed. Thus far, one participant tested positive and has failed the program.

24/7 monitoring is not intended as a form of treatment, but, rather, as a tool to assure sobriety. However, the experience of being in 24/7 does appear to have a long-term positive effect on behavior. A study by the South Dakota Attorney General found this to be the case. We will know more definitively at the end of this month when the RAND Corporation will release an impartial evaluation of the program outside. From what they are able to tell us now, the results are very positive.

After observing a session at the Anchorage site, it is not hard to see why the program may have lasting beneficial effects. Participants come in, are greeted warmly, blow a .000, see their test results and leave. Every day, twice a day they are rewarded by the knowledge of one more success. Doing this 180 or 360 times is bound to have an impact. The program requires participants to actively engage in their monitoring and to make contact with

supportive people twice each day. They develop a personal sense of responsibility and create their own success.

Program Size – Expansion Possibilities: The current program is small. We have 10 participants and expect to have a total of 30 this fiscal year from the test group. The site is functioning well, and has an estimated capacity of up to 100. Partners for Progress has been working with the Parole Board, and the Anchorage Probation Office to gain participants from an additional source. They have told us to expect referrals next month.

A highly useful and effective way to make fuller use of the existing Anchorage 24/7 site would require legislation for an Anchorage pilot project. South Dakota makes major use of 24/7 as a tool to assure the sobriety of DUI offenders who would otherwise lose their licenses. Trends in South Dakota since 2005 show a direct correlation between the expansion of 24/7 and a decrease in fatal accidents involving alcohol. The program has worked so well that Primero Insurance reduces SR 22 insurance costs for people on 24/7 by 10 percent.

In Alaska a license to drive is often essential for employment. License revocation creates a Hobson's choice between supporting a family and being lawful. This seems particularly counter-productive for therapeutic court graduates who have developed sobriety and self-sufficiency under a rigorous 18-month program. As one therapeutic court judge has said, "Work, which is critical to rehabilitation and thus public safety, is extremely difficult for people who cannot drive. By denying a license, we limit rehabilitation and increase the risk of ultimate failure."

The Criminal Justice Working Group has recognized this situation, and created a study group to analyze unintended effects of license suspension and revocation. A pilot project allowing Anchorage Wellness Court graduates to drive with a license conditioned on twice-daily 24/7 sobriety monitoring could assist the CJWG study group by demonstrating a new approach to people who would otherwise lose their licenses for life.

Anchorage 24/7 Sobriety Monitoring

What is 24/7

24/7 Sobriety Monitoring requires twice daily breath tests enforced by swift, certain and proportionate consequences for any indication of alcohol consumption. The program is an excellent system for assuring the absolute all-day, each-day sobriety of offenders who would otherwise have to be incarcerated because of their potential danger to the public as indicated by previous violent or irresponsible behavior while drunk. In Anchorage, where Alaska's first 24/7 site was opened on July 23, the program is currently being used by the Municipality for individuals with misdemeanant Domestic Violence, Assault, Child Abuse and Neglect charges resulting from actions that occurred during episodes of drunkenness.

Provided by

- Partners for Progress funds and manages the test site and keeps it open for two-hour testing sessions in every morning and evening throughout the year.
- The Municipality of Anchorage and the Court System provide swift and certain response to failed tests or no-shows.

Location and Access

- **207 East Northern Lights, Suite 113 in midtown Anchorage**, a large pinkish building at the corner of Northern Lights and Cordova. The building is next to The Greek Corner and directly across from Blockbuster and Chuck E Cheese.
- Enter from the main door at the rear of the building and walk about 20 feet down the hall to the test site in Suite 113 on the right.
- Ample free parking surrounds the building.
- There is a bus stop on Northern Lights directly in front of the building.
- In the evening after 7:00 PM the building is locked and participants must use the intercom or the doorbell at the back entrance to be let in by staff, or call them in the site at 272-1199.

Hours

- Morning testing – 7:00 to 9:00 AM
- Evening testing – 7:00 to 9:00 PM

Costs

- Participants must pay $2.00 a test ($4.00 a day or $28.00 a week) at the site.

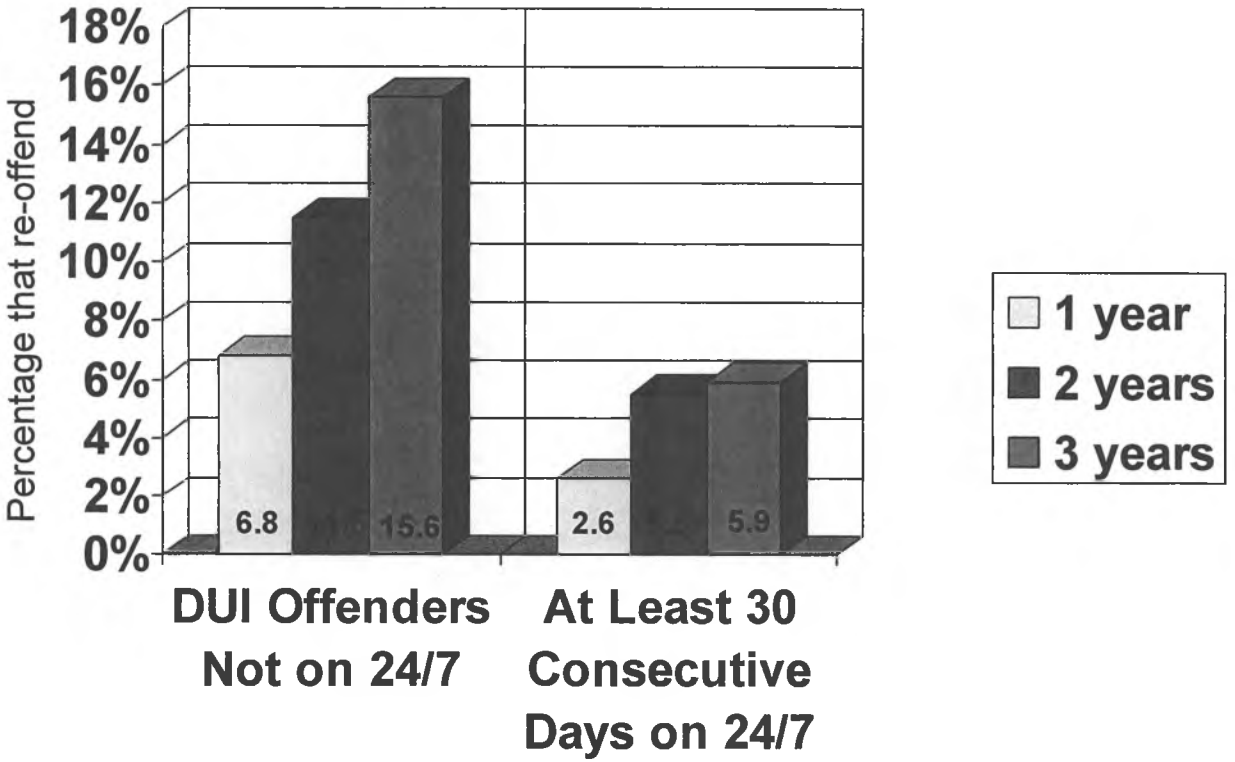
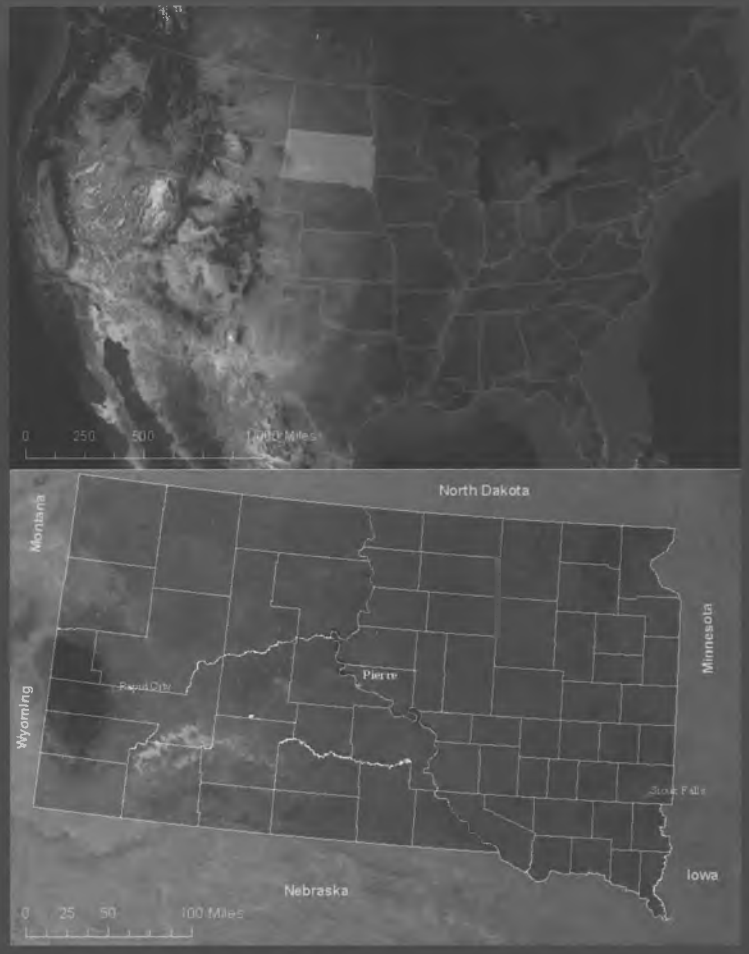
Post-24/7 Recidivism
South Dakota

Analyses by the South Dakota Attorney General's Office found that offenders placed at least 30 consecutive days on 24/7 are subsequently less likely to commit another DUI offense.



SOURCE: South Dakota Attorney General's Office, www.state.sd.us/attorney

South Dakota



- 814,000 people
- 48% live in rural SD
- In 2005, SD ranked 5th worst in alcohol related fatal crashes
- 36% of all felonies were DUIs
- 10% of all males under 50 have been on 24/7

TARGET GROUP and GOAL

- Defendant sobriety- 24/7 (NO ALCOHOL NO DRUGS NO BARS)
- (5 county pilot) Anyone arrested for DUI 2nd or more imposed as a condition of bond
- (And now) – used as a bond condition, DUI 2 or more, vehicular homicide, vehicular battery, bond or post sentence probation any offense, prison parole any offense, family court , domestic violence, DUI court/drug court, and DUI conditional permits

Alco-Sensor FST

The Alco-Sensor FST is the newest instrument in the Alco Sensor product line. Offering rapid and accurate testing. No court challenges and extremely durable instrument. Designed to do 150 test per hour.

BREATH TESTING RESULTS

(LATEST PUBLISHED STATS OCT 2011)
(twice per day is the backbone of 24/7 testing)

- 20,000 PARTICIPANT 2 x day SINCE FEB. 05
- 1,600 ACTIVE PARTICIPANTS STATEWIDE AVE.
- ADMINISTERED 4.22 MILLION TWICE PER DAY TESTS
- PASS RATE OF 99.4%
- .3% FAILED THE BREATH TEST
- .3% DID NOT SHOW FOR TESTING
- 4.22 MILLION TESTS / 2 = 2.1M DAYS x $68 PER DAY COSTS = MILLIONS IN SAVINGS?

(*estimated SAVINGS ON JAIL FEES FOR LOCAL GOVERNMENT)

Agency work load data

- 60 % always show on time and have clean testing (no failures) during participation
- 40 % have at least 1 type of failure during participation
  - 19 % have 1 failure
  - 12 % have two failures
  - 5 % have three failures
  - 9 % have four or more failure

(source Mt. Plains Evaluation)

Alcohol-Impaired MV Fatalities and 24/7 Participation

BENEFITS OF 24/7

- Reduced alcohol related fatal crashes
- Family is safer – reduced incidents of other crimes where alcohol and drugs were a factor
- Helps with the efficiencies of probation, parole, and DUI courts (case management)
- Defendant will spend less time in jail – alternative to incarceration
- Treatment prospects improve
- Participant's employer happy
- NO COST TO THE TAXPAYER

24/7 Changing Behavior

PEOPLE DO NOT CHANGE BEHAVIOR UNTIL ALL THE OTHER ALTERNATIVES ARE WORSE

24/7 Sobriety Objectives

The Goals:

- "Keep them Sober" requiring defendant sobriety- 24/7
- Reduce incarceration rates (local and state)
- Reduce alcohol related injury and fatal crashes
- Save taxpayers money
- Prison cells freed up
- Defender pay model
- Participants working providing for families
- Reduction in crime and recidivism
- Reduction or elimination of work release programs
- Set the stage for long term sobriety and behavior changes with treatment protocols and return of cognitive skills .

What is 24/7 ?

- The 24/7 Sobriety Project is a court or corrections - based management program originally designed to deal with growing jail and prison populations;
- The 24/7 Sobriety Project is a testing and monitoring program for alcohol and illegal drugs that serves as an alternative to incarceration, allows people to work and remain in the community, continuing to drive if eligible, care for their families, and stay out of the criminal justice system;
- Violation of program rules leads to immediate, measured, sure and swift sanction (usually brief incarceration of the offender);

24/7 Project Background

Facts:

- For decades alcohol and drugs have driven the criminal justice system
- 45% of traffic fatalities are alcohol related
- 85% of prison populations in SD have an admitted alcohol or drug problem
- 15% of prison population is Felony DUI
- 35% of all felonies are DUI Felony / Vehicular Battery / Vehicular Homicide
- 57% of all felonies are DUI and controlled substances
- 18% of persons convicted for DUI 1 get a second conviction for DUI 2
- 41% of all misdemeanor filings are DUI 1 and DUI 2

TESTING METHODOLOGIES

- TWICE PER DAY BREATH TESTING
- TRANSDERMAL MONITORING
- RANDOM OR SCHUDULED UA
- DRUG PATCH

Recidivism Rates under 24/7

STEP UP – A PROGRAM FOR EXPELLED/SUSPENDED YOUTH

The genesis of the Step Up program began in 2007 with the recognition that expelled/long term suspended youth from the Anchorage School District (ASD)represent a risk to the community. The data was clear; many of these youth become dropouts, some become involved in the juvenile system, they are at a higher risk of becoming gang involved, many become a drain on social welfare networks, and it is well established that a failure to obtain a high school diploma will cause them to earn substantially less income in their lifetime. ASD, Division of Juvenile Justice (DJJ), the City of Anchorage, Nine Star, United Way, and other concerned individuals started to meet on what should be done. The Anti-Gang and Youth Violence Policy Team, which was formed under the Mayor of Anchorage's Office helped provide the oversight and political will to move forward. Slowly and deliberately, the Step Up program was thus conceived, designed, developed, and implemented after much hard work.

Step Up is a proactive education program now operated cooperatively by DJJ and ASD. DJJ provides Juvenile Justice Officer Staff, rent for the space, food supplies and ASD provides the teaching staff, a counselor, equipment and other support services. The focus is to transition students back to school, assist in credit recovery with a sense of purpose and philosophy. We are inclusive, build on the strengths of families and competency driven, requiring accountability of youth and parents. We are focused on our goal of student's succeeding in academics, improving in social and emotional growth areas to make Anchorage a safer community. Service learning is also a huge component of the program, with youth participating in service learning at least twice a week. Many of these service learning events translate into employment for youth. Additionally, Step Up also provides ART (Aggression Replacement Therapy) and other support services to these youth.

The program opened its doors in the fall of September, 2009 with a grand opening in a very small space with many dignitaries present including Governor Parnell. It was recognized by many that this was a new and important effort in dealing with troubled youth who were not succeeding in a traditional comprehensive school. The program started purposely small, with only 12 slots available for high school expelled/suspended youth. In the fall of 2011, Step Up expanded to 25 slots for both high school and middle school youth who have been expelled or long-term suspended. We anticipate being full or close to full once all the referrals have been dealt with.

Step Up has steadily grown in success. The first year we experienced some bumps in the road with referrals and other transition efforts. This has greatly improved and the program is operating extremely smooth, with virtually no incidents of misbehavior at the program. The success of the program is due to a great number of factors, including the structure, curriculum, service learning, engagement of the youth, and having hand selected top notch staff.

The following statistics are very new of course since Step Up is a little over two years old and the initial size only allowed for 12 youth in the program. No less, we believe the initial statistics are extremely encouraging and very informative of what should happen in the future.

Total two year enrollment	**53 students**	
Graduated from Step Up with Diploma	5	9%
Returned to ASD schools	25	47%
Moved out of District	6	12%
Step Up return (to the next year)	5	9%
Transferred to Ninestar GED program	2	4%
Enrolled at Treatment Facility	1	2%
Detained at McLaughlin Youth Center	4	8%
Unknown	5	9%

- 100% of students that returned to ASD schools had zero long-term suspensions
- 75% of students that returned to ASD had zero discipline infractions
- 88% successfully transitioned out of Step Up

* We recognize of course that the longer that we follow these former Step Up residents the more time exists for them to run in to trouble.

Ethnicity of the 53 students

Hawaiian/Pacific Islander	36%
African American	23%
Caucasian	21%
Mixed	7%
Alaska Native	6%
Asian	2%

*** Student Success Stories from Step Up (fictitious names, histories are accurate)**

Steve Seward 16, male, White

Student was a sophomore at a comprehensive high school when he was expelled for a presumptive one year for weapon/firearms, assault, criminal acts, and prohibited organizations. Around the same time, his best friend was shot and killed in a warehouse party. He stated that at this time his life of drugs and violence came crashing down and he knew he needed to turn things around. After time at the McLaughlin Youth Facility, he decided that Step Up was his last option for a high school diploma. A search through his school district discipline records show that his expulsion was the 1st infraction he had at school. Student came to Step Up as junior with 10.75 credits. While with us, he gained 8 credits, completed all his requirements to be reinstated with the school district, and then transitioned to an alternative school where he finished up his last remaining credits and graduated with his diploma. He was also offered and completed an internship with USKH an engineering firm in Anchorage. This came about after the Step Up students took a field trip to USKH and this student impressed the USKH staff to the point of them offering him this opportunity. He then went on to work for UPS. He has come back to Step Up since he left to talk with the other students about choosing different paths.

George Fairbanks 19, male, Black

Student was a senior at a comprehensive high school when he was placed on a 45 day suspension with a recommendation for expulsion for fighting. This was his 3rd high school fight. His discipline records show that he had 8 out-of- school- suspensions, ranging from 1 to 45 days, in a 4 year period. These incidents ranged from reckless and unsafe behavior, sexual harassment, fighting, and theft/robbery. Student had also previously been expelled from the district but was able to complete his reinstatement criteria and return to school. However, within 5 months of returning, he was put up for expulsion again after getting into another fight. The decision was made to have him attend Step Up to finish up his remaining 1.5 credits. He came to Step Up, completed his credits, and was granted his diploma. This student had attended the Continuation Program, a school for students who were expelled for drugs and alcohol. This was a special deal for him as he was expelled for violent incidents and never substance use issues. He was in and out of Continuation 3 times in 2 years. All in all, this student switched school placements 11 times in 4 years before he was finally able to get his high school diploma through Step Up. We have had all 3 brothers from this family at Step Up, with 2 of them receiving high school diplomas from the program.

Dillingham Xander 17, male, Hmong

Student was a junior at a comprehensive high school when he was expelled for assault. Between the dates of 2/18/2009 and 1/6/2011, he had been in 6 different incidents ranging from assaults, fighting, and threats. He was out of school on 5 different suspensions ranging from 5 to 45 days. He came to Step Up in the 11th grade with only 4.5 credits. He should have had 15 credits. While at Step Up, this student worked extremely hard and was able to increase his credits to 11.75. He also completed all his reinstatement criteria and was reinstated with the school district. He also passed the writing HSGQE while at Step Up. We were able to transition him back into the district and he is currently attending an alternative school with a graduation date of December 2012.

Cindy Alison Stebbins 17, female, Native Hawaiian/Pacific Islander

Student was a senior at a comprehensive high school when she was placed on a long term suspension for fighting/physical violence. This was her 2nd fight and 3rd act of physical violence at school in 2 years; however, student had a much longer discipline history going back to her 6th grade year. The decision was made to place her at Step Up to complete the rest of her credits. Student had spent time at the Continuation Program, another school set up for student on long term suspensions and expulsions prior to attending Step Up. Student was successful at Step Up and was able to complete her last 5.5 credits and received her High School Diploma.

LEGISLATIVE RESEARCH REPORT

OCTOBER 21, 2011

REPORT NUMBER 12.044

STATISTICS ON CRIME IN URBAN ALASKA, 2001-2010

PREPARED FOR SENATOR HOLLIS FRENCH

BY TIM SPENGLER, LEGISLATIVE ANALYST

You asked for crime statistics in urban Alaska over the last decade.[1] Specifically, you wished to view crime data from Anchorage, Fairbanks, Kenai and Soldotna, and Palmer and Wasilla, as well as statewide figures, regarding the following:

- Murders
- Rapes and sexual assaults
- Felony assaults
- Robberies
- Violent crime totals
- Population of the above-mentioned cities
- Cost per year spent on incarcerated Alaskans with annual percentage increase
- The number of felony and misdemeanor filings and convictions in the Alaska Court System and the number of those convicted that were repeat offenders

We present data on violent crimes in Alaska for calendar years 2000 through 2009 in Table 1 on the following pages.[2] You will notice that violent crime totals have risen in most communities—particularly in Anchorage and statewide. In Table 1, we highlight (in light blue) the total violent crime highs and lows for each jurisdiction over this ten-year time period.

---

[1] This report is an update of legislative research report 08.073 from December 24, 2007.

[2] Statistics for 2010 are not currently available but, according to Kathryn Monfreda, chief of the Criminal Records and Identifications Bureau for the Department of Public Safety, (907-269-5581) these figures should be accessible in the near future.

TABLE 1: VIOLENT CRIMES IN SELECTED ALASKA COMMUNITIES, 2000-2009

Year	Crimes				
	Murder	Rape/Attempted Rape	Felony Assault	Robberies	Total Violent Crimes
Anchorage					
2000	11	195	974	346	1,526
2001	10	211	1,146	385	1,752
2002	18	254	1,068	382	1,722
2003	17	247	1,152	340	1,756
2004	14	264	1,497	319	2,094
2005	16	224	1,411	386	2,037
2006	17	250	1,868	470	2,605
2007	22	258	1,676	455	2,411
2008	12	263	1,834	544	2,653
2009	15	282	1,668	534	2,499
Fairbanks					
2000	2	59	109	39	209
2001	4	58	129	31	222
2002	2	38	214	33	287

TABLE 1: VIOLENT CRIMES IN SELECTED ALASKA COMMUNITIES, 2000-2009 (CONTINUED)

Year	Crimes				
	Murder	Rape/Attempted Rape	Felony Assault	Robberies	Total Violent Crimes
Statewide Totals					
2000	29	468	2,294	468	3,259
2001	39	479	2,548	496	3,562
2002	34	502	2,518	484	3,538
2003	43	575	2,638	442	3,698
2004	36	547	2,963	431	3,977
2005	32	524	3,040	531	4,127
2006	34	495	3,355	589	4,473
2007	42	514	3,294	577	4,427
2008	30	446	3,334	642	4,452
2009	21	503	3,357	643	4,524

Notes: Sexual assaults where the victim is a non-consenting female are included in the Rape/Attempted Rape category. Sexual assaults where the victim is a male, or where no carnal knowledge occurs, are not reflected in this table. The Uniform Crime Report lists such crimes in a separate "sex offense" category. Violent crimes in this table fall under AS 11.41.

Sources: Uniform Crime Reports, *Crime Reported in Alaska*, 2000-2009, Alaska Department of Public Safety *http://www.dps.state.ak.us/statewide/UCR.asox*

INCARCERATION COSTS

The cost of care for incarcerated Alaskan's has risen over the last decade. For example, in FY 2001, institutional care in the state cost around $112 a day, while in FY 2011 the cost was about $136 a day. Similar cost increases occurred for community residential centers, community jails, and for out of state incarceration. We include, as Attachment A, a detailed look at the Department of Corrections' (DOC) cost of care for the last eleven fiscal years, provided by the department's Division of Administrative Services.[3] This attachment also chronicles the state's rising overall expenditures on prisoner care; in FY 2001, for example, the overall cost of care was around $148 million, while in FY 2010, costs were nearly $236 million—an increase of more than $87 million.

POPULATION OF SELECTED ALASKA CITIES

Table 2, below, enumerates the estimated population of the cities in Alaska that you are interested in, for each year from 2001 through 2010. The population figures for Kenai and Soldotna are combined as are those for Palmer and Wasilla. These figures do not reflect the entire population of the Kenai Peninsula Borough, the Matanuska-Susitna Borough, or the Fairbanks North Star Borough, but only the specific cities requested. You will see that the population increased by the greatest percentage over the decade in Palmer and Wasilla at nearly 20 percent, while Anchorage and statewide growth was around six and a half percent.

[3] Leslie Houston, director of the Division of Administrative Services for the DOC, and our contact for this report, can be reached at (907) 465-3339.

TABLE 2: POPULATIONS OF SELECTED CITIES IN ALASKA 2001-2010					
Year	Anchorage	Fairbanks	Kenai/Soldotna	Palmer/Wasilla	Statewide Totals
2001	264,600	29,611	10,715	10,354	632,716
2002	267,339	29,941	10,957	11,085	641,729
2003	272,304	29,156	11,254	11,987	649,466
2004	276,865	30,402	10,756	11,757	659,653
2005	277,157	31,478	10,742	12,120	667,146
2006	281,831	30,580	10,737	12,414	674,583
2007	281,151	32,266	11,003	12,876	680,169

CONVICTIONS AND CRIMINAL CASE FILINGS

We provide data regarding criminal cases with convictions from 2003 through 2010, along with whether the perpetrator was a repeat offender, in Attachment B. The Alaska Court System (ACS) compiled this information from its CourtView Case Management System, which has been implemented in Alaska over the last several years. Cases reflected in these tables are from the courts in Anchorage, Palmer (which includes the entire Mat-Su Valley), Fairbanks, Kotzebue, Nome, Barrow, and Unalakleet. For each fiscal year, the tables display the total number of felony and misdemeanor convictions, as well as the number of those committed by repeat offenders. The total number of convictions during this time period ranged from a low of 14,752 in 2004 to a high of 18,423 in 2008. Generally, around 63 percent of individuals who had criminal convictions between 2003 and 2010 had prior convictions.

Table 3 enumerates the total number of criminal case filings, both felony and misdemeanor, from FY 2003 through FY 2010, in selected Alaska locations.[4] We obtained these data from Alaska Court System personnel as well as the ACS's Annual Statistical report on misdemeanors and felonies in Alaska. Please note that Wasilla and the entire Mat-Su Valley are included in the Palmer figures. As you will notice, felony criminal case fillings have risen from 2,612 in FY 2003 to nearly 4,700 in fiscal year 2010. Misdemeanor filings have been more or less flat over this time period.

[4] Table 3 provides data on the same court locations reviewed in Legislative Research Report 08.073; these courts represent about 75 percent of total cases statewide.

TABLE 3: ALASKA COURT SYSTEM CRIMINAL CASE FILINGS, FY 2003-FY 2010

Report: Criminal Cases with Conviction and Percentage of Convicted Cases with a Prior Conviction.

Notes in compiling cases:

1. Cases are compiled using records from the new CourtView courts: Anchorage, Palmer, Fairbanks, Kotzebue, Nome, Barrow, and Unalakleet.
2. Defendant's Identity matching is done using last name and date of birth. When either record is missing, the case is marked as "Prior Conviction Unknown".
3. A person's prior conviction in location other than in the CourtView courts is not accounted against that person in the report.
4. Guilty found, pleaded, or not contested, is not necessarily the last status of the case. The conviction may get set aside later.
5. A case can be disposed with a conviction more than once. The latest conviction for a case supersedes all earlier ones.

Cause of the discrepancy in the same report provided in 2005:

1. Criminal case is reopened when a Petition to Revoke Probation is filed. Case can then be disposed for the PTRP charge. Duplicate conviction dispositions were reported in the 2005 statistics.

Criminal Cases		Total	Felony	Misdemeanor
Total		100%	100%	100%

FAX (907) 465-2333

February 1, 2012

Senator Hollis French
Chair, Senate Judiciary Committee
Alaska State Capitol, Room 417
Juneau, AK 99801

Dear Senator French:

Thank you for the opportunity to participate in the Crime Summit hearing on Wednesday, January 25th. During my presentation you asked about the number of youth involved with the Division of Juvenile Justice, and how the number of youth placed in the Division's secure facilities compares with the number of youth who remain in the community under probation supervision. The attached data sheet summarizes this information for you.

A few points bear emphasizing:

- Only 4.8% of Alaska's youth were referred to the Division of Juvenile Justice in FY 2011. The vast majority of our state's kids are not getting into trouble with the law.

- The Division manages a significant number of referrals (reports from law enforcement) through informal (non-court-ordered) services and programs, such as community justice panels (youth court) or informal probation. The Division also may "adjust" referrals from less serious, lower-risk offenders, having them complete letters of apology, pay restitution, or perform community work service in order to hold them accountable and helping ensure that court processes are reserved for more serious, higher-risk offenders.

- The majority (58%) of juveniles who are placed under Division probation or custody remain in the community, typically in their own homes. The pie chart in the attachment shows the various other places juveniles may reside. As you can see, only a small proportion are placed in the state's secure juvenile facilities (9% in detention facilities, 10% in institutional treatment facilities).

Thank you, again, for hosting the Crime Summit and inviting the Division of Juvenile Justice to be there as guests and presenters.

Sincerely,

Barbara Henjum
Director

News Release 1/26/2012

In January, the State Senate held a "Crime Summit." The Committee goal: identify issues and offer solutions.

Conspicuously absent from the Senate Committee's review was a serious, in-depth review of individuals with a severe mental illness who commit crimes or have crimes committed against them.

Ninety percent of females with a mental illness who live on the street (shelters, tents, etc.) will at some point become a victim of sexual assault which will in itself damage the individual and will also hinder or prevent recovery from the underlying mental illness.

Men and women with a severe mental illness commit crimes or become victims in higher numbers than the average public. The costs of transportation and one day in the Psych ER can be upwards of a thousand dollars.

Approximately 10,000 individuals in Alaska because of a mental illness will come in contact with law enforcement in the next 12 months. Many will be forcibly transported to Psych ER's in handcuffs for forced evaluations or civil commitments, etc.

When a state improves psychiatric patient rights it translates to better care and better recovery. Alaska has some of the worst patient rights and government oversight of psychiatric patient rights and care in the nation.

Psychiatric patient rights in Alaska need to be improved.

To: Alaska State legislature
Capitol City of Juneau,AK. 1/25,/2012

Issue: Crime.

No matter where a crime is committed in our State, the most important question is: "Is this Alcohol or Drug related?"

Substance Abuse is the most important issue in the State of Alaska. Addressing this issue has been most inadequate. As an example, Domestic Violence. When Domestic Violence is addressed, the most important question is: "Was this Alcohol or Drug related?" Calling for an end to Domestic Violence, without addressing the primary cause of it, comes to nothing.

When it comes to "The Revolving Door" problem of the Criminal Justice System the answers come to nothing, zero, without addressing Substance Abuse Counselling or Treatment. "How many former inmates can say that their Treatment and/or Counselling for Substance Abuse was adequate?"

These are a couple of questions as to why things are the way they are in the State of Alaska concerning crime.

Signed, Albert Judson

PASSAGES MALIBU

Dear valued client,

Congratulations on taking the necessary steps in your road to recovery by investing in your life and in *The Alcoholism and Addiction Cure.*

Since we founded Passages in 2001, we have treated many individuals from around the world in their quest to be cured of their addictions to drugs and alcohol. Unfortunately, there are others who want to come to Passages but for various reasons are unable to do so, which is why we wrote this paradigm changing book. Now, they too can attain this powerful healing experience and remain substance free by using the methods that Passages has become known for the world over.

The Alcoholism and Addiction Cure will outline the four causes of all addictions and provide insight on how to structure your own holistic program for healing. We don't believe in the "disease model," nor do we place degrading labels on you like "addict" or "alcoholic." The Passages model empowers you to permanently rid yourself of addiction and chart your own destiny.

If you or someone you love would like more information about Passages and it's centers, please feel free to call 866.777.9319. Our experienced admissions counselors are available 24 hours a day, 7 days a week. You may also visit our website at www.passagesmalibu.com, follow us on Twitter at twitter.com/passagesrehab, or 'Like' us on Facebook at facebook.com/passagesmaliburehab.

Remember, at Passages, "We believe in a cure, and we believe in you."

Sincerely yours,

Pax Prentiss

Re: Safety and Security

Honorable Governor Sean Parnell;

The City of Petersburg would like to thank you for your support of our community and of Southeast Alaska as a whole. We understand that ours is a large state with many needs and your support makes all the difference. Unfortunately, not all problems can be solved at a local level so we must again rely upon your help to solve a worsening issue in our community.

In 2005, the City of Petersburg working with the District Attorney's Office noted an 18% dismissal rate on crimes sent to their office for prosecution. In 2010, this dismissal rate was 30%. As a result, several members of the City of Petersburg City Council went to Juneau to meet with the District Attorney's office. Petersburg was promised improved service and we took them at their word. In 2011, the Year-to-date dismissal rate is over 38%, not including numerous questionable plea bargains that have caused judges to question the State's logic. In December of 2011, our city contacted the Juneau office to seek both guidance and a mutually acceptable solution to these issues. We offered to host a meeting here in Petersburg to discuss the issues and how we as a community could help resolve the problem. In a series of emails (attached) with their office, Petersburg was informed that while "ideal", the Juneau office was just too busy to actively communicate with the Petersburg Police Department and explain the dismissals, plea bargains and less than adequate service. We argue that it is not a question of "ideal", but a question of properly doing an incredibly important job.

We are asking for your help. The City of Petersburg has offered some solutions and attempted to engage the District Attorney's Office to make sure there is not something we can do to make their job in Juneau easier. However, our first priority is the safety and security of the citizens of Petersburg. While Petersburg can commiserate over the issues of crime in Juneau, our city needs a District Attorney that will take our issues as seriously as they do those in their own backyard.

We look forward to your response and your support.

Sincerely,

Al Dwyer
Mayor

National Organization on Fetal Alcohol Syndrome

to Prevent Fetal Alcohol Spectrum Disorders

FASD: What the Justice System Should Know

Alcohol abuse and pregnancy are common among women in the criminal justice system.

- An estimated 70 to 85 percent of inmates need substance abuse treatment.
- Approximately one in four women is either pregnant or postpartum when she enters prison.

The Justice System can help to prevent Fetal Alcohol Spectrum Disorders (FASD) among the incarcerated population by offering educational workshops on FASD and addiction counseling for women inmates.

Many individuals with FASD will never socially mature beyond the level of 6 year-old child.

People with FASD end up in the justice system as victims of crimes.

Other factors that may place persons with FASD at risk for involvement with the criminal justice system include:

- Difficulties in impulse control
- Intellectual deficits
- Poor judgment skills
- A history of abuse and/or neglect

Problems individuals with FASD may encounter when dealing with police include:

- Being persuaded by the police (even inadvertently) to admit to crimes which they did not commit.

Victimization of FASD within the legal system

- Taking responsibility for crimes committed by others in order to win the favor of more sophisticated companions or to please the police.
- Consenting to searches of themselves or their possessions in circumstances in which non-disabled sophisticated individuals would not.
- Panicking during encounters with the police, running away or resisting arrest.
- Saying that they understand their legal rights when in fact they do not.
- Making potentially incriminating statements about how serious any misconduct may have been.

The Justice System can help FASD-affected individuals by:

- Educating judges, police officers, lawyers and parole officers about the characteristics and behaviors of persons with FASD.
- Establishing screening, analysis, and treatment procedures for those with FASD who enter the juvenile justice or adult criminal justice system.
- Establishing/utilizing alternative sentencing programs for persons with FASD who have committed non-violent offenses.
- Screening referral information for the children of incarcerated women who may have been prenatally exposed to alcohol.
- Providing appropriate support to reduce the incidence of victimization of people with FASD.

DRAFT: DO NOT CITE

FETAL ALCOHOL SPECTRUM DISORDERS (FASD) AND OFFENDER CRIMINAL HISTORY

A 1996 study conducted by the Fetal Alcohol and Drug Unit at the University of Washington[1] for the Centers for Disease Control and Prevention concluded that a majority of individuals with FASD have been in trouble with the law. Both that study and anecdotal experience have indicated that there are some distinctive patterns in the types of conduct involved, and in the manner in which individuals with FASD respond to the criminal justice system. It is possible that those very patterns could be useful in identifying criminal defendants who may have FASD. Such a screening method would not be conclusive (it would certainly be both under and over-inclusive), but it could nonetheless serve to prompt lawyers, judges or others to seek further investigation or diagnosis.

This memorandum identifies the patterns of behavior which the literature or anecdotal experience suggest may correlate with FASD. Some relate to the circumstances of the offense itself, while others concern additional circumstances that would likely be known to the lawyers, government officials or judges.

Offender Patterns

(1) Many of the underlying offenses fall into one or more of five categories:

(a) impulsive behavior, such as shoplifting, particularly for some item (possibly of no great value) for immediate consumption (e.g. a pack of cigarettes),

---

[1]Understanding The Occurrence of Secondary Disabilties in Clients With Fetal Alcohol Syndrome (FAS) and Fetal Alcohol Effects (FAE), Ann P. Streissguth, Helen M. Barr, Julia Kogan and Fred Bookstein, Final Report to the Centers for Disease control and Prevention, Grant No. R04/CCR08515, August 1996.

(b) stealing from a friend or neighbor some item (or a few) for personal use,

(c) getting into a fight because the offender overreacted with a very short fuse to some mild provocation or teasing,

(d) behavior precipitated by panic or excessive fright, such as running in fear or lashing out when cornered or overwhelmed by noise and contact, and

(e) participating as a secondary figure at the behest of more sophisticated criminals who were exploiting the offender, e.g. delivering a package as a favor for a "friend" who turns out to be a drug dealer. Involvement with others in a crime clearly beyond the skill level of the offender.

(2) Committing inexplicably stupid crimes involving an obvious risk of apprehension that most offenders would avoid. Engaging after the crime in activity with an irrationally high risk of apprehension (e.g. wearing, when visiting a friend, a piece of jewelry stolen from the friend).

(3) Where the offender took part as a secondary participant with other more sophisticated offenders, the individual with FASD is often the only one apprehended.

(4) Repeatedly engaging in relatively minor offenses without escalating (absent encouragement by more sophisticated offenders) into more serious offenses, e.g. repeated shoplifting that does not lead to armed robbery. A pattern of what would usually be regarded as first offenses, where the offender seems not to learn anything from the experience of apprehension and punishment.

(5) An absence of offenses that involve significant planning or premeditation.

(6) A history of minor offenses before the offender reached the age of 18.

(7)Behaving in a manner which reflects a failure to grasp the boundaries of permissible behavior, such as standing too close or inappropriate touching.

Other Patterns

(1) Naive cooperation with and confession to friendly law enforcement officials; fulsome and guileless confessions that most offenders would never make.

(2) Equally guileless confessions to offenses of which the too-eager-to-please individual is actually innocent, or which may never have occurred at all.

(3) A past failure on probation or parole, stemming from an inability to understand or adhere to supervision conditions or to keep appointments.

(4) An apparent lack of remorse, deriving from a failure to understand that the underlying conduct was wrong.

(5) A failure to grasp the causal connection between unlawful conduct and the resulting incarceration or other punishment.

(6) Viewing incarceration as undesirable only insofar as it results in removing the offender from the company of his friends (or the people he naively thinks are his friends).

(7) Attempts to explain away the offending conduct with implausible stories that are outlandish or simple-minded.

(8) An inability to grasp the seriousness of the distinction between different periods of possible incarceration, e.g. 3 days versus 3 months.

(9) Associating with individuals who are significantly younger than the offender, in part because they may be closer to his or her level of maturity. The younger "friends" may be more sophisticated offenders who are exploiting the relative unsophistication of the individual with FASD.

One of the main problems with crime in Alaska is that to many politicians and state workers get away with crime which sets a bad example and embarrasses the state.

News Release 1/26/2012

In January, the State Senate held a "Crime Summit." The Committee goal: identify issues and offer solutions.

Conspicuously absent from the Senate Committee's review was a serious, in-depth review of individuals with a severe mental illness who commit crimes or have crimes committed against them.

Ninety percent of females with a mental illness who live on the street (shelters, tents, etc.) will at some point become a victim of sexual assault which will in itself damage the individual and will also hinder or prevent recovery from the underlying mental illness.

Men and women with a severe mental illness commit crimes or become victims in higher numbers than the average public. The costs of transportation and one day in the Psych ER can be upwards of a thousand dollars.

Approximately 10,000 individuals in Alaska because of a mental illness will come in contact with law enforcement in the next 12 months. Many will be forcibly transported to Psych ER's in handcuffs for forced evaluations or civil commitments, etc.

When a state improves psychiatric patient rights it translates to better care and better recovery. Alaska has some of the worst patient rights and government oversight of psychiatric patient rights and care in the nation.

Psychiatric patient rights in Alaska need to be improved.

Subject: # one crime in Alaska

Hi Senator French;

Thank you for your editorial request from the general constituency for input regarding the number one crime across Alaska and it's possible systemic solutions.

I regard the number one non-prosecuted crime against all Alaskans to be the closed door behavior of our Governor concerning AGIA negotiations with big industry and big oil. The Governor has traveled far and wide several times expressly to meet with big oil cronies, using Alaska public funds, out of sight of the prying eyes of the press, and more importantly, without the participation of the Alaskan public. How can this be lawful under our state Constitution? I believe one of our own Constitutional Authors, the great Vic Fisher, has himself spoken to the questionable legality of these actions. Our governor even met in the last few weeks in Juneau with a batch of the same oil execs behind closed doors without the legislature even being in session. It was so clear that when Governor Parnell slid in as Lt. Gov., that eventually the revolving door of industry would become a huge tool in removing badly needed and fairly entitled income from Alaska State coffers.

It is time to ask our new AG to prove his worth by providing legal justification for industrial tax gerrymandering by our Governor. (why
is mining given an almost free ticket for resource extraction?)
Please use your bully pulpit to expand the debate regarding the blatant and legally questionable actions of our Governor.

You are one of our last Senators brave enough to draw these inequities that sneak around in Juneau unchallenged into the public debate. I want you to know that there is at least part of the constituency out here is madder than heck and we won't take it forever. These are the State's resources, not the Governor's, and we did not elect him to give them away to his Cronies for little or nothing.

Don't dispute!!! Prosecute!!!

Lauren E. "Lolly" Moss; Alaskan voter for 31 Years

Senator Hollis French, **January 13, 2012**

We read your letter 1/13/2012 in the Anchorage Daily News. The questions you raise have a large scope—We would like to add a small piece to the puzzle. Writing new laws is important, but just as important "society must change how it deals with individuals who need help."

One Society needs to change how money, support and spare time is given to any individual with a drug or alcohol problem, i.e.—payee, oversight, work or school program, etc.

Two A large number of individuals in prison have a severe mental illness. The assessment is they cannot receive proper treatment that promotes recovery in a prison setting. Detained individuals should be given at least a small amount of time in a forensic unit in a psychiatric hospital so they have a better chance for recovery. Forty years ago, state-run Alaska Psychiatric Institute (API) had a 10 bed forensic unit. API still has a 10 bed forensic unit in 2012.

Three Thousands of individuals who have not broken any laws are transported to locked psychiatric units each year for forced evaluation or commitment, many in handcuffs. Too often, individuals who may not have broken any laws are treated like criminals, both when they are transported to a psychiatric unit, or when they are in a psychiatric unit. When society treats an honest person like a criminal, sometimes they become a criminal.

Four Too often individuals with psychiatric disorders who may not have broken any laws are held in jails and hospital ER's while waiting for space at state-run API. Disability Law Center filed a law suit against DHSS concerning that issue.

Five Almost without exception, when society improves the quality of psychiatric patient rights, the quality of patient care improves and the opportunity for recovery. Sen. Bill 55 when passed will improve the psychiatric patient grievance procedures and needs to be supported and passed by the Senators.

We would be willing to testify telephonically to your committee on these issues.

Psychiatric Patients need your help!

Call Your Legislator—Support Sen. Bill 55

Approximately 10,000 Alaska citizens, who may not have broken any laws, are placed in locked psychiatric facilities and units each year, sometimes by force, anywhere from one hour to months. Detained citizens need to have a better grievance procedure law, rules and oversight for protection and with your help they can get it.

The Joint Commission for the Accreditation of Hospital Organizations (JCAHO)—Medicaid/Medicare fully expect each state to write laws and rules that lay out a blueprint for a fair grievance procedure and one that will protect all psychiatric patients and their family members in the grievance/ appeals process. (Alaska has not)

AS47.30.847 and the associated rules do not in a reasonable way protect psychiatric patients in the grievance/appeal process and needs to be revised.

One AS47.30.847 does not apply to all locked psychiatric units that do civil commitments / forced evaluations according to DHSS.

Two Who is the Impartial Body to hear a patients complaint? AS47.30.847 does not say.

Three No requirement that patients receive a written response to their grievance at all levels of resolution.

Four No due process requirements for a patient's grievance or appeals.

Five No appeal process requirements to the state or anyone else.

Six No requirements that patients can receive a written copy of the hospital grievance procedure and associated rules. (Psychiatric patients in Alaska are told they can file a grievance but are rarely informed of the entire contents of the grievance procedure, due process rights and appeal process rights; How can a detained citizen protect themselves if they don't even have access to all the grievance procedure rules.)

Seven No requirement for an urgent grievance procedure in AS47.30.847. (Resolution in 24 hours) Psychiatric patients in locked facilities and units are in danger without access to an urgent grievance procedure.

Eight AS47.30.847, which has no due process requirements, allows psychiatric institution and unit employees to put patients through an informal complaint process with no time frame for completion and it puts patients in danger.

For this document due process means: "a course of formal proceedings carried out regularly and in accordance with established rules and principles."

Turn Page

Current Psychiatric Patient Grievance Procedure laws and rules needs to be improved

One Federal and JCAHO grievance procedure rules that cover psychiatric hospitals and psychiatric units in hospitals. (Does not cover all psychiatric patients) Psychiatric patients must receive a written response to their grievance. (Medicaid and Medicare see a grievance and a complaint as interchangeable) There is no corresponding requirement in Alaska state law or regulations. (Patients are in danger when they are not given a written response to their grievance) Federal and JCAHO rules do not require an appeal process and psychiatric hospitals and units are given 14 days to resolve a psychiatric patient's grievance. (which is too long for a detained individual)

It would be relatively easy for a psychiatric institution or unit to give patients a form which could contain the patient's complaint and the institution's written response to the grievance and patient appeal options. It would protect patients to receive a written response and it is a Federal/ JCAHO requirement.

Two Behavioral Health (DHSS) Requirements for Grantee Grievance Procedures (4 pages) only covers approximately 80 Grantee facilities and units some of which treats psychiatric patients.
--Facilities can inform patients that they need more time to resolve their complaint but the amount of time can be open-ended.
--No due process for appeals (time for completion is open-ended)
--No written response required when responding to patient complaint/ grievance/ or appeals

Three Sec. 47.30.847. Psychiatric patients' grievance procedures. (Does not cover all "detained" psychiatric patients according to DHSS)

(a) A patient has the right to bring grievances about the patient's treatment, care, or rights to an impartial body within an evaluation facility or designated treatment facility.
(b) An evaluation facility and a designated treatment facility shall have a formal grievance procedure for patient grievances brought under (a) of this section. The facility shall inform each patient of the existence and contents of the grievance procedure.
(c) An evaluation facility and a designated treatment facility shall have a designated staff member who is trained in mental health consumer advocacy who will serve as an advocate, upon a patient's request, to assist the patient in bringing grievances or pursuing other redress for complaints concerning care, treatment, and rights.
(10 ch 109 SLA 1992)

AS47.30.847 was written and passed with good intentions, but there are too many loopholes and the loopholes are now being used by psychiatric facilities and units to deny patients their right to file a grievance in a fair way. (There is no appeal process, due process, urgent grievance procedure or written response requirements)

Detailed grievance procedure rules for appeals are only written in hospital policy by providers and they can be changed in fifteen minutes to suit the provider. Psychiatric patient grievance procedure rights including appeals need to be in law and state regulations, including the details.

Psychiatric patients need your help!

Subject: Number one crime issue in Alaska

Dear Sir, The cases mentioned break my heart. If more police and harder punishments lessened their frequency, I'm for it. But sadly, to some degree we'll always be subject to isolated catastrophic accidents. The crime I present is no accident and it occurs daily in the courtrooms and on the courthouse steps. The fraudulant foreclosure process. Used to steal peoples homes, and in my case erase 30 years of hard work, is prevalent because most people walk away. The entities below are well known for their crimes, but Alaska is behind in the fight for justice. Attorney Generals, Senators, and Judges across the country are freezing evictions and foreclosures, and demanding due process, but phone calls and e-mails are not returned in AK. Below is just a snippet of my case, sent to Cynthia Drinkwater (269-5200) (Cynthia.drinkwater@alaska.gov). She received a well written criminal complaint a year ago and phone calls and e-mails since, but is still contemplating action. Parnell, Treadwell, Begich, Young and Murkowski all claim their powerless, and no word back from the Juneau AGs office. My case # is 3AN-09-10994CI. If you choose to read Judge Aarseths final order, you'll see how he bent over backwards to pardon their crimes and discredit our "theories" and expert witnesses. I was current on my loan and sported a 750 FICO when my refi was denied, and then lured into default with modification promises. I am furious for the stress and heartache Onewest has caused my wife and son, and the unknown future now as we live in her parents basement while Onewest heaps on damages and attorney fees. We've appealed, but since the Alaska Court System is part of Team Fraud, we can only hope that the Supreme Court will see the constructive fraud, strong deceptive tendency, breach of duty, and unconscionability. It was a lovely Christmas as our kickout date was the 28th. Thanks Judge Aarseth. Really enjoyed moving despite the snow, ice, wind, and power outages.

Hi Cynthia. As you know, Onewest Bank, Indymac Bank, Deutsche Bank, Alaska Trustee LLC, MERS, and Lender Processing Services (LPS), have contaminated my loan, foreclosure, and courtroom defense. The Assignments of DOT and Substitution of Trustee utilize three infamous robo-signers, and here, the correspondence between Onewest, Richard Ullstrom of AK Trustee LLC and the document fabricator LPS contains quotes acknowledging the fabrications and forgeries, such as:

"THE NOTE THAT HAS BEEN UPLOADED IS TO E-LOAN, I NEED ONE THAT HAS BEEN ENDORSED TO INDYMAC (AND IDEALLY, FURTHER ENDORSED TO TO ONEWEST)."

"REMEMBER THAT WHAT IS NEEDED IS A COPY SHOWING ENDORSEMENT TO INDYMAC. THE COPY UPLOADED DOES NOT HAVE THAT."

"USER HAS COMPLETED THE ASSIGNMENT INFO DATA FORM WITH THE FOLLOWING ENTRIES: ASSIGNMENT FROM: E-LOAN, ASSIGNMENT TO: DEUTSCHE BANK ."

"HAVE NOT YET RECEIVED COPY OF ENDORSED NOTE. WHAT WAS UPLOADED DOES NOT SHOW ENDORSEMENT TO INDYMAC AND I AM CONCERNED THAT BORROWER'S ATTORNEY WILL RAISE STANDING ISSUE IF THE NOTE DOES NOT SHOW THAT IT IS HELD BY INDYMAC."

"OTHER 2 ENDORSEMENTS ARE NEEDED, PLEASE OPEN A COPY OF ALLONGE PROCESS FOR EACH ENDORSEMENT NEEDED MAKING SURE TO FILL IN THE FORM AND TO ENTITIES. THANKS. USER HAS COMPLETED THE REVISED DOCUMENT DATA FORM WITH THE FOLLOWING ENTRIES: DOCUMENT TYPE: ALLONGE REVISION CATEGORY: ARE MULTIPLE REVISIONS NEEDED FOR THIS DOCUMENT? RECEIVED AUTHORIZATION TO DRAFT AND UPLOAD THE ALLONGE FROM E-LOAN TO INDYMAC. PLEASE HAVE THIS ALLONGE UPLOADED INTO STEP 2 OF THE REVISION PROCESS. PLEASE ALSO INCLUDE LOAN SPECIFIC INFORMATION ON THE ALLONGE."

"THE COPY CURRENTLY UPLOADED INTO DOCUMENTS HAS NO ENDORSEMENTS AT ALL, AND THEY HAVE SPECIFICALLY REQUESTED THE NOTE."

"A QWR WAS MADE TO INDYMAC ON 1/30/09 AND ACKNOWLEDGED BY INDYMAC ON 2/5/09, BUT NO SUBSTANTIVE RESPONSE FROM INDYMAC WAS EVER RECEIVED."

And this is from material that hasn't been redacted! Would you be willing to take a closer look at more of my case yet? Please comment. Thanks, Max Espeland

Subject: RE: Legislative Update from Senator Hollis French

I think the number 1 crime problem in the state is due to drug and alcohol abuse. Many abusers also have some mental health issues.
Mental Health should be covered by insurance companies without limits. We should have several 'state of the art' drug & alcohol treatment centers that are subsidized and that take insurance. Anyone wanting treatment should get it and they should be treated the same day they make the request.
There is a huge shortage of psychologists and psychiatrists and counselors. We should offer programs at the University and reimburse student loans for those who stay in Alaska and work in the field.
Decimalize possession of marijuana; I believe it should be treated like alcohol. If you drive drunk you go to jail.

Subject: RE: Legislative Update from Senator Hollis French

I think the main or at least most dangerous crime problem is youth delinquency. It seems there are kids being arrested for serious felonies that have long criminal records. I would like to see these kids identified and institutionalized in such a way that they would be apart from criminals and would have a chance at rehabilitation—perhaps put in a strict half way house that includes work, study, exercise, etc. I would hope that the cost of less crime and incarceration might offset the cost of this institutionalization but even if it doesn't, I would still be for it.
Keep up the good work,
Sean O'Hare

Dear Neighbor,

The second session of the 27th Alaska State Legislature will convene on Tuesday. My Juneau office is up and running and I'll be there this weekend. I look forward to working on a host of interesting issues this session.

Crime Summit

As Chair of the Senate Judiciary Committee, I am sponsoring a Crime Summit on **January 24th** and **25th**. We will explore the leading criminal justice issues facing Alaska's urban areas. Our goal is to identify some cost-effective methods to combat crime, as well as concrete actions we can

Dear Senator Hollis French

September 13, 2012

On the issue of crimes, solutions, something that needs to be changed is Sec. 18.80.115 Confidential Information. The Alaska State Commission for Human Rights failed their audit, Audit Control Number: 01-30056-11, September 23, 2011. However, the auditors were not able to look deep enough into the workings of ASCHR to see if in fact they are investigating impartially and working to eradicate discrimination so that minorities who work for the state are getting their civil rights. There are no checks and balances, no transparency for the legislative auditors to do a complete and thorough investigation. The law needs to be changed so that the legislative auditors can look at everything the ASCHR and the state ombudsman has on anything they do. Otherwise the state government has no idea if they are ever doing their job. They can go on for decades and never be detected when they are not doing their job and get away with malfeasants. As of now, there is no way to tell. When a minority who works for the state files a human right grievance against the state, ASCHR does not allow these minorities to win their cases because of conflict of interest. They allow minorities who work for the federal government, local government and private contractors to win their cases, but not state workers. What essentially is being asked, is for the state to investigate itself and find itself guilty which is something the state is not going to do. There lies the conflict of interest. One can always say a minority who works for the state can sue to get their human rights back, but checking with 15 attorneys around town on this, they all want 50-60 thousand dollars up front before they start to sue. The vast majority of minorities who work for the state are at the bottom of the pay scale, living pay check to pay check. They don't have the resources to get into court. This is why the state put in ASCHR. There are 4 cases on state workers that ASCHR and now the ombudsman are working on since 1996, 15 years later and still on going. The audit report shows that they are not following the law and processing cases in a timely manner.

Thank you for your prompt and courteous attention.

Sincerely,

John Suter P.O.B. 670144, Chugiak, AK 99567

To: Sen. Hollis French
Subject: crime survey

1. What's the number one crime issue in Alaska?

concentrating on anchorage [which i'm more familiar with] it appears that theft is the worst problem, followed by burglary and assault.
http://www.muni.org/Departments/police/stats/Pages/CrimeStatistics.aspx
it depends on how you determine what is 'number one'? murder or rape might be more worth addressing, since the consequences are greater.
sorry to waste time by stating the obvious.
isn't the murder rate low to average here, and domestic violence and rape a lot higher than average?
anyway... let's just say for argument that theft is still number one. then...

2. What should be done about it?

- since much of it is drug-related, increase the availability of treatment programs.
- increase police presence in neighborhoods. when i first moved into mt view in 1999 there was a program in place that put extra officers on patrol, some of them on bicycles. think this was paid for by a federal grant -- but state resources could be similarly directed. federal emphasis lately seems to be on the militarization of local police forces through federal DHS -- not what's needed in my opinion.
- other preventive measures such as youth programs [arts immersion; sports; civic improvements, etc.]; and seed money for neighborhood organizing and event programming would help direct people toward leading productive lives.
- increase availability of low income housing. the problem with recent efforts in this area is the housing is still too expensive and the residency requirements too restrictive. often it seems like the real benefit from the funding and construction of low income housing projects goes to the developers. the financial structure of projects receiving public funds needs to be examined and clarified; and developer profit controlled for the benefit of the tenants [reduced rent, more favorable terms]. there needs to be a city-wide and statewide strategy for low- and middle-income housing, not a piecemeal approach that tends to segregate residents of a city or region by income -- having people of limited means living near wealthier individuals will tend to increase opportunity to those on the lower end. concentrating low-income housing in mt view, fairview [and to a lesser extent, muldoon and spenard] is unfair to those neighborhoods and does not promote a healthy mixture of tax brackets on the same streets.
- the last few summers a student group has been going around parts of town doing a 'peep hole project' -- installing a good quality peep hole in the entrance door of anyone who wants one, free of charge. maybe this could be a state program? having a good peep hole and a working porch light would cut down on assault and burglary.

Senator French,
In your letter to the editor you mention the 14 year old girl who overdosed on heroin and died. I am sure that you will get many letters telling you that we need stricter drug laws in Alaska in response to this. I am not going to agree with these other letters. I think that it is important when creating public policy not to be reactionary and not to simply make laws in response to one or two cases. As prohibition taught the U.S, when drugs and alcohol are illegal even when there is demand for them it simply creates an unregulated underground market.

I would urge you to support the decriminalization and regulation of drugs, with treatment provided for addicts. This is what Portugal did, and it resulted in markedly lower levels of drug use then when drugs were illegal. http://www.time.com/time/health/article/0,8599,1893946,00.html

It is simply a waste of resources to incarcerate non-violent drug offenders. If we instead treated drug addicts, instead of locking them up, we could save millions of dollars, while freeing up our police force and legal system to focus on those who are actually a danger to society. http://www.adn.com/2011/10/03/2102312/lawmakers-seek-to-cut-prison-costs.html

I write this to you as an Alaskan who neither drinks, nor does any drugs. I simply read articles about the Anchorage Police Department arresting people for being drunk at bars and think about what a terrible waste of money and man power this is. Why isn't this money being spent on education, or health care. You are in a position to do a lot of good, and I would urge you not to give in to the politically expedient stance of being "tough on crime".

-Jed Grabman,
Anchorage, Alaska

Dear Senator French,

It seems to me as though the biggest issue regarding crime in Alaska is the recent actions taken by federal, state and local governments toward law enforcement. While Alaska has wielded a smaller hatchet to public order and safety than most states in the lower 48, we Alaskans are guilty of cutting programs, forcing departments to cut officers on the beat, threatening pensions and the ability of police unions to negotiate for reasonable working conditions. In short, we have more or less told law enforcement agencies from cops, to prosecutors, to prison guards, to parole officers, that they are less important than they used to be with regard upholding the law in society. As a result, good law enforcers retire early and fewer energetic and enthusiastic recruits commit to the rigors of law enforcement training, resulting in fewer career cops. We have asked Alaska's law enforcement agencies to do more with less and it won't work. The criminal and general societal attitudes toward the law are only as good as our ability to be proactive in preventing crime, catching criminals when they have committed crime, dispensing justice to suspects according to the laws we have in place, and rehabilitation of convicted criminals.

The solution is simple. Be creative with crime prevention and enforcement programs, hire more law enforcement officers, spend the money to train them well, pay them well so that they feel well compensated for their indispensable service to society, and reward them with benefits that will attract and keep Alaska's finest in the law enforcement occupation. As with education, we cannot sell ourselves short as Alaskans regarding crime.

I, for one, would feel much safer in Alaska if revered all for the law enforcement agencies in the state with the respect that they deserve.

Sincerely,

John Zarnetske

Subject: Re: Crime Summit

Senator Hollis French,

I am happy to reply to your request for answers to 2 questions from the public for your Crime Summit meeting.

Long have I told others (Outside) that nothing will ever get accomplished in Alaska's D/V and S/A problems until the people themselves rise up appalled.

What surprises me is that it is those two events which have (finally) offended Alaska's public.

I am a 57 year old, single mother (widowed) of a teen age daughter, who was 4 years old, when we landed in Alaska.

For 10 years I have been appalled at what Alaskans think is normal here.

In answer to question

1. The Number 1 crime issue in Alaska is corruption of it's law enforcement. By corruption I mean things like Troopers, Police, and (even) FBI refusing to let reports of known abuse be made. I can't remember (I am ordained Christian clergy and so, required by law to report...) ever trying to report suspected only abuse or neglect here. It takes too long to recover each time I am abused (and I do mean literally abused) for trying to report known abuse here to police, or Troopers. Finally, this year, as instructed by Governor Parnell's Office, I reported the (known) corruption (experiences) with the Wasilla PD to the FBI in Anchorage. Again, as is usual in Alaska, anyone trying to comply or be a responsible citizen is treated as (at least) a nut (or worse). Finally, I had to turn it into the Office of Professional Responsibility of the FBI and that took asking Yahoo UK Answers just to get the Office name and contact info because that too is obstructed info.

This is normal in Alaska. Calling the Troopers from Wasilla only gets re-routed automatically to Wasilla PD instead.

STAR does NOT automatically report all S/A's reported to them. More than that, they do NOT (in 10 years of experience with them) respect the religious views of rape victims. Instead, they sit and wait until the victims will convert to their world view and belief system THEN they MIGHT send in a rescue team. Usually,not. Usually, they persecute and enable whomever is abusing or has abused victims as much or MORE than what was already done.

That Sir, is just a few examples of why it is the "solution" that is actually the problem here. Because it is corrupted.

Go to the Alaska Women's Network, look up the contact info to report D/V or S/A in your area and then try to call or email from public facilities. Most of those "resources" are what D/V and S/A advocates (anywhere else in the USA but Alaska) call Stranded. 800 #'s that do not work. Email's that can not be made from public computers, such a libraries, etc.

For 8 years straight I sought to discover even 1 female physician (or endonurse) to do colonoscopies on survivors of S/A in this state. The Alaska Native Medical community solve that lack within a year of being informed they were not providing that service. The rest of the population didn't have it. Dr. June George does NOT accept Medicaid or Medicare and I found no evidence she ever actually treats any patients at Providence Family Med. The Alaska AMA would not disclose one existed anywhere in Alaska. Until I discovered, myself, just this year, a female Pediatric Gastroenterologist in Mat-Su (only) by myself, it has been a 100% males only physicians club.

Yet, you Legislators mandated at least the API patients get choice of gender for "intimate care." Really, no one ever admitted they were actually doing that (obeying State law) for the inpatients there age 55 and older. Because ALL persons age 55 and older are recommended to have at least a screening colonoscopy. Senate Bill 8 was passed exactly because 90 something percent of the people who end up spending some time at API have been sexual assault victims.

SART and STAR had NO referrals to make, so I could get people who needed sensitive care. SART does not deal with past victims, only new ones. STAR to this day does not respond to any requests for referrals (for old victims). I watched a women who they supposedly "helped" after a rape be taken to the ER in an Ambulance 3 times AFTER the rape. Finally, she stroked out (at only about 32 years old) from their "professional help."

STAR has it's priorities all messed up. I noticed it within the first 3 months of arriving in Alaska back in Dec 2000. Prior to that, I had worked in D/V and S/A issues in 3 states.

The best law enforcement I've ever seen was actually BIA out of Lapwai Idaho. THEY know how to be respectful of persons views, traditions, customs, and the law. And I'm not Native anything!

Corruption of normal and/or anything resembling function responses (i.e. sabotage of what agencies/programs do exist here) is so rampant here and so all pervasive that the only reasonable conclusion can be gross corruption. You can expect nothing but loud denials if you ask or look into this. The louder and more knee jerk that denial, the more you should have it independently checked out. Nothing but dealing with it, removing it from our judicial system (and that means groups like STAR all over the state too) will result in progress (finally). The rest is news spin and propaganda, moral boosting, etc. Without dealing with what is wrong, it's just trying to put the trash can lid on an ever piling pile inside the can.

What you are seeing is the "stuff" that can no longer be hidden. Nothing more, nothing less.

Nothing will ever be solved until and unless law enforcement is uncorrupted in Alaska.

On Question

2. Create an Internal Affairs for this State because the FBI can only do so much and they pretty much burned out their efforts back in their 2006-08 sting.

Alaska does not care. That a woman was raped and "tortured" to death in Anchorage (can't find it in ADN archives anymore) and the perp convicted but 2 men (who testified at his trial) walked through, saw it happening, spoke with the victim (before he tortured her some more, to death) and left not reporting it, could not be convicted of any crime is about the best picture of just how horrific Alaska really is. No rape in concert, no statutory rape, rampant police brutality but whole shows glorifying Troopers (who have NO Internal Affairs) and the gross neglect of the State of deal with any of it, along with the complicity of silence by the FBI now give me absolutely no hope for this State. And Alaska was my last hope for the USA!

Sincerely,

Rev. Angela L. Davis

Subject: Input for Crime Summit

Senator French--

Thank you for organizing this very important effort! I am a long time educator in the state, so I have some experience with children, but I am by no means an expert in the area of crime. My personal opinion is that high crime rates in Alaska in areas of domestic violence are particularly disturbing. These crimes seem to be chronic and to exact a particularly heavy toll on children. Tied into this is crimes in general in which substance abuse or mental illness is involved. I really don't understand how we, as a relatively wealthy state, can tolerate the extreme lack of funding for programs treating substance abuse and mental illness. An employee at North Star told me that that is the ONLY resident facility in the state for the treatment of mental illness in children and adolescents. Really? One for profit facility in Anchorage for the entire state?! I hope she is badly mistaken! I frequently work as a substitute teacher in ASD special education classes, so I know, somewhat, about the large amount of education resources spent on children that cycle through this facility. For every one of these children whose issues can be successfully addressed and who can then successfully complete their course of study, the benefits to our society are enormous. Why do these children not have a diversity of options available to them?

I also seem to remember that, under Governor Murkowski's administration, funding for substance abuse treatment programs was cut considerably.Possibly mental health treatment as well? Has any study been done tracking crime rates with state funding for treatment facilities? Given the rampant problems associated with addiction statewide, every hub community in the state should have a treatment facility with no waiting list.

Thank you so much for allowing me to provide my input on this critical issue. Again, I am not an expert in these areas, however, I am most definitely interested.

Dear Neighbor,

The second session of the 27th Alaska State Legislature will convene on Tuesday. My Juneau office is up and running and I'll be there this weekend. I look forward to working on a host of interesting issues this session.

Crime Summit

As Chair of the Senate Judiciary Committee, I am sponsoring a Crime Summit on **January 24th** and **25th**. We will explore the leading criminal justice issues facing Alaska's urban areas. Our goal is to identify some cost-effective methods to combat crime, as well as concrete actions we can take to improve public safety. We held a similar Crime Summit in 2008, and are re-visiting the issues to get an update on progress, new challenges, and to brainstorm what the Legislature can do to help.

Presenting at the Crime Summit will be the U.S. Attorney for Alaska, representatives from the Criminal Division of the Department of Law, municipal prosecutors, commissioners, Alaska State Troopers, police chiefs, victim's services organizations, Public Defender Agency, Office of Public Advocacy, representatives from the Alaska Court System, Alaska Native Justice Center, Public Safety Employees Association, UAA Justice Center, Alaska Mental Health Trust Authority, representatives from Juvenile Justice, and more.

The featured speaker will be Annie Pennucci from the Washington State Institute for Public Policy. She will be focusing on how education, particularly early childhood education and adult GED and similar programs,

January 13, 2012

Dear Neighbor,

The second session of the 27th Alaska State Legislature will convene on Tuesday. My Juneau office is up and running and I'll be there this

January 14, 2011

Senator Hollis French
State Capitol Bldg. Room 417
Juneau, Alaska 99801

SUBJECT: Crime Summit Recommendation

Recently, I had the unfortunate experience of being the mother of a son who committed a Domestic Violence crime. It sure brought the criminal justice (or no justice system) system in great prominence.

I can without question tell you that I am extremely disappointed in the justice presumptive sentence and the years that these presumptive sentences have been increased to, while still claiming to have a rehabilitating justice system for Domestic Violence and yet murders can be out in one third of their sentences and don't have to register for anything.

The other eye opener was how there is no accountability for the veracity of the statements made to the court by the victim. In this case there is perjury under oath and many other instances of lying and the victim is given a pass that whatever they do or say is okay even if it impacts the sentencing and is untrue.

We don't need any more draconian laws. There is either a person that is rehabilitable or you have a person with a criminal mindset that is going to reoffend. How about some common sense instead of a political platform "I am tough on crime". Great running slogan. Too bad that is all it is.

Women can get any male thrown out of their residence with the claim of being threatened and they are believed. They don't seem to have to substantiate the claim. Before any domestic violence occurred my son's ex had him removed from HIS house by gun point and the victim later said, there was no violence, I just wanted him out of the house.

What I want is accountability for everyone. In my mind lying should be just as punishable as the crime. You don't need more gasoline thrown on the fire and you sure shouldn't have to be fighting made up ghosts.

TV cameras in the court room should not be allowed. It is a distraction, and intimidating for all, including the judge. Anyone would be mistaken if they said it did not have an impact or influence the sentencing. The news media also doesn't provide unbiased coverage for both sides and their presence in the court rooms needs to be stopped.

Laws that could be made:

1. PROSECUTORS NEED TO BE HELD TO A HIGHER STANDARD AND FACE

PROSECUTION IF THEY LIE OR HIDE EVIDENCE i.e. Ted Stevens case.

2. NO TV CAMERA'S IN THE COURT ROOM. IT IS DISTRACTING, INTIMADING AND HAS A NEGETIVE EFFECT ON JUDGES SENTENCING AND WITNESSES TESTIFYING.
3. VICTIMS NEED TO BE HELD ACCOUNTABLE IF THEY ARE USING THE LAW FOR MANIPULATION OF THE COURT AND THE DESTRUCTION OF OTHERS BY FALSE STATEMENTS.

My son's case is probably an anomaly; however, I have attached a copy of a Readers Digest Article that is very similar "victim" as his ex and an article about Michael Douglas's son who got extra years when his defense attorney smuggled in drugs to the jail – Douglas's son gets more time – nothing is done to this attorney who hauled in the drugs. These are just a few cases where a female uses the law to accomplish something harmful to others. This abuse of the law is spreading and the women involved are given a free ride that destroys others.

You can't take all the risk out of living, DUI drivers or just incompetent drivers are a fact. The more laws you make the less freedom everyone else has. It is also inexcusable to have sentences that remove common sense and are so long you might as well lock the prisoners up and throw away the key. The young girl who died of the overdose, again where were the parents and where is the young girls responsibility for putting herself into an environment that was dangerous. I am sure there are enough laws on the books to prosecute this man.

I hope you will read the attached articles and will consider that sometimes less is more. Right now there are more male victims being created by making laws and then not vetting the stories of the supposed victims. The draconian sentences are enlarging the prison population and not doing anything to change society. If as a society we don't start reinforcing families and quit the one parent situations this problem will only increase.

The people that I talked to in the court system said they just didn't have time to check the stories of the victims out. Maybe it would be a good thing to provide funding for fact checkers to verify the victims' stories.

Sincerely,

Aileen Herring
8821 Emerald St
Anchorage, Alaska 95502

Caught in a Trap

The crime looked horrific: kidnapping, torture, and sexual assault. But nothing was as it seemed.

By Christopher Goffard
FROM *The Los Angeles Times*

He kept thinking there had been a mistake.

That was before the detective informed him of the charges and before the article in the *Ventura County Star*. "Man Held After Woman Found Raped and Tortured," read the headline, and there was his name, Louis Gonzalez III, along with a quote from a police officer: "In 19 years of police work, this has to go down as one of the most brutal attacks I have ever seen."

He had been standing on the sidewalk outside the Simi Valley Montessori School, having just flown in from Las Vegas, hoping to get a look at his five-year-old son's new

ILLUSTRATED BY JOHN RITTER

kindergarten—standing there, waiting to scoop the boy up in his arms and fly him to Nevada for the weekend. The sky was beautiful that afternoon. Gonzalez remembered it felt like spring.

The officer arrived on a motorcycle and headed straight for him. As he snapped on the handcuffs, Gonzalez noticed little faces pressed against the schoolhouse glass and asked if he could be moved just a bit so his son didn't have to see.

Soon, he'd surrendered all the items that tethered him reassuringly to the rational, workaday world. The BlackBerry he used a hundred times a day. His credit cards and photos of his son. His shoes and socks, his shirt and jacket, his belt and slacks and underwear. He stepped into a set of black-and-white-striped jail scrubs, the kind his son might wear on Halloween.

Minutes before Gonzalez's arrest around 2 p.m. on February 1, 2008, Tim Geiges placed a frantic 911 call. By the account he would give consistently in years to come, he'd just returned from work and found his wife, Tracy West, naked and bound in an upstairs bedroom of their Simi Valley home.

The dispatcher tried to calm him. "Sir, somebody beat your wife up?"

"Somebody tied her up, and I just got home—oh, my God ..." He was whimpering. "I just untied her head just now. She's crying. I need somebody, please!"

He managed to say that his wife's attacker would be at the Montessori School, a mile away.

"Who is this person?"

"Louis. Louis Gonzalez the Third."

Detective David Del Marto found West, 33, in the emergency room of Simi Valley Hospital. Her face was swollen, her lip gashed, her hair torn out in chunks. A cord, found tied around her neck with a slipknot, had left an angry red line, and there were burns on her stomach and ring finger.

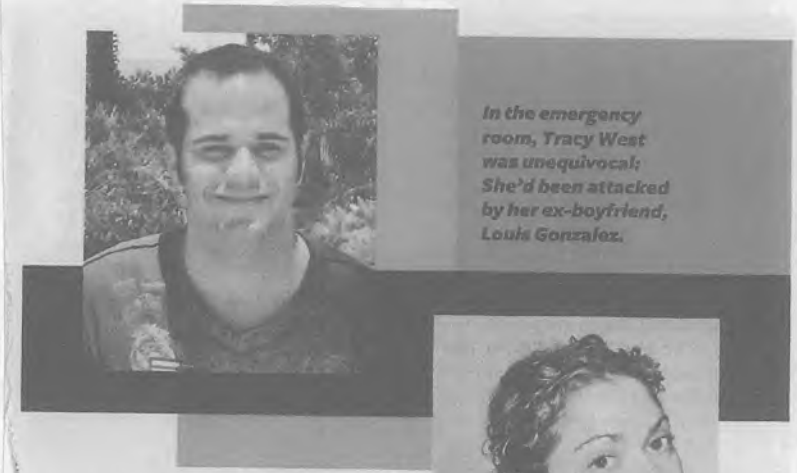
West was unequivocal about who had attacked her. It was Gonzalez, she said. He was her ex-boyfriend, the father of her son.

Del Marto made his voice gentle. "I need to find out what happened, OK? You know he's in custody, right? You don't have to worry anymore about him for now."

In a small, fragile voice, West explained that she and Gonzalez, 30, had been fighting over custody since their son's birth. She and Geiges were raising the boy, along with their younger daughter.

She said Gonzalez had ambushed her in the garage, dragged her to an upstairs bedroom, hog-tied her with her clothes, singed her with matches, and assaulted her sexually with a wooden coat hanger. Then, she said, he forced a plastic bag over her head and held it tight, and she feigned unconsciousness until he left.

"He told me he was gonna kill me," she said. "He told me that. Seven or eight different times."



In the emergency room, Tracy West was unequivocal: She'd been attacked by her ex-boyfriend, Louis Gonzalez.

HANDOUT/LOS ANGELES TIMES (2)

"Did he have anything with him in his hands?"

"He had a bag. Like a little mini-duffel bag."

During the attack, she said, she awoke from a blackout to find Gonzalez had placed mittens on her hands while he wore plastic gloves.

Del Marto thought this pointed to an uncommon level of sophistication—to a man who took extraordinary pains to avoid leaving fingerprints or traces of his DNA. In his report, the detective noted another detail she gave: Her attacker had worn overalls, as if to shield his clothes from evidence.

Del Marto thought West was lucky to be alive.

A few hours after the arrest, Del Marto pulled the accused out of his cell.

He studied Gonzalez. He saw no scratches on his face or hands and thought, The mittens.

"What is the accusation?" Gonzalez asked.

"That you assaulted Tracy at her house."

"That I assaulted? At what time did this take place?"

Del Marto stopped him. He had to read him his Miranda rights, a delicate business he knew could end the interview fast. Gonzalez agreed to talk anyway.

Maybe he thinks he's smarter than me, Del Marto thought. The guy came off as a little arrogant. Gonzalez had

an impressive title: senior vice president for business banking at the Bank of Las Vegas.

This is about a custody fight, Gonzalez said. He insisted he'd never been to West's house. Didn't even know the address.

"You work for a financial institution," Del Marto replied. "It's not hard to get a property profile on somebody."

The attack could have taken as little as 15 or 20 minutes, he said, and it was just two or three minutes from West's house to the school where he was arrested.

What about evidence at the house? Gonzalez asked.

Del Marto thought of the gloves. "Somebody probably watches *CSI* quite a lot."

"I didn't do this," Gonzalez said. "I know you think I did it, but I didn't do it."

"Yeah, I think you did it. I do," the detective replied.

Gonzalez and West had met in a study group at the University of Nevada in summer 2001. He was a high school dropout from the Bronx who had become a career-minded student; he wore pin-striped suits to class. She was smart, with brown hair and pretty hazel eyes, a vegetarian in flowered dresses who spoke softly.

Their relationship was brief. They had been apart for months when she called during a sonogram appointment. Suddenly he was listening to the heartbeat of their son.

In her fourth month of pregnancy, West met Gonzalez at a Denny's in Vegas. According to a police report, she said he became upset because she wouldn't go back to him. She said he slapped her and punched her stomach.

Gonzalez's version: They had gotten back together and argued because she was seeing another man and lying about it. He admitted to breaking her windshield, but only after she "went nuts hitting him," the police report said. He was arrested on suspicion of misdemeanor domestic violence. The charge was dropped.

The family-court battle began before the boy's first birthday.

Gonzalez's custody attorney, Denise Placencio, said West had tried relentlessly to curtail his time with his son, accusing Gonzalez of domestic abuse. The campaign continued, Placencio said, after West married Geiges and moved to California with the boy.

The courts allowed Gonzalez two weekends a month with his son. He would pick him up from the Vegas airport on Friday and take him back on Sunday, a knife twisting in his stomach as he watched his five-year-old loping down the Jetway, a gangly little guy with reddish hair, glancing back uncertainly.

In January 2008, Gonzalez sent an e-mail to West explaining that he wanted to see the boy's new Montessori school in Simi Valley. He would pick him up there on February 1 and

fly him to Nevada for the weekend.

West pressed for specifics. "What time are you planning on being here? Are you going to drive or fly?"

He would arrive by plane around noon, he wrote, and expected to get to the school around 2 p.m.

The e-mail exchange soon descended into acrimony. All these trips to Vegas were taking a toll on their son, West wrote. "Having to tell him that he has to go despite his obvious distress is not what I want."

miliate her as much as humanly possible before killing her" and fleeing with their son, Deputy District Attorney Andrea Tischler wrote in court papers.

The judge ruled: no bail.

When she met Gonzalez, lead defense attorney Debra S. White was struck by his eyes. He looked distraught and tired and angry.

This is about the boy, Gonzalez insisted. She wants me out of his life.

"This is about the boy," Gonzalez insisted. "Nail down my alibi and get me out."

Gonzalez answered that he hadn't seen these signs of distress—his son seemed happy to see him. "My focus right now is to make the best of what little time I have with him," he wrote.

West replied by writing that he had "proven time and time again" that he did not put their son's needs above his own whims.

It was hardly the nastiest exchange Gonzalez could remember. But he found himself thinking about it as he awaited arraignment. His hope of a quick release now seemed remote, considering the charges. If convicted of all counts, he faced five back-to-back life sentences.

"His goal was to degrade and humiliate her as much as humanly possible before killing her" and fleeing with their son, Deputy District Attorney Andrea Tischler wrote in court papers.

The judge ruled: no bail.

When she met Gonzalez, lead defense attorney Debra S. White was struck by his eyes. He looked distraught and tired and angry.

This is about the boy, Gonzalez insisted. She wants me out of his life. Nail down my alibi and get me out. He recited a detailed list, compiled over hours in his cell, of everybody who might have seen him around the time West said the attack occurred.

White called her sister, Leigh-Anne Salinas, her investigator on big cases. Salinas related to Gonzalez's businesslike, hard-edged manner but didn't think a jury would like him much. She was pessimistic about human nature and suspected Gonzalez might be guilty. She thought, Wow, this guy really thought this out.

Her task: verify Gonzalez's whereabouts in the hours preceding his arrest. West had accused Gonzalez of attacking her between 12:30 and

ANNE CUSACK/LOS ANGELES TIMES

Detective David Del Marto drove the route Gonzalez had taken that day. The timing didn't add up.

12:45 p.m. She knew the time, she told police, because she was about to leave to pick up her younger daughter early from school.

Salinas began retracing Gonzalez's movements, starting with his arrival at the airport in Burbank around noon. She walked into Enterprise Rent-a-Car on Hollywood Way, where employees remembered Gonzalez. He was the guy who needed a child's car seat. His receipt said 12:09 p.m.

Next, Gonzalez would have driven northwest to Simi Valley, a 28-mile trip. Salinas verified that Gonzalez was on his cell phone with another Nevada banker during the drive. Phone records confirmed this call lasted from 12:43 to 12:48 p.m.

At the Montessori School, Salinas's job proved tougher. School employees knew West, and Salinas sensed their reluctance to help the man accused of brutalizing her.

Salinas was polite and persistent. School workers remembered Gonzalez arriving between 12:45 and 12:50 p.m. He greeted his son and briefly toured the school. One lady joked that she felt underdressed alongside his suit and tie. They told him to return in about an hour to pick up his boy.

Gonzalez said he walked to a bagel shop at a nearby strip mall. The manager, Jung Soon Shin, recalled Gonzalez coming in around 1 p.m. to order a tuna sandwich on a sesame bagel.

When Shin explained that she didn't take credit cards, Gonzalez had patted his pockets—no cash—and promised to be back.

At the Wells Fargo a few blocks away, Salinas discovered, an assistant manager named Mercedes Saunders remembered Gonzalez coming in to make a withdrawal. They'd chatted, and she found him calm and pleasant. Surveillance cameras confirmed

he was there from 1:14 to 1:38 p.m., a bored-looking man in a dark suit.

Back at the bagel shop, Shin saw him return sometime before 2 p.m. with cash to buy his sandwich. She remembered him because he wasn't a regular and because after he left, she had to fish his reusable red sandwich basket out of the trash.

Salinas called her sister. West's story didn't hold up, she said.

"Wow," White said. "He actually may be innocent."

Del Marto wanted to find the duffel bag that West said Gonzalez had been carrying. Had all the items Del Marto couldn't find—the mittens, the gloves, the overalls—been stuffed in there and discarded?

He'd looked in storm drains and sewers. He'd searched roofs and freeway shoulders. He'd even inquired at Simi Valley mailbox companies, in case Gonzalez had been calculating enough to mail it to himself. No sign of the bag.

With doubts beginning to gnaw at him, he climbed into his car to time the route between the airport and West's house. He picked a Friday just after noon for his experiment, to replicate the conditions Gonzalez would have faced. He pushed his car to 80 mph. His partner held a stopwatch.

Even if Gonzalez had raced up the freeway, the detective discovered, he could not have arrived at West's house earlier than 12:42 p.m. And witnesses confirmed he was at the Montessori School right around then.

Did Gonzalez commit the attack after he left the school and before he was seen at a nearby bank? Or perhaps after he left the bank and before he was seen buying a bagel?

The detective concluded that each scenario would have given Gonzalez a narrow window of opportunity at West's house: six minutes.

Was that enough time?

Enough time for Gonzalez to find her in her garage, knock her out, drag her up the stairs, put gloves on his hands and mittens on hers, and slip on protective overalls so that his suit would remain immaculate?

Enough time to strip her, tie her up, burn her with matches, sexually assault her with a coat hanger, and try to suffocate her with a plastic bag?

Enough time to dispose of all this evidence, along with a duffel bag?

Why did no one, before or after, notice that Gonzalez was nervous or out of breath?

He remembered how West looked that day, bruised and traumatized. But the medical records seemed at odds with the sexual assault she described: They showed no internal tears or bleeding.

Maybe, Del Marto thought, the gloves, mittens, and overalls didn't exist. Maybe they were props in a story.

He withheld judgment until he could see the footage captured by the security cameras at McCarran Airport in Las Vegas.

Getting it required weeks of calls to the Transportation Security Administration. Finally, Del Marto and his partner were led to a private room in the bowels of Los Angeles International Airport and handed a disc.

Del Marto slid it into his laptop. He watched bodies shuffle through the security line in Vegas, taking off shoes, placing luggage on the conveyor belt. The detective trained his eyes on the screen for one thing in particular: the duffel bag. The airline said he hadn't checked bags. Had he carried it on board?

The detective froze the video and leaned forward. "I don't know how he could have done it," he said.

Three cameras captured Gonzalez walking through the metal detector. Del Marto froze the frame and leaned forward. Gonzalez's hands were empty.

Del Marto turned to his partner. "I don't know how he could have done this," he said.

The preliminary hearing in *State v. Gonzalez*, to determine whether he should face trial, was weeks away, and Del Marto was expected to testify on West's behalf. The detective did something rare in his 23-year career. He called the prosecutor to say that he was uncomfortable testifying in his own case.

Ventura County prosecutors were not deterred. They intended to put West on the stand to tell her story. There she would face a defense team that had lined up ten alibi witnesses and was preparing to portray her as a pathological liar.

On April 21, 2008, the day before the hearing was to begin, prosecutors learned that West was in the hospital. They had obtained a note in what appeared to be West's handwriting.

"The DA asking me to relive my horror of Louis Gonzalez attack is more than I can bear. For them it is a case. For me it is my life shattered," read the note. "I died of Rx overdose—suicide."

Later, in family court, West would say she didn't remember writing the note and blamed the hospitalization on drugs her psychiatrist had prescribed.

At 5:26 p.m. on April 22, prosecutor Andrea Tischler sent defense attorneys a brief e-mail: With West unavailable to testify, they were dropping the case. For now.

Jay Leiderman, one of Gonzalez's defense attorneys, hurried to the jail. Gonzalez was accustomed to odd-hours visits from the lawyer, but this

HANDOUT/LOS ANGELES TIMES

A bank security tape proved to be powerful evidence for Gonzalez's innocence.

time, Leiderman was smiling. "You're going home tomorrow," he said.

Gonzalez's father was there to greet him. So were Gonzalez's mother, brother, sister, and aunts, sweeping him up in a crush of family. After 83 days in a solitary cell, things felt wrong. All these people in one place, all this open air, made him dizzy.

He had his freedom. Now he wanted a sandwich. Then he wanted to get as far away from Ventura County as possible and start figuring out how to reclaim everything else he'd lost: his son, his job, his name.

The job turned out to be the easiest—the Bank of Las Vegas valued his abilities.

Lou, hey, welcome back ... So ...

He got used to telling the story. It was all about the custody case, he said. She wanted me gone.

No one came out and said anything directly, but he sensed people were wary. As if people figured that he hired a crack legal team and bought his way out of trouble. He knew certain things reinforced this perception: His accuser was walking free, after all, and retained custody of his son.

How come your ex isn't in jail? People kept asking.

He didn't have a good answer.

Getting to see his son proved tougher. He missed his sixth birthday. A custody judge withheld visitation, concerned Gonzalez might still face criminal charges.

He was finally allowed to see his son—eight months after his arrest. It was a brief visit at the office of a family reunification specialist.

Soon after, on his day off, Del Marto gave a deposition to the family law

attorney whom Gonzalez had enlisted to fight for full custody. All the physical evidence had been processed, the detective said, and none of it implicated Gonzalez.

"Based on my investigation, I see no reason why he should not be able to see his son."

Winning back his name was hardest of all. Stories persist on the Internet. Once, a date told him she had Googled him, and he had to explain.

What if he'd grabbed breakfast before his flight? His alibi gone, he could be in prison for life.

Leiderman thought it was not enough that the government dropped charges. There is such a thing as a declaration of factual innocence, he explained to Gonzalez. A judge can grant it. It is exceedingly rare—so rare that many lawyers go a career without seeing one. It means not just that prosecutors couldn't make a case against you but that you didn't do the crime.

The case remained on the docket of Ventura County Superior Court judge Patricia Murphy, who had earlier ordered Gonzalez held without bail. Leiderman petitioned the judge, trying not to get his client's hopes up. He laid out the case, pointing out the holes in West's story and the numerous alibi witnesses.

Prosecutors did not want Gonzalez declared innocent. They knew a jury wouldn't convict him but said they couldn't be positive of his innocence.

In January 2009, nearly a year after Gonzalez's arrest, Leiderman called him excitedly: The judge had sided with them. Gonzalez was soon holding a certified copy of the judge's order declaring him factually innocent.

He drove to the bank and put it in a safe-deposit box. He figured he would need it if he wanted to continue in banking, where the blot on his record would otherwise scare off future employers. It would help in his fight to win custody of his son. But it hardly made him whole.

Asked why West hadn't been charged with filing a false police report, James Ellison, Ventura County's chief assistant district attorney, gave this explanation: "We could not say with 100 percent certainty that Tracy West was lying."

Leiderman said he thinks the district attorney's office is embarrassed and wants the case to disappear. "No

one wanted to believe a woman would make something like this up," he said.

Del Marto can't say for sure what happened in that upstairs bedroom. He ruled out the possibility that West's husband, Tim Geiges, inflicted the wounds on her; his cell phone records proved he was elsewhere as she lay tied up.

Now and then, he found himself thinking of something he discovered on West's computer. It was a link to a sexual-bondage website that West had recently visited, Del Marto said. When he asked about it, she replied that a friend had sent it as a joke.

The site featured men and women in elaborate restraints and a depiction of a double-loop slipknot with a little eyelet on one end. To Del Marto, it resembled the knotted cord a nurse had removed from West's bruised neck on February 1, 2008.

The detective tried to imagine West hating her son's father enough to injure herself in such a methodical way. Tying the cord around her own neck, cutting off clumps of her hair, battering her own face ... and the other things. He'd seen people give themselves a scratch or bruise to impersonate victims, but nothing like this. "My God," he said, "to this extent?"

Del Marto said prosecutors asked him whether a case could be made against her. His reply: not without her confession. His supervisor praised his detective work, but Del Marto found the outcome unsatisfying. No one punished was a bad way to leave it.

As the custody battle staggered on, hearing by hearing, Las Vegas family court judge Bill Henderson wrestled aloud with the implications of the criminal case. He didn't believe Gonzalez had attacked West. Must he conclude, he asked, that she made it up? Perhaps someone else attacked her?

No, testified John Paglini, the court-appointed psychologist who had interviewed West four times: Either Gonzalez attacked her, or she lied.

West's voice was soft, at times barely above a whisper, when she took the stand last June. Her dark hair fell to her shoulders. She held her hands demurely in her lap, a still presence with an air of vulnerability.

She deserved her son, she said. She talked about how close he was to his little sister, how they belonged together in California; her voice broke.

Her lawyer asked her about February 1, 2008. She steadfastly insisted Gonzalez attacked her.

"Did you do it to yourself?"

"Absolutely not."

In her closing argument, Gonzalez's custody attorney, Denise Placencio, said West had been trying to divide father and son for years.

"The last resort was to frame Mr. Gonzalez and put him in jail for life," she said.

The judge concluded that West's insistence on Gonzalez's guilt "with no rational basis" was an attempt to remove the boy from his father's life.

"She continues to maintain that he's guilty of this heinous crime, and he's not," the judge said. She appeared to be a good mother otherwise, he said, and it was with "a heavy heart" that he awarded custody to the father.

The judge was not, however, prepared to accept the psychologist's either-or view of the case—that if Gonzalez didn't do it, West had made it up. What West believed about February 1, 2008, "remains unclear," and the possibility that she suffered a "delusion" had not been ruled out, the judge said.

West would stay in her son's life. She moved back to Nevada.

NATIONAL ENQUIRER

MICHAEL DOUGLAS OUTRAGED!

[1] [1]

by Jeff Samuels, NATIONAL ENQUIRER
Photography by: splash news online

MICHAEL DOUGLAS is heartbroken over his son Cameron's extended prison sentence is incensed with the pretty female defense attorney who allegedly smuggled drugs into jail for the troubled young man, say insiders.

Jennifer Ridha, who was hired to defend the "Wall Street" star's 33-year-old son, reportedly became smitten with Cameron and hid powerful anti-anxiety Xanax pills in her bra during an attorney-client meeting with him.

Michael – along with his gorgeous actress wife **Catherine Zeta-Jones** – now blames Jennifer after a no-nonsense judge recently extended Cameron's sentence by 4 1/2 years for possessing drugs in prison, say sources.

Cameron had already begun serving a five-year term for peddling meth and cocaine at a New York City hotel, along with heroin possession.

"Michael is furious, and Catherine feels the same, that the woman lawyer who was hired to help Cam ended up causing him new trouble behind bars," revealed a close source. "And she wasn't severely punished for sneaking him drugs."

Confirmed an insider:"They're angry that Jennifer was not charged with anything while Cam is going to be behind bars for nearly a decade!"

Judge Richard Berman cited the pills-in-bra smuggling incident and said Cameron had proven himself "reckless, disruptive and noncompliant."

Incredibly, the judge's sentence was twice as long as what the prosecutors wanted, and Berman told Cameron he had "blown the biggest opportunity of his life."

Hi,

In answer to question #1 I believe violent gang activity is our gratest danger at least in the urban areas.

Keeping law enforecment funded and focused with special task forces directed at these groups are one direct answer to the problem.

Thank You,
Fred

Subject: Reply to questions in legislative update

Dear Senator French:
I think the number one crime problem in Alaska is violent crimes against women and children - especially in rural areas, but in urban areas too.
Unfortunately there is no easy solution to this problem. It is not to criminalize more behavior or increase penalties - our laws are already pretty stiff. But, laws without community enforcement or a community that offers no refuge from violence are problems that could be addressed. I think the Governor's "Choose Respect" is a step in the right direction, but it is going to take time. I do think public education efforts CAN make a difference - look at seat belts, washing hands, covering a sneeze. If presented as a public HEALTH issue, as well as a public safety issue, then I think building on increased community policing is going to work over the long term. But, it has to be a long term effort.
I see that the current redistricting plan has our House district (north of the airport paired with the House district south of the airport - does that make yours the "Fly-By District"? Or, because you have all those lakes (Lake Hood, Lake Spenard, Conner Lake, Sand Lake, Jewell Lake, and Jones Lake), maybe you can call it the "Lake District"....
Best of luck with session,
Kristin Knudsen

Subject: Education

Since there is a strong link between education and crime, my suggestion is that the all or a portion of children's permanent fund dividends be invested in accounts that the child is allowed to draw on for either college or trade school education upon turning 18 years old. If they are not inclined to seek education, then cash them out at age 21. At present many of the children who most need better education or trade school training have their dividends spent by their parents for new snow machines, ATVs, and other short term frills. Unfortunately, such a change would not be popular with the parents (or most voters) who most need to consider the long term future of their children.

Keep up the good the work; I am proud you are my representative in Juneau.

What's the number one crime issues in Alaska? I would have to say among all the issues is, the courage to approach any one issue with flexibility and compassion. We should have come along ways in the recognition of all our communities in Alaska and each need there of.

Not to take away the strength of those communities, on the contrary to empower and unite the principals of a healthy environment. This may be subjected to others thoughts of what that might be. However it should not. I repeat should not be infringed upon any one community.

The belonging of everyone to co exist respectfully with one another.

I have given much thought to this and I am trying to find the most benefical way to illuminate my points. Alaska has many forces at work or in motion. First the expansion of civiliation (Dominating) So now we have many human beings that are being run over by the expansion. This is where

the social sciences come in to play. To recognize and correctly translate the needs of the communities being exposed to the expansion. With out a doubt there are people that will need help Education can provide and facillitate the society with markers if paid attentioned to the path of cohesion. This is the key to flexibility with in the departments and Legislature and the statues enacted. Not for political power or to look good or be cool. Our very existance, Now right now. If its something that needs to be changed change it Now. Don't continue to eliminate the freedoms of the citizens. Jail isn't the solution to everyone issue.

P.S I could expound on this upon your request.

Most Respectfully

Joshua Alexander Sandage

Dear Neighbor,
The second session of the 27th Alaska State Legislature will convene on Tuesday. My Juneau office is up and running and I'll be there this weekend. I look forward to working on a host of interesting issues this session.

Crime Summit

As Chair of the Senate Judiciary Committee, I am sponsoring a Crime Summit on **January 24th** and **25th**. We will explore the leading criminal justice issues facing Alaska's urban areas. Our goal is to identify some cost-effective methods to combat crime, as well as concrete actions we can take to improve public safety. We held a similar Crime Summit in 2008, and are re-visiting the issues to get an update on progress, new challenges, and to brainstorm what the Legislature can do to help.
Presenting at the Crime Summit will be the U.S. Attorney for Alaska, representatives from the Criminal Division of the Department of Law, municipal prosecutors, commissioners, Alaska State Troopers, police chiefs, victim's services organizations, Public Defender Agency, Office of Public Advocacy, representatives from the Alaska Court System, Alaska Native

Thank you San French

I would say the #1 criminal issue in Alaska is the epidemic level of child sexual abuse.

Such acts are arguably worse than murder [redacted] especially when one considers murder victims Never become the perpetrator; and seem to cope with death better.

No punishment could be too harsh in my politically incorrect opinion; How many of those children do you suppose would have preferred to have been beaten? Yet sentences often leave teenagers with the knowledge that we just released the man who raped you.

#2 Solutions

1. No statute of limitations or a very long one 50-100 years
2. Lengthy prison terms (or just kill em)
   Where's that great molester gone you'd story?
3. Though the ACLU & Supreme Court would never tolerate a drug free society why don't you, just as a publicity stunt, sponsor a bill making polygraphs court admissable i.e.
   "There claims were made on a polygraph"

Daniel Short

On the back I have expressed my [redacted] opinion in Hillbilly Rap. Please enjoy

AS wrong as is me beat you is more
wrongER you're Not beat
-Gotcha No respect for childrens
Now we're confiscating feet
cain't has you walking round
where the Kiddies might be found
& their place is over ground
so you're going under it.
Aint No bitch Billy bottom
Aint No why waste time with it
If a chicken got a throat
then that's where you put a slit
Where's this Molester gone good story
when does this (shit) over work
How you gonna tell them kids that
we just released the Jerk?

DEAR SENATOR HOLLIS;

I'd SAY #1 CRIME ISSUE IS MURDER!

AND #2 ISSUE IS RAPE!

IN ORDER TO SOLVE OR PREVENT CRIMES AND housing THOUSANDS of PEOPLE, PUNISHMENT NEED BE SWIFT & PROMPT!

FOR CAPITOL CRIMES, YOU TAKE THE CRIMINAL OUT BEHIND THE BARN & STAND him up AGAINST A DEAD STUMP & SHOOT THEM full of holes with A DULL FAN!

FOR RAPE CASES the "SENTENCE" is very simple & theres <u>NEVER</u> any REPEAT OFFENDERS!!! This METHOD was used on the NAVAHO INDIAN RESERVATIONS FOR OVER 100 YEARS & there NEVER were any 2nd

Page

Dear Senator;

offenders! Neither were these Any Rapist spend time in JAIL!

One must STOP, "mollycoddling" CRIMinals! If they committe A CRime then, they need to Be Required to PAY the PRICE!

When A Sex offender was PROVE guilty on Reservation, His Testicles were NAILed to Floor & a sharp Knife PLACed in FRONT of him! Then his HOGAN was Set Afire! END of STORY!! What Part Does Not This modern generation UNDERSTAND?

Please Change LAWS to Reflect ABOVE THINKING!!! Truly,

Subject: Re: Legislative Update from Senator Hollis French

Dear Hollis,

I think the number one crime in Alaska is corruption. You see it everywhere, from the collusion of the two oil refineries which causes us to have some of the highest gas prices in the country to the legislators who refuse to even consider a law against price gouging to a governor who seems more interested in keeping oil companies happy than abiding by the constitution. It didn't end with Bill Allen and Frank Murkowski and the Corrupt Bastards. I find it dismaying we had to have the federal government prosecute our homegrown criminals. Where was our law enforcement and the attorneys general who were in charge while this was happening?

I think we have become one of the most corrupt states in the country. It influences everyone here because it says when things can be done to whom, where, how and why. You're not safe in your home because they might put a coal mine operation down the road from you or they might decide that your basic rights to clean air and water is superseded by an open pit mine. We deserve better.

Thank you.

Hollis French
Senator

716 West 4TH Avenue, Suite 420
Anchorage, Alaska 99501

Dear Senator Hollis,

I was writing in answer to your request for public input as to what the #1 crime issue in Alaska is and what should be done about it. It seems to me it is the same problem the entire country has, which is the abuse of drugs and alcohol. I suspect that the vast majority of violent crimes, child abuse, theft, car accidents and on and on are committed by people who are under the influence of drugs and/or alcohol or whose lifestyle encourages them to habitually use them. I think by now it should be clear that stiffer penalties and longer prison terms are not an effective way to rehabilitate drug/alcohol users. In fact for many prison terms will only exacerbate their problems. That is not to say that penalties should not be imposed on law breakers, they should be. But they should be reasonable and they should not be unending if the addict is going to have any incentive to quit. Most professionals agree drug and alcohol addiction is a mental health issue. I believe that if more money was spent treating it as a health issue as opposed to a criminal issue countless dollars could be saved in the long term. Not to mention the lives that could be saved and the suffering that could be prevented.

Most people don't believe the current method of fighting the 'war on drugs' with undercover agents, SWAT teams, prison cells and probation officers is working. In fact over the last 30 years the problem seems to have gotten much worse. It is time for a different tactic. I think de-glamorizing drug and alcohol abuse would be a good step. This could be done by expanding and modifying the present school programs and also with a television/radio/newspaper campaign. It would be most effective if only the facts were presented. For example I recall being told far fetched horror stories about drug use when I was in school and after that all drug warnings seemed to loose credibility. The facts alone are horrifying enough. People who have grown up in a family of addicts and perhaps surrounded by other addicts may not even realize how different life could be with out drugs and alcohol. A public education campaign stressing the possible and inevitable financial, legal, physical and mental consequences of drug/alcohol abuse versus the benefits of not using could inspire some to quit and more to never start. If affordable treatment was made available at the same time it could be very effective for those who wanted it.

If one considers all the costs associated with addictions, the damage it does to the children of the addicts and the almost certainty that they too will grow up to be addicts, the costs of juvenile crime, foster care, the costs of all the crimes addicts commit, the additional time police departments spend investigating those crimes, the costs of trials, the costs of imprisoning addicts and then the costs of supervision during the following years of probation it seems to be astronomical. Spreading like the disease it is from generation to generation, from person to person, it also seems unending. Offering free treatment to those who decide

they want to stop but need help doing so might be expensive but would be a bargain in comparison to dealing with another addict. For every person who is successful in quitting the odds that others might not ever start or will also be able to quit are increased. I believe the state needs to offer treatment on both an inpatient/outpatient basis at a reduced or free rate to all who want it but might otherwise not be able to afford it. The availability of these programs should be widely advertised so the addicts are constantly reminded that there is a better way and it is available. If the people who volunteered for these programs were kept separate from the court ordered patients, who might not be sincere in their wish to change, the success rate could be very high. I say that because without exposure to court ordered patients, the ones who are sincerely trying to quit would not be exposed to the temptation to use that those who are only there to satisfy a court order might offer them when they are at a cross roads. There are many voluntary programs already in place and the state could join forces with them to offer services to willing participants. Perhaps vouchers could be made available to provide treatment in existing treatment centers for both outpatient and inpatient treatment. After treatment they should also have access to long term support. Just as after imprisonment a probation officer is assigned, perhaps a counsellor could be assigned to assist the newly sober person in learning to adjust to and deal with all the problems of day to day life. If the addict has underlaying issues with depression or some other type of mental or physical health issue they could advise and help them to treat it also. Many addicts are self medicating undiagnosed problems. Correcting those pre-existing problems would go along way towards ending their addictions and the resulting bad behavior.

Maybe the state already offers these programs, but it is not widely known. If so it needs to be advertised. Every drug and/or alcohol abuser in the state needs to know there is a better way to live and that help learning to live a better life is available.

I also want to thank you for giving me the opportunity to express my opinion on this tragic and serious issue.

Sincerely yours,

Marguerite Swartz

Subject: Requested info '#1 crime issue in the state of AK.'

Most will state sexual abuse of minors or rape which are not to be marginalized & are extremely important issues but we also have a real issue most of us can relate to and that is 'traffic issues, specifically arrogant drivers who drive above the law on our roads and byways (of which we have few) either in a drunken state or in a 'non-caring state knowing that the odds of getting caught are few due to the low population of officers on the roads at any given time. This issue gets worse every year.
Make it possible to fund additional Troopers for our highways. This is vital. Our state is not a teenager anymore. We've grown exponentially. We actually should have an intermediate police force similar to a Sheriff Office, just another step in the law enforcement agencies. We need these assets to curb the many accidents that take so many of our community members lives.
Just the 'sight of a Trooper vehicle ' can keep the nut behind the wheel from spinning off.
Good luck to you in this year's legislative endeavor...

James J Corbett
Wasilla AK.
44 yr. res of AK.

Anchorage AK 99501

Dear Sir,

In regards to your article on the Nome Nugget, I have some issues affecting Rural Alaska.

I live in Bresig Mission Alaska, a growing community with 340 residents. In the last 4 yrs our community has major development with the installation of water and sewer, tank farms, roads, and new housing, in which I live in currently with these developments came jobs and jobs mean money. Along with these developments also came [redacted] sites in human form who wanted this money, [redacted] bootlegging, drugs became rampant, which corrupted our people, our economy and goverment.

All Alcohol and marijuana came in BULK through Barges that resupply our stores, schools and public facilites.

Non Natives who came to do a service for our community got rich. Teachers, health workers and even our pastor who we have been trying to get rid of but having a hard time because he's paying the church council, city workers and local goverment.

Recently we got a new Mayor, PA, and principal who are honest and hard working.

Drugs are our number one problem here and our local law enforcement and troopers in Nome are no help at all.

We need help here and booting out our pastor would change our future and village life our people are →

struggling. So are our children.

Any help here or anywhere with drugs and alcohol problems would be greatly appreciated.

Subject: crime in rural Alaska

Sen. French, I write in response to your letter in Friday's ADN. I am not writing in any official capacity, but rather as a long time resident of Bristol Bay.

The number one crime issue in this part of rural Alaska is that it is generational. The children of criminals and victims are much more likely than others to offend in the future.

The good news is that in small villages it is relatively easy to identify these families; the bad news is that a significant number have fetal alcohol syndrome disorder and are not easy to help. But the State should double funding for the Office of Children's Services and offer a variety of programs for those with alcohol and mental health issues, intervening much earlier than is now occurring. Facilities offering structure and guidance should be created throughout the state, and correctional facilities should be located in regional hubs, so that offenders could have contact with their families and take advantage of local programs.

I know that this does not directly address the two crimes you mentioned, but they do support my belief that deterrence is an illusion after an alcoholic takes his first drink. While raising sentences and turning misdemeanors into felonies works to isolate the hopeless defendants, real prevention must begin years earlier. Spectacular children will emerge from dysfunctional families, but they face long odds. Taking them from their families after 5 or 10 years of abuse and neglect is, too often, too late. Early intervention and locally administered programs are needed. While the results may be difficult to measure, it seems plain to me that such efforts will pay dividends for years to come.

Thank you for your work on this.

Fred Torrisi

Subject: Crime in Alaska

Dear Senator French, Thank you for asking for our opinion regarding crime in Alaska. I have been sharing this question with several professionals that I work with and others and we all agree on the same solution so I hope you have received responses that follow this same path.

The number one crime in Alaska includes violence against children, women and others. As you may conclude, this leads to side effects that cause enormous strains on those of us that provide services such as housing, domestic violence support, children's services and shelters.

The solution is substance abuse treatment and affordable housing.

We know that over 80% of those in our prisons and the crimes they committed in some way involve alcohol or drugs. At an unfathomable cost to our children, the cost to the state and to our families, and communities, we do not have any affordable comprehensive alcohol drug or mental health treatment programs. The largest provider of mental health treatment programs in Anchorage has to fight each year for funding. If I have a client who comes to me and says, "I'm drinking and I need help"...there will be no help available. There are literally 9 beds in Anchorage. These are folks who have little to no income and certainly no opportunities for getting better without at least some support.

If you ask me, the new prison fiasco could have been turned in to a self sustaining alcohol and mental health treatment center. It makes no sense to put more money into prisons when crime can be prevented by providing effective treatment. Especially crimes against children.
Once someone gets out of prison, they have few housing options. Affordable and stable housing is an an answer to crime as much as treatment.

I apologize for the long e-mail and as I'm sure you have guessed can continue for pages. I hope you will consider my response and thank you for the opportunity.

I work in affordable housing with folks who are previously homeless, disabled and elderly and have been an Alaskan for over 40 years....the problem has never changed. Vickie Dodge-Pamplin

Subject: Crime Summit Issues

Hi Sen. French. I'm one of your biggest fans and the mother of Amanda Metivier, who I believe you know. I'm responding to your call for letters from the ADN asking for input. I am sorry this is last minute but I hope it reaches you in time. The #1 crime issue in AK is the horrific proliferation of drug crimes and the crimes committed by addicts who are stealing, pawning stolen goods, dealing drugs, trading for stolen goods or trading for them. One of my daughters and her boyfriend (and the boyfriend before) are prime examples. I used to see a parade of unsavory characters come to visit-obviously high on something, I've seen a long list of drug related texts, and have had to do my own detective work to track down some of my stolen items. I had to pay Ambrose Richardson to get back a pair of my earrings he had been holding in lieu of payment for drugs-he doesn't work except to sell drugs. His girlfriend died last year from an infected injection site-she left behind some children. A friend of my daughter, Alex K. Robinson used to work at Bingo South where she was asked to sell drugs for some of the bingo patrons, pawned several pieces of my jewelry-taken from my home-she's mostly a user but she's never been caught. I had to negotiate with the pawn companies and spend about $500.00 to get my items back. Lyle Newby Sr. sold drugs for years, attacked a man and beat him from behind but never caught. He got lots of pain meds from his Dr. and sold those too. He also "cleaned out a vacant house down the street from his mom's house and kept bringing anything that wasn't nailed down to her house on Aspen-never caught.A lot of these miscreants have been traffic stopped but APD is missing a lot of their hiding places. #2 What should be done about it? APD is too inconsistant.They help a select few but withhold help for so many of us. I filed a police report as well as my friend, Betty Whorton-we both paid for our reports but they were heavily redacted with key info blacked out. We were both ripped off $800.00 by Erik A. Thomson of Chugiak-who was supposed to cut down trees on our properties then changed his cell phone no. and never came back to do the job. Without his home address, we had to hire a PI to track down his address so he could be served for court-another $130.00 because APD refused to keep his address on our report. They wouldn't even send an officer out to talk to him. YET CHECK ADN 12-21-11, "POLICE HUNT MAN WANTED ON FRAUD ALLEGATIONS", PAGE 3 AND ADN 12-24-11, "FUGITIVE WANTED IN FRAUD SCHEMES ARRESTED"-SAME MO, DIFFERENT VICTIMS-APD HELPED THEM IN A BIG WAY, BUT NOT MY FRIEND AND I--INCONSISTANT AGAIN. ALSO-ADN, 1-7-12-"POLICE HOPE PHOTOS HELP NAB SNOWBLOWER THIEVES"-WITH A PUBLISHED PHOTO OF THE TWO SUSPECTS, ASKING FOR CRIMESTOPPER TIPS. A friend of mine, middle aged, was stopped for no lisc., no ins., and expired tags-SHE WENT TO JAIL AND IT COST HER $700.00 PLUS. last Wed., a young 21 yr. old attractive young lady who worked for Brown Jug at Minnesota and Spenard named Bianca was stopped by APD with no lisc. or ins. and got NO TICKET AND WAS ALLOWED TO DRIVE HOME. Today, while delivering mail and going over to water my 93 yr. old friends' greenhouse, I got out of my car and was verbally assaulted by her neighbor-a male who yelled at me "TO NEVER COME NEAR HIS PROPERTY AGAIN AND THAT I WAS A F----ING B---H, ETC AD NAUSEUM-I HAD SAID, NOR DONE ANYTHING. WHEN I CALLED APD OUT THEY THOUGHT THAT I WAS THE ONE LYING EVEN AFTER I TOLD THEM I WOULD TAKE A POLYGRAPH. I WAS SO UPSET I THOUGHT I WAS GOING TO HAVE TO CALL A PARAMEDIC.I ASKED IF I COULD GET A RESTRAINING ORDER-'yeah if you do a property search and find his name you can", I was told. I am that old lady's caregiver, now I'll have to take a tape recorder with me to get evidence and spend hours trying to locate the name for 3399 Willow st.Again APD DID NOTHING.This was his second attack on me. APD IS PROTECTING AND SERVING ONLY A FEW SELECT CITIZENS-NOT ALL WHO NEED HELP. At the courthouse I had to redo my court papers FOUR TIMES TO THE CLERK'S SATISFACTION, SPENDING DOUBLE ON FILING TO SEPERATE THE CASES AND PAY THE INCOMPETENT ACIS PROCESS SERVER, TODD DOUBLE TO SERVE AT THE SAME ADDRESS. THERE WAS NO CLIENT

CONTRACT FROM ACIS AND I HAD TO DEMAND RECEIPTS-THEY WEREN'T GOING TO GIVE ME ONE. I WAS SENT A LETTER SAYING THAT THEY WEREN'T ABLE TO SERVE ERIK A. THOMSON-NO EXPLAINATION, NO REFUND CHECK. ALL BECAUSE APD REFUSED TO DO ANYTHING OR LEAVE HIS ADDRESS ON THE REPORTS THAT I PAID FOR. WHETHER THEY KNOW IT OR NOT, APD HAS A TERRIBLE REPUTATION IN ANCHORAGE-THESE ARE SOME OF THE REASONS WHY.THEY ARE SO INCONSISTANT AND SELECTIVE ABOUT WHO GETS HELP AND WHO DOESN'T. MY FRIEND AND I WILL NEVER GET JUSTICE. Thank you for your service, Hollis-keep up the good work. Sincerely, Jana Barlow (243-4581, 230-5515, jbarlow907@yahoo.com)

Subject: Rape and Child Rape ... FASD (Fetal Alcohol Spectrum Disorder)
Attachments: Denali Poster.jpg

Categories: HF responded

Senator French and Senate Judiciary Members:

Today I attended the first day of this year's Alaska Crime Summit because I am a 40 year resident of Alaska and I am appalled by our highest in the nation rates of rape and child rape.

It was almost 10 years ago that I heard on the radio "Alaska has the highest rate of sexual assault in the United States." Then I heard it again the following year. I also started hearing "Alaska has the highest child sexual assault rate in the United States." I heard these statistics year after year until I decided I should spend some time trying to understand what's going on.

I am a retired biologist and animal behavior is something I've spent some time studying. I also could not rape either an adult or a child… it would be impossible. I had to ask myself "what is it about Alaskan society that causes there to be so many men that are capable of such a thing?" I think the answer lies to a great extent in our highest in the nation rates of alcohol consumption, and Fetal Alcohol Spectrum Disorder, fetal brain damage by alcohol.

Since my awakening almost a decade ago, I've been studying the issue.

I found that no matter if Democrats or Republicans were in the majority, or if our income was soaring or sinking, Alaska has had the highest rates in the nation of these particularly nasty crimes for as long as statistics have been collected…. 40 years? 50? It's part of life in Alaska and most of us don't even know it. We are in denial. The next step is anger, and you may be there, but the public isn't. One women's advocate told me "Rape is an accepted norm. I once met a 10 year old girl in rural Alaska who told me it wasn't a question of if she would be raped but when."

Alaska's sexual assault is at least twice the national average. I had to ask myself "what does that mean?" We hear that the rates are high, but we don't do the math. One in four women in the United States are raped before their 25th birthday. If we are twice that then that's half the girls in your local grade school and half the young women in the senior class. Why are we not screaming about this? Why are we so complacent?

We are in denial, and we aren't looking for causes. If we're looking for anything we're looking for punishment.

It seems our first response is to help victims… and that's appropriate. Then those of us that do get angry want vengeance and punishment. Problem is that helping victims doesn't reduce the rate of sexual assault… rape for a simpler word… and punishing the perpetrators doesn't reduce the rate either. The problem is that something about life in Alaska fosters individuals who commit these crimes… another thing we don't want to know about ourselves.

In the last few years I think I've found a large component of the problem. All males are not liable to commit these crimes, but people with brains damaged by fetal alcohol exposure are. It may be possible to turn them to more productive and acceptable behavior if you get to them early enough, but people with FASD have life-long incurable brain damage which leads them to be both victims and perpetrators of sexual assault and other violent crimes, particularly if they grow up in an atmosphere of violence and abuse.

People with Fetal Alcohol Spectrum Disorder, FASD, may have good language skills and near normal IQ, but can't remember and can't learn from mistakes. They don't understand consequences of the things they do, have little empathy for other people, and act impulsively. They are not deterred by punishment. They are also not likely to be able to figure out what "Choose Respect" means.

People with FASD need guidance, structure and support for their whole lives. They can be trained to be productive rather than destructive, but over half get in trouble with the law (60% in a Washington State study). Their first brush with the law is usually in the child custody system .... 65%of children with FAS (a form of FASD) are in state custody and only 23% live with one or both biological parents. These folks are Alaskan citizens and they need help. It has been estimated that they cost the state anywhere from $1.4 million to $5 million apiece during the course of their lives, depending on how you figure cost... for the individual, to society, to others.

I apologize for the lack of citations, but one study I read said that in the prisons studied 30-70% of inmates were afflicted with FASD. An article in "The Province," a British Columbia newspaper, said up to 80 percent of those in jail had an FASD, and at an FASD conference in Juneau, a panel of Alaska judges, lawyers and a former Alaska Attorney General suggested that the rate was at least 50%. I will note here that our recidivism rate is about 66% and that 40% of those returning to jail are reoffenders. FASD may not be the magic bullet explanation for all our problems, but it is the bullet that nobody is talking about at the Crime Summit so far.

What should we do?

What we should not do is go out and spend a bunch of money without a truly comprehensive plan that includes Education, Law, Health and Social Services, and Corrections. Alaska, H&SS, FASD Program got a $19 million federal grant for FASD in 2000 and we spent money at the rate of 5 million a year for 5 years. Then the federal money went away. Now we're spending $1.7 million a year and darned if I can get anyone to tell me what's different about the program at those two very different spending levels. What is it that we aren't doing now that we used to be doing? And does it make any difference? Big chunks of money are hard to spend wisely...you need a plan first.

Best I can come up with is we have to recognize FASD, the most common birth defect, as a problem that is going to be around as long as pregnant women continue to drink... and that will happen as long as our per capita drinking rates are high. We can't demonize the women that make the mistake and it appears that the rates of this preventable problem are in fact declining... but not disappearing. We have to own the problem.

We can diagnose children, we can look for FASD in the child welfare system and the juvenile justice system and we can work to turn the affected individuals to more productive outcomes than jail, homelessness and victimization. When these people go to jail, we have to have a system to track and guide them for the rest of their days when they get out.

Alaska is not the only society with these problems, and if we got really good at training workers and designing systems to deal with FASD, we could export our knowledge and expertise while enriching our communities with the workers, specialists and their families that would be required to do the job.

Thanks for listening and I look forward to the second day of the summit....

Hi Hollis:

I'm watching, but only paying half my attention to the proceedings.
(I'm trying to work & listen, too.)

Wade Hampton & sexual assault rates -> go look at the income levels in areas with highest rates and see if there's a correlation. The NYT or WaPo did a thing on food stamps last year. Wade Hampton has the highest food stamp usage per capita in the United States. Does grinding poverty exacerbate DV & sexual assault rates?

I know the answer. I'll bet you do, too.

Throw loss of culture on top of grinding poverty and you've got two parts of a trifecta.

Thank you for being such a kick-ass Senator. Strength to your sword arm, sir.

Jan in Homer

Senator, thank you for asking for the public's input on this matter. I offer no quick fixes, but ones that will work. I believe that education is always the answer, but in this case targeted to fill two voids in our national education system. We can start to rectify it in Alaska and be the example for the rest of the nation.

First, we must teach ethics in our schools. It must be taught at several grade increments, say first, fourth, seventh, tenth or more. Each grade level will require a different approach, but this education, this learning to think and consider appropriate responses to various situations and to be compassionate about others, will serve students well throughout their lifetimes. Long-term, it will change our neighborhoods, our communities, our nation.

Second, we must teach logic in our schools. This was a subject I didn't experience until college, but it was life-changing. I no longer get caught up in either the political or the advertising nonsense. A background in logic eliminates much of the drama in interpersonal relationships and communications, would aid our citizens in making their own nutritional selections, would reduce the desire to purchase the latest thing, would dial way down the political rhetoric that truly has no basis in logic or facts. I believe that a course in logic should be required. Our citizens would make decisions bases on facts, not on manipulation, innuendo, etc. A course in logic is not at all difficult; it is easy and fun. It is simply a new way of looking at the familiar. I guarantee that students would enjoy it. It should be definitely taught in high school, but would be helpful in middle school or earlier as well.

Thank you again for your interest.

Sheila Lankford

Senator French,

Two points that appeared to be overlooked or glossed over due to time constraints:

> The reduction in traffic fatalities in Anchorage is remarkable. With nearly three decades of my career at APD, I attended or investigated more than my share them and they account for many of my worst memories. Much of what made the reductions possible was funding provided via National Highway Traffic Safety Administration (NHTSA) funding for overtime enforcement for both DUI and seat belt enforcement. These funding streams are drying up and with that I fear a diminishment in related enforcement activities. Anchorage may be better able to supplement the required funding to perpetuate extracurricular enforcement; however, this will have a significant impact on the resources that smaller agencies will be able to dedicate to traffic safety.
>
> Sgt. Ketterling clearly addressed the growing population issues encountered in both the cities of Wasilla, Palmer, and the core area of the Mat-Su Valley. One item he appeared to have no time to address is the staffing levels of the Alaska State Troopers upon whom both the Palmer PD and Wasilla PD are integrally interdependent. Troopers often assist both agencies within our jurisdictions, then, we are increasingly providing services outside of our jurisdictions simply because the Troopers are so dramatically understaffed in the core area of the Matanuska – Susitna Valley. I do not expect the state to fund officers to staff our agencies, as nice as that would be, while funding additional troopers is more politically acceptable. This will directly improve our ability to serve our communities while allowing the Troopers to be more responsive to those who live outside of either Palmer or Wasilla.

I also take this opportunity to express my gratitude for allowing the Palmer Police Department, via Sgt. Ketterling, to speak on behalf of the smaller agencies strung throughout the state. Our issues differ dramatically from community to community; yet, there are common threads.

Respectfully,

George R. Boatright

Subject: FW: Prison Survey for FASD (Fetal Alcohol Spectrum Disorder)

Mr. Jessee,

Good Afternoon from Juneau… snowy Juneau.

For the past two days I've been attending the Senate Judiciary Committee's Crime Summit.

I was disappointed that your testimony yesterday seemed to focus on who regulates the sale of alcohol and had so little to say about mental illness and crime. Yes there are a lot of mentally ill people in jail but why is that? And what can we do to keep them out of jail and out of homelessness and victimization?

As you will see from the following emails to Senator French, my focus is on understanding why Alaska has such high rates of sexual assault and child sexual assault. FASD seems to be a key to understanding the problem, but you mentioned it only in passing.

Please read the emails and suggest how we might get estimates of the prevalence of FASD in our prison populations.

Thanks for your help…. john

To: 'Sen. Hollis French'
Subject: Prison Survey for FASD (Fetal Alcohol Spectrum Disorder)

Senator French,

Thank you for your quick response to my email and for introducing FASD into the discussion during the Corrections Department testimony. I was disappointed that during two days of talking about crime, with an emphasis on sexual assault, yours was the only direct reference to the topic.

I was very surprised that Walt Monegan made no mention of alcohol related illness in his testimony and that Jeff Jessee only mentioned FASD in passing.

At 2:00 I left the second day's session to meet with Genevieve Casey, FASD Program Manager and Diane Casto, Director of Health and Social Services Division of Behavioral Health… now I just want to send a quick note because I think there is something we can do right away to shed some light on things.

It's time to survey Alaska prisons to see what part of the population is likely affected by mental illness, particularly FASD. From Jeff Jessee's testimony, we already know the prison system is the largest

mental health facility in the state.... but he said very little or nothing about what that means and why that is.

A formal study might not be required for a quick glimpse, since I imagine the prison psychologists, rehabilitation program specialists and others that have regular contact with inmates could give us an estimate based on their personal experience and professional opinion. This could then lead to a more formal an scientific study funded and coordinated by Corrections, Health and Social Services, and Mental Health Trust.

I think part of the problem with recognizing FASD is first that we don't want to admit there is something wrong with our drinking habits. Second, we want to punish perpetrators and feel like FASD is a way for them to argue for more lenient sentences. Finally, we don't want to have to think or deal with our domestic violence and sexual assault problem. The public needs to know how bad things are before the legislature can do anything about it. Please issue a press release on highlights of the testimony during the Crime Summit, particularly the study on intimate partner violence by the University of Alaska Justice Center.

You said yesterday that we need to do something to keep from being number 1.

I think we need to figure out how to be number 50.

Alaska has the means to do the job. With our small population, incredible resources, and all that money in the bank we can afford to try and be the happiest and healthiest bunch of people on earth. If not us then who?

We're saving money for future generations... people that don't yet exist.... While people that do exist, common property owners of the wealth and resources are denied the services that will keep them from homelessness, victimization, and criminal activity. We should be angry about our situation, but we should also be ashamed.

Please circulate this email to the rest of the Committee as well as to Corrections, Health and Social Services, Education, and Mental Health.

Thanks to you and the Judiciary Committee for listening and for your service on behalf of Alaska..... john

Thank you for the very very thoughtful analysis. I will ask our corrections people about this today when they are presenting.
Nice chatting with you at the reception as well.

Hello Senator French-
Bernard Gatewood, a Board member of Big Brothers Big Sisters of Alaska and Superintendent of the Fairbanks Youth Facility, suggested I check in with you and make sure you are aware of the partnership between Big Brothers Big Sisters and the Division of Juvenile Justice, as well as to let you know about the outcomes BBBS produces for youth, both in terms of risk avoidance and educational outcomes.
I'm attaching a National report that was just released demonstrating the statistically significant outcomes that our programs have produced for the children and youth we serve. You can also refer to the "My Turn" piece that was in today's Juneau Empire. I would love to talk with you about the role Big Brothers Big Sisters can play in improving both educational and justice outcomes in Alaska. Is there a time you might be available for a call? I will be coming to Juneau during the session, but don't have dates nailed down yet.
Thanks for convening the Summit, and thanks for your time and consideration.
Taber Rehbaum

One of the main problems with crime in Alaska is that to many politicians and state workers get away with crime which sets a bad example and embarrasses the state.

Subject: response to crime summit question

Dear Senators:

During the Alaska Court System's presentation at the Crime Summit this past Wednesday, Senator Paskvan asked about the percentage of all felony cases that are dismissed (as opposed to going to trial or being disposed of with a guilty plea) that are dismissed because of the running of the Criminal Rule 45 deadline of 120 days. I responded that the number was very low and that it is a rare occurrence for a felony to be dismissed because Rule 45 has run.

I have now verified that the actual percentage of **felony cases dismissed for a Rule 45 violation in FY11 was zero.** That is, **no felony case** was dismissed in any court because Rule 45 had run. The court and parties watch that timeframe very carefully, and are committed to preventing a Rule 45 dismissal.

For comparison, although you did not specifically ask this question, in FY11, **five misdemeanor** cases were dismissed statewide for a Rule 45 violation. That compares with 32,000 misdemeanor filings; that number is also extremely low, but we are working to bring that misdemeanor number to zero also.

Senator French also asked me about the time that felony cases take to be disposed (finished and closed). I intend to verify some of the court's statistics and will be able to respond to that soon.

I hope this is helpful and please let me know if you have any other questions. Thank you.

Senator French,

Thanks again for listening to my concerns and getting them into the record during the Corrections Department testimony.

Now I'm not sure if my email were distributed to anyone other than yourself and the copies I sent to Jeff Jesse.

I can go ahead and write another email to each member of the committee, and I understand that you may not want to associate my emails with your own opinion on the subject.... Just want to know what distribution my emails got, and is there a staff person that I might consult with when you are not available?

I am attaching two PFD documents from The University of Washington Fetal Alcohol and Drug Unit http://depts.washington.edu/fadu/resources/fas-and-the-law ... for your information and for the committee. You will see that FASD may account for a high number of minor offenders as well.

Have a good weekend (though I know you may be working just as hard)..... john

Senator French,

I want to personally thank you so much for the opportunity you gave me last week in testifying before you and the committee at the Crime Summit. Thank you as well for taking the time to personally meet with me and let me explain my cause, I know you were busy. You have an incredible staff, Cindy and Kristen were most accommodating and took wonderful care of me in making sure I had all the information and support in preparing for the summit.

I look forward to working with you and your office in the future in making this program more accessible to those in our pre-trial criminal justice system. Take Care and God Bless Sir ...

Subject: 2012 Alaska Crime Summit

Good Morning Everyone,

I wanted to take a minute to thank everyone for the opportunity and honor of being invited to the crime summit last week. The support and personal attention given to me and my Alaska Pretrial Services Program by all of the Senators on the Committee and their staff was overwhelming. I look forward to a long and continued relationship with all of your offices in the future. As small of an offer it may be, please do not hesitate to contact me should anyone need assistance or I can return the pleasure of helping you in any way.

Again, thank you for everything that all of you did for myself and Alaska Pretrial Services and getting my message out. Take care and God Bless .....

Subject: Thank you

Just a quick thank you to the committee for holding the Crime Summit last week. The value of this effort has ripple effects for quite some time that are often not seen during the actual summit time. Several discussions were held on the plane ride home that helped reinvigorate certain collaborations that had dwindled.

In my own world you know that my passions for certain interventions, like the expulsion/suspension school I briefly spoke of, run close to my heart not just because of the tremendous cost vs. benefit factor, but also because it fundamentally is the right thing to do with kids. Meaningful and smart intervention is vastly cheaper and more sensible than incarceration in most situations. (Recognizing of course, that certain individuals absolutely must be locked up for community safety.) I say that even as I have the tremendous privilege of leading the largest juvenile facility in the State.

Regards and best wishes this legislative session,

Dean Williams
Juvenile Justice Superintendent
McLaughlin Youth Center
(907) 261-4324

Let It Be Known,

We the undersigned residents of Tok, Alaska are very concerned with the escalation of crime in our community. We are also concerned that the persons committing these crimes are not being prosecuted and punished sufficiently. When criminals get their cases dismissed pursuant to rule 43A, or are allowed to plea down to a level involving a hand slap it sends the wrong message to other would be criminals. As a result we are seeing more and more malicious behavior at great cost and concern to our community.

We therefore petition and respectfully request that the District Attorney and the Alaska Court System take more aggressive action concerning the crimes in the Tok area.

Copies of this Petition will be sent to the Governor, Attorney General, State Representative, State Senator, and Chairs of the House and Senate Judiciary Committees.

Murder Unclassified Felony	550	429
Unclassified Felony	429	327
Class A Felony	277	235
Class B Felony	214	136
Class C Felony	165	111
Misdemeanor	291	175
All Felonies	**216**	**133**

Note: Cases listed as a misdemeanor were originally charged as a misdemeanor but subsequent felony charges were filed in the case. Cases where a charging document was never filed are not included in this report.

Report Selection Parameters:
The report lists felony cases where the date of judgement is in the period listed in the report header. The report excludes from the calculation, any time period the case was in warrant status and any period the case was closed prior to indictment. The cases are categorized based on the degree of offense of the most serious charge at the time of filing.

Subject: response to crime summit question

Dear Senators:

During the Alaska Court System's presentation at the Crime Summit this past Wednesday, Senator Paskvan asked about the percentage of all felony cases that are dismissed (as opposed to going to trial or being disposed of with a guilty plea) that are dismissed because of the running of the Criminal Rule 45 deadline of 120 days. I responded that the number was very low and that it is a rare occurrence for a felony to be dismissed because Rule 45 has run.

I have now verified that the actual percentage of **felony cases dismissed for a Rule 45 violation in FY11 was zero.** That is, **no felony case** was dismissed in any court because Rule 45 had run. The court and parties watch that timeframe very carefully, and are committed to preventing a Rule 45 dismissal.

For comparison, although you did not specifically ask this question, in FY11, **five misdemeanor** cases were dismissed statewide for a Rule 45 violation. That compares with 32,000 misdemeanor filings; that number is also extremely low, but we are working to bring that misdemeanor number to zero also.

Senator French also asked me about the time that felony cases take to be disposed (finished and closed). I intend to verify some of the court's statistics and will be able to respond to that soon.

I hope this is helpful and please let me know if you have any other questions. Thank you.

Bail Conditions Repository – Phase 2 (Fairbanks Pilot)

September 2010 - June 2012
Responsible Agency: Alaska Court System

Problem

No one can readily determine if a person is subject to bail conditions of release because there is no statewide, electronic repository of bail orders.

Purpose

Demonstrate the feasibility of making bail orders electronically accessible to law enforcement and the public.

Expected Outcomes/Performance Measures

1. Electronic bail orders are created in the courtroom without unreasonably delaying proceedings.
2. All active Fairbanks bail orders (date forward) are in the electronically accessible repository.
3. Expired/inactive bail orders are never erroneously shown in the repository as "active".
4. The bail repository is developed, managed and supported with existing court system resources.

Scope

Phase 1: Bail order "smart" form developed as a proof of concept; in use in Fairbanks since 8/10.
Phase 2: Refine form, create repository (for Fairbanks orders) with on line access
Phase 3+: Expand to all courts.

Accomplished To Date

- ✔ Issued RFP, awarded contract to 4Point (Dec 2010)
- ✔ Gathered requirements from judges, clerks, administrative staff and other agencies (Feb 2011)
- ✔ Set up court IT infrastructure (software, hardware, training) (Mar 2011)
- ✔ Wrote business requirements and system specifications (May 2011)
- ✔ Delivered new bail form and repository for testing (Nov 2011)

Expected within the next 3 months:

- _ Complete testing – outside of courtroom
- _ Train trial court staff
- _ Go live - in courtrooms
- _ Build/test interface with APSIN
- _ Build/test web page for public

Expected within the next 6 months:

- _ Complete live-court acceptance testing
- _ Implement APSIN interface to make repository available to law enforcement
- _ Make repository available to public on court system's web page

What is Needed from Other Agencies?

1. DPS: Implement interface between the bail repository and APSIN.

Related Projects (💣 = critical to the success of this project)

1. APSIN ID (MAJIC): APSIN ID for all defendants in court criminal case records (in progress) 💣
2. APSIN Redesign (DPS): Migrate from legacy/mainframe to modern platform (in progress) 💣
3. DV Bail Conditions Database (Muni of Anchorage): Manually flag bail conditions in APSIN

MAJIC Data Standards Relevant to the Project

1. APSIN ID Number - for law enforcement queries of the repository
2. Uniform Offense Citation Table (UOCT) - for offense codes/descriptions on the form
3. Arrest Tracking and Charge Tracking Numbers - for charge information on the form
4. U.S. Dept. of Justice National Information Exchange Model (NIEM) for systems interface

MEMORANDUM

TO: Representative Gatto, Chair
Senator French, Chair
House/Senate Judiciary Committee

DATE: February 22, 2012

FROM: Susan K. Bell, Commissioner
Department of Commerce, Community,
and Economic Development

RE: ACMP

Representative Gatto and Senator French,

We have provided responses to questions raised during the recent hearing on the ACMP initiative. Please contact me if you have any further questions.

1. How long will it take for previously reviewed plans to be adopted at the onset of the new program?
   - The initiative language includes AS 46.41.040(b) which states; "*...approved coastal management plans that were in effect as of June 30, 2011 are in effect and are incorporated into the Alaska Coastal Management Program.*" Upon creation of the program, all existing approved plans would be in effect. Of the existing 28 coastal districts, there were two districts that did not have approved plans: the Northwest Arctic Borough and the North Slope Borough. It appears from the language of the initiative that those two boroughs would not have an approved plan until a new plan was submitted to the board for review and approval.

2. Will previously reviewed plans, or newly adopted plans expire?
   - Under previous versions of the ACMP program, district plans were required to be reviewed and reapproved every 10 years. Additionally, the statutory amendments to the program passed in 2003 and 2005 required all coastal districts to revise and submit their coastal plans for review and approval. The deadline for this submittal was March 1, 2006. The wording in the initiative does not include a mandatory review period where the plan would expire if not reviewed and approved. The initiative language includes AS 46.41.070 which requires coastal districts to review their plans within one year of adoption of regulations to see if they meet the requirement of the regulations and to make any changes and submit revised plans, but it does not state that the plans would expire if not revised or submitted.

3. Will plans need to have a NEPA review?
   - Under the previous program, there was a "State Coastal Management Plan" that was reviewed and approved under NEPA. The individual coastal plans were a part of the State Plan, and thus were not required to undergo individual review. We expect that this same hierarchy would be put in place under a new program.

4. How would formation of Coastal Resource Districts in the Unincorporated Borough take place?
   - The initiative language states in AS 46.41.060(b) that "*Coastal Districts, Coastal District Boundaries ...that were in effect as of June 30, 2011 are in effect and incorporated into the Alaska Coastal Management Program.*" Those municipalities in the unorganized borough that were their own coastal districts (Bethel, Cordova, Craig, Hoonah, Nome, Pelican, Thorne Bay, Valdez, and Whittier) will continue to be coastal districts. In addition, the four Coastal Resource Service Areas (Aleutians West, Bering Straits, Bristol Bay, and Ceñaliulriit) will also be coastal districts. The initiative also provides a method for areas in the unorganized borough (Regional Education Attendance Areas – REAA) that contain part of the coastal area, and that are not already formed into a coastal district, to form a district. This process is outlined starting at AS 46.41.110. Areas that would be affected by this are limited to Prince William Sound REAA (excluding Cordova, Valdez, and Whittier), Chatham REAA (excluding Hoonah and Pelican), and Southeast Island REAA (excluding Craig and Thorne Bay).

Juneau, AK 99801-1182

The Honorable Carl Gatto
Chairman, House Judiciary
Alaska State Legislature
State Capitol, Room 118
Juneau, AK 99801-1182

Dear Senator French/Representative Gatto,

Thank you for the opportunity to present the cost statement for the ACMP initiative before the Joint Judiciary Committee on February 6, 2012. The following is in response to questions posed by the Committee during the presentation for distribution to the members.

Questions from the Joint Judiciary Committee meeting Feb. 6

1. *Senator Wielechowski asked why a fiscal note for HB106 showed that the former ACMP federal program had shown $4.0 million in federal funding, while the statement of cost indicated available federal funding was $2.0 million.*

A fiscal note prepared on 05/13/2011 by the Senate Finance Committee for HB106 shows $4.0 million in federal funding for ACMP. (See Attachment 1) However, this level of federal funding appears well in excess of any recently available federal funding for coastal management programs.

Federal funding for Coastal Management Program administrative grants are governed by 16 U.S.C. § 1455. Since federal fiscal year 2008 (FFY2008) federal funding has come in three funding streams referred to as Sections 306/306A (tiered federal match up to 1:1); Section 309 (no match required); and the Coastal Non Point (CNP) or Section 310 (requires 1:1 match and not funded in FFY 2010).

Federal funding streams in the three programs are subject to maximum awards based upon the availability of federal funds. Alaska has typically received the maximum allowed for these programs. Below is a table showing federal funding from FFY2008-FFY2010. In these years, no more than $2.6 million was available for federal funding of state coastal management programs. Copies of the US

printed on recycled paper

Department of Commerce's program allocation letter are provided for your review. (Attachments 2-4.)

Federal Fiscal Year 2008	Section 306 Section 306A	Section 309	CNP	TOTAL Funds
Total Funding	$55,542,000	$10,000,000	$1,428,000	$66,970,000
Maximum State Funding	$1,967,000	$536,000	$42,000	$2,545,000
Alaska Allocation	**$1,967,000**	**$536,000**	**$42,000**	**$2,545,000**

Federal Fiscal Year 2009	Section 306 Section 306A	Section 309	CNP	TOTAL Funds
Total Funding	$56,079,000	$10,000,000	$2,345,000	$68,424,000
Maximum State Funding	$1,995,000	$536,000	$75,000	$2,606,000
Alaska Allocation	**$1,995,000**	**$536,000**	**$75,000**	**$2,606,000**

Federal Fiscal Year 2010	Section 306 Section 306A	Section 309	CNP	TOTAL Funds
Total Funding	$57,085,000	$10,000,000	$0	$67,085,000
Maximum State Funding	$2,030,000	$536,000	$0	$2,566,000
Alaska Allocation	**$2,030,000**	**$536,000**	**$0**	**$2,566,000**

As indicated during testimony, the total cost estimate of $5.4 million annually could be shared by the federal government provided that the state becomes eligible for federal funding. Uncertainty remains about the timing and availability of the federal funding stream, and all of the funds that would be requested for the budget are subject to legislative appropriation.

2. *Senator French and Representative Holmes asked for more specifics about the costs included in the overall cost estimate. They were specifically interested in information about ongoing versus one-time costs.*

Please see the summary below that itemizes costs by category. Comments about ongoing versus one-time costs are included in the narrative section. The estimates currently allow flexibility for the state to address one-time costs, however should the initiative pass, program implementation costs are likely to be different than those presented. All proposed costs will be subject to appropriation by the legislature.

CATEGORY	Description	
Personal Services	This expenditure would be an ongoing cost to support salaries and benefits for 34 full time positions ranging from a Division Director to an Office Assistant. The majority of the positions are Natural Resource Specialists supporting the envisioned Alaska Coastal Management Program In the first two years, it is likely that personal services costs will be lower than this estimate due to the program beginning from scratch. However, there will be many other activities associated with the initial gear up of the program though, so there is significant uncertainty about what percentage of these resources will be needed in the first two years.	$3,260,000
Travel	The projected travel expenditure would support employee and board related in-state and out of state travel to coastal districts and includes hotel, per diem, airfare and reimbursement for Alaska Coastal Management Program district assistance, staff training, mediation, public education, conferences and other travel supporting the program. This estimate anticipates increased travel costs in the first two years following the establishment of the board in order to assist coastal districts with their plans and advocate for the federal approval of the plan in Washington DC. Some portion of these travel resources would likely be redeployed to other program activities after the program is approved.	$267,900
Services	This expenditure is an ongoing cost to support contracts in the form of Reimbursable Services Agreements (RSA) to agencies participating in the Alaska Coastal Management Program. These contracts would support the implementation of the Alaska Coastal Management Program by the participating state agencies, coastal management areas and other contractors. This estimate also supports purchased services from other state agencies including centralized telecommunication, mail and human resource services, legal services, professional services to support monitoring & compliance activities and development and implementation activities for the Alaska Coastal Management Program. In the initial years, additional contractual services will be needed to draft and review implementing program regulations, and other start up activities.	$1,815,300
Commodities	This is an ongoing expenditure estimate that supports purchases related to office supplies, office furnishings and equipment, software as well as minor repairs to office equipment. In the first two years, actual costs in this category are likely to be significantly	$56,800

	higher as the office acquires all of the office furnishings, office equipment and other commodities necessary to build an office from scratch.	

3. *Senator French asked for more specificity about the costs included in the estimate of costs to support implementation of the 13-member Coastal Policy Board governance structure.*

The estimate of additional costs was based largely on cost estimates provided by the Department of Natural Resources (DNR) in their fiscal note for HB106 dated 04/15/2011. (Attachment 5) This fiscal note was chosen as a basis due to its somewhat similar nature to the initiative envisioned program. Comments on whether these are expected to be ongoing or one-time costs are also included.

As indicated during the testimony, these estimates assume a program that is substantially similar to the previous program with a 13-member board meeting in person 4 times annually. Significant uncertainty remains about the program that the board would ultimately implement and the associated costs. It should be noted that not all of the increased costs are directly attributable to the board members.

The costs in the table below are presented as subsets of the estimates presented in the prior table.

CATEGORY	Description	
Personal Services	One additional position was added to the previously configured program to cover the additional work associated with the administration of the Alaska Coastal Policy Board and coordinating district planning functions and information sharing. This is an ongoing cost and would be directly attributable to the Coastal Policy Board.	$109,800
Travel	This estimate anticipates increased travel costs in the first two years following the establishment of the board in order to assist coastal districts with their plans and advocate for the federal approval of the plan in Washington DC. These travel resources would likely be redeployed to other program related travel or review activities after the program is approved. These costs are not directly attributable to the addition of a board. This expenditure estimate also includes $60,000 in ongoing travel costs associated with four annual in-person meetings of the 13-member Alaska Coastal Policy Board and two staff members at approximately $1,000 per trip. This is an ongoing cost directly attributable to addition of a Coastal Policy Board.	$164,000

Services	This expenditure supports an additional $300,000 in ongoing services agreements with other state agencies services that DNR indicated would be needed to successfully implement the ACMP program. This would be an ongoing cost. These costs are not directly attributable to the addition of a board. The estimates include $60.000 estimate for regulations review by the Department of Law that would be of limited duration. Length of need is uncertain and dependent upon the complexity of the regulations and the time it takes to promulgate and implement them, this could be a cost for 2-4 years, however these resources would likely be redeployed to reviews and other program support after that time. Other ongoing services costs included $20,000 in postage, teleconference services, and other miscellaneous board and coastal district support such as conducting elections in coastal districts. This would be an ongoing cost directly attributable to the addition of the board.	$380,000
Commodities	This estimate includes some $5,600 in one-time costs such as the purchase of a recorder and sound equipment for the board. Ongoing costs include $10,000 in supplies needed to support the presentation of materials at the board meetings. These costs are directly attributable to the addition of a board.	$15,600

Reason For Change:

CC: This fiscal note combines the additional funding requested with FY12 program funding removed by the Senate. Additionally, this fiscal note is updated to reflect changes made in the House Finance committee substitute.

This revised fiscal note includes $1.36 million capital authorization (federal) for operating grants to communities so they have the funding necessary for local participation.

Analysis:

NOTE: The base budget ($4,691.7 and 33 positions) was removed from the Senate version of the FY12 operating budget, making it subject to conference committee. The annual capital project request for the federal grant funds that are shared with DCCED for grants to communities and for DCCED's administration of the grants was removed from the Senate version of the FY12 Capital Budget making it subject to conference committee.

The Alaska Coastal Management Program (ACMP) will automatically terminate on July 1, 2011 (SLA2005, CH31, Sec 22). CSHB106(FIN) would extend the termination date to July 1, 2017.

Submitted By: Senate Finance for SCS CSHB 106(FIN)

Prepared By: Conference Committee

Date: 05/04/2011

This fiscal note reflects the increased fiscal impacts due to the additional Division of Coastal and Ocean Management (DCOM) duties, including the administration and implementation of the Alaska Coastal Policy Board (CPB). Those increased fiscal impacts are detailed below:

Personal Services
One additional position, a Project Coordinator (range 20), will be required to cover the additional work associated with the CPB and the coordination of district planning functions and information sharing.

Travel
The CPB will meet four times in-person in the first two years following establishment of the board, and will meet in-person twice annually after that. The CPB will need to meet more frequently in-person for the first two years in order to establish board protocols, review coastal district plans, and address issues of interest to ACMP participants. CPB travel includes nine members and two DCOM support staff.

In addition, recognizing coastal districts will be amending their district plans based on CSHB106(FIN), two DCOM staff will travel 5-6 different districts per year for four years to assist the districts with their plan amendments.

Five DCOM staff will travel to regional locations for two years to provide ACMP training and education on program changes and the revised ACMP implementing regulations.

The DCOM Director will travel to Washington, DC three times annually for two years to work with NOAA on program change approvals and NEPA requirements.

Contractual
The CPB will meet two times annually by teleconference, with each 2-day teleconference lasting 8 hours each day (including 20 phone lines). CSHB106(FIN) will require a substantial revision to all three chapters of the implementing ACMP regulations (11 AAC 110, 112, and 114). Contractual services will be required to develop and complete those revisions, including the Department of Law final review. The coordination and distribution of district planning and consistency review data and information requires postage and other fees. DCOM will also reimburse state agencies for their participation and implementation of the ACMP program.

Supplies
Supplies will be required for supporting the CPB (dictation/recorder equipment, packet materials and binders) and support staff (office

MEMORANDUM February 3, 2012

SUBJECT: Sectional Summary of Coastal Management Program Initiative 11 ACMP (Work Order No. 27-LS1307)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee

FROM: Alpheus Bullard
Legislative Counsel

You have requested a sectional summary of the above-described initiative.

As a preliminary matter, note that a sectional summary of an initiative should not be considered an authoritative interpretation of the initiative and the initiative itself is the best statement of its contents.

Sec. 46.41.010. Coastal Policy Board. Establishes an Alaska Coastal Policy Board ("board") in the Department of Commerce, Community, and Economic Development ("department"). The board consists of nine public members, and their alternates, appointed by the governor from the coastal regions of the state, as well as the commissioners of the Department of Environmental Conservation, the Department of Fish and Game, the Department of Natural Resources, and the Department of Commerce, Community and Economic Development. It specifies membership terms, quorum and meeting requirements, board structure and governance details, and that the department will provide administrative support for the board.

Sec. 46.41.020. Powers and duties of the board. Establishes the duties and powers of the board.

Sec. 46.41.030. Division of Coastal Management. Establishes a division of ocean and coastal management within the department. Provides the duties of the division.

Sec. 46.41.040. Development of Alaska Coastal Management Program. Provides what regulations must be adopted under the Alaska Coastal Management Program ("program"). Directs that regulations relating to (1) program standards, (2) criteria for the preparation and approval of district coastal management plans, and (3) consistency review procedures for coastal activities and projects, be adopted. Further provides that the coastal management districts ("districts"), coastal district boundaries, and approved

coastal management plans ("plans") that were in effect on June 30, 2011, are restored and incorporated into the program.

Sec. 46.41.050. Objectives. Requires that the program be consistent with certain objectives.

Sec. 46.41.060. Development of district coastal management plans. Requires districts to develop and adopt plans. Provides plan requirements. Provides criteria for board approval of plans.

Sec. 46.41.070. Submission of district plans by coastal districts. Requires restored districts to review their plans within one year after the adoption of program regulations by the board. Provides that if plan changes are necessary, a revised plan must be submitted to the department for review by the board.

Sec. 46.41.080. Implementation of district coastal management plans. Requires districts to implement plans. Provides how a plan must be implemented. Provides that a plan for a district that does not exercise zoning or other controls "on the use of resources" within its coastal area will be implemented by "appropriate state agencies."

Sec. 46.41.090. Compliance and enforcement. Requires municipalities and state resource agencies to regulate land and water controls in conformity with district plans. Provides that the superior court has jurisdiction to enforce orders of the board and the department.

Sec. 46.41.100. Coastal management plans in the unorganized borough. States that coastal resource service areas ("service areas") established in the unorganized borough may exercise all authority and perform those duties required by the program.

Sec. 46.41.110. Coastal resource service areas. Provides for how service area boundaries will be determined.

Sec. 46.41.120. Organization of a coastal resource service area. Permits a service area (created under sec. 46.41.110) to be established by a vote at an election after either the submission to the board of (1) a petition from a certain percentage of the voters within the proposed service area or (2) a resolution from a certain percentage of the city and village councils in the proposed service area.

Sec. 46.41.130. Coastal resource service area boards. Requires each service area to have an elected service area board. Provides for board duties and powers, board composition and membership, election of board members, terms of office, vacancies, and the recall of board members.

Sec. 46.41.140. Elections in coastal resource service areas. Directs the lieutenant governor to administer the elections for service area board members under sec. 46.41.130 and the organization of service areas under sec. 46.41.120.

Sec. 46.41.150. Preparation of district coastal management program (sic.) by the Department of Commerce, Community and Economic Development. Permits the board to submit a district plan to the legislature for consideration if (1) the residents of a service area reject the organization of that service area at an election under sec. 46.41.120 and (2) the board finds that major economic activity has occurred, or will occur, in the proposed service area. Such plans are prepared by the department upon request of the board. Further permits the department, in consultation with the service area, to prepare a plan for a service area that has been organized under sec. 46.41.120, but that has not been able to make substantial progress in the preparation of an approvable plan.

Sec. 46.41.160. Approval of plans in coastal resource service areas. Establishes a process for a plan to be reviewed by cities and villages within a service area, prior to (1) adoption by the service area board and (2) approval by the (Coastal Policy) board. Establishes parameters for plan review by cities and villages.

Sec. 46.41.170. Cooperative administration. Provides that a city that is within the coastal area, but that is not part of a coastal service area, will be included within an adjacent service area, unless the city's governing body opts out. Provides that a municipality and a service area are not restricted from engaging in cooperative or joint administration of functions.

Sec. 46.41.180. Construction with other laws. States that the initiative's provisions (secs. 46.41.010 - 46.41.900) may not be construed to diminish various state and municipal powers and duties.

Sec. 46.41.900. Definitions. Provides definitions for the initiative's provisions (secs. 46.41.010 - 46.41.900).

MEMORANDUM February 14, 2012

SUBJECT: Article XI, section 4's "substantially the same" and the initiative establishing an Alaska Coastal Management Program (Work Order No. 27-LS1345)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee

FROM: Doug Gardner
Director
and
Alpheus Bullard
Legislative Counsel

You asked whether a bill modeled on the provisions of the former Alaska Coastal Management Program, as those provisions would have been amended by the substantive portions of CSSB 45(CRA) am (fld H) ("SB 45"),[1] would be interpreted as "substantially the same" as the initiative entitled "An Act establishing the Alaska Coastal Management Program". You also asked that this analysis account for the initiative's "Coastal Policy Board," the prior program's AS 46.40.040(b), which prevented coastal resource districts from adopting certain enforceable policies ("DEC carve-out"), and the use and definition of the term "local knowledge" in the initiative.

Discussion

While both SB 45 and the initiative have the same general purpose -- establishing a state coastal management program -- the means by which that purpose is effectuated would be different. Given the relative scarcity of prior court cases interpreting the state constitution's art. XI, sec. 4 "substantially the same" language, it's not entirely clear to what degree this difference might result in SB 45 and the initiative being interpreted as not substantially the same.[2]

---

[1] For the purposes of this memorandum, "SB 45" means the prior program as it would have been modified by that bill.

[2] When there is little case law, often it is helpful to turn to the minutes of Alaska's constitutional convention. While the article on direct legislation was the subject of extensive debate and discussion at the convention, in this case the minutes do not, as our court has observed, contain any "helpful discussion of what was the intended scope of the words 'substantially the same measure.'" *Warren v. Boucher*, 543 P.2d 731, 735 (Alaska 1975).

Under art. XI, sec. 4 of the Constitution of the State of Alaska[3] a proposed initiative is void if a law is enacted that is "substantially the same measure" as the proposed initiative.[4] Under AS 15.45.210, the lieutenant governor, with the concurrence of the attorney general, is responsible for determining whether an Act of the legislature is substantially the same as a proposed initiative.[5]

The question of whether an initiative and a legislatively enacted bill are "substantially the same" has been taken up only twice by our courts. In *Warren v. Boucher*, 543 P.2d 731 (Alaska 1975), the court was tasked with examining an initiative and a legislative bill relating to campaign finance reform. In *Warren,* the legislation "was broad and complicated, touching upon a great range of topics, including campaign spending limits, reporting of contributions and expenses, restrictions on anonymous contributions, penalties for non-compliance, the creation of an elections oversight committee to monitor elections, and several other topics." *State of Alaska v. Trust the People Initiative Committee*, 113 P.3d 613, 621 (Alaska 2005). In the second case, *Trust the People*, the court examined legislation that was "simple and straightforward, essentially dealing with only one substantive topic: filling of a U.S. Senate vacancy." *Id.* at 621. In both cases,

---

[3] Article XI, sec. 4, Constitution of the State of Alaska states:

> **INITIATIVE ELECTION.** An initiative petition may be filed at any time. The lieutenant governor shall prepare a ballot title and proposition summarizing the proposed law, and shall place them on the ballot for the first statewide election held more than one hundred twenty days after adjournment of the legislative session following the filing. If, before the election, substantially the same measure has been enacted, the petition is void.

[4] This constitutional provision is unusual. Of the 21 state constitutions that permit citizens to propose laws through a petition process, we are aware of only one other state with a constitutional provision that permits its legislature to void an initiative through the passage of a measure that is "substantially the same." Article III, section 52(d) of the Wyoming constitution provides, in part, "If before the election, substantially the same measure has been enacted, the [initiative] petition is void." This clause in the Wyoming constitution has not yet been interpreted by a court.

[5] AS 15.45.210 states:

> **Determination of void petition.** If the lieutenant governor, with the formal concurrence of the attorney general, determines that an act of the legislature that is substantially the same as the proposed law was enacted after the petition had been filed, and before the date of the election, the petition is void and the lieutenant governor shall so notify the committee.

the court employed the same test in deciding whether a bill and an initiative were substantially the same.

A. "Substantially the same" test in *Warren v. Boucher*

The test of how similar a bill and an initiative must be for the bill to invalidate the initiative was first articulated in *Warren v. Boucher*:

> It is clear that the legislative act need not conform to the initiative in all respects, and that the framers intended that the legislature should have some discretion in deciding how far the legislative act should differ from the provisions of the initiative. The question, of course, is how great is the permitted variance before the legislative act becomes no longer substantially the same.
>
> Upon reflection we have concluded that the legislature's discretion in this matter is reasonably broad. If in the main the legislative act achieves the same general purpose as the initiative, if the legislative act accomplishes that purpose by means or systems which are fairly comparable, then substantial similarity exists. It is not necessary that the two measures correspond in minor particulars, or even as to all major features, if the subject matter is necessarily complex or requires comprehensive treatment. The broader the reach of the subject matter, the more latitude must be allowed the legislature to vary from the particular features of the initiative.

543 P.2d at 736.

B. "Substantially the same" test revisited in *Trust the People*

In *Trust the People*, the court cited the *Warren v. Boucher* test:

> A court must first determine the scope of the subject matter, and afford the legislature greater or lesser latitude depending on whether the subject matter is broad or narrow; next, it must consider whether the general purpose of the legislation is the same as the general purpose of the initiative; and finally it must consider whether the means by which that purpose is effectuated are the same in both the legislation and the initiative.

Trust the People, 113 P.3d at 621.

1. Scope of subject matter

Turning to the first part of the test, as articulated by the court in *Trust the People*, it should be noted that the subject matter of this initiative, the establishment of an Alaska Coastal Management Program, is relatively complex and its reach is broad. Correspondingly, the legislature's discretion to vary from particular features of the initiative is broader in this instance than it might be in the context of a different initiative

(i.e. the filling of a U.S. Senate vacancy in *Trust the People*). As the court described its treatment of the legislatively enacted campaign finance bill in the *Warren v. Boucher* case:

> The legislature had made numerous changes to the initiative that implicated the scope of the law, its enforcement mechanisms, and other structural issues concerning the regulation of campaign finance reform. But because these changes were seen as promoting the shared goals of both the bill and the initiative, we were willing to accept the legislature's bill as "substantially the same" as its initiative counterpart, even though there were in fact differences in the texts.

Trust the People at 621 (footnote omitted).

SB 45 would most likely be interpreted to satisfy this element of the test. While direct comparison between the campaign finance legislation at issue in *Warren v. Boucher* and the legislation here is difficult, arguably a program that seeks to coordinate and unify permitting activities for all projects and activities in the state's coastal area between federal, state, and local governments, their respective agencies, and local inhabitants is more complex than legislation governing election contributions and expenditures in state election campaigns. So, in this instance, the court is likely to permit the legislature at least as much latitude to vary from the specific terms of the initiative as it allowed in *Warren v. Boucher*.[6]

2. Purpose of legislation and initiative

The next part of the test consists of examining whether the purposes of the legislation and the initiative are the same. The *Warren v. Boucher* test asks whether "the legislative act achieves the same general purpose as the initiative." *Id.* The establishment of a state coastal management program under both SB 45 and the initiative would, if approved by the National Oceanic and Atmospheric Administration (NOAA) Office of Ocean and Coastal Resource Management under the Coastal Management Act of 1972 (16 U.S.C. §§ 1451 - 1465), enable the state to formally review and influence federal activities affecting Alaska, allow the state to receive Coastal Zone Management Act grant funds, reestablish a coordinated permitting process for projects requiring state and federal authorizations, and result in greater local participation in state and federal permitting processes. Additionally, the Secretary of Commerce must find, for a state coastal management program to be approved, that the program includes certain program elements that are consistent with Congressional declaration of policy (purpose) found at 16 U.S.C. § 1452.[7] Both SB 45 and the initiative are likely to be found to meet these

---

[6] The dissent in *Warren v. Boucher* pointed out: "of the 19 separate sections of the initiative, only six are the same as the statute," and "seven sections have been eliminated entirely by the statute." *Id.* at 741 (Erwin, J., dissenting). *Trust the People* at 621 n.30.

[7] See 16 U.S.C. § 1455(d)(2) for a list of the program elements.

federal requirements. Similarly, the program's scope and organization are much the same in SB 45 and the initiative, the prior program's sec. 45.40.020 (objectives) and the initiative's sec. 45.41.050 (objectives) are in large part the same, and the initiative even goes so far as to provide that coastal districts, district boundaries, and coastal district management plans approved under the prior program are incorporated into the initiative's program (see initiative sec. 46.41.040(b)). Consequently, the general purpose of SB 45 and the initiative would likely be interpreted as the same satisfying the second element of the *Trust the People* test.[8]

3. "Means" and the issue of local control

The third prong of the test involves considering whether the means by which this general purpose is effectuated is the same in the bill and the initiative. It is here that SB 45 and the initiative could be found to differ, because the initiative provides for greater local participation and control than the state's former coastal management program as it would have been modified by SB 45.

The former program, at the time of its repeal, was housed within the Department of Natural Resources, and that department was responsible for coordinating consistency reviews, reviewing and approving coastal management plans, offering technical assistance to coastal resource districts, and offering statutory and regulatory changes to improve coastal management.[9] Instead of direct state agency control of the program, the

---

[8] In *Warren v. Boucher*, the court examined the difference between two sets of campaign finance rules and the respective difference in their probable operation. In the present case, the most salient differences between the initiative and SB 45 cannot be characterized as those differences that might exist between two disparate sets of rules, but in how decision making power is allocated between the executive branch of state government and the coastal regions of the state. While this balance of power is an important component of the initiative, a court is not likely to find that the initiative's allocation of greater power to the local governments and the residents of the coastal regions of the state and their representatives on the initiative's Coastal Policy Board is a "purpose" of the initiative, but a means of effectuating "a balanced approach to development and protection of coastal resources." (This language is from the initiative sponsor's "Short-form Description of Initiative," which provides "This initiative would establish a coastal management program for Alaska. Alaska is the only state without an approved coastal management program. The initiative seeks a balanced approach to development and protection of coastal resources." Available on February 11, 2012, at http://www.elections.alaska.gov/petitions/11ACMP/11ACMP_Proposed_Language.pdf.)

[9] The consistency review process, in which private and public land and water uses and natural resources in the coastal zone are managed in a manner consistent with the policies of a state's coastal management program, is the heart of the 1972 Coastal Management Act (16 U.S.C. §§ 1450 - 1464).

initiative vests control of the program in an Alaska Coastal Policy Board (Board),[10] the majority of whose members are residents of the coastal regions of the state.[11] Similarly, the former program prevented coastal resource districts or areas from adopting enforceable policies relating to air, land, and water quality issues that are under the Department of Environmental Conservation's authority ("DEC carve-out"),[12] whereas the initiative does not.

An argument could be made that the initiative's (1) establishment of a Board with regulatory authority over the program, made up of residents from the coastal regions of the state, (2) elimination of the "DEC carve-out," and (3) greater emphasis on program elements relating to local control and participation,[13] are not "fairly comparable means."[14]

---

[10] While CSSB 45(CRA) am (fld H) established a board, the board was advisory in nature. See secs. 3 and 13 of 27-GS1965/B.A.A.

[11] The initiative's Board would be located in the Department of Commerce, Community, and Economic Development.

[12] See former AS 46.40.040(b), AS 46.40.040(c), and AS 46.40.096(i). For a discussion of the "DEC carve-out," see the Alaska Coastal Management Program Audit Part I, pages 25 - 27, available February 11, 2012 at: http://www.legaudit.state.ak.us/pages/digests/2011/30060adig.htm.

[13] Examples of a greater emphasis on local participation and local control, and the values of local participation and control, are found in the initiative's sec. 46.41.050(1) and (9) - (11), which amend the prior program's objectives to add new language and new paragraphs relating to local participation and control, and the definition of "local knowledge" as an element of how a district's coastal management plan will be evaluated. It's difficult to state what substantive effects these facets of the initiative might be interpreted to have. The initiative's additional objectives can be summarized as (1) "coordination of planning and decision-making . . . among levels of government," (2) "participation of the public, local governments, and agencies of the state and federal governments," and (3) requiring state resource agencies to carry out their duties, powers and responsibilities in the manner provided by the initiative. What it might mean in practice for the program to "be consistent with [these] objectives" (see initiative's sec. 46.41.050) is impossible to predict. Similarly, the effects of replacing one definition of "local knowledge" with another in related provisions addressing the approval of district coastal management plans, while a seemingly small detail, is not clear.

While the use of different language or the addition of these objectives might not affect the subject matter, scope, or purpose of the program, because policy considerations relating to "coordination and participation" between "levels of government" (namely the balance of power between state agencies and local governments) animated the debate that surrounded the former program during the First Session of the 27th Legislature and the two subsequent special sessions, it may be important to note that in the context of a "substantially the same" evaluation of an initiative and a competing legislatively enacted

The central questions that you want answered are whether the differences of: (1) the Alaska Coastal Policy Board; (2) the elimination of the "DEC carve-out"; and (3) the greater emphasis on local control and participation, i.e. "local knowledge," in the initiative collectively, or when viewed individually, are substantially the same.

Alaska Coastal Policy Board

The greatest single factor which a court may consider as not substantially the same comparing the initiative and SB 45, is the role and responsibilities of the initiative's Alaska Coastal Policy Board. Note that in the *Warren v. Boucher* case, the court indicated, in the context of legislation governing election contributions and expenditures, that moving a compliance mechanism from the lieutenant governor to an "election campaign commission" did not vitiate the "aims of the initiative." *Boucher* at 739. If the legislature did the same here, and restored the program to one supervised by the executive branch, would a court be so likely to find that such a change renders the program not "substantially the same"? It may be, in contrast to *Warren v. Boucher*---where the location of the enforcement mechanism was seen as complimentary to the purposes of the initiative---that here a court could interpret the legislature's action as "vitiating" the local control and local participation aspects contained in the initiative. In eliminating the Board, with its power to adopt regulations and otherwise make law by interpreting them, SB 45 could be interpreted by a court as not substantially the same as the initiative, despite the broader discretion afforded the legislature based on the complexity of the coastal zone program.

"DEC Carve- Out"

The "DEC carve-out," on its own, is not likely to be interpreted as creating enough of a variance between the initiative and SB 45, given the latitude accorded the legislature in a complex matter that requires comprehensive treatment, for a court to find SB 45 not

---

bill by a court, these policy considerations, taken in isolation, are unlikely to exercise the same gravity. In *Trust the People*, the court noted that

> [w]hile the state raises serious policy arguments in favor of [the legislatively enacted bill], they relate to the wisdom of the legislation -- and thus are more properly directed to the voters considering the proposed initiative -- and not to the question whether the proposed initiative and the [legislatively enacted bill] are substantially the same.

Id. at 624.

[14] In *Warren v. Boucher*, the court found that the means for accomplishing the purpose were "fairly comparable," even thought they did not "correspond . . . as to all major features." 543 P.2d at 736.

substantially the same. While incorporating the "DEC carve out" would limit the scope of regulations the Board could adopt and the Board's jurisdiction, it could be that a court would view this variance as one that would promote the shared goal of both SB 45 and the initiative---providing a component of a coastal management program that has already been determined compliant with federal law. Of course, if a court were to find, as discussed above, that the Board was central to the initiative and that the "DEC carve-out" would diminish local power and control allotted under the program (in restricting what enforceable policies a coastal district would adopt), the court might find that the "DEC carve-out" in SB 45 renders it as not substantially the same. However, given the existing range of limitations placed on what sort of enforceable policies could be adopted under the initiative's sec. 46.41.060(b)(2), this is a less likely outcome.

Local Knowledge

Definitions of "local knowledge," albeit different, exist in both SB 45 and the initiative. Given the broad discretion a court would likely allow the legislature on this matter, it is unlikely that standing alone, these differing definitions would exceed the legislature's authority to vary from the particular features of the initiative. While the political struggles of 2011 underscore the importance of these issues to respective groups, a court is likely to consider whether the definitions in SB 45 vitiate the initiative, or are within permissible variances.[15] Given the complexity of the program and that the definitions -- albeit with differences -- exist in some form in both SB 45 and the initiative, it is likely that the different definitions would not prevent a finding of substantial similarity.

C. Conclusion

It is hard to predict how the lieutenant governor, or a court, would interpret the significance of this different balance of power between state agencies and local governments in determining whether the bill would be "substantially the same" as the initiative. While it may be useful for discussion to consider each component of SB 45 and the initiative separately and apply the substantially similar test from *Warren v. Boucher*, consideration of the entire program utilizing this test is difficult. Perhaps the best conclusion to a macro application of the test in *Warren v. Boucher* to SB 45 and the initiative is to observe that if each of the features discussed above individually raised "substantially the same concerns," then it would be likely that when all key differences were combined, that a court would find it a very close question as to whether SB 45 is substantially the same as the initiative. However, if you want to draft legislation that will increase the odds of being considered "substantially the same" and thereby voiding the initiative, a bill that provides greater local control and participation than the former program did (and SB 45 would have) could only help the effort.

---

[15] Note that the definition related only to what enforceable policies of a coastal district management plan will be interpreted to "address a coastal use or resource of concern to the residents" of the district before the plan may be approved by the Board.

Additional notes

1. In *Trust the People* the court reiterated that "in determining the meaning that voters might attach to an initiative, we will look to published arguments made in connection with [an] initiative." *Id.* citing *Falcon v. Alaska Public Offices Commission*, 570 P.2d 469, 472 n.6 (Alaska 1977).[16] Consequently, if the election pamphlet is published before the legislature enacts legislation that the lieutenant governor determines is substantially the same as the initiative, and the initiative sponsors emphasize that the purpose of the initiative has everything to do with local control, it could affect the above analysis.

2. If the initiative is approved by the voters, under art. XI, sec. 6 of the state constitution the legislature can subsequently amend the initiative to a greater degree than is permissible before the initiative is placed on the ballot. The Alaska Supreme Court has noted that

> [T]he power to avoid an initiative by enacting legislation should not be equated with the power to amend an initiative enacted by the voters . . . This is because the Alaska Constitution contains no explicit limitation on the legislature's power to amend an initiative enacted by the voters, but it does contain such a limitation on the legislature's power to avoid a proposed initiative: Legislation designed to avoid a vote on a proposed initiative must be "substantially the same" as the initiative.

Trust the People, 113 P.3d at 623 (internal citations omitted).

3. In testimony on Monday, February 6, 2012, there was some discussion of how long it would take the coastal management program established by the initiative to be approved by the federal government. It is our recollection that the Alaska Sea Party chairman Bruce Botelho stated that it would take several years. This raises two points of possible interest.

- It's possible that under art. XI, sec. 6, the legislature could repeal the program before it is up and running.
- While we don't know the answer, it would be interesting to know whether there would be an expedited process for federal approval of an Alaska Coastal Management

---

[16] *Falcon*, 570 P.2d at 472 n.6 provided, in pertinent part;

> "In determining the meaning of legislation enacted through initiative, or referendum, the courts will look to the published arguments made in connection with the vote upon such measures." *2 Sutherland, Statutory Construction* § 5016 at 507 (3d ed. 1943). *See State v. Lewis*, 559 P.2d 630, 637-38 (Alaska 1977), where we relied on the published Report to the People of Alaska from the Alaskan Constitutional Convention to ascertain the intent of the drafters and those who voted for ratification of the Constitution.

Program if the legislature were to enact a program that was identical to the prior program at the time of its repeal.

4. If the initiative is approved, the legislature is not required to appropriate funds for the program.

We hope the above information is helpful to your deliberations. If you have questions, please do not hesitate to contact us.

Lieutenant Governor Mead Treadwell
STATE OF ALASKA

January 17, 2012

The Honorable Gary Stevens
Senate President
State Capitol, Room 111
Juneau, AK 99801

The Honorable Mike Chenault
Speaker of the House
State Capitol, Room 208
Juneau, AK 99801

Gary + Mike —

Dear President Stevens and Speaker Chenault:

In light of the Alaska Coastal Management Program Initiative (11ACMP) recently filed with the Division of Elections, I am writing the presiding officers of each body of the legislature regarding the legislative hearing requirement of AS 24.05.186.

On January 17, 2012, the sponsors of this initiative timely filed their petition with the Division of Elections (Division) under AS 15.45.140. The Division has determined that the petition, on its face, contains a sufficient number of presumptively valid signatures – over 25,875— to be accepted for filing. The Division is now in the process of verifying those signatures as required under AS 15.45.150 -- 15.45.160. The Division has 60 days to complete the signature verification process and to notify the initiative committee of the results of that process.

✓ Under AS 24.05.186, a standing committee of the legislature, selected jointly by the presiding officers of the House and Senate, must hold at least one hearing on an initiative that my office has determined was properly filed. The legislative hearing must occur within 30 days after the convening of the legislative session at which the proposition would appear on the ballot. In this case, if the review finds that the statutory signature requirement is met, the proposition may appear on the August 2012 primary election ballot.

Based on the 60-day signature verification requirement of AS 15.45.150 and the 30-day legislative hearing requirement of AS 24.05.186(b), the required legislative hearing will need presumably to occur before the time for signature verification has elapsed.

Please let me know of any questions or issues regarding this process.

Sincerely,

Mead Treadwell
Lieutenant Governor

Alaska Coastal Management Program Initiative
Comparison of Initiative Provisions with Past Programs and Legislation

Topic	Initiative	June 2011 Program	Pre-2003 Program	CS SB 45 (CRA) am (failed House 6/11)
Location	DCCED	DNR	Governor's Office	DNR
Board	13-member board of 9 public members and 4 commissioners (DNR, DFG, DEC and DCCED).	No board - DNR commissioner responsible for all ACMP decisions with no checks and balances.	15-member board of 9 public members (local elected officials), the director of the Office of Management and Budget, and the commissioners of DCED, DEC, DFG, DNR, and DOTPF.	9-member board with 5 public members (one representing industry or a Native corporation), a deputy commissioner of DNR, and the commissioners of DEC, DFG, and DOTPF.
	Quorum: 5 public members and 2 agency members.	n/a	Quorum: 4 public members & 3 agency members.	Quorum: 3 public members and 3 agency members.
	Decisions made by a majority of members present and voting.	n/a	Decisions made by majority vote of those present.	Decisions require 2/3 vote of entire board.
	Governor appoints 9 public members from list of nominations from coastal districts.	n/a	Governor appoints 9 public members from a list of nominees from municipalities.	Governor appoints 5 public members; 4 members nominated by districts (may request subsequent lists of nominees).
	Board may recommend the Governor remove a public member for cause.	n/a	Public members removed only if they cease to meet qualifications.	Governor may remove public members for cause.
	Authority to approve regulations, direct DCCED to seek federal approval of program, approve district programs, establish interagency coordination, and evaluate effectiveness of district programs.	n/a	Authority for grants, adopting regulations (guidelines, standards and consistency reviews), interagency coordination, reviewing district plans, and developing procedures for coordination and consultation with federal agencies.	Advisory board makes recommendations, provides a forum for discussion, comments on regulations and directs districts to resubmit its coastal plan if policies duplicate new laws. Board annually solicits changes to state and federal laws.
Boundaries	Incorporates coastal zone boundaries approved by	Coastal zone boundaries were approved by former Coastal	Coastal Policy Council responsible for approving	Coastal zone boundaries were approved by former Coastal

Topic	Initiative	June 2011 Program	Pre-2003 Program	CS SB 45 (CRA) am (failed House 6/11)
	former Coastal Policy Council.	Policy Council.	coastal zone boundaries.	Policy Council.
Regional Planning	Board to initiate a program of strategic regional coastal and ocean planning.	DNR to initiate an interagency program of comprehensive coastal resource planning for each geographic region of state.	Coastal Policy Board to initiate an interagency program of comprehensive coastal resource planning for each geographic region of state.	DNR to initiate an interagency program of comprehensive coastal resource planning for each geographic region of state.
Enforceable policies	Policies cannot unreasonably or arbitrarily restrict a use of state concern.			
	Policies cannot duplicate, restate, or incorporate by reference state or federal statutes or regulations.			Policies cannot duplicate, restate, incorporate by reference, rephrase, or adopt state or federal statutes or regulations.
	Policies must be clear and concise, cannot address matters preempted by state or federal law, may be prescriptive or performance based, and may address a matter of local concern.	Policies must be clear and concise, address a matter of local concern, be prescriptive, and address a matter of local concern (not adequately addressed by state or federal law).	District programs must be consistent with the standards and guidelines adopted by the Coastal Policy Council.	Policies may not address matters preempted or in conflict with federal law and employ the least restrictive means to achieve objective. State agencies have broad authority to object to a policy.
	Designated areas not required.	Designated areas are optional but required by regulation for many subjects of enforceable policies (e.g., subsistence and habitat). DNR denied many of the designated areas proposed by districts.	Designated areas are not required.	Not specifically addressed in statute but DNR testified to the Legislature that it will not require designations in order to establish enforceable policies.
	Districts may establish Areas Meriting Special Attention and establish enforceable policies that are applicable only in those areas.			
Regulations	Board will approve new regulations for project reviews, statewide standards and district plan criteria.	According to DNR testimony to the Legislature, regulations were more stringent than intended by the Legislature.	Regulations were not more stringent than intended by the Legislature.	Amendments to the regulations would be required to implement amendments to the ACMP.
Citizen Appeals	Citizen appeals not addressed in bill.	Citizen appeals prohibited.	Citizen lawsuits allowed and pre-decision project petitions allowed pre-2002.	Citizen appeals prohibited.

Topic	Initiative	June 2011 Program	Pre-2003 Program	CS SB 45 (CRA) am (failed House 6/11)
ACMP Sunset	No sunset provision.	July 1, 2011 sunset date. No sunset prior to 2005.	No sunset provision.	ACMP sunsets July 2017 unless extended.
District Plan Amendments	Plans approved as of June 2011 incorporated into new program. No requirement to resubmit plans.	Districts must resubmit plans every 10 years.	No requirement to resubmit plan every 10 years.	This bill did not change the existing statutory requirement that requires districts to resubmit plans every 10 years. A new provision in the bill requires the board to review all new state and federal laws each year. If a district policy duplicates the new law, the board must direct the district to submit a new plan.
DEC Participation	DEC participates in the program the same as DNR and DFG.	DEC Carveout removed DEC permits from ACMP consistency reviews. Legislative intent was for DEC to participate in reviews, it but seldom did. DNR testimony to Legislature indicated districts could establish policies to fill gaps in DEC laws, but none were approved.	DEC participated in the program the same as DNR and DFG.	DEC permits excluded from ACMP project consistency reviews. Board to prepare a report about the DEC Carveout by 2/1/14 and include recommendations for changes to AS 46.40.
Review Timelines	Not addressed in bill.	Most reviews must be completed within 90-days even if there is not adequate information for decision	No 90-day limit.	Most reviews must be completed within 90-days even if there is not adequate information for decision.
	For reviews with federal permits, federal regulations require notification why there is a delay at 3 months, and review must be completed in 6 months.			
Elevations (pre-decision appeals)	No details about consistency review process. Regulations would be developed for reviews.	DNR commissioner has sole authority to make decision on elevations.	DEC, DFG & DNR made decision by consensus.	DEC, DFG & DNR decide elevations by written order signed by two resource agencies within 60 days.

Topic	Initiative	June 2011 Program	Pre-2003 Program	CS SB 45 (CRA) am (failed House 6/11)
Inland Projects	Review of inland projects not addressed.	Projects inland of the coastal zone cannot be reviewed for consistency with the ACMP.	Projects inland of the coastal zone reviewed only if there are impacts to coastal resources or uses.	Projects inland of the coastal zone cannot be reviewed for consistency with the ACMP.
	Federally-initiated activities inland of coastal zone reviewed only if there are coastal effects.			
Outer Continental Shelf (OCS)	Activities in the OCS may be reviewed for consistency with the ACMP.	Activities in the OCS may be reviewed for consistency with the ACMP, but impacts to coastal resources/uses in OCS cannot be considered because of the designated area requirement in the ACMP regulations.	Activities in the OCS may be reviewed for consistency with the ACMP.	Activities in the OCS may be reviewed for consistency with the ACMP. DNR testified to the Legislature that it would remove the designated area requirements.
Activities on federal lands & waters	In addition to activities onshore and in state waters, the federal Coastal Zone Management Act (CZMA) allows states to review activities occurring in federal waters or on federal land (i.e., activities initiated or permitted by a federal agency). As described below, the ACMP regulations limited this ability.			
	The bill does not limit provisions in the CZMA for reviewing activities on federal lands and water.	Due to the designated area requirements in regulation, impacts to coastal resources and lands could only be considered within the designated area. Since the designated areas could not include federal land, the regulation limited powers given to the state in the CZMA.	No limits in bill on provisions in the CZMA for reviewing activities on federal lands and water.	No limits in bill on review of activities on federal lands or waters. Assuming the designated area requirement would be removed from the regulations, this bill would allow consideration of impacts to coastal resources and uses on federal lands and waters.

Joint Judiciary Committee Hearing on 11ACMP:
Coastal Management Program Initiative
– February 2012 –
Relevant Laws

The Alaska Constitution (Article XI)

§ 1. Initiative and Referendum
The people may propose and enact laws by the initiative, and approve or reject acts of the legislature by the referendum.

§ 2. Application
An initiative or referendum is proposed by an application containing the bill to be initiated or the act to be referred. The application shall be signed by not less than one hundred qualified voters as sponsors, and shall be filed with the lieutenant governor. If he finds it in proper form he shall so certify. Denial of certification shall be subject to judicial review.

§ 3. Petition
After certification of the application, a petition containing a summary of the subject matter shall be prepared by the lieutenant governor for circulation by the sponsors. If signed by qualified voters who are equal in number to at least ten per cent of those who voted in the preceding general election, who are resident in at least three-fourths of the house districts of the State, and who, in each of those house districts, are equal in number to at least seven percent of those who voted in the preceding general election in the house district, it may be filed with the lieutenant governor.

§ 4. Initiative Election
An initiative petition may be filed at any time. The lieutenant governor shall prepare a ballot title and proposition summarizing the proposed law, and shall place them on the ballot for the first statewide election held more than one hundred twenty days after adjournment of the legislative session following the filing. If, before the election, substantially the same measure has been enacted, the petition is void.

§ 6. Enactment
If a majority of the votes cast on the proposition favor its adoption, the initiated measure is enacted. If a majority of the votes cast on the proposition favor the rejection of an act referred, it is rejected. The lieutenant governor shall certify the election returns. An initiated law becomes effective ninety days after certification, is not subject to veto, and may not be repealed by the legislature within two years of its effective date. It may be amended at any time. An act rejected by referendum is void thirty days after certification. Additional procedures for the initiative and referendum may be prescribed by law.

§ 7. Restrictions
The initiative shall not be used to dedicate revenues, make or repeal appropriations, create courts, define the jurisdiction of courts or prescribe their rules, or enact local or special legislation. The referendum shall not be applied to dedications of revenue, to appropriations, to local or special legislation, or to laws necessary for the immediate preservation of the public peace, health, or safety.

Alaska Statutes on Initiatives

Article 01. INITIATIVE

Sec. 15.45.010. Provision and scope for use of the initiative.

The law-making powers assigned to the legislature may be exercised by the people through the initiative. However, an initiative may not be proposed to dedicate revenue, to make or repeal appropriations, to create courts, to define the jurisdiction of courts or prescribe their rules, or to enact local or special legislation.

Sec. 15.45.020. Filing application.

An initiative is proposed by filing an application with the lieutenant governor. A deposit of $100 must accompany the application. This deposit shall be retained if a petition is not properly filed. If a petition is properly filed, the deposit shall be refunded.

Sec. 15.45.030. Form of application.

The application must include the

(1) proposed bill;

(2) printed name, the signature, the address, and a numerical identifier of not fewer than 100 qualified voters who will serve as sponsors; each signature page must include a statement that the sponsors are qualified voters who signed the application with the proposed bill attached; and

(3) designation of an initiative committee consisting of three of the sponsors who subscribed to the application and represent all sponsors and subscribers in matters relating to the initiative; the designation must include the name, mailing address, and signature of each committee member.

Sec. 15.45.040. Form of proposed bill.

The proposed bill shall be in the following form:

(1) the bill shall be confined to one subject;

(2) the subject of the bill shall be expressed in the title;

(3) the enacting clause of the bill shall be: "Be it enacted by the People of the State of Alaska;"

(4) the bill may not include subjects restricted by AS 15.45.010.

Sec. 15.45.050. Manner of notice.

Notice to the initiative committee on any matter pertaining to the application and petition may be served on any member of the committee in person or by mail addressed to a committee member as indicated on the application.

Sec. 15.45.060. Designation of sponsors.

The qualified voters who subscribe to the application in support of the proposed bill are designated as sponsors. The initiative committee may designate additional sponsors by giving written notice to the lieutenant governor of the names, addresses, and numerical identifiers of those so designated.

Sec. 15.45.070. Review of application for certification.

Within 60 calendar days after the date the application is received, the lieutenant governor shall review the application and shall either certify it or notify the initiative committee of the grounds for denial.

Sec. 15.45.080. Bases of denial of certification.

The lieutenant governor shall deny certification upon determining in writing that

(1) the proposed bill to be initiated is not confined to one subject or is otherwise not in the required form;

(2) the application is not substantially in the required form; or

(3) there is an insufficient number of qualified sponsors.

Sec. 15.45.090. Preparation of petition.

(a) If the application is certified, the lieutenant governor shall prepare a sufficient number of sequentially numbered petitions to allow full circulation throughout the state. Each petition must contain

(1) a copy of the proposed bill;

(2) an impartial summary of the subject matter of the bill;

(3) a statement of minimum costs to the state associated with certification of the initiative application and review of the initiative petition, excluding legal costs to the state and the costs to the state of any challenge to the validity of the petition;

(4) an estimate of the cost to the state of implementing the proposed law;

(5) the statement of warning prescribed in AS 15.45.100;

(6) sufficient space for the printed name, a numerical identifier, the signature, the date of signature, and the address of each person signing the petition; and

(7) other specifications prescribed by the lieutenant governor to ensure proper handling and control.

(b) Upon request of the initiative committee, the lieutenant governor shall report to the committee the number of persons who voted in the preceding general election.

Sec. 15.45.100. Statement of warning.

Each petition shall include a statement of warning that a person who signs a name other than the person's own on the petition, or who knowingly signs more than once for the same proposition at one election, or who signs the petition when knowingly not a qualified voter, is guilty of a class B misdemeanor.

Sec. 15.45.105. Qualifications of circulator.

To circulate a petition booklet, a person shall be

(1) a citizen of the United States;

(2) 18 years of age or older; and

(3) a resident of the state as determined under AS 15.05.020.

Sec. 15.45.110. Circulation of petition; prohibitions and penalty.

(a) The petitions may be circulated throughout the state only in person.

(b) *[Repealed, Sec. 92 ch 82 SLA 2000].*

(c) A circulator may not receive payment or agree to receive payment that is greater than $1 a signature, and a person or an organization may not pay or agree to pay an amount that is greater than $1 a signature, for the collection of signatures on a petition.

(d) A person or organization may not knowingly pay, offer to pay, or cause to be paid money or other valuable thing to a person to sign or refrain from signing a petition.

(e) A person or organization that violates (c) or (d) of this section is guilty of a class B misdemeanor.

(f) In this section,

(1) "organization" has the meaning given in AS 11.81.900;

(2) "other valuable thing" has the meaning given in AS 15.56.030(d);

(3) "person" has the meaning given in AS 11.81.900.

Sec. 15.45.120. Manner of signing and withdrawing name from petition.

Any qualified voter may subscribe to the petition by printing the voter's name, a numerical identifier, and an address, by signing the voter's name, and by dating the signature. A person who has signed the initiative petition may withdraw the person's name only by giving written notice to the lieutenant governor before the date the petition is filed.

Sec. 15.45.130. Certification of circulator.

Before being filed, each petition shall be certified by an affidavit by the person who personally circulated the petition. In determining the sufficiency of the petition, the lieutenant governor may not count subscriptions on

petitions not properly certified at the time of filing or corrected before the subscriptions are counted. The affidavit must state in substance

(1) that the person signing the affidavit meets the residency, age, and citizenship qualifications for circulating a petition under AS 15.45.105;

(2) that the person is the only circulator of that petition;

(3) that the signatures were made in the circulator's actual presence;

(4) that, to the best of the circulator's knowledge, the signatures are the signatures of the persons whose names they purport to be;

(5) that, to the best of the circulator's knowledge, the signatures are of persons who were qualified voters on the date of signature;

(6) that the circulator has not entered into an agreement with a person or organization in violation of AS 15.45.110(c);

(7) that the circulator has not violated AS 15.45.110(d) with respect to that petition; and

(8) whether the circulator has received payment or agreed to receive payment for the collection of signatures on the petition, and, if so, the name of each person or organization that has paid or agreed to pay the circulator for collection of signatures on the petition.

Sec. 15.45.140. Filing of petition.

(a) The sponsors must file the initiative petition within one year from the time the sponsors received notice from the lieutenant governor that the petitions were ready for delivery to them. The petition may be filed with the lieutenant governor only if it meets all of the following requirements: it is signed by qualified voters

(1) equal in number to 10 percent of those who voted in the preceding general election;

(2) resident in at least three-fourths of the house districts of the state; and

(3) who, in each of the house districts described in (2) of this subsection, are equal in number to at least seven percent of those who voted in the preceding general election in the house district.

(b) If the petition is not filed within the one-year period provided for in (a) of this section, the petition has no force or effect.

Sec. 15.45.150. Review of petition.

Within not more than 60 days of the date the petition was filed, the lieutenant governor shall review the petition and shall notify the initiative committee whether the petition was properly or improperly filed, and at which election the proposition shall be placed on the ballot.

Sec. 15.45.160. Bases for determining the petition was improperly filed.

The lieutenant governor shall notify the committee that the petition was improperly filed upon determining that

(1) there is an insufficient number of qualified subscribers;

(2) the subscribers were not resident in at least three-fourths of the house districts of the state; or

(3) there is an insufficient number of qualified subscribers from each of the house districts described in (2) of this section.

Sec. 15.45.170.Submission of supplementary petition. [Repealed, Sec. 7 ch 80 SLA 1998].

Repealed or Renumbered

Sec. 15.45.180. Preparation of ballot title and proposition.

(a) If the petition is properly filed, the lieutenant governor, with the assistance of the attorney general, shall prepare a ballot title and proposition. The ballot title shall, in not more than 25 words, indicate the general subject of the proposition. The proposition shall give a true and impartial summary of the proposed law. The total number of words used in the summary may not exceed the product of the number of sections in the proposed law multiplied by 50. In this subsection, "section" means a provision of the proposed law that is distinct from other provisions in purpose or subject matter.

(b) The proposition prepared under (a) of this section shall comply with AS 15.80.005 and shall be worded so that a "Yes" vote on the proposition is a vote to enact the proposed law.

Sec. 15.45.190. Placing proposition on ballot.

The lieutenant governor shall direct the director to place the ballot title and proposition on the election ballot of the first statewide general, special, or primary election that is held after

(1) the petition has been filed;

(2) a legislative session has convened and adjourned; and

(3) a period of 120 days has expired since the adjournment of the legislative session.

Sec. 15.45.195. Public hearings.

(a) At least 30 days before the election at which an initiative is to appear on the ballot, the lieutenant governor or a designee of the lieutenant governor shall hold two or more public hearings concerning the initiative in each judicial district of the state. Each public hearing under this section shall include the written or oral testimony of one supporter and one opponent of the initiative.

(b) The lieutenant governor shall provide reasonable notice of each public hearing required under this section. The notice must include the date, time, and place of the hearing. The notice may be given using print or broadcast media. The lieutenant governor shall provide notice in a consistent fashion for all hearings required under this section.

(c) Penalties for a violation of this section may not include removal of an initiative from the ballot.

(d) If the lieutenant governor determines that it is technologically and economically feasible, the division shall provide a live audio and video broadcast of each hearing held under (a) of this section on the division's Internet website.

Sec. 15.45.200. Display of proposed law.

The director shall provide each election board with at least five copies of the proposed law being initiated, and the election board shall display at least one copy of the proposed law in a conspicuous place in the room where the election is held.

Sec. 15.45.210. Determination of void petition.

If the lieutenant governor, with the formal concurrence of the attorney general, determines that an act of the legislature that is substantially the same as the proposed law was enacted after the petition had been filed, and before the date of the election, the petition is void and the lieutenant governor shall so notify the committee.

Sec. 15.45.220. Adoption and effective date of proposed law.

If a majority of the votes cast on the initiative proposition favor its adoption, the proposed law is enacted, and the lieutenant governor shall so certify. The act becomes effective 90 days after certification.

Sec. 15.45.230.Insufficiency of application or petition. [Repealed, Sec. 7, ch 80 SLA 1998].

Repealed or Renumbered

Sec. 15.45.240. Judicial review.

Any person aggrieved by a determination made by the lieutenant governor under AS 15.45.010 - 15.45.220 may bring an action in the superior court to have the determination reviewed within 30 days of the date on which notice of the determination was given.

Sec. 15.45.245. Delegation by lieutenant governor.

The lieutenant governor may delegate the duties imposed on the lieutenant governor by AS 15.45.010 - 15.45.240 to the director.

....

Legislative Powers

Sec. 24.05.186. Legislative hearings on initiatives certified by the lieutenant governor.

(a) A standing committee of the legislature, selected jointly by the presiding officers of the house of representatives and senate, shall hold at least one hearing on an initiative that the lieutenant governor has determined was properly filed under AS 15.45.160.

(b) The standing committee selected jointly by the presiding officers of the house of representatives and senate under (a) of this section shall hold at least one hearing under this section within 30 days after the convening of the legislative session preceding the statewide election at which the initiative proposition must appear on the election ballot under AS 15.45.190.

OFFICE OF THE
OCT 07 2011
LIEUTENANT GOVERNOR

"An Act establishing the Alaska Coastal Management Program"

Short-form Description of Initiative

This initiative would establish a coastal management program for Alaska. Alaska is the only coastal state without an approved coastal management program. The initiative seeks a balanced approach to development and protection of coastal resources.

Coastal Policy Board: This initiative would create a thirteen-person coastal policy board that would be responsible for overseeing the coastal management program. The board would approve local coastal district plans and coastal management regulations and coordinate the implementation of the coastal management program.

Coastal Districts: The program would allow municipalities and regions of the unorganized borough to organize as local coastal districts. Approved coastal district plans may include local enforceable policies so long as those policies do not unreasonably or arbitrarily restrict a use of state concern. Districts in effect on 6/30/11 are re-established.

Project Reviews: The program includes a coordinated process for review of development projects in the coastal zone to ensure they are consistent with statewide standards and local coastal district enforceable policies, but would exclude individual reviews of routine activities that do not have a significant impact on coastal resources or uses.

Federal Consistency: Once the program receives federal approval, the State of Alaska will once again be able to participate in the federal Coastal Zone Management Act.

AN ACT ENTITLED

"An Act establishing the Alaska Coastal Management Program."

BE IT ENACTED BY THE PEOPLE OF THE STATE OF ALASKA:

*** Section 1.** AS 46 is amended by adding a new chapter to read:

Chapter 41. Alaska Coastal Management Program

Sec. 46.41.010 Coastal Policy Board

(a) There is created in the Department of Commerce, Community and Economic Development the Alaska Coastal Policy Board. The board consists of the following:

(1) nine public members and alternates appointed by the governor from a list composed of at least three names from each region, nominated and submitted by the coastal districts of each region; one public member shall be appointed from each of the following regions:

(A) northwest Alaska, including, generally, the area of the North Slope Borough and the Northwest Arctic Borough;

(B) Bering Straits, including, generally, the area of the Bering Straits regional educational attendance area and the City of Nome;

(C) southwest Alaska, including, generally, the area within the Lower Yukon, Lower Kuskokwim, and Southwest regional educational attendance areas, the City of Bethel, and the Lake and Peninsula and Bristol Bay Boroughs;

(D) Kodiak-Aleutians, including the area of the Kodiak Island and Aleutian East Boroughs and the Aleutian, Adak and Pribilof regional educational attendance areas;

(E) Upper Cook Inlet, including the Municipality of Anchorage and the Matanuska-Susitna Borough;

(F) Lower Cook Inlet, including, generally, the area within the Kenai Peninsula Borough;

(G) Prince William Sound, including, generally, the area east of the Kenai Peninsula Borough to 141 W. longitude;

(H) northern Southeast Alaska, including the area southeast of 141 W. longitude and north of 57 N. latitude, including the entirety of the City and Borough

of Sitka; and

(I) southern Southeast Alaska, including that portion of southeastern Alaska not contained within the area described in (H) of this paragraph;

(2) each of the following:

(A) the commissioner of environmental conservation;

(B) the commissioner of fish and game;

(C) the commissioner of natural resources; and

(D) the commissioner of commerce, community, and economic development.

(b) Public members serve staggered terms of three years. Except as provided by (c) of this section, each member serves until a successor is appointed. A public member may be reappointed.

(c) The alternate for a commissioner serving under (a)(2) of this section shall be a deputy commissioner or the director of a division in the commissioner's department. The names of alternates shall be filed with the board.

(d) The board shall designate co-chairs, one of whom shall be selected from among the public members appointed under (a)(1) of this section and one from among the members designated in (a)(2) of this section.

(e) The board may recommend that the governor remove a public member for cause.

(f) Five public members and two designated members of the board constitute a quorum, but the board may delegate to one or more of its members the power to hold hearings. All decisions of the board shall be by a majority vote of the members present and voting.

(g) The board shall meet at least four times a year and as often as necessary to fulfill its duties under this chapter. Meetings may be held and members may vote telephonically, except one board meeting a year shall be held in person.

(h) Public members of the board or their alternates are entitled to per diem and travel expenses authorized by law for members of boards and commissions.

(i) Administrative support for the board shall be provided by staff of the department. The department, under the direction of the board shall contract with or employ personnel or consultants the department considers necessary to assist the board in carrying out the board's duties and responsibilities.

Sec. 46.41.020. Powers and duties of the board.

(a) The board shall

(1) review and approve regulations necessary to implement the coastal management program in conformity with this chapter and 16 U.S.C. 1451 - 1464 (Coastal Zone Management Act of 1972);

(2) direct the department to seek approval of the Alaska coastal management program by the National Oceanic and Atmospheric Administration, Office of Ocean and Coastal Resource Management in conformity with 16 U.S.C. 1451 – 1464 (Coastal Zone Management Act of 1972);

(3) initiate an interagency program of strategic coastal and ocean planning for each geographic region of the state;

(4) review and approve coastal district management plans after receiving the department's recommendations, including local enforceable policies, that meet the provisions of this chapter and the district plan criteria.

(5) establish continuing coordination among state agencies to facilitate the development and implementation of the Alaska coastal management program;

(6) evaluate the effectiveness of district coastal management plans; and

(7) direct the department to apply for and accept grants, contributions, and appropriations, including application for and acceptance of federal funds that may become available for coastal planning and management.

(b) The board may

(1) contract for necessary services;

(2) take any reasonable action necessary to carry out the provisions of this chapter.

Sec. 46.41.030. Division of Coastal Management.

(a) There is created in the department the division of ocean and coastal management.

(b) The division shall

(1) render, on behalf of the state, all federal consistency determinations and certifications authorized by 16 U.S.C. 1456 (Sec. 307, Coastal Zone Management Act of 1972), and each conclusive state consistency determination when a project requires a permit, lease, or authorization from the department or from two or more state resource agencies.

(2) adopt regulations approved by the board necessary to implement this chapter under the provisions of AS 44.62 (Administrative Procedure Act).

(3) assure continued provision of data and information to coastal districts to carry

out their planning and management functions under the program.

(4) develop and maintain a program of financial assistance to aid coastal districts in the development and implementation of district coastal management plan.

Sec. 46.41.040. Development of Alaska coastal management program.

(a) The regulations developed under this chapter shall include

(1) statewide coastal program standards;

(2) the criteria and process for the preparation and approval of district coastal management plans; and

(3) consistency review procedures in accordance with this chapter, including provisions for

(A) review of activities proposed or permitted by a state or federal agency;

(B) the types of activities that will trigger a consistency review;

(C) review of phased activities and uses;

(D) public notice and opportunities for public comment;

(E) elevation of proposed consistency determinations to the resource agency commissioners;

(F) establishment of review timelines;

(G) exclusion from an individual project review aspects of activities that are covered by a general permit previously found consistent with the Alaska coastal management program;

(H) exclusion of routine activities with insignificant effects to coastal uses or resources from an individual consistency review.

b) The coastal districts, coastal district boundaries and approved coastal management plans that were in effect as of June 30, 2011 are in effect and are incorporated into the Alaska coastal management program.

Sec. 46.41.050. Objectives.

The Alaska coastal management program shall be consistent with the following objectives:

(1) the use, management, restoration, and enhancement of the overall quality of the coastal environment for this and succeeding generations;

(2) the development of industrial or commercial enterprises that are consistent with the social, cultural, historic, economic, and environmental interests of the people of the state;

(3) the orderly, balanced utilization and protection of the resources of the coastal

area consistent with sound conservation and sustained yield principles;

(4) the management of coastal land and water uses in such a manner that, generally, those uses that are economically or physically dependent on a coastal location are given higher priority when compared to uses that do not economically or physically require a coastal location;

(5) the protection and management of significant historic, cultural, natural, and aesthetic values and natural systems or processes within the coastal area;

(6) the prevention of damage to or degradation of land and water reserved for their natural values as a result of inconsistent land or water usages adjacent to that land;

(7) the recognition of the need for a continuing supply of energy to meet the requirements of the state and the contribution of a share of the state's resources to meet national energy needs; and

(8) the full and fair evaluation of all demands on and uses of the land and water in the coastal area.

(9) the coordination of planning and decision-making in the coastal area among levels of government and citizens engaging in or affected by activities involving the coastal resources of the state;

(10) the participation of the public, local governments, and agencies of the state and federal governments in the development and implementation of a coastal management program; and

(11) the requirement that state resource agencies carry out their duties, powers and responsibilities that affect the use of coastal area resources in accordance with the coastal program adopted pursuant to this Act.

Sec. 46.41.060. Development of district coastal management plans.

(a) Coastal districts shall

(1) develop and adopt district coastal management plans in accordance with the provisions of this chapter. The plan adopted by a coastal district shall be based upon a municipality's existing comprehensive plan or a new comprehensive resource use plan or comprehensive statement of needs, policies, objectives, and standards governing the use and conservation of resources within the coastal area of the district. The plan must meet the district plan criteria adopted under AS 46.41.040 and must include

(A) a delineation within the district of the boundaries of the coastal area subject

to the district coastal management plan;

(B) a statement, list, or definition of the land and water uses and activities subject to the district coastal management plan;

(C) a designation of any special management areas;

(D) enforceable policies to be applied to all the land and water uses subject to the district coastal management plan as well as policies that apply to special management areas.

(b) The board shall approve an initial or amended district coastal management plan if the

(1) district coastal management plan meets the requirements of this chapter and the district plan criteria in regulation adopted by the department; and

(2) enforceable policies of the district coastal management plan

(A) do not duplicate, restate, or incorporate by reference state or federal statutes or regulations;

(B) are not preempted by federal or state law;

(C) do not arbitrarily or unreasonably restrict a use of state concern;

(D) are clear and concise as to the activities and persons affected by the policies and the requirements of the policies;

(E) use prescriptive or performance-based standards that are written in precise and enforceable language; and

(F) address a coastal use or resource of concern to the residents of the coastal resource district as demonstrated by local knowledge or supported by scientific evidence

(c) In (b)(2)(B) of this section, an enforceable policy of the district coastal management plan is preempted

(1) by federal statutes or regulations if the United States Congress expressly declares that local law or regulation is preempted, if the United States Congress demonstrates the intent to occupy the field exclusively, or if there is an actual conflict between federal and local law or regulation;

(2) by state law if it is prohibited, either by express legislative direction or direct conflict with a state statute or regulation, or where a local law or regulation substantially interferes with the effective functioning of a state statute or regulation or the underlying

purposes of a state statute or regulation.

Sec. 46.41.070. Submission of district plans by coastal districts.

(a) Within one year after the effective date of regulations implementing this chapter, coastal districts shall review their coastal management plans and if changes are necessary to meet the requirements of this chapter and implementing regulations, submit to the department a revised district coastal management plan.

Sec. 46.41.080. Implementation of district coastal management plans.

(a) A district coastal management plan approved under this chapter for a coastal district that does not have and exercise zoning or other controls on the use of resources within the coastal area shall be implemented by appropriate state agencies. Implementation shall be in accordance with the comprehensive use plan or the statement of needs, policies, objectives, and standards adopted by the district.

(b) A coastal district that has and exercises zoning or other controls on the use of resources within the coastal area shall implement its district coastal management plan. Implementation shall be in accordance with the comprehensive use plan or the statement of needs, policies, objectives, and standards adopted by the district.

Sec. 46.41.090. Compliance and enforcement.

(a) Municipalities and state resource agencies shall administer land and water use regulations or controls in conformity with district coastal management plans approved under this chapter and in effect.

(b) The superior courts of the state have jurisdiction to enforce lawful orders of the board and the department under this chapter.

Sec. 46.41.100. Coastal management plans in the unorganized borough.

(a) A coastal resource service area incorporated into the coastal management program under this chapter shall exercise those authorities and perform those duties required under this chapter.

Sec. 46.41.110. Coastal resource service areas.

(a) Except as otherwise provided in this section, each regional educational attendance area established under AS 14.08.031 containing a part of the coastal area may be organized as a coastal resource service area.

(b) The commissioner of the department may, after public hearings held in the affected area, consolidate two or more regional educational attendance areas as a single

coastal resource service area

(1) if a substantial portion of the coastal area contains land and water area owned by the federal government over which it exercises exclusive jurisdiction or land held in trust by the federal government for Alaska Natives over which the state would not exercise control as to use; or

(2) if, after giving due consideration to the standards applicable to incorporation of borough governments and the likelihood that a borough will be incorporated within the area, the commissioner determines that the functions to be performed under this chapter could be undertaken more efficiently through the combination of two or more regional education attendance area as a single coastal resource service area.

(c) A determination under (b) of this section shall be made before the organization of the coastal resource service area.

(d) or purposes of coastal management only, the commissioner of the department may, after public hearings held in the regional education attendance area affected, divide an existing regional education attendance area into no more than three coastal resource service areas according to geographic, cultural, economic, environmental, or other features relevant to coastal management planning. However,

(1) each coastal resource service area formed by dividing an existing regional education attendance must contain at least one first class city or home rule city; and

(2) a city within a coastal resource service area formed by dividing an existing regional education attendance area may not elect to exclude itself from the coastal resource service area.

Sec. 46.41.120. Organization of a Coastal Resource Service Area.

(a) Organization of a coastal resource service area may be initiated by

(1) submission to the coastal policy board of a petition signed by a number of registered voters equal to 15 percent of the number of votes cast within the coastal resource service area at the last state general election; or

(2) by submission to the board of a resolution approved by the city council or traditional village council of not less than 25 percent of the number of cities and villages within the coastal resource service area.

(b) Acting at the request of the council, the lieutenant governor, not less than 60 nor more than 90 days after receipt of a proper petition under (a)(1) of this section, a proper

resolution under (a)(2) of this section, or at the direction of the council under (a)(3) of this section, shall conduct an election on the question of organization of a coastal resource service area.

Sec. 46.41.130. Coastal resource service area boards

(a) Each coastal resource service area shall have an elected board representing the population of the service area. The board shall have the powers and duties and perform the functions prescribed for or required of coastal districts.

(b) A coastal resource service area board shall contain seven members. Board members shall be elected at large by the qualified voters of the coastal resource service area.

(c) The term of office of a member of a coastal resource service area board is three years. Members serve until their successors are elected and have qualified. This section does not prohibit the reelection of a board member.

(d) The lieutenant governor shall provide for the election of the members of coastal resource service area boards.

(e) Election of members of coastal resource service area boards shall be held annually on the date of election of members of regional educational attendance area boards under AS 14.08.071(b). If no candidate files for election to a seat on the coastal resource service area board, the seat is considered vacant at the time a newly elected member would have taken office.

(f) A seat on a coastal resource service area board shall be declared vacant by the board if the criteria under AS 14.08.045 (a) apply to the person elected. A vacancy on a coastal resource service area board shall be filled by appointment as provided in AS 14.12.070 for vacancies in the membership of regional educational attendance area boards.

(g) Members of coastal resource service area boards are subject to recall on the same grounds and in the same manner as provided for recall of municipal officials in AS 29.26.240 - 29.26.350. The lieutenant governor functions in place of the assembly or council and municipal clerk for receipt and review of recall petitions and the conduct of recall elections.

(h) Members of a coastal resource service area board are entitled to per diem and travel expenses authorized by law for members of boards and commissions and for honorariums for meetings attended in person.

Sec. 46.41.140. Elections in coastal resource service areas.

Elections under AS 46.41.100 - 46.41.160 shall be administered by the lieutenant

governor in the general manner provided in AS 15 (Election Code). In addition, the lieutenant governor may adopt regulations necessary to the conduct of coastal resource service area board elections. The state shall pay all election costs.

Sec. 46.41.150. Preparation of district coastal management program by the Department of Commerce, Community and Economic Development

(a) If residents of a coastal resource service area reject organization of the service area at an election called for the purpose and the coastal policy board finds, after public hearing, that major economic development activity has occurred or will occur within the service area, the board may direct the department to prepare and recommend for consideration by the council and for submission to the legislature a district coastal management plan for the service area.

(b) At the request of the coastal policy board, the department shall complete the district coastal management plan in accordance with this chapter and the guidelines and standards adopted by the board for a coastal resource service area that has been organized but that has failed to make substantial progress in the preparation of an approvable district costal management program within 18 months of certification of the results of an organization election or that has not submitted for approval to the board a program within 30 months of certification of the results of its organization election. Preparation of the program shall be conducted in consultation with the coastal resource service area and shall, to the maximum extent consistent with this chapter, reflect the expressed concerns of the residents of the service area.

(c) Before requesting the department to complete the district coastal management plan under (b) of this section, the board shall meet with members of the coastal resource service area board to determine whether the board is able to complete a district coastal management program within the time limitations established in this section.

Sec. 46.41.160. Approval of plans in coastal resource service areas.

(a) Before adoption by a coastal resource service area board, a district coastal management plan shall be submitted for review to each city or village within the coastal resource service area. The council of a city or traditional village council shall consider the plan submitted for review. Within 60 days of submission, the council of a city or traditional village council shall either approve the plan or enter objections to all or any portion of the plan.

(b) If a city or village within a coastal resource service area fails to approve a portion of the district coastal management plan prepared and submitted for approval under (a) of this section, the governing body shall advise the coastal resource service area board of its objections to the proposed plan and suggest alternative elements or components for inclusion in the district coastal management plan. New matter submitted by a city or village that meets the district plan criteria adopted under this chapter may be accepted by the district and the district coastal management plan modified accordingly. If a city or village fails to provide objections and suggested alternatives within the time limits established in this section, the coastal resource service area board may adopt the district coastal management plan as initially offered.

(c) Objection by a city council under (b) of this section is limited to objection to elements of the plan affecting resources or the use of resources within the corporate limits of the city. Objection by a traditional village council under (b) of this section is limited to objection to elements of the plan affecting resources or the use of resources within the village or within two miles of the village.

(d) For purposes of this section, "village" means an unincorporated community where at least 25 persons reside as a social unit as determined by the Department of Commerce, Community, and Economic Development.

Sec. 46.41.170. Cooperative administration.

(a) A city within the coastal area that is not part of a coastal resource service area shall be included for purposes of this chapter within an adjacent coastal resource service area unless its governing body, by resolution adopted by a majority of its membership, chooses to exclude the city from an adjacent coastal resource service area and a copy of the resolution is filed with the commissioner of commerce, community, and economic development.

(b) This chapter does not restrict or prohibit cooperative or joint administration of functions between a municipality and a coastal resource service area organized under the provisions of this chapter upon initiation of a mutual agreement for the purpose.

Sec. 46.41.180. Construction with other laws.

Nothing in this chapter shall be construed to

(1) diminish state jurisdiction, responsibility, or rights in the field of planning, development, or control of land or water resources, submerged land, or navigable water;

(2) affect in any way any state requirement imposed under a federal authorization or

federal waiver of sovereign immunity; or

(3) diminish the zoning or planning authority of municipalities under AS 29.

Sec. 46.41.900. Definitions.

In this chapter, unless the context otherwise requires,

(1) "affected coastal district" means a coastal district with a publically reviewed draft or approved plan in which a project is proposed to be located or that may experience a direct and significant impact from a proposed project;

(2) "board" means the Alaska Coastal Policy Board established in AS 46.41.010;

(3) "coastal district" means each of the following that contains a portion of the coastal area of the state:

(A) unified municipalities;

(B) organized boroughs of any class that exercise planning and zoning authority;

(C) home rule and first class cities of the unorganized borough or within boroughs that do not exercise planning and zoning authority;

(D) second class cities of the unorganized borough, or within boroughs that do not exercise planning and zoning authority, that have established a planning commission, and that, in the opinion of the commissioner of commerce, community, and economic development, have the capability of preparing and implementing a comprehensive district coastal management plan under AS 46.41.030;

(E) coastal resource service areas established and organized under AS 29.03.020 an AS 46.41.100 - 46.41.160;

(4) "coastal use or resource" means any land or water use or natural resource of the coastal zone. Land and water uses include, but are not limited to, public access, recreation, fishing, historic or cultural preservation, development, hazards management, marinas and floodplain management, scenic and aesthetic enjoyment, and resource creation or restoration projects. Natural resources include biological or physical resources that are found within a State's coastal zone on a regular or cyclical basis. Biological and physical resources include, but are not limited to, air, tidal and nontidal wetlands, ocean waters, estuaries, rivers, streams, lakes, aquifers, submerged aquatic vegetation, land, plants, trees, minerals, fish, shellfish, invertebrates, amphibians, birds, mammals, reptiles, and coastal resources of national significance;

(5) "coastal zone" means the coastal water including land within and under that water,

and adjacent shoreland, including the water within and under that shoreland, within the boundaries approved by the former Alaska Coastal Policy Council and by the United States Secretary of Commerce under 16 U.S.C. 1451 - 1465 (Coastal Zone Management Act of 1972, as amended); "coastal zone" includes areas added as a result of any boundary changes approved by the board and by the United States Secretary of Commerce under 16 U.S.C. 1451 - 1465; "coastal zone" does not include

(A) those lands excluded under 16 U.S.C. 1453(1); or

(B) areas deleted as a result of any boundary changes by the board in conformance with 16 U.S.C. 1451 - 1465;

(6) "consistency review" means the evaluation of a proposed project against the statewide standards and the approved enforceable policies of an affected coastal district under the process developed by the board;

(7) "department" means the Department of Commerce, Community and Economic Development;

(8) "direct and significant impact" means an activity which proximately contributes to a material change or alteration in the natural or social characteristics of a part of the state's coastal area and in which

(A) would have a net adverse effect on the quality of the resources of the coastal area;

(B) would limit the range of alternative uses of the resources of the coastal area; or

(C) would, of itself, constitute a tolerable change or alteration of the resources within the coastal area but which, cumulatively, would have an adverse effect;

(9) "district coastal management plan" means a plan developed by a coastal district, including enforceable policies of that plan, setting out policies and standards to guide public and private uses of land and water within that district and approved by the board as meeting the requirements of this chapter and the regulations adopted under this chapter;

(10) "enforceable policy" means a policy established by this chapter or approved by the board as a legally binding policy of the Alaska coastal management program applicable to public and private activities;

(11) "local knowledge" means a body of knowledge or information about the coastal environment or the human use of that environment, including information passed down

through generations, if that information is

(A) derived from experience and observations; and

(B) generally accepted by the local community;

(12) "project" means all activities that will be part of a proposed development and includes all federal agency activities as defined in 15 C.F.R. 930.31, including lease sales and development projects affecting a coastal use or resource;

(13) "resource agency" means

(A) the Department of Environmental Conservation;

(B) the Department of Fish and Game; or

(C) the Department of Natural Resources.;

(14) "scientific evidence" means facts or data that are

(A) premised upon established chemical, physical, biological, or ecosystem management principles as obtained through scientific method and submitted to the department to furnish proof of a matter required under this chapter;

(B) in a form that would allow resource agency review for scientific merit; and

(C) supported by one or more of the following:

(i) written analysis based on field observation and professional judgment along with photographic documentation;

(ii) written analysis from a professional scientist with expertise in the specific discipline; or

(iii) site-specific scientific research that may include peer-review level research or literature.

(15) "special management area" includes areas meriting special attention and means a delineated geographic area within the coastal area which is sensitive to change or alteration and which, because of plans or commitments or because a claim on the resources within the area delineated would preclude subsequent use of the resources to a conflicting or incompatible use, warrants special management attention, or which, because of its value to the general public, should be identified for current or future planning, protection, or acquisition;

(16) "use of state concern" means a land and water use that would significantly affect the long-term public interest; a "use of state concern" includes

(A) uses of national interest, including the use of resources for the siting of ports

and major facilities that contribute to meeting national energy needs, construction and maintenance of navigational facilities and systems, resource development of federal land, and national defense and related security facilities that are dependent upon coastal locations;

(B) uses of more than local concern, including those land and water uses that confer significant environmental, social, cultural, or economic benefits or burdens beyond a single coastal district;

(C) the siting of major energy facilities, activities pursuant to a state oil and gas lease, a state gas only lease, or a federal oil and gas lease, or large-scale industrial or commercial development activities that are dependent on a coastal location and that, because of their magnitude or the magnitude of their effect on the economy of the state or the surrounding area, are reasonably likely to present issues of more than local significance;

(D) facilities serving statewide or interregional transportation and communication needs; and

(E) uses in areas established as state parks or recreational areas under AS 41.21 or as state game refuges, game sanctuaries, or critical habitat areas under AS 16.20.

11ACMP STATEMENT OF COSTS

Summary:

The estimated total cost of this program during the next five years is $27.0 million. Of that estimated cost, the minimum expenditure by the State of Alaska under this initiative during the next five years, if it becomes law, is $22.3 million. The program has no expiration date, and the estimate – developed by the Governor's Office of Management and Budget -- does not provide for inflation.

Expenses of the proposed program may be shared with the federal government in year three or later if the U.S. Department of Commerce approves the program and provides partial funding, and Congress makes the required appropriation. **Of the annual estimated program cost of $5.4 million, federal support is estimated to be up to a maximum of $2.0 million per year after year five.** The program is not required by federal law.

Expenditures for this program are subject to legislative appropriation. The estimate excludes potential litigation expenses and revenue impacts to the State of Alaska.

The overall cost estimate may be high or low, depending on decisions made by the new Board proposed in the initiative. The number of days that Board and Coastal District Boards decide to meet, the number and kind of consistency reviews, elevations and appeals over natural resource permits that the program may authorize, and the potential duplication of permitting reviews at the Department of Environmental Conservation and at the Coastal District level are among the major cost uncertainties.

Costs or savings the program would provide in the management or protection of public trust resources or permit coordination cannot be estimated at this time, nor can the estimate include the costs or savings the program would provide in the process of allowing the State and local districts to comment on or condition federal permits issued in Alaska's coastal regions.

The complete budget estimate prepared by the Office of Management and Budget is below:

Statement of Costs for Initiative:
Establishment of Alaska Coastal Management Program
Prepared by the Office of Management and Budget

As required by AS 15.45.090(a)(4), the Office of Management and Budget has prepared the following estimate of costs to the State of implementing the law proposed by this ballot initiative.

This ballot initiative would establish a coastal management program for Alaska. To govern the envisioned program, the initiative creates a new thirteen-member Coastal Policy Board, referred to as the Alaska Coastal Policy Board, which would be responsible for overseeing the proposed coastal management program. Among its principal duties are reviewing and approving regulations for the program and the management plans and enforceable policies prepared by local coastal district boards. The Coastal Policy Board is also to "initiate an interagency program of strategic coastal and ocean planning for each geographic region of the state."

Administrative support for the program and board would be provided by the Alaska Department of Commerce, Community & Economic Development. The department, under the direction of the board, would contract with or employ personnel or consultants the department considers necessary to assist the board in carrying out its duties and responsibilities. To provide the structure for the administrative support, the initiative creates within the department a Division of Ocean and Coastal Management. Among its other duties, the division would be responsible for rendering determinations whether projects subject to the program would be "consistent" with applicable statewide standards and enforceable policies of an affected coastal district.

The initiative would create a coastal management program with a number of substantive differences from the most recent federally approved Alaska Coastal Management Program that existed up until July 1, 2011. If the initiative is approved by the voters, a new administrative structure for the program would be built from scratch. This would include recruiting and hiring personnel, acquiring office space, equipment and supplies. It would also include tasks such as developing implementing regulations and guidance to administer the program. There is insufficient detail in the initiative to identify all of the costs to implement the program – this represents an estimate of the costs and the actual costs are likely to be different.

As a basis for providing cost estimates, it was assumed that the operation and procedural requirements of the Coastal Management Program envisioned by the initiative would include most if not all of the costs that existed before July 1, 2011. The initiative provides the board with broad power to create a program or procedures that could vary widely from the previous program. Substantive differences in the management or procedural requirements of the program could result in the costs varying substantially from the costs presented. Areas of program implementation difference that increase costs to the state include but are not limited to: Costs of additional board meetings should the board be required to meet more than the estimated four times annually; the level and timing of federal funding for the program; potential costs to state agencies in implementing the coastal management program and administering other state programs due to an increase in the number and/or complexity of local enforceable policies and other plan requirements; an increase in the amount and complexity of coordination and enforcement

of actions taken by the board; and an increase in the level of financial and other support for local coastal districts.

Expenditures for the program would be subject to legislative appropriation. The estimate excludes litigation expenses and potential revenue impacts to the State of Alaska.

In 2011, the budget estimate for renewing the State's previous federally approved coastal management program was approximately $4,700,000 annually, a portion of the program was funded with federal funds and a portion was funded with state funds.

The cost associated with the administration and implementation of the new Coastal Policy Board was not anticipated in the estimate above. The estimate to provide administrative support to the Coastal Policy Board is approximately $700,000 annually, and the additional cost is assumed to be state funded.

Until the new coastal management program is federally approved and becomes eligible to receive federal funds, the State would expect to initially absorb the entire cost. This would be followed by a period of gradually increasing federal participation in sharing of the costs until the program met eligibility requirements for full federal funding. Typically, it takes a coastal management program approximately two years from initial application to federal approval and an additional three years before qualifying for a full program cost share. During the initial two years, the State could expect to support the program at its anticipated annual funding level of $5,400,000. The amount of federal funds available in the out years is unknown, however given the current federal program; the state would anticipate federal participation to top out at $2,000,000 in year five.

A year by year estimate of federal and state funding is presented below:

	General Funds	Federal Funds	Total Funds
Year 1	$ 5,400,000	$ 0	$ 5,400,000
Year 2	$ 5,400,000	$ 0	$ 5,400,000
Year 3	$ 4,320,000	$ 1,080,000	$ 5,400,000
Year 4	$ 3,763,633	$ 1,636,634	$ 5,400,000
Year 5	$ 3,400,000	$ 2,000,000	$ 5,400,000
Year 6	$ 3,400,000	$ 2,000,000	$ 5,400,000

Administrative support for the new agency would be provided by a new division in the Alaska Department of Commerce and Community Development. It is assumed that the new agency would be similarly structured to the previous Alaska Coastal and Ocean Management component in the Alaska Department of Natural Resources.
Alaska Coastal Management Program estimate by category

TOTAL	$5,400,000
Personal Services	$3,260,000

This expenditure would support salaries and benefits for 34 full time positions ranging from a Division Director to an Office Assistant. The majority of the positions are Natural Resource Specialists supporting the envisioned Alaska Coastal Management Program. One additional position was added to the previously configured program to cover the additional work associated with the administration of the Alaska Coastal Policy Board and coordinating district planning functions and information sharing.

Travel $267,900

The projected travel expenditure would support employee and board related in-state and out of state travel to coastal districts and includes hotel, per diem, airfare and reimbursement for Alaska Coastal Management Program district assistance, staff training, mediation, public education, conferences and other travel supporting the program. This estimate anticipates increased travel costs in the first two years following the establishment of the board in order to assist coastal districts with their plans and advocate for the federal approval of the plan in Washington DC.

This estimate assumes travel costs associated with four annual in-person meetings of the 13-member Alaska Coastal Policy Board and two support staff members.

Services $1,815,300

This expenditure supports contracts in the form of Reimbursable Services Agreements (RSA) to agencies participating in the Alaska Coastal Management Program. These contracts would support the implementation of the Alaska Coastal Management Program by the participating state agencies, coastal management areas and other contractors.

It also supports purchased services from other state agencies including centralized telecommunication, mail and human resource services, legal services, professional services to support monitoring & compliance activities and development and implementation activities for the Alaska Coastal Management Program. In the initial years, additional contractual services will be needed to draft and review implementing program regulations, conduct district elections, and other start up activities.

Commodities $56,800

This expenditure estimate supports purchases related to office supplies, office furnishings and equipment, software as well as minor repairs to office equipment.

Additional one-time costs associated with the initiative

Statement of Costs for Initiative
"An Act establishing the Alaska Coastal Management Program"
Costs to certify the initiative application and review the initiative petition
Prepared by the Office of Lieutenant Governor and the
Division of Elections

Elections cost statement
The minimum cost to the Division of Elections associated with certification of the initiative application and review of the initiative petition, excluding legal costs to the state and the costs to the state of any challenge to the validity of the petition, is estimated to be $66,821. This statement is required under AS 15.45.090(a) (3).

Total $66,821

Elections estimate by category

Personal Services $65,521
Expenses associated with certification of the initiative application and review of the initiative petition:
Three full-time employees at 522 hours is $26,067
8 temporary employees at 2520 hours is $39,454

Services $ 1,300
Printing of booklets is $1,300

Lt. Governor's Office Cost statement
The minimum cost to conduct public hearings concerning the initiative in two communities in each of four judicial districts is estimated to be $4,470. This statement is required under 15.45.195.

Total $4,470

Lt. Governor's Office Estimate by category

Travel $ 4,270
Average round trip airfare for the Lieutenant Governor and one staff member to travel to seven communities in Alaska: Average airfare: $310 * 7 locations * 2 staff = $4,270. It is assumed one of the hearings would be in Anchorage which would not involve travel costs.

Services $ 200
Cost breakdowns for teleconferencing services:
$25.00 X 8 meetings = $200.00 as a minimum cost estimate

11ACMP STATEMENT OF COSTS

Summary:

The estimated total cost of this program during the next five years is $27.0 million. Of that estimated cost, the minimum expenditure by the State of Alaska under this initiative during the next five years, if it becomes law, is $22.3 million. The program has no expiration date, and the estimate – developed by the Governor's Office of Management and Budget – does not provide for inflation.

Expenses of the proposed program may be shared with the federal government in year three or later if the U.S. Department of Commerce approves the program and provides partial funding, and Congress makes the required appropriation. **Of the annual estimated program cost of $5.4 million, federal support is estimated to be up to a maximum of $2.0 million per year after year five.** The program is not required by federal law.

The overall cost estimate may be high or low, depending on decisions made by the new Board proposed in the initiative. The number of days that Board and Coastal District Boards decide to meet, the number and kind of consistency reviews, elevations and appeals over natural resource permits that the program may authorize, and the potential duplication of permitting reviews at the Department of Environmental Conservation and at the Coastal District level are among the major cost uncertainties.

Costs or savings the program would provide in the management or protection of public trust resources or permit coordination cannot be estimated at this time, nor can the estimate include the costs or savings the program would provide in the process of allowing the State and local districts to comment on or condition federal permits issued in Alaska's coastal regions.

The complete budget estimate prepared by the Office of Management and Budget is below:

Statement of Costs for Initiative:
Establishment of Alaska Coastal Management Program
Prepared by the Office of Management and Budget

As required by AS 15.45.090(a)(4), the Office of Management and Budget has prepared the following estimate of costs to the State of implementing the law proposed by this ballot initiative.

This ballot initiative would establish a coastal management program for Alaska. To govern the envisioned program, the initiative creates a new thirteen-member Coastal Policy Board, referred to as the Alaska Coastal Policy Board, which would be responsible for overseeing the proposed coastal management program. Among its principal duties are reviewing and approving regulations for the program and the management plans and enforceable policies prepared by local coastal district boards. The Coastal Policy Board is also to "initiate an interagency program of strategic coastal and ocean planning for each geographic region of the state."

Administrative support for the program and board would be provided by the Alaska Department of Commerce, Community & Economic Development. The department, under the direction of the board, would contract with or employ personnel or consultants the department considers necessary to assist the board in carrying out its duties and responsibilities. To provide the structure for the administrative support, the initiative creates within the department a Division of Ocean and Coastal Management. Among its other duties, the division would be responsible for rendering determinations whether projects subject to the program would be "consistent" with applicable statewide standards and enforceable policies of an affected coastal district.

The initiative would create a coastal management program with a number of substantive differences from the most recent federally approved Alaska Coastal Management Program that existed up until July 1, 2011. If the initiative is approved by the voters, a new administrative structure for the program would be built from scratch. This would include recruiting and hiring personnel, acquiring office space, equipment and supplies. It would also include tasks such as developing implementing regulations and guidance to administer the program. There is insufficient detail in the initiative to identify all of the costs to implement the program – this represents an estimate of the costs and the actual costs are likely to be different.

As a basis for providing cost estimates, it was assumed that the operation and procedural requirements of the Coastal Management Program envisioned by the initiative would include most if not all of the costs that existed before July 1, 2011. The initiative provides the board with broad power to create a program or procedures that could vary widely from the previous program. Substantive differences in the management or procedural requirements of the program could result in the costs varying substantially from the costs presented. Areas of program implementation difference that increase costs to the state include but are not limited to: Costs of additional board meetings should the board be required to meet more than the estimated four times annually; the level and timing of federal funding for the program; potential costs to state agencies in implementing the

coastal management program and administering other state programs due to an increase in the number and/or complexity of local enforceable policies and other plan requirements; an increase in the amount and complexity of coordination and enforcement of actions taken by the board; and an increase in the level of financial and other support for local coastal districts.

Expenditures for the program would be subject to legislative appropriation. The estimate excludes litigation expenses and potential revenue impacts to the State of Alaska.

In 2011, the budget estimate for renewing the State's previous federally approved coastal management program was approximately $4,700,000 annually, a portion of the program was funded with federal funds and a portion was funded with state funds.

The cost associated with the administration and implementation of the new Coastal Policy Board was not anticipated in the estimate above. The estimate to provide administrative support to the Coastal Policy Board is approximately $700,000 annually, and the additional cost is assumed to be state funded.

Until the new coastal management program is federally approved and becomes eligible to receive federal funds, the State would expect to initially absorb the entire cost. This would be followed by a period of gradually increasing federal participation in sharing of the costs until the program met eligibility requirements for full federal funding. Typically, it takes a coastal management program approximately two years from initial application to federal approval and an additional three years before qualifying for a full program cost share. During the initial two years, the State could expect to support the program at its anticipated annual funding level of $5,400,000. The amount of federal funds available in the out years is unknown, however given the current federal program; the state would anticipate federal participation to top out at $2,000,000 in year five.

A year by year estimate of federal and state funding is presented below:

	General Funds	Federal Funds	Total Funds
Year 1	$ 5,400,000	$ 0	$ 5,400,000
Year 2	$ 5,400,000	$ 0	$ 5,400,000
Year 3	$ 4,320,000	$ 1,080,000	$ 5,400,000
Year 4	$ 3,763,633	$ 1,636,634	$ 5,400,000
Year 5	$ 3,400,000	$ 2,000,000	$ 5,400,000
Year 6	$ 3,400,000	$ 2,000,000	$ 5,400,000

Administrative support for the new agency would be provided by a new division in the Alaska Department of Commerce and Community Development. It is assumed that the new agency would be similarly structured to the previous Alaska Coastal and Ocean Management component in the Alaska Department of Natural Resources.

Alaska Coastal Management Program Initiative
Sectional Analysis

"An Act Establishing the Alaska Coastal Management Program"

Section 1. Adds a new chapter 41 to Title 46 in Alaska Statutes.

Sec. 46.41.010(a). Creates the Alaska Coastal Policy Board in the Department of Commerce, Community and Economic Development (DCCED). The board is comprised of the three resource agency commissioners and the DCCED commissioner and nine public members. The public members are chosen by the governor from a list of at least three names submitted by the coastal district of each of the nine regions represented on the board.

Secs. 46.41.010(b)-(i). Administrative provisions for the Board.

Sec. 46.41.020. The Board's powers and duties include reviewing and approving the regulations necessary to implement the coastal management program; initiating interagency coastal and ocean regional planning; reviewing and approving coastal district management plans; and establishing coordination among state agencies to facilitate development and implementation of the coastal program.

Sec. 46.41.030. Creates the division of ocean and coastal management in DCCED. Among other things, the division is tasked with adopting the regulations approved by the Board for implementation of the coastal program and is responsible for performing state and federal consistency determinations.

Sec. 46.41.040. Establishes the criteria for development of the coastal management program regulations. Specifies that the coastal districts, district boundaries, and approved coastal management plans in effect as of June 30, 2011 are in effect and incorporated into the coastal management program.

Sec. 46.41.050. Establishes objectives for the coastal management program that address the use, management, restoration, enhancement, development, and protection of the coastal environment; coordination among government agencies and citizens; and public and government participation in development and implementation of the coastal management program. The objectives also include the requirement that state resource agencies act in accordance with the coastal program.

Secs. 46.41.060-080. Establishes the criteria, requirements and process for development of district coastal management plans and implementation of the plans.

Sec. 46.41.090. Requires that municipalities and state resource agencies act in conformity with the approved district coastal management plans; and establishes superior court jurisdiction for enforcement of lawful orders of the Board and DCCED.

Secs. 46.41.100-170. Establishes the process for creation and functioning of coastal resource service areas in the unorganized borough.

Sec. 46.41.180. Nothing in the Act shall be construed to diminish state jurisdiction over land or water resources, submerged land, or navigable water; affect any state requirement imposed under a federal authorization or federal waiver of sovereign immunity; or diminish municipal zoning or planning authority.

Sect. 46.41.900. Definitions.

Alaska State Legislature

January 24, 2012

Senator Hollis French, Chair Senate Judiciary
Representative Carl Gatto, Chair House Judiciary

Chairmen:

As we understand, your committees have been chosen by the presiding officers to review the initiative regarding Coastal Zone Management.

We write this letter clarifying the intent in adding this provision to the legislation as co-prime sponsors two years ago.

The intent of the Legislative hearing language was to gauge the impact on the agencies charged with duties by an initiative. It has been our experience that, while well intended, language forwarded by initiative sponsors may not fully anticipate implementation challenges faced by regulators.

Therefore, we ask that you consider limiting testimony for this required meeting to the agencies affected by this measure.

While we understand the possible desire for public testimony on the issue, nothing precludes either of you (or other committees) from holding additional hearings.

Our offices can provide you with a copy of the relevant minutes from committee testimony on House Bill 36 regarding the intent of this section of the bill, if necessary.

Respectfully,

Representative Kyle Johansen

Representative Charisse Millett

Alaska State Legislature
State Capitol, Room 417
Juneau, AK 99801-1182

The Honorable Carl Gatto
Chairman, House Judiciary
Alaska State Legislature
State Capitol, Room 118
Juneau, AK 99801-1182

Dear Senator French/Representative Gatto,

Thank you for the opportunity to present the cost statement for the ACMP initiative before the Joint Judiciary Committee on February 6, 2012. The following is in response to questions posed by the Committee during the presentation for distribution to the members.

Questions from the Joint Judiciary Committee meeting Feb. 6

1. *Senator Wielechowski asked why a fiscal note for HB106 showed that the former ACMP federal program had shown $4.0 million in federal funding, while the statement of cost indicated available federal funding was $2.0 million.*

A fiscal note prepared on 05/13/2011 by the Senate Finance Committee for HB106 shows $4.0 million in federal funding for ACMP. (See Attachment 1) However, this level of federal funding appears well in excess of any recently available federal funding for coastal management programs.

Federal funding for Coastal Management Program administrative grants are governed by 16 U.S.C. § 1455. Since federal fiscal year 2008 (FFY2008) federal funding has come in three funding streams referred to as Sections 306/306A (tiered federal match up to 1:1); Section 309 (no match required); and the Coastal Non Point (CNP) or Section 310 (requires 1:1 match and not funded in FFY 2010).

Federal funding streams in the three programs are subject to maximum awards based upon the availability of federal funds. Alaska has typically received the maximum allowed for these programs. Below is a table showing federal funding from FFY2008-FFY2010. In these years, no more than $2.6 million was available for federal funding of state coastal management programs. Copies of the US

printed on recycled paper

Department of Commerce's program allocation letter are provided for your review. (Attachments 2-4.)

Federal Fiscal Year 2008	Section 306 Section 306A	Section 309	CNP	TOTAL Funds
Total Funding	$55,542,000	$10,000,000	$1,428,000	$66,970,000
Maximum State Funding	$1,967,000	$536,000	$42,000	$2,545,000
Alaska Allocation	**$1,967,000**	**$536,000**	**$42,000**	**$2,545,000**

Federal Fiscal Year 2009	Section 306 Section 306A	Section 309	CNP	TOTAL Funds
Total Funding	$56,079,000	$10,000,000	$2,345,000	$68,424,000
Maximum State Funding	$1,995,000	$536,000	$75,000	$2,606,000
Alaska Allocation	**$1,995,000**	**$536,000**	**$75,000**	**$2,606,000**

Federal Fiscal Year 2010	Section 306 Section 306A	Section 309	CNP	TOTAL Funds
Total Funding	$57,085,000	$10,000,000	$0	$67,085,000
Maximum State Funding	$2,030,000	$536,000	$0	$2,566,000
Alaska Allocation	**$2,030,000**	**$536,000**	**$0**	**$2,566,000**

As indicated during testimony, the total cost estimate of $5.4 million annually could be shared by the federal government provided that the state becomes eligible for federal funding. Uncertainty remains about the timing and availability of the federal funding stream, and all of the funds that would be requested for the budget are subject to legislative appropriation.

2. *Senator French and Representative Holmes asked for more specifics about the costs included in the overall cost estimate. They were specifically interested in information about ongoing versus one-time costs.*

Please see the summary below that itemizes costs by category. Comments about ongoing versus one-time costs are included in the narrative section. The estimates currently allow flexibility for the state to address one-time costs, however should the initiative pass, program implementation costs are likely to be different than those presented. All proposed costs will be subject to appropriation by the legislature.

CATEGORY	Description	
Personal Services	This expenditure would be an ongoing cost to support salaries and benefits for 34 full time positions ranging from a Division Director to an Office Assistant. The majority of the positions are Natural Resource Specialists supporting the envisioned Alaska Coastal Management Program In the first two years, it is likely that personal services costs will be lower than this estimate due to the program beginning from scratch. However, there will be many other activities associated with the initial gear up of the program though, so there is significant uncertainty about what percentage of these resources will be needed in the first two years.	$3,260,000
Travel	The projected travel expenditure would support employee and board related in-state and out of state travel to coastal districts and includes hotel, per diem, airfare and reimbursement for Alaska Coastal Management Program district assistance, staff training, mediation, public education, conferences and other travel supporting the program. This estimate anticipates increased travel costs in the first two years following the establishment of the board in order to assist coastal districts with their plans and advocate for the federal approval of the plan in Washington DC. Some portion of these travel resources would likely be redeployed to other program activities after the program is approved.	$267,900
Services	This expenditure is an ongoing cost to support contracts in the form of Reimbursable Services Agreements (RSA) to agencies participating in the Alaska Coastal Management Program. These contracts would support the implementation of the Alaska Coastal Management Program by the participating state agencies, coastal management areas and other contractors. This estimate also supports purchased services from other state agencies including centralized telecommunication, mail and human resource services, legal services, professional services to support monitoring & compliance activities and development and implementation activities for the Alaska Coastal Management Program. In the initial years, additional contractual services will be needed to draft and review implementing program regulations, and other start up activities.	$1,815,300
Commodities	This is an ongoing expenditure estimate that supports purchases related to office supplies, office furnishings and equipment, software as well as minor repairs to office equipment. In the first two years, actual costs in this category are likely to be significantly	$56,800

	higher as the office acquires all of the office furnishings, office equipment and other commodities necessary to build an office from scratch.	

3. *Senator French asked for more specificity about the costs included in the estimate of costs to support implementation of the 13-member Coastal Policy Board governance structure.*

The estimate of additional costs was based largely on cost estimates provided by the Department of Natural Resources (DNR) in their fiscal note for HB106 dated 04/15/2011. (Attachment 5) This fiscal note was chosen as a basis due to its somewhat similar nature to the initiative envisioned program. Comments on whether these are expected to be ongoing or one-time costs are also included.

As indicated during the testimony, these estimates assume a program that is substantially similar to the previous program with a 13-member board meeting in person 4 times annually. Significant uncertainty remains about the program that the board would ultimately implement and the associated costs. It should be noted that not all of the increased costs are directly attributable to the board members.

The costs in the table below are presented as subsets of the estimates presented in the prior table.

CATEGORY	Description	
Personal Services	One additional position was added to the previously configured program to cover the additional work associated with the administration of the Alaska Coastal Policy Board and coordinating district planning functions and information sharing. This is an ongoing cost and would be directly attributable to the Coastal Policy Board.	$109,800
Travel	This estimate anticipates increased travel costs in the first two years following the establishment of the board in order to assist coastal districts with their plans and advocate for the federal approval of the plan in Washington DC. These travel resources would likely be redeployed to other program related travel or review activities after the program is approved. These costs are not directly attributable to the addition of a board. This expenditure estimate also includes $60,000 in ongoing travel costs associated with four annual in-person meetings of the 13-member Alaska Coastal Policy Board and two staff members at approximately $1,000 per trip. This is an ongoing cost directly attributable to addition of a Coastal Policy Board.	$164,000

Services	This expenditure supports an additional $300,000 in ongoing services agreements with other state agencies services that DNR indicated would be needed to successfully implement the ACMP program. This would be an ongoing cost. These costs are not directly attributable to the addition of a board. The estimates include $60.000 estimate for regulations review by the Department of Law that would be of limited duration. Length of need is uncertain and dependent upon the complexity of the regulations and the time it takes to promulgate and implement them, this could be a cost for 2-4 years, however these resources would likely be redeployed to reviews and other program support after that time. Other ongoing services costs included $20,000 in postage, teleconference services, and other miscellaneous board and coastal district support such as conducting elections in coastal districts. This would be an ongoing cost directly attributable to the addition of the board.	$380,000
Commodities	This estimate includes some $5,600 in one-time costs such as the purchase of a recorder and sound equipment for the board. Ongoing costs include $10,000 in supplies needed to support the presentation of materials at the board meetings. These costs are directly attributable to the addition of a board.	$15,600

Part-time							
Temporary							

Reason For Change:

CC: This fiscal note combines the additional funding requested with FY12 program funding removed by the Senate. Additionally, this fiscal note is updated to reflect changes made in the House Finance committee substitute.

This revised fiscal note includes $1.36 million capital authorization (federal) for operating grants to communities so they have the funding necessary for local participation.

Analysis:

NOTE: The base budget ($4,691.7 and 33 positions) was removed from the Senate version of the FY12 operating budget, making it subject to conference committee. The annual capital project request for the federal grant funds that are shared with DCCED for grants to communities and for DCCED's administration of the grants was removed from the Senate version of the FY12 Capital Budget making it subject to conference committee.

The Alaska Coastal Management Program (ACMP) will automatically terminate on July 1, 2011 (SLA2005, CH31, Sec 22). CSHB106(FIN) would extend the termination date to July 1, 2017.

Submitted By: Senate Finance for SCS CSHB 106(FIN)

Prepared By: Conference Committee

Date: 05/04/2011

This fiscal note reflects the increased fiscal impacts due to the additional Division of Coastal and Ocean Management (DCOM) duties, including the administration and implementation of the Alaska Coastal Policy Board (CPB). Those increased fiscal impacts are detailed below:

Personal Services
One additional position, a Project Coordinator (range 20), will be required to cover the additional work associated with the CPB and the coordination of district planning functions and information sharing.

Travel
The CPB will meet four times in-person in the first two years following establishment of the board, and will meet in-person twice annually after that. The CPB will need to meet more frequently in-person for the first two years in order to establish board protocols, review coastal district plans, and address issues of interest to ACMP participants. CPB travel includes nine members and two DCOM support staff.

In addition, recognizing coastal districts will be amending their district plans based on CSHB106(FIN), two DCOM staff will travel 5-6 different districts per year for four years to assist the districts with their plan amendments.

Five DCOM staff will travel to regional locations for two years to provide ACMP training and education on program changes and the revised ACMP implementing regulations.

The DCOM Director will travel to Washington, DC three times annually for two years to work with NOAA on program change approvals and NEPA requirements.

Contractual
The CPB will meet two times annually by teleconference, with each 2-day teleconference lasting 8 hours each day (including 20 phone lines). CSHB106(FIN) will require a substantial revision to all three chapters of the implementing ACMP regulations (11 AAC 110, 112, and 114). Contractual services will be required to develop and complete those revisions, including the Department of Law final review. The coordination and distribution of district planning and consistency review data and information requires postage and other fees. DCOM will also reimburse state agencies for their participation and implementation of the ACMP program.

Supplies
Supplies will be required for supporting the CPB (dictation/recorder equipment, packet materials and binders) and support staff (office

MEMORANDUM FOR: Commonwealth, State, and Territorial Coastal Program Managers

THROUGH: Eric Wolfe
Acting Chief Financial Officer
National Ocean Service

FROM: John R. King
Chief, Coastal Programs Division

SUBJECT: FY 2008 Final Funding Guidance and Allocations
Coastal Zone Management Act Sections 306/306A, 309 and 310

This final funding guidance is based on the funding levels contained in the Consolidated Appropriations Act, 2008 (P.L. 110-161). This Act contains funding for sections 306/306A; 309; and 310. This memorandum provides guidance on the allocation and uses of these funds. Questions or comments should be directed to me, and I can be reached at (301) 713-3155 extension 188 or via e-mail at john.king@noaa.gov.

Funding Facts

	2007	2008
Section 306/306A/309*	$ 65,780,000	$ 64,358,577
CNPCP Implementation**	0	1,974,000
Deobligated Funds***	0	1,183,423
Totals	$ 65,780,000	$ 67,516,000

* - Figures reflect the FY08 Appropriation less assessments for the Hollings Scholarship program
**- Figures reflect the FY08 Appropriation less assessments for the Hollings Scholarship program and administrative costs.
*** - Total deobligated funds added to section 306 funding.

Printed on Recycled Paper

As you can see from the above table, appropriations for sections 306/309 are down by approximately $1.4M. This is partially offset by the availability of $1.2M in prior year deobligations. There is also almost $2M available for the Coastal Nonpoint Pollution Control Program.

Section 306/306A and Section 309 Allotments

For FY 2007, there is $65,542,000 in appropriated and deobligated funds available for sections 306/306A and 309. The CZMA requires that between ten and twenty percent of the section 306/309 appropriation be directed toward section 309, up to a maximum of $10,000,000. We will direct the statutory maximum of $10,000,000 (15.1%) of the appropriation toward section 309, leaving $55,542,000 for section 306/306A. The section 306/306A funds require a 1 to 1 match and are available to states with federally-approved coastal zone management programs. State allocations are provided in the attached table (attachment 1).

The states that have successfully completed section 309 assessments and strategies are eligible for section 309 funding. These funds require no match. All of the section 309 funds will be awarded through the weighted formula. The primary focus of this year's section 309 effort will be to implement the third year of the new enhancement strategies.

Implementation of Section 6217 Programs

There is a total of $1,974,000 available for the Coastal Nonpoint Program. The funds are being allocated as follows: 1. $42,000 for each state with a conditionally or fully approved 6217 program; 2. an additional $26,000 for each state with a fully approved program.

As in past years, Congress has provided these funds to support program implementation activities. Any remaining program development activities (i.e., addressing remaining conditions of approval) should be supported with the $100,000 in section 319 Clean Water Act funding identified initially in EPA's supplemental FY 2001 grants guidance for this purpose. Section 309 funds may also be used to support program development activities and states can utilize section 306 funding to support a variety of CNPCP development and implementation activities.

The CNPCP implementation funds require a 1 to1 match. The state coastal zone management lead agency is the only entity eligible to receive these awards, and may in turn make sub-awards. For states with conditional approval, these funds must be used to implement the approved portions of the CNPCP.

Application Procedures

The current application schedule is attached. July 1 start date awards are due in OCRM by April 10, 2008; and October 1 start date awards are due in OCRM by May 20, 2008 (attachment 2). This schedule may be revised pending discussions with the Grants Management Division. As with FY 2007, use of the electronic grants application system is required.

Notice Information

According to the Coastal Zone Management Act of 1972, as amended (CZMA), the Secretary of Commerce may make grants to eligible coastal states. Coastal states are defined as states that are in, or bordering on, the Atlantic, Pacific, or Arctic Oceans, the Gulf of Mexico, Long Island Sound, or one or more of the Great Lakes. For the purposes of the CZMA, the term also includes Puerto Rico, the U.S. Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa. This notice is being distributed to all eligible parties, and substitutes for the Federal Register notice required for Federal grant programs.

MEMORANDUM FOR: Commonwealth, State, and Territorial Coastal Program Managers

THROUGH: Chris Cartwright, Chief Financial Officer
National Ocean Service

FROM: John R. King
Chief, Coastal Programs Division

SUBJECT: FY 2009 Final Funding Guidance and Allocations
Coastal Zone Management Act Sections 306/306A, 309 and 310

Given the lateness of the appropriation and the need to get the funds out to the recipients, we are forgoing the normal process of issuing draft funding guidance. This final funding guidance is based on the funding levels contained in the Consolidated Appropriations Act, 2008 (P.L. 110-161). This Act contains funding for sections 306/306A; 309; and 310. This memorandum provides guidance on the allocation and uses of these funds. Questions or comments should be directed to me, and I can be reached at (301) 713-3155 extension 188 or via e-mail at john.king@noaa.gov.

In spite of the late appropriation, our goal is to get you your funds in a timely manner. To meet this goal, we must keep an application schedule similar to last year (Attachment 2). We recognize that this is a difficult schedule, however, it is critical that we get applications in as quickly as possible, so that we can get funds out the door in time to meet your start dates. We will work with you to get this done as efficiently as possible.

* - Figures reflect the Appropriation less assessments for the Hollings Scholarship program
**- Figures reflect the Appropriation less assessments for the Hollings Scholarship program and administrative costs.
*** - Total deobligated funds added to section 306 funding in 2008

Printed on Recycled Paper

As you can see from the above table, appropriations for sections 306/309 are up by approximately $1.4M, however, deobligated funds are down by almost $1.2M. There is also almost $3.4M available for the Coastal Nonpoint Pollution Control Program.

Section 306/306A and Section 309 Allotments

For FY 2009, there is $66,079,000 in appropriated funds available for sections 306/306A and 309. The CZMA requires that between ten and twenty percent of the section 306/309 appropriation be directed toward section 309, up to a maximum of $10,000,000. We will direct the statutory maximum of $10,000,000 (15.1%) of the appropriation toward section 309, leaving $56,079,000 for section 306/306A. The section 306/306A funds require a 1 to 1 match and are available to states with federally-approved coastal zone management programs. State allocations are provided in the attached table (attachment 1).

The states that have successfully completed section 309 assessments and strategies are eligible for section 309 funding. These funds require no match. All of the section 309 funds will be awarded through the weighted formula. The primary focus of this year's section 309 effort will be to continue developing program changes outlined in the current strategies and to begin developing revised assessments and strategies.

Implementation of Section 6217 Programs

There is a total of $3,362,000 available for the Coastal Nonpoint Program. The funds are being allocated as follows: 1. $2,345,000 allocated by formula to each state with a conditionally or fully approved 6217 program. Each state will see an increase of at least $19,000 over FY08 in these funds. 2. an additional $46,200 for each state with a fully approved program.

As in past years, Congress has provided these funds to support program implementation activities. Please consult the CNP Funding Guidance for additional information. (http://coastalmanagement.noaa.gov/nonpoint/docs/6217grantsguidance_FY06Final.pdf)

Any remaining program development activities (i.e., addressing remaining conditions of approval) should be supported with the $100,000 in section 319 Clean Water Act funding identified initially in EPA's supplemental FY 2001 grants guidance for this purpose. Section 309 funds may also be used to support program development activities and states can utilize section 306 funding to support a variety of CNPCP development and implementation activities.

The CNPCP implementation funds require a 1 to1 match. The state coastal zone management lead agency is the only entity eligible to receive these awards, and may in turn make sub-awards. For states with conditional approval, these funds must be used to implement the approved portions of the CNPCP.

Application Procedures

The current application schedule is attached. July 1 start date awards are due in OCRM by April 3, 2009; and October 1 start date awards are due in OCRM by May 20, 2009 (attachment 2). As with FY 2008, use of the electronic grants application system is required.

Notice Information

According to the Coastal Zone Management Act of 1972, as amended (CZMA), the Secretary of Commerce may make grants to eligible coastal states. Coastal states are defined as states that are in, or bordering on, the Atlantic, Pacific, or Arctic Oceans, the Gulf of Mexico, Long Island Sound, or one or more of the Great Lakes. For the purposes of the CZMA, the term also includes Puerto Rico, the U.S. Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa. This notice is being distributed to all eligible parties, and substitutes for the Federal Register notice required for Federal grant programs.

UNITED STATES DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration
NATIONAL OCEAN SERVICE
OFFICE OF OCEAN AND COASTAL RESOURCE MANAGEMENT
Silver Spring, Maryland 20910

MAR - 3 2010

MEMORANDUM FOR: Commonwealth, State, and Territorial Coastal Program Managers

THROUGH: Chris Cartwright, Chief Financial Officer
National Ocean Service

FROM: John R. King
Chief, Coastal Programs Division

SUBJECT: FY 2010 Draft Funding Guidance and Allocations
Coastal Zone Management Act Sections 306/306A and 309

This draft funding guidance is based on the funding levels contained in the Consolidated Appropriations Act, 2010 (P.L. 111-117). This Act contains funding for sections 306/306A and 309. This memorandum provides guidance on the allocation and uses of these funds. Questions or comments should be directed to me, and I can be reached at (301) 713-3155 extension 188 or via e-mail at john.king@noaa.gov. Comments are due by March 8, 2010.

Our goal is to get you your funds in a timely manner, and to meet this goal, we must keep an application schedule similar to last year (Attachment 2). We recognize that this is a difficult schedule, however, it is critical that we get applications in as quickly as possible, so that we can get funds out the door in time to meet your start dates. We will work with you to get this done as efficiently as possible.

Funding Facts

	2009	2010***
Section 306/306A/309*	$ 66,079,000	$ 68,077,854
CNPCP Implementation**	3,362,000	0
Deobligated Funds	0	7,146
Totals	$ 69,441,000	$ 68,085,000

* - Figures reflect the Appropriation less assessments for the Hollings Scholarship program
**- Figures reflect the Appropriation less assessments for the Hollings Scholarship program and administrative costs.
*** - Includes report language addressing the increase in 306/309 funding

Printed on Recycled Paper

As you can see from the above table, appropriations for sections 306/309 are up by approximately $2.0M, however, there is no funding available for the Coastal Nonpoint Pollution Control Program. There is also a small amount of deobligated funds available for re-allocation.

Report Language

Report language accompanying the FY10 Appropriations Act requires that a portion of the increase in the Coastal Zone Management Grants funding be used for a competitive grants program. Specifically, the report states:

> *The conference agreement provides $2,000,000 above the request, and NOAA is directed to use a portion of the increase provided for a competitive program for efforts to modernize and improve State information systems to assess, track and manage permitting and land-use tracking procedures. (* FY2010 Appropriations Conference Report (p27))

In addition, the Appropriations Act continues to include the following language regarding allocations:

> *Provided further, That in allocating grants under sections 306 and 306A of the Coastal Zone Management Act of 1972, as amended, no coastal State shall receive more than 5 percent or less than 1 percent of increased funds appropriated over the previous fiscal year.* (FY2010 Appropriations Act (p17))

Proposed Approach

Our challenge is to meet both existing statutory and regulatory requirements, and Congressional direction contained in the Conference Report. To do this, we are proposing to allocate $1,000,000 of the funding increase towards section 306 allocations, and $1,000,000 of the funding increase towards a competitive process for the purposes described in the Conference Report. There will be a separate call for proposals for the competitive funds, as well as separate cooperative agreements. This approach meets the requirements described above, and allows the standard annual CZM cooperative agreement process to move forward in a timely manner.

Section 306/306A and Section 309 Allotments

For FY 2010, there is $67,085,000 in appropriated and deobligated funds available for sections 306/306A and 309. The CZMA requires that between ten and twenty percent of the section 306/309 appropriation be directed toward section 309, up to a maximum of $10,000,000. We will direct the statutory maximum of $10,000,000 (14.9%) of the appropriation toward section 309, leaving $57,085,000 for section 306/306A. The section 306/306A funds require a 1 to 1 match and are available to states with federally-approved coastal zone management programs. State allocations are provided in the attached table (attachment 1).

The states that have successfully completed section 309 assessments and strategies are eligible for section 309 funding. These funds require no match. All of the section 309 funds will be awarded through the weighted formula. The primary focus of this year's section 309 effort will

be to develop revised assessments and strategies.

Implementation of Section 6217 Programs

No funding was appropriated for this program for FY 2010. We understand that this presents difficulties for some states, and we will provide flexibility in funding CNP implementation projects with 306 or 309 funds.

Application Procedures

The current application schedule is attached. July 1 start date awards are due in OCRM by April 5, 2010; and October 1 start date awards are due in OCRM by May 20, 2010 (attachment 2). As with FY 2009, use of the electronic grants application system is required.

NOAA Strategic Priorities

NOAA is currently in the process of finalizing its "Next Generation Strategic Plan" intended to guide Agency actions through 2017. The draft goals articulated in this plan align nicely with CZMA goals, OCRM office priorities, and the priorities of many of your programs. This provides a good opportunity to demonstrate the connection between the CZM program and funding and NOAA priorities. Towards this end, we thought it worthwhile to provide a brief description of the NOAA strategic priorities, as they will likely provide greater visibility for the CZM program and new opportunities for states to access a broader array of NOAA resources.

NOAA intends to focus its efforts on the following four (4) overarching goals:

1. Climate Adaptation & Mitigation: An informed society anticipating and responding to a changing climate and its impacts.
2. Weather Resilience: Society prepares for and responds to high-impact events that jeopardize individuals, government, and businesses.
3. Sustainable Coastal Communities and Economies: Environmentally and economically sustainable oceans, coasts, and Great Lakes communities and ecosystem services.
4. Sustainable and Resilient Fisheries, Species, and Habitats: Biodiversity protected and restored and fisheries sustained within healthy and productive ecosystems

By using the following means, familiar to coastal programs, to improve management of our coasts and oceans:

- Promoting partnerships and collaboration at all levels
- Engaging regional ocean governance bodies
- Enabling data integration and delivery
- Improving tools and technology for decision support
- Using local expertise and ecological knowledge

We anticipate that OCRM's support of coastal program engagement in regional ocean governance, climate change adaptation, and the development and use of coastal and marine spatial planning will support the NOAA strategic priorities. We encourage you to consider these priorities in the development of your annual work programs; 309 Assessments and Strategies; and in reporting your program's success stories (Section C of the Performance Reporting Guidelines). Additional information related to NOAA's Strategic Plan can be found here: http://www.ppi.noaa.gov/ngsp.html; and the current OCRM strategic plan can be found here: http://coastalmanagement.noaa.gov/resources/docs/ocrm_strategicplan.pdf.

Notice Information

According to the Coastal Zone Management Act of 1972, as amended (CZMA), the Secretary of Commerce may make grants to eligible coastal states. Coastal states are defined as states that are in, or bordering on, the Atlantic, Pacific, or Arctic Oceans, the Gulf of Mexico, Long Island Sound, or one or more of the Great Lakes. For the purposes of the CZMA, the term also includes Puerto Rico, the U.S. Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa. This notice is being distributed to all eligible parties, and substitutes for the Federal Register notice required for Federal grant programs.

Why this fiscal note differs from previous version

The fiscal note is updated to reflect changes made in the House Finance committee substitute.
(1) Based on language in the CSHB106 (FIN), this fiscal note reflects the removal of one full time Natural Resource Specialist II position and only an additional $10.0 in supplies for dissemination of projects in review by hard copy.

NOTE: The base budget ($4,691.7 and 33 positions) was removed from the Senate version of the FY12 operating budget, making it subject to conference committee. This fiscal note also includes the annual capital project request for the federal grant funds that are shared with DCCED for grants to communities and for DCCED's adminstration of the grants which was removed from the budget making it subject to conference committee.

FISCAL NOTE #9

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 106(FIN)

Analysis

NOTE: The base budget ($4,691.7 and 33 positions) was removed from the Senate version of the FY12 operating budget, making it subject to conference committee. The annual capital project request for the federal grant funds that are shared with DCCED for grants to communities and for DCCED's administration of the grants was removed from the Senate version of the FY12 Capital Budget making it subject to conference committee.

The Alaska Coastal Management Program (ACMP) will automatically terminate on July 1, 2011 (SLA2005, CH31, Sec 22). CSHB106(FIN) would extend the termination date to July 1, 2017.

This fiscal note reflects the increased fiscal impacts due to the additional Division of Coastal and Ocean Management (DCOM) duties, including the administration and implementation of the Alaska Coastal Policy Board (CPB). Those increased fiscal impacts are detailed below:

Personal Services
One additional position, a Project Coordinator (range 20), will be required to cover the additional work associated with the CPB and the coordination of district planning functions and information sharing.

Travel
The CPB will meet four times in-person in the first two years following establishment of the board, and will meet in-person twice annually after that. The CPB will need to meet more frequently in-person for the first two years in order to establish board protocols, review coastal district plans, and address issues of interest to ACMP participants. CPB travel includes nine members and two DCOM support staff.

In addition, recognizing coastal districts will be amending their district plans based on CSHB106(FIN), two DCOM staff will travel 5-6 different districts per year for four years to assist the districts with their plan amendments.

Five DCOM staff will travel to regional locations for two years to provide ACMP training and education on program changes and the revised ACMP implementing regulations.

The DCOM Director will travel to Washington, DC three times annually for two years to work with NOAA on program change approvals and NEPA requirements.

Contractual
The CPB will meet two times annually by teleconference, with each 2-day teleconference lasting 8 hours each day (including 20 phone lines). CSHB106(FIN) will require a substantial revision to all three chapters of the implementing ACMP regulations (11 AAC 110, 112, and 114). Contractual services will be required to develop and complete those revisions, including the Department of Law final review. The coordination and distribution of district planning and consistency review data and information requires postage and other fees. DCOM will also reimburse state agencies for their participation and implementation of the ACMP program.

Supplies
Supplies will be required for supporting the CPB (dictation/recorder equipment, packet materials and binders) and support staff (office equipment).

PRESENTATION
ALASKA CHILDREN'S JUSTICE ACT TASK FORCE

<TARGET><BILL></BILL><SUBJECT>2-08-12 PRESENTATION ALASKA CHILDREN'S JUSTICE ACT TASK FORCE</SUBJECT><COMM>SJUD27</COMM></TARGET>

Alaska Children's Justice Act Task Force

Presentation to Joint Senate Judiciary and HSS Committees, Alaska Legislature

February 8, 2012

hss.state.ak.us/ocs/ChildrensJustice/default.htm

OVERVIEW OF 2012 PRESENTATION

- Background on CJA: Who we are and what we do
- Child maltreatment in Alaska
- Proposed legislative changes

OVERVIEW OF CJA TASK FORCE

- Background: Founded 2002
  - Federal mandate: Child Abuse Prevention and Treatment Act (CAPTA) 42 U.S.C. 5101 and Victims of Crime Act 42 U.S.C. 10601
  - Multidisciplinary/statewide representation
  - Federally funded based on population

Mission

- Identify areas where improvement is needed in the statewide response to child maltreatment, particularly child sexual abuse, make recommendations and take actions to improve the system

Task Force Projects

- Develop and distribute better data
  - Collaboration with DHSS, Maternal Child Health Epidemiology Unit - Surveillance of Child Abuse and Neglect (SCAN) program
- Improve system response
  - Support the development of Child Advocacy Centers (CACs) and Multidisciplinary Teams (MDTs)
  - Support innovative programs
  - Support education and training
- Make recommendations for law changes

IMPROVE THE SYSTEM RESPONSE

Support the development of CACs and MDTs

- Alaska now has 10 regional CACs and 2 satellite centers
- Publications:
  - Guidelines for the Multidisciplinary Response to Child Abuse in Alaska
  - Standardized medical documentation forms

Support Innovative Programs

- Pathway to Hope
  - Tribal facilitator curriculum to assist community healing from intergenerational trauma due to sexual abuse
- Sexual exploitation of children protection
  - Internet Crimes Against Children
  - NetSmartz
  - In-school education programs

Education and training

- Educate mandatory reporters
  - Developed Mandatory Reporter Training CD
- Encourage professional development
  - Scholarships for trainings
  - Sponsor biennial Alaska Child Maltreatment Conference (collaboration with the Alaska Children's Alliance)
- Yearly legislative presentations

Yearly legislative presentations

- Children's Caucus
- Legislative committee presentations
- 2012 presentation to Senate Judiciary & HSS
  - Child maltreatment in Alaska
  - Proposed legislation

Child maltreatment in Alaska

- Data
- Fiscal impact

Maltreatment-Related Child Deaths

Deaths occurring between 2000-2008,
children ages 0 – 9 years

- Approximately **1 out of everv 5** (20%) Alaskan child deaths is maltreatment-related
  - ~ **1 out of everv 4** (25%) for Alaska Native children
- Nearly **3 out of everv 4** (~75%) maltreatment-related deaths occur in infants

Maltreatment - All Types

- In 2008 ~ **12,400 Alaskan children** were likely victims of at least one incident of maltreatment
  - **24%** had at least one incident confirmed
    - Substantiated or conviction
    - "Tip of the iceberg"
  - As many as **34 children a day** are likely maltreated, or **3,000** during this 90 day legislative session

Maltreatment - Neglect

- In 2008 ~ **8,900 Alaskan children** were the likely victims of at least one incident of neglect
  - **25%** had at least one incident confirmed
  - As many as **25 children a day** ,or **2,200** during this 90 day legislative session

Maltreatment – Physical Abuse

- In 2008 ~ **2,700 Alaskan children** were likely victims of at least one incident of physical abuse
  - **22%** had at least one incident confirmed
  - As many as **7 children a day**, or **630** during this 90 day legislative session

Maltreatment – Sexual Abuse

- In 2008 ~ **1,900 Alaskan children** were likely victims of at least one incident of sexual abuse
  - Among the children experiencing sexual abuse, **16%** had at least one incident confirmed
  - ~ **As many as 5 children a day**, or **450** during this 90 day legislative session

What does this cost?

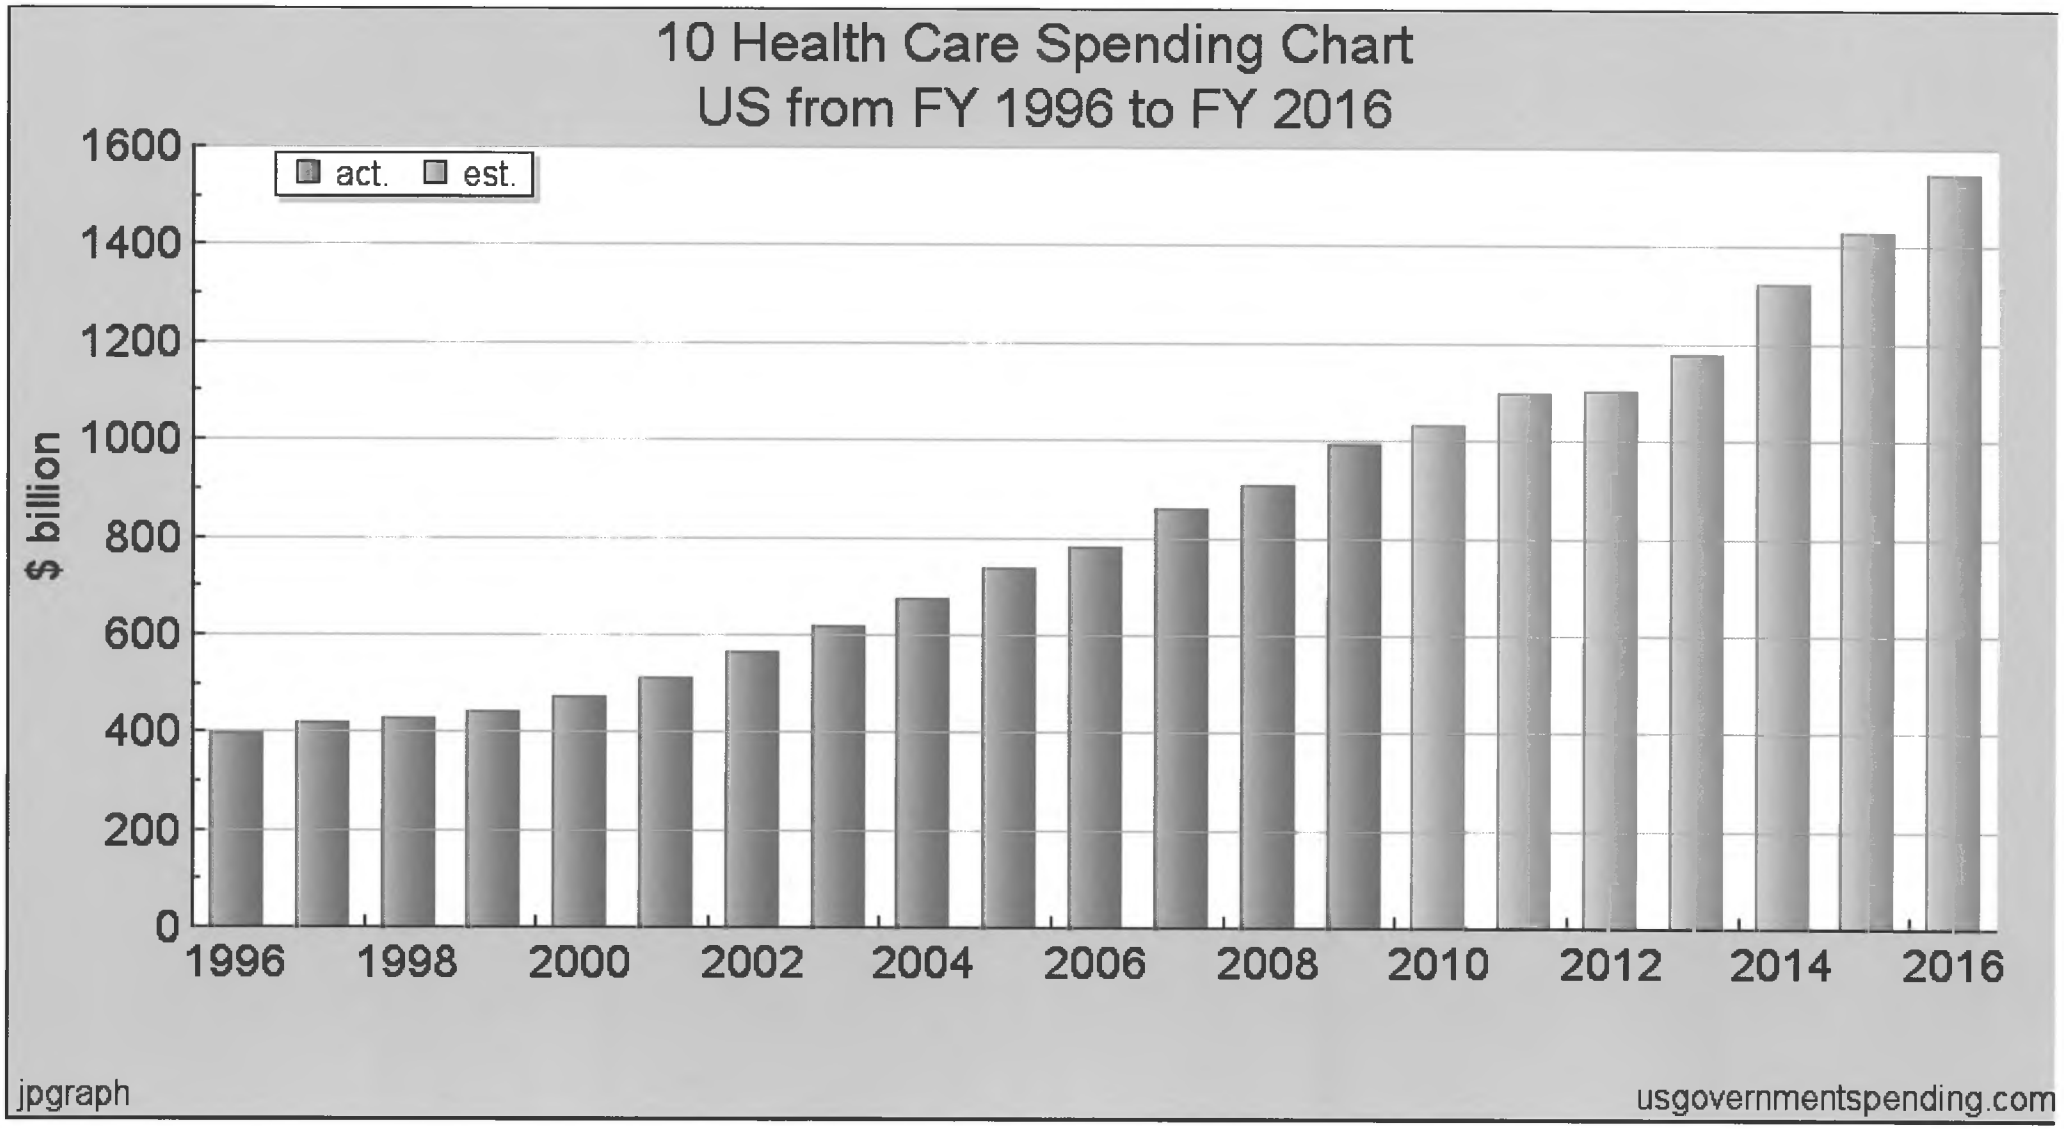
- Medical & mental health care
  - Short and long term
- Child protection system
- Criminal justice system
- Future earnings
- Quality of life

Health Care Costs

- Adverse Childhood Experiences Studies: "Turning Gold Into Lead"
- "…much of what is recognized as common in adult medicine is the result of what is not recognized in childhood."
- Link to ALL most common causes of adult disease and death in US today

www.cdc.gov

Health Care Costs



Average lifetime cost per case of fatal child maltreatment

• Medical costs	• $ 14,000
• Productivity losses	• $1,258,800
• Total	• $1,272,900

2012 The economic burden of child maltreatment in the United States Child Abuse and Neglect

Annual economic burden to Alaskans: fatal child maltreatment (infants only)

• Medical costs	• $ 140,000
• Productivity losses	• $12,588,000
• Total	• $12,729,000

Average lifetime cost per case of nonfatal child maltreatment

• Short-term health care costs	• $ 32,648
• Long-term health care costs	• $ 10,530
• Productivity losses	• $144,360
• Child welfare costs	• $ 7,728
• Criminal justice costs	• $ 6,747
• Special education costs	• $ 7,999
• Total	• $210,012

Estimated annual economic burden for Alaskans

• Short-term health care costs	• $97 – 405 million
• Long-term health care costs	• $31 - 130 million
• Productivity losses	• $430 million -1.8 billion
• Child welfare costs	• $23 – 96 million
• Criminal justice costs	• $20 -84 million
• Special education costs	• $24 – 99 million
• Total	• $625 million - 2.6 billion

based on ~3000 - 12,400 children annually

SYSTEM IMPROVEMENT THROUGH CHANGES TO OUR CRIMINAL STATUTES

RECOMMENDATION #1

Modify assault statutes to create broader criminal liability for assaults to children

Problem: Required for felony prosecution

- Serious physical injury OR
- Multiple events OR
- Reasonable caregiver would seek medical diagnosis and treatment

Problem: Definition of "serious physical injury"

- "**(A)** physical injury caused by an act performed under circumstances that create a substantial risk of death; or
- **(B)** physical injury that causes serious and protracted disfigurement, protracted impairment of health, protracted loss or impairment of the function of a body member or organ, or that unlawfully terminates a pregnancy."

Solutions: New definition "serious bodily injury to a child"

- "Serious bodily injury to the child" includes, but is not limited to, second- or third-degree burns, a fracture of any bone, a concussion, subdural or subarachnoid bleeding, retinal hemorrhage, cerebral edema, brain contusion, strangulation, injuries to the skin that involve severe bruising or the likelihood of permanent or protracted disfigurement, including those sustained by striking children with objects, or other physical injury that results in significant physical injury to the child

Solutions

- Apply the proposed "serious bodily injury" definition to
  - children under 12
  - children under age 16 who are mentally or physically impaired
- Add new theories to all three felony assault statutes that incorporate the definition of serious bodily injury to a child

Post-conviction recommendation:

- To recognize mental harm resulting from physical injury:
- Create a sentencing aggravator if the serious bodily injury caused to a child resulted in significant mental injury to the child

RECOMMENDATION #2

STRENGTHEN STATUTES REGARDING EXPOSURE OF CHILDREN TO DRUGS

Problem:

- Difficult to prosecute person who has exposed a child to drugs to extent that child tests positive for drug
- Examples: meth lab, leaving drugs laying around, using drugs around child

Solution:

- Amend endangering the welfare of a minor statute by creating 2 new subsections to:
  - Penalize reckless exposure of child to controlled substance and, because of exposure, the child tests positive for the controlled substance
  - Penalties vary depending on dangerousness of drug

Section 5, subsections (b)(2) and (g)

Problem:

- Inability to prosecute for indirect exposure to dangerous chemicals used in drug labs

Solution

- Penalize reckless exposure of child to chemicals used in meth labs

Section 5, subsections (b)(4)

RECOMMENDATION #3

INCREASE PENALITES WHEN A PARENT INTENTIONALLY WITHHOLDS ADEQUATE FOOD OR LIQUIDS

Problem:

- Current punishment for criminal nonsupport is a misdemeanor
- Intentional failure to provide adequate food or liquids to a child should be a felony

Solutions:

- Modify criminal nonsupport to create a class C felony for parent or guardian who intentionally fails to provide adequate food and liquids to the child
- Standard for determination: “a reasonable person would conclude the child was not receiving adequate food or liquids”

RECOMMENDATION #4

CREATE A CRIMINAL LAW THAT PROHIBITS AN INCARCERATED PERSON FROM CONTACTING A VICTIM OR WITNESS

Problem:

- Current statutes do not fully protect a child victim from influences and pressure prior to trial and sentencing
  - Only after sentencing
- Examples:
  - Incarcerated accused sex offender can contact under age victim
  - 3rd party can forward phone calls, letters from defendant to victim

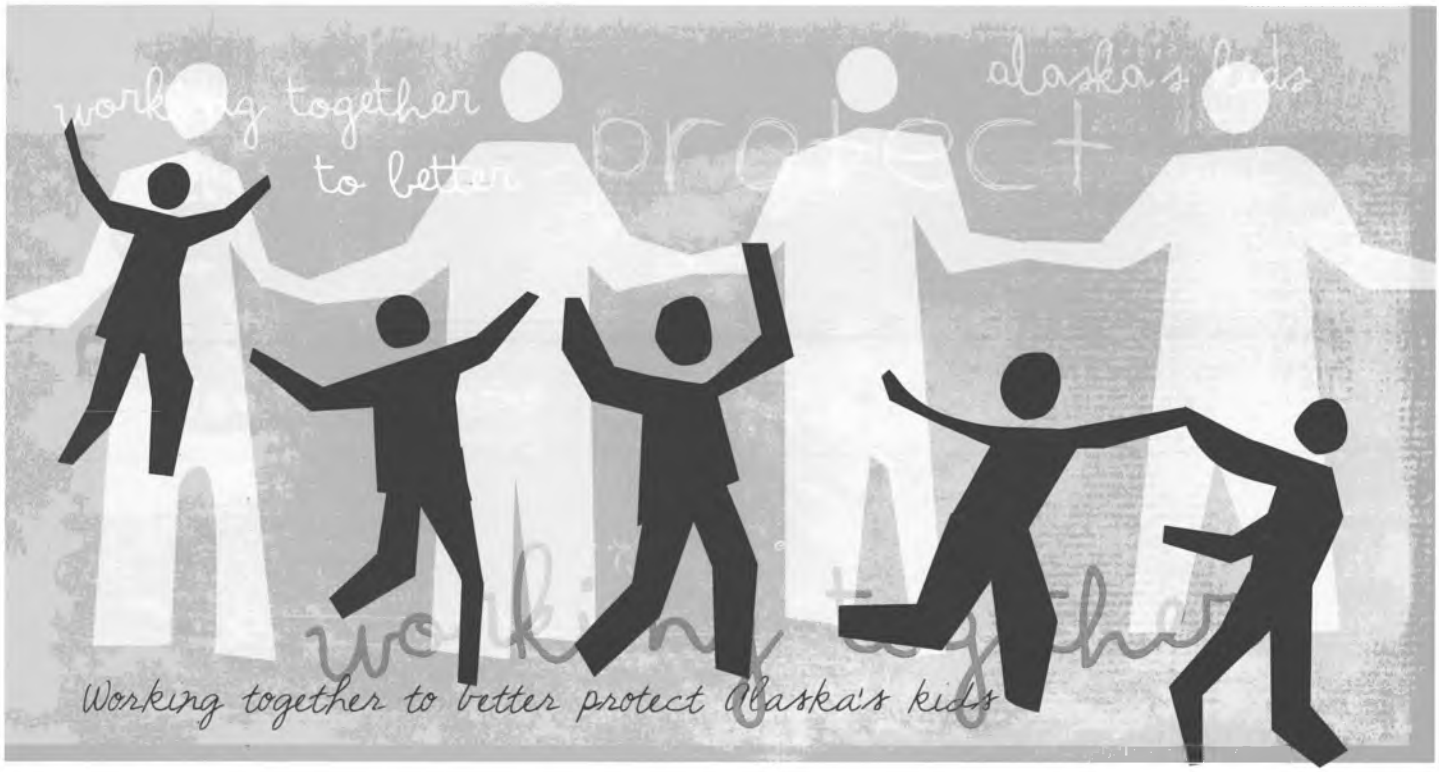
Solutions:

- Add two new theories to unlawful contact statute to:
  - Penalize a person incarcerated before trial or sentencing for contacting a victim or witness of the offense in violation of no-contact order
  - Penalize person who assists the defendant in engaging in such contact

Alaska Children's Justice Act Task Force

- Problem: need legislative changes to enhance safety of Alaskan children
- Solution: introduce and pass proposed legislation

We need champions for children!



GUIDELINES FOR THE MULTIDISCIPLINARY RESPONSE TO CHILD ABUSE IN ALASKA

A Project of the
Alaska Children's Justice Act Task Force

Alaska Children's
Justice Act Task Force

This document is intended to assist the dedicated people who participate in the evaluation of children for whom there is a concern for maltreatment: child protection, law enforcement, medical and mental health, Child Advocacy Centers (CACs), tribes/tribal organizations, victim advocates, prosecutors and others. The work is hard and often under-appreciated, but there is little we do that is more important than making a difference in the life of a child.

SECTION ONE: OVERVIEW

Guiding Principles

- These guidelines are intended to be used in the best interests of children. Every effort should be made to avoid re-traumatizing a child who has possibly suffered abuse.

- Child abuse occurs in families from every race, culture, religion, economic status and educational level. Children from infants to teens, both boys and girls, are victims of child abuse.

- Child maltreatment has life-long ramifications that include adverse outcomes in future physical and mental health, substance abuse, suicide, criminal behavior, productivity, and a host of other societal ills with enormous direct and indirect costs.[1], [2]

- A multidisciplinary approach affords the best opportunity for breaking the cycle of child abuse and neglect through effective investigations, holding offenders accountable, access to medical and mental health evaluation and treatment, and assistance to support families in providing safe and nurturing environments for their children to heal from abuse.

- Response to child abuse in small rural communities presents unique obstacles that can complicate the investigation, victim support and family services, prosecution and the healing process. Interagency cooperation is essential to minimize the trauma experienced by children in rural Alaska.

- Bringing children from rural communities into hub or urban areas for forensic evaluation and investigation requires management of logistical and emotional support including lodging, transportation, meals and additional advocacy and support. Lack of adequate and culturally-informed support while the child is away from their home community may result in recantation or difficulty in cooperating with the investigation and prosecution.

- Critical attention must be given to the reactions of the child's supporters and extended family, particularly in small rural communities because unsupportive or negative reactions to an abuse disclosure/investigation may cause further trauma to the child, compromise safety and inhibit the child's healing.

- All evaluations of possible child maltreatment must take into account aspects of individual and family diversity including regional/geographic practices and lifestyles, primary language, and physical, emotional and cognitive ability.

- Multidisciplinary team members should have, at a minimum, training on normal child development, dynamics and impacts of child abuse on children at different developmental stages, profiles of those who abuse children, and how children tell about abuse. Each member of the team should become informed regarding the diversity of their specific service area in order to remain objective and avoid bias based on demographic, educational, economic, ethnic or cultural factors.

- It is expressly understood that each agency will work within its departmental mandates and policies.

INTRODUCTION

Child abuse and neglect is a widespread problem in the United States, especially in Alaska. It is critical that we effectively respond. During the years 2007 -2008 approximately six in every 100 Alaskan children were potential victims of at least one form of child maltreatment, nearly 24 per week had concerns for sexual abuse, and over 2920 children required the services of our Child Advocacy Centers. These cases are complex and require the cooperation and sharing of information by those involved. No single agency or organization can effectively deal with the issues of child abuse and neglect, and a multidisciplinary approach that is cooperative and mutually respectful will result in a professional assessment with the least amount of trauma to the children and families involved.

"Child abuse and neglect is a widespread problem in the United States, especially in Alaska. It is critical that we effectively respond."

Statement of Purpose

The purpose of this multidisciplinary guideline document is to provide those involved in the initial evaluation of suspected child abuse and neglect with guidance based on existing best practice recommendations. We believe that consistency in the approach to these complex cases will greatly increase the effectiveness of Alaska's response to child abuse and neglect cases.

In this document **initial response** refers to any investigation and/or assessment conducted in order to make a decision on whether or not to move forward with a criminal or civil case. The initial response generally involves investigative steps, a forensic interview, a medical exam, if indicated, and an assessment of child and family needs for services.

This document represents the best knowledge about multidisciplinary practices in response to child abuse and neglect available at the time of publication. Furthermore, these are standards toward which professionals should strive to reach in these cases. This document is not intended to create substantive rights for any individual. Finally, the authors assume that any individual agency's ability to follow these guidelines will depend to some degree on the availability of resources and the necessity to balance priorities among several cases.

Intended Audience

These guidelines are for those who work in child protection, law enforcement, medical and mental health, Child Advocacy Centers (CACs), tribes/tribal organizations, prosecutors and others who participate in the evaluation of children for whom there is a concern for maltreatment. Multidisciplinary teams (MDTs) typically have two over-lapping and inter-related purposes, with participating agency membership varying depending on location and purpose. The MDT that initially responds to an allegation of abuse generally includes investigators from the Office of Children's Services and/or law enforcement, CAC staff, a medical provider, an ICWA worker (if concerning a Native child), a victim advocate, and sometimes a mental health provider. In addition, there may also be a larger MDT that meets to review cases, which may include all of the above as well as supervisors and representatives from other agencies as defined in AS 47.14.300. This document may be helpful to those wishing to understand the framework for multidisciplinary teams and to those who are involved with later stages of child abuse investigations. However, the primary intended audiences are those involved in the initial evaluation/assessment/investigation, whether the case falls within criminal and/or civil jurisdictions.

BACKGROUND

History of the Alaska Children's Justice Act Task Force

The Alaska Children's Justice Act Task Force is a statewide multidisciplinary group established in 1999 in order to comply with the Federal Child Abuse Prevention and Treatment Act requirement to undertake a comprehensive review and evaluation of law, policy and the investigative, administrative and judicial handling of cases of child abuse and neglect. The purpose of the Task Force is to promote State system enhancements or changes, including training, policies, procedures and laws that will improve how Alaska responds to children and families involved in these cases. The CJA Task Force members represent multiple disciplines and are employed in state, private and Tribal agencies.

History of Child Advocacy Centers in Alaska

CACs are community-based facilities that bring together law enforcement, child protection workers, prosecutors, child and family advocates, tribal representatives, medical and mental health professionals to utilize a collaborative team approach to the investigation of child sexual abuse and other forms of maltreatment as well as providing necessary follow-up services. CACs provide a safe neutral environment for the evaluation of child abuse and exploitation, as well as coordination of services for victims and families.

CACs were developed in Alaska as a result of community MDTs and others working in the field who recognized that child sexual abuse cases needed to be approached differently than adult sexual assault cases. The first CAC in Alaska, Alaska CARES in Anchorage, opened in 1996, followed by The Children's Place in Wasilla in 1999. Now CACs are present in 10 different hub communities, allowing a majority of children in Alaska to have access to CAC services. CACs in Alaska are based on a national model first developed in Huntsville Alabama in the 1980's with each reflecting the unique needs and resources of their community/region.

The benefits of a CAC include:

- Allegations of sexual abuse are more thoroughly investigated
- The trauma experienced by children and families is reduced
- Non-offending parents are empowered to protect and support their children
- Children and families receive services tailored to their family's needs
- More offenders are held accountable
- The community is more aware of the problem of child abuse in general and sexual abuse specifically
- The CAC becomes a resource to MDT professionals, providing specialized training and consultation

Alaska is fortunate to now have a Child Advocacy Center in each of the following communities:

- Anchorage, Alaska CARES -- 1-877-561-8301 http://www.providence.org/alaska/tchap/cares/default.htm
- Wasilla – The Children's Place – 1-907-357-5157 http://www.thechildrens-place.org/
- Juneau – S.A.F.E. Child Advocacy Center -- 1-907-463-6157 -- http://www.ccsjuneau.org/51
- Fairbanks – Stevie's Place -- 1-907-374-2850 -- http://www.rcpcfairbanks.org/Stevie's%20Place.htm
- Nome – Kawerak Child Advocacy Center--1-907-443-4379 -- http://www.kawerak.org/servicedivisions/cfs/cac/index.html
- Bethel – The Children's Center -- 1-907-543-3144
- Dillingham – Nitaput Child Advocacy/Family Support Center -- 1-907-842-1230 -- www.bbahc.org/child_advocacy
- Copper River – Copper River Basin Child Advocacy Center -- 1-907-822-3733 -- http://crbcac.com/purpose.html
- Kenai – Central Peninsula Child Advocacy Center -- (907)690-2113
- Homer – Haven House Child Advocacy Center --(907)235-7712 -- http://www.havenhousealaska.org/

Additional CACs are under development at the time of publication. Contact the Alaska Children's Alliance for an up to date list with contact information.

The Alaska Children's Alliance (ACA) is a coalition of established and developing CACs, MDTs, and child protection teams (CPTs) dedicated to improving Alaskan community responses to child maltreatment. The ACA is a state chapter of the National Children's Alliance (NCA). The NCA is a non-profit membership organization whose mission is to assist communities seeking to improve their responses to child abuse by establishing and maintaining CACs.

DEFINITIONS

These are definitions of commonly used terms and terms used throughout this document, and are not necessarily legal definitions (which may be found under pertinent statutes).

Child Advocacy Center: A child-focused, community-based program that provides coordination between the various agencies and professionals responsible for responding to child maltreatment with the primary goal to prevent re-traumatization by the system response.[3]

Child maltreatment: Any act or series of acts of commission or omission by a parent, caregiver, or person in position of authority over a child that result in harm, potential for harm, or threat of harm to a child.[4]

Child neglect: The failure to provide for a child's basic physical, emotional, or educational needs or to protect a child from harm or potential harm. Harm to a child may or may not be the intended consequence. The following types of maltreatment involve acts of omission:[5]

- Failure to provide
  - Physical needs
  - Emotional needs
  - Medical/dental needs
  - Educational needs
- Failure to supervise
  - Inadequate supervision
  - Exposure to violent environments

Child physical abuse: The intentional use of force against a child that results in, or has the potential to result in, physical injury. Physical abuse includes physical acts ranging from those which do not leave a physical mark on the child to physical acts which cause permanent disability, disfigurement, or death. Physical abuse can result from discipline or physical punishment.[6]

Child sexual abuse: Child sexual abuse occurs when a child is engaged in sexual activities that he or she cannot comprehend, for which he or she is developmentally unprepared and cannot give consent, and/or that violate the law or social taboos of society. The sexual activities may include all forms of oral-genital, genital, or anal contact by or to the child or abuse that does not involve contact, such as exhibitionism, voyeurism, or using the child in the production of pornography.[7]

Forensic Interview: A forensic interview is a process of asking, when feasible, non-leading and age appropriate questions to determine whether a crime against a child has been committed or if a child is in need of protection. A forensic interview should be performed by someone who is specially trained in child development and the many dynamics of child abuse.

Guardian Ad Litem: A GAL is a person appointed by a judge to conduct an independent investigation and advocate for the best interest of a child in the child's court case, which can include Child in Need of Aid cases where abuse or neglect is alleged, domestic violence cases where a restraining order

is filed on behalf of the child, in juvenile delinquency cases, in private child custody cases between divorcing parents, or in adult criminal cases where there is a child victim. A GAL may or may not be an attorney, and must meet specific qualifications.

ICWA worker: A person who represents the tribe in an Indian Child Welfare Act case.

Multidisciplinary team: A group of professionals and agency representatives brought together because of a report of concern that a child has been maltreated and/or that a crime has been committed against a child (the initial response). The MDT also continues to meet to provide ongoing consultation, follow up on services and case review. These meetings may include other people as listed in AS 47.14.300b.

Protective Services Report (PSR):
A report to OCS of suspected child abuse or neglect.

Victim Advocate: A trained individual who works with children and non-offending family members to provide support and referrals for services; may be a CAC staff member.

SECTION TWO: GUIDELINES FOR THE INITIAL RESPONSE

MDT Roles and Responsibilities in the Initial Response
General Guidelines

- To the best of their ability, each agency will work with and assist other members of the multidisciplinary team to ensure that the best interest and protection of children will be served.
- All reasonable efforts will be made by each agency to coordinate each step of the investigation/assessment process in order to minimize the number of interviews and interviewers involved with the child, as well as the number of medical exams.
- All agencies participating in this process will share pertinent case information with other appropriate agencies except as prohibited by law or policy.
- To the best of their ability, agencies should provide specially trained professionals with skills in forensic interviewing, assessment, and investigation to handle appropriate cases of child abuse and neglect.
- It is expressly understood that each agency will work within its departmental mandates and policies.

Role of the Office of Children's Services (OCS)

In the context of the initial response, it is the role of OCS to assess whether a parent or guardian has abused or neglected their child, or created conditions that caused such abuse or neglect. The steps involved in this process include:

- Receiving, documenting, screening, and prioritizing Protective Services Reports;
- Assessing "screened in"[8] allegations of in-home abuse or neglect of children;
- Notifying the appropriate law enforcement agency when a crime against a child may have been committed;
- Making a referral to CAC serving the area, in accordance with MDT team protocol, when a screened-in PSR involves sexual abuse or severe physical abuse, or when a child discloses sexual abuse during an assessment of less severe physical abuse or neglect. At a minimum, OCS staff should adhere to the following protocol when their safety assessment work involves a CAC:
    - Submit information from the protective services report to the CAC and coordinate with law enforcement and the CAC to schedule an interview of the child. Any information about the reporter's identity will be redacted prior to submission
    - If a non-offending caregiver (of physical or sexual abuse) is identified, request that caregiver bring the child to the CAC or to give their consent for the child to be transported to the CAC for an interview
    - If the non-offending caregiver refuses to allow the child to be transported, or there is no non-offending caretaker available, determine if there is probable cause to assume emergency custody of the child
    - Help coordinate the interview, making every effort to coordinate the interview with the necessary members of the investigation team to minimize trauma to the child. At a minimum, the OCS worker and a law enforcement officer should be present at the interview
    - Help coordinate any necessary follow-up medical examination(s) or services
    - Limit the number of interviews with a child.
    - Filing a civil child-in-need-of-aid petition, if warranted

Note: If the MDT initial response is not initiated by OCS, OCS is available as a professional resource to the MDT.

---

8 If, after a preliminary evaluation of a PSR involving in-home abuse or neglect of children, OCS may either determine that a more complete assessment is needed ("Screened In") or determine that no further assessment is needed ("Screened Out")

Role of Law Enforcement

It is the role of the law enforcement detective/investigator/officer to investigate and determine whether a crime has been committed. The investigation includes but is not limited to:

- Ensuring that all interviews are completed, including victims, witnesses, suspects and other collateral people involved
- Conducting a thorough crime scene investigation
- Collecting evidence, including any corroborating evidence
- Preserving the chain of possession of any collected evidence

Law enforcement presents the case to the prosecutor's office or agency if enough evidence of the crime exists for a criminal prosecution. As a mandated reporter, law enforcement will notify OCS of any possible cases of child maltreatment, even if out of home.

Role of Federal Bureau of Investigation (FBI)

It is the role of the Federal Bureau of Investigation (FBI) to investigate certain federal criminal cases in Alaska and certain interstate crimes. When a serious child physical or sexual abuse case falls within federal jurisdiction, the FBI role includes:

- Working with OCS on child safety issues
- Working with Alaska State Troopers (AST), and/or other local law enforcement agencies on investigation
- Serving on the MDT when there is a current investigation involving the FBI

Role of the Child Advocacy Center (CAC)

It is the role of the CAC to provide a child-focused, neutral, community-oriented program in which representatives from many disciplines meet to provide a comprehensive approach to the investigation, assessment, treatment, and prosecution of child abuse cases. The CAC provides a facility for:

- Legally sound forensic interviews of children who may have been sexually abused, physically abused, severely neglected, drug endangered, or who may be a witness to violence, plus others depending on the resources of the CAC and MDT
- Medical services for children by specially-trained medical providers, including medical treatment, follow-up exams, and medical referrals, either on site or through collaboration with community medical providers
- Referrals for families and children to an appropriate mental health provider and other indicated services

Child Advocacy Centers in Alaska strive to meet the Accreditation Standards set forth by the National Children's Alliance (see Appendix 2).

Role of the Medical Provider

It is the role of the medical providers to be responsible for medical and forensic child abuse evaluation and treatment within their licensing scope of practice. This includes the following:

- Interpretation of exam findings (or lack of findings)
- Identification of unmet health care needs
- Careful and complete written and photographic documentation
- Work with other team members to promote future health and safety of the child
- Reassurance for child and family

Role of Mental Health

The role of the mental health provider includes:

- Notifying OCS, as a mandated reporter, of any suspected child maltreatment
- Assessing and treating the emotional and psychological needs of the child and non-offending family member, with a special emphasis on working with those who have experienced complex trauma
- Providing crisis intervention as needed.

Role of Victim Advocate

It is the role of the victim advocate to assist the child victim and/or witness during the initial response, which includes:

- Providing a crisis response and preparing the child for the forensic interview and medical evaluation, if any
- Supporting the non-offending caregiver during investigation, forensic interview, medical evaluation
- Explaining legal process to caregiver and child
- Providing logistical support for child and non-offending family, including arranging transportation, assistance with appointments for services, etc.
- Conveying child's and non-offending caregiver's concerns and abilities to prosecutor and MDT members
- Serving as a resource on the dynamics of abuse, responses of children, child development and psycho-social needs of child victims

Roles of Tribes/Tribal Organizations

Under federal law, Tribes and Tribal organizations have a specific additional mandate regarding initial response to suspected or known child abuse. Mandatory reporters of child abuse who are employed by a Tribe or Tribal organization that receives federal funds are obligated to report suspected child abuse to both local child protection and local law enforcement agencies.[9] Except for Chevak, Metlakatla and Native Village of Barrow, the local child protection agency is OCS; local law enforcement may be Alaska State Troopers, City Police or Borough Police.

In addition to these mandatory reporting duties, Tribes and Tribal organizations may have a consultative role to address cultural and family dynamics in specific cases, and develop and/or assist in developing community education efforts. Tribes and Tribal organizations may have programs and services that can provide direct support and assistance to the child and family as well.

9 *Public Law 101-630, Indian Child Protection and Family Violence Prevention Act*

Forensic Interviewing of Children[10]

The forensic interview can empower a child to disclose maltreatment in a legally defensible manner.[11] Forensic interviews are typically the cornerstone of a child abuse investigation, effective child protection and subsequent prosecution. Actions taken at the initial forensic interview may significantly impact the child's understanding of and ability to respond to the intervention process and/or criminal justice system, and may also mark the beginning of the journey to healing for the child and family. The best forensic interviewing practice includes:

- An age-appropriate, neutral interview setting
- Effective communication among MDT members
- Utilization of legally sound and culturally informed interviewing techniques
- Appropriately trained and supervised interviewers

"Actions taken at the initial forensic interview may significantly impact the child's understanding of and ability to respond to the intervention process and/or criminal justice system, and may also mark the beginning of the journey to healing for the child and family."

At a minimum, forensic interviews should be child-centered and coordinated to avoid multiple interviewers and duplication in questions asked of the child.

The purpose of a forensic interview is to obtain a statement from a child, in a developmentally and culturally sensitive, unbiased and fact-finding manner that will support accurate and fair decision making by the involved multidisciplinary team in the criminal justice and child protection systems. The status of the individual conducting the forensic interview may vary, depending on the case circumstances and location, but in all situations, it is recommended that the forensic interviewer have initial and ongoing formal forensic interviewer training. The interviewer may be a CAC employee, law enforcement officer, OCS worker, medical provider, federal law enforcement officer or other MDT members, depending on the situation and who is available.

Key elements of a child forensic interview include the following:

- Introductions and rapport building
- Assessment of developmental and cultural factors influencing communication
- Age appropriate language and formulation of questions
- Explanation of rules of the interview
- Exploring the potential for abuse in as non-leading a manner as possible
- Gathering details surrounding any disclosure
- Screening for other types of abuse, neglect or mental injury
- Use of aids such as free hand drawing and body diagrams as needed to help child communicate

The CAC/MDT protocol should set out the required qualifications of the forensic interviewer, including minimum specialized training, the method for sharing among MDT members information collected in the forensic interview, and the mechanisms for collaboration and peer review.

Ongoing education in the field of child maltreatment and/or forensic interviewing is essential for those conducting forensic interviews of children. Additionally, the importance of peer review cannot be overstated. As noted by Michael Lamb, "interviewers continue to maintain or improve their skills only when they regularly review their own and others' interviews closely, discussing their strategies, successes and mistakes with other interviewers"[12] .

In response to concerns about defense attorney attacks on peer review, Victor Vieth states: "Simply put, whatever the MDT does or does not do as part of the forensic interviewing process, including peer review, will be attacked by defense counsel." "The MDT should not focus on avoiding a defense attack

---

10 Based on the Accreditation Standards of the National Children's Alliance, which all CACs in Alaska are required to strive to meet

11 Victor Vieth, Director, National Child Protection Training Center, Winona State University

12 Lamb, et al, A structured forensic interview protocol improves the quality and informativeness (sic) of investigative interviews with children: A review of research using the NICHD Investigative Interview Protocol, 31 CHILD ABUSE & NEGLECT 1201, 1210 (2007).

of the peer review process, any more than the MDT should focus on conducting a forensic interview in a manner to avoid a defense attack. [13]

Cultural Considerations in Forensic Interviewing of Children

"It should never be assumed that English is a universal language understood by all children."

Research indicates that members of different cultural groups may respond differently to children's disclosure of sexual abuse.[14] A child's cultural background may also impact upon the child's appraisal of the abusive experiences (e.g., level of self-blame) and the level of social support that the child may receive. In addition, the way emotions may or may not be expressed is also related to culture and ethnicity. In the investigative process, the interviewer should explore as appropriate:

- family structure (e.g. extended, nuclear, single), gender role expectations,
- child care practices,
- financial management of the household,
- community/country of origin and reasons for immigration or transfer to urban areas (if Alaska Native),
- any contact with family in the village/country of origin, religious belief systems, social networks, and
- attitudes about sexual violence.

Interviewers should integrate these cultural concerns into the interview process. Furthermore, the factors that make it more difficult for some children to disclose sexual abuse are culturally related (e.g., gender role expectations), and cultural issues may also contribute to the possibility of recantation.

Language proficiency is another important consideration for the interviewer. It should never be assumed that English is a universal language understood by all children. Ideally, children should be asked what language they speak at home, as well as what language they would prefer to use in talking to investigators. Children may use language terms for body parts, for certain actions, for relationships and for certain individuals, and they may not know the English word for these things or people. There may be a taboo about saying words for private parts or sex acts, especially with people outside of the family. Nicknames are widely used in some cultures, and children may not know a person's formal name, only their nickname such as "Junior" or "Chubby".

Non-verbal expression, body language and posture are interpreted differently in different cultures with great variation as to the meaning. The interviewer should not presume that a bent-over posture or a lack of eye contact, for instance, means a person is not truthful, or that alert posture and direct eye-contact means the person is truthful. Understanding the child's specific cultural norms for non-verbal expression is an important aspect of the forensic interview.

Translation/interpretation, whether of spoken language or of non-verbal communication, in and of itself, raises additional considerations, and it is important that the MDT include individuals with knowledge and understanding of the unique cultural aspects of the child and family/caregivers or who are willing and able to access such expertise when needed.

Medical Evaluation for Child Maltreatment

All CACs in Alaska evaluate children for sexual abuse; many also offer the ability to evaluate children for physical abuse, neglect and drug endangerment.

Purpose of the Medical Evaluation
The majority of children for whom sexual abuse is a concern will have normal or non-specific anal-genital exams. There are a number of reasons for this, including:

- Late disclosure
- Delays in seeking care
- Types of sexual abuse that do not cause significant physical trauma: fondling, oral-genital contact, rubbing, touching over clothes
- Elasticity of vaginal and anal openings
- Rapid healing in children
- Medical conditions that can be confused with sexual abuse

Also, research shows that that it is unusual to find any forensic evidence in pre-pubertal children, especially if they are seen more than 24 hours after the abuse has occurred.[15], [16]

Even in physical abuse cases, exams can be non-diagnostic because of delays in evaluation, medical conditions that can be confused with abuse and the overlap in findings that can occur in inflicted and accidental injuries.

Therefore the purposes of the medical evaluation include the following:

- Help ensure the health, safety and well being of the child
- Diagnose, document, and address medical conditions resulting from abuse and neglect
- Differentiate medical findings that are indicative of abuse from those which may be explained by other medical conditions
- Diagnose, document, and address medical conditions unrelated to abuse (within the scope of practice of the individual provider)
- Assess the child for any developmental, emotional, or behavioral problems needing further evaluation and treatment including referrals as necessary
- Collection, preservation and documentation of forensic material if indicated by history and timing
- Reassure and educate the child and family to assist in emotional healing

Indications for a Medical Evaluation
All children who are suspected victims of child sexual and/or physical abuse should be offered a medical evaluation.[17] Health care providers working with the CAC and MDT should determine those situations (indicators) in which medical evaluations should be "required" (with the provision that children are never forced to have any portion of an exam unless medical/surgical intervention is necessary). These indicators should be part of the CAC's written protocols.

Indicators to consider include:

- Any child who discloses direct oral, anal or genital contact (skin to skin) by a suspect's body part or an object
- Any child with anal or genital pain, bleeding, or abnormal discharge
- Any child with a non-neonatal transmission of a sexually-transmitted infection
- Any child disclosing physical abuse or observed to have possible signs of non-accidental injury, including
    - Unexplained or unwitnessed injuries to a young child
    - Injuries inconsistent with history or age and development
    - Patterned injuries
- Any child with significant signs of neglect

---

15 Christian et al; Pediatrics July 2007
16 Young et al; Archives Pediatric & Adolescent Medicine June 2006
17 Medical Standard from the National Children's Alliance

- Any child where there is a concern of endangerment due to drug exposure
- Any child who is highly suspected of being recently abused, or who may be reluctant to disclose abuse, or who is preverbal
- Other considerations for medical exams include:
    - Young children exhibiting significant sexualized behavior
    - History or exam findings of concern for abuse noted by another health care provider
    - Adolescents disclosing "consensual sex" if the teen is under 16 years of age

Access for Medical Evaluations

The National Children's Alliance Medical Standard states that: **"Specialized medical evaluation and treatment services are routinely made available to all CAC clients and coordinated with the multidisciplinary team response."**

In Alaska, some CACs offer on-site medical evaluations through employed or contract medical providers. Others arrange for medical exams to be conducted at the local hospital, clinic, or at another CAC with medical providers on staff.

CACs need to make arrangements for those situations where children require evaluation after regular business hours or at Emergency Department or in-patient hospital care – for example, a child with serious injuries requiring diagnostic testing and treatment beyond the scope of the CAC. Policies should be in place for transport to the nearest hospital if the child first presents to the CAC, as well as for examination of the child, documentation of injuries, and forensic evidence gathering as appropriate.

Medical evaluations arranged through the CAC should always be available regardless of the child's and family's ability to pay. In Alaska it is possible to bill third party payers including private insurance and Medicaid for exams conducted on children under the age of 16. In some situations and areas, such as sexual abuse exams conducted as part of a criminal investigation (or on children 16 and older), law enforcement may pay for the exam. The Alaska Violent Crimes Compensation Board is another potential resource for assisting with the costs of exams, diagnostic testing, and transportation to and from the CAC when other resources are not available.

Process for the Medical Evaluation

General Principles

Duplicative exams should be avoided whenever possible. If feasible, the child's exam should be conducted by someone with specialized training and experience in conducting medical evaluations for abuse and neglect. In addition, photo-documentation of exam findings allows for peer review and expert consultation, which also helps obviate the need for another exam.

All abuse exams should generally consist of a complete head-to-toe physical. Diagnostic testing (i.e., radiological and laboratory testing) is obtained and/or ordered by the medical provider as clinically indicated.

Every effort should be made to avoid duplicative interviewing. If the medical provider is unable to observe the child's forensic interview, then a summary of pertinent information should be provided prior to the exam. The medical provider will need to obtain a medical history, including chronic health conditions, prior injuries, surgeries or procedures (especially those that may affect interpretation of findings), medications, allergies, and relevant family medical history (such as bleeding disorders in a child with bruises, or warts in a child with possible HPV). Clarification questions about the abuse may also be necessary, such as asking the cause of a particular injury found on the child's body. Every effort should be made to ask non-leading questions, and any questions asked along with the child's responses should be noted in the medical report. Whenever possible, the child's exact words should be used and identified with quotation marks.

Consent

Ideally, there will be a non-offending legal guardian available to give consent for the child's medical exam. Alaska law does allow for the medical evaluation, x-rays and photographs to be taken of children for whom there is a concern for abuse without parental consent;[18] however parents should be notified as soon as reasonably possible, and the team should discuss how and when this will happen. In addition, Alaska law also allows adolescents to seek medical care related to sexually transmitted infections, pregnancy, and contraception without parental consent. In those instances where the medical evaluation is part of a criminal investigation, the health care provider should encourage the adolescent to talk to their parents and should coordinate with law enforcement concerning parental notification.

Exam Steps

The exam for child maltreatment is a comprehensive head-to-toe evaluation, including height, weight, and head circumference for children less than two years of age, and vital signs. The child's head, eyes, ears (including external ears, canals and ear drums), nose, mouth, neck, heart, lungs, abdomen, back, extremities, and buttocks should all be evaluated. All skin surfaces should be visualized, with careful attention to those areas which can easily be missed such as behind the ears. Oral frenula should be examined for evidence of trauma as well. A colposcope is ideal for examination of the anal-genital region; however, it may not always be available. Any source of magnification can be used if necessary, including an otoscope. Speculum exams are reserved for post-pubescent children. There are rare situations in which a medical need exists for internal visualization of the anal or vaginal canal beyond what can normally be seen with positioning and gentle external traction. Examples include the need for surgical repair or unexplained vaginal or anal bleeding. In this case, the medical provider will work with the local hospital to arrange an exam under sedation.

Diagnostic Testing

A complete description of diagnostic testing for child sexual and physical abuse is beyond the scope of this document. It is vitally important for health care providers to stay up to date with the literature on this topic, and to consult with more experienced providers as needed. Of note, however, is that Alaska has high rates of Chlamydia trachomatis and rising rates of gonorrhea. In addition, nucleic acid amplification testing (commonly called "PCR") for both of these infections can be obtained easily through a non-invasive, non-clean catch urine sample for pre-pubertal children and on the same sample as liquid cytology pap smear samples from adolescents – thus providers should have a low threshold to screen for at least these two infections on child sexual abuse cases where indicated by history or exam.

Exam Documentation

Photographic documentation of examination findings is the standard of care. Photo-documentation enables peer review, continuous quality improvement, and consultation. It may also prevent the need for a repeat examination. Photo-colposcopy is normally used for documentation of the anal-genital area; however, in the event a colposcope with camera is not available, a digital camera maybe used to document exam findings. Digital photo-documentation should be used for visible physical abuse or neglect findings.

Written documentation may involve dictated notes, forms or an electronic medical record if required by the hospital or clinic providing medical exam services for the CAC. The Children's Justice Act Task Force, in collaboration with the Alaska Children's Alliance, has developed standardized forms which may be used electronically and are currently used in a number of the CACs in the state.

Treatment

The medical provider works with other team members to develop an appropriate treatment plan for the child and family, which may include but is not limited to any of the following:

- Further diagnostic testing
- Follow-up exams and photos

---

18 AS 25.20.025

- Prescriptions and medical treatment either ordered or administered at the CAC
- Follow-up care and referrals, including:
    - Counseling
    - Primary and/or specialty medical care

Provisions must also be made for evaluation, treatment and/or referral for medical conditions found at the time of the exam.

Sharing of Exam Findings with the Team

The CAC's written protocols should describe how medical exam findings will be shared with MDT members in a timely manner, and in what format. Remember that the duty to report suspected child abuse is a clear exception to HIPPA privacy requirements.[19]

Training Criteria for Medical Providers

Medical evaluations should be conducted by health care providers with specialized training and experience in child abuse. This can include physicians, nurse practitioners, physician assistants, and sexual assault nurse examiners with pediatric training and expertise. All medical providers should operate within the scope of their practice as outlined by their state license.

Acquisition of adequate training can be through any of the following:

- Board certification in Child Abuse Pediatrics
- Child Abuse Fellowship training or child abuse Certificate of Added Qualification
- Documentation of satisfactory completion of competency-based training in the performance of child abuse evaluations
- Documentation of completion of at least 16 hours of formal medical training in child sexual abuse evaluation (the absolute minimum as recommended by the National Children's Alliance)

Continuous Quality Improvement

The National Children's Alliance Medical Standard states that the CAC must provide opportunities for ongoing training and peer review. In Alaska, most medical providers will not be conducting hundreds of child abuse exams each year. Therefore, ongoing training and peer review as well as the ability to access expert opinions are critical to develop and maintain competency.

The National Children's Alliance Medical Standard recommends that ongoing education in the field of child sexual abuse should consist of a minimum of 3 hours of CEU/CME credits every 2 years. A number of viable options are open for Alaskan medical providers for training, including:

- The biennial Alaska Child Maltreatment Conference, organized by the Alaska Children's Alliance with sponsorship from the Alaska Children's Justice Act Task Force and Western Regional Child Advocacy Center
- The National Children's Alliance Medical Training Academy (basic and advanced), held at least twice yearly through a partnership with Midwest Regional Child Advocacy Center
- The San Diego International Conference on Child and Family Maltreatment, sponsored by the Chadwick Center for Children and Families, usually held in January each year (a nice break for we Alaskans!)
- The National Symposium on Child Abuse, sponsored by The National Children's Advocacy Center (the very first CAC) and held in Huntsville, Alabama, in March each year (also a nice break for Alaskans!)
- The American Professional Society on the Abuse of Children Annual Colloquium, held each summer in various locations

Membership in the American Professional Society on the Abuse of Children (APSAC) and the International Society for the Prevention of Child Abuse and Neglect (ISPCAN) both include the benefit of their respective journals as well as access to their websites and resources.

---

19 http://aappolicy.aappublications.org/cgi/reprint/pediatrics;125/1/197.pdf

All medical providers affiliated with Alaskan CACs have the opportunity to become members of the Alaska Children's Alliance (ACA) Medical Peer Review Group and participate in monthly peer review as well as access expert consultation. Further information may be obtained through the local CAC or from the chapter coordinator for the ACA.

Cultural Considerations Regarding Medical Evaluations for Child Abuse

Many of the same concerns arise here as were discussed in the Forensic Interview section regarding cultural considerations. In addition to those areas discussed, the child's cultural beliefs may require that the medical evaluation be conducted by a person from the same gender as the child. Children may have been taught not to speak to a person of the opposite gender regarding private parts or sexual issues.

The child's cultural practices and teachings about the privacy or lack of privacy about their own body can impact how the child tolerates and cooperates with the medical evaluation. The medical evaluator needs to ensure that this step does not cause further trauma to the child because of cultural beliefs and practices.

Victim Advocacy

Victim Support and Advocacy within a CAC[20]

Child victims and their non-offending family members have a constitutional right to be treated with dignity, respect and fairness throughout the criminal justice process.[21] Victim support and advocacy should reduce trauma for the child and non-offending family members and thus strengthen the victim's involvement in the investigation and prosecution, improving overall outcomes for child victims. Victim and non-offending caregiver support from the time of disclosure throughout the case and beyond sentencing is a necessary component in the MDT's response. By keeping the child and family informed and focusing on their needs during the investigation and justice process, the victim advocate empowers the child and family to focus on well-being and healing. Victim advocacy has also been proven to increase guilty verdicts in sexual abuse cases, suggesting that better prepared and relaxed child victims and witnesses are more credible.[22]

> "By keeping the child and family informed and focusing on their needs during the investigation and justice process, the victim advocate empowers the child and family to focus on well-being and healing."

At the CAC, more than one person may serve as victim advocate, and it is important that this role/function is defined clearly within the CAC/MDT's written documents as to how the needs will be met. Some CACs have staff (e.g. family advocates, care coordinators, victim advocates, and child life specialists) that handle advocacy functions, and some CACs have a cooperative arrangement with a local victim advocacy agency (e.g., domestic violence advocates, rape crisis counselors, Court Appointed Special Advocates), and/or system-based advocates (e.g., victim witness coordinators, law enforcement victim's advocates). Some CACs use more than one of these resources.

Procedures should be in place to provide initial and on-going support and advocacy for the child and non-offending caregiver. At a minimum, victim support and advocacy should include the following services:

- Providing crisis response and preparing child for interview, medical evaluation
- Supporting non-offending caregiver during investigation, forensic interview, medical evaluation
- Explaining legal process to caregiver and child
- Providing education to caregiver and extended family members regarding the impact of abuse, dynamics of child sexual abuse and ways to support child, promote healing
- Providing logistical support for child and non-offending family, including arranging transportation, assistance with appointments for services, etc.
- One-on-one preparation of child for testimony in court at age-level
- Conveying non-offending caregiver and child concerns and abilities to prosecutor and MDT members
- Explaining victim rights and helping child and/or caregiver to complete Victim Impact Statements
- Supporting child and non-offending caregiver during trial
- Serving as a resource and possible expert witness on dynamics of abuse, responses of children, child development and psycho-social needs of child victims
- Making referrals for services to child and/or non-offending family members

Cultural Considerations Regarding Victim Advocacy

The victim advocate will likely have the most contact with the child and caregiver following the initial investigation and thus is in the strongest position to identify cultural issues and needs that impact the child's and family's cooperation with the system. It is essential that the victim advocate diligently learn about the child's lifestyle and culture (in the broadest sense)

20 *Based on the Accreditation Standards of the National Children's Alliance, which all CACs in Alaska are required to strive to meet (see Appendix 2)*

21 *State of Alaska Constitution, Article I, Section 24*

22 *Child Victims and Witnesses: A Handbook for Criminal Justice Professionals, USDOJ 1998*

to identify values and practices that may offer support and healing strategies throughout the case. The victim advocate also advises other MDT members regarding these issues to promote continuity of response for the victim.

The victim advocate needs to be aware of the role that extended family and the child's "community" (whether a whole village or a neighborhood in the city) has in the child's life and educate/inform those in the child's environment about abuse dynamics as well as ways to support this child in her/his healing journey. This may involve working with cultural authority figures such as elders, spiritual leaders, shaman, priests, etc.

Communication and Information Sharing

State law requires OCS, as a general rule, to keep confidential information that it has obtained from a report of harm (Protective Services Report) and any investigation or services arising out of that report.[23] However, an exception to this general rule requires OCS to provide appropriate confidential information to members of the investigation MDT as necessary for the MDT member to perform the member's duties.[24] OCS may not share the reporter's name but may share the contents of the report with the MDT members.[25]

Other members of the MDT may also have confidentiality restrictions applicable to them; for example, physicians must follow the federal Health Insurance Portability and Accountability Act (HIPAA)[26]. However, HIPAA's general rule (that protected health information may not be released by a covered entity without the patient's consent or court order) does not apply during these parts of the initial response: (1) when child abuse or neglect is suspected, the medical provider is a mandatory reporter and may disclose a child's protected health information to OCS in the course of reporting the suspected child abuse or neglect and (2) during an investigation of the report, the medical provider may disclose protected health information about the child to OCS without parental notification or authorization.

HIPAA also allows disclosure of protected health information (1) to other health care professionals if necessary for treatment of the patient and (2) to law enforcement if (a) the information is necessary for immediate law enforcement or for a criminal investigation in which the investigation would be compromised if the information was not immediately provided and (b) the health care provider determines, using his/her best professional judgment, that the disclosure is in the best interest of the victim.[27]

Records and information collected by the MDT are not subject to discovery or subpoena in connection with a civil or criminal proceeding and not subject to public disclosure.[28]

Cultural Considerations Regarding Information Sharing

Confidentiality can be a challenge in small communities. It is common in rural Alaska communities for health care providers, public safety officers, service providers and ICWA workers to be related to many individuals in the village. Thus it is extremely important that procedures are in place for releasing and sharing information that will assure those closely related to the child or the suspect cannot access any information on the child's disclosure or other investigative information. Medical, social services and school records that might normally be released to the parent/caregiver should be kept in a separate, secure location in the village as well as the hub when child maltreatment is suspected.

28 *AS 47.14.300(d) & (f)*

SECTION THREE: CULTURE AND DIVERSITY CONSIDERATIONS IN CHILD ABUSE EVALUATIONS

Culture is one of the filters that people use to interpret life experiences. Culture is different from race or ethnicity. It is not based on the color of our skin but on our accumulative life experiences. Culture encompasses many different factors: language, family structure, socioeconomic status, gender and gender roles, moral and religious values, traditions, history, parenting practices, sexual attitudes, tolerance level for emotionalism, and individual vs. group orientation.[29] MDTs need to maintain vigilance on matters of culture in every case; it is not acceptable to apply one's own cultural values standards and beliefs in these cases, nor is it appropriate to presume that only people of color have "culture."

Diversity influences nearly every aspect of child maltreatment response in Alaska. The concept of diversity encompasses acceptance and respect, and includes an understanding that each individual is unique and recognition of our individual differences. These differences can be along the dimensions of culture, race, ethnicity, gender, sexual orientation, socio-economic status, age, physical abilities, religious beliefs, political beliefs, or other ideologies. Practicing diversity is the exploration of these differences in a safe, positive, and nurturing environment. In the MDTs setting this means understanding each other and moving beyond simple tolerance to embracing and celebrating the rich dimensions of diversity contained within each individual.

"MDTs must be willing to become educated and competent in adjusting to the diverse world views in order to successfully investigate and prosecute in a respectful manner."

These considerations, along with developmental considerations, bring a variety of unique circumstances to most investigations. MDTs must be willing to become educated and competent in adjusting to the diverse world views in order to successfully investigate and prosecute in a respectful manner.

Addressing cultural differences and respecting diversity in the CAC and MDTs means that members should seek guidance from appropriate and knowledgeable sources when responding to child victims from an experience or context that is not familiar to the MDT member. The MDT must be deliberate and introspective during the initial investigation, including determining who will conduct the forensic interview and what questioning techniques will be used, and when drawing conclusions regarding the occurrence of abuse. Furthermore, whether the child is from a remote rural community or from a cultural context within an urban setting, the MDT must not make assumptions as to the history and comfort of the child with the response system, but rather must diligently assess the child's context and history.

Language – both verbal and non-verbal – has many interpretations. A child may live in dominant society, attend school and speak English fluently yet still be more comfortable within their own cultural context and communication norms. Research indicates that members of different cultural groups may respond differently to children's disclosure of sexual abuse.[30] A child's cultural background may also impact the child's appraisal of the abusive experiences (e.g., level of self-blame) and the level of social support that the child may receive. In addition, the way emotions may or may not be expressed is also related to culture and ethnicity. In the investigative process, the interviewer should explore:

- family structure (e.g., extended, nuclear, single),
- gender role expectations, child care practices,
- financial management of the household,
- community/country of origin and reasons for immigration or transfer to urban areas (if Alaska Native),
- any contact with family in the village/country of origin,
- religious belief systems, social networks, and
- attitudes about sexual violence.

---

29 *New York State Children's Justice Task Force "Forensic Interviewing Best Practices", 2003*

30 *Feiring, C., Coates, D.L., & Taska, L.S. (2001). Ethnic status, stigmatization, support and symptom development following sexual abuse. J. of Interpersonal Violence 16:1307-1329.*

Advocacy for children must naturally begin where the child is physically, emotionally and developmentally, and thus be accountable for creating comfort and safety for the child while they are dealing with the system, drawing on the strengths and familiarity of the child's own cultural environment. It is incumbent on the victim advocate to adapt their advocacy skills and exercise creativity in addressing the child/family needs, providing support that will enable the child to cooperate with the investigation and prosecution.

SECTION FOUR: FOLLOW-UP ROLES AND RESPONSIBILITIES

MDT Follow-Up Roles and Responsibilities

After the initial response outlined in Section Two, representatives from the following disciplines are typically part of the ongoing MDT that meet for the purpose of case review and follow up.

Role of the Office of Children's Services (OCS)

If the initial assessment of alleged child maltreatment determines that further OCS action is warranted, such action may include:

- Case management of on-going family cases
- Facilitation of services for prevention of removal
- Facilitation of reunification services to families with children in out-of-home placement
- Permanency planning services up to and including adoption and guardianship

Regardless of OCS involvement in a case, an OCS representative continues to be a member of the MDT and provides expertise and input when cases are brought before the MDT.

Role of Law Enforcement

The law enforcement agency may be involved with additional investigation tasks at the direction of the prosecutor and/or if a child makes additional disclosures or provides more detailed information after the case has been accepted for prosecution. The investigating officer will also be called upon to testify at Grand Jury and at the trial.

Role of the Child Advocacy Center

As part of their follow up role, the CAC staff provides:

- Follow-up support and case management services
- Referrals for other services within the child's community
- Maintenance of statistical case information including case disposition tracking
- Assist with scheduling and creating and providing an agenda for MDT case review meetings

Role of State of Alaska Department of Law – District Attorney's Office (DAO)

The DAO may become involved in the investigation of any possible criminal case. After an investigation is complete, the DAO determines whether or not the case can be proven beyond a reasonable doubt. If the determination is to proceed with prosecution, the DAO is responsible for filing criminal charges and moving the case through the formal legal system. The goal is to prosecute all provable cases. The final authority concerning prosecution rests with the DAO.

In addition, a DAO representative is usually a member of the MDT and provides expertise and input when cases are brought before the MDT.

Role of State of Alaska Department of Law – Attorney General's Office (AGO)

The AGO may become involved in the assessment of possible child abuse or neglect. If the decision is made to file a child-in-need-of-aid petition, the AGO responsibilities include:

- Providing legal advice and representation to the Office of Children's Services in civil child protection proceedings
- Working with OCS and other team members to hold offenders accountable in the civil justice system and provide protection for the child

In addition, an AGO representative is usually a member of the MDT and provides expertise and input when cases are brought before the MDT.

Role of Medical Provider

As part of their follow-up role, the medical provider:

- Ensures medical test results are communicated to the patient/family/caregiver and (as appropriate) MDT members
- Provides treatment as indicated
- Provides expert testimony as needed
- Provides education and training for other MDT members
- Participates in the Multidisciplinary Team
- Networks with child abuse groups and organizations

For further information, see specific section on Medical Evaluation.

Role of Victim Advocate

As part of their follow-up role, the victim advocate may assist with some or all of the following tasks:

- One-on-one preparation of child for testimony in court at age-level
- Helping child and/or caregiver to complete Victim Impact Statements
- Support for child and non-offending caregiver during trial
- Serving as a resource and possible expert witness on dynamics of abuse, responses of children, child development and psycho-social needs of child victims

For further information, see specific section on Victim Advocacy.

Role of Mental Health Provider

As part of their follow-up role, the mental health provider:

- Provides treatment planning that identifies and incorporates patient clinical problems
- Facilitates groups and individual treatment sessions
- Continuously monitors patient progress in treatment and outcomes as a result of interventions
- Makes ongoing assessment of patient mental health status and assist in crisis management
- Documents a thorough assessment, including mental status exam, interventions and activities related to the patient's plan of care
- Provides expert witness testimony as needed
- Participates in the MDT

Role of Tribes and Tribal Organizations

When a child is eligible for Tribal programs and services from a Tribal organization, the Tribe or Tribal organization may assist with some or all of the following tasks:

- Provide supplemental face-to-face support/liaison function when the victim advocate, prosecutor and law enforcement agencies are located elsewhere
- Assist agencies in making contact with the child and family residing in the village
- Provide follow-up medical monitoring and treatment
- Assist victim advocate with obtaining pertinent Victim Impact Statements
- Provide cultural and language interpreter
- Provide community and family dynamics updates for prosecutor in preparation for trial
- Support for child and non-offending caregiver during trial
- Serving as a resource and possible expert witness on cultural issues including cultural norms and consequences, cultural needs of child victims

Role of Guardian Ad Litem (GAL)

The GAL represents the best interest of the child in a CINA proceeding in those cases where OCS has taken legal custody of a child. The GAL determines and advocates for the best interest of the child given the child's situation, taking into account the child's age, maturity, culture, and ethnicity, and public laws and policies regarding family preservation and timely permanency planning. The GAL's responsibilities are to:

- Conduct ongoing independent investigations, including as reasonable and appropriate in person visits with the child, review of records, interviews with parents, social workers, teachers, and other persons as necessary to assess the child's situation and observations of the child's interactions with parents or other potential caregivers
- Consult professionals as necessary to determine the best interest of the child
- Monitor the provision and utilization of family support services
- Monitor services to the child provided by educational, medical, mental health, and other community systems and ensure these services are promoting the best interest of the child
- Explain the court proceedings, the role of a GAL, and the child's rights to the child when appropriate, in language and terms the child can understand; encourage older children to attend and participate in court hearings as appropriate and determine whether and under what conditions younger children should attend court hearings
- Determine whether to seek appointment of a GAL or attorney in related legal proceedings
- Determine whether to call the child as a witness or determine appropriate action if others seek the child's testimony, and familiarize the child with the process of testifying

Other individuals with specific expertise or knowledge may participate in the ongoing MDT according to local protocols or the needs of the specific case.

Role of State of Alaska Division of Juvenile Justice (DJJ)

DJJ is responsible for both reporting child abuse and neglect of its clients and for prosecution of juveniles who have allegedly committed offenses that would be crimes if committed by an adult, including sexual abuse offenses. DJJ will review sexual abuse offenses committed by juveniles to determine whether there is sufficient admissible evidence to support a formal adjudication. DJJ will also consider the minor's age, maturity level, emotional and intellectual capacity, family circumstances, and prior personal victimization, among other factors, to determine whether formal or informal action should be taken. The goals of DJJ are to hold these juveniles accountable for their behavior, provide for their victims, and assist the juveniles and their family to gain skills to prevent further offenses.

DJJ will also provide information to the MDT to assist in the investigation of child abuse and neglect cases.

Unique Challenges for Mental Health Service Provision in Alaska

Mental health services may be provided on site at CACs or through collaboration with community mental health providers; however, many challenges face Alaska in delivering these services. With a lack of resources along with the difficulties in recruiting, retraining and retaining qualified mental health personnel, many rural areas have no local mental health services other than the occasional itinerant provider. And of those rural areas that do have mental health services, many personnel are serving on a part-time basis, making it difficult to provide consistent and recommended follow-up services. A qualified workforce is needed to meet the needs of these children and families. Greater travel distance to outpatient services is common in rural settings and is associated with fewer mental health follow-up visits by patients as well as a lesser likelihood of receiving care in accordance with mental health services prescribed through an initial assessment.

Cultural Considerations Regarding Mental Health Evaluation and Treatment

Any mental health evaluation should include consideration of the child's cultural context and diversity factors within the family and community. Standard Western evaluation methods may not be comprehensive enough to encompass the strengths of the child's culture or the depth of impacts from historical trauma on the family and community. During the early contacts with the child and caregiver, mental health providers should identify culture and diversity dynamics and tailor treatment recommendations and plans to assure effective and appropriate services are offered. It is essential that mental health service providers diligently learn about the child's lifestyle and culture (in the broadest sense) to identify values and practices that may offer support and healing strategies throughout the case. The mental health provider also advises other MDT members regarding these issues to promote continuity of response for the child.

The mental health provider may not have a service role if the child and family are not willing. However, the mental health provider should also assist in educating and informing those in the child's environment about abuse dynamics as well as ways to support this child in her/his healing journey. This may involve working with cultural authority figures such as elders, spiritual leaders, shaman, priests, etc.

Records Handling and Storage

Protection & maintenance of records

Each CAC should develop policies and procedures for what records will be kept on site and how to maintain the confidentiality of those records. Confidentiality policies and procedures for the multidisciplinary team should be in place to insure client privacy while allowing for the sharing of relevant information consistent with legal, ethical, and professional standards of practice as determined by AS 47.14.300.

MDT protocols should also establish guidelines for how and when records may be released. Medical records are subject to HIPAA guidelines; however, federal and state law do allow for information sharing as part of the investigation for suspected child abuse. The child's parent or legal guardian normally has the right to a copy of the child's medical record; an exception is made if sharing that information may pose risk to the child.[31] Examples include cases where a parent is the alleged offender, or a non-offending parent is non-protective and likely to share the information with the offender. When medical exams are performed at the local hospital facility, requests for such records should be referred to the hospital. If concerns are present about releasing such records to the parent, this information should be shared with the hospital.

Requests for a copy of the forensic interview tape (or viewing of the tape) should be referred to the agency with primary responsibility for the investigation (OCS or law enforcement).

Mental health records, even if the mental health services are provided at the CAC, should be kept in a separate confidential file which is not released except with court order.

It is essential that each MDT discuss and develop protocols to address issues such as:

- Ownership of information stored at the CAC
- Control and release of records stored at the CAC
- Data custody

The following statutes should be considered:
AS 40.25.120(a)(2) (Public records exception for juveniles)
AS 47.10.093 (OCS records)
AS 47.12.310 (Division of Juvenile Justice records)
AS 47.14.300(d) & (f) (MDT records)
AS 47.17.040(b) (OCS investigation records)
7 AAC 54.020 – 7 AAC 54.150 (OCS records)
45 CFR 160 and 164 (HIPAA regulations)
AS 18.66.200 (protection of disclosure of communications in certain situations)

Protection of evidence

Evidence collected at a CAC as part of a child abuse investigation may include the recording of the child's forensic interview; a copy of exam photos; a copy of the forensic medical report; and forensic evidence collected from the child's body. Such documentation and collection/preservation of evidence should be conducted according to CAC and MDT policies and procedures, as well as current Alaska Sexual Assault Evidence Collection Kit guidelines. A Chain of Custody[32] should be followed for all evidence gathered as part of a Sexual Assault Evidence Collection kit. In addition, it is recommended that a Chain of Custody be used for copies of exam photographs and forensic medical reports. The CAC should have a secure locked location for forensic evidence to be stored if law enforcement is not immediately available to take possession of the evidence.

32 *Chronological documentation that ensures the physical security of samples, data and records in a criminal investigation from identification and collection through presentation to the court*

SECTION FIVE: RESOURCES FOR MDTS

This is a list of helpful resources for MDTs; some were also used in the development of this document.

APPENDIX 1

Pertinent Statutes

Note: The following statutes are current at the time of publication. To verify the most recent version of statutes relevant to child abuse, please visit the following website: http://www.legis.state.ak.us/basis/folio.asp

Alaska Criminal Laws Relating to Child Sexual and Physical Abuse

Sexual offenses:

Sexual Abuse of a Minor: (AS 11.41.434, 11.41.436, 11.41.438, and 11.41.440) Sexual contact or penetration (putting something into the vagina, rectum or any genital-mouth contact) between a minor and an adult, a person in a position of authority, someone who is at least 4 years older than the child or by another child if that child was forced or coerced into the sexual activity by someone 16 or older. Depending upon the actions, this can be an unclassified felony, a class B felony, a class C felony, or a class A misdemeanor.

Incest: (AS 11.41.450) When a biological relative of full or half blood, puts something into the vagina or rectum of a child. Incest is a class C felony.

Online enticement of a minor: (AS. 11.41.452) using a computer to communicate with a person who is (or who is believed to be) under 16 to entice, solicit, or encourage the person to engage in an act described in AS 11.41.455(a)(1) - (7) This is a class B or class C felony, depending on whether the defendant was required to register as a sex offender or child kidnapper.

Unlawful Exploitation of a Minor: (AS 11.41.455) using a person under the age of 18 in books, stories, videos, or pictures about sex. This is a class B felony or a class A felony for repeat offenders.

Indecent Exposure: (AS 11.41.458, AS 11.41.460) showing one's penis or vagina to another person on purpose. This is a class B misdemeanor if the victim is over 16, a class A misdemeanor if the victim is under 16 and a class C felony if the victim is under 16 and the person is a repeat offender or masturbates during the exposure.

Disorderly Conduct: (AS 11.61.110(7)) showing one's buttock or anus to another person.

Sexual Harassment: (AS 11.61.120) making rude or sexual gestures, pulling another person's clothing down, up, or off to expose their private parts, making sexual jokes that are offensive, making obscene phone calls.

Endangering the Welfare of a Child: (AS 11.51.100(a)(2)) a parent, guardian, or lawful custodian leaving a child under the age of 16 with another person, who is *not a parent, guardian, or lawful custodian*, knowing that the person is either (1) a registered sex offender or required to be registered in this state or another jurisdiction; (2) has been charged with a sex offense; or (3) has been charged with an attempt, solicitation, or conspiracy to commit a sex offence." This is a class C felony.

Indecent viewing or photography: (11.61.123) knowingly viewing, or producing a picture of the private exposure of the genitals, anus, or female breast of a child under 16 and the view or production is without the knowledge or consent of the parent or guardian of the child viewed or shown in the picture and without the knowledge or consent of the child, if that child is at least 13 years of age.

Distribution of child pornography: (AS 11.61.125) bringing or causing to be brought into the state for distribution, or in the state distributing, or in the state possessing, preparing, publishing, or printing with intent to distribute, any material that visually or aurally depicts conduct described in AS 11.41.455(a), knowing that the production of the material involved the use of a child under 18 years of age who engaged in the conduct. This is a class B felony or a class A felony for repeat offenders.

Electronic distribution of indecent material to minors: (AS 11.61.128) an adult knowingly distributing to a child under 16 by computer any material that depicts certain sexual conduct, whether actual or simulated. This is a class B or class C felony, depending on whether the defendant was required to register as a sex offender or child kidnapper.

Promoting prostitution in the first degree: (AS 11.66.110(a)(2) inducing or causing a person under 18 years of age to engage in prostitution. This is an unclassified felony.

Physical offenses:

Assault: (AS 11.41.200, 11.41.210, 11.41.220 11.41.230) causing physical injury to another. Depending upon the actions or harm caused, this can be a class A felony, a class B felony, a class C felony, or a class A misdemeanor. Also, it is a class C felony If the offender (a) recklessly causes physical injury to a child under 10 and the injury would (1) cause a reasonable caregiver to seek medical attention from a health care professional in the form of diagnosis or treatment or (2) if the offender has done this repeatedly or (b) knowingly causes physical injury to a child under 16 years of age but at least 10 years of age and the injury reasonably requires medical treatment;

Endangering the Welfare of a Child: (AS 11.51.100(a)(3)) for a parent, guardian, or lawful custodian of a child under the age of 16 to leave the child with another person knowing the other person has *previously* physically mistreated or had sexual contact with *any* child *and* the other person causes physical injury or has sexual contact with the present child. "Physically mistreated" includes unreasonably excessive discipline. This is a class C felony or a class A misdemeanor, depending on the injuries to the child.

Alaska Civil Law Regarding MDT Roles and Responsibilities

AS 47.14.300. Multidisciplinary child protection teams.

(a) The department shall create multidisciplinary child protection teams to assist in the evaluation and investigation of reports made under AS 47.17 and to provide consultation and coordination for agencies involved in child protection cases under AS 47.10.

(b) A team created under (a) of this section may invite other persons to serve on the team who have knowledge of and experience in child abuse and neglect matters. These persons may include

(1) mental and physical health practitioners licensed under AS 08;

(2) child development specialists;

(3) educators;

(4) peace officers as defined in AS 11.81.900;

(5) victim counselors as defined in AS 18.66.250;

(6) experts in the assessment and treatment of substance abuse;

(7) representatives of the district attorney's office and the attorney general's office;

(8) persons familiar with 25 U.S.C. 1901 - 1963 (Indian Child Welfare Act);

(9) guardians ad litem; and

(10) staff members of a child advocacy center if a center is located in the relevant area.

(c) A team created under (a) and (b) of this section shall review records on a case referred to the team by the department. The department shall make available to the team its records on the case and other records compiled for planning on the case by other agencies at the request of the department. The team may make recommendations to the department on appropriate planning for the case.

(d) Except for a public report issued by a team that does not contain confidential information, records or other information collected by the team or a member of the team related to duties under this section are confidential and not subject to public disclosure under AS 40.25.100 and 40.25.110.

(e) Meetings of a team are closed to the public and are not subject to the provisions of AS 44.62.310 and 44.62.312.

(f) The determinations, conclusions, and recommendations of a team or its members are not admissible in a civil or criminal proceeding. A member may not be compelled to disclose a determination, conclusion, recommendation, discussion, or thought process through discovery or testimony in a civil or criminal proceeding. Records and information collected by the team are not subject to discovery or subpoena in connection with a civil or criminal proceeding.

(g) Notwithstanding (f) of this section, an employee of the department may testify in a civil or criminal proceeding concerning cases reviewed by a team even though the department's records were reviewed by a team and formed the basis of that employee's testimony and the team's report.

(h) A person who serves on a multidisciplinary child protection team is not liable for damage or other relief in an action brought by the reason of the performance of a duty, a function, or an activity of the team.

(i) In this section, "team" means a multidisciplinary child protection team created under (a) and (b) of this section.

Alaska Civil Law Regarding Child Advocacy Centers and Forensic Interviewing of Children
AS 47.17.033 Investigations and interviews.
***

(c) An investigation by the department of child abuse or neglect reported under this chapter shall be conducted by a person trained to conduct a child abuse and neglect investigation and without subjecting a child to more than one interview about the abuse or neglect except when new information is obtained that requires further information from the child.

(d) An interview of a child conducted as a result of a report of harm may be audiotaped or videotaped. If an interview of a child concerns a report of sexual abuse of the child by a parent or caretaker of the child, the interview shall be videotaped, unless videotaping the interview is not feasible or will, in the opinion of the investigating agency, result in trauma to the child.

(e) An interview of a child that is audiotaped or videotaped under (d) of this section shall be conducted

(1) by a person trained and competent to conduct the interview;

(2) if available, at a child advocacy center; and

(3) by a person who is a party to a memorandum of understanding with the department to conduct the interview or who is employed by an agency that is authorized to conduct investigations.

(f) An interview of a child may not be videotaped more than one time unless the interviewer or the investigating agency determines that one or more additional interviews are necessary to complete an investigation. If additional interviews are necessary, the additional interviews shall be conducted, to the extent possible, by the same interviewer who conducted the initial interview of the child.

(g) A recorded interview of a child shall be preserved in the manner and for a period provided by law for maintaining evidence and records of a public agency.

(h) A recorded interview of a child is subject to disclosure under the applicable court rules for discovery in a civil or criminal case.

(i) The training required under (c) of this section must address the constitutional and statutory rights of children and families that apply throughout the investigation and department intervention. The training must inform department representatives of the applicable legal duties to protect the rights and safety of a child and the child's family.

(j) During a joint investigation by the department and a law enforcement agency, the department shall coordinate an investigation of child abuse or neglect with the law enforcement agency to ensure that the possibility of a criminal charge is not compromised.

(k) Unless a law enforcement official prohibits or restricts notification under (j) of this section, at the time of initial contact with a person alleged to have committed child abuse or neglect, the department shall notify the person of the specific complaint or allegation made against the person, except that the identity of the complainant may not be revealed.

(l) In this section, "child advocacy center" means a facility operated with a child-focused, community partnership committed to a multidisciplinary team approach that includes representatives from law enforcement, child protection, criminal prosecution, victim advocacy, and the medical and mental health fields who collaborate and assist in investigating allegations of sexual or other abuse and neglect of children.

Alaska Civil Laws regarding disclosure of public records
AS 40.25.120. Public records; exceptions; certified copies.
(a) Every person has a right to inspect a public record in the state, including public records in recorders' offices, except

(1) records of vital statistics and adoption proceedings, which shall be treated in the manner required by AS 18.50;

(2) records pertaining to juveniles unless disclosure is authorized by law;

(3) medical and related public health records;

(4) records required to be kept confidential by a federal law or regulation or by state law;

(5) to the extent the records are required to be kept confidential under 20 U.S.C. 1232g and the regulations adopted under 20 U.S.C. 1232g in order to secure or retain federal assistance;

(6) records or information compiled for law enforcement purposes, but only to the extent that the production of the law enforcement records or information

(A) could reasonably be expected to interfere with enforcement proceedings;

(B) would deprive a person of a right to a fair trial or an impartial adjudication;

(C) could reasonably be expected to constitute an unwarranted invasion of the personal privacy of a suspect, defendant, victim, or witness;

(D) could reasonably be expected to disclose the identity of a confidential source;

(E) would disclose confidential techniques and procedures for law enforcement investigations or prosecutions;

(F) would disclose guidelines for law enforcement investigations or prosecutions if the disclosure could reasonably be expected to risk circumvention of the law; or

(G) could reasonably be expected to endanger the life or physical safety of an individual;

***

AS 47.10.093. Disclosure of [OCS] records.

(b) A state or municipal agency or employee shall disclose appropriate confidential information regarding a case to ***

(7) a member of a multidisciplinary child protection team created under AS 47.14.300 as necessary for the performance of the member's duties;

(f) The department may release to a person with a legitimate interest confidential information relating to children not subject to the jurisdiction of the court under AS 47.10.010 .

AS 47.17.040. Central registry; confidentiality.

(a) The department shall maintain a central registry of all investigation reports but not of the reports of harm.

(b) Investigation reports and reports of harm filed under this chapter are considered confidential and are not subject to public inspection and copying under AS 40.25.110 and 40.25.120. However, in accordance with department regulations, investigation reports may be used by appropriate governmental agencies with child-protection functions, inside and outside the state, in connection with investigations or judicial proceedings involving child abuse, neglect, or custody. A person, not acting in accordance with department regulations, who with criminal negligence makes public information contained in confidential reports is guilty of a class B misdemeanor.

7 AAC 54.040. Release of child protection information to persons with legitimate interests

(a) The department has exclusive control and custody of the child protection information collected by the department. Any request for disclosure of child protection information not covered by this chapter, or requiring a special determination, must be sent to the central office of the unit of the department that handles child protection services programs.

(b) Protected health information contained in child protection files may only be released under this section to a public health authority.

(c) The department may release child protection information, on a form provided by the department, concerning a minor child that is not subject to the jurisdiction of a court under AS 47.10.010 , to a person with legitimate interest if the department has reason to believe that the release of the information will prevent physical harm to the child. The information that may be released under this subsection includes reports of harm under AS 47.17 without the name of the person making the report, the results of investigations on those reports of harm, information on protective services reports, and additional child protection information.

***

(f) A person with sufficient legitimate interest who receives child protection information from the department shall safeguard the information.

Alaska Statutes Regarding Mandatory Reporting

AS 47.17.020. Persons required to report.

(a) The following persons who, in the performance of their occupational duties, or with respect to (8) of this subsection, in the performance of their appointed duties, have reasonable cause to suspect that a child has suffered harm as a result of child abuse or neglect shall immediately report the harm to the nearest office of the department:

(1) practitioners of the healing arts;

(2) school teachers and school administrative staff members of public and private schools;

(3) peace officers and officers of the Department of Corrections;

(4) administrative officers of institutions;

(5) child care providers;

(6) paid employees of domestic violence and sexual assault programs, and crisis intervention and prevention programs as defined in AS 18.66.990;

(7) paid employees of an organization that provides counseling or treatment to individuals seeking to control their use of drugs or alcohol;

(8) members of a child fatality review team established under AS 12.65.015(e) or 12.65.120 or the multidisciplinary child protection team created under AS 47.14.300 .

(b) This section does not prohibit the named persons from reporting cases that have come to their attention in their nonoccupational capacities, nor does it prohibit any other person from reporting a child's harm that the person has reasonable cause to suspect is a result of child abuse or neglect. These reports shall be made to the nearest office of the department.

(c) If the person making a report of harm under this section cannot reasonably contact the nearest office of the department and immediate action is necessary for the well-being of the child, the person shall make the report to a peace officer. The peace officer shall immediately take action to protect the child and shall, at the earliest opportunity, notify the nearest office of the department.

(d) This section does not require a religious healing practitioner to report as neglect of a child the failure to provide medical attention to the child if the child is provided treatment solely by spiritual means through prayer in accordance with the tenets and practices of a recognized church or religious denomination by an accredited practitioner of the church or denomination.

***

(g) A person required to report child abuse or neglect under (a) of this section who makes the report to the person's job supervisor or to another individual working for the entity that employs the person is not relieved of the obligation to make the report to the department as required under (a) of this section.

(h) This section does not require a person required to report child abuse or neglect under (a)(6) of this section to report mental injury to a child as a result of exposure to domestic violence so long as the person has reasonable cause to believe that the child is in safe and appropriate care and not presently in danger of mental injury as a result of exposure to domestic violence.

(i) This section does not require a person required to report child abuse or neglect under (a)(7) of this section to report the resumption of use of an intoxicant as described in AS 47.10.011(10) so long as the person does not have reasonable cause to suspect that a child has suffered harm as a result of the resumption.

Alaska Statutes Regarding Medical and Mental Health Evaluations for Child Abuse

AS 25.20.025. Examination and treatment of minors.

(a) Except as prohibited under AS 18.16.010(a)(3),

(1) a minor who is living apart from the minor's parents or legal guardian and who is managing the minor's own financial affairs, regardless of the source or extent of income, may give consent for medical and dental services for the minor;

(2) a minor may give consent for medical and dental services if the parent or legal guardian of the minor cannot be contacted or, if contacted, is unwilling either to grant or withhold consent; however, where the parent or legal guardian cannot be contacted or, if contacted, is unwilling either to grant or to withhold consent, the provider of medical or dental services shall counsel the minor keeping in mind not only the valid interests of the minor but also the valid interests of the parent or guardian and the family unit as best the provider presumes them;

(3) a minor who is the parent of a child may give consent to medical and dental services for the minor or the child;

(4) a minor may give consent for diagnosis, prevention or treatment of pregnancy, and for diagnosis and treatment of venereal disease;

(5) the parent or guardian of the minor is relieved of all financial obligation to the provider of the service under this section.

(b) The consent of a minor who represents that the minor may give consent under this section is considered valid if the person rendering the medical or dental service relied in good faith upon the representations of the minor.

c) Nothing in this section may be construed to remove liability of the person performing the examination or treatment for failure to meet the standards of care common throughout the health professions in the state or for intentional misconduct.

HIPAA Guidelines Regarding Child Abuse and Neglect Reports

Code of Federal Regulations, Title 45, Parts 160 & 164

§ 160.203 General rule and exceptions.

A standard, requirement, or implementation specification adopted under this subchapter that is contrary to a provision of State law preempts the provision of State law. This general rule applies, except if one or more of the following conditions is met:

***

(c) The provision of State law, including State procedures established under such law, as applicable, provides for the reporting of disease or injury, child abuse, birth, or death, or for the conduct of public health surveillance, investigation, or intervention.

§ 164.502 Uses and disclosures of protected health information: general rules.

***

(g)

(5) ***Implementation specification:*** Abuse, neglect, endangerment situations. Notwithstanding a State law or any requirement of this paragraph to the contrary, a covered entity may elect not to treat a person as the personal representative of an individual if:

(i) The covered entity has a reasonable belief that:

(A) The individual has been or may be subjected to domestic violence, abuse, or neglect by such person; or

(B) Treating such person as the personal representative could endanger the individual; and

(ii) The covered entity, in the exercise of professional judgment, decides that it is not in the best interest of the individual to treat the person as the individual's personal representative.

§ 164.512 Uses and disclosures for which an authorization or opportunity to agree or object is not required.

A covered entity may use or disclose protected health information without the written authorization of the individual, as described in Sec. 164.508, or the opportunity for the individual to agree or object as described in Sec. 164.510, in the situations covered by this section, subject to the applicable requirements of this section. When the covered entity is required by this section to inform the individual of, or when the individual may agree to, a use or disclosure permitted by this section, the covered entity's information and the individual's agreement may be given orally.

(a) ***Standard: Uses and disclosures required by law.***

(1) A covered entity may use or disclose protected health information to the extent that such use or disclosure is required by law and the use or disclosure complies with and is limited to the relevant requirements of such law.

(2) A covered entity must meet the requirements described in paragraph (c), (e), or (f) of this section for uses or disclosures required by law.

(b) ***Standard: uses and disclosures for public health activities***

(1) Permitted disclosures. A covered entity may disclose protected health information for the public health activities and purposes described in this paragraph to:

(i) A public health authority that is authorized by law to collect or receive such information for the purpose of preventing or controlling disease, injury, or disability, including, but not limited to, the reporting of disease, injury, vital events such as birth or death, and the conduct of public health surveillance, public health investigations, and public health interventions; or, at the direction of a public health authority, to an official of a foreign government agency that is acting in collaboration with a public health authority;

(ii) A public health authority or other appropriate government authority authorized by law to receive reports of child abuse or neglect;

(c) ***Standard: Disclosures about victims of abuse, neglect or domestic violence***

(1) ***Permitted disclosures.*** Except for reports of child abuse or neglect permitted by paragraph (b)(1)(ii) of this section, a covered entity may disclose protected health information about an individual whom the covered entity reasonably believes to be a victim of abuse, neglect, or domestic violence to a government authority, including a

social service or protective services agency, authorized by law to receive reports of such abuse, neglect, or domestic violence:

(i) To the extent the disclosure is required by law and the disclosure complies with and is limited to the relevant requirements of such law;

(ii) If the individual agrees to the disclosure; or

(iii) To the extent the disclosure is expressly authorized by statute or regulation and:

(A) The covered entity, in the exercise of professional judgment, believes the disclosure is necessary to prevent serious harm to the individual or other potential victims; or

(B) If the individual is unable to agree because of incapacity, a law enforcement or other public official authorized to receive the report represents that the protected health information for which disclosure is sought is not intended to be used against the individual and that an immediate enforcement activity that depends upon the disclosure would be materially and adversely affected by waiting until the individual is able to agree to the disclosure.

(2) ***Informing the individual.*** A covered entity that makes a disclosure permitted by paragraph (c)(1) of this section must promptly inform the individual that such a report has been or will be made, except if:

(i) The covered entity, in the exercise of professional judgment, believes informing the individual would place the individual at risk of serious harm; or

(ii) The covered entity would be informing a personal representative, and the covered entity reasonably believes the personal representative is responsible for the abuse, neglect, or other injury, and that informing such person would not be in the best interests of the individual as determined by the covered entity, in the exercise of professional judgment.

(d) ***Standard: Uses and disclosures for health oversight activities***

(1) ***Permitted disclosures.*** A covered entity may disclose protected health information to a health oversight agency for oversight activities authorized by law, including audits; civil, administrative, or criminal investigations; inspections; licensure or disciplinary actions; civil, administrative, or criminal proceedings or actions; or other activities necessary for appropriate oversight of:

(i) The health care system;

(ii) Government benefit programs for which health information is relevant to beneficiary eligibility;

(iii) Entities subject to government regulatory programs for which health information is necessary for determining compliance with program standards; or

(iv) Entities subject to civil rights laws for which health information is necessary for determining compliance.

(2) ***Exception to health oversight activities.*** For the purpose of the disclosures permitted by paragraph (d)(1) of this section, a health oversight activity does not include an investigation or other activity in which the individual is the subject of the investigation or activity and such investigation or other activity does not arise out of and is not directly related to:

(i) The receipt of health care;

(ii) A claim for public benefits related to health; or

(iii) Qualification for, or receipt of, public benefits or services when a patient's health is integral to the claim for public benefits or services.

(3) ***Joint activities or investigations.*** Notwithstanding paragraph (d)(2) of this section, if a health oversight activity or investigation is conducted in conjunction with an oversight activity or investigation relating to a claim for public benefits not related to health, the joint activity or investigation is considered a health oversight activity for purposes of paragraph (d) of this section.

(4) Permitted uses. If a covered entity also is a health oversight agency, the covered entity may use protected health information for health oversight activities as permitted by paragraph (d) of this section.

(e) ***Standard: Disclosures for judicial and administrative proceedings***

(1) ***Permitted disclosures.*** A covered entity may disclose protected health information in the course of any judicial or administrative proceeding:

(i) In response to an order of a court or administrative tribunal, provided that the covered entity discloses only the protected health information expressly authorized by such order; or

(ii) In response to a subpoena, discovery request, or other lawful process, that is not accompanied by an order of a court or administrative tribunal, if:

(A) The covered entity receives satisfactory assurance, as described in paragraph (e)(1)(iii) of this section, from the party seeking the information that reasonable efforts have been made by such party to ensure that the individual who is the subject of the protected health information that has been requested has been given notice of the request; or

(B) The covered entity receives satisfactory assurance, as described in paragraph (e)(1)(iv) of this section, from the party seeking the information that reasonable efforts have been made by such party to secure a qualified protective order that meets the requirements of paragraph (e)(1)(v) of this section.

(iii) For the purposes of paragraph (e)(1)(ii)(A) of this section, a covered entity receives satisfactory assurances from a party seeking protecting health information if the covered entity receives from such party a written statement and accompanying documentation demonstrating that:

(A) The party requesting such information has made a good faith attempt to provide written notice to the individual (or, if the individual's location is unknown, to mail a notice to the individual's last known address);

(B) The notice included sufficient information about the litigation or proceeding in which the protected health information is requested to permit the individual to raise an objection to the court or administrative tribunal; and

(C) The time for the individual to raise objections to the court or administrative tribunal has elapsed, and:

(1) No objections were filed; or

(2) All objections filed by the individual have been resolved by the court or the administrative tribunal and the disclosures being sought are consistent with such resolution.

(iv) For the purposes of paragraph (e)(1)(ii)(B) of this section, a covered entity receives satisfactory assurances from a party seeking protected health information, if the covered entity receives from such party a written statement and accompanying documentation demonstrating that:

(A) The parties to the dispute giving rise to the request for information have agreed to a qualified protective order and have presented it to the court or administrative tribunal with jurisdiction over the dispute; or

(B) The party seeking the protected health information has requested a qualified protective order from such court or administrative tribunal.

(v) For purposes of paragraph (e)(1) of this section, a qualified protective order means, with respect to protected health information requested under paragraph (e)(1)(ii) of this section, an order of a court or of an administrative tribunal or a stipulation by the parties to the litigation or administrative proceeding that:

(A) Prohibits the parties from using or disclosing the protected health information for any purpose other than the litigation or proceeding for which such information was requested; and

(B) Requires the return to the covered entity or destruction of the protected health information (including all copies made) at the end of the litigation or proceeding.

(vi) Notwithstanding paragraph (e)(1)(ii) of this section, a covered entity may disclose protected health information in response to lawful process described in paragraph (e)(1)(ii) of this section without receiving satisfactory assurance under paragraph (e)(1)(ii)(A) or (B) of this section, if the covered entity makes reasonable efforts to provide notice to the individual sufficient to meet the requirements of paragraph (e)(1)(iii) of this section or to seek a qualified protective order sufficient to meet the requirements

of paragraph (e)(1)(iv) of this section.

(2) Other uses and disclosures under this section. The provisions of this paragraph do not supersede other provisions of this section that otherwise permit or restrict uses or disclosures of protected health information.

(f) ***Standard: Disclosures for law enforcement purposes.*** A covered entity may disclose protected health information for a law enforcement purpose to a law enforcement official if the conditions in paragraphs (f)(1) through (f)(6) of this section are met, as applicable.

(1) ***Permitted disclosures:*** Pursuant to process and as otherwise required by law. A covered entity may disclose protected health information:

(i) As required by law including laws that require the reporting of certain types of wounds or other physical injuries, except for laws subject to paragraph (b)(1)(ii) or (c)(1)(i) of this section; or

(ii) In compliance with and as limited by the relevant requirements of:

(A) A court order or court-ordered warrant, or a subpoena or summons issued by a judicial officer;

(B) A grand jury subpoena; or

(C) An administrative request, including an administrative subpoena or summons, a civil or an authorized investigative demand, or similar process authorized under law, provided that:

(1) The information sought is relevant and material to a legitimate law enforcement inquiry;

(2) The request is specific and limited in scope to the extent reasonably practicable in light of the purpose for which the information is sought; and

(3) De-identified information could not reasonably be used.

(2) ***Permitted disclosures: Limited information for identification and location purposes.*** Except for disclosures required by law as permitted by paragraph (f)(1) of this section, a covered entity may disclose protected health information in response to a law enforcement official's request for such information for the purpose of identifying or locating a suspect, fugitive, material witness, or missing person, provided that:

(i) The covered entity may disclose only the following information:

(A) Name and address;

(B) Date and place of birth;

(C) Social security number;

(D) ABO blood type and Rh factor;

(E) Type of injury;

(F) Date and time of treatment;

(G) Date and time of death, if applicable; and

(H) A description of distinguishing physical characteristics, including height, weight, gender, race, hair and eye color, presence or absence of facial hair (beard or moustache), scars, and tattoos.

(ii) Except as permitted by paragraph (f)(2)(i) of this section, the covered entity may not disclose for the purposes of identification or location under paragraph (f)(2) of this section any protected health information related to the individual's DNA or DNA analysis, dental records, or typing, samples or analysis of body fluids or tissue.

(3) ***Permitted disclosure: Victims of a crime.*** Except for disclosures required by law as permitted by paragraph (f)(1) of this section, a covered entity may disclose protected health information in response to a law enforcement official's request for such information about an individual who is or is suspected to be a victim of a crime, other than disclosures that are subject to paragraph (b) or (c) of this section, if:

(i) The individual agrees to the disclosure; or

(ii) The covered entity is unable to obtain the individual's agreement because of incapacity or other emergency circumstance, provided that:

(A) The law enforcement official represents that such information is needed to determine whether a violation of law by a person other than the victim has occurred, and such information is not intended to be used against the

victim;

(B) The law enforcement official represents that immediate law enforcement activity that depends upon the disclosure would be materially and adversely affected by waiting until the individual is able to agree to the disclosure; and

(C) The disclosure is in the best interests of the individual as determined by the covered entity, in the exercise of professional judgment.

(4) ***Permitted disclosure: Decedents.*** A covered entity may disclose protected health information about an individual who has died to a law enforcement official for the purpose of alerting law enforcement of the death of the individual if the covered entity has a suspicion that such death may have resulted from criminal conduct.

(5) ***Permitted disclosure: Crime on premises.*** A covered entity may disclose to a law enforcement official protected health information that the covered entity believes in good faith constitutes evidence of criminal conduct that occurred on the premises of the covered entity.

(6) ***Permitted disclosure: Reporting crime in emergencies.***

(i) A covered health care provider providing emergency health care in response to a medical emergency, other than such emergency on the premises of the covered health care provider, may disclose protected health information to a law enforcement official if such disclosure appears necessary to alert law enforcement to:

(A) The commission and nature of a crime;

(B) The location of such crime or of the victim(s) of such crime; and

(C) The identity, description, and location of the perpetrator of such crime.

(ii) If a covered health care provider believes that the medical emergency described in paragraph (f)(6)(i) of this section is the result of abuse, neglect, or domestic violence of the individual in need of emergency health care, paragraph (f)(6)(i) of this section does not apply and any disclosure to a law enforcement official for law enforcement purposes is subject to paragraph (c) of this section.

***

(j) ***Standard: Uses and disclosures to avert a serious threat to health or safety***

(1) ***Permitted disclosures.*** A covered entity may, consistent with applicable law and standards of ethical conduct, use or disclose protected health information, if the covered entity, in good faith, believes the use or disclosure:

(i) (A) Is necessary to prevent or lessen a serious and imminent threat to the health or safety of a person or the public; and

(B) Is to a person or persons reasonably able to prevent or lessen the threat, including the target of the threat; or

(ii) Is necessary for law enforcement authorities to identify or apprehend an individual:

(A) Because of a statement by an individual admitting participation in a violent crime that the covered entity reasonably believes may have caused serious physical harm to the victim; or

(B) Where it appears from all the circumstances that the individual has escaped from a correctional institution or from lawful custody, as those terms are defined in Sec. 164.501.

(2) ***Use or disclosure not permitted.*** A use or disclosure pursuant to paragraph (j)(1)(ii)(A) of this section may not be made if the information described in paragraph (j)(1)(ii)(A) of this section is learned by the covered entity:

(i) In the course of treatment to affect the propensity to commit the criminal conduct that is the basis for the disclosure under paragraph (j)(1)(ii)(A) of this section, or counseling or therapy; or

(ii) Through a request by the individual to initiate or to be referred for the treatment, counseling, or therapy described in paragraph (j)(2)(i) of this section.

(3) ***Limit on information that may be disclosed.*** A disclosure made pursuant to paragraph (j)(1)(ii)(A) of this section shall contain only the statement described in paragraph (j)(1)(ii)(A) of this section and the protected health information described in paragraph (f)(2)(i) of this section.

(4) ***Presumption of good faith belief.*** A covered entity that uses or discloses protected health information pursuant to paragraph (j)(1) of this section is presumed to have acted in good faith with regard to a belief described in paragraph (j)(1)(i) or (ii) of this section, if the belief is based

upon the covered entity's actual knowledge or in reliance on a credible representation by a person with apparent knowledge or authority.

(k) ***Standard: Uses and disclosures for specialized government functions***

***

(5) ***Correctional institutions and other law enforcement custodial situations.***

(i) ***Permitted disclosures.*** A covered entity may disclose to a correctional institution or a law enforcement official having lawful

custody of an inmate or other individual protected health information about such inmate or individual, if the correctional institution or such law enforcement official represents that such protected health information is necessary for:

(A) The provision of health care to such individuals;

(B) The health and safety of such individual or other inmates;

(C) The health and safety of the officers or employees of or others at the correctional institution;

(D) The health and safety of such individuals and officers or other persons responsible for the transporting of inmates or their transfer from one institution, facility, or setting to another;

(E) Law enforcement on the premises of the correctional institution; and

(F) The administration and maintenance of the safety, security, and good order of the correctional institution.

(ii) ***Permitted uses.*** A covered entity that is a correctional institution may use protected health information of individuals who are inmates for any purpose for which such protected health information may be disclosed.

(iii) No application after release. For the purposes of this provision, an individual is no longer an inmate when released on parole, probation, supervised release, or otherwise is no longer in lawful custody.

(6) ***Covered entities that are government programs providing public benefits.***

(i) A health plan that is a government program providing public benefits may disclose protected health information relating to

eligibility for or enrollment in the health plan to another agency administering a government program providing public benefits if the sharing of eligibility or enrollment information among such government agencies or the maintenance of such information in a single or combined data system accessible to all such government agencies is required or expressly authorized by statute or regulation.

(ii) A covered entity that is a government agency administering a government program providing public benefits may disclose protected health information relating to the program to another covered entity that is a government agency administering a government program providing public benefits if the programs serve the same or similar populations and the disclosure of protected health information is necessary to coordinate the covered functions of such programs or to improve administration and management relating to the covered functions of such programs.

APPENDIX 2

National Standards for Child Advocacy Centers

Multidisciplinary Team
A multidisciplinary team for response to child abuse allegations includes representation from the following: law enforcement, child protective services, prosecution, medical, mental health, victim advocacy and Children's Advocacy Center.

Cultural Competency and Diversity
Culturally competent services are routinely made available to all CAC clients and coordinated with the multidisciplinary team response.

Forensic Interviews
Forensic interviews are conducted in a manner that is legally sound, of a neutral, fact finding nature, and are coordinated to avoid duplicative interviewing.

Victim Support and Advocacy
Victim support and advocacy services are routinely made available to all CAC clients and their non-offending family members as part of the multidisciplinary team response.

Medical Evaluation
Specialized medical evaluation and treatment services are routinely made available to all CAC clients and coordinated with the multidisciplinary team response.

Mental Health
Specialized trauma-focused mental health services, designed to meet the unique needs of the child and non-offending family members, are routinely made available as part of the multidisciplinary team response.

Case Review
A formal process in which multidisciplinary discussion and information sharing regarding the investigation, case status and services needed by the child and family is to occur on a routine basis.

Case Tracking
Children's Advocacy Centers must develop and implement a system for monitoring case progress and tracking case outcomes for all MDT components.

Organizational Capacity
A designated legal entity responsible for program and fiscal operations has been established and implements basic sound administrative policies and procedures.

Child Focused Setting
The child-focused setting is comfortable, private, and both physically and psychologically safe for diverse populations of children and their non-offending family members.

MULTIDISCIPLINARY TEAM (MDT)
Essential components:

A. The CAC/MDT has a written interagency agreement signed by authorized representatives of all MDT components that clearly commits the signed parties to the CAC model for its multidisciplinary child abuse intervention response.
B. All members of the MDT including appropriate CAC staff, as defined by the needs of the case, are routinely involved in investigations and/or MDT interventions.
C. The CAC/MDT's written documents address information sharing that ensures the timely exchange of relevant information among MDT members, staff and volunteers and is consistent with legal, ethical and professional standards of practice.

Rated criteria:

D. The CAC provides routine opportunities for MDT members to provide feedback and suggestions regarding procedures/operations of the CAC/MDT.
E. The CAC/MDT participates in ongoing and relevant training and educational opportunities, including cross-discipline, team and skills-based learning.

CULTURAL COMPETENCY AND DIVERSITY

Essential components:

A. The CAC has a cultural competency plan that includes community assessment, goals, and strategies.
B. The CAC must ensure that provisions are made for non-English speaking and deaf or hard of hearing children and their non-offending family members throughout the investigation process.
C. The CAC and MDT members ensure that all services are provided in a manner that addresses culture and development throughout the investigation, intervention, and case management process.

Rated criteria:

D. The CAC engages in community outreach with underserved populations.
E. The CAC actively recruits staff, volunteers, and board members that reflect the demographics of the community
F. The CAC's cultural competency plan has been implemented and evaluated.

FORENSIC INTERVIEWS

Essential components:

A. Forensic interviews are provided by MDT/CAC staff that have specialized training in conducting forensic interviews of children.
B. The CAC/MDT's written documents describe the general forensic interview process including pre- and post-interview information sharing and decision making, and interview procedures.
C. Forensic interviews are conducted in a manner that is legally sound, non-duplicative, non-leading and neutral.
D. MDT members with investigative responsibilities are present for the forensic interview(s).
E. Forensic interviews are routinely conducted at the CAC.

Rated criteria:

F. The CAC/MDT's written documents include:
    - selection of an appropriate, trained interviewer;
    - sharing of information among team members; and
    - a mechanism for collaborative case planning.
G. The CAC and/or MDT provide opportunities for professionals who conduct forensic interviews to participate in ongoing training and peer review.
H. The CAC/MDT coordinate information gathering whether through history taking, assessment of forensic interview(s) to avoid duplication.

VICTIM SUPPORT AND ADVOCACY

Essential components:

A. Crisis intervention and ongoing support services are routinely made available for children and their non-offending family members on-site or through linkage agreements with other appropriate agencies or providers.
B. Education regarding the dynamics of abuse, the coordinated multidisciplinary response, treatment, and access to services is routinely available for children and their non-offending family members.
C. Information regarding the rights of a crime victim is routinely available to children and their non-offending family members and is consistent with legal, ethical and professional standards of practice.
D. The CAC/MDT's written documents include availability of victim support and advocacy services for all CAC clients.

Rated criteria:

E. A designated, trained individual(s) provides comprehensive, coordinated victim support and advocacy services including, but not limited to:
    - Information regarding the dynamics of abuse and the coordinated multidisciplinary response;
    - updates on case status;
    - assistance in accessing/obtaining victims' rights as outlined by law;
    - court education, support and accompaniment; and
    - assistance with access to treatment and other services such as protective orders, housing, public assistance, domestic violence intervention and transportation.

F. Procedures are in place to provide initial and on-going support and advocacy with the child and/or non-offending family members.

MEDICAL EVALUATION

Essential components:

A. Medical evaluations are provided by health care providers with pediatric experience and child abuse expertise.

B. Specialized medical evaluations for the child client are routinely made available on-site or through linkage agreements with other appropriate agencies or providers.

C. Specialized medical evaluations are available and accessible to all CAC clients regardless of ability to pay.

D. The CAC/MDT's written documents include access to appropriate medical evaluation and treatment for all CAC clients.

Rated criteria:

E. The CAC/MDT's written documents include:
    - the circumstances under which a medical evaluation is recommended;
    - the purpose of the medical evaluation;
    - how the medical evaluation is made available;
    - how medical emergency situations are addressed;
    - how multiple medical evaluations are avoided;
    - how medical care is documented;
    - how the medical evaluation is coordinated with the MDT in order to avoid duplication of interviewing and history taking; and
    - procedures are in place for medical intervention in cases of suspected physical abuse and maltreatment, if applicable.

A. The CAC and/or MDT provide opportunities for those who conduct medical evaluations to participate in ongoing training and peer review.

B. MDT members and CAC staff are trained regarding the purpose and nature of the evaluation and can educate clients and/or non-offending caregivers regarding the medical evaluation.

C. Findings of the medical evaluation are shared with the MDT in a routine and timely manner.

MENTAL HEALTH

Essential components:

A. Mental health services are provided by professionals with pediatric experience and child abuse expertise.

B. Specialized trauma-focused mental health services for the child client are routinely made available on-site or through linkage agreements with other appropriate agencies or providers.

C. Mental health services are available and accessible to all CAC clients regardless of ability to pay.

D. The CAC/MDT's written documents include access to appropriate mental health evaluation and treatment for all CAC clients.

Rated criteria:

E. The CAC/MDT's written documents include:
    - the role of the mental health professional on the MDT including provisions for attendance at case review;
    - provisions regarding sharing relevant information with the team while protecting

the clients' right to confidentiality; and
    - how the forensic process is separate from mental health treatment.

F. The CAC and/or MDT provide opportunities for those who provide mental health services to participate in ongoing training and peer review.
G. Mental health services for non-offending family members and/or caregivers are routinely made available on-site or through linkage agreements with other appropriate agencies or providers

CASE REVIEW

Essential components:

A. The CAC/MDT's written documents include criteria for case review and case review procedures.
B. A forum for the purpose of reviewing cases is conducted on a regularly scheduled basis.
C. Case review is an informed decision making process with input from all necessary MDT members based on the needs of the case.
D. A designated individual coordinates and facilitates the case review process, including notification of cases that will be reviewed.

Rated criteria:

E. Representatives routinely participating in case review include, at a minimum:
    - Law Enforcement
    - Child Protective Services
    - Prosecution
    - Medical
    - Mental Health
    - Victim Advocacy and
    - Children's Advocacy Center.

F. Recommendations from case review are communicated to appropriate parties for implementation.
G. Case review meetings are utilized as an opportunity for MDT members to increase understanding of the complexity of child abuse cases.

CASE TRACKING

Essential components:

A. The CAC/MDT's written documents include tracking case information until final disposition.
B. The CAC tracks and minimally is able to retrieve NCA Statistical Information.

Rated criteria:

C. An individual is identified to implement the case tracking process.
D. All MDT partner agencies provide their specific case information and disposition.
E. MDT partner agencies have access to information as defined by the CAC/MDT's written documents.

ORGANIZATIONAL CAPACITY

Essential components:

A. The CAC is an incorporated, private non-profit organization or government-based agency or a component of such an organization or agency.
B. The CAC maintains, at a minimum, current general commercial liability*, professional liability, and Directors and Officers liability as appropriate to its organizational structure.
C. The CAC has written administrative policies and procedures that apply to staff, MDT members, board members, volunteers and clients.
D. The CAC has an annual independent financial audit.
E. The CAC has personnel responsible for its operations and program services.
F. The CAC has, and demonstrates compliance with, written screening policies for staff that includes criminal background and child abuse registry checks and provides training and supervision.
G. The CAC has, and demonstrates compliance with, written screening policies for on-site volunteers that include criminal background and child abuse registry checks and provides training and supervision.

Rated criteria:

H. The CAC provides education and community awareness on child abuse issues.
I. The CAC has addressed its sustainability through the development of a strategic plan that includes a funding component.

CHILD FOCUSED SETTING

Essential components:

A. The CAC setting is a designated, well-defined, task appropriate facility or contiguous space within an existing structure.
B. The CAC has written policies and procedures that ensure separation of victims and alleged offenders.
C. The CAC makes reasonable accommodations to make the facility physically accessible.
D. The facility allows for live observation of interviews by MDT members.

Rated criteria:

E. The CAC is maintained in a manner that is physically safe and "child proof".
F. Children and families are observed or supervised by staff, volunteer, and/or MDT members.
G. Separate and private area(s) are available for those awaiting services, for case consultation and discussion, and for meetings or interviews.
H. The location of the CAC is convenient and accessible to clients and MDT members.

ACKNOWLEDGEMENTS

The Alaska Children's Justice Act Task Force members at the time of publication are gratefully acknowledged for their time and expertise:

- *Shannon Baergen* - Guardian ad litem, Office of Public Advocacy, Anchorage
- *Cathy Baldwin-Johnson MD** – CJATF Chair - Medical Director, Alaska CARES, Anchorage; Medical Director, The Children's Place, Wasilla; Family Physician, Providence Matanuska Health Care, Wasilla
- *John Bioff* * - General Counsel, Norton Sound Health Corporation, Nome
- *BJ Coopes MD* - Medical Director Pediatric Intensive Care and In-Patient Pediatrics, The Children's Hospital at Providence, Anchorage
- *Cyndy Curran* - Division Director, Teaching Learning Support, Department of Education
- *Derek DeGraaf* - Alaska Bureau of Investigations, Internet Crimes Against Children Task Force, Alaska State Troopers, Anchorage
- *Bradley Grigg* - Children's Behavioral Health Specialist/Child State Planner, Division of Behavioral Health, Juneau
- *Judge Charles Huguelet* - Kenai Trial Court, Alaska Court System, Kenai
- *Thom Janidlo* - Attorney, Private Practice, Anchorage
- *Lance Joanis* * - District Attorney, Department of Law, Kenai
- *Pam Karalunas* * - Statewide Coordinator, Alaska Children's Alliance, Chugiak
- *Dorothea "D" Owens* - CASA Volunteer, Haines
- *Jared Parrish* - Alaska SCAN Director, Division of Public Health, DHSS, Anchorage
- *Diane Payne** - Justice for Native Children Project Director, Alaska Summit Enterprise, Inc., Eagle River
- *Barb Ramos* - Probation Officer III, Department of Corrections, Bethel
- *Jan Rutherdale** - CJATF Co-Chair - Assistant Attorney General, Child Protection Section, Civil Division, Department of Law, Juneau
- *Sergeant Cindi Stanton* - Anchorage Police Department Crimes Against Children Unit
- *Fred Van Wallinga* - Retired Principal and Citizen Review Panel Member
- *Rob Wood* - Chief Probation Office, Division of Juvenile Justice, Anchorage
- *Doug Wooliver* - Administrative Attorney, Alaska Court System, Anchorage
- (*Mike Lesmann* * - Former Task Force Member, now Special Assistant to the Governor, Juneau)

* MDT Guidelines Subcommittee members who developed this document

Many thanks to the leadership and staff of Alaska CARES and The Children's Place who worked diligently with their state and community partners to craft mutually beneficial protocols and agreements, and then generously shared those documents with the Task Force.

This document was sent to the following organizations and agencies for their response and input:

Alaska Children's Justice Act Task Force

The Honorable Kevin Meyer

716 West 4th Avenue Suite 410

Anchorage, AK 99501

December 9, 2011

Dear Representative Meyer:

The Alaska Children's Justice Act Task Force (CJA) respectfully requests that you sponsor and introduce the attached bill to improve and remedy some deficiencies within the criminal statutes.

The CJA, funded in FY 1999, is a federally-mandated, state-wide multi-disciplinary group charged with evaluating the state system response to child abuse, making recommendations for system improvement, and implementing projects that improve the system's response.

Last year the CJA made a presentation to the House HSS Committee concerning a problem that the task force had identified. After the presentation, the task force was asked to present our recommendations.

At our scheduled meeting on December 20, 2011 at 12:30 p.m., we will present a proposal for a bill that our committee members have developed over the past several months. We are asking that you sponsor this bill. We will be prepared to answer any questions that you or your staff may have at that time.

I am including with this letter our statement regarding the proposed legislation, a copy of our member list, and a copy of the proposed legislative changes.

We look forward to our meeting with you and to your support for this important change to the statutes which we believe will further our goal of protecting Alaska's children.

Thank you for your consideration.

Respectfully yours,

Thom F. Janidlo

Vice-Chair

Alaska Children's Justice Act Task Force

Alaska Children's Justice Act Task Force (CJA)
Statement Regarding Proposed Legislation

About the CJA

The current CJA was founded in FY1999. We are a federally-mandated, state-wide multidisciplinary group, with representatives from law enforcement, medicine, child protection, law (both prosecution and defense), child advocacy centers, judiciary, mental health, CASA, schools, and parents. The CJA is charged with evaluating the state system response to child abuse, especially child sexual abuse and serious physical abuse; making recommendations for system improvement; and implementing projects that improve the system response. For a current list of CJA members, see attachment "CJA member list 11-11."

Recommendations for system improvement through criminal legislation

As we pointed out in last year's presentation to the House HESS Committee, we have become aware of some shortcomings in the current criminal laws regarding the prosecution of harm to children. After researching laws in other states, analyzing the Alaska criminal statutes, and running our ideas past prosecutors and law enforcement, we have drafted the attached "CJA proposed legislation 11-18-11."

What follows is a description of the problem and how this legislation proposes to fix the problem, with section numbers provided to locate the fix in the proposed legislation.

This legislation would seek to:

- **Modify the assault statutes to create broader criminal liability for assaults to children**

Problem: Young children or mentally/physically impaired older children sometimes experience harm that deserves greater penalties to the offender than are currently available. One reason is because the harm may not fit into the "serious

physical injury" definition[1], a required element in many of the felony assault statutes, and yet the harm caused to the child is serious enough to deserve a penalty greater than a misdemeanor. For example, a person who intentionally burns a child but not to the point of the child needing medical treatment could be charged only with a misdemeanor. Another example is that a person who spanks a child so hard that it results in severe bruising but not protracted disfigurement could be charged only with a misdemeanor.

Solutions:

A. Create a new definition of harm for child assaults, "serious bodily injury to the child" (See section 10.) This definition was modeled after a Tennessee criminal statute, 39-15-402(d).[2]

B. Apply the "serious bodily injury" definition to children under 12 or children under age 16 who are mentally or physically impaired. (See section 4 for definition of mental and physical impairment.)

C. Add new causes of action in all three felony assault statutes so that the penalty for an assault to a child corresponds with the person's mental state and the harm caused. For example, this legislation would add two new causes of action to 11.41.200, assault in the first degree (a class A felony), to punish the intentional, one-time serious bodily injury (to a young or impaired older child) and the reckless, repeated serious bodily injury to such children. (See section 1.) This legislation also would add causes of action to assault in the second degree (a class B felony) to cover less serious mental states and/or less serious injuries to such children. (See section 2.)

D. Modify assault in the third degree (a class C felony) to increase the age of the injured child from under 10 to under 12 and to also apply to a child under 16 who is mentally or physically impaired, in order to make the ages in the assault statutes the same.[3] (See section 3.)

---

[1] 11.81.900(56) defines "serious physical injury" as "**(A)** physical injury caused by an act performed under circumstances that create a substantial risk of death; or **(B)** physical injury that causes serious and protracted disfigurement, protracted impairment of health, protracted loss or impairment of the function of a body member or organ, or that unlawfully terminates a pregnancy."

[2] 39-15-402(d) defines "Serious bodily injury to the child" as including, "but is not limited to, second- or third-degree burns, a fracture of any bone, a concussion, subdural or subarachnoid bleeding, retinal hemorrhage, cerebral edema, brain contusion, injuries to the skin that involve severe bruising or the likelihood of permanent or protracted disfigurement, including those sustained by striking children with objects, or other physical injury that results in significant physical or emotional injury to the child."

E. Create a sentencing aggravator if the serious bodily injury caused to a child resulted in significant mental injury to the child. (See section 11.) The definition of "mental injury" is taken from AS 47.17.290(9).[4]

- **Create new criminal theories regarding exposure of children to drugs**

Problem: It is difficult to prosecute a person who has exposed a child to drugs and, because of that exposure, the child tests positive for that drug. For example, the District Attorney's Office currently can prosecute someone under Misconduct Involving Controlled Substance I for purposefully giving a child under 16 drugs such as methamphetamine but can't prosecute someone who is indirectly exposing a child to such drugs, such as by having a meth lab in the home. Nor can a person be prosecuted for exposing a child to serious chemicals used in meth labs, which can be highly dangerous to a child. Also, 11.51.130(a)(2) (contributing to the delinquency of a minor) -- which makes it a misdemeanor to recklessly allow a child to be in presence of the unlawful manufacture, use, display, or delivery of a controlled substance – seemed to fit better in the endangering the welfare of a minor statute.

Solution: Modify AS 11.51.100 (endangering the welfare of a minor in the first degree) by creating 3 new subsections to:

A. Penalize the reckless exposure of a child to a controlled substance and, because of that exposure, the child tests positive for the controlled substance. Exposure could include having a meth lab in the home or doing drugs in the child's presence, or leaving drugs around the house, in harms way. The penalties range from a misdemeanor to a Class B felony, depending on the dangerousness of the drug. (See section 5, subsection (b)(2).) The level of penalty, from a class B felony to a class A misdemeanor, depends on the seriousness of the class of drugs. For example, exposure to meth would be a class A felony, whereas exposure to marijuana would be a misdemeanor. (See section 5, subsection (g).)

---

[3] The CJA felt that under 12 was a better age cut-off than 10; children under 12 are usually still in elementary school, so the under 10 category seemed too restrictive.

[4] AS 47.17.290(9) states: "mental injury" means a serious injury to the child as evidenced by an observable and substantial impairment in the child's ability to function in a developmentally appropriate manner and the existence of that impairment is supported by the opinion of a qualified expert witness."

B. Move the provision in 11.51.130(a)(2) (recklessly allowing a child to be in presence of the unlawful manufacture, use, display, or delivery of a controlled substance) to AS 11.51.100. (See section 5, subsection (b)(3).)

C. Penalize the reckless exposure of a child to serious chemicals used in meth labs. (See section 5, subsection (b)(4).)

- **Increase penalties when a parent intentionally withholds adequate food or liquids**

Problem: The current punishment for criminal neglect is a misdemeanor. The CJA believes that a felony is a more apt punishment for a parent or guardian who intentionally withholds adequate food or liquids to a child, perhaps as a form of punishment or deliberate cruelty.

Solution: Modify AS 11.51.120 so that it is a class C felony for a parent to intentionally fail, without lawful excuse, to provide adequate food and liquids to the child. (See sections 6 and 7.) The standard for determining what is an inadequate amount of food is that "a reasonable person would conclude the child was not receiving adequate food or liquids."

- **Create a criminal law when an incarcerated person contacts a victim or witness in violation of a court order**

Problem: Current law prevents a defendant out on bail or on parole or probation from having contact with a victim or witness if so ordered by the court, but if that defendant is incarcerated on a no bail order, it is not a crime for him to be contacting the victim or a witness (unless he threatens her or encourages her to change her story, which is a violation of the witness tampering or interference with the judicial process law). So, for example, if an incarcerated sex offender contacts his under-age victim to tell her that he loves her and wants to marry her, no crime has been committed. Also, there is nothing law enforcement can do to the person who forwards the phone call or letters to the incarcerated offender.

Solution: Add two new theories to the unlawful contact statute to: (1) penalize an incarcerated person for contacting a victim or witness after being ordered not to and (2) penalize a person who assists the defendant who's been ordered to have no contact to have such contact. (See section 9.)

CJA Task Force Proposed Legislative changes 12/6/11

"An Act relating to the crimes of assault, endangering the welfare of a child, and criminal nonsupport contributing to the delinquency of a minor, unlawful contact; relating to criminal definitions; relating to sentencing; and providing for an effective date."

* **Sec. 1.** AS 11.41.200(a) is amended to read:

(a) A person commits the crime of assault in the first degree if

(1) that person recklessly causes serious physical injury to another by means of a dangerous instrument;

(2) with intent to cause serious physical injury to another, **that** [THE] person causes serious physical injury to any person;

(3) **that** [THE] person knowingly engages in conduct that results in serious physical injury to another under circumstances manifesting extreme indifference to the value of human life; or

(4) that person recklessly causes serious physical injury to another by repeated assaults using a dangerous instrument, even if each assault individually does not cause serious physical injury.

(5) while being 18 years of age or older, that person

(i) intentionally causes serious bodily injury to a child under 12 years of age or to a child under the age of 16 who is mentally or physically impaired.

(ii) recklessly causes serious bodily injury to a child under 12 years of age or to a child under the age of 16 who is mentally or physically impaired on more than one occasion.

* **Sec. 2.** AS 11.41.210(a) is amended to read:

(a) A person commits the crime of assault in the second degree if

(1) with intent to cause physical injury to another person, that person causes physical injury to another person by means of a dangerous instrument;

(2) that person recklessly causes serious physical injury to another person; or

(3) that person recklessly causes serious physical injury to another by repeated assaults, even if each assault individually does not cause serious physical injury.

(4) while being 18 years of age or older, that person

(i) recklessly causes serious bodily injury to a child under 12 years of age or to a child under the age of 16 who is mentally or physically impaired;

(ii) intentionally causes physical injury to a child under 12 years of age or to a child under the age of 16 who is mentally or physically impaired and the injury would cause a reasonable caregiver to seek medical attention from a health care professional in the form of diagnosis or treatment;

(iii) intentionally causes physical injury to a child under 12 years of age or a child under the age of 16 who is mentally or physically impaired on more than on occasion.

* **Sec. 3.** AS 11.41.220(a) is amended to read:

(a) A person commits the crime of assault in the third degree if that person

(1) recklessly

(A) places another person in fear of imminent serious physical injury by means of a dangerous instrument;

(B) causes physical injury to another person by means of a dangerous instrument; or

(C) while being 18 years of age or older

(i) causes physical injury to a child under **12** [10] years of age **or to a child under the age of 16 who is mentally or physically impaired** and the injury would cause a reasonable caregiver to seek medical attention from a health care professional in the form of diagnosis or treatment;

(ii) causes physical injury to a child under **12** [10] years of age **or to a child under the age of 16 who is mentally or physically impaired** on more than one occasion;

(2) with intent to place another person in fear of death or serious physical injury to the person or the person's family member makes repeated threats to cause death or serious physical injury to another person;

(3) while being 18 years of age or older, knowingly causes physical injury to a child under 16 years of age but at least **12** [10] years of age and the injury reasonably requires medical treatment;

(4) with criminal negligence causes serious physical injury under AS 11.81.900(b)(56)(B) to another person by means of a dangerous instrument; or

(5) commits a crime that is a violation of AS 11.41.230(a)(1) or (2) and, within the preceding 10 years, the person was convicted on two or more separate occasions of crimes under

(A) AS 11.41.100 - 11.41.170;

(B) AS 11.41.200 - 11.41.220, 11.41.230(a)(1) or (2), 11.41.280, or 11.41.282;

(C) AS 11.41.260 or 11.41.270;

(D) AS 11.41.410, 11.41.420, or 11.41.425(a)(1); or

(E) a law or ordinance of this or another jurisdiction with elements similar to those of an offense described in (A) - (D) of this paragraph.

* **Sec. 4.** AS 11.41 is amended by adding a new section to read:

Sec. 11.41.225. Definitions

In AS 11.41.200-220:

a) mentally impaired means a person who suffers from diminished cognitive function or capacity or a mental disorder that temporarily or permanently renders the person substantially incapable of appraising the nature of his or her conduct or the conduct of others.

b) Physically impaired includes, but is not limited to, all of the following: having any physiological disease, disorder, condition, cosmetic disfigurement, or anatomical loss that does both of the following:

(1) Affects one or more of the following body systems: neurological, immunological, musculoskeletal, special sense organs, including speech organs, respiratory, cardiovascular, reproductive, digestive, genitourinary, hemic and lymphatic, skin, and endocrine.

(2) Limits an individual's ability to participate in major life activities.

* **Sec. 5.** AS 11.51.100 is amended to read:

Sec. 11.51.100. Endangering the welfare of a child in the first degree.

(a) A person commits the crime of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person

(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;

(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person

(A) is registered or required to register as a sex offender under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;

(B) has been charged by complaint, information, or indictment with a violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or

(C) has been charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; or

(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child.

(b) A person commits the crime of endangering the welfare of a minor in the first degree if

(1) the person transports a child in a motor vehicle, aircraft, or watercraft while in violation of AS 28.35.030**;**

(2) the person recklessly exposes a child to an IA, IIA, IIIA, IVA, VA, or VIA controlled substance, and as a result of that exposure the child tests positive for a IA, IIA, IIIA, IVA, VA, or VIA controlled substance. In this section, exposure includes but is not limited to the manufacture of a controlled substance or the consumption of a controlled substance by smoking or inhalation while in the presence of a child.

(3) recklessly allows the child to enter or remain in the immediate physical presence of the unlawful manufacture, use, display, or delivery of a controlled substance knowing that the manufacture, use, display, or deliveryis occurring, unless the child's disabilities of minority have been removed for general purposes under AS 09.55.590; or

(4) recklessly causes or allows a child to enter or remain in a dwelling or vehicle in which on occupant of the dwelling or vehicle possesses an immediate precursor of methamphetamine, or the salts, isomers, or salts of isomers of the immediate precursor of methamphetamine, or possesses a listed chemical with the intent to manufacture any material, compound, mixture, or preparation that contains methamphetamine, or its salts, isomers, or salts of isomers or an immediate precursor of methamphetamine, or its salts, isomers, or salts of isomer; in this section, "listed chemical" means a chemical described under AS 11.71.200.

(c) In this section, "physically mistreated" means

(1) having committed an act punishable under AS 11.41.100 - 11.41.250; or

(2) having applied force to a child that, under the circumstances in which it was applied, or considering the age or physical condition of the child, constitutes a gross deviation from the standard of conduct that a reasonable person would observe in the situation because of the substantial and unjustifiable risk of

(A) death;

(B) serious or protracted disfigurement;

(C) protracted impairment of health;

(D) loss or impairment of the function of a body member or organ;

(E) substantial skin bruising, burning, or other skin injury;

(F) internal bleeding or subdural hematoma;

(G) bone fracture; or

(H) prolonged or extreme pain, swelling, or injury to soft tissue.

(d) Endangering the welfare of a child in the first degree under (a)(3) of this section is a

(1) class B felony if the child dies;

(2) class C felony if the child suffers sexual contact, sexual penetration, or serious physical injury; or

(3) class A misdemeanor if the child suffers physical injury.

(e) Endangering the welfare of a child under (b)**(1), (3) or (4)** of this subsection is a class A misdemeanor.

(f) Endangering the welfare of a child in the first degree under (a)(1) or (2) of this section is a class C felony.

(g) Endangering the welfare of a child under (b)(2) of this subsection is a

(1) class B felony if the controlled substance was a schedule IA, or IIA controlled substance;

(2) class C felony if the controlled substance was a schedule IIIA, or IVA controlled substance;

(3) class A misdemeanor of the controlled substance was a schedule VA, VIA controlled substance.

* **Sec. 6.** AS 11.51 is amended by adding a new section to read:

Sec. 11.51.115. Criminal nonsupport in the First Degree.

(a) A person commits the crime of criminal nonsupport if, being a person legally charged with the support of a child the person intentionally fails, without lawful excuse, to provide adequate food and or liquids for the child and a reasonable person would conclude the child was not receiving adequate food or liquids.

(b) Criminal nonsupport in the first degree is a class C felony.

(c) In this section, "child" is defined in AS 11.51.120(f)(1).

* **Sec. 7.** AS 11.51.120 is amended to read:

Sec. 11.51.120. Criminal nonsupport in the Second Degree.

(a) A person commits the crime of criminal nonsupport if, being a person legally charged with the support of a child the person knowingly fails, without lawful excuse, to provide support for the child.

(b) As used in this section "support" includes necessary food, care, clothing, shelter, medical attention, and education. There is no failure to provide medical attention to a child if the child is provided treatment solely by spiritual means through prayer in accordance with the tenets and practices of a recognized church or religious denomination by an accredited practitioner of the church or denomination.

(c) Except as provided in (d) of this section, criminal nonsupport is a class A misdemeanor.

(d) Criminal nonsupport is a class C felony if the support the person failed to provide is monetary support required by a court or administrative order from this or another jurisdiction and, at the time the person knowingly failed, without lawful excuse, to provide the support,

(1) the aggregate amount of accrued monetary child support arrearage is $20,000 or more;

(2) no child support payment has been made for a period of 24 consecutive months or more; or

(3) the person had been previously convicted under this section or a similar provision in another jurisdiction and

(A) the aggregate amount of accrued monetary child support arrearage is $5,000 or more; or

(B) no child support payment has been made for a period of six months or more.

(e) In addition to the provisions of (c) and (d) of this section, criminal nonsupport is punishable by loss or restriction of a recreational license as provided in AS 12.55.139_.

(f) In this section,

(1) "child" means a person

(A) under 18 years of age; or

(B) 18 years of age or older for whom a person is ordered to pay support under a valid court or administrative order;

(2) "child support" means support for a child;

(3) "without lawful excuse" means having the financial ability to provide support or having the capacity to acquire that ability through the exercise of reasonable efforts.

* **Sec. 8.** AS 11.51.130(a) is amended to read:

(a) A person commits the crime of contributing to the delinquency of a minor if, being 19 years of age or older or being under 19 years of age and having the disabilities of minority removed for general purposes under AS 09.55.590, the person aids, induces, causes, or encourages a child

(1) under 18 years of age to do any act prohibited by state law unless the child's disabilities of minority have been removed for general purposes under AS 09.55.590;

[(2) UNDER 18 YEARS OF AGE OR ALLOWS A CHILD UNDER 18 YEARS OF AGE TO ENTER OR REMAIN IN THE IMMEDIATE PHYSICALL PRESENCE OF THE UNLAWFUL MANUFACTURE, USE, DISPAY, OR DELIVERY OF A CONTROLLED SUBSTANCE KNOWING THAT THE MANUFACTURE, USE, DISPAY, OR DELIVERY IS OCCURING, UNLESS THE CHILD'S DISABILITIES OF MINORITY HAVE BEEN REMOVED FOR GENERAL PURPOSES UNDER AS 09.55.590 ;]

(2)[3] under 16 years of age to be repeatedly absent from school, without just cause; or

(3)[4] under 18 years of age to be absent from the custody of a parent, guardian, or custodian without the permission of the parent, guardian, or custodian or without the knowledge of the parent, guardian, or custodian, unless the child's disabilities of minority have been removed for general purposes under AS 09.55.590 or the person has immunity under AS 47.10.350 or 47.10.398(a); it is an affirmative defense to a prosecution under this paragraph that, at the time of the alleged offense, the defendant

(A) reasonably believed that the child was in danger of physical injury or in need of temporary shelter; and

(B) within 12 hours after taking the actions comprising the alleged offense, notified a peace officer, a law enforcement agency, or the Department of Health and Social Services of the name of the child and the child's location.

* **Sec. 9.** AS 11.56.750(a) is amended by adding a new section to read:

(a) A person commits the crime of unlawful contact in the first degree if the person

(1) has been ordered not to contact a victim or witness of the offense [AS]

(A) **as** part of a sentence imposed under AS 12.55.015 ; or

(B) **as** a condition of

(i) release under AS 12.30;

(ii) probation under AS 12.55.101; or

(iii) parole under AS 33.16.150; **or**

(C) while incarcerated; and

(2) either directly or indirectly, knowingly contacts or attempts to contact the victim or witness in violation of the order**; or**

(3) knowingly assists a person in violating section (a)(1 & 2) of this statute.

* **Sec. 10.** AS 11.81.900(a) is amended by adding a new subsection to read:

"Serious bodily injury to the child" includes, but is not limited to, second- or third-degree burns, a fracture of any bone, a concussion, subdural or subarachnoid bleeding, retinal hemorrhage, cerebral edema, brain contusion, strangulation, injuries to the skin that involve severe bruising or the likelihood of permanent or protracted disfigurement, including those sustained by striking children with objects, or other physical injury that results in significant physical injury to the child.

* **Sec. 11.** AS 12.55.155(18) is amended to read:

Sec. 12.55.155. Factors in aggravation and mitigation.

(18) the offense was a felony

(A) specified in AS 11.41 and was committed against a spouse, a former spouse, or a member of the social unit made up of those living together in the same dwelling as the defendant;

(B) specified in AS 11.41.410 - 11.41.458 and the defendant has engaged in the same or other conduct prohibited by a provision of AS 11.41.410 - 11.41.460 involving the same or another victim;

(C) specified in AS 11.41 that is a crime involving domestic violence and was committed in the physical presence or hearing of a child under 16 years of age who was, at the time of the offense, living within the residence of the victim, the residence of the perpetrator, or the residence where the crime involving domestic violence occurred;

(D) specified in AS 11.41 and was committed against a person with whom the defendant has a dating relationship or with whom the defendant has engaged in a sexual relationship; [OR]

(E) specified in AS 11.41.434 - 11.41.458 or AS 11.61.128 and the defendant was 10 or more years older than the victim; **or**

(F) specified in AS 11.41.200 – 11.41.220 and the serious bodily injury caused to a child resulted in significant mental injury to the child. In this section, "mental injury" is defined as a serious injury to the child as evidenced by an observable and substantial impairment in the child's ability to function in a developmentally appropriate manner and the existence of that impairment is supported by the opinion of a qualified expert witness.

* **Sec. 12.** This Act takes effect *, 2012.

Lifelong consequences

ABSTRACT

Objectives: To present new estimates of the average lifetime costs per child maltreatment victim and aggregate lifetime costs for all new child maltreatment cases incurred in 2008 using an incidence-based approach.
Methods: This study used the best available secondary data to develop cost per case estimates. For each cost category, the paper used attributable costs whenever possible. For those categories that attributable cost data were not available, costs were estimated as the product of incremental effect of child maltreatment on a specific outcome multiplied by the estimated cost associated with that outcome. The estimate of the aggregate lifetime cost of child maltreatment in 2008 was obtained by multiplying per-victim lifetime cost estimates by the estimated cases of new child maltreatment in 2008.
Results: The estimated average lifetime cost per victim of nonfatal child maltreatment is $210,012 in 2010 dollars, including $32,648 in childhood health care costs; $10,530 in adult medical costs; $144,360 in productivity losses; $7,728 in child welfare costs; $6,747 in criminal justice costs; and $7,999 in special education costs. The estimated average lifetime cost per death is $1,272,900, including $14,100 in medical costs and $1,258,800 in productivity losses. The total lifetime economic burden resulting from new cases of fatal and nonfatal child maltreatment in the United States in 2008 is approximately $124 billion. In sensitivity analysis, the total burden is estimated to be as large as $585 billion.
Conclusions: Compared with other health problems, the burden of child maltreatment is substantial, indicating the importance of prevention efforts to address the high prevalence of child maltreatment.

Published by Elsevier Ltd.

Introduction

Child maltreatment (CM) is a serious and prevalent public health problem in the United States, responsible for substantial morbidity and mortality. The 4 major types of CM are physical abuse, sexual abuse, psychological abuse, and neglect (Leeb et al., 2007). In fiscal year 2008, US state and local child protective services (CPS) received 3.3 million

reports of children being abused or neglected and an estimated 772,000 children were classified by CPS authorities as being maltreated (USDHHS, 2010). The number of confirmed cases has decreased over the past several years (USDHHS, 2010), but researchers argue that CPS data grossly underestimate the total incidence of CM (Haugaard & Emery, 1989; Hussey, Chang, & Kotch, 2006; Swahn et al., 2006; Waldfogel, 1998). A nationally representative study of children aged 0–17 reported that 10.2% of US children experienced some form of maltreatment in 2008 (Finkelhor, Turner, Ormrod, & Hamby, 2009).

CM has been shown to have lifelong adverse health, social, and economic consequences for survivors, including behavioral problems (Felitti et al., 1998; Repetti, Taylor, & Seeman, 2002); mental health conditions such as posttraumatic stress disorder (Browne & Finkelhor, 1986; Holmes & Sammel, 2005; Moeller, Bachmann, & Moeller, 1993); increased risk for delinquency, adult criminality, and violent behavior (Fang & Corso, 2007; Widom & Maxfield, 2001); increased risk of chronic diseases (Browne & Finkelhor, 1986; Felitti et al., 1998); lasting impacts or disability from physical injury (Dominguez, Chalom, & Costarino, 2001); reduced health-related quality of life (Corso, Edwards, Fang, & Mercy, 2008); and lower levels of adult economic well-being (Currie & Widom, 2010). Given the high prevalence of CM and the many negative short- and long-term consequences of CM, the economic costs of CM may be substantial. Estimating the economic burden of CM is important for several reasons. Economic estimates can help to increase awareness of the current severity of CM, place the problem in the context of other public health concerns, and may be used in economic evaluation of interventions to reduce or prevent CM.

Several studies have drawn attention to the problem of CM by producing estimates of the national economic burden of CM (Conrad, 2006; Daro, 1988; Fromm, 2001; Miller, Cohen, & Wiersema, 1996; Wang & Holton, 2007). These studies made important contributions and advanced awareness, but shortcomings have been identified (Corso & Fertig, 2010), which should be addressed if burden estimates are to be used for health policy analysis. Problems include the "(1) lack of transparency in inputs used in the estimation procedure, (2) calculation mistakes, and (3) methodological errors" (p. 297) (Corso & Fertig, 2010). Correcting for these flaws is crucial to producing higher quality future estimates of the economic burden of CM. Furthermore, since the last estimate of the economic burden of CM conducted in 2007 (Wang & Holton, 2007), researchers have found additional quantified evidence regarding the health care costs associated with CM during childhood and adulthood (Bonomi et al., 2008; Florence et al., 2012) and the long-term consequence of CM on adult earnings (Currie & Widom, 2010). Including these latest study results should improve understanding of the economic burden of CM.

Economic burden estimates generally take 1 of 2 perspectives to quantifying a health problem: a prevalence-based approach or an incidence-based approach. Both are relevant to CM. Prevalence-based economic burden provides an estimate of the direct and indirect costs incurred in a period (most often 1 year) as a result of the prevalence of CM during this same period (or this given year), regardless of the onset of CM. Thus, in a prevalence-based study of the economic burden of CM with a time frame of, say, 1 year, costs associated with all cases of CM (including cases with the onset in or at any time before the base year) would be included; however, only costs incurred during the 1-year period would be counted (Haddix, Teutsch, & Corso, 2003).

In contrast, incidence-based economic burden represents the total lifetime costs resulting from new cases of CM that occur within a set time period (most often 1 year) (Haddix, Teutsch, & Corso, 2003). Incidence-based costs are more difficult to estimate because they require data on short- and long-term costs and consequences of CM, such as its chronic sequelae on health, employment, and earnings over the lifetime of an individual. However, incidence-based costs are more useful for the economic evaluation of CM prevention/intervention activities (Haddix, Teutsch, & Corso, 2003). For example, the lifetime costs avoided could be compared with the costs of preventing 1 case of CM in a benefit-cost analysis of prevention. Both direct and indirect costs are included in an incidence-based costing perspective.

All of the previous estimates of the economic burden of CM that we are aware of are not estimated on a cost-per-case basis, except for the Conrad (2006) study. Similar to other studies, Conrad's study has a number of methodological shortcomings. For example, for the effect of CM on juvenile delinquency, Conrad uses the raw number of how many abused children become juvenile offenders as reported in a study by Widom and Maxfield (2001). This number does not take into account how many of these children would have been offenders if they had not been abused and therefore overestimates the effect of CM on juvenile delinquency. Widom and Maxfield (2001) report that about 27% of abused and neglected children have had a juvenile arrest, compared with 17% of non-abused children. This 10% marginal (or incremental) effect would have provided a more accurate estimate of the effect of CM on delinquency. There are similar problems with the estimates of effect of CM on adult criminality and lifetime productivity. In addition, for some of the cost estimates (such as the use of health care and mental health services), annual costs (prevalence-based estimates) of CM were calculated. Because the study was designed to estimate the incidence-based lifetime health care costs, the stream of incremental health care costs associated with CM over the lifetime should be used, discounted, and summed to net present value in the base year of analysis (Haddix, Teutsch, & Corso, 2003).

In this paper, we present new estimates of the average lifetime cost per CM victim and aggregate lifetime costs for all new cases of CM incurred in 2008 using an incidence-based approach. This study extends previous research in this area by correcting methodological flaws of previous studies; incorporating more recent and comprehensive studies of the epidemiology, consequences, and costs of CM; and providing a framework for using the findings in the literature to estimate the incidence-based economic burden of CM.

Methods

General overview

This study measured costs from the societal perspective. All costs were estimated in US dollars and adjusted to the reference year 2010 using the gross domestic product (GDP) deflator (available from http://www.gpoaccess.gov/usbudget/fy12/pdf/BUDGET-2012-TAB.pdf, Table 10.1). Future costs associated with CM accumulating over time were discounted at 3% to reflect their present value, as recommended by the US Panel on Cost-Effectiveness in Health and Medicine (Gold et al., 1996). Although 3% is often recommended as the base rate for cost-effectiveness analysis of health and medical interventions, a more conservative discount rate of 7% was used as a further sensitivity analysis as recommended by the Committee to Evaluate Measures of Health Benefits for Environmental, Health, and Safety Regulations (Miller, Robinson, & Lawrence, 2006).

Based on previous research (Corso & Fertig, 2010), this study focuses on the following major types of costs that are associated with CM: health care costs (short- and long-term, including physical and mental health), productivity losses, child welfare costs, criminal justice costs, and special education costs. For each category, we used the best available secondary data to develop cost per case estimates. First, a general literature review was performed to identify published, peer-reviewed studies on all outcomes related to CM with a potential economic cost or consequence. Articles were identified by keyword searching in a variety of databases, including PubMed, PsycInfo, EconLit, and Google Scholar. In addition to keyword searches, the bibliographies of all relevant articles were scanned to identify additional relevant studies. Whenever possible, published peer-reviewed studies were used to estimate the costs. However, in cases where the data on costs or effects were particularly sparse, we included non-peer-reviewed reports or white papers containing relevant economic outcomes of CM. Reports and white papers were identified by examining the citations of peer-reviewed studies identified in the general literature review and through searches of EconLit, the Social Science Research Network, and Google and Google Scholar.

The median age for CM victims in 2008 was 6 years old (USDHHS, 2010). We used the median age to calculate the average lifetime cost per victim, which was defined as the sum of short-term health care costs, long-term health care costs, productivity losses, child welfare costs, criminal justice costs, and special education costs. In other words, the present value of all future costs is estimated starting at age 6. For each category, we used attributable costs whenever possible (e.g., health care costs); these estimates reflect econometric procedures to statistically identify the difference between the costs of CM victims and non-maltreated controls, adjusting for observed differences between the 2 groups. Attributable cost data were not available for some categories; in these, costs were estimated as the product of incremental effect of CM on a specific outcome multiplied by the estimated cost associated with that outcome. For example, the cost of adult criminality due to CM is estimated as the product of the incremental probability of being an adult criminal by the average cost per adult criminal career. The estimate of the aggregate lifetime cost of CM in 2008 was obtained by multiplying per-victim lifetime cost estimates by the estimated cases of new CM in 2008.

Incidence rate

To generate incidence-based estimates, we begin with an estimate of CM cases and deaths during 2008. For cases, an estimated 772,000 children were determined by CPS agencies to be victims of abuse or neglect during 2008 (USDHHS, 2010). Three-quarters of victims (75%) had no history of prior victimization (USDHHS, 2010), yielding an estimated 579,000 new cases in 2008. Although researchers have argued that CPS data underestimate the total incidence of CM (Haugaard & Emery, 1989; Hussey, Chang, & Kotch, 2006; Swahn et al., 2006; Waldfogel, 1998), to be conservative, this study uses the CPS estimate of 579,000 new cases as the baseline for our estimation of the aggregate lifetime cost of CM in 2008.

Given that definitions of CM and criteria for substantiation vary between states and that previous research has shown that children in unsubstantiated cases have similar maltreatment experiences and developmental outcomes to children in substantiated cases (Drake, 1996; Hussey, Marshall, & English, 2005; Kohl, Jonson-Reid, & Drake, 2009; Leiter, Myers, & Zingraff, 1994), a sensitivity analysis on the aggregate lifetime cost of CM was conducted using the investigated incidents of CM. In 2008, nearly 3.7 million children received an investigation or assessment (USDHHS, 2010); assuming that 75% of these investigated children were also new reports, this suggests about 2,775,000 new victims of CM as an alternative estimate of CM incidence for sensitivity analysis.

The other major source of national estimates of the incidence of nonfatal CM is the periodic National Incidence Study (NIS), which combines information about reported cases with data on maltreated children identified by community professionals who are likely to come into contact with maltreated children such as child care providers, teachers, and hospital staff. There have been 4 cycles of NIS conducted in the United States: NIS-1 (1979–1980); NIS-2 (1986); NIS-3 (1993) and NIS-4 (2005–2006). According to NIS-4, the most recent NIS data available, an estimated 1,256,600 children experienced maltreatment using the "Harm Standard," and an estimated 2,905,800 children experienced maltreatment using the broader "Endangerment Standard" during the 2005–2006 study year (Sedlak et al., 2010). Assuming that 75% of these cases were new reports, this suggests an estimated 942,450 new cases using the "Harm Standard" and 2,179,350 new cases using the "Endangerment Standard." Both numbers were included as alternative estimates of CM incidence in 2008 in the sensitivity analysis.

An incidence-based accounting of the costs of CM must also include the value of mortality for fatal cases of maltreatment. An estimated 1,740 children nationally died from abuse or neglect in 2008 (USDHHS, 2010). About 80% of all fatalities were children younger than 4 years old. Valuation is described in detail below.

Average lifetime cost per victim of nonfatal child maltreatment

Short-term health care costs. Short-term health care costs of CM in this study refer to the health care costs resulting from a new case of CM that occurred in childhood. Because the median CM case is a child aged 6 years, short-term health care costs include the incremental health care costs attributable to CM from age 6 to age 17.

A literature review identified a set of 8 articles on pediatric, short-term medical costs of CM. However, all of the studies are based on inpatient hospital data and limit their per-case reporting time period to a single inpatient episode (Brown, Fang, & Florence, 2011). Estimating the average annual medical costs of CM requires capturing increased expenditures outside of hospital settings. For example, CM may lead to increased costs for mental health services, prescription drugs, or chronic disease care, which are not captured in the inpatient studies. Furthermore, only the most severe instances of CM require inpatient care, and therefore these studies capture a non-representative sample of abused children.

In the absence of appropriate estimates in the literature, we have, in separate analyses, estimated the medical costs of maltreatment during childhood using linked survey and Medicaid claims (Florence et al., 2012). Specifically, we linked a sample of 1,151 children with cases investigated by CPS, drawn from the National Survey of Child and Adolescent Well-Being, to individual 2000–2003 Medicaid claims. We formed a comparison group of Medicaid children based on propensity score matching. The attributable difference in annual medical costs between the case and control groups is $2,703 (2003 dollars) per victim. Full details of methods and results for this analysis can be found elsewhere (Florence et al., 2012). Adjusted by GDP deflator, the cost difference measured in 2010 dollars is $3,184, or $32,648 per victim of nonfatal CM for the present value of medical costs from ages 6 through 17.

Long-term medical costs. A few sources of data exist for adult estimates of the long-term medical costs of CM (Bonomi et al., 2008; Hulme, 2000; Walker et al., 1999). Based on a review (Brown et al., 2011), we determined that Bonomi et al.'s (2008) estimates were most suitable for this study. They examined long-term health care costs associated with physical, sexual, or both physical and sexual childhood abuse using data from 3,333 women (ages 18–64) enrolled in a large health care delivery system. Total annual health care costs were 21% higher (about $507) in 2004 for women with a history of physical or sexual childhood abuse compared to women without these abuse histories. Based on Bonomi et al.'s (2008) findings and acknowledging that the study only included women (as did the 2 other adult estimates), we assume that the average annual incremental health care costs for a CM victim from age 18 through age 64 are $507 (2004 dollars), or $582 in 2010 dollars. The present value of a stream of these incremental health care costs over the period from age 18 through age 64 is $10,530 per case.

We did not locate any studies that report incremental health care costs associated with CM for adults older than age 65. As a result, the long-term medical costs of CM included in this study only account for the incremental health care costs from age 18 to 64.

Productivity losses. Lifetime productivity losses associated with CM were estimated using the human capital approach, which measures the potential loss of earnings due to being maltreated during childhood. Currie and Widom (2010) assessed the economic consequences in individuals with documented histories of childhood neglect and physical and sexual abuse and a matched comparison group who were followed up into adulthood (mean age = 41). They found that individuals with documented histories of neglect and/or abuse earned about $5,000 less per year on average than controls, controlling for background characteristics. Based on their findings, we assume that experience of CM reduces victim earnings by $5,000 (2003 dollars) per year from ages 18 to 64, assuming that productivity losses are negligible beyond 65 when most retire. Adjusted to 2010 dollars, the earning gap is $5,890, and assuming a long-term growth in labor productivity of 1% per year (Grosse, 2003), the present discounted value of these earnings losses from age 6 would be $144,360. We do not include the value of lost tax receipts from reduced earnings. Although these are a cost to the government, from a social perspective, this is a transfer from individuals to the public sector, and there is no net loss.

Child welfare costs. Given that some of the child welfare services provided to CM victims last more than 1 year (e.g., long-term foster care), the ideal way to estimate lifetime child welfare costs associated with CM would be to track the CM victims and their child welfare costs over their entire childhood. To date, there have been no such longitudinal studies. However, according to the Administration for Children and Families, the number of children investigated for CM and the cross-section of the investigated sample with respect to age and services provided to the children (e.g., substantiated vs. unsubstantiated; in-home services vs. out-of-home placement) remained relatively constant between 2004 and 2008 (USDHHS, 2010), which satisfies the assumptions for the steady-state methodology used by other researchers to estimate the lifetime costs of disease when direct or longitudinal data on lifetime costs are not available (Barnett, Birnbaum, Cremieux, Fendrick, & Slavin, 2000; Birnbaum, Leong, & Kabra, 2003). Following their methodology, by making steady-state assumptions, the total annual child welfare costs in 1 year serve as a proxy for the lifetime welfare costs of victims investigated in that year.

Please cite this article in press as: Fang, X., et al. The economic burden of child maltreatment in the United States and implications for prevention. *Child Abuse & Neglect* (2012), doi:10.1016/j.chiabu.2011.10.006

The most recent national estimate of child welfare costs available is from 2006. Overall, states spent $25.7 billion in federal, state, and local funds on child welfare activities in fiscal year 2006, and an estimated 3,578,000 children received a CPS investigation in 2006 (DeVooght, Allen, & Geen, 2008). This yields an estimated $7,183 in child welfare costs per investigated child, or $7,728 per child in 2010 dollars.

Criminal justice costs. Criminal justice costs associated with CM were determined based on the effects of CM on juvenile and adult arrests. Widom and Maxfield (2001) analyzed data from a longitudinal study that followed a group of 908 substantiated cases of CM and a comparison group of 667 children through adulthood; they reported that 27.4% of maltreated children had a juvenile arrest, compared with 17.2% of non-abused children. We used the simple difference in these, 10.2%, as our estimate for the incremental effect of CM on the likelihood of arrest. Regarding the associated costs, Reynolds, Temple, Robertson, and Mann (2002) estimated that expenditures to the criminal justice system for juveniles with court petitions were $18,950 per participant in 1998 dollars, including the administrative expenditures associated with the juvenile arrest and the weighted national average of the proportion of cases that led to residential treatment, community treatment or probation services, and release. Updated to 2010 dollars, the criminal justice costs per juvenile arrest are $24,513. Based on the mean age of juvenile arrest of 14 (Reynolds et al., 2002) and the incremental increase of 10.2%, the present value of future expenditures to the criminal justice system associated with juvenile arrest evaluated at age 6 is $1,974 (2010 dollars) per CM victim.

For adult criminal justice costs, we used additional data from Widom and Maxfield (2001), who reported that CM increases the likelihood of having an adult criminal record by 9.1 percentage points (41.6% for the maltreated group vs. 32.5% for the comparison group). Reynolds et al. (2002) estimated that the average social cost of an adult crime — including the costs of arrest, judicial processing, and treatment — is $69,038 in 1998 dollars or $89,304 in 2010 dollars. Based on the assumed mean age of first adult arrest at 23 and an incremental increase of 9.1%, the present value of future expenditures to the criminal justice system associated with adult arrest is $4,773 (2010 dollars) per CM victim. Given the incidence-based costing framework we are using, this estimate reflects the average costs of all criminals, including chronic re-offenders.

Special education costs. Maltreated children are more likely to receive special education. Jonson-Reid, Drake, Kim, Porterfield, and Han (2004) found that 24.2% of maltreated children received special education at a mean age of 8 years, compared with 13.7% of children with no maltreatment record. Again, based on a simple difference, we assumed that the incremental effect due to CM is 10.5%. Reynolds et al. (2002) estimated that the average annual cost per child for special education services was $7,791 (1998 dollars) above and beyond regular instruction. Assuming that the average number of years receiving special education services is 9 years (from age 8 to 17) and the incremental increase is 10.5%, the present value of future special education costs associated with CM is estimated to be $7,999 (2010 dollars) per victim.

Average lifetime cost per victim of fatal child maltreatment

According to Corso, Mercy, Simon, Finkelstein, and Miller's (2007) work, for children aged 0–4, the average cost per case for a fatal assault was $11,300 (in 2000 dollars) in medical costs and $1,005,650 (in 2000 dollars) for lost productivity. Adjusted to 2010 dollars, the medical costs and productivity losses are $14,100 and $1,258,812, respectively.

Results

Table 1 presents the average lifetime cost of nonfatal CM per victim. Discounted at 3%, we estimated the average lifetime cost per victim of nonfatal CM to be $210,012 in 2010 dollars. The cost includes discounted present values of $32,648 in childhood health care costs, $10,530 in adulthood medical costs, $144,360 in productivity losses, $7,728 in child welfare costs, $6,747 in criminal justice costs, and $7,999 in special education costs. Because cost estimates vary as a function of the discount rate, we also estimated the average lifetime cost per case of nonfatal CM using the discount rate of 7% (Miller et al., 2006). Based on a 7% annual discount rate, the average lifetime cost per nonfatal victim was estimated to be $97,952 (see Table 1). For fatal CM, the average lifetime cost per death was estimated to be $1,272,900 in 2010 dollars, including $14,100

Table 1
The average lifetime cost per victim of nonfatal child maltreatment.

Source of cost	Reference	Average lifetime cost per victim (in 2010 dollars)	
		Discounted at 3%	Discounted at 7%
Short-term health care costs	Florence et al. (2012)	$32,648	$27,063
Long-term health care costs	Bonomi et al. (2008)	$10,530	$3,789
Productivity losses	Currie and Widom (2010)	$144,360	$49,068
Child welfare costs	DeVooght et al. (2008)	$7,728	$7,728
Criminal justice costs	Widom and Maxfield (2001) Reynolds et al. (2002)	$6,747	$3,860
Special education costs	Jonson-Reid et al. (2004) Reynolds et al. (2002)	$7,999	$6,443
Total		$210,012	$97,952

Table 2
The average lifetime cost per case of fatal child maltreatment.

Source of cost	Average lifetime cost per victim (in 2010 dollars)	Average lifetime cost per victim (in 2010 dollars)
	Discounted at 3%	Discounted at 7%
Medical costs	$14,100	$14,100
Productivity losses	$1,258,800	$325,267
Total	$1,272,900	$339,367

Table 3
Total lifetime costs of child maltreatment, 2008, United States (based on substantiated cases of child maltreatment).

Source of cost	Total lifetime costs (in 2010 dollars)	
	Discounted at 3%	Discounted at 7%
Nonfatal		
Incidence (cases)	579,000	579,000
Short-term health care costs	$18,903,192,000	$15,669,477,000
Long-term health care costs	$6,096,870,000	$2,193,831,000
Productivity losses	$83,584,440,000	$28,410,372,000
Child welfare costs	$4,474,512,000	$4,474,512,000
Criminal justice costs	$3,906,513,000	$2,234,940,000
Special education costs	$4,631,421,000	$3,730,497,000
Total	$121,596,948,000	$56,714,208,000
Fatal		
Incidence (cases)	1,740	1,740
Medical costs	$24,534,000	$24,534,000
Productivity losses	$2,190,312,000	$565,964,580
Total	$2,214,846,000	$590,498,580
Total costs (including both fatal and nonfatal cases)	$123,811,794,000	$57,304,706,580

in medical costs and $1,258,800 in productivity losses (Table 2). The average lifetime cost per death would be $339,367 if using the discount rate of 7%.

Table 3 presents the total lifetime economic burden of CM in 2008 based on the baseline estimate of 579,000 new cases of nonfatal CM. For these cases, the aggregate lifetime costs were estimated to be $121.6 billion. Of the total costs, childhood health care costs accounted for $18.9 billion, adulthood medical costs accounted for $6.1 billion, productivity losses accounted for $83.6 billion, child welfare costs accounted for $4.5 billion, criminal justice costs accounted for $3.9 billion, and special education costs accounted for $4.6 billion. The aggregate lifetime costs associated with the 1,740 deaths resulting from CM were estimated to be $2.21 billion, with medical costs accounting for $25 million and lost productivity accounting for $2.19 billion. Adding together the fatal and nonfatal costs gave us the total lifetime costs associated with new cases of fatal and nonfatal CM in 2008, approximately $124 billion. When using the more conservative discount rate of 7%, the total lifetime costs of CM in 2008 still exceed $57 billion (Table 3).

In sensitivity analysis (Table 4), when we assumed that all investigated children were victims of CM (i.e., 2,775,000 new victims in 2008), the total lifetime costs associated with new cases of fatal and nonfatal CM in 2008 would increase to $585 billion using the discount rate of 3% and to $272 billion using the discount rate of 7%. When incidence estimates using the NIS "Harm Standard" (i.e., 942,450 new victims per year) and "Endangerment Standard" (i.e., 2,179,350 new victims per year) were applied to the sensitivity analysis, the total lifetime costs of CM in 2008 were approximately $200 billion and $460 billion, respectively, using the discount rate of 3%. When using the discount rate of 7%, the total lifetime costs of CM were $93 billion and $214 billion respectively.

Table 4
Sensitivity analysis of total lifetime costs of child maltreatment, 2008, United States.

Source of incidence data	Incidence (cases)	Total lifetime costs (in 2010 dollars) discounted at 3%	Total lifetime costs (in 2010 dollars) discounted at 7%
Nonfatal			
NIS harm standard	942,450	$197,925,809,400	$92,314,862,400
NIS endangerment standard	2,179,350	$457,689,652,200	$213,471,691,200
CPS investigated cases	2,775,000	$582,783,300,000	$271,816,800,000
Fatal			
CPS data	1,740	$2,214,846,000	$590,498,580
Total costs (including both fatal and nonfatal cases)			
NIS harm standard		$200,140,655,400	$92,905,360,980
NIS endangerment standard		$459,904,498,200	$214,062,189,780
CPS investigated cases		$584,998,146,000	$272,407,298,580

Abbreviations: NIS, National Incidence Study; CPS, child protective services.

Discussion

Using an incidence-based approach, the lifetime economic burden of CM resulting from an estimated 579,000 new cases of nonfatal CM and 1,740 cases of fatal CM that occurred in the United States in 2008 is approximately $124 billion. On average, the lifetime cost is estimated to be $210,012 per victim of nonfatal CM and $1,272,900 per victim of fatal CM. These estimates are significant new contributions that use a consistent, robust approach in incidence-based costing methods, which improve significantly upon the limitations of past estimates of the burden of CM. Our estimates also represent the most recent and up-to-date figures for accurate, contemporary policy analysis. Furthermore, our use of a consistent, incidence-based approach directly facilitates comparisons with other health conditions and enables economic analyses of CM-specific policies. Such evaluation was impossible in the past based on previous work. We also provide sensitivity analyses on our estimates to reflect the facts that the measure of burden is dependent on assumptions about discounting for present value and CPS data underestimate the total incidence of CM.

Our new estimates cannot be compared directly to previous estimates of the economic impact of CM because of significant differences in our methods, as discussed earlier. However, for context, we cautiously make comparisons to the most widely cited report and to estimated costs of some other public health problems, which are measured using incidence-based costing approaches. Using a mix of methods, but primarily a prevalence-based approach, Wang and Holton (2007) report an estimate of $103.8 billion (2007 dollars) in annual costs; because it is primarily prevalence-based, their estimate is approximately the burden in a single year. In contrast, our estimate of $124 billion (2010 dollars)—while seemingly similar—represents the lifetime cost of new CM cases that occur in a single year.

We also estimated the lifetime burden of a new case of nonfatal CM to be $210,012 per victim. This estimate is comparable to that of many other high profile public health problems, indicating the impact and seriousness of the issue of CM. For example, the discounted lifetime costs (discounted at a 5% rate) of stroke per person were estimated at $159,846 (2010 dollars) (Taylor et al., 1996), whereas the total lifetime costs (discounted at a 3% rate) associated with type 2 diabetes were estimated between $181,000 and $253,000 (2010 dollars) per case (Zhuo, Zhang, & Hoerger, 2010). Although stroke and diabetes are clearly different from CM, we reference them to indicate that CM costs and prevalence are high enough for policy makers to justify allocating resources to effective prevention and mitigation strategies for CM.

Like any estimates of economic burden, our study has several limitations. First, we used an estimate of 579,000 new substantiated cases per year as the baseline to calculate the total lifetime economic burden of CM. This number underestimates the total incidence of CM because some of the maltreated cases may not have been reported to CPS or were reported but not substantiated for various reasons, implying that our baseline results are probably conservative, lower-bound estimates of the total lifetime economic burden of CM. Since many states are now facing fiscal crises and significantly trimming social service budgets, it is possible that budget cuts may have artificially reduced the number of substantiated cases. If so, our estimates based on substantiated cases may not represent a "steady state" burden of CM as much as estimates based on investigated cases, which may be less affected by budget cuts than substantiation. A number of papers (e.g., Drake, 1996; Fallon et al., 2011; Hussey et al., 2005; Kohl, Jonson-Reid, & Drake, 2009; Leiter, Myers, & Zingraff, 1994) have shown that risk of maltreatment, which we capture more broadly through investigations, is strongly associated with adverse CM-related outcomes, including risk of CM fatalities (Putnam-Hornstein, 2011). Second, the costs of several adverse outcomes associated with CM were not measured. Research has suggested that CM may be associated with reduced life expectancy, decreased quality of life, and negative parenting behaviors, which can lead to negative intergenerational outcomes, including conduct, peer, and emotional problems (Brown et al., 2011; Corso & Fertig, 2010; Corso et al., 2007; Roberts, O'Connor, Dunn, & Golding, 2004). We were unable to locate sufficient data on the magnitude of these effects or their costs and were therefore unable to include them in this study. As a result, our findings undercount the full costs of CM. Third, the assessment and definitions of CM differed somewhat among the studies we used to estimate different categories of costs. Some used CPS substantiated cases to identify CM (e.g., Currie & Widom, 2010; Widom & Maxfield, 2001), whereas others used CPS investigations (e.g., Florence et al., 2012) to measure CM or used self-reported surveys and questionnaires (e.g., Bonomi et al., 2008) to measure the retrospective abuse history. Fourth, most of the studies we used for component costs did not estimate the impact of psychological abuse because of the lack of data on psychological abuse. The long-term medical cost estimates in Bonomi et al. (2008) do not include psychological abuse or neglect. Excluding psychological abuse or neglect from some cost areas associated with CM may lead to an underestimation of the economic burden of CM.

Fifth, we did not estimate the economic burden of CM by type and severity of maltreatment because several of the cost studies we used (e.g., Currie & Widom, 2010; Widom & Maxfield, 2001) did not provide the effects of CM by type of maltreatment and none of the studies have estimated the effects by severity of CM. However, for the studies which *did* investigate the effects by type, results indicate that different types of maltreatment may be associated with different magnitude of these effects. For example, Jonson-Reid et al. (2004) found that children reported for physical abuse had nearly a 50% higher risk of later special education entry than those reported for sexual abuse. Bonomi et al. (2008) estimated that long-term annual health care costs were 22% higher for women with a history of physical abuse and 16% higher for women with a history of sexual abuse compared to women without physical or sexual childhood abuse. In contrast, sexual abuse can be more significantly associated with some other health consequences such as reproductive and sexual health problems. A literature review indicates that childhood sexual abuse can be associated with a myriad of serious reproductive and sexual health problems including unplanned or adolescent pregnancies, infertility, menstrual problems, and painful intercourse (Bohn & Holz, 1996). Severity of maltreatment is another important factor that may affect economic costs. Some

Please cite this article in press as: Fang, X., et al. The economic burden of child maltreatment in the United States and implications for prevention. *Child Abuse & Neglect* (2012), doi:10.1016/j.chiabu.2011.10.006

previous studies have shown a relationship between severity of CM and psychological and/or functional outcomes (e.g., Manly, Cicchetti, & Barnett, 1994; Romans, Martin, Anderson, O'Shea, & Mullen, 1995), but little has been done to examine the associations of CM severity with the outcomes included in this study for the estimation of CM costs. Furthermore, the field has not achieved consensus on how to best measure the severity of CM. The lack of the studies and consensus on the operational definitions of severity did not allow us to conduct finer calculations by severity.

Sixth, we were unable to include any long-term medical costs for adults aged 65 or older. Because other research has shown that health consequences of CM may continue beyond age 65 (Felitti et al., 1998), any associated costs in this age group further imply that we underestimate total costs of CM. Seventh, productivity losses for CM morbidity were not adjusted to include household productivity, although for mortality, household productivity losses were included in the Corso et al. (2007) estimates. Short-term productivity losses such as missed school days due to CM were excluded as well. Excluding these losses implies that our estimates underestimate the actual burden of CM. Eighth, we used the median age (6 years) in CPS reports (USDHHS, 2010) to calculate the average lifetime cost per victim. More severe cases of CM tend to occur in early childhood, so the unbalanced age distribution in terms of the severity of CM could bias our estimates. (For example, in most cases of abusive head trauma, victims are infants younger than 1-year old (Brown et al., 2011).) Ninth, most of our component costs estimates were based on data from single studies. In most cases there were few alternatives from which to choose. Given the sensitive nature of CM, we did not find any relevant studies of CM costs that were based on an experimental design. Instead, as a second best approach with the available data, we relied on studies which applied quasi-experimental longitudinal, prospective designs whenever possible. For almost all the cost categories for which existing data are available, only one study with prospective quasi-experimental design has been found for each category. Given the lack of additional valid studies in these areas, we were not able to use methods like meta-analysis or a sensitivity analysis of high and low estimates to arrive at more valid estimates for each cost category. Finally, although we include a range of estimates based on discount rate and incidence rate sensitivity analysis, we are unable to provide statistical confidence intervals in this study because of the large number of input sources used and the fact that several estimates included in our study did not report standard errors.

Although our study provides several important innovations over past estimates, a few areas should be highlighted for future research. First, as discussed above, we were unable to include economic estimates of a few impacts, which may have monetary costs. Future studies that quantify the costs of reduced life expectancy, decreased quality of life, or negative parenting behaviors and negative intergenerational outcomes could be included as updates to our estimates as they are available using the same framework. Second, if additional data on unsubstantiated cases were to be made available by CPS agencies or other sources, we could expand our sensitivity analysis and the potential range of estimates in this study. Developing more consistent definitions of CM and adding confidence intervals to inputs would strengthen our findings. Third, we were unable to estimate the economic burden of CM by type and severity of maltreatment due to the lack of sufficient data. This gap inhibits the evaluation of interventions which may be specific to certain types of maltreatment and our understanding of cost impacts of maltreatment. Where possible, we recommend that future researchers make efforts to investigate the costs of maltreatment by type and severity, as this will facilitate improved economic evaluations.

In summary, we estimate that the approximately 579,000 new substantiated cases of nonfatal CM and 1,740 cases of fatal CM per year in the United States result in a total economic burden of $124 billion. This estimate is based on discounted lifetime costs of $210,012 per victim of nonfatal CM and $1,272,900 per victim of fatal CM. These estimates are based on an incidence-based approach, which facilitates economic analysis for public health interventions. Compared with other health problems, the burden of CM is substantial, even after conservative assumptions are used, indicating the importance of preventing and treating CM. Although the evidence base for effective strategies to address CM is limited, a promising array of prevention and response programs have great potential to reduce the economic burden of CM. Included among effective programs are Nurse-Family Partnership, Early Start, and Triple P System (Macmillan et al., 2009; Prinz, Sanders, Shapiro, Whitaker, & Lutzker, 2009). For such programs to be successful, an ongoing commitment to implementation science will be needed to ensure that the full programs—upon which the positive results rest—are imparted with fidelity and include ongoing monitoring and supervision, and sustained resourcing (Cohen, Mannarino, & Murray, 2011; Toth & Manly, 2011). Given the substantial economic burden of CM, the benefits of prevention will likely outweigh the costs for effective programs.

For today, we will have a laptop and screen set up so all you need to bring is a jump drive with your presentation and we can plug you right in! If you can be there about 10 minutes before start time -- so around 1:20 -- that would helpful so we can make sure the presentation is up, loaded and ready to go when the committee begins.

All the printed material has been distributed, and we look forward to seeing you!

Cindy Smith
Office of Senator Hollis French

Subject: Materials are coming

Hi Cindy,
Michelle Lyons-Brown will be sending you within the hour the following for the presentation:
-Power point (3 slides to a page, B&W, w/o photos -hand-out of a national study (I can't remember the same) -a slightly corrected version of the CJA member list (if you've already distributed this, don't worry about redistributing)
- the statement regarding the proposed legislation -the proposed legislation

(Note: you already have a copy of the last two items -- we haven't changed them.)

We'll bring with us the 3 other reference handoutsthat are in hard copy form and not needed for the presentation (mandatory reporter training CD, MDT Guideline publication, and ACA brochure).
Jan

What is the Alaska Children's Alliance?

The Alaska Children's Alliance (ACA) is a non-profit coalition of established and developing children's advocacy centers (CAC's), multi-disciplinary teams (MDT's), and child protection teams (CPT's) dedicated to improving community responses to child maltreatment.

ACA is a state chapter of the National Children's Alliance (NCA). NCA is a non-profit accrediting organization that was developed to support and sustain the continued evolution of the CAC model. NCA provided Chapter Grant funding for the development of ACA and its publications, such as this brochure.

The Mission of the Alaska Children's Alliance

The mission of the Alaska Children's Alliance is to promote a culturally appropriate multidisciplinary response to child maltreatment throughout Alaska.

What is a Children's Advocacy Center?

A Children's Advocacy Center (CAC) provides a child-friendly environment that allows law enforcement, child protection workers, prosecutors, medical providers, victim/family advocacy, tribal representatives, and mental health providers to work together when there are allegations of child abuse. Referrals are accepted from the Office of Children's Services, law enforcement agencies (Alaska State Troopers, local police departments) and medical providers.

Why does Alaska need Children's Advocacy Centers?

- Alaska continues to have very high rates of child abuse and neglect, particularly child sexual abuse
- Child maltreatment is strongly linked to juvenile and adult crime, teen pregnancy, alcohol & drug abuse, suicide, and future family violence
- Child maltreatment has also been shown to be major contributors to poor adult medical and mental health
- Studies show that the annual economic impact of child abuse is $182,000 per maltreated child.
- Children are less fearful when investigations are conducted using CACs
- Parents & caregivers are more satisfied with the investigations when CACs are used

What happens at a Children's Advocacy Center?

- Comprehensive, multidisciplinary evaluation for child abuse concerns
- Specialized forensic interview in a child-oriented interview room which is video-taped and monitored by other members of the team
- Thorough, non-invasive medical exam by specially trained medical professionals
- Support, referrals, and follow up for children and families

Goals of CAC's, MDT's, & CPT's

- Assure that children are not further victimized by the systems designed to protect them
- Assure the child is safe
- Reduce the long term affects associated with trauma for the child and family
- Enhance and coordinate the investigation so that the accuracy of the concern is quickly and reliably determined
- Promote successful prosecution of criminal child abuse
- Encourage support and treatment for abused children and their families

OVERVIEW: BONDING REQUIREMENTS FOR MAJOR MINE PROJECTS

<TARGET><BILL></BILL><SUBJECT>3-02-12 OVERVIEW BONDING REQUIREMENTS FOR MAJOR MINE PROJECTS</SUBJECT><COMM>SJUD27</COMM></TARGET>

2012 March 2nd Judiciary Committee Hearing Witnesses

Dr. Margaret Palmer is a Professor of Entomology and Biology at the University of Maryland where she oversees a scientific research laboratory with approximately 120 staff, 20 buildings, and a research fleet. She has over 25 years of experience in research and teaching on coastal ecosystems, watershed science, and stream ecology and restoration. Her past work includes leading a large team of scientists in developing the first national database on river restoration in the U.S., coauthoring a book on The Foundations of Restoration Ecology and serving as an expert advisor on the design of multiple stream and river restoration projects.

Lance Trasky is the owner of Lance Trasky and Associates an environmental consulting company. Mr. Trasky received a Bachelor of Science degree from Michigan State University and did his graduate studies in fisheries at Central Michigan University. Mr. Trasky is a fisheries and habitat biologist with over 32 years of experience in fisheries research and analyzing potential adverse affects of many types of activities on fish and fish habitat. From 1971 to 1974 he served as the Alaska Department of Fish and Games Commercial Fisheries Division salmon area research biologist for the Arctic and Yukon River. Since 1974 he worked for the ADF&G Habitat and Restoration Division in a series of research, planning, and management positions with increasing responsibilities. In 1977 he was promoted to supervisor of the Marine and Coastal Habitat Management section, and in 1980 was made Regional Supervisor for the South Western, and Western Regions of Alaska. In 1983 his responsibilities were expanded to include ADF&G's South Central Region. This included Cook Inlet, Bristol Bay, Prince William Sound, Kodiak Island, and the lower Yukon Kuskokwim River which are the major salmon producing areas of Alaska.

Dr. David Chambers is the president of the CENTER for SCIENCE in PUBLIC PARTICIPATION, a non-profit corporation formed to provide technical assistance on mining and water quality to public interest groups and tribal governments. Dr. Chambers has 35 years of experience in mineral exploration and development – 15 years of technical and management experience in the mineral exploration industry, and for the past 20 years he has served as an advisor on the environmental effects of mining projects both nationally and internationally. He has Professional Engineering Degree in Physics from the Colorado School of Mines, a Master of Science Degree in Engineering from the University of California at Berkeley, and is a registered professional geophysicist in California (# GP 972). Dr. Chambers received his Ph.D. in Environmental Planning from Berkeley where his doctoral dissertation analyzed the U.S. Forest Service's efforts to plan for and manage minerals on the National Forests.

LexisNexis®

TRUSTEES FOR ALASKA, ALASKA CENTER FOR THE ENVIRONMENT, TAMARA SMID and EDWIN TAYLOR, Appellants, v. LENNIE B. GORSUCH, COMMISSIONER, and ALASKA DEPARTMENT OF NATURAL RESOURCES, Appellees.

No. 3879, Supreme Court File. No. S-4047

SUPREME COURT OF ALASKA

835 P.2d 1239*; *1992 Alas. LEXIS 102*; *23 ELR 20276

August 21, 1992, Decided

SUBSEQUENT HISTORY: Petition for Partial Rehearing Denied January 11, 1994.

PRIOR HISTORY: [**1] Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, Karen L. Hunt, Judge. Superior Court No. 3AN-88-7646 Civil

DISPOSITION: AFFIRMED in part, REVERSED in part, REMANDED

CASE SUMMARY:

PROCEDURAL POSTURE: Appellants, Trustees for Alaska, Alaska Center for the Environment, and citizens (trustees), challenged an order of the Superior Court of the State of Alaska, Third Judicial District, Anchorage, which affirmed an order of appellee Commissioner of Natural Resources (commissioner), approving appellee Alaska Department of Natural Resources' (DNR) issuance of a surface coal mining and reclamation operations permit.

OVERVIEW: The trustees challenged the commissioner's issuance of a surface coal-mining permit and a bond, alleging that the commissioner acted in excess of its jurisdiction and contrary to the Alaska Surface Control Mining Reclamation Act. The lower court approved the commissioner's decision, which affirmed the DNR's issuance of a permit and bond for certain mining activity. The trustees appealed. The court partially reversed the lower court's judgment, concluding that the DNR improperly issued a permit because it refrained from exercising jurisdiction over disputed facilities without a reasonable basis. Likewise, the bond was improperly issued because its amount was erroneously calculated not to cover the total cost of reclamation and its release was not contingent on the completion of wetlands restoration. Nevertheless, the court affirmed the commissioner's approval of the wetlands restoration plan because that decision was not arbitrary, capricious, or without reasonable basis.

OUTCOME: The court reversed the lower court's judgment to the extent that it affirmed the commissioner's approval of the DNR's issuance of a coal-mining permit and a bond. The matter was remanded for reconsideration of proper criteria as to the permit and for recalculation of the bond amount and reconsideration of the bond release criterion. The court affirmed the lower court's judgment to the extent it approved the wetlands restoration plan.

COUNSEL: Michael M. Wenig, Anchorage, for Appellants.

Ellen Toll, Assistant Attorney General, Anchorage, and Charles E. Cole, Attorney General, Juneau, for Appellees.

Richard M. Johannsen, Perkins Coie, Anchorage, Amicus Curiae of Diamond Shamrock-Chuitna Coal Joint Venture.

JUDGES: Before: Rabinowitz, Chief Justice, Burke, Matthews, Compton and Moore, Justices.

OPINION BY: COMPTON

OPINION

[*1241] *OPINION*

COMPTON, Justice.

RABINOWITZ, Chief Justice, with whom MATTHEWS, Justice, joins, dissenting in part.

This appeal challenges several aspects of a decision by the Commissioner of Natural Resources (commissioner) to issue a surface coal mining and reclamation operations permit under the Alaska Surface Coal Mining Control and Reclamation Act (ASCMCRA), *AS 27.21.010*-.999. We affirm the commissioner's decision in part, reverse in part and remand for further proceedings consistent with this opinion.

I. FACTUAL AND PROCEDURAL BACKGROUND

Any person who conducts a surface coal mining and reclamation operation in Alaska [**2] must obtain a permit issued under ASCMCRA. *AS 27.21.060(a)*. In January 1985 Diamond Shamrock-Chuitna Coal Joint Venture (Diamond) applied for a permit to conduct surface coal mining on the western side of Cook Inlet. The Alaska Department of Natural Resources (DNR), Division of Mining (Division), approved Diamond's application on March 5 and August 21, 1987, after extensive review, public comment and revisions.

Trustees for Alaska, Alaska Center for the Environment, and several individuals who had participated in the comment and review process (collectively Trustees), appealed the decision to the commissioner under *AS 27.21.150*. After a hearing, the hearing officer issued a proposed decision rejecting Trustees' challenges relevant to this appeal. The commissioner adopted the hearing officer's proposed decision.

Trustees appealed the commissioner's decision to the superior court. *AS 22.10.020(d)*; Alaska Appellate Rule 602(a)(2). The superior court upheld the commissioner's decision, except to the extent that the permit coverage excluded an eleven mile access/haul road from the mine site to Cook Inlet. On rehearing, the superior [*1242] court concluded that the road could be permitted [**3] under a separate ASCMCRA permit. Trustees appeals the superior court's decision raising the following contentions:

1. DNR exceeded its discretion by "refusing to require that the following off-site facilities be covered under Diamond's permit: port stockpiling and loading facilities; coal conveyor to the port; gravel pits; employee housing; access/haul roads; and airstrip."

2. DNR violated ASCMCRA by approving a bond amount which "does not reflect the cost of all reclamation which will need to be performed during the life of the permit."

3. DNR violated ASCMCRA by issuing a permit when Diamond failed to prove "that its wetlands 'revegetation' plan will restore prior 'uses' of the land that were supported by wetlands and . . . will satisfy the applicable performance standards for hydrology, water quality, and wildlife habitat."

4. DNR's bond release criteria violate ASCMCRA because they "do not appear to make bond release contingent on Diamond's successful completion of its wetlands plan."

II. APPLICABLE LAW

The parties disagree as to whether the federal Surface Mining Control and Reclamation Act of 1977 (SMCRA), *30 U.S.C. §§ 1201-1328 (1986)*, [**4] and the regulations promulgated thereunder, are controlling in this case.

SMCRA provides a process whereby a state may assume control of a program to regulate surface mining and reclamation operations. *30 U.S.C. § 1253 (1986)*. The state program must demonstrate, among other things:

that such State has the capability of carrying out the provisions of this chapter and meeting its purposes through --

(1) a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of this chapter

(7) rules and regulations consistent with regulations issued by the Secretary pursuant to this chapter.

30 U.S.C. § 1253(a) (1986). Ultimately, the Secretary of Interior must approve the program. 30 U.S.C. § 1353(b) (1986). States which do not have approved programs are subject to federally implemented programs. *30 U.S.C. § 1254 (1986)*.

In 1982 the state of Alaska passed ASCMCRA as part of its effort to assume exclusive jurisdiction of surface coal mining and reclamation within the [**5] state. Ch. 29, § 1, SLA 1982; *AS 27.21.010(a)(5)*. The legislature specifically expressed the state's intent "to assume exclusive jurisdiction over the regulation of surface coal mining and reclamation operations in the state under [SMCRA]." *AS 27.21.010(a)(5)*. In enacting ASCMCRA, the legislature also found that:

Section 503 [*30 U.S.C. § 1253*] of [SMCRA] provides that a state wishing to assume exclusive jurisdiction over the regulation of surface coal mining and reclamation operations in the state must have a state law

that provides for the regulation of surface coal mining and reclamation operations *in accordance with the requirements of* [SMCRA].

AS 27.21.010(4) (emphasis added).

In light of this finding and the legislature's express intent to assume exclusive jurisdiction, we do not believe the legislature intended the state act to be inconsistent with the federal act. Moreover, section 505(a) of SMCRA provides that state laws or regulations which are inconsistent with its provisions are superseded by the SMCRA provisions. *30 U.S.C. § 1255(a) (1986). Accord Russell v. Island Creek Coal Co., 182 W.Va. 506, 389 S.E.2d 194, 199 (W. Va. 1989).* [**6]

It is clear that both the Congress and the Alaska Legislature intended that the state program comply with SMCRA. Therefore, ASCMCRA should be construed to be consistent with SMCRA. [1]

1 However, while federal *regulations* promulgated under SMCRA may provide helpful guidance, they do not set a standard against which state law must be measured. In this context, Alaska law is superseded only where it is inconsistent with the federal *statute. 30 U.S.C. § 1255.*

[*1243] III. FAILURE TO REQUIRE INCLUSION OF CERTAIN OFFSITE FACILITIES IN DIAMOND'S PERMIT.

Trustees argues that Diamond's permit should have covered the eleven mile access/haul road and adjacent conveyor from the mine site to a port, port facilities, a solid waste disposal facility, gravel pits, and a housing facility with an air strip and access road. Trustees asserts that these facilities fall within the broad statutory definition of "surface coal mining and reclamation operation" and therefore require an [**7] ASCMCRA permit. Trustees also argues that DNR's regulations implementing ASCMCRA plainly require a permit for these facilities. DNR argues that the determination of which facilities are "resulting from or incident to" the mine operation, which must be included in the permit, is within the special expertise of the commissioner and that the commissioner's decision was reasonable and based on policy considerations.

We defer to an agency decision which involves complex subject matter or fundamental policy considerations unless the decision is arbitrary, capricious or without a reasonable basis. *Trustees for Alaska v. State, Dep't of Natural Resources, 795 P.2d 805, 809 (Alaska 1990).* "The reasonable basis standard is appropriate for determining whether the agency decision has been undertaken 'in the manner required by law.' One indication whether an agency has proceeded in the manner required by law is compliance with its own regulations." *Jager v. State, 537 P.2d 1100, 1107-08 (Alaska 1975).*

Any person who conducts a "surface coal mining and reclamation operation" must first obtain an ASCMCRA permit. *AS 27.21.060.* "'Surface [**8] coal mining and reclamation operation' means a surface coal mining operation and the activities necessary and incidental to the reclamation of that operation after August 3, 1977. . . ." *AS 27.21.998(16).* [2] The definition of "surface coal mining operations" in ASCMCRA is broad, and includes more than the actual mining activities. *AS 27.21.998(17)* provides:

"Surface coal mining operations" means:

(A) an activity

(i) conducted on the surface of land in connection with a surface coal mine or, to the extent that the activity affects the surface of land, conducted in connection with an underground coal mine;

(ii) the products of which enter commerce or the operation of which directly or indirectly affects interstate commerce;

(iii) which may include contour, strip, auger, mountain top removal, boxcut, open pit, and area mining; the use of explosives and blasting; on-site distillation or retorting, leaching, or other chemical or physical processing of coal; and loading of coal for interstate commerce at or near the mine site;

(iv) other than an activity related to the extraction of coal incidental to the extraction of other minerals under which the coal extracted does not exceed [**9] 16 2/3 percent of the total tonnage of coal and other minerals removed annually for purposes of commercial use or sale and other than a coal exploration activity subject to this chapter; and

(B) the areas on which an activity described in (A) of this paragraph occurs or where the activity disturbs the natural land surface, including adjacent land, the use of which is incidental to the activity; and affected by the construction of new roads or the improvement or use of existing roads to gain access to the site of the activity and for haulage; and excavation, workings, impoundments, dams, ventilation shafts, entry ways, refuse banks, dumps, stockpiles, overburden piles, spoil banks, culm banks, tailings, holes or depressions, repair areas, storage areas, processing areas, shipping areas, and [*1244] other areas upon which are situated structures, facilities, or other property or materials on the surface resulting from or incidental to the activity. . . .

AS 27.21.998(17). [3]

2 This is essentially identical to the federal definition of "surface coal mining and reclamation operations" found in SMCRA § 701, *30 U.S.C. § 1291(27) (1986)*.

[**10]

3 This definition closely parallels the federal definition of "surface coal mining operations" found in section 701 of SMCRA. *30 U.S.C. § 1291(28) (1986)*. The United States Court of Appeals for the District of Columbia Circuit has construed SMCRA as conferring considerable discretion on the regulatory authority in defining the scope of its own jurisdiction. *See National Wildlife Federation v. Lujan, 928 F.2d 453, 461-63 (D.C. Cir. 1991)*; *National Wildlife Federation v. Hodel, 839 F.2d 694, 743-45 (D.C. Cir. 1988)*.

In this case, the Division refused to exercise ASCMCRA jurisdiction over the disputed facilities, citing several reasons. [4] The Division made no mention in its decision of state regulations relating to the range of facilities which require permitting under ASCMCRA. Instead, it relied on the state statutory language and federal case law. On review, the commissioner's hearing officer accepted the Division's decision as a "reasonable one" in light of the "good policy reasons which have [**11] been articulated by the Division for terminating its jurisdiction at [the secondary crusher]." However, in the same decision, the hearing officer noted that "11 [Alaska Administrative Code (AAC)] 90.155 provides that a permit is required for roads and support facilities outside of a mine's permit area."

4 These reasons included:

(1) DNR has discretion in determining the extent of its jurisdiction with respect to offsite facilities which do not include coal processing;

(2) since coal processing is finished at the secondary crusher, the coal should be considered loaded for interstate commerce at that point and therefore DNR's jurisdiction under ASCMCRA ends;

(3) the hauling from the secondary crusher to the port will be operated by a separate entity;

(4) ASCMCRA "describes how a mining operation should be conducted, but provides little guidance to describe how facilities such as the port and employee housing should be operated."

(5) DNR does not have the expertise to regulate the construction of these offsite facilities;

(6) the facilities will require other permits which will address environmental concerns; and

(7) the location of the road, conveyor, and port have not yet been determined, therefore they could not have been included in the present permit.

[**12] We conclude that DNR's decision to refrain from exercising jurisdiction over the disputed facilities lacked a reasonable basis. Further, we conclude that the statutory definition of "surface coal mining operations" in *AS 27.21.998(17)* encompasses the facilities which are disputed in this case. Our conclusions are supported by the language of the statute and by regulations promulgated by DNR which clearly require permitting of many of the disputed facilities.

The state legislature defined "surface coal mining operations" to mean, inter alia, "other areas upon which are situated structures, facilities, or other property or materials on the surface *resulting from or incidental to* the activity." *AS 27.21.998(17)(B)* (emphasis added). The disputed facilities, including the conveyor, airstrip, access roads, gravel pit, solid waste disposal facility, employee housing facilities, port and the coal storage facilities, would not be necessary in the absence of the coal mining operation. They will be built to support the mining activity, will be proximate to the mine and will be located in an otherwise generally undeveloped area. The disputed facilities can only be characterized as facilities [**13] which result from or are incidental to the mining operation. The seven reasons DNR gave for declining jurisdiction simply do not provide a reasonable basis for a different conclusion.

The lack of a reasonable basis for DNR's determination is highlighted by DNR's failure to comply with its own regulations. An agency is bound by the regulations it promulgates. *See* 2 Kenneth C. Davis, *Administrative Law Treatise* § 7:21 at 98 (2d Ed. 1979). An agency has not acted in the manner required by law if its actions are not in compliance with its own regulations. *Jager, 537 P.2d at 1107-08*.

[*1245] In deciding that the disputed facilities were outside its jurisdiction, DNR apparently overlooked its own regulation which provides as follows:

A permit is required for all roads, transportation, support facilities and utility installations included in 11 AAC 90.491, whether or not these facilities are outside the permit area of any particular mine. These facilities must comply with all performance standards of this chapter determined to be applicable by the commissioner and must comply with the appropriate bonding provisions of 11 AAC 90.201 -- 11 AAC [**14] 90.207. In determining which requirements of this chapter are applicable, the commissioner will consider whether any given facility may be subject to the requirements of some other governmental permitting authority.

11 AAC 90.155.

The first sentence of this regulation is clear and unambiguous: a permit is required for all the offsite facilities listed in 11 AAC 90.491.

The facilities listed in 11 AAC 90.491 which must be designed, constructed, used and maintained in a manner which prevents or minimizes environmental damage include:

roads, railroad loops, spurs, sidings, *surface conveyor systems,* chutes, aerial tramways, *airfields, ports, docks,* or other transportation facilities, mine buildings, *coal loading facilities at or near the minesite, coal storage facilities, storage facilities,* fan buildings, hoist buildings, preparation plants, sheds, shops, *and other support facilities* . . . .

11 AAC 90.491(a) (emphasis added). Clearly many of the disputed facilities in this case are explicitly identified in this list. The facilities not explicitly identified are fairly encompassed by the phrase "other support facilities."

As defined by *AS 27.21.998(17)(B)*, [**15] "surface coal mining and reclamation operation" encompasses all of the disputed facilities, including the conveyor, airstrip, access roads, gravel pit, solid waste disposal facility, employee housing facilities, port and the coal storage facilities. Therefore, these facilities must be permitted in accordance with ASCMCRA.

IV. INCLUSION OF OFFSITE FACILITIES IN THE SAME ASCMCRA PERMIT AS THE MINE ITSELF.

Trustees argues that the superior court erred in its decision on rehearing in concluding that the access/haul road could be permitted under a separate ASCMCRA permit. Trustees asserts that the plain language and logic of ASCMCRA contemplate a single permit for an entire surface coal mining operation. It also asserts that allowing separate permits is inconsistent with the statute's remedial goals because it will allow DNR to ignore the cumulative or synergistic impacts of the combined activities.

DNR argues that neither ASCMCRA nor the regulations directly address whether a separate permit is required. It contends that 11 AAC 90.155 implies that a separate permit may be appropriate. DNR claims its interpretation of the regulation is reasonable and entitled to deference. DNR also [**16] asserts that cumulative impacts must be considered whether or not the offsite facilities are separately permitted.

"A permit is required for all roads, transportation, support facilities and utility installations included in 11 AAC 90.491, whether or not these facilities are outside the permit area of any particular mine." 11 AAC 90.155. The implication of this language is that support facilities may have separate permits from the individual mines they support. DNR's interpretation of its own regulations is neither plainly erroneous nor inconsistent with the regulations. Therefore it should be given effect unless it is contrary to ASCMCRA. *AS 44.62.030.*

The portions of ASCMCRA cited by Trustees do not on their face require that a single permit cover the entire mine operation and related facilities. Trustees urges that ASCMCRA precludes DNR's interpretation because it prohibits a person from conducting a "surface coal mining and reclamation operation in the state without a [*1246] permit for that operation." *AS 27.21.060.* We find nothing in this statutory language which requires us to interfere with DNR's interpretation that ASCMCRA allows separate permits to be issued for individual [**17] mines or for support facilities within a larger mining area.

However, statutory language does support Trustees' related argument that DNR may not ignore cumulative effects of mining and related support facilities by unreasonably restricting its jurisdiction and disregarding the effect of activities outside that jurisdiction.

One of ASCMCRA's purposes is "to prevent the adverse effects to society and the environment resulting from unregulated surface coal mining operations." *AS 27.21.010(b)(1).* Other express purposes are "to assure that surface coal mining operations are conducted in a manner that will prevent unreasonable degradation of land and water resources," *AS 27.21.010(b)(3)*, and "to strike a balance between protection of the environment and other uses of the land and the need for coal as an essential source of energy." *AS 27.21.010(b)(7).* These purposes cannot be accomplished by ignoring cumulative impacts. [5] Based on the policies inherent in these purposes, we conclude that DNR may not ignore cumulative effects of mining and related support facilities by unreasonably restricting its jurisdiction or by permitting facilities separately. These purposes require that at the [**18] time DNR reviews any ASCMCRA permit application it consider the probable cumulative impact of all anticipated activities which will be a part of a "surface coal mining operation," whether or not the activities are part of the permit under review. If DNR determines that the cumulative impact is problematic, the problems must be resolved before the initial permit is approved. [6]

5 DNR is specifically required to consider cumulative hydrologic impacts. *AS 27.21.180(c)(3).*

6 This type of "concept approval" is necessary in order to avoid a situation where, because of industry investment and reliance upon a past

mining permit approval, DNR might feel compelled to approve a subsequent permit for a related but environmentally unsound support facility. In some cases, this may require concurrent, as opposed to serial, review of separate, related permit applications. In other cases, anticipated problems resulting from cumulative impacts may require that approval of an initial permit be conditioned upon satisfactory resolution of the problems anticipated in subsequent permits.

[**19] After reviewing the record, we are unable to conclude that in approving Diamond's permit application, DNR substantially complied with its obligation to consider the cumulative environmental effects of the entire mining operation. DNR had the benefit of the United States Environmental Protection Agency's (EPA) analysis of the cumulative impacts of the mine operation, including the effects of facilities which must be permitted but were excluded by DNR from the Diamond permit at issue. [7] However, DNR has not directed this court to portions of its decision in which it meaningfully considered the effects of the facilities it erroneously determined were not within its jurisdiction. [8] Because of this [*1247] lapse, this case must be remanded to DNR for consideration of the cumulative environmental effects of the entire "surface coal mining operation" including the conveyor, airstrip, access roads, gravel pit, solid waste disposal facility, employee housing facilities, port and the coal storage facilities.

7 The EPA specifically considered the effects of these offsite facilities on wildlife, groundwater hydrology, surface water hydrology, and biology. Further, the EPA considered the cumulative impacts resulting from the development of other coal or natural resource projects in addition to the Diamond project.

[**20]

8 In an appendix to its March 1987 findings, DNR made a "cumulative hydrologic impact assessment." However, it is not clear that the conveyor system or the port were considered in this assessment. Further, it appears that DNR was aware of but consciously chose not to consider the cumulative effects of the port and conveyor on moose in the area. DNR found as follows:

> Through the development of all facilities associated with the mine operation (port, conveyor system, and mine site) a portion of the winter range will be disrupted, movement corridors may be changed due to the conveyor, and a section of one rutting area will be lost. The overall effect of these habitat disruptions may be quite different from the impacts associated with only the loss of part of a rutting area. . . . Although it is necessary to be aware of the potential for these types of cumulative impacts to occur, the authority to require monitoring and mitigation under the Surface Mining Program extends only to impacts directly resulting from operations under this permit.

V. APPROVAL OF BOND AMOUNTS INADEQUATE TO COVER THE [**21] TOTAL COST OF RECLAMATION.

Trustees argues that DNR erred in calculating the bond amounts by assuming that Diamond will have complied with all the reclamation requirements on schedule up until the time of any default. Trustees contends that this assumption violates the plain meaning and spirit of the bonding requirements of *AS 27.21.160* and DNR's regulations on bonding amounts. Trustees asserts that there is no reasonable basis for assuming that all ongoing reclamation requirements will be fully complied with up until forfeiture. Trustees also argues that it is unreasonable to assume that DNR's enforcement power will promptly remedy violations.

DNR asserts that bond amounts are left to the discretion of the commissioner and that they cover the full cost of reclamation which may be required if the operation were to shut down at any given point. DNR points out that Diamond must submit annual status reports and that DNR can require additional bonding.

Trustees argues that the issue of the adequacy of the bond required is a legal one. In its view, the substitution of judgment standard applies. DNR urges review on the reasonable basis standard because bond calculations require administrative [**22] expertise.

Alaska Statute 27.21.160(a) provides:

> The amount of the bond required for an area within the permit area shall be determined by the commissioner and shall reflect the probable difficulty of the reclamation considering the topography, geology, hydrology, revegetation potential, and similar factors relating to the area. The amount of the bond must be sufficient to assure the completion of the reclamation plan by the commissioner in the event of forfeiture . . .

AS 27.21.160(a).

Under the statute, the bond calculation involves technical analysis and the exercise of agency expertise and is clearly left to the discretion of the commissioner. We apply a "rational basis" review where an issue "requires resolution of policy questions which lie within the agency's area of expertise and are inseparable from the facts underlying the agency's decision." *Earth Resources Co. of Alaska v. State, Dep't of Revenue, 665 P.2d 960, 964 (Alaska 1983).*

However, Trustees does not challenge DNR's technical analysis or the factual sufficiency of the bond calculations. Rather, it asserts that DNR's assumption that a permittee will have no permit violations [**23] at the time of default is unreasonable and contrary to the statute.

This challenge does not implicate agency expertise. "Where the knowledge and experience of the agency is of little guidance to the court or where the case concerns 'statutory interpretation or other analysis of legal relationships about which the courts have specialized knowledge and experience,'" we may substitute our own judgment for that of the agency's. *Id. at 965, quoting Kelly v. Zamarello, 486 P.2d 906, 916 (Alaska 1971).*

In its decision, the Division rejected Trustees' criticism of its assumption that the regrading and reclamation schedules in the application will be followed:

To do as the commenter suggests, which is to determine the bond amount as though no reclamation at all has taken place during the permit term, is unreasonable and would result in the state holding a considerable [sic] larger bond than would ever be necessary to reclaim the site. If, as suggested . . . the applicant were to disregard regrading and revegetation schedules in the application, this would constitute a violation of the permit. [DNR] is required to inspect the [**24] site on a monthly basis, and has the [*1248] power to enforce the permit provisions should a violation occur. *Basing the bond amount on the assumption that the applicant will violate permit terms is unfair and unnecessary.*

(Emphasis added). DNR adopted the Division's reasoning.

We believe the Division's reasoning and its assumption are fundamentally flawed. We conclude that ASCMCRA *requires* DNR to "base[] the bond amount on the assumption that the applicant will violate permit terms."

The purpose of the bond is to insure "faithful performance of the requirements" of ASCMCRA and "to assure the completion of the reclamation plan . . . in the event of forfeiture." *AS 21.27.160(a).* A performance bond is drawn upon only where there has been a failure of performance. The bond would be unnecessary absent the assumption that a permittee may not fully perform its obligations. The amount of the bond is academic absent a failure.

In light of these elementary facts, we believe it unreasonable and indeed illogical to conclude that DNR's enforcement efforts will assure a permittee's full compliance with reclamation obligations until a forfeiture. DNR's enforcement powers cannot [**25] prevent permit violations. If they could, performance bonds would not be necessary.

The Division intimated that if reclamation does not progress as scheduled, adjustments could be made in the bond amount. But if the operation folds at the point where DNR discovers reclamation violations, a bond calculated under the assumption of compliance up to that point will necessarily be inadequate. The bonds required by DNR will only be adequate to assure full reclamation in the event that forfeiture occurs at a point when no violations exist. We conclude that the Division's assumption that no violations will exist at the time of forfeiture is unreasonable. [9]

9 One of the grounds for forfeiture of a bond is a willful or unwarranted pattern of violations. 11 AAC 90.617(a).

DNR should recalculate the bonds so that they are "sufficient to assure the completion of the reclamation plan by [DNR] in the event of forfeiture." *AS 27.21.160(a).* This does not necessarily mean that DNR must require Diamond to post a bond equal to the [**26] total reclamation cost. DNR should calculate the bond assuming forfeiture at a time when unabated permit violations exist, though it need not assume that *no* reclamation will have taken place.

VI. APPROVAL OF DIAMOND'S WETLANDS RESTORATION PLAN.

A. *Restoration of Ecological Functions and Revegetation.*

Trustees argues that ASCMCRA and SMCRA require restoration of ecological functions provided by wetlands and that the revegetation plan approved by DNR does not satisfy those requirements. Trustees asserts that: (1) the plan is too vague; (2) restoration sites will not be chosen to maximize their effectiveness, but rather they will be based on the regrading; (3) the plan does not discuss how it will replace ecological functions or why that may be infeasible or unnecessary; (4) DNR could not have reasonably determined that the plan was adequate from a hydrologic standpoint because DNR did not have a hydrologist review it; (5) DNR did not consider the adequacy of the plan from a water quality standpoint; and (6) DNR did not consider whether the plan is sufficient from the standpoint of wildlife habitat.

ASCMCRA directs the commissioner to propose regulations consistent with [**27] the environmental performance standards of SMCRA and directs that all permits issued require compliance with those environmental performance standards. *AS 27.21.210.* Trustees has not pointed to any evidence that Diamond's application violates the performance standards, but claim that

DNR approved Diamond's application without [*1249] sufficient evidence that it will restore wetlands functions. [10]

10 The Division required by stipulation that Diamond submit a wetlands plan within six months of permit approval. The Division removed the stipulation when Diamond submitted the plan.

The pre-mining and post-mining use of the area to be disturbed is fish and wildlife habitat. The Division accepted the wetlands plan despite concerns that some of the peat-filled depressions Diamond proposed to create might be too small to function effectively. The Division did not require modification because the restoration plan was a trial program and it would be reevaluated at the permit midterm review. DNR found that the reclamation [**28] plan with the wetlands restoration plan was sufficient to restore the disturbed area to a condition capable of supporting fish and wildlife.

DNR's assessment of the adequacy of the wetlands restoration plan is necessarily speculative and it involves complex subject matter which is within the expertise of the agency. Therefore, we will defer to DNR's decision unless it is arbitrary, capricious, or without a reasonable basis. *Trustees for Alaska, 795 P.2d at 809.*

In our view, DNR's acceptance of the plan meets the reasonable basis standard. The plan describes how wildlife habitat will be recreated by constructing peat-filled depressions which will be replanted with various plant species. In addition, three sediment ponds will be inoculated with plant and insect life forms, and seedlings will be planted to provide a vegetation canopy layer for the benefit of wildlife. In light of the complexity of the subject matter, we will defer to DNR's conclusion that these measures will be adequate to restore wildlife habitat. [11]

11 We are not persuaded by Trustees' other objections to the restoration plan.

[**29] B. *DNR's Bond Release Criteria.*

Trustees asserts that DNR must require Diamond to successfully reestablish wetlands as a criterion for bond release. Trustees argues that "completion of the reclamation plan" includes wetlands restoration.

In its decision, the Division made the following comments in response to Trustees' concern that DNR would not evaluate the success of the wetlands restoration before releasing the bond:

[DNR] intends to evaluate any bond release application in terms of the revegetation success criteria of plant cover, species diversity and woody plant density (11 AAC 90.451 - 11 AAC 90.457). Largely because the wetlands areas are small, separate sampling of the restored wetlands has not been required. Rather, these would be considered as an inclusion within the surrounding vegetation type. Furthermore, there is no specific authority in [ASCMCRA] to support establishing additional bond release criteria to determine whether wetlands have been reestablished successfully (i.e., retention of water, utilization by wildlife, growth of *Sphagnum,* etc.). For this reason, and because of the trial nature of the program, no such demonstration has been required.

[**30] In our view, no reasonable basis exists for the Division's conclusions. Under ASCMCRA, bond release is "conditioned on faithful performance of the requirements of this chapter and the permit. . . . The amount of the bond must be sufficient to assure the *completion of the reclamation plan* by the commissioner in the event of forfeiture . . . ." *AS 27.21.160(a).* This makes it clear that a performance bond must be conditioned on completion of the reclamation plan contained in the permit, irrespective of other specific bond release criteria. The record demonstrates that wetlands restoration is part of the reclamation plan. The commissioner may not release all or part of a bond if part of the permit area covered by the bond is in violation of the performance standards established by regulation. *AS 27.21.170(d).*

AFFIRMED in part, REVERSED in part and REMANDED. The superior court is directed to remand the permit application to DNR for consideration of the cumulative [*1250] effects of all activities which are part of the "surface coal mining operation," for reconsideration of the amount of the bond and for further proceedings in accordance with this opinion.

DISSENT BY: RABINOWITZ (In Part)

DISSENT

[**31] RABINOWITZ, Chief Justice, with whom MATTHEWS, Justice, joins dissenting in part.

I disagree with part IV of the court's opinion, holding that DNR's interpretation of its regulations as allowing separate ASCMCRA permits for different components of a surface coal mining operation is neither "plainly erroneous nor inconsistent with the regulations" or with ASCMCRA.

Alaska Statute 27.21.060 provides in part: "a person may not conduct a surface coal mining and reclamation operation in the state *without a permit* for that operation." (Emphasis added.) *See also* SMCRA § 506(a), *30 U.S.C.A. § 1256(a)*; 11 AAC 90.002(c). The language of *AS 27.21.060* contemplates that a single permit will control all components of a "surface coal mining operation."

The applicable definition of a "surface coal mining operation" includes the actual mine site and all facilities and structures, either off-site or on-site, that are "resulting from or incidental to" the mining. *AS 27.21.998(17)*. Subsection (A) defines "surface coal mining operation" in terms of "an activity" conducted at the actual mine site. *AS 27.21.998(17)(A)*. The definition of a surface coal mining [**32] operation is further broadened in subsection (B):

(B) the areas on which an activity described in (A) of this paragraph occurs or where the activity disturbs the natural land surface, including adjacent land, the use of which is incidental to the activity; and affected by the construction of new roads or the improvement or use of existing roads to gain access to the site of the activity and for haulage; and excavation, workings, impoundments, dams, ventilation shafts, entry ways, refuse banks, dumps, stockpiles, overburden piles, spoil banks, culm banks, tailings, holes or depressions, repair areas, storage areas, processing areas, shipping areas, and other areas upon which are situated structures, facilities, or other property or materials on the surface resulting from or incidental to the activity.

AS 27.21.998(17).

While DNR's assertion that "11 AAC 90.155 . . . infers that a separate permit is appropriate" for the access/haul road is a plausible interpretation of that regulation, I disagree with the court's conclusion that DNR's interpretation is not "inconsistent with the regulations." (Majority Op. 12) In my view, DNR's separate permit interpretation is in direct contravention [**33] with the text of another DNR regulation, 11 AAC 90.002, which is substantially similar to *AS 27.21.060(a)*. 11 AAC 90.002(a) provides in part "no person may conduct exploration activities or surface coal mining and reclamation operations without *a permit.*" (Emphasis added.)

The DNR regulations and DNR's interpretation of those regulations and ASCMCRA, allowing the issuance of separate permits for the access/haul road and the remainder of the mining operation, are contrary to the express purposes of ASCMCRA. Among the enumerated purposes of the statute are "to prevent the adverse effects to society and the environment resulting from unregulated surface coal mining operations" and "to assure that surface coal mining operations are conducted in a manner that will prevent unreasonable degradation of land and water resources." *AS 27.21.010(b)(1)* and *(3)*. The court reasons that to accomplish the purposes of the Act,

at the time DNR reviews any ASCMCRA permit application it [must] consider the probable cumulative impact of all anticipated activities which will be a part of a 'surface coal mining operation,' whether or not the activities are part of the permit under review.

(Majority [**34] Op. 14) I do not believe that the court's mandated "concept approval," in the context of an operation whose anticipated components will be covered by separate permits, is an adequate substitute for the safeguards of the single permit requirement of *AS 27.21.060* in light of the goal of assuring that the agency consider [*1251] the cumulative or synergistic effects of a coal mining operation. In contrast to the anticipated "concept approval" approach adopted by the court, I believe that the requirement, found in *AS 27.21.060*, of a single permit will compel the permit applicant to plan and design the operation and its various components in more concrete and greater detail. This should lead to consideration by the permit applicant and DNR of the operation's cumulative effect in a more careful and comprehensive manner.

Courts have disallowed segmentation of a proposed project for the purpose of preparing environmental impact statements (EISs) to assure that the cumulative effects of the project are adequately considered under the National Environmental Policy Act (NEPA). *Thomas v. Peterson, 753 F.2d 754 (9th Cir. 1985)*; *see also Kleppe v. Sierra Club, 427 U.S. 390, 410-411, 49 L. Ed. 2d 576, 96 S. Ct. 2718 (1976)*; [**35] *Save the Yaak Committee v. Block, 840 F.2d 714 (9th Cir. 1988)*. In discussing a Forest Service plan to prepare an EIS for the logging access road and a separate EIS for each individual timber sale area afterward, *Thomas* cautioned that allowing consideration of cumulative impacts after a portion of the project is already approved "swings the balance decidedly in favor of timber sales even if such sales would have been disfavored had road and sales been considered together before the road was built." *753 F.2d at 760*. While I recognize that in some instances phased implementation of a mining operation may require a reopening and modification of the ASCMCRA permit, the same danger that *Thomas* counselled against inheres in the instant case. Thus, I conclude that *AS 27.21.060* assures that the cumulative and synergistic effects are adequately addressed by its requirement of a single ASCMCRA permit for all components of a surface coal mining operation.

ALASKA STATE LEGISLATURE

SENATOR HOLLIS FRENCH

January 20, 2011

Commissioner Dan Sullivan
Department of Natural Resources
550 W. 7th. Avenue, Suite 1400
Anchorage, AK 99501

Commissioner Sullivan,

PacRim Coal has applied to the Department of Natural Resources for a permit to mine coal in the Chuitna watershed. I am writing to you out of concern regarding one aspect of the permitting process and that is the setting of a reclamation bond under AS 27.21.160 of the Alaska Surface Coal Mining Control and Reclamation Act (ASCMCRA).

PacRim's plan for the mine's development would remove 11 miles of Middle Creek, a major tributary of the Chuitna River and a stream identified by the Department of Fish and Game as "significant to salmon." By 'remove' I mean just that: the plan calls for diverting all of the water out of the streambed, the removal of more than 300 feet of overburden and then mining the exposed coal seams.

While there is currently no law on the books that prohibits mining through a stream – in contrast to the logging rules which require buffers around salmon streams – the reclamation bond statute stands as a significant hurdle for this project to clear. The bond is in place to make certain that PacRim fulfills its obligation to complete its reclamation plan. The difficult issue you face is setting the amount of the reclamation bond given the absence of any precedent in Alaska for permitting mining in active salmon streams.

There is some legal precedent, however, on this particular question. *Trustees of Alaska v. Gorsuch*, 835 P.2d 1239 (1992) involved several disputes surrounding a proposal to mine coal in the Chuitna area by the Diamond Shamrock-Chuitna Coal Joint Venture, a

company related to PacRim through the common ownership interests of Richard Bass and William Herbert Hunt and the Hunt family of Texas in both companies. I have attached a Legislative Research Report outlining this connection in detail. The *Trustees* case in part took up the question of whether DNR, in setting the amount of the reclamation bond, may assume compliance with the requirements of the reclamation plan. Drawing from earlier cases, the court concluded that ASCMCRA requires DNR to base the bond amount on the assumption that the applicant will violate its permit terms. 835 P. 2d at 1248. This assumption takes on a greater significance given the difficulty of PacRim's restoration obligations.

Indeed, many scientists are skeptical of PacRim's plans. For example, Professor Palmer of the University of Maryland in her "Report on Chuitna Coal Project of PacRim Coal" points out that the company will be attempting to "create a stream after all the natural flow paths and landscape topography have been destroyed. This is not even in the realm of anything that has been scientifically tested and is certainly not within the realm of what is considered ecological restoration." The report also notes that "Even with far less damage to a site, stream restoration projects that involve channel modification have an extremely high failure rate."

I hope it is clear from the foregoing that in my view the project as proposed should not be permitted. Should you come to a different conclusion, please keep these considerations in mind as you weigh the amount of the reclamation bond.

Sincerely yours,

Senator Hollis French

Memorandum

TO: Senator Hollis French
FROM: Susan Haymes, Legislative Analyst
DATE: October 25, 2010
RE: Chuitna Coal Project Developers
LRS Report 11.062

You asked if there is any business connection between Diamond Shamrock Chuitna Coal Joint Venture and PacRim Coal, LP.

The short answer is yes, there is a business connection between Diamond Shamrock Chuitna Coal Joint Venture (DSCCJV) and PacRim Coal, LP. The two companies have been involved in efforts to develop the Chuitna Coal Project located 45 miles west of Anchorage.[1] The companies are connected through the ownership interest of Richard Bass and William Herbert Hunt and the Hunt family of Texas, in both companies. Mr. Bass and the Hunt family have been involved in the Chuitna coal property since 1968, first as the Bass-Hunt-Wilson (BHW) group, then as a partner in the DSCCJV, and more recently as controlling owners of PacRim.[2]

The Alaska Department of Natural Resources (DNR) granted coal leases to the Bass-Hunt-Wilson (BHW) group for the Chuitna area in the early 1970s. In 1981, the BHW group formed the Diamond Shamrock Chuitna Coal Joint Venture with the Diamond Shamrock Corporation, and began drilling and exploratory work.[3] In October, 1983, Diamond Shamrock Joint Venture filed a Coal Exploration application with DNR to develop the coal leases held by BHW.[4] Robert Stiles signed the application as the representative of the joint venture. The operating partner for the project was the Diamond Alaska Coal Company, a subsidiary of Diamond Shamrock Corporation. In 1990, the DRven Corporation became the managing partner in the project.[5] Robert Stiles, now president of DRven, continued as the project manager.

In a presentation to the Resource Development Council in Anchorage, Alaska on December 1, 2005, Robert Stiles described the evolution of the companies involved in the Chuitna coal project. According to Mr. Stiles, the Diamond Shamrock Joint Venture was an owner and leaseholder in the Diamond Chuitna Coal

---

[1] The Chultna Coal Project is a surface coal mining and export development proposal for an ultra low sulfur, sub bituminous coal resource located in the Beluga Coal Field of South-central Alaska, approximately 45 miles west of Anchorage.

[2] The BHW group included Richard D. Bass, William "Herbert" Hunt, and Starkey Wilson. William Herbert Hunt is the son of H.L. Hunt, the founder of Hunt Oil. Herbert Hunt founded Petro-Hunt, LLC, an independent energy corporation. The Hunt Family or "Hunt Group," through Petro-Hunt LLC and Petro-Hunt International LLC (Petro-Hunt Group) has business interests primarily in oil and gas exploration, development and production, gas processing, pipeline transportation and refining. More information on Petro-Hunt and the Hunt Group can be accessed at *http://www.petro-hunt.com/About.htm.*

[3] In 1981, the Diamond Shamrock Corporation formed the Diamond Shamrock Coal Company with headquarters in Lexington, Kentucky. In 1987, the Arch Mineral Corporation, owned in equal parts by the Hunt family and Ashand Oil Company purchased Diamond Shamrock Coal. "Shamrock to Sell Coal Subsidiary," *New York Times*, April 17, 1987.

[4] The 1983 Coal Exploration application can be accessed at *http://dnr.alaska.gov/miw/mining/largemine/chuitna/pdf/exploration_permit_0283795.pdf.*

[5] The DRven Corporation, a Texas company, registered in Alaska in April 1990. According to the Department of Commerce, Community and Economic Development, DRven filed its last Biennel Report in 2006, *https://myalaska.state.ak.us/business/soskb/Corp.asp?249391*. Russ Kirkham, coal regulatory program manager, Department of Natural Resources, notes that the Hunt family remained involved in the project throughout, but DRven held the permits for the project during this time. Mr. Kirkham can be reached at 907.269.8650.

Project until about 1994. However, Richard Bass and the Hunt family have had an ownership interest in the Chuitna Coal Project since its inception.[6]

In 2005, control of the project transferred to PacRim Coal, LP, a Delaware corporation, controlled by Richard D. Bass, William Herbert Hunt, and the William Herbert Hunt Trust Estate.[7] PacRim is the current owner and developer of the Chuitna Coal Project.[8] The current manager of the project is Dan Graham.

We hope this information is helpful. If you have questions or need additional information, please let us know.

[6] The presentation can be accessed at *http://www.akrdc.org/membership/events/breakfast/0506/stiles.pdf*.

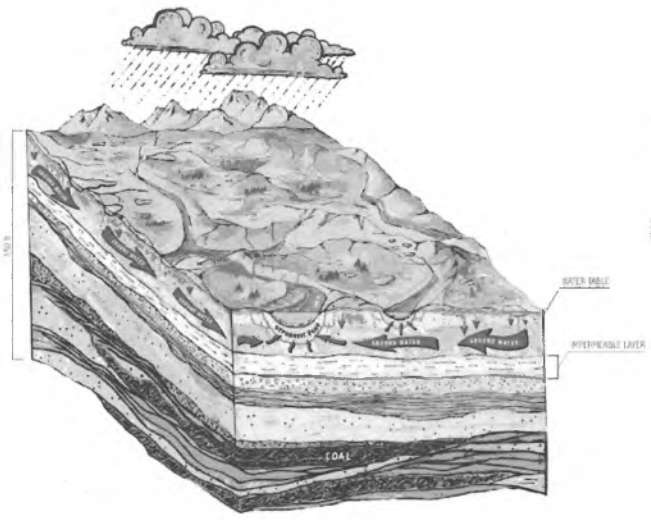
[7] PacRim is part of the Hunt Group, more information can be accessed at *http://www.petro-hunt.com/Coal.htm*. Alaska corporate registration information for PacRim can be accessed at *https://myalaska.state.ak.us/business/soskb/Corp.asp?338563*. Paula Dobbyn, "Beluga Coal Deal Edges Within Reach: High Prices and Cutbacks in Exports from China Could Make the Long-Envisioned Project a Reality, *Anchorage Daily News*, November 3, 2005.

[8] The current project proposed by PacRim consist of a surface coal mine and associated support facilities, mine access road, coal transport conveyor, housing and air strip facility, a logistics center, and coal export terminal. PacRim applied to renew its Coal Exploration Permit with the Alaska Department of Natural Resources on June 24, 2010. The public comment period on the application ended October 13, 2010. More information on the current project can be accessed at *http://dnr.alaska.gov/mlw/mining/largemine/chuitna/index.htm*.

STRIP MINES & SALMON STREAMS

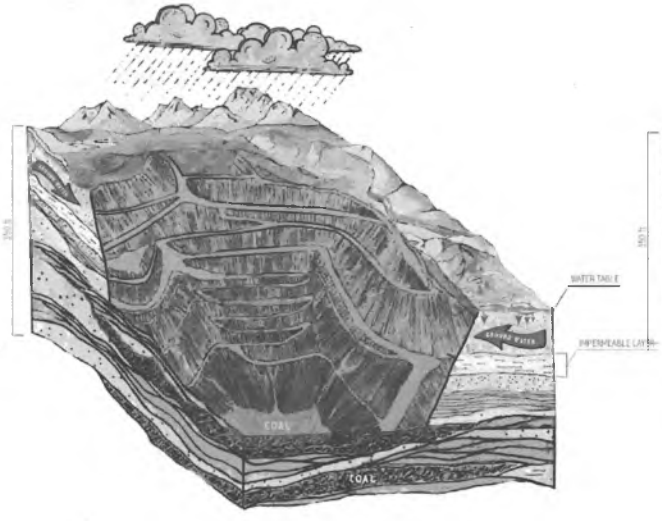
A salmon stream is more than a ditch that drains water: Salmon streams are crucial threads in the intricate fabric that comprises a watershed ecosystem. Once we start to pull out these threads, the very fabric of the watershed starts to unravel.

BEFORE



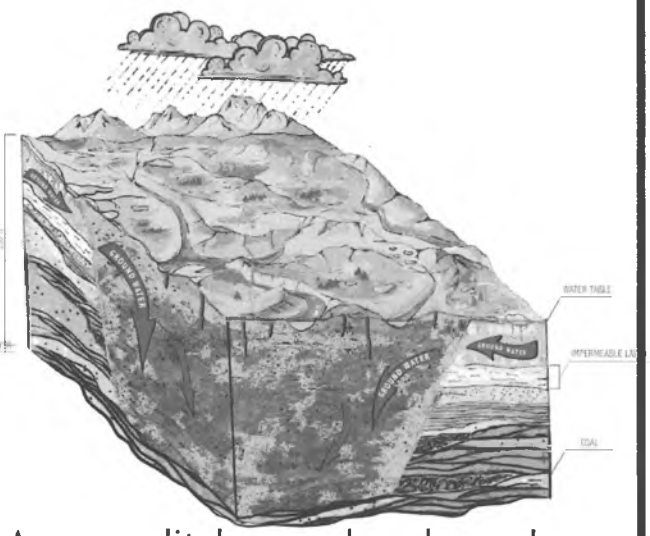
The ecosystem is a woven fabric of wetlands, tundra, forests and tiny headwater streams that pour into the Chuitna River, then Cook Inlet. Surface and groundwaters interact in a complex dynamic that provides the nutrients and conditions needed to support wild Alaskan salmon.

DURING



Impacts to the watershed and the headwater streams from mining activities will fundamentally alter the chemical, hydrologic and sediment regimes that are primary variables controlling the water quality and productivity downstream, which are all key factors for wild Alaskan salmon.

AFTER



A new ditch can be dug where the old stream used to be, but a ditch atop a filled-in pit can never replace the complex physical and chemical conditions needed to support wild salmon and the loss of habitat guarantees the native wild Alaskan salmon population will be lost forever.

JUST LIKE HUMPTY DUMPTY, ONCE IT'S BROKEN, PACRIM CAN'T PUT IT BACK TOGETHER AGAIN - NO ONE CAN

FACTS

- PacRim Coal, a Delaware corporation, is actively seeking state and federal permits to build and operate the Chuitna coal strip mine 45 miles west of Anchorage, near the communities of Tyonek and Beluga.
- PacRim clearly states: "approximately 17.4 km [11 miles] of total stream-channel [salmon] habitat will be removed during the mining operations;"
- Scientific experts concur, it is not possible to construct a new wild salmon spawning stream to the same level of productivity after mining ends.
- PacRim has not provided a single example of strip-mined wild salmon spawning and rearing habitat that has been restored to premining productivity.
- Extensive searches of scientific literature have not produced any examples of successful restoration of a strip mined-wild salmon stream.
- Strip mining will interrupt groundwater flow and destroy the shallow aquifers that currently provide groundwater to streams.
- The uninterrupted flow of shallow groundwater to wild salmon spawning streams is essential for over-winter survival of eggs and fry.
- Recreating the structural complexity and interconnectivity of the below-ground sediment layers responsible for the transport of ground water into salmon streams is impossible.
- The long-term loss of marine-derived nutrients and wetlands (primary sources of nutrients for wild salmon streams) from 25+ years of proposed mining makes the restoration of biological productivity impossible.
- The complex system of surface and groundwater exchange at the streambed is responsible for the year-round upwelling of water, critical for over-winter survival for wild salmon eggs and cannot be recreated.
- Mining through the tributaries and uplands of the Chuit River will permanently change the ecosystem and decrease the productivity of the river.
- Mining through the Chuit River headwaters will remove stored carbon and nutrients that are vital for the health of all downstream reaches; once removed they can not be replaced.
- There is no evidence that the proposed restoration and mitigation plans will compensate for the natural resource losses.
- The complex, genetically diverse wild Alaskan salmon stocks found in the Chuit River, a key to long term viability—cannot be recreated.
- Strip mining would destroy the watershed's hydrologic and geomorphic functions, including the balance of stream flow and sediment supply that supports stream function and habitats over the long term.

WHY SHOULD ALASKANS TRADE RENEWABLE SALMON STREAMS FOR DIRTY COAL BOUND FOR CHINA?

REBUILDING A SALMON STREAM IS LIKE MOVING A $100,000 WEDDING CAKE FROM ONE END OF TOWN TO THE OTHER WITH A TEASPOON.

Testimony Before the
Alaska Senate Judiciary Committee
March 2, 2012

Submitted by:

Lance Trasky
Lance Trasky and Associates
3941 Truro Drive
Anchorage, Alaska 99507

Introduction: Chairman French and members of the Judiciary Committee, my name is Lance Trasky. I have 42 years of experience as a fisheries research biologist, a habitat biologist, and a Regional Supervisor with the Alaska Department of Fish and Game.

Establishing a restoration bond for the proposed Chuitna Coal Strip Mine will be very difficult because there is nothing in the scientific literature or the projects cited by Pacrim and the Alaska Department of Natural Resources which supports the claim that re-creation of a wild Pacific salmon stream and its associated drainage has ever been successfully accomplished or is even feasible. It is also unlikely that the spawning channel and rearing ponds that Pacrim has offered as interim mitigation for the loss of salmon production from Chuitna River tributaries for 25 to 50 years would be successful in maintaining these runs.

The Problem

The Chuitna River supports substantial runs of all five species of Pacific salmon. It is an important contributor to the Cook Inlet commercial and subsistence fisheries. It is believed to be the major source of Chinook salmon to the Tyonek subsistence fishery. The Chuitna is the major Chinook salmon producing system on the west side of Cook Inlet and supports a Chinook sport fishery second only to the Deshka River. The Board of Fish has recently declared the Chuitna River a stock of concern because of shortfalls in escapement.

In the first phase of mining, Pacrim has proposed to strip mine 8,000 acres of the three major Chuitna River salmon producing tributaries. Mining would remove 11 miles of

one tributary and all surface and subsurface features to a depth of 300 feet. To create a new 11 mine long salmon spawning and rearing stream, Pacrim would have to re-construct the entire upper stream drainage from bedrock on up. Re-creation of both surface features such as wetlands and subsurface features such as the shallow and deep aquifers which provide critical ground water flow to these three major tributaries would be necessary. Because sockeye, Chinook, and coho salmon select areas of upwelling ground water for spawning and the input of ground water is essential to the overwinter survival of salmon eggs and larvae in cold climates, the creation of shallow aquifers would be one of the most critical elements in creation of a new salmon stream. Finally an 11mile long stable stream channel and riparian area incorporating all the complex and interconnecting structures and processes that allow salmon to successfully spawn and rear would have to be constructed on top of 300 feet of mine tailings. This has never been done and it is likely not feasible.

ADNR and Pacrim Examples Are Not Relevant:

Both Pacrim and ADNR have provided examples of projects which they claim support their contention that creation of a productive salmon stream after strip mining is feasible. I have reviewed these projects and have personal experience with most of the Alaska projects cited. These projects do not support the contention that re-creation of a new salmon spawning and rearing stream is feasible. None of the examples provided by ADNR or Pacrim involved complete removal of an entire drainage with its associated salmon spawning stream, aquifers, wetlands, vegetation, and the subsequent creation of a new functioning salmon stream with all of these essential attributes on top of the mine overburden. The objective of most of these projects was to improve habitat in damaged fish streams, with no expectations that salmon or other fish species would be restored to pre-development levels of productivity. Only three of the projects cited by ADNR and Pacrim even involved salmon streams, and none of these streams were strip mined. Projects cited involving grayling or catfish have no relevance to the Chutina because these species have very different life histories. The available information for the projects cited did not mention restoring aquifers or ground water. All of the Alaskan projects cited by Commissioner Sullivan and Pacrim as examples of the feasibility of restoring the Chuitna River drainage after strip mining are small-scale compared with the proposed Chuitna Coal Project, which includes 21,000 acres of leases and over 8,000 acres in the first phase of mining. In contrast the Valdez Creek mine which was cited by ADNR and was the largest placer mine in Alaska was only 640 acres and only a mile of grayling stream was constructed.

A letter I wrote to Commissioner Sullivan describing in some detail why the projects that ADNR is using to support their decisions on this project are not relevant to the proposed Chuitna coal strip mine is included in the handouts.

Federal and state biologists question the feasibility of salmon stream restoration

In a 2007 letter to the Environmental Protection Agency, the National Marine Fisheries Service (NMFS) concluded the Chuitna Coal Strip Mine would cause permanent impacts to the Chuitna watershed and associated salmon habitat. NMFS stated, "We are aware of no example of successful salmon stream restoration at this scale". In the Diamond Chuitna Coal Project Final Environmental Impact Statement, EPA also concluded "that it is questionable whether mined through streams could be returned to pre-mining productivity: therefore, fish productivity loss could be a long term loss". The Alaska Department of Fish and Game provided the following response to a letter from ADNR asking whether reclamation of the Chuitna Coal Strip Mine was feasible: "while we are aware of small scale successes in reclaiming certain stream functions we are not aware of any evidence documenting whether large-scale reclamation of ecosystem function can or cannot be accomplished."

In the process of reviewing the Alaskan projects cited as examples of post-mining stream restoration by Commissioner Sullivan and PacRim, I asked a number of fisheries biologists and hydrologists who were involved in these projects if they believed that these projects demonstrate that restoring thousands of acres of strip mined salmon streams, aquifers and drainages was feasible. They all said no. They were also unaware of any example of where a salmon producing drainage has been removed by strip mining to depths of several hundred feet, and a new stream created on top of mine overburden.

Compensation for permanent loss of salmon production:

PacRim has proposed to construct a spawning channel and rearing ponds to replace salmon production from Chuitna tributaries lost due to mining during the 25 to 50 years before a new stream would be created. ADNR has cited salmon usage of USFS gravel pits adjacent to Granite Creek on the Kenai Peninsula and two Canadian spawning channels as confirmation that these methods could replace lost salmon production. However, we know that other Canadian spawning channels and all of the spawning channels that have been constructed in South Central Alaska in the last 30 years have failed over time. Similarly, other gravel pits such as the ADF&G's and ADOT's attempt to convert the Quartz Creek gravel pit on the Sterling Highway to salmon spawning and rearing habitat have failed. Most importantly, because of the

presence of invasive northern pike in the Chuitna drainage, any attempt to sustain salmon production by spawning channels and rearing ponds is unlikely to succeed. Pike thrive in these low gradient environments and have extirpated salmon and trout from all of the lakes, gravel pits (Cheney Lake in Anchorage) and slow moving streams pike have invaded in South Central Alaska.

Conclusion

I have not found any independent restoration experts, scientific studies or projects cited by ADNR and Pacrim that support the contention that reconstruction of a salmon stream with its associated drainage, confined and unconfined aquifers, wetlands, and other essential elements on top of 300 feet of mine overburden is feasible. Restoration of a strip mined salmon producing drainage would be exponentially more difficult than small scale projects to reroute a stream around a man made barrier, revegetate stream banks, or attempts to confine a unstable placer mined grayling stream to a single channel.

In considering standards for bonding mines such as Chuitna, legislators should keep in mind that all of the techniques cited by ADNR and Pacrim as examples of the feasibility of recreating salmon stream drainages were developed in the Pacific Northwest and British Colombia in an attempt to halt or reverse the continuing decline of anadromous salmon populations due to habitat loss. Billions of dollars have been spent in the U.S. and Canada with little success. If the projects cited by PacRim and ADNR as proof of the feasibility of re-creating a salmon stream worked, these methods would be used everywhere and salmon populations would not continue to decline. The problem is that from a salmon habitat perspective, the effect of permanent landscape changes such as the deep strip mining proposed for the Chuitna River drainage cannot be reversed.

Currently, ADNR has considerable discretion in setting bond amounts. It is important to recognize, if the state allows strip mining through a wild salmon stream at Chuitna, it will set state policy that will endure. So, in light of the fact that there is nothing to indicate that restoration of strip mined salmon drainages to pre-mining functions and values or that artificial maintenance of genetically unique runs is feasible, the Legislature should take a hard look at whether mining through salmon streams is a precedent the state should pursue. If so, there will need to be some very difficult discussions about how to put a value on the loss of a renewable resource – wild Alaska salmon – in perpetuity.

Thank you for the opportunity to comment.

Mr. Daniel S. Sullivan, Commissioner
Alaska Department of Natural Resources
550 W. 5th Avenue, Ste. 1400
Anchorage, Alaska 99501

Subject: Petition to Designate the Streambeds of Anadromous Water Bodies and Riparian Areas within the Chuitna River Watershed, Alaska as Unsuitable for Surface Coal Mining Pursuant to AS. 27.21.260

Dear Commissioner Sullivan:

I am a fisheries habitat consultant with 37 years of experience as a fisheries and habitat biologist and as a Habitat and Restoration Division Regional Supervisor with the Alaska Department of Fish and Game. I am writing in support of the petition to designate the streambeds of anadromous water bodies and riparian areas within the Chuitna River watershed, Alaska, as unsuitable for surface coal mining pursuant to As. 27.21.260. I support the petition for the following reasons:

1. **The Chuitna River is an important salmon producing system**: Unlike current coal producing areas of Alaska the Chuitna River is located in a productive coastal ecosystem which supports a diversity of fish and wildlife species. Chuitna River supports all five species of pacific salmon as well as Dolly Varden, rainbow trout and whitefish. Chuitna River salmon are harvested by an in river sport fishery, the Northern district commercial fishery, and the Tyonek subsistence fishery. On the west side of Cook Inlet the Chuitna River sport fishery for Chinook salmon is the second only in importance to the Deshka River. Because of its importance the Chuitna River Chinook stock was listed as a stock of management concern by the Alaska Board of Fisheries in 2010 (Helsinger 2010).

2. **Strip mining for coal will destroy the shallow aquifers and interrupt the flow of ground water to anadromous streams in and adjacent to the mined area:** Over the past several years I have conducted an extensive search of the scientific literature but have not found any examples of strip mine reclamation projects where phreatic ground water flow in streams has been restored to premine conditions by replacing mining tailings. However there is a large body of information documenting long term disruption of both surface and ground water flow as the result of recently permitted strip mining and reclamation (Bonta, 2007, Wilson 1978 and Schwartz and Crowe 1985). Bonta et al 2007 studied the effect of surface mining and reclamation on physical watershed conditions and ground water hydrology in three watersheds. This study found that mining disturbances in watersheds

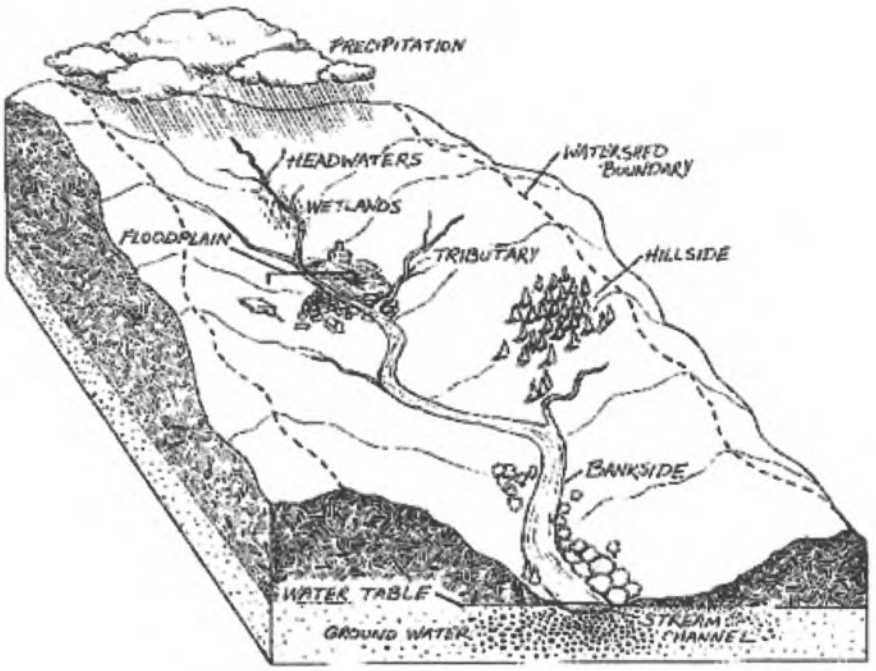

Figure 1: Cross Section of a Watershed (Source: USEPA)

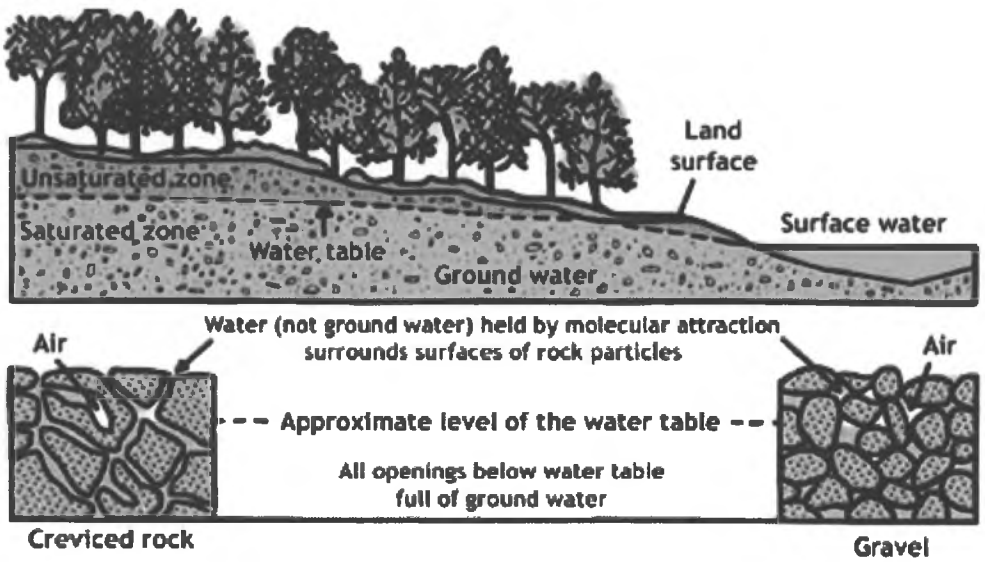

Figure 2: Cross Section of an Aquifer (Source: USGS)

Ground water is critical because it maintains stream base flow and moderates water level fluctuations, particularly in the winter when there is no precipitation. It provides stable temperatures and thermal refugia for fish. It provides water for riparian vegetation which controls bank strength and the rate of erosion (Douglas 2006). It also creates the hyporheic zone (Figure 3).

processes in the hyporheic zone play a central role in the functioning of stream ecosystems (Malcolm et al 2003).

To restore fish habitat in these streams after mining it, it would be necessary to restore the same quality and quantity of ground water. To successfully reconstruct a new stream that is as productive as mined streams, it would be necessary to reconstruct a new shallow aquifer to provide the same amount of phreatic and hyporheic flow, the same seasonal flow patterns and same quality (temperature, pH, dissolved elements, dissolved solids etc.) of ground water present prior to mining. I conducted an extensive search of the scientific literature to find examples of restoration of salmon streams after the type of strip mining proposed for the Chuitna River drainage. I also consulted with experts who have been involved in salmon habitat and strip mine restoration in Alaska and the continental United States. The search found many examples of how strip mining has dramatically altered local and regional ground water flow during and after mining, but no references to any scientific studies of mines where the aquifer's supplying phreatic ground water to the hyporheic zone of a salmon spawning and rearing stream has been successfully restored to premining productivity after strip mining. Most experts do not believe that it is possible to reconstruct a functioning shallow aquifer for an anadromous streams system in a deep mined system with any degree of confidence that it would work. Attempts to restore ground water flow to mined stream would be further hampered by the fact that the very complex geology of the Chuitna River drainage and how these shallow aquifers function is poorly understood except that ground water from these aquifers up well's at certain points in these streams and currently supports salmon spawning, rearing and overwintering.

3. **Strip mining will result in the long loss of marine derived nutrients and organic carbon essential to stream productivity:** Even if mined anadromous stream channel's in the Chuitna River drainage could be successfully reconstructed to full physical function, it is unlikely these streams could be restored to their former level of biological productivity because of the loss of marine derived nutrients (MDN) from salmon carcasses in the mined areas and the loss of organic carbon from the removal of all of the wetlands in the mine area. Significant loss of stream productivity from premining conditions has been documented in studies of streams in reclaimed stripmines. Matter and Ney (1981) found that "benthic invertebrate and fish populations were significantly lower in abundance in the reclaimed mine streams than in the reference stream and showed less taxonomic richness and stability: they were similar in these respects to the biota of unreclaimed mine streams."

Wetlands and MDN from salmon carcasses are the primary sources of stream nutrients and productivity in salmon streams. There is a large body of scientific literature showing that Pacific salmon are the major vehicle transporting marine nutrients across ecosystem boundaries from marine to freshwater and terrestrial ecosystems. Nutrients from salmon eggs and carcasses play a major role in the productivity of both freshwater and riparian ecosystems and in perpetuating future salmon runs. Most fisheries scientists and progressive fisheries managers have concluded that stream ecosystem health benefits from having the largest number of spawners possible which in turn produces a large number of carcasses (WDFW 1997). The eggs and carcasses from these spawning salmon provide an essential

wetlands can be replaced, stream productivity and fisheries production can not be restored to premining levels of productivity. The National Academy of Science recommends not destroying filling fens and bogs, both found in the Chuitna claims area, because they are "difficult or impossible to restore" (National Academy of Science 2001). For certain types of wetlands such as peat bogs which grow at a rate of less than 1mm annually, replacement is not feasible within geological time. Wetlands whether natural or constructed exist because of the presence of surface or near surface water. The extensive wetlands in the Chuitna River drainage exist in part because weathered volcanic ash a few feet below the surface forms clay like impermeable layer which holds water. Deeper layers of compacted ash act as an aquaitard confining the water table below it and forcing seeps and springs out of the hillsides and into adjacent drainages. Once the existing wetlands and the impermeable soils that currently maintain these wetlands are removed by mining there is nothing to provide a base for construction of new wetlands. There are no studies in the scientific literature which indicates that wetlands have been restored on coal mine spoils on the scale which would be required in the Chuitna River drainage. The risk of failure for many wetlands restoration projects is high, particularly in Alaska where no projects of this type have been documented (Kusler, 2004 and National Academy of Sciences, 2001).

4. **Mining will adversely affect water quality for fish and aquatic life:** Information provided by Pac rim contractors indicates that water quality will change as a result of mining in the Chuitna River drainage. Potential water quality changes include lower Ph, higher turbidity, and releases of heavy metals such as copper. Fish and their food organisms in the Chuitna River drainage have adapted to the unique water quality conditions present in the Chuitna River and its tributaries over thousands of years. Water quality is defined by dissolved elements, marine derived and terrestrial nutrients, and physical factors such as temperature, pH, conductivity, and turbidity. Anadromous species such as salmon, trout, and whitefish also depend on subtle chemical clues present in surface waters in to locate both their natal streams, and spawning locations within tributaries.

Surface water chemistry will be altered by pumping water out of the pit to allow mining and rerouting surface water away from the pit area and into streams. Data collected by Pac Rim contractors indicates that one or more of the aquifers in the mine areas contains elevated levels of copper, zinc, iron, aluminum, manganese and lead. Zinc and manganese levels in ground water within the proposed Chuitna mine area are approximately 4 times and aluminum 20 times greater than average surface water levels in stream within the proposed Chuitna mine area . All of these metals are toxic to fish and aquatic life at levels in the part per billion to part per million ranges. Aluminum interferes with phosphorus metabolism in plants which form the basis of the aquatic food chain in streams. It also precipitates on fish gill membranes inhibiting exchange of oxygen and carbon dioxide which results in asphyxiation. Copper is toxic to rainbow trout at 1.4 parts per billion, and elevated levels (5-20 ppb.) destroys the olfactory organs which anadromous fish use to locate prey and spawning streams. Zinc is toxic in the part per billion range and accumulates in and damages gills, liver, and kidneys. Copper, zinc and lead bioconcentrate (build up to high levels over time) in aquatic organisms. Copper and zinc also act synergistically in the aquatic environment so that the toxicity of the combination is greater than the individual elements.

Moose Creek in the Matanuska River drainage. The damage to salmon streams from alluvial placer mining and is very different from strip mining, which may encompass entire drainages and alter both the surface topography, subsurface geology and the aquifers down to several hundred feet. The objective of most of these stream projects has been to stabilize a short section of an existing stream channel and not reconstruct an entire drainage, stream channel and aquifer.

Although there may have been some benefits to fish, I have not been able to find any reports or scientific studies documenting that these stream relocation or stabilization projects have benefitted fish. Most of these projects such as the USFS projects on Resurrection Creek have attempted to restore both sinuosity and rearing habitat to a stream impacted by placer mining in the early 1900's by moving and grading spoil piles and providing instream cover. Placer miners channelized the stream and left spoil piles in the flood plain but did not destroy the shallow aquifer that provides ground water flow to the stream. It appears that the USFS projects have increased rearing habitat for Chinook and Coho salmon by connecting formerly isolated channels in mine spoils, but no data has been made available to document this. Similarly, it is likely that the rerouting of Moose Creek back into its original channel has provided access to additional upstream spawning and rearing habitat for salmon in previously inaccessible upstream waters but no scientific data is provided to support this. However, this project like the others does not provide any indication of the likelihood of success in completely reconstructing a salmon stream, recreating the existing water chemistry, recontouring and revegetating its drainage, reconstructing all of its wetlands and rebuilding its aquifers from basement sediments on up in the Chuitna River drainage.

7. **A great deal of new information that raises questions about the feasibility of restoring anadromous within the Chuitna River drainage to their premining level of productivity has become available since the 1990 Diamond Chuitna Coal Project Final Environmental Impact Statement.** When the Diamond Chuitna Coal Project Final Environmental Impact Statement was completed in 1990 very little was known about the physical, chemical and biological components of salmon habitat, and the function of in stream flow and ground water, marine derived nutrients, and wetlands in the productivity of salmon streams. Studies of salmon salmon genetics, the effects of mining on salmon streams, and the restoration of salmon streams were in their infancy. The impetus for much of this research was the continued decline of salmon stocks due to human activities. Since 1990 a great deal of scientific research on these subjects has been completed and information has become available. This information support the conclusion that strip mining for coal will severely impact current anadromous waters in the Chuitna River drainage and that it is very unlikely that these waters could be restored to their premining level of productivity

Thank you for your consideration of my request that you grant the Petition to Designate the Streambeds of Anadromous Water Bodies and Riparian Areas within the Chuitna River Watershed, Alaska. as Unsuitable for Surface Coal Mining Pursuant to AS. 27.21.260. If you have any questions you can contact me at the address shown above.

Sincerely,

Re: Testimony on the feasibility of reclamation for the proposed Chuitna coal mine, before the Alaska Senate Judiciary Committee on March 2, 2012

Fm: David M. Chambers, Ph.D., P. Geop.

Reclamation of a minesite is not restoration to its former function, but involves returning a minesite to a functional use after mining has been completed. The functional uses are typically things like wildlife habitat, grazing, and/or industrial use. The goals for reclamation functional use are, or have, always been aimed primarily at a surface use.

Recreating the subsurface hydrological regime that existed before mining would be extremely difficult, likely impossible, very expensive, and to my knowledge has never been the primary goal of any reclamation effort. Recreating the pre-mining hydrologic regime would be technically challenging at best, but more likely is not a viable option. At a minimum it would require a very detailed pre-mining data collection effort in order to understand the physical layout and function of the existing hydrologic (groundwater) regime. Where water moves and how fast it moves are functions that would have to be well understood before the groundwater strata are disturbed by mining. Some of the reclamation at Chuitna would involve attempting to restore up to 200 feet in thickness of potentially water-bearing strata.

Complicating the restoration would be the Chuit and South Pit faults, and several anticlines (structural features) that have warped the underlying strata since its deposition. Faults can either be zones of high permeability that promote preferential flow of groundwater, or zones of low permeability that act as barriers to the transmission of groundwater. Mining through fault zones means that the groundwater hydrology must be thoroughly understood in order to have any chance of restoring groundwater flow patterns during reclamation. Similarly, anticlines and similar geomorphic structures will influence groundwater flow, and must be carefully mapped in order that restoration of pre-mining hydrologic effects might be attempted. It is not evident from the information presented in the pre-mining work[1] that these important hydrologic factors have been adequately examined.

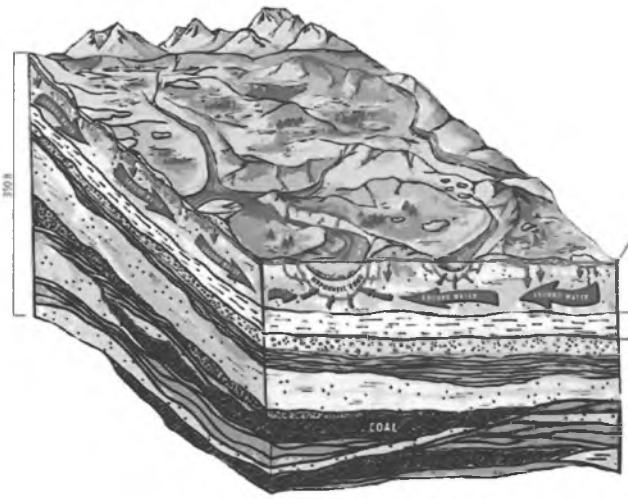
If the original hydrology were to be adequately mapped in three dimensions, the flow patterns, temperature and water quality variations documented, getting similar materials back into these configurations would be very difficult. When waste material is mined, stockpiled, and then moved back into the mined out pit, there is a tendency for homogenization of the backfill material. From a hydrologic perspective the original strata will consist of zones that conduct water (aquifers), and zones that do not conduct water (aquitards). The aquitards are as important as the aquifers because they control the flow of groundwater. A normal pit backfill would tend to create a relatively uniform aquifer, with hydraulic conductivity that could be greater than or less than that of the original strata. Backfill could also negatively impact groundwater, and potentially surface water, quality.

In order to recreate the original hydrologic regime, backfill material would need to be sorted, stored separately, and selectively replaced into the mined out areas. This sorting, with perhaps screening, and separate storage would be more expensive than traditional pit backfill methodology. Quality control of the backfill segregation and placement would also be a significant management issue. If backfilled material is not sorted, stored, and replaced to meet locational and hydrologic parameters, then the restored hydrologic system would function differently than the original.

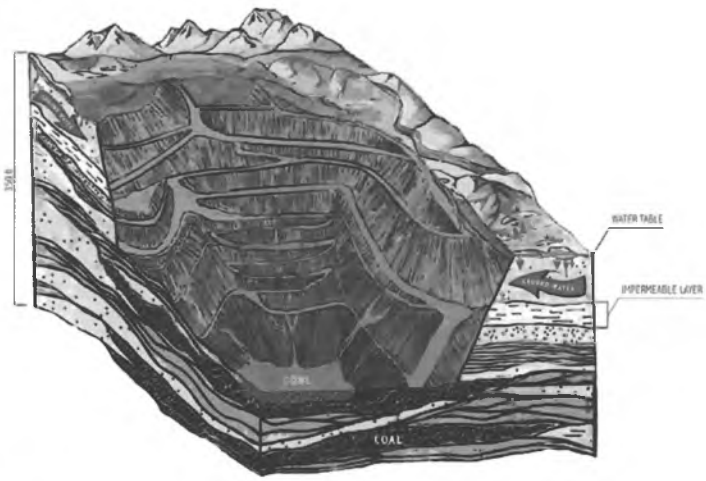
---

[1] Chuitna Coal Project Geology Baseline Information, PacRim Coal, L.P., August, 2006

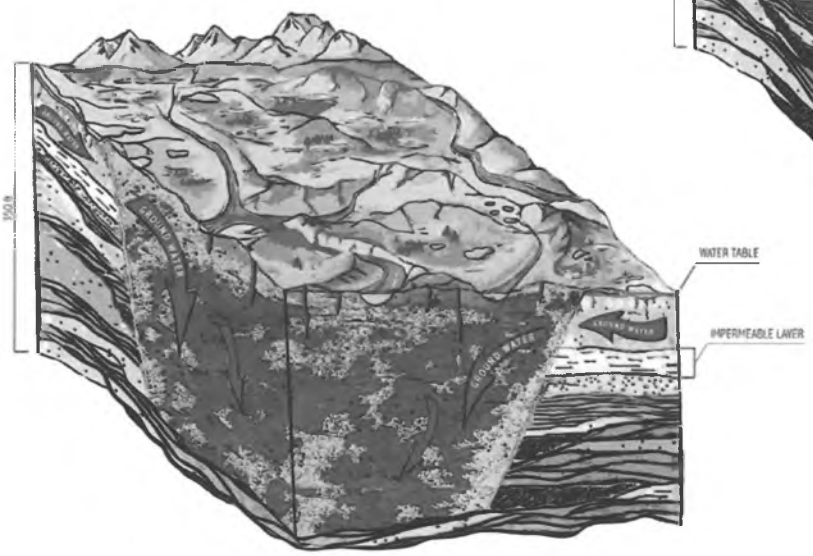
It is highly unlikely that the original hydrologic system could be restored. This is due to the disruption of the original strata due to mining that would cause a change in the physical character of the rock. There would be changes in rock size (therefore hydraulic conductivity), and changes in rock volume. The volume would increase on a unit basis due to breaking up the rock, but there might be a decrease in total volume due to the removal of the coal – coal layers that cannot be replaced physically or hydrologically.



Strip Mining - Before



Strip Mining - During



Strip Mining - After

Because of all of these complications – of adequately defining the existing hydrology; of sorting and storing the mined waste; and, of putting it back in the same hydrologic configuration as the original material – it is likely that the restored hydrologic regime would only be a rough approximation of the original. The significant increase in cost to provide only a rough approximation of what was there before explains why restoration of the original hydrologic regime at a minesite is not typically attempted.

Alaskans Must Stand Firm to Protect Salmon Habitat

By

Dr. Jim Rearden

February 25, 2012

Some folks from Texas want to strip-mine the Chuitna River watershed on the west side of Cook Inlet so they can send coal to China. To get to the coal, they want to destroy 11 miles of Middle Creek, a beautiful stream that is home to several species of wild Alaskan salmon. This would be the first time in our great State's history we would allow mining directly through a wild salmon stream. If our Governor and the state agencies allow this project to proceed, it will set a horrendous precedent that will jeopardize wild Alaska salmon forever.

Alaska's Department of Natural Resources is moving ahead with a permitting process for this monstrous misuse of the land. That an Alaska agency would consider such a proposal is an insult to Alaskans and to the land. In my 61 years being involved with Alaska's fish and game resources, the only other comparable, seriously-proposed rape of Alaska's land I can remember was when Gov. Gruening wanted to dam the Yukon River.

The federal government almost destroyed Alaska's salmon fishery. Since statehood in 1959, Alaska's Department of Fish and Game has rebuilt our salmon runs to equal to or even better than the greatest runs of the earliest years. But now, politics and money have crept in, and sound science is no longer driving our agency decision making.

The future of our salmon depends upon the health of our salmon streams. Since territorial days we have prohibited dams that could keep salmon from spawning grounds. To protect spawning grounds and prevent silting, one cannot legally drive a tractor or all-terrain vehicle across an Alaska salmon stream. We require logging projects to protect riparian habitat for fish. We say no to fish stream pollution of any kind.

At statehood, Alaska's salmon managers -- I was one -- had mostly pristine rivers to manage. The Texans presume they can replace the 11 miles of Middle Creek they plan to destroy. That is impossible; any Alaskan knows that. If they could build new salmon streams, they could make a heck of a lot more money doing that then exporting coal. Only God could create a wild Alaska salmon stream and all its fixings, and it might even take Him a few centuries.

Equally important, it's impossible to set a dollar value on the loss of salmon from Middle Creek. The reason is simple: salmon are an eternally renewable resource. What would be the value of salmon from Middle Creek over the next 10,000 years? Compare that with 25 years of income from coal shipped to China, most of which would fill the pockets of Outside investors.

Governor Parnell has promised on numerous occasions he would "never trade one resource for another." Yet he rejected a petition from local hunters and fishermen asking the state to remove salmon streams from the proposed mining area. I'm all for mining, it's vitally important to our state – just not through our salmon streams. The Governor wants us to believe the permitting system can somehow magically mitigate away the devastating effects of coal strip mining on wild salmon streams. But anyone who's lived with salmon knows that's untrue.

Alaska is the last stronghold for wild salmon. The once-magnificent runs in Oregon and Washington and Maine have fallen to the very same shortsighted decisions we're faced today with the Chuitna coal strip mine. If we set state policy by allowing mining through salmon streams at Chuitna, it won't be long before our kids and grandkids are asking: why didn't you learn from the mistakes they made in the Lower 48?

In 1950, Dr. Jim Rearden organized the wildlife department at the University of Alaska Fairbanks and taught as head of that department for four years. He has been an area biologist for commercial fisheries for the Alaska Department of Fish and Game in Cook Inlet, served on the old Board of Fish and Game and later on the Board of Game and was a member of the National Advisory Committee on Oceans and Atmosphere. He was outdoors editor of Alaska magazine for 20 years and has written more than 500 magazine stories and 27 books on Alaska subjects.

Panelist Bios

Dr. Margaret Palmer is a Professor of Entomology and Biology at the University of Maryland where she oversees a scientific research laboratory with approximately 120 staff, 20 buildings, and a research fleet. She has over 25 years of experience in research and teaching on coastal ecosystems, watershed science, and stream ecology and restoration. Her past work includes leading a large team of scientists in developing the first national database on river restoration in the U.S., coauthoring a book on The Foundations of Restoration Ecology and serving as an expert advisor on the design of multiple stream and river restoration projects.

Lance Trasky is the owner of Lance Trasky and Associates an environmental consulting company. Mr. Trasky received a Bachelor of Science degree from Michigan State University and did his graduate studies in fisheries at Central Michigan University. Mr. Trasky is a fisheries and habitat biologist with over 32 years of experience in fisheries research and analyzing potential adverse affects of many types of activities on fish and fish habitat. From 1971 to 1974 he served as the Alaska Department of Fish and Games Commercial Fisheries Division salmon area research biologist for the Arctic and Yukon River. Since 1974 he worked for the ADF&G Habitat and Restoration Division in a series of research, planning, and management positions with increasing responsibilities. In 1977 he was promoted to supervisor of the Marine and Coastal Habitat Management section, and in 1980 was made Regional Supervisor for the South Western, and Western Regions of Alaska. In 1983 his responsibilities were expanded to include ADF&G's South Central Region. This included Cook Inlet, Bristol Bay, Prince William Sound, Kodiak Island, and the lower Yukon Kuskokwim River which are the major salmon producing areas of Alaska.

Dr. David Chambers is the president of the Center for Science in Public Participation, a non-profit corporation formed to provide technical assistance on mining and water quality to public interest groups and tribal governments. Dr. Chambers has 35 years of experience in mineral exploration and development – 15 years of technical and management experience in the mineral exploration industry, and for the past 20 years he has served as an advisor on the environmental effects of mining projects both nationally and internationally. He has Professional Engineering Degree in Physics from the Colorado School of Mines, a Master of Science Degree in Engineering from the University of California at Berkeley, and is a registered professional geophysicist in California (# GP 972). Dr. Chambers received his Ph.D. in Environmental Planning from Berkeley where his doctoral dissertation analyzed the U.S. Forest Service's efforts to plan for and manage minerals on the National Forests.

Testimony of

Margaret A. Palmer, Ph.D.
Professor and Director
Socio-Environmental Synthesis Center
University of Maryland

to the

Alaska Senate Judiciary Committee

March 2, 2012

Good afternoon Chairman French and members of the Senate Judiciary Committee. My name is Margaret Palmer and I thank you for allowing me to speak to you today.

I am a Professor at the University of Maryland and Director of the National Science Foundation's National Socio-environmental Synthesis Center. I've been researching streams and watersheds for over 25 years and am an expert on stream restoration and the impacts of surface mining on streams.

As you know, PacRim Coal has proposed a large mining project in the Chuitna River watershed. This is a 25 year project that will impact a very large track of land not only due to the footprint of the mine itself but due to all the infrastructure and access needs for mining. Impacts to the Chuitna watershed will include destruction of fragile wetlands and 11 miles of salmon spawning streams.

I am here to describe irrefutable scientific evidence that the impacts of the proposed Chuitna mining project will be irreversible and that reclamation to support future salmon populations is not technologically feasible.

I wish to make three major points today:

- First, the examples of reclamation and restoration projects that have been provided by PacRim and others do not demonstrate that restoration at Chuitna is achievable.
- Second, reclamation at the Chuitna site to support salmon would require *creation* of streams and rivers, not restoration or reclamation, yet *creation* of streams is outside the realm of credible science.

- Third, there is extensive scientific documentation of widespread failures of restoration projects in watersheds far less impacted than what is proposed for the Chuitna watershed; and, thus the likelihood of reclamation success to support salmon populations is at or near zero.

Point 1: Irrelevance of PacRim reclamation examples

PacRim has put forward a number of examples of projects that they suggest are evidence that reclamation of wetlands and salmon streams lost due to the Chuitna project is technologically feasible. In fact, they are not evidence because the projects they describe are on sites only minimally impacted – this is nothing like what will happen to the Chuitna watershed if the proposed mining occurs.

The PacRim referenced projects have no bearing on what will be needed at Chuitna:

First, the referenced examples are in watersheds that still have intact headwaters and the streams are still connected longitudinally, which is not the case for Chuitna.

Second, groundwater flow paths in the examples they cite are still intact yet in the Chuitna case, with mining to depths of 300 feet or more, the existing groundwater flow paths will be destroyed. Keep in mind that groundwater is what feeds streams.

Third, many of the examples PacRim cites deal with restoration of stream *sections* that had been previously diverted or degraded ...not streams whose watersheds have been destroyed. The restoration actions required for their examples typically are just adding more bends in the existing stream, widening channels, or removing the diversion channels.

Fourth, the PacRim examples were not of mined-through streams in which the entire channel including its headwaters was exposed to major earth-moving activities. Such activities (which are to occur at the Chuitna sites) not only result in mining waste rock and soil being placed where streams once were but that material is seriously compacted.

Fifth, they provide examples from Illinois and Indiana for streams that are warm-water and do not support sensitive species like salmon.

Point 2: Stream creation is outside the realm of modern science

What PacRim is proposing is nothing like stream reclamation that is commonly practiced today. Instead it is an attempt to create a stream *de novo*. In other words,

streams and wetlands, including headwaters are to be completed destroyed, fill added and packed then after mining is complete, PacRim will dig ditches and route water to them.

In practice, ecological stream restoration varies along a continuum from: removing on-going impacts to a stream (e.g., preventing toxic inputs) and letting the system recover on its own; to enhancing in-stream habitat or the surrounding riparian zone (e.g., adding coarse woody debris to streams and planting vegetation) in an otherwise healthy stream; to full scale restoration that involves manipulations of an *existing* stream channel (e.g., re-grading banks and planting trees along a stream with eroding banks).

Yet under the plan proposed for Chuitna, there will be no existing channels remaining to 'restore'. They will be gone. Unfortunately, simply ditches and routing water to them does not create a living, breathing stream that will support insects, fish, wildlife and certainly not salmon.

Streams that are healthy enough to support salmon and other valuable species, must have the organically rich soils, wetlands, and mature native vegetation common to the region. Rainwater and snowmelt percolate into the ground, reaching the water table and then move laterally into streams and/or wetlands. Thus groundwater inputs to streams have moved through rich soils where nutrients and essential elements that are necessary for healthy streams and wetlands.

Claiming that a structure like a ditch dug on mined land is similar to a functional ecosystem because it has the same width and depth is analogous to claiming that all people of the same height are equally healthy. It's easy to understand the important difference between physical features and biological functioning when you think about people's health. For instance, my husband looks great, he is 6'2" and weighs 185. But guess what? He has really high blood pressure. Can you imagine a doctor saying he is healthy without ensuring his essential systems are working, like heart rate, blood pressure, glucose metabolism?

From a scientific point of view, it is equally unacceptable to say a stream will be healthy ecologically just because it happens to have rocks and water. It is particularly

remarkable to make such a claim in this case given the extensive watershed destruction.

Point 3: Widespread failures in much simpler reclamation projects mean large scale failure at Chuitna

The status of research evaluating the effectiveness of stream and wetland reclamation has advanced significantly in the last decade and there is now clear evidence of widespread ecological failures of projects attempted on sites far less damaged than what will occur at the Chuitna sites.

Recently, I led a national project that developed the first comprehensive database on stream and river restoration for the U.S. (38,000 projects in the database) and there is not a single case in which building streams in the manner they outline has been shown to work, much less fully compensate for what is lost when a stream is destroyed.

Additionally, there is a long list of peer-reviewed studies documenting failures from stream restoration projects. For example:

A study published in 2010 evaluated 78 independent stream restoration projects to determine if aquatic biodiversity recovered. Only 2 of those 78 showed improvement.

A special issue of the leading ecological journal, *Ecological Applications* was devoted to stream restoration in 2011 and there was not a single example provided of ecological recovery.

There are two recent publications demonstrating failure of recovery when reclamation of streams was attempted on previously minded land in ecoregions similar to the Chuitna site. The locations of those sites were in the North West Territories of Canada and in the Arctic.

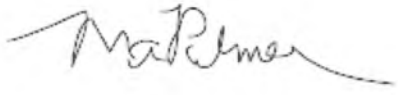
The fact is, the current status of technology for stream reclamation is limited to small scales (usually single reaches), is only useful in intact water networks, and is certainly not designed nor tested for situations in which the underlying soils, geology, and associated groundwater flow paths are destroyed.

Summary

I would like to leave you with the understanding that there is no evidence that reclamation of streams and wetlands at the Chuitna site is feasible. And that in fact

there is strong evidence that it is not feasible based on strong science and extensive research. The current technology for reclamation has not yet been successful in watersheds or in streams with far less impact that what Chuitna will experience. You should recognize that if the watershed is mined as proposed, you will not regain the salmon populations that frequent the streams now.

Thank you Mr. Chairman and Members of the Committee.



Margaret A. Palmer

Testimony Before the
Alaska Senate Judiciary Committee
March 2, 2012

Submitted by:

Lance Trasky
Lance Trasky and Associates
3941 Truro Drive
Anchorage, Alaska 99507

Introduction: Chairman French and members of the Judiciary Committee, my name is Lance Trasky. I have 42 years of experience as a fisheries research biologist, a habitat biologist, and a Regional Supervisor with the Alaska Department of Fish and Game.

Establishing a restoration bond for the proposed Chuitna Coal Strip Mine will be very difficult because there is nothing in the scientific literature or the projects cited by Pacrim and the Alaska Department of Natural Resources which supports the claim that re-creation of a wild Pacific salmon stream and its associated drainage has ever been successfully accomplished or is even feasible. It is also unlikely that the spawning channel and rearing ponds that Pacrim has offered as interim mitigation for the loss of salmon production from Chuitna River tributaries for 25 to 50 years would be successful in maintaining these runs.

The Problem

The Chuitna River supports substantial runs of all five species of Pacific salmon. It is an important contributor to the Cook Inlet commercial and subsistence fisheries. It is believed to be the major source of Chinook salmon to the Tyonek subsistence fishery. The Chuitna is the major Chinook salmon producing system on the west side of Cook Inlet and supports a Chinook sport fishery second only to the Deshka River. The Board of Fish has recently declared the Chuitna River a stock of concern because of shortfalls in escapement.

In the first phase of mining, Pacrim has proposed to strip mine 8,000 acres of the three major Chuitna River salmon producing tributaries. Mining would remove 11 miles of

one tributary and all surface and subsurface features to a depth of 300 feet. To create a new 11 mine long salmon spawning and rearing stream, Pacrim would have to re-construct the entire upper stream drainage from bedrock on up. Re-creation of both surface features such as wetlands and subsurface features such as the shallow and deep aquifers which provide critical ground water flow to these three major tributaries would be necessary. Because sockeye, Chinook, and coho salmon select areas of upwelling ground water for spawning and the input of ground water is essential to the overwinter survival of salmon eggs and larvae in cold climates, the creation of shallow aquifers would be one of the most critical elements in creation of a new salmon stream. Finally an 11mile long stable stream channel and riparian area incorporating all the complex and interconnecting structures and processes that allow salmon to successfully spawn and rear would have to be constructed on top of 300 feet of mine tailings. This has never been done and it is likely not feasible.

ADNR and Pacrim Examples Are Not Relevant:

Both Pacrim and ADNR have provided examples of projects which they claim support their contention that creation of a productive salmon stream after strip mining is feasible. I have reviewed these projects and have personal experience with most of the Alaska projects cited. These projects do not support the contention that re-creation of a new salmon spawning and rearing stream is feasible. None of the examples provided by ADNR or Pacrim involved complete removal of an entire drainage with its associated salmon spawning stream, aquifers, wetlands, vegetation, and the subsequent creation of a new functioning salmon stream with all of these essential attributes on top of the mine overburden. The objective of most of these projects was to improve habitat in damaged fish streams, with no expectations that salmon or other fish species would be restored to pre-development levels of productivity. Only three of the projects cited by ADNR and Pacrim even involved salmon streams, and none of these streams were strip mined. Projects cited involving grayling or catfish have no relevance to the Chutina because these species have very different life histories. The available information for the projects cited did not mention restoring aquifers or ground water. All of the Alaskan projects cited by Commissioner Sullivan and Pacrim as examples of the feasibility of restoring the Chuitna River drainage after strip mining are small-scale compared with the proposed Chuitna Coal Project, which includes 21,000 acres of leases and over 8,000 acres in the first phase of mining. In contrast the Valdez Creek mine which was cited by ADNR and was the largest placer mine in Alaska was only 640 acres and only a mile of grayling stream was constructed.

A letter I wrote to Commissioner Sullivan describing in some detail why the projects that ADNR is using to support their decisions on this project are not relevant to the proposed Chuitna coal strip mine is included in the handouts.

Federal and state biologists question the feasibility of salmon stream restoration

In a 2007 letter to the Environmental Protection Agency, the National Marine Fisheries Service (NMFS) concluded the Chuitna Coal Strip Mine would cause permanent impacts to the Chuitna watershed and associated salmon habitat. NMFS stated, "We are aware of no example of successful salmon stream restoration at this scale". In the Diamond Chuitna Coal Project Final Environmental Impact Statement, EPA also concluded "that it is questionable whether mined through streams could be returned to pre-mining productivity: therefore, fish productivity loss could be a long term loss". The Alaska Department of Fish and Game provided the following response to a letter from ADNR asking whether reclamation of the Chuitna Coal Strip Mine was feasible: "while we are aware of small scale successes in reclaiming certain stream functions we are not aware of any evidence documenting whether large-scale reclamation of ecosystem function can or cannot be accomplished."

In the process of reviewing the Alaskan projects cited as examples of post-mining stream restoration by Commissioner Sullivan and PacRim, I asked a number of fisheries biologists and hydrologists who were involved in these projects if they believed that these projects demonstrate that restoring thousands of acres of strip mined salmon streams, aquifers and drainages was feasible. They all said no. They were also unaware of any example of where a salmon producing drainage has been removed by strip mining to depths of several hundred feet, and a new stream created on top of mine overburden.

Compensation for permanent loss of salmon production:

PacRim has proposed to construct a spawning channel and rearing ponds to replace salmon production from Chuitna tributaries lost due to mining during the 25 to 50 years before a new stream would be created. ADNR has cited salmon usage of USFS gravel pits adjacent to Granite Creek on the Kenai Peninsula and two Canadian spawning channels as confirmation that these methods could replace lost salmon production. However, we know that other Canadian spawning channels and all of the spawning channels that have been constructed in South Central Alaska in the last 30 years have failed over time. Similarly, other gravel pits such as the ADF&G's and ADOT's attempt to convert the Quartz Creek gravel pit on the Sterling Highway to salmon spawning and rearing habitat have failed. Most importantly, because of the

presence of invasive northern pike in the Chuitna drainage, any attempt to sustain salmon production by spawning channels and rearing ponds is unlikely to succeed. Pike thrive in these low gradient environments and have extirpated salmon and trout from all of the lakes, gravel pits (Cheney Lake in Anchorage) and slow moving streams pike have invaded in South Central Alaska.

Conclusion

I have not found any independent restoration experts, scientific studies or projects cited by ADNR and Pacrim that support the contention that reconstruction of a salmon stream with its associated drainage, confined and unconfined aquifers, wetlands, and other essential elements on top of 300 feet of mine overburden is feasible. Restoration of a strip mined salmon producing drainage would be exponentially more difficult than small scale projects to reroute a stream around a man made barrier, revegetate stream banks, or attempts to confine a unstable placer mined grayling stream to a single channel.

In considering standards for bonding mines such as Chuitna, legislators should keep in mind that all of the techniques cited by ADNR and Pacrim as examples of the feasibility of recreating salmon stream drainages were developed in the Pacific Northwest and British Colombia in an attempt to halt or reverse the continuing decline of anadromous salmon populations due to habitat loss. Billions of dollars have been spent in the U.S. and Canada with little success. If the projects cited by PacRim and ADNR as proof of the feasibility of re-creating a salmon stream worked, these methods would be used everywhere and salmon populations would not continue to decline. The problem is that from a salmon habitat perspective, the effect of permanent landscape changes such as the deep strip mining proposed for the Chuitna River drainage cannot be reversed.

Currently, ADNR has considerable discretion in setting bond amounts. It is important to recognize, if the state allows strip mining through a wild salmon stream at Chuitna, it will set state policy that will endure. So, in light of the fact that there is nothing to indicate that restoration of strip mined salmon drainages to pre-mining functions and values or that artificial maintenance of genetically unique runs is feasible, the Legislature should take a hard look at whether mining through salmon streams is a precedent the state should pursue. If so, there will need to be some very difficult discussions about how to put a value on the loss of a renewable resource – wild Alaska salmon – in perpetuity.

Thank you for the opportunity to comment.

Re: Testimony on the feasibility of reclamation for the proposed Chuitna coal mine, before the Alaska Senate Judiciary Committee on March 2, 2012

Fm: David M. Chambers, Ph.D., P. Geop.

Reclamation of a minesite is not restoration to its former function, but involves returning a minesite to a functional use after mining has been completed. The functional uses are typically things like wildlife habitat, grazing, and/or industrial use. The goals for reclamation functional use are, or have, always been aimed primarily at a surface use.

Recreating the subsurface hydrological regime that existed before mining would be extremely difficult, likely impossible, very expensive, and to my knowledge has never been the primary goal of any reclamation effort. Recreating the pre-mining hydrologic regime would be technically challenging at best, but more likely is not a viable option. At a minimum it would require a very detailed pre-mining data collection effort in order to understand the physical layout and function of the existing hydrologic (groundwater) regime. Where water moves and how fast it moves are functions that would have to be well understood before the groundwater strata are disturbed by mining. Some of the reclamation at Chuitna would involve attempting to restore up to 200 feet in thickness of potentially water-bearing strata.

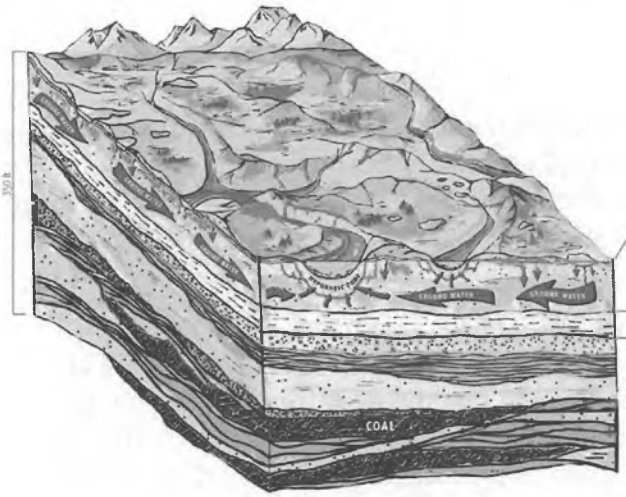
Complicating the restoration would be the Chuit and South Pit faults, and several anticlines (structural features) that have warped the underlying strata since its deposition. Faults can either be zones of high permeability that promote preferential flow of groundwater, or zones of low permeability that act as barriers to the transmission of groundwater. Mining through fault zones means that the groundwater hydrology must be thoroughly understood in order to have any chance of restoring groundwater flow patterns during reclamation. Similarly, anticlines and similar geomorphic structures will influence groundwater flow, and must be carefully mapped in order that restoration of pre-mining hydrologic effects might be attempted. It is not evident from the information presented in the pre-mining work[1] that these important hydrologic factors have been adequately examined.

If the original hydrology were to be adequately mapped in three dimensions, the flow patterns, temperature and water quality variations documented, getting similar materials back into these configurations would be very difficult. When waste material is mined, stockpiled, and then moved back into the mined out pit, there is a tendency for homogenization of the backfill material. From a hydrologic perspective the original strata will consist of zones that conduct water (aquifers), and zones that do not conduct water (aquitards). The aquitards are as important as the aquifers because they control the flow of groundwater. A normal pit backfill would tend to create a relatively uniform aquifer, with hydraulic conductivity that could be greater than or less than that of the original strata. Backfill could also negatively impact groundwater, and potentially surface water, quality.

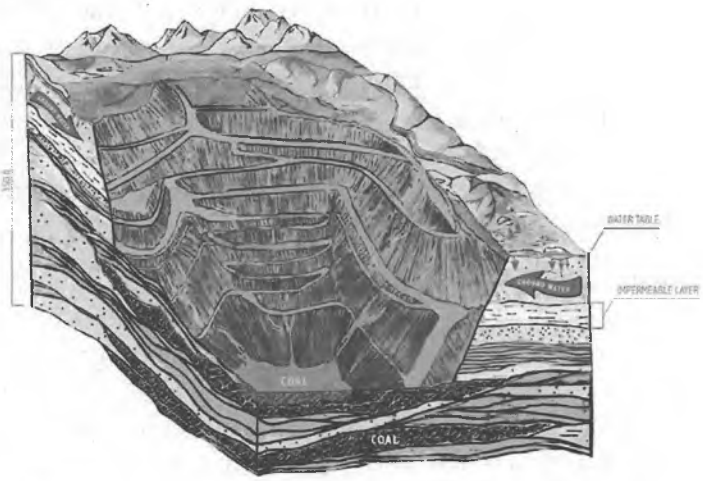
In order to recreate the original hydrologic regime, backfill material would need to be sorted, stored separately, and selectively replaced into the mined out areas. This sorting, with perhaps screening, and separate storage would be more expensive than traditional pit backfill methodology. Quality control of the backfill segregation and placement would also be a significant management issue. If backfilled material is not sorted, stored, and replaced to meet locational and hydrologic parameters, then the restored hydrologic system would function differently than the original.

[1] Chuitna Coal Project Geology Baseline Information, PacRim Coal, L.P., August, 2006

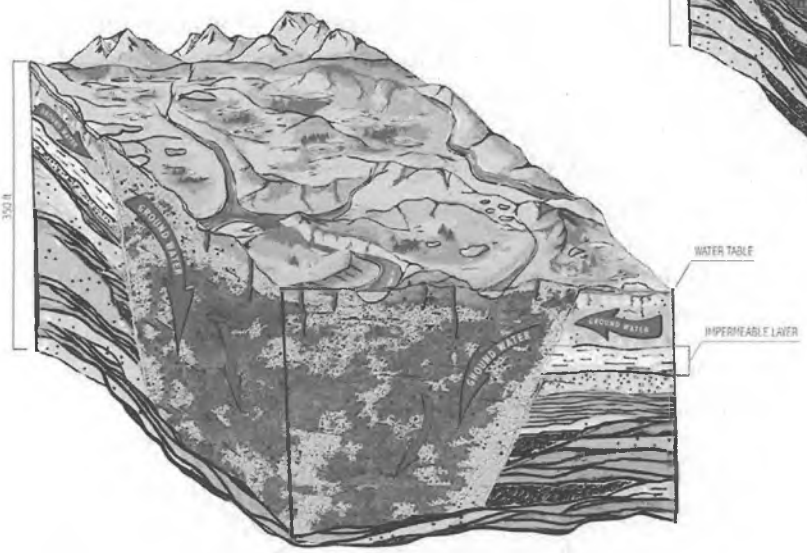
It is highly unlikely that the original hydrologic system could be restored. This is due to the disruption of the original strata due to mining that would cause a change in the physical character of the rock. There would be changes in rock size (therefore hydraulic conductivity), and changes in rock volume. The volume would increase on a unit basis due to breaking up the rock, but there might be a decrease in total volume due to the removal of the coal – coal layers that cannot be replaced physically or hydrologically.



Strip Mining - Before



Strip Mining - During



Strip Mining - After

Because of all of these complications – of adequately defining the existing hydrology; of sorting and storing the mined waste; and, of putting it back in the same hydrologic configuration as the original material – it is likely that the restored hydrologic regime would only be a rough approximation of the original. The significant increase in cost to provide only a rough approximation of what was there before explains why restoration of the original hydrologic regime at a minesite is not typically attempted.

#####

Dr. Tom Myers, researcher and consultant in hydrogeology and water resource specializing in groundwater modeling, hydrogeology, environmental forensics, regulatory compliance, water rights, NEPA analysis, and environmental and water policy.

- The current unique combination of groundwater storage, artesian pressure, horizontal and vertical conductivity, compaction and recharge cause the baseflow hydrograph that sustains streamflows during the low-flow periods of the year. The best available technology would dig up and remove the current layering and completely change the properties that control the flow through the backfill. Consequently, based on best available reclamation technology, it is not technologically feasible to restore water balances to pre-mining conditions.

  Download the full report: http://bit.ly/Juneau2012-Myers

Lance Trasky, fisheries habitat consultant with 37 years of experience as a fisheries and habitat biologist and as a Habitat and Restoration Division Regional Supervisor with the Alaska Department of Fish and Game.

- None of the examples provided by the Alaska Department of Natural Resources (ADNR) or PacRim demonstrate that reclamation is technologically feasible for streams and riparian corridors in the Chuitna watershed. The proposed project would remove 300 feet of overburden, mine the coal, then replace the overburden, in an attempt to build an entirely new stream and create a functioning stream ecosystem that supports anadromous salmon productivity similar to that which existed pre-mining. As none of the examples provided by ADNR or PacRim involved complete removal of an entire drainage with its associated salmon spawning stream, aquifers, wetlands, vegetation, and the subsequent creation of a new functioning stream on top of the mine overburden, no support is provided for the feasibility of reclamation of a coal strip mine in streams of the Chuitna watershed.

  Download the full report: http://bit.ly/Juneau2012-Trasky

John Talberth, Ph.D and Evan Branosky, Net Public Benefits of the Chuitna Coal Project

- Chuitna coal strip mine development could cost Alaska $2 billion in economic losses over the 25 year life of the mine based on the loss of intact freshwater and marine habitats including fish, flood control, water purification, subsistence resources, recreation and scenery.

- The social costs passed on to individuals could range between 193 and 604% of market price of the extracted coal, meaning the cost to Alaskans from the mining of the coal greatly exceeds the coals low value. A finding that corroborates the range published in existing literature.

Expert Comments and Report Summary
RE: The Proposed Chuitna Coal Strip Mine and the Petition to Designate Lands Unsuitable for Surface Coal Strip Mining

Dr. Margaret A. Palmer, Professor of Entomology and Biology at the University of Maryland

- Stream 2003" also called Middle Creek, will be completely destroyed. It will not be "impacted", but rather mining will go down hundreds of feet beneath it, completely removing the stream bed and any remnant of the stream for 11 miles. While stream reconstruction has been done successfully by re-grading and re-vegetating banks, or adding or removing debris to create habitat, no one has simply created a new stream where none exists. A new ditch can be dug where the old stream used to be, and can have the same curves and shape. But it will not have the exchange of surface and groundwater at the streambed, upwelling areas for fish to lay their eggs in, biodiversity of insects that headwater streams provide as food for fish, the purity of water and nutrients wetlands provided.

  Download the full report: http://bit.ly/Juneau2012-Palmer1

- [C]urrent and highly relevant science shows that the scientific technology and knowledge is not sufficient to reclaim salmon streams and riparian habitats post-mining in the Chuitna Watershed. Therefore if the mining proceeds, the damage done to streams and wetlands will be permanent – the damage is irreversible.

  Dr. Palmer's comments can be found at: http://bit.ly/Juneau2012-Palmer2

Mitchell Swanson, Geomorphologist and River Restoration Scientist

- "Constructing stream channels on reclaimed overburden alone is not the primary factor upon which to demonstrate success – one must somehow create specific watershed conditions for the stream channel to receive and move sediment, [and] recreate and retain habitat features and a stable morphology after construction."

- "...successful stream restoration examples from other locations [are] inappropriate for conditions in the Chuitna Watershed primarily because the cited examples all retained pre-project watershed conditions above the mined sites, which left the pre-project hydrology and sediment supply regimes intact...."

COMMENTS: Expert Comments on DNR denial of petition to designate the stream beds and riparian areas of the Chuitna Watershed as unsuitable for coal strip mining (ULP)

by The Center for Sustainable Economy, Mitchell Swanson, Lance Trasky, Dr. Tom Myers and Dr. Margaret Palmer

November 2011

Abstract: On October 24, 2011, the Alaska Department of Natural Resources denied the petition by the Chuitna Citizens Coalition and Cook Inletkeeper seeking to designate stream beds and riparian areas of the Chuitna watershed as unsuitable for coal strip mining (ULP). Relying on the word of PacRim Coal, DNR claims the re-creation of a vibrant, wild Alaskan salmon stream is "technically feasible." Independent, scientific experts disagree. A survey of existing literature failed to provide a single example of the successful re-creation of a wild salmon stream after it total removal. Below are the comments submitted to DNR regarding the denial of the petition.

REPORT: Net Public Benefits of the Chuitna Coal Project

by The Center for Sustainable Economy

September 2011

Abstract: Report confirming that the Chuitna Coal Project (CCP) could result in net losses to Alaskan's of over $2 billion over the life of the mine. The $2B figure includes all profits from lease fees, royalty fees, taxes, salaries and the expenditures for the project. In the end the CCP could cost up to 6 times more in economic losses than it creates in economic output.

REPORT: Economic Analysis of the Chuitna Watershed & Cook Inlet

by ECONorthwest

March 23, 2010

Abstract: The information provided in this report is intended to assist citizens and decision makers understand the magnitude of the economic value Alaskans currently enjoy and would place at risk from short- and long-term negative impacts associated with large-scale extractive development–such as the proposed Chuitna Coal Strip Mine.

Other Resources

REPORT: Report on Chuitna Coal Project Aquatic Studies and Fish and Wildlife Protection Plan
by Lance Trasky and Associates
Released August 17, 2009

Abstract: This report summarizes a review of seven environmental reports and documents developed for the proposed Chuitna Coal Project with a full analysis determining the quantity and quality of aquatic resource studies. Additionally, whether those studies provide for an adequate foundation for a successful fish and wildlife protection plan that will successfully protect aquatic resources and provide adequate information for the U. S. Army Corps to make the required determinations under the 404(b) (1) Guidelines.

REPORT: Chuitna Coal Mine Baseline Monitoring and Restoration Plan Review
by Dr. Mark S. Wipfli, Institute of Arctic Biology, University of Alaska Fairbanks
Released July 22, 2009

Abstract: This scientific review of the Chuitna Coal Mine baseline monitoring and restoration plan found critical elements missing from the Chuitna system baseline aquatic reports. The failure to address food webs, trophic linkages, interactions among upstream-downstream, stream-riparian, stream-marine, and basin-wide linkages (below and above ground) severely undermined the ability of the mining plans to protect ecosystem function during mining and to restore it post-mining. Additionally, the lack of consistent, long-term sampling fails to provide the needed estimate of annual biological variability or range of variability, and therefore does not provide a reference to which post-mining rehabilitation effects can be compared.

REPORT: Report on Chuitna Coal Project of PacRim Coal
by Margaret A. Palmer, Professor and Director, Chesapeake Biological Laboratory, University of Maryland
Released March 16, 2009

Abstract: This report, reviewing documents prepared for PacRim Coal's Chuitna Coal Project, focuses primarily on concerns with the mitigation plan for streams. Primary areas of concern include: 1) PacRim has not directly measured ecosystem functions, without these functional assessments they do not know what natural resource values are being lost, and thus how to develop a mitigation plan. 2) The approach proposed for replacing Stream 2003 (Middle Creek) is outside the realm of stream restoration practices. 3) Impacts to the watershed and the headwater streams from the mining activities will fundamentally alter

the chemical, hydrologic and sediment regimes which are master variables controlling the water quality and productivity downstream.

Letter from the CCC to Sean Parnell, Governor of Alaska
September 29, 2010

Abstract: Letter from the Chuitna Citizens Coalition asking the Governor to explain why the State of Alaska is referring to a proposed, but un-permitted, coal strip mine project with a clear and obvious implication that the project has a predetermined outcome, and that production – regardless of public input, the rule of law or scientific data – will invariably commence.

Parnell Administration Response to Citizen Letter and response from the Chuitna Citizens Coalition
December 2011

The Parnell Administration responded to comments from hundreds of Alaskans asking for common sense protection for the Chuitna River with a form letter full of misstatements and half-truths regarding the State's refusal to protect salmon from large scale coal strip mining.

&
COOK INLETKEEPER

Summary: PacRim Coal, a Delaware corporation funded by Texas millionaires is working to develop Alaska's largest coal strip mine on the western shores of Cook Inlet near the communities of Tyonek and Beluga.

The Chuitna coal strip mine:

- Sets a statewide precedent of mining through and completely removing salmon spawning and rearing habitat.
- **Dispite a complete lack of viable examples, PacRim Coal claims they can recreate a salmon stream from scratch.**
- Destroys a renewable resource, salmon, for short-term gain by extracting coal, a finite resource.

Chuitna Coal Mine

PacRim Coal Leases (Chuitna Coal)

Barrick Gold Coal Leases

Strip-Mine Area

Anadromous River (Important for salmon, trout, etc.)

Sources: Alaska Department of Natural Resources (2006); PacRim Coal (August 16, 2006)

INTRODUCTION

The Chuitna coal project would be the first strip mine in state history allowed to mine directly through 11 miles of salmon spawning and rearing habitat, completely removing the streambed, from bank to bank, to a depth of 350 feet. According to fisheries biologists and restoration experts, the level of impact PacRim proposes will make reclamation functionally impossible. Middle Creek, a tributary to the Chuit River (recognized as important to salmon by the Alaska Department of Fish and Game) will be destroyed and adjacent streams will have their water flows significantly altered.

There is **NO** law in Alaska that bans the wholesale removal of a salmon steam; the decision is left to the discretion of state agency personnel. If the Chuitna coal strip mine is permitted, a precedent will be set that has far reaching implications to all anadromous streams across the state – **if they can mine through the Chuitna Watershed tributaries they can mine through any salmon stream.**

CURRENT STATUS

October 24, 2011: Alaska Governor Sean Parnell and the Alaska Department of Natural Resources rejected the petition to protect the Chuit River and its triburaries from coal strip mining. **This decision puts all wild salmon in the Chuit River watershed in danger.**

What Experts Say About Chuitna

"Re-creating the complex three-dimensional diversity of interconnected underground sediments in salmon habitat, such as Middle Creek, would be impossible."

Dr. Mark Wipfli, avssociate professor with the University of Alaska in Fairbanks conducting research in aquatic-riparian interactions, freshwater foodwebs, and understanding how riparian forests affect aquatic productivity.

"An extensive search of scientific literature, and discussions with stream restoration and in-stream flow experts did not yield a single documented example of strip-mined salmon habitat being successfully restored."

Lance Trasky, Former ADF&G Fisheries and Habitat Biologist with over 30 years experience in fisheries research.

"PacRim's reclamation plan is based on digging a "new stream" to replicate the physical appearance of the original. There is no evidence that simply restoring the shape of a channel will bring back salmon runs, riparian corridors or other essential biological functions. Past stream restoration projects involving channel modifications with much less damage have been unsuccessful, making PacRim's plans a grand experiment with a stream that produces a significant portion of Chuitna's salmon."

Dr. Margaret Palmer, Professor of Entomology and Biology at the University of Maryland with over 25 years experience in stream ecology and restoration.

"Only God would be capable of reproducing a viable 11 miles of salmon stream and all its fixings, and it might even take Him some time."

Dr. Jim Rearden organized the wildlife department at the University of Alaska Fairbanks in 1950 and taught as head of that department for four years. He has been an area biologist for commercial fisheries for the Alaska Department of Fish and Game in Cook Inlet, served on the old Board of Fish and Game and later on the Board of Game and was a member of the National Advisory Committee on Oceans and Atmosphere. He was outdoors editor of Alaska magazine for 20 years and has written more than 500 magazine stories and 27 books on Alaska subjects.

"Strip mining the streams and their contributing watersheds significantly changes how the watershed converts rainfall into surface runoff, and how, when and if sediment is dislodged by erosion and transported to and within the stream. It is simply not feasible to re-create these characteristics after destroying soil and vegetation cover that were formed and evolved over thousands of years."

Mitchell Swanson, Geomorphologist and River Restoration Scientist

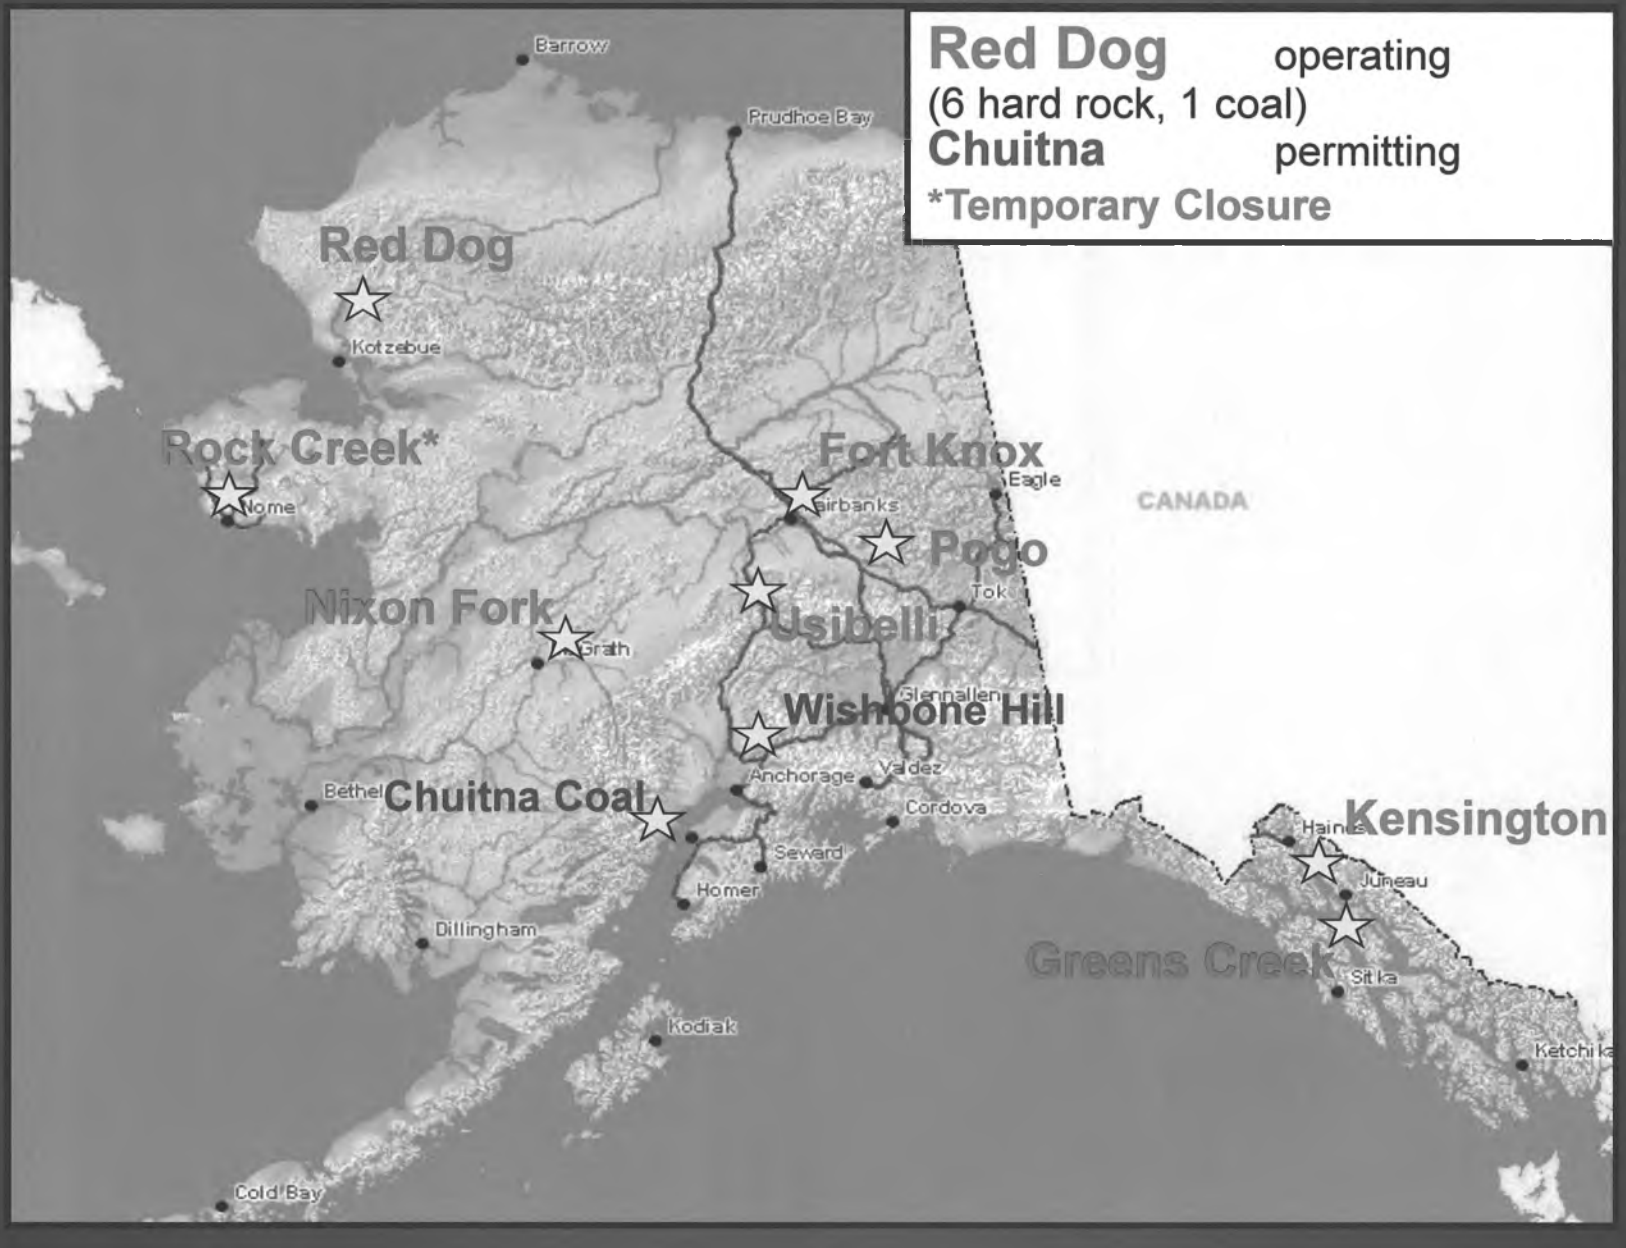
Overview: Bonding Requirements for Major Mine Projects

Senate Judiciary Committee Hearing

March 2, 2012

Tom Crafford, Director
Alaska Department of Natural Resources
Office of Project Management and Permitting

Large mining projects in Alaska



A Brief(!) Mine Permitting Primer

No Single Permit to Mine: there are many permits & authorizations

STATE

- Plan of Operations (DNR)
- Reclamation and Bonding (DNR)
- Waste Management Permits and Bonding (ADEC)
- CWA Section 402 APDES Water Discharge Permit
- Certification of ACOE Permits (ADEC)
- Sewage Treatment System Approval (ADEC)
- Air Quality Permits (ADEC)
- Fish Habitat and Fishway Permits (ADF&G)
- Water Rights (DNR)
- Right of Way/Access (DNR/DOT)
- Tidelands Leases (DNR)
- Dam Safety Certification (DNR)
- Cultural Resource Protection (DNR)
- Monitoring Plan (Surface/Groundwater/Wildlife) (DNR/DEC)

FEDERAL

- US EPA Air Quality Permit review
- US EPA Safe Drinking Water Act (UIC Permit)
- US ACOE Section 404 Dredge and Fill Permit
- US ACOE Section 10 Rivers and Harbors Act
- US ACOE Section 106 Historical and Cultural Resources Protection
- NMFS Threatened and Endangered Species Act Consultation
- NMFS Marine Mammal Protection Act
- NMFS Essential Fish Habitat
- NMFS Fish and Wildlife Coordination Act
- USFWS Threatened and Endangered Species Act Consultation
- USFWS Bald Eagle Protection Act Clearance
- USFWS Migratory Bird Protection
- USFWS Fish and Wildlife Coordination Act

(These are only some of the authorizations required)

State Agencies

(LARGE MINE PERMITTING TEAM)

- Dept of Natural Resources
  --Lead State agency for coordination: AS 27.05.010(b)
- Dept of Environmental Conservation
- Dept of Fish and Game
- Dept of Health & Social Services
- Dept of Law
- Dept of Transportation & Public Facilities
- Dept of Commerce, Community and Economic Development

Federal Agencies

- US Environmental Protection Agency
- US Army Corps of Engineers
- US Fish and Wildlife Service
- National Marine Fisheries Service

Federal Land Managers

- Bureau of Land Management
- US Forest Service
- National Park Service
- US Fish and Wildlife Service

State Large Mine Permitting Team

- Coordinates review of applications and numerous State permit requirements
- Reviews, analyzes, and evaluates complex technical documents for adequacy and soundness
- Benefits from multi-disciplinary expertise of team of experienced professionals (geologists, hydrologists, mining/civil/environmental engineers, biologists, environmental scientists)
- If the Team does not have the expertise, it can hire additional experts.
- Team members conduct mine inspections and evaluate permit updates during operations.
- The Team is involved from pre-permitting to post-closure.

National Environmental Policy Act (NEPA) Process for an Environmental Impact Statement

A means for considering and evaluating alternatives

Not a permit

- Triggered by major federal action (Notice of Intent)
- Contents:
  - proposed project, purpose & need, and project alternatives (must include No Action alternative)
  - description of the affected environment
  - analysis of environmental consequences of proposed project and alternatives
- Designation of Lead Federal Agency & selection of 3rd party contractor to mange the EIS
- Multiple Public Notice and Comment Requirements
- State participates as a Cooperating Agency and works to dovetail its permitting processes with the EIS timetable and public notice requirements

Baseline Studies

- Surface Water Quality & Quantity
- Groundwater Quality & Quantity
- Aquatic Life (Includes Marine & Freshwater Fish, Invertebrates, etc.)
- Wildlife
- Wetlands
- Socioeconomics
- Subsistence
- Traditional Ecological Knowledge
- Cultural Resources
- Air Quality
- Meteorology
- Health Impact Assessment
- Visual Resources
- Noise

State and federal agencies consult in advance with project applicants to help ensure the right information is collected

Monitoring Plans & Environmental Audits

- Air Qual, Water Qual, Fish & Wildlife are monitored according to approved plan
- Environmental Audits on 5 year schedule tied to re-crafting & reissuance of permits
- All environmental systems audited
- Audits evaluate Agencies as well as operations
- Audits by 3rd party experts
- Financial Assurances revisited and recalculated based on Audit results

Summary

- Many permits required, many state/federal agencies involved
- Experienced agency professionals involved in permitting and regulation
- Third-party experts utilized if agencies don't have the expertise
- Comprehensive analysis of potential environmental, socioeconomic, and health impacts for each project
- Air, Water, Fish & Wildlife Monitoring required
- Financial assurances are required and regularly updated

Financial Assurances
i.e., Bonding

Underlying Philosophy

- At no time is the financial assurance to be less than the amount required by the State to complete reclamation
- The bond amount can be increased any time the mine is shown to have inadequate financial assurance.

Authorities

- Reclamation Bonding is required in Alaska (AS 27.19) for mining projects
  - State reclamation standards apply to state, federal, municipal, and private lands and waters subject to mining
  - The bond is based on a Reclamation Plan that must be approved by the DNR prior to mining (AS 27.19.030)
  - DEC has separate bonding requirements that can be included with the DNR into a single bond.

Reclamation Standard (AS 29.19.020)

"A mining operation shall be conducted in a manner that prevents unnecessary and undue degradation of land and water resources, and the mining operation shall be reclaimed as contemporaneously as practicable with the mining operation to leave the site in a **stable condition**."

Reclamation Performance Standards (11 AAC 97.200-240)

- Return waterborne soil erosion to pre-mining levels in one year.
- Achieve revegetation, where feasible, in five years without reseeding or fertilizer
- Topsoil is to be salvaged, stockpiled and protected for later use in reclamation
- Surface contours are to be made conducive to natural revegetation
- Site shall be reclaimed such that it retains sufficient moisture for natural revegetation
- **Stream channels disturbed need to be reestablished in a stable condition or location**
- Pit and quarry walls and subsidence features need to be made stable.
- Buildings and structures are to be removed unless authorized to stay.
- Scrap iron, equipment, tools, piping, hardware, chemicals, fuels, waste, and general construction debris are to be removed or properly disposed.
- Facilities associated with heap leach facilities are to be reclaimed.
- Underground openings are to be sealed after closure.
- "A miner shall reclaim a mined area that has potential to generate acid rock drainage (acid mine drainage) in a manner that prevents the generation of acid rock drainage or prevents the offsite discharge of acid rock drainage."

Reclamation Plan General Elements

11 AAC 97.310

- Property descriptions and maps
- Description of mining plan and schedule
- Reclamation measures for treatment of:
  - Topsoil and revegetation
  - Tailings ponds, reservoirs, dumps, pits, etc.
  - Stream replacement
  - Roads, airstrips, and access
  - Buildings

Bonding Statute (AS 27.19.040)

- Bond amount not to exceed an amount reasonably necessary to ensure performance of the reclamation plan
- DNR Commissioner shall establish the bond amount
- A cooperative management agreement with the Federal agencies (land manager) or another State agency is allowed

DEC Statute AS46.03.100(f) for Waste Management and Disposal

- Financial assurance required for closure and monitoring:
  - Of a solid waste facility with chemical treatment of ores (tailings and rock dumps)
  - Of a facility with potential to generate or generates Acid Rock Drainage

Bond Calculation Elements

- Calculation needs to agree with Reclamation and Closure Plan and include inflation.
- Rental Equipment to be used at current rates – quotes required
- Labor with burden at little Davis-Bacon rates
- Mob-Demob estimated for the site (not % of directs)
- Salvage value of buildings and equipment cannot be utilized
- Includes water treatment and post closure monitoring
- Indirect costs include: engineering redesign, contingency, contractor profit, agency administration costs, etc.

Updates to the Financial Assurance Package

- At least every 5 years when permits are renewed
- After an environmental audit
- Upon significant mine design changes that would affect the bond calculation
- Major changes in prices of fuel or consumables
- Anytime it is believed that the project is under-bonded

Bonding Instruments – Large Mines
(11 AAC 97.4)

- Performance Bond to be placed with DNR
  - Corporate Surety Bond
  - Personal Bond accompanied by:
    - Letter of Credit
    - Certificate of Deposit
    - Deposit of cash
    - Deposit of gold bullion (25% greater than bond am't)
  - General Performance Bond
  - Payments to the Mine Reclamation Trust Fund (AS 37.14.800)
- Interest earned may stay with the bond

Financial assurances are based on a detailed engineering analysis

Alaska Dept. of Fish & Game specific roles/authorities

Title 16 Permits

Fishway & Fish Habitat

Issued by ADFG

Div. of Habitat

- AS 16.05.841: Fishway Act

For activities within or across a stream used by fish that could represent an impediment to the efficient passage of fish. e.g., culverts; water withdrawals; stream realignments or diversion; dams; low-water crossings; and construction, placement, deposition, or removal of any material or structure below ordinary high water

- AS 16.05.871: Anadromous Fish Act

All activities within or across a specified anadromous waterbody and all instream activities affecting a specified anadromous waterbody require approval from the OHMP, including construction; road crossings; gravel removal; mining; water withdrawals; the use of vehicles or equipment in the waterway; stream realignment or diversion; bank stabilization; blasting; and the placement, excavation, deposition, or removal of any material.

ADF&G Project Permitting

- Activities associated with large project development that would typically require permits from the ADF&G include:
  - Fish Habitat Permits for:
    - Construction of fish barriers (i.e., dams);
    - Flow reduction;
    - Bridges, culverts, buried pipelines, etc.;
    - Water withdrawal and intake structures;
    - Stream re-alignment; and
    - Instream mitigation projects.
  - Fish Resource Permits from the Sport Fish and Commercial Fish Divisions associated with project monitoring.

Avoid - Minimize - Mitigate

- Examples of mitigation projects that may be appropriate for large projects include:
  - Construction of wetland complexes;
  - Fish habitat improvement projects
  - Riparian planting of native species;
  - Clean-up of old abandoned sites in the area; and
  - Bank stabilization.

Coal Specific Requirements

per Alaska Surface Coal Mining Control and Reclamation Act (ASCMCRA)
AS 27.21 & 11 AAC 90

Fish and Wildlife Protection Plan

11 AAC 90.081

- (a) Each application must include a plan to prevent or minimize disturbance and adverse impacts on fish, wildlife, and related environmental values in accordance with 11 AAC 90.423, including impact control measures, management techniques, and monitoring methods to protect, enhance, or mitigate the following, if they can reasonably be expected to be affected by the proposed activities:
  - (2) important species, as determined by the commissioner, including fish and game of economic, recreational, or subsistence importance; eagles, migratory birds, other animals protected by state or federal law, and their habitats; and
  - (3) habitats of unusually high value for fish or wildlife.

- (b) Except as provided in (c) of this section, the plan must include protective measures to be used during the active mining phase of the operation, and enhancement measures to be used during the reclamation and postmining phases of the operation to develop aquatic and terrestrial habitats.

Coal Regulatory Program consults with ADF&G Habitat to accomplish the above

Reclamation Bonding

- The ASCMCRA requires under 11 AAC 90.201 - 213 that, as a prerequisite for obtaining a coal mining permit, a person must post a reclamation bond to ensure that the regulatory authority will have funds to reclaim the site if the permittee fails to complete the reclamation plan approved in the permit.
- Reclamation performance bonds are posted to cover all operations during the term of the permit. Prior to permit issuance, the permittee must post a bond to cover one of the following areas:
    - The entire permit area;
    - The initial area of land to be affected under a cumulative bond schedule; or
    - The initial area of land to be affected under an incremental bond schedule.

Bond Amount

- Minimum bond amount based on regulatory authority's independent analysis of the amount that would be necessary for a third party to complete the reclamation plan in the event of bond forfeiture.
- The bond amount generally reflects reclamation costs at the projected point of maximum reclamation liability (usually the point of maximum disturbance) within the permit area or an initial increment of that area.
- Bond updated prior to additional disturbance or when cost of reclamation increases

Bond Release

- When all reclamation requirements of the approved permit and regulatory program have been met, the regulatory authority may release the reclamation bond.
- Permittee may apply for release of the bond on all or part of the permit or increment as reclamation is completed. (Encourages concurrent reclamation)
- Regulations recognize three discrete phases of reclamation for purposes of bond release.
  - Phase I – Backfilling, grading, and drainage control (60% of total bond)
  - Phase II – Replacement of topsoil and the establishment of vegetation (~30% of total bond)
  - Phase III – Completion of all surface coal mining and reclamation activities

End of Presentation

Questions?

Coal Regulatory Program
Additional Informational Slides

Additional Coal Regulatory Info

- One of the purposes of the Alaska Surface Coal Mining and Control Act (AS 27.21) is to assure that reclamation of land on which surface coal mining takes place is accomplished as contemporaneously as practicable with the surface coal mining activity, and to assure that the rights of surface landowners and other persons with an interest in the land are protected.
- Alaska Statute 27.21.160 requires that, prior to permit issuance, the applicant file a performance bond, sufficient to cover the cost of reclamation in accordance with the approved reclamation plan.

Additional Coal Regulatory Info (Cont.)

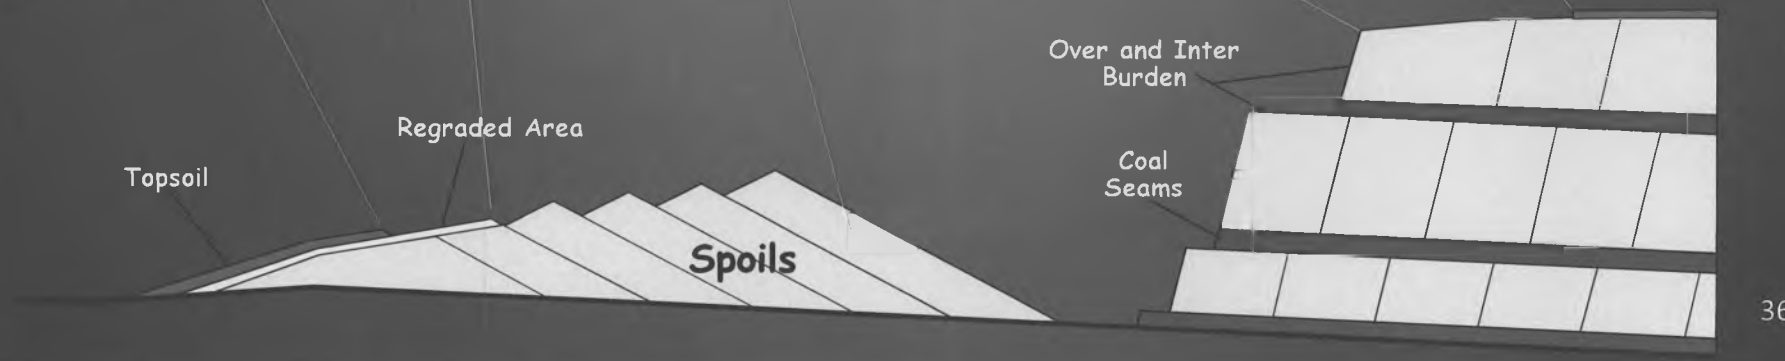
- 11 AAC 90.083. RECLAMATION PLAN GENERAL REQUIREMENTS. (a) Each application must contain a plan for reclamation of the proposed permit area showing how the applicant will comply with 11 AAC 90.301 - 11 AAC 90.501. The plan must include, at a minimum, all information required under 11 AAC 90.083 - 11 AAC 90.101.

Additional Coal Regulatory Info (Cont.)

- The reclamation plan must contain a detailed description of the intended post mining land use, including how the proposed post mining land use will be achieved.
- The description must be accompanied by comments concerning the proposed use by the legal or equitable owner of record of the surface of the proposed permit area and state and local government agencies which would have to initiate, implement, approve, or authorize the proposed land use following reclamation.

Reclamation Practices

Topsoil Replaced/ Revegitation	Regrade	Backfilling	Active Pit	Prestripping/ Topsoil removal	Direction of Mining →



First steps: Environmental resource Information (baseline Studies)

- Hydrology and geology
  - (11 AAC 90.043-045)
- Ground water information
  - (11 AAC 90.047)
- Surface water information
  - (11 AAC 90.049)
- Alternative water supply information
  - (11 AAC 90.051)

11 AAC 90.043. HYDROLOGY AND GEOLOGY

(a) Each application must describe the geology, hydrology, and water quality and quantity of all land within the permit area, adjacent area, and the general area. The description must include information on the characteristics of all surface and ground water within the general area and any other water that will flow into or receive discharge of water from the general area.

(b) All water quality analyses performed to meet the requirements of this section, 11 AAC 90.047, or 11 AAC 90.049 [,] must be conducted according to the methodology in *Standard Methods for the Examination of Water and Wastewater, 21st edition,* adopted by reference in 11 AAC 90.001(c), or the methodology in 40 C.F.R. Part 136 and 40 C.F.R. Part 434, adopted by reference in 11 AAC 90.001(b).

(c) Information on hydrology, water quality and quantity, and geology related to hydrology of the area outside the proposed permit area and within the general area will be provided by the commissioner to the extent that the data are available from an appropriate federal or state agency. The permit will not be approved without this information unless the commissioner determines that the information is not necessary to determine the impact the proposed operation will have on environmental and other resources within the permit area and general area.

Sec. 38.05.005. Division of lands.

The commissioner shall control and supervise the division of lands created and established under the Department of Natural Resources. The director has administrative powers and other delegated duties, as prescribed by law or regulation.

Sec. 38.05.010. Appointment of director.

The commissioner shall appoint a director. The director is the executive officer of the division of lands.

Sec. 38.05.015. Director serves at pleasure of commissioner.

The director serves at the pleasure of the commissioner.

Sec. 38.05.020. Authority and duties of the commissioner.

(a) The commissioner shall supervise the administration of the division of lands.

(b) The commissioner may

(1) establish reasonable procedures and adopt reasonable regulations necessary to carry out this chapter and, whenever necessary, issue directives or orders to the director to carry out specific functions and duties; regulations adopted by the commissioner shall be adopted under AS 44.62 (Administrative Procedure Act); orders by the commissioner classifying land, issued after January 3, 1959, are not required to be adopted under AS 44.62 (Administrative Procedure Act);

(2) enter into agreements considered necessary to carry out the purposes of this chapter, including agreements with federal and state agencies;

(3) review any order or action of the director;

(4) exercise the powers and do the acts necessary to carry out the provisions and objectives of this chapter;

(5) notwithstanding the provisions of any other section of this chapter, grant an extension of the time within which payments due on any exploration license, lease, or sale of state land, minerals, or materials may be made, including payment of rental and royalties, on a finding that compliance with the requirements is or was prevented by reason of war, riots, or acts of God;

(6) classify tracts for agricultural uses;

(7) after consulting with the Board of Agriculture and Conservation (AS 03.09.010), waive, postpone, or otherwise modify the development requirements of a contract for the sale of agricultural land if

(A) the land is inaccessible by road; or

(B) transportation, marketing, and development costs render the required development uneconomic;

(8) reconvey or relinquish land or an interest in land to the federal government if

(A) the land is described in an amended application for an allotment under 43 U.S.C. 1617; and

(B) the reconveyance or relinquishment is

(i) for the purposes provided in 43 U.S.C. 1617; and

(ii) in the best interests of the state;

(9) lead and coordinate all matters relating to the state's review and authorization of resource development projects;

(10) exercise the powers and do the acts necessary to carry out the provisions and objectives of AS 43.90 that relate to this chapter.

Sec. 38.05.025. Continuing regulations, agreements, etc.

All rules, regulations, procedures, funds, contracts, and agreements established or entered into by the Department of Lands before May 2, 1959, under the authority of ch. 126, SLA 1953, as amended, and ch. 184, SLA 1957, are continued, and are subject to amendment by the commissioner except where inconsistent with this chapter.

Sec. 38.05.027. Cooperative resource management or development agreements.

(a) Consistent with the authority of the commissioner under law, the commissioner, after determining that the agreement is in the best interests of the public and the state, may enter into cooperative resource management or development agreements with the federal government, a state agency, a village or municipality, or a person. Specific guidelines to protect the state and public interest shall be established, if necessary, by the commissioner before entering into an agreement under this section.

(b) A summary of agreements entered into under this section shall be submitted to the legislature within five days of the beginning of each regular session.

Sec. 38.05.030. Exceptions.

(a) *[Repealed, Sec. 88 ch 152 SLA 1984].*

11 AAC 82.600. Bonding

(a) Every mineral lease and permit may contain a provision requiring that an acceptable bond in the minimum amount required by the section of this title dealing with the specific mineral involved be filed before beginning any permit or lease operation.

(b) The amount of the bond is the amount determined by the commissioner to be justified by the nature of the surface, its uses and improvements in the vicinity of the lands, and the degree of the risks involved in the types of operations to be carried on under the lease or permit.

(c) Every bond must be either

(1) a corporate surety bond with a corporate surety qualified to do business as such in Alaska; or

(2) a personal bond accompanied by a deposit of cash in the amount of the bond, or negotiable federal or Alaska securities in a sum equal at par value to the amount of the bond together with a sufficient conveyance to the commissioner of full authority to sell the securities in the event of default in the performance of the conditions of the bond.

(d) Every bond must be conditioned upon faithful compliance with all the provisions of the lease or permit.

(e) The principal on any bond must be the lessee of record unless the lease is subject to an operating agreement which has been approved by the commissioner, in which case the operator may be the principal in place of the lessee of record.

(f) Bonds must be furnished on forms provided by the department.

Authority: AS 38.05.020

AS 38.05.145(a)

11 AAC 82.605. Assignments

(a) Leases, oil and gas exploration licenses, permits, or interests in leases, oil and gas exploration licenses, or permits, may, with the approval of the commissioner, be assigned or subleased as provided in this section to a person or persons qualified to hold a lease.

(b) No transfer of an interest in a lease, oil and gas exploration license, or permit, including assignments of working or royalty interest, operating agreements, and subleases, is binding upon the state unless approved by the commissioner. The transferor is liable for all obligations under the lease or oil and gas exploration license accruing before the approval of the transfer. When transfers of overriding royalty are made after the initial separation from the working interest of the lease, executed or image copies of these transfers must be transmitted to the department without charge for filing in the appropriate case file. However, the commissioner will take no action and official

status records will not be posted to reflect these transfers.

(c) The commissioner will approve a transfer of an undivided interest in a lease, oil and gas exploration license, or permit unless the commissioner makes a written finding that the transfer would adversely affect the interests of the state or the application does not comply with applicable regulations. The commissioner will state the reasons for denial of an application in the finding.

(d) The commissioner will disapprove a transfer of a divided interest in a lease, oil and gas exploration license, or permit if the transfer covers only a portion of the lease, oil and gas exploration license, or permit or a separate and distinct zone or geological horizon, unless the transfer would not adversely affect the interests of the state, the transfer complies with applicable regulations, and the

(1) applicant demonstrates to the commissioner's satisfaction that the proposed transfer of a divided interest is reasonably necessary to accomplish exploration of the area subject to an oil and gas exploration license and exploration or development of the lease or permit;

(2) lease is committed to a unit agreement approved by the commissioner;

(3) lease is allocated production within a participating area approved by the commissioner; or

(4) lease or area subject to an oil and gas exploration license has an oil, gas, or geothermal well certified as capable of production in paying quantities.

(e) The commissioner will make a written finding stating the reasons for disapproval of a transfer of a divided interest under (d) of this section.

(f) When a corporate merger or consolidation occurs, transferring all of the interests of one corporation to another, the surviving or new corporation shall submit to the department

(1) a signed, notarized statement by an officer of the surviving or new corporation describing the transfer of interests;

(2) a certificate of merger or certificate of consolidation issued by the State of Alaska, Department of Commerce;

(3) applications for approval of assignments transferring all interests to the surviving or new corporation, in compliance with 11 AAC 82.615;

(4) if not filed on a form provided by the department, the request for approval must contain the same information for each interest transferred as is required on the assignment application form;

(5) a filing fee is required for each affected lease or oil and gas exploration license; and

(6) the surviving or new corporation must comply with the statement of qualifications required by 11 AAC 82.205.

11 AAC 82.610. Permits or leases segregated by partial assignment

If a transfer is made of all or a part of the lessee's or permittee's working interest in a portion of the acreage in a lease or permit, the acreage as to which the transfer is made will, at the option of the commissioner, and may, upon the request of the transferee and with the approval of the commissioner, be segregated into a separate and distinct lease having the same effective date as the original lease or permit.

History: Eff. 9/5/74, Register 51; am 7/22/79, Register 71

Authority: AS 38.05.020

11 AAC 82.615. Application for approval of assignment

(a) An application for approval of assignment or transfer must

(1) be filed in triplicate and comply with 11 AAC 88.105;

(2) be filed within 90 days after the date of final signing of the transfer by the assignor; however, an assignment not filed within 90 days may be approved, at the discretion of the commissioner, where no intervening interest is filed;

(3) unless filed on forms provided by the department, be accompanied by a request for approval of assignment essentially like that used in the appropriate department form; and

(4) be accompanied by a bond, if required by the commissioner, which clearly binds the assignee and the assignee's surety to any unperformed obligations of the assignor.

(b) If the transfer is solely an assignment by the lessee or licensee of a state-issued oil and gas exploration license of record of all or a divided or undivided portion of the record title to a lease or oil and gas exploration license, forms provided by the department or facsimile must be used.

(c) Each application for approval of assignment must provide for the transfer of interest from a single assignor to a single assignee. The department form may not be altered to provide for any type of multiple party assignments.

(d) If a single instrument affects two or more leases, oil and gas exploration licenses, or permits, the applicant shall file three signed counterparts of the instrument and sufficient exact image copies of it to provide one copy of each lease, oil and gas exploration license, or permit covered by the application. A separate filing fee is required for each lease, oil and gas exploration license, or

permit affected.

(e) The assignee shall also file or refer to the current statement of qualifications required by 11 AAC 82.205.

(f) Ownership interests must be expressed in percentages with any fraction of a percent expressed in decimals with five or fewer digits to the right of the decimal point. All ownership percentages in the lease, when added, must total 100 percent.

(g) Filing fees will be assessed in accordance with 11 AAC 05.010 for each application for approval of assignments.

Kensington Gold Mine Project

Reclamation Plan Approval

DEPARTMENT OF NATURAL RESOURCES
Division of Mining, Land and Water

June 3, 2005

The Alaska Department of Natural Resources, Division of Mining, Land and Water (DNR), in accordance with and subject to Alaska Statutes 27.19 (Reclamation) and 38.05 (Alaska Land Act) and the Alaska Administrative Code, Title 11 and Chapter 97 (Mining Reclamation), approves the Reclamation Plan for the Kensington Gold Mine Project submitted by:

Coeur Alaska, Inc
3031 Clinton Dr. Suite 202
Juneau, AK 99801

The Reclamation Plan is considered to consist of Appendix 1 of the Kensington Gold Project Final Plan of Operations, dated May 2005. The Reclamation Plan applies to both private lands and lands managed by the United States Forest Service (USFS).

Effective dates of this plan approval are **June 3, 2005 through June 3, 2011**, unless sooner revoked for cause; however, Coeur Alaska's obligations under the terms and conditions of this plan approval shall continue, unless sooner terminated in accordance with the provisions of this plan approval, until completion of all requirements under and pursuant to the Plan of Operations.

This plan approval does not constitute certification of any property right or land status claimed by the applicant.

The Reclamation Plan was found to be complete and is approved by DNR with the following conditions:

Financial Assurance. This Reclamation Plan Approval does not take effect until Coeur Alaska submits a financial assurance in a form and substance approved by DNR and the USFS. The financial assurance shall not be released until all affected areas have been reclaimed and are approved by the Authorized Officer and the USFS, and all other terms of this plan of operations are met. Modifications to this Reclamation Plan may, at DNR's discretion, require bond review and update. The total financial assurance of **$7,354,015.00** has been accepted for the Kensington Gold Project, with the conditions that the financial assurance amount be reviewed prior to construction of the Tailings Storage Facility dam to determine if premature closure of the dam at Stage I or Stage II would change the closure cost estimate, and also that the financial assurance be reviewed as part of the Reclamation Plan update scheduled for 2008.

Terms of this Plan Approval. The Terms and Conditions contained within the Reclamation Plan (May 2005) are hereby included as stipulations of this Plan Approval. If there is a difference between the Reclamation Plan as submitted and the terms contained within this Plan Approval, the terms contained within this Plan Approval take precedence.

The Authorized Officer for DNR is the Director of the Division of Mining, Land and Water or his designee. The Authorized Officer may be contacted at 550 West 7th Avenue, Suite 900D, Anchorage, AK 99501-3577, telephone (907) 269-8621, and fax (907) 269-8930 or at tom_crafford@dnr.state.ak.us. Coeur Alaska will be notified of changes to the authorized officer as needed.

Monitoring Plan. Monitoring results obtained during a reporting period shall be summarized and reported to the Authorized Officer quarterly, on or before the 15th day of the month following the quarter, in an electronic format acceptable to DNR. Electronic copies should also be sent to ADNR (Carl Schrader at Carl_Schrader@dnr.state.ak.us). Amendments to this distribution list will be provided to Coeur Alaska as needed.

As-Built Maps. Coeur Alaska shall submit to ADNR an annual "as built" map illustrating the current development of all project facilities. The plan maps shall show cleared and grubbed areas; growth medium stockpiles; roads; waste rock dump development; material site development; and facility construction. Maps shall be both in a digital format and hard copy at 1"=500' or other appropriate scale necessary to review the development of individual facilities.

Inspection and Entry. Coeur Alaska shall permit authorized representatives of DNR and DEC to enter into and upon the area and facilities covered under this plan approval at all reasonable times without notice for the purpose of inspecting the area and activities covered under this plan approval. Said inspections shall be subject to such safety and security procedures as Coeur Alaska may from time to time adopt.

At any time upon DNR's written request, Coeur Alaska shall promptly make any and all records, documents, or other information required to be kept or maintained by law, regulation, ordinance or this plan approval available to DNR for inspection and copying as reasonably required by DNR to determine if Coeur Alaska is in compliance with local, state and federal laws applicable to the operations authorized under this plan approval.

Environmental Audit. A third-party environmental audit shall be conducted every six years (and prior to final closure, unless otherwise approved by DNR and the USFS). This audit will include all aspects of the project, including access roads, material sites, waste rock storage facilities, and the tailings storage facility. The third-party contractor should be mutually agreed on by the State, USFS, and Coeur Alaska, but in the event that agreement cannot be reached, the State and USFS retains the final selection decision. Costs for the third-party environmental audit shall be borne by

Coeur Alaska. The environmental audit shall include an evaluation of the adequacy of the reclamation financial sureties.

Violations. This authorization is revocable immediately upon violation of any of its terms, conditions, stipulations, or upon failure to comply with any other applicable laws, statutes and regulations (federal and State).

Assignment. This plan approval may be transferred or assigned with prior written approval from DNR. DNR will only disapprove a transfer with good cause and will evaluate whether the proposed assignee (1) is qualified to acquire all other permits and authorizations necessary to conduct operations under the plan; (2) is on notice of default or subject to an enforcement action by any state agency on any lease, reclamation bond, or other permit within the state. Any assignee must commit in writing to be bound by this plan approval to the same extent as Coeur Alaska, and must provide to DNR all proofs of bonds, or undertakings required by this plan approval. Transfer of this plan approval may, at DNR's discretion, require bond review and update.

Other Authorizations. The issuance of this authorization does not alleviate the necessity of Coeur Alaska to obtain authorizations required by other agencies for this activity.

Valid Existing Rights. This authorization is subject to all valid existing rights in and to the land under this authorization. The State of Alaska makes no representations or warranties whatsoever, either expressed or implied, as to the existence, number, or nature of such valid existing rights.

Change of Address. Any change of address must be submitted in writing to the Authorized Officer.

Modifications. Any request for modification of the plan of operations and any other affected permits or authorizations must be made by written application to DNR. Amendments to the Reclamation Plan may, at the discretion of DNR, require bond review and update.

Statutes and Regulations. This plan approval is subject to all applicable state and federal statutes, including state, federal, and any local statutes and ordinances in effect on the effective date of this plan approval, new statutes, regulations, and

ordinances enacted or promulgated after said effective date, and changes to existing statutes and regulations made after the effective date, to the extent constitutionally permissible.

Severability. If any clause or provision herein contained shall be adjudicated to be invalid, it shall not affect the validity or effect of any other clause or provision of this plan approval, nor constitute any cause of action in favor of either Coeur Alaska or DNR as against the other.

Commencement of permitted activities will be considered an acceptance by Coeur Alaska of these special stipulations.

STATE OF ALASKA
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF MINING, LAND AND WATER

MINING RECLAMATION BOND (PERSONAL BOND)

The Miner, Abacus Alaska, Inc., a corporation existing under the laws of the State of Alaska, whose address is c/o CBR Gold Corp, Suite 220, 9797 45 Avenue NW, Edmonton, Alberta T6E 5V8, Canada, as Obligor, is firmly bound unto the State of Alaska Department of Natural Resources and the State of Alaska Department of Environmental Conservation ("the State") in the sum of One Million, Two Hundred Twenty One Thousand, Four Hundred and Eight U.S. Dollars ($1,221,408), lawful money of the United States, for the payment of which the Obligor hereby binds itself, its successors, and assigns.

Contemporaneously with the execution and delivery of this Personal Bond, the Obligor delivers to the State as collateral to secure the obligation described herein a Letter of Credit numbered BMTO184657OS pursuant to 11 AAC 97.410 and 18 AAC 60.265.

Whereas, the Obligor has submitted reclamation plans for mining exploration operations under an approved reclamation plan, and obtained waste disposal or management permits at the Niblack Mine exploration property, which approved reclamation plans (hereinafter "the reclamation plans") and waste disposal or management permits (hereinafter "the Permits") are listed in Table 1 below, and are incorporated fully herein in all its terms and made a part of this bond; and

Table 1

Plan/Permit/Lease #	USD Amount	Description
ADNR Reclamation Plan Approval J092711 and ADEC Waste Management Permit 2006-DB0037	$ 1,221,408	Permits issued for the Underground Exploration Program
TOTAL	$ 1,221,408	

Whereas, the Obligor is required to post a performance bond with the State to ensure complete compliance with AS 27.19, 11 AAC Chapter 97, 18 AAC Chapter 60, the reclamation plans and the Permits; and

Whereas, the Obligor is required to post this Personal Bond with the State to ensure the Obligor's complete compliance with the requirements of the reclamation plans, AS 27.19 and attendant regulations at 11 AAC Chapter 97, and the Permits and attendant regulations at 18 AAC Chapter 60; and

Whereas, in accordance with 11 AAC 97.430, Obligor is liable for the full costs of reclamation to the standards of AS 27.19, the requirements of 11 AAC Chapter 97, and the approved reclamation plans, regardless of the amount of the bond; and

Whereas, the Obligor agrees that unless the Obligor has replaced this bond with another personal bond or with another form of financial assurance authorized under 11 AAC 97.400 and 18 AAC 60.265 providing security for compliance with all terms of the reclamation plans and Permits, coverage under this bond shall extend to and include the approved reclamation plans, Permits, and any amendments to the plan approved by the State.

Now, therefore, the terms of this Personal Bond are as follows:

Upon a determination by the State that the Obligor has satisfactorily complied with the reclamation plans (in accordance with the standards of AS 27.19.020 and of 11 AAC 97.200-250) and the Permits, the obligations of this personal bond and accompanying instrument shall terminate and the commissioner shall release this bond and the accompanying instrument.

This personal bond and accompanying instrument shall remain in full force and effect until their release is approved in writing by the State (1) in accordance with 11 AAC 97.410(b) and 18 AAC 60; or (2) upon delivery of substitute financial assurance acceptable to the State.

The State may approve replacement of this personal bond or the collateral securing it in accordance with 11 AAC 97.400 and 18 AAC 60. In the event of replacement, the substitute bond must assume all remaining reclamation obligations and liabilities.

If the State determines that the Obligor has violated or permitted a violation of the reclamation plans or Permits and failed to comply with a lawful order of the State, the Obligor forfeits this personal bond or the relevant portion thereof in accordance with AS 27.19.040(c) and AS 27.19.070(a) or and 18 AAC 60. Upon the Obligor's receipt of a notice of the Obligor's default from the State, the Obligor shall promptly pay the face value of this personal bond to the State or forfeit the funds secured by the Letter of Credit # __BMTO184657OS__ referenced above.

All correspondence pertaining to the Personal Bond shall be sent to:

State of Alaska, Department of Natural Resources
Division of Mining Land and Water

Detailed Statement of Findings and Decision on Petition Requesting that the Streambeds of Anadromous Waterbodies and Associated Riparian Areas in the Chuitna River Watershed be Designated as Lands Unsuitable for All Types of Surface Coal Mining Operations

SUMMARY AND BACKGROUND OF THE PETITION

On January 21, 2010, Trustees for Alaska (Trustees), on behalf of two organizations, submitted a petition (referenced herein as the "petition," or where context is required, the "2010 Petition") to the Commissioner of the Department of Natural Resources (DNR), requesting that certain lands within the Chuitna River[1] watershed (Chuitna watershed) be designated unsuitable for all types of surface coal mining operations. Trustees submitted the petition on behalf of the Chuitna Citizens Coalition and Cook InletKeeper. Both groups are collectively referenced herein as petitioners.

The present action is one in a continuing series of attempts dating back to the 1980s to prohibit surface coal mining operations in the Chuitna watershed. More recently, this is the second time in three years that petitioners have filed a petition requesting that DNR find the Chuitna watershed unsuitable for surface coal mining operations. In the 2007 Petition, these petitioners alleged that reclamation was not technologically feasible; the petition was litigated, and the appeal was eventually dismissed with prejudice. This procedural history and the state and federal decisions denying earlier attempts to prohibit surface coal mining are integral to the present decision.

The 2010 Petition raises many of the same arguments and reads much like the 2007 Petition. More specifically, the 2010 Petition requests that streambeds underlying anadromous water bodies and their associated riparian areas within the Chuitna watershed be designated unsuitable for surface coal mining.

---

[1] The river is also commonly referred to, including by petitioners, as the Chuit River.

This petition is based on the Alaska Surface Coal Mining Control and Reclamation Act, which authorizes the DNR Commissioner to designate state lands as off-limits for all surface coal mining operations if scientifically sound data and information justifies a finding that state lands are unsuitable for surface coal mining operations. The State of Alaska has never granted a "lands unsuitable" petition. The result of granting such a petition for the Chuitna watershed would be that the petition area would be preemptively closed for all surface coal mining operations. Thus, entities with a property interest in the land would be precluded from even applying for a permit to mine coal from the Chuitna watershed.

For that reason, three different entities -- Alaska Mental Health Trust Land Office, Tyonek Native Corporation, and PacRim Coal, LP (intervenors) -- have sought to intervene to protect their property interests and requested that DNR deny the 2010 Petition, which, if granted, would have substantial negative impacts on their property interests and on potential economic developments in the region. Tyonek Native Corporation (TNC) explained that it opposes the 2010 Petition because the petition "seeks to end most development of the coal reserves in the region where TNC's lands are located and mostly TNC shareholders reside. Such a determination would frustrate TNC's efforts to increase local employment opportunities for its shareholders, who are the Native people and the majority of the population of the region. Developing the region's substantial coal resources is critical to economic growth."

Similarly, Alaska Mental Health Trust Land Office, which is a state corporation that administers the Alaska Mental Health Trust for the benefit of individuals with mental illness, developmental disabilities, chronic alcoholism and Alzheimer's disease and related dementia,[2] stated: "The Trust is the predominant landowner within the Chuitna River Watershed, and lessor of the coal resources located within the areas subject to the petition. As the owner of the coal resources proposed for development pursuant to the existing coal leases held by PacRim Coal, LP (PRC) in the subject area, The Trust has a significant stake in the outcome of the petition proceeding. . . . To allow [the petition] to go forward would significantly affect the ability of The Trust and its lesee to develop this resource and would result in a major negative economic

---

2 http://www.mhtrust.org/layouts/mhtrust/files/documents/about_aboutdocs/Trust_Overview_update2011.pdf.

impact to The Trust and its beneficiaries." The Alaska Mental Health Trust Land Office has taken this position because it is obliged to manage the Trust's assets for the "maximization of long-term revenue from trust land," "protection and enhancement of the long-term productivity of trust land," and "encouragement of a diversity of revenue-producing uses of trust land."[3]

SUMMARY OF THE DECISION

Alaska Surface Coal Mining Control and Reclamation Act[4] (ASCMCRA), which is modeled after the federal Surface Mining Control and Reclamation Act[5] (SMCRA), authorizes DNR to preemptively disallow any surface coal mining operations and project development in a particular area by granting a "lands unsuitable" petition. State law authorizes the DNR Commissioner to grant such a petition if the Commissioner finds that: reclamation is not technologically feasible; surface coal mining operations would have long-lasting damage to the ecosystem or harm important cultural or aesthetic values; or mining operations would take place in an area prone to natural hazards that could substantially endanger life and property.[6]

To support a lands unsuitable petition, a petitioner must assume "that contemporary mining practices required under AS 27.21 and this chapter would be followed if the area were mined."[7] Thus, a petitioner may not base a petition on the

---

[3] 11 AAC 90.020(c).

[4] AS 27.21.010, *et seq.*

[5] 30 U.S.C. § 1202, *et seq.*

[6] Specifically, AS 27.21.260(c) provides the "commissioner (1) shall designate an area as unsuitable for all or certain types of surface coal mining operations if the commissioner determines that reclamation in accordance with this chapter and regulations adopted under it is not technologically feasible in the area; (2) may designate an area as unsuitable for all or certain types of surface coal mining operations if the commissioner determines that the operations in the area will may designate an area as unsuitable for all or certain types of surface coal mining operations if the commissioner determines that the operations in the area will (A) be incompatible with existing state or local land use programs; (B) affect fragile or historic land in which the operations could result in significant damage to important historic, cultural, scientific, and aesthetic values and natural systems; (C) affect aquifer recharge areas or other renewable resource land in which the operations could result in a substantial loss or reduction of long-range productivity of water supply or food or fiber products; or (D) affect areas subject to frequent flooding and areas of unstable geology, or other natural hazard land in which the operations could substantially endanger life and property."

[7] 11 AAC 90.701(a)(5). *See also* AS 27.21.210 (stating that all permits issued under the Act shall require that surface coal mining and reclamation must comply with environmental performance standards). The federal Office of Surface Mining (OSM) has also stated that a

assumption that adverse mining impacts will occur that otherwise would be prevented by the environmental protection requirements mandated by ASCMCRA or other state regulations.[8] Indeed, the federal Office of Surface Mining (OSM) has stated that a petition that simply assumes non-compliance with state law is a meritless petition that should be rejected.[9]

Also embedded in ~~SMCRA and~~ ASCMCRA is the recognition that coal mining *will* significantly impact an area.[10] Indeed, state and federal law authorize surface coal mining despite its effects on the environment. Both Congress and the Alaska Legislature, in respectively enacting SMCRA and ASCMCRA, anticipated that impacts will necessarily occur during construction and coal mining. The provisions contained in SMCRA and ASCMCRA also recognize that coal mining will have adverse impacts to surface and groundwater within the disturbed mining area and that a balancing of responsible resource development and environmental protection is necessary.[11]

The extensive permitting and litigation history that preceded the 2010 Petition provides a critical backdrop to this decision. Trustees, along with other entities, opposed a coal mining project in the Chuitna watershed in the 1980s that underwent extensive regulatory review and received permit approvals from several state and federal agencies (including DNR, the Alaska Department of Fish and Game (ADF&G), and the U.S. Environmental Protection Agency (EPA)).

After this coal project received state permitting approvals, Trustees sued the state and appealed the Cowper Administration's permitting decision to the Alaska Superior Court. One of the major issues in that appeal, which is also one of the key issues in the present petition, centered on former DNR Commissioner Judith Brady's determination that reclamation was, in fact, feasible. The Superior Court rejected Trustees' claim that DNR erred in making this finding. Trustees then appealed to the

---

petitioner "must assume that contemporary mining practices required under the applicable regulatory program will be followed." 48 Fed. Reg. 41312, 41328-29 (Sept. 14, 1983). *Accord In re Permanent Surface Mining Regulation Litigation*, 620 F. Supp. 1519 (D.D.C. 1985).

[10] 30 U.S.C. § 1202; AS 27.21.010.

[11] 30 U.S.C. § 1202; AS 27.21.010.

Alaska Supreme Court. In *Trustees for Alaska v. Gorsuch,*[12] the Supreme Court upheld DNR's decision concerning the feasibility of reclamation in the Chuitna watershed area. Specifically, in addressing the contention that DNR erred in approving the proposed plan for restoration, the *Gorsuch* Court held that DNR had properly found that the proposed reclamation and wetlands restoration plans for the leased lands were "sufficient to restore the disturbed area to a condition capable of supporting fish and wildlife."[13] On this point, the Court was unanimous.

The EPA also conducted an environmental review of the same proposed coal mine in the Chuitna watershed through its 1990 Final Environmental Impact Statement (FEIS) and issued a 1990 Record of Decision (ROD) approving the project proposal. Thereafter, the EPA issued a National Pollutant Discharge Elimination System (NPDES) permit for the mine's wastewater discharges.

This proposed coal mining project eventually stalled in the 1990s due to market conditions. Since the mid-2000s, however, the Chuitna area has seen renewed development efforts.

In response to this renewed interest, Trustees, on behalf of petitioners, filed a lands unsuitable petition in 2007 (2007 Petition). The 2007 Petition sought to have the entire Chuitna watershed deemed unsuitable for surface coal mining activities. Petitioners raised concerns regarding the feasibility of reclamation in the Chuitna watershed disturbed by coal mining, as well as allegations that essentially unjustifiable significant harm would occur. Former DNR Commissioner Tom Irwin rejected the 2007 Petition, finding that the petition was incomplete and without merit.[14] Trustees appealed Commissioner Irwin's decision to the Superior Court.[15] The Commissioner and petitioners later settled the litigation, and with the exception of one issue (discussed below) no other aspect of Commissioner Irwin's decision on the 2007 Petition was withdrawn or changed, and Trustees' appeal to the Superior Court was dismissed with prejudice.

---

[12] 835 P.2d 1239 (Alaska 1992).

[13] *Id.* at 1249.

[14] July 16, 2007 Petition Decision, at 1.

[15] *Chuitna Citizens NO-COALition, Inc., v. Irwin, et al.*, Case No. 3AN-08-6009CI.

On January 21, 2010, Trustees, on behalf of petitioners, once again submitted a new petition (2010 Petition) under ASCMCRA. To support the 2010 Petition, petitioners essentially recycle the two central claims raised in the 2007 Petition: first, that reclamation of the petition area in accordance with the ASCMCRA[16] is not technologically feasible; and second, that surface coal mining operations will destroy habitat and adversely impact fragile lands resulting in significant damage to important cultural, scientific, and aesthetic values and natural systems within the watershed.

The evidence contained in the administrative record does not support the designation of any of the petition area as lands unsuitable for surface coal mining operations. The evidence in the administrative record provided by the petitioners and intervenors, and compiled by DNR, demonstrates that reclamation throughout the Chuitna watershed is, in fact, technologically feasible. Moreover, there is not sufficient evidence to support a finding that surface coal mining operations -- that comply with the applicable statutes and regulations -- will adversely affect the environment in such a manner that would justify granting this petition.

In particular, there is insufficient evidence to suggest that prior permitting decisions issued by the state and federal government wrongly concluded that reclamation was feasible. For example, in DNR's 1987 Permitting Decision determining that the restoration and reclamation plans were sufficient (including to restore disturbed fish and wildlife habitats), DNR found "that reclamation as required by AS 27.21 and 11 AAC 90 can be accomplished under the reclamation plan," subject to DNR-required modifications.[17] As mentioned above, this finding was upheld by the Alaska Supreme Court in *Trustees for Alaska v. Gorsuch*, and is also consistent with EPA's 1990 findings that reclamation was feasible.

While the petitioners provide a few new studies to support the 2010 Petition, this information does not contradict DNR's earlier findings with respect to reclamation and restoration of wetlands and fish and wildlife habitat. Nor does it overcome the significant evidence in the record -- discussed in detail below -- which demonstrates that reclamation is technologically feasible. Nevertheless, as this lengthy statement of

---

[16] AS 27.21.010, *et seq.*

[17] August 21, 1987 Decision (1987 Permitting Decision) on the Diamond Shamrock Chuitna Coal Project, issued by J.M. Brady, at 125 and at 326-361.

findings and decision shows, DNR has again undertaken a comprehensive review of these issues and will continue to do so as the permitting process continues.

More broadly, petitioners' arguments also suffer from thematic flaws repeated throughout the petition. *First*, petitioners do not give appropriate weight to previous federal and state decisions, including the Alaska Supreme Court *Gorsuch* decision, which found that reclamation in the Chuitna watershed is feasible. When petitioners do cite some of these decisions, they often do so by selectively quoting portions of the decision to leave a misleading impression that the decisions support their allegations.

Second, petitioners make many of the same allegations, often verbatim, that were raised in the 2007 Petition, which was dismissed with prejudice by the Alaska Superior Court. A dismissal with prejudice "is treated as a dismissal on the merits and is, therefore, a final judgment on the merits ... operating as res judicata." *Smith v. CSK Auto, Inc.*, 132 P.3d 818, 820 (Alaska 2006). Res judicata (claim preclusion) and collateral estoppel (issue preclusion) "bind the parties and their privies to factual findings, as well as legal conclusions, that have been the subject of prior litigation," and "administrative agency decisions can have preclusive effect on later court proceedings, so that if a party participates in an administrative adjudication, ... the adjudication may foreclose the possibility of a later lawsuit on the same factual issues." *Alaska Public Interest Group v. State*, 167 P.3d 27, 44 (Alaska 2007).

Third, petitioners assume that DNR will permit a surface coal mine that cannot comply with ASCMRCA and other state laws, and they assume that if a mine is permitted, a mining operator will not be able to comply with such laws and regulations. As discussed above, these assumptions conflict with the requirements of an ASCMCRA lands unsuitable petition.[18] And, as the OSM has stated, a petition that simply assumes non-compliance with state law is meritless.[19]

The 2010 Petition also fails to consider other important policy objectives of ASCMCRA including:

- assuring "that the coal supply essential to the nation's energy requirements and to its economic and social well-being is provided and to strike a balance

---

[18] 11 AAC 90.701(a)(5).

[19] 48 Fed. Reg. at 41328-29.

between protection of the environment and other uses of the land and the need for coal as an essential source of energy;"[20] and

- assuring "that reclamation of land on which surface coal mining takes place is accomplished as contemporaneously as practicable with the surface coal mining, recognizing that the responsible extraction of coal by responsible mining operators is an essential and beneficial economic activity."[21]

Notably, as discussed by the intervenors and set out in detail below, this decision recognizes that the majority of landowners in the Chuitna watershed selected their lands because of the presence of significant coal resources and the financial prosperity, employment opportunities, and enhanced social well-being that development of those lands would bring, not just to private industry, but to Native corporation shareholders and Mental Health Trust beneficiaries, as well as local residents and the public at large. Thus, to the extent that any landowner or lessee in the area may propose a surface coal mining project capable of demonstrating compliance with applicable state, federal, and local requirements, and that such operations can be responsibly conducted, then such operations would further these important statutory directives.

Although this decision addresses the merits of all of petitioners' allegations, this decision expressly preserves, and in no way holds contrary to, the final findings of former DNR Commissioner Irwin on the evidence and allegations that Trustees asserted in the 2007 Petition and which petitioners now reassert, in many places verbatim, in the 2010 Petition. Today's decision also expressly preserves the defenses of res judicata and collateral estoppel for Commissioner Irwin's final findings for purposes of any future litigation that may be brought on the 2010 Petition because many of the allegations and arguments raised in the 2007 Petition, and repeated here, were dismissed with prejudice by the Alaska Superior Court.

Finally, it is worth noting that petitioners raise some reasonable concerns regarding the impact of surface coal mining operations on water quality, wetlands, the hydrologic balance of the larger Chuitna watershed, and fish and wildlife habitat.

---

[20] AS 27.21.010(b)(7).

[21] AS 27.21.010(b)(5).

These concerns are, however, more effectively and appropriately addressed during the permitting phase of any proposed project. Accordingly, it is important to note that this decision to not designate the petition area as unsuitable for all or certain types of coal mining activities does not mean that surface coal mining will automatically be approved in this area for a specific project. The lands unsuitable designation process is independent of the permitting and mine planning processes that are subject to multi-agency regulatory reviews by several state, federal and local agencies, and these processes may prohibit, curtail, or modify coal mining activities depending on the project proposal. Moreover, DNR will not issue a permit for a specific project unless a specific coal mining proposal demonstrates the capacity to comply with all applicable legal requirements.

THE PETITION PROCESS, STANDARDS FOR REVIEWING PETITIONS, AND OTHER APPLICABLE AUTHORITIES

The Alaska Surface Coal Mining Control and Reclamation Act (ASCMCRA)[22] authorizes the DNR Commissioner to determine if certain lands are unsuitable for surface coal mining operations.[23] Under ASCMCRA, a person or a municipality adversely affected by potential surface coal mining operations may file a petition asking the Commissioner to designate lands unsuitable for mining.[24] A petition "must contain allegations of facts with supporting evidence that would tend to establish the allegations."[25]

Because ASCMCRA is modeled after the federal Surface Mining Control and Reclamation Act (SMCRA),[26] both congressional and federal regulatory commentary on the federal act informs the petition review process. In discussing Section 522(a) of SMCRA,[27] the House Committee on Interior and Insular Affairs stated that the petition process "is structured to be applied on an area basis, rather than a site-by-site

---

[22] AS 27.21.010, *et seq.*

[23] AS 27.21.260(a).

[24] AS 27.21.260(b).

[25] *Id.*

[26] ASCMCRA, the state counterpart to SMCRA, was enacted in 1982. Ch. 29, § 1, SLA 1982. The State of Alaska subsequently obtained federal approval in 1983 to exercise exclusive jurisdiction over surface coal mining and reclamation under ASCMCRA, which act is based on its federal counterpart, SMCRA, 30 U.S.C. §§ 1201-1328.

[27] 30 U.S.C. § 1272.

determination, which presents issues more appropriately addressed in the permit application process."[28] The committee also stated that the petition process, whether administered by a federal or state regulatory authority, "does not require the designation of areas as unsuitable for surface mining" unless "it is demonstrated that reclamation of an area is not physically or economically feasible under the standards of the act. The other criteria for designation ... are discretionary."[29]

In considering a lands unsuitable petition under state law, the Commissioner "shall use competent and scientifically sound data and information in order to make objective decisions as to which areas of land are unsuitable for all or certain types of surface coal operations."[30] Such decisions shall also include consideration of "the planning activities of federal, state, and municipal governments."[31] The petition decision shall "use a data base and inventory system that will permit the evaluation of areas of the state to support and permit reclamation for surface coal mining operations."[32] In reaching a decision on a petition, the Commissioner will use (1) relevant information from the data base and inventory system, (2) relevant information and analysis submitted during the comment period, and (3) relevant information provided by other governmental entities.[33] The Commissioner shall include a statement of reasons for the Commissioner's decision.[34]

Before designating an area as unsuitable, the Commissioner shall prepare "a detailed statement of potential coal resources in the area, the demand for coal resources, and the impact of the designation on the environment, the economy, and the supply of coal."[35] Any potential designation must consider "present and future land use planning and regulation processes at the federal, state, and local levels."[36] In response to a petition, the Commissioner may determine to designate the entire

[36] AS 27.21.260(f).

petition area unsuitable for all or certain types of surface coal mining operations, designate only certain portions of the petition area as unsuitable for all or certain types of surface coal mining operations, deny the petition in its entirety, or direct that future permits issued in the petition area "contain specific requirements for mitigating the impact of operations on the feature that was the subject of the petition."[37]

Federal and state coal mining laws provide a plan for assuring that surface coal mining will be conducted in such a manner as to minimize the adverse impact of coal mining, while assuring the nation an adequate supply of coal.[38] These laws and their attendant regulations contain requirements regarding contemporary coal mining practices, including "performance standards" for mine operations and reclamation.[39]

What is critical to underscore is that a petition requesting that lands be designated as unsuitable for surface coal mining operations must assume "that contemporary mining practices required under AS 27.21 and this chapter would be followed if the area were mined."[40] These practices include the performance standards provided at 11 AAC 90.301 – 90.501. Thus, any mine would have to meet the requirements of the state and federal law and a petitioner may not assume mining impacts will occur that would be prevented by the environmental protection requirements mandated by the such laws and other state regulations.[41] Indeed, the federal Office of Surface Mining (OSM) has stated that a petition that simply assumes non-compliance with state law is meritless.[42]

---

[37] AS 27.21.260(c); 11 AAC 90.711(c).

[38] *See, e.g., Prager v. Hodel*, 793 F.2d 730 (5th Cir. 1986), *cert. den.* 479 U.S. 988 (1986).

[39] Performance standards provide a basic level of compliance during coal mining and reclamation. *See generally* 11 AAC 90.301 – 90.501. These standards ensure that the environment and the public are protected during mining by requiring avoidance and mitigation of impacts, and the requirement that all land disturbed by mining is restored to a productive postmining land use. *Alaska Coal Mining and the Law* (DNR, March 2007).

[40] 11 AAC 90.701(a)(5). *See also* AS 27.21.210 (stating that all permits issued under the Act shall require that surface coal mining and reclamation must comply with environmental performance standards). The federal Office of Surface Mining (OSM) has also stated that a petitioner "must assume that contemporary mining practices required under the applicable regulatory program will be followed." 48 Fed. Reg. 41312, 41328-29 (Sept. 14, 1983). *Accord In re Permanent Surface Mining Regulation Litigation*, 620 F. Supp. 1519 (D.D.C. 1985).

[41] 48 Fed. Reg. at 41328-29.

[42] *Id.*

Beyond the statutes and regulations specifically dealing with the petition process, the review of a petition includes consideration of ASCMCRA's primary purposes. These include, but are not limited to, the following:

- assuring "that surface coal mining operations are conducted in a manner that will prevent unreasonable degradation of land and water resources;"[43]
- assuring "that surface coal mining operations are not conducted where reclamation required by this chapter and the regulations adopted under it is not feasible;"[44]
- assuring "that reclamation of land on which surface coal mining takes place is accomplished as contemporaneously as practicable with the surface coal mining, recognizing that the responsible extraction of coal by responsible mining operators is an essential and beneficial economic activity;"[45]
- assuring "that the coal supply essential to the nation's energy requirements and to its economic and social well-being is provided and to strike a balance between protection of the environment and other uses of the land and the need for coal as an essential source of energy."[46]

Additionally, a critical component of DNR's mandate, which has been promulgated by the Alaska Legislature and is derived from the Alaska Constitution, is to allow responsible resource development. This duty flows from article VIII of the Alaska Constitution. Section 1 states that "[i]t is the policy of the State to encourage the settlement of its land and the development of its resources by making them available for the maximum use consistent with the public interest." Section 2 provides that the legislature shall provide for the

---

[43] AS 27.21.010(b)(3).

[44] AS 27.21.010(b)(4).

[45] AS 27.21.010(b)(5).

[46] AS 27.21.010(b)(7).

utilization, development and conservation of all natural resources belonging to the State, including land and waters, for the maximum benefit of its people."

The Legislature has, in turn, charged DNR with administering state lands for the "conservation and development of natural resources, including forests, parks, and recreational areas, land, water, agriculture, soil conservation, and minerals including petroleum and natural gas."[47] As former Commissioner Tom Irwin stated in a July 16, 2007 decision on the previous lands unsuitable petition filed by Trustees for the entire Chuitna watershed, both the federal and state statutory regimes "reflect the goal of allowing, where possible, multiple uses of coal bearing lands, and that balanced consideration would be given to regulated coal mining operations and other uses/resources."[48]

The ASCMCRA goals complement the state's economic development, energy, and mineral policies, as declared by the legislature, including the proper conservation and development of mineral resources such as coal for the "further economic development of the state, to maintain a sound economy and stable employment, and to encourage responsible economic development within the state for the benefit of present and future generations."[49]

DETAILED STATEMENT OF FINDINGS AND CONCLUSIONS

Having considered the administrative record in this matter, including the petition and supporting materials, public comments, as well as intervenors' submittals, the following is a detailed statement of findings relative to the petition, along with conclusions on the petition, including reasons for those conclusions, pursuant to AS 27.21.260 and 11 AAC 90.711, and other applicable authorities.

Background on the 2010 Petition and Prior Related Decisions

1. The petition area is 45 miles west of Anchorage, on the west side of Cook Inlet. The petition area is 3,560 acres (5.5 square miles): streams in the petition area total approximately 118 miles in length in the larger Chuitna watershed. The Chuitna

---

[47] AS 44.37.025(a).

[48] Commissioner Tom Irwin's July 16, 2007 Decision on Petition Requesting that the Chuitna River Watershed be Determined Lands Unsuitable for Surface Coal Mining, at 13 (citing 30 U.S.C. §§ 1201-1202; AS 27.21.010(b)).

[49] AS 44.99.110 (mineral policy); *accord* AS 44.99.100 (economic policy) and AS 44.99.115 (energy policy).

watershed is subject to multiple uses, including residential, subsistence, recreational, and industrial uses. The communities of Tyonek Native Village and Beluga are adjacent to the watershed and the petition area. A variety of mammals, fish (including salmon), and bird species occur in the petition area.

2. The petition area, and the Chuitna watershed throughout which the petition area pervades, falls within the Susitna/Beluga Coal Field, which is one of the most significant coal fields in Alaska.[50] Since at least statehood in 1959,[51] as well as after enactment of the Alaska Native Claims Settlement Act (ANCSA) in 1971,[52] lands within the area were selected for their mineral, coal, and oil and gas resource potential. Many of the landowners and state and local land use plans identify these areas for coal resource development.

3. Exploration on at least two separate projects in the area has been conducted for decades. One proposed project, the Diamond Shamrock Chuitna Coal Project, underwent extensive regulatory review by several state and federal agencies (including DNR, the Alaska Department of Fish and Game (ADF&G), and the U.S. Environmental Protection Agency (EPA)), from the mid-1980s until the early 1990s.

4. Based on the ASCMCRA permit application submitted on the Diamond Shamrock Chuitna Coal Project, DNR, under the Cowper Administration, issued a permitting decision in 1987 approving the construction and operation of the proposed coal mine. The findings supporting DNR's approval are recorded in (i) a March 5, 1987, "Conditions of Decision and Findings of Compliance for the Diamond Chuitna Mine" and (ii) an August 21, 1987, "Decision to Issue a Surface Mining Permit Diamond Shamrock Chuitna Coal Joint Venture Diamond Chuitna Mine." These documents were later combined into a single document referenced herein as the "1987 Permitting Decision." DNR made a number of key findings in these documents regarding reclamation and hydrologic impacts:

---

[50] The Beluga Coal Field has the largest identified resource of any coal field in Alaska, south of the Brooks Range. Merritt, R.D. and Hawley, C.C., 1986, Map of Alaska coal resources, 1:2,500,000: Alaska DGGS Special Report No. 37, Table 2.

[51] 72 Stat. 339 Public Law 85-508 (1958).

[52] 43 U.S.C. § 1601, *et seq.*

- Diamond Shamrock's Wetland Revegetation Plan satisfactorily addressed DNR's initial concerns about whether wetland habitat could be restored. The agency noted, however, that the plan would be subject to continuing DNR review and that, if appropriate, changes could be made to the plan during actual mine operation.[53]

- The project was subject to several DNR stipulations relative to reclamation measures and activities that would be required contemporaneous with mining. These included measures for sediment and drainage control (including sediment control ponds),[54] and measures for protecting surface and groundwater hydrology (including additional hydrologic monitoring).[55]

- In accordance with AS 27.21.180(c)(2), Diamond Shamrock had "demonstrated that reclamation as required by AS 27.21 and 11 AAC 90 can be accomplished under the reclamation plan," subject to DNR-required modifications.[56]

- In accordance with AS 27.21.180(c)(3), "an assessment of the probable cumulative impact of all anticipated mining in the area on the hydrologic balance has been made and the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area."[57]

- Regarding stream restoration, DNR -- while acknowledging that "post-mining baseflows will take ten to fifteen years to reach pre-mining levels and that it was important that enhancement techniques be maintained until the pre-mining flows are reached" -- found that the application

---

[53] August 21, 1987 Decision (1987 Permitting Decision) on the Diamond Shamrock Chuitna Coal Project, issued by J.M. Brady, at 33-34.

[54] *Id.* at 40-42, and at 53-92 (consisting of an August 16, 1987 report prepared for DNR by Arctic Hydrologic Consultants that provides a technical review on the proposed Sediment and Drainage Control Plan).

[55] *Id.* at 44-48.

[56] *Id.* at 125, and at 326-361 (containing Section IV findings).

[57] *Id.* at 125, and at 362-404 (containing Section V findings).

complied with 11 AAC 90.327 (Stream Channel Diversion) for the initial permit term.[58]

5. On June 28, 1988, then DNR Commissioner Judith Brady adopted, with minor modifications, the Hearing Officer's May 21, 1988, proposed decision (1988 Administrative Appeal Decision) on the consolidated administrative appeals brought on the 1987 Permitting Decision by Trustees for Alaska, the project proponent Diamond Shamrock, and others. The Hearing Officer's proposed decision recommended certain modifications to the permitting decision, including lengthening the permit term from five to ten years.[59] Based on the administrative record, the Hearing Officer also found that "Diamond's reclamation plan, including its wetlands restoration plan, is sufficient to restore the disturbed area to a condition that is capable of supporting fish and wildlife."[60] With this 1988 Administrative Appeal Decision, Commissioner Brady affirmed the 1987 Permitting Decision.

6. EPA also conducted an environmental review of the proposed coal mine through its 1990 FEIS and issued a 1990 ROD approving the proposal. Thereafter, EPA issued an NPDES permit for the mine's wastewater discharges. In the two-volume 1990 FEIS and the 1990 ROD, EPA considered several factors and made a number of key findings:

- EPA considered numerous impacts the project potentially could have on the environment, including possible impacts to wetlands, subsistence, fish and wildlife, and associated habitat impacts.[61]
- EPA concluded that the area in which the project was to be located was not pristine. For example, it had been previously entered for logging and oil and gas purposes.[62]
- EPA stated the following regarding potential impacts to wetlands:

---

[58] *Id.* at 202.

[59] 1988 Administrative Appeal Decision at 5-7.

[60] *Id.* at 33-35.

[61] 1990 FEIS at 5-11, 5-16, and 5-75.

[62] *Id.* at 5-136.

> The acidic, muskeg-type wetlands which are widely dispersed throughout the area are not highly productive and the net primary productivity of replacement communities could be as high or higher than the communities that now exist. Therefore, adverse impacts to primary wetland productivity would not be significant on a regional scale. Food webs would be interrupted in the immediate vicinity of pre-mining wetland areas, but such interruption would probably not be significant on a regional basis because of the isolated nature of most area wetlands and the large extent of similar wetlands outside the project area.[63]

- EPA noted that the wetlands within the Diamond Shamrock Chuitna Coal Project area were similar to wetlands found outside the project area (i.e., the Chuitna watershed/drainage).[64]

- In the ROD, EPA stated that the authorizing agencies, including EPA and DNR, anticipated that reclamation within the project area would be undertaken in accordance with specific requirements, and therefore feasible.[65]

7. After the commissioner upheld DNR's permitting decision upon appeal, multiple plaintiffs, including Trustees for Alaska, appealed the commissioner's decision in the *Gorsuch* litigation.[66] With the exception of one modification, which required a separate ASCMCRA permit for an eleven mile access/haul road from the mine site, the Alaska Superior Court upheld the permitting decision. Upon Trustees' appeal of the Superior Court's decision, the Alaska Supreme Court -- while remanding the decision to DNR for further consideration of cumulative effects of activities associated with the permit, and reconsideration of the reclamation bond amount -- addressed Trustees' contention that DNR erred in approving the proposed plan for restoration of ecological functions and revegetation. Among other things, the Court held:

---

[63] *Id.* at Appendix F, at 2-3.

[64] *Id.* at 3.

[65] 1990 ROD at 6, and at 9-12. *See also* 1990 FEIS, at 2-31 to 2-34.

[66] 835 P.2d at 1239.

- that DNR had found that the proposed reclamation and wetlands restoration plans for the leased lands were "sufficient to restore the disturbed area to a condition capable of supporting fish and wildlife."[67]
- that DNR acted reasonably in accepting the restoration plan, because the plan

> describes how wildlife habitat will be recreated by constructing peat-filled depressions which will be planted with various plant species. In addition, three sediment ponds will be inoculated with plant and insect life forms, and seedlings will be planted to provide a vegetation canopy layer for the benefit of wildlife.[68]

8. Diamond Shamrock Chuitna Coal Project project, however, ultimately stalled due to market conditions.

9. Since the mid-2000s, the area has seen renewed development efforts, and the former Diamond Shamrock Chuitna Coal Project is now simply referred to as the Chuitna Coal Project. The current proponent of the project, PacRim Coal, is developing baseline information and coordinating with state and federal agencies, with the expectation that permit applications for the project will be submitted in the next year.

10. The petitioners submitted a petition in 2007 (2007 Petition) seeking to have the entire Chuitna watershed be deemed lands unsuitable for surface coal mining activities. In this petition, petitioners' counsel, Trustees for Alaska, raised concerns regarding the feasibility of reclaiming areas disturbed by coal mining, as well as allegations that essentially unjustifiable significant harm would occur.

11. In a decision issued on July 16, 2007, then-Commissioner Tom Irwin returned the 2007 Petition to petitioners, finding that the petition was incomplete and without merit.[69] In that decision, which contained multiple findings of fact and law, Commissioner Irwin informed petitioners that they could submit a new petition, and described the types of evidence which would be needed to support the petition, so that

---

[67] *Id.* at 1249.

[68] *Id.*

[69] July 16, 2007 Petition Decision, at 1.

it could be reviewed on the merits.[70] Commissioner Irwin also informed petitioners, in accordance with 11 AAC 90.701(a)(5), that the petition needed to assume that contemporary mining practices, required under AS 27.21 and this chapter, would be followed if the area were mined, and that the 2007 Petition failed to do that.[71]

12. In a letter dated February 14, 2008, Commissioner Irwin upheld his decision upon petitioners' request for reconsideration. Petitioners appealed Commissioner Irwin's decision on the 2007 Petition to the Superior Court.[72] The Commissioner and petitioners later settled the litigation, and with the exception of one issue (*see* discussion of Allegation V, below), no other aspect of Commissioner Irwin's decision on the 2007 Petition was withdrawn or changed, and the petitioners' appeal to the Superior Court was dismissed with prejudice.[73]

13. On January 21, 2010, Trustees submitted a new petition (2010 Petition) under AS 27.21.260 on behalf of Chuitna Citizens Coalition and Cook Inlet Keeper.

14. Petitioner Chuitna Citizens Coalition is an organization whose members are "full-time and part-time residents of Beluga," a small community located near the petition area. The petitioner describes three of its members' interest in the recreational, fish and wildlife, and subsistence values of the petition area. Two of its members, Judy and Larry Heilman, are residents of Beluga, and state they use the watershed for hunting and fishing opportunities, but do not describe where in the petition area they specifically conduct their activities. Another member, Terry Jorgenson, engages in commercial fishing in the marine waters/Ladd Landing area in Cook Inlet. Ladd Landing is adjacent, rather than within, the petition area. Ladd Landing has been proposed as a potential transfer site for the Chuitna Coal Project for loading coal to freighters for marine shipping.[74]

15. Petitioner Cook Inlet Keeper "is a community-based nonprofit organization that combines advocacy, education and science towards its mission to

---

[70] *Id.* at 5-15.

[72] *Chuitna Citizens NO-COALition, Inc., v. Irwin, et al.*, Case No. 3AN-08-6009CI.

[73] For this reason, arguments in the 2010 Petition consistent with the arguments made in the 2007 Petition are likely barred by res judicata and collateral estoppel.

[74] Petition at 12-13.

protect Alaska's Cook Inlet Watershed and the life it sustains."[75] Cook Inlet Keeper asserts that it has members living in the petition area "that would be adversely affected by surface coal mining operations in the Chuitna River watershed," including with respect to members' subsistence activities.[76]

16. The 2010 Petition was more refined than the 2007 Petition because it requests that streambeds underlying anadromous water bodies and their associated riparian areas within the Chuitna watershed be designated unsuitable for surface coal mining as opposed to the broader request in 2007 to have the entire watershed deemed lands unsuitable for surface coal mining. Nonetheless, Petitioners submitted essentially the same evidentiary information that was provided with the 2007 Petition, and only included a handful of additional new documents as evidence to support the petition's allegations. Thus, many of the allegations and supportive materials cited by the petitioners in their 2010 Petition are the same as those that petitioners cited in their 2007 Petition and are also similar to the issues litigated in the *Gorsuch* case.[77]

17. While this more focused specification of the petition area might initially be viewed as a reduction in the area that was sought for designation under the 2007 Petition, the practical effect of the designation would not be so limited, given the geographical reach of the petition area. The specified streambeds and riparian areas have a wide-ranging, meandering trace throughout the Chuitna watershed,[78] repeatedly crossing over the coal resources that likewise pervade throughout the watershed. The designation of the petition area would therefore have a fragmenting effect on the coal resources, jeopardizing the feasibility and extraction of any of the coal resources present in the watershed, even if those resources are not within the petitioners' identified petition area.

18. On February 22, 2010, former Commissioner Tom Irwin found the 2010 Petition to be administratively complete under 11 AAC 90.703(a), and that it contained

---

[75] *Id.* at 13.

[76] *Id.* at 13-14.

[77] Petitioners in this 2010 petition, Chuitna Citizens Coalition (formerly Chuitna Citizens NO-COALition) and Cook Inlet Keeper, were among the petitioners listed in the 2007 Petition.

[78] *See* Figure 1 and "Description of the Petition Area."

the information required under 11 AAC 90.701(a). At the time, the commissioner made no other determinations as to the adequacy of the petition.

19. The petition alleges in Allegation I that reclamation of impacts from any type of surface coal mining operations in the petition area (*i.e.*, the streambeds of anadromous streams and their riparian areas), as well as the streams that overlie the delineated area, is not technologically feasible in accordance with ASCMCRA.[79] The petition specifically states that:

- surface coal mining would irreparably harm the area's hydrologic balance, including scrub/sweetgale fen and peat soils ecosystems for which few examples of successful reclamation exist;[80]
- reclamation would not restore the groundwater recharge capacity in the area, violating the performance standards requiring such restoration;[81]
- reclamation would not restore aquatic productivity to premining levels, altering highly productive spawning, migratory, and rearing habitat;[82] and
- surface coal mining on the identified lands cannot be designed and operated to minimize changes in water quality and hydrology enough to ensure no adverse effects to fish and wildlife habitat.[83]

20. The petition alleges in Allegation II that all types of surface coal mining operations will affect fragile land within the meaning of the ASCMCRA regulations and would result in significant damage to important cultural, scientific, and aesthetic values and natural systems.[84]

---

[79] *Id.* at 14-16.

[80] *Id.* at 16-24.

[81] *Id.* at 24-25.

[82] *Id.* at 25-29.

[83] *Id.* at 29-33.

[84] *Id.* at 33-45.

21. The petition alleges in Allegation III that all types of surface coal mining operations will affect renewable resource land which could result in a substantial loss or reduction of long-range productivity of water supply or food or fiber products.[85]

22. The petition alleges in Allegation IV that all types of surface coal mining operations could substantially endanger life and property because these operations will occur in areas of unstable geology and where other natural hazards are present. This would include local faults which experience frequent seismic activity, the possibility of volcanic eruptions, strong currents and severe winter ice conditions that would make transport dangerous and spills more likely, and strong winds that would contribute to coal dust being blown offsite.[86]

23. The petition alleges in Allegation V that all of the delineated petition area, including streambeds underlying anadromous water bodies and associated riparian areas that occur within Logical Mining Unit-1 (LMU-1),[87] must be considered in a decision on the petition, and that none of the delineated petition area is exempt from petition review, asserting that there were no substantial legal or financial commitments for an operation in this area before January 4, 1977.

24. In support of the 2010 Petition, the petitioners cite earlier reviews and decisions that were issued in the late 1980s and early 1990s by DNR, the EPA, and other agencies when the project was identified as the Diamond Shamrock Chuitna Coal Project. The petitioners cite DNR's August 21, 1987, permitting decision (1987 Permitting Decision) approving the project; the 1988 administrative appeal decision (1988 Administrative Appeal Decision) affirming that decision; EPA's 1990 final environmental impact statement (1990 FEIS) and 1990 Record of Decision (ROD) on the project;[88] and *Trustees for Alaska v. Gorsuch*,[89] a 1992 Alaska Supreme Court

---

[85] *Id.* at 45-46.

[86] *Id.* at 46-48.

[87] LMU-1 is the area which was proposed for permitting in the Diamond Shamrock Chuitna Coal Project. This area is now held by PacRim, and is promoted as the "Chuitna Coal Project."

[88] The FEIS was actually issued in late 1989, but because EPA's ROD was issued in 1990, and because the petitioners, intervenors, and commenters identify it as the 1990 FEIS, this decision does so as well, for ease of reference.

[89] 835 P.2d 1239 (Alaska 1992).

decision involving Trustees for Alaska's challenge on DNR's 1987 Permitting Decision that authorized the Diamond Shamrock Chuitna Coal Project.

25. Petitioners also submitted a few more recent reports that had not been submitted with the petitioners' 2007 Petition. They submitted reports by Palmer M.A., Trasky L., and Wipfli M.S., which are reports based on a review of draft aquatic baseline studies and PacRim's draft Fish and Wildlife Protection plan associated with the Chuitna Coal Project. Petitioners also submitted a report on Valley Fills in Appalachia, *Mountaintop Mining Consequences*,[90] in which the report discusses the burial of headwater streams by overburden during coal mining, along with the reports cited by Palmer, *et al.*, and quoted in the 2010 Petition. And petitioners submitted a report that discusses the development of Circumarctic peatlands, *Rapid Early Development of Circumarctic Peatlands and Atmosphere CH4 and CO2 Variations*.[91]

26. Thus, other than the refinements to the petition area, portions of the narrative that reclamation would not be technologically feasible, and the submittal of the above-referenced reports, the allegations and referenced materials in the 2010 Petition are largely the same, even verbatim, to that set forth in the 2007 Petition.

27. Under AS 27.21.260(b) and 11 AAC 90.709(a), the Commissioner may, in his or her discretion, extend the time for holding a hearing for "up to five additional months if the delay is necessary to provide a field season and a reasonable period of time to review the results of field season surveys." This option was exercised, and during the summer and fall of 2010, DNR conducted field work within the Chuitna River watershed in order to adequately review the petition. Field work consisted of multiple full day trips, conducted throughout the summer and fall of 2010, to different portions of the watershed. Field work included aerial and ground investigation of stream and riparian areas, as well as a review of the condition of reclaimed bulk coal sample sites within the 2003 and Lone Creek watersheds that are within the PacRim Chuitna Coal Project area. The additional time also allowed for the collection of additional surface and ground water information and fish population estimates by third party contractors working on the proposed Chuitna Coal Project. This information was used to more fully understand and address the potential impacts to

---

[90] Palmer, Margaret A., *et al.*, 327 Science 148 (2010).

[91] MacDonald, Glen M., *et al.*, 312 Science 385 (2006).

resources within the watershed from surface coal mining activities as they related to petitioners' allegations.

28. The following entities sought and were granted intervenor status under 11 AAC 90.705(e) in opposition to the petition:

(a) Alaska Mental Health Trust Land Office ("the Trust")
by Gregory Jones, Executive Director
718 L Street Suite 202
Anchorage, Alaska 99501

(b) PacRim Coal, LP ("PacRim")
by Joe Lucas
1007 W 3rd Ave, Suite 304
Anchorage, AK 99501

(c) Tyonek Native Cooperation ("TNC")
by Michaelene Stephan, President
1689 C Street, Suite 219
Anchorage, Alaska 99501

29. No person or entity sought intervenor status under 11 AAC 90.705(e) in support of the petition.

30. Intervenors PacRim, TNC and the Trust all strongly oppose an unsuitability designation based on the petition, and request that it be denied.

31. Both TNC and the Trust are substantial landowners in the petition area. They both submitted letters regarding their land interests and expressing their significant economic interests associated with the coal resources located within the petition area.[92] TNC specifically stated that the petition "seeks to end most development of the coal reserves in the region where TNC's lands are located and mostly TNC shareholders reside. Such a determination would frustrate TNC's efforts to increase local employment opportunities for its shareholders, who are the Native people and the majority of the population of the region. Developing the region's substantial coal resources is critical to economic growth."

---

[92] *See,* e.g., TNC comment letter on the petition, dated January 5, 2011, at 4; Trust comment letter on the petition, dated January 5, 2011, at 2.

32. The Trust wrote: "The Trust is the predominant landowner within the Chuitna River Watershed, and lessor of the coal resources located within the areas subject to the petition. As the owner of the coal resources proposed for development pursuant to the existing coal leases held by PacRim Coal, LP (PRC) in the subject area, The Trust has a significant stake in the outcome of the petition proceeding. . . . To allow it [the petition] to go forward would significantly affect the ability of The Trust and its lesee to develop this resource and would result in a major negative economic impact to The Trust and its beneficiaries."

33. PacRim, a leaseholder, also submitted similar letters.[93]

34. On January 19, 2011, DNR held a public hearing in Kenai, Alaska. One hundred and fifty individuals signed in attendance, representing many Southcentral Alaska communities. Fifty-seven individuals provided oral comments, with some individuals getting up a second time during the course of the proceedings to provide additional comments. Nearly all of the comments were in support of the petition, with one individual speaking against the petition.

35. On February 19, 2011, DNR held another public hearing in the Village of Tyonek. This second hearing was primarily scheduled to allow oral comments from those people who were unable to attend the January 19th hearing in Kenai due to adverse weather in Tyonek. Approximately 60 individuals attended the hearing, including individuals from Anchorage. Approximately eighteen people provided comments at the hearing. Nearly all of the comments were in support of the petition.

36. Public Comments: DNR received a total of approximately 550 comment submittals (letters, comment forms, e-mails and other oral comments documented in the hearing transcripts) during the petition review. Comments addressed both the petition and permitting issues directly relating to PacRim's proposed Chuitna Coal Project. Of the approximately 550 comments submitted, approximately 525 came from private individuals. Fifteen resolutions were submitted by trade organizations (fishery councils). Seven comment letters were from non-Governmental organizations; one comment letter came from a community council, and three comment letters were from Native Corporations. Eight papers supporting the petition were submitted.

---

[93] *See, e.g.*, PacRim's January 5 and 19, 2011, comment letters on the petition.

Approximately 30 comments favored dismissing the petition, while approximately 500 comments supported the petition. Comments received on the petition that were within the scope of and relevant to the petition process were considered in reviewing the petition and the formulation of this decision, and these comments and DNR's summary of comments and responses thereto are part of the agency's administrative record relative to the petition, and those written responses are expressly incorporated into this decision by reference.[94] Many of the comments focused on the Chuitna Coal Project -- both the project's location and PacRim's more recent efforts in seeking permits, environmental reviews and project development.

37. In accordance with AS 27.21.260(a), 11 AAC 90.701(a)(6), and 11 AAC 90.711, DNR has compiled information and data relating to the petition area and the petition's allegations (including detailed site-specific data required from companies as part of their permit applications) in order to develop this detailed statement and to render this decision. Detailed and relevant information regarding any petition area, including detailed soils and hydrologic data for the petition area is, as a practical matter, iterative and acquired over a period of several years. Among the key documents containing relevant, competent and scientifically sound data and information regarding the condition and environment of the Chuitna watershed are the 1990 FEIS, 1990 ROD, the 1987 Permitting Decision, and the Alaska Supreme Court *Gorsuch* decision.

Description of the Petition Area

38. The petition area is located in Southcentral Alaska, approximately 45 miles west of Anchorage (*see* Figure 1). The lands for which petitioners seek an unsuitability determination involve 3,560 acres (5.5 square miles), and cover stream reaches totaling approximately 118 miles (Chuitna watershed) (*see* Figures 2 and 3). As such, the streambeds and riparian areas do not occur in one or two confined areas on the west side of Cook Inlet, but rather meander and spread throughout the larger Chuitna watershed area. The Chuitna watershed is very large, encompassing approximately 95,600 acres (~150 square miles) and containing approximately 200 miles of streams. The main stem of the Chuitna River is approximately 25 miles in length, and courses from its headwaters at the base of the Alaska Range to the point

---

[94] 11 AAC 90.711(a).

where it empties into Cook Inlet between the communities of Tyonek (population 171[95]) and Beluga (population 20[96]). The Chuitna watershed is situated within the Beluga Plateau and consists of streams cutting through the underlying Tertiary sedimentary strata creating moderate relief, with elevations ranging up to 1400 feet.

39. The Beluga Plateau is characterized as having typical glacial moraine-controlled topography of irregular ridges and depressions. To the northwest of the watershed are higher plateaus and foothills leading to the Alaska Range. Approximately 30 miles west is Mt. Spurr, a volcano active since at least the Tertiary period, and to the southwest, the estuarine and alluvial lowlands of the Chakachatna embayment, and Cook Inlet borders the area to the south. The plateau is described as a "sedimentary plateau mantled by Quaternary glacial deposits."[97]

40. The general geology of the watershed consists of semi-consolidated, coal-bearing sedimentary rocks of the Tyonek Formation, overlain by a mantle of younger, unconsolidated sediments that include glacial deposits and alluvium located along stream reaches.[98] The Tyonek Formation is a sequence of fluvial and deltaic silts, clays, and sands with occasional gravel beds and coal seams."[99] The formation has been fairly compacted after burial and is poorly cemented.[100]

41. The hydrostratigraphic units within the watershed[101] consist of recent alluvium, glacial deposits, coals of the Tyonek Formation and the Sub-Red 1 Sands

---

[100] *Id.*

[101] The detailed studies and information of the hydrogeology and the hydrology for the watershed are limited, and much of the information used to process the 2010 petition is specifically focused upon the area within and around the proposed Chuitna Coal Project. Because similar lithologies are observed present throughout the watershed, this information has been used to provide a general description of the hydrology of the larger Chuitna

within the Tyonek Formation.[102] Alluvium consists of the sands and gravels within the course of present day stream channels. Glacial deposits consist of unconsolidated sediments characterized as unsorted mixtures of clay to boulder-sized material with lenticular bodies of well-sorted sands and gravels.[103] Coals consist of the Blue Coal, Red 3, Red 2, and Red 1 seams.[104] The interburden between the coal seams consists of interbedded and interfingering sequences of poorly consolidated and weakly cemented sandstones, siltstones, and mudstones.[105] This interburden material between coal seams and the overlying glacial deposit generally acts as an aquitard.[106] The Sub Red 1 aquifer is a fine to medium grained sandstone that underlies portions of the Chuitna watershed.[107] Coal seams within the Tyonek formation also occur below the Sub Red 1 sands.[108]

42. The near surface groundwater table generally mimics the surface topography, with flow towards streams and tributaries. This topography provides for surface-water collection and for ground-water recharge into the alluvium, coal seams, and overburden.[109] With these units, groundwater generally flows from higher elevations to lower elevations where it discharges as seeps or to the stream channels where the channel is below the local groundwater's piexometric surfaces.[110]

43. Recharge to the glacial deposits is by direct infiltration of precipitation (rain or snowmelt), infiltration from muskeg bogs in depressions, and from stream

---

watershed, but it is important to note that certain areas within the watershed may be markedly different from the available information due to erosion of the Tyonek Formation and/or displacement of lithologies due to faulting.

[110] 1990 FEIS at 4-25 to 4-26.

channels that are above the water table.[111] Overall, the storage capacity of the glacial deposits is relatively large compared to the other units, and the glacial material is the main source of recharge to the underlying coal and sand aquifers of the Tyonek Formation.

44. The groundwater direction in the upper portions of the Tyonek Formation is predominantly from west to east.[112] Groundwater flow direction is controlled locally by the presence of faulting and folding within the formation.[113] Within the watershed, the coal seams and the Sub Red 1 sands may interact with streams where these units outcrop or subcrop in the streams or alluvium.[114] This interaction with the streams may be in the form of upwelling to the stream or local recharge from the stream, depending on local structures influencing groundwater flow.[115]

45. Recharge to the coal seams occurs by direct infiltration on outcrops, downward flow from saturated glacial deposits, and by diffuse leakage through confining interburden layers.[116] Within the glacial deposits there is a small amount of vertical leakage which contributes to the recharge of the interburden, coal seams, and the Sub Red 1 sands.[117] Recharge for the Sub Red 1 sands can be inferred from well data to occur predominately at higher elevations in the western most part of the watershed and beyond.[118]

46. Discharge of groundwater into streams as baseflow contributes up to 30 percent of the total stream flow in streams in the Chuitna watershed.[119] Contributions to baseflow from the glacial deposits and aquifers in the Tyonek

[119] *Id.* at 3-27.

Formation are estimated to be approximately 89 percent and 11 percent, respectively.[120]

47. Poorly drained organic soils dominate much of the Chuitna Coal Project area, and materials underlying the surface consist primarily of alluvium, peat, glacial deposits and minor amounts of loess and volcanic ash.[121] The vegetation in the area is generally characterized as a combination of the following: closed spruce-hardwood forest, bottomland spruce-poplar forest, high brush communities and wet tundra.[122] Alder thickets and willow stands form a large portion of the Chuitna watershed.[123] No threatened or endangered plant species are known to exist in the area.[124] Of the wetland communities, open low shrub grass fen is the most common.[125]

48. A number of mammals exist in the region, most notably moose, beaver, and brown and black bear. Avian surveys have noted waterfowl, shorebirds, and raptors, though the habitat for birds is considered relatively poor in comparison to the Trading Bay and Susitna Flats State Game Refuges blanketing the area to the south and east, respectively.[126]

49. The waterbodies in the area support an array of primary, secondary, and tertiary producers (algae, invertebrates, and vertebrates).[127] These streams can be characterized as clear-water streams with moderate to high organic staining, stable channels and flows, good benthic productivity, and good to excellent fish habitat.[128]

50. Freshwater habitats in the project area support abundant resident and anadromous fish populations that have significant subsistence, commercial, and sport value. The entire main stem of the Chuitna River is accessible to adult anadromous

fish and is also utilized by juveniles for rearing and by resident fish populations.[129] By far the greatest fishery value of the Chuitna River system is represented by the production of Pacific salmon, especially Chinook, and coho.[130] Pink, chum, and red (sockeye) salmon are also present.[131] Important resident species include rainbow trout, arctic lamprey, slimy sculpin, coastrange sculpin, and threespine stickleback.[132] Pacific lamprey and Dolly Varden are also present within the Chuitna watershed.[133] Spawning activity was noted as far upstream as 11.4 km (7.2 mi) above the mouth of Stream 2003. In Lone Creek, pinks were seen as far up as 14.6 km (9.1 mi) above the mouth (at the confluence of Stream 2002).[134] Below Stream 2003, the Chuitna River was rated as very high in habitat values for Chinook and high for all other species.[135]

51. No threatened or endangered fish or wildlife species are known to be present within the petition area. The federal National Marine Fisheries Service (NMFS), with the National Oceanic and Atmospheric Administration (NOAA), has designated Cook Inlet beluga whales as depleted under the Marine Mammal Protection Act (MMPA), and as endangered under the Endangered Species Act (ESA). NMFS has also designated critical habitat for the Cook Inlet beluga whale within the waters of Cook Inlet.[136] The federally designated critical habitat is directly adjacent to the far east end of the petition area.

52. Recreational uses of the area include sport hunting, trapping, and fishing. The primary target for hunters in the area is moose. A limited number of brown and black bear are also taken.[137] In the fall and winter, waterfowl, spruce grouse, and ptarmigan are hunted. Trapping is limited to the fall and winter months,

and targets fur bearers such as beaver, river otter, lynx, marten, and wolverine.[138] Sport fishing in the Chuitna River is primarily for Chinook and coho salmon.[139]

53. The region was initially settled by the Dena'ina (Tanaina) people who lived along the coast near the present day settlement of Tyonek.[140] The Moquawkie Indian Reservation was established in 1915, and in 1970, the members elected to participate as a village corporation under the Alaska Native Claims Settlement Act (ANCSA).[141] Oil, gas, and coal exploration began in the area in the early 1960s, and the Chugach Electric Association's natural gas power plant at Beluga began operations in 1968.[142] In the mid-1970s, the state sold salvage rights to the beetle-killed spruce in the area and the resultant logging operations created a network of roads throughout the area.[143] A lumber mill was built at Tyonek in 1973, where lumber was chipped and exported. Logging occurred both south and north of the Chuitna River.[144]

54. Subsistence use of the petition area and the larger Chuitna watershed area through which the petition area meanders is similar to the recreational uses.[145] A report by the Alaska Department of Fish and Game on subsistence harvest in the Chuitna watershed area stated that "[s]almon made up the largest portion of harvests for home use in the study communities, but harvests of large land mammals, other fish, small game such as birds and furbearers, marine invertebrates, and wild plants

were also important. Marine mammal harvests were important in Tyonek."[146] Subsistence uses also include a collection of edible plants and berries.[147]

Potential Coal Resources in the Petition Area and the Effect on the Demand for and Supply of Alaska Coal

55. The petition area meanders throughout the Chuitna watershed. The watershed is within the Susitna/Beluga Coal Field. This coal field is one of the most significant coal fields in Alaska,[148] containing a resource estimated at 2.2 billion metric tonnes (MT) of low-sulfur coal.[149] The occurrence of coal seams in the west Cook Inlet area has been known for decades and large exposures of coal occur in the Chuitna River valley. These coal seams or coal measures are readily observed outcroppings in the Chuitna River itself and on banks and bluffs at many locations in the watershed. Evaluation of the coal resources in the area show that it has a low-sulfur content, and this resource would provide a cleaner burning fuel than many other coal resources currently in production in the United States.[150]

56. The lands in the Susitna/Beluga Coal Field are owned by various private and public entities, including the State of Alaska, the Mental Health Trust, Tyonek Native Corporation, Cook Inlet Region, Inc. (CIRI), and the Kenai Peninsula Borough.[151] Since statehood in 1959,[152] as well as following enactment of ANCSA in 1971,[153] many of the lands within the area were selected by the state and third parties

[153] 43 U.S.C. § 1601, *et seq.*

based upon the coal resources present in the area.[154] For example, the core townships in the Chuitna watershed are original Mental Health Land Trust selections, filed in 1960 with patent received in 1966.[155] The Trust selections were made on known resource lands containing large deposits of coal, sand and gravel, heavily timbered areas, and areas with significant oil and gas potential. It was anticipated that resource development leases on the lands would provide rental and royalty income for the Trust over the long term.[156] DNR estimates that an aggregate of at least $127 million has been expended on coal exploration and potential development within the Chuitna watershed.

57. In the 1970s, exploration drilling was conducted by the Diamond Alaska Coal Company[157] and the Beluga Coal Company.[158] This exploration continued into the late 1980s, with over 200 holes being drilled and four test pits being mined in the watershed. The exploration permits associated with these activities (Beluga-Center Ridge Exploration Permit No. 01-84-795 and Chuitna Exploration Permit Nos. 01-85-795 and 02-83-795) have been maintained and renewed continuously since first being issued.

58. The coal leases currently issued to PacRim (ADLs 36911, 36913, 36914, 37002, and 59502) were originally issued as Coal Prospecting Permits (CPPs) in early 1968. These CPPs were converted to Coal Leases in May of 1972 and 1978. The coal leases issued to the Barrick/Beluga Coal Company (ADLs 33795, 36282, 37471, 56982, 79816, 56982, and 79816) were issued as CPPs in 1967 and 1968, and converted to Coal Leases over a period between 1971 and 1976.

59. The State of Alaska and the Kenai Peninsula Borough have long recognized the potential importance of this resource to the people of Alaska. Land use plans, specifically the 2000 Kenai Area Plan,[159] and -- although no longer controlling --

the area's predecessor plan, the 1985 Susitna Area Plan for Management Unit 3,[160] identified and designated state land in the petition area for coal mineral development and activities. The planning processes for these two area plans were subject to extensive public review and comment. The Kenai Peninsula Borough's 2005 Comprehensive Plan and the 1988 Chuitna Area Resource Development Plan recognize coal as an economic resource within the Chuitna watershed.[161] The 2000 Kenai Area Plan states that these resources should "[c]ontribute to Alaska's economy by making subsurface resources available for development, which will provide job opportunities, stimulate economic growth, and establish a source of state revenues."[162]

60. Within the watershed there are currently two active coal exploration projects, PacRim's Chuitna Coal Project and Beluga Coal Company/Barrick's Beluga Coal Project. Coal reserves in the Chuitna River basin are estimated at 2.2 billion MT.[163] Estimated reserves within the Pac Rim Coal Leases are reported to be 771 million MT.[164] Areas leased as part of Beluga Coal Project are estimated to hold 600 million MT.[165] These project estimates do not include significant reserves located on CIRI lands and Trust lands not currently under lease within the watershed.

61. Work on the Diamond Shamrock Chuitna Coal Project (predecessor to PacRim's Chuitna Coal Project) intensified in the early to mid-1980s, with compilation of environmental baseline studies, preparation of mine engineering plans, market studies, and measurement of coal reserves, as well as applications for permits. In 1985, the Diamond Shamrock Chuitna Coal Project applied to the state for a permit to mine and DNR issued a permitting decision in 1987 approving the project, which then DNR Commissioner Judith Brady affirmed, with minor modifications, upon

reconsideration in 1988.[166] The EPA prepared the 1990 FEIS and issued its 1990 ROD in accordance with the National Environmental Policy Act (NEPA),[167] along with a national pollutant discharge elimination system permit (NPDES or wastewater discharge permit)[168] for the project. ADF&G issued Fish Habitat Permits for in-stream mining in one of the area streams (Stream 2003) and approved the sedimentation pond construction in the same vicinity. Subsequently, Diamond Shamrock did not proceed with the project due to economic conditions.

62. More recently, during the early to mid-2000s, coal prices began to rise and PacRim has renewed efforts to develop the project as the Chuitna Coal Project. PacRim applied for an NPDES permit triggering the need for a Supplemental EIS (SEIS) in 2006 that is in ongoing preparation. PacRim is also preparing new mine applications for an updated and reconfigured operation.

63. DNR has determined that, from a logistical and operational standpoint, because of the area that petitioners have delineated for a lands unsuitable determination, designation of those lands as unsuitable for surface coal mining operations would significantly fragment the coal resource within the watershed. This conclusion is based on simple geometry; the mosaic that would be created by the petition and overlay the footprint of the proposed Chuitna coal mine would leave almost no place for such a mine to fit and produce at an economic level.[169] Thus, it is DNR's opinion that this designation and the resulting fragmentation of the coal resource would negatively impact the economics of coal development on undesignated lands within the watershed.

64. The demand for coal in the United States and foreign markets has steadily increased over the last 50 years and coal is expected to remain an important

---

[166] Environmental groups administratively appealed DNR's 1987 Permitting Decision, which was ultimately litigated in state court, with Alaska Supreme Court issuing a decision in 1992. *Trustees for Alaska v. Gorsuch*, 835 P.2d 1239.

[167] 42 U.S.C. § 4321, *et seq.*

[168] 33 U.S.C. § 1342.

[169] *See, e.g.,* Figure 4 attached to this decision.

energy source into the future.[170] The U.S. Department of Energy has projected national coal consumption through 2035.[171] Even so, coal energy faces competition from other energy sources, such as natural gas and oil, as well as the evolving solar and wind energy sectors.[172] This competition will affect market demand for coal in domestic and foreign markets, but it will not eliminate coal as one of the world's principal energy resources.[173] The U.S. Energy Information Administration predicts that coal use will continue to grow, with most of it destined to generate electricity and the production of synthetic liquids.[174] The report predicts that coal will remain the largest source of electrical generation through 2035.[175]

65. In 2010, the United States produced approximately 984 million MT of coal.[176] Of that amount, approximately 74 million MT were exported to foreign markets.[177] In 2010, the primary destination for U.S. coal exports was the European market, with approximately 38 million MT delivered to various European countries.[178] The European market was followed by markets in Asia, North America, South America, and Africa, in order of decreasing imports of US coal.[179] Within the United States, the primary destination in 2010 of all coal produced is for electrical generation (885 MT); the other use is for steel production.[180]

66. Regarding the demand for, and supply of, Alaska coal, there is currently one active producer in Alaska, Usibelli Coal Mine in Healy, Alaska. In 2010, Usibelli

[179] *Id.*

[180] *Id.*

produced approximately two million MT of coal.[181] Approximately half of this was shipped to overseas markets including Chile, South Korea, and Japan. The rest of the coal produced by Usibelli is used at power plants located in Interior Alaska. The amount of coal used at six interior power plants is approximately a million tonnes a year and is not expected to increase in the near future.[182] The demand from overseas markets for Usibelli coal has been steadily increasing. Usibelli reported a 24% increase in exports over the same period in 2009.[183] Statewide, DNR has observed an increased interest by companies looking at Alaska coal for overseas markets as seen by an increase in requests to DNR for information on coal resources, particularly those in Southcentral Alaska. Also, "Alaskan coals have a lower sulfur content (averaging 0.3 percent) than most coals in the conterminous United States and are within or below minimum sulfur value mandated by the Clean Air Act amendments"[184], thus making Alaska coal an environmentally attractive fuel source.

67. There are two other projects approaching development and actively developing information to acquire permits. The first is the proposed Chuitna Coal Mine, through which some of the petition area crosses. At full production, this project is estimated to produce 12 million MT of coal per year, with an estimated mine life of 25 years.[185] Any coal produced from this project is expected to be exported to overseas markets. The other coal project in Southcentral Alaska that may start production in the relatively near future is Usibelli's Wishbone Hill Project. The potential minable reserves at this project are estimated at 14 million MT.[186] This

[186] Usibelli Coal Mine website: http://www.usibelli.com/Coal_leases.asp .

project is proposed to produce less than a million MT a year of coal for the export market.[187]

68. Regarding the economy of Alaska and its coal mining regions, the estimated value of Alaska coal in 2009 was approximately $65 million.[188] Based on the 2007-2009 values, the estimated value of coal produced in 2010 will be over $75 million.[189] The currently active Usibelli Coal Mine provides 130 full time jobs.[190] This number does not include additional jobs provided by support services and vendors. Using the most recently available information for the value of coal produced at Usibelli Coal Mine, the value of the coal produced at the proposed Chuitna coal project at full production would be approximately $430 million a year. According to the project description for the proposed Chuitna Coal mine, the project would employ up to 250 workers.[191]

Petitioners' Interests and Standing

69. Based on the petition, it appears that the Chuitna Citizens Coalition has provided sufficient information to support that at least three of its members -- Judy Heilman, Larry Heilman, and Terry Jorgensen -- have interests that could be adversely affected if surface coal mining operations occurred on some portion of the petition area, and that Chuitna Citizens Coalition, by virtue of these members' interests, therefore has standing to seek this merits review of the petition under AS 27.21.260. The Heilmans are residents of Beluga, one of two communities adjacent to the lowest reaches of the petition area,[192] and they use the petition area for various fish and game opportunities, though it is unclear where within the petition area they conduct these uses. Mr. Jorgenson routinely conducts commercial fishing activities near Ladd Landing in Cook Inlet, in a location approximately one mile from the mouth of the

Chuitna River at its confluence with Cook Inlet. All three express general environmental concerns about potential impacts from coal mining operations in the watershed and how those operations might affect their interests, but they provide little other detail in describing their interests.[193]

70. It is not clear that these members' interests would be affected by mining activities that might occur throughout the entire petition area. Former Commissioner Irwin had urged petitioners in his decision on the 2007 Petition to provide "evidence that supports the scope of the lands requested for designation bears some reasonable correlation to the asserted allegations [and] petitioners' interests."[194] In his decision, Commissioner Irwin also cited and quoted a 2006 OSM decision involving a large petition area that echoed his concern:

> Even though there is no specific size limit for a petition area, a basic regulatory criterion is that the petitioner must present "allegations of fact and supporting evidence, *covering all lands in the petition area*, which tend to establish that the area is unsuitable for all or certain types of surface coal mining operations" [30 CFR 764.13(b)(1)(v)]. Therefore, the large size of the petition area means that it is unlikely that the evidence presented can relate to the criteria for designation throughout the entire petition area. This is consistent with OSM's comments in the 1983 preamble that "OSM has found that under the previous regulation, very large areas for which no evidence was presented were included in petitions (Alton petition, Tongue River petition), thus requiring significant efforts by OSM and other interested parties on issues of questionable merit," 48 FR 41329 (September 14, 1983).[195]

71. While there are concerns that petitioners still have not provided, with this new petition, the evidence to sustain a review of the entire area for which they seek designation, and that these specific members' interests are actually more

---

[193] Petition at 12-13.

[194] July 16, 2007 decision on 2007 petition. *See also, id.*, at 6, 9, 10, 11, and 12 (stating, *e.g.*, that "petitioners have failed to sufficiently describe how any of the allegations and any particular type of coal mining activities that might occur on the petitioned lands would adversely affect petitioners' various interests"). And, as the Trust points out, a good deal of the land which the petition area traverses, such as Stream 2003 across the LMU-1 land leased by PacRim Coal, is 10 miles away from the Beluga community, and is "remote and inaccessible without written authority from TLO," and not located within any residential viewshed. Trust's January 5, 2011 comment letter on the petition, at 5.

[195] July 16, 2007 Decision, at 13-14, n. 11 (emphasis added), quoting OSM's January 13, 2006 Statement of Reasons for Determination of Completeness for the New River Lands for Mining Petition, at 12, in which OSM returned the petition to petitioners as incomplete and without merit. The OSM statement on the New River petition is available on OSM's website, http://www.osmre.gov/resources/newsroom/News/Archive/2006/011306.pdf .

narrowly concerned with the site-specific Chuitna Coal Project, this decision nonetheless reflects consideration of the entire petition area, and not just areas where coal mining might affect the community of Beluga and nearby lands, or the proposed Ladd Landing location (which proposed site is also actually outside the delineated petition area).

72. Cook Inlet Keeper, the second organizational petitioner, stated that it "combines advocacy, education, and science toward its mission to protect Alaska's Cook Inlet watershed and the life it sustains."[196] It cites the goals of preserving clean water, abundant fish and wildlife, and other policies "that are necessary to sustain healthy communities and strong local economies."[197] Cook Inlet Keeper asserts that it has members who live and undertake activities and work throughout Cook Inlet, and that it has members in the area that would be directly and adversely affected by mining activities in the Chuitna watershed.[198]

73. The statutory standing requirements require a sufficient description of how a petitioner's interests would be adversely affected with respect to both the potential coal mining activities, as well as to the lands for which designation of unsuitability is sought.[199] General assertions regarding an organization's goals or mission do not, alone, establish that a person (in the organization's case, a member) is adversely affected," nor does the general assertion that members are "directly affected," without more evidence demonstrating direct affects, necessarily support standing.[200]

74. While it is questionable whether Cook Inlet Keeper has provided adequate information to show its members' interests could be adversely affected by coal mining activities anywhere within the petition area, Chuitna Citizens Coalition has substantiated that at least three of its members' hold such interests, at least for portions of the petition area, and therefore the petition is subject to this merit review.

199 AS 27.21.260(b).

200 *Sisters of Providence in Washington, Inc. v. Department of Health and Social Services*, 648 P.2d 970 (Alaska 1982).

Intervenors' Interests

75. The three intervenors on the petition hold unique interests, including significant property interests, which could be adversely affected if the petition area is designated unsuitable for surface coal mining.

76. In accordance with the land conveyance system established under ANCSA,[201] the surface estate of 47,000 acres in the Chuitna watershed have been conveyed to the local Village Corporation, TNC, and the subsurface estate for that acreage was conveyed to a Regional Corporation, in this instance CIRI. TNC asserts that responsible coal mining in the Chuitna watershed, throughout which the delineated petition area meanders, would bring economic development, infrastructure projects, and job opportunities for the benefit of its shareholders, approximately 200 of whom live in the Village of Tyonek. TNC describes that at present this is especially true with respect to PacRim's Chuitna Coal Project, and TNC has entered into contracts with PacRim which relate to development of the project. The same benefits for TNC shareholders could also be realized through contractual relationships if CIRI were to pursue coal mining in the future. In addition, were CIRI to develop coal resources in the Chuitna watershed, all shareholders of Alaska Native Corporations, including TNC shareholders, will receive dividends and other potential benefits through revenue-sharing required under ANCSA.[202] TNC also cites other non-coal economic development plans that it wishes to undertake, but those plans are predicated on development of coal mining activities in the petition area. If the petition area is designated unsuitable for surface coal mining, TNC expects the designation will frustrate or deprive TNC's ability to secure economic benefits for its shareholders.[203]

77. The Trust owns a large portion of the lands in the petition area, and efforts to obtain that ownership go back to 1960.[204] The Trust Land Office (TLO) manages Trust lands, and its "primary responsibility is to maximize revenue from Trust land over time and to protect and enhance the value of Trust land ... on behalf

---

203 TNC's January 5, 2011 comment letter on the petition.

204 DNR Land Administration System case file abstracts.

of Trust beneficiaries."[205] The Trust is a state corporation that administers the Alaska Mental Health Trust, whose beneficiaries include individuals with mental illness, developmental disabilities, chronic alcoholism and Alzheimer's disease and related dementia.[206] The TLO is obliged to consider a number of trust management principals in managing the Trust's assets, including "maximization of long-term revenue from trust land," "protection and enhancement of the long-term productivity of trust land," and "encouragement of a diversity of revenue-producing uses of trust land."[207] Many of these lands are coal-bearing, and a significant subset of these lands is leased to PacRim Coal, including the Chuitna Coal Project area (*e.g.*, LMU-1). If coal production at the Chuitna Coal Project occurs, TLO estimates that it will provide significant revenue to the Trust over time, generating a 5% royalty that would equate to $300 million dollars over the 25-year projected life of the mine. If the petition area is designated unsuitable for surface coal mining and the effect of that designation deters coal mining at the Chuitna Coal Project, TLO will not be able to attain these royalties for mental health programs that support Trust beneficiaries.[208]

78. PacRim holds the leases for coal deposits in the petition area. These leases originated more than 30 years ago.[209] As noted earlier, many of the petition's allegations, supporting evidence, as well as public comment, focus on PacRim's efforts to develop the Chuitna Coal Project. PacRim has made a significant financial investment in its efforts to develop the project.[210] As PacRim notes, the predecessor Diamond Shamrock Chuitna Coal Project was designed and permitted in the late 1980s and early 1990s, but due to market conditions, the project did not go forward. PacRim has restarted efforts to obtain new permits for the Chuitna Coal Project, and is working with the federal agencies on preparation of a SEIS. PacRim's more recent

efforts have been underway since 2005.[211] Thus, if the petition were granted, PacRim's property interests would be adversely impacted.

79. Attached Figure 2 delineates surface estate ownership within the Chuitna watershed. With the exception of TNC, all of the entities listed also own the subsurface estates, including the right to any coal resources and the financial returns from the extraction and sale of that coal. As noted earlier, CIRI owns the subsurface estate to TNC's lands. And, as Figure 2 shows, the petition area meanders throughout the larger Chuitna watershed area.

Consequences Associated with Granting, Granting in Part, or Denying the Requested Unsuitability Designation

80. In rendering a decision on a petition, a number of alternative outcomes can be reached, and with each come certain consequences. These outcomes include: designating the petition area in its entirety as unsuitable for surface coal mining operations; designating only a portion of the petition area as unsuitable; denying any of the petition area as unsuitable; or denying to designate any of the petition area as unsuitable but setting forth conditions to apply to future coal mine permitting. Each option is discussed below.

A. Consequences of Designating the Petition Area in its Entirety as Unsuitable for All Types of Surface Coal Mining Operations

81. In order to designate the petition area in its entirety, the Commissioner would have to find from a review and evaluation of the petition's allegations that the mandatory or discretionary criteria applicable to the allegations are supported by competent and scientifically sound data and information, and consider planning activities of federal, state, and local governments.[212] From an on-the-ground disturbance perspective, designation of the entire delineated petition area as unsuitable for all types of surface coal mining operations (including activities to extract the coal and to transport the coal from the deposit site to Cook Inlet shore facilities), as the petition requests, would essentially eliminate the potential future impacts of those operations to the petition area's current environmental condition.

---

[211] PacRim's January 19, 2011 comment letter on the petition, at 2.

[212] AS 27.21.260(a) and AS 27.21.260(c).

82. However, the actual consequences of granting the requested designation would likely have farther-reaching geographical ramifications beyond the identified streambed and riparian land features delineated by petitioners in the petition. While coal exploration could still occur in the designated area,[213] and coal mining could theoretically occur outside the petition area within the Chuitna watershed, it is DNR's judgment that the designation would likely render most, if not all, coal mining in the watershed economically unfeasible to efficiently extract and transfer coal out of the watershed, given the fragmenting effect that the designation would have on the watershed's coal resources. This conclusion is based on simple geometry; the mosaic that would be created by the petition and (at the same scale) overlay the footprint of the proposed Chuitna coal mine, existing Usibelli coal mine, or the proposed Wishbone Hill mine, there is almost no place where such a mine could fit and produce at an economic level.

83. Thus, if the petition area were designated in its entirety for all types of surface coal mining operations, it is likely that the larger Chuitna watershed, *i.e.*, the petition area's streambeds and associated riparian areas, as well as other lands, vegetation, soils, hydrological regime, and the areas used by fish and wildlife surrounding the petition area, would not be impacted by coal mining development and operations. In the absence of feasible mining projects, and absent any changes to land management plans or uses, an area more expansive than the petition area -- quite likely the 96,000 acres of the Chuitna watershed -- would essentially remain as it is today. The area would only reflect impacts from those activities that variably have occurred in the area over the past several decades, activities which include coal exploration, recreational and subsistence uses, fishing and hunting, fulltime and seasonal residential use, episodic road building, natural gas exploration and production projects, and logging activities.[214]

84. The requested designation, if granted, and the ramifications perceived from that designation for surface coal mining in the greater Chuitna watershed, would mean that up to 2.2 billion MT of low sulfur, cleaner burning coal present in the

---

[213] AS 27.21.260(h).

[214] OASIS Environmental Inc., *Land Use Baseline Summary Report for the Chuitna Coal Project*, (October 2006).

Chuitna watershed, could not be extracted and used for power generation. Land owners in the area would not be able to realize -- for themselves or for those members on whose behalf they manage the coal resource in trust -- financial gains and program benefits from the extraction and sale of that resource. No local employment (such as the potential 250 direct jobs relating to the Chuitna Coal Project) would be realized from surface coal mining activities. Future surface coal mining in the area could only be conducted if the unsuitability designation were terminated through a petition.[215] The possibility of terminating a designation means that the coal resource is not irreversibly lost.

85. Based on Department of Energy data, while national coal consumption should not, at least in the foreseeable future, be limited by supply constraints caused by a designation of the petition area, the low-sulfur content of the watershed's coal resources and its resultant cleaner-burning fuel emissions provide incentive for seeking to develop this coal resource.

B. Consequences of Designating Parts of the Petition Area as Unsuitable for All or Certain Types of Surface Coal Mining Operations

86. The petitioners have not requested, as an alternative, that only certain portions of the petition area be designated as unsuitable, nor have they specified a narrower range of types of surface coal mining operations that could be prohibited, while other operations could be permitted. Nonetheless, the Commissioner has the authority, based on a review of a petition, to designate a more discrete portion or portions of the petition area as unsuitable for surface coal mining operations, or to prohibit some rather than all types of surface coal mining activities if he or she finds such action is warranted, and in accordance with applicable statutory and regulatory criteria. In order to designate any portion of the petition area as unsuitable for surface coal mining operations, the Commissioner would have to find from a review and evaluation of the petition's allegations that the mandatory or discretionary criteria applicable to the allegations are supported by competent and scientifically sound data and information, and take into consideration planning activities of federal, state, and local governments.[216]

---

[215] AS 27.21.260(b).

[216] AS 27.21.260(a) and AS 27.21.260(c).

87. For more discrete portions of the petition area that may, as a consequence of the evaluation, be designated by the Commissioner as unsuitable for all or certain types of surface coal mining, the on-the-ground consequences would generally be similar to those if the entire petition area were designated, except not on a watershed-wide scale. For example, if only streambeds and riparian areas within the LMU-1 lands were designated as unsuitable, while that, due to feasibility factors, would likely preclude any mining at all for the LMU-1 lands as part of the Chuitna Coal Project, it probably would not preclude surface coal mining operations elsewhere in the larger Chuitna watershed -- although those other operations may have fewer infrastructure options (*e.g.*, potential shared port facility) in the absence of the Chuitna Coal Project. It is likely that the partial designations would mean that streambeds, associated riparian areas, wetlands, vegetation, soils, hydrological regime, and the areas used by fish and wildlife through which the petition area crosses would not be impacted by coal mine development and operations.

88. Partial designation also would likely mean that coal resources for those designated areas would not be extracted or sold, due to feasibility factors. For example, if streambeds and riparian areas within the LMU-1 lands were designated, it is unlikely that it would be feasible to mine the LMU-1 area, and that would mean that at least 300 million MT of low sulfur, cleaner burning coal present in the area would not be extracted and used for power generation. The Trust land owner would not realize -- for the benefit of those beneficiaries on whose behalf the TLO manages the coal resource -- financial gains and mental health program improvement from the extraction and sale of that resource, and that unrealized gain, based on a 5% royalty, could equate to as much as $300 million dollars. Local employment anticipated from the potential 250 jobs relating to the Chuitna Coal Project would not be realized. Future surface coal mining in the designated portion could only be conducted if the unsuitability designation were terminated through a petition.[217] The possibility of terminating a designation means that the coal resource is not irreversibly lost.

89. Based on Department of Energy data, while national coal consumption should not, at least in the foreseeable future, be limited by supply constraints caused by a designation of a portion or portions of the petition area, the low-sulfur content of

---

[217] AS 27.21.260(b).

the watershed's coal resources and its resultant cleaner-burning fuel emissions provide incentive for seeking to develop this coal resource.

C. Consequences of Denying Designation of the Petition Area in its Entirety

90. The Commissioner may find that there is insufficient evidence to support the allegations and deny the designation of the petition area in its entirety. Nevertheless, and this point must be emphasized, such denial would *not* constitute approval of surface coal mining operations in the petition area, and those approvals would still need to be gained through project-specific permitting processes conducted by multiple state and federal agencies.

91. Because denial to designate any portion of the petition area would mean that the area is not closed to potential future coal mining, this decision would leave open the possibility of coal development, including the realization of potential financial and employment associated with coal mining activities, as well as the opportunity to develop low sulfur coal as a fuel burning resource on national and international markets.

92. At the same time, however, potential impacts to fish and wildlife, subsistence or recreational uses, water resources, air quality, soils, cultural resources, and esthetics (visual and noise), associated with surface coal mining activities may occur or be observed. The significant scale of those impacts would depend on a variety of factors, including the following: permit conditions placed on any specific coal mining operation; the scale of the coal mining operations (its footprint/size) and the anticipated mine life; the postmining land use; the viewshed(s) involved; and whether subsistence or recreational users have access or authority to access lands in a given project area.

D. Consequences of Denying Designation of the Petition Area, But Setting Forth Certain Requirements to Apply to Future Permits

93. As a consequence of evaluating the petition and a determination not to designate a petitioned area as unsuitable, the Commissioner may determine that certain requirements should routinely apply to coal mining permits issued in the future in order to mitigate potential impacts of any project-specific operations to the

land and resources in the petition area.[218] However, the administrative record, including petitioner's allegations and evidence, would need to provide a basis for determining the need for any requirements that might be delineated in advance of project-specific permitting. Having evaluated the 2010 Petition and the administrative record, I do not find any evidence that would cause me to impose any mitigation requirements for coal mining operations in advance of project-specific permitting that may be proposed for the petition area.

The Petition's Allegations

Petitioners' Allegation I: For surface coal mining operations in the petition area, reclamation in accordance with ASCMCRA is not technologically feasible.

94. Under AS 27.21.260(c)(1), the Commissioner "shall designate an area as unsuitable for all or certain" coal mining activities "if the commissioner determines that reclamation in accordance with this chapter and regulations adopted under it is not technologically feasible." This provision is considered mandatory, that is, the Commissioner must designate lands as unsuitable if the Commissioner determines that reclamation in accordance with the applicable authorities is not technologically feasible.

95. At the outset of Allegation I, petitioners argue that reclamation is not technologically feasible under ASCMCRA. To support this argument, petitioners assert: (i) reclamation means that the disturbed areas are restored in a timely manner to conditions that support pre-mining land uses or "higher and better uses"; (ii) there is no "higher and better" use of this area than its pre-mining use as high quality fish and wildlife habitat; (iii) surface coal mining will "cause irreversible damage to fish and wildlife habitat;" (iv) reclamation cannot return the disturbed areas to pre-mining condition; and (v) therefore reclamation is not technologically feasible.[219] In essence, this is a syllogism. Coupled with this syllogism, petitioners argue that reclamation is not technologically feasible because mining operations cannot meet the state's "performance standards."[220] These arguments, which for reasons that are discussed in

---

[218] 11 AAC 90.711(c).

[219] *Id.* at 14-16.

[220] *Id.* at 15-16.

detail below, misstate and misapply the applicable law, and are constant themes threaded throughout Allegation I.

96. From this mistaken premise, petitioners' Allegation I makes four specific arguments to support their contention that reclamation of impacts from surface coal mining activities in the petition area would not be technologically feasible. [221] These arguments are:

- construction and operation of a surface coal mine on the identified lands would irreparably harm the area's hydrologic balance;
- reclamation would not restore groundwater recharge capacity in the area;
- reclamation would not restore aquatic productivity to pre-mining levels; and
- surface coal mining in the identified lands cannot be designed and operated to minimize changes in water quality and quantity and hydrology enough to ensure no adverse effects to fish and wildlife habitat.

97. In reviewing petitioners' allegation that reclamation of impacts from surface coal mining activities in the petition area would not be technologically feasible, consideration was given to DNR's 1987 Permitting Decision on the Diamond Shamrock Chuitna Coal Project, the 1988 Administrative Appeal Decision affirming the 1987 Permitting Decision, EPA's 1990 FEIS and ROD on the same project, and the Alaska Supreme Court's *Gorsuch* decision on DNR's 1987 Permitting Decision. Additional background relative to these documents is required to understand why they are relevant to an analysis of petitioners' allegations that reclamation in the petition area in accordance with ASCMCRA is not technologically feasible. Significantly, these documents all contained findings, or affirmed findings, that reclamation in the petition area *would be* technologically feasible.

98. Based on the ASCMCRA permit application submitted on the Diamond Shamrock Chuitna Coal Project, DNR issued a permitting decision in 1987, approving the construction and operation of the proposed coal mine. The findings supporting DNR's approval are recorded in (1) a March 5, 1987, "Conditions of Decision and

---

[221] Petition, Allegation I, subparts A-D, at 14-33.

Findings of Compliance for the Diamond Chuitna Mine" and (2) an August 21, 1987, "Decision to Issue a Surface Mining Permit Diamond Shamrock Chuitna Coal Joint Venture Diamond Chuitna Mine." These documents were later combined into a single document referenced herein as the "1987 Permitting Decision." While the petitioners and intervenors cite the permitting approval in general ways, DNR made a number of key findings in these documents regarding reclamation and hydrologic impacts:

- Diamond Shamrock's Wetland Revegetation Plan satisfactorily addressed DNR's initial concerns about whether wetland habitat could be restored. The agency noted, however, that the plan would be subject to continuing DNR review and that, if appropriate, changes could be made to the plan during actual mine operation.[222]
- The project was subject to several DNR stipulations relative to reclamation measures and activities that would be required contemporaneous with mining. These included measures for sediment and drainage control (including sediment control ponds),[223] and measures for protecting surface and groundwater hydrology (including additional hydrologic monitoring).[224]
- In accordance with AS 27.21.180(c)(2), Diamond Shamrock had "demonstrated that reclamation as required by AS 27.21 and 11 AAC 90 can be accomplished under the reclamation plan," subject to DNR-required modifications.[225]
- In accordance with AS 27.21.180(c)(3), "an assessment of the probable cumulative impact of all anticipated mining in the area on the hydrologic balance has been made and the proposed operation has been designed to

[223] *Id.* at 40-42, and at 53-92 (consisting of an August 16, 1987 report prepared for DNR by Arctic Hydrologic Consultants that provides a technical review on the proposed Sediment and Drainage Control Plan).

[224] *Id.* at 44-48.

[225] *Id.* at 125, and at 326-361 (containing Section IV findings).

prevent material damage to the hydrologic balance outside the permit area."[226]

- Regarding stream restoration, DNR -- while acknowledging that "post-mining baseflows will take ten to fifteen years to reach pre-mining levels and that it was important that enhancement techniques be maintained until the pre-mining flows are reached" -- found that the application complied with 11 AAC 90.327 (Stream Channel Diversion) for the initial permit term.[227]

99. On June 28, 1988, then DNR Commissioner Judith Brady adopted, with minor modifications, the Hearing Officer's May 21, 1988, proposed decision (1988 Administrative Appeal Decision) on the consolidated administrative appeals brought on the 1987 Permitting Decision by Trustees for Alaska, the project proponent Diamond Shamrock, and others. The Hearing Officer's proposed decision recommended certain modifications to the permitting decision, including lengthening the permit term from five to ten years.[228] Based on the administrative record, the Hearing Officer also found that "Diamond's reclamation plan, including its wetlands restoration plan, is sufficient to restore the disturbed area to a condition that is capable of supporting fish and wildlife."[229] With this 1988 Administrative Appeal Decision, Commissioner Brady affirmed the 1987 Permitting Decision.

100. EPA also conducted an environmental review of the proposed coal mine through its 1990 FEIS and issued a 1990 ROD approving the proposal. Thereafter, EPA issued an NPDES permit for the mine's wastewater discharges. In the two-volume 1990 FEIS and the 1990 ROD, EPA considered several factors and made a number of key findings:

---

[226] *Id.* at 125, and at 362-404 (containing Section V findings).

[227] *Id.* at 202.

[228] 1988 Administrative Appeal Decision at 5-7.

[229] *Id.* at 33-35.

- EPA considered numerous impacts the project potentially could have on the environment, including possible impacts to wetlands, subsistence, fish and wildlife, and associated habitat impacts.[230]
- EPA concluded that the area in which the project was to be located was not pristine. For example, it had been previously entered for logging and oil and gas purposes.[231]
- EPA stated the following regarding potential impacts to wetlands:

> The acidic, muskeg-type wetlands which are widely dispersed throughout the area are not highly productive and the net primary productivity of replacement communities could be as high or higher than the communities that now exist. Therefore, adverse impacts to primary wetland productivity would not be significant on a regional scale. Food webs would be interrupted in the immediate vicinity of pre-mining wetland areas, but such interruption would probably not be significant on a regional basis because of the isolated nature of most area wetlands and the large extent of similar wetlands outside the project area.[232]

- EPA noted that the wetlands within the Diamond Shamrock Chuitna Coal Project area were similar to wetlands found outside the project area (i.e., the Chuitna watershed/drainage).[233]
- In the ROD, EPA stated that the authorizing agencies, including EPA and DNR, anticipated that reclamation within the project area would be undertaken in accordance with specific requirements, and therefore feasible.[234]

101. After the Commissioner upheld DNR's permitting decision upon appeal, multiple plaintiffs, including Trustees for Alaska, appealed the Commissioner's

decision.[235] With the exception of one modification, which required a separate ASCMCRA permit for an eleven mile access/haul road from the mine site, the superior court upheld the permitting decision. Upon Trustees' appeal of the superior court's decision, the Alaska Supreme Court -- while remanding the decision to DNR for further consideration of cumulative effects of activities associated with the permit, and reconsideration of the reclamation bond amount -- addressed Trustees' contention that DNR erred in approving the proposed plan for restoration of ecological functions and revegetation. Among other things, the Court held:

- that DNR had found that the proposed reclamation and wetlands restoration plans for the leased lands were "sufficient to restore the disturbed area to a condition capable of supporting fish and wildlife."[236]
- that DNR acted reasonably in accepting the restoration plan, because the plan

> describes how wildlife habitat will be recreated by constructing peat-filled depressions which will be planted with various plant species. In addition, three sediment ponds will be inoculated with plant and insect life forms, and seedlings will be planted to provide a vegetation canopy layer for the benefit of wildlife.[237]

102. The petitioners fail to provide convincing evidence with their petition to suggest that anything has changed since DNR's 1987 Permitting Decision determining that the restoration and reclamation plans were sufficient (including to restore disturbed fish and wildlife habitats), EPA's 1990 findings that reclamation was feasible, and the *Gorsuch* decision, in which the Alaska Supreme Court upheld DNR's decision concerning the feasibility of reclamation. Nor is there any evidence in the administrative record, or in the petition, that justifies issuing a finding that contradicts these earlier decisions.

103. The findings and other information contained in the foregoing documents provide an important backdrop for the following discussion. Allegation I relies on a number of faulty premises, speculative information, misinterpretation of regulatory

---

[235] *Gorsuch*, 835 P.2d at 1239.

[236] *Id.* at 1249.

[237] *Id.*

requirements and performance standards, a failure to assume that contemporary coal mining practices will be followed, as well as selective citation to information that, as a whole, does not support the contention that reclamation in accordance with ASCMCRA is not technologically feasible. Indeed, with respect to each of the petitioners' allegations (I, II, III, and IV), rather than assuming that contemporary mining practices will be followed and that any approved site-specific project must show it will comply with performance standards or the project will not be approved, the petitioners essentially assume that these practices and standards will *not* be met. That is not the basis upon which an unsuitability petition is reviewed and decided.[238]

A. Petitioner's overarching assertion that reclamation requires restoration of the petition area to the premining condition and that there is no higher and better use of the area than for fish and wildlife habitat.

104. Petitioners' overarching assumption in Allegation I is that the petition area must be returned to its premining condition and that "there is no higher and better use" of anadromous water bodies and the riparian areas than to support fish and wildlife habitat.[239] This allegation calls into play the state's postmining land use regulation at 11 AAC 90.481, which states, in relevant part, the following:

> (a) All disturbed areas must be restored in a timely manner to conditions that are capable of supporting
>
> (1) the uses which they were capable of supporting before any mining; or
>
> (2) higher or better uses achievable under the provisions of this section.

105. Petitioners are mistaken that the petition area must be returned to its pre-mining condition for at least five primary reasons. First, as an initial matter, embedded in SMCRA and ASCMCRA is the recognition that coal mining will

---

[238] 11 AAC 90.701(a)(5)(a petition must assume "that contemporary mining practices required under AS 27.21 and this chapter would be followed if the area were mined"). *See also* AS 27.21.210 (stating that all permits issued under the Act shall require that surface coal mining and reclamation must comply with environmental performance standards). OSM has also stated that a petitioner "must assume that contemporary mining practices required under the applicable regulatory program will be followed." 48 Fed. Reg. 41312, 41328-29 (Sept. 14, 1983). *Accord In re Permanent Surface Mining Regulation Litigation*, 620 F. Supp. 1519 (D.D.C. 1985).

[239] Petition at 15.

significantly impact an area.[240] Thus, state and federal law authorize surface coal mining despite its effects on the environment.

106. Second, petitioners' argument related to the appropriate postmining land use is premature. Under state law, determining the "higher or better" postmining use will be addressed during the permitting phase when the operator must present a postmining reclamation plan, which "must contain a detailed description of the proposed use, following reclamation, of the land to be affected by surface operations or facilities."[241]

107. Third, a petition must assume that "that contemporary mining practices required under AS 27.21 and this chapter would be followed if the area were mined."[242] DNR's regulation is consistent with federal law, where the OSM has also stated that a petitioner "must assume that contemporary mining practices required under the applicable regulatory program will be followed."[243] Yet petitioners turn this standards on its head -- i.e., Trustees argues that "in order for reclamation in accordance with SMCRA and ASCMCRA to be considered feasible, it must meet the performance standards that the DNR has established to . . . . Surface coal mining and reclamation on lands within the Chuit River watershed . . . would be incapable of meeting a number of these performance standards[.]"[244] Consequently, petitioners, by assuming that any mine in the Chuitna watershed will not be able to comply with DNR's performance standards, have misconstrued the petition process.

108. Fourth, petitioners fail to acknowledge that a mine operator will not receive the requisite permits if it cannot satisfy the performance standards set out in 11 AAC 90.481. Thus, to the extent that an operator cannot meet the performance standard cited by petitioners (11 AAC 90.481), it will not receive the requisite permits.

---

240 30 U.S.C. § 1202; AS 27.21.010. This issue is discussed in more detail below.

241 11 AAC 90.087.

242 11 AAC 90.701(a)(5).

243 48 Fed. Reg. 41312, 41328-29 (Sept. 14, 1983).

244 Petition at 16.

109. And fifth, petitioners assume inaccurately that an area's premining uses must dictate the appropriate postmining uses.[245] But one cannot simply assume that the premining land use is the "higher and better use" for an area. Instead, as discussed below, the landowner and the regulatory authorities determine the appropriate postmining land use.

110. More specifically, petitioners' arguments related to the "higher and better use" of these lands must be considered in connection with several other applicable provisions, including 11 AAC 90.481(c) and 11 AAC 90.087, area management plans,[246] as well as in consultation with the affected landowner.

111. State regulation defines "higher and better uses" as those "postmining land uses that have a higher value or other benefit to the landowner or community than the premining land use."[247] Determination of the postmining land use may be generally identified by the land owner prior to any coal mining activity, and then with more specificity in the permitting phase. Thus, there is no presumption, as petitioners assert, that the "higher and better" postmining land use for the petition area is the support of fish and wildlife habitat, although those uses would certainly be considered at the appropriate time. And under 11 AAC 90.481(c), when considering higher and better use, the Commissioner would consider measures to prevent or mitigate adverse effects on fish, wildlife, and related environmental values and threatened or endangered plants as identified and incorporated into the postmining land use plan, if appropriate.

112. As noted previously, ownership of land within the petition area and the larger Chuitna watershed is mixed, and consists of the following: State lands, private lands (with the surface estate belonging to Tyonek Native Corporation), CIRI lands, Kenai Peninsula Borough lands, Trust lands (managed by the Trust Land Office (TLO)), and parcels owned by private individuals. For those lands lying in the petition area, as well as for any areas in the larger Chuitna watershed, "higher and better uses" of these lands would be determined after consultation with the relevant land holders during the permitting phase of a specific coal mining project.

---

[245] Petition at 15.

[246] AS 27.21.260(a)(1).

[247] 11 AAC 90.911(50).

113. In its January 5, 2011, letter commenting on the petition, the TLO correctly points out some of the regulatory requirements applied in considering postmining uses:

> While fish and wildlife habitat may be an ancillary use of this land, the TLO is obligated to consider any viable use of this land in the future that could be (sic) produce benefits to The Trust and its beneficiaries. The TLO fully anticipates having input into the reclamation plan to enhance the value of this land for future uses. The provisions of 11 AAC 90.087 and 11 AAC 90.481 address post mining land use and provide that consideration be given to making the proposed operation consistent with surface owner plans and creating conditions that are capable of supporting higher and better land uses.[248]

Thus, for the Chuitna Coal Project, TLO is the landowner that has a major stake in determining, in consultation with regulatory authorities, the postmining land use for this specific project's affected area.

114. Moreover, as required by AS 27.21.260(a)(1), reviews of available land planning documents for the Chuitna watershed, through which the petition area meanders, have been conducted. Area plans provide a useful tool to guide permitting decisions both before and after mining.

115. The primary guide for state decisions on state land in the petition area is the 2000 Kenai Area Plan. This plan specifically excludes federal, borough, private, Native Corporation, and Trust Lands.[249] Prior to the transfer of landownership of the PacRim Chuitna coal leases to the Trust, those leased lands were owned by the State. Coal development was one of the primary uses designated for the area under both the 2000 Kenai Area Plan (specifically indentifying the "Chuitna Area Coal Leases")[250] and the previously applicable 1985 Susitna Area Plan.[251] The Kenai Area Plan anticipates mining of fish streams and fish habitat by noting that when DNR issues a permit for mining in or adjacent to a fish stream, the activity will be conditioned by the permit to be protective of fish, and noting that mining in fish streams requires permits from DEC and ADF&G.[252] The 2000 Kenai Area Plan also states that the postmining land

---

[248] January 5, 2011 Trust letter at 4.

[249] 2000 Kenai Area Plan at 1-9.

[250] *Id.* at 3-308.

[252] 2000 Kenai Area Plan at 2-34.

use is to "provide high value habitat for moose and provide water quality for downstream fisheries."[253] With the transfer of ownership of the lands, identification of postmining land uses are subject to the Trust's discretion.[254]

116. Review of the Kenai Peninsula Borough's 2005 Comprehensive Plan shows that it recognizes coal as an economic resource within the borough, but does not specifically discuss land use plans within the watershed. The 1988 Chuitna Area Resource Development Plan discusses the borough's "keen interest in potential large scale development of coal"[255] in the Chuitna watershed, including roads, conveyors, and ports, but does not discuss postmining land use. Instead, it relies on the State's planning documents to guide land use. The remainder of the land is either Native Corporation or Mental Health Trust lands which are guided by their own planning and development strategies, and these landowners support responsible coal mining operations.

117. For the foregoing reasons, the petitioners' allegation rests on a misinterpretation of the regulatory requirements and the misapplication of these requirements. The above discussion shows that the determination of the postmining land use is at the discretion of the landowner, with some input and approval necessary by the regulatory authority, and that, as a practical matter, postmining land uses are more formally fashioned during the permitting phase of a specific proposed coal mining operation. Therefore, declaring that there can only be one higher and better use at this stage is premature.

B. Petitioners' allegation that construction and operation of a surface coal mine in the petition area would irreparably harm the area's hydrological balance.

118. Petitioners' contend that surface coal mining would irreparably harm the area's hydrological balance, destroying streams, riparian areas and wetlands in the

---

[253] *Id.* at 3-307.

[254] Transfer of ownership of lands within the petition area, including the PacRim leased lands, to the Trust, had actually been contemplated since 1956, but delayed due to litigation. Transfer of the lands was finalized in 2010. Case abstracts for ADLs 36911, 36913, 36914, 37002, and 59502.

[255] Kenai Peninsula Borough's 2005 Comprehensive Plan at I-1.

Chuitna watershed, and dramatically affecting the local hydrology.[256] To support this argument, petitioners cite one performance standards (11 AAC 90.321) that protects the area's hydrologic balance and claim that a coal mine in the petition area cannot meet this standard.

119. The petitioners' argument is unavailing because they (i) take the apparent position that coal mining operations can have no adverse impacts on areas where mining activities occur; (ii) improperly assume that performance standards will not be followed; and (iii) ignore several other performance standards that would apply to any coal mining operations in the area to protect the Chuitna watershed's hydrological balance.[257]

120. Both Congress and the Alaska Legislature, in respectively enacting SMCRA and ASCMCRA, anticipated that adverse impacts will necessarily occur during construction and coal mining. Indeed, the provisions contained in SMCRA and ASCMCRA recognize that coal mining will have impacts to surface and groundwater within the disturbed mining area and that a balancing of resource development and environmental protection is necessary.[258] The legislative history and discussion related to hydrologic balance assumes that there will be significant impacts within the mine area itself: "The total prevention of adverse hydrologic effects from mining is impossible and thus the bill sets attainable standards to protect the hydrologic balance of impacted areas within the limits of feasibility."[259] Put simply, the standard for a lands unsuitable petition and a mandatory designation is not whether operations will have substantial impacts as petitioners allege at times, but rather whether there will be irreparable harm that makes reclamation in accordance with ASCMCRA technologically infeasible.

---

[256] Petition at 16-29.

[257] These include the following regulations set out in Article 11, Chapter 90, of the Alaska Administrative Code: .311, .313, and .315, regarding removal, conservation and storage, and reapplication of top soil; .343, .085, regarding preventative practices that must be taken to prevent long-term adverse changes to area hydrology; .451, .453, .455, and .457 regarding measures for revegetation during reclamation.

[258] 30 U.S.C. § 1202; AS 27.21.010.

[259] H.R. REP. No. 218, 95th Cong. 1st Sess. 109 (H.R. 2 April 22, 1977). *Elements of mine regulation program; Mining impacts on hydrologic balance*, OSMRE COALEX Report at 235.

121. To reduce, reclaim, and avoid coal mining's adverse impacts, state law imposes performance standards and reclamation requirements. For purposes of the petition, we must assume the performance standards will be followed.[260] 11 AAC 90.321 (Hydrologic Balance) provides performance standards that, among other things, require that "[o]perations must be planned and conducted to prevent long-term adverse changes in the hydrologic balance *in both the permit area and adjacent areas.*"[261] The regulation also provides that "[c]hanges in water quality and quantity, in the depth and flow patterns of ground water, and in the location of surface and subsurface drainage channels must be minimized so that the approved postmining land use of the permit area is not adversely affected."[262] Further, an "operator shall comply with all applicable federal and state water quality statutes and regulations."[263] A recurring flaw in the petitioners' argument is the assumption that a permitted project would not be held to these performance standards.[264] This position directly conflicts with what the law requires, which is the presumption "that contemporary mining practices required under AS 27.21 and this chapter would be followed if the area were mined."[265]

122. The petition correctly states that reclamation consists of those actions taken to restore mined land as required by AS 27.21 and 11 AAC 90. But petitioners presume that restoration must be to the premining use. As discussed above, such a standard is not supported by statute or regulation.

123. The petitioners state that some of the wetland types within the Chuitna watershed (not just the petition area), specifically fen and bog wetlands, are difficult, if not impossible, to restore.[266] The argument that there should be no impacts to wetlands or that the same type of wetland needs to be reclaimed is not supported by

[266] Petition at 20-25.

the applicable law. Instead, the reestablishment of wetlands is based on the approved postmining land use and any proposed project meeting the requirements of 11 AAC 90.337 – 317 dealing with topsoil, 11 AAC 90.321 dealing with the protection of hydrologic balance, 11 AAC 90.451 dealing with revegetation, and 11 AAC 90.451 dealing with standards for assessing revegetation success.

124. Petitioners' argument also overlooks the fact that state and federal agencies have made findings that reclamation in this area is technologically feasible. In the 1990 FEIS on the Diamond Shamrock Chuitna Coal Project, EPA stated that "[r]eclamation of the mine area would at least partly reverse the ground-water impacts from mining. After removal of the surface-water diversion systems, surface water together with incident precipitation would recharge the underlying spoil materials and with time result in the reestablishment of a ground-water regime similar but not identical to the premining condition."[267] DNR also found in its 1987 Permitting Decision that reclamation of the activities proposed for the Diamond-Shamrock Chuitna Coal Project was technologically feasible and that the Reclamation Plan met the requirements of 11 AAC 90.[268] Thus, the findings in both the 1990 FEIS and DNR's 1987 Permitting Decision contradict the petitioners' allegation that reclamation, including of wetlands, is not feasible.

125. Nonetheless, the petitioners selectively cite portions of the 1990 FEIS to assert that reclamation of wetlands and riparian areas is not technologically feasible. The petitioners cite statements that, at first blush, appear to support their allegations, but omit other statements that discuss potential impacts and proposed reclamation that ultimately negate the contention that reclamation of coal mining activities is not technologically feasible. For example, petitioners quote the following from the 1990 FEIS regarding impacts to groundwater: "Impacts to groundwater regime as a result of mining operations would be substantial and would affect recharge and discharge relationships; quantity, quality, and direction of groundwater flows; and quantity and quality of surface water."[269] However, petitioners fail to mention two other key

[269] 2010 Petition at 25 (quoting 1990 FEIS at 5-16).

observations EPA reached: "These impacts are unavoidable; however, with proper planning, the impacts can be minimized."[270]

126. Petitioners also selectively cite the 1990 FEIS to support their contention that reclamation is not technologically feasible:

> Because of the long period required for soil formation, soils in the Diamond Chuitna mine area are highly susceptible to irreversible, disruptive impacts from surface mining. A major long-term disturbance would result from the removal of soils and overburden to reach the coal seams.[271]

127. Perhaps more importantly, petitioners omit what EPA concluded regarding feasibility of reclamation: "The initial construction impact to soils would be eventually mitigated by implementation of the reclamation plan and successful revegetation."[272]

128. In addition, EPA concluded in the 1990 FEIS that the reclamation plan was consistent with legal requirements:

> The project reclamation plan, as required by the State Surface Coal Mining Permit, includes a plan for the restoration of wetlands in the mining area. This plan provides for the enhancement of wetlands development throughout the reclaimed mine area, and the rehabilitation of certain sediment control ponds. The permit also requires construction of a minimum of four 1/2 acre coho salmon rearing ponds. These requirements are subject to review and possible revisions as necessary with the goal of achieving the desired restoration of wetland functions. The wetland restoration measures would reduce net wetland losses expected as a result of the project. Post reclamation wildlife habitat value could be less than premining conditions due to reductions in habitat diversity now contributed by the interspersed wetland/upland areas; however, this diversity is expected to re-establish over the long-term. An extensive sediment pond system is planned, which is expected to reduce the hydrologic and water quality impacts associated with the direct loss of wetlands during the period of mining, as reclamation proceeds.[273]

129. Significantly, in 1987, DNR, in its review of the Diamond Shamrock surface coal mining permit application for the Chuitna Coal project, found that the mining and reclamation plans met the requirements of 11 AAC 90.083, 11 AAC

---

[270] 1990 FEIS at 5-16.

[271] 1990 FEIS at 5-4.

90.085, 11 AAC 90.321, 11 AAC 90.323, and 11 AAC 90.335 - 90.353, and were protective of the hydrologic balance within the proposed mining area.[274]

130. In 1990, while remanding the permitting decision on other grounds, the Alaska Supreme Court upheld DNR's decision concerning reclamation.[275] The Supreme Court stated:

> In our view, DNR's acceptance of the plan meets the reasonable basis standard. The plan describes how wildlife habitat will be recreated by constructing peat-filled depressions which will be replanted with various plant species. In addition, three sediment ponds will be inoculated with plant and insect life forms, and seedlings will be planted to provide a vegetation canopy layer for the benefit of wildlife. In light of the complexity of the subject matter, we will defer to DNR's conclusion that these measures will be adequate to restore wildlife habitat.[276]

131. The petitioners fail to provide compelling evidence with their petition to suggest that there has been significant changes since DNR's 1987 Permitting Decision determining that the restoration and reclamation plans were sufficient (including to restore disturbed fish and wildlife habitats), EPA's 1990 findings that reclamation was feasible, and the proceedings in *Trustees for Alaska v. Gorsuch,* in which the Alaska Supreme Court upheld DNR's decision concerning the feasibility of reclamation. Wetlands of a similar type occur throughout the petition area. While the petitioners cite several passages from the 1990 EIS that discuss wetlands in the area and their functions, this information does not contradict DNR's earlier findings with respect to reclamation and restoration of wetlands and fish and wildlife habitat. Moreover, even though EPA found that there would be significant wetland impacts during operations in the Chuitna Coal project area, EPA made no finding that reclamation was not technologically feasible.

132. Not only have petitioners' argument been addressed in previous decisions, but the petitioners continue to rely on information that they submitted with their 2007 petition and which Commissioner Irwin found either did not provide competent evidence to support their allegations, or which, when inspected more

closely, contradicted petitioners' allegations.[277] The petitioners did not seek further review of these final findings, and dismissed with prejudice their lawsuit on Commissioner Irwin's July 16, 2007 decision and corresponding February 14, 2008 decision on reconsideration.[278]

133. Additionally, the petitioners continue to rely on a 1998 report by Cooper, *et al.*, *Hydrologic Restoration of a Fen in Rocky Mountain National Park, Colorado, USA*[279] -- regarding 1990 wetland restoration efforts for fen wetlands systems in the Rocky Mountains, which does not support their allegations. The efforts documented in that paper were devoted to restoring fen systems for lands disturbed by agricultural activities that took place roughly one hundred years ago and relating to activities not likely subject to the regulations and practices used in contemporary agricultural activities, much less contemporary surface coal mining activities.[280] These lands are also located in a much more arid environment than the petition lands in the Chuitna watershed. Additionally, at least one conclusion in the report appears to contradict the petitioners' claim that fen systems cannot be restored:

> The ditch was blocked in an attempt to restore the hydrologic regime in the central and southern portions of the fen. Water-level data from three years prior to the restoration and four years after restoration show that blocking the ditch successfully restored surface sheet flow, high later summer water levels, and anaerobic soil conditions.[281]

134. The other reports that the petitioners continue to rely on that were included with the 2007 Petition deal with studies of restoration efforts for sphagnum moss in Quebec,[282] a wetlands restoration project in Hungary in a primarily agricultural and urban development area,[283] as well as a report of modeling approaches for the "prediction of effective water and lands use management aimed at

mire conservation and restoration in primarily Western Siberia.[284] These studies discuss the difficulties of restoring wetlands but do not provide relevant data and information to support petitioners' argument in Allegation I that restoring wetlands, particularly fens, is not technologically feasible.

135. Petitioners also continue to rely on another report they assert shows that fens and bogs cannot be restored, *Compensating for Wetland Losses Under the Clean Water Act,*[285] but the excerpts from the report do not discuss any restoration measures that might be applicable to further aid analysis of the validity of this assertion, including contemporary coal mining practices and performance standards. The primary purpose of the report is to provide guidance to the U.S. Army Corps of Engineers and EPA in making permitting decisions and to develop mitigation strategies that the agencies can use in their decisions under section 404 of the Clean Water Act.[286] While the report is cited in the petition to support the claim that any proposed fen/bog restoration is not technologically feasible, petitioners' claims are contradicted by other competent and scientifically sound information discussed in detail below, which demonstrates that, while it may be difficult, it is possible to restore fens.

136. In short, as Commissioner Irwin previously found, none of these reports deal with disturbances caused by surface coal mines or mining in general, nor do they assess the effectiveness of contemporary coal mining practices and performance standards applicable to both operational and reclamation phases of surface coal mining activities, thus rendering the reports not competent for purposes of review to determine lands unsuitable for surface coal mining operations. Moreover, these reports do not show that reclamation in accordance with ASCMCRA of lands in the petition area disturbed by construction and operation of surface coal mining operations would not be technologically feasible.

137. In addition to the foregoing decisions that have found the hydrological balance and wetlands can be restored, there is evidence of contemporary techniques

[286] 33 U.S.C. § 1344.

that can be used to restore wetlands after mining. For example, in its intervention on the petition, PacRim notes other contemporary coal mining practices that are considered to promote reclamation success, including:

- Modern mining operations are conducted and reclaimed in a manner addressing sequential changes in the hydrologic control infrastructure, which minimizes impacts during mining and shortens the period of hydrologic restoration;
- Modern mine operations also incorporate material handling plans, which often include segregation of materials according to specific properties and reclamation or hydrologic benefits (i.e., topsoil, alluvium, surface gravels, aquiclude or aquitard materials) and dictate how these materials will be placed into the reclamation areas; and
- Modern groundwater models, such as MODFLOW developed by the USGS, are able to predict mining impacts to groundwater and in-stream flows, allowing a mine operator to formulate plans to mitigate potential water table declines and associated stream flow losses during mining, as well as proving a means to mitigate impacts after mining while groundwater elevations naturally recover.[287]

138. In fact, many examples of where high value wetlands have been reclaimed after disturbance by mining do exist. Within the Chuitna watershed, Exhibit 2 to PacRim's January 19, 2011, letter on the petition, shows compelling evidence of wetlands reestablishing after disturbance by mining activities. PacRim also provided recent reports concerning revegetation of disturbed areas in Alaska, including Barclay's willow and Diamond-leaf willow,[288] as well as sedges in wetland areas.[289] DNR reviewed these reports, and found them to be competent and scientifically sound data and information documenting successful revegetation efforts that are viable techniques that should be considered for reclamation planning in the coal-mine permitting context.

139. Examples of the ability to reclaim areas in the Chuitna watershed -- while small scale -- also exist. At the headwaters of Stream 2003, a test pit was dug to a depth of approximately seventeen feet to the top of a coal seam. The area was backfilled and graded with little additional work conducted to encourage vegetation or wetlands regrowth. During recent environmental

[289] Nolan and Wright (2007).

baseline work, including wetlands and vegetation mapping, this area was delineated as undisturbed natural ground. The report on this site stated that "[t]he lake and surrounding area are characterized as a vegetated pond with high value wetlands which contribute to carbon export and food chain support to adjacent streams."[290]

140. Although small in scale, this site is important because it shows that a functional wetland was established without additional mitigation or maintenance that would be required as part of a reclamation plan under 11 AAC 90.083. This site, along with several other sites disturbed by exploration activities within the Chuitna watershed, were inspected as part of the department's field work on the petition.

141. With its 2010 Petition, the petitioners included three recent reports that they commissioned which they assert support their allegation that reclamation is not technologically feasible. These reports are the "Chuitna Coal Mine baseline monitoring and restoration plan review" by Mark Wipfli (2009 Wipfli Report),[291] "Report on Chuitna Coal Project of PacRim Coal" (2009 Palmer Report),[292] and a "Report on Chuitna Coal Project Aquatic Studies and Fish and Wildlife Protection Plan" by Lance Trasky (2009 Trasky Report).[293] These reports include analyses of the potential impacts from surface coal mining based on a review of draft project and baseline documents that PacRim Coal is developing for its proposed Chuitna Coal Project. As the permitting process for the proposed Chuitna Coal Project has progressed, these draft project and baseline documents have changed considerably in response to comments and concerns raised by state and federal agencies. Consequently, the three reports commissioned by the petitioners have limited applicability in relation to the evolving proposed project.

142. In any event, petitioners' reports discuss the importance of the existing food web and hydrologic linkages in understanding the premining ecosystem and they

assert that the data is not adequate to support a permitting decision, *e.g.*, "stream restoration presented in the Fish and Wildlife Protection Plan is conceptual and few specifics are provided."[294] The ADF&G agreed with the author that there was not enough information in these reports to address their concerns about reclamation,[295] but goes on to state ADF&G could not "conduct a thorough analysis until finalized plans are submitted."[296] The 2009 Wipfli Report states that the reports reviewed contain important biological information but are missing important baseline studies and potential impacts to the Chuitna watershed. From these reports, the petitioners argue that the understanding of streams and riparian areas has changed since the original Diamond Shamrock surface coal mining permit application was reviewed and use this as their basis for requesting designation of the petition area as lands unsuitable for mining.

143. The 2009 Palmer Report[297] is a review of draft baseline documents for the proposed Chuitna Coal Mine. The report focuses on the potential impacts the proposed Chuitna Coal Mine would have on streams and the environment both in the project area and downstream, and raises concerns with the baseline studies associated with the Chuitna Coal Project.[298] The petitioners cite the 2009 Palmer Report to support their allegation that the reclamation of streams is not technologically feasible.[299] However, in light of stream restoration projects associated with mining projects that are discussed in this decision, the 2009 Palmer Report fails to demonstrate that reclamation, or stream restoration, is not technologically feasible.[300] Examples discussed in this decision dealing with stream restoration after both large and small scale mining, including surface coal mining, show where streams

299 Petition at 28.

300 *See* Section F, below, relating to Allegation I.

have been successfully reclaimed, along with the ecological functions of the restored portions of those streams.

144. The 2009 Trasky Report, which is another report cited by petitioners, stresses the importance of nutrients that support fish populations, *e.g.*, "Nutrients from salmon eggs and carcasses play a major role in the productivity of both freshwater and riparian ecosystems and in perpetuating future salmon runs." However, the report fails to take into account proposed or mandated mitigation that would require the addition of nutrients such as pollock bone meal, transported salmon carcasses, and salmon carcass analogs. Selected examples of nutrient addition to salmon bearing waters include those from Revillagigedo Island, Southeast Alaska[301] Grilse Creek[302], and Cluxewe River in British Columbia[303], and these examples confirmed an increase in salmonids size and weight, as well as an increase in abundance of other food chain organisms. These examples support the proposition that nutrient addition can be used to mitigate the loss of any marine derived nutrient caused by mining operations and can be continued as mitigation throughout the reclamation period until natural sources can be re-established.

145. The ADF&G also reviewed the petition, including the 2009 reports prepared by Wipfli, Palmer, and Trasky. ADF&G concluded that "information submitted with, or in response to the petition, is insufficient at this time to determine whether reclamation of anadromous water bodies or riparian areas anywhere within the entire Chuitna River watershed is not technologically feasible."[304] The letter goes on to state that many of the concerns raised by the petitioners with regard to reclaiming anadromous water bodies and their associated riparian areas need to be addressed on a project-specific basis, when performance standards and other requirements are considered.[305] This is a sound conclusion.

[304] Alaska Department of Fish and Game Letter dated May 26, 2011, at 2.

[305] *Id.*

146. Where the petitioners' commissioned reports do discuss reclamation, the reports either do not apply the appropriate reclamation standards based on the postmining land use authorities, or the conclusions reached in these reports are speculative and not supported by competent and scientifically sound data. It is also important to note that contemporary mining practices have also changed with the advance of new technology and increased understanding of reclamation processes.[306] Contemporary mining practices require continuous monitoring and mitigation of reclaimed areas. The petitioners and the authors of the commissioned reports base their arguments on the erroneous assumption that no adverse impacts at all are allowed to fish and wildlife habitat, wetlands, and site hydrology as a result of surface coal mining operations.

147. The petitioners also cite a 2010 report (Mountaintop Mining Consequences, Palmer, *et al.*) documenting the impacts of valley fills[307] on headwater streams in the Appalachian region. Mine operators create valley fills when they dispose of excess spoil/overburden material on valley floors. This material consists of spoil and overburden that is not used in reclaiming the postmining topography after mining has been completed. This activity is typically associated with "mountain top removal"[308] operations in the Appalachian region. In Alaska, there is only one permitted valley fill, located at the Two Bull Ridge Mine near Healy, Alaska. The petitioners cite the valley fill report[309] to raise concerns that it would be impossible to reclaim premining vegetation, especially woody vegetation.

---

306 Examples of contemporary mining practices include mining and reclamation plans that consider the roles landforms have on the function of reclaimed areas, the use of GPS controlled mining equipment, and extensive monitoring and mitigation plans that allow the mining and reclamation operation to adapt to real world conditions.

307 "Valley fill" is defined as a "fill structure consisting of any material other than organic material that is placed in a valley where side slopes of the existing valley measured at the steepest point are greater than 20 degrees or the average slope of the profile of the valley from the toe of the fill to the top of the fill is greater than 10 degrees." 11 AAC 90.911(120).

308 "Mountaintop removal" is defined as "surface mining which removes an entire coal seam or seams running through the upper fraction of a mountain, ridge, or hill, by removing substantially all of the overburden off the bench and creating a level plateau or a gently rolling contour, with no highwalls remaining, and capable of supporting postmining land uses approved in accordance with 11 AAC 90.141." 11 AAC 90.911(64).

309 Petition at 22.

148. However, the potential circumstance petitioners cite has not been an issue in Alaska, even in areas where the reclamation effort did not involve a valley fill. For example, based on documentation in both an evaluation report and a recent final bond release for the Gold Run Pass permit, revegetation of wood species was well above the standard required by 11 AAC 90.457.[310]

149. At present, there are no planned or anticipated valley fills in the petition area. Notwithstanding, there is documentation noting successful reclamation of woody vegetation at the Lone Creek Bulk Sample sites in the Chuitna watershed.[311]

150. The petitioners assert that the valley fill report provides evidence that surface coal mining causes permanent damage to streambeds and riparian areas and that there are no examples of large scale reclamation associated with mining.[312] However, the valley fill report is narrowly focused on impacts of mountaintop removal and the disposal of valley fill in West Virginia. This information is countered by the information discussed elsewhere in this document, including competent information relevant to the Alaska environment and stream reclamation efforts in Alaska. Moreover, it is noteworthy that the Palmer, *et al.*, valley fill report does not discuss or consider successful stream restoration efforts at surface coal mining operations in other parts of the United States, some of which are documented in this decision.
