SB 151 also supports a recommendation currently before the American Bar Association stating that the ABA "... urges lawyers and judges, as well as bar associations and law school clinical programs, to support training that includes law school law enforcement, and legal/judicial education curricula on enhanced awareness of the child and adult disability of Fetal Alcohol Spectrum Disorders (FASD) and its impact on individuals in the child welfare, juvenile justice, and adult criminal justice systems, and that they work with medical, mental health, and FASD disability experts to promote: ... (d) applying FASD as a mitigating factor in the mitigation of juvenile justice and criminal sentencing ... and consideration of alternatives to incarceration that reduce recidivism."

The Trust thanks Senator Meyer's efforts to address issues related to people with disabilities, so that the most appropriate (and cost effective) outcomes are realized.

Sincerely,

Jeff Jessee
Chief Executive Officer
Alaska Mental Health Trust Authority

FISCAL NOTE #1

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 151(HSS)

Analysis

SB 151 would add as a mitigating factor at sentencing. It would allow a new mitigator if the defendant was affected by a fetal alcohol spectrum disorder that significantly affected the defendant's behavior. If proven, the court would have discretion to reduce the term of imprisonment to below the presumptive range.

The proposed new factor would not apply to persons convicted of crimes against a person (AS 11.41), arson in the first degree (AS 11.46.400), or if the person being sentenced had previously been convicted of a felony.

The fiscal impact for the Departmetn of Law is indeterminate because it will require expert testimony on the issue of whether the person suffers from such a disorder and if so, did it significantly affect his or her behavior.

FISCAL NOTE #2

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 151(HSS)

Analysis

Senate Bill 151 adds a new factor to the list of mitigating factors in AS 12.55.155(d) that the court shall consider at sentencing; if proven, the court may then impose a sentence below the presumptive range for certain crimes. Specifically, except for defendants convicted of offenses against persons , arson, and criminal mischief, and except if the defendant has any prior felony conviction, the court may consider whether the defendant committed the offense "while affected by a fetal alcohol spectrum disorder that was insufficient to constitute a complete defense . . . but that significantly affected the defendant's conduct."

The court cannot predict the number of cases in which parties will attempt to prove this factor as a mitigator at sentencing, but believes the sentencing hearings will be held and handled in the normal course without a fiscal impact. The Alaska Court System therefore submits a zero fiscal note.

2012 LEGISLATIVE SESSION

BILL NO. CSSB 151(HSS)

Analysis

AS 12.55.155(d) allows a sentencing court to impose a sentence less than the presumptive range where mitigating factors have been proven. This bill amends AS 12.55.155(d) by adding section 20, which allows the court to find a factor of mitigation where the defendant committed the offense while affected by fetal alcohol spectrum disorder.

The Public Defender Agency does not anticipate a fiscal impact from this change. Accordingly, the Agency submits a zero fiscal note.

Sponsor Statement
SB165 Uniform Probate Code; Trusts, Wills; Disposition of Human Remains

Alaska first modernized its trust and estate legislation in 1997. Since then, the trust and estate planning community continuously makes recommendations to the legislature for updates and improvements to Alaska's trust and estate laws to ensure that Alaska can continue to provide the best possible planning solutions. Alaska's trust and estate laws have significant impact on our economy, bringing literally millions of dollars to the state and creating jobs within the trust, banking, insurance and legal fields.

Senate Bill 165 provides for amendments to statute in the following areas:

- Extends protection for retirement plan assets to the beneficiaries of retirement plans (often the surviving spouse).
- Provides means of representation for minors and incapacitated persons in dealing with settlements of accounts or settlement agreements.
- Amends the 2003 Alaska Principal and Income Act to conform with current IRS regulations.
- Provides rules concerning who may control the disposition of decedents' remains.
- Makes conforming amendments to Alaska's laws regarding insurable interests to align with changes to the Uniform Trust Code.
- Provides that IRA interests can be voluntarily transferred to a family member or trust.
- Makes amendments to Alaska's community property provisions to update and clarify the ownership of community property.
- Allows a beneficiary to extend the time funds will be held in a Uniform Transfer to Minors Account.

Passage of SB 165 will ensure that Alaska remains the premier state in which to establish trusts and estates. I urge your support for this important legislation.

Senate Judiciary Committee

SECTIONAL ANALYSIS FOR SENATE BILL 165

Sec. 1. Asset Protection for Inherited Retirement Plans. Alaska Statute 09.38.017(a) protects an individual's interest in a retirement plan from the claims of the individual's creditors. The amendment extends this protection to claims of a beneficiary's creditors (e.g., creditors of an individual's spouse). Arizona, Florida, and Texas have enacted similar provisions.

Sec. 2. This is a conforming amendment for Sec. 28.

Sec. 3. These are definitional changes implementing Sec. 1.

Sec. 4. through Sec. 5. Representation for Settlement Agreements. Alaska Statute 13.06.120 provides that minors, incapacitated persons, and similar persons may be represented by another person who has the same interests in the matter. This type of representation is important in order to simplify and make more efficient proceedings that involve persons who are not legally competent to represent themselves. The existing statute clearly applies to judicial proceedings. However, often it is important to have representation of minors and incapacitated persons with respect to the settlement of accounts of trustees of trusts and with respect to settlement agreements. These amendments clarify that the statute not only applies to court proceedings but also to non-judicial settlement proceedings.

Sec. 6 through Sec. 22. Amendments to 2003 Alaska Principal and Income Act. This modern act allows a person creating a new trust, or a trustee of an existing trust, to adopt a "unitrust" approach for determining the income of the trust which may be required to be distributed annually. A unitrust distributes a certain percentage of its assets annually to the current beneficiary. The use of this percentage unitrust approach allows the trustee to invest in order to maximize total return for both income and remainder beneficiaries.

Since 2003, the Internal Revenue Service has issued final regulations with respect to unitrusts. The Alaska Principal and Income Act amendments contained in this bill are designed to update Alaska's provisions to take advantage of these new regulations.

In summary, the most important changes contained in the bill expressly allow a trustee to choose a unitrust rate of three to five percent rather than be limited to the four percent amount presently in the law. The changes provide an explicit definition of income for a trust drafted as a unitrust. Language is added to provide the ordering of distributions among types of income and principal. A smoothing period of up to five years is allowed for determining the assets to be used when applying the unitrust percentage. Also, the new provisions clarify how the unitrust rules will apply to retirement benefits. These new changes will facilitate the use of unitrusts under Alaska law and maximize flexibility to take advantage of federal income tax planning.

Sec. 23 through 25. Amendments to Alaska Uniform Transfers to Minors Act. The Alaska Uniform Transfers to Minors Act allows donors, personal representatives, trustees, and obligors, to transfer assets to an account for the benefit of a minor. A custodian is named who may make distributions for the benefit of the minor. Under the existing statutes, the minor is entitled to the property when the minor reaches age 18 years or 21 years, depending on the type of transfer. The statute allows this age of distribution to be extended in certain circumstances to age 25 years.

A number of situations have arisen both in Alaska and in other states where it is undesirable for assets to be distributed later than the ages 18, 21, or 25 years, due to problems the minor may have, including substance abuse problems, immaturity, and the inability to manage assets. Often, the minor himself or herself is willing to have the assets remain in a custodial setting, managed by a competent person who will make distributions for the benefit of the minor. The amendments in this bill would allow for the extension to an age greater than that presently specified in the statute, as long as the minor consents to the extension during the six-month period when the minor attains the age when otherwise the assets would be distributed under the statute.

Sec. 26. Decedents Remains. Alaska does not presently have adequate statutory authority with respect to who may control the disposition of a decedent's remains. This has resulted in arguments and disputes among relatives and friends. Businesses involved in this area need protection concerning who is the person entitled to give them directions. This new act resolves the present uncertainty of the law. It provides authority for a person to provide directions and a form for a disposition document. If a person has not provided directions, then a priority list is provided of the persons who may control the disposition of the decedent's remains. Businesses who follow these directions or priority list are protected from liability.

Sec. 27. Insurable Interests. For many years, individuals have relied on life Insurance in helping to meet their financial, business, and estate planning needs. Often, their needs are best served by having one or more life insurance contracts held in an irrevocable trust, partnership, or limited liability company. In particular, irrevocable life insurance trusts have been widely used throughout the United States to own life insurance policies.

However, a relatively recent federal court case *(Chawla, ex rel Giesinger v. Transamerica Occidental Life Ins. Co.*, 2005 WL 405405 (E.D. Va. 2005)) had the effect of pointing out that while state insurance statutes typically require purchasers of insurance contracts to have an "insurable interest" in the life or body of the insured, the statutory provisions describing who may have an insurable interest did not specifically include trusts and business entities which are commonly used to purchase and own such policies. This case raised sufficient uncertainty about the status of life insurance trusts that in July, 2010, the Uniform Law Commission approved amendments to the Uniform Trust Code to clarify the situation.

Alaska has previously adopted substantial portions of the Uniform Trust Code. The proposed amendment to AS 21.42.020 is based in large part on the recommended amendments to the Uniform Trust Code, and also clarifies that persons with insurable interests may form business entities for the purposes of purchasing, holding, and administering life insurance contracts. Other states, for example Delaware, have already amended their statutes for these reasons, or are considering such amendments.

Sec. 28. Transfers of IRA Interests. Lifetime estate planning often occurs by a participant making gifts, sales or other transfers of property during lifetime to family members or trusts for their benefit. For many individuals, one of their most valuable assets is their individual retirement account (IRA). Alaska law (AS 09.38.017) protects IRAs from claims of creditors. This protection

could be construed to even prohibit voluntary transfers of the participant's interest in an IRA, which would prevent lifetime transfers of IRAs for estate planning and other purposes. Although it is important to maintain that creditor protection for IRAs, it would be beneficial to permit voluntary transfers of IRAs. Therefore, this section clarifies that the participant of an IRA may voluntarily transfer his or her IRA during lifetime.

Sec. 29 through Sec. 33. Community Property. In 1998, Alaska enacted an optional community property system. Several amendments have been made to Alaska's act, and this bill proposes further amendments designed to improve the act. Specifically, the amendments accomplish the following:

a. Add references to a community property trust in appropriate provisions.

b. Eliminate language stating a confusing statute of limitations and incorporates by reference a new statute of limitations.

c. Provide clarification that property which spouses agree is community property is owned as community property regardless of the form of title to the property. If title to community property is in a form that provides for survivorship ownership between the spouses then the survivorship ownership is presumed to have been made with the consent of both spouses. If one spouse designates a beneficiary for an interest in property, the designation is only effective for that spouse's one half interest unless the other spouse consents in writing. Various family designations are presumed to have been made with the consent of the other spouse. The testimony of one spouse is sufficient to rebut a presumption.

d. Enact remedies for improper transfers and limitation periods within which those remedies must be pursued.

Sec. 34. Repealed sections.

Sec. 35. Indirect rule change.

Sec. 36. Applicability

Sec. 37. Requirement for two-thirds majority vote of each house.

MEMORANDUM February 17, 2012

SUBJECT: CSSB 165(JUD) draft (Work Order No. 27-LS0819\E)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee
Attn: Cindy Smith

FROM: Terry Bannister
Legislative Counsel

This memo accompanies the bill described above.

1. Correction. In bill sec. 39(b), the reference in the D.1 amendment to "AS 13.36.215(5)" has been corrected to read "AS 13.36.215(b)."

2. Single subject issue. As you are aware, it is my opinion that, by combining all of the subjects in the bill, the bill is not confined to one subject, which violates the constitutional requirement that a bill be confined to one subject.[1] This issue is present in SB 165 without the amendments added by the Senate Judiciary Committee, and the addition of the trust property appointment provisions do not change this.

The Alaska Supreme Court standard is that an "act should embrace some one general subject; and by this is meant, merely, that all matters treated of should fall under some one general idea, be so connected with or related to each other, either logically or in popular understanding, as to be parts of, or germane to, one general subject."[2]

Historically, the Alaska Supreme Court has interpreted Alaska's single subject rule to permit very broad subject matter in one bill without violating the single subject requirement. For example, the Court has held that bills relating to such broad themes as "development of water resources,"[3] "taxation,"[4] "land,"[5] "intoxicating liquor,"[6] and

---

[1] Art. 2, sec. 13, Alaska State Constitution.

[2] State v. First Nat'l Bank of Anchorage, 660 P.2d 406 (Alaska 1982).

[3] Gellert v. State, 522 P.2d 1120 (Alaska 1974).

[5] State v. First Nat'l Bank of Anchorage, 660 P.2d 406 (Alaska 1982).

"criminal law"[7] are acceptable.[8] However, there was a strong dissent in one case against allowing broad subject matter in a single bill.[9] And in 2010, for the first time, the Alaska Supreme Court invalidated a piece of proposed legislation for failure to satisfy the single subject requirement.[10] Please be aware that failure to comply with this requirement could jeopardize this bill if it were ever challenged.

3. Applicability (bill section 39). Applying the changes in AS 09.38.017 to retirement plans that pre-date the effective date of these changes and applying the changes and new provisions contained in AS 13.36.157 - 13.36.159 and AS 13.36.215(5) to trusts that pre-date the effective date of these changes may raise constitutional impairment of contracts issues if the changes or provisions affect provisions that are considered essential parts of the retirement plans or trusts.

If I may be of further assistance, please advise.

AMENDMENT

OFFERED IN THE SENATE

TO: SB 165

Page 15, following line 10:

Insert a new subsection to read:

"(j) A custodian is not required to give a written notice of the minor's right to compel immediate distribution under (h) of this section, and the minor may not compel distribution of custodial property under (i) of this section, if

(1) the transferor or another person pays the tax liability resulting from the delay of distribution;

(2) the transferor or another person indemnifies and holds both the minor and the custodial property harmless from claims resulting from the delay of distribution; and

(3) the custodian gives the minor written notice of

(A) the change to distribution resulting from the operation of this subsection;

(B) the payment of the tax liability; and

(C) the indemnification of the minor and the custodial property."

Amendment language from Rep. Gruenberg

SB165 Conceptual Amendment drafted by Ervin Henley

p 15 l 16 add a new subsection to read:

"(j) The ~~trustor~~ custodian need not give written notice of the minor's right to compel immediate distribution ~~and~~ under (h) of this section and the minor shall have no right to compel distribution of custodial property under (i) of this section if ~~the custodian gives the minor written notice of~~ the trustor or another person pays the entire tax liability resulting from these changes and indemnifies and holds both the minor and the trust harmless thereon, and gives the minor written notice of the changes and the person's payment of the tax liability and the person's indemnification of the trust and the minor."

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB165
2012 LEGISLATIVE SESSION

Analysis

SB 165 makes changes to the Uniform Probate Code, Uniform Trust Code, and creates a Disposition of Human Remains Act.

Section 27 (AS.21.42.020) provides that a trustee or a trust may procure an insurance contract on the life or body of an individual and the proceeds may be payable to the trustee if the trustee or trust owns the insurance contract, a settler of the trust has an insurable interest in the individual insured, and the proceeds of the contract are primarily for the benefit of a trust beneficiary.

There is no fiscal impact to the Division of Insurance as a result of this legislation.

Senate Judiciary Committee

Changes to SB 165 Principal and Income/Probate/Retirement, etc. In Version "D"

In Section 1, language was changed to more clearly delineate the kinds of retirement accounts covered by the provisions of the section.

In Section 28, a definition of an individual retirement account is provided for the purposes of the section, which governs voluntary transfers of accounts.

CS FOR SENATE BILL NO. 165(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE JUDICIARY COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to property exemptions for retirement plans, individual retirement accounts, and Roth IRAs; relating to pleadings, orders, liability, and notices under the Uniform Probate Code; relating to the appointment of trust property; relating to the Alaska Principal and Income Act; relating to the Alaska Uniform Transfers to Minors Act; relating to the disposition of human remains; relating to insurable interests for life insurance policies; relating to transfers of individual retirement plans; relating to the community property of married persons; and amending Rule 301(a), Alaska Rules of Evidence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 09.38.017(a) is amended to read:

(a) In addition to the exemption under AS 09.38.015(b), the following are exempt from a claim of an individual's **or beneficiary's** creditor:

(1) the interest of the individual **or beneficiary** in a retirement plan; [AND]

(2) the money or other assets payable to the individual from a retirement plan**;**

(3) the interest of a beneficiary in

(A) a retirement plan if the beneficiary acquired the interest as a result of the death of an individual; the beneficiary's interest is exempt to the same extent that the individual's interest was exempt immediately before the individual died;

(B) an individual retirement account that has been transferred by the individual to the beneficiary during the individual's lifetime; the beneficiary's interest is exempt to the same extent that the individual's interest was exempt immediately before the transfer to the beneficiary;

(4) the money or other assets payable to a beneficiary from

(A) a retirement plan if the beneficiary acquired the money or other assets as a result of the death of an individual who would have had, during the individual's life, an exemption in the money or other assets;

(B) an individual retirement account if the beneficiary acquired the money or other assets as a result of the transfer of the money or other assets by an individual who would have had, at the time of the transfer, an exemption in the money or other assets.

*** Sec. 2.** AS 09.38.017(d) is amended to read:

(d) A retirement plan exempt from claims under (a) of this section is conclusively presumed to be a spendthrift trust under this section**, except for transfers or assignments under AS 34.40.113**.

*** Sec. 3.** AS 09.38.017(e) is amended to read:

(e) In this section,

(1) "alternate payee" has the meaning given in 26 U.S.C. 414(p)(8);

(2) **"beneficiary" includes a person, trust, or trustee who has,**

before or after the death of an individual, a direct or indirect beneficial interest in a retirement plan; in this paragraph, "beneficial interest" includes an interest that is acquired

(A) as a designated beneficiary, survivor, co-annuitant, heir, or legatee; or

(B) if excludible from gross income under 26 U.S.C. (Internal Revenue Code), as a

(i) rollover under 26 U.S.C. 408 or 26 U.S.C. 408A;

(ii) a distribution from one retirement plan to another retirement plan; or

(iii) a distribution that is similar to (i) or (ii) of this subparagraph;

(3) "individual" means [AN INDIVIDUAL WHO IS] a participant in, **an owner** [A BENEFICIARY] of, or an alternate payee of a retirement plan;

(4) "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A;

(5) [(3)] "retirement plan" means

(A) a retirement plan that is qualified under 26 U.S.C. 401(a), 26 U.S.C. 403(a), 26 U.S.C. 403(b), [26 U.S.C. 408, 26 U.S.C. 408A, OR] 26 U.S.C. 409**, 26 U.S.C. 414(d), 26 U.S.C. 414(e), or 26 U.S.C. 457** (Internal Revenue Code)**;**

(B) an individual retirement account; and

(C) the teachers' retirement system under AS 14.25, the judicial retirement system under AS 22.25, the public employees' retirement system under AS 39.25, and the elected public officers' retirement system under former AS 39.37.

*** Sec. 4.** AS 13.06.120 is amended to read:

Sec. 13.06.120. Pleadings; when parties bound by orders; notice. In any proceedings involving trusts, nonprobate assets, or estates of decedents, minors, protected persons, or incapacitated persons brought under AS 13.06 - AS 13.36 or

AS 13.38, [INCLUDING ANY JUDICIALLY SUPERVISED SETTLEMENTS AND ANY NONJUDICIAL PROCEEDINGS AND SETTLEMENTS,] the following apply:

(1) interests to be affected shall be described in pleadings that give reasonable information to owners by name or class, by reference to the instrument creating the interests, or in other appropriate manner;

(2) persons are bound by orders binding others in the following cases:

(A) orders binding the sole holder or all co-holders of a power of revocation or a general or nongeneral power of appointment, including one in the form of a power of amendment, bind other persons to the extent their interests, as objects, takers in default, or otherwise, are subject to the power;

(B) to the extent there is no conflict of interest between them or among persons represented, orders binding a conservator bind the person whose estate the conservator controls; orders binding a guardian bind the ward if no conservator of the estate has been appointed; orders binding a trustee bind beneficiaries of the trust in proceedings to probate a will establishing or adding to a trust, to review the acts or accounts of a prior fiduciary, and in proceedings involving creditors or other third parties; orders binding a personal representative bind persons interested in the undistributed assets of a decedent's estate in actions or proceedings by or against the estate; and orders binding an agent having authority to act with respect to the particular questions or dispute bind the principal; if there is no conflict of interest and no conservator or guardian has been appointed, a parent may represent the minor child;

(C) an unborn person, a minor, an incapacitated person, or a person whose identity or location is unknown or not reasonably ascertainable who is not otherwise represented is bound by an order to the extent the interest is adequately represented by another party having a substantially identical interest in the proceeding;

(D) with regard to interests given upon the happening of a certain event to persons who comprise a certain class, orders binding the living

persons who would constitute the class, if the event had happened immediately before the commencement of the proceeding, bind all members of the class;

(E) with regard to an interest given to a living person when the same interest or a share of the interest is to pass to the surviving spouse or to persons who are or might be the distributees, devisees, heirs, or issue of the living person upon the happening of a future event, orders binding the living person bind the surviving spouse, distributees, devisees, heirs, or issue of the living person;

(F) with regard to interests given to a person or a class of persons, or to both, upon the happening of a future event, if the same interest or a share of the interest is to pass to another person or class of persons, or to both, upon the happening of an additional future event, orders binding the living person or class of persons who would take the interest upon the happening of the first event bind the persons and classes of persons who might take on the happening of the additional future event;

(G) if a person is designated by a trust instrument to represent and bind a born or unborn beneficiary of the trust and receive a notice, information, accounting, or report for the beneficiary, then the beneficiary is bound by an order binding the designated person; in this subparagraph,

(i) the settlor may make the designation in the trust instrument, in a separate document, or by a trust protector authorized in the trust instrument to make the designation;

(ii) except as otherwise provided in this subparagraph, a person designated under (i) of this subparagraph may not represent and bind a beneficiary while the designated person is serving as trustee;

(iii) except as otherwise provided in this subparagraph, a person designated under (i) of this subparagraph may not represent and bind another beneficiary if the designated person also is a beneficiary, unless the designated person was named by the settlor, is the beneficiary's spouse, or is a grandparent or descendant of a grandparent of the beneficiary or the beneficiary's spouse; in this sub-

subparagraph, "spouse" means the individual to whom the beneficiary is married and with whom the beneficiary is living, and a physical separation primarily for education, business, health, and similar reasons does not prevent the individual from being considered to be living with the beneficiary;

(3) a person representing another person under (2)(A) - (F) of this section and a person designated under (2)(G)(i) of this section are not liable to the beneficiary whose interests are represented, or to a person claiming through that beneficiary, for an action or omission to act made in good faith;

(4) notice is required as follows:

(A) notice as prescribed by AS 13.06.110 shall be given to every interested person or to one person who can bind an interested person as described in (2)(A), (B), or (D) - (G) of this section; notice may be given both to a person and to another person who may bind the person;

(B) notice is given to unborn persons, a minor, an incapacitated person, or a person whose identity or location is unknown or not reasonably ascertainable, and persons who are not represented under (2)(A), (B), or (D) - (G) of this section, by giving notice to all known persons whose interests in the proceedings are substantially identical to those of the unborn persons, the minor, the incapacitated person, or the person whose identity or location is unknown or not reasonably ascertainable;

(5) at any point in a proceeding, a court may appoint a guardian ad litem to represent the interest of an unborn person, a minor, an incapacitated person, or a person whose identity or address is unknown or not reasonably ascertainable, if the court determines that representation of the interest otherwise would be inadequate; if not precluded by conflict of interests, a guardian ad litem may be appointed to represent several persons or interests; the court shall set out its reasons for appointing a guardian ad litem as a part of the record of the proceeding.

*** Sec. 5.** AS 13.06.120 is amended by adding a new subsection to read:

(b) In this section,

(1) "order" means a judicial order, nonjudicial order, the result of the

settlement of an account of a fiduciary under a procedure authorized by AS 13.06 - 13.36 or AS 13.38, and a settlement agreement resulting from a proceeding;

(2) "proceeding" means a judicial proceeding, nonjudicial proceeding, the settlement of an account of a fiduciary under a procedure authorized by AS 13.06 - 13.36 or AS 13.38, and a settlement negotiation, even if the settlement negotiation does not involve a judicial or nonjudicial third party who decides or facilitates a settlement.

* **Sec. 6.** AS 13.36.157 is repealed and reenacted to read:

Sec. 13.36.157. Exercise of power of appointment. (a) An authorized trustee with unlimited discretion to invade trust principal may appoint part or all of that principal to a trustee of an appointed trust for, and only for the benefit of, a current beneficiary of the invaded trust to the exclusion of other current beneficiaries. A permissible appointee of a power of appointment held by a beneficiary of the appointed trust is not considered a beneficiary of the appointed trust. The successor and remainder beneficiaries of the appointed trust may be one or more of the successor and remainder beneficiaries of the invaded trust to the exclusion of other successor and remainder beneficiaries.

(b) An authorized trustee exercising the power under (a) of this section may grant a discretionary power of appointment, including a presently exercisable power of appointment, in the appointed trust to one or more of the current beneficiaries of the invaded trust, to the extent that the beneficiary who is granted the power to appoint is authorized to receive the principal outright under the terms of the invaded trust. A permissible appointee is not limited to the beneficiaries of the invaded trust.

(c) Under (a) and (b) of this section, if the beneficiaries of the invaded trust are described by a class, the beneficiaries of the appointed trust may include present or future members of that class.

(d) An authorized trustee with the power to invade trust principal but without unlimited discretion may appoint part or all of the principal of the trust to a trustee of an appointed trust if the current beneficiaries of the appointed trust are the same as the current beneficiaries of the invaded trust and the successor and remainder beneficiaries of the appointed trust are the same as the successor and remainder beneficiaries of the

invaded trust. The shares of the current beneficiaries of the appointed trust must be the same as the shares of the current beneficiaries of the invaded trust, and the shares of the successor and remainder beneficiaries of the appointed trust must be the same as the shares of the successor and remainder beneficiaries of the invaded trust.

(e) If the authorized trustee exercises the power under (d) of this section, the appointed trust must include the same standard authorizing the trustee to distribute the income or invade the principal of the appointed trust as the standard in the invaded trust. However, the standard authorizing the trustee to distribute the income or invade the principal of the appointed trust may be changed if the trustee appoints to an appointed trust that is a special needs trust, a pooled trust, or a third-party trust.

(f) If an authorized trustee exercises the power under (d) and (e) of this section to extend the duration of the appointed trust beyond the duration of the invaded trust for any period after the invaded trust would have otherwise terminated under the provisions of the invaded trust, the appointed trust, in addition to the language required to be included in the appointed trust under (e) of this section, may also provide an additional trustee with unlimited discretion to invade the principal of the appointed trust during the extended duration. The trustee with unlimited discretion continues to be subject to the restrictions in (d) - (h) of this section.

(g) Under (d) - (f) of this section, if the beneficiaries of the invaded trust are described by a class, the beneficiaries of the appointed trust include present or future members of that class.

(h) If the authorized trustee exercises the power under (d) - (g) of this section and if the invaded trust grants a power of appointment to a beneficiary of the trust, the appointed trust must grant this power of appointment in the appointed trust, and the class of permissible appointees shall be the same as in the invaded trust.

*** Sec. 7.** AS 13.36 is amended by adding new sections to read:

Sec. 13.36.158. Additional provisions relating to exercise of a power of appointment. (a) An exercise of the power to invade trust principal under AS 13.36.157 is the exercise of a special power of appointment.

(b) The appointed trust to which an authorized trustee appoints the assets of the invaded trust under AS 13.36.157 may have a duration that is longer than the

duration set out in the invaded trust.

(c) If an authorized trustee has unlimited discretion to invade the principal of a trust and if the same trustee or another trustee has a power, not dependent on unlimited discretion, to invade principal under the trust instrument, the authorized trustee having unlimited discretion may exercise the power of appointment under AS 13.36.157(a) - (c).

(d) An authorized trustee may exercise the power to appoint in favor of an appointed trust under AS 13.36.157 whether or not there is a current need to invade principal under the terms of the invaded trust.

(e) An authorized trustee exercising the power under AS 13.36.157 - 13.36.159 has a fiduciary duty to exercise the power in the best interests of one or more proper objects of the exercise of the power and as a prudent person would exercise the power under the prevailing circumstances. The authorized trustee may not exercise the power under AS 13.36.157 - 13.36.159 if there is substantial evidence of a contrary intent of the settlor and it cannot be established that the settlor would be likely to have changed this intention under the circumstances existing at the time the trustee exercises the power. The provisions of the invaded trust may not be viewed alone as substantial evidence of a contrary intent of the settlor unless the invaded trust expressly prohibits the exercise of the power in the manner intended by the authorized trustee.

(f) The provisions of AS 13.36.157 - 13.36.159 may not be construed to abridge the right of a trustee to appoint property further in trust under the terms of the governing instrument of a trust, another provision of law, or common law, or as directed by a court having jurisdiction over the trust.

(g) Nothing in AS 13.36.157 - 13.36.159 creates or implies a duty to exercise a power to invade principal. An inference of impropriety may not be made, and liability is not incurred, as a result of an authorized trustee not exercising the power conferred under AS 13.36.157.

(h) A power authorized by AS 13.36.157 may be exercised, subject to the provisions of AS 13.36.159(a), unless expressly prohibited by the terms of the governing instrument. A general prohibition against amending or revoking the invaded

trust and a provision that constitutes a spendthrift clause do not preclude the exercise of a power under AS 13.36.157.

(i) An authorized trustee may not exercise a power authorized by AS 13.36.157 to

(1) reduce, limit, or modify a beneficiary's current right to a mandatory distribution of income or principal, a mandatory annuity or unitrust interest, a right to withdraw a percentage of the value of the trust, or a right to withdraw a specified dollar amount, if the mandatory right has come into effect with respect to the beneficiary, but the mandatory right may be reduced, limited, or modified during any extended duration of the trust; however, notwithstanding the other provisions in this paragraph, but subject to the other limitations in AS 13.36.157 - 13.36.159, an authorized trustee may exercise a power authorized by AS 13.36.157 to appoint to an appointed trust that is a special needs trust, a pooled trust, or a third-party trust;

(2) decrease or indemnify against a trustee's liability or exonerate a trustee from liability for failure to exercise reasonable care, diligence, and prudence unless the court having jurisdiction over the trust specifies otherwise;

(3) eliminate a provision granting another person the right to remove or replace the authorized trustee exercising the power under AS 13.36.157 unless a court having jurisdiction over the trust specifies otherwise;

(4) fix as binding and conclusive the value of an asset for purposes of distribution, allocation, or otherwise; or

(5) jeopardize

(A) the deduction or exclusion originally claimed with respect to a contribution to the invaded trust that qualified for the annual exclusion under 26 U.S.C. 2503(b), the marital deduction under 26 U.S.C. 2056(a) or 26 U.S.C. 2523(a), or the charitable deduction under 26 U.S.C. 170(a), 26 U.S.C. 642(c), 26 U.S.C. 2055(a), or 26 U.S.C. 2522(a) (Internal Revenue Code);

(B) the qualification of a transfer as a direct skip under 26 U.S.C. 2642(c) (Internal Revenue Code);

(C) the election to treat a corporation as a subchapter S corporation under 26 U.S.C. 1362 (Internal Revenue Code); or

(D) another specific tax benefit for which a contribution originally qualified for income, gift, estate, or generation-skipping transfer tax purposes under 26 U.S.C. (Internal Revenue Code).

(j) Before exercising the power under AS 13.36.157, an authorized trustee shall consider the tax implications of the exercise of the power.

(k) An authorized trustee may not exercise a power described in AS 13.36.157 - 13.36.159 in violation of the limitations on validity in AS 34.27.051 or 34.27.100, or the restrictions on exercising certain powers in AS 13.36.153 by trustees who are not independent. A violation voids the entire exercise of the power unless the exercise is modified to correct the violation.

(*l*) Unless a court having jurisdiction over the trust directs otherwise, an authorized trustee may not exercise a power authorized by AS 13.36.157 to change the provisions regarding the determination of the compensation of a trustee. The commissions or other compensation payable to the trustees of the invaded trust may continue to be paid to the trustees of the appointed trust during the term of the appointed trust and shall be determined in the same manner as for the invaded trust.

(m) A trustee may not receive a payment, a commission, or other compensation for appointing property from the invaded trust to an appointed trust under AS 13.36.157. However, a trustee may be compensated at an hourly rate for the time spent considering and implementing the exercise of a power to appoint.

(n) Unless the invaded trust expressly provides otherwise, the provisions in AS 13.36.157 - 13.36.159 apply to

(1) a trust, whether testamentary or inter vivos, governed by the laws of this state, including a trust whose governing law has been changed to the laws of this state; and

(2) a trust that has a trustee who is an individual domiciled in this state, or a trustee that is an entity having an office in this state, if a majority of the trustees select this state as the location for the primary administration of the trust and the selection is made by an instrument in writing that is signed and acknowledged by a majority of the trustees; the instrument exercising this selection shall be kept with the records of the invaded trust.

(o) A power to pay principal that includes words such as "best interests," "welfare," "comfort," or "happiness" is not considered a limitation or modification of the right to distribute principal.

(p) In this section, "internal revenue code" means the Internal Revenue Code of the United States (26 U.S.C.) as it exists on the effective date of this Act and as it is amended from time to time.

Sec. 13.36.159. Implementation of power of appointment. (a) Unless the authorized trustee provides otherwise, the appointment of

(1) all of the assets comprising the principal of the invaded trust to an appointed trust includes subsequently discovered assets of the invaded trust and undistributed principal of the invaded trust acquired after the appointment to the appointed trust;

(2) a part but not all of the assets comprising the principal of the invaded trust to an appointed trust may not include subsequently discovered assets belonging to the invaded trust or principal paid to or acquired by the invaded trust after the appointment to the appointed trust; those subsequently discovered assets remain the assets of the invaded trust.

(b) The exercise of the power to appoint to an appointed trust under AS 13.36.157 shall be evidenced by an instrument in writing that is signed, dated, and acknowledged by the authorized trustee. The exercise of the power is effective 30 days after the date of service of the instrument as specified in (d) of this section, unless the persons entitled to notice consent in writing to a sooner effective date.

(c) An authorized trustee may exercise the power authorized by AS 13.36.157 without the consent of the settlor or a person interested in the invaded trust and without court approval. However, an authorized trustee may seek court approval for the exercise. When seeking court approval, notice shall be sent to all qualified beneficiaries.

(d) A copy of the invaded trust, the appointed trust, and the instrument exercising the power shall be delivered to

(1) the settlor, if living, of the invaded trust;

(2) a person having the right, under the terms of the invaded trust, to

remove or replace the authorized trustee exercising the power under AS 13.36.157; and

(3) a qualified beneficiary or a person who may represent and bind the qualified beneficiary under AS 13.06.120.

(e) Notice under (d) of this section to a qualified beneficiary is not required if the settlor has exempted the authorized trustee from providing notification or information to beneficiaries under AS 13.36.080(b). Notice under (d) of this section shall be provided under AS 13.06.110.

(f) The instrument exercising the power must state whether the appointment is of all or part of the assets comprising the principal of the invaded trust and, if a part, the approximate percentage of the value of the principal of the invaded trust that is the subject of the appointment.

(g) A person entitled to notice under (d) of this section may object to the trustee's exercise of the power under AS 13.36.157 - 13.36.159 by serving a written notice of objection on the trustee before the effective date of the exercise of the power. The failure to object does not constitute consent.

(h) The receipt of a copy of the instrument exercising the power does not, before the expiration of the limitation period in AS 13.36.100 with respect to a report disclosing the exercise, affect the right of a qualified beneficiary to object to the exercise of the power under AS 13.36.157 and to request the court to modify or to reverse the exercise.

(i) A copy of the instrument exercising the power shall be kept with the records of the invaded trust.

*** Sec. 8.** AS 13.36.215 is amended by adding a new subsection to read:

(b) In AS 13.36.157 - 13.36.159,

(1) "appointed trust" means an irrevocable trust that receives principal from an invaded trust under AS 13.36.157, including a new trust created by the settlor of the invaded trust or by the trustees, acting in that capacity, of the invaded trust;

(2) "authorized trustee" means, with regard to an invaded trust, a trustee with the authority to pay trust principal to or for a current beneficiary; in this paragraph, "trustee" does not include a settlor or a beneficiary to whom income or

principal must be paid, currently or in the future, or who is or will become eligible to receive a distribution of income or principal in the discretion of the trustee other than by the exercise of a power of appointment held in a nonfiduciary capacity;

(3) "current beneficiary" means a person or, with regard to a class of persons, a person who is or will become a member of the class, to whom a trustee may distribute principal when exercising a power under AS 13.36.157;

(4) "invade" means pay directly to the beneficiary of a trust or apply to the benefit of a beneficiary;

(5) "invaded trust" means an irrevocable inter vivos or testamentary trust the principal of which is appointed under AS 13.36.157;

(6) "pooled trust" means a trust described in 42 U.S.C. 1396p(d)(4)(C) that meets the requirements for a pooled trust under the regulations of this state relating to the Medicaid treatment of trusts;

(7) "principal" means the assets of a trust, including accrued and accumulated income, but excluding income that is currently required to be distributed;

(8) "special needs trust" means a trust under 42 U.S.C. 1396p(d)(4)(A) that meets the requirements for a special needs trust under the regulations of this state relating to the Medicaid treatment of trusts;

(9) "third-party trust" means a trust that is

(A) established by a third party with the assets of the third party to provide for supplemental needs for a person eligible when the trust is created or at a future time for needs-based public assistance; and

(B) exempt from the provisions of the regulations of this state relating to the Medicaid treatment of trusts;

(10) "unlimited discretion" means the unlimited right to distribute principal that is not modified in any manner.

* **Sec. 9.** AS 13.38.200(b) is amended to read:

(b) In exercising a discretionary power of administration regarding a matter within the scope of this chapter, whether granted by the governing instrument or this chapter, including AS 13.38.210 and **13.38.300 - 13.38.490** [13.38.300 - 13.38.410], a fiduciary shall administer a trust or estate impartially based on what is fair and

reasonable to all of the beneficiaries, except to the extent that the governing instrument clearly manifests an intention that the fiduciary shall or may favor one or more of the beneficiaries. A determination in accordance with this chapter is presumed to be fair and reasonable to all of the beneficiaries.

*** Sec. 10.** AS 13.38.210(c) is amended to read:

(c) A trustee may not make an adjustment under this section if

(1) the adjustment would diminish the income interest in a trust that requires all of the income to be paid at least annually to a spouse and for which a federal estate tax or gift tax marital deduction would be allowed, in whole or in part, if the trustee did not have the power to make the adjustment; the prohibition in this paragraph does not apply to a trust after the trustee determines that the marital deduction has not been claimed or has not been allowed;

(2) the adjustment would reduce the actuarial value of the income interest in a trust to which a person transfers property with the intent to qualify for a federal gift tax exclusion;

(3) the adjustment would change the amount payable to a beneficiary as a fixed annuity or a fixed fraction of the value of the trust assets;

(4) the adjustment is from any amount that is permanently set aside for charitable purposes under the governing instrument and for which a federal estate or gift tax charitable deduction has been taken, unless both income and principal are permanently set aside for charitable purposes under the governing instrument;

(5) possessing or exercising the power to make an adjustment would cause an individual to be treated as the owner of all or part of the trust for federal income tax purposes, and the individual would not be treated as the owner if the trustee did not possess the power to make an adjustment;

(6) possessing or exercising the power to make an adjustment would cause all or part of the trust assets to be subject to federal estate or gift tax with respect to an individual, and the assets would not be subject to federal estate or gift tax with respect to the individual if the trustee did not possess the power to make an adjustment;

(7) the trustee is a beneficiary of the trust; or

(8) the trust has been converted to a unitrust under **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410].

* **Sec. 11.** AS 13.38.300 is amended to read:

Sec. 13.38.300. Power to convert to unitrust. Unless expressly prohibited by the governing instrument, a trustee may release the power to adjust under AS 13.38.210 and may convert a trust into a unitrust as described in **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410] if

(1) the trustee determines that the conversion will enable the trustee to better carry out the intent of the settlor or testator and the purposes of the trust;

(2) the trustee gives written notice of the trustee's intention to release the power to adjust, of the trustee's intention to convert the trust into a unitrust, **of the unitrust percentage selected, of the smoothing period selected,** and of how the unitrust will operate, including what initial decisions the trustee **intends to** [WILL] make under **AS 13.38.340** [THIS SECTION], to all the sui juris beneficiaries who

(A) are currently eligible to receive income from the trust;

(B) would be eligible, if a power of appointment were not exercised, to receive income from the trust if the interest of all of the beneficiaries eligible to receive income under (A) of this paragraph were to terminate immediately before the giving of the notice; and

(C) would, if a power of appointment were not exercised, receive a distribution of principal if the trust were to terminate immediately before the giving of the notice;

(3) there are at least one sui juris beneficiary under (2)(A) of this section and at least one sui juris beneficiary under (2)(B) or (C) of this section; and

(4) a sui juris beneficiary does not object to the conversion to a unitrust in a writing delivered to the trustee within 60 days after the mailing of the notice under (2) of this section.

* **Sec. 12.** AS 13.38.310(a) is amended to read:

(a) A trustee may petition the court to approve the conversion to a unitrust if

(1) a beneficiary timely objects to the conversion to a unitrust; [OR]

(2) there is not a sui juris beneficiary who is eligible under

AS 13.38.300(2); or

(3) the trustee is a beneficiary [AS 13.38.300(2)(A), AND THERE IS NOT A SUI JURIS BENEFICIARY WHO IS ELIGIBLE UNDER AS 13.38.300(2)(B) OR (C)].

*** Sec. 13.** AS 13.38.330(b) is amended to read:

(b) After a trust has been converted to a unitrust, "income" in the governing instrument means an annual distribution equal to **the amount produced by the application of a fixed unitrust percentage established under (d) of this section to** [FOUR PERCENT OF] the net fair market value, as determined annually, of the trust's assets, whether the assets would be considered income or principal under other provisions of this chapter**, averaged over the lesser of**

(1) the preceding years in the smoothing period selected by the trustee; or

(2) the period during which the trust has been in existence.

*** Sec. 14.** AS 13.38.330 is amended by adding a new subsection to read:

(d) The unitrust percentage to be used in determining the unitrust amount must be a reasonable current return from the unitrust of at least three percent and not more than five percent, taking into account the intentions of the trustor of the unitrust as expressed in the governing instrument, the needs of the beneficiaries, general economic conditions, projected current earnings for the unitrust, projected appreciation for the unitrust, and the effect of projected inflation on the unitrust.

*** Sec. 15.** AS 13.38.340 is amended to read:

Sec. 13.38.340. Trustee's discretionary powers regarding unitrust. The trustee may, in the trustee's discretion, from time to time, determine

(1) the effective date of a conversion to a unitrust;

(2) the provisions for prorating a unitrust distribution for a short year in which a beneficiary's right to payments commences or ceases;

(3) the frequency of unitrust distributions during the year;

(4) the effect of other payments from or contributions to the trust on the trust's valuation;

(5) whether to value the trust's assets annually or more frequently;

(6) **whether to use a smoothing period of three, four, or five years;**

(7) what valuation dates to use;

(8) [(7)] how frequently to value nonliquid assets and whether to estimate their value;

(9) [(8)] whether to omit trust property occupied or possessed by a beneficiary from the calculations; and

(10) [(9)] other matters necessary for the proper functioning of the unitrust.

*** Sec. 16.** AS 13.38.350(b) is amended to read:

(b) Unless otherwise provided by the governing instrument, a unitrust distribution shall be considered to have been paid from net income as net income would be determined if the trust were not a unitrust. To the extent net income is insufficient, the unitrust distribution shall be considered to have been paid from **ordinary income that is allocable under federal income tax rules to net income as determined for a unitrust. To the extent that the ordinary income is insufficient, the unitrust distribution is considered to have been paid from** net realized short-term capital gains. To the extent **net** income**, ordinary income,** and net realized short-term capital gains are insufficient, the unitrust distribution shall be considered to have been paid from net realized long-term capital gains. To the extent **net** income**, ordinary income,** and net realized short-term and long-term capital gains are insufficient, the unitrust distribution shall be paid from the principal of the trust.

*** Sec. 17.** AS 13.38.360 is amended to read:

Sec. 13.38.360. Court orders regarding unitrust. The trustee or, if the trustee declines to petition the court, a beneficiary may petition the court to

[(1) SELECT A PAYOUT PERCENTAGE DIFFERENT THAN FOUR PERCENT;

(2)] provide for a distribution of net income, as would be determined if the **unitrust** [TRUST] were not a unitrust, in excess of the unitrust distribution if the distribution is necessary to preserve a tax benefit [;

(3) AVERAGE THE VALUATION OF THE TRUST'S NET ASSETS OVER A PERIOD OTHER THAN THREE YEARS].

* **Sec. 18.** AS 13.38.390(b) is amended to read:

(b) If AS 13.38.380(a)(3), (4), or (6) applies to all the trustees, the trustees may petition the court to direct a conversion. **In the alternative, the trustees may appoint an independent person who shall be granted the authority, while acting in a fiduciary capacity, to make decisions in place of the trustees relating to a conversion, reconversion, and the exercise of discretionary powers under AS 13.38.340.**

* **Sec. 19.** AS 13.38.400 is amended to read:

Sec. 13.38.400. Reconversion from a unitrust. A trustee may reconvert a trust that has been converted into a unitrust under AS 13.38.300 by following the same procedures provided in **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410] for converting a trust into a unitrust. If a unitrust is reconverted under this section, the trustee's power to adjust under AS 13.38.210 applies to the trustee after the reconversion.

* **Sec. 20.** AS 13.38 is amended by adding new sections to article 2 to read:

Sec. 13.38.420. Additional unitrust provisions. (a) The unitrust amount may be determined by reference to the net fair market value of the unitrust's assets in one or more years.

(b) Distribution of a unitrust amount is considered a distribution of all of the income of a unitrust and is considered to be an income interest.

(c) Distribution of a unitrust amount is considered to be a reasonable apportionment of the total return of a unitrust.

(d) A unitrust that provides for a distribution based on a unitrust percentage in excess of five percent of the net fair market value of the unitrust assets a year is considered to have paid out all of the income of the unitrust and to have paid out principal of the unitrust to the extent that the distribution exceeds five percent a year.

(e) The governing instrument of a unitrust may grant discretion to the trustee to adopt a consistent practice of treating capital gains as part of the unitrust amount to the extent that the unitrust amount exceeds the income determined as if the trust were not a unitrust, or the governing instrument may specify the ordering of classes of income.

(f) Unless the terms of the unitrust specifically provide otherwise, a unitrust amount is considered to have been made from the following sources, which are listed in order of priority:

(1) net income determined as if the trust were not a unitrust;

(2) ordinary income not allocable to net income;

(3) net realized short-term capital gains;

(4) net realized long-term capital gains; and

(5) the principal of the trust estate.

(g) The unitrust governing instrument may provide that the trustee may exclude assets used by the unitrust beneficiary, such as a residence property or tangible personal property, from the net fair market value of the unitrust assets for the purposes of computing the unitrust amount. These assets may be considered equivalent to income or to the unitrust amount.

Sec. 13.38.430. Power to treat gains as part of distribution of principal. Unless prohibited by the unitrust's governing instrument or specifically addressed by AS 13.38.350 or 13.38.420, the trustee of a unitrust may treat gains from the sale of capital assets of the unitrust to be part of a distribution of principal to a beneficiary, and, if the trustee treats these gains as part of a distribution of principal to a beneficiary, the trustee shall treat these gains consistently on the unitrust's books, records, and tax returns as part of a distribution to a beneficiary.

Sec. 13.38.435. Definitions. In AS 13.38.300 - 13.38.435,

(1) "smoothing period" means the period of years over which the fair market value of the assets of a unitrust are averaged;

(2) "unitrust amount" means the amount that is distributed from a unitrust to a beneficiary;

(3) "unitrust percentage" means the unitrust percentage established under AS 13.38.330(d).

*** Sec. 21.** AS 13.38.690(a) is repealed and reenacted to read:

(a) A trustee shall allocate

(1) to income that portion of a payment that equals the greater of the following:

(A) the portion that the payor characterizes as interest, a dividend, a remittance in place of interest, or a remittance in place of a dividend; or

(B) the portion that is characterized as imputed interest for federal income purposes;

(2) to principal that portion of a payment that remains after the allocation is made under (1) of this subsection.

*** Sec. 22.** AS 13.38.690(b) is amended to read:

(b) If **no** [A] part of a payment under a contract calling for equal installments over a fixed period of time is [NOT] allocable to income under the provisions of (a) of this section, the difference between the trust's acquisition value of the contract and the total expected return **is** [SHALL BE] considered to be interest. The trustee shall allocate to income the portion of each payment equivalent to interest on the then unpaid principal balance at the rate specified in the contract or at a rate necessary to amortize the difference between the expected return and the acquisition value, where that rate is readily ascertainable by the trustee.

*** Sec. 23.** AS 13.38.690(c) is amended to read:

(c) If **no** [THERE IS NOT A] portion of a payment from a separate fund held exclusively for the benefit of the trust [THAT] is allocable to income under (a) or (b) of this section, but the internal net income of the fund determined as if the fund were a separate trust subject to **AS 13.38.200 - 13.38.410, 13.38.500 - 13.38.690, or 13.38.710 - 13.38.860** [AS 13.38.500 - 13.38.860] is readily ascertainable by the trustee, the **internal net income of the fund is considered to be the income earned by the fund, and the** portion of the payment equal to the then undistributed net income of the fund realized since the trust acquired its interest in the fund is considered to be a distribution of **that internal net** income **of the fund** and shall be allocated to the trust income account. The balance of the payment described in this subsection shall be allocated to principal. **The power to adjust under AS 13.38.210, the power to convert to a unitrust under AS 13.38.300, and the provisions of AS 13.38.420 apply to retirement benefits covered by this subsection that are payable to a trust. These powers and provisions may be exercised by the payee**

trustee or in the governing instrument for the retirement benefits separately and independently from the exercise by the payee trustee or in the governing instrument of these powers and provisions for the trust, as if the retirement benefits and the trust were separate trusts subject to this chapter.

*** Sec. 24.** AS 13.38.690(d) is amended to read:

(d) A trustee shall allocate 10 percent of the part of the payment that is required to be made during the accounting period to income and the balance to principal if there is **no** [NOT A] part of the payment that is allocable to income under (a) - (c) of this section and all or part of the payment is required to be made. The trustee shall allocate the entire payment to principal if **no** [A] part of a payment is [NOT] required to be made or the payment received is the entire amount to which the trustee is entitled. In this subsection, a payment is not "required to be made" to the extent that it is made because the trustee exercises a right of withdrawal.

*** Sec. 25.** AS 13.38.690(e) is amended to read:

(e) If, to obtain a federal estate or gift tax marital deduction for a trust, the trustee must allocate more of a payment to income than provided for by this section, the trustee shall allocate **to income** the additional amount necessary to obtain the marital deduction [TO INCOME].

*** Sec. 26.** AS 13.46.190 is amended to read:

Sec. 13.46.190. Termination of custodianship. The custodian shall transfer in an appropriate manner the custodial property to the minor or to the minor's estate upon the earlier of the

(1) minor's attainment of 21 years of age with respect to property transferred under AS 13.46.030 or 13.46.040 unless the time of transfer of the custodial property to the minor is changed under AS 13.46.195 **or 13.46.197**;

(2) minor's attainment of 18 years of age with respect to property transferred under AS 13.46.050 or 13.46.060**, unless the time of transfer of the custodial property to the minor is changed under AS 13.46.197**;

(3) time specified in the transfer under AS 13.46.080 if the time of transfer of the custodial property to the minor is changed under AS 13.46.195 **or 13.46.197**; or

(4) minor's death.

* **Sec. 27.** AS 13.46 is amended by adding a new section to read:

Sec. 13.46.197. Extension of custodial term by custodian. (a) A custodian may extend the custodial term under this section to an age older than the age that is specified by this chapter or a transferring document made under AS 13.46.080, subject to the right of the minor to compel immediate distribution under (c) of this section.

(b) To extend the custodial term under (a) of this section, the custodian shall give the minor written notice of the custodian's intent to extend the custodial term. The notice must specify the duration of the extension by indicating the new custodial term and must inform the minor of the minor's right to compel immediate distribution under (c) of this section. The custodian shall give the notice during the later of the following periods:

(1) the six-month period that precedes the last day of the custodial term; or

(2) the six-month period that begins on the minor's 18th birthday.

(c) Rather than permit the extension of the custodial term, the minor may compel immediate distribution of all or part of the custodial property by giving written notice to the custodian

(1) during the six-month period that begins on the day that is the last day of the current custodial term; or

(2) within 90 days after receiving the custodian's notice under (b) of this section.

(d) If a minor does not exercise the minor's right to compel distribution under (c) of this section, the custodial term shall be extended as indicated in the custodian's notice given under (b) of this section, and the minor may not compel the immediate distribution of custodial property before the end of the custodial term, as extended.

(e) A custodian may extend the custodial term more than once under this section.

(f) In this section, "custodial term" means the period of time provided in or allowed by this chapter during which the custodian is directed to hold custodial property until the property is transferred to the minor.

* **Sec. 28.** AS 13.46.990(11) is amended to read:

(11) "minor" means an individual who has not attained the age of 18 years, except that when used in reference to the beneficiary for whose benefit custodial property is held or to be held, "minor" means an individual who has not attained the age at which the custodian is required under AS 13.46.190**,** [AND] 13.46.195**, and 13.46.197** to transfer the custodial property to the beneficiary;

* **Sec. 29.** AS 13 is amended by adding a new chapter to read:

Chapter 75. Disposition of Human Remains.

Sec. 13.75.010. Directions by decedent. (a) A person may provide directions for the disposition of the person's remains by placing the directions in a disposition document. The directions may include or be limited to designating an agent to control the disposition of the person's remains.

(b) A disposition document must be signed by the person and acknowledged before a notary public, and contain the form and contents required by AS 13.75.030. A disposition document may be a separate document or it may be contained in another document, including a will or prepaid funeral or burial contract. The disposition document may be modified or revoked only by a subsequent disposition document that complies with this subsection.

Sec. 13.75.020. Persons authorized to control disposition. (a) The following persons, in the priority listed, may control disposition of a decedent's remains:

(1) a person designated in a disposition document as the disposition agent for the decedent;

(2) a person serving, or nominated by the decedent in the decedent's will to serve, as the personal representative of the decedent's estate, if the person is acting according to the decedent's written instructions contained in the decedent's will;

(3) the individual who was the spouse of the decedent at the time of the decedent's death;

(4) the sole surviving competent adult child of the decedent, or, if there is more than one surviving competent adult child of the decedent, the majority of the surviving competent adult children; fewer than one-half of the surviving competent adult children may exercise the rights and duties of this section if these surviving adult

children use reasonable efforts to notify all other surviving competent adult children that they are exercising these rights and duties and are not aware of any opposition by one-half or more of all of the surviving competent adult children;

(5) the surviving competent parents of the decedent; if one of the surviving competent parents is absent, the remaining competent parent may exercise the rights and duties of this section after reasonable efforts have been unsuccessful in locating the absent surviving competent parent; in this paragraph, "absent" means a person who is unable to communicate decisions or participate in making decisions regarding the disposition of a decedent's remains personally, telephonically, or through electronic communication;

(6) the surviving competent adult person in the next degrees of kindred, the two surviving competent adult persons of the same degree of kindred if there are two, or, if there are more than two surviving competent adult persons of the same degree of kindred, the majority of those persons; fewer than the majority of surviving competent adult persons of the same degree of kindred may exercise the rights and duties of this section if those persons use reasonable efforts to notify all other surviving competent adult persons of the same degree of kindred that they are exercising these rights and duties and are not aware of any opposition by one-half or more of all surviving competent adult persons of the same degree of kindred;

(7) in the case of an indigent or another individual whose final disposition is the responsibility of the state or a municipality, a public administrator, medical examiner, coroner, or another public official charged with arranging the final disposition of the decedent; or

(8) another person who is willing to assume legal and financial responsibility.

(b) If a person takes control of the disposition under (a) of this section, the person is liable for the reasonable costs of the disposition.

(c) In this section,

(1) "adult" means a person who is 18 years of age or older;

(2) "competent" means a person who does not suffer from disabilities that prevent the person from managing the person's property or affairs.

Sec. 13.75.030. Form of disposition document. A disposition document must be in substantially the following form:

DISPOSITION DOCUMENT

You can select Part 1, Part 2, or both, by completing the part(s) you select, including providing any signatures indicated. Part 3 contains general statements and a place for your signature. You must sign in front of a notary.

PART 1. APPOINTMENT OF AGENT TO CONTROL DISPOSITION OF REMAINS. If you appoint an agent, you and your agent must complete this part as indicated, and the agent must sign this part.

I, _____, being of sound mind, wilfully and voluntarily make known my desire that, on my death, the disposition of my remains shall be controlled by _____ (name of agent first named below), and, with respect to that subject only, I appoint that person as my agent. All decisions made by my agent with respect to the disposition of my remains, including cremation, are binding.

ACCEPTANCE BY AGENT OF APPOINTMENT.

THE AGENT, AND EACH SUCCESSOR AGENT, BY ACCEPTING THIS APPOINTMENT, AGREES TO AND ASSUMES THE OBLIGATIONS PROVIDED IN THIS DOCUMENT. AN AGENT MAY SIGN AT ANY TIME, BUT AN AGENT'S AUTHORITY TO ACT IS NOT EFFECTIVE UNTIL THE AGENT SIGNS BELOW TO INDICATE THE ACCEPTANCE OF APPOINTMENT. ANY NUMBER OF AGENTS MAY SIGN, BUT ONLY THE SIGNATURE OF THE AGENT ACTING AT ANY TIME IS REQUIRED.

AGENT:

Name: _____

Address: _____

Telephone Number: _____

Signature Indicating Acceptance of Appointment:

_____

Date of Signature: _____

SUCCESSORS:

If my agent dies, becomes legally disabled, resigns, or refuses to act, I appoint the following persons (each to act alone and successively, in the order named) to serve as my agent to control the disposition of my remains as authorized by this document:

(1) First Successor

Name: _____

Address: _____

Telephone Number: _____

Signature of First Successor Indicating Acceptance of Appointment:

_____

Date of Signature: _____

(2) Second Successor

Name: _____

Address: _____

Telephone Number: _____

Signature of Second Successor Indicating Acceptance of Appointment:

_____

Date of Signature: _____

PART 2. DIRECTIONS FOR THE DISPOSITION OF MY REMAINS.

Stated below are my directions for the disposition of my remains:

_____

_____

_____

_____

If the disposition of my remains is by cremation, then (pick one):

( ) I do not wish to allow any of my survivors the option of

canceling my cremation and selecting alternative arrangements, regardless of whether my survivors consider a change to be appropriate.

( ) I wish to allow only the survivors I have designated below to have the option of canceling my cremation and selecting alternative arrangements, if they consider that a change to be appropriate:

_____

_____

_____

_____

PART 3. GENERAL PROVISIONS AND SIGNATURE.

WHEN DIRECTIONS BECOME EFFECTIVE. The directions, including any appointment of an agent, in this disposition document become effective on my death.

REVOCATION OF PRIOR APPOINTMENTS. I revoke any prior appointment of any person to control the disposition of my remains.

SIGNATURE OF PERSON MAKING DISPOSITION DOCUMENT

Signature: _____

Date of signature: _____

(Notary acknowledgment of signature)

Sec. 13.75.040. Agent's appointment. The person appointed as an agent in a disposition document may sign the disposition document at any time, but the agent's authority to act is not effective until the agent signs the instrument.

Sec. 13.75.050. Exercise of authority. If a person fails to exercise the person's authority to control disposition under AS 13.75.020 within 48 hours after receiving notification of the decedent's death or within 48 hours after the decedent's death, whichever is earlier, the person may not control the disposition of the decedent's remains, and the right to control the disposition of the decedent's remains passes to the person who is next listed in priority under AS 13.75.020. If the person to whom the right to control the disposition passes under this section fails to exercise the person's authority to control the disposition within 48 hours after being notified that the

authority to control the disposition has passed to the person, the authority to control the disposition passes to the person who is next listed in priority under AS 13.75.020.

Sec. 13.75.060. Certain persons prohibited from control. If a person is charged with a felonious killing in connection with a decedent's death and if the funeral director or the cemetery knows about the charge, then the person may not control disposition, and the right to control disposition passes to the person who is next listed in priority under AS 13.75.020.

Sec. 13.75.070. Prohibition of cremation; written instructions. A person may not authorize cremation for a decedent's remains if a decedent has left directions in a disposition document that the decedent does not wish to be cremated.

Sec. 13.75.080. Implementation of directions. (a) The person authorized to control the disposition shall carry out the directions of the decedent to the extent that the decedent's estate or the person is financially able to carry out the directions.

(b) Notwithstanding any other provision in AS 13.06 - 13.36 (Uniform Probate Code), if a person provides directions in a disposition document that is contained in a will, the directions shall be carried out immediately without the necessity of probate. If the will is not probated or is declared invalid for testamentary purposes, the directions are valid to the extent to which they have been acted on in good faith.

Sec. 13.75.090. Misrepresentation; liability. If a person represents that the person knows the identity of a decedent, and, with the intent to procure the disposition of the decedent's remains, signs a statement, other than a death certificate, that identifies the decedent, the person guarantees the identity of the decedent and is liable for any damages that result, directly or indirectly, from that guarantee.

Sec. 13.75.100. Liability. (a) A disposition organization is not liable for carrying out the directions of a decedent if the disposition organization carries out the directions of a decedent or a person who establishes that the person is entitled to control the disposition.

(b) This section may not be construed to reduce or eliminate the liability of a disposition organization for its negligence or reckless acts.

Sec. 13.75.110. Disputes. (a) A person listed in AS 13.75.020 who is involved in a dispute with one or more persons listed in AS 13.75.020 about which of the

persons has the authority to control disposition may bring an action in the superior court to resolve the dispute.

(b) If there is a dispute with one or more persons listed in AS 13.75.020 about which person has the authority to control disposition, a cemetery organization or funeral establishment is not liable for refusing to accept, to inter, or otherwise to dispose of the decedent's remains until the cemetery organization or funeral establishment receives a court order or another suitable confirmation that the dispute has been resolved.

Sec. 13.75.120. Exemptions. The disposition of the remains of a member of the organized militia under AS 26.05.262, the disposition of the remains of a member of the armed forces under AS 26.10.065(a), and the disposition of the remains of a member of the United States Coast Guard under AS 26.10.065(b) are exempt from this chapter.

Sec. 13.75.190. Definitions. In this chapter,

(1) "control" means the authority to control disposition;

(2) "directions" means

(A) instructions for the disposition of a person's remains;

(B) the appointment of an agent to handle the disposition of a person's remains; or

(C) both (A) and (B) of this paragraph;

(3) "disposition" means disposition of a decedent's remains, including cremation, but does not include an anatomical gift; in this paragraph, "anatomical gift" has the meaning given in AS 13.52.390;

(4) "disposition document" means a disposition document authorized by AS 13.75.010

(A) in which a person provides directions regarding the disposition of the person's remains; and

(B) that complies with AS 13.75.030;

(5) "disposition organization" means

(A) a cemetery association formed under AS 10.30.010;

(B) a nonprofit cemetery corporation authorized by

AS 10.30.055;

(C) a person operating a crematory;

(D) a person operating a columbarium;

(E) a funeral home or other type of funeral establishment;

(F) a funeral director or an embalmer.

Sec. 13.75.195. Short title. This chapter may be cited as the Disposition of Human Remains Act.

*** Sec. 30.** AS 21.42.020 is amended by adding new subsections to read:

(e) Notwithstanding (a) of this section, a trustee, acting in a fiduciary capacity, may procure or cause to be procured an insurance contract that is on the life or body of an individual and under which the proceeds of the insurance contract are payable to the trustee, acting in a fiduciary capacity, if

(1) the trustee, acting in a fiduciary capacity, owns the insurance contract or the trust itself owns the insurance contract;

(2) on the date the contract is made, a settlor of the trust is the individual insured, has an insurable interest in the individual insured, or would have had an insurable interest in the individual insured if the settlor were living at the time the contract was made; in this paragraph, "settlor" means a person, including a person for whom a fiduciary or agent is acting, who executes the trust instrument; and

(3) the proceeds of the contract are primarily for the benefit of a trust beneficiary who has an insurable interest in the individual insured, except that, if the determination of the trust beneficiary's insurable interest is based on (d)(1) of this section, the trust beneficiary's relation by blood or law must be within the third degree.

(f) A person who has an insurable interest in the life or body of an individual may form a business firm that is substantially or solely for the purpose of purchasing, holding, or administering an insurance contract on the life or body of the individual. In this subsection, "firm" has the meaning given in AS 21.97.900, but also includes a business trust and a joint venture.

*** Sec. 31.** AS 34.40 is amended by adding a new section to read:

Sec. 34.40.113. Transfers of individual retirement accounts. (a) Notwithstanding a provision in AS 09.38.017(d), AS 34.40.110, or another law to the

contrary, a person may voluntarily transfer or assign the person's interest in an individual retirement account if the person

(1) is the owner of or a participant in the individual retirement account; or

(2) acquired the interest as a result of the death of another individual.

(b) In this section, "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A.

*** Sec. 32.** AS 34.77.030(g) is amended to read:

(g) Whether or not the community property agreement provides that all property acquired by either or both spouses during the marriage is community property, and except to the extent otherwise expressly provided **by the spouses** in the community property agreement **or by the settlors in a community property trust**, property acquired by a spouse during marriage and after the determination date is individual property if acquired

(1) by gift or a disposition at death made by a third person to the spouse and not to both spouses;

(2) in exchange for or with the proceeds of other individual property of the spouse;

(3) from appreciation or income of the spouse's individual property except to the extent that the income or appreciation is classified as community property under AS 34.77.130;

(4) by a decree, community property agreement, written consent, or reclassification under AS 34.77.060(b) designating it as the individual property of the spouse;

(5) as a recovery for damage to property under AS 34.77.140, except as specifically provided otherwise in a decree, community property agreement, **community property trust,** or written consent; [OR]

(6) as a recovery for personal injury, except for the amount of the recovery attributable to expenses paid or otherwise satisfied from community property**; or**

(7) as a transfer to a community property trust and declared by the trust to be the individual property of the spouse.

* **Sec. 33.** AS 34.77.050(b) is amended to read:

(b) A gift of community property to a third person that is not allowed under (a) of this section is subject to **AS 34.77.140(e) - (h)** [(d) OF THIS SECTION] unless both spouses act together in making the gift or the other spouse ratifies the gift.

* **Sec. 34.** AS 34.77.110 is amended by adding new subsections to read:

(f) Property that spouses agree in a community property agreement is community property or property that is transferred to a community property trust and expressly declared by the trust to be community property is owned as community property regardless of the form of title to the property, even if the title indicates that the property is owned unequally by the spouses or is only in the name of one spouse.

(g) If the title to community property is in a form that provides for ownership by survivorship between the spouses, then ownership by survivorship is presumed to have been made with the consent of both spouses.

(h) If a spouse with management and control of community property designates a beneficiary for the property on the death of one or both of the spouses, and if the community property is held in a form of title that permits a beneficiary designation, the beneficiary designation is effective only for the designating spouse's one-half interest in the community property unless the other spouse consents in writing to the designation. A designation of the following as the beneficiary is presumed to have been made with the consent of the other spouse:

(1) the other spouse or an ancestor or descendant of either spouse;

(2) a charity; or

(3) a trust, to the extent that the beneficiaries consist of persons or entities identified in (1) or (2) of this subsection.

(i) The testimony of one spouse is sufficient to rebut a presumption established under this section.

(j) A disposition of community property contrary to (e) - (h) of this section is voidable. An action in court to void the disposition must be commenced within the time specified by AS 34.77.140(e).

* **Sec. 35.** AS 34.77.140(d) is amended to read:

(d) Except as provided otherwise in **(e) - (h) of this section** [AS 34.77.050(d)], a spouse must begin an action against the other spouse under (a) of this section within three years after acquiring actual knowledge of the facts giving rise to the claim.

* **Sec. 36.** AS 34.77.140 is amended by adding new subsections to read:

(e) Except as provided by (f) - (h) of this section, if a gift of community property during marriage by a spouse does not comply with AS 34.77.050(a), the nondonor spouse may bring an action to recover the property or the amount of money by which the gift exceeded the limit under AS 34.77.050(a). The nondonor spouse may bring the action against the donor spouse, the gift recipient, or both. The nondonor spouse must commence the action within the earliest of the following times:

(1) one year after the nondonor spouse receives notice of the gift;

(2) one year after dissolution of the marriage; or

(3) on or before the deadline for filing a claim under AS 13.16.460 after the death of the donor spouse.

(f) If a recovery under (e) of this section occurs during the marriage of the donor spouse and the nondonor spouse, the property or money that is recovered is considered community property. If the recovery occurs after the dissolution of the marriage of the donor and nondonor spouses or after the death of either the donor or the nondonor spouse, the recovery is limited to 50 percent of the property or money that would have been recovered if the recovery had occurred during the marriage.

(g) If a transfer of community property to a third person during marriage by a spouse acting without the other spouse becomes a completed gift on the death of the donor spouse, or if an arrangement involving community property during marriage by a spouse acting without the other spouse is intended to be and becomes a gift to a third person on the death of the donor spouse, the surviving spouse may bring an action in court against the gift recipient to recover one-half of the gift. To bring an action under this subsection, the surviving spouse must commence the action on or before the deadline for filing a claim under AS 13.16.460.

(h) If a spouse who would have been entitled to bring an action under (e) - (g)

of this section predeceases the donor spouse, the deceased spouse's successor in interest may bring an action for recovery under (e) - (g) of this section, but the action must be commenced within one year after the deceased spouse's death. Recovery in an action under this subsection is the same as if the donor spouse had predeceased the spouse entitled to the recovery, but the amount of the recovery is calculated as of the date of the death of the spouse entitled to the recovery.

*** Sec. 37.** AS 13.38.330(c); AS 34.77.050(d), and 34.77.110(d) are repealed.

*** Sec. 38.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE CHANGE. AS 34.77.110(i), enacted by sec. 34 of this Act, has the effect of amending Rule 301(a), Alaska Rules of Evidence, by specifying the evidence that is sufficient to rebut a presumption under AS 34.77.110(i), enacted by sec. 34 of this Act.

*** Sec. 39.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) AS 09.38.017(a), as amended by sec. 1 of this Act, AS 09.38.017(d), as amended by sec. 2 of this Act, and AS 09.38.017(e), as amended by sec. 3 of this Act, apply to a retirement plan that exists before, on, or after the effective date of this Act. In this section, "retirement plan" has the meaning given in AS 09.38.017(e), as amended by sec. 3 of this Act.

(b) AS 13.36.157, repealed and reenacted by sec. 6 of this Act, AS 13.36.158 and 13.36.159, enacted by sec. 7 of this Act, and AS 13.36.215(b), enacted by sec. 8 of this Act, apply to a trust that exists before, on, or after the effective date of this Act.

(c) AS 13.46.190, as amended by sec. 26 of this Act, AS 13.46.197, enacted by sec. 27 of this Act, and AS 13.46.990(11), as amended by sec. 28 of this Act, apply to a transfer that is made before, on, or after the effective date of this Act. In this subsection, "transfer" has the meaning given in AS 13.46.990.

(d) AS 34.40.113, added by sec. 31 of this Act, applies to an individual retirement account that exists before, on, or after the effective date of this Act. In this section, "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A.

*** Sec. 40.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. AS 34.77.110(i), enacted by sec. 34 of this Act, takes effect only if sec. 38 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

AMENDMENT

OFFERED IN THE SENATE BY SENATOR FRENCH

TO: CSSB 165(JUD), Draft Version "E"

Page 35, following line 23:

Insert a new subsection to read:

"(c) AS 13.46.190, as amended by sec. 26 of this Act, AS 13.46.197, enacted by sec. 27 of this Act, and AS 13.46.990(11), as amended by sec. 28 of this Act, apply to a transfer that is made before, on, or after the effective date of this Act. In this subsection, "transfer" has the meaning given in AS 13.46.990."

Reletter the following subsection accordingly.

SECTIONAL ANALYSIS FOR SENATE BILL 165

Sec. 1. Asset Protection for Inherited Retirement Plans. Alaska Statute 09.38.017(a) protects an individual's interest in a retirement plan from the claims of the individual's creditors. The amendment extends this protection to claims of a beneficiary's creditors (e.g., creditors of an individual's spouse). Arizona, Florida, and Texas have enacted similar provisions.

Sec. 2. This is a conforming amendment for Sec. 28.

Sec. 3. These are definitional changes implementing Sec. 1.

Sec. 4. through Sec. 5. Representation for Settlement Agreements. Alaska Statute 13.06.120 provides that minors, incapacitated persons, and similar persons may be represented by another person who has the same interests in the matter. This type of representation is important in order to simplify and make more efficient proceedings that involve persons who are not legally competent to represent themselves. The existing statute clearly applies to judicial proceedings. However, often it is important to have representation of minors and incapacitated persons with respect to the settlement of accounts of trustees of trusts and with respect to settlement agreements. These amendments clarify that the statute not only applies to court proceedings but also to non-judicial settlement proceedings.

Section 6 through 8. Existing Alaska Statute 13.36.157 provides a trustee with a method to modify an existing trust, commonly referred to as "decanting". Alaska enacted its "decanting" statute in 1998. Alaska copied New York's statute. At the present time, the following states have enacted decanting statutes: Alaska, Arizona, Delaware, Florida, Indiana, Missouri, Nevada, New Hampshire, New York, North Carolina, Ohio, South Dakota, and Tennessee. In addition, decanting statutes are pending before Illinois, Michigan, and Virginia.

New York recently did a thorough revision of its decanting statute and enacted this new revised statute in 2011. The proposed amendment to Alaska's decanting statute closely tracks the changes made by New York with modifications necessary to accommodate Alaska's procedural provisions.

The purposes of a decanting statute are to allow a trustee to modify a trust in order to correct errors and to adjust to changed circumstances and laws. The revised draft distinguishes between trustees who have unlimited discretion and those without unlimited discretion. A trustee without unlimited discretion must maintain the same beneficiaries in the new trust and apply the same standard for distributions. The trustee cannot be a settlor or beneficiary of the trust, and has a fiduciary duty to exercise the power of appointment in the best interests of one or more proper objects of the exercise of the power and as a prudent person would exercise the power under prevailing circumstances. A trustee must exercise the power in writing and must give written notice to the settlor, any person having the right to remove or replace the trustee, and any qualified

beneficiary. A beneficiary may object to the exercise if it is an abuse of discretion, or fails to comply with the trustee's duties stated above. Restrictions exist to protect mandatory distribution rights, tax benefits, and to prohibit the trustee from exercising the power to either increase the trustee's compensation or decrease the trustee's liability.

Implementation of irrevocable trusts is best accomplished if the law provides reasonable flexibility to adjust to changed circumstances and to correct errors. The reason why so many states have enacted decanting statutes is because of the need for this flexibility. Amendment to Alaska's decanting statute to include these revised provisions will benefit the residents of the state of Alaska, many of whom use lifetime or testamentary trusts to implement their estate planning purposes.

Sec. ~~6~~ 9 through Sec. ~~22~~25. Amendments to 2003 Alaska Principal and Income Act. This modern act allows a person creating a new trust, or a trustee of an existing trust, to adopt a "unitrust" approach for determining the income of the trust which may be required to be distributed annually. A unitrust distributes a certain percentage of its assets annually to the current beneficiary. The use of this percentage unitrust approach allows the trustee to invest in order to maximize total return for both income and remainder beneficiaries.

Since 2003, the Internal Revenue Service has issued final regulations with respect to unitrusts. The Alaska Principal and Income Act amendments contained in this bill are designed to update Alaska's provisions to take advantage of these new regulations.

In summary, the most important changes contained in the bill expressly allow a trustee to choose a unitrust rate of three to five percent rather than be limited to the four percent amount presently in the law. The changes provide an explicit definition of income for a trust drafted as a unitrust. Language is added to provide the ordering of distributions among types of income and principal. A smoothing period of up to five years is allowed for determining the assets to be used when applying the unitrust percentage. Also, the new provisions clarify how the unitrust rules will apply to retirement benefits. These new changes will facilitate the use of unitrusts under Alaska law and maximize flexibility to take advantage of federal income tax planning.

Sec. ~~23~~ 26 through ~~25~~28. Amendments to Alaska Uniform Transfers to Minors Act. The Alaska Uniform Transfers to Minors Act allows donors, personal representatives, trustees, and obligors, to transfer assets to an account for the benefit of a minor. A custodian is named who may make distributions for the benefit of the minor. Under the existing statutes, the minor is entitled to the property when the minor reaches age 18 years or 21 years, depending on the type of transfer. The statute allows this age of distribution to be extended in certain circumstances to age 25 years.

A number of situations have arisen both in Alaska and in other states where it is undesirable for assets to be distributed later than the ages 18, 21, or 25 years, due to problems the minor may have, including substance abuse problems, immaturity, and the inability to manage assets. Often, the minor himself or herself is willing to have the assets remain in a custodial setting, managed by a competent person who will make distributions for the benefit of the minor. The amendments in this bill would allow for the extension to an age greater than that presently specified in the statute, as long as the minor consents to the extension during the six-month period when the minor attains the age when otherwise the assets would be distributed under the statute.

Sec. ~~26~~29. Decedents Remains. Alaska does not presently have adequate statutory authority with respect to who may control the disposition of a decedent's remains. This has resulted in arguments and disputes among relatives and friends. Businesses involved in this area need protection concerning who is the person entitled to give them directions. This new act resolves the present uncertainty of the law. It provides authority for a person to provide directions and a form

for a disposition document. If a person has not provided directions, then a priority list is provided of the persons who may control the disposition of the decedent's remains. Businesses who follow these directions or priority list are protected from liability.

Sec. ~~27~~30. **Insurable Interests.** For many years, individuals have relied on life Insurance in helping to meet their financial, business, and estate planning needs. Often, their needs are best served by having one or more life insurance contracts held in an irrevocable trust, partnership, or limited liability company. In particular, irrevocable life insurance trusts have been widely used throughout the United States to own life insurance policies.

However, a relatively recent federal court case *(Chawla, ex rel Giesinger v. Transamerica Occidental Life Ins. Co.*, 2005 WL 405405 (E.D. Va. 2005)) had the effect of pointing out that while state insurance statutes typically require purchasers of insurance contracts to have an "insurable interest" in the life or body of the insured, the statutory provisions describing who may have an insurable interest did not specifically include trusts and business entities which are commonly used to purchase and own such policies. This case raised sufficient uncertainty about the status of life insurance trusts that in July, 2010, the Uniform Law Commission approved amendments to the Uniform Trust Code to clarify the situation.

Alaska has previously adopted substantial portions of the Uniform Trust Code. The proposed amendment to AS 21.42.020 is based in large part on the recommended amendments to the Uniform Trust Code, and also clarifies that persons with insurable interests may form business entities for the purposes of purchasing, holding, and administering life insurance contracts. Other states, for example Delaware, have already amended their statutes for these reasons, or are considering such amendments.

Sec. ~~28~~31. **Transfers of IRA Interests.** Lifetime estate planning often occurs by a participant making gifts, sales or other transfers of property during lifetime to family members or trusts for their benefit. For many individuals, one of their most valuable assets is their individual retirement account (IRA). Alaska law (AS 09.38.017) protects IRAs from claims of creditors. This protection could be construed to even prohibit voluntary transfers of the participant's interest in an IRA, which would prevent lifetime transfers of IRAs for estate planning and other purposes. Although it is important to maintain that creditor protection for IRAs, it would be beneficial to permit voluntary transfers of IRAs. Therefore, this section clarifies that the participant of an IRA may voluntarily transfer his or her IRA during lifetime.

Sec. ~~29~~–32 **through** Sec. ~~33~~36. **Community Property.** In 1998, Alaska enacted an optional community property system. Several amendments have been made to Alaska's act, and this bill proposes further amendments designed to improve the act. Specifically, the amendments accomplish the following:

a. Add references to a community property trust in appropriate provisions.

b. Eliminate language stating a confusing statute of limitations and incorporates by reference a new statute of limitations.

c. Provide clarification that property which spouses agree is community property is owned as community property regardless of the form of title to the property. If title to community property is in a form that provides for survivorship ownership between the spouses then the survivorship ownership is presumed to have been made with the consent of both spouses. If one spouse designates a beneficiary for an interest in property, the designation is only effective for that spouse's one half interest unless the other spouse consents in writing. Various family designations are presumed to have been made with the consent of the other spouse. The

testimony of one spouse is sufficient to rebut a presumption.

d. Enact remedies for improper transfers and limitation periods within which those remedies must be pursued.

Sec. ~~34~~37. Repealed sections.

Sec. ~~35~~38. Indirect rule change.

Sec. ~~36~~39. Applicability

Sec. ~~37~~40. Requirement for two-thirds majority vote of each house.

CS FOR SENATE BILL NO. 165(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE JUDICIARY COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to property exemptions for retirement plans, individual retirement accounts, and Roth IRAs; relating to pleadings, orders, liability, and notices under the Uniform Probate Code; relating to the appointment of trust property; relating to the Alaska Principal and Income Act; relating to the Alaska Uniform Transfers to Minors Act; relating to the disposition of human remains; relating to insurable interests for life insurance policies; relating to transfers of individual retirement plans; relating to the community property of married persons; and amending Rule 301(a), Alaska Rules of Evidence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 09.38.017(a) is amended to read:

(a) In addition to the exemption under AS 09.38.015(b), the following are exempt from a claim of an individual's **or beneficiary's** creditor:

(1) the interest of the individual **or beneficiary** in a retirement plan; [AND]

(2) the money or other assets payable to the individual from a retirement plan**;**

(3) the interest of a beneficiary in

(A) a retirement plan if the beneficiary acquired the interest as a result of the death of an individual; the beneficiary's interest is exempt to the same extent that the individual's interest was exempt immediately before the individual died;

(B) an individual retirement account that has been transferred by the individual to the beneficiary during the individual's lifetime; the beneficiary's interest is exempt to the same extent that the individual's interest was exempt immediately before the transfer to the beneficiary;

(4) the money or other assets payable to a beneficiary from

(A) a retirement plan if the beneficiary acquired the money or other assets as a result of the death of an individual who would have had, during the individual's life, an exemption in the money or other assets;

(B) an individual retirement account if the beneficiary acquired the money or other assets as a result of the transfer of the money or other assets by an individual who would have had, at the time of the transfer, an exemption in the money or other assets.

*** Sec. 2.** AS 09.38.017(d) is amended to read:

(d) A retirement plan exempt from claims under (a) of this section is conclusively presumed to be a spendthrift trust under this section**, except for transfers or assignments under AS 34.40.113**.

*** Sec. 3.** AS 09.38.017(e) is amended to read:

(e) In this section,

(1) "alternate payee" has the meaning given in 26 U.S.C. 414(p)(8);

(2) **"beneficiary" includes a person, trust, or trustee who has,**

before or after the death of an individual, a direct or indirect beneficial interest in a retirement plan; in this paragraph, "beneficial interest" includes an interest that is acquired

(A) as a designated beneficiary, survivor, co-annuitant, heir, or legatee; or

(B) if excludible from gross income under 26 U.S.C. (Internal Revenue Code), as a

(i) rollover under 26 U.S.C. 408 or 26 U.S.C. 408A;

(ii) a distribution from one retirement plan to another retirement plan; or

(iii) a distribution that is similar to (i) or (ii) of this subparagraph;

(3) "individual" means [AN INDIVIDUAL WHO IS] a participant in, **an owner** [A BENEFICIARY] of, or an alternate payee of a retirement plan;

(4) "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A;

(5) [(3)] "retirement plan" means

(A) a retirement plan that is qualified under 26 U.S.C. 401(a), 26 U.S.C. 403(a), 26 U.S.C. 403(b), [26 U.S.C. 408, 26 U.S.C. 408A, OR] 26 U.S.C. 409**, 26 U.S.C. 414(d), 26 U.S.C. 414(e), or 26 U.S.C. 457** (Internal Revenue Code)**;**

(B) an individual retirement account; and

(C) the teachers' retirement system under AS 14.25, the judicial retirement system under AS 22.25, the public employees' retirement system under AS 39.25, and the elected public officers' retirement system under former AS 39.37.

*** Sec. 4.** AS 13.06.120 is amended to read:

Sec. 13.06.120. Pleadings; when parties bound by orders; notice. In any proceedings involving trusts, nonprobate assets, or estates of decedents, minors, protected persons, or incapacitated persons brought under AS 13.06 - AS 13.36 or

AS 13.38, [INCLUDING ANY JUDICIALLY SUPERVISED SETTLEMENTS AND ANY NONJUDICIAL PROCEEDINGS AND SETTLEMENTS,] the following apply:

(1) interests to be affected shall be described in pleadings that give reasonable information to owners by name or class, by reference to the instrument creating the interests, or in other appropriate manner;

(2) persons are bound by orders binding others in the following cases:

(A) orders binding the sole holder or all co-holders of a power of revocation or a general or nongeneral power of appointment, including one in the form of a power of amendment, bind other persons to the extent their interests, as objects, takers in default, or otherwise, are subject to the power;

(B) to the extent there is no conflict of interest between them or among persons represented, orders binding a conservator bind the person whose estate the conservator controls; orders binding a guardian bind the ward if no conservator of the estate has been appointed; orders binding a trustee bind beneficiaries of the trust in proceedings to probate a will establishing or adding to a trust, to review the acts or accounts of a prior fiduciary, and in proceedings involving creditors or other third parties; orders binding a personal representative bind persons interested in the undistributed assets of a decedent's estate in actions or proceedings by or against the estate; and orders binding an agent having authority to act with respect to the particular questions or dispute bind the principal; if there is no conflict of interest and no conservator or guardian has been appointed, a parent may represent the minor child;

(C) an unborn person, a minor, an incapacitated person, or a person whose identity or location is unknown or not reasonably ascertainable who is not otherwise represented is bound by an order to the extent the interest is adequately represented by another party having a substantially identical interest in the proceeding;

(D) with regard to interests given upon the happening of a certain event to persons who comprise a certain class, orders binding the living

persons who would constitute the class, if the event had happened immediately before the commencement of the proceeding, bind all members of the class;

(E) with regard to an interest given to a living person when the same interest or a share of the interest is to pass to the surviving spouse or to persons who are or might be the distributees, devisees, heirs, or issue of the living person upon the happening of a future event, orders binding the living person bind the surviving spouse, distributees, devisees, heirs, or issue of the living person;

(F) with regard to interests given to a person or a class of persons, or to both, upon the happening of a future event, if the same interest or a share of the interest is to pass to another person or class of persons, or to both, upon the happening of an additional future event, orders binding the living person or class of persons who would take the interest upon the happening of the first event bind the persons and classes of persons who might take on the happening of the additional future event;

(G) if a person is designated by a trust instrument to represent and bind a born or unborn beneficiary of the trust and receive a notice, information, accounting, or report for the beneficiary, then the beneficiary is bound by an order binding the designated person; in this subparagraph,

(i) the settlor may make the designation in the trust instrument, in a separate document, or by a trust protector authorized in the trust instrument to make the designation;

(ii) except as otherwise provided in this subparagraph, a person designated under (i) of this subparagraph may not represent and bind a beneficiary while the designated person is serving as trustee;

(iii) except as otherwise provided in this subparagraph, a person designated under (i) of this subparagraph may not represent and bind another beneficiary if the designated person also is a beneficiary, unless the designated person was named by the settlor, is the beneficiary's spouse, or is a grandparent or descendant of a grandparent of the beneficiary or the beneficiary's spouse; in this sub-

subparagraph, "spouse" means the individual to whom the beneficiary is married and with whom the beneficiary is living, and a physical separation primarily for education, business, health, and similar reasons does not prevent the individual from being considered to be living with the beneficiary;

(3) a person representing another person under (2)(A) - (F) of this section and a person designated under (2)(G)(i) of this section are not liable to the beneficiary whose interests are represented, or to a person claiming through that beneficiary, for an action or omission to act made in good faith;

(4) notice is required as follows:

(A) notice as prescribed by AS 13.06.110 shall be given to every interested person or to one person who can bind an interested person as described in (2)(A), (B), or (D) - (G) of this section; notice may be given both to a person and to another person who may bind the person;

(B) notice is given to unborn persons, a minor, an incapacitated person, or a person whose identity or location is unknown or not reasonably ascertainable, and persons who are not represented under (2)(A), (B), or (D) - (G) of this section, by giving notice to all known persons whose interests in the proceedings are substantially identical to those of the unborn persons, the minor, the incapacitated person, or the person whose identity or location is unknown or not reasonably ascertainable;

(5) at any point in a proceeding, a court may appoint a guardian ad litem to represent the interest of an unborn person, a minor, an incapacitated person, or a person whose identity or address is unknown or not reasonably ascertainable, if the court determines that representation of the interest otherwise would be inadequate; if not precluded by conflict of interests, a guardian ad litem may be appointed to represent several persons or interests; the court shall set out its reasons for appointing a guardian ad litem as a part of the record of the proceeding.

*** Sec. 5.** AS 13.06.120 is amended by adding a new subsection to read:

(b) In this section,

(1) "order" means a judicial order, nonjudicial order, the result of the

settlement of an account of a fiduciary under a procedure authorized by AS 13.06 - 13.36 or AS 13.38, and a settlement agreement resulting from a proceeding;

(2) "proceeding" means a judicial proceeding, nonjudicial proceeding, the settlement of an account of a fiduciary under a procedure authorized by AS 13.06 - 13.36 or AS 13.38, and a settlement negotiation, even if the settlement negotiation does not involve a judicial or nonjudicial third party who decides or facilitates a settlement.

* **Sec. 6.** AS 13.36.157 is repealed and reenacted to read:

Sec. 13.36.157. Exercise of power of appointment. (a) An authorized trustee with unlimited discretion to invade trust principal may appoint part or all of that principal to a trustee of an appointed trust for, and only for the benefit of, a current beneficiary of the invaded trust to the exclusion of other current beneficiaries. A permissible appointee of a power of appointment held by a beneficiary of the appointed trust is not considered a beneficiary of the appointed trust. The successor and remainder beneficiaries of the appointed trust may be one or more of the successor and remainder beneficiaries of the invaded trust to the exclusion of other successor and remainder beneficiaries.

(b) An authorized trustee exercising the power under (a) of this section may grant a discretionary power of appointment, including a presently exercisable power of appointment, in the appointed trust to one or more of the current beneficiaries of the invaded trust, to the extent that the beneficiary who is granted the power to appoint is authorized to receive the principal outright under the terms of the invaded trust. A permissible appointee is not limited to the beneficiaries of the invaded trust.

(c) Under (a) and (b) of this section, if the beneficiaries of the invaded trust are described by a class, the beneficiaries of the appointed trust may include present or future members of that class.

(d) An authorized trustee with the power to invade trust principal but without unlimited discretion may appoint part or all of the principal of the trust to a trustee of an appointed trust if the current beneficiaries of the appointed trust are the same as the current beneficiaries of the invaded trust and the successor and remainder beneficiaries of the appointed trust are the same as the successor and remainder beneficiaries of the

invaded trust. The shares of the current beneficiaries of the appointed trust must be the same as the shares of the current beneficiaries of the invaded trust, and the shares of the successor and remainder beneficiaries of the appointed trust must be the same as the shares of the successor and remainder beneficiaries of the invaded trust.

(e) If the authorized trustee exercises the power under (d) of this section, the appointed trust must include the same standard authorizing the trustee to distribute the income or invade the principal of the appointed trust as the standard in the invaded trust. However, the standard authorizing the trustee to distribute the income or invade the principal of the appointed trust may be changed if the trustee appoints to an appointed trust that is a special needs trust, a pooled trust, or a third-party trust.

(f) If an authorized trustee exercises the power under (d) and (e) of this section to extend the duration of the appointed trust beyond the duration of the invaded trust for any period after the invaded trust would have otherwise terminated under the provisions of the invaded trust, the appointed trust, in addition to the language required to be included in the appointed trust under (e) of this section, may also provide an additional trustee with unlimited discretion to invade the principal of the appointed trust during the extended duration. The trustee with unlimited discretion continues to be subject to the restrictions in (d) - (h) of this section.

(g) Under (d) - (f) of this section, if the beneficiaries of the invaded trust are described by a class, the beneficiaries of the appointed trust include present or future members of that class.

(h) If the authorized trustee exercises the power under (d) - (g) of this section and if the invaded trust grants a power of appointment to a beneficiary of the trust, the appointed trust must grant this power of appointment in the appointed trust, and the class of permissible appointees shall be the same as in the invaded trust.

*** Sec. 7.** AS 13.36 is amended by adding new sections to read:

Sec. 13.36.158. Additional provisions relating to exercise of a power of appointment. (a) An exercise of the power to invade trust principal under AS 13.36.157 is the exercise of a special power of appointment.

(b) The appointed trust to which an authorized trustee appoints the assets of the invaded trust under AS 13.36.157 may have a duration that is longer than the

duration set out in the invaded trust.

(c) If an authorized trustee has unlimited discretion to invade the principal of a trust and if the same trustee or another trustee has a power, not dependent on unlimited discretion, to invade principal under the trust instrument, the authorized trustee having unlimited discretion may exercise the power of appointment under AS 13.36.157(a) - (c).

(d) An authorized trustee may exercise the power to appoint in favor of an appointed trust under AS 13.36.157 whether or not there is a current need to invade principal under the terms of the invaded trust.

(e) An authorized trustee exercising the power under AS 13.36.157 - 13.36.159 has a fiduciary duty to exercise the power in the best interests of one or more proper objects of the exercise of the power and as a prudent person would exercise the power under the prevailing circumstances. The authorized trustee may not exercise the power under AS 13.36.157 - 13.36.159 if there is substantial evidence of a contrary intent of the settlor and it cannot be established that the settlor would be likely to have changed this intention under the circumstances existing at the time the trustee exercises the power. The provisions of the invaded trust may not be viewed alone as substantial evidence of a contrary intent of the settlor unless the invaded trust expressly prohibits the exercise of the power in the manner intended by the authorized trustee.

(f) The provisions of AS 13.36.157 - 13.36.159 may not be construed to abridge the right of a trustee to appoint property further in trust under the terms of the governing instrument of a trust, another provision of law, or common law, or as directed by a court having jurisdiction over the trust.

(g) Nothing in AS 13.36.157 - 13.36.159 creates or implies a duty to exercise a power to invade principal. An inference of impropriety may not be made, and liability is not incurred, as a result of an authorized trustee not exercising the power conferred under AS 13.36.157.

(h) A power authorized by AS 13.36.157 may be exercised, subject to the provisions of AS 13.36.159(a), unless expressly prohibited by the terms of the governing instrument. A general prohibition against amending or revoking the invaded

trust and a provision that constitutes a spendthrift clause do not preclude the exercise of a power under AS 13.36.157.

(i) An authorized trustee may not exercise a power authorized by AS 13.36.157 to

(1) reduce, limit, or modify a beneficiary's current right to a mandatory distribution of income or principal, a mandatory annuity or unitrust interest, a right to withdraw a percentage of the value of the trust, or a right to withdraw a specified dollar amount, if the mandatory right has come into effect with respect to the beneficiary, but the mandatory right may be reduced, limited, or modified during any extended duration of the trust; however, notwithstanding the other provisions in this paragraph, but subject to the other limitations in AS 13.36.157 - 13.36.159, an authorized trustee may exercise a power authorized by AS 13.36.157 to appoint to an appointed trust that is a special needs trust, a pooled trust, or a third-party trust;

(2) decrease or indemnify against a trustee's liability or exonerate a trustee from liability for failure to exercise reasonable care, diligence, and prudence unless the court having jurisdiction over the trust specifies otherwise;

(3) eliminate a provision granting another person the right to remove or replace the authorized trustee exercising the power under AS 13.36.157 unless a court having jurisdiction over the trust specifies otherwise;

(4) fix as binding and conclusive the value of an asset for purposes of distribution, allocation, or otherwise; or

(5) jeopardize

(A) the deduction or exclusion originally claimed with respect to a contribution to the invaded trust that qualified for the annual exclusion under 26 U.S.C. 2503(b), the marital deduction under 26 U.S.C. 2056(a) or 26 U.S.C. 2523(a), or the charitable deduction under 26 U.S.C. 170(a), 26 U.S.C. 642(c), 26 U.S.C. 2055(a), or 26 U.S.C. 2522(a) (Internal Revenue Code);

(B) the qualification of a transfer as a direct skip under 26 U.S.C. 2642(c) (Internal Revenue Code);

(C) the election to treat a corporation as a subchapter S corporation under 26 U.S.C. 1362 (Internal Revenue Code); or

(D) another specific tax benefit for which a contribution originally qualified for income, gift, estate, or generation-skipping transfer tax purposes under 26 U.S.C. (Internal Revenue Code).

(j) Before exercising the power under AS 13.36.157, an authorized trustee shall consider the tax implications of the exercise of the power.

(k) An authorized trustee may not exercise a power described in AS 13.36.157 - 13.36.159 in violation of the limitations on validity in AS 34.27.051 or 34.27.100, or the restrictions on exercising certain powers in AS 13.36.153 by trustees who are not independent. A violation voids the entire exercise of the power unless the exercise is modified to correct the violation.

(*l*) Unless a court having jurisdiction over the trust directs otherwise, an authorized trustee may not exercise a power authorized by AS 13.36.157 to change the provisions regarding the determination of the compensation of a trustee. The commissions or other compensation payable to the trustees of the invaded trust may continue to be paid to the trustees of the appointed trust during the term of the appointed trust and shall be determined in the same manner as for the invaded trust.

(m) A trustee may not receive a payment, a commission, or other compensation for appointing property from the invaded trust to an appointed trust under AS 13.36.157. However, a trustee may be compensated at an hourly rate for the time spent considering and implementing the exercise of a power to appoint.

(n) Unless the invaded trust expressly provides otherwise, the provisions in AS 13.36.157 - 13.36.159 apply to

(1) a trust, whether testamentary or inter vivos, governed by the laws of this state, including a trust whose governing law has been changed to the laws of this state; and

(2) a trust that has a trustee who is an individual domiciled in this state, or a trustee that is an entity having an office in this state, if a majority of the trustees select this state as the location for the primary administration of the trust and the selection is made by an instrument in writing that is signed and acknowledged by a majority of the trustees; the instrument exercising this selection shall be kept with the records of the invaded trust.

(o) A power to pay principal that includes words such as "best interests," "welfare," "comfort," or "happiness" is not considered a limitation or modification of the right to distribute principal.

(p) In this section, "internal revenue code" means the Internal Revenue Code of the United States (26 U.S.C.) as it exists on the effective date of this Act and as it is amended from time to time;

Sec. 13.36.159. Implementation of power of appointment. (a) Unless the authorized trustee provides otherwise, the appointment of

(1) all of the assets comprising the principal of the invaded trust to an appointed trust includes subsequently discovered assets of the invaded trust and undistributed principal of the invaded trust acquired after the appointment to the appointed trust;

(2) a part but not all of the assets comprising the principal of the invaded trust to an appointed trust may not include subsequently discovered assets belonging to the invaded trust or principal paid to or acquired by the invaded trust after the appointment to the appointed trust; those subsequently discovered assets remain the assets of the invaded trust.

(b) The exercise of the power to appoint to an appointed trust under AS 13.36.157 shall be evidenced by an instrument in writing that is signed, dated, and acknowledged by the authorized trustee. The exercise of the power is effective 30 days after the date of service of the instrument as specified in (d) of this section, unless the persons entitled to notice consent in writing to a sooner effective date.

(c) An authorized trustee may exercise the power authorized by AS 13.36.157 without the consent of the settlor or a person interested in the invaded trust and without court approval. However, an authorized trustee may seek court approval for the exercise. When seeking court approval, notice shall be sent to all qualified beneficiaries.

(d) A copy of the invaded trust, the appointed trust, and the instrument exercising the power shall be delivered to

(1) the settlor, if living, of the invaded trust;

(2) a person having the right, under the terms of the invaded trust, to

remove or replace the authorized trustee exercising the power under AS 13.36.157; and

(3) a qualified beneficiary or a person who may represent and bind the qualified beneficiary under AS 13.06.120.

(e) Notice under (d) of this section to a qualified beneficiary is not required if the settlor has exempted the authorized trustee from providing notification or information to beneficiaries under AS 13.36.080(b). Notice under (d) of this section shall be provided under AS 13.06.110.

(f) The instrument exercising the power must state whether the appointment is of all or part of the assets comprising the principal of the invaded trust and, if a part, the approximate percentage of the value of the principal of the invaded trust that is the subject of the appointment.

(g) A person entitled to notice under (d) of this section may object to the trustee's exercise of the power under AS 13.36.157 - 13.36.159 by serving a written notice of objection on the trustee before the effective date of the exercise of the power. The failure to object does not constitute consent.

(h) The receipt of a copy of the instrument exercising the power does not, before the expiration of the limitation period in AS 13.36.100 with respect to a report disclosing the exercise, affect the right of a qualified beneficiary to object to the exercise of the power under AS 13.36.157 and to request the court to modify or to reverse the exercise.

(i) A copy of the instrument exercising the power shall be kept with the records of the invaded trust.

*** Sec. 8.** AS 13.36.215 is amended by adding a new subsection to read:

(b) In AS 13.36.157 - 13.36.159,

(1) "appointed trust" means an irrevocable trust that receives principal from an invaded trust under AS 13.36.157, including a new trust created by the settlor of the invaded trust or by the trustees, acting in that capacity, of the invaded trust;

(2) "authorized trustee" means, with regard to an invaded trust, a trustee with the authority to pay trust principal to or for a current beneficiary; in this paragraph, "trustee" does not include a settlor or a beneficiary to whom income or

principal must be paid, currently or in the future, or who is or will become eligible to receive a distribution of income or principal in the discretion of the trustee other than by the exercise of a power of appointment held in a nonfiduciary capacity;

(3) "current beneficiary" means a person or, with regard to a class of persons, a person who is or will become a member of the class, to whom a trustee may distribute principal when exercising a power under AS 13.36.157;

(4) "invade" means pay directly to the beneficiary of a trust or apply to the benefit of a beneficiary;

(5) "invaded trust" means an irrevocable inter vivos or testamentary trust the principal of which is appointed under AS 13.36.157;

(6) "pooled trust" means a trust described in 42 U.S.C. 1396p(d)(4)(C) that meets the requirements for a pooled trust under the regulations of this state relating to the Medicaid treatment of trusts;

(7) "principal" means the assets of a trust, including accrued and accumulated income, but excluding income that is currently required to be distributed;

(8) "special needs trust" means a trust under 42 U.S.C. 1396p(d)(4)(A) that meets the requirements for a special needs trust under the regulations of this state relating to the Medicaid treatment of trusts;

(9) "third-party trust" means a trust that is

(A) established by a third party with the assets of the third party to provide for supplemental needs for a person eligible when the trust is created or at a future time for needs-based public assistance; and

(B) exempt from the provisions of the regulations of this state relating to the Medicaid treatment of trusts;

(10) "unlimited discretion" means the unlimited right to distribute principal that is not modified in any manner.

*** Sec. 9.** AS 13.38.200(b) is amended to read:

(b) In exercising a discretionary power of administration regarding a matter within the scope of this chapter, whether granted by the governing instrument or this chapter, including AS 13.38.210 and **13.38.300 - 13.38.490** [13.38.300 - 13.38.410], a fiduciary shall administer a trust or estate impartially based on what is fair and

reasonable to all of the beneficiaries, except to the extent that the governing instrument clearly manifests an intention that the fiduciary shall or may favor one or more of the beneficiaries. A determination in accordance with this chapter is presumed to be fair and reasonable to all of the beneficiaries.

*** Sec. 10.** AS 13.38.210(c) is amended to read:

(c) A trustee may not make an adjustment under this section if

(1) the adjustment would diminish the income interest in a trust that requires all of the income to be paid at least annually to a spouse and for which a federal estate tax or gift tax marital deduction would be allowed, in whole or in part, if the trustee did not have the power to make the adjustment; the prohibition in this paragraph does not apply to a trust after the trustee determines that the marital deduction has not been claimed or has not been allowed;

(2) the adjustment would reduce the actuarial value of the income interest in a trust to which a person transfers property with the intent to qualify for a federal gift tax exclusion;

(3) the adjustment would change the amount payable to a beneficiary as a fixed annuity or a fixed fraction of the value of the trust assets;

(4) the adjustment is from any amount that is permanently set aside for charitable purposes under the governing instrument and for which a federal estate or gift tax charitable deduction has been taken, unless both income and principal are permanently set aside for charitable purposes under the governing instrument;

(5) possessing or exercising the power to make an adjustment would cause an individual to be treated as the owner of all or part of the trust for federal income tax purposes, and the individual would not be treated as the owner if the trustee did not possess the power to make an adjustment;

(6) possessing or exercising the power to make an adjustment would cause all or part of the trust assets to be subject to federal estate or gift tax with respect to an individual, and the assets would not be subject to federal estate or gift tax with respect to the individual if the trustee did not possess the power to make an adjustment;

(7) the trustee is a beneficiary of the trust; or

(8) the trust has been converted to a unitrust under **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410].

* **Sec. 11.** AS 13.38.300 is amended to read:

Sec. 13.38.300. Power to convert to unitrust. Unless expressly prohibited by the governing instrument, a trustee may release the power to adjust under AS 13.38.210 and may convert a trust into a unitrust as described in **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410] if

(1) the trustee determines that the conversion will enable the trustee to better carry out the intent of the settlor or testator and the purposes of the trust;

(2) the trustee gives written notice of the trustee's intention to release the power to adjust, of the trustee's intention to convert the trust into a unitrust, **of the unitrust percentage selected, of the smoothing period selected,** and of how the unitrust will operate, including what initial decisions the trustee **intends to** [WILL] make under **AS 13.38.340** [THIS SECTION], to all the sui juris beneficiaries who

(A) are currently eligible to receive income from the trust;

(B) would be eligible, if a power of appointment were not exercised, to receive income from the trust if the interest of all of the beneficiaries eligible to receive income under (A) of this paragraph were to terminate immediately before the giving of the notice; and

(C) would, if a power of appointment were not exercised, receive a distribution of principal if the trust were to terminate immediately before the giving of the notice;

(3) there are at least one sui juris beneficiary under (2)(A) of this section and at least one sui juris beneficiary under (2)(B) or (C) of this section; and

(4) a sui juris beneficiary does not object to the conversion to a unitrust in a writing delivered to the trustee within 60 days after the mailing of the notice under (2) of this section.

* **Sec. 12.** AS 13.38.310(a) is amended to read:

(a) A trustee may petition the court to approve the conversion to a unitrust if

(1) a beneficiary timely objects to the conversion to a unitrust; [OR]

(2) there is not a sui juris beneficiary who is eligible under

AS 13.38.300(2); or

(3) the trustee is a beneficiary [AS 13.38.300(2)(A), AND THERE IS NOT A SUI JURIS BENEFICIARY WHO IS ELIGIBLE UNDER AS 13.38.300(2)(B) OR (C)].

* **Sec. 13.** AS 13.38.330(b) is amended to read:

(b) After a trust has been converted to a unitrust, "income" in the governing instrument means an annual distribution equal to **the amount produced by the application of a fixed unitrust percentage established under (d) of this section to** [FOUR PERCENT OF] the net fair market value, as determined annually, of the trust's assets, whether the assets would be considered income or principal under other provisions of this chapter**, averaged over the lesser of**

(1) the preceding years in the smoothing period selected by the trustee; or

(2) the period during which the trust has been in existence.

* **Sec. 14.** AS 13.38.330 is amended by adding a new subsection to read:

(d) The unitrust percentage to be used in determining the unitrust amount must be a reasonable current return from the unitrust of at least three percent and not more than five percent, taking into account the intentions of the trustor of the unitrust as expressed in the governing instrument, the needs of the beneficiaries, general economic conditions, projected current earnings for the unitrust, projected appreciation for the unitrust, and the effect of projected inflation on the unitrust.

* **Sec. 15.** AS 13.38.340 is amended to read:

Sec. 13.38.340. Trustee's discretionary powers regarding unitrust. The trustee may, in the trustee's discretion, from time to time, determine

(1) the effective date of a conversion to a unitrust;

(2) the provisions for prorating a unitrust distribution for a short year in which a beneficiary's right to payments commences or ceases;

(3) the frequency of unitrust distributions during the year;

(4) the effect of other payments from or contributions to the trust on the trust's valuation;

(5) whether to value the trust's assets annually or more frequently;

(6) **whether to use a smoothing period of three, four, or five years;**

(7) what valuation dates to use;

(8) [(7)] how frequently to value nonliquid assets and whether to estimate their value;

(9) [(8)] whether to omit trust property occupied or possessed by a beneficiary from the calculations; and

(10) [(9)] other matters necessary for the proper functioning of the unitrust.

*** Sec. 16.** AS 13.38.350(b) is amended to read:

(b) Unless otherwise provided by the governing instrument, a unitrust distribution shall be considered to have been paid from net income as net income would be determined if the trust were not a unitrust. To the extent net income is insufficient, the unitrust distribution shall be considered to have been paid from **ordinary income that is allocable under federal income tax rules to net income as determined for a unitrust. To the extent that the ordinary income is insufficient, the unitrust distribution is considered to have been paid from** net realized short-term capital gains. To the extent **net** income**, ordinary income,** and net realized short-term capital gains are insufficient, the unitrust distribution shall be considered to have been paid from net realized long-term capital gains. To the extent **net** income**, ordinary income,** and net realized short-term and long-term capital gains are insufficient, the unitrust distribution shall be paid from the principal of the trust.

*** Sec. 17.** AS 13.38.360 is amended to read:

Sec. 13.38.360. Court orders regarding unitrust. The trustee or, if the trustee declines to petition the court, a beneficiary may petition the court to

[(1) SELECT A PAYOUT PERCENTAGE DIFFERENT THAN FOUR PERCENT;

(2)] provide for a distribution of net income, as would be determined if the **unitrust** [TRUST] were not a unitrust, in excess of the unitrust distribution if the distribution is necessary to preserve a tax benefit [;

(3) AVERAGE THE VALUATION OF THE TRUST'S NET ASSETS OVER A PERIOD OTHER THAN THREE YEARS].

* **Sec. 18.** AS 13.38.390(b) is amended to read:

(b) If AS 13.38.380(a)(3), (4), or (6) applies to all the trustees, the trustees may petition the court to direct a conversion. **In the alternative, the trustees may appoint an independent person who shall be granted the authority, while acting in a fiduciary capacity, to make decisions in place of the trustees relating to a conversion, reconversion, and the exercise of discretionary powers under AS 13.38.340.**

* **Sec. 19.** AS 13.38.400 is amended to read:

Sec. 13.38.400. Reconversion from a unitrust. A trustee may reconvert a trust that has been converted into a unitrust under AS 13.38.300 by following the same procedures provided in **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410] for converting a trust into a unitrust. If a unitrust is reconverted under this section, the trustee's power to adjust under AS 13.38.210 applies to the trustee after the reconversion.

* **Sec. 20.** AS 13.38 is amended by adding new sections to article 2 to read:

Sec. 13.38.420. Additional unitrust provisions. (a) The unitrust amount may be determined by reference to the net fair market value of the unitrust's assets in one or more years.

(b) Distribution of a unitrust amount is considered a distribution of all of the income of a unitrust and is considered to be an income interest.

(c) Distribution of a unitrust amount is considered to be a reasonable apportionment of the total return of a unitrust.

(d) A unitrust that provides for a distribution based on a unitrust percentage in excess of five percent of the net fair market value of the unitrust assets a year is considered to have paid out all of the income of the unitrust and to have paid out principal of the unitrust to the extent that the distribution exceeds five percent a year.

(e) The governing instrument of a unitrust may grant discretion to the trustee to adopt a consistent practice of treating capital gains as part of the unitrust amount to the extent that the unitrust amount exceeds the income determined as if the trust were not a unitrust, or the governing instrument may specify the ordering of classes of income.

(f) Unless the terms of the unitrust specifically provide otherwise, a unitrust amount is considered to have been made from the following sources, which are listed in order of priority:

(1) net income determined as if the trust were not a unitrust;

(2) ordinary income not allocable to net income;

(3) net realized short-term capital gains;

(4) net realized long-term capital gains; and

(5) the principal of the trust estate.

(g) The unitrust governing instrument may provide that the trustee may exclude assets used by the unitrust beneficiary, such as a residence property or tangible personal property, from the net fair market value of the unitrust assets for the purposes of computing the unitrust amount. These assets may be considered equivalent to income or to the unitrust amount.

Sec. 13.38.430. Power to treat gains as part of distribution of principal. Unless prohibited by the unitrust's governing instrument or specifically addressed by AS 13.38.350 or 13.38.420, the trustee of a unitrust may treat gains from the sale of capital assets of the unitrust to be part of a distribution of principal to a beneficiary, and, if the trustee treats these gains as part of a distribution of principal to a beneficiary, the trustee shall treat these gains consistently on the unitrust's books, records, and tax returns as part of a distribution to a beneficiary.

Sec. 13.38.435. Definitions. In AS 13.38.300 - 13.38.435,

(1) "smoothing period" means the period of years over which the fair market value of the assets of a unitrust are averaged;

(2) "unitrust amount" means the amount that is distributed from a unitrust to a beneficiary;

(3) "unitrust percentage" means the unitrust percentage established under AS 13.38.330(d).

* **Sec. 21.** AS 13.38.690(a) is repealed and reenacted to read:

(a) A trustee shall allocate

(1) to income that portion of a payment that equals the greater of the following:

(A) the portion that the payor characterizes as interest, a dividend, a remittance in place of interest, or a remittance in place of a dividend; or

(B) the portion that is characterized as imputed interest for federal income purposes;

(2) to principal that portion of a payment that remains after the allocation is made under (1) of this subsection.

*** Sec. 22.** AS 13.38.690(b) is amended to read:

(b) If **no** [A] part of a payment under a contract calling for equal installments over a fixed period of time is [NOT] allocable to income under the provisions of (a) of this section, the difference between the trust's acquisition value of the contract and the total expected return **is** [SHALL BE] considered to be interest. The trustee shall allocate to income the portion of each payment equivalent to interest on the then unpaid principal balance at the rate specified in the contract or at a rate necessary to amortize the difference between the expected return and the acquisition value, where that rate is readily ascertainable by the trustee.

*** Sec. 23.** AS 13.38.690(c) is amended to read:

(c) If **no** [THERE IS NOT A] portion of a payment from a separate fund held exclusively for the benefit of the trust [THAT] is allocable to income under (a) or (b) of this section, but the internal net income of the fund determined as if the fund were a separate trust subject to **AS 13.38.200 - 13.38.410, 13.38.500 - 13.38.690, or 13.38.710 - 13.38.860** [AS 13.38.500 - 13.38.860] is readily ascertainable by the trustee, the **internal net income of the fund is considered to be the income earned by the fund, and the** portion of the payment equal to the then undistributed net income of the fund realized since the trust acquired its interest in the fund is considered to be a distribution of **that internal net** income **of the fund** and shall be allocated to the trust income account. The balance of the payment described in this subsection shall be allocated to principal. **The power to adjust under AS 13.38.210, the power to convert to a unitrust under AS 13.38.300, and the provisions of AS 13.38.420 apply to retirement benefits covered by this subsection that are payable to a trust. These powers and provisions may be exercised by the payee**

trustee or in the governing instrument for the retirement benefits separately and independently from the exercise by the payee trustee or in the governing instrument of these powers and provisions for the trust, as if the retirement benefits and the trust were separate trusts subject to this chapter.

*** Sec. 24.** AS 13.38.690(d) is amended to read:

(d) A trustee shall allocate 10 percent of the part of the payment that is required to be made during the accounting period to income and the balance to principal if there is **no** [NOT A] part of the payment that is allocable to income under (a) - (c) of this section and all or part of the payment is required to be made. The trustee shall allocate the entire payment to principal if **no** [A] part of a payment is [NOT] required to be made or the payment received is the entire amount to which the trustee is entitled. In this subsection, a payment is not "required to be made" to the extent that it is made because the trustee exercises a right of withdrawal.

*** Sec. 25.** AS 13.38.690(e) is amended to read:

(e) If, to obtain a federal estate or gift tax marital deduction for a trust, the trustee must allocate more of a payment to income than provided for by this section, the trustee shall allocate **to income** the additional amount necessary to obtain the marital deduction [TO INCOME].

*** Sec. 26.** AS 13.46.190 is amended to read:

Sec. 13.46.190. Termination of custodianship. The custodian shall transfer in an appropriate manner the custodial property to the minor or to the minor's estate upon the earlier of the

(1) minor's attainment of 21 years of age with respect to property transferred under AS 13.46.030 or 13.46.040 unless the time of transfer of the custodial property to the minor is changed under AS 13.46.195 **or 13.46.197**;

(2) minor's attainment of 18 years of age with respect to property transferred under AS 13.46.050 or 13.46.060**, unless the time of transfer of the custodial property to the minor is changed under AS 13.46.197**;

(3) time specified in the transfer under AS 13.46.080 if the time of transfer of the custodial property to the minor is changed under AS 13.46.195 **or 13.46.197**; or

(4) minor's death.

* **Sec. 27.** AS 13.46 is amended by adding a new section to read:

Sec. 13.46.197. Extension of custodial term by custodian. (a) A custodian may extend the custodial term under this section to an age older than the age that is specified by this chapter or a transferring document made under AS 13.46.080, subject to the right of the minor to compel immediate distribution under (c) of this section.

(b) To extend the custodial term under (a) of this section, the custodian shall give the minor written notice of the custodian's intent to extend the custodial term. The notice must specify the duration of the extension by indicating the new custodial term and must inform the minor of the minor's right to compel immediate distribution under (c) of this section. The custodian shall give the notice during the later of the following periods:

(1) the six-month period that precedes the last day of the custodial term; or

(2) the six-month period that begins on the minor's 18th birthday.

(c) Rather than permit the extension of the custodial term, the minor may compel immediate distribution of all or part of the custodial property by giving written notice to the custodian

(1) during the six-month period that begins on the day that is the last day of the current custodial term; or

(2) within 90 days after receiving the custodian's notice under (b) of this section.

(d) If a minor does not exercise the minor's right to compel distribution under (c) of this section, the custodial term shall be extended as indicated in the custodian's notice given under (b) of this section, and the minor may not compel the immediate distribution of custodial property before the end of the custodial term, as extended.

(e) A custodian may extend the custodial term more than once under this section.

(f) In this section, "custodial term" means the period of time provided in or allowed by this chapter during which the custodian is directed to hold custodial property until the property is transferred to the minor.

* **Sec. 28.** AS 13.46.990(11) is amended to read:

(11) "minor" means an individual who has not attained the age of 18 years, except that when used in reference to the beneficiary for whose benefit custodial property is held or to be held, "minor" means an individual who has not attained the age at which the custodian is required under AS 13.46.190, [AND] 13.46.195**, and 13.46.197** to transfer the custodial property to the beneficiary;

* **Sec. 29.** AS 13 is amended by adding a new chapter to read:

Chapter 75. Disposition of Human Remains.

Sec. 13.75.010. Directions by decedent. (a) A person may provide directions for the disposition of the person's remains by placing the directions in a disposition document. The directions may include or be limited to designating an agent to control the disposition of the person's remains.

(b) A disposition document must be signed by the person and acknowledged before a notary public, and contain the form and contents required by AS 13.75.030. A disposition document may be a separate document or it may be contained in another document, including a will or prepaid funeral or burial contract. The disposition document may be modified or revoked only by a subsequent disposition document that complies with this subsection.

Sec. 13.75.020. Persons authorized to control disposition. (a) The following persons, in the priority listed, may control disposition of a decedent's remains:

(1) a person designated in a disposition document as the disposition agent for the decedent;

(2) a person serving, or nominated by the decedent in the decedent's will to serve, as the personal representative of the decedent's estate, if the person is acting according to the decedent's written instructions contained in the decedent's will;

(3) the individual who was the spouse of the decedent at the time of the decedent's death;

(4) the sole surviving competent adult child of the decedent, or, if there is more than one surviving competent adult child of the decedent, the majority of the surviving competent adult children; fewer than one-half of the surviving competent adult children may exercise the rights and duties of this section if these surviving adult

children use reasonable efforts to notify all other surviving competent adult children that they are exercising these rights and duties and are not aware of any opposition by one-half or more of all of the surviving competent adult children;

(5) the surviving competent parents of the decedent; if one of the surviving competent parents is absent, the remaining competent parent may exercise the rights and duties of this section after reasonable efforts have been unsuccessful in locating the absent surviving competent parent; in this paragraph, "absent" means a person who is unable to communicate decisions or participate in making decisions regarding the disposition of a decedent's remains personally, telephonically, or through electronic communication;

(6) the surviving competent adult person in the next degrees of kindred, the two surviving competent adult persons of the same degree of kindred if there are two, or, if there are more than two surviving competent adult persons of the same degree of kindred, the majority of those persons; fewer than the majority of surviving competent adult persons of the same degree of kindred may exercise the rights and duties of this section if those persons use reasonable efforts to notify all other surviving competent adult persons of the same degree of kindred that they are exercising these rights and duties and are not aware of any opposition by one-half or more of all surviving competent adult persons of the same degree of kindred;

(7) in the case of an indigent or another individual whose final disposition is the responsibility of the state or a municipality, a public administrator, medical examiner, coroner, or another public official charged with arranging the final disposition of the decedent; or

(8) another person who is willing to assume legal and financial responsibility.

(b) If a person takes control of the disposition under (a) of this section, the person is liable for the reasonable costs of the disposition.

(c) In this section,

(1) "adult" means a person who is 18 years of age or older;

(2) "competent" means a person who does not suffer from disabilities that prevent the person from managing the person's property or affairs.

Sec. 13.75.030. Form of disposition document. A disposition document must be in substantially the following form:

DISPOSITION DOCUMENT

You can select Part 1, Part 2, or both, by completing the part(s) you select, including providing any signatures indicated. Part 3 contains general statements and a place for your signature. You must sign in front of a notary.

PART 1. APPOINTMENT OF AGENT TO CONTROL DISPOSITION OF REMAINS. If you appoint an agent, you and your agent must complete this part as indicated, and the agent must sign this part.

I, _____, being of sound mind, wilfully and voluntarily make known my desire that, on my death, the disposition of my remains shall be controlled by _____ (name of agent first named below), and, with respect to that subject only, I appoint that person as my agent. All decisions made by my agent with respect to the disposition of my remains, including cremation, are binding.

ACCEPTANCE BY AGENT OF APPOINTMENT.

THE AGENT, AND EACH SUCCESSOR AGENT, BY ACCEPTING THIS APPOINTMENT, AGREES TO AND ASSUMES THE OBLIGATIONS PROVIDED IN THIS DOCUMENT. AN AGENT MAY SIGN AT ANY TIME, BUT AN AGENT'S AUTHORITY TO ACT IS NOT EFFECTIVE UNTIL THE AGENT SIGNS BELOW TO INDICATE THE ACCEPTANCE OF APPOINTMENT. ANY NUMBER OF AGENTS MAY SIGN, BUT ONLY THE SIGNATURE OF THE AGENT ACTING AT ANY TIME IS REQUIRED.

AGENT:

Name: _____

Address: _____

Telephone Number: _____

Signature Indicating Acceptance of Appointment:

_____

Date of Signature: _____

SUCCESSORS:

If my agent dies, becomes legally disabled, resigns, or refuses to act, I appoint the following persons (each to act alone and successively, in the order named) to serve as my agent to control the disposition of my remains as authorized by this document:

(1) First Successor

Name: _____

Address: _____

Telephone Number: _____

Signature of First Successor Indicating Acceptance of Appointment:

_____

Date of Signature: _____

(2) Second Successor

Name: _____

Address: _____

Telephone Number: _____

Signature of Second Successor Indicating Acceptance of Appointment:

_____

Date of Signature: _____

PART 2. DIRECTIONS FOR THE DISPOSITION OF MY REMAINS.

Stated below are my directions for the disposition of my remains:

_____

_____

_____

_____

If the disposition of my remains is by cremation, then (pick one):

( ) I do not wish to allow any of my survivors the option of

canceling my cremation and selecting alternative arrangements, regardless of whether my survivors consider a change to be appropriate.

( ) I wish to allow only the survivors I have designated below to have the option of canceling my cremation and selecting alternative arrangements, if they consider that a change to be appropriate:

_____

_____

_____

_____

PART 3. GENERAL PROVISIONS AND SIGNATURE.

WHEN DIRECTIONS BECOME EFFECTIVE. The directions, including any appointment of an agent, in this disposition document become effective on my death.

REVOCATION OF PRIOR APPOINTMENTS. I revoke any prior appointment of any person to control the disposition of my remains.

SIGNATURE OF PERSON MAKING DISPOSITION DOCUMENT

Signature: _____

Date of signature: _____

(Notary acknowledgment of signature)

Sec. 13.75.040. Agent's appointment. The person appointed as an agent in a disposition document may sign the disposition document at any time, but the agent's authority to act is not effective until the agent signs the instrument.

Sec. 13.75.050. Exercise of authority. If a person fails to exercise the person's authority to control disposition under AS 13.75.020 within 48 hours after receiving notification of the decedent's death or within 48 hours after the decedent's death, whichever is earlier, the person may not control the disposition of the decedent's remains, and the right to control the disposition of the decedent's remains passes to the person who is next listed in priority under AS 13.75.020. If the person to whom the right to control the disposition passes under this section fails to exercise the person's authority to control the disposition within 48 hours after being notified that the

authority to control the disposition has passed to the person, the authority to control the disposition passes to the person who is next listed in priority under AS 13.75.020.

Sec. 13.75.060. Certain persons prohibited from control. If a person is charged with a felonious killing in connection with a decedent's death and if the funeral director or the cemetery knows about the charge, then the person may not control disposition, and the right to control disposition passes to the person who is next listed in priority under AS 13.75.020.

Sec. 13.75.070. Prohibition of cremation; written instructions. A person may not authorize cremation for a decedent's remains if a decedent has left directions in a disposition document that the decedent does not wish to be cremated.

Sec. 13.75.080. Implementation of directions. (a) The person authorized to control the disposition shall carry out the directions of the decedent to the extent that the decedent's estate or the person is financially able to carry out the directions.

(b) Notwithstanding any other provision in AS 13.06 - 13.36 (Uniform Probate Code), if a person provides directions in a disposition document that is contained in a will, the directions shall be carried out immediately without the necessity of probate. If the will is not probated or is declared invalid for testamentary purposes, the directions are valid to the extent to which they have been acted on in good faith.

Sec. 13.75.090. Misrepresentation; liability. If a person represents that the person knows the identity of a decedent, and, with the intent to procure the disposition of the decedent's remains, signs a statement, other than a death certificate, that identifies the decedent, the person guarantees the identity of the decedent and is liable for any damages that result, directly or indirectly, from that guarantee.

Sec. 13.75.100. Liability. (a) A disposition organization is not liable for carrying out the directions of a decedent if the disposition organization carries out the directions of a decedent or a person who establishes that the person is entitled to control the disposition.

(b) This section may not be construed to reduce or eliminate the liability of a disposition organization for its negligence or reckless acts.

Sec. 13.75.110. Disputes. (a) A person listed in AS 13.75.020 who is involved in a dispute with one or more persons listed in AS 13.75.020 about which of the

persons has the authority to control disposition may bring an action in the superior court to resolve the dispute.

(b) If there is a dispute with one or more persons listed in AS 13.75.020 about which person has the authority to control disposition, a cemetery organization or funeral establishment is not liable for refusing to accept, to inter, or otherwise to dispose of the decedent's remains until the cemetery organization or funeral establishment receives a court order or another suitable confirmation that the dispute has been resolved.

Sec. 13.75.120. Exemptions. The disposition of the remains of a member of the organized militia under AS 26.05.262, the disposition of the remains of a member of the armed forces under AS 26.10.065(a), and the disposition of the remains of a member of the United States Coast Guard under AS 26.10.065(b) are exempt from this chapter.

Sec. 13.75.190. Definitions. In this chapter,

(1) "control" means the authority to control disposition;

(2) "directions" means

(A) instructions for the disposition of a person's remains;

(B) the appointment of an agent to handle the disposition of a person's remains; or

(C) both (A) and (B) of this paragraph;

(3) "disposition" means disposition of a decedent's remains, including cremation, but does not include an anatomical gift; in this paragraph, "anatomical gift" has the meaning given in AS 13.52.390;

(4) "disposition document" means a disposition document authorized by AS 13.75.010

(A) in which a person provides directions regarding the disposition of the person's remains; and

(B) that complies with AS 13.75.030;

(5) "disposition organization" means

(A) a cemetery association formed under AS 10.30.010;

(B) a nonprofit cemetery corporation authorized by

AS 10.30.055;

(C) a person operating a crematory;

(D) a person operating a columbarium;

(E) a funeral home or other type of funeral establishment;

(F) a funeral director or an embalmer.

Sec. 13.75.195. Short title. This chapter may be cited as the Disposition of Human Remains Act.

*** Sec. 30.** AS 21.42.020 is amended by adding new subsections to read:

(e) Notwithstanding (a) of this section, a trustee, acting in a fiduciary capacity, may procure or cause to be procured an insurance contract that is on the life or body of an individual and under which the proceeds of the insurance contract are payable to the trustee, acting in a fiduciary capacity, if

(1) the trustee, acting in a fiduciary capacity, owns the insurance contract or the trust itself owns the insurance contract;

(2) on the date the contract is made, a settlor of the trust is the individual insured, has an insurable interest in the individual insured, or would have had an insurable interest in the individual insured if the settlor were living at the time the contract was made; in this paragraph, "settlor" means a person, including a person for whom a fiduciary or agent is acting, who executes the trust instrument; and

(3) the proceeds of the contract are primarily for the benefit of a trust beneficiary who has an insurable interest in the individual insured, except that, if the determination of the trust beneficiary's insurable interest is based on (d)(1) of this section, the trust beneficiary's relation by blood or law must be within the third degree.

(f) A person who has an insurable interest in the life or body of an individual may form a business firm that is substantially or solely for the purpose of purchasing, holding, or administering an insurance contract on the life or body of the individual. In this subsection, "firm" has the meaning given in AS 21.97.900, but also includes a business trust and a joint venture.

*** Sec. 31.** AS 34.40 is amended by adding a new section to read:

Sec. 34.40.113. Transfers of individual retirement accounts. (a) Notwithstanding a provision in AS 09.38.017(d), AS 34.40.110, or another law to the

contrary, a person may voluntarily transfer or assign the person's interest in an individual retirement account if the person

(1) is the owner of or a participant in the individual retirement account; or

(2) acquired the interest as a result of the death of another individual.

(b) In this section, "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A.

* **Sec. 32.** AS 34.77.030(g) is amended to read:

(g) Whether or not the community property agreement provides that all property acquired by either or both spouses during the marriage is community property, and except to the extent otherwise expressly provided **by the spouses** in the community property agreement **or by the settlors in a community property trust**, property acquired by a spouse during marriage and after the determination date is individual property if acquired

(1) by gift or a disposition at death made by a third person to the spouse and not to both spouses;

(2) in exchange for or with the proceeds of other individual property of the spouse;

(3) from appreciation or income of the spouse's individual property except to the extent that the income or appreciation is classified as community property under AS 34.77.130;

(4) by a decree, community property agreement, written consent, or reclassification under AS 34.77.060(b) designating it as the individual property of the spouse;

(5) as a recovery for damage to property under AS 34.77.140, except as specifically provided otherwise in a decree, community property agreement, **community property trust,** or written consent; [OR]

(6) as a recovery for personal injury, except for the amount of the recovery attributable to expenses paid or otherwise satisfied from community property**; or**

(7) as a transfer to a community property trust and declared by the trust to be the individual property of the spouse.

*** Sec. 33.** AS 34.77.050(b) is amended to read:

(b) A gift of community property to a third person that is not allowed under (a) of this section is subject to **AS 34.77.140(e) - (h)** [(d) OF THIS SECTION] unless both spouses act together in making the gift or the other spouse ratifies the gift.

*** Sec. 34.** AS 34.77.110 is amended by adding new subsections to read:

(f) Property that spouses agree in a community property agreement is community property or property that is transferred to a community property trust and expressly declared by the trust to be community property is owned as community property regardless of the form of title to the property, even if the title indicates that the property is owned unequally by the spouses or is only in the name of one spouse.

(g) If the title to community property is in a form that provides for ownership by survivorship between the spouses, then ownership by survivorship is presumed to have been made with the consent of both spouses.

(h) If a spouse with management and control of community property designates a beneficiary for the property on the death of one or both of the spouses, and if the community property is held in a form of title that permits a beneficiary designation, the beneficiary designation is effective only for the designating spouse's one-half interest in the community property unless the other spouse consents in writing to the designation. A designation of the following as the beneficiary is presumed to have been made with the consent of the other spouse:

(1) the other spouse or an ancestor or descendant of either spouse;

(2) a charity; or

(3) a trust, to the extent that the beneficiaries consist of persons or entities identified in (1) or (2) of this subsection.

(i) The testimony of one spouse is sufficient to rebut a presumption established under this section.

(j) A disposition of community property contrary to (e) - (h) of this section is voidable. An action in court to void the disposition must be commenced within the time specified by AS 34.77.140(e).

* **Sec. 35.** AS 34.77.140(d) is amended to read:

(d) Except as provided otherwise in **(e) - (h) of this section** [AS 34.77.050(d)], a spouse must begin an action against the other spouse under (a) of this section within three years after acquiring actual knowledge of the facts giving rise to the claim.

* **Sec. 36.** AS 34.77.140 is amended by adding new subsections to read:

(e) Except as provided by (f) - (h) of this section, if a gift of community property during marriage by a spouse does not comply with AS 34.77.050(a), the nondonor spouse may bring an action to recover the property or the amount of money by which the gift exceeded the limit under AS 34.77.050(a). The nondonor spouse may bring the action against the donor spouse, the gift recipient, or both. The nondonor spouse must commence the action within the earliest of the following times:

(1) one year after the nondonor spouse receives notice of the gift;

(2) one year after dissolution of the marriage; or

(3) on or before the deadline for filing a claim under AS 13.16.460 after the death of the donor spouse.

(f) If a recovery under (e) of this section occurs during the marriage of the donor spouse and the nondonor spouse, the property or money that is recovered is considered community property. If the recovery occurs after the dissolution of the marriage of the donor and nondonor spouses or after the death of either the donor or the nondonor spouse, the recovery is limited to 50 percent of the property or money that would have been recovered if the recovery had occurred during the marriage.

(g) If a transfer of community property to a third person during marriage by a spouse acting without the other spouse becomes a completed gift on the death of the donor spouse, or if an arrangement involving community property during marriage by a spouse acting without the other spouse is intended to be and becomes a gift to a third person on the death of the donor spouse, the surviving spouse may bring an action in court against the gift recipient to recover one-half of the gift. To bring an action under this subsection, the surviving spouse must commence the action on or before the deadline for filing a claim under AS 13.16.460.

(h) If a spouse who would have been entitled to bring an action under (e) - (g)

of this section predeceases the donor spouse, the deceased spouse's successor in interest may bring an action for recovery under (e) - (g) of this section, but the action must be commenced within one year after the deceased spouse's death. Recovery in an action under this subsection is the same as if the donor spouse had predeceased the spouse entitled to the recovery, but the amount of the recovery is calculated as of the date of the death of the spouse entitled to the recovery.

* **Sec. 37.** AS 13.38.330(c); AS 34.77.050(d), and 34.77.110(d) are repealed.

* **Sec. 38.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE CHANGE. AS 34.77.110(i), enacted by sec. 34 of this Act, has the effect of amending Rule 301(a), Alaska Rules of Evidence, by specifying the evidence that is sufficient to rebut a presumption under AS 34.77.110(i), enacted by sec. 34 of this Act.

* **Sec. 39.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) AS 09.38.017(a), as amended by sec. 1 of this Act, AS 09.38.017(d), as amended by sec. 2 of this Act, and AS 09.38.017(e), as amended by sec. 3 of this Act, apply to a retirement plan that exists before, on, or after the effective date of this Act. In this section, "retirement plan" has the meaning given in AS 09.38.017(e), as amended by sec. 3 of this Act.

(b) AS 13.36.157, repealed and reenacted by sec. 6 of this Act, AS 13.36.158 and 13.36.159, enacted by sec. 7 of this Act, and AS 13.36.215(b), enacted by sec. 8 of this Act, apply to a trust that exists before, on, or after the effective date of this Act.

(c) AS 34.40.113, added by sec. 31 of this Act, applies to an individual retirement account that exists before, on, or after the effective date of this Act. In this section, "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A.

* **Sec. 40.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. AS 34.77.110(i), enacted by sec. 34 of this Act, takes effect only if sec. 38 of this Act receives the two-thirds majority vote of each house required

by art. IV, sec. 15, Constitution of the State of Alaska.

Insert new bill sections to read:

"* **Sec. 23.** AS 13.46.190 is amended to read:

Sec. 13.46.190. Termination of custodianship. The custodian shall transfer in an appropriate manner the custodial property to the minor or to the minor's estate upon the earlier of the

(1) minor's attainment of 21 years of age with respect to property transferred under AS 13.46.030 or 13.46.040 unless the time of transfer of the custodial property to the minor is changed under AS 13.46.195 **or 13.46.197**;

(2) minor's attainment of 18 years of age with respect to property transferred under AS 13.46.050 or 13.46.060**, unless the time of transfer of the custodial property to the minor is changed under AS 13.46.197**;

(3) time specified in the transfer under AS 13.46.080 if the time of transfer of the custodial property to the minor is changed under AS 13.46.195 **or 13.46.197**; or

(4) minor's death.

* **Sec. 24.** AS 13.46 is amended by adding a new section to read:

Sec. 13.46.197. Extension of custodial term by custodian. (a) A custodian may extend the custodial term under this section to an age older than the age that is specified by this chapter or a transferring document made under AS 13.46.080, subject to the right of the minor to compel immediate distribution under (c) of this section.

(b) To extend the custodial term under (a) of this section, the custodian shall

give the minor written notice of the custodian's intent to extend the custodial term. The notice must specify the duration of the extension by indicating the new custodial term and must inform the minor of the minor's right to compel immediate distribution under (c) of this section. The custodian shall give the notice during the later of the following periods:

(1) the six-month period that precedes the last day of the custodial term; or

(2) the six-month period that begins on the minor's 18th birthday.

(c) Rather than permit the extension of the custodial term, the minor may compel immediate distribution of all or part of the custodial property by giving written notice to the custodian

(1) during the six-month period that begins on the day that is the last day of the current custodial term; or

(2) within 90 days after receiving the custodian's notice under (b) of this section.

(d) If a minor does not exercise the minor's right to compel distribution under (c) of this section, the custodial term shall be extended as indicated in the custodian's notice given under (b) of this section, and the minor may not compel the immediate distribution of custodial property before the end of the custodial term, as extended.

(e) A custodian may extend the custodial term more than once under this section.

(f) In this section, "custodial term" means the period of time provided in or allowed by this chapter during which the custodian is directed to hold custodial property until the property is transferred to the minor.

*** Sec. 25.** AS 13.46.990(11) is amended to read:

(11) "minor" means an individual who has not attained the age of 18 years, except that when used in reference to the beneficiary for whose benefit custodial property is held or to be held, "minor" means an individual who has not attained the age at which the custodian is required under AS 13.46.190**,** [AND] 13.46.195**, and 13.46.197** to transfer the custodial property to the beneficiary;"

AMENDMENT

OFFERED IN THE SENATE BY SENATOR FRENCH

TO: CSSB 165( ), Draft Version "D"

Page 1, line 3, following "**Code;**":

Insert "**relating to the appointment of trust property;**"

Page 7, following line 5:

Insert new bill sections to read:

"* **Sec. 6.** AS 13.36.157 is repealed and reenacted to read:

Sec. 13.36.157. Exercise of power of appointment. (a) An authorized trustee with unlimited discretion to invade trust principal may appoint part or all of that principal to a trustee of an appointed trust for, and only for the benefit of, a current beneficiary of the invaded trust to the exclusion of other current beneficiaries. A permissible appointee of a power of appointment held by a beneficiary of the appointed trust is not considered a beneficiary of the appointed trust. The successor and remainder beneficiaries of the appointed trust may be one or more of the successor and remainder beneficiaries of the invaded trust to the exclusion of other successor and remainder beneficiaries.

(b) An authorized trustee exercising the power under (a) of this section may grant a discretionary power of appointment, including a presently exercisable power of appointment, in the appointed trust to one or more of the current beneficiaries of the invaded trust, to the extent that the beneficiary who is granted the power to appoint is authorized to receive the principal outright under the terms of the invaded trust. A permissible appointee is not limited to the beneficiaries of the invaded trust.

(c) Under (a) and (b) of this section, if the beneficiaries of the invaded trust are described by a class, the beneficiaries of the appointed trust may include present or

future members of that class.

(d) An authorized trustee with the power to invade trust principal but without unlimited discretion may appoint part or all of the principal of the trust to a trustee of an appointed trust if the current beneficiaries of the appointed trust are the same as the current beneficiaries of the invaded trust and the successor and remainder beneficiaries of the appointed trust are the same as the successor and remainder beneficiaries of the invaded trust. The shares of the current beneficiaries of the appointed trust must be the same as the shares of the current beneficiaries of the invaded trust, and the shares of the successor and remainder beneficiaries of the appointed trust must be the same as the shares of the successor and remainder beneficiaries of the invaded trust.

(e) If the authorized trustee exercises the power under (d) of this section, the appointed trust must include the same standard authorizing the trustee to distribute the income or invade the principal of the appointed trust as the standard in the invaded trust. However, the standard authorizing the trustee to distribute the income or invade the principal of the appointed trust may be changed if the trustee appoints to an appointed trust that is a special needs trust, a pooled trust, or a third-party trust.

(f) If an authorized trustee exercises the power under (d) and (e) of this section to extend the duration of the appointed trust beyond the duration of the invaded trust for any period after the invaded trust would have otherwise terminated under the provisions of the invaded trust, the appointed trust, in addition to the language required to be included in the appointed trust under (e) of this section, may also provide an additional trustee with unlimited discretion to invade the principal of the appointed trust during the extended duration. The trustee with unlimited discretion continues to be subject to the restrictions in (d) - (h) of this section.

(g) Under (d) - (f) of this section, if the beneficiaries of the invaded trust are described by a class, the beneficiaries of the appointed trust include present or future members of that class.

(h) If the authorized trustee exercises the power under (d) - (g) of this section and if the invaded trust grants a power of appointment to a beneficiary of the trust, the appointed trust must grant this power of appointment in the appointed trust, and the class of permissible appointees shall be the same as in the invaded trust.

* **Sec. 7.** AS 13.36 is amended by adding new sections to read:

Sec. 13.36.158. Additional provisions relating to exercise of a power of appointment. (a) An exercise of the power to invade trust principal under AS 13.36.157 is the exercise of a special power of appointment.

(b) The appointed trust to which an authorized trustee appoints the assets of the invaded trust under AS 13.36.157 may have a duration that is longer than the duration set out in the invaded trust.

(c) If an authorized trustee has unlimited discretion to invade the principal of a trust and if the same trustee or another trustee has a power, not dependent on unlimited discretion, to invade principal under the trust instrument, the authorized trustee having unlimited discretion may exercise the power of appointment under AS 13.36.157(a) - (c).

(d) An authorized trustee may exercise the power to appoint in favor of an appointed trust under AS 13.36.157 whether or not there is a current need to invade principal under the terms of the invaded trust.

(e) An authorized trustee exercising the power under AS 13.36.157 - 13.36.159 has a fiduciary duty to exercise the power in the best interests of one or more proper objects of the exercise of the power and as a prudent person would exercise the power under the prevailing circumstances. The authorized trustee may not exercise the power under AS 13.36.157 - 13.36.159 if there is substantial evidence of a contrary intent of the settlor and it cannot be established that the settlor would be likely to have changed this intention under the circumstances existing at the time the trustee exercises the power. The provisions of the invaded trust may not be viewed alone as substantial evidence of a contrary intent of the settlor unless the invaded trust expressly prohibits the exercise of the power in the manner intended by the authorized trustee.

(f) The provisions of AS 13.36.157 - 13.36.159 may not be construed to abridge the right of a trustee to appoint property further in trust under the terms of the governing instrument of a trust, another provision of law, or common law, or as directed by a court having jurisdiction over the trust.

(g) Nothing in AS 13.36.157 - 13.36.159 creates or implies a duty to exercise

a power to invade principal. An inference of impropriety may not be made, and liability is not incurred, as a result of an authorized trustee not exercising the power conferred under AS 13.36.157.

(h) A power authorized by AS 13.36.157 may be exercised, subject to the provisions of AS 13.36.159(a), unless expressly prohibited by the terms of the governing instrument. A general prohibition against amending or revoking the invaded trust and a provision that constitutes a spendthrift clause do not preclude the exercise of a power under AS 13.36.157.

(i) An authorized trustee may not exercise a power authorized by AS 13.36.157 to

(1) reduce, limit, or modify a beneficiary's current right to a mandatory distribution of income or principal, a mandatory annuity or unitrust interest, a right to withdraw a percentage of the value of the trust, or a right to withdraw a specified dollar amount, if the mandatory right has come into effect with respect to the beneficiary, but the mandatory right may be reduced, limited, or modified during any extended duration of the trust; however, notwithstanding the other provisions in this paragraph, but subject to the other limitations in AS 13.36.157 - 13.36.159, an authorized trustee may exercise a power authorized by AS 13.36.157 to appoint to an appointed trust that is a special needs trust, a pooled trust, or a third-party trust;

(2) decrease or indemnify against a trustee's liability or exonerate a trustee from liability for failure to exercise reasonable care, diligence, and prudence unless the court having jurisdiction over the trust specifies otherwise;

(3) eliminate a provision granting another person the right to remove or replace the authorized trustee exercising the power under AS 13.36.157 unless a court having jurisdiction over the trust specifies otherwise;

(4) fix as binding and conclusive the value of an asset for purposes of distribution, allocation, or otherwise; or

(5) jeopardize

(A) the deduction or exclusion originally claimed with respect to a contribution to the invaded trust that qualified for the annual exclusion under 26 U.S.C. 2503(b), the marital deduction under 26 U.S.C. 2056(a) or 26

U.S.C. 2523(a), or the charitable deduction under 26 U.S.C. 170(a), 26 U.S.C. 642(c), 26 U.S.C. 2055(a), or 26 U.S.C. 2522(a) (Internal Revenue Code);

(B) the qualification of a transfer as a direct skip under 26 U.S.C. 2642(c) (Internal Revenue Code);

(C) the election to treat a corporation as a subchapter S corporation under 26 U.S.C. 1362 (Internal Revenue Code); or

(D) another specific tax benefit for which a contribution originally qualified for income, gift, estate, or generation-skipping transfer tax purposes under 26 U.S.C. (Internal Revenue Code).

(j) Before exercising the power under AS 13.36.157, an authorized trustee shall consider the tax implications of the exercise of the power.

(k) An authorized trustee may not exercise a power described in AS 13.36.157 - 13.36.159 in violation of the limitations on validity in AS 34.27.051 or 34.27.100, or the restrictions on exercising certain powers in AS 13.36.153 by trustees who are not independent. A violation voids the entire exercise of the power unless the exercise is modified to correct the violation.

(*l*) Unless a court having jurisdiction over the trust directs otherwise, an authorized trustee may not exercise a power authorized by AS 13.36.157 to change the provisions regarding the determination of the compensation of a trustee. The commissions or other compensation payable to the trustees of the invaded trust may continue to be paid to the trustees of the appointed trust during the term of the appointed trust and shall be determined in the same manner as for the invaded trust.

(m) A trustee may not receive a payment, a commission, or other compensation for appointing property from the invaded trust to an appointed trust under AS 13.36.157. However, a trustee may be compensated at an hourly rate for the time spent considering and implementing the exercise of a power to appoint.

(n) Unless the invaded trust expressly provides otherwise, the provisions in AS 13.36.157 - 13.36.159 apply to

(1) a trust, whether testamentary or inter vivos, governed by the laws of this state, including a trust whose governing law has been changed to the laws of this state; and

(2) a trust that has a trustee who is an individual domiciled in this state, or a trustee that is an entity having an office in this state, if a majority of the trustees select this state as the location for the primary administration of the trust and the selection is made by an instrument in writing that is signed and acknowledged by a majority of the trustees; the instrument exercising this selection shall be kept with the records of the invaded trust.

(o) A power to pay principal that includes words such as "best interests," "welfare," "comfort," or "happiness" is not considered a limitation or modification of the right to distribute principal.

(p) In this section, "internal revenue code" means the Internal Revenue Code of the United States (26 U.S.C.) as it exists on the effective date of this Act and as it is amended from time to time;

Sec. 13.36.159. Implementation of power of appointment. (a) Unless the authorized trustee provides otherwise, the appointment of

(1) all of the assets comprising the principal of the invaded trust to an appointed trust includes subsequently discovered assets of the invaded trust and undistributed principal of the invaded trust acquired after the appointment to the appointed trust;

(2) a part but not all of the assets comprising the principal of the invaded trust to an appointed trust may not include subsequently discovered assets belonging to the invaded trust or principal paid to or acquired by the invaded trust after the appointment to the appointed trust; those subsequently discovered assets remain the assets of the invaded trust.

(b) The exercise of the power to appoint to an appointed trust under AS 13.36.157 shall be evidenced by an instrument in writing that is signed, dated, and acknowledged by the authorized trustee. The exercise of the power is effective 30 days after the date of service of the instrument as specified in (d) of this section, unless the persons entitled to notice consent in writing to a sooner effective date.

(c) An authorized trustee may exercise the power authorized by AS 13.36.157 without the consent of the settlor or a person interested in the invaded trust and without court approval. However, an authorized trustee may seek court approval for

the exercise. When seeking court approval, notice shall be sent to all qualified beneficiaries.

(d) A copy of the invaded trust, the appointed trust, and the instrument exercising the power shall be delivered to

(1) the settlor, if living, of the invaded trust;

(2) a person having the right, under the terms of the invaded trust, to remove or replace the authorized trustee exercising the power under AS 13.36.157; and

(3) a qualified beneficiary or a person who may represent and bind the qualified beneficiary under AS 13.06.120.

(e) Notice under (d) of this section to a qualified beneficiary is not required if the settlor has exempted the authorized trustee from providing notification or information to beneficiaries under AS 13.36.080(b). Notice under (d) of this section shall be provided under AS 13.06.110.

(f) The instrument exercising the power must state whether the appointment is of all or part of the assets comprising the principal of the invaded trust and, if a part, the approximate percentage of the value of the principal of the invaded trust that is the subject of the appointment.

(g) A person entitled to notice under (d) of this section may object to the trustee's exercise of the power under AS 13.36.157 - 13.36.159 by serving a written notice of objection on the trustee before the effective date of the exercise of the power. The failure to object does not constitute consent.

(h) The receipt of a copy of the instrument exercising the power does not, before the expiration of the limitation period in AS 13.36.100 with respect to a report disclosing the exercise, affect the right of a qualified beneficiary to object to the exercise of the power under AS 13.36.157 and to request the court to modify or to reverse the exercise.

(i) A copy of the instrument exercising the power shall be kept with the records of the invaded trust.

* **Sec. 8.** AS 13.36.215 is amended by adding a new subsection to read:

(b) In AS 13.36.157 - 13.36.159,

(1) "appointed trust" means an irrevocable trust that receives principal from an invaded trust under AS 13.36.157, including a new trust created by the settlor of the invaded trust or by the trustees, acting in that capacity, of the invaded trust;

(2) "authorized trustee" means, with regard to an invaded trust, a trustee with the authority to pay trust principal to or for a current beneficiary; in this paragraph, "trustee" does not include a settlor or a beneficiary to whom income or principal must be paid, currently or in the future, or who is or will become eligible to receive a distribution of income or principal in the discretion of the trustee other than by the exercise of a power of appointment held in a nonfiduciary capacity;

(3) "current beneficiary" means a person or, with regard to a class of persons, a person who is or will become a member of the class, to whom a trustee may distribute principal when exercising a power under AS 13.36.157;

(4) "invade" means pay directly to the beneficiary of a trust or apply to the benefit of a beneficiary;

(5) "invaded trust" means an irrevocable inter vivos or testamentary trust the principal of which is appointed under AS 13.36.157;

(6) "pooled trust" means a trust described in 42 U.S.C. 1396p(d)(4)(C) that meets the requirements for a pooled trust under the regulations of this state relating to the Medicaid treatment of trusts;

(7) "principal" means the assets of a trust, including accrued and accumulated income, but excluding income that is currently required to be distributed;

(8) "special needs trust" means a trust under 42 U.S.C. 1396p(d)(4)(A) that meets the requirements for a special needs trust under the regulations of this state relating to the Medicaid treatment of trusts;

(9) "third-party trust" means a trust that is

(A) established by a third party with the assets of the third party to provide for supplemental needs for a person eligible when the trust is created or at a future time for needs-based public assistance; and

(B) exempt from the provisions of the regulations of this state relating to the Medicaid treatment of trusts;

(10) "unlimited discretion" means the unlimited right to distribute

principal that is not modified in any manner."

CS FOR SENATE BILL NO. 165( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATE JUDICIARY COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to property exemptions for retirement plans, individual retirement accounts, and Roth IRAs; relating to pleadings, orders, liability, and notices under the Uniform Probate Code; relating to the Alaska Principal and Income Act; relating to the Alaska Uniform Transfers to Minors Act; relating to the disposition of human remains; relating to insurable interests for life insurance policies; relating to transfers of individual retirement plans; relating to the community property of married persons; and amending Rule 301(a), Alaska Rules of Evidence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 09.38.017(a) is amended to read:

(a) In addition to the exemption under AS 09.38.015(b), the following are exempt from a claim of an individual's **or beneficiary's** creditor:

(1) the interest of the individual **or beneficiary** in a retirement plan; [AND]

(2) the money or other assets payable to the individual from a retirement plan;

(3) the interest of a beneficiary in

(A) a retirement plan if the beneficiary acquired the interest as a result of the death of an individual; the beneficiary's interest is exempt to the same extent that the individual's interest was exempt immediately before the individual died;

(B) an individual retirement account that has been transferred by the individual to the beneficiary during the individual's lifetime; the beneficiary's interest is exempt to the same extent that the individual's interest was exempt immediately before the transfer to the beneficiary;

(4) the money or other assets payable to a beneficiary from

(A) a retirement plan if the beneficiary acquired the money or other assets as a result of the death of an individual who would have had, during the individual's life, an exemption in the money or other assets;

(B) an individual retirement account if the beneficiary acquired the money or other assets as a result of the transfer of the money or other assets by an individual who would have had, at the time of the transfer, an exemption in the money or other assets.

*** Sec. 2.** AS 09.38.017(d) is amended to read:

(d) A retirement plan exempt from claims under (a) of this section is conclusively presumed to be a spendthrift trust under this section**, except for transfers or assignments under AS 34.40.113**.

*** Sec. 3.** AS 09.38.017(e) is amended to read:

(e) In this section,

(1) "alternate payee" has the meaning given in 26 U.S.C. 414(p)(8);

(2) **"beneficiary" includes a person, trust, or trustee who has, before or after the death of an individual, a direct or indirect beneficial interest in a retirement plan; in this paragraph, "beneficial interest" includes an interest**

that is acquired

(A) as a designated beneficiary, survivor, co-annuitant, heir, or legatee; or

(B) if excludible from gross income under 26 U.S.C. (Internal Revenue Code), as a

(i) rollover under 26 U.S.C. 408 or 26 U.S.C. 408A;

(ii) a distribution from one retirement plan to another retirement plan; or

(iii) a distribution that is similar to (i) or (ii) of this subparagraph;

(3) "individual" means [AN INDIVIDUAL WHO IS] a participant in, **an owner** [A BENEFICIARY] of, or an alternate payee of a retirement plan;

(4) "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A;

(5) [(3)] "retirement plan" means

(A) a retirement plan that is qualified under 26 U.S.C. 401(a), 26 U.S.C. 403(a), 26 U.S.C. 403(b), [26 U.S.C. 408, 26 U.S.C. 408A, OR] 26 U.S.C. 409**, 26 U.S.C. 414(d), 26 U.S.C. 414(e), or 26 U.S.C. 457** (Internal Revenue Code)**;**

(B) an individual retirement account; and

(C) the teachers' retirement system under AS 14.25, the judicial retirement system under AS 22.25, the public employees' retirement system under AS 39.25, and the elected public officers' retirement system under former AS 39.37.

*** Sec. 4.** AS 13.06.120 is amended to read:

Sec. 13.06.120. Pleadings; when parties bound by orders; notice. In any proceedings involving trusts, nonprobate assets, or estates of decedents, minors, protected persons, or incapacitated persons brought under AS 13.06 - AS 13.36 or AS 13.38, [INCLUDING ANY JUDICIALLY SUPERVISED SETTLEMENTS AND ANY NONJUDICIAL PROCEEDINGS AND SETTLEMENTS,] the following

apply:

(1) interests to be affected shall be described in pleadings that give reasonable information to owners by name or class, by reference to the instrument creating the interests, or in other appropriate manner;

(2) persons are bound by orders binding others in the following cases:

(A) orders binding the sole holder or all co-holders of a power of revocation or a general or nongeneral power of appointment, including one in the form of a power of amendment, bind other persons to the extent their interests, as objects, takers in default, or otherwise, are subject to the power;

(B) to the extent there is no conflict of interest between them or among persons represented, orders binding a conservator bind the person whose estate the conservator controls; orders binding a guardian bind the ward if no conservator of the estate has been appointed; orders binding a trustee bind beneficiaries of the trust in proceedings to probate a will establishing or adding to a trust, to review the acts or accounts of a prior fiduciary, and in proceedings involving creditors or other third parties; orders binding a personal representative bind persons interested in the undistributed assets of a decedent's estate in actions or proceedings by or against the estate; and orders binding an agent having authority to act with respect to the particular questions or dispute bind the principal; if there is no conflict of interest and no conservator or guardian has been appointed, a parent may represent the minor child;

(C) an unborn person, a minor, an incapacitated person, or a person whose identity or location is unknown or not reasonably ascertainable who is not otherwise represented is bound by an order to the extent the interest is adequately represented by another party having a substantially identical interest in the proceeding;

(D) with regard to interests given upon the happening of a certain event to persons who comprise a certain class, orders binding the living persons who would constitute the class, if the event had happened immediately before the commencement of the proceeding, bind all members of the class;

(E) with regard to an interest given to a living person when the same interest or a share of the interest is to pass to the surviving spouse or to persons who are or might be the distributees, devisees, heirs, or issue of the living person upon the happening of a future event, orders binding the living person bind the surviving spouse, distributees, devisees, heirs, or issue of the living person;

(F) with regard to interests given to a person or a class of persons, or to both, upon the happening of a future event, if the same interest or a share of the interest is to pass to another person or class of persons, or to both, upon the happening of an additional future event, orders binding the living person or class of persons who would take the interest upon the happening of the first event bind the persons and classes of persons who might take on the happening of the additional future event;

(G) if a person is designated by a trust instrument to represent and bind a born or unborn beneficiary of the trust and receive a notice, information, accounting, or report for the beneficiary, then the beneficiary is bound by an order binding the designated person; in this subparagraph,

(i) the settlor may make the designation in the trust instrument, in a separate document, or by a trust protector authorized in the trust instrument to make the designation;

(ii) except as otherwise provided in this subparagraph, a person designated under (i) of this subparagraph may not represent and bind a beneficiary while the designated person is serving as trustee;

(iii) except as otherwise provided in this subparagraph, a person designated under (i) of this subparagraph may not represent and bind another beneficiary if the designated person also is a beneficiary, unless the designated person was named by the settlor, is the beneficiary's spouse, or is a grandparent or descendant of a grandparent of the beneficiary or the beneficiary's spouse; in this sub-subparagraph, "spouse" means the individual to whom the beneficiary is married and with whom the beneficiary is living, and a physical

separation primarily for education, business, health, and similar reasons does not prevent the individual from being considered to be living with the beneficiary;

(3) a person representing another person under (2)(A) - (F) of this section and a person designated under (2)(G)(i) of this section are not liable to the beneficiary whose interests are represented, or to a person claiming through that beneficiary, for an action or omission to act made in good faith;

(4) notice is required as follows:

(A) notice as prescribed by AS 13.06.110 shall be given to every interested person or to one person who can bind an interested person as described in (2)(A), (B), or (D) - (G) of this section; notice may be given both to a person and to another person who may bind the person;

(B) notice is given to unborn persons, a minor, an incapacitated person, or a person whose identity or location is unknown or not reasonably ascertainable, and persons who are not represented under (2)(A), (B), or (D) - (G) of this section, by giving notice to all known persons whose interests in the proceedings are substantially identical to those of the unborn persons, the minor, the incapacitated person, or the person whose identity or location is unknown or not reasonably ascertainable;

(5) at any point in a proceeding, a court may appoint a guardian ad litem to represent the interest of an unborn person, a minor, an incapacitated person, or a person whose identity or address is unknown or not reasonably ascertainable, if the court determines that representation of the interest otherwise would be inadequate; if not precluded by conflict of interests, a guardian ad litem may be appointed to represent several persons or interests; the court shall set out its reasons for appointing a guardian ad litem as a part of the record of the proceeding.

* **Sec. 5.** AS 13.06.120 is amended by adding a new subsection to read:

(b) In this section,

(1) "order" means a judicial order, nonjudicial order, the result of the settlement of an account of a fiduciary under a procedure authorized by AS 13.06 - 13.36 or AS 13.38, and a settlement agreement resulting from a proceeding;

(2) "proceeding" means a judicial proceeding, nonjudicial proceeding, the settlement of an account of a fiduciary under a procedure authorized by AS 13.06 - 13.36 or AS 13.38, and a settlement negotiation, even if the settlement negotiation does not involve a judicial or nonjudicial third party who decides or facilitates a settlement.

*** Sec. 6.** AS 13.38.200(b) is amended to read:

(b) In exercising a discretionary power of administration regarding a matter within the scope of this chapter, whether granted by the governing instrument or this chapter, including AS 13.38.210 and **13.38.300 - 13.38.490** [13.38.300 - 13.38.410], a fiduciary shall administer a trust or estate impartially based on what is fair and reasonable to all of the beneficiaries, except to the extent that the governing instrument clearly manifests an intention that the fiduciary shall or may favor one or more of the beneficiaries. A determination in accordance with this chapter is presumed to be fair and reasonable to all of the beneficiaries.

*** Sec. 7.** AS 13.38.210(c) is amended to read:

(c) A trustee may not make an adjustment under this section if

(1) the adjustment would diminish the income interest in a trust that requires all of the income to be paid at least annually to a spouse and for which a federal estate tax or gift tax marital deduction would be allowed, in whole or in part, if the trustee did not have the power to make the adjustment; the prohibition in this paragraph does not apply to a trust after the trustee determines that the marital deduction has not been claimed or has not been allowed;

(2) the adjustment would reduce the actuarial value of the income interest in a trust to which a person transfers property with the intent to qualify for a federal gift tax exclusion;

(3) the adjustment would change the amount payable to a beneficiary as a fixed annuity or a fixed fraction of the value of the trust assets;

(4) the adjustment is from any amount that is permanently set aside for charitable purposes under the governing instrument and for which a federal estate or gift tax charitable deduction has been taken, unless both income and principal are permanently set aside for charitable purposes under the governing instrument;

(5) possessing or exercising the power to make an adjustment would cause an individual to be treated as the owner of all or part of the trust for federal income tax purposes, and the individual would not be treated as the owner if the trustee did not possess the power to make an adjustment;

(6) possessing or exercising the power to make an adjustment would cause all or part of the trust assets to be subject to federal estate or gift tax with respect to an individual, and the assets would not be subject to federal estate or gift tax with respect to the individual if the trustee did not possess the power to make an adjustment;

(7) the trustee is a beneficiary of the trust; or

(8) the trust has been converted to a unitrust under **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410].

*** Sec. 8.** AS 13.38.300 is amended to read:

Sec. 13.38.300. Power to convert to unitrust. Unless expressly prohibited by the governing instrument, a trustee may release the power to adjust under AS 13.38.210 and may convert a trust into a unitrust as described in **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410] if

(1) the trustee determines that the conversion will enable the trustee to better carry out the intent of the settlor or testator and the purposes of the trust;

(2) the trustee gives written notice of the trustee's intention to release the power to adjust, of the trustee's intention to convert the trust into a unitrust, **of the unitrust percentage selected, of the smoothing period selected,** and of how the unitrust will operate, including what initial decisions the trustee **intends to** [WILL] make under **AS 13.38.340** [THIS SECTION], to all the sui juris beneficiaries who

(A) are currently eligible to receive income from the trust;

(B) would be eligible, if a power of appointment were not exercised, to receive income from the trust if the interest of all of the beneficiaries eligible to receive income under (A) of this paragraph were to terminate immediately before the giving of the notice; and

(C) would, if a power of appointment were not exercised, receive a distribution of principal if the trust were to terminate immediately

before the giving of the notice;

(3) there are at least one sui juris beneficiary under (2)(A) of this section and at least one sui juris beneficiary under (2)(B) or (C) of this section; and

(4) a sui juris beneficiary does not object to the conversion to a unitrust in a writing delivered to the trustee within 60 days after the mailing of the notice under (2) of this section.

*** Sec. 9.** AS 13.38.310(a) is amended to read:

(a) A trustee may petition the court to approve the conversion to a unitrust if

(1) a beneficiary timely objects to the conversion to a unitrust; [OR]

(2) there is not a sui juris beneficiary who is eligible under **AS 13.38.300(2); or**

(3) the trustee is a beneficiary [AS 13.38.300(2)(A), AND THERE IS NOT A SUI JURIS BENEFICIARY WHO IS ELIGIBLE UNDER AS 13.38.300(2)(B) OR (C)].

*** Sec. 10.** AS 13.38.330(b) is amended to read:

(b) After a trust has been converted to a unitrust, "income" in the governing instrument means an annual distribution equal to **the amount produced by the application of a fixed unitrust percentage established under (d) of this section to** [FOUR PERCENT OF] the net fair market value, as determined annually, of the trust's assets, whether the assets would be considered income or principal under other provisions of this chapter**, averaged over the lesser of**

(1) the preceding years in the smoothing period selected by the trustee; or

(2) the period during which the trust has been in existence.

*** Sec. 11.** AS 13.38.330 is amended by adding a new subsection to read:

(d) The unitrust percentage to be used in determining the unitrust amount must be a reasonable current return from the unitrust of at least three percent and not more than five percent, taking into account the intentions of the trustor of the unitrust as expressed in the governing instrument, the needs of the beneficiaries, general economic conditions, projected current earnings for the unitrust, projected appreciation for the unitrust, and the effect of projected inflation on the unitrust.

* **Sec. 12.** AS 13.38.340 is amended to read:

Sec. 13.38.340. Trustee's discretionary powers regarding unitrust. The trustee may, in the trustee's discretion, from time to time, determine

(1) the effective date of a conversion to a unitrust;

(2) the provisions for prorating a unitrust distribution for a short year in which a beneficiary's right to payments commences or ceases;

(3) the frequency of unitrust distributions during the year;

(4) the effect of other payments from or contributions to the trust on the trust's valuation;

(5) whether to value the trust's assets annually or more frequently;

(6) **whether to use a smoothing period of three, four, or five years;**

(7) what valuation dates to use;

(8) [(7)] how frequently to value nonliquid assets and whether to estimate their value;

(9) [(8)] whether to omit trust property occupied or possessed by a beneficiary from the calculations; and

(10) [(9)] other matters necessary for the proper functioning of the unitrust.

* **Sec. 13.** AS 13.38.350(b) is amended to read:

(b) Unless otherwise provided by the governing instrument, a unitrust distribution shall be considered to have been paid from net income as net income would be determined if the trust were not a unitrust. To the extent net income is insufficient, the unitrust distribution shall be considered to have been paid from **ordinary income that is allocable under federal income tax rules to net income as determined for a unitrust. To the extent that the ordinary income is insufficient, the unitrust distribution is considered to have been paid from** net realized short-term capital gains. To the extent **net** income**, ordinary income,** and net realized short-term capital gains are insufficient, the unitrust distribution shall be considered to have been paid from net realized long-term capital gains. To the extent **net** income**, ordinary income,** and net realized short-term and long-term capital gains are insufficient, the unitrust distribution shall be paid from the principal of the trust.

* **Sec. 14.** AS 13.38.360 is amended to read:

Sec. 13.38.360. Court orders regarding unitrust. The trustee or, if the trustee declines to petition the court, a beneficiary may petition the court to

[(1) SELECT A PAYOUT PERCENTAGE DIFFERENT THAN FOUR PERCENT;

(2)] provide for a distribution of net income, as would be determined if the **unitrust** [TRUST] were not a unitrust, in excess of the unitrust distribution if the distribution is necessary to preserve a tax benefit [;

(3) AVERAGE THE VALUATION OF THE TRUST'S NET ASSETS OVER A PERIOD OTHER THAN THREE YEARS].

* **Sec. 15.** AS 13.38.390(b) is amended to read:

(b) If AS 13.38.380(a)(3), (4), or (6) applies to all the trustees, the trustees may petition the court to direct a conversion. **In the alternative, the trustees may appoint an independent person who shall be granted the authority, while acting in a fiduciary capacity, to make decisions in place of the trustees relating to a conversion, reconversion, and the exercise of discretionary powers under AS 13.38.340.**

* **Sec. 16.** AS 13.38.400 is amended to read:

Sec. 13.38.400. Reconversion from a unitrust. A trustee may reconvert a trust that has been converted into a unitrust under AS 13.38.300 by following the same procedures provided in **AS 13.38.300 - 13.38.435** [AS 13.38.300 - 13.38.410] for converting a trust into a unitrust. If a unitrust is reconverted under this section, the trustee's power to adjust under AS 13.38.210 applies to the trustee after the reconversion.

* **Sec. 17.** AS 13.38 is amended by adding new sections to article 2 to read:

Sec. 13.38.420. Additional unitrust provisions. (a) The unitrust amount may be determined by reference to the net fair market value of the unitrust's assets in one or more years.

(b) Distribution of a unitrust amount is considered a distribution of all of the income of a unitrust and is considered to be an income interest.

(c) Distribution of a unitrust amount is considered to be a reasonable

apportionment of the total return of a unitrust.

(d) A unitrust that provides for a distribution based on a unitrust percentage in excess of five percent of the net fair market value of the unitrust assets a year is considered to have paid out all of the income of the unitrust and to have paid out principal of the unitrust to the extent that the distribution exceeds five percent a year.

(e) The governing instrument of a unitrust may grant discretion to the trustee to adopt a consistent practice of treating capital gains as part of the unitrust amount to the extent that the unitrust amount exceeds the income determined as if the trust were not a unitrust, or the governing instrument may specify the ordering of classes of income.

(f) Unless the terms of the unitrust specifically provide otherwise, a unitrust amount is considered to have been made from the following sources, which are listed in order of priority:

(1) net income determined as if the trust were not a unitrust;

(2) ordinary income not allocable to net income;

(3) net realized short-term capital gains;

(4) net realized long-term capital gains; and

(5) the principal of the trust estate.

(g) The unitrust governing instrument may provide that the trustee may exclude assets used by the unitrust beneficiary, such as a residence property or tangible personal property, from the net fair market value of the unitrust assets for the purposes of computing the unitrust amount. These assets may be considered equivalent to income or to the unitrust amount.

Sec. 13.38.430. Power to treat gains as part of distribution of principal. Unless prohibited by the unitrust's governing instrument or specifically addressed by AS 13.38.350 or 13.38.420, the trustee of a unitrust may treat gains from the sale of capital assets of the unitrust to be part of a distribution of principal to a beneficiary, and, if the trustee treats these gains as part of a distribution of principal to a beneficiary, the trustee shall treat these gains consistently on the unitrust's books, records, and tax returns as part of a distribution to a beneficiary.

Sec. 13.38.435. Definitions. In AS 13.38.300 - 13.38.435,

(1) "smoothing period" means the period of years over which the fair market value of the assets of a unitrust are averaged;

(2) "unitrust amount" means the amount that is distributed from a unitrust to a beneficiary;

(3) "unitrust percentage" means the unitrust percentage established under AS 13.38.330(d).

* **Sec. 18.** AS 13.38.690(a) is repealed and reenacted to read:

(a) A trustee shall allocate

(1) to income that portion of a payment that equals the greater of the following:

(A) the portion that the payor characterizes as interest, a dividend, a remittance in place of interest, or a remittance in place of a dividend; or

(B) the portion that is characterized as imputed interest for federal income purposes;

(2) to principal that portion of a payment that remains after the allocation is made under (1) of this subsection.

* **Sec. 19.** AS 13.38.690(b) is amended to read:

(b) If **no** [A] part of a payment under a contract calling for equal installments over a fixed period of time is [NOT] allocable to income under the provisions of (a) of this section, the difference between the trust's acquisition value of the contract and the total expected return **is** [SHALL BE] considered to be interest. The trustee shall allocate to income the portion of each payment equivalent to interest on the then unpaid principal balance at the rate specified in the contract or at a rate necessary to amortize the difference between the expected return and the acquisition value, where that rate is readily ascertainable by the trustee.

* **Sec. 20.** AS 13.38.690(c) is amended to read:

(c) If **no** [THERE IS NOT A] portion of a payment from a separate fund held exclusively for the benefit of the trust [THAT] is allocable to income under (a) or (b) of this section, but the internal net income of the fund determined as if the fund were a separate trust subject to **AS 13.38.200 - 13.38.410, 13.38.500 - 13.38.690, or**

13.38.710 - 13.38.860 [AS 13.38.500 - 13.38.860] is readily ascertainable by the trustee, the **internal net income of the fund is considered to be the income earned by the fund, and the** portion of the payment equal to the then undistributed net income of the fund realized since the trust acquired its interest in the fund is considered to be a distribution of **that internal net** income **of the fund** and shall be allocated to the trust income account. The balance of the payment described in this subsection shall be allocated to principal. **The power to adjust under AS 13.38.210, the power to convert to a unitrust under AS 13.38.300, and the provisions of AS 13.38.420 apply to retirement benefits covered by this subsection that are payable to a trust. These powers and provisions may be exercised by the payee trustee or in the governing instrument for the retirement benefits separately and independently from the exercise by the payee trustee or in the governing instrument of these powers and provisions for the trust, as if the retirement benefits and the trust were separate trusts subject to this chapter.**

* **Sec. 21.** AS 13.38.690(d) is amended to read:

(d) A trustee shall allocate 10 percent of the part of the payment that is required to be made during the accounting period to income and the balance to principal if there is **no** [NOT A] part of the payment that is allocable to income under (a) - (c) of this section and all or part of the payment is required to be made. The trustee shall allocate the entire payment to principal if **no** [A] part of a payment is [NOT] required to be made or the payment received is the entire amount to which the trustee is entitled. In this subsection, a payment is not "required to be made" to the extent that it is made because the trustee exercises a right of withdrawal.

* **Sec. 22.** AS 13.38.690(e) is amended to read:

(e) If, to obtain a federal estate or gift tax marital deduction for a trust, the trustee must allocate more of a payment to income than provided for by this section, the trustee shall allocate **to income** the additional amount necessary to obtain the marital deduction [TO INCOME].

* **Sec. 23.** AS 13.46.195(d) is amended to read:

(d) The time for transfer to the minor of custodial property transferred under AS 13.46.040 may be changed under this section if the governing will or trust or

nomination provides in substance that the custodianship is to continue until the time the minor attains a specified age. That time may not be earlier than the time the minor attains 18 years of age [OR LATER THAN THE TIME THE MINOR ATTAINS 25 YEARS OF AGE], and, in that case, the governing will or trust or nomination shall determine the time to be specified in the transfer under AS 13.46.080.

*** Sec. 24.** AS 13.46.195(e) is amended to read:

(e) The time for transfer to the minor of custodial property transferred under AS 13.46.030 may be changed under this section if the transfer under AS 13.46.080 provides in substance that the custodianship is to continue until the time the minor attains a specified age. That time may not be earlier than the time the minor attains 18 years of age [OR LATER THAN THE TIME THE MINOR ATTAINS 25 YEARS OF AGE].

*** Sec. 25.** AS 13.46.195 is amended by adding new subsections to read:

(h) Notwithstanding (b) - (f) of this section, a custodian may extend the time for transfer to the minor of custodial property to an age older than the age that is specified in the transfer document or that is specified otherwise by this chapter. To extend the time for transfer, the custodian shall give the minor written notice of the minor's right to compel immediate distribution under (i) of this section. The custodian shall give the notice during the later of the following periods:

(1) the six-month period that precedes the age for distribution specified in the transfer document or specified otherwise by this chapter; or

(2) the six-month period that begins on the minor's 18th birthday.

(i) Notwithstanding (h) of this section, a minor may compel immediate distribution of custodial property by giving written notice to the custodian. To compel immediate distribution, the minor shall give the notice during the six-month period that begins on the date that is the later of

(1) the age for distribution specified in the transfer document or specified otherwise by this chapter; or

(2) the minor's 18th birthday.

*** Sec. 26.** AS 13 is amended by adding a new chapter to read:

Chapter 75. Disposition of Human Remains.

Sec. 13.75.010. Directions by decedent. (a) A person may provide directions for the disposition of the person's remains by placing the directions in a disposition document. The directions may include or be limited to designating an agent to control the disposition of the person's remains.

(b) A disposition document must be signed by the person and acknowledged before a notary public, and contain the form and contents required by AS 13.75.030. A disposition document may be a separate document or it may be contained in another document, including a will or prepaid funeral or burial contract. The disposition document may be modified or revoked only by a subsequent disposition document that complies with this subsection.

Sec. 13.75.020. Persons authorized to control disposition. (a) The following persons, in the priority listed, may control disposition of a decedent's remains:

(1) a person designated in a disposition document as the disposition agent for the decedent;

(2) a person serving, or nominated by the decedent in the decedent's will to serve, as the personal representative of the decedent's estate, if the person is acting according to the decedent's written instructions contained in the decedent's will;

(3) the individual who was the spouse of the decedent at the time of the decedent's death;

(4) the sole surviving competent adult child of the decedent, or, if there is more than one surviving competent adult child of the decedent, the majority of the surviving competent adult children; fewer than one-half of the surviving competent adult children may exercise the rights and duties of this section if these surviving adult children use reasonable efforts to notify all other surviving competent adult children that they are exercising these rights and duties and are not aware of any opposition by one-half or more of all of the surviving competent adult children;

(5) the surviving competent parents of the decedent; if one of the surviving competent parents is absent, the remaining competent parent may exercise the rights and duties of this section after reasonable efforts have been unsuccessful in locating the absent surviving competent parent; in this paragraph, "absent" means a person who is unable to communicate decisions or participate in making decisions

regarding the disposition of a decedent's remains personally, telephonically, or through electronic communication;

(6) the surviving competent adult person in the next degrees of kindred, the two surviving competent adult persons of the same degree of kindred if there are two, or, if there are more than two surviving competent adult persons of the same degree of kindred, the majority of those persons; fewer than the majority of surviving competent adult persons of the same degree of kindred may exercise the rights and duties of this section if those persons use reasonable efforts to notify all other surviving competent adult persons of the same degree of kindred that they are exercising these rights and duties and are not aware of any opposition by one-half or more of all surviving competent adult persons of the same degree of kindred;

(7) in the case of an indigent or another individual whose final disposition is the responsibility of the state or a municipality, a public administrator, medical examiner, coroner, or another public official charged with arranging the final disposition of the decedent; or

(8) another person who is willing to assume legal and financial responsibility.

(b) If a person takes control of the disposition under (a) of this section, the person is liable for the reasonable costs of the disposition.

(c) In this section,

(1) "adult" means a person who is 18 years of age or older;

(2) "competent" means a person who does not suffer from disabilities that prevent the person from managing the person's property or affairs.

Sec. 13.75.030. Form of disposition document. A disposition document must be in substantially the following form:

DISPOSITION DOCUMENT

You can select Part 1, Part 2, or both, by completing the part(s) you select, including providing any signatures indicated. Part 3 contains general statements and a place for your signature. You must sign in front of a notary.

PART 1. APPOINTMENT OF AGENT TO CONTROL

DISPOSITION OF REMAINS. If you appoint an agent, you and your agent must complete this part as indicated, and the agent must sign this part.

I, _____, being of sound mind, wilfully and voluntarily make known my desire that, on my death, the disposition of my remains shall be controlled by _____ (name of agent first named below), and, with respect to that subject only, I appoint that person as my agent. All decisions made by my agent with respect to the disposition of my remains, including cremation, are binding.

ACCEPTANCE BY AGENT OF APPOINTMENT.

THE AGENT, AND EACH SUCCESSOR AGENT, BY ACCEPTING THIS APPOINTMENT, AGREES TO AND ASSUMES THE OBLIGATIONS PROVIDED IN THIS DOCUMENT. AN AGENT MAY SIGN AT ANY TIME, BUT AN AGENT'S AUTHORITY TO ACT IS NOT EFFECTIVE UNTIL THE AGENT SIGNS BELOW TO INDICATE THE ACCEPTANCE OF APPOINTMENT. ANY NUMBER OF AGENTS MAY SIGN, BUT ONLY THE SIGNATURE OF THE AGENT ACTING AT ANY TIME IS REQUIRED.

AGENT:

Name: _____

Address: _____

Telephone Number: _____

Signature Indicating Acceptance of Appointment:

_____

Date of Signature: _____

SUCCESSORS:

If my agent dies, becomes legally disabled, resigns, or refuses to act, I appoint the following persons (each to act alone and successively, in the order named) to serve as my agent to control the disposition of my remains as authorized by this document:

(1) First Successor

Name: _____

Address: _____

Telephone Number: _____

Signature of First Successor Indicating Acceptance of Appointment:

_____

Date of Signature: _____

(2) Second Successor

Name: _____

Address: _____

Telephone Number: _____

Signature of Second Successor Indicating Acceptance of Appointment:

_____

Date of Signature: _____

PART 2. DIRECTIONS FOR THE DISPOSITION OF MY REMAINS.

Stated below are my directions for the disposition of my remains:

_____

_____

_____

_____

If the disposition of my remains is by cremation, then (pick one):

( ) I do not wish to allow any of my survivors the option of canceling my cremation and selecting alternative arrangements, regardless of whether my survivors consider a change to be appropriate.

( ) I wish to allow only the survivors I have designated below to have the option of canceling my cremation and selecting alternative arrangements, if they consider that a change to be appropriate:

_____

_____

_____

PART 3. GENERAL PROVISIONS AND SIGNATURE.

WHEN DIRECTIONS BECOME EFFECTIVE. The directions, including any appointment of an agent, in this disposition document become effective on my death.

REVOCATION OF PRIOR APPOINTMENTS. I revoke any prior appointment of any person to control the disposition of my remains.

SIGNATURE OF PERSON MAKING DISPOSITION DOCUMENT

Signature: _____

Date of signature: _____

(Notary acknowledgment of signature)

Sec. 13.75.040. Agent's appointment. The person appointed as an agent in a disposition document may sign the disposition document at any time, but the agent's authority to act is not effective until the agent signs the instrument.

Sec. 13.75.050. Exercise of authority. If a person fails to exercise the person's authority to control disposition under AS 13.75.020 within 48 hours after receiving notification of the decedent's death or within 48 hours after the decedent's death, whichever is earlier, the person may not control the disposition of the decedent's remains, and the right to control the disposition of the decedent's remains passes to the person who is next listed in priority under AS 13.75.020. If the person to whom the right to control the disposition passes under this section fails to exercise the person's authority to control the disposition within 48 hours after being notified that the authority to control the disposition has passed to the person, the authority to control the disposition passes to the person who is next listed in priority under AS 13.75.020.

Sec. 13.75.060. Certain persons prohibited from control. If a person is charged with a felonious killing in connection with a decedent's death and if the funeral director or the cemetery knows about the charge, then the person may not control disposition, and the right to control disposition passes to the person who is next listed in priority under AS 13.75.020.

Sec. 13.75.070. Prohibition of cremation; written instructions. A person

may not authorize cremation for a decedent's remains if a decedent has left directions in a disposition document that the decedent does not wish to be cremated.

Sec. 13.75.080. Implementation of directions. (a) The person authorized to control the disposition shall carry out the directions of the decedent to the extent that the decedent's estate or the person is financially able to carry out the directions.

(b) Notwithstanding any other provision in AS 13.06 - 13.36 (Uniform Probate Code), if a person provides directions in a disposition document that is contained in a will, the directions shall be carried out immediately without the necessity of probate. If the will is not probated or is declared invalid for testamentary purposes, the directions are valid to the extent to which they have been acted on in good faith.

Sec. 13.75.090. Misrepresentation; liability. If a person represents that the person knows the identity of a decedent, and, with the intent to procure the disposition of the decedent's remains, signs a statement, other than a death certificate, that identifies the decedent, the person guarantees the identity of the decedent and is liable for any damages that result, directly or indirectly, from that guarantee.

Sec. 13.75.100. Liability. (a) A disposition organization is not liable for carrying out the directions of a decedent if the disposition organization carries out the directions of a decedent or a person who establishes that the person is entitled to control the disposition.

(b) This section may not be construed to reduce or eliminate the liability of a disposition organization for its negligence or reckless acts.

Sec. 13.75.110. Disputes. (a) A person listed in AS 13.75.020 who is involved in a dispute with one or more persons listed in AS 13.75.020 about which of the persons has the authority to control disposition may bring an action in the superior court to resolve the dispute.

(b) If there is a dispute with one or more persons listed in AS 13.75.020 about which person has the authority to control disposition, a cemetery organization or funeral establishment is not liable for refusing to accept, to inter, or otherwise to dispose of the decedent's remains until the cemetery organization or funeral establishment receives a court order or another suitable confirmation that the dispute has been resolved.

Sec. 13.75.120. Exemptions. The disposition of the remains of a member of the organized militia under AS 26.05.262, the disposition of the remains of a member of the armed forces under AS 26.10.065(a), and the disposition of the remains of a member of the United States Coast Guard under AS 26.10.065(b) are exempt from this chapter.

Sec. 13.75.190. Definitions. In this chapter,

(1) "control" means the authority to control disposition;

(2) "directions" means

(A) instructions for the disposition of a person's remains;

(B) the appointment of an agent to handle the disposition of a person's remains; or

(C) both (A) and (B) of this paragraph;

(3) "disposition" means disposition of a decedent's remains, including cremation, but does not include an anatomical gift; in this paragraph, "anatomical gift" has the meaning given in AS 13.52.390;

(4) "disposition document" means a disposition document authorized by AS 13.75.010

(A) in which a person provides directions regarding the disposition of the person's remains; and

(B) that complies with AS 13.75.030;

(5) "disposition organization" means

(A) a cemetery association formed under AS 10.30.010;

(B) a nonprofit cemetery corporation authorized by AS 10.30.055;

(C) a person operating a crematory;

(D) a person operating a columbarium;

(E) a funeral home or other type of funeral establishment;

(F) a funeral director or an embalmer.

Sec. 13.75.195. Short title. This chapter may be cited as the Disposition of Human Remains Act.

*** Sec. 27.** AS 21.42.020 is amended by adding new subsections to read:

(e) Notwithstanding (a) of this section, a trustee, acting in a fiduciary capacity, may procure or cause to be procured an insurance contract that is on the life or body of an individual and under which the proceeds of the insurance contract are payable to the trustee, acting in a fiduciary capacity, if

(1) the trustee, acting in a fiduciary capacity, owns the insurance contract or the trust itself owns the insurance contract;

(2) on the date the contract is made, a settlor of the trust is the individual insured, has an insurable interest in the individual insured, or would have had an insurable interest in the individual insured if the settlor were living at the time the contract was made; in this paragraph, "settlor" has the meaning given in AS 13.36.390; and

(3) the proceeds of the contract are primarily for the benefit of a trust beneficiary who has an insurable interest in the individual insured, except that, if the determination of the trust beneficiary's insurable interest is based on (d)(1) of this section, the trust beneficiary's relation by blood or law must be within the third degree.

(f) A person who has an insurable interest in the life or body of an individual may form a business firm that is substantially or solely for the purpose of purchasing, holding, or administering an insurance contract on the life or body of the individual. In this subsection, "firm" has the meaning given in AS 21.97.900, but also includes a business trust and a joint venture.

*** Sec. 28.** AS 34.40 is amended by adding a new section to read:

Sec. 34.40.113. Transfers of individual retirement accounts. (a) Notwithstanding a provision in AS 09.38.017(d), AS 34.40.110, or another law to the contrary, a person may voluntarily transfer or assign the person's interest in an individual retirement account if the person

(1) is the owner of or a participant in the individual retirement account; or

(2) acquired the interest as a result of the death of another individual.

(b) In this section, "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A.

*** Sec. 29.** AS 34.77.030(g) is amended to read:

(g) Whether or not the community property agreement provides that all property acquired by either or both spouses during the marriage is community property, and except to the extent otherwise expressly provided **by the spouses** in the community property agreement **or by the settlors in a community property trust,** property acquired by a spouse during marriage and after the determination date is individual property if acquired

(1) by gift or a disposition at death made by a third person to the spouse and not to both spouses;

(2) in exchange for or with the proceeds of other individual property of the spouse;

(3) from appreciation or income of the spouse's individual property except to the extent that the income or appreciation is classified as community property under AS 34.77.130;

(4) by a decree, community property agreement, written consent, or reclassification under AS 34.77.060(b) designating it as the individual property of the spouse;

(5) as a recovery for damage to property under AS 34.77.140, except as specifically provided otherwise in a decree, community property agreement, **community property trust,** or written consent; [OR]

(6) as a recovery for personal injury, except for the amount of the recovery attributable to expenses paid or otherwise satisfied from community property**; or**

(7) as a transfer to a community property trust and declared by the trust to be the individual property of the spouse.

*** Sec. 30.** AS 34.77.050(b) is amended to read:

(b) A gift of community property to a third person that is not allowed under (a) of this section is subject to **AS 34.77.140(e) - (h)** [(d) OF THIS SECTION] unless both spouses act together in making the gift or the other spouse ratifies the gift.

*** Sec. 31.** AS 34.77.110 is amended by adding new subsections to read:

(f) Property that spouses agree in a community property agreement is

community property or property that is transferred to a community property trust and expressly declared by the trust to be community property is owned as community property regardless of the form of title to the property, even if the title indicates that the property is owned unequally by the spouses or is only in the name of one spouse.

(g) If the title to community property is in a form that provides for ownership by survivorship between the spouses, then ownership by survivorship is presumed to have been made with the consent of both spouses.

(h) If a spouse with management and control of community property designates a beneficiary for the property on the death of one or both of the spouses, and if the community property is held in a form of title that permits a beneficiary designation, the beneficiary designation is effective only for the designating spouse's one-half interest in the community property unless the other spouse consents in writing to the designation. A designation of the following as the beneficiary is presumed to have been made with the consent of the other spouse:

(1) the other spouse or an ancestor or descendant of either spouse;

(2) a charity; or

(3) a trust, to the extent that the beneficiaries consist of persons or entities identified in (1) or (2) of this subsection.

(i) The testimony of one spouse is sufficient to rebut a presumption established under this section.

(j) A disposition of community property contrary to (e) - (h) of this section is voidable. An action in court to void the disposition must be commenced within the time specified by AS 34.77.140(e).

*** Sec. 32.** AS 34.77.140(d) is amended to read:

(d) Except as provided otherwise in **(e) - (h) of this section** [AS 34.77.050(d)], a spouse must begin an action against the other spouse under (a) of this section within three years after acquiring actual knowledge of the facts giving rise to the claim.

*** Sec. 33.** AS 34.77.140 is amended by adding new subsections to read:

(e) Except as provided by (f) - (h) of this section, if a gift of community property during marriage by a spouse does not comply with AS 34.77.050(a), the

nondonor spouse may bring an action to recover the property or the amount of money by which the gift exceeded the limit under AS 34.77.050(a). The nondonor spouse may bring the action against the donor spouse, the gift recipient, or both. The nondonor spouse must commence the action within the earliest of the following times:

(1) one year after the nondonor spouse receives notice of the gift;

(2) one year after dissolution of the marriage; or

(3) on or before the deadline for filing a claim under AS 13.16.460 after the death of the donor spouse.

(f) If a recovery under (e) of this section occurs during the marriage of the donor spouse and the nondonor spouse, the property or money that is recovered is considered community property. If the recovery occurs after the dissolution of the marriage of the donor and nondonor spouses or after the death of either the donor or the nondonor spouse, the recovery is limited to 50 percent of the property or money that would have been recovered if the recovery had occurred during the marriage.

(g) If a transfer of community property to a third person during marriage by a spouse acting without the other spouse becomes a completed gift on the death of the donor spouse, or if an arrangement involving community property during marriage by a spouse acting without the other spouse is intended to be and becomes a gift to a third person on the death of the donor spouse, the surviving spouse may bring an action in court against the gift recipient to recover one-half of the gift. To bring an action under this subsection, the surviving spouse must commence the action on or before the deadline for filing a claim under AS 13.16.460.

(h) If a spouse who would have been entitled to bring an action under (e) - (g) of this section predeceases the donor spouse, the deceased spouse's successor in interest may bring an action for recovery under (e) - (g) of this section, but the action must be commenced within one year after the deceased spouse's death. Recovery in an action under this subsection is the same as if the donor spouse had predeceased the spouse entitled to the recovery, but the amount of the recovery is calculated as of the date of the death of the spouse entitled to the recovery.

* **Sec. 34.** AS 13.38.330(c); AS 13.46.195(g); and AS 34.77.050(d) and 34.77.110(d) are repealed.

*** Sec. 35.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE CHANGE. AS 34.77.110(i), enacted by sec. 31 of this Act, has the effect of amending Rule 301(a), Alaska Rules of Evidence, by specifying the evidence that is sufficient to rebut a presumption under AS 34.77.110(i), enacted by sec. 31 of this Act.

*** Sec. 36.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) AS 09.38.017(a), as amended by sec. 1 of this Act, AS 09.38.017(d), as amended by sec. 2 of this Act, and AS 09.38.017(e), as amended by sec. 3 of this Act, apply to a retirement plan that exists before, on, or after the effective date of this Act. In this section, "retirement plan" has the meaning given in AS 09.38.017(e), as amended by sec. 3 of this Act.

(b) AS 34.40.113, added by sec. 28 of this Act, applies to an individual retirement account that exists before, on, or after the effective date of this Act. In this section, "individual retirement account" means an individual retirement account established under 26 U.S.C. 408 or a Roth IRA established under 26 U.S.C. 408A.

*** Sec. 37.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. AS 34.77.110(i), enacted by sec. 31 of this Act, takes effect only if sec. 35 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

Subject: RE: AK SB 165 by Senate Judiciary Committee

Hi Cindy, this is good news!! Thanks so much for your help with this.
I would like to listen to the hearing, but there is no need for me to testify. Can I call in to listen, or will the hearing be available via Internet?

Brenda

Subject: RE: AK SB 165 by Senate Judiciary Committee

Brenda – I have runt his by the attorneys who are working on the bill and they have no problem with your suggested amendment to the definition of settlor. So as it moves through committee we will make this change.

If you would still like to testify on this issue, the call in number is 1 (855) 463-5009 and you'd just let the moderator know you'd like to testify on SB 165. The meeting starts at 1:30 pm. Alaska time and this bill is the first item on the agenda.

Let me know if you do decide to call in – I have to send your name in to the conference operators so they know to plug you into the meeting!

Subject: AK SB 165 by Senate Judiciary Committee

Hi Cindy, thank you for speaking with me today. By way of introduction, I represent the American Council of Life Insurers (ACLI), a national trade association representing more than 300 legal reserve life insurers operating in the United States. Our members represent over 90% of the assets and premiums of the U.S. life insurance and annuity industry.

Our interest in SB 165 is with regard to Section 27 of the bill, relating to insurable interests for life insurance policies. We support the committee's proposed adoption of the language in this section, that for the most part, tracks the Insurable Interest Amendments to the Uniform Trust Code (UTC), which were adopted by the National Conference of Commissioners on Uniform State Laws (NCCUSL) in July, 2010 (attached). These amendments were drafted with much consideration by NCCUSL experts over their model recommendation for several years, and were given congratulatory recognition by ACLI when they were adopted.

ACLI actively participated in the NCCUSL effort from its beginning, voicing our concern in protecting against the problem of stranger-originated life insurance (STOLI) by inadvertently broadening the model insurable interest law with respect to trusts. The NCCUSL Drafting Committee's Reporter's Summary (attached) highlights this concern.

In SB 165, Section 27, AS 21.42.020(e)(2) states that the term "settlor" has the meaning given in AS 13.36.390, which reads: " 'settlor' means a person who transfers property in trust and includes a person who furnishes the property transferred to a trust even if the trust is created by another person." However, the NCCUSL insurable interest amendments define "settlor" more narrowly to mean "a person that executes a trust instrument. The term includes a person for which a fiduciary or agent is acting." An explanation for the change in the UTC definition of "settlor" is included in the comments attached to the NCCUSL Insurable Interest Amendments and reads in pertinent part:

With regard to language of the amendment, subsection (a) provides that the term "settlor "is limited to a person who executes the trust instrument. This is narrower than the UTC definition of "settlor," which, in addition to the person who executes the trust instrument, would include a person who merely contributes property to the trust. See UTC Section 103(15). As explained in the comment to Section 103(15), the broader definition serves a useful purpose in connection with the UTC generally; however, none of those situations relates to the issue of whose life should properly be the subject of a life insurance policy that is used to fund a trust. Moreover, to use the broader definition would needlessly complicate the issue of whose life should be the subject of insurance because it would be rare, if ever, that a life insurance policy used to fund a trust for estate planning purposes would be on the life of someone other than the settlor signing the trust or someone in whose life that settlor would have an insurable interest. Because there are situations in which a trust instrument will be executed by a fiduciary or agent for the creator of the trust, subsection (a) also makes clear that in such circumstances the fiduciary or agent is deemed to be the equivalent of the settlor.

ACLI respectfully requests that the reference to the current AK statutory definition of "settlor" be stricken and that the term be defined in the bill to track the NCCUSL Insurable Interest Amendments' definition of "settlor." **Our suggested amendment would be as follows on Page 22, lines 22 - 23:**

Sec. 27. AS 21.42.020 is amended by adding new subsections to read:
(e) Notwithstanding (a) of this section, a trustee, acting in a fiduciary capacity, may procure or cause to be procured an insurance contract that is on the life or body of an individual and under which the proceeds of the insurance contract are payable to the trustee, acting in a fiduciary capacity, if
(1) the trustee, acting in a fiduciary capacity, owns the insurance contract or the trust itself owns the insurance contract;
(2) on the date the contract is made, a settlor of the trust is the individual insured, has an insurable interest in the individual insured, or would have had an insurable interest in the individual insured if the settlor were living at the time the contract was made; in this paragraph, "settlor" ~~has the meaning given in AS 13.36.390~~ means a person that executes a trust instrument, and the term includes a person for which a fiduciary or agent is acting; and
(3) the proceeds of the contract are primarily for the benefit of a trust beneficiary who has an insurable interest in the individual insured, except that, if the

26 determination of the trust beneficiary's insurable interest is based on (d)(1) of this
27 section, the trust beneficiary's relation by blood or law must be within the third degree.
28 (f) A person who has an insurable interest in the life or body of an individual
29 may form a business firm that is substantially or solely for the purpose of purchasing,
30 holding, or administering an insurance contract on the life or body of the individual. In
31 this subsection, "firm" has the meaning given in AS 21.97.900, but also includes a

Memorandum

TO:	**Senator Hollis French, Chairman of the Senate Judiciary Committee, Alaska State Legislature**
FROM:	**Beth Chapman and Dave Shaftel**
DATE:	**February 6, 2012**
RE:	**Section Analysis: Amendments to AS 13.36.157, Trustee's Power to Appoint to Another Trust**

Section _____. Existing Alaska Statute 13.36.157 provides a trustee with a method to modify an existing trust, commonly referred to as "decanting". Alaska enacted its "decanting" statute in 1998. Alaska copied New York's statute. At the present time, the following states have enacted decanting statutes: Alaska, Arizona, Delaware, Florida, Indiana, Missouri, Nevada, New Hampshire, New York, North Carolina, Ohio, South Dakota, and Tennessee. In addition, decanting statutes are pending before Illinois, Michigan, and Virginia.

New York recently did a thorough revision of its decanting statute and enacted this new revised statute in 2011. The proposed amendment to Alaska's decanting statute closely tracks the changes made by New York with modifications necessary to accommodate Alaska's procedural provisions.

The purposes of a decanting statute are to allow a trustee to modify a trust in order to correct errors and to adjust to changed circumstances and laws. The revised draft distinguishes between trustees who have unlimited discretion and those without unlimited discretion. A trustee without unlimited discretion must maintain the same beneficiaries in the new trust and apply the same standard for distributions. The trustee cannot be a settlor or beneficiary of the trust, and has a fiduciary duty to exercise the power of appointment in the best interests of one or more proper objects of the exercise of the power and as a prudent person would exercise the power under prevailing circumstances. A trustee must exercise the power in writing and must give written notice to the settlor, any person having the right to remove or replace the trustee, and any qualified beneficiary. A beneficiary may object to the exercise if it is an abuse of discretion, or fails to comply with the trustee's duties stated above. Restrictions exist to protect mandatory distribution rights, tax benefits, and to prohibit the trustee from exercising the power to either increase the trustee's compensation or decrease the trustee's liability.

Implementation of irrevocable trusts is best accomplished if the law provides reasonable flexibility to adjust to changed circumstances and to correct errors. The reason why so many states have enacted decanting statutes is because of the need for this flexibility. Amendment to Alaska's decanting statute to include these revised provisions will benefit the residents of the state of Alaska, many of whom use lifetime or testamentary trusts to implement their estate planning purposes.

Memorandum

TO: **Senator Hollis French, Chairman of the Senate Judiciary Committee, Alaska State Legislature**
FROM: **David Shaftel & Caroline Wanamaker**
DATE: **February 3, 2012**
RE: **Amendments to Uniform Transfer to Minors Act**

During the hearing on Senate Bill 165 before the Senate Judiciary Committee, Senators McGuire and French requested information concerning the ages of distribution under the Act. In addition, Senator McGuire wanted to make sure that the amendments did not reduce the ages for distributions under the existing Act. These matters are discussed below.

Type of Transfer	Default Rule	Variations Permitted at Time Transfer is Made
Irrevocable Gift *AS 13.46.030*	Age 21 *AS 13.46.190(1)*	Age 18 to 25, with minor's right to compel distribution at age 21 *AS 13.46.195* *AS 13.46.080*
Exercise of Power of Appointment *AS 13.46.030*	Age 21 *AS 13.46.190(1)*	Age 18 to 25 *AS 13.46.195* *AS 13.46.080*
Personal Representative's or Trustee's Transfer Authorized by Will or Trust *AS 13.46.040*	Age 21 *AS 13.46.190(1)*	Age 18 to 25 *AS 13.46.195* *AS 13.46.080*
Personal Representative's or Trustee's transfer under Will or Trust that does not authorize transfer *AS 13.46.050*	Age 18 *AS 13.46.190(2)*	Cannot presently be changed
Transfer by Obligor *AS 13.46.060*	Age 18 *AS 13.46.190(2)*	Cannot presently be changed

The latest version of these amendments is not intended to change any of the above periods of time in which the custodian can presently retain the assets in the account. The main purpose of the amendments is to allow the custodian to increase the duration of time in which the assets remain in the account. However, the minor will have the right to compel immediate distribution of the assets to the minor during the six month period that begins on the date that is the age for distribution specified in accordance with the Act ("this chapter").

It is very important that these amendments maintain the qualification of a gift to an account as a "present interest" within the meaning of Section 2503(b) of the Internal Revenue Code. This will allow gifts of $13,000 or less each year to be gift tax-free.

Here are several examples of the intended goals of these amendments:

Example 1. *(AS 13.46.030 Gift)* Parent forms a UTMA account for child without specifying the age at which the account terminates and makes annual exclusion gifts of $13,000 a year. Because Parent did not vary the default age at the time of setting up the account, the age upon which the account terminates and the assets are distributed to the child is 21. As child nears the age of twenty-one years, custodian of the account decides that it would be in the best interests of the child to extend the duration of the account until age thirty. Custodian would give the child notice of this intention to extend the account. Notice would be given within the six month period prior to age twenty-one. The child would have the right to compel distribution at age twenty-one. If the child did not compel distribution during the six month period that begins at age twenty-one, then the assets would remain in the account until age thirty.

Example 2. *(AS 13.46.040 Gift)* Parent's will leaves assets to minor child. A provision in the will authorizes the personal representative of parent's estate to form a UTMA account for child without specifying the age of termination of the account.. Because Parent did not vary the default age at the time of setting up the account, the age upon which the account terminates and the assets are distributed to the child is 21. As child nears age twenty-one, custodian of the account decides that it would be wise to extend the account to age twenty-five. Child will have the right to compel distribution at age twenty-one. As child approaches age twenty-five, personal representative again decides that it would wise to postpone distribution, now until age thirty. Child will have the right to compel distribution at age twenty-five.

Example 3. *(AS 13.46.060 Transfer)* Due to a personal injury accident, debtor owes minor child $25,000. Debtor may pay this amount to a UTMA account with an appropriate custodian. As the child nears age eighteen, the custodian determines that it would be wise to extend the account until age thirty. Child has the right to compel distribution at age eighteen. If the child does not compel distribution, then the assets would remain in the account until age thirty.

Example 4. Assume that an account has been extended to age thirty and the custodian again decides that it would be wise to extend the account until age forty. The procedure for extension of time can be repeated again. The custodian would give the child notice during the six month period that proceeds age thirty. The child would have the right to compel distribution during the six month period that begins on the date that is the age for distribution specified by this chapter, which would be age thirty due to the prior extension of time.

ALASKA COURT SYSTEM
State of Alaska
Office of the Administrative Director

SPONSOR STATEMENT
Senate Bill 168

Senate Bill 168 was introduced by request of the Alaska Supreme Court. The bill amends the statutory provisions that govern the geographic cost of living adjustments that apply to judges' and justices' salaries. Under the proposed legislation judges' and justices' geographic cost of living adjustments would be calculated in the same manner as for executive branch employees who are not represented by a union.

Under current law, and unlike other state employees, judges and justices have two caps on their cost of living adjustment. The first is an artificially low adjustment calculation; the second is a restriction on the portion of their salary to which the adjustment applies.

Alaska Statute 22.35.010 states that the geographic cost of living adjustment for judges and justices is limited to a maximum of 17.5% and applies only to the first $40,000 of their salary (for a maximum of $7,000). No other state employees are subject to these restrictions.

By comparison, the geographic cost of living adjustment applied to the salaries of attorneys in the executive branch in Barrow, Kotzebue and Nome is 36.92%, in Bethel it is 32.26%, and in Dillingham it is 27.75%. As with all state employees other than judges, those adjustments apply to the attorneys' full salaries. By capping judicial adjustments at $7,000, the judges in those same communities have an effective geographic cost of living adjustment of less than 5% of their salaries. Obviously, that does not fully offset the higher cost of living in those communities.

The severely limited cost of living adjustments are unfair to rural judges and they likely discourage qualified candidates from applying for judicial openings in rural Alaska. The attached bill is intended to address these problems.

Thank you for your consideration of this bill.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB168

Analysis

Senate Bill 168 amends the statutes governing the geographic cost of living adjustments that apply to judges' salaries. Under current law, and unlike all other state employees, judges have two caps on their cost of living adjustment. The first is an artifically low adjustment calculation; the second is a restriction on the amount of a judge's salary to which the adjustment applies.

Alaska Statute 22.35.010 states that the geographic cost of living adjustment for judges is limited to a maximum of 17.5% and applies only to the first $40,000 of their salary (for a maximum of $7,000). No other state employees are subject to these restrictions.

Senate Bill 168 fixes this discrepancy by deleting AS 22.35.010 and tying the geographic differentials received by judges to the statute that sets the geographic differentials for all other non-covered state employees.

Increased Cost of Change to Differentials	**249,199**

[1] As is the case with other state employees, some judges currently receive a geographic differential. Unlike other state employees, however, a judge's geographic differential is calculated only upon the first $40,000 of salary, not the entire salary. Additionally, the geographic differential paid to some judges is substantially lower than the differential paid to other state employees in the same location. For example, second district judges in Kotzebue are paid a 17.5% geographic differential, while other state employees in this community are paid 51% and will be paid 60% if the FY13 rates proposed by the unions are accepted.

Deputy Administrative Director

March 23, 2012

The Honorable Hollis French
Chair, Senate Judiciary Committee
State Capitol, Room 417
Juneau, Alaska 99801

Dear Senator French:

The current statute governing geographic pay differentials for judges limits the rate of the differential to a maximum of 17.5% and applies only to the first $40,000 of a judge's salary (17.5% of $40,000 is $7,000). Because that amount of differential does not fully cover the increased cost of living in many rural communities, the court system requested the introduction of SB 168. That bill would have applied to judges' salaries the same geographic pay differentials that apply to the salaries of most other non-union state employees.

The attached draft committee substitute takes a different approach. Instead of changing the differential rates for judges the CS preserves the current rates, but removes the $40,000 cap. It also adds Dillingham to the statute[1].

This alternative to SB 168 has the effect of increasing rural court judge's geographic differentials from a maximum of $7,000 to a maximum of $31,752. Although the draft CS applies lower differential rates to the salaries of judges than are applied to the salaries of other state employees, the actual dollar amount of the differential is similar to that received by many of the state attorneys practicing in rural Alaska.

The draft CS is an approach that the court system considered a likely amendment to the original bill and is one that we support.

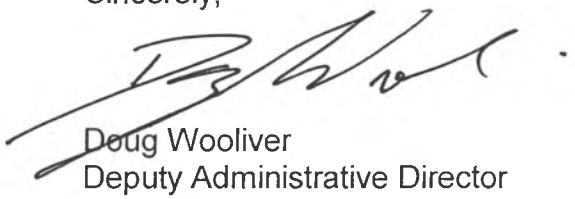
---

[1] At the time the original geographic pay differential statute was adopted there was not a resident superior court judge in Dillingham. However, since that judgeship was created in 1996 the court has always provided that judge with the same geographic differential received by other judges in the region.

The draft CS also reduces our fiscal notes from a total of $795,110 to $241,199, which we hope will addresses the "sticker shock" associated with the original bill.

Thank you for your consideration of this draft CS and please let me know if you have any questions.

Sincerely,



Doug Wooliver
Deputy Administrative Director
Alaska Court System

Deputy Administrative Director

January 18, 2012

The Honorable Hollis French
Chair, Senate Judiciary Committee
State Capitol Room 417
Juneau, Alaska 99801

Dear Senator French:

The Alaska Court System respectfully requests that the Senate Judiciary Committee schedule a committee hearing for SB 168.

Senate Bill 168 was introduced by request of the Alaska Supreme Court. The bill amends the statutory provisions that govern the geographic cost of living adjustments that apply to judges' and justices' salaries. Under the proposed legislation judges' and justices' geographic cost of living adjustments would be calculated in the same manner as for executive branch employees who are not represented by a union.

Under current law, and unlike other state employees, judges and justices have two caps on their cost of living adjustment. The first is an artificially low adjustment calculation; the second is a restriction on the portion of their salary to which the adjustment applies.

Alaska Statute 22.35.010 states that the geographic cost of living adjustment for judges and justices is limited to a maximum of 17.5% and applies only to the first $40,000 of their salary (for a maximum of $7,000). No other state employees are subject to these restrictions.

By comparison, the geographic cost of living adjustment applied to the salaries of attorneys in the executive branch in Barrow, Kotzebue and Nome is 36.92%, in Bethel it is 32.26%, and in Dillingham it is 27.75%. As with all state employees other than judges, those adjustments apply to the attorneys' full salaries. By capping judicial adjustments at $7,000, the judges in those same communities have an effective geographic cost of living adjustment of less than 5% of their salaries. Obviously, that does not fully offset the higher cost of living in those communities.

The severely limited cost of living adjustments are unfair to rural judges and they likely

discourage qualified candidates from applying for judicial openings in rural Alaska. The attached bill is intended to address these problems.

Thank you for your consideration of this request.

Doug Wooliver
Deputy Administrative Director
Alaska Court System

SB 172

<TARGET><BILL>SB 172</BILL><SUBJECT>SB 172</SUBJECT><COMM>SJUD27</COMM></TARGET>

Senator Fred Dyson

SPONSOR STATEMENT

SB 172 – An Act Relating to Health Care Decisions, Including Do Not Resuscitate Orders

The purpose of this bill is to provide for the protection of a patient's right to prevent a physician from issuing a Do Not Resuscitate (DNR) order on the patient without the expressed consent of that patient, or if the patient lacks capacity, without the expressed consent of the authorized agent of the patient, or, if no one is available or known to be authorized to speak for the patient and the patient lacks capacity, without the concurrence of a second physician.

In 2004 the Alaska Legislature drafted the current AS 13.52 *Health Care Decisions Act.* The Legislature included language in AS 13.52.120(a) establishing a *presumption in favor of life.* Legislative Legal states the language of the Health Care Decision Act, when read in its entirety, supports interpreting the chapter to allow a patient (or the patient's authorized representative) to prevent a physician from issuing a DNR order, but that ambiguities in the chapter could result in other interpretations.

This ambiguity in statute allows unnecessary emotional and mental anguish to Alaskan residents faced with critical end of life decisions. SB 172 clarifies the authority of DNR decisions with respect to patients and physicians, and amends the Alaska Health Care Directive form to allow patients to accept or refuse life-sustaining procedures.

Contact: Chuck Kopp, Staff to Senator Fred Dyson, (907)465-2199

SENATOR FRED DYSON

CSSB 172 - Section Analysis

Section 1. Amends AS 13.52.045 *Withholding or withdrawing of life-sustaining procedures.*
A Do-Not-Resuscitate (DNR) order does not prevent a health care institution or facility from providing life-sustaining procedures (i.e. assisted ventilation and intubation, blood transfusions, antibiotics, dialysis, artificial nutrition and hydration) to the patient.

Section 2. Amends AS 13.52.060(e) *Obligations of health care providers, institutions, and facilities.*
A health care provider may not decline to comply with a DNR order for reasons of conscience if the order is consistent with the provisions of AS 13.52; nor can a health care provider, health care institution or facility decline to comply with an individual instruction or a health care decision that requests that a do not resuscitate order be made ineffective, except as provided by AS 13.52.030(h).

Section 3. Amends AS 13.52.060(f) *Obligations of health care providers, institutions, and facilities.*
A health care provider, health care institution or facility may not decline to comply with an individual instruction or health care decision that requests that a do not resuscitate order be made ineffective, except as provided by AS 13.52.030(h).

Section 4. Amends AS 13.52.065(a) *Do not resuscitate protocol and identification requirements.*
A physician may issue a DNR order for a patient of the physician only as provided in this section.

Section 5. Amends AS 13.52.065(b) to state that the protocol adopted by DHSS for withholding of CPR by health care providers and institutions must comply with this section.

Section 6. Amends AS 13.52.065 by adding new subsections-
(g) a physician may not issue a DNR order without the express consent of the patient, if the patient has capacity and is 18 years or older; consent may also be provided by an advance health care directive or by a person authorized to make health care decisions for the patient.

(h) a physician may issue a DNR without the express consent required in (g) if patient does not have capacity, no one is authorized to make health care decisions for patient, and,

(1) patient has advance health care directive which indicates patient wants a DNR order; or,

(2) patient has advance health care directive which is silent about issuance of a DNR order and another physician concurs in the decision to issue a DNR order; or

(3) patient does not have an advance health care directive, and another physician concurs in the decision to issue a do not resuscitate order.

(i) a physician shall revoke a DNR order for a patient if
(1) DNR order violates (g) of this section;
(2) patient has capacity and requests DNR be revoked;
(3) patient does not have capacity, patient does not have advance health care directive that indicates patient wants a DNR order, and a person authorized to make health care decisions for the patient requests the revocation of the DNR order; or
(4) patient is under 18 years of age and parent or guardian of patient requests that the DNR order be revoked.

(j) a physician may revoke a DNR order issued by another physician for a patient, if the physician has a physician-patient relationship with the patient.

Section 7. Amends AS 13.52.080(a) *Immunities*
Amends AS 13.52.080(a) to replace a citation to a subsection that is repealed by this bill (AS 13.52.065(f) *Do not resuscitate protocol and identification requirements*).

Section 8. Amends AS 13.52.300 the *Optional form* used to create an advance health care directive. A new section, *Life-Sustaining Procedures*, is added under Part 2 – Instructions for Health Care, (6)End-of-Life Decisions, giving patients the opportunity to accept or decline life-sustaining procedures, or identify specific life-sustaining procedures they wish to receive.

Section 9. Amends AS 13.52.390(17) *Definitions*
The definition for "Health care decision" is expanded to include *a direction relating to the provision of cardiopulmonary resuscitation or other resuscitative measures;*

Section 10. Repeals AS 13.52.065(f), which currently addresses how DNR orders are made ineffective.

Section 11. Adds a provision to indicate how DNR orders made before the bill's effective date are to be treated in light of the bill.

SENATOR FRED DYSON

CSSB 172 (27-LS0991\D) – EXPLANATION OF CHANGES

The substantive changes in Committee Substitute for SB 172 as introduced on 01/20/12 are as follows:

1. Section 2, p. 2, line 3; and Section 3, p. 2, line 12 – INSERT - **except as provided in AS 13.52.030(h)** to clarify that health care providers may decline to comply with a decision of a surrogate who the health care provider observes is not abiding by the wishes, values and best interest of the patient.

2. Section 2, p. 2, lines 5 – 6, and Section 3, p. 2, lines 14 - 15 –
DELETE - [cardiopulmonary resuscitation or other resuscitative measures be provided];
INSERT - **a do not resuscitate order be made ineffective**.

   This reflects the narrow focus of the bill to protect patients from being subject to DNR orders against their consent, and is consistent with current statutory language in AS 13.52.065(f).

3. Section 3, p.2, line 13 - DELETE [advance health care directive] and INSERT **individual instruction**.

   This language change was the original draft intent of Legislative Legal, and is a correction to keep language internally consistent within AS 13.52.060, subsection (f), and with the purpose of the bill.

4. Section 6, p. 3, adds new subsection (h)(3) – when physicians may issue do not resuscitate orders without express consent of patient.

   This particular situation was not previously addressed.

5. Section 6, p. 3, lines 19 and 20 – DELETE [subsection (i)(3)].

   This change recognizes that in the case of a patient who does not have capacity, a dated advance health care directive may not reflect the current wishes, values and best interest of the patient.

6. Section 6, p. 3, lines 23 and 24 – DELETE [or does not oppose]

   This change removes ambiguity.

7. Section 6, p.3, lines 29 – 31, and p.4, lines 1 and 2 - DELETE [; or (2) health care obligation to the patient arising out of the physician's (A) individual relationship with the patient; or (B) employment by the health care institution or health care facility where the patient is being treated.]

   This language change keeps the relationship more narrowly defined to the physician-patient relationship. It provides less complication and is consistent with current chapter language in 13.52.065.

8. Section 8, p. 5, lines 11 - 14 - DELETE all amended language.

   Current statutory language in AS 13.52.080 *Immunities,* and AS 13.52.090 *Statutory Damages* adequately covers health care provider, health care institution and health care facility immunity and liability considerations.

9. Section 9, p. 5, line 16, 20 & 21- DELETE all amended language.

   See comment on #10 below.

10. Section 10, p. 5, lines 29 - 31 and p. 6, lines 1 - 3- DELETE all new subsection language.

    Section 13.52.120(b) already states that withholding or withdrawing of CPR or other life sustaining procedures must be *consistent with this chapter*, and statutory language in AS 13.52.080 *Immunities,* and AS 13.52.090 *Statutory Damages* adequately covers health care provider, health care institution and health care facility immunity and liability considerations.

11. Section 11, p.13, lines 2 - 11 – *Life-Sustaining Procedures.* In addition to the options of receiving or not receiving life-sustaining procedures, an additional option is provided to allow for a patient to select specific life-sustaining procedures so that this is not an "all or none" proposition when electing to receive or not receive life-sustaining procedures.

CS FOR SENATE BILL NO. 172( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS DYSON, Davis, Coghill, McGuire, Olson

A BILL

FOR AN ACT ENTITLED

"An Act relating to health care decisions, including do not resuscitate orders."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 13.52.045 is amended by adding a new subsection to read:

(b) A health care institution or health care facility may not interpret the issuance of a do not resuscitate order for a patient as preventing the health care institution or health care facility from providing life-sustaining procedures to the patient.

*** Sec. 2.** AS 13.52.060(e) is amended to read:

(e) A health care provider may decline to comply with an individual instruction or a health care decision for reasons of conscience, except **that a health care provider may not decline to comply with** [FOR] a do not resuscitate order **that is consistent with this chapter for reasons of conscience**. A health care institution or health care facility may decline to comply with an individual instruction or health care decision if the instruction or decision is contrary to a policy of the institution or facility that is expressly based on reasons of conscience and if the policy was timely

communicated to the patient or to a person then authorized to make health care decisions for the patient. **Notwithstanding the other provisions of this subsection, this subsection does not, except as provided by AS 13.52.030(h), allow a health care provider, health care institution, or health care facility to decline to comply with an individual instruction or a health care decision that requests that a do not resuscitate order be made ineffective.**

*** Sec. 3.** AS 13.52.060(f) is amended to read:

(f) A health care provider, health care institution, or health care facility may decline to comply with an individual instruction or a health care decision that requires medically ineffective health care or health care contrary to generally accepted health care standards applicable to the provider, institution, or facility. **Notwithstanding the other provisions of this subsection, this subsection does not, except as provided by AS 13.52.030(h), allow a health care provider, health care institution, or health care facility to decline to comply with an individual instruction or a health care decision that a requests that do not resuscitate order be made ineffective.** In this subsection, "medically ineffective health care" means health care that according to reasonable medical judgment cannot cure the patient's illness, cannot diminish its progressive course, and cannot effectively alleviate severe discomfort and distress.

*** Sec. 4.** AS 13.52.065(a) is amended to read:

(a) A physician may issue a do not resuscitate order for a patient of the physician **only as provided in this section**. The physician shall document the grounds for the order in the patient's medical file.

*** Sec. 5.** AS 13.52.065(b) is amended to read:

(b) The department shall by regulation adopt a protocol, subject to the approval of the State Medical Board, for do not resuscitate orders that sets out a standardized method of procedure for the withholding of cardiopulmonary resuscitation by health care providers and health care institutions. **The protocol adopted by the department must comply with this section.**

*** Sec. 6.** AS 13.52.065 is amended by adding new subsections to read:

(g) Except as provided in (h) of this section, a physician may not issue a do not resuscitate order for a patient of the physician without the express consent of

(1) the patient, if the patient has capacity and is 18 years of age or older; under this paragraph, the consent may be provided by an advance health care directive; or

(2) a person authorized to make health care decisions for the patient.

(h) A physician may issue a do not resuscitate order for a patient of the physician without the express consent required by (g) of this section if the patient does not have capacity, no person is authorized to make health care decisions for the patient, and,

(1) if the patient has an advance health care directive, the directive indicates that the patient wants a do not resuscitate order;

(2) if the patient has an advance health care directive, the directive is silent about the issuance of a do not resuscitate order and another physician concurs in the decision to issue a do not resuscitate order; or

(3) if the patient does not have an advance health care directive, another physician concurs in the decision to issue a do not resuscitate order.

(i) A physician shall revoke a do not resuscitate order issued for a patient if

(1) the issuance of the do not resuscitate order violates (g) of this section;

(2) except as provided in (4) of this subsection, the patient has capacity and requests that the do not resuscitate order be revoked;

(3) the patient does not have capacity, the patient does not have an advance health care directive that indicates that the patient wants a do not resuscitate order, and a person authorized to make health care decisions for the patient requests the revocation of the do not resuscitate order; or

(4) the patient is under 18 years of age and the parent or guardian of the patient requests that the do not resuscitate order be revoked.

(j) A physician may revoke a do not resuscitate order issued by another physician for a patient, if the physician has a physician-patient relationship with the patient.

* **Sec. 7.** AS 13.52.080(a) is amended to read:

(a) A health care provider or health care institution that acts in good faith and

in accordance with generally accepted health care standards applicable to the health care provider or institution is not subject to civil or criminal liability or to discipline for unprofessional conduct for

(1) providing health care information in good faith under AS 13.52.070;

(2) complying with a health care decision of a person based on a good faith belief that the person has authority to make a health care decision for a patient, including a decision to withhold or withdraw health care;

(3) declining to comply with a health care decision of a person based on a good faith belief that the person then lacked authority;

(4) complying with an advance health care directive and assuming in good faith that the directive was valid when made and has not been revoked or terminated;

(5) participating in the withholding or withdrawal of cardiopulmonary resuscitation under the direction or with the authorization of a physician or upon discovery of do not resuscitate identification upon an individual;

(6) causing or participating in providing cardiopulmonary resuscitation or other life-sustaining procedures

(A) under AS 13.52.065(e) when an individual has made an anatomical gift;

(B) because an individual has made a do not resuscitate order ineffective under **AS 13.52.065** [AS 13.52.065(f)] or another provision of this chapter; or

(C) because the patient is a woman of childbearing age and AS 13.52.055 applies; or

(7) acting in good faith under the terms of this chapter or the law of another state relating to anatomical gifts.

*** Sec. 8.** AS 13.52.300 is amended to read:

Sec. 13.52.300. Optional form. The following sample form may be used to create an advance health care directive. The other sections of this chapter govern the effect of this or any other writing used to create an advance health care directive. This

form may be duplicated. This form may be modified to suit the needs of the person, or a different form that complies with this chapter may be used, including the mandatory witnessing requirements:

ADVANCE HEALTH CARE DIRECTIVE

Explanation

You have the right to give instructions about your own health care to the extent allowed by law. You also have the right to name someone else to make health care decisions for you to the extent allowed by law. This form lets you do either or both of these things. It also lets you express your wishes regarding the designation of your health care provider. If you use this form, you may complete or modify all or any part of it. You are free to use a different form if the form complies with the requirements of AS 13.52.

Part 1 of this form is a durable power of attorney for health care. A "durable power of attorney for health care" means the designation of an agent to make health care decisions for you. Part 1 lets you name another individual as an agent to make health care decisions for you if you do not have the capacity to make your own decisions or if you want someone else to make those decisions for you now even though you still have the capacity to make those decisions. You may name an alternate agent to act for you if your first choice is not willing, able, or reasonably available to make decisions for you. Unless related to you, your agent may not be an owner, operator, or employee of a health care institution where you are receiving care.

Unless the form you sign limits the authority of your agent, your agent may make all health care decisions for you that you could legally make for yourself. This form has a place for you to limit the authority of your agent. You do not have to limit the authority of your agent if you wish to rely on your agent for all health care decisions that may have to be made. If you choose not to limit the authority of your agent, your agent will have the right, to the extent allowed by law, to

(a) consent or refuse consent to any care, treatment, service, or procedure to maintain, diagnose, or otherwise affect a physical or mental condition, including the administration or discontinuation of psychotropic medication;

(b) select or discharge health care providers and institutions;

(c) approve or disapprove proposed diagnostic tests, surgical procedures, and programs of medication;

(d) direct the provision, withholding, or withdrawal of artificial nutrition and hydration and all other forms of health care; and

(e) make an anatomical gift following your death.

Part 2 of this form lets you give specific instructions for any aspect of your health care to the extent allowed by law, except you may not authorize mercy killing, assisted suicide, or euthanasia. Choices are provided for you to express your wishes regarding the provision, withholding, or withdrawal of treatment to keep you alive, including the provision of artificial nutrition and hydration, as well as the provision of pain relief medication. Space is provided for you to add to the choices you have made or for you to write out any additional wishes.

Part 3 of this form lets you express an intention to make an anatomical gift following your death.

Part 4 of this form lets you make decisions in advance about certain types of mental health treatment.

Part 5 of this form lets you designate a physician to have primary responsibility for your health care.

After completing this form, sign and date the form at the end and have the form witnessed by one of the two alternative methods listed below. Give a copy of the signed and completed form to your physician, to any other health care providers you may have, to any health care institution at which you are receiving care, and to any health care agents you have named. You should talk to the person you have

named as your agent to make sure that the person understands your wishes and is willing to take the responsibility.

You have the right to revoke this advance health care directive or replace this form at any time, except that you may not revoke this declaration when you are determined not to be competent by a court, by two physicians, at least one of whom shall be a psychiatrist, or by both a physician and a professional mental health clinician. In this advance health care directive, "competent" means that you have the capacity

(1) to assimilate relevant facts and to appreciate and understand your situation with regard to those facts; and

(2) to participate in treatment decisions by means of a rational thought process.

PART 1

DURABLE POWER OF ATTORNEY FOR
HEALTH CARE DECISIONS

(1) DESIGNATION OF AGENT. I designate the following individual as my agent to make health care decisions for me:

_____

(name of individual you choose as agent)

_____

(address) (city) (state) (zip code)

_____

(home telephone) (work telephone)

OPTIONAL: If I revoke my agent's authority or if my agent is not willing, able, or reasonably available to make a health care decision for me, I designate as my first alternate agent

_____

(name of individual you choose as first alternate agent)

_____

(address) (city) (state) (zip code)

_____

(home telephone) (work telephone)

OPTIONAL: If I revoke the authority of my agent and first alternate agent or if neither is willing, able, or reasonably available to make a health care decision for me, I designate as my second alternate agent

_____

(name of individual you choose as second alternate agent)

_____

(address) (city) (state) (zip code)

_____

(home telephone) (work telephone)

(2) AGENT'S AUTHORITY. My agent is authorized and directed to follow my individual instructions and my other wishes to the extent known to the agent in making all health care decisions for me. If these are not known, my agent is authorized to make these decisions in accordance with my best interest, including decisions to provide, withhold, or withdraw artificial hydration and nutrition and other forms of health care to keep me alive, except as I state here:

_____

_____

_____

(Add additional sheets if needed.)

Under this authority, "best interest" means that the benefits to you resulting from a treatment outweigh the burdens to you resulting from that treatment after assessing

(A) the effect of the treatment on your physical, emotional, and cognitive functions;

(B) the degree of physical pain or discomfort caused to you by the treatment or the withholding or withdrawal of the treatment;

(C) the degree to which your medical condition, the treatment, or the withholding or withdrawal of treatment, results in a severe and continuing impairment;

(D) the effect of the treatment on your life expectancy;

(E) your prognosis for recovery, with and without the treatment;

(F) the risks, side effects, and benefits of the treatment or the withholding of treatment; and

(G) your religious beliefs and basic values, to the extent that these may assist in determining benefits and burdens.

(3) WHEN AGENT'S AUTHORITY BECOMES EFFECTIVE. Except in the case of mental illness, my agent's authority becomes effective when my primary physician determines that I am unable to make my own health care decisions unless I mark the following box. In the case of mental illness, unless I mark the following box, my agent's authority becomes effective when a court determines I am unable to make my own decisions, or, in an emergency, if my primary physician or another health care provider determines I am unable to make my own decisions. If I mark this box, my agent's authority to make health care decisions for me takes effect immediately.

(4) AGENT'S OBLIGATION. My agent shall make health care decisions for me in accordance with this durable power of attorney for health care, any instructions I give in Part 2 of this form, and my other wishes to the extent known to my agent. To the extent my wishes are unknown, my agent shall make health care decisions for me in accordance with what my agent determines to be in my best interest. In determining my best interest, my agent shall consider my personal values to the extent known to my agent.

(5) NOMINATION OF GUARDIAN. If a guardian of my person needs to be appointed for me by a court, I nominate the agent designated in this form. If that agent is not willing, able, or reasonably available to act as guardian, I nominate the alternate agents whom I have named under (1) above, in the order designated.

PART 2

INSTRUCTIONS FOR HEALTH CARE

If you are satisfied to allow your agent to determine what is best for you in making health care decisions, you do not need to fill out this part of the form. If you do fill out this part of the form, you may strike any wording you do not want. There is a state protocol that governs the use of do not resuscitate orders by physicians and other health care providers. You may obtain a copy of the protocol from the Alaska Department of Health and Social Services. A "do not resuscitate order" means a directive from a licensed physician that emergency cardiopulmonary resuscitation should not be administered to you.

(6) END-OF-LIFE DECISIONS. Except to the extent prohibited by law, I direct that my health care providers and others involved in my care provide, withhold, or withdraw treatment in accordance with the choice I have marked below: (Check only one box.)

(A) [ ] Choice To Prolong Life

I want my life to be prolonged as long as possible within the limits of generally accepted health care standards; OR

(B) [ ] Choice Not To Prolong Life

I want comfort care only and I do not want my life to be prolonged with medical treatment if, in the judgment of my physician,

I have (check all choices that represent your wishes)

[ ] (i) a condition of permanent unconsciousness: a condition that, to a high degree of medical certainty, will last permanently without improvement; in which, to a high degree of medical certainty, thought, sensation, purposeful action, social interaction, and awareness of myself and the environment are absent; and for which, to a high degree of medical certainty, initiating or continuing life-sustaining procedures for me, in light of my medical outcome, will provide only minimal medical benefit for me; or

[ ] (ii) a terminal condition: an incurable or irreversible illness or injury that without the administration of life-sustaining procedures will result in my death in a short period of time, for which there is no

reasonable prospect of cure or recovery, that imposes severe pain or otherwise imposes an inhumane burden on me, and for which, in light of my medical condition, initiating or continuing life-sustaining procedures will provide only minimal medical benefit;

[ ] Additional instructions:_____

_____

(C) Artificial Nutrition and Hydration. If I am unable to safely take nutrition, fluids, or nutrition and fluids (check your choices or write your instructions),

[ ] I wish to receive artificial nutrition and hydration indefinitely;

[ ] I wish to receive artificial nutrition and hydration indefinitely, unless it clearly increases my suffering and is no longer in my best interest;

[ ] I wish to receive artificial nutrition and hydration on a limited trial basis to see if I can improve;

[ ] In accordance with my choices in (6)(B) above, I do not wish to receive artificial nutrition and hydration.

[ ] Other instructions: _____

_____

(D) Relief from Pain.

[ ] I direct that adequate treatment be provided at all times for the sole purpose of the alleviation of pain or discomfort; or

[ ] I give these instructions:

_____

_____

(E) **Life-Sustaining Procedures. "Life-sustaining procedures" means any medical treatment, procedure, or intervention that may keep you alive but will not remove your terminal condition or remove permanent unconsciousness; "life-sustaining procedures" includes assisted ventilation, renal dialysis, surgical procedures, blood transfusions, and the administration of drugs, including**

antibiotics, or artificial nutrition and hydration.

[ ] I wish to receive all life-sustaining procedures.

[ ] I do not wish to receive any life-sustaining procedures.

[ ] I wish to receive the following life-sustaining procedures:

_____

_____

_____

_____

(F) Should I become unconscious and I am pregnant, I direct that

_____

_____

(7) OTHER WISHES. (If you do not agree with any of the optional choices above and wish to write your own, or if you wish to add to the instructions you have given above, you may do so here.) I direct that

_____

_____

Conditions or limitations: _____

_____.

(Add additional sheets if needed.)

PART 3

ANATOMICAL GIFT AT DEATH

(OPTIONAL)

If you are satisfied to allow your agent to determine whether to make an anatomical gift at your death, you do not need to fill out this part of the form.

(8) Upon my death: (mark applicable box)

(A) [ ] I give any needed organs, tissues, or other body parts, OR

(B) [ ] I give the following organs, tissues, or other body parts only

_____

_____

(C) [ ] My gift is for the following purposes (mark any of the

following you want):

[ ] (i) transplant;

[ ] (ii) therapy;

[ ] (iii) research;

[ ] (iv) education.

(D) [ ] I refuse to make an anatomical gift.

PART 4

MENTAL HEALTH TREATMENT

This part of the declaration allows you to make decisions in advance about mental health treatment. The instructions that you include in this declaration will be followed only if a court, two physicians that include a psychiatrist, or a physician and a professional mental health clinician believe that you are not competent and cannot make treatment decisions. Otherwise, you will be considered to be competent and to have the capacity to give or withhold consent for the treatments.

If you are satisfied to allow your agent to determine what is best for you in making these mental health decisions, you do not need to fill out this part of the form. If you do fill out this part of the form, you may strike any wording you do not want.

(9) PSYCHOTROPIC MEDICATIONS. If I do not have the capacity to give or withhold informed consent for mental health treatment, my wishes regarding psychotropic medications are as follows:

_____ I consent to the administration of the following medications:

_____ I do not consent to the administration of the following medications:

Conditions or limitations: _____

_____.

(10) ELECTROCONVULSIVE TREATMENT. If I do not have the capacity to give or withhold informed consent for mental health

treatment, my wishes regarding electroconvulsive treatment are as follows:

_____ I consent to the administration of electroconvulsive treatment.

_____ I do not consent to the administration of electroconvulsive treatment.

Conditions or limitations: _____

_____.

(11) ADMISSION TO AND RETENTION IN FACILITY. If I do not have the capacity to give or withhold informed consent for mental health treatment, my wishes regarding admission to and retention in a mental health facility for mental health treatment are as follows:

_____ I consent to being admitted to a mental health facility for mental health treatment for up to _____ days. (The number of days not to exceed 17.)

_____ I do not consent to being admitted to a mental health facility for mental health treatment.

Conditions or limitations: _____

_____.

OTHER WISHES OR INSTRUCTIONS

_____

_____

_____

Conditions or limitations: _____

_____.

PART 5

PRIMARY PHYSICIAN

(OPTIONAL)

(12) I designate the following physician as my primary physician:

_____

(name of physician)

_____

(address) (city) (state) (zip code)

_____

(telephone)

OPTIONAL: If the physician I have designated above is not willing, able, or reasonably available to act as my primary physician, I designate the following physician as my primary physician:

_____

(name of physician)

_____

(address) (city) (state) (zip code)

_____

(telephone)

(13) EFFECT OF COPY. A copy of this form has the same effect as the original.

(14) SIGNATURES. Sign and date the form here:

_____

(date) (sign your name)

_____

(print your name)

_____

(address) (city) (state) (zip code)

(15) WITNESSES. This advance care health directive will not be valid for making health care decisions unless it is

(A) signed by two qualified adult witnesses who are personally known to you and who are present when you sign or acknowledge your signature; the witnesses may not be a health care provider employed at the health care institution or health care facility where you are receiving health care, an employee of the health care provider who is providing health care to you, an employee of the health care institution or health

care facility where you are receiving health care, or the person appointed as your agent by this document; at least one of the two witnesses may not be related to you by blood, marriage, or adoption or entitled to a portion of your estate upon your death under your will or codicil; or

(B) acknowledged before a notary public in the state.

ALTERNATIVE NO. 1

Witness Who is Not Related to or a Devisee of the Principal

I swear under penalty of perjury under AS 11.56.200 that the principal is personally known to me, that the principal signed or acknowledged this durable power of attorney for health care in my presence, that the principal appears to be of sound mind and under no duress, fraud, or undue influence, and that I am not

(1) a health care provider employed at the health care institution or health care facility where the principal is receiving health care;

(2) an employee of the health care provider providing health care to the principal;

(3) an employee of the health care institution or health care facility where the principal is receiving health care;

(4) the person appointed as agent by this document;

(5) related to the principal by blood, marriage, or adoption; or

(6) entitled to a portion of the principal's estate upon the principal's death under a will or codicil.

_____

(date) (signature of witness)

_____

(printed name of witness)

_____

(address) (city) (state) (zip code)

Witness Who May be Related to or a Devisee of the Principal

I swear under penalty of perjury under AS 11.56.200 that the

principal is personally known to me, that the principal signed or acknowledged this durable power of attorney for health care in my presence, that the principal appears to be of sound mind and under no duress, fraud, or undue influence, and that I am not

(1) a health care provider employed at the health care institution or health care facility where the principal is receiving health care;

(2) an employee of the health care provider who is providing health care to the principal;

(3) an employee of the health care institution or health care facility where the principal is receiving health care; or

(4) the person appointed as agent by this document.

State of Alaska

_____ Judicial District

On this _____ day of _____, in the year _____, before me, _____ (insert name of notary public) appeared _____, personally known to me (or proved to me on the basis of satisfactory evidence) to be the person whose name is subscribed to this instrument, and acknowledged that the person executed it.

Notary Seal

_____

(signature of notary public)

*** Sec. 9.** AS 13.52.390(17) is amended to read:

(17) "health care decision" means a decision made by an individual or

the individual's agent, guardian, or surrogate regarding the individual's health care, including

(A) selection and discharge of health care providers and institutions;

(B) approval or disapproval of proposed diagnostic tests, surgical procedures, and programs of medication;

(C) direction to provide, withhold, or withdraw artificial nutrition and hydration if providing, withholding, or withdrawing artificial nutrition, artificial hydration, or artificial nutrition and hydration is in accord with generally accepted health care standards applicable to health care providers or institutions;

(D) the administration or withdrawal of psychotropic medications, the use of electroconvulsive treatment, and the admission to a mental health facility; [AND]

(E) making an anatomical gift at death; **and**

(F) a direction relating to the provision of cardiopulmonary resuscitation or other resuscitative measures;

*** Sec. 10.** AS 13.52.065(f) is repealed.

*** Sec. 11.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONTINUING EFFECT OF DO NOT RESUSCITATE ORDERS. A do not resuscitate order made under AS 13.52 before the effective date of this Act continues in effect under AS 13.52, unless the do not resuscitate order is revoked under AS 13.52.065(i) or (j), added by sec. 6 of this Act, or made ineffective under another provision of AS 13.52, as amended by this Act.

SENATE BILL NO. 172

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY SENATORS DYSON, Davis, Coghill, McGuire, Olson

Introduced: 1/20/12
Referred:

A BILL

FOR AN ACT ENTITLED

"An Act relating to health care decisions, including do not resuscitate orders."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 13.52.045 is amended by adding a new subsection to read:

(b) A health care institution or health care facility may not interpret the issuance of a do not resuscitate order for a patient as preventing the health care institution or health care facility from providing life-sustaining procedures to the patient.

*** Sec. 2.** AS 13.52.060(e) is amended to read:

(e) A health care provider may decline to comply with an individual instruction or a health care decision for reasons of conscience, except **that a health care provider may not decline to comply with** [FOR] a do not resuscitate order **that is consistent with this chapter for reasons of conscience**. A health care institution or health care facility may decline to comply with an individual instruction or health care decision if the instruction or decision is contrary to a policy of the institution or facility that is expressly based on reasons of conscience and if the policy was timely

communicated to the patient or to a person then authorized to make health care decisions for the patient. **Notwithstanding the other provisions of this subsection, this subsection does not allow a health care provider, health care institution, or health care facility to decline to comply with an individual instruction or a health care decision that requests that cardiopulmonary resuscitation or other resuscitative measures be provided.**

*** Sec. 3.** AS 13.52.060(f) is amended to read:

(f) A health care provider, health care institution, or health care facility may decline to comply with an individual instruction or a health care decision that requires medically ineffective health care or health care contrary to generally accepted health care standards applicable to the provider, institution, or facility**, except that this subsection does not allow a health care provider, health care institution, or health care facility to decline to comply with an advance health care directive or a health care decision that requests that cardiopulmonary resuscitation or other resuscitative measures be provided**. In this subsection, "medically ineffective health care" means health care that according to reasonable medical judgment cannot cure the patient's illness, cannot diminish its progressive course, and cannot effectively alleviate severe discomfort and distress.

*** Sec. 4.** AS 13.52.065(a) is amended to read:

(a) A physician may issue a do not resuscitate order for a patient of the physician **only as provided in this section**. The physician shall document the grounds for the order in the patient's medical file.

*** Sec. 5.** AS 13.52.065(b) is amended to read:

(b) The department shall by regulation adopt a protocol, subject to the approval of the State Medical Board, for do not resuscitate orders that sets out a standardized method of procedure for the withholding of cardiopulmonary resuscitation by health care providers and health care institutions. **The protocol adopted by the department must comply with this section.**

*** Sec. 6.** AS 13.52.065 is amended by adding new subsections to read:

(g) Except as provided in (h) of this section, a physician may not issue a do not resuscitate order for a patient of the physician without the express consent of

(1) the patient, if the patient has capacity and is 18 years of age or older; under this paragraph, the consent may be provided by an advance health care directive; or

(2) a person authorized to make health care decisions for the patient.

(h) A physician may issue a do not resuscitate order for a patient of the physician without the express consent required by (g) of this section if the patient does not have capacity, no person is authorized to make health care decisions for the patient, and,

(1) if the patient has an advance health care directive, the directive indicates that the patient wants a do not resuscitate order; or

(2) if the patient has an advance health care directive, the directive is silent about the issuance of a do not resuscitate order and another physician concurs in the decision to issue a do not resuscitate order.

(i) A physician shall revoke a do not resuscitate order issued for a patient if

(1) the issuance of the do not resuscitate order violates (g) of this section;

(2) except as provided in (5) of this subsection, the patient has capacity and requests that the do not resuscitate order be revoked;

(3) the patient has an advance health care directive that indicates that the patient does not want a do not resuscitate order;

(4) the patient does not have capacity, the patient does not have an advance health care directive that indicates that the patient wants a do not resuscitate order, and a person authorized to make health care decisions for the patient requests or does not oppose the revocation of the do not resuscitate order; or

(5) the patient is under 18 years of age and the parent or guardian of the patient requests that the do not resuscitate order be revoked.

(j) A physician may revoke a do not resuscitate order issued by another physician for a patient, if the physician has a

(1) physician-patient relationship with the patient; or

(2) health care obligation to the patient arising out of the physician's

(A) individual relationship with the patient; or

(B) employment by the health care institution or health care facility where the patient is being treated.

* **Sec. 7.** AS 13.52.080(a) is amended to read:

(a) A health care provider or health care institution that acts in good faith and in accordance with generally accepted health care standards applicable to the health care provider or institution is not subject to civil or criminal liability or to discipline for unprofessional conduct for

(1) providing health care information in good faith under AS 13.52.070;

(2) complying with a health care decision of a person based on a good faith belief that the person has authority to make a health care decision for a patient, including a decision to withhold or withdraw health care;

(3) declining to comply with a health care decision of a person based on a good faith belief that the person then lacked authority;

(4) complying with an advance health care directive and assuming in good faith that the directive was valid when made and has not been revoked or terminated;

(5) participating in the withholding or withdrawal of cardiopulmonary resuscitation under the direction or with the authorization of a physician or upon discovery of do not resuscitate identification upon an individual;

(6) causing or participating in providing cardiopulmonary resuscitation or other life-sustaining procedures

(A) under AS 13.52.065(e) when an individual has made an anatomical gift;

(B) because an individual has made a do not resuscitate order ineffective under **AS 13.52.065** [AS 13.52.065(f)] or another provision of this chapter; or

(C) because the patient is a woman of childbearing age and AS 13.52.055 applies; or

(7) acting in good faith under the terms of this chapter or the law of another state relating to anatomical gifts.

* **Sec. 8.** AS 13.52.080(c) is amended to read:

(c) A health care provider, health care institution, or health care facility is not subject to civil or criminal liability, or to discipline for unprofessional conduct, if a do not resuscitate order prevents the health care provider, health care institution, or health care facility from attempting to resuscitate a patient who requires cardiopulmonary resuscitation or other resuscitative measures because of complications arising out of health care being administered to the patient by the health care provider, health care institution, or health care facility. This subsection does not apply if

(1) the complications suffered by the patient are caused by gross negligence or reckless or intentional actions on the part of the health care provider, health care institution, or health care facility**; or**

(2) the do not resuscitate order relied on by the health care provider, health care institution, or health care facility was issued in violation of AS 13.52.065.

* **Sec. 9.** AS 13.52.120(b) is amended to read:

(b) Notwithstanding any other provision of law **except (h) of this section**, death resulting from the withholding or withdrawal of cardiopulmonary resuscitation or other life-sustaining procedures does not, for any purpose, constitute a suicide or homicide if the withholding or withdrawal is

(1) consistent with this chapter**, except that a violation of AS 13.52.065(g) - (i), does not, for any purpose, constitute a homicide**; and

(2) from an individual

(A) for whom a do not resuscitate order has not been issued;

(B) for whom a do not resuscitate order has been issued under

(i) the protocol for do not resuscitate orders established under AS 13.52.065; or

(ii) a do not resuscitate identification found on the individual.

* **Sec. 10.** AS 13.52.120 is amended by adding a new subsection to read:

(h) The provisions of (b) of this section do not apply to a person who orders or causes the withholding or withdrawal of cardiopulmonary resuscitation or other life-

sustaining procedures if the person acts intentionally, recklessly, with criminal negligence, or with gross negligence. In this subsection, "intentionally," "recklessly," and "criminal negligence" have the meanings given in AS 11.81.900.

*** Sec. 11.** AS 13.52.300 is amended to read:

Sec. 13.52.300. Optional form. The following sample form may be used to create an advance health care directive. The other sections of this chapter govern the effect of this or any other writing used to create an advance health care directive. This form may be duplicated. This form may be modified to suit the needs of the person, or a different form that complies with this chapter may be used, including the mandatory witnessing requirements:

ADVANCE HEALTH CARE DIRECTIVE

Explanation

You have the right to give instructions about your own health care to the extent allowed by law. You also have the right to name someone else to make health care decisions for you to the extent allowed by law. This form lets you do either or both of these things. It also lets you express your wishes regarding the designation of your health care provider. If you use this form, you may complete or modify all or any part of it. You are free to use a different form if the form complies with the requirements of AS 13.52.

Part 1 of this form is a durable power of attorney for health care. A "durable power of attorney for health care" means the designation of an agent to make health care decisions for you. Part 1 lets you name another individual as an agent to make health care decisions for you if you do not have the capacity to make your own decisions or if you want someone else to make those decisions for you now even though you still have the capacity to make those decisions. You may name an alternate agent to act for you if your first choice is not willing, able, or reasonably available to make decisions for you. Unless related to you, your agent may not be an owner, operator, or employee of a health care institution where you are receiving care.

Unless the form you sign limits the authority of your agent, your agent may make all health care decisions for you that you could legally make for yourself. This form has a place for you to limit the authority of your agent. You do not have to limit the authority of your agent if you wish to rely on your agent for all health care decisions that may have to be made. If you choose not to limit the authority of your agent, your agent will have the right, to the extent allowed by law, to

(a) consent or refuse consent to any care, treatment, service, or procedure to maintain, diagnose, or otherwise affect a physical or mental condition, including the administration or discontinuation of psychotropic medication;

(b) select or discharge health care providers and institutions;

(c) approve or disapprove proposed diagnostic tests, surgical procedures, and programs of medication;

(d) direct the provision, withholding, or withdrawal of artificial nutrition and hydration and all other forms of health care; and

(e) make an anatomical gift following your death.

Part 2 of this form lets you give specific instructions for any aspect of your health care to the extent allowed by law, except you may not authorize mercy killing, assisted suicide, or euthanasia. Choices are provided for you to express your wishes regarding the provision, withholding, or withdrawal of treatment to keep you alive, including the provision of artificial nutrition and hydration, as well as the provision of pain relief medication. Space is provided for you to add to the choices you have made or for you to write out any additional wishes.

Part 3 of this form lets you express an intention to make an anatomical gift following your death.

Part 4 of this form lets you make decisions in advance about certain types of mental health treatment.

Part 5 of this form lets you designate a physician to have primary

responsibility for your health care.

After completing this form, sign and date the form at the end and have the form witnessed by one of the two alternative methods listed below. Give a copy of the signed and completed form to your physician, to any other health care providers you may have, to any health care institution at which you are receiving care, and to any health care agents you have named. You should talk to the person you have named as your agent to make sure that the person understands your wishes and is willing to take the responsibility.

You have the right to revoke this advance health care directive or replace this form at any time, except that you may not revoke this declaration when you are determined not to be competent by a court, by two physicians, at least one of whom shall be a psychiatrist, or by both a physician and a professional mental health clinician. In this advance health care directive, "competent" means that you have the capacity

(1) to assimilate relevant facts and to appreciate and understand your situation with regard to those facts; and

(2) to participate in treatment decisions by means of a rational thought process.

PART 1

DURABLE POWER OF ATTORNEY FOR
HEALTH CARE DECISIONS

(1) DESIGNATION OF AGENT. I designate the following individual as my agent to make health care decisions for me:

_____

(name of individual you choose as agent)

_____

(address) (city) (state) (zip code)

_____

(home telephone) (work telephone)

OPTIONAL: If I revoke my agent's authority or if my agent is not

willing, able, or reasonably available to make a health care decision for me, I designate as my first alternate agent

_____

(name of individual you choose as first alternate agent)

_____

(address) (city) (state) (zip code)

_____

(home telephone) (work telephone)

OPTIONAL: If I revoke the authority of my agent and first alternate agent or if neither is willing, able, or reasonably available to make a health care decision for me, I designate as my second alternate agent

_____

(name of individual you choose as second alternate agent)

_____

(address) (city) (state) (zip code)

_____

(home telephone) (work telephone)

(2) AGENT'S AUTHORITY. My agent is authorized and directed to follow my individual instructions and my other wishes to the extent known to the agent in making all health care decisions for me. If these are not known, my agent is authorized to make these decisions in accordance with my best interest, including decisions to provide, withhold, or withdraw artificial hydration and nutrition and other forms of health care to keep me alive, except as I state here:

_____

_____

_____

(Add additional sheets if needed.)

Under this authority, "best interest" means that the benefits to you resulting from a treatment outweigh the burdens to you resulting from that treatment after assessing

(A) the effect of the treatment on your physical, emotional, and cognitive functions;

(B) the degree of physical pain or discomfort caused to you by the treatment or the withholding or withdrawal of the treatment;

(C) the degree to which your medical condition, the treatment, or the withholding or withdrawal of treatment, results in a severe and continuing impairment;

(D) the effect of the treatment on your life expectancy;

(E) your prognosis for recovery, with and without the treatment;

(F) the risks, side effects, and benefits of the treatment or the withholding of treatment; and

(G) your religious beliefs and basic values, to the extent that these may assist in determining benefits and burdens.

(3) WHEN AGENT'S AUTHORITY BECOMES EFFECTIVE. Except in the case of mental illness, my agent's authority becomes effective when my primary physician determines that I am unable to make my own health care decisions unless I mark the following box. In the case of mental illness, unless I mark the following box, my agent's authority becomes effective when a court determines I am unable to make my own decisions, or, in an emergency, if my primary physician or another health care provider determines I am unable to make my own decisions. If I mark this box, my agent's authority to make health care decisions for me takes effect immediately.

(4) AGENT'S OBLIGATION. My agent shall make health care decisions for me in accordance with this durable power of attorney for health care, any instructions I give in Part 2 of this form, and my other wishes to the extent known to my agent. To the extent my wishes are unknown, my agent shall make health care decisions for me in accordance with what my agent determines to be in my best interest. In determining my best interest, my agent shall consider my personal values to the extent known to my agent.

(5) NOMINATION OF GUARDIAN. If a guardian of my person needs to be appointed for me by a court, I nominate the agent designated in this form. If that agent is not willing, able, or reasonably available to act as guardian, I nominate the alternate agents whom I have named under (1) above, in the order designated.

PART 2

INSTRUCTIONS FOR HEALTH CARE

If you are satisfied to allow your agent to determine what is best for you in making health care decisions, you do not need to fill out this part of the form. If you do fill out this part of the form, you may strike any wording you do not want. There is a state protocol that governs the use of do not resuscitate orders by physicians and other health care providers. You may obtain a copy of the protocol from the Alaska Department of Health and Social Services. A "do not resuscitate order" means a directive from a licensed physician that emergency cardiopulmonary resuscitation should not be administered to you.

(6) END-OF-LIFE DECISIONS. Except to the extent prohibited by law, I direct that my health care providers and others involved in my care provide, withhold, or withdraw treatment in accordance with the choice I have marked below: (Check only one box.)

(A) [ ] Choice To Prolong Life

I want my life to be prolonged as long as possible within the limits of generally accepted health care standards; OR

(B) [ ] Choice Not To Prolong Life

I want comfort care only and I do not want my life to be prolonged with medical treatment if, in the judgment of my physician,

I have (check all choices that represent your wishes)

[ ] (i) a condition of permanent unconsciousness: a condition that, to a high degree of medical certainty, will last permanently without improvement; in which, to a high degree of medical certainty, thought, sensation, purposeful action, social interaction, and awareness of

myself and the environment are absent; and for which, to a high degree of medical certainty, initiating or continuing life-sustaining procedures for me, in light of my medical outcome, will provide only minimal medical benefit for me; or

[ ] (ii) a terminal condition: an incurable or irreversible illness or injury that without the administration of life-sustaining procedures will result in my death in a short period of time, for which there is no reasonable prospect of cure or recovery, that imposes severe pain or otherwise imposes an inhumane burden on me, and for which, in light of my medical condition, initiating or continuing life-sustaining procedures will provide only minimal medical benefit;

[ ] Additional instructions:_____

_____

(C) Artificial Nutrition and Hydration. If I am unable to safely take nutrition, fluids, or nutrition and fluids (check your choices or write your instructions),

[ ] I wish to receive artificial nutrition and hydration indefinitely;

[ ] I wish to receive artificial nutrition and hydration indefinitely, unless it clearly increases my suffering and is no longer in my best interest;

[ ] I wish to receive artificial nutrition and hydration on a limited trial basis to see if I can improve;

[ ] In accordance with my choices in (6)(B) above, I do not wish to receive artificial nutrition and hydration.

[ ] Other instructions: _____

_____

(D) Relief from Pain.

[ ] I direct that adequate treatment be provided at all times for the sole purpose of the alleviation of pain or discomfort; or

[ ] I give these instructions:

_____

_____

(E) **Life-Sustaining Procedures. "Life-sustaining procedures" means any medical treatment, procedure, or intervention that may keep you alive but will not remove your terminal condition or remove permanent unconsciousness; "life-sustaining procedures" includes assisted ventilation, renal dialysis, surgical procedures, blood transfusions, and the administration of drugs, including antibiotics, or artificial nutrition and hydration.**

[ ] I wish to receive life-sustaining procedures.

[ ] I do not wish to receive life-sustaining procedures.

(F) Should I become unconscious and I am pregnant, I direct that

_____

_____

(7) OTHER WISHES. (If you do not agree with any of the optional choices above and wish to write your own, or if you wish to add to the instructions you have given above, you may do so here.) I direct that

_____

_____

Conditions or limitations: _____

_____.

(Add additional sheets if needed.)

PART 3

ANATOMICAL GIFT AT DEATH

(OPTIONAL)

If you are satisfied to allow your agent to determine whether to make an anatomical gift at your death, you do not need to fill out this part of the form.

(8) Upon my death: (mark applicable box)

(A) [ ] I give any needed organs, tissues, or other body parts, OR

(B) [ ] I give the following organs, tissues, or other body parts only

_____

_____

(C) [ ] My gift is for the following purposes (mark any of the following you want):

[ ] (i) transplant;

[ ] (ii) therapy;

[ ] (iii) research;

[ ] (iv) education.

(D) [ ] I refuse to make an anatomical gift.

PART 4

MENTAL HEALTH TREATMENT

This part of the declaration allows you to make decisions in advance about mental health treatment. The instructions that you include in this declaration will be followed only if a court, two physicians that include a psychiatrist, or a physician and a professional mental health clinician believe that you are not competent and cannot make treatment decisions. Otherwise, you will be considered to be competent and to have the capacity to give or withhold consent for the treatments.

If you are satisfied to allow your agent to determine what is best for you in making these mental health decisions, you do not need to fill out this part of the form. If you do fill out this part of the form, you may strike any wording you do not want.

(9) PSYCHOTROPIC MEDICATIONS. If I do not have the capacity to give or withhold informed consent for mental health treatment, my wishes regarding psychotropic medications are as follows:

_____ I consent to the administration of the following medications:

_____ I do not consent to the administration of the following medications:

Conditions or limitations: _____

_____.

(10) ELECTROCONVULSIVE TREATMENT. If I do not have the capacity to give or withhold informed consent for mental health treatment, my wishes regarding electroconvulsive treatment are as follows:

_____ I consent to the administration of electroconvulsive treatment.

_____ I do not consent to the administration of electroconvulsive treatment.

Conditions or limitations: _____

_____.

(11) ADMISSION TO AND RETENTION IN FACILITY. If I do not have the capacity to give or withhold informed consent for mental health treatment, my wishes regarding admission to and retention in a mental health facility for mental health treatment are as follows:

_____ I consent to being admitted to a mental health facility for mental health treatment for up to _____ days. (The number of days not to exceed 17.)

_____ I do not consent to being admitted to a mental health facility for mental health treatment.

Conditions or limitations: _____

_____.

OTHER WISHES OR INSTRUCTIONS

_____

_____

_____

Conditions or limitations: _____

_____.

PART 5

PRIMARY PHYSICIAN

(OPTIONAL)

(12) I designate the following physician as my primary physician:

_____

(name of physician)

_____

(address) (city) (state) (zip code)

_____

(telephone)

OPTIONAL: If the physician I have designated above is not willing, able, or reasonably available to act as my primary physician, I designate the following physician as my primary physician:

_____

(name of physician)

_____

(address) (city) (state) (zip code)

_____

(telephone)

(13) EFFECT OF COPY. A copy of this form has the same effect as the original.

(14) SIGNATURES. Sign and date the form here:

_____

(date) (sign your name)

_____

(print your name)

_____

(address) (city) (state) (zip code)

(15) WITNESSES. This advance care health directive will not be valid for making health care decisions unless it is

(A) signed by two qualified adult witnesses who are personally known to you and who are present when you sign or acknowledge your signature; the witnesses may not be a health care provider employed at the health care institution or health care facility where you are receiving

health care, an employee of the health care provider who is providing health care to you, an employee of the health care institution or health care facility where you are receiving health care, or the person appointed as your agent by this document; at least one of the two witnesses may not be related to you by blood, marriage, or adoption or entitled to a portion of your estate upon your death under your will or codicil; or

(B) acknowledged before a notary public in the state.

ALTERNATIVE NO. 1

Witness Who is Not Related to or a Devisee of the Principal

I swear under penalty of perjury under AS 11.56.200 that the principal is personally known to me, that the principal signed or acknowledged this durable power of attorney for health care in my presence, that the principal appears to be of sound mind and under no duress, fraud, or undue influence, and that I am not

(1) a health care provider employed at the health care institution or health care facility where the principal is receiving health care;

(2) an employee of the health care provider providing health care to the principal;

(3) an employee of the health care institution or health care facility where the principal is receiving health care;

(4) the person appointed as agent by this document;

(5) related to the principal by blood, marriage, or adoption; or

(6) entitled to a portion of the principal's estate upon the principal's death under a will or codicil.

_____

(date) (signature of witness)

_____

(printed name of witness)

_____

(address) (city) (state) (zip code)

* **Sec. 12.** AS 13.52.390(17) is amended to read:

(17) "health care decision" means a decision made by an individual or the individual's agent, guardian, or surrogate regarding the individual's health care, including

(A) selection and discharge of health care providers and institutions;

(B) approval or disapproval of proposed diagnostic tests, surgical procedures, and programs of medication;

(C) direction to provide, withhold, or withdraw artificial nutrition and hydration if providing, withholding, or withdrawing artificial nutrition, artificial hydration, or artificial nutrition and hydration is in accord with generally accepted health care standards applicable to health care providers or institutions;

(D) the administration or withdrawal of psychotropic medications, the use of electroconvulsive treatment, and the admission to a mental health facility; [AND]

(E) making an anatomical gift at death; **and**

(F) a direction relating to the provision of cardiopulmonary resuscitation or other resuscitative measures;

* **Sec. 13.** AS 13.52.065(f) is repealed.

* **Sec. 14.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONTINUING EFFECT OF DO NOT RESUSCITATE ORDERS. A do not resuscitate order made under AS 13.52 before the effective date of this Act continues in effect under AS 13.52, unless the do not resuscitate order is revoked under AS 13.52.065(i) or (j), added by sec. 6 of this Act, or made ineffective under another provision of AS 13.52, as amended by this Act.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB172

Analysis

This bill specifies that a health care provider may not decline to comply with a do not resuscitate order that is consistent with the chapter for reasons of conscience. The bill amends the statutes specifically as it relates to requests that cardiopulmonary resuscitation or other resuscitative measures be provided. It provides that the protocol adopted by the department must comply with the amended language provided section.

Implementation of the bill as written would require the Division of Public Health's Section of Emergency Programs, Emergency Medical Services (EMS) Unit to upgrade the statewide DNR protocol in the Comfort One program.

Implementation of the bill as written would require the Division of Public Health's Section of Emergency Programs, Emergency Medical Services (EMS) Unit to upgrade the statewide Do Not Resuscitate protocol materials. While the program already budgets on-going printing costs as part of the base budget, revising these materials will have one-time costs associated that are not considered part of the base. This involves modifying already printed administrative forms and procedures that support the Comfort One program. Also, the current inventory of forms already printed and distributed will need to be replaced with the updated forms. The cost to update the forms and replace the inventory can be absorbed without reducing services elsewhere.

The Division of Public Health provides about 4500 enrollment forms and a lesser number of each of two pamphlets each year. The Comfort One enrollment forms are distributed to the three main EMS Regions (Southern, Southeast, and Interior). Southern Region is the largest user of the forms and has had an increasing number of requests for the forms. The three regions send forms out to the other four regions upon request.

MEMORANDUM October 28, 2011

SUBJECT: Question regarding AS 13.52 (Work Order No. 27-LS0991)

TO: Senator Fred Dyson
Attn: Chuck Kopp

FROM: Terry Bannister
Legislative Counsel

You have asked whether AS 13.52 adequately protects the right of a patient, or the patient's designee, to overrule a physician's decision to issue a do not resuscitate (DNR) order. This question was prompted by a recent situation in which a physician at a hospital issued a DNR order against the express wishes and directions of both the patient and the patient's wife who held his durable power of attorney.[1] You have referred me to AS 13.52.065, which addresses DNR protocol and identification requirements, AS 13.52.100, which addresses the patient's right to make health care decisions while the patient has capacity, and AS 13.52.120, which addresses a presumption in favor of life.

AS 13.52.065(a) does allow a physician to issue a do not resuscitate order. However, that provision cannot be read in isolation from the rest of AS 13.52 (the "chapter"). AS 13.52 is fairly clear that a patient with capacity has the right to make a DNR order ineffective. However, the chapter is not as clear that an individual can prevent a doctor from placing the order or that an authorized agent of the patient may make a DNR order ineffective or prevent the doctor from placing the DNR order.

With certain exemptions for conscience or where medically ineffective standards are involved,[2] AS 13.52.060(d) requires a health care provider,[3] to comply with an individual instruction[4] of the patient, and with a health care decision made by an authorized person. The term, "individual instruction," appears to cover a DNR order, because it covers a

---

[1] I am presuming this was a durable power of attorney for health care.

[2] AS 13.52.060(e) - (f).

[3] The term includes a physician.

[4] Defined in AS 13.52.390 as an individual's direction concerning a health care decision for the individual.

health care decision,[5] which in turn includes any care, treatment, service, or procedure that affects an individual's physical or mental condition.[6]

The chapter's specific provisions regarding DNR orders, AS 13.52.065(f) and AS 13.52.100(c), clearly allow DNR orders to be made ineffective if a patient who is able to make the decision requests this, but these sections do not expressly address authorized agents. However, with regard to patients without capacity, AS 13.52.100(c) states that if the individual is not able to make the decision, the DNR protocol authorized by AS 13.52.065(b) be used. The sample form in AS 13.52.300 for an advance care directive states that the protocol governs the use of DNR orders by health care providers; the exact meaning of "use" is not defined in the chapter or the protocol, so it is left up to interpretation. The DNR protocol established by the Department of Health and Social Services[7] states that a DNR patient may revoke the patient's DNR status at any time and in any manner in accordance with AS 13.52,[8] but does not go into more detail or expressly address revocation by agents of the individual.

It can also be argued that in this chapter a reference to a "patient" also includes an authorized agent of an adult individual. This interpretation is supported by AS 13.52.060(d) mentioned above. It is also supported by AS 13.52.080(a)(6)(B), because that provision appears to indicate that AS 13.52.065(f) is not the only provision under which a DNR order can be made ineffective. This position is also supported by AS 13.52.010's allowing a patient to make advance health care directives and appoint agents regarding health care decisions. And, under AS 13.52.010(b), an agent may be given the authority under a durable power of attorney for health to make any health care decision the principal could have made while having capacity.[9]

---

[5] See AS 13.52.390(17).

[6] See AS 13.52.390(16).

[7] The current protocol was adopted in 1996 under AS 18.12, a chapter that was repealed when AS 13.52 was enacted in 2004 (with an effective date of January 1, 2005). Under sec. 18, ch. 83, SLA 2004, the Department of Health and Social Services was given authority to adopt regulations to implement AS 13.52, and under sec. 19, ch. 83, SLA 2004, the Department of Law's regulations attorney was directed to make certain citation changes in 7 AAC 16 to reflect the new chapter (these do not appear in the regulations) until the new regulations were adopted. Under sec. 19, ch. 83, SLA 2004, the regulations in 7 AAC 16 were to continue in effect until the Department of Health and Social services adopted regulations for the 2004 act.

[8] See 7 AAC 16.010(g).

[9] See AS 13.52.010(b).

The fact that the chapter at AS 13.52.300 contains an advance care directive form to state health care decisions and to appoint agents also supports an interpretation that individuals may indicate their wishes, and appoint agents, regarding DNR orders. The form itself contains language that the individual has the right to give instructions about the individual's own health care, although this language is qualified by making the right "to the extent allowed by law." But the form states that the DNR protocol governs the use of DNR orders. Finally, AS 13.52.120(a) states that the chapter establishes a presumption in favor of life, which would seem to support interpreting the chapter to allow a patient (or the patient's authorized representative) to prevent a physician from issuing a DNR order.

In AS 13.52 it seems clear that a patient with capacity has the right to make a DNR order ineffective. And while I would tend to conclude that the better interpretation of AS 13.52 is that a doctor's right to issue a DNR order is limited by the decision of the patient or the patient's authorized representative, and that an agent with that authority can revoke a DNR order, there are some ambiguities in the chapter that could result in other interpretations.

It would be helpful to know the exact basis for the positions taken by the physician and the hospital.

If I may be of further assistance, please advise.

MEMORANDUM December 30, 2011

SUBJECT: Bill relating to health care decisions, including do not resuscitate orders (Work Order No. 27-LS0991\M)

TO: Senator Fred Dyson
Attn: Chuck Kopp

FROM: Terry Bannister
Legislative Counsel

This memo accompanies the bill described above.

1. "Intervening care." After reviewing what you were requesting and the terms used in the chapter, it appears that you are referring to "life-sustaining procedures" (see the definition in AS 13.52.300). Please read the complete definition and make sure that this is what you had in mind. The new section uses that term instead of "intervening care." The provision has been moved to AS 13.52.045, which addresses the provision of life-sustaining procedures.

Contrary to what I indicated on the phone, it appears that the selection of life-sustaining procedures is not sufficiently addressed in the form provided under AS 13.52.300, so it is necessary to change the form. Unfortunately, this requires that the entire form be laid out in your bill even though the actual changes are small.

2. Use of "advance health care directive." After reviewing your question about the substitution of "advance health care directive" for "individual instruction" in AS 13.52.060(e), I decided to return to "individual instruction" because it is narrower than "advance health care directive," and a narrower term is consistent with the goal of the changes to AS 13.52.060(e) (to limit the health care provider's right to decline to comply for reasons of conscience).

3. Authorization by another physician to revoke a DNR order. Language has been added to proposed sec. 13.52.065(j) to identify which physicians may revoke another physician's DNR. Please examine sec. 13.52.065(j)(2)(B): is employment of the physician by the health care facility or institution the relationship that you had in mind?

If I may be of further assistance, please advise.

Memorandum

TO: Senator Fred Dyson
FROM: Chuck Burnham, Legislative Analyst
DATE: January 19, 2012
RE: State Laws: Assuring Healthcare Provider Compliance with Advance Health Directives
LRS Report 12.142

You asked about states' laws on "do not resuscitate orders" (DNRs). Specifically, you asked how other states prevent healthcare providers from using their patient care management authority to issue DNRs against the will of patients who have terminal conditions.

Background

As you likely know, all states have laws codifying patients' control, to varying degrees, over the medical care they receive in their final days of life.[1] Such legal mechanisms are commonly known as "advanced health directives," and may include "do not resuscitate orders" (DNRs). Typically, DNRs are used by elderly individuals or those with terminal illnesses to direct healthcare providers to suspend treatment should the patient experience a medical event that, in the absence of intervention, is likely to bring about death. In the absence of a DNR, medical ethics and standards of practice generally compel physicians to attempt life-saving measures; however, this requirement is limited when, in the judgment of the attending physician, such care would not ultimately prove beneficial to the patient. This concept is embodied in the Code of Ethics of the American Medical Association (AMA), which includes the following language in AMA Opinion 2.035:

> Physicians are not ethically obligated to deliver care that, in their best professional judgment, will not have a reasonable chance of benefiting their patients. Patients should not be given treatments simply because they demand them. Denial of treatment should be justified by reliance on openly stated ethical principles and acceptable standards of care, as defined in Opinion 2.03, "Allocation of Limited Medical Resources," and Opinion 2.095, "The Provision of Adequate Health Care," not on the concept of "futility," which cannot be meaningfully defined.

Recognizing the emotional and trying atmosphere that surrounds end-of-life care, the AMA provides in Opinion 2.037 a framework of considerations and actions to be taken by healthcare providers in circumstances where their prescribed treatment differs from the wishes of terminal patients. That Opinion frames the issue as follows:

> When further intervention to prolong the life of a patient becomes futile, physicians have an obligation to shift the intent of care toward comfort and closure. However, there are necessary value judgments involved in coming to the assessment of futility. These judgments must give consideration to patient or proxy assessments of worthwhile outcome. They should also take into account the physician or other provider's perception of intent in treatment, which should not be to prolong the dying process without benefit to the patient or to others with legitimate interests. They may also take into account community and institutional standards, which in turn may have used physiological or functional outcome measures. Nevertheless, conflicts between the parties may persist in determining what is futility in the particular instance.[2]

---

[1] Alaska's laws on advanced healthcare directives are codified at AS 13.52. For the purposes of this report, the term "patient" generally includes individuals receiving care, their families, and other proxies that may be involved in end-of-life decisions should the patient become incapacitated.

[2] The AMA Code of Medical Ethics is available online at *http://www.ama-assn.org/ama/pub/physician-resources/medical-ethics/code-medical-ethics.page?*.

The AMA recommends that healthcare institutions adopt policies that use a due process approach in determining medical futility. Opinion 2.037 outlines a seven-step approach that emphasizes fostering understanding and cooperation between patient and physician, involvement of institutional bodies such as ethics committees where disagreements remain, and the swift and orderly transfer of patients to other institutions when agreement cannot be reached.

Patient Protections in State Laws

Although the policies of the AMA generally appear to strike a reasonable balance between the wishes of patients and the medical judgment of physicians, those policies do not carry the weight of law. The concern that you contemplate—that physicians may order a DNR over the wishes of the patient at a point too early in the end-of-life process—is clearly shared by policymakers in a number of other jurisdictions.

For example, the Uniform Law Commission (ULC) includes protection against physicians superseding the wishes of patients in its Uniform Healthcare Decisions Act.[3] Section 7 of the Act, "Obligations of Healthcare Provider," includes the following:

> (d) Except as provided in subsections (e) and (f), a health-care provider or institution providing care to a patient shall:
>
> > (1) comply with an individual instruction of the patient and with a reasonable interpretation of that instruction made by a person then authorized to make health-care decisions for the patient; and
> >
> > (2) comply with a health-care decision for the patient made by a person then authorized to make health-care decisions for the patient to the same extent as if the decision had been made by the patient while having capacity.

The Act then allows that should a healthcare provider decline to comply with the instructions of a patient for reasons of conscience, policy, or conflict with generally accepted healthcare standards, the patient should be promptly informed and treatment should continue until transfer to another facility can be arranged.[4] The Act, in part or in total, has been adopted by a number of states including Alaska and, for example, Mississippi and New Mexico.

Although the policies of the AMA and the Uniform Act have clearly influenced policymakers' approaches to protecting patients' wishes in end-of-life circumstances, states nonetheless vary considerably in their laws on the topic. For instance, in California and Hawaii, physicians may issue orders specifying withholding end-of-life treatment, but only with the signature of a patient or legally recognized proxy. Similar orders may be issued by physicians in Tennessee and Virginia only with the "consent" of the affected patient. Medical doctors in Ohio may issue a "DNR Identification" order, but state law makes clear that the legal "declaration" of a patient regarding treatment preferences supersedes the physician's DNR.[5]

It is important to note that although the states we have mentioned, and others, have taken steps to protect patients from becoming subject to a DNR order against their will, determinations on when to discontinue efforts at life-saving interventions such as cardio pulmonary resuscitation (CPR) fall to the purview of physicians, the policies of the institutions in which they practice, and the accepted standards of medical practice. Therefore, patients' authority under the laws we've discussed necessarily extend only to whether they desire or refuse medical intervention through an advanced directive at the end of life rather than to the duration or timing of the cessation of those measures.

We hope this is helpful. If you have questions or need additional information, please let us know.

---

[3] Established in 1892, the ULC, also known as the National Conference of Commissioners on Uniform State Laws, seeks to provide states with "non-partisan, well-conceived and well-drafted legislation that brings clarity and stability to critical areas of state statutory law." The ULC is comprised of lawyers, judges, legislators, and academics who have been appointed by state governments. More information is available on the Commission's website at *http://www.nccusl.org/Default.aspx*.

[4] Full text of the Act is available online at *http://www.nccusl.org/Default.aspx*.

[5] We include, as attachments, examples of relevant statutes of California, Delaware, Florida, Georgia, Hawaii, Mississippi, New Mexico, Ohio, Tennessee, and Virginia.

PROVIDENCE
Health & Services
Alaska

February 14, 2012

Senator Fred Dyson
State Capitol, Room 121
Mailstop 3100
Juneau, AK 99801-1182

Dear Senator Dyson:

I recently became aware that in a letter dated January 18, 2012 from you to Senator Bettye Davis, and subsequently made part of the public record for Senate Bill 172, there are statements attributed to the "Chief Operating Officer" and the "Chief Medical Officer" of an area hospital in reference to a specific patient and family. For a number of reasons, I believe that the "chief operating officer" referenced in your letter may be me, and the "chief medical officer" would then be Roy Davis, MD. I wish to clarify a statement attributed to Providence executives in order to avert misunderstanding among interested parties who are neither familiar with the case referenced in your letter nor the mechanisms and laws for physician prescriptions, including "Do Not Resuscitate" ("DNR") orders.

While I presently serve as the chief executive officer of Providence Health & Services Alaska, at the time referenced in your letter, I served as the chief operating officer. You and I spoke on at least two occasions about the case in question. I explained that these cases are almost always highly complicated and emotionally demanding for all parties. Physicians do an outstanding job of considering each patient's needs and of determining the appropriateness for such orders under these challenging circumstances.

Roy Davis, MD, our chief medical officer, indicates that he never spoke with you about the patient matter. However, you did speak with Richard Mandsager, MD. Dr. Mandsager serves as chief executive officer for Providence Alaska Medical Center, and he recalls speaking with you about certain details of the case. We suspect that your reference to the "chief medical officer" was in fact to Dr. Mandsager in his role as chief executive officer.

The specific clarification we wish reflected in the public record is that neither Dr. Mandsager nor any other executive of Providence Health & Services represented to you that the DNR order would be removed from the referenced patient's medical record. Such an action is inconsistent with policy, bylaws and community practice. As such, removal of the DNR was never considered.

I respectfully request that you correct the official record on this important matter.

Sincerely,

Bruce Lamoureux

Bruce Lamoureux
Sr Vice President/Chief Executive Alaska Region

Senator Hollis French
Representative Bob Lynn

Providence Health & Services Alaska
Review of Senate Bill 172 and House Bill 309
Prepared by Providence Physician Leadership - February 10, 2012 and Unanimously Endorsed by the Providence Alaska Medical Center's (PAMC) Medical Executive Committee, elected representatives of physicians who hold medical privileges at PAMC – February 13, 2012

At first glance, Senate bill # 172 and its partner bill #309 in the House, appear to empower patients to make decisions about their health care at the end of life (Sec. 1 pg 1 lines 3-7). However, on further review these bills contain language involving a very complex decision making process that normally occurs between a patient and his or her physician.

These bills attempt to legislate a complex decision making process and make a "one size fits all" model for end-of-life care. Specifically, these bills are concerned with advanced health care directives which may be made independently or may accompany a will or estate planning. The advanced health care directive is designed to give direction to your family, loved ones and health care providers about care choices if you become critically ill and cannot make decisions for yourself. Ideally, every individual would make this directive ahead of time, when they are clear of mind and not under stress or distracted in any way. In reality, fewer than 1 in 5 individuals arriving to a hospital have an advanced directive(Halpern NA, Pastores SM, Chou JF, Chawla S, Thaler HT, Palliat Med. 2011 Apr;14(4):483-9. Epub 2011 Mar 18; . Knott CI, Psirides AJ, Young PJ, Sim D., Crit Care Resusc. 2011 Sep;13(3):167-74).

These bills also address requests by patients or health care providers to use or not to use advanced medical procedures in an attempt to keep them alive. New terminology adopted by several states terms these issues as "Allow Natural Death," (AND). In Alaska, the terminology utilized is called DNR (do not resuscitate) orders and advanced resuscitative measures. A DNR order can be initiated with or without an advance health care directive. Historically, A DNR is a written agreement that is made between a physician and a patient after discussion about a patient's medical condition. A DNR can answer questions about whether a patient wants CPR (chest compressions or cardiopulmonary resuscitation), wants artificial breathing applied (also called intubation) or some assistance with breathing if an individual needs assistance on a temporary or long term basis. It addresses artificial nutrition if an individual is temporarily or permanently unable to swallow or eat. It addresses the use of antibiotics for infection and other medications to support blood pressure. It addresses the use of electricity/shocking of the heart to reset or restart the heart if the heart stops. .

The decisions made by an individual about how they want to spend their end days are complex and personal. Each person has their own set of circumstances that guide their decision making. The decision may be based on what types of illnesses an individual has or how long they have had these illnesses. It may have to do with their ability or inability to tolerate pain and suffering. It may be directly or indirectly related to religious or cultural beliefs. It may reflect a preference to allow all bodily processes to occur

naturally and not be artificially supported. It may have to do with a desire not to be a burden to family or loved ones if circumstances alter one's ability to care for themselves. It may reflect financial concerns.

The list of reasons why people make decisions is lengthy and unique to each individual. These decisions should be discussed at length with family and loved ones and preferably with a physician who can communicate the degree and prognosis of illnesses with the individual and their loved ones. Ideally, everyone knows and understands the choices and why they are made.

In reality, fewer than 1 in 5 patients admitted to the hospital have made these decisions even though they may have very complicated advanced illnesses or injuries (Halpern, et.al. and Knott et.al.). In general, the American culture tends to not discuss death and dying and is generally unprepared to address these issues until they are forced to do so when confronted by a life altering or life threatening injury or illness. The decisions must then be made under stress. The worst case scenario presents when a patient is not able to make decisions and family members must make decisions while hoping they know what a patient may want. Often families do not know, are unsure, or simply are not present or cannot be found. Whenever possible, these decisions are made in advance. When they have not been made in advance, the medical team caring for the patient is faced with making the decisions together with available family members. Decisions are based upon what is known about the illness(es) or injuries, progression of disease, and benefits vs. harm of interventions. These decisions are crafted with input from family regarding patient preferences. It is a complex process and made with due diligence, generally with the input of many care providers, in addition to family wishes. They are not made lightly.

It is important to note that advanced interventions including CPR, artificial breathing techniques, artificial nutrition, shocking of the heart, etc. are helpful only in very specific medical circumstances. They are not applicable to each and every end of life illness or injury no matter what is portrayed on TV (references: code of Ethics of the American Medical Association (AMA), Opinions 2.035, 2.095). In fact, many of these interventions are painful and are rarely successful (Ebell & Alfonsa; Family Practice 2011; 28:505-515) . They are often associated with severe painful and sometimes persistent complications that leave the few who survive the procedures permanently impaired. CPR for example, was designed to be utilized in only a specific subset of heart patients (Kouwenhouen JAMA 1960 173: 1064-7). It was not recommended for other situations because the likelihood of survival is so low and the risks of complications are so high. For example, advanced cancer patients have not been shown to benefit from CPR. The procedure frequently causes broken ribs and a broken breast bone and collapsed lungs, to mention only a few of the potential complications. The benefits of the procedures should clearly outweigh the potential risks of the complications associated with these procedures. In end stage cancer, the benefits rarely outweigh the risks. When they do outweigh the risks, then CPR and other advanced aggressive procedures are performed. However, medical standards do not recommend doing advanced aggressive interventions in every case (references: code of Ethics of the American Medical Association (AMA), Opinions 2.035, 2.095). In these situations, the

recommendation is to provide full support for patients, but not to provide procedures that have a higher risk of injury than to provide benefit, irrespective of a DNR that may be in effect.

The House and Senate bills do not reflect the complexity of this decision making process. This legislation is inappropriate for a large portion of individuals by mandating the following:

1. These bills attempt to mandate that aggressive potentially hazardous interventions be performed on every patient who requests it, no matter what the underlying disease, injury or illness (Sec.2 pg 2, lines 2-6, Sec 3. Pg 2 lines 11-15.

2. If the patient is not capable of decision making, a surrogate decision maker can mandate that potentially hazardous interventions be performed EVEN if the patient's advance health care directive states otherwise (Sec. 3. Pg 2 lines 11-15, Sec 6. Pg2, lines 29-31and pg 3, line 4, Sec 12, pg 19, lines 18,19).

3. It agrees that health care providers can identify medical futility (when procedures or interventions will not help a patient condition) but it further mandates that health care providers cannot refuse to apply potentially harmful interventions to patients if they or their families demand it. This is true even when the procedures are deemed to be medically ineffective (Sec 3. pg 2, lines 7-18) .

4. In short, it mandates that providers batter patients, by performing painful and potentially harmful procedures that are in direct contrast to generally acceptable medical practice s (Sec 3. pg 2, lines 7-18) .

5. It mandates that under certain circumstances health care providers may not adhere to their medical creed to "first do no harm". It mandates that providers harm patients. (Sec 3. pg 2, lines 7-18).

6. It does not encourage or support the input of medical providers or collaborative efforts to determine the best course of care by weighing all of the care options with clear understanding and discussion of risks vs. benefits (Sec 3. pg 2, lines 7-18) ..

7. It encourages individuals to direct hospitals and health care providers to perform potentially harmful interventions on patients who will not benefit from these interventions (Sec 3. pg 2, lines 7-18, (Sec.2 pg 2, lines 2-6). It negates individual freedom to choose.

8. It allows surrogate decision makers to reverse decisions made by individuals who have completed advance health care directives (Sec.2 pg 2, lines 2-6, Sec 3. pg 2, lines 7-18, Sec 6 pg 3 line 4, Sec. 13.52.300 pg 7, lines 6-11, and 15 and 16.)

9. It mandates that all previously established health care directives become null and void if they were established previously but not in accordance with the new bill directives (Sec 6 pg 3, lines 14-26, Sec 14. Pt 19, lines 23-27).

10. It threatens litigation to providers who will not inflict harm on patients by refusing to perform medically ineffective harmful procedures and aggressive interventions when patients or their families request it (Sec 8. Pg 5, lines 12-14).

11. It defaults automatically to doing aggressive painful potentially hazardous procedures on all patients who have not previously established written health care directives that specifically refuse to have CPR or other advanced aggressive interventions (Sec. 6 pg 3 lines 5-10, Sec 4. Pg 2 lines 19-22).

12. It mandates that a physician revoke DNR orders under any circumstance in which a patient, a family member or a surrogate decision maker demands it – even if the interventions demanded are medically ineffective. (Sec.2 pg 2, lines 2-6, Sec 3. pg 2, lines 7-18)

13. It states that a physician who has an "individual relationship with the patient" may revoke a DNR. It does not specify what that relationship might be. (Sec 6. Pg 3, line 3)It states that a physician who is employed by the health care institution where the patient is being treated may revoke a DNR order without establishing a professional patient -physician relationship (Sec. 6 pg 4, lines 1 and 2).

14. The advance health care directive form has been altered to indicate that any selection by an individual that does not ask for full resuscitation efforts must wish to die (Sec 13.52.300, pg 11 lines 8-31 and pg 12, lines 1-11.). It does not address or support an individual's right to request that their care be focused upon relief of pain and suffering, maximizing comfort and avoiding the prolonging of the dying process.

15. The new version of the advance health care directive form does not encourage graduated selection of interventions. It is an all or none proposition (Sec 13.52.300, pg 13, lines 2-10).

Page 19 simply needs to be deleted altogether.

Why the medical community has grave concerns

- It does not allow those individuals with the most expert understanding of health and disease and prognosis to exercise their expertise.
- It implies that DNR orders are made flippantly and without deep compassionate concern for the welfare of patients.
- It makes an assumption that doing potentially harmful and painful interventions are always in the patients' best interests despite accepted medical standards that indicate otherwise.
- It ignores the Hippocratic Oath and that health care providers must first do no harm . It supports the battery of patients by mandating that harmful procedures be performed on patients without regard to the benefit vs. risk assessment of these interventions

- It does not support the time honored tradition of patient physician relationship in which these discussions should be made.
- It makes an assumption that every patient feels that the quantity of life trumps the quality of life
- It does not promote death with dignity
- It forces families and loved ones to reconsider the decisions of their loved ones and consider reversing decisions that may cause irreparable psychological and emotional damage in the long run.
- It assumes that physicians do not err on the side of over-utilizing CPR. It assumes that providers underutilize these aggressive procedures. This is untrue.

Considerations for Alaska citizens who do not want government intrusion into personal medical decision making

- It makes an assumption that each individual values the quantity of life over the quality of life without regard to the degree of suffering an individual may experience.
- It assumes that every individual wants artificial support even when it has been shown to not be helpful.
- It assumes that every person wants to have CPR and undergo potential pain and suffering from these procedures even when they have been shown not to be of any benefit.
- It allows other individuals to reverse your right to death with dignity because they are afraid to lose you. It implies that they may not value your life if they do not at least try the aggressive resuscitative measures.
- It forces others to ignore your choices and decide for themselves whether or not to honor your wishes.
- It mandates that every individual should be treated the same. It is a "cookie cutter approach" to medical care assuming that each person wants the same thing as proponents for the right to life.
- It has the potential to reverse a well thought out decision for end of life care that may have been made by you for reasons unknown to other individuals.
- It does not allow those who have not yet made advanced directives to have well thought out approaches to their medical care and instead defaults to the use of aggressive medical interventions

- It assumes that physicians do not make medical decisions incorporating acceptable medical standards of care.
- It assumes that a patient and their physician cannot tailor a unique care plan for each individual. Instead, a legislator with no medical experience whatsoever can mandate the procedures that will happen to you at the end of life.
- It mandates patients with extremely advanced medical conditions undergo these procedures simply because they do not have advance health care directives.
- It insists that all previously established advanced health directives and DNR orders be reconsidered and must be in compliance with the new standards established with this new bill.

SENATOR FRED DYSON

January 18, 2012

Senator Bettye Davis
State Capitol Room 30
Juneau, Alaska 99801

SB 172

Re: AS 13.52 Alaska Health Care Decisions Act – Do Not Resuscitate (DNR) Orders & End of Life Decisions

Dear Senator Davis,

Thank you for your valuable support as a co-sponsor of the attached bill amending AS 13.52 *Alaska Health Care Decisions Act.* Ambiguities in the current law concerning the rights of patients and their surrogates to refuse or invalidate a DNR order have resulted in unnecessary distress of Alaskan residents facing critical end of life decisions.

In August 2011 my office was contacted by a recently discharged Anchorage area hospital patient and his wife, Mervin and Margery Mullins. The couple stated that a physician at the hospital put a Do-Not-Resuscitate order on Mervin, who has brain cancer, but doing much better than the prognosis. The DNR order was issued against the expressed wishes of both Mervin and Margery. When they protested, the physician told them that a DNR order is issued at the sole direction of a physician for his/her patient. Margery met with the hospital Chief Ethicist who confirmed their attending physician was correct. According to the Mullins, they were also told that the Durable Power of Attorney held by Margery "did not matter" because the decision was the physician's to make.

I had several conversations with the hospital Chief Operating Officer and Chief Medical Officer. They stated there is ambiguity in the law as to what a hospital (health care facility) can do with respect to overruling a DNR order placed on a patient by a physician. I explained my view - that the presumption of the law is in favor of life and of the patient's rights on end of life decisions, stated as such in AS.13.52.120(a) *In the absence of evidence to the contrary of the patient's intent, this chapter establishes a presumption in favor of life, consistent with the best interest of the patient.* The Chief Medical Officer agreed and directed that the DNR order be removed from Mr. Mervin Mullins.

I asked Legislative Legal to advise me on what the law actually says in AS 13.52 with respect to DNR orders and end of life decisions, and their opinion on whether the law adequately protects the patient (or his/her agent) right to overrule a physician's decision to issue a DNR order. I have attached to this correspondence the memos from Legal, dated October 28, 2011, and December 30, 2011.

In part, Legal states -

> *AS 13.52 is fairly clear that a patient with capacity has the right to make a DNR order ineffective. However, the chapter is not as clear that an individual can prevent a doctor from placing the order or that an authorized agent of the patient may make a DNR order ineffective or prevent the doctor from placing the DNR order. (emphasis added)*
>
> *Finally, AS 13.52.120(a) states that the chapter establishes a presumption in favor of life, which would seem to support interpreting the chapter to allow a patient (or the patient's authorized representative) to prevent a physician from a issuing a DNR order. In AS 13.52 it seems clear that a patient with capacity has the right to make a DNR order ineffective. And while I would tend to conclude that the better interpretation of AS 13.52 is that a doctor's right to issue a DNR order is limited by the decision of the patient or the patient's authorized representative, and that an agent with that authority can revoke a DNR order, there are some ambiguities in the chapter that could result in other interpretations. (emphasis added)*

Based on this review by Legal, the stated confusion in the law by an Anchorage area hospital facility, and the experience of the Mullins couple, I asked Legal to draft an amendment to AS 13.52 clarifying the ambiguities. Specifically, that a physician may not issue a DNR order without the expressed consent of the patient, or if the patient lacks capacity, without the expressed consent of the authorized agent of the patient, or, if no one is available or known to be authorized to speak for the patient, without the concurrence of a second physician.

The Advance Health Care Directive sample form provided in AS 13.52.300 is also amended to allow the patient the option of accepting or decline life-sustaining procedures (treatments that will keep you alive, but not remove your terminal condition).

If you agree with me that this is an important matter and find the amendments to AS 13.52 to be acceptable, I would very much welcome your support as a co-sponsor.

Best regards,

Fred Dyson

Health Care Decisions Act – AS 13.52

Concerns and a legal review of the law with respect to DNR orders

Terms

Individual instruction – an individual's direction concerning health care decisions for the individual

Health care – any care, treatment, service, or procedure to maintain, diagnose, or otherwise affect an individual's physical or mental condition

Health care decision – a decision made by an individual or individual's agent, guardian or surrogate regarding the individual's health care

Advance health care directive – an individual instruction or a durable power of attorney for health care

Concern

It appears that patient or surrogate consent is not required by Providence Alaska Medical Center for issuance of a Do Not Resuscitate (DNR) order. Providence Alaska is a partner in the WWAMI medical education program. The University of Washington Medical Center, Harborview Medical Center and Seattle VA Medical Centers all state with respect to disagreements about DNR orders – *At the UW, Harborview, and VA Medical Centers, the policy is to write a DNR order only with patient/family agreement. If there is disagreement, every reasonable effort should be made to communicate with the patient or family. In many cases, this will lead to resolution of the conflict. In difficult cases, an ethics consultation can prove helpful. Nevertheless, CPR should generally be provided to such patients, even if judged futile.(emphasis added) – Ethics in Medicine, Do Not Resuscitate Orders, University of Washington School of Medicine.*

Question

Does current law protect the right of a patient, or the patient's designee, to make ineffective a physician's decision to issue a DNR order?

Legal Opinion

State of Alaska, Legislative Legal opinion of October 28, 2011, states *AS 13.52 is fairly clear that a patient with capacity has the right to make a DNR order ineffective. However, the chapter is not as clear that an individual can prevent a doctor from placing the order or that an authorized agent of the patient may make a DNR order ineffective or prevent the doctor from placing the DNR order.*

Review of current law (AS 13.52 Health Care Decisions Act)

- ✓ AS 13.52.065(a) allows a physician to issue a DNR order. However, this cannot be read in isolation from the rest of AS 13.52 (Health Care Decisions Act).

- ✓ AS 13.52 is fairly clear that a patient with capacity has the right to make a DNR order ineffective.

- ✓ The chapter is not as clear that an individual can prevent a doctor from placing the order or that an authorized agent of the patient may make a DNR order ineffective or prevent the doctor from placing the DNR order.

- ✓ Rights of health care providers and institutions - right to object for reasons of conscience (except a DNR); right not to comply with medically ineffective health care (13.52.060(e-f) and 13.52.120(e)); right of health care provider not to comply with a decision of a surrogate who provider observes is not

abiding by wishes, values and best interests of patient (13.52.030(g-h)); and right of judicial relief (13.52.140).

- ✓ AS 13.52.060(d) requires a health care provider to comply with an individual instruction of the patient, and with a health care decision made by an authorized person. AS 13.52.060(d) *a health care provider, health care institution, or health care facility providing care to a patient shall comply with (1) an individual instruction of the patient...; and (2) a health care decision for the patient made by a person then authorized to make health care decisions for the patient* to the same extent as if the decision had been made by the patient while having capacity.

- ✓ The term "individual instruction" appears to cover a DNR order (approving or disapproving) because it covers a health care decision, see AS 13.52.390(17), which includes any care, treatment, service, or procedure that affects an individual's physical or mental condition.

- ✓ Specific provisions regarding DNR orders - AS 13.52.065(f) *Do not resuscitate protocol and identification requirements*, and AS 13.52.100(c) *Capacity*, clearly allow DNR orders to be made ineffective if a patient who is able to make the decision requests it, but these sections do not expressly address authorized agents. A do not resuscitate order may not be made ineffective unless, 1.) a physician revokes the do not resuscitate order; 2.) a patient for whom the order is written and who has capacity requests that the do not resuscitate order be revoked; or 3.) the patient for whom the order is written is under 18 years of age and the parent or guardian of the patient requests that the DNR order be revoked.

- ✓ The DNR protocol established by Department of Health and Social Services states that a DNR patient may revoke the patient's DNR status at any time and in any manner in accordance with AS 13.52, but does not address revocation by agents of the individual.

- ✓ AS 13.52.060(d), mentioned above, and AS 13.52.080(a)(6)(B)*Immunities,* both indicate that an authorized agent of the patient may make a DNR order ineffective. Also, AS 13.52.010 *Advance health care directives,* allows a patient to make advance health care directives and appoint agents regarding health care decisions. Under AS 13.52.010(b), an agent may be given the authority under a durable power of attorney for health to make any health care decision the principal could have made while having capacity.

- ✓ AS 13.52.300 - The Advance Health Care Directive form allows persons to state health care decisions and appoint agents which supports an interpretation that individuals may indicate their wishes and appoint agents regarding DNR orders.

- ✓ AS 13.52.120(a) *Effect of this chapter,* states the chapter establishes a presumption in favor of life, which would seem to support interpreting the chapter to allow a patient (or authorized representative) to prevent a physician from issuing a DNR order.

Conclusion of Legislative Legal

In AS 13.52 it seems clear that a patient with capacity has the right to make a DNR order ineffective. And while I would tend to conclude that the better interpretation of AS 13.52 is that a doctor's right to issue a DNR order is limited by the decision of the patient or the patient's authorized representative, and that an agent with that authority can revoke a DNR order, there are some ambiguities in the chapter that could result in other interpretations. – October 28, 2011 Legal Memo to Senator Dyson

Response to February 10, 2012 Letter Outlining Concerns with SB 172

This legislation is consistent with current law. The intent is to clarify ambiguities within the Health Care Decisions Act – AS 13.52. We appreciate the opportunity to review this legislation with you.

Sectional Analysis & Health Care Decisions Act – AS 13.52
A legal review of the Sectional Analysis of Senate Bill 172 (SB172), and of the current law (Health Care Decisions Act) pertaining to end of life decisions in AS 13.52, are provided along with this response and will be helpful to understanding the specifics of the legislation.

1. Providence – *These bills attempt to mandate that aggressive potentially hazardous interventions be performed on every patient who requests it, no matter what the underlying disease, injury or illness (Sec. 2, pg 2, lines 2 -6; Sec. 3, pg 2, lines 11-15).*

   Response – This is a broad overstatement. Sec. 2, pg 2, lines 2 -6; and Sec. 3, pg 2, lines 11-15, restates more clearly what AS 13.52 already states. See October 28, 2011, State of Alaska, Legislative Legal opinion attached.

   Note: On p. 2, line 13, the term "advanced health care directive" will be amended to "individual instruction", to be consistent with the more narrow focus of limiting the health care provider's right to decline to comply with a patient request that cardiopulmonary resuscitation be provided.

2. Providence – *If the patient is not capable of decision making, a surrogate decision maker can mandate that potentially hazardous interventions be performed EVEN if the patient's advance health care directive states otherwise (Sec. 3, pg 2, lines 11-15; Sec. 6, pg 2, lines 29-31 and pg 3, line 4; and Sec. 12, pg 19, lines 18-19).*

   Response – This is not correct. An advanced health care directive indicating a patient's choice for a DNR order or choice not to prolong life must be adhered to (see 13.52.030(g)) and this legislation does not change that. Rather, it reiterates the authority of patient advance health care directives in Sec. 6, pg 3, lines 2-3 which states in part, *under this paragraph, the consent (to a DNR order) may be provided by an advance health care directive.* Further, the rights of health care providers and institutions not to comply with a decision of a surrogate who the provider observes is not abiding by the wishes, values and best interests of a patient are protected under 13.52.030(g-h) *Surrogates*, and under 13.52.140 *Judicial relief*.

3. Providence – *It agrees that health care providers can identify medical futility (when procedures or interventions will not help a patient condition) but it further mandates that health care providers cannot refuse to apply potentially harmful interventions to patients if they or their*

families demand it. This is true even when the procedures are deemed to be medically ineffective (Sec. 3, pg 2, lines 7-18).

Response – Much of this section is current law, not new law. Only lines 11 – 15 contain new language, which clarifies that a health care provider, health care institution or facility may not decline to comply with an individual instruction or health care decision that requests CPR or other resuscitative measures be provided.

4. Providence – *In short, it mandates that providers batter patients, by performing painful and potentially harmful procedures that are in direct contrast to generally acceptable medical practice (Sec. 3, pg 2, lines 7-18).*

   Response – See response to #3.

5. Providence – *It mandates that under certain circumstances health care providers may not adhere to their medical creed to "first do no harm". It mandates that providers harm patients (Sec. 3, pg 2, lines 7-18).*

   Response – See response to #3.

6. Providence – *It does not encourage or support the input of medical providers or collaborative efforts to determine the best course of care by weighing all of the care options with clear understanding and discussion of risks vs. benefits (Sec. 3, pg 2, lines 7-18).*

   Response – See response to #3; also, the authority to issue or make ineffective DNR orders is, unfortunately, often viewed as a zero sum game. If the physician gains decision making authority, the patient loses. If the patient gains decision making authority, the physician loses. This legislation does nothing to discourage the dialogue surrounding these difficult decisions. Ideally, agreement will be reached. But in the end, if there is an impasse between the patient (or surrogate) and the physician with respect to a DNR order, the law says the presumption is in favor of life, and with that of patient consent to a DNR order being required.

   With respect to parents of a child patient, sometimes they cannot accept, even after long and painful discussions that their child will not survive. They will not "give up". May CPR be done long enough (not prolonged) for the parents looking on to demonstrate its futility? The health care provider is also treating the family, even though the child is beyond saving. Public safety and critical care personnel with substantial service in the profession know the relevancy of this argument.

7. Providence – *It encourages individuals to direct hospitals and health care providers to perform potentially harmful interventions on patients who will not benefit from these interventions (Sec. 3, pg 2, lines 7-18; Sec. 2, pg 2, lines 2-6). It negates individual freedom to choose.*

   Response – see response to #3 and #6; also, with respect to DNR orders, this legislation most certainly supports the patient's individual freedom to choose, and protects them from becoming subject to a DNR order against their will. Determinations of when to discontinue efforts at life-saving interventions fall to the purview of physicians, the policies of the health care institutions, and the accepted standards of medical practice.

8. Providence - *It allows surrogate decision makers to reverse decisions made by individuals who have completed advance health care directives (Sec. 2, pg 2, lines 2-6; Sec. 3, pg 2, lines 7-18; Sec. 6, pg 3, line 4; Sec. 13.52.300, pg 7, lines 6-11, and 15 and 16).*

   Response – this is not correct. See response to #2; also, a real misunderstanding occurs here with respect to what is current law, and what is being proposed in the legislation. The reference to Sec. 13.52.300, pg 7, lines 6-11, and 15 and 16, is all current law as stated in the sample Advance Health Care Directive form. None of this is new or amended language that is being proposed. Rather, the language in question on the form is merely giving the explanation that Part 1 of the form is a durable power of attorney for health care and advising the reader that they may appoint an agent, limit or not limit the agent's authority to make health care decisions for the patient, and if they choose not to limit the agent's authority, a careful description of the specific actions an agent make take on their behalf is identified.

9. Providence – *It mandates that all previously established health care directives become null and void if they were established previously but not in accordance with the new bill directives (Sec. 6, pg 3, lines 14 – 26; Sec. 14, pg 19, lines 23-27).*

   Response – this is an incorrect, overly broad statement. Rather, the bill language mentioned in Sec. 14, pg 19, lines 23 – 27 speaks only to indicate how DNR orders made before the bill's effective date are to be treated in light of the bill.

   Further, 13.52.150 *Do not resuscitate orders and identification of other jurisdictions* states that with respect to DNR orders or DNR identification executed, issued or authorized in another state or territory or possession of the United States - a health care provider or health care institution may presume, in the absence of actual notice to the contrary, that the DNR order or the DNR identification complies with the laws of this state, regardless of where or when it was executed, issued, or authorized, and that the patient is a qualified patient.

10. Providence – *It threatens litigation to providers who will not inflict harm on patients by refusing to perform medically ineffective harmful procedures and aggressive interventions when patients or their families request it (Sec. 8, pg 5, lines 12-14).*

    Response – the language of this section is consistent with current law liability for gross negligence or reckless or intentional actions, and states that immunities from liability do not apply to health care providers, institutions and facilities if the DNR order relied on by these entities was issued in violation of AS 13.52.065.

    The legislation protects health care providers from criminal liability by providing that a violation of 13.52.065 *Do not resuscitate protocol and identification requirements* does not, for any purpose, constitute a homicide (Sec. 9, pg 5, lines 20-21).

11. Providence – *It defaults automatically to doing aggressive painful potentially hazardous procedures on all patients who have not previously established written health care directives that specifically refuse to have CPR or other advanced aggressive interventions (Sec. 6, pg 3, lines 5-10; Sec. 4, pg 2, lines 19-22).*

    Response – this is not correct. This legislation allows patients (or surrogates) to make health care decisions with respect to DNR orders. Most patients do not have advanced health care directives, but defer making end of life decisions until they must be made.

    A misunderstanding occurs here in the sections of legislation identified. Sec. 6, pg 3, lines 5-10 speaks to when a physician may issue a DNR order without the express consent of the patient in various situations, one of which is when a patient has an advance health care directive which indicates the patient wants a DNR, and another situation in which a patient has an advance health care directive which is silent about the issuance of a DNR and another physician concurs in the decision to issue a DNR order.

12. Providence – *It mandates that a physician revoke DNR orders under any circumstance in which a patient, a family member or a surrogate decision maker demands it – even if the interventions demanded are medically ineffective (Sec. 2, pg 2, lines 2-6; Sec. 3, pg 2, lines 7-18).*

    Response – this is an incorrect, overly broad statement. See responses to #2, #6 and #7. True, the legislation protects patients from becoming subject to DNR orders against their will. However, the law clearly lays out process for determining who has standing to act on behalf of the patient, and who does not (13.52.030 *Surrogates).*

13. Providence – *It states that a physician who has "an individual relationship with the patient" may revoke a DNR. It does not specify what that relationship might be (Sec. 6, pg 3, line 31). It states that a physician who is employed by the health care institution where the patient is being treated may revoke a DNR order without establishing a professional patient-physician relationship (Sec. 6, pg 4, lines 1 and 2).*

    Response – we welcome proposed language from Providence. The central idea is to limit the number of uninvolved physicians who could raise objections to a DNR order. Sec. 6, pg 3, line 30 contains the key contextual language *arising out of the physician's* "individual relationship with the patient"; or "employment by the health care institution or health care facility where the patient is being treated". With respect to *individual relationship* – a patient could have close friends, who just happen to be physicians, who know much about the patient's medical situation, and personal values and wishes, but who are not the patient's primary care providers. With respect to *employment by the health care institution....where the patient is being treated* - the patient-physician relationship is implied, but not clearly stated.

14. Providence – *The advance health care directive form has been altered to indicate that any selection by an individual that does not ask for full resuscitation efforts must wish to die (Sec. 13.52.300, pg 11, lines 8-31, and pg 12, lines 1-11). It does not address or support an individual's right to request that their care be focused upon relief of pain and suffering, maximizing comfort and avoiding the prolonging of the dying process.*

    Response – a complete misunderstanding occurs here in the sections of legislation identified. The reference to Sec. 13.52.300, pg 11, lines 8-31, and pg 12, lines 1-11, is all current law as stated in the sample Advance Health Care Directive form. None of this is new or amended language that is being proposed. Further, the plain meaning of this form is clear - to enable patients to provide detailed instructions for health care concerning end-of-life decisions. The form covers the choice to prolong life, not to prolong life (and under what circumstances), additional instructions from patient, choices concerning artificial nutrition and hydration, and relief from pain.

15. Providence - *The new version of the advance health care directive form does not encourage graduated selection of interventions. It is an all or none proposition (13.52.300, pg 13, lines 2-10).* Response – This legislation incorporates the entirety of the current form, with one amendment (pg 13, lines 2-10) to provide an additional choice in the Alaska Health Care Directive form to allow patients to accept or refuse life-sustaining procedures. The current form under Part 2 – Instructions for Health Care, on pages 11 – 13 of the bill, give ample opportunities for graduated selection of interventions as stated in response to #14.

To: Sen. Hollis French
Subject: HB 309!

Dear Senator French,

I am writing to encourage you to take a stand **AGAINST** HB 309 and SB 172.

These bills have the capacity to negate a person's advanced directive and take *medical* decision making out of the hands of the professionals who practice medicine, and place it in the hands of state government.

I do not believe that the people of Alaska would agree with government involvement in our personal health care decisions.

The central tenant of this amendment, which is flawed in an irreparable way, is that of a physician being compelled to provide medical procedures or therapies, which in his or her own judgment, ***inflict greater harm than good*** at the instruction of a patient or his surrogate decision maker.
Advanced directives are meant to allow a patient to approve or disapprove proposed medical procedures; not mandate a specific therapy or therapies.

As an advocate for patients living with chronic illness, and those nearing the end-of-life for most of my professional career, I am involved daily with difficult discussions regarding delivering appropriate, evidenced based, compassionate care to those facing their end days.
I strongly believe that health care providers do their best to promote and preserve life in a manner that is consistent with current standards of care; utilizing medical data that provides prognostic indication, similar case experiences, religious preferences and social norms.
Rarely, **if ever,** is a unilateral decision made about CPR, intubation or aggressive resuscitation.
These are difficult, moral and ethical decisions that weigh heavily upon a medical team with the full understanding that each individual is unique and no one solution applies to all of our society.

This pending legislation is alarming to those who work daily with patients and families who are navigating the complex waters of medical management of chronic and terminal illness.

Providing appropriate medical care is part of the ethical code that nurses and physicians must use to guide their care. Offering a medical intervention which has proven to be harmful, painful , ineffective or is associated with complications which may lead to death, is *inconsistent* with this ethical groundwork.

These bills do not allow open discussion between family members, spouses and loved ones to help make a determination about patient wishes, preferences, prognosis, outcomes and long term impact. In short, they legislate a belief that life, any type or quality of life, must be persevered or those not adhering to this directive will suffer the penalties of law.

Please take the time to examine the serious and harmful content of these bills.
HB 309 is not "fixable" by any edits of language within it. The current statute 13.52.065 is very clear and does not require any revision.

I look forward to hearing from you.

MEMORANDUM January 23, 2012

SUBJECT: Sectional summary of SB 172 relating to health care decisions, including do not resuscitate orders
(Work Order No. 27-LS0991\B)

TO: Senator Fred Dyson
Attn: Chuck Kopp

FROM: Terry Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Amends AS 13.52.045 to prohibit a health care institution or health care facility from interpreting the issuance of a do not resuscitate order as preventing the providing of life-sustaining procedures to the patient.

Section 2. Amends 13.52.060(e) to prohibit a health care provider from declining, for reasons of conscience, to comply with a do not resuscitate order that is consistent with this chapter. Also states that the subsection does not allow a health care provider, health care institution, or health care facility to decline to comply with an individual instruction or a health care decision that requests that cardiopulmonary resuscitation or other resuscitative measures be provided.

Section 3. Amends AS 13.52.060(f) to state that the subsection does not allow a health care provider, health care institution, or health care facility to decline to comply with an advance health care directive or a health care decision that is consistent with the chapter and that requests that cardiopulmonary resuscitation or other resuscitative measures be provided. The subsection addresses declining to comply with an individual instruction or a health care decision that requires medically ineffective health care or health care contrary to generally accepted health care standards.

Section 4. Amends AS 13.52.065(a) limits a physician's right to issue a DNR order. The order may be issued only as provided in AS 13.52.065.

Section 5. Amends AS 13.52.065(b) to require that the protocol (adopted by the department) for withholding cardiopulmonary resuscitation comply with AS 13.52.065.

Section 6. Adds new subsections to AS 13.52.065.

Sec. 13.52.065(g) prohibits a physician from issuing a do not resuscitate order for a patient of the physician without the express consent described in the subsection (except as provided by (h)).

Sec. 13.52.065(h) states when a physician may issue a do not resuscitate order for a patient of the physician without the express consent required by (g) of this section.

Sec. 13.52.065(i) requires a physician to revoke a do not resuscitate order issued for a patient under certain listed circumstances.

Sec. 13.52.065(j) allows a physician to revoke a do not resuscitate order issued by another physician under certain described circumstances.

Section 7. Amends AS 13.52.080(a) to replace a citation to a subsection that is repealed by this bill.

Section 8. Amends AS 13.52.080(c) to provide that its immunity provisions do not apply if a do not resuscitate order relied on by the health care provider, health care institution, or health care facility was issued in violation of AS 13.52.065.

Section 9. Amends AS 13.52.120(b) to clarify that a violation of the new provisions (added by bill sec. 6) does not, in the context of the provision's required consistency with the chapter, constitute a homicide. Adds a cross reference to the new (h) as an exception for applying the subsection's approach to suicide or homicide.

Section 10. Adds AS 13.52.120(h) to state that the provisions in (b) about homicide and suicide do not apply to a person who orders or causes the withholding or withdrawal of life-sustaining procedures and acts intentionally, recklessly, with criminal negligence, or with gross negligence.

Section 11. Amends the optional form in AS 13.52.300 to add a wish regarding life-sustaining procedures.

Section 12. Amends AS 13.52.390 (the definition section) to change the definition of "health care decision" to state that the term includes a direction about receiving cardiopulmonary resuscitation or other resuscitative measures.

Section 13. Repeals AS 13.52.065(f), which currently addresses how DNR orders are made ineffective.

Section 14. Adds a provision to indicate how DNR orders made before the bill's effective date are to be treated in light of the bill.

If I may be of further assistance, please advise.

SENATOR FRED DYSON

CSSB 172 (27-LS0991\D) – EXPLANATION OF CHANGES

The substantive changes in Committee Substitute for SB 172 as introduced on 01/20/12 are as follows:

1. Section 2, p. 2, line 3; and Section 3, p. 2, line 12 – INSERT - **except as provided in AS 13.52.030(h)** to clarify that health care providers may decline to comply with a decision of a surrogate who the health care provider observes is not abiding by the wishes, values and best interest of the patient.

2. Section 2, p. 2, lines 5 – 6, and Section 3, p. 2, lines 14 - 15 –
   DELETE - [cardiopulmonary resuscitation or other resuscitative measures be provided];
   INSERT - **a do not resuscitate order be made ineffective**.

   This reflects the narrow focus of the bill to protect patients from being subject to DNR orders against their consent, and is consistent with current statutory language in AS 13.52.065(f).

3. Section 3, p.2, line 13 - DELETE [advance health care directive] and INSERT **individual instruction**.

   This language change was the original draft intent of Legislative Legal, and is a correction to keep language internally consistent within AS 13.52.060, subsection (f), and with the purpose of the bill.

4. Section 6, p. 3, adds new subsection (h)(3) – when physicians may issue do not resuscitate orders without express consent of patient.

   This particular situation was not previously addressed.

5. Section 6, p. 3, lines 19 and 20 – DELETE [subsection (i)(3)].

   This change recognizes that in the case of a patient who does not have capacity, a dated advance health care directive may not reflect the current wishes, values and best interest of the patient.

6. Section 6, p. 3, lines 23 and 24 – DELETE [or does not oppose]

   This change removes ambiguity.

7. Section 6, p.3, lines 29 – 31, and p.4, lines 1 and 2 - DELETE [; or (2) health care obligation to the patient arising out of the physician's (A) individual relationship with the patient; or (B) employment by the health care institution or health care facility where the patient is being treated.]

   This language change keeps the relationship more narrowly defined to the physician-patient relationship. It provides less complication and is consistent with current chapter language in 13.52.065.

8. Section 8, p. 5, lines 11 - 14 - DELETE all amended language.

   Current statutory language in AS 13.52.080 *Immunities,* and AS 13.52.090 *Statutory Damages* adequately covers health care provider, health care institution and health care facility immunity and liability considerations.

9. Section 9, p. 5, line 16, 20 & 21- DELETE all amended language.

   See comment on #10 below.

10. Section 10, p. 5, lines 29 - 31 and p. 6, lines 1 - 3- DELETE all new subsection language.

    Section 13.52.120(b) already states that withholding or withdrawing of CPR or other life sustaining procedures must be *consistent with this chapter*, and statutory language in AS 13.52.080 *Immunities,* and AS 13.52.090 *Statutory Damages* adequately covers health care provider, health care institution and health care facility immunity and liability considerations.

11. Section 11, p.13, lines 2 - 11 – *Life-Sustaining Procedures.* In addition to the options of receiving or not receiving life-sustaining procedures, an additional option is provided to allow for a patient to select specific life-sustaining procedures so that this is not an "all or none" proposition when electing to receive or not receive life-sustaining procedures.

Re: CSSB 172

Dear Dr. Rust:

This will respond to your request for a legal analysis of the most current version of the Committee Substitute for Senate Bill 172 (CSSB 172), which changes current law on Do Not Resuscitate orders.

We have analyzed the most recent version of Senate Bill 172, along with the 11 numbered changes in the most recent version of the committee substitute for that bill. While the changes in CSSB 172 eliminate the exposure to criminal penalties that were in the original bill, the fundamental change in the current law is still reflected in the committee substitute. CSSB 172 still requires a physician to perform procedures that may violate his or her conscience, violate recognized standards of medical care, or what could constitute medically ineffective health care, contrary to generally accepted health care standards. Sections 2, 3, 6 and 13 of the bill still require a physician to perform cardio-pulmonary resuscitation on a patient who has arrested even when such medical procedure is medically contra-indicated.

The current bill also directly contradicts provisions in three different places in the current Alaska Health Care Decisions Act. First, in AS 13.52.060(e), a health care provider may decline to comply with "an individual instruction," meaning the patient's instruction, "for reasons of conscience." Currently, the exception is that if there is a Do Not Resuscitate order, all health care providers must abide by it and cannot resuscitate a patient for which there is a DNR in place. AS 13.52.060(e) also permits a physician to decline complying with a patient's instruction if the instruction is "contrary to a policy of the institution or facility that is expressly based on reasons of conscience. . ." Consonant with the Ethical and Religious Directives for Catholic Health Care Services, Catholic hospitals do not require resuscitation when such is medically and clinically contra-indicated. Requiring a Catholic hospital to provide or allow the provision of such a procedure when not medically indicated may raise First Amendment, Freedom of Exercise implications.

Second, AS 13.52.060(f) permits a physician to decline a patient's instruction that "requires medically ineffective health care or health care contrary to generally accepted health care standards . . ."

Third, AS 13.52.120(e) states "this chapter does not authorize or require a health care provider or institution to provide health care contrary to generally accepted health care standards applicable to the health care provider or institution."

Although CSSB 172 purports to leave all of that language in, it essentially eliminates those provisions when a patient instructs a physician to attempt to resuscitate the patient after the patient has arrested, meaning stopped breathing or the patient's heart has stopped beating or both; in other words, after the patient has died a natural death. In essence, the CSSB 172 still permits, as the original bill did, the patient to dictate what health care the physician must provide. This is contrary to the entire spirit of the Health Care Decisions Act when it was enacted in 2004, later when it was amended in 2006, and again when it was amended in 2008.

As you may know, Alaska's Health Care Decisions Act was patterned on and very closely follows the Uniform Health Care Decisions Act drafted by the National Conference of Commissioners on Uniform State Laws. The act represents a very comprehensive and cohesive treatment of health care decisions, including but not limited to end of life decisions. As is the case with all uniform laws, they are intended to be uniform so that when people travel from one state to another, they will have the benefit of the same or similar laws on similar subjects. In addition, uniformity assists courts when it is necessary for them to interpret the laws. The changes proposed in CSSB 172 would very significantly destroy that uniformity with the other acts that have been passed in other states. One of the Legislative Research Services memorandums to Senator Dyson dated January 19, 2012, acknowledges that Alaska's act came from the Uniform Health Care Decisions Act. The section from the Uniform Health Care Decisions Act cited in the Legislative Research Services memo is identical to the Alaska equivalent statute, AS 13.52.060(d). That uniformity would be destroyed by the proposed legislation.

Another fundamental point is that the proposed CSSB 172 is not needed. The existing statute already has a mechanism to deal with the situation that apparently provided the impetus for CSSB 172. In that situation, the physician's clinical judgment was that attempted resuscitation following arrest was not clinically indicated while the patient wanted such medical care to be provided anyway. The Alaska Health Care Decisions Act provides a mechanism that comes into play when there is such a dispute between physician and patient or surrogate decision maker. AS 13.52.060(g) provides that when the patient has requested care that the provider is unwilling to provide, care for the patient is transferred to other providers. Subsection (g) sets up a procedure under which the physician informs the patient of the physician's declining to carry out the patient's instructions. The physician then "provides continuing care to the patient until a transfer is affected." Assuming the patient or surrogate assists with the transfer, a physician also

then has the duty to "immediately cooperate and comply with the decision by the patient . . . to transfer . . . to another health care institution, to another health care facility, to the patient's home, or to another location chosen by the patient." This authority would include the ability to transfer to another physician.

Thus, the Health Care Decision Act already provides a mechanism for resolving disputes between patients and their physicians when the patient wants some procedure or medical care that the physician thinks is medically ineffective, unethical or is contra-indicated. When the opposite situation occurs, that is a physician recommending certain care but the patient refusing to consent to it, the result is already established: the patient will not receive the care. The only problem arises when the patient wants affirmative care to be provided that the physician thinks is clinically inappropriate. The statute already provides a way to resolve that situation.

CSSB 172, including the recent changes, appears to be based upon three fundamental mischaracterizations. First, the changes proposed in CSSB 172 confuse cardio-pulmonary resuscitation, a specific medical procedure brought to bear on a person who has died through the cessation of respiration or the cessation of cardio-activity or both with what are referred to as "life sustaining procedures." Cardio-pulmonary resuscitation becomes relevant only when there has been a cardiac or respiratory arrest. "Life-sustaining procedures," as generally understood and as used by AS 13.52, are "bridge" treatments that keep a person alive. "Life sustaining procedures" are defined in the Act at 13.52.390(26) and are defined to mean "any medical treatment, procedure or intervention that, in the judgment of the primary physician, when applied to a patient with a qualifying condition, [i.e., terminal or permanently unconscious] would not be effective to remove the qualifying condition and would serve only to prolong the dying process . . ." In other words, "life sustaining procedures" are treatments applied to people who are still living. They are further defined in the same section to include "assisted ventilation, renal dialysis, surgical procedures, blood transfusion, and the administration of drugs, including antibiotics, or artificial nutrition and hydration." All these treatments are applied to people who are still living. The changes proposed by CSSB 172 confuse CPR with life-sustaining procedures as if they were all the same thing. They are different procedures with different purposes and applied at different times to the patient.

The proposed changes also confuse resuscitation, a medical procedure which is done on a physician's order (like all other care) or medical staff (of physicians) policy with a decision to withhold or withdraw life-sustaining procedures which is a decision always left to the patient or his surrogates.

The Alaska Health Care Decisions Act distinguishes between cardio-pulmonary resuscitation and life sustaining procedures. The proposed changes will confuse or obliterate those distinctions and thus create ample grounds for disputes over correct statutory interpretation.

The second mischaracterization is that the proposed changes confuse the concept of "consent for treatment." The second numbered change proposed for CSSB 172 gives as the reason for that change that it "reflects the narrow focus of the bill to protect patients from being subject to DNR orders against their consent. . . ." The concept of "consent for treatment" applies to treatment that is proposed or recommended by a physician which cannot be administered unless and until a patient consents to the recommended treatment. Procedures performed on the patient to which there has been no informed consent, absent an emergency and presumed consent, are considered battery; and thus all medical treatment requires consent before it can be administered. "Consent for treatment," applies to treatment that is being recommended by the physician. The underlying assumption of the proposed changes for CSSB 172 is that a patient "consents" to a DNR. The DNR is the absence of a medical procedure, not a medical procedure. A patient does not and cannot logically "consent" to treatment that is not being proposed or recommended. This confusion with consent for treatment leads to a transformation of approval of treatment recommended by the physician to a direct order by the patient to the physician that the physician will perform a certain procedure.

It has always been the case, and continues to be the case, that a patient has the option of declining recommended treatment. Even if it is universally accepted that the proposed treatment is good for the patient, the patient can still decline that treatment. But there is a world of difference between a patient's right to decline recommended treatment and a patient's prerogative to demand medical procedures that the doctor thinks are medically ineffective or inappropriate.

The third fundamental confusion is the assumption that the Health Care Decisions Act is ambiguous on whether a physician has the authority to impose or revoke a DNR order. The statute is not ambiguous on that point. AS 13.52.065(f) states that a DNR order may not be revoked unless a physician revokes it. The first sentence in that subsection could be argued to be ambiguous because it also refers to a patient requesting that a DNR order be revoked. But the second and last sentence of subsection (f) makes it clear that it is only a physician who can revoke the DNR order. It states "any physician of a patient for whom a do not resuscitate order is written may revoke the Do Not Resuscitate order if the person for whom the order is written requests that the physician revoke the Do Not Resuscitate order." (Emphasis supplied.) A patient can request it, but a physician's order can be revoked only by a physician. There is really no ambiguity on that point.

If the legislature had intended that when a patient requested the DNR order to be revoked the physician was required to do so, the above underlined word would have been "shall."

The fact that the legislature used the word "may" unambiguously shows that it is the physician who makes the decision. In addition, the definition of "health care decision" found in AS 13.52.390(19) lists five areas upon which the patient can decide the health care that he wants. But requiring resuscitation in the face of a DNR is not among them. The statute thus excludes mandating resuscitation after the patient dies from the definition of "health care decision." Section 9 of CSSB 172 would change that.

Also, Section 10 of CSSB 172 expressly repeals outright A.S. 13.52.060(f) [the current DNR provision] in its entirety, which is a tacit admission that it unambiguously gives the ability to revoke a DNR solely to the physician.

As the Legislative Research Service memorandum dated January 19, 2012 to Senator Dyson sets out, the American Medical Association Code of Medical Ethics has opinions on these issues. E-2.035 provides "physicians are not ethically obligated to deliver care that, in their best professional judgment, will not have a reasonable chance of benefiting their patients. Patients should not be given treatments simply because they demand them. . . ." This is a standard of medical ethics applied across the country.

AMA Code of Ethics Opinion E-2.037 provides that "when further intervention to prolong the life of a patient becomes futile, physicians have an obligation to shift the intent of care toward comfort and closure."

The AMA has a specific medical ethic opinion on Do Not Resuscitate orders. E-2.22 states "when a patient suffers cardiac or respiratory arrest, attempts should be made to resuscitate the patient, except when cardio pulmonary resuscitation (CPR) is not in accord with the patient's expressed desires or is clinically inappropriate." As you know, many patients are inappropriate for resuscitation procedures because of their frailness or other conditions that make the traumatic resuscitation procedures contra-indicated.

In all of medical practice, only a physician has the authority to enter orders calling for the administration of health care to patients in a hospital. The proposed changes would reverse that universal practice when it came to Do Not Resuscitate orders and elevate the patient's desires and demands over the physician's best clinical judgment. Medical care in recent times is always subject to the consent of a patient. Even if the doctor recommends a certain procedure, the patient has the authority to decline to have it administered to him or her. The proposed changes turn this right to decline recommended medical care into a demand that the physician provide medical care regardless of the physician's best medical judgment.

Finally, we note the Division of Legal and Research Services Memorandum dated December 30, 2011, to Senator Dyson, which apparently formed the basis for the CSSB 172, had a number of errors. That memo indicated that the selection of life-sustaining procedures was not sufficiently addressed in the statutory form. Although the term "life-sustaining procedures" is not set out in the form, the form provides for "choice to prolong life" which is understood by all concerned to include a request to use appropriate life-sustaining procedures "within the limits of generally accepted health care standards." The form goes on to address specifically artificial nutrition and hydration and relief from pain. But the initial choice would already call for the application of life-sustaining procedures. The memorandum also suggests that the term "individual instruction" appears to cover a DNR order. As indicated above, it does not. The same sentence misquotes the definition of "health care decision" and mis-cites to the wrong section of the statute. See text of that memorandum on p.2 at fn. 5 and 6. The correct cite is to AS 13.52.390(20). The memorandum then goes on to state that "AS 13.52.065(f) clearly allowed DNR orders to be made ineffective if a patient who is able to make the decision requests this. . . ." As explained above, that is not the case. Finally, in the final paragraph the memorandum states that "it seems that a patient with capacity has the right to make a DNR order ineffective." But that is inconsistent with the language of AS 13.52.062(f), as discussed above.

Consequently, CSSB 172 does not merely "clarify" what was the intent in the original enactment, it is diametrically opposed to the carefully crafted statutory scheme that complied with the uniform law on the subject and with national medical ethical codes. In the last analysis, the changes are unnecessary because the problem attempted to be solved is already addressed within the existing terms of the statute by permitting a patient to transfer to another physician or facility.

We hope the foregoing is helpful. Please let us know if there is further clarification or explanation needed.

Very truly yours,

ATKINSON, CONWAY & GAGNON

Re: CSSB 172
Supplement to March 7 analysis

Dear Dr. Rust:

Mr. Jim Jordon, Executive Director of the Alaska State Medical Association has raised a very good point about the statutes governing physicians that require them to adhere to the AMA Code of Ethics. His point was passed on by Laurie Herman. The purpose of this is to follow-up on that point.

The bottom line is that the statutes and regulations governing physicians requires them to adhere to the nine AMA "Principles of Medical Ethics" appearing at the beginning of the book "Code of Medical Ethics" which includes both those principles as well as all of the opinions adopted by the AMA Counsel on Ethical and Judicial Affairs. None of those nine general principles specifically addresses end-of-life issues or Do Not Resuscitate orders. The closest one is principle VIII which states "a physician shall, while caring for a patient, regard responsibility to the patient as paramount." The nine "principles of medical ethics" do not include the specific ethics opinions referenced in our letter of March 7th.

The details are that Chapter 64 of Title 8 of the Alaska Statutes is the chapter that governs the Alaska State Medical Board, physician licensing, and physician discipline. A.S. 08.64.326(a)(11) states:

> The board may impose a sanction if the board finds after a hearing that a licensee . . .
>
> * * *
>
> (11) Has violated any code of ethics adopted by regulation by the board;

The State Medical Board has adopted regulations which include 12 AAC 40.955 entitled "Ethical Standards." 12 AAC 40.955(a) states:

> The Principles of Medical Ethics of The American Medical Association on p.xiv of the 2002 – 03 Edition of the Council on Ethical and Judicial Affairs, Code of Medical Ethics, published by the American Medical Association are adopted by reference as the ethical standards for physicians and applies to all physicians subject to this chapter.

The AMA publishes its Code of Medical Ethics which includes the nine "Principles of Medical Ethics" now appearing on p.xv of the 2006 – 07 Edition; but they are the same as those referenced in the 2002 – 03 Edition. The "Code of Medical Ethics" includes both these general principles and over 300 pages of ethics opinions on various matters which have been adopted by the Council on Ethical and Judicial Affairs. The State Medical Board's regulation does not explicitly incorporate all of these opinions. But from our conversation with Mr. Jordon, Executive Director of the Alaska State Medical Association, we understand that the State Medical Board interprets its own regulation to include not just simply the nine general principles, but also all of the opinions that are published as part of the "Code of Medical Ethics" by the AMA.

That being the case, requiring a physician to perform or authorize a resuscitation when he did not think it was medically effective or ethical would put him in the impossible position of either violating the new provisions of the Alaska Health Care Act as amended by CSSB 172 or violating the State Medical Board's disciplinary statutes.

PROVIDENCE
Health & Services
Alaska

Senator Fred Dyson
State Capitol, Room 121
Mailstop 3100
Juneau, AK 99801-1182

Dear Senator Dyson:

I recently became aware that in a letter dated January 18, 2012 from you to Senator Bettye Davis, and subsequently made part of the public record for Senate Bill 172, there are statements attributed to the "Chief Operating Officer" and the "Chief Medical Officer" of an area hospital in reference to a specific patient and family. For a number of reasons, I believe that the "chief operating officer" referenced in your letter may be me, and the "chief medical officer" would then be Roy Davis, MD. I wish to clarify a statement attributed to Providence executives in order to avert misunderstanding among interested parties who are neither familiar with the case referenced in your letter nor the mechanisms and laws for physician prescriptions, including "Do Not Resuscitate" ("DNR") orders.

While I presently serve as the chief executive officer of Providence Health & Services Alaska, at the time referenced in your letter, I served as the chief operating officer. You and I spoke on at least two occasions about the case in question. I explained that these cases are almost always highly complicated and emotionally demanding for all parties. Physicians do an outstanding job of considering each patient's needs and of determining the appropriateness for such orders under these challenging circumstances.

Roy Davis, MD, our chief medical officer, indicates that he never spoke with you about the patient matter. However, you did speak with Richard Mandsager, MD. Dr. Mandsager serves as chief executive officer for Providence Alaska Medical Center, and he recalls speaking with you about certain details of the case. We suspect that your reference to the "chief medical officer" was in fact to Dr. Mandsager in his role as chief executive officer.

The specific clarification we wish reflected in the public record is that neither Dr. Mandsager nor any other executive of Providence Health & Services represented to you that the DNR order would be removed from the referenced patient's medical record. Such an action is inconsistent with policy, bylaws and community practice. As such, removal of the DNR was never considered.

I respectfully request that you correct the official record on this important matter.

Sincerely,

Bruce Lamoureux

Bruce Lamoureux
Sr Vice President/Chief Executive Alaska Region

Re: CSSB 172 & Response to Providence Alaska Medical Center's Legal Analysis Memo of March 7, 2012

Dear Dr. Stephen Rust,

I appreciate your patience and professionalism working with my office and the Legislature on our efforts to clarify the roles and responsibilities of physicians and patients with respect to do not resuscitate (DNR) orders as addressed in AS 13.52, the Alaska Health Care Decisions Act. It is my hope that we will find points of agreement on how the law is applied to the process of a physician issuing a DNR order, and a patient's right to make the order ineffective.

This letter is in response to the March 7, 2012 legal analysis memo of CSSB 172 (Version I) that was prepared by the Law Offices of Atkinson, Conway and Gagnon for Providence Alaska Medical Center. I will refer to this legal analysis as "the Memo". I would note that the current version of the bill is Version D, which I have included with this letter for your convenience.

My prime concern pertains to the process of physician issued DNR orders - that of a health care provider unilaterally disregarding the expressed wish of a fully informed patient, who has capacity to make their own health care decisions. The Alaska Health Care Decisions Act (AHCDA) in AS 13.52 makes it explicitly clear that the patient (or surrogate) and health care professional work together in end of life decisions, with neither party retaining absolute authority over the other. Nevertheless, AHCDA is heavily weighted with language protecting the self-determination and autonomy of the patient with respect to end of life care. Most importantly, SB 172 does nothing to change what the law already requires, it only states it more clearly.

In short, if the medical community would agree to follow the law *as it is written,* I would not be pursuing this legislation. The Memo identified three (3) points of law within AHCDA that protect physician rights with respect to provision of care: AS 13.52.060(e)- conscience rights of health care providers and health care facilities; AS 13.52.060(f)- right to decline 'medically ineffective' healthcare; and AS 13.52.120(e)- right not to

senator.fred.dyson@legis.state.ak.us • www.akrepublicans.org

provide healthcare contrary to generally accepted health care standards. I would also add AS 13.52.030(h), which protects a physician's right not to follow a surrogate's direction when the primary health care provider observes a surrogate to not be abiding by the wishes, values and best interest of the patient. Finally, the Memo rightly identifies the patient safeguard provided in AS 13.52.060(g) for when a health care facility or provider refuses to comply with an individual instruction or health care decision of a patient. I believe each of these protections is necessary, however, they must be considered in balance with the entirety of the AHCDA.

The Memo failed to recognize or identify the important patient protections of AHCDA, which provide counterbalance to the health care provider & facility protections. There is a healthy tension built into the AHCDA which encourages the patient and physician to work together. The relevant patient protections in existing law are as follows -

1. Sec. 13.52.060(d)(1)(2) Obligations of health care providers, institutions, and facilities. – notes the health care provider protections mentioned above, then states,

> *A health care provider, health care institution, or health care facility providing care to a patient shall comply with*
>
> *(1) an individual instruction of the patient and with a reasonable interpretation of that instruction made by a person then authorized to make health care decisions for the patient; and*
>
> *(2) a health care decision for the patient made by a person then authorized to make health care decisions for the patient to the same extent as if the decision had been made by the patient while having capacity.(emphasis added)*

2. Sec. 13.52.065(f) Do not resuscitate protocol and identification requirements

> *(f) A do not resuscitate order may not be made ineffective unless a physician revokes the do not resuscitate order, a patient for whom the order is written and who has capacity requests that the do not resuscitate order be revoked, or the patient for whom the order is written is under 18 years of age and the parent or guardian of the patient requests that the do not resuscitate order be revoked. Any physician of a patient for whom a do not resuscitate order is written may revoke the do not resuscitate order if the person for whom the order is written requests that the physician revoke the do not resuscitate order. (emphasis added)*

3. Sec. 13.52.080(a)(6)(B) Immunities

A health care provider or health care institution that acts in good faith and in accordance with generally accepted health care standards applicable to the health care provider or institution is not subject to civil or criminal liability or to discipline for unprofessional conduct for

(6) causing or participating in providing cardiopulmonary resuscitation or other life-sustaining procedures

(B) because an individual has made a do not resuscitate order ineffective under AS 13.52.065 (f) or another provision of this chapter; (emphasis added)

4. Sec. 13.52.100(a)(b)(c) Capacity

a) *This chapter does not affect the right of an individual to make health care decisions while having capacity to make health care decisions.*

b) *An individual is rebuttably presumed to have capacity to make a health care decision, to give or revoke an advance health care directive, and to designate or disqualify a surrogate.*

c) *An individual who is a qualified patient,* ***including an individual for whom a physician has issued a do not resuscitate order, has the right to make a decision regarding the use of cardiopulmonary resuscitation and other life-sustaining procedures as long as the individual is able to make the decision****. If an individual who is a qualified patient, including an individual for whom a physician has issued a do not resuscitate order, is not able to make the decision, the protocol adopted under AS 13.52.065 for do not resuscitate orders governs a decision regarding the use of cardiopulmonary resuscitation and other life-sustaining procedures. (emphasis added)*

5. Sec. 13.52.120(a) Effect of this chapter

   a) *In the absence of evidence to the contrary of the patient's intent, this chapter establishes a presumption in favor of life, consistent with the best interest of the patient. (emphasis added)*

6. Sec. 13.52.130. Prohibited requirements

   As a condition of receiving or being insured for health care services, a health care provider, a health care institution, a health care service plan, an insurer issuing health insurance, a self-insured employee welfare benefit plan, or a nonprofit hospital plan may not require an individual to execute a health care directive, obtain a do not resuscitate order from a physician, or possess do not resuscitate identification.(emphasis added)

These are clearly significant patient protections in the AHCDA that mitigate unilateral physician decision making with respect to DNR orders. Sections 13.52.080 and 13.52.100 mentioned above clearly refute the legal Memo's argument that only the physician may revoke a DNR order, or make an order for cardio-pulmonary resuscitation.

The Memo highlights the very ambiguity in the law which SB 172 seeks to address. It referenced the Ethical and Religious Directives for Catholic Health Care Services, and expressed a concern that SB 172 may bring about a Free Exercise of Religion complaint. In my reading of the Directives, I find that our legislation is entirely consistent with the declarations, and that the Directives never give unilateral authority on end of life decisions to a physician. SB 172 is no more likely to bring about a Free Exercise complaint than is current law. The Directives state in part,

> *"Neither the health care professional nor the patient acts independently of the other; both participate in the healing process. The free and informed consent of the person or the person's surrogate is required for medical treatments and procedures. The functional integrity of the person may be sacrificed to maintain the health or life of the person when no other morally permissible means is available. The free and informed judgment made by a competent adult patient concerning the use or withdrawal of life-sustaining procedures should always be respected and normally complied with, unless it is contrary to Catholic moral teaching."*

The Memo states that SB 172 is contrary to the spirit of the AHCDA. I was one of the prime sponsors of the AHCDA legislation in 2004 and Chair of the House HESS Committee. I have spoken with the legislators and staff members involved with the passage of AHCDA who affirm that SB 172 is entirely consistent with what was intended by the legislative body at that time.

The Memo takes some pains to explain the nuances of 'life-sustaining procedure' and 'cardiopulmonary resuscitation'. This was unnecessary, as SB 172 does not confuse CPR with life sustaining procedures. The language pertaining to life-sustaining procedures in Section 1 of the proposed bill simply says patients who are under a DNR order, do not forgo a right to receive other health care that would help sustain their life. It is straightforward. Further, the Section 8 amendment in CSSB172 concerning life-sustaining procedures to the Advanced Health Care Directives Form was made at Providence Alaska Medical Center request, not the bill sponsor.

The Memo argues that SB 172 destroys the uniformity between AHCDA and the Uniform Health Care Decisions Act. Legislative Legal advises my office that there was not an attempt at uniformity between the two Acts. Some sections were made uniform, but no legislative intent was directed toward cohesive uniformity between the Acts.

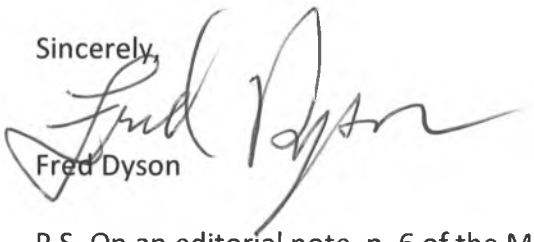
The Memo argues that a DNR order is not treatment as it is not a 'medical procedure'; therefore, "consent for treatment" from the patient for a DNR order is not required. This flawed logic fails to recognize that the default ethical standard/practice in medicine is that, in absence of a DNR order, physicians will attempt life-saving measures, and is properly the expectation of the patient. Further, this reasoning denies a DNR order to be 'health care'. A DNR order directly impacts *how* a patient is treated. Once a patient is under a DNR order, many other decisions about patient health care logically and procedurally follow. A DNR order is a health care decision, and we believe existing law in AHCDA clearly states this decision is not to be made unilaterally by the physician. Section 9 of CSSB 172 amends the current definition of 'health care decision' to include *a direction relating to the provision of cardiopulmonary resuscitation or other resuscitative measures* as identified in current law (see 13.52.100(c) above).

Finally, I do not wish to do away with the protections in statute against provision of 'clinically inappropriate' care. I do wish the decision making process surrounding DNR orders to recognize that a disease outcome model of understanding patient's wishes is not the only frame of reference for these decisions. A physician should be actively seeking to understand the deep values of his/her patient, and asking not only "what's the matter with you?", but "what matters to you?" We should never have a "surprise" at death's door with the patient expecting something entirely different than the physician. Sometimes, what matters to the patient is living to see a special moment or event, and then they can die in peace. The only way to know this is to spend time working through these issues with the patient and their families. It does not all fit well within a 15 minute appointment, and undoubtedly these discussions are very draining for physicians, but they must be done. Otherwise, we are left with a paternalistic approach to end of life decisions. Undoubtedly, it is easier and less expensive for health care

facilities and providers to make these decisions regardless of patient wishes. But I don't think that is what any of us truly desire.

In closing, I believe that our differing patient health care perspectives concerning DNR orders are not that far apart. I do appreciate Providence Alaska Medical Center's good work in many areas of health care. I and my family have directly benefited from Providence health care. Please don't consider this disagreement to mean disapproval of PAMC. This discussion has helped refine my thoughts on DNR orders and the process by which they are issued and made ineffective. I look forward to continuing the dialogue with hopes of achieving a common understanding and interpretation of what AHCDA requires of patients and physicians with respect to the issuance of DNR orders.

Sincerely,



Fred Dyson

P.S. On an editorial note, p. 6 of the Memo mis-cites the wrong section of the ACHDA by referring to AS 13.52.062(f), which does not exist. The correct cite is AS 13.52.065(f).

Subject: Re: a question regarding regulations

I was able to find the original legislation passed in 2004, HB025. Page 51, lines 19-29, subsection (b) directs the Department of Law to change the citations in 7 AAC 16.10 from AS 18.12 to AS 13.52. Apparently that correction was not made, however, this confirms that the current regulations are the DNR protocols for AS 13.52.

Subject: RE: a question regarding regulations

Cindy,

AS 18.12 was repealed in 2004 when AS 13.52.065 was enacted, and later amended in 2006. While I cannot say for sure, it appears that the department determined at least once, and perhaps additional times on review, that the existing protocol satisfied the requirement in AS 13.52. I cannot find another regulation with AS 13.52.065 as its statutory authority.

Cindy, I have looked and haven't found a regulation that references AS 13.52 as its authority. I believe the regulations in 7 AAC 16.010 meet the requirements of AS 13.52.065 although that isn't the citation. I will need to check with the Department of Law for clarification.

In a recent bill hearing, the subject of do not resuscitate orders was discussed.

According to AS 13.52.065 (b):

"The department shall by regulation adopt a protocol, subject to the approval of the State Medical Board, for do not resuscitate orders that sets out a standardized method of procedure for the withholding of cardiopulmonary resuscitation by health care providers and health care institutions".

Can you provide me those regs and that protocol?

RE: SB 172 – Health Care Decisions and Do Not Resuscitate Orders

Dear Senator French:

The Alaska State Medical Association (ASMA) represents physicians statewide and is primarily concerned with the health of all Alaskans.

Thank-you for the opportunity to testify on SB 172 which pertains to health care decisions and do not resuscitate orders.

ASMA urges you not to make any changes in the current law which has been termed Alaska's Health Care Decision Act until you have thoroughly explored all material aspects of this very complex subject. A bill of this complexity introduced in the second 90 day session of a two year Legislature cannot be properly addressed in the time allocated and available. SB 172 deals with death, dying and end of life care, all of which our society for the most part abhors discussing.

It is estimated that only 20% of us have adopted advance directives that document our decisions as to when and how our end of life care is provided. The other 80% of us, leave these decisions until we are gravely ill when decisions are made in an environment that is highly emotionally charged; and often are made by surrogates who may or may not know what care we desired. These decisions are as well guided by closely held personal beliefs, religious tenets, and cultures.

Physicians providing end of life care are an integral part of this decision making process and responsible, first and foremost to the patient. In providing their counsel they are guided by their medical expertise and by their code of ethics (The Principles of Medical Ethics of the American Medical Association which are adopted in AS 08.64, see AS 08.64.326(a)(11), and 12 AAC 40.955 (a)). A physician who violates this code of medical ethics is subject to disciplinary action.

SB 172 (and the work draft seen by ASMA for a committee substitute) provides for the impossible situation for physicians of either violating provisions of SB 172 or violating the AMA's Code of Medical Ethics and thus violating the Alaska State Medical Board's disciplinary statutes.

ASMA understands that Alaska's current Health Care Decision Act was patterned on and closely follows the Uniform Health Care Decision Act drafted by the National Conference of Commissioners on Uniform State Laws. The uniformity benefits the people when they travel from one state to another. It would appear that uniformity would be disrupted by SB 172.

SB 172 would provide a "one size fits all proscription for advance health care directives which is not appropriate for all medical situations that can present. Attached is a very recent article that provides an interesting discussion of the potential "default options". ("Time to Revise the Approach to Delivering Cardiopulmonary Resuscitation Status", Journal of the American Medical Association, March 7, 2012.) This article infers that much more discussion is needed. (Also please note that the 20% of those estimated to have enacted advance directives in Alaska, should SB 172 be enacted, would need to have their personal attorney examine their existing advance directives and modify them if required by this proposed bill.)

SB 172 will impact every Alaskan and every aspect of it needs to be thoroughly addressed by the Legislature. ASMA does not believe that the required and warranted attention can be given to the varied and complex issues in the less than 30 days remaining in this session. To do otherwise, can be a result fraught with unintended consequences most of which could be expected to adversely impact the patient/physician relationship and the care provided.

ASMA stands ready to assist you in forming a group representing various stakeholders to examine all of the pertinent issues in a manner that "first does no harm".

Sincerely,

Mary Ann Foland

March 19, 2011

I. Introduction
   a. RN w a Master in Education Counseling
   b. Executive Director at Hospice of Anchorage for 3 years, volunteer for 28 years
   c. Teach adjunct at UAA – Psychology Department – Intro to Death and Dying
   d. I am testifying as an individual
   e. Thank you for your consideration of this important topic

II. First learned about death
   a. at 5 – uncle from car accident
   b. at 12 – a 3 yo cousin with cancer
   c. at 14 - a friend w muscular dystrophy
   d. at 20 – a 5 yo. cousin

III. In nursing school:
   I learned about how to help people recover from disease, but from my experiences as a child I've always been concerned about how we care for people who biologically can not recover and their families. My heart goes out to Mrs. Mullens in her pain and grief.

IV. What I've learned
   a. Most people fear what they don't know
   b. As a culture American's avoid learning about death and therefore when faced with a life-threatening crisis
      i. most of us do not have any knowledge of the choices we might face nor about what is legal or ethical. Most people are committed "to doing the right thing" – but they don't know what that is.
      ii. we are overwhelmed with emotional pain of fearing loss,
      iii. we ask that our doctors and hospitals - 'stop death'
      iv. when it's biologically impossible (and the doctor is brave enough and takes the time to have that conversation with the individual and family) people sometimes (actually quite often) react with anger as a way to avoid the pain.

V. The solution to the problem
   a. Isn't in this bill. In my opinion this bill creates many more problems for good end of life care than we already have (and we have plenty) and offers no workable solutions.
   b. Because there is no one right way to die, the solution is in each of us learning about the benefits and burdens of some of the common choices we are apt to face, and also the legal and ethical issues that guide care at end of life. And then very importantly talking, with all our loved ones,

about how each of us as individuals want to live until we die - what we want and don't want and why. Hospice of Anchorage hopes to be able to convene a coalition of stakeholders on this important topic.

c. This bill however is not addressing how to care for people at the end of life, which is where the real problem is, but what to do after they die.
    i. Resuscitation is done after someone dies.
    ii. It has a less than 1 % chance of bringing a person w an advanced chronic illness back to life and then only with a high likelihood that the individual's condition will be much worse. (http://www.compassionandsupport.org/index.php/for_professionals/molst_training_center/cpr)
    iii. As Ira Byock, MD, a national expert in end of life care, currently practicing palliative medicine at Dartmouth- Hitchcock Medical Center, in his just published book: The Best Care Possible, pointed out, "The Presidential Commission for the study of Bioethical Issues, and court decision, have said the people have a right to refuse any medical treatments that are offered, and must be give a chance to decide among legitimate and available treatments for their conditions. But the Commission, and the courts have also said that people do not have a right to receive any treatments they desire. The responsibility for determining what treatment options are indicated rest with physicians." (p165) It is against the law to practice medicine without a medical license.

d. This bill in attempting to honor the choices of individual for care at end of life, is actually making it harder to honor choice in a number of ways but most concerning to me (besides the demand that physicians provide futile care):
    i. negates individual freedom to choose and allows surrogate decision makers to reverse decisions made by individuals? In doing so it places an undue burden on families. (Research shows that families whose loved ones die in the hospital suffer multiple negative effects, including higher rates of illness and PTSD, then persons who die at home.)
    ii. it calls into question previously established health care directives and Alaska's Comfort 1 system for expected home deaths.
    iii. it assumes that people who do not ask for full resuscitation efforts must wish to die. While in some circumstances I would not want CPR, I certainly do not want to die. It does not allow for a range of treatments.

VI. In conclusion

a. Physicians and hospitals are programmed to cure, to save lives. And despite advanced medical care, 100% of people still die. It is extremely difficult for physicians and hospitals to stop aggressive treatments, including trying to resuscitate people who have died. It is the rare physician that is willing to write a DNR order when the individual or family express a preference for that procedure, even knowing full well that

procedure is futile and may cause long lasting trauma to the survivors who may witness or demand a CPR attempt. The adherence to the ethics of good medical care should be applauded, not condemned, as this bill attempts to do.

b. Both healthcare professionals and individuals in Alaska need to learn to talk about dying and the choices to be made long before we are in crisis. I have testified as an individual as we do not have an agency statement on this bill. However, Hospice of Anchorage, a volunteer hospice, caring for Alaskans since 1982, is committed to making end of life easier and leading discussions. Please call us if you would like to learn more.

Testimony on SB172
before the Alaska Senate Judiciary Committee
3/19/2012

My name is Bryan Talbott-Clark. I'm a Master-level social worker with Hospice of Anchorage, testifying on my own behalf in opposition to SB 172. In my work here, and in a previous hospital internship, I've worked with numerous families on advance directives and the importance of making their wishes known.

What my experience tells me is that people don't like to talk or think about death until they have no choice. Physicians being people too, most of them don't like to talk about it, either. As I've read about the situations that prompted this bill, I do see a problem that should be addressed, but it's nothing to do with the subject of this bill. The real problem is very much one of understanding and communication around end-of-life issues.

I have to say, it appears to me that some of that very lack of understanding is reflected in the design of this legislation. A Do Not Resuscitate order is not the same as an Advance Directive; it's a statement of professional judgment that resuscitative measures are not medically indicated. A patient's judgment can't make something medically indicated when it isn't. This bill would amount to letting people require medical professionals to act unprofessionally, forcing them to give inappropriate treatments. If the patient or their power of attorney question their doctor's judgment, they can vote with their feet and get another doctor, who can readily revoke a DNR if his or her professional judgment says that's appropriate. But a patient should no more be able to revoke a DNR than they should be able to prescribe their own morphine.

I mentioned communication. If the general public were better educated about their options, if more doctors were more willing to discuss end-of-life issues with their patients sooner, there would be a lot fewer nasty surprises like the situation that prompted this bill. That's what we should be talking about – getting the word out about what kind of choices we may have at the end of our lives, and empowering people to talk about it with their families and their doctors before an illness forces their hand. But this bill won't do any of that.

As you know, the work of a legislator is very much like the work of a doctor. You must always be cautious in considering any intervention, because every intervention carries the risk of harmful consequences, some known, some unforeseen. These consequences must be weighed against the expected benefit of the intervention, whether it's a medical procedure or a legislative act.

The bill before you is clearly the wrong medicine. The predictable harm it will do is substantial, not even counting unforeseen consequences, while its intended effects entirely miss the mark. It will do nothing to improve communication between patients and doctors, while at the same time it stands to criminalize good medical practice and force good doctors to choose between following their ethics and obeying the law.

It's not a matter of tweaking or fixing the bill; SB 172 is the wrong approach entirely, and should not move forward. I urge that the committee act accordingly. Thank you.

Time to Revise the Approach to Determining Cardiopulmonary Resuscitation Status

Craig D. Blinderman, MD, MA
Eric L. Krakauer, MD, PhD
Mildred Z. Solomon, EdD

In US hospitals, cardiopulmonary resuscitation (CPR) is the de facto default option—patients must "opt out" by requesting or consenting to a do-not-attempt-resuscitation order. Despite its worthy intent, requiring all patients or their surrogates to consent to a do-not-attempt-resuscitation order to avoid CPR has resulted in an ethically unjustifiable practice that exposes many patients to substantial harms.

Whenever there is a plausible risk of cardiac arrest, the standard approach is to ask patients or their surrogates about their preferences regarding CPR. However, the very act of asking can suggest to the patient and family that CPR may be beneficial, even when the clinician believes otherwise. Additionally, research in cognitive psychology has revealed that default options are often interpreted as recommendations or guidelines, or as the path of least resistance, and that such default options significantly affect decision making.[1] For these reasons, patients or their surrogates may be biased toward choosing full resuscitation status, even when CPR likely would bring little or no benefit and would risk considerable harm. Therefore, the standard approach of neutrally seeking consent to withhold CPR may inadvertently diminish patients' and families' comprehension of the clinical situation and lead to decisions that are grounded neither in patients' values[2] nor in their best interest.

Instead of assuming that CPR must always be offered, we suggest 3 distinct approaches based on the likelihood and degree of potential benefits and harms of resuscitation. In all 3 approaches, physicians must take the time to fully explain the patient's prognosis and likely disease trajectory, clarify any misconceptions, and elicit the patient's values and goals, which should form the basis for all CPR discussions. However, the options offered by the physician should change as the likely proportion of burdens to benefits increases.

Approach 1: Consider CPR as a Plausible Option

Physicians should discuss CPR as a plausible option when the relative benefits and harms of CPR are uncertain, as is often the case in patients whose chronic illness has not reached end stage. Fried et al[3] have shown that patient preferences for treatment are determined by their attitudes toward the burden of treatment and the likelihood of those possible outcomes. Thus, physicians should explore the patient's or surrogate's understanding of the disease, clarify any misconceptions, and discuss the likelihood of successful CPR (approximately 16% of hospitalized patients survive to discharge following CPR)[4] and possible harms of attempting CPR (eg, injury related to resuscitation efforts, prolonged stay in an intensive care unit, disability, anoxic brain injury, or nursing home placement). Physicians should seek a nuanced understanding of the patient's values and expect that patients in medically similar circumstances may choose differently. The discussion, the resulting resuscitation preferences and status, and the patient's values and goals should be recorded in the medical record.

Approach 2: Recommend Against CPR

Physicians should recommend against CPR when there is a low likelihood of benefit from CPR and a high likelihood of harm, such as when patients have advanced incurable cancer, advanced dementia, or end-stage liver disease.[4] Patients in this category who survive resuscitation are likely to spend their last hours or days in an intensive care unit or have an anoxic brain injury. The physician should approach such patients or their surrogates with a presumption against providing CPR but also remain attentive when discussing the patient's values and goals for unique personal, familial, religious, or cultural factors that might make an attempt at CPR unusually beneficial.

For most of these high-risk patients, physicians should recommend against CPR and explain that they do not want to expose the patient to a procedure that is unlikely to be beneficial and will most likely cause significant harm. Assent to this recommendation by a patient or surrogate would then allow the physician to write a do-not-attempt-resuscitation order. Physicians must be careful not to give

the impression that withholding CPR means giving up (ie, that other treatments will not be provided) or that the patient will be ignored or abandoned. On the contrary, physicians should explain that their intent is to protect the patient and ensure the best possible experience in the final phase of life.

Despite such a recommendation, some patients in this category or their surrogates may request that CPR be attempted for a variety of reasons, including religious or cultural beliefs. It is ethically acceptable for the physician to acquiesce to such a request as long as it is grounded in the patient's values and goals and there is a potential for a modicum of medical benefit.[5]

Approach 3: Do Not Offer CPR

Physicians should not offer CPR to the patient who will die imminently or has no chance of surviving CPR to the point of leaving the hospital. Once this determination is made, and absent extraordinary but reasonable patient values or goals that might make the harms of CPR in this situation worth risking, it is, in our opinion, not only ethical, but also imperative, that CPR not be offered. The physician's primary responsibility is to protect the patient from unnecessary harm. Indeed, CPR was not intended to be used in this clinical situation.[6]

Not offering CPR for imminently dying patients should be explicitly permitted by hospital policy. However, the decision not to offer CPR should be disclosed to the patient or surrogate. As in the previous approach, physicians should not give the impression that not attempting CPR means giving up or that the patient will be ignored or abandoned, but rather that the intent is to protect the patient from harm and maximize comfort.

If a patient or surrogate continues to insist that CPR be attempted, an ethics consultation should be requested if available. If the ethics consultants concur that the case falls within this clinical situation, and absent highly unusual patient values or goals, the consultants should gently and respectfully inform the patient or surrogate of their support for the decision to not attempt CPR and enter a note to this effect in the medical record. Support from a social worker, chaplain, or patient advocate should be made available to the patient and family as appropriate.

Conclusions

Whenever there is a reasonable chance that the benefits of CPR might outweigh its harms, CPR should be the default option. However, in imminently dying patients, a default status of full resuscitation is not justifiable. Not only is CPR in this situation likely to harm patients without compensatory benefit, the default framework likely influences patients and surrogates to request that full resuscitation is attempted even when the physician believes doing so may be inappropriate. The default option in this situation should be an order to not attempt CPR, perhaps coupled with consultation by a palliative care specialist. Similar reasoning may have motivated 15% of nursing homes in Wisconsin to develop policies that make withholding CPR the default option and to offer full-code status only on an opt-in basis.[7]

Physicians are responsible for recommending the medical means to honor their patients' values and for helping them to identify and achieve their health care goals. This responsibility becomes crucial in the setting of life-threatening illness, in which patients are especially vulnerable and may be exposed to potentially harmful life-sustaining interventions. While promotion of patient autonomy is a fundamental responsibility of physicians, protecting the patient from harm becomes increasingly important as the patient becomes more vulnerable. Sometimes, it should be preeminent.

Conflict of Interest Disclosures: All authors have completed and submitted the ICMJE Form for Disclosure of Potential Conflicts of Interest. Dr Blinderman reported that he has served on speakers bureaus for Cephalon and has received travel accommodations and honorarium from the International Multidisciplinary Forum on Palliative Care for speaking at a conference in 2010 and from the Vietnam-Centers for Disease Control and Prevention-Harvard Medical School-AIDS Partnership for training and supporting Vietnamese clinicians in palliative care. Drs Krakauer and Solomon did not report any disclosures.

Subject: SB172

Hi Cindy,

Dr. Ryan McGhan, a critical care intensivist in Anchorage will be calling in via the 855 number to testify on SB172 on Monday in Senate Judiciary. He works nights so will sleep for a few hours and get up to call in so it would be very difficult for him to go to the LIO.

Thanks.

Laurie

AHCHA
Alaska Home Care & Hospice Association

April 24, 2012

Alaska State Senators,

We, members of the Alaska Home Care and Hospice Association (AHCHA), are writing to express the concerns of our membership related to a bill that was recently reviewed in the Alaska State Senate Judiciary Committee – SB 172. The bill was apparently introduced to address a perceived gap in the current Alaska Statute (Health Care Decisions Act AS 13.52, enacted in 2004), specifically the issue that a physician can issue a 'Do Not Resuscitate' (DNR) order without the expressed consent of a patient or surrogate decision maker. The current laws, and ethical health care processes, already allow a physician to decline to provide CPR while assisting the patient/family to find a physician willing to follow the patient/family wishes.

Our concerns relate to the impact that this proposed bill would have on our current DNR, 'Expected Home Death', and/or 'Comfort One' processes that occur outside of the acute care setting, and which are recognized state wide by healthcare, law enforcement and emergency response organizations. Home Health staff, Hospice staff and Physicians throughout the state, often care for the medically frail and dying members of our communities in the comfort of the dying persons home. The current law is reasonably clear on these types of situations, allowing Alaskan citizens to die peacefully at home when they have indicated that preference. Our position is that the current law has worked well for over 5 years. It allows Alaskans to express their desires related to end of life choices, and to die peacefully at home without the threat of their wishes being disregarded.

SB 172 appears to negate any Advance Directives currently in place, requiring that health care providers revisit the issue with patients and families, and to bow to the wishes of a surrogate decision maker who can now demand that CPR be provided, even when there is clearly no benefit to the patient, and/or the patient previously indicated that he or she does not desire resuscitation. While patients/surrogate decision makers may always decline any offered treatment, they have never had a right to demand a medical procedure that has not been offered. This bill would change that time honored dynamic. It will place community health care providers in the position of being required to provide a procedure that they know is futile and possibly traumatic for the family to witness.

The wording of SB 172 is ambiguous and may create increased confusion among health care providers and members of the community, resulting in increased strain on our Emergency Response System and more expensive, futile, and potentially distressing trips to the Emergency Room at the end of life.

We urge you to carefully consider the potential impact of any proposed changes to our current law in this session or future sessions of the legislature. The proposed SB 172 is trying to fix something that does not need to be fixed, and may create potential legal and medical problems, as well as unnecessary anguish for physicians, nurses, and Alaskan families in its wake.

Sincerely,

Jacob Malouf

Our View: First do no harm

Bill on CPR in terminal cases raises its own serious issues

(03/21/12 19:05:32)

Sen. Fred Dyson testified that his strong respect for life prompted his effort to rewrite part of the state's patients' rights law. Senate Bill 172 would not restrict a patient's right to refuse treatment to prolong life. But in cases where the patient's or a spouse or other family member's demands for treatment conflicted with a doctor's judgment or ethical standards, cardio pulomonary resuscitation might be required.

Medical professionals who testified were not in favor of the bill, pointing out that CPR is not a gentle procedure, especially for older terminal patients and that it may prolong life at a cost of much greater pain and misery for the patient.

That runs counter to the medical maxim, "First do no harm." Respect for life could make dying far more painful than it needs to be. Many who have been with a dying loved one have experienced that point where the patient waves off any more help, when they realize the fight for life is over. Hence the mercy in giving patients the right to refuse treatment, either at the time or in advance.

On the other side of that equation is testimony by one widow who said both she and her husband wanted life-sustaining treatment, no matter the pain, until the end, because of their faith -- faith that is often most precious at such times. What should doctors, who might argue that CPR in such cases could break ribs, cause more suffering or even hasten death, do in such cases? How would they reconcile the amended law and their own code?

The patients' rights law is good in letting patients decide when to simply let nature take its course. In one sense Dyson's bill keeps that decision with the patient and spouse or other surrogate. But the bill

creates a dilemma for doctors -- who already, with families, face hard calls about how far to go in prolonging a life.

There is no template answer for end of life decisions. In most cases, those final decisions are best made by patients and families. But in these most personal times, they're not the only ones involved. Lawmakers need to think this one over for awhile.

BOTTOM LINE: Patients' rights rewrite may solve one problem, create more.

Providence Health & Services Alaska
Review of Senate Bill 172 and House Bill 309
Prepared by Providence Physician Leadership - February 10, 2012 and Unanimously Endorsed by the Providence Alaska Medical Center's (PAMC) Medical Executive Committee, elected representatives of physicians who hold medical privileges at PAMC – February 13, 2012

At first glance, Senate bill # 172 and its partner bill #309 in the House, appear to empower patients to make decisions about their health care at the end of life (Sec. 1 pg 1 lines 3-7). However, on further review these bills contain language involving a very complex decision making process that normally occurs between a patient and his or her physician.

These bills attempt to legislate a complex decision making process and make a "one size fits all" model for end-of-life care. Specifically, these bills are concerned with advanced health care directives which may be made independently or may accompany a will or estate planning. The advanced health care directive is designed to give direction to your family, loved ones and health care providers about care choices if you become critically ill and cannot make decisions for yourself. Ideally, every individual would make this directive ahead of time, when they are clear of mind and not under stress or distracted in any way. In reality, fewer than 1 in 5 individuals arriving to a hospital have an advanced directive(Halpern NA, Pastores SM, Chou JF, Chawla S, Thaler HT, Palliat Med. 2011 Apr;14(4):483-9. Epub 2011 Mar 18; . Knott CI, Psirides AJ, Young PJ, Sim D., Crit Care Resusc. 2011 Sep;13(3):167-74).

These bills also address requests by patients or health care providers to use or not to use advanced medical procedures in an attempt to keep them alive. New terminology adopted by several states terms these issues as "Allow Natural Death," (AND). In Alaska, the terminology utilized is called DNR (do not resuscitate) orders and advanced resuscitative measures. A DNR order can be initiated with or without an advance health care directive. Historically, A DNR is a written agreement that is made between a physician and a patient after discussion about a patient's medical condition. A DNR can answer questions about whether a patient wants CPR (chest compressions or cardiopulmonary resuscitation), wants artificial breathing applied (also called intubation) or some assistance with breathing if an individual needs assistance on a temporary or long term basis. It addresses artificial nutrition if an individual is temporarily or permanently unable to swallow or eat. It addresses the use of antibiotics for infection and other medications to support blood pressure. It addresses the use of electricity/shocking of the heart to reset or restart the heart if the heart stops. .

The decisions made by an individual about how they want to spend their end days are complex and personal. Each person has their own set of circumstances that guide their decision making. The decision may be based on what types of illnesses an individual has or how long they have had these illnesses. It may have to do with their ability or inability to tolerate pain and suffering. It may be directly or indirectly related to religious or cultural beliefs. It may reflect a preference to allow all bodily processes to occur

naturally and not be artificially supported. It may have to do with a desire not to be a burden to family or loved ones if circumstances alter one's ability to care for themselves. It may reflect financial concerns.

The list of reasons why people make decisions is lengthy and unique to each individual. These decisions should be discussed at length with family and loved ones and preferably with a physician who can communicate the degree and prognosis of illnesses with the individual and their loved ones. Ideally, everyone knows and understands the choices and why they are made.

In reality, fewer than 1 in 5 patients admitted to the hospital have made these decisions even though they may have very complicated advanced illnesses or injuries (Halpern, et.al. and Knott et.al.). In general, the American culture tends to not discuss death and dying and is generally unprepared to address these issues until they are forced to do so when confronted by a life altering or life threatening injury or illness. The decisions must then be made under stress. The worst case scenario presents when a patient is not able to make decisions and family members must make decisions while hoping they know what a patient may want. Often families do not know, are unsure, or simply are not present or cannot be found. Whenever possible, these decisions are made in advance. When they have not been made in advance, the medical team caring for the patient is faced with making the decisions together with available family members. Decisions are based upon what is known about the illness(es) or injuries, progression of disease, and benefits vs. harm of interventions. These decisions are crafted with input from family regarding patient preferences. It is a complex process and made with due diligence, generally with the input of many care providers, in addition to family wishes. They are not made lightly.

It is important to note that advanced interventions including CPR, artificial breathing techniques, artificial nutrition, shocking of the heart, etc. are helpful only in very specific medical circumstances. They are not applicable to each and every end of life illness or injury no matter what is portrayed on TV (references: code of Ethics of the American Medical Association (AMA), Opinions 2.035, 2.095). In fact, many of these interventions are painful and are rarely successful (Ebell & Alfonsa; Family Practice 2011; 28:505-515) . They are often associated with severe painful and sometimes persistent complications that leave the few who survive the procedures permanently impaired. CPR for example, was designed to be utilized in only a specific subset of heart patients (Kouwenhouen JAMA 1960 173: 1064-7). It was not recommended for other situations because the likelihood of survival is so low and the risks of complications are so high. For example, advanced cancer patients have not been shown to benefit from CPR. The procedure frequently causes broken ribs and a broken breast bone and collapsed lungs, to mention only a few of the potential complications. The benefits of the procedures should clearly outweigh the potential risks of the complications associated with these procedures. In end stage cancer, the benefits rarely outweigh the risks. When they do outweigh the risks, then CPR and other advanced aggressive procedures are performed. However, medical standards do not recommend doing advanced aggressive interventions in every case (references: code of Ethics of the American Medical Association (AMA), Opinions 2.035, 2.095). In these situations, the

recommendation is to provide full support for patients, but not to provide procedures that have a higher risk of injury than to provide benefit, irrespective of a DNR that may be in effect.

The House and Senate bills do not reflect the complexity of this decision making process. This legislation is inappropriate for a large portion of individuals by mandating the following:

1. These bills attempt to mandate that aggressive potentially hazardous interventions be performed on every patient who requests it, no matter what the underlying disease, injury or illness (Sec.2 pg 2, lines 2-6, Sec 3. Pg 2 lines 11-15.

2. If the patient is not capable of decision making, a surrogate decision maker can mandate that potentially hazardous interventions be performed EVEN if the patient's advance health care directive states otherwise (Sec. 3. Pg 2 lines 11-15, Sec 6. Pg2, lines 29-31and pg 3, line 4, Sec 12, pg 19, lines 18,19).

3. It agrees that health care providers can identify medical futility (when procedures or interventions will not help a patient condition) but it further mandates that health care providers cannot refuse to apply potentially harmful interventions to patients if they or their families demand it. This is true even when the procedures are deemed to be medically ineffective (Sec 3. pg 2, lines 7-18) .

4. In short, it mandates that providers batter patients, by performing painful and potentially harmful procedures that are in direct contrast to generally acceptable medical practice s (Sec 3. pg 2, lines 7-18) .

5. It mandates that under certain circumstances health care providers may not adhere to their medical creed to "first do no harm". It mandates that providers harm patients. (Sec 3. pg 2, lines 7-18).

6. It does not encourage or support the input of medical providers or collaborative efforts to determine the best course of care by weighing all of the care options with clear understanding and discussion of risks vs. benefits (Sec 3. pg 2, lines 7-18) ..

7. It encourages individuals to direct hospitals and health care providers to perform potentially harmful interventions on patients who will not benefit from these interventions (Sec 3. pg 2, lines 7-18, (Sec.2 pg 2, lines 2-6). It negates individual freedom to choose.

8. It allows surrogate decision makers to reverse decisions made by individuals who have completed advance health care directives (Sec.2 pg 2, lines 2-6, Sec 3. pg 2, lines 7-18, Sec 6 pg 3 line 4, Sec. 13.52.300 pg 7, lines 6-11, and 15 and 16.)

9. It mandates that all previously established health care directives become null and void if they were established previously but not in accordance with the new bill directives (Sec 6 pg 3, lines 14-26, Sec 14. Pt 19, lines 23-27).

10. It threatens litigation to providers who will not inflict harm on patients by refusing to perform medically ineffective harmful procedures and aggressive interventions when patients or their families request it (Sec 8. Pg 5, lines 12-14).

11. It defaults automatically to doing aggressive painful potentially hazardous procedures on all patients who have not previously established written health care directives that specifically refuse to have CPR or other advanced aggressive interventions (Sec. 6 pg 3 lines 5-10, Sec 4. Pg 2 lines 19-22).

12. It mandates that a physician revoke DNR orders under any circumstance in which a patient, a family member or a surrogate decision maker demands it – even if the interventions demanded are medically ineffective. (Sec.2 pg 2, lines 2-6, Sec 3. pg 2, lines 7-18)

13. It states that a physician who has an "individual relationship with the patient" may revoke a DNR. It does not specify what that relationship might be. (Sec 6. Pg 3, line 3)It states that a physician who is employed by the health care institution where the patient is being treated may revoke a DNR order without establishing a professional patient -physician relationship (Sec. 6 pg 4, lines 1 and 2).

14. The advance health care directive form has been altered to indicate that any selection by an individual that does not ask for full resuscitation efforts must wish to die (Sec 13.52.300, pg 11 lines 8-31 and pg 12, lines 1-11.). It does not address or support an individual's right to request that their care be focused upon relief of pain and suffering, maximizing comfort and avoiding the prolonging of the dying process.

15. The new version of the advance health care directive form does not encourage graduated selection of interventions. It is an all or none proposition (Sec 13.52.300, pg 13, lines 2-10).

Page 19 simply needs to be deleted altogether.

Why the medical community has grave concerns

- It does not allow those individuals with the most expert understanding of health and disease and prognosis to exercise their expertise.
- It implies that DNR orders are made flippantly and without deep compassionate concern for the welfare of patients.
- It makes an assumption that doing potentially harmful and painful interventions are always in the patients' best interests despite accepted medical standards that indicate otherwise.
- It ignores the Hippocratic Oath and that health care providers must first do no harm . It supports the battery of patients by mandating that harmful procedures be performed on patients without regard to the benefit vs. risk assessment of these interventions

- It does not support the time honored tradition of patient physician relationship in which these discussions should be made.
- It makes an assumption that every patient feels that the quantity of life trumps the quality of life
- It does not promote death with dignity
- It forces families and loved ones to reconsider the decisions of their loved ones and consider reversing decisions that may cause irreparable psychological and emotional damage in the long run.
- It assumes that physicians do not err on the side of over-utilizing CPR. It assumes that providers underutilize these aggressive procedures. This is untrue.

Considerations for Alaska citizens who do not want government intrusion into personal medical decision making

- It makes an assumption that each individual values the quantity of life over the quality of life without regard to the degree of suffering an individual may experience.
- It assumes that every individual wants artificial support even when it has been shown to not be helpful.
- It assumes that every person wants to have CPR and undergo potential pain and suffering from these procedures even when they have been shown not to be of any benefit.
- It allows other individuals to reverse your right to death with dignity because they are afraid to lose you. It implies that they may not value your life if they do not at least try the aggressive resuscitative measures.
- It forces others to ignore your choices and decide for themselves whether or not to honor your wishes.
- It mandates that every individual should be treated the same. It is a "cookie cutter approach" to medical care assuming that each person wants the same thing as proponents for the right to life.
- It has the potential to reverse a well thought out decision for end of life care that may have been made by you for reasons unknown to other individuals.
- It does not allow those who have not yet made advanced directives to have well thought out approaches to their medical care and instead defaults to the use of aggressive medical interventions

- It assumes that physicians do not make medical decisions incorporating acceptable medical standards of care.
- It assumes that a patient and their physician cannot tailor a unique care plan for each individual. Instead, a legislator with no medical experience whatsoever can mandate the procedures that will happen to you at the end of life.
- It mandates patients with extremely advanced medical conditions undergo these procedures simply because they do not have advance health care directives.
- It insists that all previously established advanced health directives and DNR orders be reconsidered and must be in compliance with the new standards established with this new bill.

Hollis French- Senate Judiciary Chair

Hollis,

Thank you for hearing SB 172-I think you will hear why this is a very important clarification of the existing statues.

We would appreciate your allowing the hearing on SB-172 to proceed as follows:

Sponsor presentation- including explanation of the changes in the Sponsor substitute, (most of the sponsor changes are a result of meetings with Providence staff), and sectional analysis.

Testimony of Margery Mullins, the person whose experience with her husband (now deceased) brought the problems with ambiguities in the existing statues to light.

Testimony of Providence staff and supporters and Attorney(s)

Terry Banister to answer legal questions from committee

Testimony of Doctor's

-Dr. Ward Hurlburt-Chief Medical Officer of the State

-Dr. George Rhyneer- Former Chief Medical officer at Prov.

-Dr. Donald Olsen-Alaska State Senate

Final questions and debate.

ALASKA STATE SENATE

SENATOR FRED DYSON

Date: January 30, 2012

To: Senator Hollis French, Chair
Senate Judiciary

From: Senator Fred Dyson

Re: Committee Hearing Request for SB 172

I respectfully request a committee hearing be scheduled for SB 172, "An Act relating to health care decisions, including do not resuscitate orders."

Contact: Chuck Kopp, Staff to Senator Fred Dyson, (907)465-2199

During Session (January - May): Alaska State Capitol • Juneau, Alaska 99801 • (800) 342-2199 • (907) 465-2199 • (907) 465-4587 (fax)
During Interim (June-December): 10928 Eagle River Road, Suite 238 • Eagle River, Alaska 99577 • (907) 694-6683 • (907) 694-1015 (fax)
senator.fred.dyson@legis.state.ak.us • www.akrepublicans.org

Sec. 13.52.010. Advance health care directives.

(a) Except as provided in AS 13.52.173 , an adult may give an individual instruction. Except as provided in AS 13.52.177 , the instruction may be oral or written. The instruction may be limited to take effect only if a specified condition arises.

(b) An adult may execute a durable power of attorney for health care, which may authorize the agent to make any health care decision the principal could have made while having capacity. The power remains in effect notwithstanding the principal's later incapacity and may include individual instructions. The power must be in writing, contain the date of its execution, be signed by the principal, and be witnessed by one of the following methods:

(1) signed by at least two individuals who are personally known by the principal, each of whom witnessed either the signing of the instrument by the principal or the principal's acknowledgment of the signature of the instrument; or

(2) acknowledged before a notary public at a place in this state.

(c) Unless related to the principal by blood, marriage, or adoption, an agent under a durable power of attorney for health care may not be an owner, operator, or employee of the health care institution at which the principal is receiving care.

(d) A witness for a durable power of attorney for health care may not be

(1) a health care provider employed at the health care institution or health care facility where the principal is receiving health care;

(2) an employee of the health care provider providing health care to the principal, or of the health care institution or health care facility where the principal is receiving health care; or

(3) the agent.

(e) At least one of the individuals used as a witness for a durable power of attorney for health care shall be someone who is not

(1) related to the principal by blood, marriage, or adoption; or

(2) entitled to a portion of the estate of the principal upon the principal's death under a will or codicil of the principal existing at the time of execution of the durable power of attorney for health care or by operation of law then existing.

(f) Unless otherwise specified in the durable power of attorney for health care, the authority of an agent becomes effective only upon a determination that the principal lacks capacity and ceases to be effective upon a determination that the principal has recovered capacity.

(g) Unless otherwise specified in a written advance health care directive, a determination that a principal lacks or has recovered capacity, or that another condition exists that affects an individual instruction or the authority of an agent, shall be made by

(1) the primary physician, except in the case of mental illness;

(2) a court in the case of mental illness, unless the situation is an emergency; or

(3) the primary physician or another health care provider in the case of mental illness where the situation is an emergency.

(h) An agent shall make a health care decision in accordance with the principal's individual instructions, if any, and other wishes to the extent known to the agent. Otherwise, the agent shall make the decision in accordance with the agent's determination of the principal's best interest. In determining the principal's best interest, the agent shall consider the principal's personal values to the extent known to the agent.

(i) A health care decision made by an agent for a principal is effective without judicial approval.

(j) A written advance health care directive may include the individual's nomination of a guardian of the individual.

(k) Except as provided in AS 13.52.247 (a), an advance health care directive, including an advance health care directive that is made in compliance with the laws of another state, is valid for purposes of this chapter if it complies with this chapter, regardless of where or when it was executed or communicated.

(l) Notwithstanding the sample form provided under AS 13.52.300, an individual instruction that would be valid by itself under this chapter is valid even if the individual instruction is contained in a writing that also contains a durable power of attorney for health care and the durable power of attorney does not meet the witnessing or other requirements of this chapter.

Sec. 13.52.020. Revocation of advance health care directive.

(a) Except in the case of mental illness under (c) of this section, a principal may revoke the designation of an agent only by a signed writing or by personally informing the supervising health care provider.

(b) Except in the case of mental illness under (c) of this section and except as provided by AS 13.52.183 , a principal may revoke all or part of an advance health care directive, other than the designation of an agent, at any time and in any manner that communicates an intent to revoke.

(c) In the case of mental illness, an advance health care directive may be revoked in whole or in part at any time by the principal if the principal does not lack capacity and is competent. A

revocation is effective when a competent principal with capacity communicates the revocation to a physician or other health care provider. The physician or other health care provider shall note the revocation on the principal's medical record. In the case of mental illness, the authority of a named agent and an alternative agent named in the advance health care directive continues in effect as long as the advance health care directive appointing the agent is in effect or until the agent has withdrawn. For the purposes of this subsection, a principal is not considered competent when

(1) it is the opinion of the court in a guardianship proceeding under AS 13.26, the opinion of two physicians, at least one of whom is a psychiatrist, or the opinion of a physician and a professional mental health clinician, that the principal is not competent; or

(2) a court in a hearing under AS 47.30.735 , 47.30.750, or 47.30.770 determines that the principal is gravely disabled; in this paragraph, "gravely disabled" has the meaning given in AS 47.30.915 (7)(B).

(d) A health care provider, agent, guardian, or surrogate who is informed of a revocation shall promptly communicate the fact of the revocation to the supervising health care provider and to any health care institution at which the patient is receiving care.

(e) A decree of annulment, divorce, dissolution of marriage, or legal separation revokes a previous designation of a spouse as agent unless otherwise specified in the decree or in a durable power of attorney for health care.

(f) An advance health care directive that conflicts with an earlier advance health care directive revokes the earlier directive to the extent of the conflict.

Sec. 13.52.025. Rescission of withdrawal by agent.

A person who has withdrawn as an agent may rescind the withdrawal by executing an acceptance after the date of the withdrawal. A person who rescinds a withdrawal shall give notice to the principal if the principal has capacity or to the principal's health care provider if the principal does not have capacity.

Sec. 13.52.030. Surrogates.

(a) Except in the case of mental health treatment and except as provided by AS 13.52.173 and 13.52.193, a surrogate may make a health care decision for a patient who is an adult if an agent or guardian has not been appointed or the agent or guardian is not reasonably available, and if the patient has been determined by the primary physician to lack capacity.

(b) Subject to AS 13.52.055 (b), a surrogate may make a decision regarding mental health treatment for a patient who is an adult if

(1) an agent or guardian has not been appointed or the agent or guardian is not reasonably available;

(2) the mental health treatment is needed on an emergency basis; and

(3) the patient has been determined to lack capacity by

(A) two physicians, one of whom is a psychiatrist; or

(B) a physician and a professional mental health clinician.

(c) Except as provided for anatomical gifts in AS 13.52.173 , an adult may designate an individual to act as surrogate for that adult by personally informing the supervising health care provider. Except as provided by AS 13.52.173 or 13.52.193, in the absence of a designation, or if the designee is not reasonably available, a member of the following classes of the patient's family who is reasonably available, in descending order of priority, may act as surrogate:

(1) the spouse, unless legally separated;

(2) an adult child;

(3) a parent; or

(4) an adult sibling.

(d) Except as provided by (l) of this section or AS 13.52.173 or 13.52.193, if none of the individuals eligible to act as surrogate under (c) of this section is reasonably available, an adult who has exhibited special care and concern for the patient, who is familiar with the patient's personal values, and who is reasonably available may act as surrogate.

(e) A surrogate shall communicate the surrogate's assumption of authority as promptly as practicable to the health care provider, the health care institution, and the members of the patient's family specified in (c) of this section who can be readily contacted.

(f) If more than one member of a class under (c)(2) - (4) of this section assumes authority to act as surrogate, the members of that class do not agree on a health care decision, and the supervising health care provider is informed of the disagreement, the supervising health care provider shall comply with the decision of a majority of the members of that class who have communicated their views to the provider. If the class is evenly divided concerning the health care decision and the supervising health care provider is informed of the even division, that class and all individuals having a lower priority under (c)(2) - (4) of this section are disqualified from making the decision, and the primary physician, after consulting with all individuals in that evenly divided class who are reasonably available, shall make a decision based on the consultation and the primary physician's own determination of the best interest of the patient.

(g) A surrogate shall make a health care decision in accordance with the patient's individual instructions or other advance health care directives, if any, and other wishes to the extent known to the surrogate. Otherwise, the surrogate shall make the decision in accordance with the

surrogate's determination of the patient's best interest. In determining the patient's best interest, the surrogate shall consider the patient's personal values to the extent known to the surrogate.

(h) If a patient's primary health care provider observes that a surrogate is not abiding by the wishes, values, and best interest of the patient, the primary health care provider may decline to comply with a decision of the surrogate and shall notify the health care institution where the primary health care provider is providing health care to the patient.

(i) A health care decision made by a surrogate for a patient is effective without judicial approval.

(j) A patient who has capacity may, at any time, disqualify another person, including a member of the patient's family, from acting as the patient's surrogate by a signed writing or by personally informing the supervising health care provider of the disqualification.

(k) Unless related to the patient by blood, marriage, or adoption, a surrogate may not be an owner, operator, or employee of the health care facility where the patient is receiving care.

(l) A supervising health care provider may require an individual claiming the right to act as a surrogate for a patient to provide a written declaration under penalty of perjury stating facts and circumstances reasonably sufficient to establish the claimed authority.

Sec. 13.52.040. Decisions by guardian.

(a) Subject to AS 13.52.183 , 13.52.193, and 13.52.203, a guardian shall comply with the ward's individual instructions and may not revoke a ward's advance health care directive executed before the ward's incapacity unless a court expressly authorizes the revocation.

(b) Unless there is a court order to the contrary, a health care decision of an agent takes precedence over that of a guardian.

(c) Except as provided in (a) of this section, a health care decision made by a guardian for the ward is effective without judicial approval.

Sec. 13.52.045. Withholding or withdrawing of life-sustaining procedures.

Notwithstanding any other provision of this chapter, an agent or a surrogate may determine that life-sustaining procedures may be withheld or withdrawn from a patient with a qualifying condition when there is

(1) a durable power of attorney for health care or other writing that clearly expresses the patient's intent that the procedures be withheld or withdrawn; or

(2) no durable power of attorney for health care or other writing that clearly expresses the patient's intent to the contrary, the patient has a qualifying condition as determined under AS

13.52.160 , and withholding or withdrawing the procedures would be consistent with the patient's best interest.

Sec. 13.52.050. Decisions for exceptional procedures.

Unless there is a durable power of attorney for health care or another writing clearly expressing an individual's intent to the contrary, an agent or surrogate may not consent on behalf of a patient to an abortion, sterilization, psychosurgery, or removal of bodily organs except when the abortion, sterilization, psychosurgery, or removal of bodily organs is necessary to preserve the life of the patient or to prevent serious impairment of the health of the patient.

Sec. 13.52.055. Pregnancy.

(a) Before implementing a health care decision for a woman of childbearing age that would affect a fetus if present, the supervising health care provider shall take reasonable steps to determine whether the woman is pregnant.

(b) Notwithstanding any other provision of this chapter to the contrary, an advance health care directive by a patient or a decision by the person then authorized to make health care decisions for a patient may not be given effect if

(1) the patient is a woman who is pregnant and lacks capacity;

(2) the directive or decision is to withhold or withdraw life-sustaining procedures;

(3) the withholding or withdrawal of the life-sustaining procedures would, in reasonable medical judgment, be likely to result in the death of the patient; and

(4) it is probable that the fetus could develop to the point of live birth if the life-sustaining procedures were provided.

(c) This section does not apply to emergency services in the field.

Sec. 13.52.060. Obligations of health care providers, institutions, and facilities.

(a) Before implementing a health care decision made for a patient, a supervising health care provider, if possible, shall promptly communicate to the patient the decision made and the identity of the person making the decision.

(b) A supervising health care provider who knows of the existence of an advance health care directive, a revocation of an advance health care directive, or a designation or disqualification of a surrogate shall promptly record its existence in the patient's health care record, shall request a copy if it is in writing, and shall arrange for its maintenance in the health care record if a copy is furnished.

(c) A supervising health care provider who makes or is informed of a determination that a patient lacks or has recovered capacity, or that another condition exists that affects an individual instruction or the authority of an agent, a guardian, or a surrogate, shall promptly record the determination in the patient's health care record and communicate the determination to the patient, if possible, and to any person then authorized to make health care decisions for the patient.

(d) Except as provided in (e), (f), and (i) of this section and by AS 13.52.253 , a health care provider, health care institution, or health care facility providing care to a patient shall comply with

(1) an individual instruction of the patient and with a reasonable interpretation of that instruction made by a person then authorized to make health care decisions for the patient; and

(2) a health care decision for the patient made by a person then authorized to make health care decisions for the patient to the same extent as if the decision had been made by the patient while having capacity.

(e) A health care provider may decline to comply with an individual instruction or a health care decision for reasons of conscience, except for a do not resuscitate order. A health care institution or health care facility may decline to comply with an individual instruction or health care decision if the instruction or decision is contrary to a policy of the institution or facility that is expressly based on reasons of conscience and if the policy was timely communicated to the patient or to a person then authorized to make health care decisions for the patient.

(f) A health care provider, health care institution, or health care facility may decline to comply with an individual instruction or a health care decision that requires medically ineffective health care or health care contrary to generally accepted health care standards applicable to the provider, institution, or facility. In this subsection, "medically ineffective health care" means health care that according to reasonable medical judgment cannot cure the patient's illness, cannot diminish its progressive course, and cannot effectively alleviate severe discomfort and distress.

(g) A health care provider, health care institution, or health care facility that declines to comply with an individual instruction or a health care decision shall

(1) promptly inform the patient, if possible, and any person then authorized to make health care decisions for the patient that the provider, institution, or facility has declined to comply with the instruction or decision;

(2) provide continuing care to the patient until a transfer is effected; and

(3) unless the patient or person then authorized to make health care decisions for the patient refuses assistance, immediately cooperate and comply with a decision by the patient or a person then authorized to make health care decisions for the patient to transfer the patient to another health care institution, to another health care facility, to the patient's home, or to another location

chosen by the patient or by the person then authorized to make health care decisions for the patient.

(h) Except as provided for civil commitments under AS 47.30.817 , a health care provider, health care institution, or health care facility may not require or prohibit the execution or revocation of an advance health care directive as a condition for providing health care.

(i) Notwithstanding the exception in (e) of this section for do not resuscitate orders, a health care provider may perform cardiopulmonary resuscitation or other resuscitative measures on a patient even if there is a do not resuscitate order for the patient if the condition requiring cardiopulmonary resuscitation or other resuscitative measures is precipitated by complications arising out of medical services being provided by the health care provider to the patient.

(j) The provisions of (i) of this section do not apply when a health care provider performs emergency medical services on a patient in the field, unless an online physician orders the health care provider to perform cardiopulmonary resuscitation or other resuscitative measures; in this subsection,

(1) "health care provider" does not include a physician;

(2) "in the field" does not include in a health care facility, health care institution, hospital, or mental health facility;

(3) "online physician" means a physician who is immediately available in person or by radio or telephone, when medically appropriate, for communication of medical direction to health care providers.

Sec. 13.52.065. Do not resuscitate protocol and identification requirements.

(a) A physician may issue a do not resuscitate order for a patient of the physician. The physician shall document the grounds for the order in the patient's medical file.

(b) The department shall by regulation adopt a protocol, subject to the approval of the State Medical Board, for do not resuscitate orders that sets out a standardized method of procedure for the withholding of cardiopulmonary resuscitation by health care providers and health care institutions.

(c) The department shall develop standardized designs and symbols for do not resuscitate identification cards, forms, necklaces, and bracelets that signify, when carried or worn, that the carrier or wearer is an individual for whom a physician has issued a do not resuscitate order.

(d) A health care provider other than a physician shall comply with the protocol adopted under (b) of this section for do not resuscitate orders when the health care provider is presented with a do not resuscitate identification, an oral do not resuscitate order issued directly by a physician if the applicable hospital allows oral do not resuscitate orders, or a written do not resuscitate order entered on and as required by a form prescribed by the department.

(e) Notwithstanding (d) of this section, if an individual has made an anatomical gift to occur at death and is in a hospital when a do not resuscitate order or an order to withdraw life-sustaining procedures is to be implemented for the individual, the order may not be implemented until the subject of the anatomical gift can be evaluated to determine if it is suitable for donation.

(f) A do not resuscitate order may not be made ineffective unless a physician revokes the do not resuscitate order, a patient for whom the order is written and who has capacity requests that the do not resuscitate order be revoked, or the patient for whom the order is written is under 18 years of age and the parent or guardian of the patient requests that the do not resuscitate order be revoked. Any physician of a patient for whom a do not resuscitate order is written may revoke the do not resuscitate order if the person for whom the order is written requests that the physician revoke the do not resuscitate order.

Sec. 13.52.070. Health care information.

(a) Unless otherwise specified in an advance health care directive, a person then authorized to make health care decisions for a patient has the same rights as the patient to request, receive, examine, copy, and consent to the disclosure of medical or other health care information.

(b) Notwithstanding (a) of this section, if there is a question about the principal's capacity, an agent or a surrogate of the principal may immediately access the personal health care information necessary to determine the principal's capacity, even if the agency or surrogacy does not become effective until the principal lacks capacity.

Sec. 13.52.080. Immunities.

(a) A health care provider or health care institution that acts in good faith and in accordance with generally accepted health care standards applicable to the health care provider or institution is not subject to civil or criminal liability or to discipline for unprofessional conduct for

(1) providing health care information in good faith under AS 13.52.070;

(2) complying with a health care decision of a person based on a good faith belief that the person has authority to make a health care decision for a patient, including a decision to withhold or withdraw health care;

(3) declining to comply with a health care decision of a person based on a good faith belief that the person then lacked authority;

(4) complying with an advance health care directive and assuming in good faith that the directive was valid when made and has not been revoked or terminated;

(5) participating in the withholding or withdrawal of cardiopulmonary resuscitation under the direction or with the authorization of a physician or upon discovery of do not resuscitate identification upon an individual;

(6) causing or participating in providing cardiopulmonary resuscitation or other life-sustaining procedures

(A) under AS 13.52.065 (e) when an individual has made an anatomical gift;

(B) because an individual has made a do not resuscitate order ineffective under AS 13.52.065 (f) or another provision of this chapter; or

(C) because the patient is a woman of childbearing age and AS 13.52.055 applies; or

(7) acting in good faith under the terms of this chapter or the law of another state relating to anatomical gifts.

(b) An individual acting as an agent, a guardian, or a surrogate under this chapter is not subject to civil or criminal liability or to discipline for unprofessional conduct for health care decisions made in good faith.

(c) A health care provider, health care institution, or health care facility is not subject to civil or criminal liability, or to discipline for unprofessional conduct, if a do not resuscitate order prevents the health care provider, health care institution, or health care facility from attempting to resuscitate a patient who requires cardiopulmonary resuscitation or other resuscitative measures because of complications arising out of health care being administered to the patient by the health care provider, health care institution, or health care facility. This subsection does not apply if the complications suffered by the patient are caused by gross negligence or reckless or intentional actions on the part of the health care provider, health care institution, or health care facility.

Sec. 13.52.090. Statutory damages.

(a) A health care provider or institution that intentionally violates this chapter is liable to the aggrieved individual or the individual's estate for damages of $10,000 or actual damages resulting from the violation, whichever is greater, plus attorney fees as provided by court rule.

(b) A person who intentionally falsifies, forges, conceals, defaces, or obliterates an individual's advance health care directive or a revocation of an advance health care directive without the individual's consent, or who coerces or fraudulently induces an individual to give, revoke, or not to give an advance health care directive, is liable to that individual for damages of $10,000 or actual damages resulting from the action, whichever is greater, plus attorney fees as provided by court rule.

Sec. 13.52.100. Capacity.

(a) This chapter does not affect the right of an individual to make health care decisions while having capacity to make health care decisions.

(b) An individual is rebuttably presumed to have capacity to make a health care decision, to give or revoke an advance health care directive, and to designate or disqualify a surrogate.

(c) An individual who is a qualified patient, including an individual for whom a physician has issued a do not resuscitate order, has the right to make a decision regarding the use of cardiopulmonary resuscitation and other life-sustaining procedures as long as the individual is able to make the decision. If an individual who is a qualified patient, including an individual for whom a physician has issued a do not resuscitate order, is not able to make the decision, the protocol adopted under AS 13.52.065 for do not resuscitate orders governs a decision regarding the use of cardiopulmonary resuscitation and other life-sustaining procedures.

Sec. 13.52.110. Status of copy.

A copy of a written advance health care directive, revocation of an advance health care directive, or designation or disqualification of an agent or a surrogate has the same effect as the original.

Sec. 13.52.120. Effect of this chapter.

(a) In the absence of evidence to the contrary of the patient's intent, this chapter establishes a presumption in favor of life, consistent with the best interest of the patient.

(b) Notwithstanding any other provision of law, death resulting from the withholding or withdrawal of cardiopulmonary resuscitation or other life-sustaining procedures does not, for any purpose, constitute a suicide or homicide if the withholding or withdrawal is

(1) consistent with this chapter; and

(2) from an individual

(A) for whom a do not resuscitate order has not been issued;

(B) for whom a do not resuscitate order has been issued under

(i) the protocol for do not resuscitate orders established under AS 13.52.065; or

(ii) a do not resuscitate identification found on the individual.

(c) The issuance of a do not resuscitate order under this chapter, the possession of do not resuscitate identification under this chapter, or the making of a health care directive under this chapter does not affect in any manner the sale, procurement, or issuance of a policy of life insurance, and does not modify the terms of an existing policy of life insurance. A policy of life insurance is not legally impaired or invalidated in any manner by the withholding or withdrawal of life-sustaining procedures from an insured individual or the withholding or withdrawal of cardiopulmonary resuscitation from an individual who possesses do not resuscitate identification or for whom a do not resuscitate order has been issued, notwithstanding any term of the policy to the contrary.

(d) This chapter does not authorize mercy killing, assisted suicide, or euthanasia.

(e) This chapter does not authorize or require a health care provider or institution to provide health care contrary to generally accepted health care standards applicable to the health care provider or institution.

(f) This chapter does not authorize an agent or a surrogate to consent to the admission of an individual to a mental health facility unless the individual's written advance health care directive expressly so provides, and the period of admission may not exceed 17 days.

(g) This chapter does not affect other statutes of this state governing treatment for mental illness of an individual involuntarily committed to a mental health facility.

Sec. 13.52.130. Prohibited requirements.

As a condition of receiving or being insured for health care services, a health care provider, a health care institution, a health care service plan, an insurer issuing health insurance, a self-insured employee welfare benefit plan, or a nonprofit hospital plan may not require an individual to execute a health care directive, obtain a do not resuscitate order from a physician, or possess do not resuscitate identification.

Sec. 13.52.135. Discriminatory treatment prohibited.

When determining the best interest of a patient under this chapter, health care treatment may not be denied to a patient because the patient has a disability or is expected to have a disability.

Sec. 13.52.140. Judicial relief.

On petition of a patient, the patient's agent, guardian, or surrogate, or a health care provider or institution involved with the patient's care, the superior court may enjoin or direct a health care decision or order other equitable relief. A proceeding under this section is governed by AS 13.26.090 - 13.26.320.

Sec. 13.52.150. Do not resuscitate orders and identification of other jurisdictions.

A do not resuscitate order or a do not resuscitate identification executed, issued, or authorized in another state or a territory or possession of the United States is valid for the purposes of this chapter if it complies with the laws of this state. A health care provider or health care institution may presume, in the absence of actual notice to the contrary, that the do not resuscitate order or the do not resuscitate identification complies with the laws of this state, regardless of where or when it was executed, issued, or authorized, and that the patient is a qualified patient.

THE ALASKA HEALTH CARE DECISIONS ACT, ANALYZED

KENNETH C. KIRK*

This Article reviews and examines the Alaska Health Care Decisions Act ("AHCDA"), found at section 13.52 of the Alaska Statutes and effective January 1, 2005. The AHCDA is examined functionally, historically, philosophically, and by hypothetical application to well-known cases. The Article identifies a number of errors and ambiguities in the AHCDA and concludes that while the AHCDA expresses itself as an attempt to balance the societal concerns of sanctity of life and the right to self-determination, in practice it is likely to promote termination of life support in circumstances supported by neither of those two philosophical imperatives.

I. INTRODUCTION

After four years of debate, the 2004 Alaska Legislature finally passed the Alaska Health Care Decisions Act ("AHCDA").[1] The AHCDA is an ambitious attempt to pull together a number of statutory schemes related to the end of life, including laws on advance directives (also known as "living wills"), termination of life support for those who are terminally ill or permanently unconscious, laws related to decision making for the mentally ill, and laws related to organ donation. The AHCDA also adds a section on surrogate decision making for those who have not filled out an advance medical directive and have no court-appointed guardian. The AHCDA includes an optional form called an advance healthcare directive, which can be used to appoint a decision maker for healthcare decisions in the event a person is incapacitated.[2] The advance healthcare directive also provides instructions for healthcare, including decisions to withdraw life

support (which includes feeding tubes); changes the system for making anatomical gifts at death; allows appointment of a surrogate decision maker for mental health treatment; and indicates the physician who will have the right, under certain circumstances, to make decisions on a patient's behalf.[3]

This Article will examine the AHCDA from several different perspectives. Part II reviews the AHCDA functionally, with an emphasis on what its various parts achieve and how well these parts fit together. Part III culls the legislative history to show how the bill evolved from a "Five Wishes" statement to its current form. Part IV examines the AHCDA from a philosophical perspective, showing how the various emphases on sanctity of life, right to self-determination, and quality of life have been factored, albeit somewhat unevenly, into the Act. Part V applies the AHCDA to the well-known cases involving Karen Ann Quinlan, Nancy Cruzan, Terri Schiavo, Sun Hudson, and Ora Mae Magouirk to see how those cases would likely have come out under the AHCDA. Finally, Part VI considers the likely practical effects of the AHCDA, analyzing whether the probable results are in fact consistent with the aims on which the AHCDA purports to be based.

II. FUNCTIONAL ANALYSIS

The Health Care Decisions Act is a hybrid enactment, covering a number of different areas relating to decision making on medical issues.

The AHCDA's most distinctive attribute is the new advance healthcare directive form, with the activating portion at the beginning of the statute,[4] and the optional form itself at the conclusion (except for the definitions).[5] Under the old living will statute,[6] a terminally ill individual could direct that his attending physician withhold or withdraw procedures that merely prolonged the dying process and were not necessary to keep him comfortable and to relieve pain.[7] The individual could also make an organ donation on the same document[8] or separately. Under the new form, in a single document, the individual can designate an agent to make healthcare decisions if he or she becomes incapacitated; can

limit that agent's authority; can indicate, when the person has a "qualifying condition,"[9] whether life should be prolonged by artificial means, artificial nutrition or hydration, or whether pain relief should be provided; can direct an anatomical gift at death, and even what types of use to which the gift can be made; can delegate authority for mental health treatment; and can designate a primary physician for decision-making purposes.[10] The AHCDA provides details regarding how the form must be witnessed, when it is effective,[11] what the agent must consider in making decisions on the person's behalf, and how it may be revoked, among other limitations.

Noticeably, the statutes related to guardianship were not incorporated into the AHCDA, but were instead left in Title 13.[12] However, several portions of the AHCDA do relate to guardians. Under the guardianship statutes, a person nominated by the respondent has priority to be selected as guardian,[13] and under the AHCDA the form may include the individual's nomination of a guardian;[14] thus, the AHCDA provides a method for nominating the person who will be given priority under the guardianship statutes. The sample form, if left unaltered, simply nominates the person who is designated to make healthcare decisions as the guardian.[15] Note, however, that under the guardianship statutes, a general guardian has a great deal of authority with regard to finances (assuming a separate conservator has not been appointed), and a different person might be better able to handle those duties. As a result, patients are advised to consider carefully the decision to designate a healthcare agent that will also act as the preferred guardian. Separating the functions of healthcare agent and guardian would require writing a separate instruction on the form, as the appointment of a guardian is otherwise automatic in the last paragraph of Part One of the statutory form.

Interestingly, absent a court order to the contrary, a healthcare decision made by an agent[16] takes precedence over that of a

guardian,[17] and the guardian is required to comply with the ward's healthcare directive unless a court expressly authorizes the revocation. Attorneys who represent petitioners in guardianship cases have already noticed the potential malpractice trap; consequently, they now draft proposed orders for the court so that their guardians will be able to act according to their own perceptions of the ward's best interest and will not be overruled by an appointed agent. To understand the problem, imagine that you are the attorney for the petitioner in a guardianship case, and your client has asked you to secure guardianship over a relative with dementia, in part so that reasonable healthcare decisions can be made. In your proposed orders, which are ultimately adopted by the court, you neglect to state clearly that the guardian's decisions will overrule any decisions by an agent (probably because you are using the same forms you used in the past, when this was not an issue). On the eve of an important medical procedure, you discover that the ward has a pre-existing, valid healthcare directive, naming another individual as the agent. The agent will not consent to the medical procedure, so it cannot be performed. The malpractice risk in that scenario should be apparent.

In recognition of the fact that a significant portion of the population does not, and will not, have advance directives, the AHCDA includes a detailed provision allowing for the appointment of surrogates for individuals who do not have advance healthcare directives or guardians.[18] A patient can designate such a surrogate by personally informing the supervising healthcare providers of the identity of the desired surrogate.[19] If the patient fails to do so, a surrogate is appointed according to a priority list, beginning with the patient's spouse, then adult children, then parents, then adult siblings, and finally "an adult who has exhibited special care and concern for the patient, who is familiar with the patient's personal values, and who is reasonably available."[20] The surrogate is to act in accordance with the patient's individual instructions and wishes; otherwise, the surrogate may make the decision in accordance with his or her determination of the patient's best interest, considering the patient's personal values.[21] The patient's primary healthcare provider may overrule the

surrogate's decision if it appears that he or she is not abiding by the wishes, values, and best interests of the patient.[22]

The AHCDA has specific restrictions on when life support (including the withholding of artificial nutrition and hydration) may be withheld or withdrawn. The patient must have a "qualifying condition," which means either a terminal condition or a state of permanent unconsciousness.[23] However, the standards for do-not-resuscitate orders (commonly called "DNR" or "Comfort One" orders) are different under the AHCDA. Specifically, the order must be entered by a physician and does not require the consent of the patient, agent, guardian, surrogate, or family.[24]

The rules on anatomical gifts (also known as "organ donation") primarily involve two different sections of the AHCDA. The first, section 13.52.170, allows the patient to make an anatomical gift in a variety of ways.[25] The second, section 13.52.180, allows other individuals (again, according to a priority list) to make anatomical gifts on the patient's behalf, unless the patient had previously and specifically objected.[26] The statute also provides a form for a third party to make the gift,[27] and other sections of the statute attempt to sort out the necessary details and prevent abuses.[28]

Finally, there are the mental health provisions.[29] Part Four of the optional form directive allows an individual to make a variety of decisions about mental health treatment, including whether he or she consents to administration of psychotropic medications, electroconvulsive treatment, or mental health commitment.[30] The remaining mental health provisions, for the most part, carve out

22. § 13.52.030(h).
23. § 13.52.390(36).
24. § 13.52.065.
25. § 13.52.170.
26. § 13.52.180.
27. § 13.52.190.
28. §§ 13.52.200–.270.
29. Whether mental health treatment even falls within the AHCDA depends on whether the AHCDA is viewed as primarily related to medical care or to end-of-life issues. If the AHCDA is aimed at medical care in general, including mental health treatment, this part of the statute makes sense. But, if one thinks of the AHCDA as related primarily to questions surrounding the end-of-life, the section on mental health treatment does not fit at all.
30. § 13.52.300, pt. 4.

exceptions to the general rules applicable to other medical treatments.[31]

Most of the laws related to mental health commitments are not in the AHCDA, but rather in section 47.30[32] of the Alaska Statutes, which covers involuntary mental health commitments. Under the involuntary commitment statute, an individual can be committed by a peace officer, a psychiatrist or other physician, or a psychologist;[33] the AHCDA adds the designated healthcare agent to the list of people who can initially order a commitment.[34] Additionally, under the AHCDA, the agent can commit the patient for up to seventeen days,[35] whereas the statute on involuntary commitments mandates a probable cause hearing within three days.[36]

The mental health portion of the advance directive itself is nothing new; indeed, it is lifted word-for-word from the old statute, which was titled "Personal Declaration of Preference for Mental Health Treatment"[37] and was repealed effective the same day the AHCDA took effect.[38] Both forms allow the agent to make the decisions on psychotropic medication, electroconvulsive treatment, and involuntary commitment for up to seventeen days.[39]

Curiously, under Part Four of the AHCDA's form, the default rule is that the healthcare agent can make mental health decisions on behalf of the patient.[40] Consequently, there is a risk that those who do not read the form carefully or check off the boxes indicating non-consent will inadvertently give the agent the authority to consent to highly invasive and controversial mental

33. § 47.30.705.

34. § 13.52.300.

35. *Id.*

36. § 47.30.715.

37. ALASKA STAT. §§ 47.30.950–.980 (2002) (repealed 2004).

38. ALASKA STAT. § 13.52.300 (2004); ALASKA STAT. §§ 47.30.950–.980 (2002) (repealed 2004).

39. ALASKA STAT. § 13.52.300 (2004); ALASKA STAT. §§ 47.30.950–.980 (2002) (repealed 2004).

40. ALASKA STAT. § 13.52.300, pt. 4 (2004). The optional form directive reads as follows: "If you are satisfied to allow your agent to determine what is best for you in making these mental health decisions, you do not need to fill out this part of the form." *Id.*

health treatments.[41] Under the repealed mental health declaration, there was no such default.[42] Rather, a patient who did not wish to give an agent those powers did not have to fill out the form in the first place.[43]

Moreover, the witnessing requirements were more stringent under the prior statute. Under that statute, neither witness could be related to the patient,[44] and the agent was expected to accept the appointment in writing.[45] Under the AHCDA, one witness may be a relative of the patient's.[46] As a result, it is easier to delegate important mental health decisions, and such delegation can even be done accidentally by leaving Part Four of the statutory form blank.

This puzzling default in the mental health section underscores a problem that surfaces throughout the AHCDA: people are encouraged to fill out these forms as part of estate planning or general good stewardship, even if they do not have current medical problems; however, many parts of the statutory form seem designed for those with an existing major medical issue.

III. HISTORICAL ANALYSIS

The AHCDA's history is unusual in that it took a full four years of work in various committees in order for the bill to become law. The bill was introduced in 2001, in the first session of the 22nd legislature, as House Bill 197.[47] After the House Health, Education and Social Services ("HESS") Committee and the Judiciary Committee made amendments, the bill passed the House during the second session of that legislature in 2002.[48] It did not pass the Senate (it was never even scheduled for a Senate hearing), and so, technically speaking, it died. However, in the following legislature,

---

41. Although some individuals with current psychological disorders may wish to give a trusted agent the authority to make these decisions on his or her behalf, it is unlikely that a person who has no current mental disorder would want to appoint someone to override his or her express wishes in this regard. After all, mental health treatment is generally recommended only for conscious patients. If the patient is conscious and agrees to the treatment, there is no need for the agent to be involved. So, presumably if the agent is acting, it is because the patient is not in agreement, at the time the decision must be made, with the proposed treatment.

48. H.B. 197, 22d Leg., 2d Sess. (Alaska 2002).

the bill was reintroduced in exactly the same form.[49] Finally, in 2004, after being amended numerous times by both the House and Senate committees, the bill received near-unanimous legislative approval and became law.[50]

From the beginning, the bill was touted as being based on the "Five Wishes."[51] The Five Wishes is a document developed by the Aging With Dignity organization,[52] which prompts the declarant to make choices regarding the following:

1. Comfort care (such as how much medicine should be provided, whether warm baths should be given, and whether religious readings or "well-loved poems" should be read aloud to the declarant when near death);
2. How people should treat the declarant (such as whether people should be around when death is near, whether members of a church or synagogue should be asked to pray for the declarant, and whether there is a preference to die in the home);
3. What loved ones should be told (including, for example, whether the declarant wishes forgiveness from family or friends, how the declarant wishes to be remembered, and instructions for memorial services);
4. Desired medical treatment (including especially the question of withdrawal of life support); and,
5. Which person should be named to make healthcare decisions if the declarant is no longer able to do so.

52. The Dying Process: Five Wishes Document, http://www.learningplaceonline.com/stages/together/wishes/wishes-1.htm (last visited Sept. 26, 2005) [hereinafter Five Wishes Document].

The 2001 version of the bill closely resembled the Five Wishes document, including the many details of comfort care.[53] However, by 2002, legislative committees had substantially rewritten the bill;[54] eventually, the finished product was merely "inspired by" the Five Wishes.[55]

The Five Wishes document is a personal document not a legal document, and, as such, is written in lay language. By contrast, the AHCDA is more comforting to lawyers, as it is drafted in the style of a legal document and employs language and stylistic trends familiar to lawyers.[56]

The legislature's desire to provide something similar to the Five Wishes explains those portions of the AHCDA related to the healthcare directive, but those portions account for less than half of the total Act. The rest of the bill was explained as an attempt to bring together, under a single chapter, a variety of laws which previously had been scattered throughout the statutes.[57] The bill can be said to have accomplished this.[58]

For the most part, philosophical discussions about end-of-life issues did not occur in the legislature until 2004, when the bill reached the Senate HESS Committee. The chairman, Senator Fred Dyson (R-Eagle River), raised a number of questions about life support termination, as did the Alaska Catholic Conference.[59] In addition to numerous committee meetings, a meeting was held off record and included the Alaska Catholic Conference's representative, the Lieutenant Governor's chief of staff, and a staff member of a legislator who advocated passage of the bill.[60] As a result of this meeting, a number of changes were made to the bill, including the addition of a broad statement that, in the absence of evidence to the contrary of the patient's intent, the AHCDA established a presumption in favor of life,[61] and a clarification that the AHCDA does not authorize mercy killing, assisted suicide, or euthanasia.[62] The changes did not entirely satisfy the Catholic Conference[63] but seemed to assuage the concerns of Senator Dyson, for when the bill moved to the Senate Judiciary Committee, Senator Dyson advocated its passage.[64]

One of the more interesting exchanges in the Senate HESS Committee centered on the issue of pregnancy. Senator Dyson, who described himself as "irrevocably pro-life regarding the abortion issue" took the position that if a pregnant woman was in an unconscious state, efforts should be made to keep the child alive, even if that meant continuing life support past a point of physical benefit for the woman.[65] Senator Gretchen Guess (D-Anchorage) took the position that the statute should not overturn a healthcare directive and that the healthcare directive ought to have an option for a pregnant woman to determine whether she would want to be kept alive so that the child might be

born.[66] This seems to have led to an odd compromise under which the statute and the sample form say two different things. In the sample form[67] the declarant is to answer the question "should I become unconscious and I am pregnant, I direct that" (followed by several blank lines). However, a section of the AHCDA says that, if a pregnant woman lacks capacity, a directive or decision to withhold or withdraw life-sustaining procedures may not be given effect if it is probable that the fetus could develop to the point of live birth with the provision of such life-sustaining procedures.[68] In other words, if life support will enable the baby to be born alive, then life support must be continued, regardless of what the mother might have said in her directive. So the AHCDA itself would overrule a directive to discontinue life support. The resolution of any tension between a directive and the AHCDA may hinge on whether the doctor has actually read the statute or only the approved statutory form.

After four years of testimony, committee hearings, committee substitutes, and debate, the final version of House Bill 25 passed the Senate unanimously, and was then adopted by the House with only one dissenting House vote.[69] The governor signed the Act the following month, and it took effect on January 1, 2005.[70]

IV. PHILOSOPHICAL ANALYSIS

A central premise of this article posits that people approach end-of-life issues from three different philosophical positions. This section of the Article will analyze how each of these positions ultimately influenced the adoption of the AHCDA.

A. Self-Determination

The first of these positions is an emphasis on self-determination, that is, the ability to make one's own decisions about one's own life. This is usually referenced as a "constitutional right" to self-determination. In *Cruzan v. Missouri Department of Health,*[71] a case involving a woman in a vegetative state whose

family wanted to remove her feeding tube, the United States Supreme Court held that the early common law rule that individuals are to be free from the restraint or interference of others[72] and the requirement for informed consent to medical treatment[73] suggested that a competent person has a constitutionally protected liberty interest in refusing unwanted medical treatment.[74] The Court noted in *Cruzan* that this right to self-determination may also extend to allowing others to exercise what it called a substituted judgment.[75] Substituted judgment involves informing the medical providers of what the patient, presumably unable to express his or her own wishes, would have wanted regarding cessation of medical treatment. Interestingly, Chief Justice Rehnquist's majority opinion does not actually find that there is a constitutional right to refuse medical treatment, but rather notes that such a right could be inferred from the Court's previous decisions.[76] In the subsequent case of *Washington v. Glucksberg*,[77] the Court, again in an opinion written by Chief Justice Rehnquist, noted that while that right could be inferred (since it had been "strongly suggested" by previous opinions), it had not actually been pronounced by the Court.[78]

B. Sanctity of Life

The second significant philosophical position represents an emphasis on the sanctity of life. The Supreme Court has recognized this position, not as a constitutional right, but as a legitimate state interest,[79] which a state can consider in establishing laws. In *Cruzan*, it was this interest, among others, that justified allowing Missouri to require clear and convincing evidence that the individual would want life support terminated.[80] In *Glucksberg*, the state's interest in the preservation of life was a factor in upholding the state of Washington's prohibition of assisted suicide.[81]

C. Quality of Life

A patient's quality of life has never been specifically recognized as either a legitimate interest or a right by the Supreme Court. Nonetheless, concern for a patient's quality of life influenced the debate over the AHCDA.

A moderate quality of life position may be defined as concern for the pain and misery that accompany the end of life. An extreme position suggests that once one is no longer able to do anything useful, productive, or interesting, one ought to die. Various courts and professional groups have taken diverging positions on this philosophical question.

In *In re Quinlan*,[82] the New Jersey Supreme Court factored into its decision-making calculus the likelihood of the patient ever returning to "cognitive life," thus taking a position somewhere between the moderate and the extreme positions outlined above.[83]

In one survey of doctors and medical administrators, a remarkable 89% believed it was ethical to withdraw nutrition and hydration from patients in a vegetative state, with a majority endorsing the view that patients in a vegetative state would be "better off dead."[84] One version of this philosophy was expressed in the legislative hearings on the AHCDA by Dr. Maria Wallington, a medical ethicist.[85] She testified that the decision to terminate life support should hinge on whether "what is needed to keep the person alive actually allows him/her to go on with life" or the chance the person will become healthy again and not depend on medical care.[86]

Remarkably, throughout the lengthy history of committee hearings and floor debates in 2001, 2002, and 2003, there was hardly any examination of the philosophical underpinnings of the law, which initially appeared to be strongly influenced by the right to self-determination. Throughout the committee minutes, legislators appeared to assume that people should be able to make their own choices regarding end-of-life decisions.[87] Examples, both

good and bad, were given from the personal experiences of witnesses and legislators.[88] However, no one raised much concern for the sanctity of life, until the bill reached the Senate HESS Committee in March 2004.[89] At that point, intertwined with the debate over the pregnancy provisions of the bill and the hammering out of various details, the concern for the sanctity of life finally surfaced.[90] Senator Dyson and the Alaska Catholic Conference raised the issue, and a few witnesses took opposing positions.[91]

Notably, a significant portion of the debate centered on the issue of withdrawal of artificial nutrition and hydration.[92] Senator Dyson raised this as a main question about the bill in the opening

of his committee's hearing.[93] A representative of the Alaska Nurses' Association argued that withholding fluid and nutrition actually allows a patient to die naturally.[94] Dr. Wallington argued that the law should safeguard the choices made in a person's advance directive.[95] On the other hand, the Alaska Catholic Conference representative argued that the law should have a strong presumption in favor of life, quoting the statement of then-Pope John Paul II that administration of water and food always represents a natural means of preserving life, not a medical act, even when provided by artificial means.[96]

Ultimately, for the most part, the resulting bill is based on the right to self-determination, with a few specific overlays based on concern for the sanctity of life. Life support, including artificial nutrition and hydration, can be withdrawn only if the person is in a state of permanent unconsciousness (meaning a coma or a permanent vegetative state, depending on how one interprets the definitions) or has a terminal illness.[97] A surrogate, whether appointed by the patient or selected according to the statutory procedure, can make decisions for the patient; but in doing so, the surrogate must consider the patient's personal values, including any religious beliefs.[98] Life support may not be withdrawn for a pregnant woman if her child could survive to birth with the procedures in place.[99] Further, a healthcare provider may decline to provide "medically ineffective health care or healthcare contrary to generally accepted health care standards," but only after providing the family an opportunity to transfer the patient to another institution.[100] Finally, the AHCDA explicitly states that, in the absence of evidence of the patient's intent to the contrary, the law establishes a presumption in favor of life, consistent with the patient's best interest.[101]

D. Distrust of Lawyers

A distrust for lawyers seems, if only speculatively, to have influenced the bill. Such distrust is evidenced by the fact that the AHCDA vests final decision-making authority in patients, their agents, or their surrogates, with some limited rights-of-refusal or review by their doctors.[102] Further, doctors, not courts, decide whether a person lacks capacity.[103] A doctor may decline to comply with a surrogate's decisions if he or she believes that the surrogate is not abiding by the wishes, values, and best interest of the patient.[104] The doctor can otherwise refuse to comply with the individual instruction or decision for a variety of reasons, such as "reasons of conscience,"[105] or a belief that the proposed treatment would be ineffective or contrary to generally accepted healthcare standards.[106] It is the doctor who ultimately decides whether to issue a "Do Not Resuscitate" order.[107] The AHCDA grants healthcare providers fairly broad immunity in making these decisions.[108] The role of the judiciary receives only the briefest mention,[109] and an agent's healthcare decision can even overrule the decision of a court-appointed guardian (unless a court order specifically provides otherwise).[110]

In his book *Strangers at the Bedside*,[111] historian David Rothman chronicles how, beginning in the 1960s, the United States evolved from a society of unwavering acceptance of the decisions of doctors to a society in which lawyers, bioethicists, politicians, judges, and ethics committees are involved in the decision-making. He credits the shift in part to the fact that most Americans no longer have a trusted family doctor whom they know well enough to trust with end-of-life decisions.[112] Nonetheless, the AHCDA places some of the decision-making authority directly into the physician's hands.[113] Thus, the AHCDA assumes that patients want

their primary physicians to make such decisions. This is a questionable assumption in an age when many people go to a clinic, family practice group, or emergency room for primary care. At no point did legislators discuss this issue in the many committee hearings on the bill. Therefore, whether the AHCDA reflects an atavistic view of primary physicians or merely a general hesitancy to let lawyers make these decisions is uncertain.[114]

An emphasis on decision making by physicians may have also resulted from the drafters' focus on patients with pre-existing medical conditions, rather than on those who fill out the advance directive form as part of general estate planning.[115] For instance, the designation of a primary physician will typically pose little problem for someone with cancer, who would likely designate his or her oncologist. Regardless, under the AHCDA, nearly all end-of-life decisions will be made by doctors in consultation with family members, and very few decisions will be made by judges.

V. APPLICATION TO CASES

One rarely appreciates the implications of a statute until one applies the statute to a set of facts. This part of the Article will examine some of the best-known cases from recent memory to determine how they might have turned out under the AHCDA.

A. Karen Ann Quinlan

In April of 1975, Karen Ann Quinlan, a twenty-one year old New Jersey woman, stopped breathing.[116] She was revived, but suffered anoxia, or a loss of oxygen in the blood stream going to the brain.[117] Quinlan ended up in a "chronic persistent vegetative state," which was explained as a "primitive reflex level" of neurological function, with the brain stem working, but other parts of the brain nonfunctional.[118] She was sustained by a respirator and feeding tube, and it was assumed by the doctors (incorrectly, as it

turned out) that her primitive level of brain stem function would be insufficient for her to breathe on her own.[119]

Karen's father filed a petition, asking that he be appointed guardian and that the letters of guardianship contain an express power to authorize the discontinuance of all extraordinary medical procedures.[120] The hospital opposed the discontinuance, and the judge denied the father's request.[121] On appeal, the Supreme Court of New Jersey found that if Karen were able to do so, she could decide to discontinue the life support apparatus.[122] Addressing the question of substitution of judgment, the court determined that her guardian could "assert her right to privacy" on her behalf.[123] The court did not assert a broad right of guardians to make such decisions, but rather found such a right to be reasonable within the context of these particular facts.[124] In doing so, the court balanced the individual's right to privacy against the State's interest in the preservation and sanctity of human life and a physician's right to administer medical treatment according to his best judgment.[125] The court applied a sliding scale, finding that the State's interest weakened, and the individual's right to privacy grew, "as the degree of bodily invasion increase[d] and the prognosis dim[med]."[126] The court incorporated consideration of Karen's quality of life into the analysis.[127] It said that the "focal point of decision should be the prognosis as to the reasonable possibility of return to cognitive and sapient life, as distinguished from the forced continuance of that biological vegetative existence to which Karen seems to be doomed."[128] As the court's words indicate, the quality of life philosophical position is implicated whenever the focus is on the possibility of returning to a sapient or more productive level of life.[129]

129. Conversely, the sanctity of life position would tend to consider any life as being valuable, even if it were sub-cognitive. The self-determination position would be neutral unless the patient had expressed her wishes in some way.

The court announced a rather curious requirement for termination of life support: although the father was appointed guardian, in order to terminate life support he had to obtain the concurrence of the rest of the family.[130] Furthermore, the attending physicians, in consultation with the hospital ethics committee, had to determine that there was no reasonable possibility of Karen ever emerging from her vegetative state.[131]

How would the Quinlan case be analyzed under the AHCDA? Because Karen did not have an advance healthcare directive,[132] her father would have turned to the surrogacy statute,[133] and because she had no spouse or adult child, her father would be next in line to be Karen's surrogate under the AHCDA.[134] Therefore, he would have the authority to act, assuming Karen's mother did not object.[135]

As surrogate, Mr. Quinlan would inform the attending physician that he wanted life support removed. The doctor would turn to section 13.52.045 and see that, because Karen did not sign a directive to the contrary, he would not be prohibited from removing the life support.[136]

Next, the same section would direct him over to section 13.52.160 to see whether Karen had a "qualifying condition."[137] That section does not actually define "qualifying condition," but rather requires that the determination be made by the patient's primary physician and at least one other physician.[138] A "qualifying condition" is defined in section 13.52.390(36) as either a terminal condition or permanent unconsciousness.[139]

The definition of "terminal condition" is "an incurable or irreversible illness or injury" that will result in imminent death, for which there is no reasonable prospect of cure or recovery, that imposes severe pain or an inhumane burden on the patient, and for which continuing life sustaining procedures will provide only

minimal medical benefit.[140] The definition of "terminal condition" would be problematic here, because there was no guarantee that Karen would die within a "short period of time" if life-sustaining procedures were discontinued.[141] Additionally, Karen's family members did not request removal of the feeding tube, further casting doubt on whether removal of the respirator would result in death.[142]

The doctor would next turn to the definition of "permanent unconsciousness": a condition that will last "permanently without improvement," in which thought, sensation, purposeful action, social interaction, and awareness of self and the environment are absent, and for which initiating or continuing life sustaining procedures provide only minimal medical benefit.[143] This definition is also problematic for a person in a vegetative state because it requires that sensation be absent.[144] Doctors seem to be in some disagreement as to whether a patient in a persistent vegetative state feels pain.[145] If Karen felt pain, one would assume sensation was not absent, and the definition of permanent unconsciousness could not legitimately be met.[146] There is no general consensus in neurology on this issue, probably due to the fact that although patients in a vegetative state react to painful stimuli,[147] they lack a connection to the "higher" parts of the brain that understand what pain is.[148] According to one survey of doctors, about 30% of the respondents believe that vegetative state patients experience pain,

and about 13% believe they experience hunger and thirst.[149] Given that the majority of doctors believe there is no sensation, combined with the possibility of "doctor shopping" by the family,[150] it is probably safe to assume that the Quinlans could, today, find a doctor who agrees that Karen meets the criteria for "permanent unconsciousness." This is even further evident when considering that 88% of the doctors responding to the survey believed it was ethical to withdraw artificial nutrition and hydration from a patient in a vegetative state.[151]

The legislative history also yields some guidance. The definition of "permanent unconsciousness" was based on an Illinois statute,[152] which includes the mandate that sensation be absent.[153] While the Illinois courts have not specifically addressed the question of whether reaction to painful stimuli constitutes sensation, several Illinois Supreme Court decisions have concluded that the condition of permanent unconsciousness covers the patient in a vegetative state.[154] Also, during legislative hearings in 2004, the Alaska legislative aide who had been shepherding the bill through the legislature specifically referenced "vegetative state" among the circumstances that would constitute a qualifying condition for purposes of removal of life support.[155]

Let us assume that the primary physician and one other doctor, after consulting with the neurologist,[156] have informed the attending physician that at least one of the qualifying conditions has been met, either because they assume Karen will die within a short period of time without life support or because they believe she does not have sensation. The matter would then be back in the hands of the attending physician, who would return to section

13.52.045 and see that there must be an additional determination that withdrawing the life support would be consistent with the patient's best interest.[157] However, this decision is initially made by the surrogate.[158] The doctor would thus direct Mr. Quinlan to make the determination and, to the extent known to him, to consider Karen's wishes and personal values.[159] He would explain that "best interest" means that the benefits to the individual outweigh the burdens on the individual. In this decision, several factors should be considered: "the effect of treatment on the physical, emotional, and cognitive functions of the patient"; "the degree of pain or discomfort caused by either treatment or withdrawal of treatment"; the degree to which Karen's medical condition results in a severe and continuing impairment; the effect of treatment on her life expectancy; the prognosis for recovery; the risks, side effects, and benefits of treating or not treating; and Karen's religious beliefs and basic values.[160] Presumably, Mr. Quinlan would report back that he has considered all of those factors and still believes it to be in Karen's best interest to withdraw life support.

The decision would now go back to the medical professionals for several possible vetoes. First, the patient's primary healthcare provider may determine that the surrogate is not abiding by the wishes, values, and best interest of the patient, and may therefore decline to comply with the surrogate's decision.[161] Alternatively, the healthcare provider may decline to comply for reasons of conscience.[162] It is hard to say whether Karen's physicians would veto the surrogate's decision; they testified that "removal from the respirator would not conform to medical practices, standards and traditions,"[163] but that standard is not recognizably close to the standard under the AHCDA.[164] Under the AHCDA, a healthcare provider can refuse to provide healthcare contrary to generally accepted healthcare standards.[165] But here it would not be a question of providing healthcare, but rather of withdrawing it. As best as can be determined from the case law, the doctors never asserted an objection of conscience.[166] However, they might have

argued that removal was not in Karen's best interest, especially in 1976.

If either side chose to go to court, they could do so under section 13.52.140, which provides that a court, through a guardianship proceeding, may enjoin or direct a healthcare decision.[167] A probate court judge adjudicating Karen's case would need to know what legal standard to apply, and immediately he or she would encounter a problem: there is an apparent error in the section on judicial relief. Section 13.52.140 says that a proceeding to enjoin or direct a healthcare decision is governed by sections 13.26.165–.320.[168] However, these statutory sections do not cover adult guardianships, but rather conservatorships.[169] In Alaska, conservators deal only with financial matters, not with medical decisions,[170] and the procedural protections are less than those for appointment of a guardian.[171] The statute should have referenced sections 13.26.090–.155, for guardians of incapacitated adults. There is, within those sections, a specific provision as to what a guardian is or is not allowed to do:

> A guardian may not . . . consent on behalf of the ward to the withholding of lifesaving medical procedures; however, a guardian is not required to oppose the cessation or withholding of lifesaving medical procedures when those procedures will serve only to prolong the dying process and offer no reasonable expectation of effecting a temporary or permanent cure of or relief from the illness or condition being treated unless the ward has clearly stated that lifesaving medical procedures not be withheld . . . .[172]

Is the probate court to look only to this section of the guardianship statutes and determine whether a guardian is fulfilling that duty, or is the probate court to look at the AHCDA and review all of its decision-making requirements (including whether the patient has a qualifying condition, and whether it is in the patient's best interest to withdraw life support)? That question will undoubtedly have to be answered in future litigation.

At any rate, the likely end result is that Karen Quinlan would still have her respirator removed, as she would be found to have met the standards of both the guardianship and healthcare decision laws related to removal of life support. In fact, Karen continued to

breathe after removal of the respirator[173] and could survive for as long as she had the feeding tube inserted.[174] Under the AHCDA, she could have the tube removed only upon her father's consent or if the doctors concluded that it was "medically ineffective health care,"[175] a problematic standard that will be examined in more detail in the Sun Hudson case below.

B. Nancy Beth Cruzan

In January 1983, a Missouri woman, Nancy Cruzan, was in a serious automobile accident.[176] Paramedics were able to restore her breathing and heart beat.[177] After three weeks in a coma, she progressed to a vegetative state.[178] She was able to take some food orally, but in order to ease the feeding and ensure that she had sufficient nutrition, a "gastrostomy feeding and hydration tube" was surgically inserted.[179] However, after several years with no improvement, Nancy's parents, who had already been appointed as co-guardians, petitioned in Missouri state court for authority to remove the feeding tube.[180]

Initially, the only evidence as to Nancy's own wishes was testimony by a former roommate that Nancy once said that she would not wish to continue her life unless she could live at least halfway normally.[181] The trial court authorized the withdrawal of life support, but the state appealed.[182] The Missouri Supreme Court reversed, based on Missouri's living will statute, which had a policy strongly favoring preservation of life.[183] Specifically, Missouri required clear and convincing evidence of the patient's wishes for removal of life support when there was not a specific advance directive.[184] The Supreme Court affirmed, holding that Missouri had a legitimate interest in the protection and preservation of

human life, which it was entitled to safeguard with a statute designed to guard against potential abuses.[185]

There, the case law ends, but not the case. The publicity surrounding *Cruzan* brought forward two new witnesses who had known Nancy before her accident and who learned about the case through the news coverage surrounding the appeal.[186] They both related conversations with Nancy, which supported the idea that she would not want to live in a vegetative state.[187] Aided by friendlier medical testimony the second time around, Mr. and Mrs. Cruzan prevailed in a new trial; third-party attempts to intervene and appeal were refused, and the feeding tube was removed, resulting in Nancy Cruzan's death twelve days later.[188]

In many respects, Nancy Cruzan's situation was similar to that of Karen Quinlan. However, a significant difference is that Nancy Cruzan did not need a respirator.[189] However, she did need a feeding tube, and unlike the Quinlans, the Cruzan family wanted the feeding tube removed.[190] The AHCDA makes no distinction between respirators and feeding tubes; they are all considered "life sustaining procedures" that may be withheld if the qualifying conditions are met.[191] This distinction may make a big difference to the Roman Catholic Church and, judging by the number of protestors in both the Cruzan and Schiavo cases,[192] to quite a lot of other people as well. However, it makes no legal difference in Alaska. It should be noted that defining artificial hydration and nutrition as medical care constitutes a significant philosophical choice on the legislature's part; the Catholic Church, among others,

would define it not as medical care but as feeding, and thus a basic responsibility which must not be withdrawn.[193]

The next difference looks like a complication, but it actually leads to a simplification: Nancy Cruzan's parents were already her guardians when they decided to withhold artificial nutrition and hydration.[194] As her guardians, they would be surprised to discover that the AHCDA does not grant them any authority: it only allows an *agent or surrogate* to withhold or withdraw life sustaining procedures.[195] A guardian is not an agent or a surrogate. The definition of an agent requires that the declarant have executed a durable power of attorney for healthcare.[196] Furthermore, the definition of surrogate specifically excludes guardians.[197]

The operation of these definitions, as they apply to the AHCDA, might be cause for consternation. However, not all of the laws related to end-of-life decision-making were included in Chapter 13.52. For example, under section 13.26.150(e)(3), which is part of the guardianship statutes, a guardian can oppose cessation of "life saving medical procedures" under a set of conditions similar to those in the AHCDA.[198] The guardian may consent to the withholding of such procedures when "[the procedures] will only serve to prolong the dying process, and offer no reasonable expectation of effecting a cure of or relief from the condition being treated if the ward has not clearly stated that the life sustaining medical procedures not be withheld . . . ."[199] While Nancy never prohibited such procedures from being withheld,[200] another portion of that set of conditions is problematic. It refers to prolonging the dying process. Prior to the removal of the feeding tube, Nancy was not dying; the consensus was that she could possibly live for

200. Ms. Cruzan had only made general statements to a roommate that she would not want to continue her life unless she could live "halfway normally." *See* Cruzan v. Harmon, 760 S.W.2d 408, 411, 424 (Mo. 1988).

another thirty years.[201] Unfortunately, this requirement in section 13.26.150(e)(3) seems to have been written for terminally ill patients, not patients in a coma or a vegetative state. However, technically speaking, the feeding tube prolongs the dying process.[202] Furthermore, the feeding tube appears to meet the other requirements of section 13.26.150(e) because it would offer no reasonable expectation of a cure or relief for Cruzan.[203] Under these circumstances, the guardian would undoubtedly be legally justified in taking action.[204] Nothing in the adult Guardianship Statutes or the AHCDA requires a guardian to seek specific court approval to withhold or withdraw life support.[205] Under section 13.52.140, the superior court may enjoin or direct a healthcare decision, but an application to the superior court is not required.[206] A healthcare decision made by a guardian is effective without judicial approval.[207]

A question remains as to the conscience clause in section 13.52.060(e), which allows a healthcare provider to decline to comply with an instruction for reasons of conscience.[208] The state-run institution in which Nancy lived out her final years strongly opposed, on moral grounds, the removal of the feeding tube.[209] However, the AHCDA's conscience clause has different standards for healthcare providers and healthcare institutions or facilities. The provider may decline to comply for reasons of conscience,[210] but another provider can easily be brought in to remove the tube. Under the statute, the healthcare facility can object to an instruction only if it is contrary to a written policy of the facility that is expressly based on reasons of conscience.[211] Nothing in the case law or background materials suggests that the Missouri Rehabilitation Center had any such written policy. Therefore the facility would not have had the right to object.

The AHCDA's section on judicial relief allows the healthcare provider to petition the superior court for an injunction.[212] In *Cruzan*, the facility may have sought this relief because the appeals featured the State of Missouri, representing its healthcare institution as a party, and the Cruzans as the opposing party.[213] After the appeals, the State of Missouri was dismissed from the guardianship case.[214] Even if the State of Missouri had continued to be involved with the guardianship case, the guardianship statute would have formed the substantive basis for the decision to withdraw life support, and the conditions of that statute appear to be easily met.[215]

Analyzing Cruzan's case under the AHCDA demonstrates that when a patient is in a terminal, comatose, or vegetative state, and has not executed an advance directive, a close family member who wants to remove life support should not claim the status of surrogate. Rather, the family member should petition to be appointed guardian first and then act under the guardianship statute. Because the guardianship statutes were not updated to be consistent with the AHCDA, it is easier for a guardian to find sufficient legal justification to terminate life support.

C. Teresa Marie Schindler-Schiavo

In February of 1990, Terri Schiavo suffered a heart attack at the age of twenty-seven.[216] The heart attack caused her to enter into a vegetative state.[217] Her husband, Michael Schiavo, was appointed guardian without objection.[218] By 1993, however, serious disagreements between Terri's parents and Michael ensued.[219] The parents petitioned to have Michael removed as guardian,[220] and Michael eventually petitioned the court to allow him to remove the feeding tube that kept Terri alive.[221] The trial court found clear and

convincing evidence to support removal of the feeding tube.[222] Despite interventions by Terri's parents, the Florida governor and legislature, and the United States Congress and President, the courts sided with Michael Schiavo and allowed the feeding tube to be removed.[223] Terri Schiavo died on March 31, 2005.[224]

The first court action in the Schiavo case was the uncontested petition by Michael Schiavo to be appointed guardian.[225] Under Alaska law, a spouse has priority for appointment as guardian, unless the incapacitated person nominated someone else at a time when she had sufficient mental capacity to make an informed choice.[226] A court may decline to appoint a person who has priority when it is in the best interest of the incapacitated person.[227]

In the Schiavo case, there was initially no reason for the court to consider that it might not be in Terri's best interest to appoint her husband as her guardian.[228] When Terri's parents petitioned to remove Michael as the guardian, an Alaska court would have turned to section 13.26.125 and found that, while the court was clearly empowered to remove and replace a guardian, the statutes do not dictate the substantive standard for taking such action. Subsection (e) of that section states that a guardian may be removed if there is "probable cause to believe [he] is not performing [his] responsibilities effectively and there is an imminent danger that the physical health or safety of the ward will be seriously impaired . . . ."[229] However, it is clear from the context of that subsection that there may be other bases.[230] The Alaska

Supreme Court addressed this question recently in *H.C.S. v. Community Advocacy Project of Alaska, Inc.*[231] The court concluded that before removing or replacing a guardian, the trial court should first determine whether there has been a material change in circumstances since the guardian was originally appointed, and if there has been, whether the existing appointment is in the ward's best interest.[232] Terri's parents alleged abuse by Michael, but the judge found inadequate evidence of abuse.[233] In all likelihood, the same judge who would later order removal of Terri's feeding tube would not have removed Michael from his position as guardian for proposing a DNR order.

This leaves the question of whether a conflict existed due to Michael's romantic interest in another woman. Nothing in the Alaska statutes or case law indicates whether such a conflict would have been sufficient, in and of itself, to justify removal. The priority section of the guardianship statutes states that the court may not appoint a person who has "interests that may conflict with those of the incapacitated person."[234] However, this provision is included among several other bases for disqualification that relate to financial, not personal, interests.[235] If the person is providing substantial services in a business or professional capacity,[236] is a creditor of the incapacitated person,[237] or is employed by someone else who would be disqualified,[238] the person may not be appointed. Because the definition of a conflict of interest is unclear under this statute, Terri's parents could have argued that Michael's personal relationship warranted his removal. It is this very ambiguity, however, that makes it impossible to say how the judge might have ruled.

Note that the three cases examined thus far involved guardians rather than agents, and so the surrogacy section of the AHCDA did not apply.[239] Given that all three of these women were relatively young and healthy before a sudden trauma placed them in a vegetative state, it is hardly surprising that they did not have

appointed healthcare agents. It should also not be surprising that at least two of them already had guardians,[240] for the simple reason that in the *Cruzan* and *Schiavo* cases, the family members in question waited for a number of years before petitioning the court to remove life support.[241] In the meantime, a myriad of medical and other decisions had to be made, so that guardianship would have been a normal and expected action, even if the thought of removing life support was on no one's mind at the time. For instance, approximately 50% of patients who are diagnosed as being in a vegetative state one month after the injury will recover consciousness within a year.[242] Therefore, if the patient is in a vegetative or minimally conscious state, as opposed to being comatose, there will almost certainly be significant delays before the issue of removing life support comes to the fore.

There can be no surrogate under Alaska law if a guardian is already appointed and available.[243] Thus, surrogates are unlikely to make life-support decisions for patients in a vegetative state because, by the time life support decisions are being made, the patient will likely have a guardian. A variety of non-medical decisions need to be made for someone in a vegetative or minimally conscious state, so a guardian would be appointed to make those decisions. A guardianship petition may be dismissed if there are feasible alternatives to guardianship,[244] and a surrogate would be a feasible alternative to guardianship if only medical decisions need to be made.

Another potential problem with the AHCDA exists. Assume hypothetically that no one, including Michael Schiavo, had been appointed Terri's guardian. Suppose instead he argued for surrogate status under the AHCDA. In the absence of a designation by the patient as to whom she wanted as her surrogate, the first priority for appointment goes to the spouse, "unless legally separated."[245] One might naturally assume that because he had moved in with another woman, fathered two children by her, and began referring to her as his fiancée, Michael Schiavo would be considered legally separated from his wife. That would be an incorrect assumption. Legal separation has a specific meaning in

245. § 13.52.030(c)(1).

Alaska, and it is not based on the general facts of the case, but rather on whether a decree of legal separation has been entered under section 25.24.450.[246] Because there was no legal separation decree between Michael and Terri Schiavo, Michael would still have been entitled to priority to be the surrogate, despite his conflicted circumstances. The primary healthcare provider could decline to comply with specific decisions made by Michael,[247] but not with his right to be the surrogate. Of course the hospital, the parents, or any other interested person could petition for judicial relief under section 13.52.140 or guardianship under section 13.26.105.

Assuming Michael was able to maintain his position as guardian, we would again return to the statutes to determine his authority to consent to withdrawal of life-saving medical procedures. As in the *Cruzan* case, the question would be whether the procedures in question serve only to prolong the dying process and offer no reasonable expectation of effecting a temporary or permanent cure or relief from the illness or condition being treated.[248] Suppose for the sake of argument no one had been appointed guardian, and Michael was seeking to act under surrogacy authority. He would have to establish, among other things, that his wife was in a state of permanent unconsciousness,[249] and again there is the question of whether she experienced sensation.[250] Terri's autopsy report indicated that, toward the end of her life, she was given acetaminophen,[251] but it is unclear whether this was for pain, fever, or inflammation. If the definition of permanent unconsciousness in the AHCDA is interpreted literally, surrogates will not be able to terminate life support for patients such as Nancy Cruzan and Terri Schiavo. The statute states that thought, sensation, purposeful action, social interaction, *and* awareness of self and the environment must be absent for the person to be found permanently unconscious.[252] A literal interpretation means that each of those five prongs must be absent, so that if the patient still experiences sensation, they are not

252. § 13.52.390(31)(b).

permanently unconscious.[253] However, under Illinois law, sensation is interpreted as consciousness, and under this interpretation, a surrogate would be able to direct removal of a feeding tube for a person in a vegetative state.[254] Furthermore, given that the majority of doctors believe it is appropriate to remove feeding tubes for patients in vegetative states[255] and the possibility of "doctor shopping" by the guardian, there is little doubt that Terri Schiavo's fate would not have changed under the AHCDA.

D. Sun Hudson

If the Quinlan, Cruzan, and Schiavo cases look remarkably similar from a factual viewpoint, the sad case of Sun Hudson is quite different.[256] Sun was born with a genetic condition called thanatophoric dysplasia, a form of dwarfism, which includes a narrow chest, small ribs, and underdeveloped lungs.[257] Infants born with this condition, if they are not stillborn, usually die shortly after birth from respiratory failure.[258] This condition normally restricts the growth of the rib cage so that the baby slowly suffocates.[259] Texas Children's Hospital, where Sun was born, placed him on a ventilator, but informed his mother that further treatment would be futile, merely prolonging the inevitable, and that in their view he should be removed from the ventilator.[260] His mother refused, and the matter ended up in probate court, where the judge eventually ruled that five-month old Sun could be taken off life support,

despite his mother's objections.[261] Under Texas law, the mother was allowed ten days to find another hospital willing to take over care.[262] When the mother was unable to find another hospital, Sun was removed from the ventilator, and he died a few breaths later, on March 15, 2005.[263]

The AHCDA applies only to adults,[264] so under Alaska law, Sun's mother would act on her baby's behalf under general parental rights rather than as a surrogate.[265] Nonetheless, the hospital could have determined that keeping Sun on a respirator would constitute "medically ineffective health care," which is care that "cannot cure the illness, cannot diminish its progressive course, and cannot effectively alleviate severe discomfort and distress."[266] This would have been a questionable determination, however, because the respirator diminished the progressive course of the malady by prolonging Sun's life.

Another way in which the Alaska and Texas procedures diverge is that under Alaska law, if the mother chose to seek a transfer, the hospital would have had to provide continuing care until the transfer was effected.[267] By contrast, there is a ten-day time limit under Texas law.[268] In Alaska, the search for a hospital willing to take the child could go on indefinitely.

Alternatively, the hospital could have turned to section 13.52.140, under which it could have requested the superior court to direct a healthcare decision. At that point, the court has the dilemma noted earlier: should it review the surrogate's decision under the standards provided in the AHCDA or under the standards provided in the guardianship act? The judicial relief section of the AHCDA appears to direct the court to the guardianship act.[269] However, another question arises as to whether to consult the section on guardians of minors or guardians of incapacitated persons. The statute does not provide guidance

269. The AHCDA states that "[a] proceeding under this section is governed by AS 13.26.165–13.26.320." § 13.52.140. These sections are a part of the guardianship statutes.

because it mistakenly directs that the statute on conservatorships be used.[270] Understandably, the statute on minor guardianships does not address termination of life support beyond generally authorizing the guardian to facilitate medical care and treatment.[271] The article regarding incapacitated persons, which does address termination issues, is not limited to adults and can apply to any incapacitated person.[272] If the court turns to this article, it may hold that a guardian can consent to withholding life-saving medical procedures, as long as those procedures serve only to prolong the dying process, under section 13.26.150(e)(3). However, nothing in the guardianship statutes suggests that the judge may order the withholding of life-sustaining procedures if the guardian does not want them withheld.

On the other hand, if the judge interprets the section of the AHCDA which states that "[a] proceeding under this section is governed by" the guardianship statutes as merely referring to the procedure, then it would look to the AHCDA for the standards to be applied in determining whether life support should be terminated. However this is a stretch, not only because section 13.52.140 does not refer to *procedure*, but rather a *proceeding*, and the AHCDA does not appear to contemplate that the decisions be made by a judge.[273] If a judge heard a case similar to that of baby Sun's, the judge would have to determine whether the condition is "incurable or irreversible," whether "without administration of life-sustaining procedures death would result in a short period of time," whether "there is no reasonable prospect of cure or recovery," and whether "the condition imposes severe pain or an inhumane burden on the patient."[274] Assuming the other conditions were met, the court might nonetheless have a difficult time finding that there would be an "inhumane burden" on the baby, who was apparently not in any particular pain and breathing reasonably well on the ventilator.

Assuming the judge would not find an inhumane burden, this would have left the hospital with one remaining alternative: it could petition the court to appoint someone other than the mother as the

child's guardian, hoping that the appointee would be more likely to agree with its position. However, section 13.26.045 allows appointment of a guardian for a minor only if all parental rights of custody have been terminated or suspended by circumstances or a prior court order. None of those conditions occurred in this case. Therefore, regardless of the hospital's position, it is likely Sun Hudson would have lived a little while longer under the AHCDA.

E. Ora Mae Magouirk

In April 2005, at the height of the Schiavo controversy, one of the hot topics of discussion on the Internet was the unusual case of a widow who was allegedly being starved to death in a hospice. Unlike the previous cases, it is not possible to conclusively state the facts of this case.[275] However, for purposes of this Article, ascertaining the precise facts from among the multiple versions is unnecessary. Therefore, the following version has been pieced together by combining the various sources, with no representation of accuracy.

Ora Mae Magouirk was an eighty-one year old woman living in Alabama. Because she was a widow without any surviving children, her granddaughter helped take care of her by running errands and bringing her food. The granddaughter also had a general power of attorney. Magouirk had a living will, which said

---

275. Only a few articles appeared in the mainstream press, none of which were able to determine which side of the controversy gave the most accurate facts. Most of the information available on the case comes from Internet news sources that have a particular philosophical perspective and whose information, therefore, is necessarily suspect. *See, e.g.*, Sarah Foster, *Closest Kin Prevented from Visiting 'Grandma,'* WORLDNETDAILY.COM, Apr. 12, 2005, http://www.worldnetdaily.com/news/article.asp?ARTICLE_ID=43763; Sarah Foster, *Granddaughter Yanks Grandma's Feeding Tube*, WORLDNETDAILY.COM, Apr. 7, 2005, http://www.worldnetdaily.com/news/article.asp?ARTICLE_ID=43688; Mark A. that nutrition and hydration were to be withheld only if she were either comatose or in a vegetative state. In March 2005, Magouirk was hospitalized for an aortic problem, reportedly lucid at the time. The granddaughter had her transferred to a hospice, telling other relatives they should let her pass away, and apparently not telling the hospice about the living will. Magouirk was only able to eat foods such as Jell-O and chips of ice. On learning of this, Magouirk's sister and brother insisted on placement of a feeding tube, and made arrangements for Magouirk to be transported to the hospital at the University of Alabama at Birmingham to begin the procedure. However, while they were at the hospice awaiting her transport to the hospital, the granddaughter went to court and obtained an emergency order appointing herself as guardian; she again refused to have the feeding tube inserted. A few days later, after hearing from Magouirk's siblings, the probate judge ordered that she be "adequately fed" pending a determination of her condition, which was to be based on the opinion of three mutually agreed-upon neurologists. There is no available record of the final decision. Magouirk reportedly died a few months later at a relative's home.

Perhaps the first and foremost lesson one can learn from the Magouirk case is that having an advance directive is useless if one's medical providers are unaware of it. In Alaska, most of the major hospitals have now set up directories that will store copies of advance directives for those who provide one.[276] In addition, declarants should provide a copy to any physician they see on a regular basis and any surgeon or specialist who may be treating them for a particular problem (and to the declarant's lawyer, of course).

In the Magouirk case, the granddaughter's power of attorney did not include medical decision-making, and the living will apparently did not include appointment of an agent for health-care decisions. Therefore, under the AHCDA, the hospice would have referred to section 13.52.030, the section on surrogates. The sources reflect conflicting information on Magouirk's ability to express herself at the time she arrived at the hospice. However, if she had been able to express an opinion, she could have designated a surrogate and informed her healthcare providers of her choice. Assuming that she could not express an opinion, the healthcare providers would have looked to the priority list to see who should

276. Confirmed by phone calls by author's staff to major hospitals in Alaska. Telephone interviews by author's staff with Providence Hospital, Alaska Regional Hospital, and Alaska Native Medical (July 19-22, 2005).

make decisions on her behalf.[277] Magouirk did not have a surviving spouse, adult child, or parent, but the fourth priority is an adult sibling. Magouirk had two adult siblings. Either her sister or brother could have stepped forward and claimed the position of surrogate, or they could have both done so and would have had to reach consensus.[278] Had they both stepped forward and not been able to agree on decisions, the doctor would have broken the tie.[279] Either way, the sister and brother were both inclined to have a feeding tube inserted, and there is no reason to think that doing so would have been so far outside generally accepted healthcare standards that the provider would have been entitled to refuse. Presumably, the tube would have been inserted.

Could the granddaughter nonetheless have gone to probate court and received an emergency guardianship order? After all, a surrogate may make decisions only if a guardian has not been appointed,[280] and while an *agent* may, in certain circumstances, be able to overrule a guardian,[281] there is nothing in the AHCDA that suggests that a *surrogate* can overrule a guardian. The granddaughter could have applied for temporary guardianship under section 13.26.140, and if she convinced the court that an emergency order was necessary to protect the respondent from serious injury, illness, or disease, she could have obtained it.[282] The maneuver may or may not have worked. The granddaughter would have had to file a petition that provides the names and addresses of "the individuals most closely related to the respondent by blood or marriage."[283] This would have required her to provide the names of the brother and sister and take the risk that the court would contact them and learn that they were opposed to her guardianship.

The guardianship statutes also have a priority list, which is similar to, but not identical to, the list in the AHCDA.[284] One of the differences between the two lists could be absolutely critical in this case: the surrogate list begins with a spouse, then an adult child, then a parent, then an adult sibling, and finally an adult who has exhibited special care and concern for the patient.[285] The

283. *See* § 13.26.105(b)(6).
284. The guardianship priority list is at section 13.26.145(d); the surrogate preference list is at section 13.52.030(c).
285. § 13.52.030(c).

guardianship list begins with the spouse, then an adult child or parent, then a relative with whom the incapacitated person has resided for more than six months, then a relative or friend who has demonstrated a sincere longstanding interest in the welfare of the incapacitated person.[286] As adult siblings, the brother and sister would have had priority over the granddaughter for appointment as surrogates, but for guardianship appointment, the siblings would have been on the same priority level as relatives who had demonstrated a sincere, longstanding interest in the welfare of the incapacitated person. In fact, the granddaughter might have been considered higher on the list than the siblings, because while she was not actually living with Magouirk, she had apparently been helping to provide for her for some time.

Regardless of who was appointed as guardian (if the probate court even found a necessity for guardianship given the availability of a surrogate), the court would have still had the authority to review and amend a decision of the guardian[287] and, therefore, could have directed the insertion or withholding of the feeding tube. The court would have considered whether the procedures in question would "serve only to prolong the dying process and offer no reasonable expectation of effecting a temporary or permanent cure of, or relief from, the illness or condition being treated . . . ."[288] While Magouirk was elderly and had a potentially dangerous aortic condition, the information at hand suggests that she was not terminal, and, therefore, would probably not have qualified for cessation of life-sustaining treatment. She was also not in a vegetative state, so she would have experienced severe discomfort from being given inadequate nutrition and hydration, which would have unquestionably factored into a judge's decision.

VI. CONCLUSION

In the spring of 2005, the news of the moment was the death of Terri Schiavo by dehydration. Congress passed legislation to stop this action in a late-night session,[289] and numerous writs, cases, and appeals were filed. In the end, judicial authority won out over congressional dissent. Ms. Schiavo's feeding tube was disconnected and she slowly died. In the meantime, the media and the internet buzzed with stories about a deformed baby in Houston and an

elderly woman in a hospice in Georgia. End-of-life decisions were the water-cooler topic of the season.

The majority public sentiment seems to have been that Ms. Schiavo should not have been "starved to death,"[290] an observation supported by the legislative response. In the U.S. House of Representatives, where the vote was recorded, 203 representatives voted in favor of the bill to provide her with specific relief and only 58 representatives voted against the bill.[291] The U.S. Senate passed the same bill on a voice vote, and the President promptly signed it. Based on the overwhelming legislative response, one could assume that the majority of Americans seem to be opposed to removal of a feeding tube from a patient in a minimally conscious or vegetative state.

Nonetheless, in Alaska,[292] the recently passed AHCDA would, in all likelihood, have resulted in Terri Schiavo's death by dehydration, just as it actually happened in Florida. Despite the fact that the AHCDA says that it establishes a presumption in favor of life,[293] the specifics and the legislative history allow plenty of leeway to terminate life support, including removal of a feeding tube in circumstances in which most people believe it would be wrong to do so.[294]

The AHCDA needs to be revisited, regardless of the philosophical position from which one approaches these issues. For example, the misdirection in section 13.52.140, in which the reader is referred to the conservatorship statutes instead of the guardianship statutes; the dichotomy between what the form suggests about the right to direct that life support be terminated even if one is pregnant[295] and the statute that does not allow it;[296]

295. The sample Advance Health Directive given in the statutes has a section that seems to allow a person to enter end-of-life directives in case that person is unconscious and pregnant. § 13.52.300, pt. 2, item (6)(E).

296. § 13.52.055(b).

and the possible misconception as to what "legally separated" means in the context of a spouse taking control as a surrogate,[297] all need to be clarified.

When it addresses these technical concerns, the legislature should also consider whether the actual effect of the AHCDA will accomplish its purpose. The AHCDA purports to be based on the right to self-determination, combined with a concern for the sanctity of life.[298] Instead, it has been infused with enough loopholes such that doctors and surrogates can terminate lives, even of the unwilling, based on their own philosophical convictions. Although many people espouse the philosophy that those who cannot lead a productive life are "better off dead," this is not the philosophy the legislature appears to have endorsed, at least explicitly, when it passed the AHCDA.[299] If the legislature did not intend this result, it should consider a number of changes to the AHCDA, including a re-examination of whether the definition of "permanent unconsciousness" should include those in a vegetative state.

MEMORANDUM January 23, 2012

SUBJECT: Sectional Summary of the 2012 Revisor's Bill
(Work Order No. 27-LS0888\A)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee

FROM: Kathryn L. Kurtz KK
Assistant Revisor

The following is a sectional summary of the 2012 revisor's bill. The bill is prepared under AS 01.05.036, which provides, in part, that the revisor of statutes

> . . . shall prepare for submission to the legislature legislation for the correction or removal of the deficiencies, conflicts, or obsolete provisions, or to otherwise improve the form or substance of any portion of the statute law of this state.

To assist the reader in understanding the bill, I have summarized the contents by listing sections that have similar purposes or effects.

Sections that delete, repeal, or update obsolete provisions: Sections 1 - 3, 7 - 12, and 14 amend or repeal provisions that have become obsolete.

Sections that correct errors or oversights: Sections 4 - 6 correct errors or oversights.

Sections that improve the form or substance of the law: Section 13 proposes an amendment to improve the form or substance of the statutory law of Alaska.

SECTION 1. Amends AS 18.50.165(a) to remove the phrase "on and after July 1, 1997" in two places. The subsection requires the state registrar of vital statistics to prepare a form for acknowledging paternity under AS 25.20.055. The date is long past, along with any transition period needed to adapt to the requirements specified -- the date reference has become obsolete.

SECTION 2. Amends AS 18.56.110(g) to remove the phrase "beginning after June 30, 1983". This subsection has been in place since 1981. The limitation it expresses originally applied to periods beginning after June 30, 1982; that was extended by sec. 2,

ch. 35, SLA 1982, to apply to periods beginning after June 30, 1983. Given the length of time the provision has now been in place, the date reference has become obsolete.

SECTION 3. Amends AS 26.05.060 to remove references to 48 U.S.C. 473 - 479, part of a larger portion of the federal code that was omitted from the 1970 (and subsequent) editions of the United States Code because it related to Alaska as a territory. Since those sections became obsolete for federal purposes when Alaska achieved statehood, the reference to them here in the Alaska Statutes is also obsolete. The section retains language that makes the Alaska National Guard and the Alaska Naval Militia subject to all applicable federal laws.

SECTION 4. Amends AS 29.60.800 to change the name of the "municipal harbor facility grant fund" to the "harbor facility grant fund", in order to match the changes made in secs. 6 and 7, ch. 7, SLA 2011. Those sections made regional housing authorities eligible to apply for the harbor facility grants, and removed the word "municipal" in reference to those grants in AS 29.60.810 and 29.60.820.

SECTION 5. Amends AS 42.05.711(r) to remove a definition of the term "renewable energy resources" by reference to AS 42.45.045, since that section is the subject of a delayed repeal scheduled to occur in 2013. The text of the definition now found in AS 42.45.045 is added to AS 42.05.711 by the following section of this bill, so that AS 42.05.711 will not be affected by the repeal of AS 42.45.045. Also changes a reference to the effective date of the subsection to August 31, 2010, the actual effective date of the subsection.

SECTION 6. Amends AS 42.05.711 by adding a new subsection. See the analysis for the previous section.

SECTION 7. Amends AS 43.20.014(f)(1), which defines "school district" by reference to the definition in AS 14.03.126 (repealed by sec. 8, ch. 41, SLA 2006, effective June 30, 2009). This bill section removes the reference to AS 14.03.126, and inserts the text of the definition from that section as it read prior to the repeal.

SECTION 8. In AS 43.55.019(g)(1), substitutes a reference to the definition of "school district" in AS 43.20.014, as amended by sec. 7, for a reference to AS 14.03.126, which has been repealed. See Sec. 7 for further explanation.

SECTION 9. In AS 43.56.018(f)(1), substitutes a reference to the definition of "school district" in AS 43.20.014, as amended by sec. 7, for a reference to AS 14.03.126, which has been repealed. See Sec. 7 for further explanation.

SECTION 10. In AS 43.65.018(f)(1), substitutes a reference to the definition of "school district" in AS 43.20.014, as amended by sec. 7, for a reference to AS 14.03.126, which has been repealed. See Sec. 7 for further explanation.

SECTION 11. In AS 43.75.018(f)(1), substitutes a reference to the definition of "school district" in AS 43.20.014, as amended by sec. 7, for a reference to AS 14.03.126, which has been repealed. See Sec. 7 for further explanation.

SECTION 12. In AS 43.77.045(f)(1), substitutes a reference to the definition of "school district" in AS 43.20.014, as amended by sec. 7, for a reference to AS 14.03.126, which has been repealed. See Sec. 7 for further explanation.

SECTION 13. Amends AS 44.62.190, relating to notice of the proposed adoption, amendment or repeal of a regulation. The paragraph amended, AS 44.62.190(a)(6), provides for electronic notice of these changes to legislators. The amendment deletes the qualifying phrase "if the state agency has the technological capability," because, according to the Regulations Attorney at the Department of Law, all state departments now have this capability. This section also deletes the clause permitting an agency that does not have the technological capability to furnish electronic notification to legislators through an alternative method.

SECTION 14. Repeals AS 21.27.380(f), which provides for the renewal of two year trainee licenses issued to a managing general agent, reinsurance intermediary broker, reinsurance intermediary manager, or surplus lines broker. The provisions permitting issuance of those two year trainee licenses, AS 21.27.600, 21.27.680, 21.27.740, and 21.27.800, were repealed by sec. 53, ch. 96, SLA 2004, making the renewal provision in AS 21.27.380(f) superfluous.

SECTION 15. Provides for an immediate effective date.

TEXT OF REPEALED PROVISION

AS 21.27.380(f):

> (f) A two-year trainee license issued to a managing general agent, reinsurance intermediary broker, reinsurance intermediary manager, or surplus lines broker may be renewed only once.

Sponsor Statement
SB 180 -- Naturally Occurring Asbestos in Gravel

HB 258 authorizes and regulates the use of gravel or aggregate material that contains naturally occurring asbestos (NOA). There are documented cases of NOA being found in several areas of the state, including Juneau, along the Dalton Highway and Ambler. Discovery of NOA in local gravel pits has delayed and, in Ambler's case, halted construction projects. The use of NOA in construction projects may be regulated by states. Virginia and California have been regulating NOA for many years. With the passage of SB 180, the discovery of NOA in local gravel sources and the cost of transporting non-NOA gravel and material will not impact the success and completion of construction projects and important future state infrastructure in Rural Alaska.

Several large projects are on the state's horizon that will require the use of large amounts of gravel. These large projects are in mineral rich areas of the state critical to the future development of Alaska. Most notably, it is estimated that the gas pipeline alone may use 50 to 60 million cubic yards of new gravel. Many miles of the Dalton Highway will be reconstructed in support of the project, requiring additional gravel. In Rural Alaska, almost all airport construction and upgrades require material from local gravel sources; a new small airport can use up to 25,000 cubic yards of gravel. The use of NOA gravel and materials should be resolved before it becomes an issue during the actual construction process of any of these large future projects.

SB 180 directs the Department of Transportation and Public Facilities to develop and implement statewide regulations and standard operating procedures (SOP) to allow for the use of NOA for both State and private construction projects. SB 180 will balance the needs of moving Alaska forward; building critical infrastructure, completing construction projects while protecting the health of Alaskan workers and communities.

MEMORANDUM December 22, 2011

SUBJECT: Sectional summary of draft bill relating to naturally occurring asbestos (Work Order No. 27-LS0400\B)

TO: Representative Reggie Joule
Attn: Brodie Anderson

FROM: Emily Nauman EN
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1 of the bill contains legislative findings and purpose statements to explain and support the measure.

Section 2 of the bill creates immunity from civil action or a claim for civil damages based on an alleged asbestos-related death, injury, illness, or disability or asbestos-related property damage claim in specified circumstances.

Section 3 of the bill adds a new section, AS 18.31.250, to describe how a person may qualify for immunity under sec. 2 of the bill related to use of aggregate material containing naturally occurring asbestos in construction projects that are not initiated or contracted for by the Department of Transportation and Public Facilities (DOT).

Section 4 of the bill directs DOT to establish standards and procedures for gravel and aggregate materials that contain naturally occurring asbestos.

Section 5 of the bill, a temporary law provision, permits DOT to review and approve site-specific plans submitted for DOT projects and for projects not initiated by the department during the interim period before initial standards and operating procedures adopted under sec. 4 of this bill take effect.

Section 6 of the bill authorizes DOT to use a specific standard previously adopted by the California Air Resources Board on an interim basis for the purpose of determining the

asbestos content of a bulk sample in a bulk test required under the new permanent law provisions until the department adopts its initial standards that may be more relevant to this state's experience.

Section 7 of the bill gives the measure an immediate effective date.

State Senate
Alaska State Capitol
Juneau, AK 99801-1182

January 31, 2012

Dear Senator Olson:

The Northwest Arctic Leadership Team (NWALT) writes in support of Senate Bill 180. As you know, NWALT is a partnership of the Northwest Arctic Borough, Maniilaq Association, the Northwest Arctic Borough School District and NANA Regional Corporation. It is our charge to maximize resources and reduce duplication of efforts to address issues affecting the people of Northwest Alaska while honoring and perpetuating our Iñupiat cultural heritage.

Enactment of SB 180 is essential for completion of long-needed construction and public works projects in the Upper Kobuk Valley, most of which have been put on hold for over a decade due to naturally occurring asbestos (NOA) in the local gravel sources. Projects delayed in Ambler add up to over $10 million and include:

1. Airport runway extension and upgrades to Grizzly Bridge, which are necessary to reach the airport (the last improvement to the airport was in 1991 and to Grizzly Bridge was in 1976)
2. Upgrades to water and sewer services (last improvements in 1973 and 1982 respectively)
3. Building of new homes (last new homes completed in 1991 by the Northwest Inupiat Housing Authority)
4. Upgrades to existing dumpsite (opened in 1976 with no improvements since)
5. To secure the embankment protecting homes from river erosion

In Kobuk, a necessary addition to the school to accommodate students attending high school in the village has been delayed since grades 9-12 were made available in the village five years ago.

The use of NOA-containing material in construction and public works projects in the Upper Kobuk is necessary to the maintenance and improvement of local infrastructure so that residents may have the opportunity to enjoy a quality of life similar to that of residents who have the benefit of NOA-free gravel sources. Additionally, this legislation is a crucial part of the long-term solution to an important issue affecting rural Alaskans across the State, as well as proposed development projects such as the Ambler Mining District Access Project.

NWALT Northwest Arctic Leadership Team

We thank you for your advocacy on this important issue.

Sincerely,

Siikauraq Martha Whiting
NWALT Co-Chair
Mayor
Northwest Arctic Borough

Marie N. Greene

FISCAL NOTE #1

STATE OF ALASKA **BILL NO.** CSSB 180(TRA)
2012 LEGISLATIVE SESSION

Analysis

The proposed legislation intends to require the Alaska Department of Transportation and Public Facilities to establish standards and operating procedures in connection with public construction and maintenance projects to allow for the use of gravel or aggregate containing a limited amount of naturally occurring asbestos in a manner that avoids significant human health risks while mitigating significantly higher costs associated with using only gravel or aggregate that is 100 percent free of asbestos. The proposed legislation also intends to require users of gravel or aggregate containing a limited amount of naturally occurring asbestos to prepare project plans that demonstrate conformance with established standards and to shield providers of gravel or aggregate containing a limited amount of asbestos from liability under certain conditions.

There is no anticipated financial impact to the department as a result of this legislation. Existing resources would be used to provide consultative assistance to the Department of Transportation and Public Facilities in establishing and implementing standards for the use of aggregate or gravel that contains a limited amount of naturally occurring asbestos. Electronic means of communication will be utilized to avoid the need for travel.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 180(TRA)

Analysis

The Department of Environmental Conservation is tasked with consulting with the Department of Transportation & Public Facilities on the development of standards and operating procedures to allow the use of gravel or aggregate material that contains naturally occurring asbestos in transportation and public facilities construction projects.

Travel:
This fiscal note assumes Air Quality will assign staff to membership on an inter-agency task force(s) to establish interim standards and develop standard operating procedures. Membership will require travel to multiple planning and public meetings during FY2013 and FY2014, with annual meetings occurring thereafter.

Naturally Occurring Asbestos in Alaska and Experiences and Policy of Other States Regarding its Use

EXECUTIVE SUMMARY

Naturally Occurring Asbestos (NOA) occurs in mineral deposits in Alaska. Some localities in Alaska do not have gravel sources that are NOA-free, which impacts the cost of heavy construction projects such as roads and airports. Because airborne asbestos fibers are a significant human health risk, mining and industrial use of asbestos is rare in the United States. Disposition of existing asbestos materials in industry and buildings is tightly regulated by federal and state authorities. The use of NOA is not regulated by federal agencies or most states. Determining if NOA can be safely used in heavy construction materials and what can or should be done with NOA materials that are already in place are complex questions. The ultimate answer depends on propensity for the NOA in each scenario to actually release asbestos fibers that may be inhaled by humans, which in turn depends on the amount and type of asbestos mineral, how it is handled in processing, and how it is maintained. Practical analysis of this depends on laboratory analysis, as well as regulation or control of operations. Implementation of these requires stakeholder education and cooperation and agency oversight. This report summarizes these from the perspective of the Alaska Department of Transportation (ADOT).

Some key points:

- NOA is present in many states, but only a few have regulations governing its use.
- There are many regions in Alaska that have minerals in surface rocks that may contain asbestos and asbestos has been discovered in many locations in Alaska.
- Gravel is constantly in demand for heavy construction projects, if a major project, such as the gas pipeline is built, it will require very large quantities of gravel
- All future material site exploration should consider the possibility of encountering NOA, and those areas indicated by mapping as possible NOA minerals should be carefully investigated.
- California, which does have NOA regulations, uses a threshold asbestos concentration, below which the material is not considered NOA. If the material is NOA, regulations cover its use. Virginia is similar.
- Starting with a site-specific plan and then covering the material and reducing dust are key features of those regulations, if NOA is over the threshold asbestos content.
- We present a review of dust suppression and capping techniques, many of which might be useful, depending on the situation.
- Education of the public and worker training are important components of any NOA plan.

The key conclusion is that NOA can be used in many projects, but precautions are needed, especially a plan for its use. Considering the importance of NOA to ADOT's mission we recommend that the ADOT take the lead in a statewide effort to develop an appropriate NOA policy and program by coordinating a stakeholders working group effort. NOA programs in other states were developed with input from industry, public health, environmental and state organizations and agencies. The outputs of the NOA programs included source characterization, geologic mapping, standardized operating procedures (SOP), program exemption procedures, and local authority. Successful implementation of a NOA program will require significant commitment and change in industry, operational, management, design and construction practices for use of NOA materials. To insure comprehensive input and facilitate stakeholder "buy in," the statewide working group should include federal and state, and local government, as well as industry, community and public health interested parties.

Here we assume that in order for projects that must use NOA to proceed, the ADOT must have a standard or SOP that contains the goals and guidelines that the ADOT must follow in order to use NOA safely. The SOP in turn would require a specific action plan for each project. Of course other project owners could use the ADOT's SOP. Thus, the ADOT's goal with the NOA working group is to develop an SOP that is directed towards ADOT projects, but also satisfies the goals the various stakeholders. We note here that protecting the public health and safety is the overarching goal the ADOT's operations, but the ADOT's approach via building safe roads and airports is different than, for example, the EPA's approach of limiting public exposure to carcinogens. The goals and charges of all the agencies can be reconciled into a workable SOP, but the coordination effort should not be underestimated.

Here is a putative outline of the SOP required for safe use of NOA and the steps likely required to garner wide stakeholder approval of the SOP.

1. The SOP includes
    a. site investigation and characterizations
        i. Laboratory practices
    b. review of design alternates to use non-NOA materials
        i. Cost analysis
    c. evaluation of human health concerns and agency involvement
    d. designs that use NOA
        i. typical drawings and specifications
    e. acceptable construction practices
        i. typical contract provisions
        ii. QA/QC
    f. acceptable and required O&M practices
        i. State forces
        ii. Local forces
    g. O&M and other issues related to in-place NOA

    h. the administrative procedures for the entire process, including lines of authority and approval authority
        i. interagency communications
        ii. documentation
2. For each project or situation
    a. a site specific NOA plan
    b. including outline construction specifications or O&M procedures
    c. public involvement and education
    d. QA/QC

However to be successful, the SOP must be acceptable to

- The agencies who may have some jurisdiction or be involved
- The DOT design, construction and O&M staff and experts
- The contractors and material site owners and suppliers
- The general public
- Involved and concerned public.

Thus, we recommend the ADOT take the lead and develop a NOA Action Plan that involves a consultant to the DOT. Here are the main steps of that Action Plan that will lead to a workable SOP:

- Outline the SOP
- Contact all interested parties and notify them of the Action Plan and request a statement of their interest
- Meet with all the major players and discuss the issues – either at a roundtable or individually
- Prepare a draft of the SOP and an example Site Specific Plan for ADOT review
- Distribute the draft to interested stakeholders
- Hold a meeting to review the draft and discuss comments and changes
- Determine if new laws or regulations are needed
- If not, the ADOT promulgates the SOP
- If new laws or regulations are needed, ADOT starts the process.

INTRODUCTION

Asbestos is a term for naturally occurring silicate minerals with long, thin fibrous crystals that were historically mined and utilized in a wide-variety of manufactured products because of favorable chemical and physical properties. By the 1980s inhalation of asbestos fibers was found to be a human carcinogen responsible for diseases such as asbestosis, mesothelioma and lung cancer and the mining and use of asbestos in manufactured products was banned. While mining and manufacturing has since ended in the United States, Naturally Occurring Asbestos (NOA) is a constituent of some rocks and soils existing in varying types and quantities in several locations throughout the nation including Alaska. The United States Occupational Safety and Health Administration (OSHA) regulates asbestos exposure in the workplace; however, federal regulations do not address non-occupational exposure from NOA. Due to the lack of regulatory guidance associated with NOA, some states with substantial NOA concerns, such as California, have implemented state-wide regulations controlling the use of soils with NOA.

Due to geography, land mass, limited road systems and relatively sparse and scattered population centers within Alaska, NOA has not been a historical concern for the state. However, over the past several years NOA has been encountered in Alaska and has impacted state projects (e.g. Dalton Highway, Ambler, etc). Meanwhile the Alaska Department of Transportation & Public Facilities (ADOT) has an ever-increasing demand for gravel and rock to construct and repair the state's roads and airports. Large construction projects such as the proposed gas line or railroad extension will require gravel and rock source development.

The ADOT contracted with the Institute of Northern Engineering (INE) of the University of Alaska Fairbanks through the Alaska University Transportation Center to report on the available background information in Alaska and a literature search of information from other states that have similar NOA issues. INE contracted with Nortech Environmental, an Alaska consulting firm, to provide expertise in asbestos issues in Alaska, and to perform the literature search and consultations with other states.

This paper reviews NOA background, analytical issues, policies and regulations that have been considered and/or implemented by other authorities involved with NOA and who have developed NOA policy options. Identified NOA control strategies and technologies are evaluated and analyzed according to their effectiveness, enforcement, affordability and consistency with emerging US standards and ADOT programs. The literature is clear that NOA gravels can be used safety with proper workforce training, understanding and implementation of appropriate control strategies and technology. Implementation of effective Alaskan NOA policies, including development of any SOP to deal with NOA,

will require program consensus, including an educational component, and must involve all stakeholders in the NOA issue (resource owner, owner, designer, contractor, local, regional and state government, and communities) in a holistic approach.

BACKGROUND

Asbestos History

The word 'asbestos' is of Greek origin and has the meaning "inextinguishable" or "indestructible." Today asbestos is the commercial term for a group of silicate minerals consisting of magnesium, calcium and iron all with fibrous tendencies. The favorable properties of asbestos were known and utilized by the ancient Greeks and Romans, Europeans throughout the Middle Ages, and most of the industrial world by the modern era. Asbestos was added in manufactured material for thermal and electrical insulation as well as for strength and chemical stability. These favorable traits lead to the continued use of asbestos in manufactured products through the industrial expansion of the 20th Century. By mid-1960 a high frequency of respiratory disease within the asbestos mining, manufacturing, shipbuilding and construction industries began to gain the attention of medical researchers.

Asbestos is naturally occurring in many parts of the world and was historically mined as raw ore. After the ore was segregated, the asbestos was broken down into fibers and fiber bundles during a milling process, and then further refined depending on the use. Asbestos was included in the manufacture of thermal piping insulation and spray-applied fireproofing as well as resilient floor coverings, acoustical materials, gaskets, plaster, vermiculite, joint compound, wall board, roofing products, industrial mastics, textile and friction productions such as automotive brakes.

In mineralogy, the word 'asbestos' describes a series of magnesium silicate minerals that naturally occur in fibrous form or 'asbestiform.' The six varieties of recognized asbestos minerals comprise two mineralogical groups: serpentines and amphiboles. The only variety of serpentine asbestos is chrysotile or 'white asbestos,' while the amphibole group has five mineral varieties: amosite or 'brown asbestos' (cummingtonite-grunerite asbestos), crocidolite or 'blue asbestos' (riebeckite asbestos), anthophyllite asbestos, tremolite asbestos and actinolite asbestos. Amosite and crocidolite are the trade names used for the asbestos varieties of the cummingtonite-grunerite and riebeckite series respectively. The name 'Amosite' originated as an acronym for "Asbestos Mines of South Africa."

Chrysotile is the predominant asbestos variety used commercially in the United States. Chrysotile has a crystal structure of a sheet of silicate rolled into a straw-like, hollow tube. The property creates a hydrophilic or 'water loving' tendency, and therefore water is often used to reduce airborne chrysotile fiber concentrations during processing and removal activities. Crocidolite and Amosite are the two additional asbestos varieties exclusively mined and intentionally added to commercial products. The other three forms of amphibole asbestos are generally found in trace amounts and are often described as a contaminant in mining operations. The crystal structure of amphiboles is a chain structure of

magnesium and silicon ions that form into long straight fibers. The molecular arrangement makes the amphiboles hydrophobic or 'water fearing' and difficult to wet and therefore, water is somewhat less effective as dust control with this group.

Asbestos has become a serious health and safety concern due to widespread use in manufactured products; many of which are still used today. The primary pathway of exposure for asbestos is inhalation of airborne fibers; ingestion is generally a minor pathway. Particles smaller than 10 μm in aerodynamic diameter, such as asbestos fibers, are known to readily enter the lungs. Asbestos dust may also be ingested directly into the mouth during respiration, hand-mouth contact while eating or smoking, or indirectly by swallowing of mucus. Dermal exposure to asbestos has been known to cause irritation; however, no serious health effects from skin exposure have been identified.

Asbestos is known to cause or contribute to fibrosis and malignancies of the lung and other organs. The U. S. Environmental Protection Agency (EPA) has classified asbestos as a Group A human carcinogen meaning sufficient evidence exists to connect exposure and human carcinogenicity. Exposure to airborne asbestos has been linked to Asbestosis- a debilitating, non-malignant lung disease; mesothelioma – a rare cancer of the chest and abdominal lining, and cancers of the lung, esophagus, stomach, colon and other organs. Other conditions associated with asbestos exposure are build-up of fluid in the lungs known as pleural effusion and deposits in the pleural cavity called pleural plaques.

Data from asbestos work exposure suggests the risks of asbestosis and lung cancer are "dose-dependent" meaning they decrease proportionately with a decrease in total asbestos exposure. Mesothelioma however is not recognized as a dose-response related illness and has been linked to primarily amphibole asbestos exposure.

The time between exposure and resulting disease is known as the latency period, and typically spans between ten and forty years. The age at which asbestos exposure occurs is relatively unimportant for determining the lifetime risk of lung cancer. On the other hand, the age at which asbestos exposure occurs is very important in determining the lifetime risk of developing mesothelioma. The earlier exposure occurs, the more time mesothelioma has to develop; thus the concern for asbestos exposure to school children.[1]

Asbestos exposure and cigarette smoking increases the lung cancer rate significantly above the rate due to either smoking (ten times) or asbestos exposure (five times) alone. A smoker routinely exposed to asbestos experiences a synergistic effect from the two thereby increasing their risk of developing a lung disease by fifty to ninety times more than a person who does not smoke and is not exposed to asbestos. OSHA standards require employers of workers who

are exposed to asbestos to be provided information packets on smoking cessation programs and to ban smoking in all workplaces where any asbestos exposure is possible.

Asbestos Regulations

Although NOA is not regulated per se, here we review the most important asbestos regulations. The EPA regulates asbestos products primarily under three laws:

- Clean Air Act (CAA), at 40 CFR 61 Subpart M – National Emission Standard for a Hazardous Air Pollutant – Asbestos (NESHAP);
- Toxic Substances Control Act (TSCA), at 40 CFR 763 Asbestos; and
- Asbestos Hazard Emergency Response Act (AHERA) which amended TSCA in 1986.

Asbestos is further regulated by several federal agencies and some Alaska agencies.

NESHAP

The asbestos NESHAP regulates the emission of asbestos from the workplace into ambient air primarily during removal activities, building renovation/demolition and associated waste disposal operations. The NESHAP allows no visible emission of asbestos from the workplace during any regulated activity.

Three key NESHAP concepts are 'asbestos-containing material' (ACM), 'friable' material, and 'Regulated ACM' (RACM). A material is defined as ACM if it contains more than 1% asbestos as determined by polarized light microscopy (PLM) analysis. Untested materials identified as suspect by an accredited inspector must be Presumed ACM (PACM). Friable is defined as a material that, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. Nonfriable materials are subdivided into Category I nonfriable (packings, gaskets, asphalt roofing products and resilient floor covering) and Category II nonfriable (such as wallboard, cement asbestos products, asbestos-containing plasters, and any nonfriable ACM not listed in Category I). Category II nonfriable ACM are materials that may become friable during handling or disposal.

RACM includes all friable ACM, nonfriable ACM that has become friable, Category II materials that will be made friable by the proposed activity and all Category I materials that will be subjected to operations causing fibers to become airborne. Prior to the demolition or renovation of any non-exempt structure in the United States, the owner or operator of the facility must inspect for the presence of asbestos, including Category I and II non friable ACM. NESHAP requires building owners and operators to notify the EPA (or a designated state agency) before demolishing any non-exempt structure. In addition, it requires a ten day advance notification if scheduled activities will disturb equal or greater than (≥) 260 linear feet on pipes, ≥160 square feet on surfaces and ≥35 cubic feet of debris of RACM. The NESHAP standard also prohibits emissions of asbestos to the outside air and requires emission control procedures and appropriate work

practices during collection, packaging, transportation and disposal of regulated ACM waste.

AHERA

EPA issued regulations pursuant to the 1986 Asbestos Hazard Emergency Response Act (AHERA) in October of 1987. AHERA applies to public, nonprofit private and Defense Department kindergarten to twelfth grade school buildings. It requires them to conduct ACM inspections, develop comprehensive ACM management plans, and select asbestos response actions to deal with asbestos hazards. AHERA established a series of accredited personnel and set the training requirements for each. The AHERA occupational survey does not require inspection of all portions of the school (ie exterior, roof etc) nor the removal of asbestos identified, but does require that schools select and implement an appropriate response action for each identified asbestos hazard. The response action may be encapsulation, enclosure, removal or an approved Operations Maintenance and Repair Program (O&M Program). Encapsulation deals with applying a chemical coating or impregnation of the ACM building material in order to prevent any fiber release, while enclosure consists of sealing the ACM in an airtight structure. O&M Programs and Management in Place (MIP) are generally the most utilized and preferred response method until the ACM has become deteriorated or will be impacted by renovation activities thus requiring removal.

The Asbestos School Hazard Abatement Reauthorization Act (ASHARA) was enacted on November 28, 1990. ASHARA amended AHERA to require accreditation for any person who inspects for ACM in a public or commercial building, or who designs or conducts a response action with respect to friable ACM in such a building. ASHARA does not require building owners to conduct inspections for asbestos-containing materials in public and commercial buildings; however, should the owner decide to conduct an inspection an accredited inspector must be used.

TSCA

EPA's Asbestos Ban and Phase Out Rule (ABPO) (40 CFR 763 Subpart I) was published in the Federal Register on July 12, 1989, under TSCA. The rule was to prohibit the importation, manufacture and processing of 94 percent of all remaining asbestos products in the United States over a period of seven years, beginning in 1990. However, the U.S. Fifth Circuit Court of Appeals vacated most of the ABPO and remanded it to EPA in October 1991. EPA subsequently banned several paper products and has used general TSCA authority to control re-introduction of asbestos products into the market place.

OSHA

OSHA currently has three standards for asbestos exposure. The general industry standard, 29 CFR 1910.1001, applies to all occupational exposures to asbestos in all industries except the shipyard and construction industries. This

standard would apply to workers handling NOA if exposures were above the PELs. The shipyard standard, 29 CFR 1915.100, applies to asbestos exposure in all shipyard work and the construction standard, 29 CFR 1926.1101, applies to asbestos exposure in all construction work, including demolition and building maintenance.

All three standards are similar, with each standard setting two permissible exposure limits (PEL), the time-weighted average (TWA) and the excursion limit (EL). The TWA is 0.1 fiber per cubic centimeter of air (f/cc) averaged over an eight-hour period, while the EL is 1.0 f/cc averaged over a 30-minute period where exposure is likely to be the greatest. Each standard specifies training, medical monitoring and recordkeeping requirements for employers of workers who are exposed to asbestos. Differences exist primarily in the areas of effective dates for worker training, medical monitoring, and in work practices specific to the industry. The construction standard is the most detailed and divides asbestos work into classes, I-IV, based on the type of the material, the work being performed, how the material will be impacted, and the amount of ACM involved in the work. For all construction work scheduled to impact PACM or ACM, a competent person must conduct an initial exposure assessment to determine employee worst-case exposure and to establish the engineering controls, work practices, and personal protective equipment that may be required. The standard also supplements the OSHA Hazard Communication Standard (29CFR 1910.1200 and 29 CFR 1926.59) by requiring building and facility owners to notify prospective contractors and subcontractors, tenants, and the owner's own employees about the presence, location and amount of PACM and ACM in the building. This standard requires owners to conduct asbestos inspection or surveys so that the necessary information is available for compliance with notification requirements. The General Industry Standards would apply to workers handling NOA if there exposure were over the PEL.

DOT

The U.S. Department of Transportation (DOT) regulates the transportation of hazardous materials including friable asbestos under the Hazardous Materials Transportation Act (HTMA). DOT's hazardous materials regulations (HMR) are found at 49 CFR 171-180. These regulations require the proper packaging, labeling, shipping manifests, marking, placarding and trained employees associated with shipping of ACM and waste. Proper shipping papers must accompany asbestos-containing shipments with packages properly marked and labeled with the Class 9 diamond. The markings must include the North American identification number, NA2212, and the proper DOT descriptive name (RQ, Asbestos 9, NA2212, PG III). Laboratory samples in shipment are exempt from the regulations, except for the packaging requirements of 49 CFR 173.4.

MSHA

As of April 29, 2008, the U.S. Department's of Labor Mine Safety and Health Administration (MSHA) revised exposure limits on asbestos for miners. The

ruling changes health standards for asbestos exposure at metal and nonmetal mines, surface coal mines and surface areas of underground coal mines. The new ruling lowered MSHA's permissible exposure limits to match those of OSHA. The previous MSHA PEL of 2.0 f/cc was once the same as OSHA's; however, MSHA has not made continuing amendments to the standard in past years which reduced the PEL to 1.0, 0.5, 0.2 and eventually 0.1 f/cc. In addition, the ruling allowed for Phase Contrast Microscopy (PCM) to analyze airborne asbestos samples and Transmission Electron Microscopy (TEM) to reanalyze samples found to be above the PEL via PCM.

Alaska

The Alaska Department of Labor (ADOL) has adopted, with a few modifications, the federal regulations OSHA for asbestos and asbestos removal activities. Federal government has delegated authority to the Alaska Department of Environmental Conservation (ADEC) to implement federal programs which extend the NESHAP, ASHARA and AHERA requirements and the Alaska Department of Occupation Safety and Health (AKOSH) to oversee worker protection.

Other States

Some states have adapted more stringent AHERA and OSHA type regulations, and in some large metropolitan areas the city regulates asbestos and asbestos abatement directly. Other states such as California have developed statewide policies concerning issues not addressed in Federal regulations such as Naturally Occurring Asbestos (NOA) found in soils and rock.

Relevancy of Regulations

None of these regulations, except California and Virginia, discussed elsewhere, apply directly to NOA as likely to be encountered by the AK DOT. The MSHA and ADOL/OSHA regulations apply regarding worker exposure, if workers were exposed over the PEL. The detailed ADOL/OSHA regulations regarding asbestos demolition and disposal do not apply to NOA.

Naturally Occurring Asbestos

Naturally Occurring Asbestos (NOA) has been generally accepted as the generic term to identify any of the six (Chrysotile, Amosite, Crocidolite, Actinolite, Tremolite, Anthophyllite) varieties of asbestos when encountered in natural geological deposits. Asbestos is not chemically altered through a refining process to obtain the hazardous end product we encounter in manufactured goods; but rather raw asbestos ore is mined and crushed down into a usable form. Consequently, NOA describes the location of asbestos (in situ rock and soil) rather than a variety of asbestos.

The mineralogical community uses the term "asbestiform" to describe the morphology of a mineral which has longitudinal parting and can be split into individual fibers. Not all asbestiform minerals are regulated varieties of asbestos; however, all regulated asbestos are asbestiform. Asbestiform minerals consist of fibers that grow almost exclusively in one dimension, are easily bent and occur as bundles of smaller fibers which are called fibrils. This bundling effect of asbestiform minerals is used as a unique distinguishing feature. Asbestiform minerals are long and thin, with aspect ratios of typically 20:1 to 100:1 or greater. Most asbestiform fibers are less than 0.1 microns in width, and nearly all are less than 0.5 micron. Individual asbestiform fibers are visible only with the aid of a microscope. It is important to note these forms became regulated due mainly to their presence in commercial products and several other asbestiform minerals exist, in addition to the six regulated forms, and may be encountered in natural deposits and pose heath hazards similar to that of the regulated varieties.

Geologic Occurrence of Asbestos Minerals

Metamorphic rocks are the result of the transformation of a protolith (existing rock) in a process called metamorphism during which the protolith is subjected to heat and pressure causing profound physical and/or chemical change. Prior to the transformation, the protolith may begin as sedimentary rock, igneous rock or another older metamorphic rock. A large portion of the Earth's crust is composed of metamorphic rocks which are classified by texture and by chemical and mineral assemblage. They may be formed simply by being deep beneath the Earth's surface, subjected to high temperatures and the great pressure of the rock layers above it. They can be formed by tectonic processes such as continental collisions which cause horizontal pressure, friction and distortion or when rock is heated up by hot molten rock, magma, from the Earth's interior, later referred to as igneous intrusion.

Serpentines (Chrysotile) are a magnesium silicate, while amphiboles are generally iron-magnesium silicates with varying amounts of sodium and calcium. If the protolith contains these chemical components asbestos formation is more likely than those that do not. All rocks which have this chemical composition have the potential to contain amphibole asbestos or serpentine asbestos; however, the non-asbestiform varieties of these minerals considerably more dominant than asbestiform.[2]

Asbestos minerals are generally associated with ultramafic rocks and their metamorphic protolith, including serpentinite (serpentine rock). Ultramafic rocks are those igneous rocks composed mainly of iron-magnesium silicate minerals, such as olivine and pyroxene. They include the rock types dunite, peridotite, pyroxenite, and hornblendite. Ultramafic rocks form in high-temperature and high-pressure environments deep beneath the earth's surface. By the time they are exposed at the earth's surface, ultramafic rocks have typically undergone a type of metamorphism known as serpentinization, a process that alters the

original iron-magnesium minerals to one or more waterbearing magnesium silicate minerals (lizardite, antigorite, chrysotile) that belong to the serpentine mineral group. The mineral chrysotile is often present as asbestos in the resulting rock. Metamorphism of ultramafic rocks and serpentinite may also lead to the formation of amphibole asbestos minerals. Conditions favorable for asbestos formation may occur repeatedly during the metamorphic process and, consequently, it is very common for at least a small quantity of asbestos to be present in metamorphosed ultramafic rock bodies. [3]

While generally associated with serpentinite and ultramafic rocks, chrysotile asbestos may less commonly occur in other rocks that originally contained the minerals olivine and pyroxene. These include metamorphosed mafic plutonic rocks like gabbro or mafic volcanic rocks such as basalt that are commonly associated with ultramafic rocks or serpentinite. Chrysotile and the amphibole forms of asbestos may also form in magnesium-rich limestones and dolomites which are metamorphosed carbonate rocks. The amphibole asbestos minerals are most commonly found in metamorphosed ultramafic rocks, including serpentinite, and in metamorphosed mafic plutonic rocks, metamorphosed mafic volcanic rocks, metamorphosed iron-rich chert, and metamorphosed ironstones. In many of these geologic environments, Asbestos is thought to be more likely found where changes in the geology occur such as near geologic contacts, along dike boundaries, or near inclusions of different rocks or in fault and shear zones where natural fluid flow has been enhanced. [3]

Asbestos minerals may also be found in sedimentary rocks, stream sediments, or soils derived from parent materials that contain asbestos. Alluvial deposits that contain asbestiform materials are likely to be found in any watershed that drains ultramafic rocks.[4]

Soils derived from parent materials that contain chrysotile asbestos and amphibole asbestos may also contain asbestos fibers and are an important potential source of airborne asbestos. Weathering and leaching reduce the amounts of asbestos in soils over time, yet little is known about the rates of weathering and leaching of asbestos in soil environments. Available information suggests that substantial reductions in the amount of chrysotile may take hundreds or thousands of years, depending on the soil environment, and somewhat longer for amphibole asbestos. [2]

NOA in USA

In the United States, the presence of asbestos or asbestiform minerals in rocks has been identified in 20 states, and mined in 17 states in the last 100 years. [5] In addition to known previous mining locations, reports of asbestos or other fibrous minerals has been identified through geological surveys and other miscellaneous encounters. The United States Geological Survey (USGS) has an ongoing effort of compiling these sites and locating them on maps that are available on its web-

site at http://tin.er.usgs.gov/mrds[6]. The sites on these maps give an indication of the major areas of concern, which are most particularly located along the Appalachian and Rocky Mountains as well as in the Western Cordillera. In some of these areas, such as California and Virginia, the NOA issue has been known for some time and local agencies have responded in a variety of ways such as implementing state and local policies and regulations for testing and handling suspect and known NOA. The health risks associated with NOA are based on the potential for exposure. The exposure pathway of greatest concern is through inhalation, which requires the asbestos to become airborne. Experts believe that natural factors such as wind erosion pose little threat to human exposure, but rather disturbance of NOA-containing rock and soil under dry conditions. Because of this health risks are generally quantified though activity-based sampling on a site-specific basis. Below is a list of some areas in the US where NOA has been identified, and local responses to the occurrence:

Virginia

In 1987 the presence of NOA in Fairfax County, Virginia, was brought to the attention of the Fairfax County Air Pollution Control Division (Fairfax APCD) during the construction of an underground parking garage. As a result from the NOA-containing rock being drilled and crushed with no mitigation controls in place, the entire construction project was reportedly covered with NOA-containing dust. Several drill operators experienced itching and skin irritation which through subsequent medical and geological investigations was determined to be caused by tremolite asbestos fibers. The Fairfax County Soil Science Office later performed sampling and found a vein of asbestiform actinolite and tremolite comprising 10.9 square miles. Since the NOA discovery, Fairfax County has implemented NOA-specific policies regarding construction project that will impact soil.[7]

California

Serpentinite is California's official state rock and the source of much of the NOA found there. El Dorado Hills, a community in the Sierra foothills near Sacramento is a community that has had ongoing NOA issues associated with fibrous amphiboles in bedrock and soils since 1999. Reports have indicated that airborne concentrations of asbestos regularly reach levels of concern through non-construction activities such has recreation and gardening. In February 2002, during a construction project at a local school, veins of asbestos-containing minerals were discovered. The school soil was remediated that summer, but in September 2003, the EPA carried out activity-based sampling which involved measuring NOA in the breathing zone during recreational activities around the school which yielded varying results of airborne asbestos concentrations. Results underwent criticism for analysis methods and definition of asbestiform vs non-asbestiform minerals; however, a generally consensus was reached that a potential health risk existed for asbestos exposure existed in the area.[8]

Minnesota

Silver Bay, located on the shore of Lake Superior, served as a processing mill for Northeastern Minnesota's is rich in iron-ore mining operations. Historically the lake not only served as a steady water supply, but also as a dump site for the mine tailings. Amphiboles are known to be present in this area iron-oxide ore, and mineral fibers were later detected in the air and water supply of several towns, including Duluth. In 1975 after ongoing legal battles, the 8th Circuit Court of Appeals instituted the "control-city" standard where air monitoring at Silver Bay was required to yield results equal to or less than the control city; in this case St. Paul. [8]

New Jersey

A milling facility associated with a marble and limestone quarry near Sparta, NJ has been accused of emitting fibrous tremolite in dust generated from milling and quarry activities. The geology of the area suggests that amphibole minerals are present; however, emissions testing illustrated that the tremolite mineral present was non-asbestiform. Samples were later collected from homes in close proximity to the quarry which did not yield conclusive evidence that asbestos had migrated from the quarry or milling operation. Analysis methods and the definition of asbestos were again scrutinized; however, the quarry and milling facility are still operational.[8]

Washington

On Sumas Mountain in western Washington State a major low-moving landslide is occurring in altered serpentinite rock near the headwaters of Swift Creek. The landslide material contains both asbestiform and non-asbestiform lizardite, resulting in chrysotile being the asbestiform mineral of concern. Erosion resulting from the slide releases large quantities of sediment into the drainage and eventually the area river. To prevent flooding, the river is routinely dredged and staged in piles along the river. This staged material has historically been utilized as a local source of fill and has formed an area used for recreational activities. In 2006, the US EPA engaged in activity-based sampling in which three activities involving different levels of disturbance of the dredged material were simulated for this study: loading and unloading of dredged material with heavy equipment, shoveling and raking dredged material over a surface, and recreational activity, such as biking, jogging and walking on the dredged materials. Sampling indicated that a potential health risk regarding airborne asbestos fibers existed for several of the activities. In 2007, the US EPA released a fact sheet warning residents to limit their exposures through avoiding contact with the dredged materials. [8]

Montana

Libby is a small town located in the northwest corner of Montana approximately 35 miles East of Idaho and 65 miles south of Canada. In the 1880's, gold miners discovered vermiculite near Libby, and by 1920 the Zonolite Company had formed and began mining the vermiculite. Vermiculite is used in many common commercial products, including attic insulation, fireproofing materials, masonry fill, and as an additive to potting soils and fertilizers. In 1963, W.R. Grace purchased the Zonolite mining operation which remained in production until 1990.[9] In the fall of 1999, a series of newspaper articles state the ore deposit contained small amounts of asbestiform amphiboles. In response to these articles, the EPA sent an Emergency Response Team to Libby in November 1999 to address the asbestos concerns. The vermiculite ore mined from Libby was contaminated with fibrous amphiboles consisting of tremolite and the asbestiform amphiboles winchite and richterite. [8]Tremolite is a regulated form of asbestos; however, papers by Meeker[10] and Gunter[11] concluded that tremolite made up less than 10% of the amphibole population suggesting the winchite and richterite likely contributed to the increase in asbestos related illness affecting the former Libby miners. Multiple studies yielded results illustrating that rates of lung cancer, asbestosis and mesothelioma were about 2.5 times higher in the Libby miners than expected. [8]

EPA implemented a program to inspect all Libby properties for elevated asbestos levels. Between 2002 and 2003, approximately 3500 properties were inspected, with 12,000 soil samples being collected. As of 2009, the EPA has completed cleanups at over 1100 properties including the vermiculite processing plants and other "highly contaminated" public areas with an estimated 100 large property cleanups scheduled for the 2009 constructed season.[9]

Analytical Methods for Quantifying Asbestos in Soils

Various types of microscopic analysis are used to determine the amount of asbestos present in soils. The most common forms are discussed below. Additionally, variations exist for each method depending on sample preparation and counting methods utilized.

Polarized Light Microscopy (PLM)

PLM analysis is the standard method used to test for the presence or absence of asbestos in building materials. PLM results report a visual estimation of the weight percentage of asbestos in a sample. PLM analysis typically begins by viewing a sample under a stereoscope at 10X – 50X magnification; fibrous sub-samples are then selected to be viewed under a light microscope at 100X – 500X magnification. By correctly interpreting light interactions, analysts can accurately distinguish asbestos from non-asbestos materials (glass, cellulose) as well as

identify the variety of asbestos present. Accuracy of this method depends on the uniformity of the material, the type of analysis and the analyst's experience. "Point Counting" considered more accurate than standard PLM is one variation of the method where the analyst views a set number of grid points and documents the material present. The number of points that have asbestos versus no asbestos determines the percentage of asbestos reported. [12]

Common forms of PLM analysis are not applicable for materials which contain highly varied, non-uniform and non-manufactured materials such as soils, gravels, dusts or large quantities of fibers smaller than 0.25 µm.

Transmission Electron Microscopy (TEM)

TEM is capable of identifying the largest range of asbestos fibers/structures of all Electron Microscopy analysis and can differentiate between asbestos and non-asbestos fibers/structures. TEM is used for air, bulk, dust and soil sampling. TEM analysis utilizes an electron microscope for which the level of magnification can resolve down to10 nanometer (nm) particles and can identify asbestos particles by appearance, chemical composition and crystalline structure. Depending on the variation of TEM analysis results are either a visual estimation of a weight percent, or are "semi-quantitative" based on actually weighing the sample then estimating the weight of asbestos found by the fibers size and density.

In addition to bulk sample analysis, TEM is also used to analyze microvac (ASTM D-5755) and wipe (ASTM D-6480) samples. These sampling techniques are common to quantify asbestos levels in settled dust. Both methods require settled dust to be collected from a known surface area. The laboratory analysis consists of digesting the media (filter or wipe) in solution and analyzing via TEM. Samples can be qualitatively analyzed which yields an "absent" or "present" result for asbestos and notes the types of asbestos observed. Samples can also be analyzed qualitatively for which the solution with the digested media is diluted known magnitudes until asbestos fibers can be accurately counted with the microscope. By using known sampling surface areas, dilution factors and analysis areas, the microscopist can calculate the amount of asbestos structures present per square centimeter (st/cm^2) of dust. While this method is a very useful tool in determining the concentration of asbestos in settled dust, concentrations of asbestos in settled dust are not regulated by any agency since the asbestos is neither airborne nor present in a building material.

TEM allows for more accurate identification of much smaller fibers than PLM analysis. EPA method 600/R-93/116, Section 2.5[13] summarizes the TEM bulk analysis. Many laboratories have developed their own methods to provide a full quantitative analysis of bulk samples via TEM.

Scanning Electron Microscopy (SEM)

SEM is primarily used for asbestos analysis for air and dust samples with the asbestos fibers being identified using their chemical composition and appearance. Asbestos fibers too small to be detected using light microscopy can be seen.[14] SEM can be used to observe particle down to approximately 0.1 µm. SEM has not historically been heavily used for regulatory purposes; however, recently it has become more popular for studying amphiboles in their natural setting.[15]

CARB Method 435

The California Air Resources Board (CARB) adopted a NOA-specific testing method in 1990 known as CARB Method 435. (M435 or CARB 435) California currently requires this method for the analysis of gravels or mineralized soils to detect the presence of asbestos. In this method, the soil/aggregate sample is weighed, dried, milled (crushed to fine powder) and then analyzed by PLM or TEM. The CARB method is designed to detect "loose" asbestos fibers, unlike sieving methods which are used to analyze ACM mixed in soil.[16]

PLM analysis utilizes either a 400 or 1000 point count to obtain a level of detection of 0.25% and 0.1% respectively. The PLM resolution is only accurate down to 0.25 µm; asbestos fibers/bundles smaller than that (specifically amphiboles) will not be detected using PLM. For the CARB 435 TEM Method the sample is weighed, dried, milled, put into suspension and analyzed. Results are given in percent asbestos by mass with sensitivities down to 0.001%.[17]

CARB 435 results are considered representative of the worst case conditions when the NOA aggregate becomes pulverized due to handling, use application or natural conditions.

EPA Region 1 Proprietary Soil Characterization

This is a proprietary method that separates and analyzes the different portions of the sample. PLM or TEM analysis may be used for the final analysis but the method includes observations of the fractions of materials present, classification by particle size and source categories, including organic, man-made, geological and asbestos materials. Since this method does not alter the materials present for analysis, results represents the materials as they exist in their natural setting. EPA Region 1 Soil Characterization provides a visual estimation of the weight percentage.[18]

Analytical Methods for Quantifying Asbestos in Air

Typically asbestos air samples are collected by "pulling" a known rate of air through a 25mm cassette by either an electric or battery operated vacuum pump. The air is forced through either a 0.45 micron (µm) (TEM) or 0.8 µm (PCM) mixed cellulose ester (MCE) filter which is then analyzed for asbestos fibers/structures

by TEM or PLM respectively. The concentration of airborne asbestos is calculated by the density of asbestos present on the filter and the volume of air sampled.

Phase Contrast Microscopy (PCM)

PCM (NIOSH 7400 Method) sampling method is a very common form of determining airborne fiber concentrations using a light microscope. The PCM method counts all fibers meeting the criteria of greater than 5 (µm) in length and 0.3 µm in diameter and meet the 3:1 aspect ratio (whether asbestos fibers or not) and reports results in fibers per cubic centimeter (f/cc) of air. PCM only counts fibers that are present in the fields observed, and does not identify the type of fiber (asbestos, cellulose, fiberglass, ect).[19]

This method is widely used for monitoring airborne fiber concentrations during asbestos removal/impacting projects, including determining OSHA approved worker exposures through a time-weighted average (TWA). TWA's calculate the average concentration of fibers a given worker was exposed to during his/her work shift.

Transmission Electron Microscopy (TEM)

For TEM air sampling analysis, the same collection procedure is used as with PCM sampling, except the cassette filter has a smaller pour size and results are reported in asbestos structures per square millimeter (Str/mm^2).[20] The results are reported in Str/mm^2 since the analysis includes all asbestos particles 0.5 microns and larger in length and may not necessarily be fibers. TEM allows for the analysis of very fine fibers while simultaneously determining their chemical composition and crystalline structure.

TEM Method 7402[21] is typically used when a PCM sample is found to have elevated fiber levels. Method 7402 analyzes a separate piece of the same cassette filter under an Election Microscope, opposed to a light microscope, which allows the analyst to determine if there is actually an elevated level of asbestos fibers, or if the fiber level was elevated due to a high number of miscellaneous fibers meeting the PCM counting criteria. This method is a useful complimentary tool to the PCM 7400 Method.

Elutriator Method

The Elutriator Method (Superfund EPA 540-R-97-028) begins by sieving the soil sample into fine a course fragments. The fine soil fractions are then placed in a closed tumbler chamber where any respirable dust created during tumbling is collected on air cassettes. The cassettes are then analyzed via TEM by ISO 10312[22] counting rules which are designed for samples collected from ambient

conditions, specifically indoors. This method is used to identify the amount of respirable fibers present within a soil sample.[18]

NOA AND EFFECTS ON ALASKAN CONSTRUCTION PROJECT

Historical Alaska NOA Incidents

Alaska has large known deposits of ultramafic and serpentine mineral ore located throughout the state. The documented cases of NOA encounters in the state have been limited and comparatively small. The potential for larger and more serious incidents can be expected to increase as public and professional awareness examine proposed activities with more scrutiny and existing material sites are exhausted and new site are developed. The following is a brief synopsis of several known NOA incidents in Alaska.

Juneau

In 2005, NOA was found to be present in Juneau's city-run Stabler's Point Rock Quarry causing several contractors to stop using the material until additional information and guidance was made available. Stabler's Point consists of the hardest local rock, metamorphosed mafic volcanic rock, which has been known to historically contain NOA. According to a Memorandum issued by the City/Borough of Juneau in 2005, scattered veins of asbestos-containing rock have also been reported in the following Juneau quarries: Lemon Creek, Treadwell, Upper and Lower Fish Creek and Bonnie Brae. The city believes that asbestos is likely to be present in most Juneau areas with high quality rock.[32]

Of the initial samples collected from the Stabler's Quarry two were found to contain tremolite asbestos at 3% and 5%.[33] Later some samples were also found to contain actinolite asbestos.[34] Blasting and rock crushing operations, which are known to release asbestos fibers from rock, had been occurring on a regular basis for several years prior to the discovery of NOA at the quarry. A private consulting firm hired by one of the contractors utilizing the quarry later stated given the presence of asbestos at the quarry, and the limited air sampling performed, it would appear as though workers were occasionally exposed to airborne asbestos levels in excess of workplace exposure standards.[34]

The rock aggregate obtained from the Stabler's Quarry was used for several years on a variety of private and commercial construction projects throughout the Juneau area and was a topic of concern for many local residents. In addition, aggregate collection (blasting) and refining (crushing) methods used were performed under general conditions meaning no methods were implemented to reduce airborne fiber concentrations during work activities. Since the discovery of NOA at the Stabler's Quarry, sampling efforts have been performed as well as requiring the use of wet methods and respirators for quarry workers.

As in most situations, once NOA was discovered activity was stopped until an assessment could be performed. In the Juneau case, the majority of the asbestos-containing gravel aggregate was used in construction projects where it would not be left exposed. The quarry itself implemented engineering controls

such as PPE for workers and the use of wet methods. In addition, attempts were made to focus mining efforts on portions of the quarry which yielded the lowest concentrations of NOA. Material from this mine is currently only used on projects where it will not remain exposed after completion; such as paved road construction. The City of Juneau originally was researching the possibility of implementing local NOA regulations; however, as of yet no regulations have be made.

Dalton Highway

As described by Perkins et al[5] the Dalton Highway (formerly known as the Haul Road) was constructed in the early 1970's and runs adjacent to the Trans-Alaska Pipeline connecting the Prudhoe Bay oil fields of Alaska's North Slope to the state highway system near Fairbanks. Most of the Dalton Highway is unpaved and is primarily utilized by pipeline employees and truckers supplying the oil fields.

In 2000, the Alaska Department of Transportation & Public Facilities (ADOT) awarded a contract to replace culverts and bridge abutments and to add surfacing material to approximately 20 miles of gravel road from Milepost (MP) 90 to 111 on the Dalton Highway. The project utilized surfacing gravel from a material site (MS) located at MP 105. The project contractor constructed a 1 to 2 foot thick gravel pad at MP 107 for a project staging area and temporary housing site since the closest permanent habitation was located approximately 70 miles away. An estimated 30 truckloads of gravel had been removed from MS 105 before workers noticed several large pieces of fibrous material suspected to be asbestos, after which aggregate extraction from this site was terminated.

After ultramafic rock containing actinolite and tremolite asbestos was confirmed at MS 105, concerns about worker exposure on the project site, as well as potential exposure in the temporary living quarters due to cross-contamination arose. Furthermore, questions were raised on how to safely complete the project, as well as address public health concerns for driving on the Dalton Highway. The project contractor retained a consultant to assess the problem, recommend work plan modifications, provide necessary worker training, perform exposure monitoring and reporting.

Results from the assessment included close to 700 breathing zone air samples collected from workers; 3% of which had asbestos fiber concentrations at or near 0.1f/cc per the NIOSH 7400 PCM[19] method. 36 of those samples were additionally analyzed via NIOSH 7402[21] (modified TEM analysis) which illustrated approximately 40% of the fibers observes were asbestos. Results concluded that workers who impacted the material the greatest, such as bulldozer and grader operators, were at the highest risk of exposure. Asbestos fiber release from rock crushing operations would have presumably been higher. Samples for potential motorist exposure were collected under conditions simulating "worse case scenario" - driving with windows open while following heavy equipment

which produced a visible dust cloud – indicated fiber concentrations well below the OSHA PEL.

The discovery of NOA at MS 105 on the Dalton Highway incurred significant delays and added millions of dollars to the project costs. After the assessment was completed, the MS 105 was abandoned for a MS which yielded non-NOA gravel to complete the project. The new MS was tested for the presence of NOA prior to starting work. Existing portions of road bed constructed with NOA along the project length were identified and capped with NOA-free material. Work practices and method of construction was modified to minimize worker exposure and NOA accessibility.

Similar to Juneau, the NOA concern at Material Site 105 on the Dalton Highway was discovered after workers had begun to remove and use the material. During this project; however, the NOA-containing aggregate was used to construct the gravel pad for temporary living quarters, as well as to resurface approximately 20 miles of the unpaved Dalton Highway. The NOA assessment for this project illustrated that some workers were at risk of being exposed to asbestos above regulatory limits, but motorist traveling down the gravel highway, in a "worse case scenario" were not. Regardless of the remoteness of the area and the low health risk it posed to the public, it was agreed that known NOA-containing gravel on the highway would be capped and work practices would be modified to address NOA exposure concerns during project construction. Equipment and camp facilities were decontaminated and workers were provided training. MS 105 was no longer utilized as an aggregate source for the remainder of the project and has been closed indefinitely as an aggregate source.

Ambler

Ambler is Kowagniut Inupiat Eskimo village located in northwestern Alaska along the North bank of the Kobuk River. Ambler is approximately forty-five miles north of the Arctic Circle, one hundred and forty miles east of Kotzebue and three hundred and twenty miles northwest of Fairbanks.

In 2003, the ADOT was conducting routine soil testing in preparation for a scheduled Ambler project requiring the use of gravel aggregate. Tests results reported the presence of chrysotile asbestos in the aggregate samples taken from the local gravel pit. This was the only available gravel aggregate source for Ambler and consequently had previously been used to construct the community airport, roads and utility systems. The pit is commercially owned by the local development corporation (NANA), who closed and placarded the pit soon after the NOA discovery.

All roads in Ambler, including the airport runways, are finished with unpaved gravel surfaces. All-terrain vehicles (ATV's) are the most prevalent means of transportation and create substantial visible dust, generated from the unpaved

community road surfaces, during summer months. In 2007, the Agency for Toxic Substances and Disease Registry (ATSDR) performed an exposure investigation[35] primarily focused on ATV generated dust and potential asbestos exposure for both ATV riders and the general public. The assessment concluded that exposure to visible dust generated from the Ambler roadways created a higher than average health risk concerning asbestos.

In addition to the asbestos related health concerns, several community projects which require the use of the gravel aggregate have subsequently been put on hold or cancelled. In 2004, a multi- year effort was undertaken by R&M Consultants to locate an aggregate source free of NOA. However, no location within a reasonable distance (15-25 miles) was identified that would definitively yield non-NOA aggregate.[36] Since the NOA discovery in 2003, the gravel pit has been restricted from use. Due to the inability to use gravel for regular maintenance, the Ambler runway began to dilapidate until the crown had lost its vertical rise and ruts and potholes became increasingly prevalent and obnoxious due to lack of drainage and replenishing aggregate. The runway was also a major source of dust emissions from the airplanes prop wash during take off and landing. The runway was operated by ADOT that concluded runway repairs were required to continue safe operations. ADOT also decided due to the NOA concern in the community they would apply a dust-suppressing poly synthetic palliative called Durasoil to the surface of the runway after the repairs were complete. ADOT had experienced positive results using this form, and variety, of dust suppressant in other remote areas of Alaska to control fugitive dust. Since no non-NOA containing aggregate sites were available, the known NOA-containing quarry was utilized as the aggregate source for the runway repairs. A consultant was retained to assist with a Ambler public meeting, the development of NOA project work plan, training of project workers, community relations during construction while oversight, monitoring and project reporting. Monitoring documented a Negative Exposure Assessment (NEA) with no air sampling results exceeding the OSHA PEL at any point during the project.[37]

Since the discovery of chrysotile in the Ambler gravel pit, the following NOA-related investigative efforts have been performed to date:

- **Asbestos at Ambler Material Pit Preliminary Assessment**.[38] Alaska Department of Health & Social Services, Division of Public Health, Section of Epidemiology, October 23, 2003.
    - Chrysotile asbestos discovered in Ambler quarry during routine soil testing.
    - Quarry was closed indefinitely.
- **Limited Health Survey**.[39] Alaska Department of Labor and Workforce Development, Occupational Safety & Health Labor Standards and Safety Division, November 2003.
    - School area soil, interior dust and air samples confirmed Chrysotile NOA

- Recommended material site cap, school cleaning, HEPA filtration and administrative controls to control summer risk

- **Ambler Airport Rehabilitation: Airport Materials Site Investigation**.[36] R&M Consultants. 2004 Geotechnical Report.
  - Soil boring was performed around Ambler area to find an alternative, non-NOA gravel source. Results indicated that no non-NOA gravel source was available within reasonable distance to Ambler.
- **Naturally Occurring Asbestos Summary of Requirements and Recommendations.**[40] Alaska Native Tribal Health Consortium (ANTHC). August 2005
- **Public Health Evaluation and Assessment – Interim Report**.[41] May 20, 2005. Middaugh, John P.
  - Medical records review for residents of Ambler, Kobuk, Shungnak and Kiana, to see if asbestos-related diseases had occurred
  - No asbestos-related diagnoses on death certificate; no mesothelioma cases dating back to 1970
  - On review of chest X-ray, nine people with pleural plaques suspicious for asbestos exposure were identified.
- **Investigation of Possible Environmental Asbestos Exposure in Northwest Alaska – Interim Report**.[42] Chimonas, Marc; Middaugh, John and Arnold, Scott. June 15, 2005: Alaska Division of Public Health
  - Expert review of 130 chest X-rays from villagers 50 and older; interviews conducted
  - Twenty-one individuals with either pleural plaques or pulmonary fibrosis suspicious for asbestos exposure. Some were exposed to asbestos occupationally.
  - Not possible to definitively establish or exclude environmental asbestos exposure as a cause of disease
- **Exposure Investigation Final Report**.[35] Agency for Toxic Substances and Disease Registry. June 2007
  - Chrysotile NOA confirmed in gravel used to construct roads
  - Ambient sampling confirmed airborne NOA, but not likely to be a public health concern
  - Visible airborne dust levels behind four-wheelers exposed trailing riders to a high-level of respiratory exposure and confirmed public health concerns.
- **Federal Aviation Administration, Ambler Airfield, Alaska Winter Exposure Assessment.**[43] ***NORTECH*** Environmental Engineering, Health & Safety. June 2008 Report.
  - FAA technician tasks were performed while personal and area air samples were running. Results indicated area fiber concentrations were below 0.01 f/cc while the personal TWA was below 0.10 f/cc.
  - Frequent cleaning of facilities was recommended.

- **Federal Aviation Administration, Ambler Airfield, Alaska Summer Exposure Assessment**[44] ***NORTECH*** Environmental Engineering, Health & Safety. August 2008 Report.
    - FAA technician tasks were performed while personal and area air samples were running. Results indicated area fiber concentrations were below 0.01 f/cc while the personal TWA was below 0.10 f/cc. Area samples were also collected while planes landed/took off with all results below 0.01 f/cc.
    - Frequent cleaning of facilities was recommended.
- **Ambler Airport Dust Suppression**.[37] ***NORTECH*** Environmental Engineering, Health & Safety in association with R&M Consultants. November, 2008 Report.
    - Utilized NOA-containing gravel to resurface runway using "wet methods" as needed. Palliative applied to runway surface for dust suppression.
    - Personal and area air monitoring illustrated the PEL and clearance concentrations were not exceeded.

In addition to the studies listed above, a *Naturally Occurring Asbestos Dust Control Working Group* has been established as a result of the Ambler NOA. This working group is a consortium of federal, state and local groups who help to manage and oversee NOA-related projects and concerns in Ambler in the interest of public safety. The group consists of the City of Amber, ANTHC, ATSDR, USRD, HIS, Maniilaq, DOH and ADOT.

Ambler is located between the Jade Mountains and the Cosmos Hills; small mountain ranges along the southern slopes of the Brooks Range. The rocks in these mountains are mineral-rich and contain large ore deposits. Bornite, reportedly one of the world's richest copper deposits, exists within these ranges and major jade deposits are found in the Jade Mountains. Serpentine rocks, commonly containing asbestos, have been mapped in both these ranges.[45, 46] An asbestos mine was temporarily operated at Asbestos Mountain in the Cosmos Hills near Kobuk. The asbestos has apparently been eroded from these rocks and transported throughout the area by glaciers, water and wind. Sedimentary deposits have been found with varying concentrations of asbestos throughout the area.[36]

The NOA found in Ambler poses many issues not previously encountered in Alaska. Ambler requires the use of gravel to maintain the limited road system, runway, public utilities and local projects. With no apparent asbestos-free gravel sources within a reasonable distance and only year round air travel access identifying methods to use NOA safety are significant to the regional corporation source owner and local community. ADOT held public meetings in Ambler to obtain feedback, report progress and provide information regarding NOA, asbestos health hazards, risk and effective methods to reduce exposure (avoidance of visible dust clouds, road watering, regular household cleaning to

remove visible dust accumulations, removing footwear prior to entering homes and driving slower on the roads, etc).

Alaskan Construction Projects

The presence of NOA and its effects on construction projects in general, as well as its effects on certain Alaskan Construction projects, are noted in other sections. Here we examine the occurrence of NOA in Alaska and its likely effect on future construction projects. Most heavy construction projects such as dams, roads, airports, pipelines, and railways require large quantities of natural materials, sand, rock, and fill soil. These materials are excavated, processed, and transported to the sites where they are needed. Ideally the transport distance from excavation to installation and the processing steps are minimized. In any case, the excavation, processing, and transport are key cost drivers in most heavy construction projects. If material sources proximate to the project have NOA or are likely to contain NOA, the project owners and designers must make a decision to obtain NOA-free materials further from the project at a greater cost, or to use the NOA materials and make allowances for handing the NOA material in such a manner to keep airborne asbestos fibers and their human health hazards to a minimum. Other sections of this report deal with methods of ameliorating fiber release from NOA-containing materials after they have been installed and regulations in other states that have established standards for NOA materials that establish benchmark concentrations, which, together with prudent work methods, are protective of human health.

This chapter will: examine the need for gravel and similar materials in Alaska, discuss the mineralogy of Alaska with respect to asbestos, present a map of mineral occurrences that may contain NOA and their location with respect to transportation corridors, and examine the implications for projects. Finally we will present some conclusions.

Alaska Gravel Needs

Many heavy construction projects move large quantities of soil within their right of way. These are often called "unclassified materials." Over these are then placed "classified" or "select" materials. The exact definition and qualities of these material are dependent on the particular type of project and its specifications. These materials generally must be imported from off the right of way, usually from special "material sites." Here we will just refer to those imported materials collectively as "gravel." We will discuss them in relation to historical and known current demands for gravel, as well as estimates for future projects.

Highways

Here we discuss some likely gravel needs in the DOT's Northern Region. Currently, for projects on the highway system, there is gravel available, although

it may involve a longer haul distance. Generally, these sources have not been checked for NOA. New sources are needed for the routine maintenance (M&O) activities and routine construction projects. DOT Northern Region used 2 million CY from 64 different material sites in 2007 and 1.6 million CY from 40 different materials sites in 2008.[23] The DOT generally has enough material for maintenance and operations (M&O) and new projects, although most new projects are improvements to existing roads. The large rocks used to armor stream banks and other hydraulic structures is known as "rip rap" and rocks large enough for rip rap are usually scarce.

The Trans Alaska Pipeline System (TAPS) and future 48"Gas Pipeline

The TAPS project used 73 million CY of gravel, total. The workpad required 32 million CY. [24] Of that, the Dalton Highway (Haul Road) required about 13 million CY for its prism. Many access roads to material sites were required for Haul Road construction, and may have been counted in either the Haul Road number or not. Certainly the 225 access roads were counted in the 73 million CY. Thus, if the Haul Road and its material sites were counted in, the TAPS project would have required 50 to 60 million CY of gravel without the Haul Road. The most likely route of the proposed gas line will follow the Dalton Highway and the Alaska Highway, there will not be a major new highway. However we do not believe that Alyeska will allow the gas pipeline to use Alyeska's workpad or construct close to TAPS, therefore new workpads and many new access roads will be required. There will be new camp pads, airports, and compressor stations. Not counting the DOT upgrade work, we estimate that the gas line will need to mine 50 to 60 million CY of new gravel. (Referring the annual DOT usage, the new pipeline will require 25-fold the annual DOT requirement, and most of that in the first year or two of construction).

Special highway construction

If the gas line is built, AK DOT will need to reconstruct many miles of substandard road. Large sections of the Dalton Highway need reconstruction.

Airports

Virtually all airport construction and upgrades require material from local sources. In some locations material is barged in from long distances, but this is expensive. There are about 256 bush airports owned by the ADOT.[25] A new small airport may require 25,000 CY of gravel. In addition, gravel is needed for access roads and maintenance of both the runway and the access roads.

Railroad Extension

There is currently a study regarding extending the Alaska Railroad from Fairbanks to Delta (90 miles) and from Delta through Canada (200 miles).[26] A rough estimate for that yields 14 million CY of fill, gravel, and ballast for the main line. Much of the line would be close to the Alaska Highway. However access roads, camps, and ancillary structures – there will be many bridges – may require another 5 million CY.

Mining and other industry

Mining needs gravel for access roads. Smaller mines generally have some material available on-site, but major new mines will require gravel from outside the mine. Extrapolation from Alyeska's numbers (73 million CY in 800 miles) one could say 91,000 CY per mile of new infrastructure. That would include main road and roads to gravel sources and pads for ancillary structures. Minimizing haul distances is economical, which tends to increase the number of material sites. Two new material sites per mile might be a good estimate.

Balance between Existing and new MS

Most of the smaller scale road maintenance is done with existing gravel sources. The volume is generally not large and the costs of opening a new pit are often greater than the haul costs from a more distant pit. A major project will require a lot of gravel and thus justify the extra costs of opening closer pits. Besides direct costs, safety is an important consideration when hauling of gravel on an active highway, and minimizing the number of construction rigs on a traveled highway is good practice.

Since the existing open material sources are just adequate for current needs, it is clear that many new gravel sources will be needed if any of the major projects come to fruition.

Mineralogy of Alaska with respect to asbestos

"Asbestos" is a commercial term, not the name of a particular chemical or geological rock type. While there are six asbestos types that are regulated due to known human health effects, there are other, similar minerals that are not regulated. Some of these may likewise have adverse health effects. Within minerals of a certain chemistry, some of the mineral may have crystallized into large crystals or masses, while other portions may have crystallized in fibers or bundles of fibers. In general, "Asbestos is defined as certain minerals that have crystallized in a finely fibrous habit, in bundles of easily separable fibers and/or fibers which are composed of smaller diameter fibrils, and with a hair-like elongated shape resembling organic fibers, with exceptionally smooth faces and displaying unusual adamantine or silky luster" [8]

As noted by Gosen[31] asbestos is most commonly defined as the asbestiform variety of several specific, naturally occurring, hydrated silicate minerals. Asbestos typically includes chrysotile, the asbestiform member of the serpentine group, and several members of the amphibole mineral group, including, but not limited to, the asbestiform varieties of (1) riebeckite (commercially called crocidolite), (2) cummingtonite-grunerite (commercially called amosite), (3) anthophyllite (anthophyllite asbestos), (4) actinolite (actinolite asbestos), and (5) tremolite (tremolite asbestos). Other amphiboles are known to occur in the

fibrous or asbestiform habit,[27] such as winchite, richterite[30] and fluoro-edenite,[29,28] but usually they have not been specifically listed in the asbestos regulations. The many different ways that asbestos and asbestiform and other related terms have been described are summarized in Lowers and Meeker.[30]

The geological conditions necessary for the formation of NOA have been reviewed and the rock types known to host NOA include serpentinites, altered **ultramafic** and some **mafic** rocks, dolomitic marbles and metamorphosed dolostones, metamorphosed iron formations, and alkalic intrusions and carbonatites.[31] In summary, there are many types of minerals that might contain asbestos, and these include rock types very common in Alaska.

Map of mineral occurrences that may contain NOA and their location with respect to transportation corridors

Next follows some maps that show the regions of Alaska that may contain asbestos, based on the mineral type. The mineral types are taken from the above reference sources, and the mineral locations are based on the USGS map, *Geologic map of Alaska, U.S. Geological Survey Special Map, by H. M. Beikman, 1980.* In addition, in Appendix 3, is the USGS database of all geological exploration and mining that identified asbestos. These have been mapped along with the transportation corridors identified by ADOT planning. Note the northern region had more detailed planning maps.

It is important to realize that the map is of the bedrock, or parent material. If the rock erodes, it will move down-gradient via colluvial or alluvial transport. Thus asbestos might be found in sites distant from the origins.

The first map is an index, and the following three maps show greater detail.

Conclusions and recommendations regarding future projects.

It is clear that many of Alaska's current transportation corridors traverse regions containing minerals that may contain NOA. Although Alaska is a huge state, as a practical matter, gravel must be obtained reasonably close to the project. It is also clear that large quantities of gravel will be needed for future projects. While not all the areas that mineralogy mapping has identified as possible asbestos sources will contain asbestos, the mining and geological exploration done in those areas has identified that asbestos is found in these regions. Since asbestos was often found during the exploration for other minerals, it seems likely that asbestos is fairly common in those regions. We know of projects such as Ambler and the Dalton Highway that have been impeded by NOA, thus it is reasonable to expect future projects to be impeded, if they traverse areas with mafic and ultramafic rock and other minerals as identified on the map.

While finding NOA in pre-construction geological exploration is usually a negative for the project, its untoward effects are paltry compared to finding asbestos once construction using the material has started. Therefore all projects that use gravel or other mineral resources in areas identified with mafic or ultramafic rock, or down-gradient or downstream from those minerals must include analysis for asbestos as part of the material site exploration process. If asbestos is identified, its type and extent should be quantified, if possible.

If asbestos is found the project managers must make a decision. Non-asbestos containing earth materials should be used if possible. However if material without asbestos is not readily available, the project managers must make a decision about using the material with NOA or, presumably, importing non-NOA material, or perhaps rerouting or abandoning the project. Using the guidelines and information presented in other sections of this paper will help. Reiterating the key conclusion – if a project's material source is in a region identified on the maps in these chapters as likely to contain asbestos, the material site exploration phase must include an assessment of the material site for asbestos.

Footnote to Chapter
Summary of Asbestos Minerals

Table 1 Summary of minerals where fibrous crystal form or cleavage has generated concern (not an exhaustive list) Mineral Asbestiform or fibrous probability Remarks Serpentine minerals Chrysotile Always Most common type of asbestos; almost the only form mined today Antigorite Rare Amphibole minerals Riebeckite Probable (crocidolite) Previously mined as asbestos in South Africa, Australia and Russia, but not common elsewhere Cummingtonite-grunerite Probable (amosite) Previously mined as asbestos in South Africa. Non-asbestiform habit is common Tremolite-actinolite Probable Widespread occurrence both as asbestiform and non-asbestiform habits, but only rarely mined as abestos Winchite-richterite Probable Rarely encountered Anthophyllite Probable Previously mined as asbestos in Finland and in the eastern USA. Often associated with talc. Arfvedsonite, fluor-edenite, etc. Possible Rarely encountered Zeolites Erionite, mordenite Almost always fibrous Not considered as asbestos, rarely encountered Clay minerals Palygorskite, sepiolite Fibrous habit possible or common Not considered as asbestos, rarely encountered Others Brucite, wollastonite, talc, balangeroite Fibrous habit possible or common Not considered as asbestos, and, except for talc, rarely encountered

Table 1 Summary of minerals where fibrous crystal form or cleavage has generated concern (not an exhaustive list)

Mineral	Asbestiform or fibrous probability	Remarks
Serpentine minerals		
Chrysotile	Always	Most common type of asbestos; almost the only form mined today
Antigorite	Rare	
Amphibole minerals		
Riebeckite	Probable (crocidolite)	Previously mined as asbestos in South Africa, Australia and Russia, but not common elsewhere
Cummingtonite-grunerite	Probable (amosite)	Previously mined as asbestos in South Africa. Non-asbestiform habit is common
Tremolite-actinolite	Probable	Widespread occurrence both as asbestiform and non-asbestiform habits, but only rarely mined as abestos
Winchite-richterite	Probable	Rarely encountered
Anthophyllite	Probable	Previously mined as asbestos in Finland and in the eastern USA. Often associated with talc.
Arfvedsonite, fluor-edenite, etc.	Possible	Rarely encountered
Zeolites		
Erionite, mordenite	Almost always fibrous	Not considered as asbestos, rarely encountered
Clay minerals		
Palygorskite, sepiolite	Fibrous habit possible or common	Not considered as asbestos, rarely encountered
Others		
Brucite, wollastonite, talc, balangeroite	Fibrous habit possible or common	Not considered as asbestos, and, except for talc, rarely encountered

OTHER STATES NOA REGULATIONS

Several large areas of asbestiform mineral deposits exist in the United States. These deposits host both serpentine and/or amphibole minerals in mafic and ultramafic rock formations and have varying concentrations of asbestos. Some states have implemented policies in order to safely address NOA concerns while attempting to limit adverse affects on projects in which NOA-containing rock will be impacted.

Virginia

Fairfax County has adopted a two stage approach for dealing with local NOA. The Fairfax County Health Department, Air Pollution Control Division (Fairfax APCD) oversees the potential public health concern associated with exposure to asbestos generated from construction activities. They enforce the Fairfax APCD Control Requirement Directives 1 and 2 for Construction Activities in Actinolite/Tremolite Soil Sources (CRD 1 and 2). The Virginia Department of Labor and Industry, Occupational Health Division (VDLI) regulates the interior of the construction site as it pertains to employee exposure under the Asbestos Standard, 29 CFR 1926.1101. These two agencies work in concert to control the emissions of asbestos fibers during work activities. The program is founded in the approach of proper disposal and capping of both the NOA source and constructed project. The following is a brief summary of CRD 1 and 2:

Directive 1 – Standards of performance for Actinolite/tremolite soil sources

1. Compliance Plan - A written compliance plan must be submitted to the Fairfax APCD for review and approval before work begins on the construction project.

2. Dust Control - Effective dust control must be practiced at all times.

3. Air Monitoring – Air monitoring must be performed during all phases of earthwork involving actinolite or tremolite containing material and comply with ambient air concentration standards for asbestos.

4. Disposal and Cap - An appropriate, safe, disposal site must be used to dispose of actinolite or tremolite contaminated soils whether they are to remain on site or be removed. All final disposal areas and the finished grade of the developed land shall be covered with six inches of clean compacted material.

5. Notification – Sufficient notice of asbestos shall be given to all employees and contractors on the site in compliance with the OSHA Asbestos Standard (29 CFR 1926.1101).

Directive 2 – Monitoring and Reporting Requirements

1. Monitoring requirements
    a. The monitoring and sample analysis will be conducted by competent personnel and closely supervised by an experienced individual certified with NIOSH 582 course training or equivalent [we should expound on that]
    b. Air monitoring samples will be collected.
    c. Project Reports of the perimeter, area, and personal monitoring results will be submitted to the Fairfax County Health Department.

2. Project Reporting Requirements
    a. A written description of the work activities.
    b. Diagram of the Construction Project.
    c. Air Monitoring Results.
    d. Violations to Directive 1 detected by air monitoring

3. A 24-hour average standard for asbestos ambient air concentrations is calculated

John Yetman was interviewed on the effectiveness of Fairfax County's NOA program, as well as public and commercial response. Mr. Yetman is a Senior Environmental Health Specialist with the Fairfax County Health Department, and has managed the county's NOA program for over 20 years. The NOA program described above has been in effect in Fairfax County since 1993. The NOA found in Fairfax County is typically beneath several feet of clay, so the program is designed exclusively for excavation and soil impacting activities. The soils of Fairfax County have been mapped, with known NOA encompassing 11 square miles of the 400+ square mile county. The geological maps are reportedly accurate to +/- 500 feet. If excavation/soil impacting activities are to occurring within this 11 square mile area, the contractor is required to submit a compliance plan as mentioned above.

The compliance plan describes location and activities associated with the project, dust control methods and worker and public safety controls. If the project is located within the NOA area per the soil map, the contractor is required to have a compliance plan approved through the county health department. If the project site is located within 500 feet of the mapped boundary, the contractor may submit a limited compliance plan which outlines the same requirements as the full plan; however, implementation of the plan is only required if suspect NOA is discovered.

Dust control consists primarily of applying water and/or slowing operations so that no visible dust is present. Air monitoring is required at all times soil impacting activity is occurring which consist of both area and personal sampling using PCM cassettes and analysis. The area monitoring is performed at several points on the perimeter of the "work zone", a term used to describe the area of

the jobsite that has controlled access from the public. Area monitoring is a 24-hour average with the Fairfax County Air Pollution standard being 0.02 f/cc. Personal samples are also collected from workers inside the work zone to determine and 8-hour TWA with a maximum allowable fiber concentration of 0.10 f/cc. All air monitoring is required to be performed by a third party. All air monitoring results are required to be submitted in a final close out report; however, exceedences in airborne fiber concentrations are reported to the county health department immediately. Samples with elevated fiber levels may be further analyzed using Method 7402 which utilizes TEM to determine if the fibers meeting the PCM counting rules are asbestos.

Mr. Yetman explained that NOA-containing soils are encouraged to remain onsite; however, soils can be utilized as fill for other jobsites located within the known NOA area. If soils are removed from Fairfax County, it is strongly recommended the contractor inform the recipient of the possible contamination in the soil, and obtain a signature of acknowledgement.

Directive 1 also requires that 6 inches of clean cap be applied to all disturbed soils within the NOA area. Allowances are made when the soil is to be covered with vegetative-sod, in which case only 3 inches of cap is required.

Mr. Yetman felt that the program has been very successful for the county. He explained that the public and local contractors have become accustom to the NOA requirements, and they very rarely experience issues. He also noted that fiber level exceedences have become less common as contractors have developed effective means for dealing with dust suppression.

The "backbone", as described by Yetman, of Fairfax County's NOA management plan is the county soil map. This is an efficient way to identify if NOA will be a concern for the project, and if a compliance plan is required. Additionally, Mr. Yetman explained that the Health Department makes certain to explain the liability associated with removing NOA-containing material offsite, or outside of Fairfax County, which has seemed to reduce this occurrence.

California

The State of California Air Resources Board (CARB) has implemented regulations designed to significantly decrease the chances that asbestos in soil and rock can become airborne, and thus minimizing public exposure to asbestos. These state regulations are referred to as the Airborne Toxic Control Measures. (ATCM's) The first ATCM applies to surfacing applications and was originally adopted in 1990, but was amended in 2001. The second ATCM applies to construction, grading, quarrying and surface mining operations.

According to the CARB's Implementation Guidance Document for the Asbestos Airborne Toxic Control Measure for Surfacing Applications[47], the first Asbestos

ATCM prohibits the sale or use of restricted material for unpaved surfacing unless it has been tested and found to have an asbestos content that is less than 0.25 percent. The ATCM defines restricted materials as aggregate material extracted from an ultramafic (or ultrabasic) rock unit as shown on referenced geologic maps; ultramafic rock including serpentine; or aggregate material shown to have an asbestos content of 0.25 percent or more; or any mixture containing 10% ultramafic/serpentine materials.

The test method required to determine the asbestos content is either CARB Method 435 or a method approved by the CARB's Executive Officer. If restricted material is being sold or supplied for surfacing purposes, the producer of the material (quarry operator) is required to provide the recipient the following information: the amount of material sold or supplied; the dates the material was sold or supplied, sampled and tested; and a statement verifying that the asbestos content of the material is less than 0.25 percent. Anyone who sells or supplies restricted material, but did not extract the material from the ground, must provide all of the above information with the exception of the date that the material was sampled and tested. If restricted material is being sold or supplied for non-surfacing purposes the supplier must notify the recipient with a warning statement that the material may contain asbestos.

The amended ATCM contains the following surfacing exemptions:

- sand and gravel operations;
- roads located at quarries and mines;
- maintenance operations on existing roads;
- emergency road repairs;
- asphalt and concrete materials;
- landfill operations;
- results of a geologic evaluation;
- steep surfaces with limited access;
- surfacing applications in remote locations;
- roads located at construction sites; and
- riprap (material placed along water course or shoreline to prevent erosion)

The amended ATCM also allows the district authority to require geologic evaluation for the presence of rocks that may contain asbestos and the authority to require testing of any aggregate material for its asbestos content. This authority would typically be exercised if there is credible evidence indicating the potential presence of asbestos outside of an ultramafic rock unit.

There are two possibilities for the regions with mapped mafic or ultramafic rock, either the asbestos content is ≥0.25% or the asbestos content is <0.25. If the asbestos content is <0.25%, the material can be used for surfacing or any other use, if the material has ≥0.25% asbestos, its use is restricted. Minerals taken from mapped areas are restricted and must be tested and certified prior to use. In addition to mapped restricted areas the program includes a number of

exemptions and has district authority to implement regional priorities. The 0.25 threshold was derived from the detection limit per the test method. Since only PLM 400 point count is required, if one fiber is observed in the counting area the sample has 0.25% asbestos. If fibers are observed outside of the counting area, the sample is reported as having "trace" amounts of asbestos present, and be considered <0.25% asbestos.

Any person who sells, supplies, or offers for sale or supply restricted material for non-surfacing applications must provide with each sale or supply a written receipt containing the following statement:

"WARNING!
This material may contain asbestos.
It is unlawful to use this material for surfacing or any application in which it would remain exposed and subject to possible disturbances.
Extreme care should be taken when handling this material to minimize the generation of dust."

Thus, NOA-containing material may be used for construction projects as long as the affected material is not to remain exposed. If NOA-containing aggregate is used for road construction, the dust suppressing method used, such as capping, must be designed to last for an extended period of time (ie greater than 5 years). Asphalt or concrete would suffice as an appropriate method, while water application or other short-term palliatives would not.

If an approved asbestos bulk test method has been used to perform two or more tests on any one volume of aggregate material, whether by the same or a different person, the arithmetic average of these test results shall be used to determine the asbestos content of the aggregate material.

The sampling frequency required for determining the asbestos content of any aggregate material is required to be the following unless the APCO approved an alternate testing frequency.

- Storage Piles and Conveyer Belts – Minimum of 3 random grab samples per 1000 tons
- Aggregate Covered Surfaces – Minimum of 3 random grab samples per
    - 1 mile of road
    - 1 acre of surface area
    - 2 miles or 2 acres of road shoulder

The second ATCM, which applies to construction, grading, quarrying, and surface mining operations was adopted in July, 2002. This ATCM requires more stringent dust control measures at these operations. For example, an approved dust mitigation plan may be required, depending on the size of the project, or proximity to a receptor such as a hospital, school, day care center, work site, business, residence or permanent campground. The requirements for road

construction and maintenance differ somewhat from those for general construction and grading (e.g., development of a shopping center). Other requirements of the proposed ATCM address post-construction stabilization of disturbed areas. These areas must be revegetated, paved, or covered with at least three inches of non-asbestos-containing material. NOA-containing material may be transported if the loads are adequately wetted or covered with tarps.

According to the CARB's Regulatory Advisory: Asbestos Airborne Toxic Control Measure for Construction, Grading, Quarrying and Surface Mining[48], the second California ATCM applies to road construction and maintenance, construction and grading operations, and quarries and surface mines when the activity occurs in an area where naturally-occurring asbestos is likely to be present according to currently published NOA maps. Areas are subject to the regulation if they are identified on maps published by the department of Conservation as ultramafic rock units or if the Air Pollution Control Officer (APCO) or owner/operator has knowledge of the presence of ultramafic rock, serpentine, or naturally-occurring asbestos on the site. The ATCM also applies if ultramafic rock, serpentine, or asbestos is discovered during any operation or activity.

Road construction and maintenance operations are required to use dust control measures for a specified set of emission sources and prevent visible emissions from crossing the project boundaries. California has local air pollution control or air quality management districts which must also be notified before any work begins. For construction and grading projects that will disturb one acre or less, the regulation requires several specific actions to minimize emissions of dust such as vehicle speed limitations, application of water prior to and during the ground disturbance, keeping storage piles wet or covered, and track-out prevention and removal. Construction projects that will disturb more than one acre must prepare and obtain district approval for an asbestos dust mitigation plan. The plan must specify how the operation will minimize emissions and must address specific emission sources. Regardless of the size of the disturbance, activities must not result in emissions that are visible crossing the property line. Quarries and surface mines must also obtain district approval for an asbestos dust mitigation plan which must address specific emission sources. In addition, they must meet specific opacity standards for certain types of equipment and ensure that there are no emissions visibly crossing the property line.

Records related to the applicability of the regulation or compliance with the specific provisions of the regulation or the asbestos dust mitigation plan must be kept for seven years. The results of any air monitoring or bulk sampling required by the district, any bulk sampling to document the applicability of, or compliance with, the regulation, and any other records specified in the dust mitigation plan must be reported to the district.

The second ATCM has the following exemptions:

- Homeowners and tenants working on their own residential property

- Agricultural operations and timber harvesting
    - Except for the construction of roads and structures in connection with agricultural and timber operations

In addition, districts may grant an exemption under any of the following conditions:

- A geological evaluation demonstrates that ultramafic rock or serpentine is not likely to be found;
- Road construction and maintenance activities in a remote location;
- The processing of rock from an alluvial deposit.
- For emergency road repairs, district notification may be delayed.

CARB's Manager of Emissions Evaluations, Robert Krieger, provided feedback on California's NOA regulations. Mr. Krieger explained that while the state of California has developed the ATCM's, it is the responsibility of the local air pollution district authority to implement and regulate, and the districts have the option of placing more stringent requirements than the ATCM's. While asbestos has several definitions, California has taken a conservative approach that any asbestos exposure is harmful, thus the ATCM's designed to reduce or eliminate asbestos exposure to the public; consequently, imposing the 0.25% standard. Additionally, districts can implement air sampling requirements for projects encountering NOA; the ATCM does not address air monitoring requirements.

Mr. Krieger mentioned that historically when NOA was discovered on a school's property it had been removed. More recently, however, this practice has been determined to be costly and unnecessary. If NOA-containing material is found to be on a school's property, or is used as fill during a construction project, it must be covered with a minimum of 12 inches of clean fill. Projects not on school grounds where NOA-containing material is used a 3 inch layer of clean fill is required.

John Clinkenbeard, a Certified Professional Geologist (C.P.G.) for the State of California, explained the USGS has developed geological maps of the entire state of California available at 1:250,000 resolution. At this resolution, a boundary line on the map is approximately 1,000 feet wide and the smallest area resolution is 25 acres. When the local district authority reviews a construction permit, they reference these maps to evaluate if the proposed project site falls with in areas of known ultramafic or serpentine formations, or an area with known asbestos present. If the project is to occur in an area of concern the ATCM applies. If the project area is outside of the known areas of concern, the project site must undergo a geological evaluation by a third party C.P.G. Evaluations are also used when the project location is close to the boundary line, or the Contractor believes that asbestos is not present. California is presently working on increasing the statewide geological map resolution to 1:100,000; however, this project is not anticipated on being completed for several years. Some districts have funded mapping efforts in order to obtain a 1:24 map resolution.

After discussing NOA in Alaska, Mr. Clinkenbeard referenced Airborne Visual Inferred Spectroscopy (AVIRIS) as a possible geological mapping option. Imaging spectroscopy is a new tool that can be used to map specific materials by detecting specific chemical bonds. As a result it is an excellent tool for environmental assessments, mineral mapping and exploration, vegetation communities/species and health studies, and general land management studies.[49] The AVIRIS technology is aircraft-mounted and can collect data at a rate of 2 square kilometers per second. While this technology may not be feasible for Alaska's entire landmass, project specific uses may prove to be beneficial.

Jeff Wright with the CARB was contacted regarding M435 asbestos testing. The M435 method was developed in 1990 and was designed to detect serpentine asbestos in gravel/soil. The ATCM's requirements result in a large quantity of soil and gravel being tested for the presence of asbestos per M435; therefore, many testing laboratories throughout the state perform this analysis. CARB performed an interlaboratory study of California laboratories which offered the M435 testing. Samples were "spiked" with a known amount of asbestos and sent to the labs for analysis. The results of the study indicated vast discrepancies in the sample results.[50] All the laboratories included in the study were national accredited to analyze asbestos, however; M435 is unique from other test methods and while all the labs where adhering to M435 protocol, several different varieties of milling and homogenizing equipment was used. Mr. Wright explained that increased sample pulverization has been known to decrease asbestos concentrations via PLM analysis because the fibers are reduced in size to the point where they no longer meet the definition of a fiber; in contrast, asbestos concentration results per TEM analysis tend to increase. Because NOA is typically not uniform in samples, after the material has been milled sample homogenization should occur. PLM analysis examines only a small fraction of the sample, and TEM examines approximately one millionth of that, making homogenizing the samples an extremely important process.

Mr. Wright explained that California is in the process of undergoing several changes to M435. The proposed changes are as followed:

- Sampling
    - Bias field sampling per the discretion of the C.P.G.
        - Perform "target sampling" which focuses on areas or materials most likely to contain NOA opposed to "random" sampling in which the NOA may not be sampled
- Processing
    - Formulate a M435 accreditation for testing laboratories
        - California is working with NVLAB to develop an M435 accreditation

        - Require specific equipment to be used for the pulverizing and homogenizing processes
- Analysis
    - Move away from quantitative analysis
        - Results would be reported as "present" or "absent"
    - Additional analysis
        - If PLM observes no asbestos, require the sample to be analyzed via TEM

Other States

The following states either have, or are in the process of implementing NOA regulations: Massachusetts, New Hampshire, Pennsylvania, and Texas.

NOA CONTROL STRATEGIES AND TECHNOLOGIES

The following are a number of NOA control strategies and technologies that can be used to ameliorate asbestos release from NOA and NOA-containing material. After presenting some general information generated by the federal EPA, the items are divided into manage-in-place, dust suppression methods, covering or capping, and road maintenance. Finally, long term maintenance requires some public education.

EPA Facts Sheet: Methods for Reducing NOA Exposure[51]

Below is a list of methods recommended by the EPA to reduce asbestos exposure resulting from NOA. These are general methods, and must be applied on a project-specific basis:

- *Wet road surfaces with water using trucks, hoses, or sprinklers*
- *Wet piles of excavated material and cover them with tarps, plastic sheeting, or other items*
- *Continuously mist the work area*
- *Install wind barriers around the work area*
- *Clean or decontaminate equipment and vehicles to ensure that no equipment or workers track soil out of the work area (a gravel pad, tire shaker, or wheel wash system may be used to clear soil from vehicles)*
- *Wet the work area using a spray system attached directly to rock cutting or drilling equipment, such as a fine-mist sprayer or a variable-rate fogger nozzle*
- *Excavate utility trenches to an adequate depth and backfill them with clean soil so that future repair work will not need excavation into potential NOA-containing materials*
- *When transporting NOA-containing materials, avoid overloading trucks; keep the material below the top of each truck compartment and cover material with a tarp*
- *Limit personnel and vehicle access to the work area*
- *Identify NOA-containing areas with signs*
- *Reduce driving speed*
- *Reduce drilling or excavating speeds*
- *Excavate during periods of calm or low winds*

Roads and Parking with NOA in place and for unpaved roads and parking areas:

- *Cover roads with non-NOA-containing rock, chemical sealants or dust suppressants, chip seals, limestone aggregate, petroleum sealants, or asphalt cement paving*

- *Wet road surfaces with water*
- *Install windbreaks or berms*
- *Reduce driving speed*
- *Avoid dusty areas, especially in windy conditions*

And throughout communities:

- *Cover areas of rock and soil with clean soil, rock, vegetation, or other material*
- *Pave over unpaved walkways, driveways, or roadways containing NOA*
- *Landscape areas with vegetation, such as NOA-tolerant plants, and add a layer of organic mulch or NOA-free soil. Water plants often until they are established to minimize erosion*
- *Water garden areas before digging*
- *Keep windows and doors closed on windy days and during periods when nearby rock or soil may be disturbed, such as during construction*
- *Limit track-in by using entryway (door) mats, and wipe down pets before they enter buildings to reduce the amount of soil tracked indoors*
- *Allow children to play in outdoor areas only if the area has a ground covering, such as wood chips, mulch, sand, pea gravel, grass, asphalt, shredded rubber, or rubber mats*
- *Relocate outdoor activities to areas that do not contain NOA (walk, run, hike, and bike only on paved trails)*
- *Avoid dusty areas, especially in windy conditions*

Manage In Place

The ideal method for managing NOA material is in place and undisturbed; especially if the NOA material is not exposed. Fairfax County, Virginia, for example has a large NOA deposit which exists beneath non-NOA material. Unless this material is required to be impacted through construction or other activities, Fairfax County has taken the position to leave the material in place. NOA does not pose a health risk if it remains in a location where asbestos fibers cannot become airborne; such as beneath non-NOA material.

Separation

A variation on manage-in-place is to separate the NOA from associated non-NOA materials. Separation and excavation of the NOA materials for a source of gravel aggregate might serve as a control method, if the locations are known and the amounts are small. However this method seldom practical, since NOA deposits commonly extend miles, if not hundreds of miles. Excavation is generally only utilized as amelioration method when soils with known NOA are required to be impacted for projection such as road and building construction and utility work. Excavation requires the disturbance of the NOA, hence the potential for airborne exposure.

Dust Suppression

If NOA material is required to be disturbed, dust generating activities should be limited at all times. The most common engineering control used to reduce dust levels, hence airborne asbestos exposure, is the use of water and/or wet methods during NOA-related activities. The following is a list produced by the EPA of engineering and work practices that reduce exposure to NOA on excavation, grading, or utility work at construction sites.[51]

Reducing Vehicle Traffic and/or Speed

Dust emissions from unpaved road surfaces are directly proportional to the number of vehicles traveling on it, thus, reducing the amount of traffic will in turn reduce the amount of dust generated. By implementing weight or use restrictions on vehicles traversing the unpaved road could significantly limit the amount of traffic on a NOA-containing unpaved road and in some circumstances it may be possible to remove an unpaved road, or section of road, from service to the general public. An example of this type of control was recently imposed by the City of Kotzebue, in an effort to reduce particulate matter smaller than 10 microns in diameter (PM_{10}) emissions, where anyone under the age of 14 is prohibited from operating off road vehicles on city streets unless accompanied by an adult on the same vehicle.[52]

The rate at which a vehicle travels on an unpaved surface is also proportional to the amount of dust generated[53] meaning the efficiency of speed reduction as a dust control measure increases as the speed is reduced. For example, if the base speed is 40 miles per hour, a reduction to 20 miles per hour results in a 65% reduction in dust emissions; a further reduction to 15 miles per hour results in an 80% reduction in dust emissions. [54] Vehicular speed reduction can be achieved through posted signage coupled with enforcement and/or roadway manipulation such as speed bumps. The initial implementation of both these methods would be minimal, with immediate results. Major costs associated with these methods include increased travel time and additional law enforcement. While enforcement of these methods may be difficult in some rural Alaska communities, it may be a very practical, enforceable and effective for reducing airborne asbestos at quarries, construction sites and more densely populated areas.

In a best case scenario, at optimal conditions, both of these control methods would still not address the issue of exposed NOA on the roadway. Substantial amounts of dust would still be produced during dry conditions and natural elements such as wind would continue to make asbestos airborne. In most situations, these methods should be either approached as interim responses, or used in combination with other methods.

Water Application

Federal regulations require the use of "wet methods" when impacting ACM's which have potential of releasing asbestos into the air. Due to the moisture, particles/fibers adhere to each other through the surface tension of connecting water droplets and the adhesion of droplets to particles/fibers reducing the amount of emissions released during impact. The same principle applies to NOA-containing unpaved road systems; if they remain wet, dust emissions will be minimal. The easiest and most effective way to accomplish this is direct application of water to the surface of the roadway.

A large water source exists in most communities throughout Alaska. While more heavily populated areas have the required means to extract and apply water in sufficient quantities, many smaller communities do not. Often times some form of water application system can be implemented; however, may be too laborious to continue for long term.[55] In Amber, for example, no water trucks or large tanks were available for water application on so a simple gravity feed system was utilized. This system consisted of 4 - 275 gallon interconnected square plastic containers (totes) placed in the back of a truck which were filled with water from the Kobuk River and attached to a perforated pipe on the back of the truck.[37]

Applying water to surfaces provides effective, but short-term reductions in dust generation with water typically needing to be re-applied ever 0.5 – 12 hours depending on temperature and humidity. It has been determined that regular, light watering is more effective than less frequent, heavy watering.[55]

If the necessary equipment and water source are available, wetting unpaved surfaces can be greatly reduce dust emissions while remaining cost effective. Additionally, if wetting were coupled with one or both of the traffic control methods, evaporation from the roads surface would occur slower and dust emissions would be lower yet. Continuing costs would include equipment maintenance and workers performing the application. If equipment is not available, start up costs could be significant. Wetting is a practical control method to be used as a construction project control method or a short-term solution. Due to water having to be continuously applied to keep the surface moist, alternate long term control strategies should be investigated.

Increasing Moisture Content

The application of deliquescent salts such as calcium chloride, magnesium chloride and sodium chloride (common rock salt) are also implemented as dust control methods. These salts absorb moisture from the atmosphere and when mixed with surfacing soils will keep the treated soils at higher moisture content than untreated soils. For example at 77ºF and 90% humidity calcium chloride will absorb more than 17 times its own weight in water.[53] Potential disadvantages to the use of these salts are that roads may become slippery when wet, vehicle corrosion may occur and roads may become more susceptible to freeze and

thaw damage. Additionally, salts applied for dust suppression initially penetrate the roads surface several centimeters, followed by a gradual rise to the surface by capillarity action, making them susceptible to being washed off by rain. Prolonged rainfall will leach the salts from the roadway, potentially impact groundwater and surface water quality, and attract wildlife potentially causing safety concerns. Typically if the proper buffer zone exists between the water and the treated area, water quality impacts will remain minimal.[54] The practical utility of an application of one of these salts is no more than one year.[53] Sodium chlorides generally considered less effective than either calcium or magnesium chloride. Application of these materials is generally required 1-2 times per season.

Several locations in Alaska have utilized calcium chloride for dust control in recent years including Kotzebue, Teck Cominco's Red Dog Mine, and Haines, among other locations.[53] Environmental impacts of chlorides include metal corrosion, and degradation to nearby vegetation, surface, groundwater, and aquatic species.[53] In addition, because calcium chloride can substantially lower the freezing temperature of water, concentrations of the palliative in road soils can change the thermal stability of these soils.[53] This could potentially create issues in areas where extremely heavy loads are forced to wait until the road has completely frozen in order to supply adequate reinforcement such as on the Dalton Highway.

Covering or Capping of Installed NOA

Another common engineering control is to place a cover system (or cap) over the NOA. These materials may include non-NOA soil or rock, concrete, chemical sealants or dust suppressants, chip seals, limestone aggregate, petroleum sealants, asphalt paving, geotextiles, wood chips, mulch, sand, pea gravel, shredded rubber, rubber mats, and vegetation. Several factors, including cover material properties and site characteristics, affect the type of cover system appropriate for a particular area.

Palliatives

The majority of palliatives used on unpaved roads and airfields consist of chemicals designed to bind soil particulates together, formeing larger particles less likely to become airborne. Petroleum-based binders, organic nonpetroleum dust suppressants (lignins), electrochemical stabilizers, synthetic polymer products and pozzuolannic minerals comprise the main palliatives and our discussed further below:

Petroleum-based binders used as capping materials for dust suppression include emulsified asphalts, cutback asphalt (liquid asphalt), dust oils and modified asphalt emulsions.[55] These products are applied to the surface soil as a thin layer of asphalt which binds the soil particles together, consequently

waterproofing the road as well. Some binders increase the mass of fine particulates, instead of binding particles together. Both variations result in decreased emissions. When asphalt is used to bind particles together, the emulsified asphalt, because it is a mixture of asphalt and water in very small droplets, has the capability to penetrate unpaved road surfaces to coat more than just the surface particles, especially if the product is mechanically mixed into the top inch or two of road surface with a grader. Petroleum-based binders that contain fractions of lighter solvents, and especially those containing polycyclic aromatic hydrocarbons (many of which are carcinogens), can contaminate waterways if any migration of these lighter fractions occurs due to runoff.[53]

Organic non-petroleum dust suppressants include lignosulfonates, resins, and vegetable oils. Lignosulfonates originate from lignin, a complex compound which binds wood cells together as a natural polymer. Most commonly lignin is derived from wood fibers during paper manufacturing. Lignosulfonates bind surface soil particles together due to a combination of chemical and physical interactions. Lignosulfonates are known to greatly increase dry strength under dry conditions and retain effectiveness through extended dry periods. Generally 1-2 applications of lignosulfonates are required per season. Lignosulfonates are water soluble and will leach out of, or deeper into, roadway surface with rainfall and may become partially or totally destroyed.[55] These products are also corrosive to aluminum and its alloys unless calcium carbonate is added. Glacial tills contain low levels of clay and have low plasticity; consequently, lignosulfonates may be of limited value in controlling dust emissions from these soils. Furthermore, because lignosulfonates are derivatives of sulfuric acid, leaching may adversely impact watershed areas by affecting the acidity of water sources. Lignosulfonates are reported to not bind well on roads that had been treated previously with chloride compounds.[56]

Electrochemical stabilizers include sulphonated petroleum, ionic stabilizers, and enzymes. These products are intended to neutralize the ionic charges of clay-sized particles, thereby allowing electrostatic forces to bind the particles. Electrochemical stabilizers are generally effective regardless of climatic conditions.[55] To be effective, electrochemical stabilizers need to be worked into the road surface, requiring equipment that may not be available in remote rural communities. The performance of this material is dependent on fine-clay mineralogy which is unlikely to be encountered in most areas of Alaska.

Synthetic polymer products include polyvinyl acrylics and acetates that bind soil particles together and form a semi-rigid film on the road surface. These products are found as either a water soluble liquid or a powder intended to be mixed with water. Because synthetic polymer products are almost exclusively applied as a liquid, the material takes approximately 12-24 hours to cure during which time traffic should be kept minimal on application surfaces until the curing process is complete. Additionally, the product should be applied during a time of year when temperatures will not approach freezing, otherwise the curing process will not

work. The synthetic polymer products "Durasoil" was used as the dust suppressant in Ambler, as well as many other unpaved runways throughout northwest Alaska.[37] Synthetic polymer treatments are generally required once every 3-5 years.

Pozzolanic minerals, such as lime and cement, are typically added to non-plastic road surface material to produce a thin crust by agglomerating with fine dust particles. These stabilizers must be field mixed into the road material and compacted. These surfaces do increase the dry strength of material under dry conditions; however, once hardened it cannot re-harden if disturbed by abrasive forces, such as some off road vehicles and grading. Generally treatment with this method is applied once every ten years.

Gravel Replenishment

Asbestos-containing dust emissions from unpaved surfaces can be reduced by the addition of several inches of non-NOA containing gravel. This action would reduce the concentration of NOA on the surface; therefore, reduce the rate at which asbestos is allowed to become airborne.[57] Gravel provides a hard-wearing surface that shields underlying NOA from the abrasive forces of vehicle wheels. Traffic causes abrasion between the NOA and non-NOA aggregates, however, which over time creates fine dust. The degradation is somewhat dependent upon the hardness of the aggregate. Newly applied gravel will not reduce the strength of vortex airflows behind passing vehicles from entraining loose soil particles into the air. If the road-base is not well-constructed using crushed aggregate, surface gravel will be pushed down into the road surface by traffic, especially during wet conditions. If the road surface does not contain enough fine material of high cohesion to hold surface gravel in place, traffic can also cause surface gravel to be expelled laterally from the road's driving lanes. To be effective over more than a short period of time, new gravel applied to a road should be anchored to the road surface by incorporation into a cohesive surface layer through either well-graded aggregate mixes or by the use of soil adhesives (i.e., palliatives).[53]

In the event the newly applied gravel is lost to the roadway surface through vertical migration into non-cohesive soils, the use of geotextile fabrics may be of benefit. These fabrics are constructed of polymer threads that are very high in tensile strength, and are available in designs that either form.

Paving

Paving includes a variety of surfacing materials with the three general types being bituminous concrete, concrete and chip seals.

The most effective, and expensive, method currently available to control dust emissions from unpaved surfaces is the application of pavement or other durable materials to the road surfaces. Bituminous or Portland concrete provide durable

surface which prevents the abrasion of underlying soils. Bituminous concrete is a hot mixture of asphalt and well-graded aggregate, while Portland concrete is a composite material of cement, water and aggregate. Concrete requires less maintenance and is considered more durable than bituminous surfacing. Both methods are designed to support heavy traffic and unless the roadway typically carries 250 to 500 vehicles per day, the use of either of these paving options will likely not be cost effective.[55] Kotzebue has several roads which typically meet this "traffic quota" on a daily basis, and recently have had some of the main roads paved.[53] These forms of paving are not typically used on secondary roads, and would virtually never be considered for rural Alaska.

Chip seal surfaces, also called macadam, consist of one to three layers of aggregate and asphalt. Asphalt is sprayed over each aggregate layer as it is applied. After all the aggregate layers are in place with asphalt being applied over each individually, a covering of smaller stones is placed on top and then the entire system is compacted with the finished chip seal typically being 1 to 4 cm thick. Applying chip –sealing to an NOA-containing unpaved road would reduce dust emissions into the atmosphere because the chip sealant would bind the surface material. Annual dust control efficiencies of paved surfaces have been estimated by researchers to range from 90 to 99.9 percent.[57] A standard three-layered chip surface at 3.75 cm would be expected to last 10 years before additional surface treatment is required. Most chip seals require a second coat after 1 year and a third in approximately five years.

Durable Surfacing Materials

Fiberglass plates are used in cold climate oilfields to provide temporary road surfaces over native soil. These interlocking plates are typically manufactured in sections that are 14 feet long by 8 feet wide by 2 inches thick. The plates are designed to carry very heavy loads over short distances without the need to construct structural roadbeds in areas like northwestern Alaska, where construction aggregate is in very limited supply. The plates are expensive, costing about $2,000 per plate, but appear to have a significant lifespan.[58].Some questions exists, however, as to whether such plates are skid resistant at the vehicle speeds typical in rural communities.

Road Maintenance

The effectiveness of any dust suppressant applied to a road surface depends upon many factors such as type of road, traffic, intended uses climate, type of dust suppressant, drainage, and available maintenance resources. These factors must be considered together in the proper maintenance of a road that will safely and cost-effectively resist dust generation. For example, if the road surface is not well drained, water will puddle either on the road surface or in adjacent low spots. Standing water will float soil fines to the surface and distribute them across the roadway surface with passing traffic. Standing water adjacent to a roadway has

the potential to saturate the road sub-base, resulting in structural failure as evidenced by potholes. Aggregate in a roadway surface reduces tire forces on fine materials that increases the release of dust from a roadway. The loss of fines in the roadway surface leaves the aggregate unanchored and vulnerable to being pushed to the side of the road by tire forces. The success of palliatives to reduce dust depends on the repair and maintenance of good drainage on and adjacent to the road.[53]

Control Strategies for long term management of in place NOA.

Education

In rural communities throughout Alaska, the availability of law enforcement to assist in applicable dust suppressing methods is likely to be limited or non-existent. Imposing speed limits and vehicle use restrictions in these communities will be most effective if the residents of the community understand their purpose. Education about NOA and its potential health effects is a vital step in obtaining local support for any control method used. Education techniques for NOA-affected areas may include advertising, public meetings, information packets and making available NOA-knowledgeable experts. If residents understand the reasons for implemented controlled methods in their communities, a positive local response can result in social pressure applied throughout to adhere to new policies for the well-being of the community as a whole.

Residents in areas with geology favorable for NOA formation should be educated in basic NOA knowledge. In rural communities with a known NOA issue, such as Ambler, where airborne asbestos fibers from NOA are likely to be present, NOA general housekeeping and personal hygiene techniques should be implemented which requires specific education efforts. Education efforts could be carried out through State agencies or consulting firms with knowledge and experience with NOA. The cost for this effort would include travel to the subject community, preparation of materials (information packets) and potentially on-going assistance as new issues develop; however, these costs will be minimal considering many control methods are dependent on community support. If residents are unwilling to comply with newly imposed policies, any control method is likely to fail or have minimal effect.

Workers and the general public need to be properly educated regarding general housekeeping and persona hygiene practices appropriate for locals with NOA exposure potential. This control technologies include:

- Routine hand and clothes washing
- Boot/shoe removal at work and home
- Wet wiping and/or HEPA vacuum of visible dust accumulations as they develop
- Wet methods
- Controlling or avoiding visible NOA dust

Analysis with Discussion

Introduction

The asbestos standards, such as the training requirements for asbestos workers, were written on the premise of encounters solely in manufactured products. While the EPA has developed several documents to help increase knowledge and prevent exposure resulting from NOA, no Federal regulations have been implemented. This has resulted in several states implementing their own set of regulations and guidance documents. However, of the 20 states where NOA is known to exist, only a few have, or are beginning to, implement NOA regulations. The remaining states (such as Alaska) deal with NOA on a project-specific basis which typically exhibits substantial project delays and increased costs.

While there are limited general recommendations (see EPA NOA dust guidance), recommended NOA amelioration methods need to be selected on a site-specific basis because the exposure is dependent on a vast number of variables related to site specific conditions and work practices chosen for processing/handling. The single most important goal for almost all NOA-containing sites, materials, and systems is to prevent asbestos fibers from becoming airborne to eliminate respiratory exposure to asbestos. Several methods have been utilized to achieve this goal, with the main options being: manage in-place, dust suppression, cover or cap, and excavation/removal of NOA-containing material.

It is clear that gravel sources with NOA are present in Alaska and they have the potential to affect public health, project development and costs. At the same time it is well documented nationally and with Alaskan experience that use of proper NOA control strategies allow the safe employment of NOA materials. While past project experience in Alaska has not documented significant exposure or post project health concerns, NOA has been costly to some projects. This was primarily due to lack of advanced knowledge of NOA's presence, failure to characterize and notify, which resulted in changed conditions and non-competitive contract modifications after the contract has been awarded. Even if NOA is known during the project planning stages, the best course of action may not be clear because there are professional NOA geologic, risk and regulatory interpretations and definitional issues that will generate discussion and require resolution. The successful implementation of a NOA program will therefore require development and needs to involve training and transition for all involved including state, regional corporations, private resource owners, project designers, contractors, operation and maintenance staff, community and local residents.

Resource owners need to better understand their resource, develop the knowledge and marketing expertise to have it properly characterized and categorized for appropriate uses. Designer's need to develop the necessary project specifications requiring resource certification as well as contractor training and experience. Successful contractors need to learn how to develop

competitive work plans for safely utilizing NOA materials on project specific basis. For both companies and citizens in affected areas these changes include learning about the hazards and taking personal responsibility for controlling or avoiding activities creating airborne visible dust as well as implementing life style and work practice changes involving life style modifications such as housing/office boot/shoe removal, utilization of wet methods and HEPA filtration for routine cleaning of visible dust accumulations.

Liability

The liability of ADOT and suppliers of NOA materials may be divided into three:

1. Tort liability to individuals and organizations,
2. Contractors have additional liability to protect their workers and the public from the contractor's operations, and
3. Legal liability to agencies for failure to follow applicable laws and regulations.

Tort

If the ADOT's use of NOA damages an individual or organization, ADOT may incur tort liability. For example, if a resident of a village downwind from an ADOT airport that used NOA in the runway were to die of a disease known to be caused by asbestos exposure, the victims family might sue the ADOT. Although it takes years of heavy asbestos exposure to cause those diseases, and for most asbestos diseases asbestos is a "risk factor" not the sole cause, there are other causes, most notably smoking, sympathetic juries frequently find for the plaintiff, almost regardless of fault. Due to the tort reform movement, Alaska's current tort laws have reduced the windfall aspects of such suits, but they are certainly possible. Here we can suggest little except developing good standards for use of NOA, having review by all agencies concerned with health and environmental safety, then strictly documenting conformance. Such defensive practices will not make such suits impossible, but will make their defense much easier.

The owners of NOA materials sites face essentially the same tort issues as the ADOT. The question if this liability can be handed off from the owner to the ADOT is one that requires legal advice. California has a system of notification and paperwork that would seem to hand that liability off to the purchaser of the materials. We do not know if this has been tested in court. We doubt the CARB has the legal authority to change the state's tort laws. However, as above, conforming to established procedures is often a strong defense.

Contractors' liability

The contractors' liability to follow the state's labor laws regarding occupation health and safety are fairly straight-forward, if the NOA is mentioned in the project bid documents. The contractor's liability to third parties, such as the public, may be more complicated. The contractor's general liability insurance will defend them; however the contractor's insurance company will then try to recover

from the state and/or the material owner. This may be forestalled by appropriate contact terms regarding insurance, but clearly this is a item for expert risk management and legal advice. Finally, if the specifications do not make clear the need to get certain permits and the contractor's operations are impacted, the contractor may try recover from the ADOT for defective specifications.

Liability for laws and regulation compliance

CERCLA and RCRA deal with *wastes.* NOA is not a *waste* thus mining and incorporation of NOA does not come under either of those laws. However, for example, if the NOA mining segregated some materials that had a lot of asbestos from other materials, and thus had small mounds of asbestos materials on the site, might these mounds be waste piles? Here the regulatory standard is 1% asbestos, so if the mounds had less than 1% asbestos, they would not be asbestos under the CERCLA or RCRA regulations. Here the authors have not obtained further clarifications regarding mining and mine waste. While this would be the responsibility of the owner of the NOA materials site, these clarifications should be obtained in the next phase to enhance communications between the ADOT and the material site owners.

California Experiences

The California NOA regulations do address many issues and procedures that may bear on liability. The California NOA regulations separate the "notice requirements" into two categories; material intended for surfacing, and material not intended for surfacing. In addition to the notification variations, material intended for surfacing must have an asbestos content of <0.25% asbestos per the CARB 435 analysis, unless the surfacing application is considered one or more of the 11 surfacing ATCM exemptions. These notification requirements are intended to both "hand-off" liability to the purchasers and produce adequate documentation. (Signage and placard requirements for regulated material are intended more to prevent accidental misuse and/or handling than for recordkeeping or proof of receipt.)

Once the NOA-containing material is in the possession of the purchaser, it is their responsibility to provide adequate protection and training to the employees which handle the material. The end-use of the material is also the purchaser's responsibility at this point. They must insure they not only adhere to all OSHA, EPA, State and Local requirements during handling and transport, but also to their approved site specific Work Plan. The purchaser must also insure the material is approved by the regulating agency for its intended end use. Often the end use of the regulated material will managed by a third party where they would be in responsible charge of obtaining approval, permits, etc., for the materials end use and any required dust control strategies (capping, paving, etc.).

Resource owners and contractors have raised liability concerns regarding the sale and use of NOA materials. In some instances it is understood litigation may

already have been filed against NOA resource owners for the sale and use of NOA materials. This is a real concern that if not properly understood and addressed will impact the safe use of NOA materials and create unnecessary project costs. CERCLA Section 9604 provides for resource owner protection against naturally occurring hazards. Liability for resource processors and/or contractors can be addressed through their compliance with NOA program requirements. It is not possible to prevent all lawsuits and particularly frivolous filed cases. Therefore the effectiveness of the recommended NOA program to be developed will likely be tested legally and provide court interpretation and resolution of liability concerns.

Ambler, for example, is a unique case which would not completely comply with any of the existing 11 surfacing exemptions or the Construction, Grading, Quarrying and Surface Mining ATCM for California. While California's state NOA regulations are undoubtedly the most developed in the United States, it is unlikely the drafters/authors were required to take into account communities such as this. Had similar circumstances existed, certainly specific exemptions would have been established to address this. Alaska can look to, and even adopt, the California NOA regulations; however, scenarios exist in Alaska unlike anywhere else in the United States, and special provisions and/or exemptions will be a necessity of this future rule.

Examples of Liability

In the Swift Creek Washington case where NOA-containing Sumas Mountains would periodically experience landslides which flowed into the Swift Creek River where the material was dredged and staged along the shoreline to prevent flooding. There was no organization deemed the Responsible Party, and several federal, state and local agencies are currently involved in the Swift Creek NOA concern. It was determined that the EPA Superfund program had limitations on spending money on this type of cleanup because the material of concern was naturally-occurring. This makes NOA sites exempt by law from the EPA Superfund program, except where the material was moved by unnatural forces (ie construction, dredging). This caveat allowed the EPA to use funding to assist in the Swift Creek NOA concern.[60]

Libby, Montana, which has been declared an EPA Superfund site, has had ongoing federal cleanup efforts since 1999. In this case, processing mined vermiculite constituted the majority of the contamination; consequently, the asbestos was not viewed as naturally-occurring. In 2003, in a ruling issued by the District Court of Montana, the court said the mining company, W.R. Grace, was liable for costs related to the investigation and cleanup of asbestos contamination in Libby and ruled that the EPA's revised method for calculating indirect, or overhead, costs is appropriate and that those costs may be recovered from W.R. Grace. The ruling meant W.R. Grace was responsible to pay all of the $54.5 million in costs that the EPA incurred through December 31, 2001. Costs incurred after that date were to be resolved in future proceedings if disputed by

W.R. Grace. In May, 2009, W.R. Grace and three individual defendants were acquitted of criminal charges under the Clean Air Act alleging they conspired to conceal the health dangers posed by the contamination.[61]

NOA proposed for use

While NOA materials are known to be present in 20 of the 50 states, only a handful are moving ahead with implementing NOA regulatory control policies. Those states that have implemented NOA regulations have focused their programs on:

- Geologic mapping of "restricted" areas with materials likely to contain NOA
- Compliance level characterization of NOA free materials based on the limit of detection of less than 0.25% asbestos content
- Asbestos characterization sampling for use of materials from restricted areas
- Utilization Compliance Plan Submittal, Review and Approval
    - Source, transport route and work product
- Providing local authority to interpret program requirements site specifically and implement additional testing where necessary.
- Development of necessary program exemptions
    - area wide
    - regional

While education and training with regards to NOA exposure, work practices, and safe uses is key to any program, the submittal and approval of site specific compliance plans for approval by local authorities will insure the long term viability of an effective "living" program for that project's NOA.

NOA site specific work plan might note the availability and cost of NOA-free material as those affect project design options. Control technologies that eliminate or reduce exposure pathways might minimize individual project costs. The remoteness of many Alaska projects and absence of alternative transportation routes may require reasonable exemptions, based on a balance of benefits and risks.

Similarly, the concentration and variety of NOA will play a major role in determining the most cost effective control strategies. While federal regulations are indifferent to the form of asbestos, control methods for NOA should not be. Forms of asbestos that break apart and easily become airborne should be held to a higher standard than those which are tightly bound within a rock matrix. This highlights the importance of developing a consensus standard as well as mapping and sampling efforts to properly characterize specific asbestos materials present as well as the risk. The authors recognize this may be quite difficult in practice, but certain broad guidelines are possible and these may help project planners and designers.

NOA in place - control technologies

NOA control methods should start with the least expensive options first. In general terms there are four control methods: education, wetting, palliatives, and capping.

By itself and together will all the other control methods educational outreach to the staff, industry and general public regarding the hazards and methods of controlling or avoiding airborne dust is almost always advised. Outreach such as encouraging implementing speed controls and restrictions on vehicle use in sensitive areas (i.e., near schools, hospitals, and residential areas) and modifying life style habits to reduce personal exposure are all worthy of consideration.

If a road base lacks adequate drainage, the embankment will be weak and the effectiveness of dust control measures will be limited. Reconstructing unpaved roads to provide good drainage and a solid base is needed for dust palliatives, capping with clean material, or paving to be effective. If the road soils are of poor quality, geotextiles may be a feasible option to add support to the road surface. According to Succarieh,[54] expert professional advice about the road is often needed. The ADOT Local Technical Assistance Program (LTAP) may assist As part of the educational program it is recommended that the ADOT LTAP enhance their NOA knowledge and resources for distribution.

If sufficient equipment and manpower is available, watering roads during high dust periods should be performed; however, this is a short-term effective method of dust control and more long-term control methods should be investigated. Historical monitoring data illustrates that high dust generation rates are greatest during the two-month period following breakup, therefore, short term control measures like watering can provide limited benefits if impacted communities have access to watering equipment.[54]

Another control technology is application of dust palliatives. In order to obtain the greatest benefits from the application of dust palliatives, site-specific investigations of local traffic and soil is required. Investigations should begin with an assessment of the soils used to construct and surface the unpaved roads. The ADOT's LTAP, may assist rural communities with technical assistance and/or training on proper techniques for soil analyses useful in the palliative selection process.[54]

Some deliquescent salts and/or synthetic polymer products may provide adequate levels of dust control on unpaved roads. Again this depends heavily on the soil and traffic conditions in the respective community. These products have been tested in several locations in Alaska and have been demonstrated to provide varying control of dust emissions. Because the successful use of these products is dependent upon a number of factors that vary from community to

community, pilot tests of selected products for a summer season should be undertaken in affected communities before community-wide application is pursued. [54]

Contractor Feedback

Approximately 150 contractors in California who likely encounter NOA were contacted via email and asked to provide general feedback regarding associated California regulations. The email contained 5 basic questions in combination with a short narrative explaining the purpose of the inquiries. Only one of the contractors contacted replied, with limited applicable information. This contractor expressed the following when asked about their opinion on the California NOA regulations:

> *For the most part, the measures taken are reasonable and consist of greater than normal dust control through the use of more water on grade during earth moving operations and trenching.*

The contractor explained equipment "wash systems" are routinely utilized for decontaminating equipment prior to leaving a NOA site. Another precaution was capping the native material with either a hard surface (concrete, asphalt, ect) or "clean" soil. The thickness of the cap varies depending on the perceived threat of the asbestos, and when soil capping is used it is underlain with a warning fabric to prevent excavations being made into the NOA at a later date.

This contractor did not have certified asbestos workers on staff to perform the removal/handling of hazardous materials such as NOA. They stated their employees are trained to look for hazardous while work is being performed, and if material is encountered which may be hazardous it is either avoided or remediated by a qualified contractor. The following quote explains their route of action if hazardous materials are required to be abated:

> *When we do have a situation develop where hazardous materials are present and they need to be remediated then a proper contractor is brought into service under contract with the property owner keeping us out of the loop.*

To close, the contractor states the NOA regulations in California are not "unbearable" but do add additional costs to affected projects.

Future and Plan of Action

The regulatory authority utilized in the states evaluated included a state-wide program that was implemented across at the local, county level. Typically, multiple disciplines are involved including health, environmental and air pollution control divisions of the regulatory authority.

To date the Alaskan documented experiences in Juneau, Dalton and Ambler all involved transportation projects. Fortunately, once identified they were handled appropriately with additional assessment, training and work practice and product use modifications, each demonstrating once it is known, the NOA material can be safely used. However, while the experiences may not have resulted in any significant human exposures, the late identification resulted in changed conditions and costly non-competitive contract modifications. While NOA encounters in Alaska have been comparatively limited, the need for implementation of a state-wide NOA policy is reinforced by the lengthy, problematic and consequently expensive circumstances that have occurred due to lack of standard operating procedure and/or regulatory guidance. Road and pipeline pad construction and maintenance have and will be the largest future use of gravel resources. For these reasons it is recommended and appropriate for ADOT to take the lead in the further evaluation and development of NOA strategy alternatives and program development. It is anticipated and recommended that ADOT develop internal NOA operations and maintenance (O&M) and design standards for ADOT projects. For maximum effectiveness the department's internal policies and SOP for NOA should reflect a statewide, industry and regulatory consensus. These NOA standards will involve awareness education, resource characterization, acquisition, use as well as required training and development of design requirements, contractor's work practices and O&M practices.

It is readily apparent that the NOA concerns go well beyond the ADOT areas of responsibility involving all aspects of the local people, resource use and community. As demonstrated by other states moving to address NOA issues, a more holistic approach to NOA should involve public health, worker, community and environmental protection advocacy. The existing Alaskan "dust working group" comprised of regulatory and government stakeholders appears as a natural technical committee that could be expanded to include industry and be instrumental for the technical information exchange, development of a statewide NOA strategy(s) consensus and facilitate with the implementation of a successful statewide program.

Clearly the ADOT needs an SOP that that tells ADOT planners, designers and operators how to handle NOA, and this SOP will certainly call for a specific plan for each project. However in order for the SOP to be successful, it must be acceptable to all relevant state and federal agencies, and acceptable to all other stakeholders, such a contractors, materials site owners, and affected communities. Thus the first step is for the ADOT to formulate a NOA Action Plan to solicit comments and advice from all stakeholders, develop drafts of the SOP, circulate drafts to all stakeholders, and present the drafts to all stakeholders.

Working Group

Through the development of the NOA Action Plan (AP) the professional and technical issues can be resolved by the stakeholders working group and applied

with state conditions to existing programs developed elsewhere to develop an Alaskan specific program consensus and AP. It is recommended that the working group be comprehensive in make up and include all interested parties or stakeholders. Representatives from government, community and industry should be included. The following is considered a minimum list of known stakeholders that we recommend ADOT consider and include in forming a statewide stakeholder working group.

- BIA
- Alaska Geological Survey
- Denali Commission
- EPA
- ADOT
- ADEC
- DHSS
- Alaska Native Tribal Health Consortium.
- Alaska Tribal Air Call
- Denali Pipeline
- Alyeska Pipeline
- Native Corporations
- Village corporations in areas with NOA
- Community Health Consortium

Coordinating the working group and developing an NOA AP to achieve the goals and targets of these recommendations will require significant commitment and change in operational, management, building and behavioral practices at all levels of agencies and state government. For the AP to be successful, it must have both long term overarching goals and short term, manageable and achievable actions that have short delivery timelines. The statewide working group of stakeholders will be important to providing the forum for technology transfer, alternative strategy consideration, program development and successful implementation of the consensus achieved.

Work of the Working Groups

ADOT's initial working group purpose and scope of work should be fivefold:

- Inform stakeholders on NOA background and needs and solicit participation;
- Define existing NOA control strategies in use;
- Brainstorm actions that best meet all NOA stakeholders unique needs and objectives;
- Develop a Statewide government, industry and community NOA SOP
- Meet and present the SOP to all stakeholders
- Finalize the SOP and develop an example of a site-specific plan for Implementation

How to begin

The California regulations and EPA guidance are a good beginning to any NOA SOP. With some cut and paste and modification for remote projects and Alaskan conditions, those documents could form a draft of the SOP. However caution is needed to not present these or any document to the agencies as a fait accompli. Rather, all stakeholders, especially the relevant agencies, need to help ADOT define the issues and insure the final SOP does not conflict with the charge of any of those agencies

CONCLUSIONS AND RECOMMENDATIONS

This paper reviews NOA background, analytical issues, policies and regulations that have been considered and/or implemented by other authorities involved with NOA and have developed NOA policy options. Based on the analysis of the findings the following conclusions and recommendations have been developed.

- NOA gravels are present throughout the nation and in Alaska which have the potential to impact public health, project development and associated costs.
    - Transportation projects have been adversely impacted by NOA in Juneau, Ambler and on the Dalton Highway.
    - Material site investigations must check for NOA, especially in regions with mineral types likely to contain NOA.
- NOA gravels can be used safety with proper training, understanding and implementation of appropriate control strategies and technologies
    - Technical and regulatory interpretation and definitional issues remain
- Established state NOA programs evaluated have focused their programs on
    - Geologic mapping of "restricted" NOA areas
    - Characterization of NOA free materials based on the analytical procedure's limit of detection of less than 0.25% asbestos content
    - Source characterization sampling from restricted areas
    - If ≥0.25% asbestos, Compliance Plan Submittal and Approval should be required
    - Local authority enforcement to interpret program requirements site specifically and implement additional testing where necessary
    - Development of necessary program exemptions
    - States with NOA programs were developed across public health, environmental and air pollution divisions at the state level and implemented at the local, county level.

It is recommended that ADOT write an action plan to undertake development of a NOA SOP as the lead coordinating entity of a holistic statewide approach that involves all stakeholders and develops a statewide agency, industry and community consensus standard for NOA use. In order to do this, the ADOT should convene a statewide stakeholder's working group to resolve technical issues, work out a consensus on a state wide NOA program.

CSSB 180: Sectional and Explanation of Changes

Section 1. Findings - deleted in this version, can travel with bill.

Section 2. Immunities. The bill creates a new subsection in title 9 (Code of Civil Procedure) Ch. 65, which deals with limits or conditions for immunity. The original bill provided immunity to landowners, and to the state and contractors, as long as they followed the provisions of a site specific plan outlined later in this bill.

The new CS removes immunity provisions for the state, since it will be the state's decision to allow use of NOA in certain circumstances. The immunity provisions for the others remain (if they follow the provisions of the bill and the site-specific plans).

Sec. 3 Naturally Occurring Asbestos

Title 18 deals with Asbestos. This creates a new Article 2A regarding naturally occurring asbestos and the use of materials containing NOA. These provisions apply to non-state entities.

(a) Provides that an entity may qualify for immunity under the provisions in title 9 when using a gravel or aggregate material that has a content **equal to or greater than 0.25 percent** of naturally occurring asbestos using a bulk test method specified by DOT.
(b) In order to qualify, the person having legal authority for a private contractor that is within the designated area must prepare and submit a site specific plan. Before gravel extraction can begin, DOT must approve the plan.
(c) In order to be immunized the private contractor has to adhere to the plan, including monitoring and mitigation requirements.

A new subsection was added in the house version to define the minimum detectable amount of asbestos as .25 for the purpose of designating gravel and aggregate as NOA.

Section 4. Title 44 (Authorizing statutes, Department of Transportation) A new article 3A. **Use of Materials Containing Naturally Occurring Asbestos,** provides:

44.42.400 Program Administration

(a) A single employee is responsible for oversight for the provisions that follow.
(b) A municipality or community may request to become an area designated by the Department as an area which may use NOA under the immunity provisions. The community must apply to the department, the department can approve only after reviewing tests for NOA, considering availability of other construction materials that are free of NOA, and after soliciting public input from the resident of the area. The department can require relevant information from the applicant (tests, information on other options, etc). After designation, the department shall notify, including through signage, potentially affected persons that the area has been so designated.
(c) The department can also make designations in places where there is no municipality or community. The department is responsible for tests, etc., in these areas and must notify potentially affected persons using same methods as in (b).
(d) Provides a definition of "community, which follows PCE model.

44.42.410 Site-Specific Use Plans.

(a) Requires contractors, after consultation with the owners of land on which the NOA will be placed, to submit a site-specific use plan to the department which
  (1) Meets standards adopted by the Department in consultation in regulation as outlined in 420 (the next section of the bill)
  (2) Demonstrates how methods used will comply with acceptable standards
  (3) Outlines long-term maintenance plans to ensure that human health and air quality are maintained
  (4) - (6) Describes how the material will be contained, buried, sealed or otherwise capped to ensure that asbestos does not become airborne because of vehicle use, road maintenance or grading if applicable.

(b) Similar set of provisions for department managed projects such as airports, or other public works projects

(c) The department will review and either approve or disapprove plans taking into account construction seasons in the project location.
(d) Projects may not be approved unless the Department determines it is economically unreasonable to undertake the project with materials free from naturally occurring asbestos.
(e) The department in consultation with other departments, shall develop a monitoring and mitigation plan for the project. If the site specific use plan is approved, the monitoring and mitigation plan developed by DOT will be attached to that plan and to qualify for immunity the party that has direct control over or responsibility for the monitoring and mitigation must comply with the plan developed by DOT.
(f) On approval, the department
  (1) Provides the contractor a copy of the approved SSUP that includes
    (A)The monitoring nd mitigation plan
    (B)Requirement that the contractor submit all asbestos-related data
    (C)Recommendations for reducing exposure to airborn asbestos fibers
  (2) Provides the plan to the mayor or manager of a municipality affected by the use of the gravel
  (3) may provide to all contractors copies of OSHA, EPA and USMS recommended practices
(g) Provides for recording the presence of naturally occurring asbestos and noting that subsequent interest holders may have legal obligations with regard to the NOA in the project area.
(h) Results of monitoring or testing performed must be provided to the department.

There is a new provision that surfacing materials cannot contain NOA.

44.42.420 Regulations

Section provides that the Department in consultation with listed other departments may adopt regulations under the AAPA to revise statewide standards on use of NOA, and that must include procedures for completing site investigations, laboratory standards, procedures for evaluating human health concerns, construction operation and maintenance practices etc., etc.

Section 5. Uncodified law:

Provides interim project authorization through December 31, 2013, which allows early designation by DOT on a temporary basis of sites, which may then submit site specific plans etc... Sets California Air Resources Board CARB Method 435 as the interim standard for determining asbestos content under these provisions.

Note that the data base provisions in SB 180 were dropped from the house version, since the House decided to require applications from communities as the trigger for DOT decisions on use.

"aggregate material"

Immunity questions:

1. Does any other state that uses NOA immunize the state?
2. Do they immunize any other parties (contractors, landowners, etc.)?
3. Are there any other similar (construction or hazardous material related) programs
   in Alaska that provide immunity from suit to the state or to contractors?
4. If the DOT sets maintenance and ongoing testing as part of a site specific plan, who becomes responsible for that? What happens if over time, maintenance is not done according to the plan? Who is liable then? How long do these requirements stay in effect?
5. What happens if the maintenance essentially requires further work from the state and the state fails to either provide or fund that work?
6. The immunity for landowners does not appear to be tied to any site specific plan use. Is this correct?

"the person"

"economically unreasonable"? 25%

Is asbestos = cancer linear?

The Honorable Hollis French
State Senate
Alaska State Capitol
Juneau, AK 99801-1182

Dear Senator French,

During the March 23rd Senate Judiciary Committee hearing regarding SB180, a question was raised about the baseline prevalence of pleural changes in the United States or Alaska. I have personally researched this question.

Unfortunately, there is no formal surveillance system for pleural changes among the general state or U.S. population. I spoke with Dr. Al Franzblau, a physician with the University of Michigan School of Public Health who is a subject matter expert in the field of radiographic diagnosis of pneumoconiosis, which includes pleural changes due to asbestos-related diseases. Dr. Franzblau stated that an accurate prevalence estimation is difficult to make because of the wide variability in the sensitivity and specificity of diagnosing pleural changes from chest x-rays. He stated that he has seen papers that estimate the prevalence of pleural abnormalities among people with no known exposure to asbestos to vary considerably (from <1% to >10%), depending on the population studied, methodology employed, and experience/training of the individual(s) reading the films. Dr. Franzblau said that he would try to send me a link to some of the papers he was referring to when he is able.

Below is a list of the abstracts I was able to pull from PubMed related to this issue for your review. Please let me know if you have additional questions related to this matter.

Sincerely,

Joe McLaughlin, MD

Radiographic changes in a group of chrysotile miners and millers exposed to low asbestos dust concentrations.
Cordier S, Theriault G, Provencher S.
Abstract
Radiographic changes in 342 Quebec asbestos miners exposed to low levels of asbestos dust for an average period of 20 years were studied. Their estimated cumulative exposure ranged from 7 fibres per cubic centimeter X years (f-y/cc) to 300 f-y/cc. Of these workers, 2.1% showed a small opacity score of 1/0 or more and 2.7% showed pleural changes. No linear relationship could be established between small opacity score and any index of exposure to asbestos. Pleural changes were related to age. A referent group of office workers within the same mining industry showed a prevalence of 2.1% (1/48) for small irregular opacities 1/0 or more, and for pleural changes.

J Occup Med. 1989 Sep;31(9):775-80.
Public health implications of the variability in the interpretation of 'B' readings for pleural changes.
Parker DL, Bender AP, Hankinson S, Aeppli D.
Abstract
During 1985 in Minnesota, an initial reading of 566 radiographs found 30% of them to be positive for pleural changes. However, only 4% were considered positive by at least two out of three readers from National Institute for Occupational Safety and Health panel reading the radiographs under blind conditions. The implications of this variability in radiographic readings for public health decisions was illustrated in Minnesota, where selective overreading of radiographs of female subjects created an illusion of a generalized environmental problem rather than an occupational exposure. One solution to this dilemma is establishment of criteria to minimize false-positive pleural findings. The study also supports the need for more careful consideration of other disease processes in the interpretation of "B" readings.

Am J Ind Med. 2000 Mar;37(3):291-5.
The prevalence of pleural plaques and/or pulmonary changes among construction workers in Okayama, Japan.
Kishimoto T, Morinaga K, Kira S.
Abstract
BACKGROUND:
Since asbestos has been widely used in Japanese building materials since 1960s, a large number of Japanese construction workers may be exposed to asbestos occupationally.
METHODS:
Among 2951 construction workers in Okayama, Japan, the prevalence of asbestos-induced pleural or pulmonary changes was examined by screening chest x-rays; these findings were confirmed by computed tomography (CT) scanning of the chest.
RESULTS:
Among 2951 construction workers, 168 (5.7%) were found to have significant findings for pleural plaque or pulmonary changes on chest x-ray. Seventy-four had both pleural plaque and asbestosis, 85 pleural plaques alone, and 9 asbestosis alone. In 11 subjects, pleural plaques were suggested by chest x-ray, but neither pleural plaque nor asbestosis was demonstrated by chest CT. Honeycombing as one of the characteristic findings of asbestosis was found in 29 subjects. Others showed subpleural spots or curvilinear shadow, which suggested the early stage of asbestosis. The occupations of these workers were carpenters (64), plasterers (27), and concrete board cutters (14). About 30% of the workers with these findings were aware that they were handling asbestos in activities such as installation of asbestos boards, and/or asbestos spraying.
CONCLUSIONS:

As the incidence of malignant mesothelioma and primary lung cancer associated with asbestos exposure are high, screening by chest CT is necessary for detecting asbestos-induced pulmonary and/or pleural lesions. Education for protection such as telling about the presence of asbestos in building materials is also necessary.

Asbestos related diseases from environmental exposure to crocidolite in Da-yao, China. I. Review of exposure and epidemiological data.

Luo S, Liu X, Mu S, Tsai SP, Wen CP.

Abstract

BACKGROUND:

Scattered patches of crocidolite, one form of asbestos, were found in the surface soil in the rural county of Da-yao in southwestern China. In 1983, researchers from the West China University of Medical Sciences (WCUMS) discovered that residents of two villages in Da-yao had hyperendemic pleural plaques and excessive numbers of pleural mesotheliomas.

AIMS:

To review and summarise epidemiological studies, along with other relevant data, and to discuss the potential contribution to environmental risk assessment.

METHODS:

This report is based on a review of several clinical/epidemiological studies conducted by WCUMS researchers since 1984, which included one cross sectional medical examination survey, one clinical/pathological analysis of 46 cases of mesothelioma, and three retrospective cohort mortality studies. Additional information acquired from reviewing original data first hand during a personal visit along with an interview of medical specialists from Da-yao County Hospital was also incorporated.

RESULTS:

The prevalence of pleural plaque was 20% among peasants in Da-yao over 40 years of age in the cross sectional survey. The average number of mesothelioma cases was 6.6 per year in the 1984-95 period and 22 per year in the 1996-99 period, in a population of 68 000. For those mesothelioma cases that were histology confirmed, there were 3.8 cases/year in the first period and 9 cases/year in the second. Of the 2175 peasants in this survey, 16 had asbestosis. Lung cancer deaths were significantly increased in all three cohort studies. The annual mortality rate for mesothelioma was 85 per million, 178 per million, and 365 per million for the three cohort studies, respectively. The higher exposed peasants had a fivefold increased mesothelioma mortality compared to their lower exposed counterparts. There were no cases of mesothelioma in the comparison groups where no crocidolite was known to exist in the environment. In the third cohort study, almost one of five cancer deaths (22%) was from mesothelioma. The ratio of lung cancer to mesothelioma deaths was low for all three studies (1.3, 3.0, and 1.2, respectively).

CONCLUSIONS:

The observation of numerous mesothelioma cases at Da-yao was a unique finding, due mainly to their lifetime exposure to crocidolite asbestos. The finding of cases dying at a younger age and the relatively high ratio of mesothelioma cases to lung cancer could also be another unique result of lifetime environmental exposure to crocidolite asbestos. Although the commercial use of crocidolite has been officially banned since 1984, the incidence of mesothelioma has continued to show a steady increase, particularly among peasants. Since the latency of mesothelioma is approximately 30-40 years, the ban had little effect in the 1990s. The increased awareness and changes in diagnosis over time may also contribute to the increase. Furthermore, exposure to asbestos stoves and walls continued. The government implemented reduction of these exposures. However, from a public health standpoint, the most important issue is the complete avoidance of further exposure to asbestos.

Environ Health. 2008 Jun 20;7:30.

Modelling prevalence and incidence of fibrosis and pleural plaques in asbestos-exposed populations for screening and follow-up: a cross-sectional study.

Paris C, Martin A, Letourneux M, Wild P.

Abstract

BACKGROUND:
CT-Scan is currently under assessment for the screening of asbestos-related diseases. However, to date no consensus exists as to how to select high-risk asbestos-exposed populations suitable for such screening programs. The objective of this study is to select the most relevant exposure variables for the prediction of pleural plaques and asbestosis in order to guide clinicians in their use of CT-Scan.
METHODS:
A screening program of non malignant asbestos-related diseases by CT-scan was conducted among asbestos-exposed volunteers in France. Precise assessments of asbestos exposure were obtained by occupational hygiene measurements and a job-exposure matrix. Several parameters were calculated (time since first exposure, duration, intensity and cumulative exposure to asbestos). Predictive parameters of prevalence and incidence were then estimated by standard logistic and a complementary log-log regression models.
RESULTS:
1011 subjects were recruited in this screening program among them 474 (46.9%) presented with pleural plaques and 61 (6.0%) with interstitial changes compatible with asbestosis on CT-scan. Time since first exposure ($p < 0.0001$) and either cumulative or mean exposure ($p < 0.0001$) showed independent associations with both pleural plaques and asbestosis prevalence and pleural plaques incidence. Modelling incidence of pleural plaques showed a 0.8% to 2.4% yearly increase for a mean exposure of 1 f/ml.
CONCLUSION:
Our findings confirmed the role played by time since first exposure and dose but not duration in asbestos-related diseases. We recommend to include these parameters in high-risk populations suitable for screening of these diseases. Short-periodicity of survey of pleural plaques by CT-Scan seemed not to be warranted.

Radiologically recognized pleural changes in nonpneumoconiotic silica-exposed coal miners.
Orriols R, Muñoz X, Sunyer J, Isidro I, Tura JM, Ferrer J.
Abstract
OBJECTIVES:
Whether nonpneumoconiotic silica-exposed coal miners develop radiologically recognizable pleural changes was studied.
METHODS:
In a retrospective follow-up study, the oldest and the most recent chest X-rays of 765 workers with a profusion category lower than 1/0 according to the International Labour Office were read.
RESULTS:
Altogether 720 (94.1%) workers had no abnormalities, and 45 (5.9%) showed some pleural alteration in the first X-ray. In 43 (6%) of the 720 with no initial abnormalities, some pleural change was detected in the last X-ray. There was a statistical difference ($P = 0.022$) according to silica exposure category [low: 5 (2.4%); medium: 8 (6%); high: 30 (8%)]. The relative risk for any pleural alteration was significantly increased in relation to the silica-exposed group [medium: odds ratio (OR) 5.72, 95% confidence interval (95% CI) 1.4-23.5, $P = 0.016$; high: OR 7.62, 95% CI 2.1-27.2, $P = 0.002$] and to rib alterations (OR 3.74, 95% CI 1.4-9.7, $P = 0.007$). In 19 (2.6%) workers with no alterations initially, a costophrenic sinus alteration was detected later. Again the silica exposure categories [low: 1 (0.5%); medium: 3 (2.2%); high: 15 (4.2%)] differed significantly ($P = 0.033$). The relative risk of costophrenic sinus obliteration was significantly increased in relation to the silica-exposed group [medium: OR 8.59, 95% CI 0.7-113, $P = 0.102$; high: OR 16.44, 95% CI 1.5-177, $P = 0.021$]. The appearance of two costophrenic sinus obliterations and the disappearance of four were detected in the last chest X-ray of the 45 workers with some pleural alteration initially.
CONCLUSIONS:
Costophrenic sinus obliteration can be found in nonpneumoconiotic silica-exposed coal miners and seems to be associated with silica exposure intensity.

Asbestos Exposure – Ambler
Public Health Evaluation and Assessment
Interim Report

May 20, 2005

John P. Middaugh, M.D.
Scott Arnold, Ph.D.

Introduction

Many individuals, agencies, and stakeholders have been working together to evaluate the significance of the discovery in the fall of 2003 of naturally occurring asbestos in the gravel pit at Ambler. Several meetings have been hosted by the Northwest Arctic Borough to share information and identify steps needed to develop recommendations for the community.

Public Health Findings

The Alaska Division of Public Health has been working with the Maniilaq Health Center, Maniilaq Association, the Alaska Native Tribal Health Consortium, and several national asbestos experts to obtain information on the medical and public health significance of the presence of asbestos in Ambler.

Inhalation of asbestos fibers is the primary route of human exposure. The likelihood of developing asbestos-related diseases is related to the length of exposure and the concentration of asbestos.

We performed a medical records search to determine if any asbestos-related diseases have ever been identified in residents of Ambler, Kobuk, Shungnak, and Kiana.

- We reviewed all death certificates from 1980 to the present to see if there were any residents of Maniilaq villages who had died with any asbestos-related diagnosis. There were no residents with any asbestos-related diagnoses on the death certificate.

- We reviewed the State Cancer Registry and the Alaska Native Tumor Registry to see if there were any asbestos-related cancers that had been diagnosed and reported from any residents of Ambler, Kobuk, Shungnak, and Kiana. There were no residents who had been diagnosed with mesothelioma from any of these villages dating back to 1970. There were no reported cases of lung cancer from Ambler, Kobuk, or Shungnak dating back to 1970. There were 5 reported cases of lung cancer, all from the village of Kiana. These 5 cases occurred from 1984 to 2003, and they included 4 different cell types of lung cancer.

- We reviewed computerized medical records in the RPMS medical record system. There were no residents of the 4 villages who ever had been diagnosed with any asbestos-related disease.

- We reviewed existing chest x-rays from 128 residents from the 4 villages who were 50 years and older – 28 of these residents were from Ambler. Because of the past epidemics of tuberculosis and other common pulmonary diseases, there were many abnormalities. An expert, certified nationally as a chest x-ray reader for asbestos-related disease, reviewed these x-rays on behalf of the Maniilaq Association and the Alaska Division of Public Health.
  - Of the 28 residents of Ambler whose chest x-rays were reviewed, 2 had pleural changes that were probably caused by prior exposure to asbestos.
  - Of the 100 residents of Kobuk, Shungnak, and Kiana whose chest x-rays were reviewed, 7 had pleural changes that might have been caused by prior exposure to asbestos.
  - The asbestos-related changes were in the form of pleural plaques, and their appearance suggests that they were due to asbestos exposure many years ago, possibly due to occupational exposure.

- After receiving the information from reading the chest x-rays, a medical epidemiologist from the Section of Epidemiology visited Maniilaq, reviewed all available medical records, and with the help of a local interpreter, interviewed the patients who were still living and who agreed to be interviewed.
  - Several of the residents described past employment working in mines.
  - Many of the residents worked in mining many years ago, and they were unable to provide detailed information that would enable specific characterization of exposure to asbestos.
  - Of the 9 people with pleural plaques suspicious for asbestos exposure, 1 recalled working in an asbestos mine, 1 worked with asbestos as a construction worker, 1 was repeatedly exposed to high levels of mine dust while washing her husband's clothing, 1 refused interview, 2 had other medical conditions not-related to asbestos that definitively explained the x-ray findings, and the results for the remaining 3 were inconclusive because they had non-asbestos related lung diseases but these diseases did not definitively account for the x-ray changes.
- There are no medical tests to determine the amount of asbestos a person has been exposed to during their lifetime.
- There are no medical tests that are uniquely specific to identifying asbestos-related disease, but general clinical tests of lung function and chest x-rays are used to diagnose the disease and its impact. It is particularly difficult to identify mild cases.
- Persons who are exposed to asbestos have a greatly increased risk of developing asbestos-related disease if they smoke tobacco.

Asbestos Deposits in the Kobuk River Area

- Asbestos has been documented to be naturally present in the Kobuk valley for at least one century, and archaeologists have evidence that asbestos has been used by Alaska Natives for hundreds of years.

- Twelve asbestos deposits have been identified in the Ambler/Shungnak/Kobuk area.
- Asbestos mining occurred near Shungnak in the 1940s. Approximately 45 tons of tremolite asbestos was mined from Asbestos Mountain near the head of Dahl Creek in the 1940s.
- Approximately one ton of chrysotile asbestos was removed near Dahl Creek in 1945.
- Limited development of asbestos deposits on Bismark Mountain, Jade Mountain, and Cosmos Creek also occurred in the 1940s.
- Local Alaska Natives were employed to mine and develop these asbestos deposits in the 1940s.

Environmental Sampling Near Ambler

Since the discovery of naturally occurring asbestos in the Ambler gravel pit during the fall of 2003, several sampling efforts have occurred (Table 1). Gravel from the Ambler gravel pit has been used throughout Ambler for roads, housing and building pads, and the airport runway for 30 to 40 years.

- The unprocessed soil from the easternmost portion of the gravel pit contains trace amounts of asbestos (<1%). The sieved processed soil remaining in the gravel pit contains 5% to 10% asbestos. Pure chysotile asbestos has also been identified in the gravel pit.
- Chrysotile asbestos has been detected in air samples within the school at 0.01 fibers/cubic centimeter. For comparison, the OSHA standard based on an 8-hour time weighted average is 0.1 fibers/cubic centimeter.
- Asbestos concentrations ranged from trace amounts (<1%) to 5% in samples of gravel used for construction that came from the Ambler gravel pit.
- Chrysotile asbestos was found in soil used to cover the gravel at the new Ambler school, although in very low levels.
- Asbestos was not detected in three ambient air samples collected last year near the road in Ambler.
- In an effort to locate a new, asbestos-free gravel pit site, the Alaska Department of Transportation and Public Facilities investigated 7 candidate material sites adjacent to the Ambler and Kobuk Rivers over an approximately 10 mile area. Of the 40 soil samples collected from the proposed new material site, 17 contained trace amounts (<1%) of asbestos. Of the 30 samples collected from the other 6 candidate sites, 12 samples contained trace amounts to 1% asbestos.

Planned Construction Activities

- Several major construction projects important to the village have been on hold until the extent of asbestos could be determined and its significance assessed:
  - Runway repairs at the airport
  - New sewage lagoon
  - New washeteria with underground piping to the new sewage lagoon

- The Alaska Native Tribal Health Consortium (ANTHC) engineers are proceeding with construction planning, including provisions to protect workers from asbestos exposure in accordance with Occupational Safety and Health Administration (OSHA) requirements.

- Based upon the characteristics of the planned construction projects, ANTHC believes that all of the construction projects can be accomplished within OSHA standards for worker protection.

Summary and Public Health Recommendations

- Additional public health medical record and chest x-ray reviews will be needed, but they will not provide much additional information to assist in deciding on construction this summer.
- There would be minimal increase in risk to residents from marginal exposure to asbestos as a result of any of the proposed construction activities if they were to proceed this summer. The asbestos that is present has been present for decades, and now that it is known to be present, construction projects can take precautions to minimize airborne dust and worker exposure can be controlled to OSHA standards.
- Deferring the construction projects carries risks to the community. The community needs to have a sound airport runway, a functioning sewage lagoon, and a working water and sewer system.
- With use of personal air monitors, worker safety and health can be protected if the proposed construction proceeds.
- Ambient air monitoring during construction will enable monitoring of community exposures.
- Additional soil testing in Ambler is essential to determine if asbestos is present other than from past use of gravel from the Ambler gravel pit.
- Soil testing in Kobuk, Shungnak, and Kiana should be done to determine if asbestos is present in the villages.
- Given the long history of use of gravel from the gravel pit, it is unlikely that Ambler will ever be asbestos-free in the future. However, the low concentrations of asbestos to which the residents will be exposed are unlikely to pose a significant threat to the public's health. The Alaska Division of Public Health will continue to assist the community to assess the extent of past, present, and future health hazards and, if necessary, develop practical risk management approaches.

Table 1. Recent Sampling for Asbestos in the Ambler area.

Agency	Year	Sample location	Number of samples	Amount of asbestos
Alaska Department of Transportation and Public Facilities	2003	Ambler gravel pit	3	1 to 10%
Department of Labor and Workforce Development	2003	Under school-original soil	2	not detected
		Near school from gravel originating from the gravel pit	3	< 1%
		Gravel pit	2	<1%
		Gravel pit	1	pure chrysotile mineral
		Wipe samples inside of school	3	asbestos detected
		Air sample	1	0.01 fibers/cc
NANA (prepared by Stevens Exploration Management Corp.)	2004	Ambler gravel pit	visual examination of screened reject	5 to 10 % asbestos
		Gravel pit-easternmost portion	3	<1%
Alaska Native Tribal Health Consortium	2004	Lagoon test hole	2 composite	not detected
		Sand/gravel from the Redstone Ave stockpile,WTP and washeteria pad, and lift station	3	0.75% to 5%
		WTP and washeteria pad	1 composite	1.7%
		Ambler borrow pit	1 composite	1.46%
Alaska Department of Environmental Conservation	2004	Air samples collected July and August for Total Suspended Particulates (TSP)	The 3 filters with the highest TSP	not detected
		Soil sample from the school yard	1	asbestos detected
Alaska Department of Transportation and Public Facilities	2005	Seven material sites were investigated	Proposed site-40 samples	17/40 samples-asbestos detected at <1%
			Six other sites-five samples each	12/30 samples-asbestos detected <1% to 1%

NORTHWEST ARCTIC BOROUGH ASSEMBLY
RESOLUTION 12-05

A RESOLUTION OF THE NORTHWEST ARCTIC BOROUGH ASSEMBLY SUPPORTING THE EXTRACTION AND USE OF GRAVEL WITH LOW LEVELS OF NATURALLY OCCURRING ASBESTOS AND FOR RELATED PURPOSES

WHEREAS: many gravel sources—particularly in the Ambler region—of the Northwest Arctic Borough contain low levels of naturally occurring asbestos (NOA); and

WHEREAS: the presence of NOA has prevented a significant number of gravel sources from being developed, and in turn prevented many construction and community projects from being undertaken; and

WHEREAS: the City of Ambler stated an urgent need for gravel to repair eroding beaches, the airport runway; and community homes; and

WHEREAS: without using gravel containing low levels of NOA potentially available through sale from NANA Regional Corporation, the City of Ambler cannot otherwise undertake these repair projects without affordable gravel sources; and

WHEREAS: a recent study indicates that careful use and appropriate control strategies can minimize the risk that low amounts of NOA in gravel and aggregate sources present during extraction and use; and

WHEREAS: House Bill 258 is being considered by the Alaska Legislature to allow for the use of gravel and aggregate containing low levels of NOA by implementing standards and operating procedures for use and extraction; and

WHEREAS: the Borough desires to support the use of gravel containing low levels of NOA in a safe and responsible manner.

NOW THEREFORE BE IT RESOLVED, by the Northwest Arctic Borough Assembly:

1. The Borough supports the passage of HB 258 to facilitate the use of gravel or aggregate containing low levels of naturally occurring asbestos; and

2. The Borough supports NANA and City of Ambler's extraction and use of gravel containing low levels of naturally occurring asbestos.

PASSED AND ADOPTED THIS 28th DAY OF FEBRUARY, 2012.

Walter G. Sampson, Assembly President

PASSED AND APPROVED THIS 28th DAY OF FEBRUARY, 2012.

Siikauraq Martha Whiting, Mayor

ATTESTED THIS 28th DAY OF FEBRUARY, 2012.

Helena Hildreth, Borough Clerk **ATTEST:**

A RESOLUTION SUPPORTING SALE OF GRAVEL TO BE USED FOR AMBLER EMERGENCY AND BUILDING PROJECTS

WHEREAS, the City of Ambler is organized as a municipal corporation under the laws of the State of Alaska; and

WHEREAS, NANA Regional Corporation, Inc. (NANA) is organized pursuant to the Alaska Native Claims Settlement Act (ANCSA, P.L. 92-203); and

WHEREAS, beach erosion is an ongoing and urgent problem that is putting structures as well as community infrastructure at risk of eroding; and,

WHEREAS, the airport at Ambler is in urgent need of gravel to make it safer to land aircraft; and

WHEREAS, naturally occurring asbestos (NOA) has been found in the gravel at Ambler; and,

WHEREAS this naturally occurring asbestos (NOA) has held up projects that better the community needs for the past (however many) years; and,

WHEREAS, the City of Ambler recognizes that housing needs have not been met due to the gravel shortage; and,

WHEREAS, the City of Ambler recognizes the urgent need to have gravel supplied to upgrade the airport runway and other Ambler projects, and fully supports NANA'S sale of gravel containing NOA for community projects, and;

WHEREAS, if NANA sells gravel with NOA, standard operating procedures for the extraction, transportation, and placement of the gravel will be followed and in addition the airport runway will be paved; and

BE IT THEREFORE RESOLVED by the City Council of the City of Ambler that the City of Ambler supports NANA's sale of gravel containing NOA and understands that standard operating procedures will be used in the extraction, transportation, and placement of the gravel.

ADOPTED, this 15TH day of July, 2011, at a duly called meeting held in Ambler, Alaska by a vote of 4 for, 0 against, and 3 not voting.

Memorandum

TO: Senator Donald Olson
FROM: Susan Haymes, Legislative Analyst
DATE: March 21, 2012
RE: Naturally Occurring Asbestos and Immunity from Liability
LRS Report 12.257

You asked if laws governing the use of naturally occurring asbestos in California and Virginia provide for immunity from liability similar to the proposed language in SB 180 and HB 258.

The short answer to your question is no. Neither California nor Virginia have any provisions that create immunity from a civil action or a claim for civil damages based on the use of gravel and aggregate materials containing naturally occurring asbestos (NOA).

According to John Yeltman, Environmental Health Specialist, Fairfax County Health Department, the state of Virginia does not have a law that provides for liability immunity from claims relating to the use of gravel or other aggregate materials containing naturally occurring asbestos.[1] Mr. Yeltman notes that the potential exposure to naturally occurring asbestos is not a statewide issue, but exists primarily in Fairfax County. The county operates a NOA program which has established standards and requirements to control exposure to asbestos generated from construction activities. Soil and other materials containing asbestos can be used as fill as long as the recipient has been notified of the asbestos and the fill is capped with at least six inches of clean material. Mr. Yeltman explained that if the responsible party does not provide a warning and an asbestos-related injury or illness occurs, the party could be sued under Virginia law.

The California Air Resources Board (CARB) implemented regulations in that state, known as Airborne Toxic Control Measures, to minimize public exposure to NOA in rock and soil. The CARB established a 0.25 percent threshold for asbestos content. If the asbestos content is less than 0.25 percent, the material may be used for surfacing or any other use; if the material has greater than or equal to 0.25 percent, its use is restricted. Any person who sells, supplies, or offers for sale restricted material for non-surfacing applications must provide a written receipt containing a warning that it is unlawful to use the material for surfacing or any application in which the material would remain exposed (CA Code of Regulations, Title 17, Section 93106).[2]

We searched Lexis, the state of California's online statutes, and the National Conference of State Legislature's 50-State Bill Information Service for state laws and proposed legislation. We found no laws or proposed legislation that provide immunity from liability for persons supplying or using materials containing naturally occurring asbestos for asbestos-related claims.[3]

We hope this is helpful. If you have questions or need additional information, please let us know.

---

[1] Mr. Yeltman can be reached at 703.246.2541.

[2] More information on the California NOA program can be accessed at *www.arb.ca.gov/toxics/asbestos/reginfo.htm*.

[3] California laws can be accessed at *www.leginfo.ca.gov/calaw.html*, and state legislation can be accessed at the National Conference of State Legislature's 50-State Bill Information Service at *www.ncsl.org/issues-research.aspx?tabs=966,124,829*. California does allow immunity from liability to an owner of a building that has asbestos-containing construction materials, if the owner provides notice to employees and occupants of the buildings (Cal Health & Safety Code § 25915.5).

Subject: HB 258 (naturally occurring asbestos) - Immunity and Work

Brodie,

Per our discussion, we asked our immunity experts about worker's compensation, and it turns out that as worker's compensation is considered a benefit rather than a claim, it is typically NOT affected by immunity statutes. We are looking into this further with the specific immunity language in the bill in mind, but I wanted to let you know that this is our initial conclusion.

Department of Labor might also have some thoughts on worker's compensation from an administration and policy point of view.

Thanks!

CS FOR SENATE BILL NO. 180(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR OLSON

A BILL

FOR AN ACT ENTITLED

"An Act directing the Department of Transportation and Public Facilities to develop and implement standards and operating procedures, to evaluate site-specific use plans, and to designate project areas concerning gravel or other aggregate material containing naturally occurring asbestos; authorizing use on an interim basis of gravel or other aggregate material containing naturally occurring asbestos for certain transportation projects and public facilities; providing immunity for certain landowners, extractors, suppliers, transporters, and contractors for certain actions or claims arising in connection with the use of gravel or aggregate material containing naturally occurring asbestos in certain areas; requiring reporting of certain asbestos-related data to the Department of Transportation and Public Facilities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 09.65 is amended by adding a new section to read:

Sec. 09.65.245. Immunity for certain persons supplying or using gravel or other aggregate material; limitations on asbestos-related actions against defendants. (a) Except as provided in (b) of this section, a civil action or claim for damages or costs alleging a death, injury, illness, disability, property damage, or any other damages resulting from the use of gravel or other aggregate material that contains naturally occurring asbestos may not be brought against a defendant

(1) based on the ownership of land within an area designated by the Department of Transportation and Public Facilities under AS 44.42.400(b) or (c) from which gravel or other aggregate material is extracted that, when tested using a bulk method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass; or

(2) for an act or omission occurring in the course of extracting, supplying, transporting, or using gravel or other aggregate material containing naturally occurring asbestos within an area designated by the Department of Transportation and Public Facilities under AS 44.42.400(b) or (c) when the act or omission was in compliance with the requirements of AS 18.31.250, AS 44.42.410(a) and (d), and applicable regulations developed under AS 44.42.420.

(b) The immunity provided by this section does not apply to the state, but the immunity does apply to a state employee acting within the scope of employment or by a contractor employed by the state acting within the scope of the contract.

(c) In this section, "naturally occurring asbestos" has the meaning given in AS 44.42.430.

* **Sec. 2.** AS 18.31 is amended by adding new sections to read:

Article 2A. Naturally occurring asbestos.

Sec. 18.31.250. Use of materials containing naturally occurring asbestos. (a) A principal construction contractor or, in the absence of an identified principal construction contractor, person having legal authority for the design and construction of a project may qualify for immunity in a civil action under AS 09.65.245(a)(2) for the use of gravel or other aggregate material that, when tested using a bulk test method

prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass.

(b) To qualify for the immunity provided under AS 09.65.245(a)(2), before initiating a construction project not subject to AS 44.42.410(b) that is within an area designated by the Department of Transportation and Public Facilities under AS 44.42.400(b) or (c) and that will use gravel or other aggregate material that contains naturally occurring asbestos, the principal construction contractor or, in the absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project, shall prepare and submit to the Department of Transportation and Public Facilities specific project plans demonstrating compliance with the standards adopted by the department under AS 44.42.420 and the requirements of the site-specific use plan under AS 44.42.410. Before extraction of gravel or other aggregate material may begin, the plan must be approved and returned to the contractor by the department.

(c) To preserve the immunity provided under AS 09.65.245(a)(2), the principal construction contractor or, in the absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project, shall adhere to the site-specific use plan approved by the department and the monitoring and mitigation plan created by the department.

Sec. 18.31.260. Presence of naturally occurring asbestos. The state shall consider 0.25 percent by mass, the minimum detectable amount of asbestos under the California Air Resources Board Method 435, as the baseline for the presence of naturally occurring asbestos in gravel or other aggregate material.

* **Sec. 3.** AS 44.42 is amended by adding new sections to read:

Article 3A. Use of Materials Containing Naturally Occurring Asbestos.

Sec. 44.42.400. Administration and designated use areas. (a) The department shall designate a single employee who reports to the commissioner to oversee the duties assigned to the department in AS 44.42.400 - 44.42.430 and to serve as the point of contact for inquiries related to projects using gravel or other aggregate material containing naturally occurring asbestos.

(b) An area that includes land within a municipality or community may be designated by the department as an area in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related injuries only if the municipality or community requests that designation. A municipality or community may request to become an area designated by the department under this subsection by submitting an application to the department. The department may approve an application received under this subsection only after reviewing tests documenting the presence of naturally occurring asbestos in that area, analyzing the effect of the presence of naturally occurring asbestos on construction projects in the area, considering the availability of gravel or other aggregate material free from naturally occurring asbestos in the area, and soliciting public input from residents in the affected municipality or community. The department may require a municipality or community that applies to become a designated area to provide the department with tests documenting the presence of naturally occurring asbestos, information related to the effect of the presence of naturally occurring asbestos on construction projects in the area, information related to availability of gravel or other aggregate material free from naturally occurring asbestos, and other information relevant to the application. After designating an area after approval of an application under this subsection, the department shall notify, including through signage, potentially affected persons that the area has been designated as an area where immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries.

(c) In places that do not include a municipality or community, the department may designate an area in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related injuries. Before designating an area under this subsection, the department shall document the presence of naturally occurring asbestos in that area, analyze the effect of the presence of naturally occurring asbestos on construction projects in the area, consider the availability of gravel or other aggregate material free from naturally occurring asbestos in the area, and solicit public input from potentially affected persons. After designating an area under this subsection, the department shall notify, including

through signage, potentially affected persons that the area has been designated as an area where immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries.

(d) In this section, "community" means a place in the unorganized borough, in a borough, or in a unified municipality that is not incorporated as a municipality, that is not a reserve, and in which 25 or more individuals reside as a social unit.

Sec. 44.42.410. Site-specific use plan. (a) To qualify for the immunity provided under AS 09.65.245(a)(2), a contractor intending to use, within an area designated by the department under AS 44.42.400(b) or (c), gravel or other aggregate material that, when tested using a bulk test method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass, shall, after consulting with the owner of the land on which the gravel or other aggregate material containing naturally occurring asbestos will be placed, submit a site-specific use plan to the department that

(1) describes the manner in which the proposed use of gravel or other aggregate material that contains naturally occurring asbestos conforms to the standards adopted under AS 44.42.420(b);

(2) demonstrates how the proposed construction operation and maintenance practices comply with those that are required and those that are minimally acceptable, as described in AS 44.42.420(b)(5), and otherwise meet requirements of law applicable to the handling of compounds that contain asbestos;

(3) outlines the efforts that will be made, as a component of long-term maintenance on the completed project or facility, to ensure that human health and air quality are not compromised by the use of the gravel or other aggregate material that contains naturally occurring asbestos;

(4) describes how the gravel or other aggregate material to be used can be contained underneath the project or buried so that asbestos fibers cannot become airborne or otherwise transferred outside of the project area, except as provided in (5) and (6) of this subsection;

(5) if the requirements in (4) of this subsection are economically unreasonable, describes how the gravel or other aggregate material to be used will be

sealed, including chip sealing or mixing with asphalt, in order to prevent asbestos fibers from becoming airborne or otherwise transferred outside of the project area, except as provided in (6) of this subsection; and

(6) if the requirements under (4) and (5) of this subsection are economically unreasonable, describes how the gravel or other aggregate material will be used in order to prevent asbestos from becoming airborne or otherwise transferred outside of the project area, including how the gravel or other aggregate material will be used in order to prevent asbestos from becoming airborne because of vehicle traffic, road maintenance, or grading, if applicable.

(b) For a project that is a transportation facility, including a public highway, airport, or pipeline or railroad track bed, or a public work, as that term is defined in AS 35.95.100, for which the department is the principal construction contractor, and for which the department intends to use, within an area designated by the department under AS 44.42.400(b) or (c), gravel or other aggregate material that, when tested using a bulk testing method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass, the department shall develop a site-specific use plan that details the use of gravel or other aggregate material in the construction or maintenance of the transportation project or public facility in accordance with the requirements of (a) of this section and regulations developed under AS 44.42.420. The department may not begin extraction of the gravel or aggregate material containing naturally occurring asbestos until the site-specific use plan is approved and the monitoring and mitigation plan is completed by the department. The department shall adhere to the site-specific use and monitoring and mitigation plans.

(c) The department shall review each site-specific use plan and shall work toward approving or disapproving the plan, taking into consideration the construction season in the project location.

(d) The department may not approve a plan for construction with gravel or other aggregate material determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass unless

(1) the department determines that it is economically unreasonable to

undertake the construction project with gravel or other aggregate material free from naturally occurring asbestos; and

(2) the completed project will not use gravel or other aggregate material containing naturally occurring asbestos for a surface application.

(e) On developing or receiving a site-specific use plan that meets the requirements of (a) and (d) of this section and the regulations adopted under AS 44.42.420, the department, in consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Natural Resources, the Department of Law, and the Department of Labor and Workforce Development, shall develop a monitoring and mitigation plan for the project. If the site-specific use plan is approved, the monitoring and mitigation plan developed by the department shall be attached to the site-specific use plan. To qualify for the immunity provided in AS 09.65.245(a)(2), the person that has direct control over or responsibility for the monitoring or mitigation shall comply with the monitoring or mitigation plan developed by the department.

(f) On approval of a site-specific use plan, the department

(1) shall provide to the contractor a copy of the approved site-specific use plan that includes

(A) the monitoring and mitigation plan developed under (e) of this section;

(B) a requirement that all asbestos-related data collected by the contractor during or after construction be submitted to the department; and

(C) recommended methods for reducing exposure to airborne asbestos fibers;

(2) shall provide a copy of the site-specific use plan, including the monitoring and mitigation plan, to the mayor or manager of a municipality affected by the use of gravel or other aggregate material containing asbestos; and

(3) may provide to the contractor copies of the United States Occupational Safety and Health Administration, United States Mine Safety and Health Administration, and United States Environmental Protection Agency recommended practices for handling and use of gravel or other aggregate material containing

naturally occurring asbestos.

(g) Within 60 days after completing a project in accordance with a site-specific plan approved by the department, the person responsible for compliance with the site-specific use plan shall record in the recording district where the property is located a document that includes a description of the affected property, a reference to the most recent recorded conveyance of that property, and a notice indicating the presence of naturally occurring asbestos, and stating that subsequent interest holders may have legal obligations with respect to preventing the naturally occurring asbestos from becoming airborne or otherwise transferred outside of the project area. The person that records a document required under this section shall provide written notification to the department and the landowner that the document has been recorded.

(h) The person responsible for compliance with the site-specific use plan shall submit to the department the results of any monitoring or testing performed in accordance with the site-specific use plan and any mitigation measures undertaken.

Sec. 44.42.420. Regulations. (a) The department, after consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Natural Resources, the Department of Law, and the Department of Labor and Workforce Development, shall prescribe in regulation a bulk testing method for gravel or other aggregate material containing naturally occurring asbestos.

(b) The department, after consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Natural Resources, the Department of Law, and the Department of Labor and Workforce Development, may adopt regulations under AS 44.62 (Administrative Procedure Act) to implement AS 44.42.400 - 44.42.430, including regulations revising statewide standards on the use in the construction and maintenance of transportation projects and public facilities of gravel or aggregate material that, when tested using a bulk test method prescribed by the department by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass. The regulations adopted under this subsection must include

(1) procedures for completing site investigations and characterizations

of proposed projects, including the development and description of appropriate laboratory practices;

(2) procedures for reviewing design alternatives and preparing and evaluating appropriate comparative cost analyses that consider the use of gravel or other aggregate material that does not contain naturally occurring asbestos;

(3) procedures for evaluating human health concerns arising out of gravel or other aggregate material that contains naturally occurring asbestos and documentation of methods and means to be used during periods of handling of the gravel or other aggregate material to ensure compliance with appropriate workplace safety and air quality standards relating to the project and to ensure the health and safety of communities affected by construction projects that use gravel or other aggregate material containing naturally occurring asbestos;

(4) procedures for preparing designs and design specifications for facilities involving use of gravel or other aggregate material that contains naturally occurring asbestos;

(5) procedures for outlining construction operation and maintenance practices that are required and those that are minimally acceptable to meet requirements of law applicable to the handling of compounds that contain asbestos;

(6) procedures for processing, reviewing, and approving or disapproving site-specific use plans and area designation requests received under AS 44.42.400(b) in a uniform manner;

(7) guidelines to analyze the cost of a project;

(8) guidelines for determining whether the cost associated with the use of gravel or other aggregate material free from naturally occurring asbestos under AS 44.42.410(d) is economically unreasonable;

(9) guidelines for determining whether the cost associated with burying or sealing gravel or other aggregate material containing naturally occurring asbestos under AS 44.42.410(a)(2) and (3) is economically unreasonable;

(10) guidelines for establishing areas designated under AS 44.42.400(b) or (c) that take into account the effect on human health in and around the designated area and environmental factors affecting the transfer of asbestos fibers

within and outside of a designated area.

Sec. 44.42.430. Definitions. In AS 44.42.400 - 44.42.430,

(1) "contractor" means the principal construction contractor, or in absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project and includes the department;

(2) "naturally occurring asbestos" means chrysotile, amosite, crocidolite, fibrous tremolite, fibrous anthophyllite, and fibrous actinolite asbestos-containing material that has not been processed in an asbestos mill and that, when tested using a bulk method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM PROJECT AUTHORIZATION. (a) Notwithstanding AS 44.42.400(a) and (b), added by sec. 2 of this Act, the Department of Transportation and Public Facilities may, on a temporary basis, designate a limited number of areas in the state in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related injuries where an inability to complete construction projects has been demonstrated because of lack of gravel or other aggregate material free from naturally occurring asbestos. After designating an area on a temporary basis, the department shall notify, including through signage, potentially affected persons that the area has been designated as an area in which immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries. Notwithstanding AS 18.31.250, added by sec. 2 of this Act, the Department of Transportation and Public Facilities may approve a limited number of appropriate construction projects until the development and implementation of initial standards under AS 44.42.420, added by sec. 3 of this Act, for projects not subject to AS 44.42.410(b), if, under (b) of this section, the Department of Transportation and Public Facilities prepares and adopts interim standards and requires its contractors to prepare site-specific plans for the use of gravel or other aggregate material that, when tested using the bulk method prescribed in sec. 5 of this Act, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass in

transportation projects and public facilities. The department shall apply the standards developed under (b) of this section to a person described in AS 18.31.250 for a project that is not subject to AS 44.42.410(b).

(b) Notwithstanding AS 44.42.400(a) and (b), added by sec. 2 of this Act, the Department of Transportation and Public Facilities may, on a temporary basis, designate a limited number of areas in the state in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related injuries where an inability to complete construction projects has been demonstrated because of lack of gravel or other aggregate material free from naturally occurring asbestos. After designating an area on a temporary basis, the department shall notify, including through signage, potentially affected persons that the area has been designated as an area where immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries. Notwithstanding AS 44.42.410(b), added by sec. 3 of this Act, the Department of Transportation and Public Facilities may approve a limited number of appropriate transportation projects and public facilities until the development and implementation of initial standards under AS 44.42.420, added by sec. 3 of this Act, after consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Labor and Workforce Development, and appropriate federal agencies. The Department of Transportation and Public Facilities may prepare and adopt interim standards and operating procedures and may require of its contractors the preparation of site-specific plans for the use of gravel or other aggregate material that when tested using the bulk method prescribed in sec. 5 of this Act, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass.

(c) The authority granted by (a) and (b) of this section expires December 31, 2013.

* **Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM STANDARDS FOR APPLICATION OF ASBESTOS BULK TESTING. Until the Department of Transportation and Public Facilities adopts and prescribes a method of bulk testing under AS 44.42.420(a), added by sec. 3 of this Act, the department shall use California Air Resources Board Method 435, Determination of Asbestos Content of Serpentine Aggregate, adopted on June 6, 1991, as that standard has effect on the effective

date of this Act, as the basis for determining the asbestos content of a bulk sample or for interim use as authorized by sec. 4 of this Act.

* **Sec. 6.** This Act takes effect immediately under AS 01.10.070(c).

MEMORANDUM

Date: March 29, 2012

TO: Leg Legal

From: Cindy Smith

RE: SB 180 27-LS1219\E Naturally Occurring Asbestos

Please prepare a Senate Judiciary CS for SB 180, as follows:

1. Import the language of the House Finance version of this bill (HB 258, version G).

2. Eliminate all provisions providing immunity to the state (retain immunity provisions for landowners, contractors, etc.)

3. Add a provision that states that no site specific plan shall be approved by DOT using NOA greater than .25% for any surface application, and that any use of NOA gravel over .25% must include plans for capping or sealing the material.

CS FOR HOUSE BILL NO. 258(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered: 3/29/12
Referred: Rules

Sponsor(s): REPRESENTATIVES JOULE, Tammie Wilson

A BILL

FOR AN ACT ENTITLED

"An Act directing the Department of Transportation and Public Facilities to develop and implement standards and operating procedures, to evaluate site-specific use plans, and to designate project areas concerning gravel or other aggregate material containing naturally occurring asbestos; authorizing use on an interim basis of gravel or other aggregate material containing naturally occurring asbestos for certain transportation projects and public facilities; providing immunity for the state and for landowners, extractors, suppliers, transporters, and contractors for certain actions or claims arising in connection with the use of gravel or aggregate material containing naturally occurring asbestos in certain areas; requiring contractors to report certain asbestos-related data to the Department of Transportation and Public Facilities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS AND PURPOSE. (a) The legislature finds that

(1) gravel or similar aggregate material is constantly in demand for major construction and maintenance of state and local transportation projects and public facilities and for all types of construction by public and private entities;

(2) naturally occurring asbestos may be found in sources of gravel and similar aggregate material throughout the state;

(3) while airborne asbestos fibers are a significant threat to workplace safety and public health and are subject to close regulation by federal and state authorities under 42 U.S.C. 7401 - 7671q (Clean Air Act) and 15 U.S.C. 2601 - 2692 (Toxic Substances Control Act), use of materials containing naturally occurring asbestos in construction projects may be regulated by states;

(4) in communities that do not have sources of gravel or similar aggregate material that is free of naturally occurring asbestos, costs of construction are substantially increased because of the necessity of locating alternative sources of gravel or similar aggregate material and transporting that material to distant construction and maintenance sites; and

(5) a recent study suggests that, with careful use and close adherence to appropriate control strategies, state and local transportation projects and public facilities may be safely completed using sources of gravel or similar aggregate material that contains naturally occurring asbestos; the study recommends that the Department of Transportation and Public Facilities establish standards and operating procedures through a statewide process that will apply to the use of gravel and aggregate material that contains asbestos by the department and by any public or private entity.

(b) It is the purpose of this Act

(1) to authorize and direct the Department of Transportation and Public Facilities to develop, implement, and, as circumstances may require or indicate, modify standards and operating procedures to allow the use in the construction and maintenance of transportation projects and public facilities in certain areas of the state of gravel or aggregate material that contains naturally occurring asbestos, with the expectation that use of that

material in a manner that is consistent with those standards and procedures may avoid significant risk to human health and eliminate significantly higher costs of construction and maintenance of projects and facilities associated with using only construction material that is free of asbestos;

(2) to establish that a person that uses gravel that contains naturally occurring asbestos in certain areas of the state may prepare specific project plans that conform to the requirements of this Act and the department's standards and operating procedures; and

(3) to shield persons and the state, including its agencies, officers, and employees, under certain conditions, from liability based on exposure to naturally occurring asbestos.

(c) This Act creates a voluntary program in certain areas of the state and provides civil immunity for the use of gravel or other aggregate material that contains naturally occurring asbestos for contractors meeting the requirements of the program; nothing in this Act mandates a contractor to submit a site-specific plan or to adhere to the requirements of a plan approved by the department.

(d) Because neither the state nor the federal government has established a scale assigning a specific risk level to a corresponding amount of naturally occurring asbestos, this Act accepts 0.25 percent by mass, the minimum detectable amount of asbestos under the California Air Resources Board Method 435, as the baseline for the presence of naturally occurring asbestos in gravel or other aggregate material. Health risks resulting from asbestos exposure vary according to the level, type, and duration of exposure. While exposure to very small concentrations of asbestos may pose some health risk, there is not a practical way to prevent all exposure to asbestos for residents in close proximity to deposits that contain naturally occurring asbestos. The intent of this act is to establish a sensible analytical threshold for detection of naturally occurring asbestos in gravel or other aggregate material and to establish appropriate exceptions for the use of gravel or other aggregate material that contains naturally occurring asbestos for certain public facilities and transportation projects involving unusual circumstances, including projects in remote locations or in regions where gravel or other aggregate material free from naturally occurring asbestos is not reasonably available.

*** Sec. 2.** AS 09.65 is amended by adding a new section to read:

Sec. 09.65.245. Immunity for certain persons supplying or using gravel or other aggregate material; limitations on asbestos-related actions against defendants. (a) Notwithstanding AS 09.50.250, a civil action or claim for damages or costs alleging a death, injury, illness, disability, property damage, or any other damages resulting from the use of gravel or other aggregate material that contains naturally occurring asbestos may not be brought against a defendant, including a contractor meeting the requirements of the program or the state and its agencies, officers, and employees,

(1) based on the ownership of land within an area designated by the Department of Transportation and Public Facilities under AS 44.42.400(b) or (c) from which gravel or other aggregate material is extracted that, when tested using a bulk method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass; or

(2) for an act or omission occurring in the course of extracting, supplying, transporting, or using gravel or other aggregate material containing naturally occurring asbestos within an area designated by the Department of Transportation and Public Facilities under AS 44.42.400(b) or (c) when the act or omission was in compliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (d) and applicable regulations developed under AS 44.42.420.

(b) A civil action or claim based on noncompliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (e) and applicable regulations developed under AS 44.42.420 for damages or costs alleging an asbestos-related death, injury, illness, or disability or alleging asbestos-related property damage or any other asbestos-related damages may only be brought against a defendant that has direct control over or responsibility for compliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (e) and applicable regulations developed under AS 44.42.420.

(c) Notwithstanding AS 09.50.250, a civil action or claim for damages or costs alleging an asbestos-related death, injury, illness, or disability or alleging asbestos-

related property damage or any other asbestos-related damages may not be brought against any state agency or officer or employee of the state for an act or omission occurring in the course of designating a project area under AS 44.42.400(a) or (b), approving a site-specific use plan, or developing or approving a monitoring plan or a mitigation plan under AS 44.42.410.

(d) In this section, "naturally occurring asbestos" has the meaning given in AS 44.42.430.

*** Sec. 3.** AS 18.31 is amended by adding new sections to read:

Article 2A. Naturally occurring asbestos.

Sec. 18.31.250. Use of materials containing naturally occurring asbestos. (a) A principal construction contractor or, in the absence of an identified principal construction contractor, person having legal authority for the design and construction of a project may qualify for immunity in a civil action under AS 09.65.245(a)(2) for the use of gravel or other aggregate material that, when tested using a bulk test method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass.

(b) To qualify for the immunity provided under AS 09.65.245(a)(2), before initiating a construction project not subject to AS 44.42.410(b) that is within an area designated by the Department of Transportation and Public Facilities under AS 44.42.400(b) or (c) and that will use gravel or other aggregate material that contains naturally occurring asbestos, the principal construction contractor or, in the absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project, shall prepare and submit to the Department of Transportation and Public Facilities specific project plans demonstrating compliance with the standards adopted by the department under AS 44.42.420 and the requirements of the site-specific use plan under AS 44.42.410. Before extraction of gravel or other aggregate material may begin, the plan must be approved and returned to the contractor by the department.

(c) To preserve the immunity provided under AS 09.65.245(a)(2), the principal construction contractor or, in the absence of an identified principal

construction contractor, the person having legal authority for the design and construction of the project, shall adhere to the site-specific use plan approved by the department and the monitoring and mitigation plan created by the department.

Sec. 18.31.260. Presence of naturally occurring asbestos. The state shall consider 0.25 percent by mass, the minimum detectable amount of asbestos under the California Air Resources Board Method 435, as the baseline for the presence of naturally occurring asbestos in gravel or other aggregate material.

*** Sec. 4.** AS 44.42 is amended by adding new sections to read:

Article 3A. Use of Materials Containing Naturally Occurring Asbestos.

Sec. 44.42.400. Administration. (a) The department shall designate a single employee who reports to the commissioner to oversee the duties assigned to the department in AS 44.42.400 - 44.42.430 and to serve as the point of contact for inquiries related to projects using gravel or other aggregate material containing naturally occurring asbestos.

(b) An area that includes land within a municipality or community may be designated by the department as an area in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related injuries only if the municipality or community requests that designation. A municipality or community may request to become an area designated by the department under this subsection by submitting an application to the department. The department may approve an application received under this subsection only after reviewing tests documenting the presence of naturally occurring asbestos in that area, analyzing the effect of the presence of naturally occurring asbestos on construction projects in the area, considering the availability of gravel or other aggregate material free from naturally occurring asbestos in the area, and soliciting public input from residents in the affected municipality or community. The department may require a municipality or community that applies to become a designated area to provide the department with tests documenting the presence of naturally occurring asbestos, information related to the effect of the presence of naturally occurring asbestos on construction projects in the area, information related to availability of gravel or other aggregate material free from naturally occurring asbestos, and other information relevant to the application.

After designating an area after approval of an application under this subsection, the department shall notify, including through signage, potentially affected persons that the area has been designated as an area where immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries.

(c) In places that do not include a municipality or community, the department may designate an area in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related illness injuries. Before designating an area under this subsection, the department shall document the presence of naturally occurring asbestos in that area, analyze the effect of the presence of naturally occurring asbestos on construction projects in the area, consider the availability of gravel or other aggregate material free from naturally occurring asbestos in the area, and solicit public input from potentially affected persons. After designating an area under this subsection, the department shall notify, including through signage, potentially affected persons that the area has been designated as an area where immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries.

(d) In this section, "community" means a place in the unorganized borough, in a borough, or in a unified municipality that is not incorporated as a municipality, that is not a reserve, and in which 25 or more individuals reside as a social unit.

Sec. 44.42.410. Site-specific use plan. (a) To qualify for the immunity provided under AS 09.65.245(a)(2), a contractor intending to use, within an area designated by the department under AS 44.42.400(b) or (c), gravel or other aggregate material that, when tested using a bulk test method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass, shall, after consulting with the owner of the land on which the gravel or other aggregate material containing naturally occurring asbestos will be placed, submit a site-specific use plan to the department that

(1) describes the manner in which the proposed use of gravel or other aggregate material that contains naturally occurring asbestos conforms to the standards adopted under AS 44.42.420(b);

(2) demonstrates how the proposed construction operation and maintenance practices comply with those that are required and those that are minimally acceptable, as described in AS 44.42.420(b)(5), and otherwise meet requirements of law applicable to the handling of compounds that contain asbestos;

(3) outlines the efforts that will be made, as a component of long-term maintenance on the completed project or facility, to ensure that human health and air quality are not compromised by the use of the gravel or other aggregate material that contains naturally occurring asbestos;

(4) describes how the gravel or other aggregate material to be used can be contained underneath the project or buried so that asbestos fibers cannot become airborne or otherwise transferred outside of the project area, except as provided in (5) and (6) of this subsection;

(5) if the requirements in (4) of this subsection are economically unreasonable, describes how the gravel or other aggregate material to be used will be sealed, including chip sealing or mixing with asphalt, in order to prevent asbestos fibers from becoming airborne or otherwise transferred outside of the project area, except as provided in (6) of this subsection; and

(6) if the requirements under (4) and (5) of this subsection are economically unreasonable, describes how the gravel or other aggregate material will be used in order to prevent asbestos from becoming airborne or otherwise transferred outside of the project area, including how the gravel or other aggregate material will be used in order to prevent asbestos from becoming airborne because of vehicle traffic, road maintenance, or grading, if applicable.

(b) To qualify for and preserve the immunity provided under AS 09.65.245(a)(2), the department, in its operating procedures applicable to a project that is a transportation facility, including a public highway, airport, or pipeline or railroad track bed, or a public work, as that term is defined in AS 35.95.100, and for which the contractor intends to use, within an area designated by the department under AS 44.42.400(b) or (c), gravel or other aggregate material that, when tested using a bulk testing method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass,

shall require that

(1) the contractor submit a plan that details the use of gravel or other aggregate material in the construction or maintenance of the transportation project or public facility in accordance with the requirements of (a) of this section and regulations developed under AS 44.42.420;

(2) before the extraction of the gravel or aggregate material containing naturally occurring asbestos may begin, the plan be approved and returned to the contractor by the department;

(3) the contractor adhere to the monitoring, mitigation, and site-specific use plans.

(c) The department shall review each submitted site-specific use plan and shall work toward approving or disapproving the plan, taking into consideration the construction season in the project location.

(d) The department may not approve a plan for construction with gravel or other aggregate material determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass unless the department determines that it is economically unreasonable to undertake the construction project with gravel or other aggregate material free from naturally occurring asbestos.

(e) On receiving a plan that meets the requirements of (a) and (d) of this section and the regulations adopted under AS 44.42.420, the department, in consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Natural Resources, the Department of Law, and the Department of Labor and Workforce Development, shall develop a monitoring and mitigation plan for the project. If the site-specific use plan is approved, the monitoring and mitigation plan developed by the department shall be attached to the site-specific use plan. To qualify for the immunity provided in AS 09.65.245(a)(2), the party that has direct control over or responsibility for the monitoring or mitigation shall comply with the monitoring or mitigation plan developed by the department.

(f) On approval of a site-specific use plan, the department

(1) shall provide to the contractor a copy of the approved site-specific use plan that includes

(A) the monitoring and mitigation plan developed under (e) of this section;

(B) a requirement that all asbestos-related data collected by the contractor during or after construction be submitted to the department; and

(C) recommended methods for reducing exposure to airborne asbestos fibers;

(2) shall provide a copy of the site-specific use plan, including the monitoring and mitigation plan, to the mayor or manager of a municipality affected by the use of gravel or other aggregate material containing asbestos; and

(3) may provide to the contractor copies of the United States Occupational Safety and Health Administration, United States Mine Safety and Health Administration, and United States Environmental Protection Agency recommended practices for handling and use of gravel or other aggregate material containing naturally occurring asbestos.

(g) Within 60 days after completing a project in accordance with a site-specific plan approved by the department, the contractor shall record in the recording district where the property is located a document that includes a description of the affected property, a reference to the most recent recorded conveyance of that property, and a notice indicating the presence of naturally occurring asbestos, and stating that subsequent interest holders may have legal obligations with respect to preventing the naturally occurring asbestos from becoming airborne or otherwise transferred outside of the project area. The contractor shall provide written notification to the department and the landowner that the document has been recorded.

(h) The contractor shall submit to the department the results of any monitoring or testing performed in accordance with the site-specific use plan and any mitigation measures undertaken.

Sec. 44.42.420. Regulations. (a) The department, after consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Natural Resources, the Department of Law, and the Department of Labor and Workforce Development, shall prescribe in regulation a bulk testing method for gravel or other aggregate material containing naturally occurring

asbestos.

(b) The department, after consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Natural Resources, the Department of Law, and the Department of Labor and Workforce Development, may adopt regulations under AS 44.62 (Administrative Procedure Act) to implement AS 44.42.400 - 44.42.430, including regulations revising statewide standards on the use in the construction and maintenance of transportation projects and public facilities of gravel or aggregate material that, when tested using a bulk test method prescribed by the department by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass. The regulations adopted under this subsection must include

(1) procedures for completing site investigations and characterizations of proposed projects, including the development and description of appropriate laboratory practices;

(2) procedures for reviewing design alternatives and preparing and evaluating appropriate comparative cost analyses that consider the use of gravel or other aggregate material that does not contain naturally occurring asbestos;

(3) procedures for evaluating human health concerns arising out of gravel or other aggregate material that contains naturally occurring asbestos and documentation of methods and means to be used during periods of handling of the gravel or other aggregate material to ensure compliance with appropriate workplace safety and air quality standards relating to the project and to ensure the health and safety of communities affected by construction projects that use gravel or other aggregate material containing naturally occurring asbestos;

(4) procedures for preparing designs and design specifications for facilities involving use of gravel or other aggregate material that contains naturally occurring asbestos;

(5) procedures for outlining construction operation and maintenance practices that are required and those that are minimally acceptable to meet requirements of law applicable to the handling of compounds that contain asbestos;

(6) procedures for processing, reviewing, and approving or

disapproving site-specific use plans and area designation requests received under AS 44.42.400(b) in a uniform manner;

(7) guidelines to analyze the cost of a project;

(8) guidelines for determining whether the cost associated with the use of gravel or other aggregate material free from naturally occurring asbestos under AS 44.42.410(d) is economically unreasonable;

(9) guidelines for determining whether the cost associated with burying or sealing gravel or other aggregate material containing naturally occurring asbestos under AS 44.42.410(a)(2) and (3) is economically unreasonable;

(10) guidelines for establishing areas designated under AS 44.42.400(b) or (c) that take into account the effect on human health in and around the designated area and environmental factors affecting the transfer of asbestos fibers within and outside of a designated area.

Sec. 44.42.430. Definitions. In AS 44.42.400 - 44.42.430,

(1) "contractor" means the principal construction contractor, or in absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project;

(2) "naturally occurring asbestos" means chrysotile, amosite, crocidolite, fibrous tremolite, fibrous anthophyllite, and fibrous actinolite asbestos-containing material that has not been processed in an asbestos mill and that, when tested using a bulk method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass.

*** Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM PROJECT AUTHORIZATION. (a) Notwithstanding AS 44.42.400(a) and (b), added by sec. 3 of this Act, to ensure early application of the policy described in sec. 1 of this Act, the Department of Transportation and Public Facilities may, on a temporary basis, designate a limited number of areas in the state in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related injuries where an inability to complete construction projects has been demonstrated because of lack of gravel or

other aggregate material free from naturally occurring asbestos. After designating an area on a temporary basis, the department shall notify, including through signage, potentially affected persons that the area has been designated as an area in which immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries. Notwithstanding AS 18.31.250, added by sec. 3 of this Act, the Department of Transportation and Public Facilities may approve a limited number of appropriate construction projects until the development and implementation of initial standards under AS 44.42.420 and the administrative requirements of AS 44.42.400, added by sec. 4 of this Act, for projects not subject to AS 44.42.410(b), if, under (b) of this section, the Department of Transportation and Public Facilities prepares and adopts interim standards and requires its contractors to prepare site-specific plans for the use of gravel or other aggregate material that, when tested using the bulk method prescribed in sec. 6 of this Act, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass in transportation projects and public facilities. The department shall apply the standards developed under (b) of this section to a person described in AS 18.31.250 for a project that is not subject to AS 44.42.410(b).

(b) Notwithstanding AS 44.42.400(a) and (b), added by sec. 3 of this Act, to ensure early application of the policy described in sec. 1 of this Act, the Department of Transportation and Public Facilities may, on a temporary basis, designate a limited number of areas in the state in which certain landowners and contractors are granted immunity under AS 09.65.245(a) for causing asbestos-related injuries where an inability to complete construction projects has been demonstrated because of lack of gravel or other aggregate material free from naturally occurring asbestos. After designating an area on a temporary basis, the department shall notify, including through signage, potentially affected persons that the area has been designated as an area where immunity may be granted under AS 09.65.245(a) for certain landowners and contractors causing asbestos-related injuries. Notwithstanding AS 44.42.410(b), added by sec. 4 of this Act, the Department of Transportation and Public Facilities may approve a limited number of appropriate transportation projects and public facilities until the development and implementation of initial standards under AS 44.42.420 and the administrative requirements of AS 44.42.400, after consultation with the Department of Environmental Conservation, the Department of Health and Social Services, the Department of Labor and Workforce Development, and

appropriate federal agencies. The Department of Transportation and Public Facilities may prepare and adopt interim standards and operating procedures and may require of its contractors the preparation of site-specific plans for the use of gravel or other aggregate material that when tested using the bulk method prescribed in sec. 6 of this Act, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass.

(c) The authority granted by (a) and (b) of this section expires December 31, 2013.

* **Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM STANDARDS FOR APPLICATION OF ASBESTOS BULK TESTING. Until the Department of Transportation and Public Facilities adopts and prescribes a method of bulk testing under AS 44.42.420(a), added by sec. 4 of this Act, the department shall use California Air Resources Board Method 435, Determination of Asbestos Content of Serpentine Aggregate, adopted on June 6, 1991, as that standard has effect on the effective date of this Act, as the basis for determining the asbestos content of a bulk sample or for interim use as authorized by sec. 5 of this Act.

* **Sec. 7.** This Act takes effect immediately under AS 01.10.070(c).

CS FOR SENATE BILL NO. 180( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR OLSON

A BILL

FOR AN ACT ENTITLED

"An Act directing the Department of Transportation and Public Facilities to develop and implement standards and operating procedures, evaluate site-specific use plans, develop and maintain an information database that includes locations of gravel or other aggregate material that contains naturally occurring asbestos and gravel or other aggregate material free from naturally occurring asbestos, and suggests locations to stockpile gravel or other aggregate material free from naturally occurring asbestos, and transmit reports related to the use in the construction and maintenance of transportation projects and public facilities and in the construction of projects by public and private entities of gravel or aggregate material that contains naturally occurring asbestos, and authorizing use on an interim basis of that material for certain transportation projects and public facilities; providing immunity for the state and for landowners, extractors, suppliers, transporters, and contractors for certain actions or

claims arising in connection with the use of gravel or aggregate material containing naturally occurring asbestos; requiring contractors to report certain asbestos-related data to the Department of Transportation and Public Facilities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS AND PURPOSE. (a) The legislature finds that

(1) gravel or similar aggregate material is constantly in demand for major construction and maintenance of state and local transportation projects and public facilities and for all types of construction by public and private entities;

(2) naturally occurring asbestos may be found in sources of gravel and similar aggregate material throughout the state;

(3) while airborne asbestos fibers are a significant threat to workplace safety and public health and are subject to close regulation by federal and state authorities under 42 U.S.C. 7401 - 7671q (Clean Air Act) and 15 U.S.C. 2601 - 2692 (Toxic Substances Control Act), use of materials containing naturally occurring asbestos in construction projects may be regulated by states;

(4) in communities that do not have sources of gravel or similar aggregate material that is free of naturally occurring asbestos, costs of construction are substantially increased because of the necessity of locating alternative sources of gravel or similar aggregate material and transporting that material to distant construction and maintenance sites; and

(5) a recent study suggests that, with careful use and close adherence to appropriate control strategies, state and local transportation projects and public facilities may be safely completed using sources of gravel or similar aggregate material that contains naturally occurring asbestos; the study recommends that the Department of Transportation and Public Facilities establish standards and operating procedures through a statewide process that will apply to the use of gravel and aggregate material that contains asbestos by the

department and by any public or private entity.

(b) It is the purpose of this Act

(1) to authorize and direct the Department of Transportation and Public Facilities to develop, implement, and, as circumstances may require or indicate, modify standards and operating procedures to allow the use in the construction and maintenance of transportation projects and public facilities of gravel or aggregate material that contains naturally occurring asbestos, with the expectation that use of that material in a manner that is consistent with those standards and procedures may avoid significant risk to human health and eliminate significantly higher costs of construction and maintenance of projects and facilities associated with using only construction material that is free of asbestos;

(2) to establish that a person that uses gravel that contains naturally occurring asbestos may prepare specific project plans that conform to the requirements of this Act and the department's standards and operating procedures; and

(3) to shield persons and the state, including its agencies, officers, and employees, under certain conditions, from liability based on exposure to naturally occurring asbestos.

(c) This Act creates a voluntary program and provides civil immunity for the use of gravel or other aggregate material that contains naturally occurring asbestos for contractors meeting the requirements of the program; nothing in this Act mandates a contractor to submit a site-specific plan or to adhere to the requirements of a plan approved by the department.

(d) Because neither the state nor the federal government has established a scale assigning a specific risk level to a corresponding amount of naturally occurring asbestos, this Act accepts 0.25 percent by mass, the minimum detectable amount of asbestos under the California Air Resources Board Method 435, as the baseline for the presence of naturally occurring asbestos in gravel or other aggregate material. Health risks resulting from asbestos exposure vary according to the level, type, and duration of exposure. While exposure to very small concentrations of asbestos may pose some health risk, there is not a practical way to prevent all exposure to asbestos for residents in close proximity to deposits that contain naturally occurring asbestos. The intent of this act is to establish a sensible analytical threshold for detection of naturally occurring asbestos in gravel or other aggregate material and to establish appropriate exceptions for the use of gravel or other aggregate material that

contains naturally occurring asbestos for certain public facilities and transportation projects involving unusual circumstances, including projects in remote locations or in regions where gravel or other aggregate material free from naturally occurring asbestos is not reasonably available.

Ch 65 Actions, Immunities Defenses Burdens

*** Sec. 2.** AS 09.65 is amended by adding a new section to read:

Sec. 09.65.245. Immunity for certain persons supplying or using gravel or other aggregate material; limitations on asbestos-related actions against defendants. (a) Notwithstanding AS 09.50.250, a civil action or claim for damages or costs alleging a death, injury, illness, disability, property damage, or any other damages resulting from the use of gravel or other aggregate material that contains naturally occurring asbestos may not be brought against a defendant, including a ~~contractor meeting the requirements of the program or the state and its agencies,~~ officers, and employees,

(1) based on the ownership of land from which gravel or other aggregate material is extracted that, when tested using a bulk method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass; or

(2) for an act or omission occurring in the course of extracting, supplying, transporting, or using gravel or other aggregate material containing naturally occurring asbestos when the act or omission was in compliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (d) and applicable regulations developed under AS 44.42.420.

(b) A civil action or claim based on noncompliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (e) and applicable regulations developed under AS 44.42.420 for damages or costs alleging an asbestos-related death, injury, illness, or disability or alleging asbestos-related property damage or any other asbestos-related damages may only be brought against a defendant that has direct control over or responsibility for compliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (e) and applicable regulations developed under AS 44.42.420.

(c) Notwithstanding AS 09.50.250, a civil action or claim for damages or costs alleging an asbestos-related death, injury, illness, or disability or alleging asbestos-related property damage or any other asbestos-related damages may not be brought against any state agency or officer or employee of the state for an act or omission occurring in the course of approving a site-specific use plan or in the course of developing or approving a monitoring plan or a mitigation plan under AS 44.42.410.

(d) In this section,

(1) "asbestos" has the meaning given in AS 18.31.500;

(2) "naturally occurring asbestos" means asbestos-containing material that has not been processed in an asbestos mill.

*** Sec. 3.** AS 18.31 is amended by adding a new section to read: Ch 31 Asbestos

Article 2A. Use of materials containing naturally occurring asbestos.

Sec. 18.31.250. Use of materials containing naturally occurring asbestos. (a) A principal construction contractor or, in the absence of an identified principal construction contractor, person having legal authority for the design and construction of a project may qualify for immunity in a civil action under AS 09.65.245(a)(2) for the use of gravel or other aggregate material that, when tested using a bulk test method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass.

(b) To qualify for the immunity provided under AS 09.65.245(a)(2), before initiating a construction project not subject to AS 44.42.410(b) that will use gravel or other aggregate material that contains naturally occurring asbestos, the principal construction contractor or, in the absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project, shall prepare and submit to the Department of Transportation and Public Facilities specific project plans demonstrating compliance with the standards adopted by the department under AS 44.42.420 and the requirements of the site-specific use plan under AS 44.42.410. Before extraction of gravel or other aggregate material may begin, the plan must be approved and returned to the contractor by the department.

(c) To preserve the immunity provided under AS 09.65.245(a)(2), the

principal construction contractor or, in the absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project, shall adhere to the site-specific use plan approved by the department and the monitoring and mitigation plan created by the department.

*** Sec. 4.** AS 44.42 is amended by adding new sections to read:

Article 3A. Use of Materials Containing Naturally Occurring Asbestos. DOT an h. sites

Sec. 44.42.400. Administration. The department shall

(1) designate a single employee who reports to the commissioner to oversee the duties assigned to the department in AS 44.42.400 - 44.42.430 and to serve as the point of contact for inquiries related to projects using gravel or other aggregate material containing naturally occurring asbestos;

(2) coordinate with the Department of Natural Resources to establish and maintain a database of

(A) sites in the state for which the department has acquired or received information indicating that the sites contain naturally occurring asbestos;

(B) sources of gravel or other aggregate material that, according to information available to the department from reasonably reliable sources, are free from naturally occurring asbestos within reasonable proximity to known sites of naturally occurring asbestos;

(C) sources of gravel or other aggregate material for all known projects the state or a municipality intends to undertake within 25 miles of a community in the next five years where the state or municipality intends to use gravel or other aggregate material containing naturally occurring asbestos that, according to information available to the department from reasonably reliable sources, are free from naturally occurring asbestos; the database must include all sources of gravel or other aggregate material within 25 miles of the community;

(D) communities that have reported to the department that they do not have reasonable access to gravel or other aggregate material free from naturally occurring asbestos; and

(E) all data collected under the requirements of AS 44.42.410(f)(1)(B), by project;

(3) annually transmit to the commissioner and publish on the department's Internet website a report containing

(A) a listing of all current projects for which a plan has been submitted under AS 18.31.250 or AS 44.42.410(b);

(B) a listing of all known projects intended to be undertaken by the state or a municipality in the next five years where the state or municipality intends to use gravel or aggregate material containing naturally occurring asbestos;

(C) suggestions for potential locations to stockpile gravel or other aggregate material free from naturally occurring asbestos for use in future projects and an estimate of the cost of stockpiling that gravel; and

(D) suggestions for potential locations, in coordination with ongoing state and municipal construction projects, to stockpile gravel or other aggregate material free from naturally occurring asbestos for future projects and an estimate of the cost of stockpiling that gravel; and

(4) annually provide a report on the monitoring and mitigation data transmitted by contractors to the department under AS 44.42.410(h) and the results of site monitoring performed by the department to the Department of Environmental Conservation, the Department of Health and Social Services, and the Department of Labor and Workforce Development.

Sec. 44.42.410. Site-specific use plan. (a) To qualify for the immunity provided under AS 09.65.245(a)(2), a contractor intending to use gravel or other aggregate material that, when tested using a bulk test method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass shall, after consulting with the owner of the land on which the gravel or other aggregate material containing naturally occurring asbestos will be placed, shall submit a site-specific use plan to the department that

(1) describes the manner in which the proposed use of gravel or other

aggregate material that contains naturally occurring asbestos conforms to the standards adopted under AS 44.42.420(b);

(2) demonstrates how the proposed construction operation and maintenance practices comply with those that are required and those that are minimally acceptable, as described in AS 44.42.420(b)(5), and otherwise meet requirements of law applicable to the handling of compounds that contain asbestos;

(3) outlines the efforts that will be made, as a component of long-term maintenance on the completed project or facility, to ensure that human health and air quality are not compromised by the use of the gravel or other aggregate material that contains naturally occurring asbestos;

(4) describes how the gravel or other aggregate material to be used can be contained underneath the project or buried so that asbestos fibers cannot become airborne or otherwise transferred outside of the project area, except as provided in (5) and (6) of this subsection;

(5) if the requirements in (4) of this subsection are economically unreasonable, describes how the gravel or other aggregate material to be used will be sealed, including chip sealing or mixing with asphalt, in order to prevent asbestos fibers from becoming airborne or otherwise transferred outside of the project area, except as provided in (6) of this subsection; and

(6) if the requirements under (4) and (5) of this subsection are economically unreasonable, describes how the gravel or other aggregate material will be used in order to prevent asbestos from becoming airborne or otherwise transferred outside of the project area.

(b) To qualify for and preserve the immunity provided under AS 09.65.245(a)(2), the department, in its operating procedures applicable to a project that is a transportation facility, including a public highway, airport, or pipeline or railroad track bed, or a public work, as that term is defined in AS 35.95.100, and for which the contractor intends to use gravel or other aggregate material that, when tested using a bulk testing method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass, shall require that

(1) the contractor submit a plan that details the use of gravel or other aggregate material in the construction or maintenance of the transportation project or public facility in accordance with the requirements of (a) of this section and regulations developed under AS 44.42.420;

(2) before the extraction of the gravel or aggregate material containing naturally occurring asbestos may begin, the plan be approved and returned to the contractor by the department;

(3) the contractor adhere to the monitoring, mitigation, and site-specific use plans.

(c) The department shall review each submitted site-specific use plan and shall work toward approving or disapproving the plan, taking into consideration the construction season in the project location.

(d) The department may not approve a plan for construction with gravel or other aggregate material determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass unless the department determines that it is economically unreasonable to undertake the construction project with gravel or other aggregate material free from naturally occurring asbestos.

(e) On receiving a plan that meets the requirements of (a) and (d) of this section and the regulations adopted under AS 44.42.420, the department, in consultation with the Department of Environmental Conservation, the Department of Health and Social Services, and the Department of Labor and Workforce Development, shall develop a monitoring and mitigation plan for the project. If the site-specific use plan is approved, the monitoring and mitigation plan developed by the department shall be attached to the site-specific use plan. To qualify for the immunity provided in AS 09.65.245(a)(2), the party that has direct control over or responsibility for the monitoring or mitigation shall comply with the monitoring or mitigation plan developed by the department.

(f) On approval of a site-specific use plan, the department

(1) shall provide to the contractor a copy of the approved site-specific use plan that includes

(A) the monitoring and mitigation plan developed under (e) of

this section;

(B) a requirement that all asbestos-related data collected by the contractor during or after construction be submitted to the department; and

(C) recommended methods for reducing exposure to airborne asbestos fibers;

(2) shall provide a copy of the site-specific use plan, including the monitoring and mitigation plan, to the mayor or manager of a municipality affected by the use of gravel or other aggregate material containing asbestos; and

(3) may provide to the contractor copies of the United States Occupational Safety and Health Administration, United States Mine Safety and Health Administration, and United States Environmental Protection Agency recommended practices for handling and use of gravel or other aggregate material containing naturally occurring asbestos.

(g) Within 60 days after completing a project in accordance with a site-specific plan approved by the department, the contractor shall record in the recording district where the property is located a document that includes a description of the affected property, a reference to the most recent recorded conveyance of that property, and a notice indicating the presence of naturally occurring asbestos, and stating that subsequent interest holders may have legal obligations with respect to preventing the naturally occurring asbestos from becoming airborne or otherwise transferred. The contractor shall provide written notification to the department and the landowner that the document has been recorded.

(h) The contractor shall submit to the department the results of any monitoring or testing performed in accordance with the site-specific use plan and any mitigation measures undertaken.

Sec. 44.42.420. Regulations. (a) The department, after consultation with the Department of Environmental Conservation, Department of Health and Social Services, and Department of Labor and Workforce Development, shall prescribe in regulation a bulk testing method for gravel or other aggregate material containing naturally occurring asbestos.

(b) The department, after consultation with the Department of Environmental

Conservation, Department of Health and Social Services, and Department of Labor and Workforce Development, may adopt regulations under AS 44.62 (Administrative Procedure Act) to implement AS 44.42.400 - 44.42.430, including regulations revising statewide standards on the use in the construction and maintenance of transportation projects and public facilities of gravel or aggregate material that, when tested using a bulk test method prescribed by the department by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass. The regulations adopted under this subsection must include procedures for

(1) completing site investigations and characterizations of proposed projects, including the development and description of appropriate laboratory practices;

(2) reviewing design alternatives and preparing and evaluating appropriate comparative cost analyses that consider the use of gravel or other aggregate material that does not contain naturally occurring asbestos;

(3) evaluating human health concerns arising out of gravel or other aggregate material that contains naturally occurring asbestos and documentation of methods and means to be used during periods of handling of the gravel or other aggregate material to ensure compliance with appropriate workplace safety and air quality standards relating to the project;

(4) preparing designs and design specifications for facilities involving use of gravel or other aggregate material that contains naturally occurring asbestos;

(5) outlining construction operation and maintenance practices that are required and those that are minimally acceptable to meet requirements of law applicable to the handling of compounds that contain asbestos;

(6) processing, reviewing, and approving or disapproving site-specific use plans in a uniform manner.

Sec. 44.42.430. Definitions. In AS 44.42.400 - 44.42.430,

(1) "asbestos" has the meaning given in AS 18.31.500;

(2) "contractor" means the principal construction contractor, or in absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project;

(3) "naturally occurring asbestos" means asbestos-containing material that has not been processed in an asbestos mill.

*** Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM PROJECT AUTHORIZATION. (a) Notwithstanding AS 18.31.250, added by sec. 3 of this Act, to ensure early application of the policy described in sec. 1 of this Act to a limited number of appropriate construction projects until the development and implementation of initial standards under AS 44.42.420 and the administrative requirements of AS 44.42.400, added by sec. 4 of this Act, for projects not subject to AS 44.42.410(b), if, under (b) of this section, the Department of Transportation and Public Facilities prepares and adopts interim standards and requires its contractors to prepare site-specific plans for the use of gravel or other aggregate material that, when tested using the bulk method prescribed in sec. 6 of this Act, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass in transportation projects and public facilities, the department shall apply those standards to a person described in AS 18.31.250 for a project that is not subject to AS 44.42.410(b).

(b) Notwithstanding AS 44.42.410(b), added by sec. 4 of this Act, to ensure early application of the policy described in sec. 1 of this Act to a limited number of appropriate transportation projects and public facilities until the development and implementation of initial standards under AS 44.42.420 and the administrative requirements of AS 44.42.400, after consultation with the Department of Environmental Conservation, Department of Health and Social Services, Department of Labor and Workforce Development, and appropriate federal agencies, the Department of Transportation and Public Facilities may prepare and adopt interim standards and operating procedures and may require of its contractors the preparation of site-specific plans for the use of gravel or other aggregate material that when tested using the bulk method prescribed in sec. 6 of this Act, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass.

(c) The authority granted by (a) and (b) of this section expires December 31, 2013.

*** Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM STANDARDS FOR APPLICATION OF ASBESTOS BULK TESTING.

Until the Department of Transportation and Public Facilities adopts and prescribes a method of bulk testing under AS 44.42.420(a), added by sec. 4 of this Act, the department shall use California Air Resources Board Method 435, Determination of Asbestos Content of Serpentine Aggregate, adopted on June 6, 1991, as that standard has effect on the effective date of this Act, as the basis for determining the asbestos content of a bulk sample or for interim use as authorized by sec. 5 of this Act.

*** Sec. 7.** This Act takes effect immediately under AS 01.10.070(c).

Explanation of Changes to version D

- Page 3, lines 12-13
  - After the word "state", inserted "including its agencies, officers, and employees"
- Page 3, lines 19-23
  - On the recommendation of LAW, this language is added to establish why .25 percent NOA by mass is used.
- Page 3, line 31
  - After the word "state", inserted "and its agencies, officers, and employees"
- Page 4, lines 22-23
  - After the word "agency", inserted "or officer or employee of the state"
- Page 5, Line 19
  - Changed AS 09.65.245 to AS 09.65.245**(a)(2),** to separate the gravel pit landowner from the immunity provided to the contractor for adherence to the site-specific plan.
- Page 9, lines 15-22
  - Adds new section to direct DOT to approve or disapprove a submitted site-specific plan. Directs DOT to provide findings to support a determination that a project is "economically unreasonable".

- Page 9, line 23
    - Rewrites the section to:
        - Direct DOT to provide to the contractor a copy of the "approved" plan.
        - Remove the requirement that DOT provide copies of the recommended practices for handling NOA from OSHA, Mine Safety & Health Administration, and the EPA.

SB 180 Use of Naturally Occurring Asbestos
v.D Sectional Analysis

Affected Statutes:

- **AS 09.65 – Actions, Immunities, Defenses, & Duties**
- **AS 18.31 – Asbestos**
- **AS 44.42 – Dept. of DOT&PF**

Section	Statute	Change	Purpose or Effect
1	Uncodified Law	Adds new section	Legislative Findings and Purpose
2	AS 09.65	Adds new section	Creates immunity from civil action or claim for civil damages based on an alleged asbestos related death, injury, illness, disability, or property damage in specific circumstances to certain persons, the State, & state employees. Liability Immunity is provided to persons owning, extracting, supplying, transporting or using gravel or aggregate material containing NOA if the following apply: 1) Gravel or aggregate material contains equal to or greater 0.25 % NOA by mass; **and**

			2) The use of gravel was in compliance with DOT's SOP. If not in compliance, lawsuits can only be brought against those that have direct control or responsibility for the compliance requirements.
3	AS 18.31	Adds New section	Describes how a person may qualify for immunity under section 2 in construction projects that are **not** initiated or contracted for by DOT.
4	44.42.400	Adds 4 new sections	**44.42.400 Administration** 1. Designates a single employee to oversee this program 2. Directs DOT to establish & maintain an informational database on known sites of NOA. 3. Directs DOT to provide annual reports on the use of NOA in AK.
	44.42.410		**44.42.410(a) Site-specific use plan** States the requirements for a site-specific use plan submitted by a contractor intending to use NOA, including a requirement that the contractor **bury or seal** the NOA material if economically practicable. **44.42.410(b)** Directs DOT to require site-specific use plans for DOT projects using NOA material. **44.42.410(c)** Directs DOT to review submitted plans. **44.42.410(d)** DOT **cannot** approve site-specific plan unless it is economically unreasonable to undertake the project with NOA free material. **44.42.410(e)** Directs DOT, in consultation with DEC & DHSS to develop monitoring & mitigation plans and incorporate into the site-specific plan. **44.42.410(f)** Directs DOT to approve or disapprove a site-specific plan. Directs DOT to provide findings to support a determination that a project is economically

			unreasonable. **44.42.410(g)** Directs DOT to provide monitoring and mitigation plan and other safety info to contractors whose plan has been approved. Requires contractors submit all asbestos-related data to DOT. **44.42.410(h)** Requires a contractor, after completing a project, record notice in the recording district where the property is located indicating the presence of NOA material. **44.42.410(i)** Requires contractors to report any monitoring data collected to DOT.
	44.42.420		Directs DOT to establish standards and procedures for testing and use of NOA materials.
	44.42.430		Definitions.
5	Uncodified Law	Adds new section	**Interim Project Authorization** Authorizes certain limited projects to move forward with a site-specific plan approved by interim standards established by DOT&PF with consultation from DEC, DHSS, DLWF Interim Project Authorization ends December 31, 2012
6	Uncodified Law	Adds new section	**Interim Standards for Bulk Testing** Until DOTP&F adopts and prescribes a method of testing the department shall use California Air Resources Board Method 435
7		Effective Date	**Immediate**

CS FOR SENATE BILL NO. 180( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR OLSON

A BILL

FOR AN ACT ENTITLED

"An Act directing the Department of Transportation and Public Facilities to develop and implement standards and operating procedures, evaluate site-specific use plans, develop and maintain an information database that includes locations of gravel or other aggregate material that contains naturally occurring asbestos, gravel or other aggregate material free from naturally occurring asbestos, and suggests locations to stockpile gravel or other aggregate material free from naturally occurring asbestos, and transmit reports related to the use in the construction and maintenance of transportation projects and public facilities and in the construction of projects by public and private entities of gravel or aggregate material that contains naturally occurring asbestos, and authorizing use on an interim basis of that material for certain transportation projects and public facilities; providing immunity for the state and for landowners, extractors, suppliers, transporters, and contractors for certain actions or claims arising in connection with the

use of gravel or aggregate material containing naturally occurring asbestos; requiring contractors to report certain asbestos-related data to the Department of Transportation and Public Facilities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS AND PURPOSE. (a) The legislature finds that

(1) gravel or similar aggregate material is constantly in demand for major construction and maintenance of state and local transportation projects and public facilities and for all types of construction by public and private entities;

(2) naturally occurring asbestos may be found in sources of gravel and similar aggregate material throughout the state;

(3) while airborne asbestos fibers are a significant threat to workplace safety and public health and are subject to close regulation by federal and state authorities under 42 U.S.C. 7401 - 7671q (Clean Air Act) and 15 U.S.C. 2601 - 2692 (Toxic Substances Control Act), use of materials containing naturally occurring asbestos in construction projects may be regulated by states;

(4) in communities that do not have sources of gravel or similar aggregate material that is free of naturally occurring asbestos, costs of construction are substantially increased because of the necessity of locating alternative sources of gravel or similar aggregate material and transporting that material to distant construction and maintenance sites; and

(5) a recent study suggests that, with careful use and close adherence to appropriate control strategies, state and local transportation projects and public facilities may be safely completed using sources of gravel or similar aggregate material that contains naturally occurring asbestos; the study recommends that the Department of Transportation and Public Facilities establish standards and operating procedures through a statewide process that will apply to the use of gravel and aggregate material that contains asbestos by the department and by any public or private entity.

(b) It is the purpose of this Act

(1) to authorize and direct the Department of Transportation and Public Facilities to develop, implement, and, as circumstances may require or indicate, modify standards and operating procedures to allow the use in the construction and maintenance of transportation projects and public facilities of gravel or aggregate material that contains naturally occurring asbestos, with the expectation that use of that material in a manner that is consistent with those standards and procedures may avoid significant risk to human health and eliminate significantly higher costs of construction and maintenance of projects and facilities associated with using only construction material that is free of asbestos;

(2) to establish that a person that uses gravel that contains naturally occurring asbestos may prepare specific project plans that conform to the requirements of this Act and the department's standards and operating procedures; and

(3) to shield persons and the state, including its agencies, officers, and employees, under certain conditions, from liability based on exposure to naturally occurring asbestos.

(c) This Act creates a voluntary program and provides civil immunity for the use of gravel or other aggregate material that contains naturally occurring asbestos for contractors meeting the requirements of the program; nothing in this Act mandates a contractor to submit a site-specific plan or to adhere to the requirements of a plan approved by the department.

(d) Because neither the state nor the federal government has established a scale assigning a specific risk level to a corresponding amount of naturally occurring asbestos, this Act accepts 0.25 percent by mass, the smallest testable amount of asbestos under the California Air Resources Board Method 435, as the baseline for the presence of naturally occurring asbestos in gravel or other aggregate material.

*** Sec. 2.** AS 09.65 is amended by adding a new section to read:

Sec. 09.65.245. Immunity for certain persons supplying or using gravel or other aggregate material; limitations on asbestos-related actions against defendants. (a) Notwithstanding AS 09.50.250, a civil action or claim for damages or costs alleging a death, injury, illness, disability, property damage, or any other damages resulting from the use of gravel or other aggregate material that contains naturally occurring asbestos may not be brought against a defendant, including a contractor meeting the requirements of the program or the state and its agencies,

officers, and employees,

(1) based on the ownership of land from which gravel or other aggregate material is extracted that, when tested using a bulk method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass; or

(2) for an act or omission occurring in the course of extracting, supplying, transporting, or using gravel or other aggregate material containing naturally occurring asbestos when the act or omission was in compliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (d) and applicable regulations developed under AS 44.42.420.

(b) A civil action or claim based on noncompliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (e) and applicable regulations developed under AS 44.42.420 for damages or costs alleging an asbestos-related death, injury, illness, or disability or alleging asbestos-related property damage or any other asbestos-related damages may only be brought against a defendant that has direct control over or responsibility for compliance with the requirements of AS 18.31.250 or AS 44.42.410(b), as applicable, and AS 44.42.410(a) and (e) and applicable regulations developed under AS 44.42.420.

(c) Notwithstanding AS 09.50.250, a civil action or claim for damages or costs alleging an asbestos-related death, injury, illness, or disability or alleging asbestos-related property damage or any other asbestos-related damages may not be brought against any state agency or officer or employee of the state for an act or omission occurring in the course of approving a site-specific use plan or in the course of developing or approving a monitoring plan or a mitigation plan under AS 44.42.410.

(d) In this section,

(1) "asbestos" has the meaning given in AS 18.31.500;

(2) "naturally occurring asbestos" means asbestos-containing material that has not been processed in an asbestos mill.

*** Sec. 3.** AS 18.31 is amended by adding a new section to read:

Article 2A. Use of materials containing naturally occurring asbestos.

Sec. 18.31.250. Use of materials containing naturally occurring asbestos. (a) A principal construction contractor or, in the absence of an identified principal construction contractor, person having legal authority for the design and construction of a project may qualify for immunity in a civil action under AS 09.65.245(a)(2) for the use of gravel or other aggregate material that, when tested using a bulk test method prescribed by the Department of Transportation and Public Facilities by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass.

(b) To qualify for the immunity provided under AS 09.65.245, before initiating a construction project not subject to AS 44.42.410(b) that will use gravel or other aggregate material that contains naturally occurring asbestos, the principal construction contractor or, in the absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project, shall prepare and submit to the Department of Transportation and Public Facilities specific project plans demonstrating compliance with the standards adopted by the department under AS 44.42.420 and the requirements of the site-specific use plan under AS 44.42.410. Before extraction of gravel or other aggregate material may begin, the plan must be approved and returned to the contractor by the department.

(c) To preserve the immunity provided under AS 09.65.245(a)(2), the principal construction contractor or, in the absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project, shall adhere to the site-specific use plan approved by the department and the monitoring and mitigation plan created by the department.

*** Sec. 4.** AS 44.42 is amended by adding new sections to read:

Article 3A. Use of Materials Containing Naturally Occurring Asbestos.

Sec. 44.42.400. Administration. The department shall

(1) designate a single employee who reports to the commissioner to oversee the duties assigned to the department in AS 44.42.400 - 44.42.430 and to serve as the point of contact for inquiries related to projects using gravel or other aggregate material containing naturally occurring asbestos;

(2) establish and maintain a database of

(A) sites in the state for which the department has acquired or received information indicating that the sites contain naturally occurring asbestos;

(B) sources of gravel or other aggregate material that, according to information available to the department from reasonably reliable sources, are free from naturally occurring asbestos within reasonable proximity to known sites of naturally occurring asbestos;

(C) sources of gravel or other aggregate material for all known projects the state or a municipality intends to undertake within 25 miles of a community in the next five years where the state or municipality intends to use gravel or other aggregate material containing naturally occurring asbestos that, according to information available to the department from reasonably reliable sources, are free from naturally occurring asbestos; the database must include all sources of gravel or other aggregate material within 25 miles of the community;

(D) communities that have reported to the department that they do not have reasonable access to gravel or other aggregate material free from naturally occurring asbestos; and

(E) all data collected under the requirements of AS 44.42.410(g)(1)(B), by project;

(3) annually transmit to the commissioner and publish on the department's Internet website a report containing

(A) a listing of all current projects for which a plan has been submitted under AS 18.31.250 or AS 44.42.410(b);

(B) a listing of all known projects intended to be undertaken by the state or a municipality in the next five years where the state or municipality intends to use gravel or aggregate material containing naturally occurring asbestos;

(C) suggestions for potential locations to stockpile gravel or other aggregate material free from naturally occurring asbestos for use in future projects and an estimate of the cost of stockpiling that gravel; and

(D) suggestions for potential locations, in coordination with ongoing state and municipal construction projects, to stockpile gravel or other aggregate material free from naturally occurring asbestos for future projects and an estimate of the cost of stockpiling that gravel; and

(4) annually provide a report on the monitoring and mitigation data transmitted by contractors to the department under AS 44.42.410(i) and the results of site monitoring performed by the department to the Department of Environmental Conservation, the Department of Health and Social Services, and the Department of Labor and Workforce Development.

Sec. 44.42.410. Site-specific use plan. (a) To qualify for the immunity provided under AS 09.65.245(a)(2), a contractor intending to use gravel or other aggregate material that, when tested using a bulk test method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass shall, after consulting with the owner of the land on which the gravel containing naturally occurring asbestos will be placed, shall submit a site-specific use plan to the department that

(1) describes the manner in which the proposed use of gravel or other aggregate material that contains naturally occurring asbestos conforms to the standards adopted under AS 44.42.420(b);

(2) demonstrates how the proposed construction operation and maintenance practices comply with those that are required and those that are minimally acceptable, as described in AS 44.42.420(b)(5), and otherwise meet requirements of law applicable to the handling of compounds that contain asbestos;

(3) outlines the efforts that will be made, as a component of long-term maintenance on the completed project or facility, to ensure that human health and air quality are not compromised by the use of the gravel or other aggregate material that contains naturally occurring asbestos;

(4) describes how the gravel or other aggregate material to be used can be contained underneath the project or buried so that asbestos fibers cannot become airborne or otherwise transferred outside of the project area, except as provided in (5) and (6) of this subsection;

(5) if the requirements in (4) of this subsection are economically unreasonable, describes how the gravel or other aggregate material to be used will be sealed, including chip sealing or mixing with asphalt, in order to prevent asbestos fibers from becoming airborne or otherwise transferred outside of the project area, except as provided in (6) of this subsection; and

(6) if the requirements under (4) and (5) of this subsection are economically unreasonable, describes how the gravel or other aggregate material will be used in order to prevent asbestos from becoming airborne or otherwise transferred outside of the project area.

(b) To qualify for and preserve the immunity provided under AS 09.65.245(a)(2), the department, in its operating procedures applicable to a project that is a transportation facility, including a public highway, airport, or pipeline or railroad track bed, or a public work, as that term is defined in AS 35.95.100, and for which the contractor intends to use gravel or other aggregate material that, when tested using a bulk testing method prescribed by the department in regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass, shall require that

(1) the contractor submit a plan that details the use of gravel or other aggregate material in the construction or maintenance of the transportation project or public facility in accordance with the requirements of (a) of this section and regulations developed under AS 44.42.420;

(2) before the extraction of the gravel or aggregate material containing naturally occurring asbestos may begin, the plan be approved and returned to the contractor by the department;

(3) the contractor adhere to the monitoring, mitigation, and site-specific use plans.

(c) The department shall review each submitted site-specific use plan and shall work toward approving or disapproving the plan, taking into consideration the construction season in the project location.

(d) The department may not approve a plan for construction with gravel or other aggregate material determined to have a content equal to or greater than 0.25

percent of naturally occurring asbestos by mass unless the department determines that it is economically unreasonable to undertake the construction project with gravel or other aggregate material free from naturally occurring asbestos.

(e) On receiving a plan that meets the requirements of (a) and (d) of this section and the regulations adopted under AS 44.42.420, the department, in consultation with the Department of Environmental Conservation, the Department of Health and Social Services, and the Department of Labor and Workforce Development, shall develop a monitoring and mitigation plan for the project. If the site-specific use plan is approved, the monitoring and mitigation plan developed by the department shall be attached to the site-specific use plan. To qualify for the immunity provided in AS 09.65.245(a)(2), the party that has direct control over or responsibility for the monitoring or mitigation shall comply with the monitoring or mitigation plan developed by the department.

(f) The department shall approve or disapprove a site-specific plan. The department may require a contractor submitting a site-specific plan to provide additional information or test results before the department approves or disapproves a site-specific plan. If the department determines that it is economically unreasonable to undertake a construction project with gravel or aggregate material free from naturally occurring asbestos under (d) of this section or if the department determines that it is economically unreasonable to bury or seal the gravel or other aggregate material that contains naturally occurring asbestos under (a)(4) or (a)(5) of this section, the department shall make findings to support the determination.

(g) On approval of a site-specific use plan, the department

(1) shall provide to the contractor a copy of the approved site-specific use plan that includes

(A) the monitoring and mitigation plan developed under (e) of this section;

(B) a requirement that all asbestos-related data collected by the contractor during or after construction be submitted to the department;

(C) recommended methods for reducing exposure to airborne asbestos fibers; and

(2) shall provide a copy of the site-specific use plan, including the monitoring and mitigation plan, to the mayor or manager of a municipality affected by the use of gravel or other aggregate material containing asbestos.

(h) Within 60 days after completing a project in accordance with a site-specific plan approved by the department, the contractor shall record in the recording district where the property is located a document that includes a description of the affected property, a reference to the most recent recorded conveyance of that property, and a notice indicating the presence of naturally occurring asbestos, and stating that subsequent interest holders may have legal obligations with respect to preventing the naturally occurring asbestos from becoming airborne or otherwise transferred. The contractor shall provide written notification to the department and the landowner that the document has been recorded.

(i) The contractor shall submit to the department the results of any monitoring or testing performed in accordance with the site-specific use plan and any mitigation measures undertaken.

Sec. 44.42.420. Regulations. (a) The department, after consultation with the Department of Environmental Conservation, Department of Health and Social Services, and Department of Labor and Workforce Development, shall prescribe in regulation a bulk testing method for gravel or other aggregate material containing naturally occurring asbestos.

(b) The department, after consultation with the Department of Environmental Conservation, Department of Health and Social Services, and Department of Labor and Workforce Development, shall develop, implement, and revise statewide standards on the use in the construction and maintenance of transportation projects and public facilities of gravel or aggregate material that, when tested using a bulk test method prescribed by the department by regulation, is determined to have a content equal to or greater than 0.25 percent of naturally occurring asbestos by mass. The standards adopted under this subsection must include procedures for

(1) completing site investigations and characterizations of proposed projects, including the development and description of appropriate laboratory practices;

(2) reviewing design alternatives and preparing and evaluating appropriate comparative cost analyses that consider the use of gravel or other aggregate material that does not contain naturally occurring asbestos;

(3) evaluating human health concerns arising out of gravel or other aggregate material that contains naturally occurring asbestos and documentation of methods and means to be used during periods of handling of the gravel or other aggregate material to ensure compliance with appropriate workplace safety and air quality standards relating to the project;

(4) preparing designs and design specifications for facilities involving use of gravel or other aggregate material that contains naturally occurring asbestos;

(5) outlining construction operation and maintenance practices that are required and those that are minimally acceptable to meet requirements of law applicable to the handling of compounds that contain asbestos.

Sec. 44.42.430. Definitions. In AS 44.42.400 - 44.42.430,

(1) "asbestos" has the meaning given in AS 18.31.500;

(2) "contractor" means the principal construction contractor, or in absence of an identified principal construction contractor, the person having legal authority for the design and construction of the project;

(3) "naturally occurring asbestos" means asbestos-containing material that has not been processed in an asbestos mill.

*** Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM PROJECT AUTHORIZATION. (a) Notwithstanding AS 18.31.250, added by sec. 3 of this Act, to ensure early application of the policy described in sec. 1 of this Act to a limited number of appropriate construction projects until the development and implementation of initial standards under AS 44.42.420 and the administrative requirements of AS 44.42.400, added by sec. 4 of this Act, for projects not subject to AS 44.42.410(b), if, under (b) of this section, the Department of Transportation and Public Facilities prepares and adopts interim standards and requires its contractors to prepare site-specific plans for the use of gravel or other aggregate material that, when tested using the bulk method prescribed in sec. 6 of this Act, is determined to have a content equal to or greater than 0.25 percent

naturally occurring asbestos by mass in transportation projects and public facilities, the department shall apply those standards to a person described in AS 18.31.250 for a project that is not subject to AS 44.42.410(b).

(b) Notwithstanding AS 44.42.410(b), added by sec. 4 of this Act, to ensure early application of the policy described in sec. 1 of this Act to a limited number of appropriate transportation projects and public facilities until the development and implementation of initial standards under AS 44.42.420 and the administrative requirements of AS 44.42.400, after consultation with the Department of Environmental Conservation, Department of Health and Social Services, Department of Labor and Workforce Development, and appropriate federal agencies, the Department of Transportation and Public Facilities may prepare and adopt interim standards and operating procedures and may require of its contractors the preparation of site-specific plans for the use of gravel or other aggregate material that when tested using the bulk method prescribed in sec. 6 of this Act, is determined to have a content equal to or greater than 0.25 percent naturally occurring asbestos by mass.

(c) The authority granted by (a) and (b) of this section expires December 31, 2012.

*** Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTERIM STANDARDS FOR APPLICATION OF ASBESTOS BULK TESTING. Until the Department of Transportation and Public Facilities adopts and prescribes a method of bulk testing under AS 44.42.420(a), added by sec. 4 of this Act, the department shall use California Air Resources Board Method 435, Determination of Asbestos Content of Serpentine Aggregate, adopted on June 6, 1991, as that standard has effect on the effective date of this Act, as the basis for determining the asbestos content of a bulk sample or for interim use as authorized by sec. 5 of this Act.

*** Sec. 7.** This Act takes effect immediately under AS 01.10.070(c).

ALASKA STATE LEGISLATURE
HOUSE TRANSPORTATION STANDING COMMITTEE
March 30, 2010
1:05 p.m.

MEMBERS PRESENT

Representative Peggy Wilson, Chair
Representative Craig Johnson, Vice Chair
Representative Kyle Johansen
Representative Cathy Engstrom Munoz
Representative Tammie Wilson
Representative Max Gruenberg

WITNESS REGISTER

REPRESENTATIVE REGGIE JOULE
Alaska State Legislature
Juneau, Alaska
POSITION STATEMENT: Testified as prime sponsor of HB 333.

DEWEY HOFFMAN, Staff
Representative Reggie Joule
Alaska State Legislature
Juneau, Alaska.
POSITION STATEMENT: Testified on behalf of Representative Reggie Joule, the prime sponsor of HB 333.

CHRISTINE HESS, Staff
Representative Reggie Joule
Alaska State Legislature
Juneau, Alaska

POSITION STATEMENT: Testified on behalf of Representative Reggie Joule, the prime sponsor of HB 333.

LANCE MILLER, Vice-President, Resources
NANA Regional Corporation
Anchorage, Alaska
POSITION STATEMENT: Testified in support of HB 333.

MARY SIROKY, Legislative Liaison
Office of the Commissioner
Department of Transportation & Public Facilities (DOT&PF)
Juneau, Alaska
POSITION STATEMENT: Answered questions during the discussion of HB 333.

LORI VERBRUGGE, Toxicologist
Department of Health and Social Services
Anchorage, Alaska
POSITION STATEMENT: Answered questions during the discussion of HB 333.

WILDA LAUGHLIN
Special Assistant
Department of Health and Social Services (DH&SS)

Juneau, Alaska
POSITION STATEMENT: Answered questions during the discussion of HB 333.

MARIT CARLSON-VAN DORT, Legislative Liaison
Office of the Commissioner
Department of Environmental Conservation (DEC)
Anchorage, Alaska
POSITION STATEMENT: Answered questions during the discussion of HB 333.

ACTION NARRATIVE

1:05:02 PM

CHAIR PEGGY WILSON called the House Transportation Standing Committee meeting to order at 1:05 p.m. Representatives P. Wilson, Gruenberg, Petersen, and T. Wilson were present at the call to order. Representatives Munoz, Johnson, and Johansen arrived as the meeting was in progress.

HB 333-NATURALLY OCCURRING ASBESTOS IN GRAVEL

1:05:06 PM

CHAIR P. WILSON announced that the only order of business would be HOUSE BILL NO. 333, "An Act directing the Department of Transportation and Public Facilities to develop and implement standards and operating procedures allowing for the use in the construction and maintenance of transportation projects and public facilities and in the construction of projects by public and private entities of gravel or aggregate materials that contain naturally occurring asbestos, and authorizing use on an interim basis of those materials for certain transportation projects and public facilities; and relating to certain claims arising out of or in connection with the use of gravel or aggregate materials." [Before the committee was Version E.]

1:06:13 PM

REPRESENTATIVE T. WILSON moved to adopt the proposed committee substitute (CS) for HB 333, labeled 26-LS1248\S, Chenoweth, 3/16/10, as the work draft. There being no objection, Version S was before the committee.

1:06:50 PM

REPRESENTATIVE REGGIE JOULE, Alaska State Legislature, explained that HB 333 would authorize and regulate use of naturally occurring asbestos (NOA), which is due to minerals present in the soil and rocks. This has become problematic in Ambler since there are many projects that need aggregate material, such as the airport or sewage lagoon. He offered that he is working towards resolution of the issue. He introduced his staff, Dewey Hoffman, who is working on the issue of NOA, and asked him to provide more details on HB 333.

DEWEY HOFFMAN, Staff, Representative Reggie Joule, Alaska State Legislature, on behalf of the sponsor, Representative Reggie Joule provided an overview on the bill. He stated that HB 333 would put policies in place to mitigate the difficulties associated with construction in areas of the state with naturally occurring asbestos (NOA). He stated that NOA occurs in mineral deposits throughout Alaska and our state has large known deposits of ultramafic and serpentine mineral ore. These deposits often contain NOA, which is similar to the asbestos we are familiar with and that is known to cause fibrosis or malignancies of the lungs and other major organs. Asbestos is defined in the bill as gravel, rock, sand and similar materials that are determined to have a content of at least 0.25 percent asbestos by mass, setting the threshold for NOA at 0.25 percent.

MR. HOFFMAN said the Department of Transportation & Public Facilities (DOT&PF) hired Nortech, Inc. and the Institute of Northern Engineering, University of Alaska, Fairbanks, to research the issues and recommend solutions. He referred to a series of maps in members' packets which show mineral occurrences in Alaska that likely contain NOA. He also referred to pages 29-32 of the full report titled, Naturally Occurring Asbestos in Alaska and Experiences and Policy of Other States Regarding its Use. This report concludes that NOA can be used in most circumstances without harmful side effects so long as proper procedures are implemented and followed, he stated.

MR. HOFFMAN explained that there are documented cases of NOA being found in several areas of the state, including at a rock quarry in Juneau, along the Dalton Highway at material site 105, and in local gravel pits in Ambler. The NOA was discovered during routine soil testing and has delayed or halted, as in Ambler's case, construction projects for years. Current projects in Ambler that are affected include the Ambler Airport Runway Extension Project, construction of a new sewer lagoon and access road, and housing construction. Some experts believe

that over time more NOA will be documented, particularly in the very areas that are rich in minerals and likely to be developed. Some localities do not have gravel materials nearby that are free of NOA, yet several large projects will require the use of large amounts of gravel. How to handle NOA should be resolved before it becomes an issue during the actual preconstruction or construction process of one of these projects. He referred members to page 27 of the Nortech, Inc. report for more detailed information. He stated that the use of NOA is not currently regulated by the federal government and only a few states, such as Virginia and California have addressed it.

1:12:05 PM

MR. HOFFMAN reported that Virginia and California have been regulating NOA for many years and several other states are in the process of addressing the issue. California uses a threshold for asbestos concentration, below which the material is not considered NOA. Regulation controls are put into place for safety reasons if the material is above the established threshold. This bill has adopted a similar approach. He summarized that the purpose of the bill is to define the measures that must be developed and established in order to safely use gravel or materials containing NOA. After procedures and standards are adopted and a site-specific plan is approved for a construction project, HB 333 would protect the suppliers and users from liability so long as the plan is appropriately followed. The bill would remove the doubt and fear of liability associated with use of NOA, which would encourage suppliers and landowners to offer gravel for sale. This would ensure that work could safely proceed in Alaska while using gravel that has some NOA. This would also help keep construction costs down, he stated.

1:13:54 PM

CHAIR P. WILSON related her understanding that health problems are caused by direct contact with asbestos. She asked what causes the concern if the NOA is contained within the rock.

1:14:48 PM

CHRISTINE HESS, Staff, Representative Reggie Joule, Alaska State Legislature, explained that the biggest concern comes from all-terrain vehicles (ATVs) use, which substantially raises dust levels during the summer months. She explained that the Department of Environmental Conservation (DEC) and the

Department of Health and Social Services (DHSS) have conducted tests in Ambler to identify health issues. The DHSS chest X-ray monitoring only found several people with an indication in their lungs, but the health problems could be attributed to other factors such as smoking. The departments are discussing dust control measures to mitigate health risks.

1:16:30 PM

LANCE MILLER, Vice-President, Resources, NANA Regional Corporation testified in support of HB 333. He stated that currently there is and will continue to be a critical need for gravel for projects throughout Alaska and some gravel may contain asbestos. He recalled that Mr. Hoffman previously mentioned the issues that arose in the 70s on the Dalton Highway project and in 2005 with a Juneau gravel project. He mentioned a chronology of projects exist, but without some protocols in place for gravel containing trace amounts of NOA, many projects will come to a standstill with all the notoriety that asbestos has received nationwide. Asbestos comes from magnesium silicate minerals associated with ultramafic rocks. Interestingly, a lot of the mineral deposits that have formed are located near geologically dynamic area, where the ultramafic rocks have been brought up along the sea floor. Thus, it is not a random coincidence that mineral deposits contain magnesium-rick rocks that contain NOA minerals. In fact, many parts of the state from Juneau to the Arctic region contain mineral deposits and asbestos, but not necessarily at a level to cause any alarm. He referred specifically to the mountains behind Ambler, to Jade Mountain, which is comprised of serpentine. He remarked that the state gem is jade, which also comes from ultramafic rock. California's geology has similar problems to the ones encountered in Alaska's geology. The state rock of California is serpentine, which is the main asbestos bearing rock. California adopted regulations to address NOA, which are similar to the process reflected in HB 333. He commented that California has a record of being protective of health and the environment.

1:20:14 PM

MR. MILLER related that within the Ambler region about $10 million in projects are currently on hold. He offered his belief that not moving forward with projects, such as the planned sewer lagoon and water projects, would affect the health and safety of the residents of Ambler. Using the California standards, some sites in the Ambler area are asbestos free.

Adopting the standards in HB 333, which are basically the California standards, would allow projects to move forward and would provide protection so long as the standard operating procedures are adhered to by landowners and contractors.

1:21:14 PM

REPRESENTATIVE MUNOZ asked for examples of how California is mitigating their asbestos issues.

MR. MILLER offered his understanding that much of the mitigation has occurred by adopting methods of handling material, such as wearing respirators when crushing rock that contains NOA or wetting down the material. The mineral is fibrous and when dry will float in the air, but NOA has water-absorbing properties will not float in the air when wet. California has addressed NOA by developing specific procedures quarries or gravel pits to protect workers. In Alaska, such as at Stabler Point in Juneau, the material is contained within rock so crushing the rock can liberate the NOA. In other locations, such as in Ambler, the natural forces have crushed the rock and released the NOA into streams. Thus, the NOA is contained in gravel.

1:22:59 PM

REPRESENTATIVE PETERSEN referred to HB 333 and asked for the reference to any language that mandates masks be used to protect workers who may be exposed to NOA.

MR. MILLER explained the process for handling NOA would be developed as part of the standard operating procedures (SOP) that would be developed under the bill.

REPRESENTATIVE P. WILSON suggested that the procedures would likely be developed in regulation.

1:23:42 PM

REPRESENTATIVE MUNOZ asked whether "fear of asbestos in the air" would generally cause agencies to "shut down" a project and if such action would be undertaken by the Environmental Protection Agency (EPA).

MR. MILLER responded that usually a project would be shut down by the landowner since SOPs are not currently in place to protect the landowner from risk.

REPRESENTATIVE MUNOZ related her understanding that if the SOPs were in place the landowner would be afforded some legal protection.

MR. MILLER agreed that the SOPs would provide some immunity.

1:24:44 PM

MARY SIROKY, Legislative Liaison, Office of the Commissioner, Department of Transportation & Public Facilities (DOT&PF), explained that three agencies have been working to resolve the issues surrounding NOA in Ambler. The agencies have arrived at some short-term solutions. Thus, HB 333 will not be needed since the three agencies have agreed to develop the SOP for operations on state land. The three agencies, the Department of Transportation & Public Facilities (DOT&PF), Department of Health and Social Services (DH&SS), and Department of Environmental Conservation (DEC) have committed to work with Representative Joule to formulate an agreed upon plan for the projects in Ambler by June 1. The departments have committed to work during the legislative interim to develop the standard operating procedure (SOP) for other sites. She restated that by June 1, 2010, the DOT&PF will develop a plan, in conjunction with DH&SS and DEC, to address the Ambler project sites and during the rest of the year plans to develop the SOP for other state-owned sites. She stated that the departments will also develop recommendations for third-party sites. In response to Chair P. Wilson, she restated the department's goals to address NOA.

THIS NEVER HAPPENED

1:28:13 PM

REPRESENTATIVE P. WILSON asked for the DOT&PF to report to the committee next legislature.

MS. SIROKY agreed to do so.

1:28:34 PM

REPRESENTATIVE T. WILSON asked whether the departments' plans would also address the issue for private properties.

MS. SIROKY answered that she was unaware of any projects with delays due to NOA that are not state projects.

1:29:09 PM

REPRESENTATIVE JOHNSON asked for an indication of the past success rate for cooperation between the DOT&PF, DH&SS, and DEC.

MS. SIROKY related that most of the difficulties have surrounded procedures for third-party aspects of NOA. She related that the three departments have agreed that solutions can be found for state-owned properties.

1:30:07 PM

REPRESENTATIVE JOHNSON related he has not observed much inter-agency cooperation to give him optimism that June 1, 2010 is a realistic date. He said he is not certain that HB 333 is not needed.

MS. SIROKY, in response to Representative Johansen, stated that the Ambler issue has been "on the radar screen for about a year." She recalled the DOT&PF previously worked on NOA issues on the Dalton Highway in the 70s. This is the first issue in recent history that she could remember. In further response to Representative Johansen, she related that the interagency agreement between the three departments was reached yesterday.

1:31:21 PM

REPRESENTATIVE JOHANSEN asked to hear from the sponsor at some point.

MS. SIROKY, in response to Chair P. Wilson, with respect to NOA, offered her belief that the DEC has been involved for some time on the issues of NOA.

1:31:58 PM

REPRESENTATIVE T. WILSON asked whether the DOT&PF will be able to solve the issue without the $355,000 shown in the fiscal note

MS. SIROKY answered that since the departments have agreed they can resolve the issues without the bill, that the DOT&PF will not need the funding. She explained that the fiscal note assumed that certain accounting and regulation's projects would be needed. Under the current plan, the DOT&PF will not develop databases and regulations for third-party ownership. In further response to Representative T. Wilson, she explained that the state does not need to develop regulations to address methods the state will follow. The process that will be used is the

three commissioners will set mandates for their respective departments to implement.

1:33:31 PM

REPRESENTATIVE T. WILSON asked whether the DOT&PF will develop regulations for private parties.

MS. SIROKY related that under the agreement the departments reached, the DOT&PF will address the state-owned sites in Ambler. Secondly, the DOT&PF will develop policies and procedures for other state-owned sites, and finally, the DOT&PF will develop recommendations for other parties to proceed. In further response to Representative T. Wilson, she gave an example of third parties, such as a tribal organization who may wish to use naturally occurring asbestos (NOA) to build a road on tribal property. Additionally, she anticipated some municipalities may encounter similar issues. She pointed out that her expertise is not in asbestos and the EPA does not currently regulate NOA. The current federal regulations for asbestos are limited to worker safety. Thus, NOA, which becomes a fiber in the natural environment and poses a serious health threat poses a different situation than the normal issues encountered, such as during removal of asbestos insulation. She explained some difficulties in Alaska that are not present in California. In California, their roads connect so paving may be a solution to eliminate NOA issues. The problem is more complex in Alaska, with its remote areas and gravel roads or runways in villages.

1:35:38 PM

REPRESENTATIVE PETERSEN referred to the fiscal note analysis which estimated it would take a year and a half to complete the SOP. He asked how the departments would be able to accomplish the work by June 1, 2010.

MS. SIROKY answered that the fiscal note anticipated the development of regulations to address third parties would take time, as well as time necessary to identify the scope of institutional controls. The issue is very complicated, but when the NOA oversight is limited to state sites, the state can better monitor and track the management of NOA. In further response to Representative Petersen, she agreed that the departments believe they can find solutions to the issues at the Ambler airport. In response to Chair P. Wilson, she affirmed

DOT&PF is not aware of any sites other than state-owned entities in which projects have been halted.

CHAIR P. WILSON restated that the DOT&PF will work with the other agencies to develop policies and will come back to the legislature with suggestions for procedures when the NOA involves third parties.

MS. SIROKY agreed.

1:37:51 PM

REPRESENTATIVE JOHNSON asked whether the fiscal note could be zeroed out if the public portion was removed from HB 333 and the bill only applied to the state.

MS. SIROKY stated that she did not know for certain. However, she offered her belief that is the argument she is currently making on this issue. In further response to Representative Johnson, she said she thought that the fiscal note could be a zero fiscal note, but would need to re-read the bill to see if any other implications were in the bill that would necessitate additional funding.

1:39:39 PM

REPRESENTATIVE JOHNSON asked for the reason that the DOT&PF has not already addressed this issue if it is so easy to fix.

MS. SIROKY related that the DOT&PF has held "pointed conversations" on this topic with the other agencies. The departments found that when third parties were removed that they could reach agreement. The departments experienced the most difficulty over determining the "final regulator" for third parties. The main stumbling block surrounded who would ultimately regulate the NOA. Since the NOA issues at Ambler are limited to the state, the departments felt they could reach an agreement for the standard and the SOP. She offered her belief that once the SOP is in place, the departments can work through the issues to regulate third parties. In further response to Representative Johnson, she clarified that the "pointed conversations" were held with the "sister agencies."

1:41:57 PM

MS. SIROKY, in response to Representative Johnson, reiterated that the DOT&PF believes it can develop the methodology for

addressing the issue at Ambler and can develop SOPs for other state-owned sites.

MARIT CARLSON-VAN DORT, Legislative Liaison, Office of the Commissioner, on behalf of the Department of Environmental Conservation (DEC), agreed the department has held conversations with the bill sponsor, the DOT&PF, and the DH&SS. The three departments agreed to find interim solutions for the issues at Ambler. She further agreed that "it did get a little bit stickier" when the agencies discussed regulating third parties and where the authority would ultimately lie. She explained that DEC does not have authority over asbestos, although it does have authority over ambient air quality. The EPA does not regulate ambient air asbestos, but regulates asbestos in Title V, which is the asbestos related to demolition and the related human health issues. Thus, the problem surrounded who would develop the standards, whether the standards should be in statute or in regulation, and the role of the DH&SS in developing health standards for NOA. The DOT&PF responsibility would determine the material specifications and usage. During the legislative interim, the DEC, in conjunction with the other departments will review asbestos product usage, whether it can be used as fill or if a cap of clean material would be required. She maintained her belief that a solution for Ambler can be found and solutions could be arrived at during the legislative interim, which may also result in suggestions for statute changes to present to the legislature.

1:45:12 PM

MS. CARLSON-VAN DORT, in response to Representative T. Wilson, answered that the DEC wants to ensure that Ambler can complete its current project. Any additional project not currently slated will become part of the discussion during the legislature interim with respect to use of NOA materials. In further response to Representative T. Wilson, she responded that removing third parties from HB 333 does not resolve other issues, such as determining and setting the standard in regulation. Additionally, the DEC will review the 0.25 threshold identified in the bill to determine whether it is the appropriate standard.

1:46:38 PM

REPRESENTATIVE PETERSEN asked whether the DEC believes the standard is too high or too low or if the DEC has had time to consider the standard.

MS. CARLSON-VAN DORT stated that she did do not know at this time. The standard in HB 333 was modeled after the California standard. California caps and paves most of their roads, which removes the ambient air and dust issue. While communities in rural Alaska also have ambient NOA air and dust issues, paving is very expensive so other solutions must be found.

1:47:30 PM

LORI VERBRUGGE, Toxicologist, Department of Health and Social Services, stated she has been involved in Ambler issue since 2004 or 2005. She offered that the DH&SS is enthusiastic to work on these issues with the other departments.

1:48:42 PM

WILDA LAUGHLIN, Special Assistant, Department of Health and Social Services (DH&SS), offered her belief that the three departments can work together as Ms. Siroky outlined. In response to Representative T. Wilson, she related her understanding that this has primarily been an issue between the DOT&PF and the DEC. She stated that the DH&SS may need to weigh in on the health aspects and is willing to do so. She offered that the Division of Public Health is working to define the DH&SS's role with respect to NOA.

1:50:34 PM

CHAIR P. WILSON recalled some testing has been conducted in Ambler to find out if residents are experiencing health issues, primarily associated with their lungs.

MS. LAUGHLIN stated that Ms. Verbrugge is better able to assess that question. In response to Representative Johnson, she related that the commissioners are discussing the NOA issues.

REPRESENTATIVE JOHNSON stated he wanted to hear that the commitment is coming from the top level.

MS. LAUGHLIN stated she has briefed Commissioner Hogan.

MS. SIROKY related that Deputy Commissioner Frank Richards is supportive of the plan, as is Roger Healy, the Director of Statewide Design & Engineering Standards. In further response to Representative Johnson, she indicated that the NOA issue

falls under the responsibility of Mr. Richards. She offered to call Commissioner von Scheben for his approval.

MS. CARLSON-VAN DORT related recent conversations she held with Deputy Commissioner Dan Easton and Acting Director of the Division of Air Quality Alice Edwards. She further reported she held discussions last week with Commissioner Hartig and all three are supportive of the NOA agreement.

1:53:40 PM

CHAIR P. WILSON asked Ms. Verbrugge to report on investigations and decisions made with respect to NOA in Ambler.

MS. VERBRUGGE explained during the 2004-2005 period, some reports were made to the community. A medical epidemiologist reviewed charts and X-Rays to determine the extent of asbestos diseases, but the outcome was inconclusive. The epidemiologist did not find direct cause and effect for Mesothelioma, which is a type of lung disease directly linked to asbestos. The epidemiologist found some evidence of lung diseases was consistent with asbestos lung disease, but the final results were not definitive. Thus, the question is still open as to whether health effects in Ambler were due to contact with NOA. In 2005, the federal Agency for Toxic Substances and Disease Registry (ATSDR) collected samples and determined that the exposure by simply walking across the side of the road or along the street would constitute a health hazard for residents of Ambler. The DH&SS has not eliminated the potential for concerns in Ambler, she stated.

CHAIR P. WILSON, after first determining no one else wished to testify, closed public testimony on HB 333.

1:57:15 PM

REPRESENTATIVE JOULE stated that the people in the community of Ambler have pushed for a change. Mayor Morgan Johnson of Ambler has observed the capital projects languish in the community and has worked hard to find solutions to the project delays. In addition to the efforts taken by the DOT&PF, and DEC, the tribal health personnel in NANA, Manilaq, and the Alaska Native Tribal Health Consortium (ANTHC) have all worked together to attempt to move this issue forward.

REPRESENTATIVE JOULE remarked the tendency to "shoot the messengers," but this issue predates today's testifiers. He

said he thought that "we can get there." The appropriate department commitments have been made on the record and to him personally. First and foremost, this issue is about the health and safety of the citizens of Ambler. Further, this issue is about economic development in an area that would benefit from it. In 2003, this issue was initiated, but if a road to Nome is ever undertaken NOA regulations will need to be adopted. He offered his belief the agencies understand and recognize the issue and if this can be accomplished it will happen. He stated he would also appreciate it if the committee could move the bill forward.

REPRESENTATIVE JOULE, in response to Representative Johnson, answered that any liability to the state would be considered as part of the bill and be addressed in the SOP.

2:02:19 PM

REPRESENTATIVE MUNOZ moved to report the proposed committee substitute (CS) for HB 333 labeled, 26-LS1248\S, Chenoweth, 3/16/10, out of committee with individual recommendations and the accompanying fiscal notes. There being no objection, CSHB 333(TRA) was reported form the House Transportation Standing Committee.

2:03:19 PM

ADJOURNMENT

There being no further business before the committee, the House Transportation Standing Committee meeting was adjourned at 2:03 p.m.

CHRIS KENNEDY , Assistant Attorney General, testified on Sections 1 and 14 of SB 39. Those sections are identical to an amendment offered to similar legislation last year and were proposed by the Department of Education as part of the Administration's response to problems discovered by the Toksook Bay law suit. The law suit was filed against the state by 500 plaintiffs after an oil spill occurred on a former BIA school site. A permanent fuel pipe, installed by the BIA, gave way shortly after the school was transferred from BIA to state ownership. Historically, the state and REAAs have strict and joint liability for 100 percent of any damages from a spill of this kind, regardless of fault. Section 1 eliminates strict and joint liability for damages; however, the state and REAAs would continue to be liable under common law for negligence. Section 1 is aimed at the unique circumstance when the state inherits schools with potential latent problems. Section 14 defines the applicability of Section 1, and establishes that it only applies to future claims.

CHAIRMAN TAYLOR asked Mr. Kennedy if he supported those two provisions. MR. KENNEDY replied that he did.

.....

SENATOR PARNELL asked representatives of the Department of Law to describe the scope of the state's liability under SB 39. MR. KENNEDY explained the state will remain liable for its own negligence under common law, but only for the percent of damage it is responsible for. MS. SANSONE agreed and noted AS 46.03.822 (page 1, line 10) is the strict liability statute. She added a negligence action is more difficult to prove because one must establish the state's responsibilities and it would be subject to state discretionary immunity.

SENATOR PARNELL asked if the sovereign immunity principles would still apply. MS. SANSONE replied affirmatively.

CHAIRMAN TAYLOR asked for details about the Toksook Bay oil spill. MR. KENNEDY replied the fuel line that broke was about 30 years old. The state took ownership of the property about one year before the fuel line corroded. CHAIRMAN TAYLOR commented under most proposals currently before the Legislature, the statute of limitations would run out in 15 years so no one could be sued anyway.

MR. KENNEDY explained the title transfer process also complicated the lawsuit. The state settled and received some financial concessions from the federal government.

Senator John Coghill

Senate Judiciary Committee

Sponsor Statement SB 186
Sentencing/Probation/Mentally Ill

Senate Bill 186 provides important corrections to the state's guilty but mentally ill (GBMI) statutes, ensuring that they comply with the United States Supreme Court in *Apprendi v. New Jersey* and *Blakely v. Washington.* The bill provides a procedure for post-conviction findings of GBMI, and adopts a 10 day notice when any party intends to raise the issue. It clarifies that the jury must determine that a defendant is guilty but mentally ill, unless the right to a jury determination is waived by the defendant.

Other changes to the statute ensure that the provisions of the *Blakely* decision are applied to issues of burden of proof in various factors in homicide cases, and clarify when juries must make factual findings to forward to a judge for sentencing purposes.

The bill also clarifies that neither the prosecuting attorney nor the defendant can, without mutual agreement, change the terms of a Rule 11 plea agreement under the Rules of Criminal Procedure after it has been imposed, and that the court may not reduce a period of probation agreed to under a Rule 11 agreement without the consent of the prosecution.

Senate Bill 186 makes important changes to ensure that Alaska's criminal procedures comply with Supreme Court decisions, and that plea agreements made in good faith are upheld by the courts. The bill is supported by the Alaska Department of Law.

Senate Judiciary Committee

SENATE BILL 186
SECTIONAL ANALYSIS

Section 1 clarifies in statute that in order for a person to be found guilty but mentally ill (GBMI), the fact finder must determine by proof beyond a reasonable doubt that when the defendant committed the crime he or she was guilty but mentally ill. This change is required by the decisions of the United States Supreme Court in *Apprendi v. New Jersey* and *Blakely v. Washington*, holding that the Sixth Amendment right to a jury trial requires that a factual finding that would increase the statutory maximum penalty for an offense must be submitted to a jury and proven beyond a reasonable doubt.

The court of appeals has said that a person who is found guilty but mentally ill does not qualify for parole release, including mandatory parole, until the person no longer suffers from a mental disease or defect that causes the defendant to be dangerous to the public. Because a person who is found GBMI may not qualify for mandatory parole, the factual decisions addressing whether the defendant is GBMI must be submitted to a jury (unless the defendant waives this requirement) and proven beyond a reasonable doubt.

Section 2: Under current law the defense, the prosecution, or the court may raise the question after a guilty verdict, of whether the defendant is guilty but mentally ill. This is possible if the issue has not been raised in the trial. The procedure for addressing this issue needs to be changed to reflect the constitutional requirements articulated in *Apprendi* and *Blakely*. **Section 2** makes these changes. It also adopts a procedure for giving notice 10 days before trial if the party intends to raise the issue after trial.

Section 3 clarifies that the jury must determine whether the defendant is guilty but mentally ill, unless the right is waived by the defendant. The court then determines the sentence.

Section 4 is amended to recognize that current law has other provisions that require a different standard of proof in addition to those specified in the current statute.

Sections 5 and 6 add provisions to ensure that neither the prosecuting authority nor the defendant can, without mutual agreement, change the terms of a Rule 11, Alaska Rules of Criminal Procedure, agreement after it has been imposed. If a defendant, as part of a plea agreement under Rule 11, agrees to a particular period of probation the court may not, without the consent of the prosecution, reduce the period of probation. This has the effect of overruling the decision in *State v. Henry*, 240 P. 3d 846 (Alaska App. 2010). Judges, in sentencing a person who has violated a condition of probation, must still apply the *Chaney* criteria in deciding how much, if any, of the suspended period of incarceration should be imposed.

However, the court may not reduce the period of probation or the period of suspended time (less the time imposed for the probation violation) without the agreement of the prosecuting authority.

Section 7 amends the sentencing law for murder in the first degree to change the burden of proof that the defendant subjected the victim to substantial physical torture or that the defendant was a peace officer who used the officer's authority to facilitate the murder. The current statute provides for a clear and convincing burden on the prosecution. Under the *Apprendi* and *Blakely* decisions, the state must prove these factors beyond a reasonable doubt.

Section 8 clarifies in statute that a if a sentence is imposed on a defendant that would preclude the person from receiving good time, for example a person who has been convicted of the first degree murder of a peace officer, the jury (unless waived by the defendant) must determine the factual issue, in this example, that the victim was a peace officer, beyond a reasonable doubt. Additionally, if a court is sentencing a person who is subject to a presumptive range and the prosecution seeks to increase the range by proof of certain aggravating factors, the jury (unless waived) must determine the factual issue by proof beyond a reasonable doubt.

Section 9 includes guidance to the court in finding the aggravating factor that the defendant's conduct was the most serious in the definition of the offense. AS 12.55.155(c)(10). First, it provides that the jury must determine the facts supporting an allegation that the defendant's conduct was the must serious in the definition of the offense. Because finding a factor in aggravation allows the court to impose a higher term of imprisonment than the presumptive range, the finding by the jury (unless waived) is required by the *Apprendi/Blakely* decisions. After the jury makes this factual determination, the court then makes the legal decision that the factual decision justifies an increase in sentence because the conduct is the most serious in the definition of the offense. The crime of theft provides a good illustration of this. Theft in the second degree, a class C felony, prohibits a person from committing theft of property valued between $500 and $25,000. The maximum term for a class C felony is five years incarceration; the presumptive range is zero to two years for a first felony offense. If the jury finds that the defendant stole an amount close to $25,000, the court may then consider this conduct as the most serious in the definition of second degree theft.

Section 9 also codifies court decisions that clarify that once a factor in aggravation has been decided as required in *Apprendi/Blakely*, other factors in aggravation may be considered without a factual determination beyond a reasonable doubt by the jury. Once one factor in aggravation is decided, the judge may sentence a person up to the maximum term; thus additional factors do not raise the maximum term. *Reandeau v. State*, 265 P.3d 1045 (Alaska App. 2011).

Sections 20 and 11 are conforming to **Sections 5 and 6.**

Section 12 notes the indirect effect of **Section 8** on Rule 32.1, Alaska Rules of Criminal Procedure.

Sections 13 – 15 include applicability provisions, conditional effect of the court rule change, and the effective date, July 1, 2012.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB186
2012 LEGISLATIVE SESSION

Analysis

This bill requires that post-conviction determination of a defendant being "guilty but mentally ill" requires the party seeking this determination to give notice of this intention 10 days before the trial. This bill also requires that this determination be made by the original fact finder in the trial unless the defendant, with the concurrence of the prosecution, waives this requirement in writing. This bill specifies that the standard of proof to be applied in determining whether the defendant is guilty but mentally ill is a reasonable doubt standard.

The bill also limits the court's discretion to modify the term of probation or suspended incarceration following a certain plea agreement. This bill also permits a trial court to make legal determinations and factual findings on additional aggravating factors that enhance the penalty range on felony offenses.

Although provisions on this bill are subject to litigation, it is not anticipated that this bill will have significant fiscal impact. The Agency, therefore, submits a zero fiscal note.

Department of Law

(Revised 1/17/2012 OMB)

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 186
2012 LEGISLATIVE SESSION

Analysis

SB 186 makes several changes in criminal procedures in response to the decisions by the United States Supreme Court that factual issues that would increase the potential penalty for conviction of a crime must be decided by a jury (unless the defendant waives this right) by proof beyond a reasonable doubt. The bill also clarifies procedures for deciding certain factors in aggravation.

SB 186 also clarifies procedures for imposition of a sentence after a probation violation if the defendant has made certain agreements as part of a plea negotiation.

The fiscal impact to Department of Law is zero.

Subject: SB 186 - Senator Coghill's amendment re felony theft dollar amounts

Follow Up Flag: Follow up
Flag Status: Flagged

On Friday, the Senate Judiciary Committee considered proposed amendments to SB 186 from Senator Coghill that would raise the threshold value amount for a felony theft from $500 to $1500. (Currently, Theft 2 occurs when the value of the stolen item is between $500 and $25,000, and it is a Class C felony. If the value is less than $500, the theft is a misdemeanor.)

Senator Wielechowski asked whether the court system could extract information from its statistics to explain how many felony theft cases are charged, or how many felony convictions result, when the dollar value of the stolen item is below $1500 (or just slightly above $500). The court's statistics are kept by statute, and, unfortunately, they do not describe the value of the items at issue in a theft case. We can say how many charges are brought under a statute, and how many defendants were convicted under a statute, but our statistics do not describe factual details about the cases.

Please let me know if I can help with any other information.

MEMORANDUM February 15, 2012

SUBJECT: Proposed Amendment to AS 11.41.200(a); AS 11.81.900(b)

TO: Senator Hollis French
Attn: Cindy Smith

FROM: Doug Gardner
Director

I spoke with Cindy Smith in your office regarding the enclosed proposed amendment. While I discussed making changes to conform the amendment to other criminal statutes, I elected to provide the amendment as drafted, but enclose this memorandum to spot issues that may arise during hearings on the proposed amendment. It was my view that this was more helpful to you than trying to make some changes, and yet not necessarily fix some of the broader concerns raised by the amendment. My comments in the time available are as follows:

- Currently, the concept embodied in this amendment exists in principle in AS 11.41.230(a)(1)(C) (assault in the third degree). Another way to address the concerns raised in the amendment is to move the provision in AS 11.41.230(a)(1)(C), to assault in the second degree, with a different mental state, etc. A concern that may be raised with the proposed amendment is how the amendment relates to existing AS 11.41.230(a)(1)(C), or 11.41.230(a)(3).
- A serious concern is that not all of the injuries in the proposed amendment to AS 11.81.900(b) (serious bodily injury to a child), would qualify as serious physical injury as the term is currently defined in AS 11.81.900(b)(56). For example, a broken bone from an intentional shove of a child by a person over 18 of a person under 12 years of age, would classify as a class A felony assault. What if the broken bone was a bone in the foot, such as a toe? Many of the serious injuries listed in the proposed amendment are already clearly serious physical injuries as the term is already defined. The inconsistent results of establishing, as noted above, that any fracture of a bone is a serious bodily injury to a child, in contrast to dealing with each injury on a case-by-case basis, through expert testimony, will lead to potentially inapposite results. The general definition of serious physical injury arguably provides more fairness and equity in analyzing what constitutes serious physical injury, than the proposed list in the amending language.
- A disadvantage in this proposal is that because an element of the offense requires proof of a child's age, or proof of age and disability, this statute will render

unavailable the aggravator in AS 12.55.155(c)(5) (vulnerability due to age, disability, etc.). Is this intended? I note that this issue already exists for prosecution under the assault in the third degree statute noted above, but at the A felony level, the consequences are more significant in eliminating this aggravator.

- "...[O]n more than one occasion." Could this language be used in an argument that a defendant may only be charged once for multiple assaults, forcing the state back to existing assault charging theories? Clearly this language would need to be addressed.
- The amendment employs a new term "serious bodily injury" that is not used in the criminal code. This new term overlaps broadly with the term "serious physical injury" which is commonly used in the criminal code but also includes within its meaning conditions which may or may not normally be considered serious. Employing different definitions for broadly similar conditions is never wise. It is impossible to accurately predict how a court will rationalize different statutes imposing different penalties while employing these terms. To the extent there is overlap one can be certain that equal protection and due process issues may require the imposition of a lesser punishment when similar statutes punish the same conduct. In this regard, how this amendment interacts with AS 11.41.220 should be closely examined.
- The amendment uses an age of 12 years. The legislature has previously employed the age of 10 when creating special relationships or conditions to increase the severity of conduct in the assault statutes. For example, AS 11.41.220(a) provides:

> (a) A person commits the crime of assault in the third degree if that person
>
> (1) recklessly
>
> . . .
>
> **(C) while being 18 years of age or older**
>
> **(i) causes physical injury to a child under 10 years of age and the injury would cause a reasonable caregiver to seek medical attention from a health care professional in the form of diagnosis or treatment;**
>
> **(ii) causes physical injury to a child under 10 years of age on more than one occasion;**
>
> . . .
>
> **(3) while being 18 years of age or older, knowingly causes physical injury to a child under 16 years of age but at least 10 years of age and the injury reasonably requires medical treatment;**
>
> . . . .

Is there a particular reason for using the age of 12 instead of the age of 10 as the legislature has previously done?

- The legislature previously looked at the issues of assaults on children and proof of the injuries and enacted the provisions of AS 11.41.220(a) that are set out above. If this provision and our other assault statutes are no longer seen as sufficiently

criminalizing the conduct, might it be wise to use and expand upon this framework. For example, instead of focusing on whether an injury necessitates medical attention or treatment one could increase the level of the offense if it requires hospitalization or some other factor.

- When the legislature includes things that qualify as aggravating factors as elements in crimes, the prosecution is not permitted to use that aggravating factor to increase the term of imprisonment for the offense. The existence of an aggravating factor allows a court to increase the imprisonment up to maximum for that level of offense. Without an aggravating factor, a court must sentence an offender within the presumptive range for the offense, a term that is usually significantly less than the maximum. Increasing levels of offenses, for example from a C felony to a B felony, may not always result in an increase in punishment due to the loss of aggravating factors being used to increase punishment at sentencing.

AMENDMENT

OFFERED IN THE SENATE

TO: SB 186

Page 1, line 1, following "**Act**":

Insert "**relating to assault causing serious bodily injury to a child; relating to a definition of "serious bodily injury to a child";**"

Page 1, following line 6:

Insert new bill sections to read:

"*** Section 1.** AS 11.41.200(a) is amended to read:

(a) A person commits the crime of assault in the first degree if

(1) that person recklessly causes serious physical injury to another by means of a dangerous instrument;

(2) with intent to cause serious physical injury to another, the person causes serious physical injury to any person;

(3) the person knowingly engages in conduct that results in serious physical injury to another under circumstances manifesting extreme indifference to the value of human life; or

(4) that person recklessly causes serious physical injury to another by repeated assaults using a dangerous instrument, even if each assault individually does not cause serious physical injury**;**

(5) while being 18 years of age or older, that person

(A) intentionally causes serious bodily injury to a child under 12 years of age or to a child under 16 years of age who is mentally or physically impaired; or

(B) recklessly causes serious bodily injury on one or more

than one occasion to a child under 12 years of age or to a child under 16 years of age who is mentally or physically impaired.

*** Sec. 2.** AS 11.81.900(b) is amended by adding a new paragraph to read:

(65) "serious bodily injury to a child" includes second or third degree burns, a fracture of any bone, a concussion, strangulation, injuries to the skin that involve severe bruising or the likelihood of permanent or protracted disfigurement, including those sustained by striking children with objects, or other physical injury that results in significant physical injury to the child."

AMENDMENT

OFFERED IN THE SENATE BY SENATOR COGHILL

TO: SB 186

Page 1, line 1, following "**Act**":

Insert "**relating to property crimes;**"

Page 1, following line 6:

Insert new bill sections to read:

"* **Section 1.** AS 11.46.130(a) is amended to read:

(a) A person commits the crime of theft in the second degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$1,500** [$500] or more but less than $25,000;

(2) the property is a firearm or explosive;

(3) the property is taken from the person of another;

(4) the property is taken from a vessel and is vessel safety or survival equipment;

(5) the property is taken from an aircraft and the property is aircraft safety or survival equipment;

(6) the value of the property is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(A) an offense under AS 11.46.120, or an offense under another law or ordinance with similar elements;

(B) a crime set out in this subsection or an offense under another law or ordinance with similar elements;

(C) an offense under AS 11.46.140(a)(1), or an offense under another law or ordinance with similar elements; or

(D) an offense under AS 11.46.220(c)(1) or (c)(2)(A), or an offense under another law or ordinance with similar elements; or

(7) the property is an access device.

*** Sec. 2.** AS 11.46.140(a) is amended to read:

(a) A person commits the crime of theft in the third degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$250** [$50] or more but less than **$1,500** [$500]; **or**

(2) [REPEALED

(3)] the value of the property is less than **$250** [$50] and, within the past five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of theft or concealment of merchandise, or an offense under another law or ordinance with similar elements.

*** Sec. 3.** AS 11.46.150(a) is amended to read:

(a) A person commits the crime of theft in the fourth degree if the person commits theft as defined in AS 11.46.100 and the value of the property or services is less than **$250** [$50].

*** Sec. 4.** AS 11.46.220(c) is amended to read:

(c) Concealment of merchandise is

(1) a class C felony if

(A) the merchandise is a firearm;

(B) the value of the merchandise is **$1,500** [$500] or more; or

(C) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(i) the offense of concealment of merchandise under this paragraph or (2)(A) of this subsection, or an offense under another law or ordinance with similar elements; or

(ii) an offense under AS 11.46.120, 11.46.130, or 11.46.140(a)(1), or an offense under another law or ordinance with similar elements;

(2) a class A misdemeanor if

(A) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500]; or

(B) the value of the merchandise is less than **$250** [$50] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions of the offense of concealment of merchandise or theft in any degree, or an offense under another law or ordinance with similar elements;

(3) a class B misdemeanor if the value of the merchandise is less than **$250** [$50].

*** Sec. 5.** AS 11.46.260(b) is amended to read:

(b) Removal of identification marks is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

*** Sec. 6.** AS 11.46.270(b) is amended to read:

(b) Unlawful possession is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

* **Sec. 7.** AS 11.46.280(d) is amended to read:

(d) Issuing a bad check is

(1) a class B felony if the face amount of the check is $25,000 or more;

(2) a class C felony if the face amount of the check is **$1,500** [$500] or more but less than $25,000;

(3) a class A misdemeanor if the face amount of the check is **$250** [$50] or more but less than **$1,500** [$500];

(4) a class B misdemeanor if the face amount of the check is less than **$250** [$50].

* **Sec. 8.** AS 11.46.285(b) is amended to read:

(b) Fraudulent use of an access device is

(1) a class B felony if the value of the property or services obtained is $25,000 or more;

(2) a class C felony if the value of the property or services obtained is **$1,500** [$50] or more but less than $25,000;

(3) a class A misdemeanor if the value of the property or services obtained is less than **$1,500** [$50].

* **Sec. 9.** AS 11.46.295 is amended to read:

Sec. 11.46.295. Prior convictions. For purposes of considering prior convictions in prosecuting a crime of theft under AS 11.46.130(a)(6) or **11.46.140(a)(2)** [11.46.140(a)(3)], or in prosecuting the crime of concealment of merchandise under AS 11.46.220(c), a conviction for an offense under another law or ordinance with similar elements is a conviction of an offense having elements similar to those of an offense defined as such under Alaska law at the time the offense was committed. The court shall consider the date of a prior conviction as occurring on the date that sentence is imposed for the prior offense.

* **Sec. 10.** AS 11.46.360(a) is amended to read:

(a) A person commits the crime of vehicle theft in the first degree if, having no right to do so or any reasonable ground to believe the person has such a right, the person drives, tows away, or takes

(1) the car, truck, motorcycle, motor home, bus, aircraft, or watercraft

of another;

(2) the propelled vehicle of another and

(A) the vehicle or any other property of another is damaged in a total amount of **$1,500** [$500] or more;

(B) the owner incurs reasonable expenses as a result of the loss of use of the vehicle, in a total amount of **$1,500** [$500] or more; or

(C) the owner is deprived of the use of the vehicle for seven days or more;

(3) the propelled vehicle of another and the vehicle is marked as a police or emergency vehicle; or

(4) the propelled vehicle of another and, within the preceding seven years, the person was convicted under

(A) this section or AS 11.46.365;

(B) former AS 11.46.482(a)(4) or (5);

(C) former AS 11.46.484(a)(2);

(D) AS 11.46.120 - 11.46.140 of an offense involving the theft of a propelled vehicle; or

(E) a law or ordinance of this or another jurisdiction with elements substantially similar to those of an offense described in (A) - (D) of this paragraph.

*** Sec. 11.** AS 11.46.482(a) is amended to read:

(a) A person commits the crime of criminal mischief in the third degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with intent to damage property of another, the person damages property of another in an amount of **$1,500** [$500] or more;

(2) the person recklessly creates a risk of damage in an amount exceeding $100,000 to property of another by the use of widely dangerous means; or

(3) the person knowingly

(A) defaces, damages, or desecrates a cemetery or the contents of a cemetery or a tomb, grave, or memorial regardless of whether the tomb,

grave, or memorial is in a cemetery or whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected;

(B) removes human remains or associated burial artifacts from a cemetery, tomb, grave, or memorial regardless of whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected.

* **Sec. 12.** AS 11.46.484(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fourth degree if, having no right to do so or any reasonable ground to believe the person has such a right

(1) with intent to damage property of another, the person damages property of another in an amount of **$250** [$50] or more but less than **$1,500** [$500];

(2) the person tampers with a fire protection device in a building that is a public place;

(3) the person knowingly accesses a computer, computer system, computer program, computer network, or part of a computer system or network;

(4) the person uses a device to descramble an electronic signal that has been scrambled to prevent unauthorized receipt or viewing of the signal unless the device is used only to descramble signals received directly from a satellite or unless the person owned the device before September 18, 1984; or

(5) the person knowingly removes, relocates, defaces, alters, obscures, shoots at, destroys, or otherwise tampers with an official traffic control device or damages the work upon a highway under construction.

* **Sec. 13.** AS 11.46.486(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fifth degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with reckless disregard for the risk of harm to or loss of the property or with intent to cause substantial inconvenience to another, the person tampers with property of another;

(2) with intent to damage property of another, the person damages property of another in an amount less than **$250** [$50]; or

(3) the person rides in a propelled vehicle knowing it has been stolen or that it is being used in violation of AS 11.46.360 or 11.46.365(a)(1).

*** Sec. 14.** AS 11.46.530(b) is amended to read:

(b) Criminal simulation is

(1) a class C felony if the value of what the object purports to represent is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of what the object purports to represent is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of what the object purports to represent is less than **$250** [$50].

*** Sec. 15.** AS 11.46.620(d) is amended to read:

(d) Misapplication of property is

(1) a class C felony if the value of the property misapplied is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property misapplied is less than **$1,500** [$500].

*** Sec. 16.** AS 11.46.730(c) is amended to read:

(c) Defrauding creditors is a class A misdemeanor unless that secured party, judgment creditor, or creditor incurs a pecuniary loss of **$1,500** [$500] or more as a result to the defendant's conduct, in which case defrauding secured creditors is

(1) a class B felony if the loss is $25,000 or more;

(2) a class C felony if the loss is **$1,500** [$500] or more but less than $25,000."

SB 186
Amendment 27-LS0811\1.1
Summary of Amendment

The purpose of this amendment is to raise the threshold amounts for offenses regarding property. The offenses proposed for amendment are theft and its related offenses which include concealment of merchandise, removal of identification marks, unlawful possession, issuing a bad check, and fraudulent use of an access device. This amendment also addresses the crimes of vehicle theft, criminal mischief, criminal simulation, misapplication of property, and defrauding creditors.

These crimes regarding property have a value threshold that distinguishes first, second, third, and fourth degree offenses that, depending on the value of the property, or the loss incurred by the victim, are a Class C felony or an A or B misdemeanor.

The values of these crimes regarding property were set in 1978, and since that time have not been adjusted. This amendment will adjust the value from $500 to $1500, and $50 to $250 establishing the thresholds for C felony, A misdemeanor, and B misdemeanor crimes.

Presently ***Removal of an Identification Mark*** on an item valued at $50.00 is a Class B misdemeanor; with the proposed amendment the value of the property would be raised to $250.00.

I have listed a few of the other offenses (by Section) to show that the change throughout the property offenses sections that we are addressing is consistently $500 is increased to $1500 and $50 is increased to $250.

Sec. 1 **Theft in the Second Degree** (Class C Felony) Increases the value of property or services $1500 ($500) but less than $25,000.
Value of property is $250 ($50) or more but less than $1500 ($500) and within the preceding 5 years the person has been convicted or sentenced on two or more separate occasions in this or another jurisdiction.

Sec. 2 **Theft in the Third Degree** (A Misdemeanor) value of property is $250 ($50) but less than $1500 ($500)
Value of property is less than $250 ($50) and within the past 5 years person has been convicted or sentenced on two or more separate occasions in or another jurisdiction.

Sec. 3 **Theft in the Fourth Degree** (B Misdemeanor) value of property is less than $250 ($50).

AMENDMENT

OFFERED IN THE SENATE BY SENATOR COGHILL

TO: SB 186

Page 1, line 1, following "**Act**":

Insert "**relating to property crimes;**"

Page 1, following line 6:

Insert new bill sections to read:

"*** Section 1.** AS 11.46.130(a) is amended to read:

(a) A person commits the crime of theft in the second degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$1,500** [$500] or more but less than $25,000;

(2) the property is a firearm or explosive;

(3) the property is taken from the person of another;

(4) the property is taken from a vessel and is vessel safety or survival equipment;

(5) the property is taken from an aircraft and the property is aircraft safety or survival equipment;

(6) the value of the property is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(A) an offense under AS 11.46.120, or an offense under another law or ordinance with similar elements;

(B) a crime set out in this subsection or an offense under another law or ordinance with similar elements;

(C) an offense under AS 11.46.140(a)(1), or an offense under another law or ordinance with similar elements; or

(D) an offense under AS 11.46.220(c)(1) or (c)(2)(A), or an offense under another law or ordinance with similar elements; or

(7) the property is an access device.

*** Sec. 2.** AS 11.46.140(a) is amended to read:

(a) A person commits the crime of theft in the third degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$250** [$50] or more but less than **$1,500** [$500]; **or**

(2) [REPEALED

(3)] the value of the property is less than **$250** [$50] and, within the past five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of theft or concealment of merchandise, or an offense under another law or ordinance with similar elements.

*** Sec. 3.** AS 11.46.150(a) is amended to read:

(a) A person commits the crime of theft in the fourth degree if the person commits theft as defined in AS 11.46.100 and the value of the property or services is less than **$250** [$50].

*** Sec. 4.** AS 11.46.220(c) is amended to read:

(c) Concealment of merchandise is

(1) a class C felony if

(A) the merchandise is a firearm;

(B) the value of the merchandise is **$1,500** [$500] or more; or

(C) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(i) the offense of concealment of merchandise under this paragraph or (2)(A) of this subsection, or an offense under another law or ordinance with similar elements; or

(ii) an offense under AS 11.46.120, 11.46.130, or 11.46.140(a)(1), or an offense under another law or ordinance with similar elements;

(2) a class A misdemeanor if

(A) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500]; or

(B) the value of the merchandise is less than **$250** [$50] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions of the offense of concealment of merchandise or theft in any degree, or an offense under another law or ordinance with similar elements;

(3) a class B misdemeanor if the value of the merchandise is less than **$250** [$50].

*** Sec. 5.** AS 11.46.260(b) is amended to read:

(b) Removal of identification marks is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

*** Sec. 6.** AS 11.46.270(b) is amended to read:

(b) Unlawful possession is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

* **Sec. 7.** AS 11.46.280(d) is amended to read:

(d) Issuing a bad check is

(1) a class B felony if the face amount of the check is $25,000 or more;

(2) a class C felony if the face amount of the check is **$1,500** [$500] or more but less than $25,000;

(3) a class A misdemeanor if the face amount of the check is **$250** [$50] or more but less than **$1,500** [$500];

(4) a class B misdemeanor if the face amount of the check is less than **$250** [$50].

* **Sec. 8.** AS 11.46.285(b) is amended to read:

(b) Fraudulent use of an access device is

(1) a class B felony if the value of the property or services obtained is $25,000 or more;

(2) a class C felony if the value of the property or services obtained is **$1,500** [$50] or more but less than $25,000;

(3) a class A misdemeanor if the value of the property or services obtained is less than **$1,500** [$50].

* **Sec. 9.** AS 11.46.295 is amended to read:

Sec. 11.46.295. Prior convictions. For purposes of considering prior convictions in prosecuting a crime of theft under AS 11.46.130(a)(6) or **11.46.140(a)(2)** [11.46.140(a)(3)], or in prosecuting the crime of concealment of merchandise under AS 11.46.220(c), a conviction for an offense under another law or ordinance with similar elements is a conviction of an offense having elements similar to those of an offense defined as such under Alaska law at the time the offense was committed. The court shall consider the date of a prior conviction as occurring on the date that sentence is imposed for the prior offense.

* **Sec. 10.** AS 11.46.360(a) is amended to read:

(a) A person commits the crime of vehicle theft in the first degree if, having no right to do so or any reasonable ground to believe the person has such a right, the person drives, tows away, or takes

(1) the car, truck, motorcycle, motor home, bus, aircraft, or watercraft

of another;

(2) the propelled vehicle of another and

(A) the vehicle or any other property of another is damaged in a total amount of **$1,500** [$500] or more;

(B) the owner incurs reasonable expenses as a result of the loss of use of the vehicle, in a total amount of **$1,500** [$500] or more; or

(C) the owner is deprived of the use of the vehicle for seven days or more;

(3) the propelled vehicle of another and the vehicle is marked as a police or emergency vehicle; or

(4) the propelled vehicle of another and, within the preceding seven years, the person was convicted under

(A) this section or AS 11.46.365;

(B) former AS 11.46.482(a)(4) or (5);

(C) former AS 11.46.484(a)(2);

(D) AS 11.46.120 - 11.46.140 of an offense involving the theft of a propelled vehicle; or

(E) a law or ordinance of this or another jurisdiction with elements substantially similar to those of an offense described in (A) - (D) of this paragraph.

*** Sec. 11.** AS 11.46.482(a) is amended to read:

(a) A person commits the crime of criminal mischief in the third degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with intent to damage property of another, the person damages property of another in an amount of **$1,500** [$500] or more;

(2) the person recklessly creates a risk of damage in an amount exceeding $100,000 to property of another by the use of widely dangerous means; or

(3) the person knowingly

(A) defaces, damages, or desecrates a cemetery or the contents of a cemetery or a tomb, grave, or memorial regardless of whether the tomb,

grave, or memorial is in a cemetery or whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected;

(B) removes human remains or associated burial artifacts from a cemetery, tomb, grave, or memorial regardless of whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected.

* **Sec. 12.** AS 11.46.484(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fourth degree if, having no right to do so or any reasonable ground to believe the person has such a right

(1) with intent to damage property of another, the person damages property of another in an amount of **$250** [$50] or more but less than **$1,500** [$500];

(2) the person tampers with a fire protection device in a building that is a public place;

(3) the person knowingly accesses a computer, computer system, computer program, computer network, or part of a computer system or network;

(4) the person uses a device to descramble an electronic signal that has been scrambled to prevent unauthorized receipt or viewing of the signal unless the device is used only to descramble signals received directly from a satellite or unless the person owned the device before September 18, 1984; or

(5) the person knowingly removes, relocates, defaces, alters, obscures, shoots at, destroys, or otherwise tampers with an official traffic control device or damages the work upon a highway under construction.

* **Sec. 13.** AS 11.46.486(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fifth degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with reckless disregard for the risk of harm to or loss of the property or with intent to cause substantial inconvenience to another, the person tampers with property of another;

(2) with intent to damage property of another, the person damages property of another in an amount less than **$250** [$50]; or

(3) the person rides in a propelled vehicle knowing it has been stolen or that it is being used in violation of AS 11.46.360 or 11.46.365(a)(1).

* **Sec. 14.** AS 11.46.530(b) is amended to read:

(b) Criminal simulation is

(1) a class C felony if the value of what the object purports to represent is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of what the object purports to represent is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of what the object purports to represent is less than **$250** [$50].

* **Sec. 15.** AS 11.46.620(d) is amended to read:

(d) Misapplication of property is

(1) a class C felony if the value of the property misapplied is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property misapplied is less than **$1,500** [$500].

* **Sec. 16.** AS 11.46.730(c) is amended to read:

(c) Defrauding creditors is a class A misdemeanor unless that secured party, judgment creditor, or creditor incurs a pecuniary loss of **$1,500** [$500] or more as a result to the defendant's conduct, in which case defrauding secured creditors is

(1) a class B felony if the loss is $25,000 or more;

(2) a class C felony if the loss is **$1,500** [$500] or more but less than $25,000."

SENATE BILL NO. 186

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Introduced: 2/1/12
Referred: Judiciary, Finance

A BILL

FOR AN ACT ENTITLED

"An Act relating to persons found guilty but mentally ill; relating to sentencing procedures for factors that may increase the presumptive range or affect mandatory parole eligibility; relating to the granting of probation; relating to procedures for finding aggravating factors at sentencing; amending Rule 32.1, Alaska Rules of Criminal Procedure; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

New Section 1. Amendment by Coghill $1,500[500]

*** Section 1.** AS 12.47.040(b) is amended to read:

(b) To return a verdict under (a)(4) of this section, the **fact finder** [JURY] must find beyond a reasonable doubt that the defendant committed the crime and [FIND BY A PREPONDERANCE OF THE EVIDENCE] that, when the defendant committed the crime, the defendant was guilty but mentally ill as defined in AS 12.47.030.

*** Sec. 2.** AS 12.47.060(a) is amended to read:

(a) In a prosecution for a crime when the affirmative defense of insanity is not raised and when evidence of mental disease or defect of the defendant is not admitted at trial under AS 12.47.020, [AND THE DEFENDANT IS CONVICTED OF A CRIME,] the defendant **or** [,] the prosecuting attorney [, OR THE COURT ON ITS OWN MOTION] may raise the issue of whether the defendant is guilty but mentally ill. **A party that seeks a post-conviction determination of guilty but mentally ill must give notice 10 days before trial of intent to do so; however, this deadline is waived if the opposing party presents evidence or argument at trial tending to show that the defendant may be guilty but mentally ill.** A hearing must be held on this issue [AT OR] before the **same fact finder that returned the verdict of guilty under procedures set by the court. In cases decided by a jury, at the request of the defendant and with the concurrence of the prosecuting attorney, the court may decide the issue. A waiver of consideration by a jury must be in writing and in person before the court** [SENTENCING HEARING]. At the hearing, the **fact finder** [COURT] shall determine whether the defendant has been shown to be guilty but mentally ill **beyond a reasonable doubt, considering** [BY A PREPONDERANCE OF THE] evidence presented at the hearing and any evidence relevant to the issue that was presented at trial.

*** Sec. 3.** AS 12.47.060(b) is amended to read:

(b) If the **fact finder** [COURT] finds that a defendant is guilty but mentally ill, **the court** [IT] shall sentence the defendant as provided by law and shall enter the finding of guilty but mentally ill as part of the judgment.

*** Sec. 4.** AS 12.55.025(i) is amended to read:

(i) Except as **otherwise** provided **in this chapter** [BY AS 12.55.125(a)(3), 12.55.145(d), 12.55.155(f), AND 12.55.165], the preponderance of the evidence standard of proof applies to sentencing proceedings.

*** Sec. 5.** AS 12.55.090(b) is amended to read:

(b) **Except as otherwise provided in (f) of this section, the** [THE] court may revoke or modify any condition of probation [,] or may change the period of probation.

*** Sec. 6.** AS 12.55.090 is amended by adding a new subsection to read:

(f) Unless the defendant and the prosecuting authority agree at the probation revocation proceeding or other proceeding, the court may not reduce the specific period of probation, or the specific term of suspended incarceration except by the amount of incarceration imposed for a probation violation, if

(1) the sentence was imposed in accordance with a plea agreement under Rule 11, Alaska Rules of Criminal Procedure; and

(2) the agreement required a specific period of probation or a specific term of suspended incarceration.

*** Sec. 1.** AS 12.55.125(a) is amended to read:

(a) A defendant convicted of murder in the first degree or murder of an unborn child under AS 11.41.150(a)(1) shall be sentenced to a definite term of imprisonment of at least 20 years but not more than 99 years. A defendant convicted of murder in the first degree shall be sentenced to a mandatory term of imprisonment of 99 years when

(1) the defendant is convicted of the murder of a uniformed or otherwise clearly identified peace officer, firefighter, or correctional employee who was engaged in the performance of official duties at the time of the murder;

(2) the defendant has been previously convicted of

(A) murder in the first degree under AS 11.41.100 or former AS 11.15.010 or 11.15.020;

(B) murder in the second degree under AS 11.41.110 or former AS 11.15.030; or

(C) homicide under the laws of another jurisdiction when the offense of which the defendant was convicted contains elements similar to first degree murder under AS 11.41.100 or second degree murder under AS 11.41.110;

(3) [THE COURT FINDS BY CLEAR AND CONVINCING EVIDENCE THAT] the defendant subjected the murder victim to substantial physical torture;

(4) the defendant is convicted of the murder of and personally caused the death of a person, other than a participant, during a robbery; or

(5) [THE COURT FINDS BY CLEAR AND CONVINCING

EVIDENCE THAT] the defendant is a peace officer who used the officer's authority as a peace officer to facilitate the murder.

* **Sec. 24.** AS 12.55.125 is amended by adding a new subsection to read:

(p) If the state seeks either (1) the imposition of a sentence under (a) of this section that would preclude the defendant from being awarded a good time deduction under AS 33.20.010(a) based on a fact other than a prior conviction; or (2) to establish a fact that would increase the presumptive sentencing range under (c)(2), (d)(2), (e)(4), (i)(1)(A) or (B), or (i)(2)(A) or (B) of this section, the factual question required to be decided shall be presented to a trial jury and proven beyond a reasonable doubt under procedures set by the court, unless the defendant waives trial by jury and either stipulates to the existence of the fact or consents to have the fact proven to the court sitting without a jury. Written notice of the intent to establish a fact under this subsection must be served on the defendant and filed with the court as provided for notice under AS 12.55.155(f)(2).

* **Sec. 25.** AS 12.55.155 is amended by adding new subsections to read:

(i) If the state seeks to establish a factor in aggravation at sentencing under (c)(10) of this section,

(1) the assessment of the facts underlying the state's allegation that the defendant's conduct was among the most serious included in the definition of the offense shall be made by the trial jury under procedures set by the court and as provided in (f)(2) of this section, unless the defendant waives trial by jury, stipulates to the existence of the aggravating factor or to the facts alleged by the state, or consents to have the assessment proved under procedures set out in (f)(1) of this section; factual assertions underlying the state's allegation that the defendant's conduct was among the most serious included in the definition of the offense must be proved beyond a reasonable doubt;

(2) the legal decision concerning whether the defendant's conduct determined under (1) of this subsection was among the most serious included in the definition of the offense shall be made by the court under procedures set out in (f)(1) of this section.

(j) If one of the aggravating factors in (c) of this section is established as

provided in (f)(1) and (2) of this section, the court may increase the term of imprisonment up to the maximum term of imprisonment. Any additional aggravating factor may then be established by clear and convincing evidence by the court sitting without a jury, including an aggravating factor that the jury has found not to have been established beyond a reasonable doubt.

*** Sec. 10.** AS 33.05.050 is amended to read:

Sec. 33.05.050. Report of probation officer. When directed by the court, the probation officer shall report to the court [,] with a statement of the conduct of the probationer while on probation. **Except as otherwise provided by law, the** [THE] court may then discharge the probationer from further supervision and may terminate the proceedings against the probationer, or may extend the probation, as shall seem advisable.

*** Sec. 11.** AS 33.05.070(b) is amended to read:

(b) As speedily as possible after arrest, the probationer shall be taken before the court for the district having jurisdiction over the probationer. **Except as provided in AS 12.55.090(f),** [THEREUPON] the court may revoke the probation and require the probationer to serve the sentence imposed [,] or any lesser sentence [,] and, if imposition of sentence was suspended, may impose any sentence **that** [WHICH] might originally have been imposed, subject to the limitation specified in AS 12.55.086(c).

*** Sec. 12.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE AMENDMENT. AS 12.55.125(p), enacted by sec. 8 of this Act, and AS 12.55.155(i) and (j), enacted by sec. 9 of this Act, have the effect of changing Rule 32.1, Alaska Rules of Criminal Procedure, by amending procedures for sentencing persons convicted of certain crimes.

*** Sec. 13.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) AS 12.47.040(b), as amended by sec. 1 of this Act, AS 12.47.060(a), as amended by sec. 2 of this Act, AS 12.47.060(b), as amended by sec. 3 of this Act, AS 12.55.025(i), as amended by sec. 4 of this Act, and AS 12.55.125(a), as amended

by sec. 7 of this Act, apply to proceedings occurring on or after the effective date of this Act for offenses occurring before, on, or after the effective date of this Act.

(b) AS 12.55.090, as amended by sec. 6 of this Act, applies to offenses occurring on or after the effective date of this Act.

(c) AS 12.55.125(p), enacted by sec. 8 of this Act, applies to sentencing proceedings occurring on or after the effective date of this Act for offenses occurring before, on, or after the effective date of this Act.

*** Sec. 14.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. Sections 8 and 9 of this Act take effect only if sec. 12 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

*** Sec. 15.** This Act takes effect July 1, 2012.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB186
2012 LEGISLATIVE SESSION

Analysis

This legislation requires a jury to find someone Guilty But Mentally Ill (GBMI) "beyond a reaonsable doubt" as opposed to the current language of "by a preponderance of the evidence." DOC has very few offenders who meet this criteria, therefore, this legislation will have little to no fiscal impact on the department.

Re: Request for hearing for Senate Bill 190

Honorable Senator Hollis French

I respectfully request a hearing of the Senate Judiciary Committee for Senate Bill 190.

Senate Bill 190 is an act relating to activities, including violations and penalties, under the supervision of the Big Game Commercial Services Board.

Thank you for your consideration.

Sponsor Statement
Committee Substitute for Senate Bill 190

The Committee Substitute for Senate Bill 190 deals with licensing and disciplinary functions under the supervision of the Big Game Commercial Services Board and creates a retired status master guide-outfitter license. The changes to statute outlined in this sponsor statement were recommended by members of the Big Game Commercial Services Board and numerous other professional hunting guides in the state.

First, the bill would give the Big Game Commercial Services Board the ability to adopt regulations it considers appropriate in addition to regulations already set out in the Board's governing chapter.

The bill would provide retiring guides or outfitters the opportunity to receive, for a one-time payment, a retired master guide-outfitter license. An individual holding a retired status master guide-outfitter license may not guide or outfit in the state under the retire status license, but it will serve as a symbolic recognition of their achievements in the profession. The license is valid for the life of its holder and does not need to be renewed.

The bill also clarifies in statute that a person licensed as a registered guide-outfitter may be employed by another registered guide-outfitter to provide the services of a class-A assistant guide in any game management unit. The purpose is to make the statutes more clear and rid them of ambiguity regarding the relationship between a registered guide who is employed by another registered guide on a specific hunt.

Senate Bill 190 also gives the Big Game Commercial Services Board the ability to suspend or permanently revoke a transporter license or any class of guide license if the board finds, after a hearing, that the licensee engaged in conduct involving unprofessionalism, moral turpitude or gross immorality.

This bill will also allow the Big Game Commercial Services Board to adopt regulations eliminating the need for a contracting registered guide to be present in the field as long as a Class-A assistant guide or other registered guide employed by the contracting guide is conducting the hunt.

Further, the bill will update the statutes in Title 8 that inform the court of which violations by a licensee shall result in board suspension of a license and which violations may result in a board suspension of a license.

CS FOR SENATE BILL NO. 190( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS MENARD, Huggins

A BILL

FOR AN ACT ENTITLED

"An Act relating to the duties of the Big Game Commercial Services Board; relating to activities, including violations and penalties, under the supervision of the Big Game Commercial Services Board; creating a retired status master guide-outfitter license; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 08.54.600(c) is amended to read:

(c) **In addition to the regulations required under (a) of this section, the** [THE] board may adopt regulations [AS] the board considers appropriate**, including regulations** to

(1) establish a code of ethics for professions regulated by the board;

(2) establish requirements for the contents of written contracts to provide big game hunting services and transportation services to clients;

(3) authorize the department to request a copy of a big game hunting services or transportation services contract entered into by a person licensed under this

chapter.

*** Sec. 2.** AS 08.54 is amended by adding a new section to read:

Sec. 08.54.608. Retired status master guide-outfitter license. (a) On retiring from guiding or outfitting, or both, and on payment of an appropriate one-time fee, an individual who has held a master guide-outfitter license issued under AS 08.54.610 that has not been suspended or revoked under AS 08.54.710 may apply for a retired status master guide-outfitter license. An individual holding a retired status master guide-outfitter license may not guide or outfit in the state under the retired status license. A retired status license is valid for the life of the license holder and does not require renewal.

(b) An individual with a retired status master guide-outfitter license may apply for a new registered guide-outfitter license under AS 08.54.610.

*** Sec. 3.** AS 08.54.610(d) is amended to read:

(d) **Notwithstanding AS 08.54.750, a** [A] person who is licensed as a registered guide-outfitter may be employed by another registered guide-outfitter to **provide the services of a class-A** [PERFORM THE FUNCTIONS OF A REGISTERED GUIDE-OUTFITTER OR CLASS-A ASSISTANT GUIDE IN THE GAME MANAGEMENT UNIT FOR WHICH THE PERSON IS CERTIFIED UNDER AS 08.54.600 OR OF AN] assistant guide in any game management unit.

*** Sec. 4.** AS 08.54.610(e) is amended to read:

(e) A registered guide-outfitter who contracts for a guided hunt shall be

[(1) PHYSICALLY PRESENT IN THE FIELD WITH THE CLIENT AT LEAST ONCE DURING THE CONTRACTED HUNT; AND

(2)] in the field **supervising** and participating in the contracted hunt **and conducting the hunt**, unless the **board adopts regulations permitting** [HUNT IS BEING CONDUCTED BY] a class-A assistant guide or a registered guide-outfitter employed by **a** [THE] contracting registered guide-outfitter **to conduct a hunt for a contracting registered guide-outfitter**.

*** Sec. 5.** AS 08.54.710 is amended by adding a new subsection to read:

(j) The board may suspend or permanently revoke a transporter license or any class of guide license if the board finds after a hearing that the licensee engaged in

conduct involving unprofessionalism, moral turpitude, or gross immorality.

*** Sec. 6.** AS 08.54.720(f) is amended to read:

(f) In addition to the penalties set out in (b) - (e) of this section and a disciplinary sanction imposed under AS 08.54.710,

(1) the court may order the board to suspend the guide license or transporter license of a person who commits a misdemeanor offense set out in (a)(1), (3) - (5), (7), **(8),** (17), (18), or (19) of this section for a specified period of not more than three years;

(2) the court shall order the board to suspend the guide license or transporter license of a person who commits a misdemeanor offense set out in (a)(2) or **(9) - (14)** [(8) - (14)] of this section for a specified period of not less than one year and not more than five years;

(3) the court shall order the board to suspend the guide license or transporter license for a specified period of not less than three years, or to permanently revoke the guide license or transporter license, of a person who commits an offense set out in (a)(15) or (16) of this section; and

(4) all guns, fishing tackle, boats, aircraft, automobiles, or other vehicles, camping gear, and other equipment and paraphernalia used in, or in aid of, a violation of (a) of this section may be seized by persons authorized to enforce this chapter and may be forfeited to the state as provided under AS 16.05.195.

*** Sec. 7.** AS 08.54.770(a) is amended to read:

(a) The department shall set fees under AS 08.01.065 for each of the following:

(1) registered guide-outfitter license;

(2) class-A assistant guide license;

(3) assistant guide license;

(4) transporter license;

(5) **retired status master guide-outfitter license;**

(6) license application fee.

*** Sec. 8.** AS 08.54.790 is amended by adding new paragraphs to read:

(11) "any class of guide license" does not include a retired status

master guide-outfitter license;

(12) "licensee" means a person to whom a license, other than a retired status master guide-outfitter license, has been issued under this chapter.

* **Sec. 9.** Section 4 of this Act takes effect July 1, 2013.

* **Sec. 10.** Except as provided by sec. 9 of this Act, this Act takes effect immediately under AS 01.10.070(c).

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 190

Analysis

SB 190 allows individuals that have retired from guiding or outfitting to pay a one-time fee and obtain a retired status master guide-outfitter license which would not require renewal. Individuals that obtains this license may not guide in the state under the retired status license.

This bill has zero fiscal impact.

ALASKA

PROFESSIONAL HUNTERS ASSOCIATION, INC.

Phone: 907-822-3755 Fax: 907-822-3752
Email:office@alaskaprohunter.orgwww.alaskaprohunter.org

Dear Senator Menard,

I'm writing thank you for sponsoring SB 190 and affirm the support of the Alaska Professional Hunters Association for this important bill. As the sitting president of the APHA and a lifelong Alaskan and second generation Registered Guide I know firsthand how burdensome unclear and, or, contradictory statutes and regulations can be. SB 190 will alleviate some of this burden by clarifying the relationship between Registered Guides when they work for each other and, at the same time, protecting the value of the Class A Assistant Guide license. The APHA also appreciates the creation of a retired, non-active, license so that respected, retired guides can stay licensed and not cut into fixed, retirement incomes. This is essential to maintaining the social continuity, of an industry that respects its elders and provides a career path that includes substantial time as an apprentice.

The APHA has always pushed for greater professional competency and accountability. For this reason we vigorously support giving the Big Game and Commercial services board the ability to suspend or revoke guide or transporter licensed for unprofessional behavior, moral turpitude and gross immorality. Having operators, representing themselves as guides, who are amoral or chronically immoral or unprofessional hurts our membership in a business that relies on reputation and word of mouth business. Alaska deserves to have the best and most ethical guides harvesting its big game resource.

In closing I want to once again thank the honored members or the legislature that have taken the time to consider SB 190 and carry it through the process on the behalf of me and my organizations livelihoods! I also want to state that many APHA members have spent their personal time advising and working on drafting SB 190 as recognition of the collaborated effort between your office and our membership. For the sake of brevity I have only used a few examples of the positive aspects of SB 190 but we do support the bill in its entirety.

Thank You,

Gary LaRose

Big Game Commercial Services Board

February 9, 2012

Dear Senator Menard and Representative Feige,

The Big Game Commercial Serves Board supports House Bill 229 and Senate Bill 190 for improving the guide industry in Alaska. The Board was reinstated 7 years ago and has worked on these concerns during the meetings. These changes are housekeeping measures the board feels are needed for a healthy industry. The Board was unanimous in the vote in support of submitting this Bill and its contents. We respectfully ask for the passage of this legislation.

Sincerely,

Paul Johnson

Paul Johnson

Telephone: (907) 465-2543 Fax: (907) 465-2974 Website: http://www.commerce.state.ak.us/occ/pgui.htm

Senator Menard and Senator Huggins,

Thank you for Sponsoring SB190. I've lived in Wasilla since 1984, got my registered guide license in 1986, started our family run business – Alaska Remote Guide Service in 1987, and upgraded my registered guide-outfitter license to master guide-outfitter status a few years back. To my knowledge, there have been no changes to the Big Game Commercial Service Board Statutes since 1994 or before. I think your bill and Representative Feige's HB229 help address some key issues in bringing the statutes current with several changes that have taken place since then in the guide industry. Most of us in the industry want to do what is right, but it is very hard to understand what that is, even after reading the statutes and regulations several times. In fact I was in a working group at the BGCSB meeting in Fairbanks two years ago, when we were discussing supervision and participation issues. Several guides were present along with some top level enforcement personnel. I think it's fair to say that all of us were at least some what confused about what was expected by us in the statutes.

I've been in attendance at every commercial service board meeting for the past several years, and worked in and led several committees that dealt with several issues in this bill. The key concerns that most interested me personally were 08.54.610 (d) and (e). The current requirement in 08.54.610 (e) (1) that the bill asks to delete, works fine for large operations that are lucky enough to have a lodge or main camp in the same Guide Use Area where they hunt. Everybody gets flown to the lodge to start with and then head out hunting from there. By so doing, this requirement has been met. In operations where the main camp or lodge is in a different guide use area or in many smaller operations, meeting this requirement can be a lot more complicated, and requiring the guide to do so can actually impact the quality of the client's hunt and the service that the guide is able to provide.

While the above mentioned points in the bill are my main focus, I fully agree with and support every provision that your bill deals with. I have spent a lot of personal time and effort to help get these issues put forward. As this bill moves forward, feel free to contact me concerning any questions or concerns that may arise, and let me know how I can help. Thank you again for you help!

MEMORANDUM February 29, 2012

SUBJECT: CSSB 190( ) Sectional Summary
(Work Order No. 27-LS1328\M)

TO: Senator Linda Menard
Attn: Michael Rovito

FROM: Alpheus Bullard
Legislative Counsel

You have requested a sectional summary of the above-described Work Order.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Expands the range of regulations the Big Game Commercial Services Board ("board") may adopt.

Section 2. Establishes a retired status master guide-outfitter license.

Section 3. Permits a person licensed as a registered guide-outfitter to be employed by another registered guide-outfitter as a class-A assistant guide in any game management unit. Under existing law, a person licensed as a registered guide outfitter could be employed by another registered guide-outfitter to perform the functions of a registered guide-outfitter or class-A assistant guide in the game management unit for which the person was certified under AS 08.54.600 or as an assistant guide in any game management unit. The bill removes this possibility.

Section 4. Amends the duties, in the field, of a registered guide-outfitter who contracts for a guided hunt.

Section 5. Permits the board to suspend or permanently revoke a transporter license or any class of guide license if the board makes certain findings.

Section 6. Increases the period of time a court may order the board to suspend a guide license or a transporter license for certain violations under AS 08.54.720(a)(8).

Section 7. Directs the Department of Commerce, Community, and Economic Development to set fees for a retired status master guide-outfitter license.

Section 8. Adds new definitions (relating to the addition of a retired status master guide-outfitter license at sec. 1) to AS 08.54.

Section 9. Provides a July 1, 2013, effective date for sec. 4 of the bill.

Section 10. Provides an immediate effective date for secs. 1 - 3 and 5 - 8 of the bill.

Senator Lesil McGuire

SB 195 "An Act establishing a maximum caseload for probation and parole officers."

SB 195 will put into statute a maximum of 60 cases for probation and parole officers at any given time.

Currently parole officers in the Anchorage area are often responsible for over 100 cases. That is not an appropriate amount of time to manage their caseload and protect the public. The ability of a parole officer to monitor an individual closely can reduce recidivism rates and help offenders return to our community as productive members of society.

Felony offenders are given the greatest amount of attention. These interactions include home visits, office visits, employment checks, and frequent contact with other agencies including law enforcement and social service programs. Officers use a range of sanctions and treatment interventions to reduce the chance an offender will commit a new crime. Research shows that this approach is more successful and cost-effective than relying on jails or prisons as the only response to criminal behavior.

SB 195 is intended to start a conversation about the effectiveness and systemic costs of our corrections system.

I greatly appreciate your support of Senate Bill 195.

The National Conference of State Legislatures is the bipartisan organization that serves the legislators and staffs of the states, commonwealths and territories.

NCSL provides research, technical assistance and opportunities for policymakers to exchange ideas on the most pressing state issues and is an effective and respected advocate for the interests of the states in the American federal system. It's objectives are:

To improve the quality and effectiveness of state legislatures.

To promote policy innovation and communication among state legislatures.

To ensure state legislatures a strong, cohesive voice in the federal system.

The Conference operates from offices in Denver, Colorado, and Washington, D.C.

About the Project and Work Group

The NCSL Sentencing and Corrections Work Group project was developed under an NCSL partnership with the Public Safety Performance Project (PSPP) of the Pew Center on the States. The NCSL project responds to the challenges faced by states as they consider corrections and sentencing policies that both manage state spending and protect the public. The Pew PSPP was launched in 2006 to help states advance fiscally sound, data-driven policies and practices in sentencing and corrections. Pew's work has included research, technical assistance, and funding and overseeing a variety of efforts both in states and nationally to support strategies that protect public safety, hold offenders accountable and control corrections costs.

The NCSL Criminal Justice Program assembled the Sentencing and Corrections Work Group in 2010. The bipartisan, 18-member group includes officers of NCSL's Law and Criminal Justice Committee and other legislators who are recognized as leaders on these issues. The group had a one-year work plan to discuss and identify overarching principles for effective state sentencing and corrections policy and to identify key issues and approaches that explain and illustrate the recommendations.

The issues addressed by the NCSL work group reflect the important role of state legislatures in enacting policies that manage prison populations and costs, address offender and community needs, and contribute to the safe and fair administration of criminal justice. The discussions took place during a difficult, recessionary budget climate. A major interest of the work group was how to have an immediate effect on state public safety dollars while also ensuring that the public safety is protected into the future. Many concepts addressed in the *Principles* reflect recent advances in resource-sensitive policies that actually reduce risk and recidivism. Mindful that sentencing and corrections policies reach into various levels and branches of government, the *Principles* also reflect the value that lawmakers place on stakeholders throughout criminal justice systems in policy development and discussions. Apparent throughout the *Principles* is the importance of interbranch and intergovernmental collaboration, information exchange and evaluation in working toward effective sentencing and corrections policies.

It is the intent of NCSL and this work group that the *Principles* and examples presented here will help guide and inform many aspects of state sentencing and corrections policy now and well into the future.

Managing Offenders in the Community

Prisons are expensive. The Public Safety Performance Project of the Pew Center on the States reported that approximately $9 of every $10 spent by states on corrections in FY 2008 was devoted to state prisons, even though nearly 70 percent of offenders are supervised in the community. The 2009 Pew report shows that prison spending has increased in recent years at a faster rate than spending on community corrections. The analysis of corrections department data from eight states—Alabama, Georgia, Louisiana, Missouri, Montana, New York, Oregon and Wyoming—covered a 25-year period. During that time, Pew reported, 88 percent of new corrections dollars were allocated to prisons and only 12 percent went to community corrections supervision.

Of every $10 spent by states on corrections in FY 2008, $9 was devoted to state prisons, even though nearly 70 percent of offenders are supervised in the commuunity, according to Pew's Public Safety Performance Project.

Non-prison options for suitable offenders not only helps states do more with their corrections money, but also ensures prison space is available for the most dangerous offenders. Intermediate supervision options such as electronic monitoring, residential programs and problem-solving courts are less costly than incarceration, and they provide a greater degree of monitoring and requirements than traditional probation or parole programs. Residential and community treatment can address substance abuse and mental health needs commonly related to criminal behavior (see also *Treating Drug Offenders*). Non-prison sanctions for probation and parole violations can also provide for offender accountability and reserve costly prison space for offenders who may present a public safety concern.

Adequate funding for community corrections is a perennial challenge, especially as states struggle with the recent recession. Some states are finding ways to use data and evidence to invest in successful, effective supervision strategies; they use savings gained to reinvest in identified policies that further manage costs and achieve better result for both offenders and corrections systems. Policies such as risk-based supervision, administrative supervision and compliance credits allow agencies to focus community resources on the highest-risk offenders and at the same time, hold accountable all offenders who are in the community.

Using community-based supervision options for suitable offenders not only helps states do more with their corrections money, but also ensures prison space is available for the most dangerous offenders.

Tailored Supervision

Many states allow courts and agencies to tailor supervision based on an offender's risk of reoffending and treatment needs (see also *Using Data and Evidence*). Intermediate supervision options, which provide varying levels of surveillance and services, may include such options as electronic monitoring and home confinement, residential placements, or required participation in problem-solving courts. As noted in *Principle 4*, the value of intermediate sanctions depends upon policies that target resources effectively and focus the highest-level supervision on the highest-risk offenders. Creating more intensive supervision for lower-risk offenders usually does not help meet corrections goals, affect cost control, or reduce reoffending.

Electronic Monitoring Electronic monitoring uses technology to track an offender's whereabouts and monitor compliance. For nonviolent offenders, it often is combined with house arrest or is used to enforce curfew and travel restrictions. Correctional agencies also use electronic monitoring as an alternative sanction to jail or prison for violations of supervision conditions or to monitor offenders who are making the transition into the community after prison.

Savings Identified in Florida

Florida's Office of Program Policy Analysis and Government Accountability (OPPAGA) identified several intermediate sanctions for nonviolent offenders that, when used in lieu of prison, could significantly reduce criminal justice costs and reserve prison beds for the most dangerous criminals. Shown below are these sanctions, the suitable offenders and savings expected. The per diem savings are comparable to the state's $55.54 per diem cost of incarceration.

Intermediate Sanctions	Target Population	Per Diem Savings Per Offender
GPS monitoring	Nonviolent felony offenders with minimum sentence of 12 to 24 months' incarceration.	$41.51
Non-treatment residential facilities	Probation technical violators, nonviolent offenders with restitution ordered, or nonviolent offenders in need of structured assistance to obtain employment and gain stability.	$29.53
Day reporting centers	Low-level felony or misdemeanor offenders.	$44.06
Residential substance abuse treatment	Offenders with substance abuse issues.	$26.66

Source: Florida Office of Program Policy Analysis and Government Accountability, 2010.

The Vermont General Assembly increased use of electronic monitoring to provide community supervision for certain offenders who otherwise would be incarcerated. A 2008 law authorized use of electronic monitoring for probation violations and as part of supervision provided in a structured, community transition program. In 2010, the General Assembly created a house arrest sentence for offenders who otherwise would be sent to prison. This allows offenders to continue working, attend treatment, support their families, and remain in their residences except for travel approved by a supervising officer.

Electronic monitoring has been found to be a cost-effective supervision strategy when used in lieu of jail and in conjunction with appropriate services. A 2006 Washington State Institute for Public Policy (WSIPP) analysis of evidence-based policy options determined electronic monitoring to be an economically beneficial supervision tool that does not affect crime incidence. The WSIPP analysis determined that electronic monitoring, when used in lieu of jail, could save Washington State $870 per offender.

Residential Facilities Residential facilities provide offenders with a structured environment and support services in a community-based setting. Colorado's 35 residential facilities serve both offenders diverted from prison and some who are making the transition from prison into the community. Most facilities require offenders to keep a job, and pay room and board, state and federal taxes, and any restitution and child support owed. Offenders participate in programs such as substance abuse treatment; counseling designed to address cognitive reasoning and criminal behavior; employment and vocational courses; and life skills, financial, and anger management training. A Department of Corrections analysis in FY 2008 found that employed offenders were three times more likely to finish the program than those who were unemployed, underscoring the importance of job readiness for community-based offenders.

Problem-Solving Courts Problem-solving courts were identified by state chief justices and court administrators in a 2006 National Center for State Courts survey as one of the two most effective supervision programs

available in their states; mental health and substance abuse programs are the other. These courts, which vary in size, target population and structure, are designed to address the special needs of the target population. In Nevada, 42 problem-solving courts throughout the state include adult, juvenile and family drug courts; mental health courts; reentry courts; driving under the influence courts; a prostitution prevention court; habitual offenders' courts; and veterans' courts.

At least six state legislatures—Colorado, Hawaii, Illinois, Indiana, Nevada and Texas—authorized establishment of veterans' treatment courts in 2009 and 2010.

Veterans' treatment courts are the most recent type of problem-solving court being established in states. At least six state legislatures—Colorado, Hawaii, Illinois, Indiana, Nevada and Texas—took action in 2009 and 2010 to authorize courts that address needs of veterans who become involved in the criminal justice system. Many of these offenders have substance abuse and mental health needs stemming from combat experience; services overseen by the courts partner with veterans' agencies and eligible benefits. California, Iowa, New Hampshire and Oregon have similar policies that authorize diversion of veterans convicted of nonviolent crimes into treatment programs in lieu of prison.

Drug courts are the oldest and most common type of problem-solving courts—in 2010 there were more than 2,500 such courts operating across all 50 states, according to the National Association of Drug Court Professionals. Missouri's first drug court was established in 1993; today that state has the most drug courts per capita of any state in the nation. A Drug Court Coordinating Commission was established by the General Assembly in 2001 to evaluate resources, oversee operation and recommend funding for the state's drug courts. An academic study conducted for the commission projected savings of $7,800 per year for each offender who is supervised in drug court instead of being sent to prison.

The federal Bureau of Justice Assistance's Drug Court Clearinghouse tracks and summarizes cost-benefit evaluations of drug court programs dating back to 2000. Studies comparing drug court participants to similar offenders who are not enrolled have found criminal justice system savings as a result of reduced prison and jail time, lower re-arrest and re-conviction rates, and decreased victim and law enforcement costs. Other benefits—such as increased employment rates and wage earnings, reduced health care costs, and increased parental participation and payment of child support—also have been noted. Studies of statewide drug court programs reveal that, while some drug courts cost more than typical court dockets or probation caseloads, the specialty courts still are more cost-effective than jail or prison.

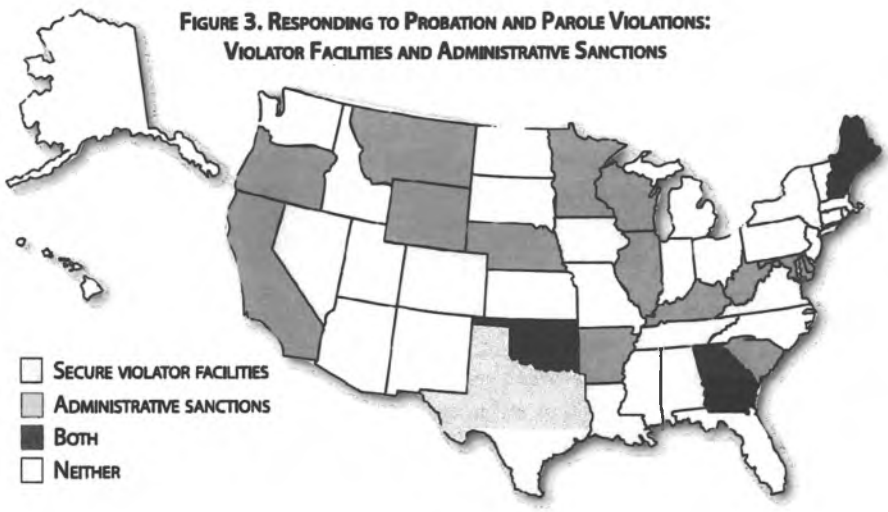
As policymakers explore the value of drug courts, they also can be aware of opportunities for improvement. A two-year examination of problem-solving courts by the National Association of Criminal Defense Lawyers resulted in a 2009 report that questioned the effectiveness of drug courts in addressing the societal problems of substance abuse. The report also cautioned about procedural matters and questioned whether drug court caseloads are adequately diverse and if clients are predominately those with the greatest need for intensive judicial supervision and treatment services (see also *Determining Criminal Sentences* and *Treating Drug Offenders*). As suggested in the *Principles*, policymakers can improve the effectiveness of intermediate and alternative sanctions both by ensuring that approaches are evidence-based and by requiring that community resources safely target offenders who can most benefit from community interventions in lieu of prison.

Probation and Parole Violations Offenders sent to prison for probation and parole violations contribute substantially to state prison populations and related costs. According to the Bureau of Justice Statistics, 35 percent of all state prison admissions in 2009 were offenders who returned to incarceration as a result of parole violations. Although some violators must be returned to prison to protect society, a growing number of states are developing non-prison sanctions for offenders who break the rules of their supervision, known as technical violations.

Alternative sanctions for probation and parole violators are designed to hold offenders accountable for breaking the rules, address issues related to the violations, and minimize the cost of incarceration to the state. Intermediate options allow a violator to remain in the community, continue to work, and pay restitution and child support. Sanctions include residential and community-based treatment programs, specialty court supervision, house arrest, electronic monitoring, work release, community service, secure and residential facilities, increased monitoring and reporting, and possible short periods in jail.

Several states have statutorily authorized community supervision agencies to impose intermediate sanctions for technical violations of probation or parole in lieu of formal court revocation proceedings (see Figure 3). Administrative sanctions allow violations to be swiftly dealt with at the agency level. This not only reduces time and costs of court and parole board hearings, but also provides for offender accountability and reduces reliance on prison as a sanction. Under the Oregon Department of Corrections' structured sanctions program, officers can impose immediate sanctions for violations of probation or parole conditions. A grid is used to determine appropriate sanctions—jail, residential work centers, house arrest and community service—based on the offender's risk level, crime of conviction, and seriousness of the violation. Officers also can order violators to participate in programs such as substance abuse and mental health treatment, employment assistance, and anger management classes. A 2002 evaluation by the Department of Corrections found that offenders who were ordered to community sanctions had lower rates of future re-conviction than those ordered to jail; those ordered to community service had the lowest rate of re-conviction among all community-based options. The overall evaluation conclusions noted that the most effective sanctions include a rehabilitative component.

Figure 3. Responding to Probation and Parole Violations: Violator Facilities and Administrative Sanctions



Several states have secure facilities that are designed to house and treat probation or parole violators instead of sending them to prison, as shown in Figure 3. In 2006, the Tennessee General Assembly authorized the Parole Technical Violators Diversion Program. Parolees who violate a condition of parole but have not committed a new felony may be sent to a secure facility for a six-month term to participate in a community service work crew or attend GED classes during the day and complete treatment programs in the evening. Tennessee offers probation violators the opportunity to complete programming in a Special Technical Violator Unit (STVU) in lieu of revocation to a state prison. In the STVU, the probationer will participate for at least four months in an intensive work and treatment program. As of 2010, New Hampshire requires that all programs and services provided at a parole violator facility be evidence-based and designed to re-engage parolees in their parole plan.

Funding Strategies

Prison populations are beginning to decline as a result of changes in front-end sentencing policies, availability of strategies to provide community-based sanctions for probation and parole violators, and specialized court and other treatment programs for drug offenders and those with mental health and other needs. Some states have created funding mechanisms to reinvest prison savings into programs that safely and successfully supervise offenders in the community.

In some states, state-local partnerships provide "incentive funding" to localities that successfully supervise offenders in the community instead of sending them to state prison for probation and parole violations. At least nine states—Arizona, Arkansas, California, Colorado, Illinois, Kansas, Kentucky, Ohio and Texas—have such arrangements, under which local correctional agencies usually receive state funding and other assistance to implement evidence-based supervision and programming. The goal is to reduce the rate at which probationers and parolees commit new crimes or violate their supervision conditions and are then sent or returned to prison.

In Kansas, a Risk Reduction Initiative adopted by the Legislature in 2007 was designed to increase offender success by reducing the number of revocations to state prison by at least 20 percent. To accomplish this, a grant program was established for local probation agencies that developed risk-reduction supervision and programming. Targeting medium- to high-risk offenders, the initiative uses specialized caseloads, employment training and placement, educational assistance, transportation and housing, and other services to help offenders remain crime- and drug-free. Careful assessment is used to assign offenders to the appropriate level and type of substance abuse, mental health, cognitive and other treatment.

At least nine states—Arizona, Arkansas, California, Colorado, Illinois, Kansas, Kentucky, Ohio and Texas—have "incentive funding" for localities that safely and successfully supervise offenders in the community.

The first round of funding in FY 2008 went to all 31 probation agencies in the state. By FY 2009, the Department of Corrections reported a 25 percent decrease in revocations to prison compared to the FY 2006 baseline; this exceeded the initial goal of 20 percent reduction.

In 2009, the California Legislature created a performance-based state-local funding partnership. Using one-time federal stimulus money, the Legislature allocated funding to local probation departments to implement evidence-based supervision practices designed to increase successful probation completion. Success is measured in terms of decreases in the number of probationers sent to prison for technical violations or new crimes. Continued funding under the act depends upon the rate at which the revocations decline. Each year, counties will be eligible to receive a portion of state savings achieved by reducing the number of prison admissions.

These funding strategies are examples of ones that, related to *Principle 4*, help states partner with local jurisdictions to create incentives for and hold accountable community programs and services.

Options for Low-Level Offenders

Other state community supervision strategies are risk- and resource-sensitive in terms of identifying offenders who are not serious criminals, pose little threat and can be safely sanctioned at lower levels of supervision. State policies provide for administrative supervision, which consists of minimal reporting and monitoring requirements so long as restitution is being paid and the offender remains crime- and drug-free. Other policies move offenders who comply with their supervision conditions to less active supervision or provide an opportunity for early termination of the community supervision term. Table 1 identifies additional information on policies for supervising low-risk offenders. Limiting and decreasing supervision and services for lower-risk offenders focuses resources more effectively on higher-risk offenders, and are among the strategies states can consider that, as suggested in the *Principles*, update and adapt criminal codes to reflect current standards and needs.

Table 1. Options for Supervising Low-Risk Offenders		
Type	**Supervision Components**	**Examples**
Administrative Supervision	Minimal reporting requirements; monitoring to ensure court-ordered payments are being made and no new criminal activity occurs.	Kentucky created an administrative caseload supervision program in 2011 for low-risk offenders who are identified via risk assessment.
Risk-based Supervision Levels	Offender is assigned to a supervision level based on offense, compliance with supervision conditions and risk assessment scores.	In New Hampshire, risk assessments guide both the level of supervision and time spent at each level of supervision. For example, a low- or medium-risk offender will be placed on active supervision for the first 12 months and, if compliant, moved to administrative supervision for the remainder of the term.
Early Termination	Gives courts discretion to review and grant early termination of a probation or parole sentence. Often requires the offender to have paid restitution in full and completed all program and treatment requirements.	Texas has incorporated early termination into a "progressive sanctions and incentives program" administered by local supervision agencies. Includes use of structured, swift and incremental sanctions for violations of supervision, and incentives such as early termination for compliance.
Compliance Credits	Provides probationers or parolees with a monthly credit for compliance with supervision requirements.	Nevada law permits certain probationers to earn 10 days per month for complying with supervision requirements and staying on schedule with all court-ordered fee and restitution payments. An additional 10 days per month can be earned for maintaining employment and participating in education or rehabilitation programs.
Probation Term Limits	Caps the length of time a court can order for a probation sentence.	In 2003, Delaware limited probation sentences to two years for any violent felony, 18 months for drug offenses and one year for all other offenses. Previous law did not set an upper limit on probation terms, and lengthy probation sentences were common.

Source: 2007 Tex. Gen. Laws, Chap. 1205; 2009 Nev. Stats., Chap. 44; 2010 N.H. Laws, Chap. 247; 2011 Ky. Acts, Chap. 2; and Vol. 74 Del. Laws, Chap. 27.

The variety of strategies described help states safely and cost-effectively manage many offenders in the community. Community corrections resources can be maximized with other risk- and resource-sensitive policies that focus the most supervision and services on offenders who need to be watched most closely and who have significant needs that can be addressed in the community.

Bail set at $50,000 for man accused of beating girl

ARRAIGNED: Syvinski still in jail; third-party observation required.

By CASEY GROVE
casey.grove@adn.com

(06/11/11 21:15:27)

A man accused of punching a 7-year-old girl multiple times in the head Sunday in Midtown remained in jail after his arraignment Friday in Anchorage Jail Court.

A judge set bail for Byron Syvinski at $50,000 and required that he be under 24-hour observation by a court-approved third party.

Syvinski, 32, faces one count each of third- and fourth-degree assault and one count of first-degree robbery. He did not enter a plea Friday, and Judge Catherine Easter assigned his case to a public defender.

Easter also ordered Syvinski not to return to the Eide Street neighborhood where police and witnesses say he attacked two of his neighbors, including young Am-Marie Martin.

Police wrote in court papers that Syvinski -- who stands 6 feet tall and weighs 240 pounds -- first tried to take a bag from a neighborhood boy, then punched the boy's father when he intervened. Police said the boy hit Syvinski with a metal pole, but that didn't stop him.

Syvinski then walked down the street and ordered Martin to get off her bike, police said. When she didn't, he punched her once, then twice more after she fell to the ground, police said.

Neighbors surrounded Syvinski, who police say was acting delirious when two officers arrived and arrested him. Syvinski had a cast on his broken left arm and the arm was infected, police said. He was taken to a hospital after the incident.

Officers arrested Syvinski on Thursday after he was released from the hospital.

Martin was still at Providence Alaska Medical Center on Friday for continued treatment, said her mother, Andrea Dunwoody, just after the arraignment. The girl suffered a concussion and brain hemorrhage from Syvinski's pounding, police said.

Martin wasn't eating solid food and depended on an intravenous line for nutrients, Dunwoody said.

"She's traumatized. She's depressed. She's angry. She's upset. All of the above," Dunwoody told reporters outside the jail. "He took away my daughter. She's not the same."

The girl has refused to allow male nurses into her hospital room and she also didn't trust the male doctor treating her, Dunwoody said.

"She wants to know why she's there. I can't tell her," Dunwoody said.

Still, small gifts and letters -- some from complete strangers -- had raised Am-Marie's spirits, her

mother said.

In the meantime, Dunwoody is wondering why Syvinski was loose on Anchorage's streets the day of the attack.

Syvinski had called police four times seeking help the day before the attacks, police said. He was taken into protective custody -- either to jail or a hospital but police won't say -- and was back out by Sunday afternoon, when the violence began.

His criminal record, which includes previous assaults and a felony gun theft conviction, indicates repeated drug use, according to court records.

Dunwoody said the Alaska justice system failed to address Syvinski's many problems.

"He should've gotten the help he asked for," she said.

Syvinski can't move to halfway house

RULING: Man accused of hitting girl says he was beaten in jail.

By CASEY GROVE
casey.grove@adn.com

(08/13/11 21:53:47)

Alaska State Troopers are investigating the reported jailhouse beating of an Anchorage man accused of punching a young girl in June. But a judge on Friday denied Byron Syvinski's subsequent request to be moved from the jail to a halfway house, saying the 32-year-old remains a danger to the community.

Syvinski is accused of attacking several neighbors, including a 7-year-old girl he allegedly punched in the head multiple times while trying to steal her bike.

Through his court-appointed attorney, Jeff Robinson, Syvinski had sought lowered bail and release to a halfway house because of a beating that left his face bruised and re-injured his previously broken arm, Robinson told Anchorage District Court Judge Patrick Hanley.

Troopers are investigating the alleged July 31 attack on Syvinski by another inmate or inmates at the Anchorage jail, a troopers spokeswoman said.

Syvinski appeared in court for the Friday bail hearing with bruises under his eyes and his left arm in a cast and sling. He's charged with robbery and multiple assault counts for the alleged June 5 attack on his Eide Street neighbors.

Police wrote in court papers that Syvinski was acting delirious when he approached a neighborhood teenager and tried to snatch the boy's bag. Syvinski punched the boy's father in the face before the boy struck Syvinski with a pole, police said.

Syvinski walked down the street to where Am-Marie Martin -- who turned 8 Friday, her mother said -- was on her bike in her driveway, police said. Syvinski ordered the girl off the bike and when she didn't move, he punched her, knocking her to the pavement, police said.

Witnesses told police that Syvinski punched the girl twice more while she was on the ground.

Martin was taken to a hospital with severe head injuries. Syvinski also was taken to a hospital for an infected arm. Police arrested him five days later.

In court Friday, Robinson told Hanley that Syvinski spent some time separated from other inmates for additional medical treatment. It was shortly after Syvinski's release from medical segregation that he was attacked, Robinson said.

"The decision to release him to general population is frightening," Robinson told the judge. "We live in a civilized society; we don't believe in vigilante justice."

Robinson showed Hanley and Assistant District Attorney Brittany Dunlop pictures of Syvinski's injuries taken days after the beating. The photos showed Syvinski's swollen lips and dark bruises

on his body.

"We have no reason to think the (Department of Corrections) can't protect Mr. Syvinski," Dunlop said.

Halfway houses have less security than jails, which could make it easier for Syvinski to escape, the prosecutor argued. That would allow Syvinski -- whose criminal record indicates repeated drug abuse dating back to 1999 -- to possibly get high and attack someone again, she said.

Martin's mother, Andrea Dunwoody, told the judge that Syvinski belonged in jail, not a halfway house. Dunwoody also addressed Syvinski directly.

"Just imagine what my daughter felt when you pounded her head into the ground," she told him. Dunwoody glared at Syvinski, who looked to the floor.

In the end, Hanley agreed with the prosecutor, saying that Syvinski posed a threat to the community and a halfway house did not provide the necessary level of security.

Dunwoody told reporters outside the courtroom that her daughter still suffers from headaches and dizziness but that she is ready for the school year to start.

Dunwoody said she doesn't have much sympathy for Syvinski.

"Like it or not, he's going to get justice in jail," she said. "I don't feel bad that he's got black eyes."

Ex-officer arrested again on child porn charge

Anchorage Daily News
(01/10/08 12:25:40)

A former Anchorage police officer, already convicted once of possessing child pornography, has been arrested and charged again.

Bryan Herrera, 44, was charged last month with violating the terms of his probation for having downloaded and stored thousands of child porn images in his computer, according to police spokeswoman Marlene Lammers.

On Wednesday, the Anchorage Police Department's Cyber Crimes Unit detectives re-arrested Herrera on a new charge of child porn possession. He is being held on that charge in lieu of $30,000 bail, Lammers said.

A 12-year veteran at the time, Herrera was charged in October 2005 with collecting images of young children having sex with each other and with adults.He was also accused of setting up a remote-controlled camera in his home so he could tape a teenage girl undressing.

In a plea agreement with the district attorney's office, Herrera pleaded no contest to two counts and was sentenced to serve up to two years in prison. He was released on probation after serving his time. A condition of his release was that he not have a computer with an Internet connection.

In June, probation officers told police they had seized Herrera's laptop and believed he had downloaded and stored child porn on it. Police forensics computer examiners verified the accusation and on Dec. 10 probation officers arrested him, according to Lammers.

Murder parolee questioned in woman's slaying

Man had done yard work for woman found dead in her home.

By JAMES HALPIN and MEGAN HOLLAND
Anchorage Daily News
(06/25/09 22:06:21)

The man being sought for questioning in the slaying of a woman found dead in her home just off West International Airport Road was taken into custody Thursday night while using the restroom at the Flight Deck Bar and Lounge, just a block from the crime scene, according to police.

Kenneth Arnold Wahl, who is on parole for the brutal 1983 killing of a school counselor, was taken to police headquarters for questioning and was held on a felony parole violation, police said. Wahl had not been charged in connection with the death of Elisa Orcutt, 47, though police have named him a "person of interest." Orcutt was found dead in her home in the 5100 block of Cambridge Way on Tuesday.

Police from the vice unit and Community Action Policing team descended on the bar at 832 W. International Airport Road just before 8:30 p.m. and found Wahl in the men's room, police spokeswoman Anita Shell said.

"Patrons at the bar recognized him," Shell said. "He was taken into custody without incident."

Police say Wahl, 45, was doing yard work for Orcutt on Friday, the last day she was seen alive.

Wahl had been arrested six times, and released six times, since 2005 for parole violations stemming from the 1983 murder and was currently wanted on a seventh charge.

Investigators say they have learned of no connection between Wahl and Elisa Orcutt, 47, beyond his doing work at her home.

Orcutt's body was found in her home in the 5100 block of Cambridge Way just before 10 a.m. Tuesday, less than two hours after she missed a court appearance for a divorce that was finalized in her absence.

Since naming Wahl as a man who might have some information, detectives had received reports of possible sightings, homicide Detective Sgt. Slawomir Markiewicz said Thursday afternoon.

"We accounted for all the other neighbors as far as talking to them," Markiewicz said. "He had a place pretty close to the victim's place. Actually, from where he was staying he could see the victim's house." Neighbors say Wahl moved into a small, white pickup camper sitting on pallets in a yard catty-cornered to the Orcutt residence earlier this spring. He'd been doing odd jobs and yard work for the people whose property he was on and other neighbors and landed some work at the Orcutt home last Friday, according to police.

Elisa Orcutt was supposed to meet with her lawyer, Jody Brion, on Saturday in preparation for the divorce trial this week, but didn't show, according to a memorandum Brion filed in court. Brion called her repeatedly over the weekend but didn't reach her.

"Counsel believes that she is very stressed out with the prospect of the trial," Brion wrote in court papers.

About 8:30 a.m. Tuesday, everyone but Orcutt showed up at the courthouse for a hearing. The divorce was granted despite her absence. According to court documents, both Orcutt and her husband suffered from physical and mental impairments. They had no children.

Douglas Orcutt, 56, spent a career working for Alaska Airlines but left his work after being diagnosed with the early onset of Alzheimer's disease, court records say. He moved to Washington in September and filed for divorce in November, citing "irremediable differences" caused by "an incompatibility of temperament existing between the parties." Records say he was in town for the hearing this week.

Court records indicate Elisa Orcutt used to work at a Lowe's Home Improvement Warehouse but was injured on the job and had received Social Security income. She had been diagnosed with bipolar disorder and also suffered from depression and physical problems, according to court records.

"Elisa has been through a lot of stuff," said Pete Johnson, husband of her sister. "She didn't deserve this." If they know a motive for the slaying, police won't say what it is. They have been equally mum on what exactly happened inside the home, saying only they and the killer have that information.

"There was some trauma that caused her death," Markiewicz said. "The nature of the injuries is such that we concluded it must be the result of a homicide."

Wahl was convicted of first-degree murder for the stabbing death of Edward "Larry" Delany, a 40-year-old junior high school counselor. Authorities said Wahl stabbed him with a knife about 40 times in his apartment the day after they hooked up for a sexual encounter in 1983. He was sentenced in 1985 to serve 45 years.

According to Parole Board records, Wahl first appeared before the board in 2003, but was denied parole. He went back before the board in April 2005, when board members changed their minds. He was released two months later.

Conditions of Wahl's parole were standard, including requirements that he: maintain employment, training or treatment; notify his parole officer of a change in residence; possess no firearms; stay away from drugs and alcohol; not leave Anchorage beyond a 50-mile radius without informing his parole officer; not contact the victim's family.

But between his release and April of this year, Wahl was out of jail only for brief periods -- three months, then two days, then three weeks, and then two months -- before being jailed again for parole or probation violations.

He went back before the Parole Board after each one, and each time the board decided to let him go -- in April 2005, December 2005, September 2006 and January 2009. Ronald Taylor, executive director of the Alaska Board of Parole, said he couldn't discuss why the board decided to let Wahl out.

But in April, Wahl vanished from his halfway house. His probation officer searched for him for a day before handing over the search to Alaska State Troopers. A felony warrant for his arrest was issued.

Some fugitives are actively sought, but in many cases they are arrested after incidental contacts,

like traffic stops, troopers spokeswoman Megan Peters said. Various factors affect who is actively sought, including the severity of the crime and whether there is information on the person's location, she said.

Troopers have about 9,300 active arrest warrants, she said. Asked how Wahl's warrant would be prioritized, Peters said, "It goes back to what resources you have available, if you know where somebody is."

Kennith Wahl's time behind bars

Jan. 19, 1983: Arrested for murder.

Nov. 20, 1985: Sentenced to 45 years.

June 9, 2005: Released from prison to a halfway house, the Glennwood Center in downtown Anchorage

Sept. 6, 2005: Back in jail for a parole/probation violation.

March 15, 2006: Released.

May 17, 2006: Back in jail for a parole/probation violation.

June 16, 2008: Released.

July 6, 2008: Back in jail for a parole/probation violation.

July 22, 2008: Released.

Sept. 23, 2008: Back in jail for a parole/probation violation.

Dec. 3, 2008: Released.

Jan. 12, 2009: Begins mandatory six months at a halfway house.

April 9, 2009: Doesn't show up to halfway house. Felony arrest warrant later issued.Kenneth Wahl's time behind bars

Four charged in armed robbery spree

Posted by crimeblog
Posted: July 29, 2011 - 3:52 pm

From Kyle Hopkins in Anchorage --

A four-man stickup crew has been indicted following a string of gunpoint robberies earlier this year in northeast Anchorage, prosecutors say.

Wearing black masks and gloves, the group held shotguns inches from the face of a Mountain View cigarette shop owner during a holdup in January, police say. The men are accused of blasting a shotgun round through the window of a Bragaw Street convenience store during a March robbery and robbing a cabbie and his passenger in April.

Assistant District Attorney James Fayette outlined the accusations today in **this prosecution bail memo.**

An Anchorage grand jury on Wednesday indicted:

-- Aaron Aasa, 26.
-- Ronald E. Thompson Jr., 18.
-- Brothers Eric Vaifanua, 18, and Faamanu "Junior" Vaifanua, 21.

Both on Probation

They are charged with robbing a cigarette shop called Smoke King in north Mountain View on Jan. 20, holding the shopkeeper and his son at gunpoint, prosecutors say. A security camera taped the invasion:

Crime Scene

This is a blog dedicated to the general topic of crime and crime prevention in Alaska. We will post crime-related stories and other relevant items as we come across them. The Daily News encourages community engagement and discussion of issues of crime and criminal justice. Comments are not edited and will be posted immediately. We know that stories about crime often provoke strong reactions, but **we insist that you keep your comments on point, use good taste and show courtesy toward other writers. Posts that violate the Terms of Use will be deleted, and repeat offenders will be banned from adn.com.** When presenting factual information, take care that it is accurate and cite and/or link to sources where appropriate.

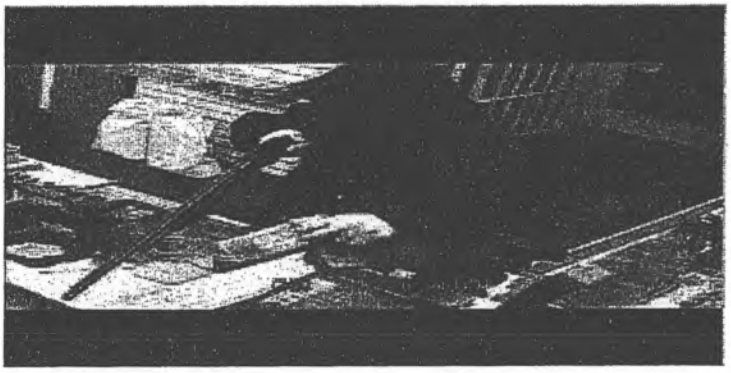
...



Two months later, three of the men robbed the Mini Stop convenience store on Bragaw Street, prosecutors say.

A break in the robbery investigations came April 10, following the cab-driver robbery.

The early morning holdup came on North Bunn Street where the taxi driver's passenger was trying to pay his fare, prosecutors say. A man with a shotgun had approached the passenger. Another man, carrying a handgun, walked up to the cab driver and demanded cash, prosecutors say.

As the men fled, one fired several shots in the air, prosecutors say. Someone nearby called police to report the sound of shots fired. The witness saw a black SUV speeding away, prosecutors say.

Police soon found the black Ford sitting in a car wash in west Mountain View. In a nearby trash can, police found a Mossberg 12-gauge shotgun, a handgun and white surgical gloves.

Security cameras showed the men pulling the pistol-grip shotgun from the SUV and stashing it in the trash can, prosecutors say.

In the SUV, police found old cartons of "Kool" cigarettes, the same brand that robbers stole from the Mountain View smoke shop and the Bragaw convenience store, prosecutors say.

Among other evidence linking the men to the robberies, police say that Faamanu Vaifanua was wearing white tennis shows that matched footprints left in the snow outside the Smoke King store.

The four are accused of robbery, conspiracy to commit robbery and evidence tampering. Faamanu

Senate Judicial Committee
Alaska Legislature

Re: S195

As a Probation/Parole Officer (PO) for the State of Alaska for over sixteen years and in three different offices around the state, I have been assigned to different units during that time and am currently assigned to the sex offender (SO) unit in Anchorage. I keep in mind the goal of protecting the community while supervising felony offenders.

In general, a PO monitors an offender for compliance with conditions set forth by the Superior Court or the Alaska Board of Parole. That means meeting with an offender at least monthly, sometimes twice monthly and a few individuals warrant weekly visits. All contacts require documentation. Contacts are not limited to the office. SOPOs are required to conduct home visits and engage in other collateral contacts such as with employers, family members, neighbors, landlords, and occasionally contact a victim or the parent of a minor victim. During a home visit of a sex offender today, PO cannot simply look for a pile of glossy magazines in the corner of a room or under a piece of furniture. In light of technological advances for example, in order to search for pornography, a PO must search a residence for computers, laptops, thumb drives, CDs, additional hard drives and other devices that have internet connectivity such as smart phones, tablets, X boxes and play stations. We are also expected to monitor compliance with the sex offender registry, monitor the use of email addresses as well as prohibited social networking sites and aliases etc. SOPOs are also expected sit in on treatment groups, attend staffing meetings, communicate possibly multiple times in one month with a treatment provider and prepare various forms utilized during the course of a treatment period. In addition, we write violation documents and reports as well as attend court and parole hearings. Some offenders warrant extensive time and effort with referrals at least initially to get started down the path of rehabilitation or to see if they will reject the rehabilitative offerings.

I appreciate your consideration of legislation limiting our caseload size, which will allow POs to more effectively supervise felony offenders, which will enhance protection of the public and support rehabilitation.

Very truly yours,

Jo Bennett
Probation/Parole Officer II
Anchorage, Alaska

Good morning Chairman French and committee members.

My name is Charles Stewart and I am a probation officer at the Anchorage Complex. First I would like to thank you for considering this bill. It is very important to all state Probation Officers. The goal of every probation officer is to work with offenders and to help them change their criminal thinking and behavior. Doing so will help keep them out of jail.

Unfortunately, we can't do that now. At this time officers are mainly doing paperwork with very little time to work hands on with offenders. We have caseloads of up to 100 or more. The goal of the Department of Corrections is to cut down the recidivisms. Deputy Commissioner Gutierrez explained to you on Jan 25 of 2012 our goal and program to cut down on recidivisms in the future. Deputy Commissioner Gutierrez working with a committee developed a reentry program.

We believe that this is a great program, but we foresee a problem. That problem is the caseload of the probation officers. We have very little time to work hands on with offenders because the current paperwork load is overwhelming given the numbers we supervise. Mainly we put out fires at this time. While we all support the "evidence based" approach to handling offenders, we must have more "face" time with our caseload for it to work. All of the evidence based programs contain significant one-on-one time with offenders. It also requires even more paperwork because we must document what we are doing with these people. Not reducing the caseload is to assure that our recidivism reduction efforts will fail.

Our current recidivisms rate is 66 percent. Andre Rosay, Director of the UAA Justice Center provided you with this information on January 25. In your packets you will see a report from North Carolina (dated March 2011) that shows that a caseload of 60 is an ideal caseload goal for probation officers, and a caseload of 30 for officers carrying a special case loads of

mental health patients, sex offenders or offenders under "increased supervision". In you packets you will find other reports showing that the lower caseloads the more reduction there is in recidivism.

Another piece to this is the cost. On 1/25/12 Deputy Commissioner Edward stated to this committee that the average cost in the state of a hard bed is $134 a day. If allowed to spend more time with offenders in one-on-one supervision, probation officers can reduce recidivism. We estimate that it will save money. For instance, a reduction of just 16 percent per our current case load of 100 or more would save $2,144 a day or $782,560 a year in just one case load. We believe that this kind of savings would pay for an additional probation officer, administration, and space and still save over $600,000 per caseload. This does not take into consideration the other department with in the state that supports the offender and his family.

SB 198: A Bill Relating to Police Officer Protections and Certifications
SPONSOR STATEMENT

Police officers in Alaska provide some of the most valuable services to our citizens. Their protection and service allows us to enjoy our communities safely and comfortably. SB 198 acknowledges the value of police officers and proposes changes to statute.

SB 198 requires due process hearings to occur before a police officer has a certificate revoked. Currently, statute allows for revocation of a certificate by the Police Standards Council without a hearing. Revocation of a certificate can mean the end of a career and should be the last resort used to punish those worst offenders. SB 198 also sets a standard for clear and convincing evidence before revocation occurs and allows for suspension before revocation.

SB 198 also adds court officers to the definition of police officers. By doing this, court service officers are recognized for the work they perform. Court officers carry weapons, can arrest people, and serve warrants. Including them in the definition for police officers allows for streamlined training and certification by the Police Standards Council. This change also puts court officers under an already existing framework of liability.

SB 198 provides protection for police officers against retaliation for refusing to take a lie detector test. Evidence in Alaska shows a retaliatory tendency against officers who opt out of taking a lie detector test. Several other states have passed similar protections for public safety officers.

Lastly, SB 198 makes the personal information of police officers confidential. This section provides security and assurance to officers that their safety is a priority. Police officers and their families should not be subject to harassment in or out of their work environment. This section provides guarantee that their employment will not compromise their or their families' safety.

CS FOR SENATE BILL NO. 198(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE STATE AFFAIRS COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act establishing procedures relating to issuance, suspension, or revocation of certification of police officers by the Alaska Police Standards Council; making confidential certain information that personally identifies a police officer; relating to requesting or requiring police officers or applicants for employment as peace officers to submit to lie detector tests; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18.65.240(c) is repealed and reenacted to read:

(c) If a police officer does not meet the standards adopted under (a)(2) of this section, the council may,

(1) before filing an accusation or a statement of issue under AS 44.62.330 - 44.62.630, suspend a certificate that has been issued to the police officer;

(2) following the filing of an accusation, hearing, and decision under

AS 44.62.330 - 44.62.630, revoke the certificate of a police officer;

(3) following the filing of a statement of issues, hearing, and decision under AS 44.62.330 - 44.62.630, refuse to issue a certificate to an applicant.

* **Sec. 2.** AS 18.65.240 is amended by adding a new subsection to read:

(d) In a proceeding to determine the outcome of the accusation or statement of issues, the council shall prove the conduct alleged in the accusation or statement of issues by clear and convincing evidence.

* **Sec. 3.** AS 18.65 is amended by adding a new section to read:

Sec. 18.65.244. Deference to prior resolutions. In a proceeding to revoke, suspend, or refuse to issue a certificate to a police officer, the council may consider past disciplinary actions against the police officer. However, the council shall give substantial weight to the significance of a past removal or reversal of the disciplinary action if the removal or reversal was the result of

(1) an arbitration or grievance proceeding under a collective bargaining agreement;

(2) a grievance, hearing, or other proceeding under applicable personnel rules;

(3) a proceeding under AS 44.62 (Administrative Procedure Act); or

(4) an appeal to a court.

* **Sec. 4.** AS 23.10.037(b) is amended to read:

(b) The provisions of (a) of this section do not apply to the state or a political subdivision of the state when dealing with **an applicant for employment as a police officer in a position with the state or the political subdivision** [POLICE OFFICERS IN ITS EMPLOY OR WITH PERSONS APPLYING TO BE EMPLOYED AS POLICE OFFICERS]. In this subsection, "police **officer** [OFFICERS]" includes **an officer or employee** [OFFICERS AND EMPLOYEES] of the Department of Transportation and Public Facilities who **is** [ARE] stationed at an international airport and **has** [HAVE] been designated to have the general police powers authorized under AS 02.15.230(a).

* **Sec. 5.** AS 39.90.100(a) is amended to read:

(a) A public employer may not discharge, threaten, or otherwise discriminate

against an employee regarding the employee's compensation, terms, conditions, location, or privileges of employment [BECAUSE]

(1) **because** the employee, or a person acting on behalf of the employee, reports to a public body or is about to report to a public body a matter of public concern; [OR]

(2) **because** the employee participates in a court action, an investigation, a hearing, or an inquiry held by a public body on a matter of public concern**; or**

(3) in the case of an employee who is a police officer, because the employee refuses under (e) of this section to submit to a test conducted with a lie detector device after being hired.

*** Sec. 6.** AS 39.90.100 is amended by adding new subsections to read:

(e) A police officer who works for a public employer may, after being hired, refuse a request by the employer to submit to a test conducted with a lie detector device. The refusal and the underlying request

(1) are confidential;

(2) may not be made part of the police officer's personnel file or employment record.

(f) In this section, "lie detector device" means a polygraph, deceptograph, voice stress analyzer, psychological stress evaluator, or other similar device, mechanical or electrical, that is used to obtain data to support a diagnostic opinion regarding the honesty or dishonesty of a natural person.

*** Sec. 7.** AS 40.25 is amended by adding a new section to read:

Sec. 40.25.145. Confidentiality of police officer information. (a) Except as provided in (b) of this section, information in the possession of a law enforcement agency that personally identifies a police officer who is employed by the agency, including the police officer's photographic image or home address, is confidential and is not subject to inspection under AS 40.25.110 or 40.25.120 unless the police officer voluntarily authorizes its release in writing.

(b) Notwithstanding (a) of this section, information that personally identifies a police officer may be released for inspection under AS 40.25.110 or 40.25.120 if

(1) the police officer is lawfully arrested and the information is a photograph of the police officer; or

(2) the police officer is lawfully arrested and the information is included in one or more of the following:

(A) a report or recording that documents a 911 telephone call;

(B) a police or investigative report;

(C) a complaint made to a law enforcement agency;

(D) the statement of a witness in either a criminal matter or a proceeding related to the adjudication of a minor under AS 47.12.110.

*** Sec. 8.** This Act takes effect immediately under AS 01.10.070(c).

Prepared by: David Sexton, Executive Director — Phone (907) 465-5523
Division: Alaska Police Standards Council — Date/Time 2/28/12 9:12 AM
Approved by: Joseph A. Masters, Commissioner — Date 2/28/2012
Department of Public Safety

(Revised 1/17/2012 OMB)

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB198

Analysis

This bill establishes procedures relating to the issuance, suspension, and revocation of certification of police officers by the Alaska Police Standards Council (APSC); makes court services officers subject to certification by the APSC; makes confidential certain information that personally identifies a police officer; and prohibits public employers of police officers from requiring police officer applicants or employees to submit to a lie detector test.

The potential fiscal impact to the Department of Public Safety (DPS) relates to the portions of this bill that make binding on the Alaska Police Standards Council (APSC) decisions issued as a result of arbitration, grievance, or administrative hearing proceedings (to include reversal of disciplinary actions) and that preclude APSC from holding revocations hearings prior to a decision being issued in any of these proceedings.

When DPS terminates a trooper, they make a recommendation to the APSC to revoke the trooper's police officer certification. The APSC takes the recommendation under advisement and makes an independent decision whether to revoke the tooper's certification. This process runs independently from any grievance, arbitration, or administrative hearing and serves to limit the liability of the state to pay back wages to the period of time between when the employee was terminated and when the certification was revoked.

The Public Safety Employees Association (PSEA) may file a grievance on behalf of that former trooper. If the case is not settled between PSEA and the State, it will go to arbitration. The arbitrator will determine either that the termination was justified and uphold the state's action or grant the grievance and impose some lesser level of discipline. When the grievance is granted, DPS is ordered to make the former employee whole.

If the APSC is prohibited from revoking a trooper's certification until a final administrative decision is issued (which can take many years), DPS could potentially be required to pay hundreds of thousands of dollars in back wages to cover the period of time from the date of termination until the date of the decision.

Should this bill become law, APSC will be required to amend their regulations dealing with denial and revocation of certificates. Any costs associated with a regulation project could be absorbed within the APSC's existing budget.

The actual fiscal impact to the department cannot be estimated because it is dependent on the number of terminations where the final administrative decision is in the trooper's favor; therefore, an indeterminate fiscal note is being submitted.

LIST OF STATES THAT SUSPEND POLICE CERTIFICATES

Justices Allow Ban on Polygraph Use

By Joan Biskupic
Washington Post Staff Writer
Wednesday, April 1, 1998; Page A01

The Supreme Court ruled yesterday that state and federal governments may ban the use of polygraph evidence in court, declaring that doubts and uncertainties remain about the accuracy of the so-called lie-detector tests.

Close to 30 states, including Maryland and Virginia, ban polygraph evidence, and some legal experts said yesterday's 8 to 1 decision may prompt the states that do not have outright prohibitions on polygraphs to consider imposing them.

The ruling marks the first time the high court has taken up the issue of polygraph testing, and it comes at a time when the machines are increasingly being used outside the courtroom. Prosecutors use them to extract confessions from suspects and defense lawyers use them for leverage in plea bargains. The military uses them to safeguard national security and prevent espionage, and companies often rely on them to uncover employee wrongdoing or to monitor workers in sensitive jobs.

Although the test results can still be used for these purposes, the Supreme Court yesterday said they can be banned from courtrooms, and sent a signal that their accuracy is in doubt.

Advocates of polygraphs say the instruments have grown increasingly sophisticated in recent years in their ability to determine whether a person is lying by recording their breathing, blood pressure and skin conditions.

But several justices expressed skepticism about the science and the ability of any examiner using the polygraph device to accurately gauge whether someone is telling the truth.

"There is simply no consensus that polygraph evidence is reliable," Justice Clarence Thomas wrote for the court.

Because "uncertainties plague even the best polygraph exams," the court found that prohibiting a defendant from introducing the results of a polygraph test, to show he is telling the truth, does not violate his right to fully defend himself.

Yesterday's case involved Edward G. Scheffer, a former U.S. airman who was court-martialed for using methamphetamines, passing bad checks and going AWOL. Yet he had passed a polygraph test asking whether he had used illegal drugs. The U.S. Court

of Appeals for the Armed Forces said the military's automatic ban on polygraphs was unconstitutional and that Scheffer had a right to at least try to lay a foundation for the reliability of the polygraph result, as he would other evidence.

But the Supreme Court reversed that decision, ruling that Scheffer was not "significantly impaired" by exclusion of the polygraph evidence.

Although only one justice dissented, the majority spoke with no definitiveness.

Thomas and three other justices sought not only to uphold bans on polygraph evidence, but to discourage states from ever allowing their use in court. "By its very nature, polygraph evidence may diminish the jury's role in making credibility determinations," Thomas said, joined by Chief Justice William H. Rehnquist and Justices Antonin Scalia and David H. Souter.

But the other justices in the majority broke ranks, saying that perhaps in the future another dispute might offer a more compelling case for the introduction of polygraph testimony.

Justice Anthony M. Kennedy wrote in a concurring statement that he agreed with the majority that a defendant does not have a constitutional right to use polygraph evidence, but he doubted that an automatic exclusion of the evidence was "wise." Joined by Justices Sandra Day O'Connor, Ruth Bader Ginsburg and Stephen G. Breyer, Kennedy said some later case may be more compelling to say that defendants have a right to introduce polygraphs.

Justice John Paul Stevens, who was the lone dissenter, emphasized the value of the tests to a defendant and noted that the military gives "hundreds of thousands of such tests and routinely uses their results for a wide variety of official decisions."

Stevens called the government's position inconsistent. While it routinely uses the test and says it is an "effective investigatory tool," the Justice Department said it was not reliable enough to be used in court and, unlike other scientific evidence, could mislead a jury by purporting to show the "truth."

"There will always be critics of the polygraph," said Gordon L. Vaughan, counsel for the American Polygraph Association. "But I think the opinions suggest that there is an ongoing debate about the reliability of the polygraph." Thomas wrote that most states ban polygraph evidence, and Vaughan said that breaks down into 29 states with outright bans, 16 states that allow some test results if both the prosecution and defense agree to it. One state, New Mexico, makes them generally admissible.

Federal courts are split on whether polygraph results may be introduced. "This ruling could have some tendency to discourage the admission of polygraphs," said Charles W. Daniels of the National Association of Criminal Defense Lawyers.

Charles L. Hobson, of the Criminal Justice Legal Foundation, which sided with the government, said the ruling in United States v. Scheffer properly gives state and federal governments the ability to limit questionable evidence.

CS FOR SENATE BILL NO. 198(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE STATE AFFAIRS COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act establishing procedures relating to issuance, suspension, or revocation of certification of police officers by the Alaska Police Standards Council; making confidential certain information that personally identifies a police officer; relating to requesting or requiring police officers to submit to lie detector tests; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 18.65.240(c) is repealed and reenacted to read:

(c) If a police officer does not meet the standards adopted under (a)(2) of this section, the council may,

(1) before filing an accusation or a statement of issue under AS 44.62.330 - 44.62.630, suspend a certificate that has been issued to the police officer;

(2) following the filing of an accusation, hearing, and decision under

AS 44.62.330 - 44.62.630, revoke the certificate of a police officer;

(3) following the filing of a statement of issues, hearing, and decision under AS 44.62.330 - 44.62.630, refuse to issue a certificate to an applicant.

* **Sec. 2.** AS 18.65 is amended by adding a new section to read:

Sec. 18.65.244. Deference to prior resolutions. In a proceeding to revoke, suspend, or refuse to issue a certificate to a police officer, the council may consider past disciplinary actions against the police officer. However, the council shall give substantial weight to the significance of a past removal or reversal of the disciplinary action if the removal or reversal was the result of

(1) an arbitration or grievance proceeding under a collective bargaining agreement;

(2) a grievance, hearing, or other proceeding under applicable personnel rules;

(3) a proceeding under AS 44.62 (Administrative Procedure Act); or

(4) an appeal to a court.

* **Sec. 3.** AS 39.90.100(a) is amended to read:

(a) A public employer may not discharge, threaten, or otherwise discriminate against an employee regarding the employee's compensation, terms, conditions, location, or privileges of employment [BECAUSE]

(1) **because** the employee, or a person acting on behalf of the employee, reports to a public body or is about to report to a public body a matter of public concern; [OR]

(2) **because** the employee participates in a court action, an investigation, a hearing, or an inquiry held by a public body on a matter of public concern**; or**

(3) in the case of an employee who is a police officer, because the employee refuses under (e) of this section to submit to a test conducted with a lie detector device after being hired.

* **Sec. 4.** AS 39.90.100 is amended by adding new subsections to read:

(e) A police officer who works for a public employer may, after being hired, refuse a request by the employer to submit to a test conducted with a lie detector

device. The refusal and the underlying request

(1) are confidential;

(2) may not be made part of the police officer's personnel file or employment record.

(f) In this section, "lie detector device" means a polygraph, deceptograph, voice stress analyzer, psychological stress evaluator, or other similar device, mechanical or electrical, that is used to obtain data to support a diagnostic opinion regarding the honesty or dishonesty of a natural person.

*** Sec. 5.** AS 40.25 is amended by adding a new section to read:

Sec. 40.25.145. Confidentiality of police officer information. (a) Except as provided in (b) of this section, information in the possession of a law enforcement agency that personally identifies a police officer who is employed by the agency, including the police officer's photographic image or home address, is confidential and is not subject to inspection under AS 40.25.110 or 40.25.120 unless the police officer voluntarily authorizes its release in writing.

(b) Notwithstanding (a) of this section, information that personally identifies a police officer may be released for inspection under AS 40.25.110 or 40.25.120 if

(1) the police officer is under investigation and the information is a photograph of the police officer; or

(2) the police officer is under investigation and the information is included in one or more of the following:

(A) a report or recording that documents a 911 telephone call;

(B) a police or investigative report;

(C) a complaint made to a law enforcement agency;

(D) the statement of a witness in either a criminal matter or a proceeding related to the adjudication of a minor under AS 47.12.110.

*** Sec. 6.** This Act takes effect immediately under AS 01.10.070(c).

*** Sec. 7.** This Act takes effect immediately under AS 01.10.070(c).

WORK OF THE

Good afternoon. I would first like to reintroduce you to the Council.

The Mission of the Alaska Police Standards Council:

Is to produce and maintain highly trained and positively motivated professional officers, capable of meeting contemporary law enforcement **standards** *of performance.*

The Core Services we provide the citizens of the State of Alaska:

- In cases of misconduct by a certified police officer, we make a determination whether certification should be revoked.
- We monitor compliance with current regulations and legislation.
- We develop, monitor, and revise law enforcement training.
- We assist academies and departments with funding for academy training.
- We fund specialized and advanced training for departments.
- We determine certification eligibility for all police, probation, and correctional officers and issue appropriate level of certificate.
- We provide pre-employment polygraph and psychological testing for smaller agencies across the state.

Senate Bill 198 directly affects, or more honestly cuts, to the heart of several of our core services. Please keep our ability to provide these services to the people of Alaska in mind as you contemplate this proposed bill.

Let's talk first about certification. In this state, as in most states, you need to earn a certificate in order to possess and wield police powers. Our process certifies that you have the education, training, and moral fiber to do the job as legislation has seen fit to define it.

At any one time we have about 3,000 sworn officers in this state. This bill wants to inhibit and intervene with our ability to, if necessary, decertify an officer. While we consider the ability to decertify an errant officer **critical** to our mission and goals, revoking a certificate is but a scalpel in our tool belt.

I'm assuming that the changes this bill proposes are actions taken in response to a perceived current problem. I'm not sure what this problem is however. In the past 5 years only 6 officers have lost their certificate due to Council revocation. Let me repeat that – 3,000 sworn officers in the state – 6 of them had their certificates **"taken"** away from them by council action over a five year period! These certificates were revoked after charges of sexual assault of a minor, sexual assault, harassment, official misconduct and dishonesty were leveled.

In our world, possible misconduct is reported to APSC staff, which fully investigates the matter, and only if we find it appropriate is the matter given to the full council which **again** reviews all of the facts before taking action. Council action can be further appealed through the court system if the officer so desires.

The council is made up of 13 members, hand picked by the governor and affirmed by the legislature. They are police and correctional management, line officers and union members, and citizens at large. You could not ask for a more balanced, knowledgeable, trustworthy board whose primary mission is the protection of the citizen of Alaska.

Clearly, this bill is a solution in search of a problem.

Our legal counsel from the Department of Law wishes to speak to two proposed changes, the necessity to give "**substantial weight**" to prior decisions in our deliberations, and the changing of the burden of proof for our investigations from the preponderance of evidence to clear and convincing evidence. I have no doubt he will express himself more eloquently than I concerning these legal matters, suffice it to say the Council has grave concerns to being **singled out and held to different standards** than the four dozen other boards and commissions required to uniformly operate under the requirements of the state Administrative Procedures Act. (AS 44.62).

Our next concern revolves around the use of polygraphs and other truth verification devices. We appreciate the work done on an earlier version of this bill, and the cooperation that resulted in not prohibiting pre-employment polygraphs. Right now, both Alaska and federal labor law recognizes the special relationship and trust between the citizens and their law enforcement officers, and allows the use of polygraphs in both pre-employment, and investigative situations. The Council is asking, if it's a good idea to take a polygraph to get a job – what changes that you can't take a polygraph to keep a job? It takes a lot to earn police powers…not everyone is up to the challenge. We request the bar not be lowered, and the standards held to be employed remain the same to stay employed.

WE WILL FIND OURSELVES WAY OUTSIDE THE NORM SHOULD WE BECOME ONE OF THE 1 IN 10 RECOGNIZING THIS EXCEPTION.

In fact, 9 out of 10 states allow for investigative polygraph use in matters concerning law enforcement officer's behavior. As not a single recent Council revocation action hinged on polygraph results, the Council is again at a loss why this section of the bill is being introduced ~~to clip our member's wings~~.

Next, this bill demands that departments cease supplying photographs of our officers in action, in the performance of their duties.

The language in this bill goes against every tenant of Community Policing we have tried to put in place for the last two decades. If adopted, I can no longer show pictures of my officers receiving a check from the local Rotary to go toward Special Olympics, and I can no longer hang the photos of my officers in the lobby of my police department or city hall.

I **want** my community to know who my officers are. That is how you build community support, trust, and cooperation. These images are important to recruitment. AS 39.25.080 already makes it unlawful to disseminate state personnel records information, including a home address. Obviously we have no objection to following current state law. We do object to giving away management rights to run progressive, modern, community orientated departments.

Finally, It would mean a great deal to the Council if we could discuss changes to the definition of police officer, which you will find under section 4. It has been a long time goal of the Council to remove the words "full-time" from the definition of police officer. Removing these two words not only bring part-time, seasonal and reserve officers under our oversight, but protects cities and jurisdictions who are trying to do the right thing by hiring on additional help, only to find their employees are operating outside of regulations.

As proposed today, the Alaska Police Standards Council opposes much of this bill. As stated before however we appreciate all of the work that has gone into making the bill more meaningful, and we look forward to the same cooperative working spirit with this committee as we enjoyed with the last. Thank you for the opportunity to present the council's views on this proposed legislation. I am at your service should you have questions.

Dear Senator Wielechowski:

On behalf of the Soldotna Police Department employees represented by PSEA, I wish to express our support for Senate Bill 198. SB 198 will improve the quality of police officers protecting Alaskans by strengthening due process, elevating standards, and providing more tools at the Alaska Police Standards Council. This legislation improves this regulatory body and by doing so improves the quality of police officers in Alaska.

My thanks go out to you and the Senate State Affairs Committee for introducing this important legislation.

Rory L. Espy
President
Soldotna Police Bargaining Unit

4228 Laurel Street, Anchorage, Alaska 99508
Phone (907) 337-1979 FAX (907) 337-1753 E-Mail psea@psea.net

Dear Senator Wielechowski:

On behalf of the Sitka. Police Department employees represented by PSEA, I wish to express our support for Senate Bill 198. SB 198 will improve the quality of police officers protecting Alaskans by strengthening due process, elevating standards, and providing more tools at the Alaska Police Standards Council. This legislation improves this regulatory body and by doing so improves the quality of police officers in Alaska.

My thanks go out to you and the Senate State Affairs Committee for introducing this important legislation.

Timothy D White
PSEA Sitka Chapter President
Sitka Police Department
907-747-3245

Dear Senator Wielechowski,

I am writing in support of SB198 and ask you to support this bill both in Committee and on the Floor. As an Alaska State Trooper who works regularly with Court Services Officers (CSO), I am concerned with the fact that CSO's are currently serving without any type of State-recognized (APSC) certification. Requiring certification for this position will provide consistent job requirements and increased avenues for accountability on the job. Thank you.

Sincerely,
Rob Cox
(907) 350-4656

Dear Senator Wielechowski:

On behalf of the Juneau Police Department employees represented by PSEA, I wish to express our support for Senate Bill 198. SB 198 will improve the quality of police officers protecting Alaskans by strengthening due process, elevating standards, and providing more tools at the Alaska Police Standards Council. This legislation improves this regulatory body and by doing so improves the quality of police officers in Alaska.

My thanks go out to you and the Senate State Affairs Committee for introducing this important legislation.

Alaska Senate
Chairman Wielechowski
State Affairs Committee

February 24, 2012

Dear Senator Wielechowski,

My name is Charles Taylor. I am employed as a Court Services Officer (CSO) with the Department of Public Safety, Division of Alaska State Troopers, and I am stationed in Kenai. I ask you to support SB198 both in Committee and on the Floor in its entirety and specifically, as it applies to CSO's (SB 198; Section 4). Alaska Statutes currently require that peace officers be certified. However, there is currently no requirement that CSO's be certified. This bill will correct the issue consistent with current law.

Additionally, I view SB198 as a simple and inexpensive fix that protects the State and its resources. In my employment I am uniformed and equipped similar to State Troopers. Consequently, citizens often mistake me as an Alaska State Trooper. Unlike Troopers, the approximately 60 Court Services Officers serve without any type of State-recognized certification. Without formal recognition of training and qualifications through certification, the State of Alaska may be open to greater liability arising out of actions performed by CSO's. Thank you.

Sincerely,

Charles Taylor

Alaska Senate
Chairman Wielechowski
State Affairs Committee

February 24, 2012

Dear Senator Wielechowski,

I am employed as a Court Services Officer (CSO) with the Alaska State Troopers. I wish to take this opportunity to request your support of SB198. The passage of this legislation would require that CSO's be certified by the Alaska Police Standards Council (APSC) and standardize the training which CSO's receive. Passage of this legislation would greatly enhance the professionalism of the officers serving the State of Alaska court system and increase the accountability of individual officer performance.

Sincerely,

Thomas Robson

ALASKA CORRECTIONAL OFFICERS ASSOCIATION

"Walking Alaska's Toughest Beat"

March 1, 2012

Senator Bill Wielechowski
State Capitol Room 101
Juneau AK, 99801

Senator Wielechowski,

My supervisor, Brad Wilson, returned from Juneau late last night and probably will not have time before this morning's Senate State Affairs Committee meeting to personally convey his support for the protections Senate Bill 198 would extend to our brothers and sisters serving as Police Officers and Court Service Officers. I know that Brad strongly supports this Bill. I will attempt to speak for him as his subordinate, but also as a retired Correctional Officer. Correctional Officers also fall under Alaska Police Standards' training and certification requirements and they fully understand the need for the protections that SB 198 will afford for our fellow law enforcement agency members.

Correctional Officers know the valuable services that Police Officers and Court Service Officers provide. We know the importance of an Alaska Police Standards certificate and the impact that revocation can have on future employment. We acknowledge that there have been occasions when a certificate needed to be revoked, but we feel **strongly** that a certificate should never be revoked without clear and convincing evidence and due process. SB 198 will provide that protection for Police Officers.

Furthermore, Correctional Officers recognize the very real need to protect members of the law enforcement community from having their personal information publicly released. Most, who have served in this field for any length of time, can recount numerous instances of irate detainees and prisoners defiantly shouting, "*I know where you and your family live and I will get you*". Fortunately, most of the time the person does not know where the Officer lives and the threat is seldom acted upon. However, tragically there have been heartbreaking instances around the nation of just such threats being carried out. Unfortunately, more might have if the officer's personal information had been made public!

We urge the Legislature to quickly pass SB 198.

Thank you,

Jim Lecrone

March 21, 2012

Senate Judiciary Committee
Chairperson Hollis French

My name is Meagan Carmichael. I have worked as a business agent with PSEA since October 2009. During that time, employers have relied on polygraph exams to support several terminations of police officer employees. In one case, an employee declined to take a poly during an internal investigation, and the employer punished the officer by immediately placing him on admin leave, even though the CBA prohibits the employer from disciplining employees who decline polygraphs. The employer relied on his refusal to terminate the officer, and as evidence of his guilt. In another case, a citizen filed a complaint against an officer, and the complainant failed a polygraph regarding the truthfulness of his complaint. The employer disregarded the fact that the complainant failed the polygraph, and gave him a second chance by giving him a second polygraph. The internal investigative report omitted the fact that the complainant failed the polygraph, and the employer fired the officer anyway. Eyewitness testimony from five different police officers supported the officer's version of events. In a third case, an officer volunteered for and passed 2 polygraphs about the truthfulness of his statements during an investigation, but the employer ignored the fact that he passed both polygraphs and fired the officer for allegations of dishonesty anyway. He was a veteran officer with over 10 years of experience, with no prior integrity issues or discipline. When officers are fired for dishonesty, they often face losing their police certifications, and hence their livelihoods. The APSC relies on employer's internal investigations to revoke certificates, and they rely on polygraphs to revoke certificates. Officers cannot get hired as police officers in other states if their certificates are revoked in Alaska. Police officers should enjoy the same rights and protections as any other citizen of the state of Alaska, and the US. This bill will not prevent employers from asking police officers to take polygraphs, but it will protect the officer's ability to decline to take polygraphs, because they are inherently unreliable and inadmissible in court.

Thank you for your time. I am available for questions.

Re: SB 198/HB 351

As Chief of Police of the Fairbanks Police Department, I ask for this moment of your attention to express my opposition to the above-cited legislation.

I read the concerns that Mr. David Sexton, Executive Director of the Alaska Police Standards Council, provided in testimony, and find my concerns directly overlay his. At point here is the capacity to effectively provide the citizens of Alaska with genuine, effective "quality control" of police applicants through enforcing standards. The degradation of that core function that would come with the passage of this legislation puts in question how seriously we value that level of professionalism. The policing profession inherently calls for certain sacrifices from its members, but the degree of intrusion under current practices is minimal, while the value gained from those same practices has proven great—too great to abandon.

For what worth it might have, let me add this. Over a six year period, I was privileged to represent the United States in various roles generally referred to as international police advising. During that time, I saw and lived the consequences of corruption and compromised standards with the police in many countries. I left that experience nearly phobic of acts that could trigger movement down that proverbial slippery slope. That might help explain my passion in resisting what I see as an unwarranted, rather wholesale degradation of our State's efforts to maintain the highest competence of law enforcement standards that would follow passage of this legislation.

Thank you for your attention.

Sincerely,

Laren J Zager
Chief of Police

Dear Senator French,

As the senior administration of the Juneau Police Department, we must tell you that we strongly oppose Senate Bill 198.

Efforts to reduce the authority of the Alaska Police Standards Council should always be scrutinized very carefully.

Although we put together the best hiring practices possible under the law, law enforcement officers are human and are subject to all the frailties of the species.

The experts in law enforcement say that in order to keep graft and corruption out of a police agency, three systems must be in place. First, you have to hire the best possible people. Second, you have to have standards, policies, and procedures in place that provide the best direction possible as officers go about their duties , some of which can have grave consequences for the public. Finally, when officers fail to live up to the standards, there must be a system in place that removes them from the profession.

This bill appears to negatively impact our ability as law enforcement agency administrators to rely on the third requirement to hold our profession to the highest standards; the standards that you as a citizen of Alaska expect.

Finally, the idea of restricting us from displaying photographs of our employees in our workplace or restricting the news media from publishing photographs of officers working newsworthy events seems irrelevant to police certification and seems be born of unbridled paranoia.

Please reconsider supporting this poorly thought-out bill.

Thank you for your consideration as we work together to make Alaska a place that we can all be proud of.

Sincerely,

Greg Browning

Re: CS for Senate Bill 198 (STA)
ACLU Follow-Up Review of Legal Issues

Dear Chair French and Vice-Chair Wielechowski:

Thank you for the opportunity to submit further written testimony regarding the Committee Substitute for Senate Bill 198 (State Affairs), relating to the regulation of police licenses and confidentiality of police officer information.

This review supplements our prior testimony of April 2, 2012, provided to the Judiciary Committee even with that date, and addresses continued revisions to the proposed Legislation.

Section Seven: The Confidentiality Provision for Police Officer Information is Overbroad and Would Improperly Limit Access to Legitimately Needed Information

Our previous commentary noted that the broad category of personally identifying information could potentially include an officer's name, badge number, and – as the Bill explicitly states – his photograph. Making all such personally identifying information about a police officer confidential would insulate bad actors from any accountability for their actions. If this Bill were to become law as currently drafted, a woman who had been raped or harassed by an unknown police officer would be unable to even view a photo array of the officers on duty the night she was assaulted in order to provide departmental management with information necessary to identify the

perpetrator. Citizens might be unable to review even the most pedestrian police records if the records contained an officer's name or badge number.

We trust that the Judiciary Committee will more narrowly tailor these provisions to address this highly problematic drafting issue. As noted, protection of core, private information about officers is a logical and appropriate goal. However, the provision as currently written threatens meaningful public review of law enforcement practices.

Section Two: The "Clear and Convincing" Standard Is Inappropriate for Public Servants Trusted with the Power to Arrest and to Use Deadly Force

The ACLU wishes to revise previous testimony, and note that the Alaska Bar Rules require a showing of clear and convincing evidence for discipline of an attorney. Alaska Bar Rule 22(e). However, ordinary attorneys do not arrest citizens, search citizens, or shoot firearms in the course of their daily duties.

Given the nature of police officer duties, and their authorization for use of deadly force in the ordinary course of their work, a "clear and convincing" requirement for revocation of police certification is troubling.

Other than attorneys, for other categories of state licensees, a preponderance of the evidence, or "more likely than not," standard applies, as best our review of statutes and case law shows. The State should show the utmost care and caution in certifying a person given the unique privileges to drive an emergency vehicle at high speeds, carry and use a government-issued firearm, search the homes and persons of Alaskan citizens, and arrest Alaskans for alleged criminal activity.

Review of disciplinary action against Alaska police officers does not reveal that they are currently held to unreasonable standards. In fact, several of them have been permitted to retain employment in the face of activity that would leave many Alaskans out of a job.

In one recent case, a police officer told a colleague via e-mail that he wanted to see her breasts and buttocks, using a more vulgar term for both. He also repeatedly and drunkenly told a second colleague in the crude terms that he wanted to have sex with her, even after being repeatedly told by his uninterested colleague to stop. *State v. Alaska Public Safety Employees Ass'n*, 235 P.3d 197, 199 (Alaska 2010). The officer, employed with the Department of Transportation as an airport police officer was fired for the misconduct. An arbitrator reinstated him – not because he was *innocent* of the charges, but because the arbitrator ruled a lesser penalty would suffice. The Alaska Supreme Court upheld the arbitrator's decision in the face of opposition from the state employer.

Similarly, the Alaska Supreme Court also upheld an arbitrator's decision reinstating a trooper who repeatedly lied about his own conduct in training and with civilians, as well as failing to meaningfully investigate several crimes. *State v. Public Safety Employees Ass'n,* 257 P.3d 151,

153 (Alaska 2011). The arbitrator reinstated the trooper – again, not because the claims were false, but because the "State has shown lenience for minor acts of dishonesty in the past." *Id.* at 161-62. A law enforcement officer cannot serve if he cannot testify credibly in court about criminal activity he observes.

These two cases suggest that changing the standard to "clear and convincing" would make it harder to decertify a rogue officer. No one would want his wife, daughter, or mother to be stopped, handcuffed, searched, or arrested by a police officer with a history of disturbing, sexually harassing activity. No one would want to be stopped or arrested by a police officer with a history of dishonesty (even if "minor"); nor would a prosecutor want such an officer as a witness in a criminal case. We recommend the Committee and the Legislature reject the proposed change.

Section Three: The Council Should Only Give
Substantial Weight to an Arbitrator's Findings of Fact

Upon review of the outcomes of police disciplinary proceedings described above, the ACLU has further concerns regarding the statement in Section Three that the Council shall give "substantial weight" to the determinations of arbitrators.

It appears that arbitrators may reverse dismissals ***not because the department reached an incorrect factual conclusion*** as to the truth about the misconduct, but because the arbitrator second-guessed the severity of the punishment or considered the past history of what kind of behavior the agency had tolerated.

In order to protect the public, the Council should be free to set high standards regarding sexual harassment, dishonesty, or other misconduct by officers. The Council – in establishing statewide standards and protecting the public – has a vital role to fill. While the Council should give some deference to *fact-finding* by an arbitrator, it should not be required to give deference to the *scope of a penalty* enforced by an arbitrator.

Please feel free to contact the undersigned should you require any additional information. We are happy to reply to any questions that may arise, or to answer informally any questions which Members of the Committee may have. And again, thank you for the opportunity to share further thoughts.

Sincerely,

Jeffrey Mittman

SB 200 Eyewitnesses and Lineups
Sponsor Statement

Evidence provided by eyewitnesses is a vital part of many criminal investigations. According to the International Association of Chiefs of Police, some 77,000 people nationwide go to trial each year because eyewitnesses have picked them out of lineups or photo arrays. Eyewitness testimony is arguably some of the most powerful evidence presented at a trial.

Since 1989, however, DNA technology has resulted in over 230 exonerations of people who, on average, had served 12 years in prison, and 75% of those convictions involved misidentifications by eyewitnesses. When innocent people are convicted, not only do they suffer an enormous injustice, but the real perpetrator is never caught and taken off the street.

Organizations such as the American Bar Association, The Police Foundation and the National Institute of Justice have identified procedures that improve the accuracy of eyewitness identifications. Senate Bill 200 will require law enforcement agencies to adopt specific procedures for conducting photo and live line-ups. It will require the Department of Public Safety to create and administer a training program for law enforcement officers on scientific findings and the use of appropriate methods when interviewing eyewitnesses to crimes. I urge your support for this important step toward ensuring that perpetrators are caught, and innocent people are screened out during eyewitness processes.

Sponsor(s): SENATOR FRENCH

A BILL

FOR AN ACT ENTITLED

"An Act establishing certain requirements and procedures related to the identification of suspects by eyewitnesses to criminal offenses."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 12.50 is amended by adding new sections to read:

Article 4. Identification of Persons by Eyewitnesses.

Sec. 12.50.300. Eyewitness identification proceedings. (a) A law enforcement agency conducting eyewitness identification proceedings shall adopt specific procedures for conducting photo and live lineups, including at a minimum, a requirement that

(1) before a photo or live lineup, a law enforcement officer shall record as compete a description as possible of the perpetrator provided by the eyewitness, in the eyewitness's own words; the statement must include relevant information regarding the conditions under which the eyewitness observed the perpetrator, including location, time, distance, obstructions, lighting, weather conditions, any

impairments relating to the vision of the eyewitness, or other impairments; and

(2) an independent administrator shall conduct the lineup; however, when it is impracticable for an independent administrator to conduct a photo or live lineup,

(A) a blinded administrator shall conduct the lineup; or

(B) the administrator shall use a procedure that achieves neutral administration of the lineup and that consists of simultaneous presentation of the lineup.

(b) The admissibility of an eyewitness identification as evidence is not precluded by the failure of an agency to adopt procedures under or to satisfy requirements of (a) of this section.

Sec. 12.50.310. Training of law enforcement officers. The Department of Public Safety shall create, administer, and conduct a training program for law enforcement officers and recruits in the requirements, methods, technical aspects, and scientific findings related to eyewitness identification proceedings under AS 12.50.300 - 12.50.399.

Sec. 12.50.399. Definitions. For the purposes of AS 12.50.300 - 12.50.399,

(1) "administrator" means the person conducting the lineup;

(2) "blinded administrator" means an administrator who might know who the suspect is, but does not know which lineup member is being viewed by the eyewitness; "blinded administrator" includes an administrator who conducts a photo lineup through the use of a folder system or substantially similar system;

(3) "eyewitness" means a person whose identification by sight of another person may be relevant in a criminal investigation;

(4) "independent administrator" means an administrator who is not participating in the investigation of the criminal offense and is unaware of which person in the lineup is the suspect;

(5) "law enforcement agency" means a public agency that performs as one of its principal functions an activity relating to crime prevention, control, or reduction or relating to the enforcement of the criminal law; "law enforcement agency" does not include a court;

(6) "law enforcement officer" means an employee of a law enforcement agency;

(7) "live lineup" means a procedure in which a group of people is displayed to an eyewitness for the purpose of determining if the eyewitness is able to identify the perpetrator of a crime;

(8) "photo lineup" means a procedure in which an array of photographs is displayed to an eyewitness for the purpose of determining if the eyewitness is able to identify the perpetrator of a crime;

(9) "suspect" means the person believed by law enforcement to be the possible perpetrator of the offense.

MEMORANDUM

March 12, 2012

TO: Leg Legal

FROM: Cindy Smith

RE: CS for SB 200 LS1136\B

Please draft CS that makes these three changes to SB 200 Eyewitnesses and Lineups:

On page 1, at line 12, after the word "include", insert the word "relevant"

On page 2, at line 2 after the word lineup, insert the word "or"

On page 2, after line 6, insert the following: "The failure or inability to meet the requirements listed in (1) through (3) above does not preclude the admission of eyewitness identifications into evidence".

Thanks! We need this for a committee that meets on Friday, March 16th --

The failure or inability to meet the requirements listed in (1) through (3) above does not preclude the admission of eyewitness identifications into evidence.

Sec. 28.33.033. Presumptions and chemical analysis of breath or blood.

(a) Upon the trial of a civil or criminal action or proceedings arising out of acts alleged to have been committed by a person operating a commercial motor vehicle while under the influence of an alcoholic beverage in violation of AS 28.33.030, the following rules apply with regard to the amount of alcohol in the person's blood or breath at the time alleged:

(1) if there was less than 0.04 percent by weight of alcohol in the person's blood, or less than 40 milligrams of alcohol per 100 milliliters of the person's blood, or less than 0.04 grams of alcohol per 210 liters of the person's breath, that fact does not give rise to a presumption that the person was or was not under the influence of an alcoholic beverage, but that fact may be considered with other competent evidence in determining whether the person was under the influence of an alcoholic beverage;

(2) if there was 0.04 percent or more by weight of alcohol in the person's blood, or 40 milligrams or more of alcohol per 100 milliliters of the person's blood, or 0.04 grams or more of alcohol per 210 liters of the person's breath, it is presumed that the person was under the influence of an alcoholic beverage.

(b) For purposes of this chapter, percent by weight of alcohol in the blood is based upon milligrams of alcohol per 100 milliliters of blood.

(c) The provisions of (a) of this section may not be construed to limit the introduction of any other competent evidence bearing upon the question of whether the person was or was not under the influence of an alcoholic beverage.

(d) The person tested may have a physician, or a qualified technician, chemist, registered nurse, or other qualified person of the person's own choosing administer a chemical test in addition to the test administered at the direction of a law enforcement officer. The failure or inability to ~~obtain~~ adjust procedures or to obtain, meet requirements listed in (1) an additional test by a person does not preclude the admission of evidence relating to ~~the test taken at the direction of a law enforcement officer~~ eyewitness identification; the fact that the person under arrest sought to obtain such an additional test, and failed or was unable to do so, is likewise admissible in evidence.

(e) Upon the request of the person who submits to a chemical test at the request of a law enforcement officer, full information concerning the test, including the results of it, shall be made available to the person or person's attorney.

Re: SB 200: Improved Eyewitness Identification
ACLU Review

Dear Chair French and Vice-Chair Wielechowski:

Thank you for the opportunity to provide written testimony with respect to Senate Bill 200, which improves the procedures for eyewitnesses to identify criminal suspects.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout Alaska who seek to preserve and expand the individual freedoms and civil liberties guaranteed by the United States and Alaska Constitutions. In that context, **we support this legislation.**

This Bill Improves the Reliability of Eyewitness Identification to Strengthen Prosecutions and Minimize False Convictions

The proper goal of the criminal justice system is to convict the guilty and acquit the innocent while respecting individuals' constitutional rights. Mistaken eyewitness testimony frustrates this aim. As Chair French articulated in his sponsor statement, eyewitness identification, while powerful, is not infallible. Indeed, it is its confluence of persuasiveness and fallibility that has led to hundreds of false convictions. This bill is an important step to mitigate the risk of false prosecutions and convictions,

which will protect Alaskans by increasing the odds that the guilty will be convicted and the innocent will be spared.

The ACLU of Alaska supports this bill because it limits the likelihood that an eyewitness will be influenced, intentionally or not, by police. It helps to protect Alaskans' constitutional right to be free from improper prosecution and it enhances the accuracy of legitimate prosecutions.

We are pleased that the Judiciary Committee is considering Senate Bill 200 and we hope that it passes without significant amendment. Please feel free to contact the undersigned should you have any questions or seek additional information.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

Re: Senate Bill Establishing
Certain Procedures Related to the
Identification Suspects by
Eyewitnesses to criminal offenses

Dear Senator French,

Thank you for taking the time to address a very important issue. The problems with suggestive identification techniques have resulted in the convictions of many individuals who were later exonerated by unquestionable DNA evidence. The courts in Alaska are often presented with questions regarding the accuracy of identification procedures. There is no doubt that standardization of the procedures and incorporating the latest scientific knowledge will help assure the accuracy of fact finding as well as providing the courts with guidance.

Although I am sure you are familiar with the case of **Tegoseak v. State,** 221 P.2d 345 (Alaska App., 2009), I would recommend it to others interested in this issue. In that case, the Alaska Court of Appeals did a thorough survey of the current science and law. Many of those concerns are addressed in this draft bill.

I would, however, request that the bill be amended to require "sequential" presentation of the images, rather than a "simultaneous presentation". Science teaches us that with the simultaneous presentation of an array of photos, the witness often picks the photo "least unlike" the offenders. When the photos are presented individually and sequentially, the witness does not engage in the often erroneous comparison process.

Sequential viewing is the procedure adopted by the Wisconsin Attorney General, the California Commission of the Fair Administration of Justice, and by North Carolina (see discussion at page 359 of *Tegoseak.)*

There is now a wealth of science showing, perhaps contrary to common belief, that eyewitness testimony is fraught with error.

Based on my 39 years of criminal defense practice, I can assure you that this bill is an excellent starting point to use science to reduce that potential. I am not able to be the hearing today due to a court conflict so I hope that this letter may be considered instead.

Sincerely yours,

John M. Murtagh
Attorney at law

2012 LEGISLATIVE SESSION

BILL NO. SB 200

Analysis

This legislation amends AS 12.50 by adding new section Article 4. Identification of Persons by Eyewitnesses. Should this legislation pass, it will place a requirement on law enforcement agencies conducting eye witness identification proceedings shall adopt specific procedures for conducting photo and live lineups; require the Department of Public Safety to create, administer, and conduct training programs in the methods, technical aspects, and scientific findings related to eyewitness proceedings under AS 12.50.300-12.50.399; and, provides a section on definitions for purposes of AS 12.50.300-12.50.399.

There is no fiscal impact on the Department of Corrections.

STATE OF ALASKA **BILL NO.** SB 200
2012 LEGISLATIVE SESSION

Analysis

SB 200 creates minimum requirements for lineups for eyewitness identification procedures by police agencies. It requires the Department of Public Safety to train law enforcement officers in conducting lineups.

The bill would probably increase litigation concerning the validity of identification procedures, particularly in cases arising from small police agencies. But we expect to be able to address this litigation with current resources.

The Department of Law anticipates zero fiscal impact.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB200

Analysis

SB200 amends AS 12.50 by adding new sections governing eyewitness identification. This bill outlines procedures that police must follow when conducting lineups. These procedures include requiring police to obtain and record eyewitnesses' statements, in their own words, that detail specific information about their observations prior to being shown a lineup. This bill also requires, whenever practical, the lineup be conducted by an administrator who is not directly participating in the investigation and is unaware of suspect's identity in the lineup.

This legislation will have no fiscal impact on the Public Defender Agency.

Analysis
As of: Feb 27, 2012

FRANK MOSES TEGOSEAK, Appellant, v. STATE OF ALASKA, Appellee.

Court of Appeals No. A-10074, No. 2248

COURT OF APPEALS OF ALASKA

221 P.3d 345*; *2009 Alas. App. LEXIS 185

December 11, 2009, Decided

PRIOR HISTORY: [**1]

Appeal from the Superior Court, Third Judicial District, Anchorage, Michael L. Wolverton, Judge. Trial Court No. 3AN-05-5489 Cr.

CASE SUMMARY:

PROCEDURAL POSTURE: Defendant sought review of an order from the Superior Court, Third Judicial District, Anchorage (Alaska), which denied his motion to suppress a citizen's identification of him as the driver of a vehicle and convicted him of felony driving under the influence and driving with a suspended license.

OVERVIEW: Defendant was convicted of felony driving under the influence and driving with a suspended license. Both the grand jury and the trial jury heard the testimony of a private citizen who observed a vehicle being driven in an obviously impaired manner, and who later identified defendant from a photographic lineup as having driven the vehicle. On appeal, the court found that it was extremely unlikely that the grand jurors' decision to indict defendant would have been altered if they had known that the citizen's wife identified another man's photograph in the photo lineup, or if they had known that the citizen's identification of defendant's photograph was uncertain. Even assuming that the lineup procedure was unnecessarily suggestive, any error was harmless beyond a reasonable doubt. An officer testified that a codefendant stated that he had taken over driving the vehicle after a stop because defendant had been driving so poorly that he thought defendant was going to kill them. The jury would have convicted defendant even if the citizen had been unable to identify him at trial, and even if the jurors had been told that the citizen was unable to identify the driver in the photo lineup.

OUTCOME: The court affirmed the judgment of the trial court.

LexisNexis(R) Headnotes

Criminal Law & Procedure > Grand Juries > Evidence Before the Grand Jury > Exculpatory Evidence

[HN1] Under Alaska law, a prosecutor must inform a grand jury of exculpatory evidence known to the government.

Criminal Law & Procedure > Grand Juries > Evidence Before the Grand Jury > Exculpatory Evidence

[HN2] For purposes of defining a prosecutor's duty to present evidence to a grand jury, courts define the term "exculpatory evidence" narrowly: it means only the type of evidence that tends, in and of itself, to negate the defendant's guilt.

Criminal Law & Procedure > Eyewitness Identification > Fair Identification Requirement

[HN3] A witness's identification is admissible if the State demonstrates the reliability of the identification under the totality of the circumstances. The phrase "totality of the

circumstances" encompasses five factors: 1) the witness's opportunity to view the perpetrator during the crime; 2) the witness's degree of attention; 3) the accuracy of any prior description given by the witness; 4) the witness's level of certainty when making the identification; and 5) the length of time between the crime and the witness's identification.

Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Constitutional Errors
Criminal Law & Procedure > Appeals > Standards of Review > Harmless & Invited Errors > Definitions
[HN4] Constitutional error requires reversal of a criminal conviction unless the error is shown to be harmless beyond a reasonable doubt. In assessing whether an error is harmless beyond a reasonable doubt, the question is whether there is a reasonable possibility that the error affected the result.

COUNSEL: Tracey Wollenberg, Assistant Public Defender, and Quinlan Steiner, Public Defender, Anchorage, for the Appellant.

Eric A. Ringsmuth, Assistant Attorney General, Office of Special Prosecutions and Appeals, Anchorage, and Richard A. Svobodny, Acting Attorney General, Juneau, for the Appellee.

JUDGES: Before: Coats, Chief Judge, and Mannheimer and Bolger, Judges. BOLGER, Judge, concurring.

OPINION BY: MANNHEIMER

OPINION

[*346] MANNHEIMER, Judge.

Following a jury trial, Frank Moses Tegoseak was convicted of felony driving under the influence and driving with a suspended license. [1] Both the grand jury that indicted Tegoseak and the trial jury that convicted him heard the testimony of Robert Maestas, a private citizen who observed a Ford Bronco being driven in an obviously impaired manner, and who later identified Tegoseak from a photographic lineup as having driven the Bronco.

1 *AS 28.35.030(n)* and *AS 28.15.291(a)(1)*, respectively.

In pre-trial motions, Tegoseak argued that the photographic lineup was conducted in an unduly suggestive manner and that the superior court should therefore suppress Maestas's [**2] identification of Tegoseak as the driver. The superior court, employing the test set forth in *Manson v. Brathwaite, 432 U.S. 98, 97 S.Ct. 2243, 53 L.Ed.2d 140 (1977)*, concluded that Maestas's identification of Tegoseak was reliable despite the arguable flaws in the way the photo lineup was conducted. The court therefore denied Tegoseak's motions and allowed evidence of the identification to be admitted at Tegoseak's trial.

We agree with Tegoseak that there are troublesome aspects to the photographic lineup procedure in this case. In addition, we are aware that scientific research conducted during the past thirty years has cast doubt on the analysis set forth in *Manson v. Brathwaite* -- raising questions as to whether that analysis is a valid method for ascertaining whether a photographic lineup has yielded a reliable identification. Nevertheless, we conclude that any potential suggestiveness in the photo lineup in Tegoseak's case was harmless beyond a reasonable doubt, and we therefore affirm Tegoseak's convictions.

Underlying facts

On June 19, 2005, Robert and Michelle [*347] Maestas [2] were driving around the Anchorage area, looking for a house to purchase. They observed a Ford Bronco that was [**3] traveling slower than normal. While they watched, the Bronco swerved and repeatedly changed lanes without apparent cause.

2 Robert and Michelle Maestas were formerly known as Robert and Michelle Mayer; they changed their names prior to Tegoseak's trial. Thus, in the grand jury transcript, they are referred to as "Mayer". But at trial, and in the parties' briefs to this Court, they are referred to by their current names.

The Maestases could see three occupants in the vehicle: two males in the front seat, and another person in the back seat. Using her cell phone, Michelle Maestas called the Anchorage Police dispatcher to report this vehicle because she and her husband thought that the driver was drunk.

After making this call to the police, the Maestases temporarily lost sight of the Bronco, but they came upon it again a few moments later. It was still being driven in an erratic manner. The Maestases then decided to follow the car. Michelle Maestas called the Anchorage police once more, and this time she remained on the line to assist officers in locating the Bronco as it continued to travel through Anchorage.

The Maestases followed the Bronco to the parking lot of Bell's Nursery on DeArmoun [**4] Road, where the Bronco stopped. Robert Maestas parked the couple's

car near the nursery parking lot in order to keep an eye on the Bronco while they waited for the police to arrive.

While the Bronco was parked in the Bell's Nursery parking lot, Mr. and Mrs. Maestas saw the driver and the front-seat passenger emerge from the Bronco and swap places. While these two men were outside the vehicle, Robert Maestas was able to observe them.

Maestas described both males as having dark or black hair. He described the man who was originally driving the Bronco (and who switched to the passenger seat in the nursery parking lot) as having a "slender build" and "wearing a black shirt". Maestas described the other man (that is, the man who was originally in the passenger seat of the Bronco, and who began driving the vehicle after the switch in the nursery parking lot) as "a heavier set gentleman" who was wearing a "white ... T-shirt".

After the two men switched places in the Bronco, the Bronco left the nursery parking lot and headed east on DeArmoun Road. Just after the Bronco started up DeArmoun, Anchorage Police Officer Gerald Asselin arrived and conducted a traffic stop of the vehicle.

When Officer Asselin [**5] stopped the Bronco, he found that there were two men and one woman inside the vehicle. The man driving the vehicle was wearing a white T-shirt, and the male passenger was wearing a black shirt. The driver was later identified as Edgar Henry, while the passenger was identified as Tegoseak.

Because his dispatcher had informed him that the driver and passenger had just switched places, Officer Asselin questioned both men about who had been driving the Bronco before the vehicle stopped at Bell's Nursery. Based on the men's responses (both verbal and non-verbal), Asselin concluded that Tegoseak had been driving the vehicle prior to the stop at Bell's. In particular, as Asselin later testified, Edgar Henry told the police that he had taken over driving the Bronco after the stop at Bell's Nursery because Tegoseak had been driving so poorly that he thought Tegoseak was going to kill them.

Officer Asselin conducted field sobriety tests of both Henry and Tegoseak. Based on the results of these tests, the officer concluded that he had probable cause to arrest both men. A subsequent breath test showed that Tegoseak had a blood alcohol content of .227 percent (in other words, just under three times [**6] the legal limit). [3]

3 *See AS 28.35.030(a)(2).*

One week later, on June 26th, Officer Asselin contacted Robert and Michelle Maestas and asked them to view a photographic lineup to see if they could identify the two men in the Bronco. This photo lineup was comprised of two separate arrays of six photographs [*348] each. The two arrays were composed so that each of them contained a photograph of one of the men in the Bronco. (The first array contained a photograph of Edgar Henry in position number 5; the second array contained a photograph of Frank Tegoseak in position number 5.)

Asselin showed the photo arrays to Mr. and Mrs. Maestas separately. He told them that he would show them two photo arrays, and he asked them to let him know if they "recognize[d] any of those individuals as being involved." When Asselin showed the first array to Mr. and Mrs. Maestas, he reminded them that, if they did not recognize anyone from the first array of six photographs, he had a second set of photographs to show them.

After Michelle Maestas examined the two arrays of photographs, she picked one person from among the twelve photographs as having been in the Bronco -- but that person was neither Henry nor Tegoseak.

After [**7] Michelle Maestas failed to identify either Henry or Tegoseak, Officer Asselin showed the photographs to Robert Maestas.

When Robert Maestas was shown the first array of six photographs, he selected *three* people from this array as the possible occupants of the Bronco. Maestas told Asselin, "[I]t could have been [number] 1 or 3 that was driving [the Bronco originally], and [number] 5 that was in the passenger seat. ... I think [that], between 1 and 3, those two [photographs] kind of look like the driver that we originally pulled up next to."

The three photographs that Maestas selected were of Edgar Henry and two "fillers" -- that is, two people whose photographs were included, not because the police suspected that they were connected to this incident, but rather to fill out the six-photograph array.

At this point -- that is, after Maestas had apparently identified both the original driver and the original passenger from among the photographs in the first array -- Asselin said to Maestas, "Let me try to at least show you [the second array of photographs]; then you can see the entire compilation of photos. So far, you've said [that] 1 and 3 [in the first array] could be the driver." Asselin [**8] then showed Maestas the second array of six photographs.

When Maestas looked at the second array of photos, he told Asselin that photograph number 5 in this second array could also potentially be the initial driver of the Bronco (that is, the man who was driving before the driver and passenger switched places in the nursery parking lot). Maestas told Asselin that the man "originally driving the car" was "either [number] 5 in [the second array] or [number] 1 in [the first array]." (As we

explained above, Tegoseak's picture was number 5 in the second photo array.)

Asselin asked Maestas to memorialize his identifications on two different "Photographic Lineup" forms. These forms (one for each of the two arrays) apparently had boxes on them that corresponded to the photographs in the arrays. Asselin asked Maestas to place a check mark on the boxes that corresponded to the photographs he had selected.

On the first of these forms (*i.e.,* the form that corresponded to the first photo array), Maestas stated that he identified photograph number 5 in the first array as the man who began driving the Bronco *after* [**9] the car stopped at the nursery. (As explained above, this photograph was of Edgar Henry.)

Asselin then handed Maestas the second form (*i.e.,* the form corresponding to the second photo array). Although Maestas had told Asselin that he was uncertain whether the original driver of the Bronco was photograph number 1 from the first array or photograph number 5 from the second array, Asselin directed Maestas to put a check mark in only one box -- the box corresponding to photograph number 5 from the second array.

Asselin invited Maestas to add a handwritten notation explaining his uncertainty about the identification. Maestas wrote on the form, "When looking at the photos, both [photograph] # 5 on [the second array] and [photograph] # 1 on [the first array] look similar to the original driver that we ... first [saw]."

However, Officer Asselin added his own separate notation to this form. In the officer's notation, he indicated that Maestas had [*349] made an identification from the photographs, and that the person Maestas had identified was Frank Tegoseak (who, as we explained above, was photograph number 5 in the second array). Maestas signed this form.

This same ambiguity concerning the nature or precision [**10] of Maestas's identification is reflected in the testimony given by Asselin and Maestas at the evidentiary hearing.

At the hearing, Asselin testified that he did not remember the exact exchange between himself and Maestas, "but it was clear to [him], based upon the [conversation], that [Maestas] identified [photograph] number 5 [in the second array] as being ... the person who was originally driving the vehicle." Asselin conceded that, while he was showing the photographs to Maestas, "there was some conversation ... where [Maestas] would say, 'Well, [photograph] number 1 [in the first array] looks very similar', but [Maestas] came back to it being [photograph] number 5 [in the second array]."

When Maestas testified at the evidentiary hearing, he acknowledged that he was hesitant to positively identify either photograph 1 from the first array or photograph 5 from the second array -- "because the two photos look similar, ... and [because it was] a week [after the incident]." When Maestas was asked whether he had made a "positive identification", he responded, "I wouldn't say it was 100 percent positive; no."

After hearing this testimony, and after listening to Officer Asselin's tape recording [**11] of the photo lineup procedure, Superior Court Judge Michael L. Wolverton concluded that the photo lineup procedure was not unduly suggestive.

In particular, Judge Wolverton found that the "filler" photographs were well-selected (in the sense that the people depicted in these filler photographs were visually similar to the two suspects). The judge suggested that this fact (the good selection of fillers) was potentially the explanation for Robert and Michelle Maestas's difficulty in selecting Henry and Tegoseak from among the photographs.

Judge Wolverton also concluded that there was nothing wrong in Officer Asselin's act of drawing Robert Maestas's attention to the second array after Maestas had already declared that the first array contained photographs of both suspects. The judge found that Asselin was not trying to suggest that Maestas had chosen prematurely, or to suggest that the second array contained a photograph of at least one of the suspects. Rather, Judge Wolverton found that Asselin was simply "trying to explain" the procedure (*i.e.,* the need to examine both arrays) and to request that Maestas withhold his final judgement until he had seen all twelve of the photographs.

Judge [**12] Wolverton also concluded that, given the circumstances of the case, there was essentially no possibility of a misidentification. The judge remarked that "this might [have been] a different situation if [the occupants of the Bronco] had not been followed and [immediately arrested] -- almost like a hand-off to the police -- [but] we know who was in the vehicle [when] it was stopped, [and the photo lineup] was [merely] a determination as to ... who was driving when" -- a determination that was made "easier ... because one [man] was wearing a white shirt and [the other] was wearing a black shirt."

Tegoseak's claim that his indictment is flawed because the prosecutor did not inform the grand jury that Michelle Maestas failed to identify Tegoseak as one of the men in the Bronco, and that Robert Maestas's identification of Tegoseak was less than certain

[HN1] Under Alaska law, a prosecutor must inform the grand jury of exculpatory evidence known to the government. [4] Tegoseak contends that the prosecutor in his case violated this duty in two ways. First, Tegoseak argues that the prosecutor was required to tell the grand jury that Michelle Maestas had not identified Tegoseak as one of the men in the Bronco [**13] -- and that, in fact, the only man she identified as having been in the Bronco [*350] was a "filler". Second, Tegoseak argues that the prosecutor was required to tell the grand jury that Robert Maestas's identification of Tegoseak was less than certain.

> 4 *Cameron v. State, 171 P.3d 1154, 1157 (Alaska 2007); Frink v. State, 597 P.2d 154, 164-66 (Alaska 1979).*

[HN2] For purposes of defining a prosecutor's duty to present evidence to the grand jury, we have defined the term "exculpatory evidence" narrowly: it means only the type of evidence "that tends, in and of itself, to negate the defendant's guilt". [5] Thus, we have held that a witness's failure to identify the defendant as the perpetrator of the crime, or the fact that a witness's post-event description of the perpetrator did not match the defendant, was not "exculpatory evidence", given the other evidence linking the defendant to the crime. [6]

> 5 *See, e.g., Cathey v. State, 60 P.3d 192, 195 (Alaska App. 2002); State v. McDonald, 872 P.2d 627, 639 (Alaska App. 1994).*
>
> 6 *See, e.g., Wilkie v. State, 715 P.2d 1199, 1201-02 (Alaska App. 1986); Tookak v. State, 648 P.2d 1018, 1020-21 (Alaska App. 1982). See also Abruska v. State, 705 P.2d 1261, 1272-73 (Alaska App. 1985)* [**14] (holding that the victim's potentially contradictory statements about whether it was the defendant who shot him were not exculpatory evidence).

For example, in *Haag v. State, 117 P.3d 775 (Alaska App. 2005)*, the defendant (who was white) argued that the prosecutor violated the duty to present exculpatory evidence because the prosecutor failed to inform the grand jurors that a witness to the crime initially reported that the two perpetrators were black. *Id. at 777-78*. We held that, in the context of the other evidence linking Haag to the crime, the witness's description of the perpetrators as black was not exculpatory: "The fact that [the witness] initially stated that both robbers were black is certainly something that a defense attorney might use to attack [the witness's] later identification of Haag as one of the robbers. But this is not information that *negates Haag's guilt in and of itself" Haag, 117 P.3d at 778* (emphasis added).

In Tegoseak's case, the police responded quickly to the Maestas's report of the Bronco being driven in an erratic manner, and there is essentially no doubt that, when the police stopped the Bronco, the vehicle contained the same people that Michelle and [**15] Robert Maestas had observed minutes before. As Judge Wolverton noted when he issued his rulings on Tegoseak's pre-trial motions, there is essentially no possibility that Tegoseak was misidentified as one of the drivers of the Bronco.

Given these circumstances, it is extremely unlikely that the grand jurors' decision to indict Tegoseak would have been altered if they had known that Michelle Maestas identified another man's photograph in the photo lineup, or if they had known that Robert Maestas's identification of Tegoseak's photograph was uncertain. For this reason, either the evidence that Tegoseak complains of was not "exculpatory" as that term is defined in our cases, or the State's failure to apprise the grand jurors of this evidence was harmless.

Tegoseak's claim on appeal, and a preliminary discussion of the problems that can be encountered in post-crime eyewitness identification

On appeal, Tegoseak renews his argument that the photographic lineup procedure was unduly suggestive, and he further argues that when the facts of the case are analyzed under the factors set forth in *Brathwaite,* this analysis fails to demonstrate that Robert Maestas's identification of him was reliable.

The [**16] photographic lineup in this case does not appear to be overtly suggestive. As Judge Wolverton noted when he denied Tegoseak's suppression motion, the ten filler photographs are quite similar to the two suspects' photographs in facial characteristics and hair style. In other words, Henry's and Tegoseak's photographs did not stand out from the filler photographs in such an obvious way as to practically single out these two men as the suspects.

But even though a photographic lineup may not be overtly suggestive, the procedure by which the photographs are selected, the procedure by which a photo lineup is displayed to a witness, and the procedure by which the witness's identification is elicited, can engender suggestiveness -- even when [*351] this is not the intention of the officer conducting the lineup.

Medical researchers have long recognized the phenomenon that testers influence the persons they are testing. Even though one might think that a test subject's physical reaction to an experimental drug or therapy would remain the same regardless of the mental attitude or desires of the researchers, the truth is that the re-

searchers' expectations regarding the experiment *do* make a difference to [**17] the result.

One well-known problem is the "placebo effect": the recognized phenomenon that when a person *believes* that they are receiving an effective drug or therapy, their body will physically react in accordance with their belief -- even though the substance or treatment they are receiving would ordinarily do nothing to alleviate their condition.

But the placebo effect is compounded by another difficulty known as the "Clever Hans effect". This is the problem that researchers, because of their knowledge of the experiment and their expectations concerning the outcome, can unintentionally influence the responses of the test subjects -- by unconscious signaling, or by small differences in how they interact with test subjects who are receiving the real drug or therapy as opposed to a placebo. [7]

7 In 1891, William von Osten began displaying his horse, "Clever Hans", to the public. Hans would answer questions by tapping his hoof -- either by tapping out a number, or by tapping out the letters of the alphabet that corresponded to the answer (with one tap equaling "A", two taps equaling "B", and so on). Hans could apparently perform mathematical calculations, tell time, identify musical intervals, [**18] and name people.

Von Osten did not intend to trick people. He believed that animals possessed an intelligence equal to that of humans -- and, in his quest to prove this, he attempted to teach many animals how to do simple calculations. However, Clever Hans was the only animal who showed any ability.

The first scientific test of Hans's ability was conducted in 1904 by Professor Carl Stumpf. Stumpf looked for evidence of cheating or trickery to explain Hans's ability, but he found none, and he subsequently endorsed Hans's abilities as genuine. Following Professor Stumpf's endorsement, Clever Hans became a sensation, and people flocked to see him.

In 1907, a group of thirteen scientists (the "Hans Commission") re-tested Clever Hans. Their test is now recognized as a classic experiment in psychology.

Because there was no evidence of connivance or cheating, the scientists began with the assumption that Hans did have an ability of some kind, and they designed their experiment to find out what this ability was.

Hans was tested inside a large tent to avoid outside distractions, such as spectators. The experiment was designed in the following way:

> . A large number of questions were used, to eliminate [**19] the effects of chance;
>
> . Different people posed these questions, in case Hans was picking up signals from his owner, von Osten;
>
> . The questioners sometimes knew the answers to the questions they were asking, but other times they did not;
>
> . The questioners would stand at different distances from Hans during different trials; and
>
> . Some trials were run with Hans blinkered.

The first important finding was that Clever Hans needed to have visual contact with the questioner in order to answer correctly. The farther away the questioner stood, the less accurate Hans became. And when Hans's peripheral vision was obstructed by blinkers, his ability to answer was diminished even further.

The other major finding was that Hans could only answer a question correctly if the questioner also knew the answer to the question. When the questioner did not know the answer to the question, Hans could not give the answer.

These facts -- that Hans could only answer a question correctly if it was posed by a questioner who knew the answer, and only if Hans could see the questioner -- led the psychologists to perceive that Hans was not using intelligence to work out the answers; rather, he was responding to visual cues [**20] given unwittingly by the questioner. These unwitting visual cues took the form of increases or decreases in the tension of the questioner's body, changes in the questioner's facial expression, and other involuntary movements that the questioner would make when Hans reached the right answer.

The results of the experiment with Clever Hans led the scientists to the key insight that an

animal's -- or a person's -- behavior can be influenced by subtle and unintentional cues given by a questioner or researcher.

This effect -- now known as the "Clever Hans effect" -- is one of the primary reasons why scientific tests (and, in particular, clinical trials) must be done using a "double-blind" method: a procedure in which neither the questioner/researcher nor the subject being tested knows the nature of the information required or the treatment being administered.

[*352] In the late 1980s (that is, approximately ten years after the Supreme Court issued its decision in *Brathwaite*), Professor Gary L. Wells of Iowa State University noted that photographic lineups could be affected by [**21] these same difficulties -- that the police officers who conducted photographic lineups could unwittingly be influencing the witnesses they were interviewing. Professor Wells accordingly proposed that photo lineups (like medical trials) should be conducted using a double-blind procedure. [8] In other words, (1) the lineup should be conducted by an officer who does not know which photograph in the lineup represents the suspect and which photographs are fillers, and (2) because witnesses will naturally assume that any photo lineup will contain a photograph of the person whom the police suspect, the witness must affirmatively be told that the lineup may not contain a photograph of the perpetrator.

8 Gary L. Wells, *Eyewitness Identification: a system handbook* (Carswell Legal Publications, 1988); Gary L. Wells & C. A. Elizabeth Luus, "Police Lineups as Experiments: Social methodology as a framework for properly conducted lineups", 16 Personality and Social Psychology Bulletin 106-117 (1990).

In his article, "The Double-Blind Lineup: General Comments and Observations" (2008), [9] Professor Wells notes that police officers can inadvertently (and often unconsciously) influence witnesses by such seemingly [**22] innocuous comments as, "I noticed you paused on photograph number 3". Or, when a witness hesitates between two or three photographs, the officer might say to the witness, "Tell me about photograph 2" -- directing the witness's attention to the photograph that the officer knows is the suspect, rather than to one of the fillers. Or, when the witness has picked a filler, the officer might ask, "Is there any other photograph that stands out to you?" -- a question that obviously would not be asked if the witness had selected the suspect.

9 Available at: www.psychology.iastate.edu/~glwells/homepage.htm, through the link "Meet the double-blind lineup".

According to Professor Wells, there are currently close to 200 cases in which (1) the police identified a person as the suspected perpetrator of a crime, (2) the suspect was included in a photographic or live lineup, (3) the witness who viewed the lineup identified the suspect as the perpetrator, (4) the suspect was convicted, but (5) post-trial DNA testing proved that the suspect was innocent.

One of these cases recently received national publicity through the publication of the book, *Picking Cotton,* [10] and the related story that aired in March [**23] 2009 on the CBS television news show "60 Minutes". [11]

10 Jennifer Thompson-Cannino & Ronald Cotton, with Erin Torneo, *Picking Cotton: Our Memoir of Injustice and Redemption* (St. Martin's Press, 2009).

11 Both the video and the text of the 60 Minutes story, "Picking Cotton" (originally aired in March 2009) are available at:

www.cbsnews.com/stories/2009/03/06/60minutes/main4848039.shtml

As described in the 60 Minutes story, in the summer of 1984, a man broke into Jennifer Thompson's apartment and raped her at knife-point. During the attack, Thompson forced herself to stay alert and study this man carefully -- his physical characteristics, his voice, his accent -- so that, if she survived, she could make sure that he was convicted and sentenced to prison. After about half an hour, Thompson tricked the rapist into letting her get up to fix him a drink; she then took the opportunity to escape from her apartment through the back door.

Police Detective Mike Gauldin interviewed Thompson at the hospital, and he worked with Thompson to assemble a composite sketch of the rapist. After the sketch was broadcast, the police started to receive tips

about the crime. One of these tips was about a young man [**24] named Ronald Cotton. Cotton worked at a restaurant near Thompson's apartment, and he had a previous conviction for breaking and entering, as well as a juvenile record for sexual assault.

Three days after the rape, Detective Gauldin assembled a six-photograph lineup that contained Cotton's picture, and then he called Thompson to come view the lineup. Thompson studied the photographs for about [*353] five minutes, and then she identified Cotton as the man who had raped her.

Thompson subsequently picked Cotton from a live lineup. After Thompson made the live lineup identification, the police informed her that she had picked the same man that she previously selected from the photo lineup. When she heard this, Thompson remembers thinking, "Bingo! I did it right; I did it right."

Later, Thompson identified Cotton again when she testified at his trial. Cotton was convicted and sentenced to life imprisonment plus 50 years.

While in prison, Cotton met a man named Bobby Poole. Poole looked very similar to Cotton; in fact, some of the prison stewards mistook them for each other. Then Cotton heard, from a fellow inmate, that Poole had admitted raping Thompson. Based on this information, Cotton received a [**25] new trial.

At the new trial, Cotton's lawyers summoned Bobby Poole to court so that Jennifer Thompson could see him. But when Thompson looked at Poole, she did not recognize him. Indeed, she felt nothing but anger toward Cotton and his attorneys. She remembers thinking, "How dare you question me? How dare you [suggest that I] could possibly have forgotten what my rapist looked like? ... The one person [I] would never forget?"

Cotton was again convicted. This time, he received two life sentences.

Seven years later (ten years after the rape), Cotton watched the O.J. Simpson trial on television and learned about DNA. He convinced his lawyer to investigate the possibility of DNA testing. By luck, the Birmingham, North Carolina police still had the rape kit, and the kit contained enough viable sperm to conduct a DNA test. The result: Bobby Poole was indeed the rapist -- and Ronald Cotton was innocent.

For people who care about our justice system, this is a bittersweet tale. A man spent a decade in prison for a crime he did not commit -- and yet he was finally exonerated, and he has even become reconciled with the woman whose testimony sent him to prison. Cotton and Thompson are now friends; they [**26] co-authored the book *Picking Cotton,* which describes the case, and they are prominent advocates of reform in police identification practices.

But for the judges and lawyers who administer and actively participate in the criminal justice system, this story has a more fundamental and disquieting aspect. What happened in Ronald Cotton's case lends anecdotal support to the scientific research that casts doubt on the validity of the *Brathwaite* method for assessing the reliability of eyewitness identifications.

The test established by the Supreme Court in Manson v. Brathwaite, and how this test relates to the facts of the Ronald Cotton case

In *Brathwaite,* the United States Supreme Court had to decide whether an eyewitness identification should be suppressed if the identification procedure was unnecessarily suggestive. As this Court explained in *Anderson v. State, 123 P.3d 1110, 1115 (Alaska App. 2005)*, the precise issue confronting the Supreme Court in *Brathwaite* was whether, following an unnecessarily suggestive identification procedure, the witness's identification should be automatically suppressed or whether, instead, the government should be given the opportunity to demonstrate the reliability [**27] of the witness's identification despite the undue suggestiveness of the procedure.

In *Brathwaite,* the Supreme Court rejected a rule of *per se* suppression and instead held that [HN3] the witness's identification would be admissible if the State could demonstrate the reliability of the identification under the "totality of the circumstances". [12] The Supreme Court defined this phrase, "totality of the circumstances", as encompassing the five factors that the Court had set forth in an earlier decision, *Neil v. Biggers:* [13]

> [*354] . the witness's opportunity to view the perpetrator during the crime,
>
> . the witness's degree of attention,
>
> . the accuracy of any prior description given by the witness,
>
> . the witness's level of certainty when making the identification, and
>
> . the length of time between the crime and the witness's identification.

Brathwaite, 432 U.S. at 114, 97 S.Ct. at 2253 (citing *Neil v. Biggers, 409 U.S. at 199-200, 93 S.Ct. at 382*).

12 *Brathwaite, 432 U.S. at 112-14, 97 S.Ct. at 2252-53*, citing *Stovall v. Denno, 388 U.S. 293, 302, 87 S. Ct. 1967, 18 L. Ed. 2d 1199*; *388 U.S.*

293, 87 S.Ct. 1967, 1972, 18 L. Ed. 2d 1199; *388 U.S. 293, 87 S. Ct. 1967, 18 L.Ed.2d 1199 (1967).*
13 *409 U.S. 188, 93 S.Ct. 375, 34 L.Ed.2d 401 (1972).*

With the *Brathwaite* reliability test in mind, we now return to the facts [**28] of the Ronald Cotton case.

One of the crucial events in that case occurred after Bobby Poole was finally identified as a suspect in the case and Ronald Cotton was granted a second trial. At that second trial, Poole was summoned to court so that Jennifer Thompson would have the opportunity to view Cotton and Poole together.

As we explained earlier in this opinion, Thompson spent half an hour in Poole's presence during the rape. During that half hour, Thompson consciously paid attention to, and made a point of remembering, Poole's physical features and the nuances of his voice and speech, so that she could be sure to identify him later. Nevertheless, when Thompson saw the two men together in court, she did not recognize Poole as her attacker. Indeed, even though the two men apparently had similar physical features, Thompson did not even experience any uncertainty. She reaffirmed that Cotton was the rapist -- and Cotton was convicted again.

Years later, when the DNA test results finally proved Cotton's innocence, Detective Gauldin (the detective who conducted the photo lineup) was the one who went to tell Thompson that Poole was the rapist and that Cotton was innocent. Thompson's reaction [**29] was, "No, that can't be true; it's not possible. ... I know Ronald Cotton raped me. There's no question in my mind."

Moreover, even after Thompson knew the truth, her memory of the event remained the same: whenever she thought about the rape, or dreamed about it, it was still Cotton's face that she saw.

This last aspect of the case is particularly troubling: the fact that Thompson's false memory of Cotton as her attacker persisted even after Thompson knew (intellectually) that Cotton was innocent and that Poole had committed the rape. This false memory was clearly the result of the identification procedures employed during the investigation -- because Thompson was not previously acquainted with Cotton, and because she was in Poole's presence (not Cotton's presence) during the half-hour of the rape. But if the five *Brathwaite* factors are applied to this case, it is obvious that a court would have allowed Thompson to testify and identify Cotton as her assailant -- even if the court had found that the photo lineup was unnecessarily suggestive.

Thompson had plenty of opportunity (a half an hour) to view the rapist. And during the attack, she consciously devoted her attention to the rapist, [**30] so that she would remember his physical characteristics and voice. Shortly after the rape, when Thompson was interviewed at the hospital, she worked with the police to develop a composite drawing of her attacker -- a drawing that resembled Ronald Cotton. And when Thompson was shown the photo lineup three days after the rape, she declared she was certain that Cotton was her attacker.

One might conclude that this is simply a rare and unfortunate instance where application of the *Brathwaite* factors would lead a court to admit evidence of a mistaken identification. But there is another, more troubling conclusion that could be drawn: that the *Brathwaite* factors are inadequate to the task of sorting reliable identifications from unreliable identifications.

A photographic lineup is generally conducted in private between a police investigator and a witness. As Professor Wells notes in the recent article he co-authored with Deah S. Quinlivan concerning the validity of the *Brathwaite* factors, when a police investigator conducts a photographic lineup, the investigator interacts directly with the witness: in effect, they have a conversation [*355] about the photos. [14] If the police investigator knows which [**31] photograph represents the person who is under suspicion, there is a danger that the witness's identification will be influenced by the officer's knowledge and expectations, even though, seemingly, there is nothing suggestive about the procedure:

> [When the police investigator knows which photograph is the suspect's photograph, this] creates a situation very similar to one that has been extensively studied by psychological scientists in other contexts in which a tester's knowledge or expectations influence the person being tested in a direction that is consistent with the tester's knowledge or expectations. ... There is no presumption that these tester effects are the result of intentional efforts by the tester or that the tester is aware of influencing the person being tested. ... [T]he concern here is with the kinds of influences that are unintentional, natural by-products of the [personal] interaction.

Wells & Quinlivan at 7-8.

14 Gary L. Wells & Deah S. Quinlivan, "Suggestive Eyewitness Identification Procedures and the Supreme Court's Reliability Test in Light of Eyewitness Science: Thirty Years Later" [*i.e.*, 30 years after *Brathwaite*], 33 Law and Human Be-

havior 1-24 (2009), DOI [Digital Object Identifier] 10.1007/s10979-008-9130-3.

Moreover, the *Brathwaite* decision appears to be premised on the assumption that, despite the suggestiveness of an identification procedure, a witness retains a "true" memory of the event which may be independently sufficient to reliably identify the perpetrator -- [**32] if the witness had an adequate opportunity to observe the perpetrator, if the witness was paying attention, etc. In effect, the five *Brathwaite* factors are the test that a court uses to determine if the witness is relying on this presumed independent memory rather than on the result suggested by the identification procedure.

Indeed, even the dissent in *Brathwaite* subscribes to this notion that a witness retains a "true" memory of the event that exists independent of the suggestive photo lineup or show-up, and that this memory can be retrieved despite the previous suggestive procedure. Justice Marshall, writing in dissent, suggested that "when a prosecuting attorney learns that there has been a suggestive confrontation", the prosecutor can "easily" cure this error by "arrang[ing] another lineup under scrupulously fair conditions." *Brathwaite, 432 U.S. at 126-27, 97 S.Ct. at 2259.*

But as Professors Wells and Quinlivan point out in their article on *Brathwaite,* "the dominant view among psychological scientists [is] that, once an eyewitness has mistakenly identified someone, that [mis-identified] person 'becomes' the witness' memory[,] and the error will simply repeat itself [in subsequent [**33] identifications]." [15]

15 *Id.* at 9.

This observation is vividly corroborated by the facts of the Ronald Cotton case. Even when Jennifer Thompson was confronted with Bobby Poole (the real rapist) in court, she had no recollection of him, and she re-affirmed her identification of Ronald Cotton as her attacker. Indeed, this false memory persisted even after Thompson *knew* that the memory was false: she continued to see Ronald Cotton's face when she thought back to the rape even after she learned that the DNA testing had demonstrated Cotton's innocence.

Moreover, even assuming that a "true" memory exists independently of a witness's exposure to a suggestive identification procedure, there is reason to doubt whether the five *Brathwaite* factors are a valid method for judging whether a witness's testimony reflects that independent memory.

For instance, according to the Wells and Quinlivan article, when a witness is asked to estimate how long they were able to observe the perpetrator of a crime, the witness will often grossly over-estimate the amount of time the perpetrator was in their view -- especially if the witness was under stress or anxiety at the time they observed the events. [16] Similarly, a witness [**34] will often inaccurately minimize the amount of time that [*356] their view of the perpetrator was blocked by another person or a physical obstruction. [17]

16 *Id.* at 10.
17 *Id.*

Perhaps more troubling are the results of experiments showing that the comments of a police investigator can alter a witness's perception or memory of how long they were able to view the perpetrator, and how good their view was. In a series of experiments, witnesses were given a poor view of a simulated crime, and then they were shown a photo lineup that did *not* include the culprit. [18] The experiment centered on those witnesses who (mistakenly) identified one of the people in the lineup as having committed the crime. The lineup administrator would tell some of these witnesses, "Good; you identified the suspect in this case", while the administrator would make no suggestive remark to the others. [19]

18 *Id.*
19 *Id.*

Later, when all of these witnesses were asked, "How good was the view that you had of the culprit?" and "How well could you make out the details of the culprit's face?", the overwhelming majority of witnesses who heard no confirmatory remark conceded that, even though they had made an identification from the lineup, their view was not very good and [**35] they could not easily make out the details of the culprit's face. [20] On the other hand, the witnesses who received a confirmatory remark from the lineup administrator had very different perceptions of their own experience. Even though these witnesses had the same poor view of the crime, about 25 percent of them reported that they had a "good" or "excellent" view of the crime, and 20 percent of them declared that they could easily make out the details of the culprit's face. [21]

20 *Id.*
21 *Id.*

The results of these experiments suggest that if the evidence in support of the first *Brathwaite* factor -- opportunity to view -- is based solely on the self-reporting of the witness, then a court would need to know (and try to take account of) what was said to the witness during the identification procedure. In other words, there is reason to believe that this first *Brathwaite* factor is *not* independent of the suggestive identification procedure.

Similarly, many experiments have shown that when a witness receives a confirmatory suggestive remark following their identification of a person in a lineup, this tends to inflate the witness's own perception of how much attention they were paying to the perpetrator of the [**36] crime -- the second *Brathwaite* factor. [22]

22 *Id.* at 11.

The third *Brathwaite* factor -- the witness's degree of certainty in their identification -- is obviously crucial to all stages of a criminal investigation. A witness's certainty (or lack of certainty) may influence whether a person is charged at all, or whether the prosecutor takes the case to trial, and if the case goes to trial, how much weight the jury will give to the witness's testimony.

Of course, life provides many instances of people who are certain about something but who are nevertheless mistaken. The question is: is there a valid correlation between a witness's certainty and the correctness of their identification?

Studies have shown that, among witnesses who make an identification (either correct or mistaken) from a lineup, the statistical correlation between the witness's certainty and the correctness of their identification can be as high as 0.41. [23] (Some studies suggest that the correlation is lower.) To put this figure in perspective, the statistical correlation between height and sex in human beings is considerably higher than 0.4. In other words, these studies suggest that you would have much better success in predicting a person's [**37] sex if you knew their height than you would have in predicting the accuracy of a witness's identification if you knew the witness's degree of certainty. [24]

23 *Id.* at 12.
24 *Id.*

[*357] Nevertheless, the fact that there is a positive correlation between a witness's certainty and the accuracy of their identification means that a witness's degree of certainty is *some* indication of the accuracy of their identification. [25]

25 *Id.*

However, as is the case with *Brathwaite* factors one and two, a lineup administrator's confirmatory remark can have a substantial influence on a witness's degree of certainty. In one study, for example, witnesses who mistakenly identified someone from a lineup were later asked whether they had been "positive" or "nearly positive" when they made their identification. Of the witnesses who did not receive a confirmatory remark from the lineup administrator, only 15 percent reported that they had been "positive" or "nearly positive" when they made their selection from the lineup. However, among the witnesses who received a confirmatory remark following their mistaken identification, 50 percent reported that they had been "positive" or "nearly positive" when they made their selection. [26]

26 *Id.*

As Professors Wells [**38] and Quinlivan observe, one crucial aspect of this experiment is that these witnesses were asked *after the fact* to report on their degree of certainty *at the time they made their identification.* [27] In other words, the lineup administrator's suggestive confirmatory remark was not altering the witness's degree of certainty at the time they made their selection from the lineup. Rather, the confirmatory remark was altering the witness's memory -- their *recollection* of their degree of certainty at that earlier time.

27 *Id.*

This finding has potential importance to a judge's evaluation of a witness's testimony -- in particular, the witness's self-report of their degree of certainty -- at any pre-trial hearing on the *Brathwaite* factors. It suggests that a witness's self-reported degree of certainty is not necessarily trustworthy.

The fourth *Brathwaite* factor -- the "accuracy" of the witness's pre-lineup description of the perpetrator -- suggests a logical error. One can not know whether a witness's description of the perpetrator is "accurate" unless one knows who the perpetrator is.

As illustrated by the Ronald Cotton case, the fact that a witness may have accurately described the defendant in advance [**39] of the lineup, and then selected the defendant's photograph from the lineup, does not prove guilt unless the witness's recollection of the perpetrator is accurate. To conclude that a witness's pre-lineup description was "accurate" (in the sense of describing the true perpetrator of the crime) simply because the witness's description fits the physical characteristics of the defendant is to assume the very fact that needs to be proved.

Instead of the "accuracy" of a witness's pre-lineup description, the fourth *Brathwaite* factor is more properly concerned with the *consistency* between the witness's pre-lineup description of the perpetrator and the physical characteristics of the person whom the witness later selects in the lineup, as well as the *degree* of this consistency (*i.e.,* the amount of detail in the witness's pre-lineup description, and how much of that detail is consistent with physical characteristics of the person whom the witness selected in the lineup).

This fourth *Brathwaite* factor suffers from an underlying analytical weakness. The probative value of this fourth factor -- *i.e.,* the consistency between a witness's pre-lineup description of the culprit and the physical characteristics [**40] of the person who is later selected in the lineup -- hinges in large measure on the assumption that the composition of the lineup has not been influenced by the witness's pre-lineup description of the culprit. This assumption is often false. It is common for the police to rely on the witness's pre-lineup description when they select which photographs to include in a lineup -- because the witness's description is often one of the primary clues that the police rely on when they begin to narrow the field of potential suspects.

Moreover, some studies have shown that when witnesses are confronted with a photo [*358] lineup, they tend to select the person who looks most like their memory of the culprit, even when none of the photos matches their memory exactly. [28] This is apparently what happened in the Ronald Cotton case.

28 *Id.* at 13.

Even though Detective Gauldin did not expressly tell Thompson that the photo lineup contained a photograph of the person whom the police suspected, Thompson made the assumption that her attacker's photograph was among the six photos displayed to her, and she believed that her job was to identify the correct photograph. She later told "60 Minutes" reporter Leslie Stahl, "I ... remember [**41] almost feeling like I was [taking] an SAT [multiple choice] test. You know, where you start narrowing down your choices. You can [immediately] discount A and B, [and then you work on the others]."

What does this mean in terms of *Brathwaite*'s fourth factor? Professors Wells and Quinlivan suggest the following hypothetical: The police assemble a photo lineup, and they include a photo of the defendant because the defendant seems to match the witness's description of the perpetrator. The witness views the lineup and identifies the defendant. A judge later rules that the lineup was unnecessarily suggestive because the filler photographs were too dissimilar to the photograph of the defendant. But then, based on the consistency between the witness's pre-lineup description of the culprit and the defendant's physical characteristics, the judge concludes that the witness's identification of the defendant is reliable. [29] One might well question whether courts should indulge in this form of circular reasoning.

29 *Id.*

The judicial, legislative, and [**42] *law enforcement response to this research*

Despite the tension between the *Brathwaite* analysis of reliability and the results of the past three decades' psychological research into the dynamics of eyewitness identification, few courts have conducted a critical re-examination of the *Brathwaite* approach.

The New York Court of Appeals was the first court to reject *Brathwaite* on state constitutional grounds: *People v. Adams, 53 N.Y.2d 241, 423 N.E.2d 379, 383-84, 440 N.Y.S.2d 902*; *53 N.Y.2d 241, 423 N.E.2d 379, 440 N.Y.S.2d 902, 905-07 (N.Y. 1981).* The New York court concluded that the *Biggers/Brathwaite* approach to assessing the reliability of eyewitness identifications was flawed, and so the New York court instead adopted the *per se* rule of exclusion that the United States Supreme Court rejected in *Brathwaite.* In other words, the New York court ruled that evidence of an eyewitness identification arising from an unnecessarily suggestive police-arranged identification procedure must be suppressed, [**43] regardless of the *Brathwaite* factors. However, the New York decision -- rendered in 1981 -- was not based on the nascent scientific research into eyewitness identification; rather, it was based on the New York court's agreement with the *Brathwaite* dissenters that it was simply too risky to try to assess the reliability of an identification made during an unnecessarily suggestive lineup or showup.

Beginning in the early 1990s, courts began to demonstrate awareness of the growing scientific criticism of the *Brathwaite* approach. In *State v. Ramirez, 817 P.2d 774, 780-81 (Utah 1991)*, the Utah Supreme Court adopted a modified version of the *Brathwaite* factors. The court's primary aim was to craft factors that "more precisely define[d] the focus of the relevant inquiry", and that expressly recognized the problem of witness suggestibility -- a difficulty that has no comparable emphasis in the *Biggers/Brathwaite* factors. *See Ramirez, 817 P.2d at 781.*

See also State v. Hunt, 275 Kan. 811, 69 P.3d 571, 576 (Kan. 2003) (adopting the *Ramirez* formulation of the test for reliability of eyewitness identifications because the *Ramirez* factors "present an approach to the identification issue which heightens ... the reliability [**44] of such identification[s]" and which represents "a refinement in the [*Brathwaite*] analysis").

In *Commonwealth v. Johnson, 420 Mass. 458, 650 N.E.2d 1257, 1261-65 (Mass. 1995)*, the Massachusetts Supreme Court followed the lead of the New York Court of Appeals and rejected the *Brathwaite* reliability analysis in [*359] favor of a *per se* rule of exclusion (under the Massachusetts constitution). The Massachusetts court relied in part on the research conducted into eyewitness identification by Professors Gary Wells and Elizabeth Loftus. *See Johnson, 650 N.E.2d at 1262 n. 9.*

The year 2005 appears to have been a turning point of sorts in the judicial recognition of the growing body of research into the psychological dynamics of eyewitness identification. In that year, two state supreme courts issued opinions that contained lengthy citations and discussions of the research literature: *State v. Ledbetter, 275 Conn. 534, 881 A.2d 290, 311-13 (Conn. 2005)*, and *State v. Dubose, 2005 WI 126, 285 Wis. 2d 143, 699 N.W.2d 582, 591-92 (Wis. 2005)*. The Connecticut court in *Ledbetter* concluded that the research data was not convincing enough to abandon the *Brathwaite* analysis, but the Wisconsin court in *Dubose* held that an eyewitness identification arising from an unnecessarily [**45] suggestive showup must be suppressed, without regard to any *Brathwaite* reliability analysis.

See also *Smith v. Smith, unpublished, 2003 U.S. Dist. LEXIS 17642, 2003 WL 22290984, *10-14 (S.D. N.Y. 2003)*, a habeas corpus decision which contains a lengthy discussion of the various potential flaws in eyewitness identification testimony. The federal court acknowledged that the current research casts doubt on *Brathwaite,* but the court denied the defendant's petition for habeas corpus relief because the state courts that affirmed the defendant's conviction were not clearly wrong to follow the prevailing *Brathwaite* analysis.

In addition to these few courts that have responded to the psychological research on eyewitness identification, several legislatures and police agencies have enacted new laws or policies based on this research.

In September 2005, the Wisconsin Attorney General issued a "Model Policy and Procedure for Eyewitness Identification". [30] This policy recommended that all police agencies utilize a double-blind, sequential photo lineup procedure. [31] The salient details of this procedure are: (1) the officer conducting the photo lineup does not know who the suspect is, (2) the witness being interviewed is told [**46] that the culprit may not be included among the photographs, (3) the photographs are shown to the witness one at a time, rather than in a group, (4) the witness is not told in advance how many photographs they will see, and (5) the witness is asked to rate each photograph separately (*e.g.,* "yes", "no", or "unsure") -- thus minimizing the danger that the witness will view the procedure as a "multiple choice" test where their task is to pick the one photo that best matches their memory of the culprit. [32]

30 This model policy is available at: www.doj.state.wi.us/dles/tns/eyewitnesspublic.pdf

31 *Id.* at 3.

32 *Id.* at 3 & 8-9. On page 9 of the model policy, the Wisconsin Attorney General recommends that the following instructions be given to each witness before a photo lineup:

> In a moment, I am going to show you a series of photos. The person who committed the crime may or may not be included. I do not know whether the person being investigated is included. Even if you identify someone during this procedure, I will continue to show you all the photos in the series.
>
> Keep in mind that things like hair styles, beards, and mustaches can be easily changed and that complexion colors may look slightly different [**47] in photographs.
>
> You should not feel you have to make an identification. It is as important to exclude innocent persons as it is to identify the perpetrator.
>
> The photos will be shown to you one at a time and are not in any particular order. Take as much time as you need to look at each one. After each photo, I will ask you "Is this the person you saw [insert description of act here]?" Take your time answering the question. If you answer "Yes," I will then ask you, "In your own words, can you describe how certain you are?"
>
> Because you are involved in an ongoing investigation, in order to prevent damaging the investigation, you should avoid discussing this identification procedure or its results.
>
> Do you understand the way the photo array procedure will be conducted and the other instructions I have given you?

In April 2006, the California Commission on the Fair Administration of Justice issued its "Report and Recommendations Regarding Eye Witness Identification Procedures". In this report, the California Commission

likewise recommended that all police agencies in the state adopt a double-blind, sequential [*360] photo lineup procedure. [33]

33 California Commission on the Fair Administration of Justice: [**48] Report and Recommendations Regarding Eye Witness Identification Procedures (April 2006), page 5. Available at: www.psychology.iastate.edu/~glwells/California_commission.pdf

In October 2008, a series of articles that appeared in the Dallas Morning News highlighted a number of misidentifications (and ensuing wrongful criminal convictions) that resulted from suggestive showups and photo lineups. [34] These articles contained a discussion of the current psychological research regarding eyewitness identification, and they prompted the Dallas Police Department to alter their procedures.

34 *See, e.g.,* Steve McGonigle & Jennifer Emily, "18 Dallas County cases overturned by DNA relied heavily on eyewitness testimony", Dallas Morning News, October 10, 2008. Available at:

In September 2009, USA Today reported that five other states (Connecticut, Georgia, Maryland, North Carolina, and West Virginia) and several major metropolitan police departments are changing their identification procedures [**49] in response to the psychological research and the wealth of information confirming that innocent people are indeed being convicted based on mistaken eyewitness identifications. [35]

35 Kevin Johnson, "States Change Police Lineups After Wrongful Convictions", USA Today, September 17, 2009. Available at:

www.usatoday.com/news/nation/2009-09-16-police-lineups_N.htm

In particular, North Carolina has enacted a statute that mandates double-blind, sequential photo lineup procedures. *See* North Carolina Statute 15A-284.52. According to the USA Today article, one of the leading proponents of this revision of North Carolina's lineup procedures was Michael Gauldin -- the chief investigator in the Ronald Cotton case. [36]

36 *Id.*

There can be little doubt that these recent changes in the legal system have been prompted by the confluence of two forces: the increasing amount of psychological research in this area, and the concurrent development of forensic DNA testing. As Professors Gary L. Wells, Amina Memon, and Steven D. Penrod noted in their article, "Eyewitness Evidence: Improving Its Probative Value", 7 Psychological Science in the Public Interest 45 (2006), the last two decades have seen no major change [**50] in how eyewitness identification scientists approach their work; rather, "the advent of forensic DNA testing has changed the way the legal system views eyewitness evidence." [37]

37 *Id.* at 48.

The changing attitude of the legal system is attributable to the fact that "the development of forensic DNA testing in the 1990s [uncovered] definitive cases of the conviction of innocent people in the United States", and that "[e]yewitness identification error was at the heart of the evidence used to convict the vast majority of these innocent people." [38] In other words, DNA testing provided the physical science confirmation of what the psychological scientists had been suggesting for years -- and this made the non-scientific world begin to pay close attention.

38 *Id.*

A re-examination of the photo lineup in Tegoseak's case

As we explained earlier in this opinion, Officer Asselin -- the lead investigator in this case -- knew that Edgar Henry was photograph number 5 in the first array of six photos and that Frank Tegoseak was photograph number 5 in the second array. Asselin first showed the two photographic arrays to Michelle Maestas, but she failed to identify either Edgar Henry or Frank Tegoseak. Thus, [**51] when Asselin next showed the photographs to Robert Maestas, Asselin knew that this was his

final opportunity to get an identification of either Henry or Tegoseak from an eyewitness.

[*361] As we also explained, when Robert Maestas was shown the first array, he "correctly" identified the photograph of Henry (photograph number 5) as being the original passenger in the Bronco, but Maestas also "incorrectly" identified photographs 1 and 3 of this first array as being the original driver.

Asselin knew that this was "wrong", so he said to Maestas, "Let me try to at least show you [the second array of photographs]; then you can see the entire compilation of photos. So far, you've said [that] 1 and 3 [in the first array] could be the driver." Asselin then showed Maestas the second array of six photographs.

When Judge Wolverton ruled on Tegoseak's motion to suppress Maestas's identification, the judge concluded that Asselin's remark to Maestas was not meant to suggest that Maestas should keep looking at more photos because he had not yet successfully identified the culprit. Rather, Judge Wolverton concluded that Asselin's remark was simply intended to clarify the photo lineup procedure -- to remind Maestas [**52] that there were two photo arrays, and that Maestas should examine both arrays before he made his final selections.

But as we have explained, for purposes of assessing the suggestiveness of the photo lineup, the crucial aspect of the communication between Asselin and Maestas was not Asselin's intention when he made these remarks; instead, the crucial aspect was the information or the suggestion that Maestas may have drawn from these remarks.

If -- as appears likely -- Maestas knew or suspected that the photo arrays contained photographs of the two men whom Asselin knew to be the culprits (the two men who had been found in the Bronco), then when Asselin told Maestas to keep looking at more photos even though Maestas had apparently identified both men, Asselin's remark could well have suggested to Maestas that his initial selection was "wrong", and that he had not yet identified the true culprit.

This is not to imply that Asselin was consciously attempting to manipulate Maestas's choice. The suggestiveness of the procedure could have been inadvertent on Asselin's part -- but real, nonetheless.

The potential suggestiveness of Asselin's remark could only have been amplified later, when Maestas [**53] viewed the second array and told Asselin that the original driver of the Bronco was either photograph 1 in the first array (a filler) or photograph 5 in the second array (Tegoseak). Rather than have Maestas place an "X" in the two boxes representing these two photos, Asselin directed Maestas to place an "X" in only one box, the box representing Tegoseak's photo -- although Asselin invited Maestas to add a written notation explaining that Maestas thought that the other photo might also be the driver.

Asselin's reaction to Maestas's ambiguous identification was not necessarily an attempt to manipulate Maestas. Rather, it might be attributed to the phenomenon of "observer bias". Both scientific researchers and police investigators can fall prey to the normal human tendency to pay attention to, or to overemphasize, the results that they expect or hope to see -- and the converse tendency to fail to observe, or to ignore the significance of, results they do not expect or hope to see.

But while Asselin may not have intended to manipulate Maestas, his directions to Maestas may have affected Maestas's perception of the identification procedure. Asselin's directions to Maestas potentially constituted [**54] an inadvertent suggestion that photograph number 5 in the second array (*i.e.,* Tegoseak) was Maestas's "real" selection, and that photograph number 1 in the first array was only a subsidiary alternative selection.

As we explained earlier in this opinion, one of the important findings of the psychological research in this area is that, if a witness makes an identification during a suggestive lineup procedure and then the witness receives some kind of confirmation from the officer administering the lineup, the witness's after-the-fact perception of their identification can be altered: the witness can become artificially more confident in their identification. There is reason to believe that this is what happened to Robert Maestas.

[*362] At the evidentiary hearing on Tegoseak's motion to suppress, Maestas readily admitted that he had selected two photos from the lineup as "look[ing] similar to" the man who was the original driver of the Bronco -- "both [number] 5 on [the second array] and number 1 on [the first array]". When Maestas was asked whether his identification was "positive", Maestas conceded that it was not.

But by the time of Tegoseak's trial ten weeks later, Maestas viewed the matter [**55] differently. When Maestas was questioned about the photo lineup at trial, he now declared that, even though he had initially wavered between photograph 1 in the first array (a filler) and photograph 5 in the second array (Tegoseak), he soon perceived that Tegoseak was the man he had seen in the Bronco.

Here is Maestas's testimony on direct examination:

> *Prosecutor:* And [with regard to] Photo Lineup B, were you able to make an identification [from that array]?

Maestas: I was. ... [Photograph] number 5 ... was the original driver.

Prosecutor: And when you were asked to make the identification, did you hesitate somewhat between [photograph] 5 [in the second array] and [photograph] 1 [in the first array]?

Maestas: I did; I did. But then I had recalled the way that the gentleman's ears kind of stuck out, after the fact.

Prosecutor: Okay. And when you say "the gentleman" -- that's [photograph] number 5?

Maestas: ... Five. Uh-huh. [affirmative]

And here is Maestas's testimony on redirect examination:

Prosecutor: You said [with regard to] the first photo lineup [that] you weren't 100 percent sure. Did you become more sure as you looked at those photos?

Maestas: I -- I became more sure when I recollected, like [**56] I said, what I really distinctly remember was the way the ears stuck out from the head, [from the] side of the head.

Prosecutor: Okay.

Maestas: That's why I was able to make my determination a little easier.

Prosecutor: And that's how you selected [photograph] number 5 [in the second array]?

Maestas: Yes.

Maestas said nothing about the distinctiveness of Tegoseak's ears during the photo lineup procedure itself, nor did he say anything about this physical feature when he testified at the suppression hearing. Rather, as Maestas himself admitted, "[he] became more sure when [he] recollected". By the time of Tegosaek's trial, Maestas "distinctly remember[ed] ... the way the ears stuck out from ... the side of [Tegoseak's] head", and he declared that he was able to identify Tegoseak's photo based on this physical feature. This is arguably an example of the kind of altered memory and altered certainty described in the research literature.

Why we conclude that the potential suggestiveness of the photo lineup is harmless beyond a reasonable doubt

We have covered a lot of ground in this opinion: a lengthy discussion of the Ronald Cotton case, a look at some of the scientific research on the subject of [**57] eyewitness identification, and a description of the recent efforts in various states and cities to improve eyewitness identification procedures. All of this naturally leads to the question: What, if anything, should this Court do in response to what society has learned in the thirty years since *Brathwaite?*

We first wish to clarify that the Ronald Cotton case is simply one case, albeit a prominent one. What happened in that case may provide reason to question the *Brathwaite* analysis, but it does not constitute scientific proof that the *Brathwaite* analysis is flawed.

Second, we acknowledge that our examination of the past three decades' research has not been an exhaustive one. There are many studies in this area that we have not mentioned. And, of course, there are questions in the scientific community about the methodology of particular studies, as well as questions regarding the significance that should [*363] be attributed to the results of various studies.

We do not intend to endorse a particular viewpoint or reach a definitive conclusion at this time. Rather, our goals are more modest: to acknowledge that psychological research into eyewitness identification has furnished new insights into [**58] the potential suggestiveness of identification procedures, and to point out that this research has illuminated the related problem that a suggestive identification procedure can work an after-the-fact alteration of a witness's memory of a criminal episode.

We need go no further at the present time -- because, even assuming that the photo lineup procedure in Tegoseak's case was unnecessarily suggestive, any error was harmless beyond a reasonable doubt. [39]

> 39 [HN4] Constitutional error requires reversal of a criminal conviction unless the error is shown to be harmless beyond a reasonable doubt. *Chapman v. California, 386 U.S. 18, 24, 87 S. Ct. 824, 17 L. Ed. 2d 705*; *386 U.S. 18, 87 S.Ct. 824, 828, 17 L. Ed. 2d 705*; *386 U.S. 18, 87 S. Ct. 824, 17 L.Ed.2d 705 (1967)*; *Raphael v. State, 994 P.2d 1004, 1010 (Alaska 2000)*. In assessing whether an error is harmless beyond a reasonable doubt, "the question is whether there is a reasonable possibility that the error affected the result."

Dailey v. State, 65 P.3d 891, 896 (Alaska App. 2003), citing *Smithart v. State, 988 P.2d 583, 589 (Alaska 1999)*.

When Judge Wolverton ruled on Tegosaek's suppression motion, he noted that "this might [have been] a different situation if [Tegoseak and Henry] had not been followed and almost [handed]-off to the [**59] police." As Judge Wolverton correctly pointed out, the case against Tegoseak was not a "whodunit" -- not a case where the police knew that a crime had been committed but did not know the identity of the perpetrator. Rather, the State's evidence clearly established (1) that the Bronco was being driven in an erratic manner, (2) that two men -- one wearing a white shirt and one wearing a black shirt -- got out of the Bronco in the nursery parking lot and switched places before getting back in the vehicle and driving off, (3) that only two men were in the Bronco when the police stopped the vehicle minutes later -- one wearing a white shirt and one wearing a black shirt, and (4) that, following the stop, both men initially admitted to having just driven the car. In addition, Officer Asselin testified that Edgar Henry told the police that he had taken over driving the Bronco after the stop at Bell's Nursery because Tegoseak had been driving so poorly that he thought Tegoseak was going to kill them.

Given all of this, we have no doubt that the jury would have convicted Tegoseak even if Maestas had been unable to identify Tegoseak at trial, and even if the jurors had been told that Maestas [**60] was unable to identify the driver in the photo lineup, or that Maestas had identified one of the filler photos as being the driver. In other words, even if the superior court should have granted Tegoseak's motion to suppress Robert Maestas's identification of him as the initial driver of the Bronco, any error was harmless beyond a reasonable doubt.

Conclusion

The judgement of the superior court is AFFIRMED.

CONCUR BY: BOLGER

CONCUR

BOLGER, Judge, concurring.

The research cited in the lead opinion suggests that we should consider changes to the test we currently use to determine whether a photo lineup procedure satisfies due process of law. But I choose to withhold my opinion on this issue until both parties have the opportunity to submit their positions on the relevant research either through an evidentiary hearing or adversarial briefing. This occasion will more likely arise in a case where the research is essential to the outcome. In the present case, I agree with the conclusion of the lead opinion: Any error in the photo lineup procedure was harmless beyond a reasonable doubt.

The Why and How of Blind Sequential Lineup Reform

By: Jeanne Schleh, Assistant Ramsey County Attorney (retired)

The Problem: Faulty Eyewitness Identification & DNA

Eyewitness identification evidence is often crucial in criminal investigations. In a growing number of well-publicized cases nationwide, however, DNA evidence has exonerated individuals who were convicted primarily on the basis of mistaken eyewitness identification. This has brought public scrutiny on law enforcement procedures and challenged law enforcement practitioners both to reexamine long-standing practices and to implement change that will reduce the likelihood of such misidentifications in the future. No one in law enforcement has any interest in convicting the innocent.

More than a decade ago, in the wake of early DNA exonerations, the U.S. Department of Justice's National Institute of Justice (NIJ), under then-Attorney General Janet Reno, formed an inter-disciplinary study group (including law enforcement, prosecutors, defense attorneys and scientists) to examine eyewitness identification procedures. Its landmark 1999 report[1] began the national law enforcement discussion of lineup reform. Already at that time, the scientific evidence from years of laboratory studies showed that eyewitness identification was more reliable when blind sequential procedures were used, but questions remained on whether the reform was practical in the field. Nonetheless, some states and local law enforcement jurisdictions throughout the country, convinced by the scientific evidence, successfully implemented lineup reform following the NIJ report.[2]

Now, ten years after the report, the scientific evidence supporting the reform has only grown, and a growing number of law enforcement agencies have adopted it and found it to be practical in the field.[3] However, even in states like Minnesota and Wisconsin in which substantial headway has been made, there is a long way to go to achieve universal compliance with lineup reform.

---

New Jersey's *Attorney General Guidelines for Preparing and Conducting Photo and Live Lineup Identification Procedures* (August 2001); North Carolina's *Recommendations for Eyewitness Identification* (October 2003).

[2] Early reform jurisdictions include the states of New Jersey and North Carolina and the Northampton (MA) Police Department (its then Capt. Ken Patenaude was an NIJ panel member). See, New Jersey's *Attorney General Guidelines for Preparing and Conducting Photo and Live Lineup Identification Procedures* (April 2001), www.njdcj.org/agguide/photoid.pdf and *North Carolina Actual Innocence Commission Recommendations for Eyewitness Identification* (October 2003), www.ncids.org/New%20ID.pdf and that state's subsequent enactment in 2006 of sections 15A-284.50 to 15A-284.53 of the *North Carolina General Statutes*, adopting its recommendations.

[3] These include, in Minnesota, the Minnesota Bureau of Criminal Apprehension, Ramsey County, Hennepin County and the Chaska Police Department; in Wisconsin, Milwaukee, Madison and more than 200 other Wisconsin agencies (following the Wisconsin Attorney General's 2005 recommendation that these changes be adopted statewide www.thejusticeproject.org/reports/model-policy-and-procedure); others include: Suffolk County (MA)(Boston and suburbs), Denver (CO), Westfield (MA), Virginia Beach (VA), Santa Clara County (CA) and Dallas (TX).

Rationale for Change to Blind Sequential Lineups

The most widely used law enforcement eyewitness identification procedure nationwide has long been the simultaneous photo array. The typical photo array contains six photos. It is common practice for an investigator with knowledge of the case, and the identity of the suspect, to show the photo lineup to witnesses.

However, 25 years of scientific research on memory and interview techniques convincingly demonstrates that the likelihood of mistaken identification drops sharply if lineups[4] are *blind*[5] (that is, conducted by someone who does not know who the suspect is) and *sequential*. When (as occurred in the DNA exoneration cases), the real perpetrator's photo *is not* present in the lineup, witnesses shown the photos simultaneously are up to three times more likely to identify someone than are witnesses shown the same photos sequentially. When the real perpetrator's photo *is* included in the lineup, laboratory studies show some reduction in the number of correct identifications made using the sequential method. However, that somewhat lower identification rate is offset by the much larger risk of misidentification using the simultaneous method if the perpetrator is not present.

The first meta-analysis[6] in 2001 of 30 laboratory tests comparing sequential and simultaneous photo displays[7] over 16 years of research reveals this differential in numerical terms. Specifically, in perpetrator-absent lineups (the scenario most like the DNA exoneration cases), there is an aggregate error rate of 27 percent (incorrect identification of a specific filler photo, the designated innocent suspect who looked most similar to the real perpetrator) for the simultaneous method compared to a 9 percent error rate when the sequential method was used. The simultaneous method, in short, encouraged guessing. There is a trade-off: In perpetrator-present lineups, the 2001 meta-analysis showed a 15 percent drop in correct identifications (from 50 percent in simultaneous to 35 percent in sequential displays). See Nancy Steblay, et. al., "Eyewitness Accuracy Rates in Sequential and Simultaneous Lineup Presentation: A Meta-analytical Comparison," *Law and Human Behavior* 25, no. 5 (October 2001): 459-473.

In the six years following the 2001 meta-analysis, there was an explosion of additional studies. A follow-up meta-analysis, now aggregating the results of 70 tests over 22 years, confirms the significantly greater risk of mistaken identification for simultaneous lineups when the perpetrator is absent. The larger sample, moreover, shows the trade-off drop in incorrect identifications when the perpetrator is present to be lower than it appeared in 2001 (8 percent rather than 15).[8] Most scientists consider these results to be conclusive and the issue to be settled (as demonstrated by the lack of further studies since 2007).

---

[4] The terms *lineup* and *photo display* are used interchangeably in this training bulletin.

[5] This procedure is sometimes also referred to as "double blind" to include the fact that the witness likewise does not know the location of the suspect in the sequence (or even if the suspect is included at all). Since this is implicit in any lineup, the term *blind* in this bulletin should be construed to cover both.

[6] Meta-analysis is a cumulative quantitative summary of outcomes across studies.

[7] All of the studies were blind or blinded since that is a presumption in the scientific method.

[8] Dr. Steblay presented this data at the John Jay College of Criminal Justice as "2001+6: An Updated Meta-analysis of Eyewitness Lineup Performance under Sequential versus Simultaneous Formats" (paper presented at conference entitled "Off the Witness Stand: Using Psychology in the Practice of Justice," March 1-3, 2007. This paper is pending publication.

This scientific data supporting the switch to blind sequential lineups as a means of increasing the accuracy of lineups and reducing the likelihood of misidentification is clear, as is the startling implication that the traditional law enforcement method of conducting photo lineups might have inadvertently increased the likelihood of mistaken eyewitness identifications.

On reflection, the reasons for this result also makes sense objectively: (1) Simultaneous photo display encourages *relative judgment* (i.e., a witness comparing photos side by side is more likely to pick a person who looks *most like* the perpetrator—regardless of whether the person is, in fact, the perpetrator). (2) The most professional and well-intentioned investigator who knows where the suspect is in the lineup cannot eliminate all possibility of unintentionally cueing the witness or responding to the witness's identification. Even the smallest response—like the investigator's eyes lighting up when the "right" person is picked—can artificially inflate the witness's level of confidence and convert a "looks like" into a positive identification. If the risk of administrator influence on lineup results (and, therefore, defense attack on those grounds) can be eliminated by having someone other than the investigator who knows the identity of the suspect conduct the lineup, why would we want to do it any other way?

The most common error in the DNA exoneration cases was the identification of a person the police suspected—a person who looked similar to the real perpetrator—but who turned out to be innocent. The typical simultaneous photo array shown in these cases did not contain the photo of the real perpetrator, and the mistaken eyewitness was, in effect, identifying a "filler" photo. Use of the blind sequential method removes, or at least greatly diminishes, the role of police error in the equation.

Essential Components: Sequential Display and Blind Administration (or Functional Equivalent)

Both sequential display and blind administration are necessary components of the reform. Switching from simultaneous to sequential photo displays alone could even increase misidentification, since there is a danger of inadvertently highlighting an individual suspect photo. On the other hand, in a law enforcement setting, an independent administrator may not always be available. The practical realities of conducting lineups under the time pressures and personnel constraints of a criminal investigation, especially in a small department, might mean only an investigator with knowledge of the case is available, or that other options would result in unacceptable delay. In these circumstances, an alternate method still maintaining the blind component may be used: Under this alternative, the investigator who knows the identity of the suspect may show the lineup—as long as it is done in a way that assures that he does not know and cannot see the order in which the photos are presented, and the witness knows this (and therefore will not be looking to the investigator for cues or validation). This is the functional equivalent of blind administration, sometimes referred to as the "blinded" method.

Practical Law Enforcement Experience with the New Method

In Minnesota, Hennepin County, Ramsey County, the Chaska Police Department and the Minnesota Bureau of Criminal Apprehension each have four or more years of experience with implementation of this reform. In each of these jurisdictions, the change has now become standard procedure and has proved no more difficult to administer than the old method.

Concerns that it would result in administrative complications or additional costs have turned out to be unwarranted.

In evaluating its program, Ramsey County discovered some surprising additional benefits: Although meta-analysis of laboratory studies showed some drop in correct identifications using the new methods (as the price paid for far fewer incorrect identifications), investigators using the new method in Ramsey County did not feel they were "losing" identifications and, moreover, felt more confident in identifications that were made. This perception is likely to be a consequence of less overall guessing by witnesses, as well as a reluctance to charge obviously marginal identification cases. Moreover, although Ramsey County investigators were trained on the alternative "blinded" method, in practice, most were able to find, and came to prefer using, an independent administrator. A concern widely expressed before implementation that lineups would be adversely affected if the administrator was not the investigator who had developed rapport with the witness turned out to be a nonissue. Finally, the bonus of adopting this reform has been that in court a major avenue of defense attack on the admissibility and reliability of eyewitness identification procedures used has been eliminated. Other jurisdictions that have adopted the change report a similar experience.

Elements of Eyewitness Lineup Protocol Change

Investigator training on the new method of doing lineups should include an explanation of the scientific data and rationale for change to blind sequential lineups (see above). Instruct that while blind administration by an independent administrator is the preferred route, alternative blinded procedures may be used. The key to implementing this reform is an understanding of what "blind" means and why it is important. Emphasize that this change in no way implies any doubt about the integrity and professionalism of the investigator but simply eliminates all possibility of even unintentionally cueing a witness or inflating a witness's level of confidence in any identification. This, in turn, eliminates these as potential issues in subsequent court proceedings.

Some jurisdictions prefer to use a lineup form (with or without a supplemental report); others instead write a general supplemental report for lineups. Regardless of approach, the following elements are necessary:

- Instructions to the administrator on how to do a blind sequential lineup
- Instructions to the witness (including different language depending on whether an independent or "blinded" administrator is conducting the lineup)
- Documentation of any witness reaction to any of the photos (verbal, physical or emotional)
- If an identification is made, documentation of the witness's level of certainty

A one page (two-sided) Sequential Photo Display Form, developed specifically for use by all Ramsey County law enforcement officers, is appended as an example of a form containing these elements. On the administrator side are all the instructions for the administrator, a section to be

filled out by the administrator during the photo display and a section to be filled out by the administrator after the photo display. On the witness side are the instructions to be read to the witness before the photo display (including alternative language, depending upon whether an independent administrator [IA] or "blinded" functional equivalent [FE] is used) and a section to be completed by the witness after the photo display. This form is designed to be self-explanatory so that an officer from the street with no knowledge of the case could be called in, if necessary, to be the independent administrator.

How to Do a Blind Sequential Lineup

There are several methods by which the photos may be displayed sequentially. All have in common that the witness sees only one photo at a time and must continue to view all photos even if a person is identified before all are shown.[9] After each photo is shown, it must be removed from view before the next photo is shown. Regardless of which method is used, a record must be kept of which photos were shown in which order to which witness.

The low-tech version can be as simple as numbering the photos and placing each in a separate folder bearing the same number (or for the blinded method, having someone else, including another investigator who knows who the suspect is or even a civilian employee, do this for the administrator). The witness is then instructed to look at the folders one at a time (for blinded method, have the witness open the folders in such a manner that the investigator cannot see the photos). Return the folder to the bottom of the pile before handing the witness the next folder, or keep remaining folders out of sight, so the witness does not know how many there are.

The "box with 6 doors" method, developed and used in the state of New Jersey since 2001, has also been widely used in Ramsey County. The standard 6-person simultaneous display is inserted in a box with six numbered doors, built specifically for this purpose. Only one door at a time is opened, and the doors are opened in numerical order. The box is equally adaptable to the blinded method since someone else can prepare the standard 6-pack lineup sheet and insert it in the box. The box is easily transportable to the field.

The high-tech version would be to download lineup photos to a laptop to be shown to the witness one at a time.[10] The witness must be instructed to continue forward only (i.e., may not go back to look at a prior photo). The display should start and end in black.

Do not repeat the display unless the witness requests it. If, after one rotation is completed, the witness requests to see the photos again, the entire array may be repeated. Even if the witness asks to see only one photo, the entire array must be shown. A record must be made of the

---

[9] Continuing the photo display when the witness identifies a photo before all photos are shown avoids later legal criticism that the lineup was improperly truncated. In the circumstance that a witness makes an early "filler" pick without having seen the suspect's photo, it also allows an answer to the question of what would have happened had the witness seen the suspect's photo. Conversely, a witness may pick the suspect but then discredit this pick when a later photo is shown.

[10] An elegant software program has been developed by SunGard OSSI (North Carolina) for this purpose. It randomly sorts photos, assigns a discrete number to each lineup shown, maintains a record of which version each witness saw, guides witnesses through a series of questions on each photo (with a beep to prompt the administrator to ask follow-up questions if an identification is made), preserves an audio recording of all questions and answers (downloadable to CD) and generates a report of results including the photos shown, identifying who the suspect was and whom the witness picked. (See Jerry Farris, "Remote Lineup Application," *The Police Chief* 75, no. 8 (August 2008): 96-98.)

number of times the display was shown, and all photos must be shown each time in the same order as the original display. Since the scientific evidence establishes a sharp drop-off in the reliability of any identification made after two cycles, some departments will not allow more than two cycles. Certainly, no criminal charge should be based on an identification requiring more than two cycles. (All eyewitness identification cases should, in any event, have other corroborating evidence.)

Blind Administration

Emphasize the importance of using an independent administrator whenever possible. When the investigator has already interviewed and cultivated a relationship with the witness, he should simply explain that department policy requires another officer to conduct this procedure but that he will be available to talk to the witness as soon as the procedure is done. Whenever an independent administrator is used, the investigator who knows the identity of the suspect must remain out of sight of the witness when the photos are shown.

When no independent administrator is available, a functionally equivalent blinded method must be used to administer the lineup. "Blinded" means that the investigator administering the lineup who knows the identity of the suspect must (1) instruct the witness that he does not know the order of the photos or whether the person who committed the crime is in any of the photos and (2) have the witness view the photos in such a manner that the administrator cannot see which photo the witness is viewing.

Make clear that the blind component requirement is not because there is any question about their professionalism or integrity but because of human nature: It is natural for a witness to look to the investigator for validation, and it is natural for the investigator to be pleased the suspect is picked. The slightest reaction, such as seeing the investigator's eyes light up when the "right" person is picked, can instantly artificially inflate the witness's level of confidence in his or her selection. Blind administration eliminates this risk.

Instructions to the Witness

Before any photo display is shown, the witness should be instructed:

- The person who committed the crime may or may not be included
- I do not know whether any person being investigated is included **(blind)** ***or*** I do not know the order of the photos **(blinded)**
- Even if you identify someone during this procedure, I will continue to show you all photos in the series
- Keep in mind that a photo may be an old one; some things, like hair styles, can be changed, and skin tones may look slightly different in photos
- You should not feel you have to make an identification; it is just as important to clear innocent persons as it is to identify the guilty; whether or not you identify someone, the investigation will continue
- You will see only one photo at a time; they are not in any particular order; take as much time as you need to look at each one
- You should avoid discussing this procedure or the results with any other potential witness in the case

Role of Administrator During and After the Lineup

After the witness has looked at each photo, the administrator should ask, "Is this the person who [describe act committed]? If the answer is no, move on to the next photo. If the answer is yes, follow up with, "How certain are you of your selection?" The witness's exact answers must be documented for any yes answer. (If the witness asks whether you mean a percentage or on a scale of 1 to 10, tell him or her to use whatever method seems right to him or her.) Note also any physical or emotional reactions of the witness.

Be careful not to give the witness any feedback on his or her answer (such as "good work!" or "that's who we thought it was"). (Of course, an independent administrator who does not know who the suspect is will be unable to give such feedback.) Answers other than yes or no may also be helpful to the investigation and should likewise be documented. Even if an identification is made, continue showing the remaining photos in the array." After one cycle of the array has been completed, do not repeat the procedure unless requested by the witness. If requested, show all photos in the array, in the same order, and document any additional comments.

The administrator's report must indicate how many times the array was shown. Keeping track of the number of times photos are displayed before an identification is made provides an additional tool for evaluating the reliability of the identification. If the photo display is shown more than twice, the witness is likely to be "comparison shopping"—i.e., guessing. Documenting this alone is an improvement over the simultaneous display procedure, in which comparing photos to find the person most like the perpetrator (regardless of whether it is, in fact, the perpetrator) was always an inherent, but usually immeasurable, risk.

Many departments (including Ramsey County) complete their eyewitness identification procedure by asking the witness to fill out a form confirming the oral result in the witness's own handwriting. The portion of the Ramsey County form to be completed by the witness indicates how many photos were shown, a check-off that the witness either was or was not able to identify any person, a space to answer in the witness's own words the question, "How certain are you of your identification?" and a signature and date line. If the witness refuses to sign the form, the administrator writes "refused." The entire form, including the witness advisory and the portions completed by the administrator and the witness, is placed in the case file regardless of whether any identification is made. Ramsey County also has an alternate version of its form in simplified language as an option for use with young children, mentally impaired persons or persons with limited knowledge of English. (Both forms are available online at: www.co.ramsey.mn.us/attorney/SPDNA.asp.)

The administrator must also preserve the photo display used, including the order of photos. The 6-person template for simultaneous photo displays may be used for this purpose. If an identification is made, have the witness sign and date the photo.

Follow-up Interview by the Investigator

In cases in which an identification is made, after the witness has answered the level of certainty question, the case investigator who knows who the suspect is may follow up with a supplemental interview as needed. This is the time to develop as many additional facts as possible about

details of any identification made, including exploring what it was about the photo (or photos) selected that made the witness pick it, any follow-up on the witness's level of certainty or confidence in the selection or, in the case of multiple perpetrators, what each individual did.

It continues to be important that the investigator not provide any information that could artificially inflate the level of confidence the witness expressed in any selection. If a witness asks whether he or she has picked the "right" person, that question should not be answered (if at all) until the investigator has asked all follow-up questions and the investigation is complete. Especially if other potential eyewitnesses are yet to be questioned, witnesses may simply be told the investigation is ongoing and needs to be concluded before that question can be answered. If the person picked is ultimately charged with a crime, the witness will eventually find this out. However, being careful not to reinforce the witness's selection, and documenting this, will strengthen any case ultimately charged by eliminating any defense claim that the witness was manipulated into making a positive identification. If witnesses are concerned for their safety and want to know if the suspect is in custody, that question may be answered at the end of the interview.

Selecting Photos for the Lineup

As has typically been the practice in the past, the investigator with knowledge of the case and the identity of the suspect may continue under the new protocol to be involved in assembling the photo lineup. Training on the new protocol is a good opportunity to review lineup photo selection. Use M-RAP descriptors given by the witness to find fillers (*unless* the witness's description does not match the suspect's: in that event, use descriptors matching the suspect's description). Select at least 5 fillers (a larger number may be used). Before finalizing the photo group, look at them together to make sure the suspect does not stand out. Number the photos. Do not make the suspect Number 1. If the blinded method is used, the investigator simply has someone else number the photos and insert them in folders, the box or the laptop.

When there are multiple perpetrators, the same ratio of fillers to suspects should be used (at least 5:1). Typically separate photo displays are prepared for each suspect. If all suspects have similar characteristics (such as in gang cases with multiple perpetrators of the same age and ethnicity), one large lineup containing all suspects could be done containing the same filler-to-suspect ratio.

If more than one witness views the photo display, consider placing the suspect in different positions in each. However, be sure to preserve a photo record of the order of photos shown to each witness and to have each witness sign and date any photo selected. (A good way to preserve the record of the order of photos shown is to print a copy of the 6 photos used in the simultaneous display 6-pack format.)

Training Key® #600

Eyewitness Identification

Recent research findings have prompted development of new guidelines and protocols for using eyewitness identification—whether it be through photo arrays, showups, or lineups.

Background

Although the evidence provided by eyewitnesses can be tremendously helpful in the development of leads, identifying criminals, and exonerating the innocent—it is subject to error. Civilian eyewitnesses frequently prove to be unreliable observers, and erroneous identifications are sometimes the result. Misidentifications by eyewitnesses are normally the result of a combination of factors.

For example, human perception tends to be inaccurate, especially under stress. The average citizen, untrained in observation and placed under extreme stress as a victim of or witness to a crime, may not be able to describe a perpetrator accurately, sometimes even after coming face-to-face with the individual.

Also, a witness, particularly one who is not really sure what the perpetrator actually looked like, may be easily influenced by suggestions conveyed to him or her during the identification process. In *United States* v. *Wade*, the Supreme Court of the United States recognized these facts in saying:

> *The influence of improper suggestions upon identifying witnesses probably accounts for more miscarriages of justice than any other single factor. Perhaps it is responsible for more such errors than all other factors combined.*[1]

Law enforcement officers may unwittingly facilitate misidentifications by using suggestive words or engaging in certain types of suggestive behavior. The average witness, anxious to make an identification and influenced by the police officer's image as an authority figure, can be very sensitive to any suggestion made by the police regarding the identity of the perpetrator. Officers may, totally unintentionally, convey to the witness by word or behavioral cue, that a particular person being viewed is the suspect.

Consequently, great care must be taken by officers conducting any type of eyewitness identification to avoid any action that might lead to an erroneous identification. Scrupulously adhering to the procedures and precautions outlined in this document will help avoid misidentifications that may lead to unjust accusations or even erroneous convictions of innocent persons and divert the investigation away from the real culprit. In addition, even if the actual perpetrator is caught and brought to trial, using improper identification procedures during the investigation will often cause the suppression of identification evidence at trial, resulting in dismissal of the charges or otherwise making it impossible to convict the guilty party.

It is estimated that some 77,000 people nationwide are put on trial because eyewitnesses pick them out of lineups or photo arrays. Recently, changes in eyewitness identification procedures have been spurred by the fact that nearly 200 people have been cleared of crimes through DNA evidence, most of which were convicted based on eyewitness identification.[2]

Research in this field has provided much information on the dynamics of eyewitness identification. For example, the manner in which suspects are presented to witnesses has bearing on whether identification will be made and which individual is more likely to be pinpointed by the witness. In the wake of these and many other research findings, the American Bar Association (ABA) issued a resolution containing *Best Practices for Promoting the Accuracy of Eyewitness Identification Procedures* in August 2004. The document has subsequently prompted states such as Wisconsin and California to conduct similar reviews of eyewitness identification practices and to issue recommendations for change in their respective

jurisdictions that generally mirror the ABA suggestions.[3] No doubt, these findings will continue to influence reforms around the nation. Officers may find that these best practices may also be cited during court proceedings as models for conducting eyewitness identification.

If a court determines that an identification procedure was excessively suggestive, the court may prohibit introduction of the evidence in question. It may rule that any in-court identification of the accused by the victim is inadmissible or suppress other evidence that was obtained as a result of an improper pretrial identification procedure or both. Of course, any of these actions may be fatal to a case.

Today, in evaluating proper identification procedure, the courts will generally be concerned with whether it was suggestive. If the court finds that the procedure was suggestive, the court will then proceed to determine whether, despite the suggestiveness, the identification was reliable when considering the totality of the circumstances.[4]

For purposes of this document, identification procedures may be categorized as showups, lineups, or photo arrays. In a lineup, eyewitnesses are presented with a number of individuals. By contrast, in a showup, witnesses are shown one suspect only. Photo array procedures generally involve showing several photographs to a witness for the purpose of obtaining identification.

Showups

The showup has been widely condemned by the courts and by experts in law, law enforcement, and law enforcement identification procedures.[5] While the courts have not held showups to be categorically improper, they have ruled that the determination of whether a specific showup was excessively suggestive will be made based upon the totality of the circumstances attending that particular showup. In practice, evidence deriving from showups is frequently suppressed because the showup is so inherently suggestive. Consequently, the use of showups should be avoided where possible, particularly when photo arrays or lineups could be used.

It is recognized however, that a showup may provide sufficient probable cause early in an investigation that will help avoid the escape of a prime suspect as well as facilitate the release an innocent person and thus redirect police investigations in potentially more productive areas. Therefore, where use of a showup seems reasonable and appropriate, certain guidelines should be followed to minimize the suggestiveness of the procedure and the risk of suppression of any resultant identification evidence.

Showups conducted in the station house or jail are the most unreliable and hence the most objectionable. Showups should, whenever reasonably possible, conform with the following guidelines:

- Showups should not be used when independent probable cause exists to arrest a suspect.
- Prior to the showup, the witness should provide officers with as complete a description of the suspect as possible.
- When possible, the witness should be taken to the location of the suspect rather than bringing the suspect to the witness.
- Showups should not be conducted when the suspect is in a cell, handcuffed, or dressed in jail clothing.
- Showups should not be conducted with more than one witness present at a time. If showups are conducted separately for multiple witnesses, the witnesses should not be permitted to communicate before or after the showup regarding the identification of the suspect.
- The same suspect should not be presented to the same witness more than once.
- Showup suspects should not be required to put on clothing worn by the perpetrator, speak words uttered by the perpetrator, or perform other actions mimicking those of the perpetrator.[6]
- Words or conduct by the police that may suggest to the witness that the individual is or may be the perpetrator should be scrupulously avoided. For example, one should never tell the witness that the individual was apprehended near the crime scene, that the evidence points to the individual as the perpetrator or that other witnesses have identified the individual as the perpetrator. Unfortunately, the mere fact that the individual has been presented to the witness for identification strongly suggests that the officers believe him to be the guilty party.
- Following the showup, ask the witness how confident he or she is in the identification.
- Before showing the suspect, the following statement should be read to the witness. (Note: The same statement, with minor adjustments for context, should be made prior to using photo arrays or lineups). The statement should include the following:

In a moment I am going to ask you to view (a person) (a series of photos) (a series of individuals).

It is just as important to clear innocent persons from suspicion as to identify guilty parties.

[In the case of lineups and photo arrays say that]: Individual(s) present in the (lineup) (photo array) may not appear exactly as they did on the date of the incident because features such as head hair and facial hair are subject to change.

The person who committed the crime may or may not be present in the group of individuals.

You do not have to identify anyone.

Regardless of whether you make an identification, we will continue to investigate the incident.

Do you understand these instructions?

Lineups

The lineup, if properly conducted, is significantly less suggestive than the showup and hence is generally preferable. Nevertheless, police officers conducting a lineup must also use caution to avoid suggestive influences. Studies of witness psychology reveal that lineup witnesses tend to believe that the guilty party must be one of the individuals in the lineup. Consequently, witnesses tend to pick out the person in the lineup who most closely resembles their perception of the perpetrator, even though the perpetrator may not in fact be

present.

Instructions—similar to those given to a witness prior to a showup—can facilitate an identification and avoid misidentification based on the witness's memory. The witness should be told that he or she is about to view a group of individuals who may have committed the crime. Before making any identification, the witness should be told that the individuals present in the lineup may not appear as they did on the date of the incident due to changes in features, such as head and facial hair or scars. The witness should also be told that the suspect may or may not be in the lineup; and that a positive identification is therefore not mandatory. The witness should be informed that whether or not an identification is made, the investigation will continue. Where two or more witnesses are involved, they should view the lineup separately and should not be allowed to discuss the lineup until all have completed the process.

Many witnesses, in an effort to please the police officers conducting the lineup, feel obligated to pick out someone from the lineup rather than disappoint the officers.[7] Such witnesses are often sensitive to, and strongly influenced by, subtle clues conveyed by the officers that may indicate to the witness that the officer believes that a particular individual in the lineup is the perpetrator. This makes it doubly important that officers conduct the lineup—and conduct themselves—in a nonsuggestive manner. To prevent these suggestive techniques and avoid any tip offs about the suspect's identity, police lineups should be administered by an officer who does not know which person in the lineup is the actual suspect.

Additionally, it has been recommended in the studies cited by the ABA and others that a lineup should be administered sequentially rather than all at once (simultaneously). When witnesses view photos or lineups simultaneously, they tend to make comparative judgments; they try to determine which of those persons present appears to make the best fit to their memory of the suspect. When the suspect is present in the lineup or photo array, they will likely be identified in this manner and no harm is caused. But, if the actual suspect is not present, witnesses still tend to make an identification based on the best fit among those present. This can lead to misidentification. Therefore, studies suggest that sequential presentation of suspects in both photo arrays and lineups is the better approach because witnesses tend to make absolute rather than comparative judgments when viewing suspects individually. In this process, suspects and fillers are presented one at a time and then move out of site as the next person is brought into view.

Preparing for a lineup may be as important to the validity of the procedure as actually conducting it. Selecting individuals as fillers for the lineup is a particularly important issue. In determining which fillers should be presented to the witnesses in a lineup, the following principles should be observed:

1. The lineup should consist of individuals of similar physical characteristics. Witnesses tend to pick out anyone who stands out from the rest of the group in any significant way. Therefore, the individuals who appear in the lineup should be reasonably similar with respect to age; height; weight; hair color, length and style; facial hair, clothing; and other characteristics such as glasses or visible tattoos. Of course, the individuals must be of the same race and sex. Absolute uniformity of the lineup participants is obviously unattainable and is not procedurally necessary.[8] However, lineups should avoid using fillers who so closely resemble the suspect that the witness cannot correctly identify the actual suspect.

2. The lineup should consist of at least five or six persons. The smaller the lineup, the less objective it is. A lineup with only two or three persons is little better than a showup, and suggestive factors become excessively influential. In addition, some authorities caution against the use of plainclothes police officers in lineups because they do not naturally look or act like suspects, a factor that causes witnesses to reject them as possibilities. They also may have been seen by the witness in the community, upon visits to the police station, or in similar contexts.

Preparing a witness for viewing the lineup is another important consideration. Preparation should be limited to nonsuggestive statements, such as explaining the procedure that will be used and making it clear that the individuals in the lineup will be unable to see the witness. Officers should avoid taking any action or making any statement that will adversely affect the validity of the lineup. In particular, before a lineup, officers should avoid:

1. Showing the witness any photos of the suspect.[9]

2. Conducting a showup with the suspect, or allowing the witness—accidentally or otherwise—to see the suspect, such as in an office or holding cell prior to the lineup.

3. Making suggestive statements to the witness, such as telling the witness that the person that is the suspect will be in the lineup. It is even desirable to tell the witness that the perpetrator may not be among those in the lineup. Other common errors that should be avoided include telling the witness that another witness has identified someone in the same lineup, advising the witness to take special notice of some particular individual in the lineup, or making any other statement or action which may cause the witness to focus on a particular individual, or to feel that the witness must pick out somebody.

4. Finally, if more than one witness is to view a lineup, the witnesses should be kept separated prior to the lineup and should not be permitted to discuss the case with each other, compare descriptions, etc.

5. In conducting the lineup, officers who are not assigned to that case should handle the procedure if possible. This helps to minimize the possibility that the officers who are conducting the investigation will in their zeal to solve the case, convey (inadvertently or otherwise) clues to the witness as to which person to pick out, or put pressure on the witness to pick out somebody. The following should also be observed in conducting lineups:

- *Statements that put pressure on the witness to make an identification should be avoided.* Witnesses are anxious to please the officers conducting the lineup, so they should not be made to feel that they are expected to pick out someone. For example, urging a hesitant witness to make an identification or to try harder would be improper.
- *Statements that may cause the witness to focus on a particular individual should be avoided.* The same sort of statements discussed in regard to witness preparation should be avoided during actual conduct of the lineup. Officers are often tempted to prompt a witness when someone in the lineup is a prime suspect and the witness is hesitant to make an identification.
- *The lineup should be presented to one witness at a time.* The common practice of having a group of witnesses view a lineup simultaneously should not be permitted. Courts,

including the U.S. Supreme Court,[10] have disapproved multiple-witness lineups. If for some reason, more than one witness must be present simultaneously, witnesses should be required to make their identifications silently, in writing, and should not be permitted to discuss the identification aloud with each other or with the officers present.

• *If possible, conduct a blank lineup.* Conducting two or more lineups, where one lineup includes the suspect and the others do not, assists the prosecution in later refuting any claim by the defense that the lineup was too small or was suggestive.

• *If multiple lineups are to be conducted for the same witnesses, do not put the suspect in more than one.* Seeing the same face in a second lineup may cause the witness to erroneously recognize the person as the perpetrator, merely because the face is familiar from the first lineup. Because of this, the courts have disapproved this practice.[11]

6. Videotape and audiotape the lineup whenever possible. This procedure provides a historical record of the proceeding should the identification or the process used come into question, or the actual identification process is necessary to assist the prosecution at trial.

In another context the Court has held that requiring a suspect participating in a lineup to speak, even to the extent of uttering the same words used by the criminal does not violate the Fifth Amendment, since it is not "testimonial self-incrimination." Other actions, such as standing, walking, gesturing, and the like are similarly not self-incriminating within the meaning of the Fifth Amendment. Similarly, requiring the suspect to wear certain clothing has been held to be outside of the coverage of the Fifth Amendment.

Following the lineup, certain precautions should be taken. For example, where more than one witness has viewed a lineup, witnesses should be kept separate after the lineup procedure has been completed. While discussions between witnesses following a lineup will presumably not render any previously made identification invalid, it may affect the admissibility of a subsequent in-court identification of the defendant by these witnesses during the trial itself.

Additionally, witnesses should not be praised or congratulated for picking out the suspect. This may serve to reinforce a shaky identification, convincing the witness that he or she has picked out the actual perpetrator when the witness actually has doubt. In addition to increasing the chances of a miscarriage of justice, this may lead to suppression of a later in-court identification of the perpetrator by the same witness.

Photo Identifications

Photographic identifications may take a number of forms. If a single photo is shown to the witness, the photo identification has all of the vices of the showup and is generally regarded by the courts as improper. Consequently, multiple-photo arrays are preferable. In such procedures, the photos may be shown individually, one at a time, or may be displayed simultaneously on a card. This procedure is similar to a lineup, and virtually all of the cautions set forth for lineups in the preceding discussion apply to multiple-photo identification procedures as well.

Specifically, the following recommendations are made regarding photographic identifications presented simultaneously or sequentially:

• There should be at least six photographs.

• The photographs should be of people who are reasonably uniform in age; height; weight and general appearance; and of the same sex and race. If scars or tattoos were present on the suspect, all in the photo array should be similarly marked or the area of the body should be covered for all.

• The photographs themselves should be similar. For example, color photographs and black and white photographs should not be mixed; they should be of approximately the same size and composition.

• Mug shots should not be mixed with snapshots since they are generally recognizable as such and have an immediate tendency to brand an individual.

• If mug shots are used, or if the photographs otherwise include any identifying information regarding the subject of the photograph, this information should be covered so that it cannot be seen by the witness. If only some of the photos have such information, the corresponding portions of photos should be covered so that none of the photos will look different.

• The array should not include more than one photo of the same suspect.

• The photo array should be shown to only one witness at a time.

• As with showups and lineups, no suggestive statements should be made. For example, witnesses should not be told that the suspect's photo is in the group, or that someone else has already picked out one of the photos as being the criminal. Similarly, nothing should be said or done to direct the witness's attention to any particular photograph. For example, pointing to a particular photo and saying, "Is this the guy?" is improper and may lead to suppression.

• As in the case of lineups, it is recommended by some that photo arrays be presented to the witness one at a time, then removed from view before the next photo is presented.

• The photo array should be preserved for future reference. In fact, in some states, failure to preserve the array will lead to suppression of the identification process. Additionally, as in lineups, full details about the identification process should be recorded and preserved—such as the administrator's name; procedures used; date, time and location of the procedure; number of fillers, names of those present during the procedure; and whether the array was viewed more than once by the same witness. Assuming that the photo identification has been properly conducted and that the array itself was not in any way suggestive, preserving this information helps the prosecution refute any claims by the defense to the contrary.

The proper use of photographs to obtain identification of a perpetrator has been approved by the courts.[12] However, the courts appear to prefer that photographic identification procedures be used only to develop investigative leads. Some courts have criticized the practice of using photographic identifications once the suspect has been arrested, preferring that once the suspect is in custody and therefore readily available, a lineup be employed for eyewitness identifications.[13]

The Right to Counsel at Eyewitness Identifications

In 1967, the U.S. Supreme Court held that a suspect has a right to counsel at a post-indictment lineup.[14] Subsequently, the Court expanded this ruling to provide for a right to counsel at any lineup conducted after formal adversary proceedings

have been initiated against the suspect, whether by way of formal charge, preliminary hearing, indictment, information, or arraignment.[15] There is, however, no right to have counsel present at a lineup conducted before such adversary proceedings have been initiated. These same rules apply to showups. However, there is no right to counsel at photo identification sessions.[16]

The purpose of having counsel present at the identification is to enable counsel to detect any suggestiveness or other irregularities in the procedure. It should be recognized, however, that the presence-of-counsel requirement may actually help the police in certain instances. First, the department's goal should be to avoid any possibility of an erroneous identification and a resultant miscarriage of justice. Therefore, the presence of counsel may be regarded as a positive step in preventing any such occurrence. In addition, if counsel is present and acquiesces in the procedure being employed, this may preclude any subsequent defense contention that suggestiveness or other impropriety occurred. This will strengthen the prosecution's case. Therefore, to the extent that defense counsel is responsible and objective, cooperation with counsel in constructing and conducting a nonsuggestive and otherwise proper identification procedure may benefit to all concerned.

Summary

Of all investigative procedures employed by police in criminal cases, probably none is less reliable than the eyewitness identification. Erroneous identifications create more injustice and cause more suffering to innocent persons than perhaps any other aspect of police work. Proper precautions must be followed by officers if they are to use eyewitness identifications effectively and accurately.

Endnotes

[1] 388 U.S. 218, 229 (1967).

Also: California Commission on the Fair Administration of Justice, "Report and Recommendations Regarding Eyewitness Identification Procedures," released April 13, 2006. Also: State of Wisconsin, Office of the Attorney General, "Model Policy and Procedure for Eyewitness Identification," September 2005.

[4] This in turn is to be achieved by analyzing six factors. These are (1) the opportunity of the witness to view the criminal at the time of the crime; (2) the witness's degree of attention; (3) the accuracy of the witness's prior description of the criminal; (4) the level of certainty demonstrated by the witness at the confrontation; (5) the length of time between the crime and the confrontation and (6) whether the witness was a casual observer or the victim of the crime. If in view of these various factors, it appears that the identification was reliable despite the suggestiveness of the procedure, evidence of the identification will be admissible to bolster a subsequent in-court identification. *Neil* v. *Biggers*, 409 U.S. 188 (1972). See also *Manson* v. *Brathwaite*, 432 U.S. 98 (1977). (*Biggers* test applied to photo identifications.)

[5] See *Stovall* v. *Denno*, 388 U.S. 293 (1967).

[6] Although such requirements sometimes may properly be imposed during a lineup, the showup is so inherently suggestive that the same court that would approve their use in a lineup may find them excessively suggestive when employed during a showup.

[7] Although it may surprise many officers to hear it, the average citizen still sees the police officer as a benevolent father figure (or perhaps, in the case of a female officer, a mother figure), with the result that the lineup witness is often extremely anxious to please the officer by making an identification—even though the citizen is not at all certain that the person chosen is the guilty party.

[8] *United States* v. *Lewis*, 547 F.2d 1030, 1035 (8th Cir. 1976).

[9] Even a photo array should be avoided. This is especially true if the suspect is the only person in the photo array who is also in the lineup.

[10] See *Gilbert* v. *California*, 388 U.S. 263 (1967).

[11] See *Foster* v. *California*, 394 U.S. 440 (1969).

[12] *Simmons* v. *United States*, 390 U.S. 377 (1968).

[13] It has been said that once a witness has identified a photo, this influences subsequent identifications. The contention is that the witness thereafter is really only recognizing the previously seen photograph, not the actual criminal. For this reason, the practice of showing a witness a photograph of the defendant just prior to trial to "refresh the witness's memory" should be avoided.

[14] *United States* v. *Wade*, 388 U.S. 218 (1967), *Gilbert* v. *California*, 388 U.S. 263 (1967).

[15] *Kirby* v. *Illinois*, 406 U.S. 682, 688-89 (1972).

[16] *United States* v. *Ash*, 413 U.S. 300 (1973). At least one state supreme court has held that where simulated lineups are filmed or videotaped for later exhibition, there is no right to have counsel present when the film or videotape is subsequently shown to witnesses, *People* v. *Lawrence*, 481 P.2d 212 (1971). Showing witnesses a film or tape of a previously recorded simulated lineup has become known as a "Lawrence lineup."

questions

The following questions are based on information in this *Training Key*. Select the one best answer for each question.

1. Which of the following statements is *false*?

   (a) Improper identification procedures may result in suppression of eyewitness testimony at trial.
   (b) Some eyewitnesses are anxious to please or assist officers and may make identifications based on subtle suggestions or cues from officers during lineups or photo identification.
   (c) Showups should be used even when independent probable cause exists to arrest the suspect in question.
   (d) During showups, the witness should be taken to the location of the suspect rather than bringing the suspect to the witness.

2. Which of the following statements is *false*?

   (a) Showup suspects may be required to put on clothing or speak words uttered by the perpetrator.
   (b) Following a showup, the witness should be asked how confident he or she is in the identification.
   (c) Lineups are inherently less suggestive to witnesses than showups.
   (d) Lineups should be conducted by someone who does not know the identity of the suspect.

3. Which of the following statements is *true*?

   (a) A lineup should consist of at least five or six people.
   (b) Multiple witnesses to the same lineup should be kept separate from one another prior to and following the identification procedure.
   (c) Whenever possible, lineups should be presented to one witness at a time.
   (d) All of the above are true.

answers

1. (c) When independent probable cause exists, the suspect should be taken into custody without conducting a showup.
2. (a) During showups, suspects may not be required to put on clothing worn by or speak words uttered by the perpetrator as these could promote a misidentification.
3. (d) All of the statements are true.

Successful Eyewitness Identification Reform: Ramsey County's Blind Sequential Lineup Protocol

By Susan Gaertner, Ramsey County Attorney, Saint Paul, Minnesota; and John Harrington, Chief of Police, Saint Paul, Minnesota

An article in the October 2008 issue of this magazine raises one of the most critical issues in the law enforcement community today—the problem of faulty eyewitness identification—and urges police chiefs to lead the discussion of reform.[1] Highly publicized DNA exoneration cases, most of which involved mistaken eyewitness identifications, have focused public scrutiny on law enforcement procedures and challenged law enforcement practitioners both to reexamine long-standing practices and to implement change that will reduce the likelihood of such misidentifications in the future. No one in the law enforcement profession has any interest in convicting the innocent.

The Mecklenburg article makes eight general recommendations[2] but is short on practical specifics. It also sidesteps the two essentials in lineup reform that are supported by more than a quarter century of scientific study—that lineups be "blind" (that is, conducted by someone who does not know who the suspect is) and sequential.[3] The article argues that both points require more field study and that there are practical impediments to the implementation of these reforms in a law enforcement setting.

The present article, intended as a pragmatic contribution to the reform discussion, describes the successful implementation of a blind sequential lineup protocol in Ramsey County, Minnesota. Its purpose is not to debate the science but to address the practical application of this change in a law enforcement setting and to provide specifics for any other agency interested in doing the same.

Persuaded by its own review of the science (for reasons stated below), Ramsey County decided to move ahead in 2005 with a year-long pilot project to test whether implementation of blind sequential lineups was feasible and practical for law enforcement practitioners. The pilot was successful and, in April 2006, the new lineup protocol was adopted as countywide policy by all law enforcement agencies in the jurisdiction. The Illinois Field Study (described in the Mecklenburg article) notwithstanding, Ramsey County continues to be satisfied that the bulk of scientific evidence—and pragmatic considerations—support this change. After almost four years of experience with this protocol, the county has concluded that it is feasible, practical, and superior to past eyewitness identification procedures.

Lineup reform need not be delayed for years awaiting the outcome of additional field study when the basic reforms make sense objectively and when experience demonstrates that they can be successfully applied in the field.[4] Implementing this change in protocol has not only proved workable for investigators in Ramsey County but has also improved the uniformity and the quality of eyewitness identification investigations. It has also yielded bonus practical benefits in court.

The county's experience is adaptable to other law enforcement jurisdictions; hopefully, outlining it here will encourage other jurisdictions to replicate this effort—and perhaps provide some shortcuts for doing so.

Background: The Sutherlin Exoneration

Ramsey County is a jurisdiction of 493,215 residents.[5] It has 10 separate law enforcement agencies, including the Saint Paul Police Department (the largest agency, currently with 599 sworn officers), the Ramsey County

Sheriff's Department, seven smaller suburban departments, and a campus police department. The Ramsey County Attorney's Office prosecutes all felony crimes committed in the jurisdiction.

As a result of national discussion of the DNA exoneration cases, the county attorney in March 2001 decided to initiate a systematic postconviction review of cases of all persons convicted in Ramsey County prior to 1995 (when current DNA technology became widely available) to determine if DNA testing could shed new light on the validity of their convictions.[6] Of the 116 cases identified, three, all from the 1980s, were found in which DNA evidence could be outcome-determinative. In only one was the evidence still available. Testing of that evidence resulted in the exoneration of David Sutherlin for a 1985 rape. The primary evidence against Sutherlin was mistaken eyewitness identification.

In the Sutherlin case, the investigator suspected Sutherlin was the rapist based on the victim's physical description of her assailant, which matched Sutherlin's, and the fact that Sutherlin lived close to the location of the crime. His photo was included in a simultaneous photo display, which was shown to the victim by the investigator. The victim said he looked exactly like her assailant. At trial, she could only say, however, that he resembled her attacker. Other evidence presented included that enzymes found on the victim's clothing were consistent with those of Sutherlin as well as 22 percent of the population and that Sutherlin's car had a noisy muffler similar to one heard leaving the scene. The defendant was convicted and sentenced to serve time consecutive to an unrelated double murder.[7]

The 2002 DNA testing of the evidence in the 1985 rape case that exonerated Sutherlin also positively identified the real assailant: it turned out he lived in the same neighborhood as Sutherlin and matched the physical description provided by the victim.[8] Unlike Sutherlin, however, his photo was not on file with the Saint Paul Police Department at the time.[9]

The indisputable evidence of a miscarriage of justice in the Sutherlin case and the failure to retain evidence that would either have confirmed or refuted the validity of two other convictions prompted two reforms in Ramsey County: the development of a countywide evidence retention policy and a reexamination of eyewitness identification procedures.[10]

Review of Practice and Science

The traditional photo identification procedure in Ramsey County, as it has been across the United States, was the simultaneous photo array. The typical photo array contained six photos. It was the usual practice for an investigator with knowledge of the case to show the photo lineup to witnesses.

In the wake of the DNA exonerations, the U.S. Department of Justice's National Institute of Justice (NIJ), under then U.S. attorney general Janet Reno, formed a study group to examine eyewitness identification procedures.[11] The panel reviewed what was then 20 years of scientific research on memory and interview techniques, including scientific evidence supporting blind sequential lineup administration.[12] Its landmark 1999 report began the national law enforcement discussion of lineup reform and made numerous reform recommendations (many of which parallel those in the Mecklenburg article).[13] The panel acknowledged the scientific evidence at that time showing eyewitness identification to be more reliable when photos were shown sequentially and blind procedures were used.[14] However, operating on consensus, the report presented both sequential and simultaneous as acceptable alternative procedures and stopped short of including blind administration in its final recommendations, instead stating that it "may be impractical for some jurisdictions to implement."[15]

The first meta-analysis assessing all laboratory studies comparing the simultaneous and sequential lineup formats came in 2001.[16] It showed that identification errors are significantly more likely (up to three times higher) in a simultaneous format; conversely, the sequential procedure produces fewer misidentifications. The sequential format also produces fewer correct identifications overall. However, the reduction in correct identifications using this method is offset by the much larger reduction of incorrect identifications.[17]

The DNA exonerations, the NIJ report, scientific data, and subsequent open discussion of the science involved in eyewitness identification caused law enforcement jurisdictions throughout the United States to reassess eyewitness identification procedures and whether those procedures contributed to misidentification. New Jersey was the first state to implement statewide blind sequential lineup reform, followed more recently by North Carolina.[18] Ramsey County's review of the NIJ report and the underlying science convinced the jurisdiction that it should attempt to implement the reform, or at least test its feasibility in a law enforcement setting.

Rationale for Change

On reflection, the startling scientific evidence that the traditional law enforcement method of offering photo displays might have inadvertently increased the likelihood of misidentification makes sense objectively for two reasons:

- The risk of administrator influence on lineup results can be essentially eliminated by having someone other than the investigator, who knows the identity of the suspect, conduct the photo lineup, whether the lineup is simultaneous or sequential. (Ramsey County has the utmost confidence in the integrity and professionalism of its investigators but recognizes that even the most well-intentioned investigator who knows which person in the lineup is the suspect cannot eliminate all possibility of unintentionally cueing the witness or responding to the witness's identification or nonidentification of that person.)
- Simultaneous photo display tends to encourage relative judgment; that is, a witness comparing photos side by side can more easily pick the person who looks most like the perpetrator—regardless of whether that person is, in fact, the perpetrator.

The scientific evidence made clear that both components were necessary and that each accomplished a different objective. If a nonblind administrator is used, switching from simultaneous to sequential photo displays alone may even increase misidentification, since there is a danger of inadvertently highlighting an individual suspect photo. On the other hand, while recognizing the necessity of blind administration, the county understood the practical realities of conducting photo lineups under the time pressures and the personnel constraints in a criminal investigation and that, especially in a small department, the investigator with knowledge of the case (a nonblind administrator) might be the only one available. The county therefore set up a practical alternative that still maintained the blind component: If no independent administrator is available, the investigator must use a method that is the functional equivalent (FE)—that is, a method that assures that the investigator does not know and cannot see the order in which the photos are presented and that the witness knows this (and therefore will not be looking to the administrator for cues). This is sometimes called a "blinded" method.

Blind Sequential Lineup Pilot Project

In the spring of 2005, after reviewing the NIJ report and the scientific literature, the county attorney approached the Saint Paul chief of police and Ramsey County Sheriff Bob Fletcher about conducting a pilot project to test the feasibility of employing blind sequential lineups in the field.[19] They agreed. The county attorney developed a new lineup form to facilitate uniformity of application of this protocol change and conducted training of the pilot investigators in April 2005.[20] The training explained the rationale behind both the blind and the sequential components of the protocol.[21] Although using an independent administrator was the preferred method, the training also included the alternative FE (blinded) method. The pilot began May 1, 2005, and lasted one year.

At the outset, some law enforcement personnel were skeptical. Would having an independent administrator conducting the lineups cause unacceptable delays? Would this procedure result in overtime or other administrative complications or costs? Would lineup results be adversely affected because the administrator was not the investigator who had developed a rapport with the witness? Would there be a decline in positive identifications?

After one year, the results were clear: investigators who used this method found it not only workable but no more difficult to apply than the traditional method. There were no associated administrative difficulties or additional overtime costs. However, there was an unexpected benefit: most investigators involved in the pilot came to prefer the new method and felt more confident in the eyewitness identifications that resulted. Notwithstanding laboratory study results,[22] no one felt that appreciably fewer identifications had been made. The fear that independent administrators' lack of rapport with witnesses would adversely affect identifications turned out to be a nonissue. To Ramsey County's surprise, most investigators ended up preferring to use and managed to find an independent administrator; as a result, there was less need, in practice, to use the FE (blinded) option than was anticipated.

Taking the time to have a pilot project and being open to the suggestions of the investigators involved were crucial to winning support for the change. The blind sequential lineup procedure was adopted by all Ramsey County law enforcement agencies in April 2006. Countywide training of all investigators was conducted that month, and the protocol has been used since that time.

Ramsey County Blind Sequential Photo Identification Protocol

A one-page (two-sided) Sequential Photo Display Form was developed specifically for use by all Ramsey County law enforcement officers.[23] It contains all instructions needed in the field to ensure that the basic elements of the new protocol are uniformly applied. On one side are all the instructions for the administrator (whether independent or an FE), a section to be filled out by the administrator during the photo display, and a section to be filled out by the administrator after the photo display. On the other side are the instructions to be read to the witness before the photo display (including alternative language, depending on whether an independent or an FE administrator is used) and a section to be completed by the witness after the photo display. The form is designed to be selfexplanatory, enabling an officer from the street with no knowledge of the case to be called in, if necessary, to be the independent administrator.

In formulating the photo display (typically, six photos), administrators are instructed to use descriptors given by the witness to find fillers. They are instructed to select at least five fillers and, before finalizing the array, to look at them together to make sure the suspect does not stand out.

An independent administrator is to be used whenever possible. Agencies deal with the rapport issue directly. If an investigator has already interviewed and cultivated a relationship with a witness, the investigator explains that department procedures require another officer to show the photos but that the investigator will be available to talk to the witness as soon as the procedure is done. Whenever an independent administrator conducts the procedure, the investigator with knowledge of the suspect's identity must remain out of sight of the witness while the lineup is being conducted.

When no independent administrator is available, the FE method may be used, ensuring first that the investigator in the case with knowledge of the identity of the suspect does not know and cannot see where the suspect is in the order of photos displayed and, second, that the witness knows this. Using the alternate FE language on the Sequential Photo Display Form instructions to the witness, the investigator tells the witness, "I do not know the order of the photos," and instructs the witness not to let the investigator see which photo is being viewed.

Lineup Methods

There are several methods by which the photos may be displayed sequentially. All have in common the fact that the witness sees only one photo at a time and must continue to view all the photos even if a person is identified before all are shown.[24]

The high-tech version of this method would be to use a laptop computer to display and maintain a record of the photos shown. However, no adequate software program was available to Ramsey County in 2005 that adequately addressed technical issues.[25]

The low-tech version can be as simple as numbering the photos and placing each in a separate folder (or, for the FE alternative, having someone else do so for the investigator). The witness can then be instructed to look at the folders one at a time (for the FE alternative, this must be done in such a manner that the investigator cannot see the photos). The remaining folders should be kept out of sight so that the witness does not know how many there will be.

The "box with six doors" method, developed and used in the state of New Jersey since 2001, has been used widely by Ramsey County investigators and is the preferred method for many departments in this jurisdiction. The standard six-person simultaneous photo display sheet is simply inserted in a box built specifically for this purpose. Only one door at a time is opened by the witness. The box is equally adaptable to the FE method since someone else can prepare the six-person lineup sheet and insert it into the box.

Regardless of the method used, a record must be kept of the photos used and the order shown.

Whether an independent administrator or an FE is used, the sequential photo display procedure is the same and includes the following:

- Reading the administrator instructions on the form and completing the case and witness identification information at the top of the form
- Selecting the applicable independent administrator or FE language on the form; reading and checking off the six instructions[26] to the witness and having the witness initial in the spot indicated that she understands the instructions (an alternate simplified instruction form has been developed for use with children, mentally impaired adults, and persons with limited knowledge of English)[27]
- Displaying the photos to the witness one at a time, with only one photo visible at a time, being careful not

to give the witness any feedback during or after the photo display
- Recording any comments the witness makes while examining the photos and any other relevant observations (such as the witness's physical reactions)
- If the witness makes an identification, asking the witness how certain he is of the identification and recording the answer on the form
- Not showing the lineup more than once *unless* the witness requests it; if requested, the entire lineup must be shown, even if the witness requests only one or a few
- Recording the number of times the lineup was shown and what the witness said each time
- At the conclusion of the photo display, having the witness complete the witness section of the form and, if an identification is made, having the witness sign the selected photo
- *Not* giving the witness feedback on the accuracy of any selection, as this can artificially inflate witness confidence in the selection and skew further investigation

The witness section of the form is the record, in the witness's own handwriting, of whether any identification was made and, if so, how certain the witness is of the identification. This portion of the form is to be signed and dated by the witness.

It is critical for administrators to record the number of times a witness is shown the sequence because the scientific evidence strongly supports the conclusion that there is a sharp drop-off in the accuracy of any identification made after two showings.[28]

The completed Sequential Photo Display Form covers all these points and is sufficient to document the procedure; however, some departments require that a general supplementary report be written as well.

Follow-up Interview by Investigator

After an independent administrator has conducted a lineup, the investigator assigned to the case may follow up with a supplemental interview, as needed. This is the time to develop as many additional facts as possible about the details of any identification made, including exploring what it was about the photo (or photos) selected that made the witness pick it, any follow-up on the witness's level of certainty or confidence in the selection, and, in the case of multiple perpetrators, what each individual did.

It is critical that investigators *not* provide any information that could artificially inflate the level of confidence witnesses express in their selections (for example, witnesses must not be told that they did a good job or picked the same person other witnesses picked). If witnesses ask whether they picked the right person, that question should not be answered until investigators have already asked all follow-up questions, if at all. If an investigation is ongoing—and especially if other potential eyewitnesses are yet to be questioned—witnesses may simply be told that the investigation needs to be concluded before that question can be answered. If the person a witness picked is ultimately charged with a crime, the witness will eventually find this out. However, being careful not to reinforce the witness's selection, and documenting this, should eliminate any defense claim that the investigator artificially inflated the witness's level of confidence in his or her selection. If witnesses are concerned for their safety and want to know if the suspect is in custody, that question, of course, may be answered.

Other Implementations of Blind Sequential Lineup Protocols

Ramsey County is not alone in the adoption of this new eyewitness identification protocol. The neighboring jurisdiction, Hennepin County (which contains the city of Minneapolis and suburbs), after a similar pilot in 2004, successfully implemented blind sequential lineups countywide in 2005. Like Ramsey County, officers in Hennepin County may use an alternate "blinded" procedure if an independent administrator is unavailable.[29] In addition to the statewide adoption of this procedure in New Jersey and North Carolina, the Wisconsin Attorney General's Office has formally recommended that this change be adopted statewide,[30] and more than 200 Wisconsin law enforcement agencies, including those in Milwaukee and Madison, have done so to date. Others using this procedure include Denver, Colorado; Suffolk County, Massachusetts (including the Boston Police Department and suburbs); the Northampton, Massachusetts, Police Department; the Westfield, Massachusetts, Police Department; the Chaska, Minnesota, Police Department; the Virginia Beach, Virginia, Police Department; and Santa Clara County, California.[31] In January 2009, the Dallas, Texas, Police Department announced it was withdrawing from the NIJ-sponsored field study mentioned in the Mecklenburg article and was adopting the blind sequential protocol.[32] Seven other Texas jurisdictions had already adopted it. These examples indicate that the protocol can be adapted for large and small agencies in a variety of settings, urban, suburban, small-town, and rural.[33]

Assessment of the Ramsey County Experience

After almost four years of experience with the blind sequential eyewitness identification protocol, Ramsey County investigators and prosecutors report no problems with the change. Notwithstanding laboratory findings that this method may produce a slight drop in correct identifications (as the price for significantly fewer faulty identifications), investigators do not feel that they have lost identifications, and they have increased confidence in the identifications that are made. Use of the form has contributed to uniformity in application of the protocol. Overall, the additional attention paid to this issue has also heightened the county's awareness that no case should be based on eyewitness identification alone and that further investigation is always needed.

Keeping track of the number of times the photos are displayed before an identification is made provides an additional tool for evaluating the reliability of the identification, since it provides a mechanism for assessing whether the witness is "comparison shopping." This alone is an improvement over the simultaneous display procedure, in which comparing photos to find the person most like the perpetrator (regardless of whether it is, in fact, the perpetrator) was always an inherent, but usually unmeasurable, risk.

The change in protocol has not resulted in overtime, delay, or other administrative difficulties. The unexpected bonus of adopting this reform is that, in the courtroom, a major avenue of defense attack on both the admissibility and the reliability of eyewitness identification procedures has been eliminated. Most importantly, however, Ramsey County feels it has taken a significant step in reducing the likelihood of false eyewitness identification.

Conclusion

Ramsey County's change in protocol is not the only model for blind sequential identification reform, nor is it perfect. The county is prepared to make adjustments in the future as scientific knowledge in this area evolves. However, it is confident that this change represents an improvement over prior practice. The Ramsey County experience unequivocally demonstrates that this model can work in a law enforcement setting.

The authors wish to acknowledge the assistance of retired assistant Ramsey County attorney Jeanne Schleh in the writing of this article. Ms. Schleh also designed and implemented the blind sequential training method described herein. ■

Notes:

[1]See Sheri Mecklenburg et al., "Eyewitness Identification: What Chiefs Need to Know Now," *The Police Chief* 75, no. 10 (October 2008): 68–81 (hereafter referred to as the Mecklenburg article).

[2]Ibid., 74–76. These recommendations include standards and training on appropriate interviewing, selecting fillers, instructions to witnesses, memorializing witness verbal and nonverbal reactions in report writing, and raising officer awareness of the potential for influencing the outcome.

[3]This procedure is sometimes also referred to as "double blind" to include the fact that the witness likewise does not know the location of the suspect in the sequence (or even if the suspect is included at all). Since this should be a given in any lineup, this article will simply use the term *blind* to cover both.

[4]Action on this front should not be postponed pending the current NIJ-sponsored field study to which the Mecklenburg article alludes because that study appears to contain the same design flaw that existed in the Illinois study: it is designed to test whether witnesses correctly identify the person the police suspect. However, the crux of the matter in the DNA exoneration cases was that the police did not identify the correct suspect. Unlike laboratory studies, in which scientists can control ground truth (that is, who the real perpetrator is), a field study based on real crime cannot control for a known perpetrator.

[6]Only cases of persons convicted before 1995 who were still imprisoned were reviewed.

[7]While the rape investigation was under way, Sutherlin was arrested on a double murder and was convicted and sentenced for those offenses first, with a consecutive sentence imposed for his ultimate rape conviction. He is still serving time on the murders, but his 2002 exoneration of the rape means he will never serve any prison time for the sex offense. He will also be eligible for earlier release on the murders and, upon release, will not be subject to sex offender registration requirements that would otherwise apply.

[8]He could not be prosecuted due to expiration of the statute of limitations in effect at the time of the crime.

[9]Within a year of the 1985 rape, he did develop an arrest record. By 2002, when the DNA match was made, he had a lengthy record of convictions, although none was sex-related.

[10]This policy, first implemented countywide in 2004, is available on the county attorney's Web site at http://www.co.ramsey.mn.us/attorney/SPDNA.asp.

[11]The interdisciplinary panel of 34 persons included representatives of the criminal justice community (law enforcement agencies, prosecutors, and the defense bar) and social science researchers.

[12]A good summary of scientific recommendations from that time is found in Gary L. Wells et al., "Eyewitness Identification Procedures: Recommendations for Lineups and Photo Spreads," *Law and Human Behavior* 22, no. 6 (December 1998): 603–647.

[13]See U.S. Department of Justice, Office of Justice Programs, National Institute of Justice, *Eyewitness Evidence: A Guide for Law Enforcement*, NCJ 178240, October 1999, http://www.ncjrs.org/pdffiles1/nij/178240.pdf (accessed February 26, 2009).

[14]Ibid., 9.

[15]Ibid.

[16]A meta-analysis is a review of existing studies providing a cumulative quantitative summary of outcomes across the studies.

[17]Nancy Steblay et al., "Eyewitness Accuracy Rates in Sequential and Simultaneous Lineup Presentation: A Meta-analytic Comparison," *Law and Human Behavior* 25, no. 5 (October 2001): 459–473. Specifically, it shows an aggregate error rate of 27 percent (incorrect identification of a specific filler photo, the designated innocent suspect) for the simultaneous method compared to a 9 percent error rate using the sequential method. An updated meta-analysis, currently under review, again shows significantly greater risk of mistaken identification for simultaneous lineups and somewhat small correct identification rates for sequential lineups. Steblay presented the preliminary data for this more recent meta-analysis at the John Jay College of Criminal Justice as "2001+6: An Updated Meta-analysis of Eyewitness Lineup Performance under Sequential versus Simultaneous Formats," (paper presented at conference titled "Off the Witness Stand: Using Psychology in the Practice of Justice," New York City, March 1–3, 2007).

[18]See New Jersey's *Attorney General Guidelines for Preparing and Conducting Photo and Live Lineup Identification Procedures*, April 2001, http://www.njdcj.org/agguide/photoid.pdf (accessed February 26, 2009); the North Carolina Actual Innocence Commission Recommendations for Eyewitness Identification, October 2003, http://www.ncids.org/New%20Legal%20Resources/Eyewitness%20ID.pdf (accessed February 26, 2009); and that state's subsequent enactment in 2006 of sections 15A-284.50 to 15A-284.53 of the *North Carolina General Statute*, adopting its recommendations.

[19]The terms *lineup* and *photo display* are used interchangeably here. Ramsey County rarely conducts in-person lineups.

[20]Participating in the training were the Saint Paul Police Department's homicide and sex crime investigators and the Ramsey County Sheriff's Department's general investigators, as well as investigators from three smaller suburban departments.

[21]Ramsey County's scientific consultant for the training and development of its Sequential Photo Display Form is Nancy Steblay, professor of psychology at Augsburg College in Minneapolis. She also provided oversight and review of scientific references in this article. Dr. Steblay may be contacted at steblay@augsburg.edu.

[22]See note 17.

[23]The form may be downloaded at http://www.co.ramsey.mn.us/attorney/SPDNA.asp.

[24]Continuing the photo display when the witness identifies a photo before all photos are shown avoids later legal criticism that the lineup was improperly truncated. In the circumstance that a witness makes an early "filler" pick without having seen the suspect's photo, it also allows an answer to the question of what would have happened had the witness seen the suspect's photo (in some cases, a witness might revoke the filler pick). Conversely, the witness may pick the suspect but then discredit this pick when a later photo is shown. Regardless of what happens when the full display is completed, documenting all of these reactions is important and useful information about the witness's memory, the quality of lineup fillers, and the strength of the witness's identification—and ultimately whether the police have the right suspect.

[25]An elegant software program has recently been developed by SunGard OSSI for this purpose. It randomly sorts photos, maintains a record of which version witnesses saw, guides witnesses through a series of questions on each photo by blind administration, preserves an audio recording of all answers (which can be downloaded to a discloseable CD), and generates a written report of results. (See Jerry Farris, "Remote Lineup Application," *The Police Chief* 75, no. 8 (August 2008): 96–98, for a description of its use for blind sequential lineups by the Winston-Salem, North Carolina, Police Department.) A variation of this program is currently used by the Tucson, Arizona, Police Department in a field study comparing simultaneous and sequential lineups. It uses blind administration in either format (which the computer randomly assigns). The study, for which Dr. Steblay is the scientific consultant, will run approximately through October 2009.

[26]These instructions advise witnesses (1) that the person who committed the crime may or may not be included in the photos shown; (2) that the administrator does not know whether the person being investigated is included (or, for an FE, that the administrator does not know the order of the photos); (3) that even if the witness identifies someone during the procedure, all photos will continue to be shown; (4) that a photo may be an old one and that some things, like hair styles, can be changed, and skin colors may look slightly different in photos; (5) that witnesses should not feel compelled to make an identification, since it is just as important to clear innocent persons as it is to identify the guilty and that the investigation will continue whether or not an identification is made; and (6) that witnesses will see only one photo at a time, that the photos are not in any particular order, and that they may take as much time as needed to look at each one. Witnesses are also cautioned to avoid discussing this procedure or the results with any other potential witnesses in the case.

[27]This form may also be downloaded at http://www.co.ramsey.mn.us/attorney/SPDNA.asp.

[28]This effect has been found in both field and laboratory studies. For field tests, see Amy Klobuchar et al., "Improving Eyewitness Identifications: Hennepin County's Blind Sequential Lineup Pilot Project," *Cardozo Public Law, Policy, and Ethics Journal* 4, no. 2 (April 2006): 381–414; for laboratory tests, see Nancy Steblay, *Double-Blind Sequential Police Lineup Procedures: Toward an Integrated Laboratory and Field Practice Perspective*, final report to the National Institute of Justice, grant no. 2004-IJ-CX-0044, http://web.augsburg.edu/~steblay/March2007_Final_NIJ_report.pdf (accessed February 26, 2009).

[29]The inference in the Mecklenburg article that the blind component is optional in Hennepin County is incorrect, as is the statement that the Hennepin County sequential protocol called for witnesses to make a choice after seeing all the photos. The county's protocol requires an alternative blinded procedure if an independent administrator is not available. For the complete report on the field study, see Klobuchar et al., "Improving Eyewitness Identifications."

PERRY *v.* NEW HAMPSHIRE

CERTIORARI TO THE SUPREME COURT OF NEW HAMPSHIRE

No. 10–8974. Argued November 2, 2011—Decided January 11, 2012

Around 3 a.m. on August 15, 2008, the Nashua, New Hampshire Police Department received a call reporting that an African-American male was trying to break into cars parked in the lot of the caller's apartment building. When an officer responding to the call asked eyewitness Nubia Blandon to describe the man, Blandon pointed to her kitchen window and said the man she saw breaking into the car was standing in the parking lot, next to a police officer. Petitioner Barion Perry's arrest followed this identification.

Before trial, Perry moved to suppress Blandon's identification on the ground that admitting it at trial would violate due process. The New Hampshire trial court denied the motion. To determine whether due process prohibits the introduction of an out-of-court identification at trial, the Superior Court said, this Court's decisions instruct a two-step inquiry: The trial court must first decide whether the police used an unnecessarily suggestive identification procedure; if they did, the court must next consider whether that procedure so tainted the resulting identification as to render it unreliable and thus inadmissible. Perry's challenge, the court found, failed at step one, for Blandon's identification did not result from an unnecessarily suggestive procedure employed by the police. A jury subsequently convicted Perry of theft by unauthorized taking.

On appeal, Perry argued that the trial court erred in requiring an initial showing that police arranged a suggestive identification procedure. Suggestive circumstances alone, Perry contended, suffice to require court evaluation of the reliability of an eyewitness identification before allowing it to be presented to the jury. The New Hampshire Supreme Court rejected Perry's argument and affirmed his conviction.

Held: The Due Process Clause does not require a preliminary judicial

inquiry into the reliability of an eyewitness identification when the identification was not procured under unnecessarily suggestive circumstances arranged by law enforcement. Pp. 6–19.

(a) The Constitution protects a defendant against a conviction based on evidence of questionable reliability, not by prohibiting introduction of the evidence, but by affording the defendant means to persuade the jury that the evidence should be discounted as unworthy of credit. Only when evidence "is so extremely unfair that its admission violates fundamental conceptions of justice," *Dowling* v. *United States*, 493 U. S. 342, 352 (internal quotation marks omitted), does the Due Process Clause preclude its admission.

Contending that the Due Process Clause is implicated here, Perry relies on a series of decisions involving police-arranged identification procedures. See *Stovall* v. *Denno*, 388 U. S. 293; *Simmons* v. *United States*, 390 U. S. 377; *Foster* v. *California*, 394 U. S. 440; *Neil* v. *Biggers*, 409 U. S. 188; and *Manson* v. *Brathwaite*, 432 U. S. 98. These cases detail the approach appropriately used to determine whether due process requires suppression of an eyewitness identification tainted by police arrangement. First, due process concerns arise only when law enforcement officers use an identification procedure that is both suggestive and unnecessary. *Id.*, at 107, 109; *Biggers*, 409 U. S., at 198. Even when the police use such a procedure, however, suppression of the resulting identification is not the inevitable consequence. *Brathwaite*, 432 U. S., at 112–113; *Biggers*, 409 U. S., at 198–199. Instead, due process requires courts to assess, on a case-by-case basis, whether improper police conduct created a "substantial likelihood of misidentification." *Id.*, at 201. "[R]eliability [of the eyewitness identification] is the linchpin" of that evaluation. *Brathwaite*, 432 U. S., at 114. Where the "indicators of [a witness'] ability to make an accurate identification" are "outweighed by the corrupting effect" of law enforcement suggestion, the identification should be suppressed. *Id.*, at 114, 116. Otherwise, the identification, assuming no other barrier to its admission, should be submitted to the jury. Pp. 6–10.

(b) Perry argues that it was mere happenstance that all of the cases in the *Stovall* line involved improper police action. The rationale underlying this Court's decisions, Perry asserts, calls for a rule requiring trial judges to prescreen eyewitness evidence for reliability any time an identification is made under suggestive circumstances. This Court disagrees.

If "reliability is the linchpin" of admissibility under the Due Process Clause, *Brathwaite*, 432 U. S., at 114, Perry contends, it should not matter whether law enforcement was responsible for creating the suggestive circumstances that marred the identification. This argu-

ment removes *Brathwaite*'s statement from its mooring, attributing to it a meaning that a fair reading of the opinion does not bear. The due process check for reliability, *Brathwaite* made plain, comes into play only after the defendant establishes improper police conduct.

Perry's contention also ignores a key premise of *Brathwaite:* A primary aim of excluding identification evidence obtained under unnecessarily suggestive circumstances is to deter law enforcement use of improper procedures in the first place. This deterrence rationale is inapposite in cases, like Perry's, where there is no improper police conduct. Perry also places significant weight on *United States* v. *Wade,* 388 U. S. 218, describing it as a decision not anchored to improper police conduct. But the risk of police rigging was the very danger that prompted the Court in *Wade* to extend a defendant's right to counsel to cover postindictment lineups and showups.

Perry's position would also open the door to judicial preview, under the banner of due process, of most, if not all, eyewitness identifications. There is no reason why an identification made by an eyewitness with poor vision or one who harbors a grudge against the defendant, for example, should be regarded as inherently more reliable than Blandon's identification here. Even if this Court could, as Perry contends, distinguish "suggestive circumstances" from other factors bearing on the reliability of eyewitness evidence, Perry's limitation would still involve trial courts, routinely, in preliminary examinations, for most eyewitness identifications involve some element of suggestion. Pp. 10–14.

(c) In urging a broadly applicable rule, Perry maintains that eyewitness identifications are uniquely unreliable. The fallibility of eyewitness evidence does not, without the taint of improper state conduct, warrant a due process rule requiring a trial court to screen the evidence for reliability before allowing the jury to assess its creditworthiness. The Court's unwillingness to adopt such a rule rests, in large part, on its recognition that the jury, not the judge, traditionally determines the reliability of evidence. It also takes account of other safeguards built into the adversary system that caution juries against placing undue weight on eyewitness testimony of questionable reliability. These protections include the defendant's Sixth Amendment rights to counsel and to confront and cross-examine the eyewitness, eyewitness-specific instructions warning juries to take care in appraising identification evidence, and state and federal rules of evidence permitting trial judges to exclude relevant evidence if its probative value is substantially outweighed by its prejudicial impact or potential for misleading the jury. Many of these safeguards were availed of by Perry's defense. Given the safeguards generally applicable in criminal trials, the introduction of Blandon's eyewitness tes-

Syllabus

timony, without a preliminary judicial assessment of its reliability, did not render Perry's trial fundamentally unfair. Pp. 14–18.

Affirmed.

GINSBURG, J., delivered the opinion of the Court, in which ROBERTS, C. J., and SCALIA, KENNEDY, THOMAS, BREYER, ALITO, and KAGAN, JJ., joined. THOMAS, J., filed a concurring opinion. SOTOMAYOR, J., filed a dissenting opinion.

NOTICE: This opinion is subject to formal revision before publication in the preliminary print of the United States Reports. Readers are requested to notify the Reporter of Decisions, Supreme Court of the United States, Washington, D. C. 20543, of any typographical or other formal errors, in order that corrections may be made before the preliminary print goes to press.

SUPREME COURT OF THE UNITED STATES

No. 10–8974

BARION PERRY, PETITIONER *v.* NEW HAMPSHIRE

ON WRIT OF CERTIORARI TO THE SUPREME COURT OF NEW HAMPSHIRE

[January 11, 2012]

JUSTICE GINSBURG delivered the opinion of the Court.

In our system of justice, fair trial for persons charged with criminal offenses is secured by the Sixth Amendment, which guarantees to defendants the right to counsel, compulsory process to obtain defense witnesses, and the opportunity to cross-examine witnesses for the prosecution. Those safeguards apart, admission of evidence in state trials is ordinarily governed by state law, and the reliability of relevant testimony typically falls within the province of the jury to determine. This Court has recognized, in addition, a due process check on the admission of eyewitness identification, applicable when the police have arranged suggestive circumstances leading the witness to identify a particular person as the perpetrator of a crime.

An identification infected by improper police influence, our case law holds, is not automatically excluded. Instead, the trial judge must screen the evidence for reliability pretrial. If there is "a very substantial likelihood of irreparable misidentification," *Simmons* v. *United States*, 390 U. S. 377, 384 (1968), the judge must disallow presentation of the evidence at trial. But if the indicia of reliability are strong enough to outweigh the corrupting effect of the

police-arranged suggestive circumstances, the identification evidence ordinarily will be admitted, and the jury will ultimately determine its worth.

We have not extended pretrial screening for reliability to cases in which the suggestive circumstances were not arranged by law enforcement officers. Petitioner requests that we do so because of the grave risk that mistaken identification will yield a miscarriage of justice.[1] Our decisions, however, turn on the presence of state action and aim to deter police from rigging identification procedures, for example, at a lineup, showup, or photograph array. When no improper law enforcement activity is involved, we hold, it suffices to test reliability through the rights and opportunities generally designed for that purpose, notably, the presence of counsel at postindictment lineups, vigorous cross-examination, protective rules of evidence, and jury instructions on both the fallibility of eyewitness identification and the requirement that guilt be proved beyond a reasonable doubt.

I

A

Around 3 a.m. on August 15, 2008, Joffre Ullon called the Nashua, New Hampshire, Police Department and

---

[1]The dissent, too, appears to urge that all suggestive circumstances raise due process concerns warranting a pretrial ruling. See *post,* at 6, 9, 14–17. Neither Perry nor the dissent, however, points to a single case in which we have required pretrial screening absent a police-arranged identification procedure. Understandably so, for there are no such cases. Instead, the dissent surveys our decisions, heedless of the police arrangement that underlies every one of them, and inventing a "longstanding rule," *post,* at 6, that never existed. Nor are we, as the dissent suggests, imposing a *mens rea* requirement, *post,* at 1, 7, or otherwise altering our precedent in any way. As our case law makes clear, what triggers due process concerns is police use of an unnecessarily suggestive identification procedure, whether or not they intended the arranged procedure to be suggestive.

reported that an African-American male was trying to break into cars parked in the lot of Ullon's apartment building. Officer Nicole Clay responded to the call. Upon arriving at the parking lot, Clay heard what "sounded like a metal bat hitting the ground." App. 37a–38a. She then saw petitioner Barion Perry standing between two cars. Perry walked toward Clay, holding two car-stereo amplifiers in his hands. A metal bat lay on the ground behind him. Clay asked Perry where the amplifiers came from. "[I] found them on the ground," Perry responded. *Id.*, at 39a.

Meanwhile, Ullon's wife, Nubia Blandon, woke her neighbor, Alex Clavijo, and told him she had just seen someone break into his car. Clavijo immediately went downstairs to the parking lot to inspect the car. He first observed that one of the rear windows had been shattered. On further inspection, he discovered that the speakers and amplifiers from his car stereo were missing, as were his bat and wrench. Clavijo then approached Clay and told her about Blandon's alert and his own subsequent observations.

By this time, another officer had arrived at the scene. Clay asked Perry to stay in the parking lot with that officer, while she and Clavijo went to talk to Blandon. Clay and Clavijo then entered the apartment building and took the stairs to the fourth floor, where Blandon's and Clavijo's apartments were located. They met Blandon in the hallway just outside the open door to her apartment.

Asked to describe what she had seen, Blandon stated that, around 2:30 a.m., she saw from her kitchen window a tall, African-American man roaming the parking lot and looking into cars. Eventually, the man circled Clavijo's car, opened the trunk, and removed a large box.[2]

---

[2]The box, which Clay found on the ground near where she first encountered Perry, contained car-stereo speakers. App. 177a–178a.

Clay asked Blandon for a more specific description of the man. Blandon pointed to her kitchen window and said the person she saw breaking into Clavijo's car was standing in the parking lot, next to the police officer. Perry's arrest followed this identification.

About a month later, the police showed Blandon a photographic array that included a picture of Perry and asked her to point out the man who had broken into Clavijo's car. Blandon was unable to identify Perry.

B

Perry was charged in New Hampshire state court with one count of theft by unauthorized taking and one count of criminal mischief.[3] Before trial, he moved to suppress Blandon's identification on the ground that admitting it at trial would violate due process. Blandon witnessed what amounted to a one-person showup in the parking lot, Perry asserted, which all but guaranteed that she would identify him as the culprit. *Id.*, at 15a–16a.

The New Hampshire Superior Court denied the motion. *Id.*, at 82a–88a. To determine whether due process prohibits the introduction of an out-of-court identification at trial, the Superior Court said, this Court's decisions instruct a two-step inquiry. First, the trial court must decide whether the police used an unnecessarily suggestive identification procedure. *Id.*, at 85a. If they did, the court must next consider whether the improper identification procedure so tainted the resulting identification as to render it unreliable and therefore inadmissible. *Ibid.* (citing *Neil* v. *Biggers*, 409 U. S. 188 (1972), and *Manson* v. *Brathwaite*, 432 U. S. 98 (1977)).

Perry's challenge, the Superior Court concluded, failed at step one: Blandon's identification of Perry on the night

[3] The theft charge was based on the taking of items from Clavijo's car, while the criminal mischief count was founded on the shattering of Clavijo's car window.

of the crime did not result from an unnecessarily suggestive procedure "manufacture[d] . . . by the police." App. 86a–87a. Blandon pointed to Perry "spontaneously," the court noted, "without any inducement from the police." *Id.,* at 85a–86a. Clay did not ask Blandon whether the man standing in the parking lot was the man Blandon had seen breaking into Clavijo's car. *Ibid.* Nor did Clay ask Blandon to move to the window from which she had observed the break-in. *Id.,* at 86a.

The Superior Court recognized that there were reasons to question the accuracy of Blandon's identification: the parking lot was dark in some locations; Perry was standing next to a police officer; Perry was the only African-American man in the vicinity; and Blandon was unable, later, to pick Perry out of a photographic array. *Id.,* at 86a–87a. But "[b]ecause the police procedures were not unnecessarily suggestive," the court ruled that the reliability of Blandon's testimony was for the jury to consider. *Id.,* at 87a.

At the ensuing trial, Blandon and Clay testified to Blandon's out-of-court identification. The jury found Perry guilty of theft and not guilty of criminal mischief.

On appeal, Perry repeated his challenge to the admissibility of Blandon's out-of-court identification. The trial court erred, Perry contended, in requiring an initial showing that the police arranged the suggestive identification procedure. Suggestive circumstances alone, Perry argued, suffice to trigger the court's duty to evaluate the reliability of the resulting identification before allowing presentation of the evidence to the jury.

The New Hampshire Supreme Court rejected Perry's argument and affirmed his conviction. *Id.,* at 9a–11a. Only where the police employ suggestive identification techniques, that court held, does the Due Process Clause require a trial court to assess the reliability of identification evidence before permitting a jury to consider it. *Id.,*

at 10a–11a.

We granted certiorari to resolve a division of opinion on the question whether the Due Process Clause requires a trial judge to conduct a preliminary assessment of the reliability of an eyewitness identification made under suggestive circumstances not arranged by the police. 563 U. S. ___ (2011).[4]

II

A

The Constitution, our decisions indicate, protects a defendant against a conviction based on evidence of questionable reliability, not by prohibiting introduction of the evidence, but by affording the defendant means to persuade the jury that the evidence should be discounted as unworthy of credit. Constitutional safeguards available to defendants to counter the State's evidence include the Sixth Amendment rights to counsel, *Gideon* v. *Wainwright*, 372 U. S. 335, 343–345 (1963); compulsory process, *Taylor* v. *Illinois*, 484 U. S. 400, 408–409 (1988); and confrontation plus cross-examination of witnesses, *Delaware* v. *Fensterer*, 474 U. S. 15, 18–20 (1985) *(per curiam)*.

---

[4] Compare *United States* v. *Bouthot*, 878 F. 2d 1506, 1516 (CA1 1989) (Due process requires federal courts to "scrutinize all suggestive identification procedures, not just those orchestrated by the police."); *Dunnigan* v. *Keane*, 137 F. 3d 117, 128 (CA2 1998) (same); *Thigpen* v. *Cory*, 804 F. 2d 893, 895 (CA6 1986) (same), with *United States* v. *Kimberlin*, 805 F. 2d 210, 233 (CA7 1986) (Due process check is required only in cases involving improper state action.); *United States* v. *Zeiler*, 470 F. 2d 717, 720 (CA3 1972) (same); *State* v. *Addison*, 160 N. H. 792, 801, 8 A. 3d 118, 125 (2010) (same); *State* v. *Reid*, 91 S. W. 3d 247, 272 (Tenn. 2002) (same); *State* v. *Nordstrom*, 200 Ariz. 229, 241, 25 P. 3d 717, 729 (2001) (same); *Semple* v. *State*, 271 Ga. 416, 417–418, 519 S. E. 2d 912, 914–915 (1999) (same); *Harris* v. *State*, 619 N. E. 2d 577, 581 (Ind. 1993) (same); *State* v. *Pailon*, 590 A. 2d 858, 862–863 (R. I. 1991) (same); *Commonwealth* v. *Colon-Cruz*, 408 Mass. 533, 541–542, 562 N. E. 2d 797, 805 (1990) (same); *State* v. *Brown*, 38 Ohio St. 3d 305, 310–311, 528 N. E. 2d 523, 533 (1988) (same); *Wilson* v. *Commonwealth*, 695 S. W. 2d 854, 857 (Ky. 1985) (same).

Apart from these guarantees, we have recognized, state and federal statutes and rules ordinarily govern the admissibility of evidence, and juries are assigned the task of determining the reliability of the evidence presented at trial. See *Kansas* v. *Ventris*, 556 U. S. 586, 594, n. (2009) ("Our legal system . . . is built on the premise that it is the province of the jury to weigh the credibility of competing witnesses."). Only when evidence "is so extremely unfair that its admission violates fundamental conceptions of justice," *Dowling* v. *United States*, 493 U. S. 342, 352 (1990) (internal quotation marks omitted), have we imposed a constraint tied to the Due Process Clause. See, *e.g.*, *Napue* v. *Illinois*, 360 U. S. 264, 269 (1959) (Due process prohibits the State's "knowin[g] use [of] false evidence," because such use violates "any concept of ordered liberty.").

Contending that the Due Process Clause is implicated here, Perry relies on a series of decisions involving police-arranged identification procedures. In *Stovall* v. *Denno*, 388 U. S. 293 (1967), first of those decisions, a witness identified the defendant as her assailant after police officers brought the defendant to the witness' hospital room. *Id.*, at 295. At the time the witness made the identification, the defendant—the only African-American in the room—was handcuffed and surrounded by police officers. *Ibid.* Although the police-arranged showup was undeniably suggestive, the Court held that no due process violation occurred. *Id.*, at 302. Crucial to the Court's decision was the procedure's necessity: The witness was the only person who could identify or exonerate the defendant; the witness could not leave her hospital room; and it was uncertain whether she would live to identify the defendant in more neutral circumstances. *Ibid.*

A year later, in *Simmons* v. *United States*, 390 U. S. 377 (1968), the Court addressed a due process challenge to police use of a photographic array. When a witness identi-

fies the defendant in a police-organized photo lineup, the Court ruled, the identification should be suppressed only where "the photographic identification procedure was so [unnecessarily] suggestive as to give rise to a very substantial likelihood of irreparable misidentification." *Id.*, at 384–385. Satisfied that the photo array used by Federal Bureau of Investigation agents in *Simmons* was both necessary and unlikely to have led to a mistaken identification, the Court rejected the defendant's due process challenge to admission of the identification. *Id.*, at 385–386. In contrast, the Court held in *Foster* v. *California*, 394 U. S. 440 (1969), that due process required the exclusion of an eyewitness identification obtained through police-arranged procedures that "made it all but inevitable that [the witness] would identify [the defendant]." *Id.*, at 443.

Synthesizing previous decisions, we set forth in *Neil* v. *Biggers*, 409 U. S. 188 (1972), and reiterated in *Manson* v. *Brathwaite*, 432 U. S. 98 (1977), the approach appropriately used to determine whether the Due Process Clause requires suppression of an eyewitness identification tainted by police arrangement. The Court emphasized, first, that due process concerns arise only when law enforcement officers use an identification procedure that is both suggestive and unnecessary. *Id.*, at 107, 109; *Biggers*, 409 U. S., at 198. Even when the police use such a procedure, the Court next said, suppression of the resulting identification is not the inevitable consequence. *Brathwaite*, 432 U. S., at 112–113; *Biggers*, 409 U. S., at 198–199.

A rule requiring automatic exclusion, the Court reasoned, would "g[o] too far," for it would "kee[p] evidence from the jury that is reliable and relevant," and "may result, on occasion, in the guilty going free." *Brathwaite*, 432 U. S., at 112; see *id.*, at 113 (when an "identification is reliable despite an unnecessarily suggestive [police] identification procedure," automatic exclusion "is a Draconian

sanction," one "that may frustrate rather than promote justice").

Instead of mandating a *per se* exclusionary rule, the Court held that the Due Process Clause requires courts to assess, on a case-by-case basis, whether improper police conduct created a "substantial likelihood of misidentification." *Biggers*, 409 U. S., at 201; see *Brathwaite*, 432 U. S., at 116. "[R]eliability [of the eyewitness identification] is the linchpin" of that evaluation, the Court stated in *Brathwaite*. *Id.*, at 114. Where the "indicators of [a witness'] ability to make an accurate identification" are "outweighed by the corrupting effect" of law enforcement suggestion, the identification should be suppressed. *Id.*, at 114, 116. Otherwise, the evidence (if admissible in all other respects) should be submitted to the jury.[5]

Applying this "totality of the circumstances" approach, *id.*, at 110, the Court held in *Biggers* that law enforcement's use of an unnecessarily suggestive showup did not require suppression of the victim's identification of her assailant. 409 U. S., at 199–200. Notwithstanding the improper procedure, the victim's identification was reliable: She saw her assailant for a considerable period of time under adequate light, provided police with a detailed description of her attacker long before the showup, and had "no doubt" that the defendant was the person she had seen. *Id.*, at 200 (internal quotation marks omitted). Similarly, the Court concluded in *Brathwaite* that police use of an unnecessarily suggestive photo array did not

---

[5] Among "factors to be considered" in evaluating a witness' "ability to make an accurate identification," the Court listed: "the opportunity of the witness to view the criminal at the time of the crime, the witness' degree of attention, the accuracy of his prior description of the criminal, the level of certainty demonstrated at the confrontation, and the time between the crime and the confrontation." *Manson* v. *Brathwaite*, 432 U. S. 98, 114 (1977) (citing *Neil* v. *Biggers*, 409 U. S. 188, 199–200 (1972)).

require exclusion of the resulting identification. 432 U. S., at 114–117. The witness, an undercover police officer, viewed the defendant in good light for several minutes, provided a thorough description of the suspect, and was certain of his identification. *Id.*, at 115. Hence, the "indicators of [the witness'] ability to make an accurate identification [were] hardly outweighed by the corrupting effect of the challenged identification." *Id.*, at 116.

B

Perry concedes that, in contrast to every case in the *Stovall* line, law enforcement officials did not arrange the suggestive circumstances surrounding Blandon's identification. See Brief for Petitioner 34; Tr. of Oral Arg. 5 (counsel for Perry) ("[W]e do not allege any manipulation or intentional orchestration by the police."). He contends, however, that it was mere happenstance that each of the *Stovall* cases involved improper police action. The rationale underlying our decisions, Perry asserts, supports a rule requiring trial judges to prescreen eyewitness evidence for reliability any time an identification is made under suggestive circumstances. We disagree.

Perry's argument depends, in large part, on the Court's statement in *Brathwaite* that "reliability is the linchpin in determining the admissibility of identification testimony." 432 U. S., at 114. If reliability is the linchpin of admissibility under the Due Process Clause, Perry maintains, it should make no difference whether law enforcement was responsible for creating the suggestive circumstances that marred the identification.

Perry has removed our statement in *Brathwaite* from its mooring, and thereby attributes to the statement a meaning a fair reading of our opinion does not bear. As just explained, *supra,* at 8–9, the *Brathwaite* Court's reference to reliability appears in a portion of the opinion concerning the appropriate remedy *when the police use an unneces-*

sarily suggestive identification procedure. The Court adopted a judicial screen for reliability as a course preferable to a *per se* rule requiring exclusion of identification evidence whenever law enforcement officers employ an improper procedure. The due process check for reliability, *Brathwaite* made plain, comes into play only after the defendant establishes improper police conduct. The very purpose of the check, the Court noted, was to avoid depriving the jury of identification evidence that is reliable, *notwithstanding* improper police conduct. 432 U. S., at 112–113.[6]

Perry's contention that improper police action was not essential to the reliability check *Brathwaite* required is echoed by the dissent. *Post,* at 3–4. Both ignore a key premise of the *Brathwaite* decision: A primary aim of excluding identification evidence obtained under unnecessarily suggestive circumstances, the Court said, is to deter law enforcement use of improper lineups, showups, and photo arrays in the first place. See 432 U. S., at 112. Alerted to the prospect that identification evidence improperly obtained may be excluded, the Court reasoned, police officers will "guard against unnecessarily suggestive procedures." *Ibid.* This deterrence rationale is inapposite in cases, like Perry's, in which the police engaged in no improper conduct.

Coleman v. *Alabama,* 399 U. S. 1 (1970), another decision in the *Stovall* line, similarly shows that the Court has linked the due process check, not to suspicion of eyewitness testimony generally, but only to improper police arrangement of the circumstances surrounding an identi-

---

[6]The Court's description of the question presented in *Brathwaite* assumes that improper state action occurred: "[Does] the Due Process Clause of the Fourteenth Amendment compe[l] the exclusion, in a state criminal trial, apart from any consideration of reliability, of pretrial identification evidence obtained by a police procedure that was both suggestive and unnecessary." 432 U. S., at 99.

fication. The defendants in *Coleman* contended that a witness' in-court identifications violated due process, because a pretrial stationhouse lineup was "so unduly prejudicial and conducive to irreparable misidentification as fatally to taint [the later identifications]." 399 U. S., at 3 (plurality opinion). The Court rejected this argument. *Id.,* at 5–6 (plurality opinion), 13–14 (Black, J., concurring), 22, n. 2 (Burger, C. J., dissenting), 28, n. 2 (Stewart, J., dissenting). No due process violation occurred, the plurality explained, because nothing "the police said or did prompted [the witness'] virtually spontaneous identification of [the defendants]." *Id.,* at 6. True, Coleman was the only person in the lineup wearing a hat, the plurality noted, but "nothing in the record show[ed] that he was required to do so." *Ibid.* See also *Colorado* v. *Connelly*, 479 U. S. 157, 163, 167 (1986) (Where the "crucial element of police overreaching" is missing, the admissibility of an allegedly unreliable confession is "a matter to be governed by the evidentiary laws of the forum, . . . and not by the Due Process Clause.").

Perry and the dissent place significant weight on *United States* v. *Wade*, 388 U. S. 218 (1967), describing it as a decision not anchored to improper police conduct. See Brief for Petitioner 12, 15, 21–22, 28; *post,* at 2–4, 8–10. In fact, the risk of police rigging was the very danger to which the Court responded in *Wade* when it recognized a defendant's right to counsel at postindictment, police-organized identification procedures. 388 U. S., at 233, 235–236. "[T]he confrontation *compelled by the State* between the accused and the victim or witnesses," the Court began, "is peculiarly riddled with innumerable dangers and variable factors which might seriously, even crucially, derogate from a fair trial." *Id.,* at 228 (emphasis added). "A major factor contributing to the high incidence of miscarriage of justice from mistaken identification," the Court continued, "has been the degree of suggestion inher-

ent in the manner in which *the prosecution* presents the suspect to witnesses for pretrial identification." *Ibid.* (emphasis added). To illustrate the improper suggestion it was concerned about, the Court pointed to police-designed lineups where "all in the lineup but the suspect were known to the identifying witness, . . . the other participants in [the] lineup were grossly dissimilar in appearance to the suspect, . . . only the suspect was required to wear distinctive clothing which the culprit allegedly wore, . . . the witness is told by the police that they have caught the culprit after which the defendant is brought before the witness alone or is viewed in jail, . . . the suspect is pointed out before or during a lineup, . . . the participants in the lineup are asked to try on an article of clothing which fits only the suspect." *Id.,* at 233 (footnotes omitted). Beyond genuine debate, then, prevention of unfair police practices prompted the Court to extend a defendant's right to counsel to cover postindictment lineups and showups. *Id.,* at 235.

Perry's argument, reiterated by the dissent, thus lacks support in the case law he cites. Moreover, his position would open the door to judicial preview, under the banner of due process, of most, if not all, eyewitness identifications. External suggestion is hardly the only factor that casts doubt on the trustworthiness of an eyewitness' testimony. As one of Perry's *amici* points out, many other factors bear on "the likelihood of misidentification," *post,* at 9—for example, the passage of time between exposure to and identification of the defendant, whether the witness was under stress when he first encountered the suspect, how much time the witness had to observe the suspect, how far the witness was from the suspect, whether the suspect carried a weapon, and the race of the suspect and the witness. Brief for American Psychological Association as *Amicus Curiae* 9–12. There is no reason why an identification made by an eyewitness with poor vision, for ex-

ample, or one who harbors a grudge against the defendant, should be regarded as inherently more reliable, less of a "threat to the fairness of trial," *post,* at 14, than the identification Blandon made in this case. To embrace Perry's view would thus entail a vast enlargement of the reach of due process as a constraint on the admission of evidence.

Perry maintains that the Court can limit the due process check he proposes to identifications made under "suggestive circumstances." Tr. of Oral Arg. 11–14. Even if we could rationally distinguish suggestiveness from other factors bearing on the reliability of eyewitness evidence, Perry's limitation would still involve trial courts, routinely, in preliminary examinations. Most eyewitness identifications involve some element of suggestion. Indeed, all in-court identifications do. Out-of-court identifications volunteered by witnesses are also likely to involve suggestive circumstances. For example, suppose a witness identifies the defendant to police officers after seeing a photograph of the defendant in the press captioned "theft suspect," or hearing a radio report implicating the defendant in the crime. Or suppose the witness knew that the defendant ran with the wrong crowd and saw him on the day and in the vicinity of the crime. Any of these circumstances might have "suggested" to the witness that the defendant was the person the witness observed committing the crime.

C

In urging a broadly applicable due process check on eyewitness identifications, Perry maintains that eyewitness identifications are a uniquely unreliable form of evidence. See Brief for Petitioner 17–22 (citing studies showing that eyewitness misidentifications are the leading cause of wrongful convictions); Brief for American Psychological Association as *Amicus Curiae* 14–17 (describing

research indicating that as many as one in three eyewitness identifications is inaccurate). See also *post,* at 14–17. We do not doubt either the importance or the fallibility of eyewitness identifications. Indeed, in recognizing that defendants have a constitutional right to counsel at postindictment police lineups, we observed that "the annals of criminal law are rife with instances of mistaken identification." *Wade*, 388 U. S., at 228.

We have concluded in other contexts, however, that the potential unreliability of a type of evidence does not alone render its introduction at the defendant's trial fundamentally unfair. See, *e.g., Ventris*, 556 U. S., at 594, n. (declining to "craft a broa[d] exclusionary rule for uncorroborated statements obtained [from jailhouse snitches]," even though "rewarded informant testimony" may be inherently untrustworthy); *Dowling*, 493 U. S., at 353 (rejecting argument that the introduction of evidence concerning acquitted conduct is fundamentally unfair because such evidence is "inherently unreliable"). We reach a similar conclusion here: The fallibility of eyewitness evidence does not, without the taint of improper state conduct, warrant a due process rule requiring a trial court to screen such evidence for reliability before allowing the jury to assess its creditworthiness.

Our unwillingness to enlarge the domain of due process as Perry and the dissent urge rests, in large part, on our recognition that the jury, not the judge, traditionally determines the reliability of evidence. See *supra*, at 7. We also take account of other safeguards built into our adversary system that caution juries against placing undue weight on eyewitness testimony of questionable reliability. These protections include the defendant's Sixth Amendment right to confront the eyewitness. See *Maryland* v. *Craig*, 497 U. S. 836, 845 (1990) ("The central concern of the Confrontation Clause is to ensure the reliability of the evidence against a criminal defendant."). Another is the

defendant's right to the effective assistance of an attorney, who can expose the flaws in the eyewitness' testimony during cross-examination and focus the jury's attention on the fallibility of such testimony during opening and closing arguments. Eyewitness-specific jury instructions, which many federal and state courts have adopted,[7] likewise warn the jury to take care in appraising identification evidence. See, *e.g.*, *United States* v. *Telfaire*, 469 F. 2d 552, 558–559 (CADC 1972) *(per curiam)* (D. C. Circuit Model Jury Instructions) ("If the identification by the witness may have been influenced by the circumstances under which the defendant was presented to him for identification, you should scrutinize the identification with great care."). See also *Ventris*, 556 U. S., at 594, n. (citing jury instructions that informed jurors about the unreliability of uncorroborated jailhouse-informant testimony as a reason to resist a ban on such testimony); *Dowling*, 493

Jury Instr. No. 315 (Summer 2011); Conn. Crim. Jury Instr. 2.6–4 (2007); 2 Ga. Suggested Pattern Jury Instr. (Crim. Cases) No. 1.35.10 (4th ed. 2011); Ill. Pattern Jury Instr., Crim., No. 3.15 (Supp. 2011); Pattern Instr., Kan. 3d, Crim., No. 52.20 (2011); 1 Md. Crim. Jury Instr. & Commentary §§2.56, 2.57(A), 2.57(B) (3d ed. 2009 and Supp. 2010); Mass. Crim. Model Jury Instr. No. 9.160 (2009); 10 Minn. Jury Instr. Guides, Crim., No. 3.19 (Supp. 2006); N. H. Crim. Jury Instr. No. 3.06 (1985); N. Y. Crim. Jury Instr. "Identification—One Witness" and "Identification—Witness Plus" (2d ed. 2011); Okla. Uniform Jury Instr., Crim., No. 9–19 (Supp. 2000); 1 Pa. Suggested Standard Crim. Jury Instr. No. 4.07B (2d ed. 2010); Tenn. Pattern Jury Instr., Crim., No. 42.05 (15th ed. 2011); Utah Model Jury Instr. CR404 (2d ed. 2010); Model Instructions from the Vt. Crim. Jury Instr. Comm. Nos. CR5–601, CR5–605 (2003); W. Va. Crim. Jury Instr. No. 5.05 (6th ed. 2003).

U. S., at 352–353. The constitutional requirement that the government prove the defendant's guilt beyond a reasonable doubt also impedes convictions based on dubious identification evidence.

State and federal rules of evidence, moreover, permit trial judges to exclude relevant evidence if its probative value is substantially outweighed by its prejudicial impact or potential for misleading the jury. See, *e.g.*, Fed. Rule Evid. 403; N. H. Rule Evid. 403 (2011). See also Tr. of Oral Arg. 19–22 (inquiring whether the standard Perry seeks differs materially from the one set out in Rule 403). In appropriate cases, some States also permit defendants to present expert testimony on the hazards of eyewitness identification evidence. See, *e.g.*, *State* v. *Clopten*, 2009 UT 84, A33, 223 P. 3d 1103, 1113 ("We expect . . . that in cases involving eyewitness identification of strangers or near-strangers, trial courts will routinely admit expert testimony [on the dangers of such evidence].").

Many of the safeguards just noted were at work at Perry's trial. During her opening statement, Perry's court-appointed attorney cautioned the jury about the vulnerability of Blandon's identification. App. 115a (Blandon, "the eyewitness that the State needs you to believe[,] can't pick [Perry] out of a photo array. How carefully did she really see what was going on? . . . How well could she really see him?"). While cross-examining Blandon and Officer Clay, Perry's attorney constantly brought up the weaknesses of Blandon's identification. She highlighted: (1) the significant distance between Blandon's window and the parking lot, *id.*, at 226a; (2) the lateness of the hour, *id.*, at 225a; (3) the van that partly obstructed Blandon's view, *id.*, at 226a; (4) Blandon's concession that she was "so scared [she] really didn't pay attention" to what Perry was wearing, *id.*, at 233a; (5) Blandon's inability to describe Perry's facial features or other identifying marks, *id.*, at 205a, 233a–235a; (6) Blandon's failure to pick Perry

out of a photo array, *id.*, at 235a; and (7) Perry's position next to a uniformed, gun-bearing police officer at the moment Blandon made her identification, *id.*, at 202a–205a. Perry's counsel reminded the jury of these frailties during her summation. *Id.*, at 374a–375a (Blandon "wasn't able to tell you much about who she saw . . . . She couldn't pick [Perry] out of a lineup, out of a photo array . . . . [Blandon said] [t]hat guy that was with the police officer, that's who was circling. Again, think about the context with the guns, the uniforms. Powerful, powerful context clues.").

After closing arguments, the trial court read the jury a lengthy instruction on identification testimony and the factors the jury should consider when evaluating it. *Id.*, at 399a–401a. The court also instructed the jury that the defendant's guilt must be proved beyond a reasonable doubt, *id.*, at 390a, 392a, 395a–396a, and specifically cautioned that "one of the things the State must prove [beyond a reasonable doubt] is the identification of the defendant as the person who committed the offense," *id.*, at 398a–399a.

Given the safeguards generally applicable in criminal trials, protections availed of by the defense in Perry's case, we hold that the introduction of Blandon's eyewitness testimony, without a preliminary judicial assessment of its reliability, did not render Perry's trial fundamentally unfair.

* * *

For the foregoing reasons, we agree with the New Hampshire courts' appraisal of our decisions. See *supra,* at 4–5. Finding no convincing reason to alter our precedent, we hold that the Due Process Clause does not require a preliminary judicial inquiry into the reliability of an eyewitness identification when the identification was not procured under unnecessarily suggestive circum-

stances arranged by law enforcement. Accordingly, the judgment of the New Hampshire Supreme Court is

Affirmed.

SUPREME COURT OF THE UNITED STATES

No. 10–8974

BARION PERRY, PETITIONER *v.* NEW HAMPSHIRE

ON WRIT OF CERTIORARI TO THE SUPREME COURT OF NEW HAMPSHIRE

[January 11, 2012]

JUSTICE THOMAS, concurring.

The Court correctly concludes that its precedents establish a due process right to the pretrial exclusion of an unreliable eyewitness identification only if the identification results from police suggestion. I therefore join its opinion. I write separately because I would not extend *Stovall* v. *Denno,* 388 U. S. 293 (1967), and its progeny even if the reasoning of those opinions applied to this case. The *Stovall* line of cases is premised on a "substantive due process" right to "fundamental fairness." See, *e.g., id.,* at 299 (concluding that whether a suggestive identification "resulted in such unfairness that it infringed [the defendant's] right to due process of law" is "open to all persons to allege and prove"); *Manson* v. *Brathwaite,* 432 U. S. 98, 113 (1977) ("The standard, after all, is that of fairness as required by the Due Process Clause of the Fourteenth Amendment"). In my view, those cases are wrongly decided because the Fourteenth Amendment's Due Process Clause is not a "secret repository of substantive guarantees against 'unfairness.'" *BMW of North America, Inc.* v. *Gore,* 517 U. S. 559, 598–599 (1996) (SCALIA, J., joined by THOMAS, J., dissenting); see also *McDonald* v. *Chicago,* 561 U. S. ___, ___ (2010) (THOMAS, J., concurring in part and concurring in judgment) (slip op., at 7) ("The notion that a constitutional provision that guarantees only 'process' before a person is deprived of life, liberty, or property

could define the substance of those rights strains credulity"). Accordingly, I would limit the Court's suggestive eyewitness identification cases to the precise circumstances that they involved.

SUPREME COURT OF THE UNITED STATES

No. 10–8974

BARION PERRY, PETITIONER *v.* NEW HAMPSHIRE

ON WRIT OF CERTIORARI TO THE SUPREME COURT OF NEW HAMPSHIRE

[January 11, 2012]

JUSTICE SOTOMAYOR, dissenting.

This Court has long recognized that eyewitness identifications' unique confluence of features—their unreliability, susceptibility to suggestion, powerful impact on the jury, and resistance to the ordinary tests of the adversarial process—can undermine the fairness of a trial. Our cases thus establish a clear rule: The admission at trial of out-of-court eyewitness identifications derived from impermissibly suggestive circumstances that pose a very substantial likelihood of misidentification violates due process. The Court today announces that that rule does not even "com[e] into play" unless the suggestive circumstances are improperly "police-arranged." *Ante*, at 2, 11.

Our due process concern, however, arises not from the act of suggestion, but rather from the corrosive effects of suggestion on the reliability of the resulting identification. By rendering protection contingent on improper police arrangement of the suggestive circumstances, the Court effectively grafts a *mens rea* inquiry onto our rule. The Court's holding enshrines a murky distinction—between suggestive confrontations intentionally orchestrated by the police and, as here, those inadvertently caused by police actions—that will sow confusion. It ignores our precedents' acute sensitivity to the hazards of intentional and unintentional suggestion alike and unmoors our rule from the very interest it protects, inviting arbitrary re-

sults. And it recasts the driving force of our decisions as an interest in police deterrence, rather than reliability. Because I see no warrant for declining to assess the circumstances of this case under our ordinary approach, I respectfully dissent.[1]

I

The "driving force" behind *United States* v. *Wade*, 388 U. S. 218 (1967), *Gilbert* v. *California*, 388 U. S. 263 (1967), and *Stovall* v. *Denno*, 388 U. S. 293 (1967), was "the Court's concern with the problems of eyewitness identification"—specifically, "the concern that the jury not hear eyewitness testimony unless that evidence has aspects of reliability." *Manson* v. *Brathwaite*, 432 U. S. 98, 111–112 (1977). We have pointed to the "'formidable'" number of "miscarriage[s] of justice from mistaken identification" in the annals of criminal law. *Wade*, 388 U. S., at 228. We have warned of the "vagaries" and "'proverbially untrustworthy'" nature of eyewitness identifications. *Ibid.* And we have singled out a "major factor contributing" to that proverbial unreliability: "the suggestibility inherent in the context of the pretrial identification." *Id.*, at 228, 235.

Our precedents make no distinction between intentional and unintentional suggestion. To the contrary, they explicitly state that "[s]uggestion can be created intentionally or unintentionally in many subtle ways." *Id.*, at 229. Rather than equate suggestive conduct with misconduct, we specifically have disavowed the assumption that suggestive influences may only be "the result of police procedures intentionally designed to prejudice an accused." *Id.*, at 235; see also *id.*, at 236 (noting "grave potential for prejudice, intentional or not, in the pretrial lineup"); *id.*, at

[1] Because the facts of this case involve police action, I do not reach the question whether due process is triggered in situations involving no police action whatsoever.

239 (describing lack of lineup regulations addressing "risks of abuse and unintentional suggestion"). "Persons who conduct the identification procedure may suggest, intentionally or unintentionally, that they expect the witness to identify the accused." *Moore* v. *Illinois*, 434 U. S. 220, 224 (1977). The implication is that even police acting with the best of intentions can inadvertently signal "'that's the man.'" *Wade*, 388 U. S., at 236; see also *Kirby* v. *Illinois*, 406 U. S. 682, 690–691 (1972) ("[I]t is always necessary to 'scrutinize *any* pretrial confrontation . . .'").[2]

In *Wade* itself, we noted that the "potential for improper influence [in pretrial confrontations] is illustrated by the circumstances . . . [i]n the present case." 388 U. S., at 233–234. We then highlighted not the lineup procedure, but rather a preprocedure encounter: The two witnesses who later identified Wade in the lineup had seen Wade outside while "await[ing] assembly of the lineup." *Id.*, at 234. Wade had been standing in the hallway, which happened to be "observable to the witnesses through an open door." *Ibid.* One witness saw Wade "within sight of an FBI agent"; the other saw him "in the custody of the agent." *Ibid.* In underscoring the hazards of these circumstances, we made no mention of whether the encounter had been arranged; indeed, the facts suggest that it was not.

More generally, our precedents focus not on the act of suggestion, but on suggestion's "corrupting effect" on

---

[2] *Wade* held that the dangers of pretrial identification procedures necessitated a right to counsel; that same day, *Stovall* held that a defendant ineligible for the *Wade* rule was still entitled to challenge the confrontation as a due process violation. Because the two were companion cases advancing interrelated rules to avoid unfairness at trial resulting from suggestive pretrial confrontations, *Wade*'s exposition of the dangers of suggestiveness informs both contexts. See *Manson* v. *Brathwaite*, 432 U. S. 98, 112 (1977) ("*Wade* and its companion cases reflect the concern that the jury not hear eyewitness testimony unless that evidence has aspects of reliability").

reliability. *Brathwaite*, 432 U. S., at 114. Eyewitness evidence derived from suggestive circumstances, we have explained, is uniquely resistant to the ordinary tests of the adversary process. An eyewitness who has made an identification often becomes convinced of its accuracy. "*Regardless of how the initial misidentification comes about*, the witness thereafter is apt to retain in his memory the image of the photograph rather than of the person actually seen, reducing the trustworthiness of subsequent . . . courtroom identification." *Simmons* v. *United States*, 390 U. S. 377, 383–384 (1968) (emphasis added); see also *Wade*, 388 U. S., at 229 (witness is "not likely" to recant). Suggestion bolsters that confidence.

At trial, an eyewitness' artificially inflated confidence in an identification's accuracy complicates the jury's task of assessing witness credibility and reliability. It also impairs the defendant's ability to attack the eyewitness' credibility. *Stovall*, 388 U. S., at 298. That in turn jeopardizes the defendant's basic right to subject his accuser to meaningful cross-examination. See *Wade*, 388 U. S., at 235 ("[C]ross-examination . . . cannot be viewed as an absolute assurance of accuracy and reliability . . . where so many variables and pitfalls exist"). The end result of suggestion, whether intentional or unintentional, is to fortify testimony bearing directly on guilt that juries find extremely convincing and are hesitant to discredit. See *id.*, at 224 ("[A]t pretrial proceedings . . . the results might well settle the accused's fate and reduce the trial itself to a mere formality"); *Gilbert*, 388 U. S., at 273 ("[T]he witness' testimony of his lineup identification will enhance the impact of his in-court identification on the jury").

Consistent with our focus on reliability, we have declined to adopt a *per se* rule excluding all suggestive identifications. Instead, "reliability is the linchpin" in deciding admissibility. *Brathwaite*, 432 U. S., at 114. We have explained that a suggestive identification procedure "does

not in itself intrude upon a constitutionally protected interest." *Id.*, at 113, n. 13; see also *Neil* v. *Biggers*, 409 U. S. 188, 198–199 (1972) (rejecting the proposition that "unnecessary suggestiveness alone requires the exclusion of evidence"). "Suggestive confrontations are disapproved because they increase the likelihood of misidentification"—and "[i]t is the likelihood of misidentification which violates a defendant's right to due process." *Id.*, at 198; see also *United States ex rel. Kirby* v. *Sturges*, 510 F. 2d 397, 406 (CA7 1975) (Stevens, J.) ("The due process clause applies only to proceedings which result in a deprivation of life, liberty or property. . . . [I]f a constitutional violation results from a showup, it occurs in the courtroom, not in the police station"). In short, "'what the *Stovall* due process right protects is an evidentiary interest.'" *Brathwaite*, 432 U. S., at 113, n. 14.

To protect that evidentiary interest, we have applied a two-step inquiry: First, the defendant has the burden of showing that the eyewitness identification was derived through "impermissibly suggestive" means.[3] *Simmons*, 390 U. S., at 384. Second, if the defendant meets that burden, courts consider whether the identification was

---

[3] Our precedents refer to "impermissibly," "unnecessarily," and "unduly" suggestive circumstances interchangeably. See, *e.g.*, *Brathwaite*, 432 U. S., at 105, n. 8, 107–108, 110, 112–113 ("impermissibly" and "unnecessarily"); *Neil* v. *Biggers*, 409 U. S. 188, 196–199 (1972) ("impermissibly" and "unnecessarily"); *Coleman* v. *Alabama*, 399 U. S. 1, 3–5 (1970) ("unduly" and "impermissibly"); *Simmons* v. *United States*, 390 U. S. 377, 383–384 (1968) ("unduly" and "impermissibly"). The Circuits have followed suit. *E.g.*, *Thigpen* v. *Cory*, 804 F. 2d 893, 895 (CA6 1986) ("unduly"); *Green* v. *Loggins*, 614 F. 2d 219, 223 (CA9 1980) ("unnecessarily or impermissibly"). All reinforce our focus not on the act of suggestion, but on whether the suggestiveness rises to such a level that it undermines reliability. Police machinations can heighten the likelihood of misidentification, but they are no prerequisite to finding a confrontation "so impermissibly suggestive as to give rise to a very substantial likelihood of . . . misidentification." *Simmons*, 390 U. S., at 384.

reliable under the totality of the circumstances. That step entails considering the witness' opportunity to view the perpetrator, degree of attention, accuracy of description, level of certainty, and the time between the crime and pretrial confrontation, then weighing such factors against the "corrupting effect of the suggestive identification." *Brathwaite*, 432 U. S., at 108, 114. Most identifications will be admissible. The standard of "fairness as required by the Due Process Clause," *id.*, at 113, however, demands that a subset of the most unreliable identifications—those carrying a "'very substantial likelihood of . . . misidentification'"—will be excluded. *Biggers*, 409 U. S., at 198.

II

A

The majority today creates a novel and significant limitation on our longstanding rule: Eyewitness identifications so impermissibly suggestive that they pose a very substantial likelihood of an unreliable identification will be deemed inadmissible at trial *only* if the suggestive circumstances were "police-arranged." *Ante*, at 2. Absent "improper police arrangement," "improper police conduct," or "rigging," the majority holds, our two-step inquiry does not even "com[e] into play." *Ante*, at 2, 11. I cannot agree.

The majority does not simply hold that an eyewitness identification must be the product of police action to trigger our ordinary two-step inquiry. Rather, the majority maintains that the suggestive circumstances giving rise to the identification must be "police-arranged," "police rigg[ed]," "police-designed," or "police-organized." *Ante,* at 2, 12–13. Those terms connote a degree of intentional orchestration or manipulation. See Brief for Respondent 19 (no indication that police "deliberately tried to manipulate any evidence"); Brief for United States as *Amicus Curiae* 18 ("[N]o one deliberately arranged the circumstances to obtain an identification"). The majority cate-

gorically exempts all eyewitness identifications derived from suggestive circumstances that were not police-manipulated—however suggestive, and however unreliable—from our due process check. The majority thus appears to graft a *mens rea* requirement onto our existing rule.[4]

As this case illustrates, police intent is now paramount. As the Court acknowledges, Perry alleges an "*accidental* showup." Brief for Petitioner 34 (emphasis added); see *ante,* at 4. He was the only African-American at the scene of the crime standing next to a police officer. For the majority, the fact that the police did not intend that showup, even if they inadvertently caused it in the course of a police procedure, ends the inquiry. The police were questioning the eyewitness, Blandon, about the perpetrator's identity, and were intentionally detaining Perry in the parking lot—but had not intended for Blandon to identify the perpetrator from her window. Presumably, in the majority's view, had the police asked Blandon to move to the window to identify the perpetrator, that could have made all the difference. See Tr. of Oral Arg. 32, 37.

I note, however, that the majority leaves what is required by its arrangement-focused inquiry less than clear. In parts, the opinion suggests that the police must arrange an identification "procedure," regardless of whether they "inten[d] the arranged procedure to be suggestive." *Ante,* at 2, n. 1; see also *ante,* at 7–8. Elsewhere, it indicates that the police must arrange the "suggestive circumstances" that lead the witness to identify the accused. See

---

[4]The majority denies that it has imposed a *mens rea* requirement, see *ante,* at 2, n. 1, but by confining our due process concerns to police-arranged identification procedures, that is just what it has done. The majority acknowledges that "whether or not [the police] intended the arranged procedure to be suggestive" is irrelevant under our precedents, *ibid.,* but still places dispositive weight on whether or not the police intended the procedure itself.

ante, at 1–2, 10–11, 18–19. Still elsewhere it refers to "improper" police conduct, *ante,* at 1–2, 9–12, connoting bad faith. Does police "arrangement" relate to the procedure, the suggestiveness, or both? If it relates to the procedure, do suggestive preprocedure encounters no longer raise the same concerns? If the police need not "inten[d] the arranged procedure to be suggestive," *ante,* at 2, n. 1, what makes the police action "improper"? And does that mean that good-faith, unintentional police suggestiveness in a police-arranged lineup can be "impermissibly suggestive"? If no, the majority runs headlong into *Wade.* If yes, on what basis—if not deterrence—does it distinguish unintentional police suggestiveness in an accidental confrontation?

The arrangement-focused inquiry will sow needless confusion. If the police had called Perry and Blandon to the police station for interviews, and Blandon saw Perry being questioned, would that be sufficiently "improper police arrangement"? If Perry had voluntarily come to the police station, would that change the result? Today's opinion renders the applicability of our ordinary inquiry contingent on a murky line-drawing exercise. Whereas our two-step inquiry focuses on overall reliability—and could account for the spontaneity of the witness' identification and degree of police manipulation under the totality of the circumstances—today's opinion forecloses that assessment by establishing a new and inflexible step zero.

B

The majority regards its limitation on our two-step rule as compelled by precedent. Its chief rationale, *ante,* at 7–13, is that none of our prior cases involved situations where the police "did not arrange the suggestive circumstances." *Ante,* at 10; see also *ante,* at 2, n. 1. That is not necessarily true, given the seemingly unintentional encounter highlighted in *Wade.* But even if it were true, it is

unsurprising. The vast majority of eyewitness identifications that the State uses in criminal prosecutions are obtained in lineup, showup, and photograph displays arranged by the police. Our precedents reflect that practical reality.

It is also beside the point. Our due process concerns were not predicated on the source of suggestiveness. Rather, "[i]t is the likelihood of misidentification which violates a defendant's right to due process," *Biggers*, 409 U. S., at 198, and we are concerned with suggestion insofar as it has "corrupting effect[s]" on the identification's reliability. *Brathwaite*, 432 U. S., at 114. Accordingly, whether the police have created the suggestive circumstances intentionally or inadvertently, the resulting identification raises the same due process concerns. It is no more or less likely to misidentify the perpetrator. It is no more or less powerful to the jury. And the defendant is no more or less equipped to challenge the identification through cross-examination or prejudiced at trial. The arrangement-focused inquiry thus untethers our doctrine from the very "'evidentiary interest'" it was designed to protect, inviting arbitrary results. *Id.*, at 113, n. 14.

Indeed, it is the majority's approach that lies in tension with our precedents. Whereas we previously disclaimed the crabbed view of suggestiveness as "the result of police procedures intentionally designed to prejudice an accused," *Wade*, 388 U. S., at 235, the majority's focus on police rigging and improper conduct will revive it. Whereas our precedents were sensitive to intentional and unintentional suggestiveness alike, see *supra*, at 2–3, today's decision narrows our concern to intentionally orchestrated suggestive confrontations. We once described the "primary evil to be avoided" as the likelihood of misidentification. *Biggers*, 409 U. S., at 198. Today's decision, however, means that even if that primary evil is at its apex, we need not avoid it at all so long as the suggestive circum-

stances do not stem from improper police arrangement.

C

The majority gives several additional reasons for why applying our due process rule beyond improperly police-arranged circumstances is unwarranted. In my view, none withstands close inspection.

First, the majority insists that our precedents "aim to deter police from rigging identification procedures," so our rule should be limited to applications that advance that "primary aim" and "key premise." *Ante*, at 2, 11 (citing *Brathwaite*, 432 U. S., at 112). That mischaracterizes our cases. We discussed deterrence in *Brathwaite* because Brathwaite challenged our two-step inquiry as *lacking* deterrence value. Brathwaite argued that deterrence demanded a *per se* rule excluding all suggestive identifications. He said that our rule, which probes the reliability of suggestive identifications under the totality of the circumstances, "cannot be expected to have a significant deterrent impact." *Id.*, at 111.

We rebutted Brathwaite's criticism in language the majority now wrenches from context: Upon summarizing Brathwaite's argument, we acknowledged "several interests to be considered." *Ibid.* We then compared the two rules under each interest: First, we noted the "driving force" behind *Wade* and its companion cases—"the concern that the jury not hear eyewitness testimony unless that evidence has aspects of reliability"—and found both approaches "responsive to this concern," but the *per se* rule to go "too far" in suppressing reliable evidence. 432 U. S., at 111–112. We noted a "second factor"—deterrence—conceding that the *per se* rule had "more significant deterrent effect," but noting that our rule "also has an influence on police behavior." *Id.*, at 112. Finally, we noted a "third factor"—"the effect on the administration of justice"—describing the *per se* rule as having serious drawbacks on

this front. *Ibid.* That was no list of "primary aim[s]." Nor was it a ringing endorsement of the primacy of deterrence. We simply underscored, in responding to Brathwaite, that our rule was not without deterrence benefits. To the contrary, we clarified that deterrence was a subsidiary concern to reliability, the "driving force" of our doctrine. It is a stretch to claim that our rule cannot apply wherever "[t]his deterrence rationale is inapposite." *Ante*, at 11.

Second, the majority states that *Coleman* v. *Alabama*, 399 U. S. 1 (1970), held that "[n]o due process violation occurred . . . because nothing 'the police said or did prompted'" the identification and shows that our rule is linked "only to improper police arrangement." *Ante*, at 11–12. That misreads the decision. In *Coleman*, the petitioners challenged a witness' in-court identification of them at trial on grounds that it had been tainted by a suggestive pretrial lineup. We held that no due process violation occurred because the in-court identification appeared to be "entirely based upon observations at the time of the assault and not at all induced by the conduct of the lineup," and thus could not be said to stem from an identification procedure "'so impermissibly suggestive as to give rise to a very substantial likelihood of irreparable misidentification.'" 399 U. S., at 5–6 (plurality opinion). We then dismissed each of the asserted suggestive influences as having had no bearing on the identification at all: The petitioners claimed that the police intimated to the witness that his attackers were in the lineup; we found the record "devoid of evidence that anything the police said or did" induced the identification. *Id.*, at 6. The petitioners claimed that they alone were made to say certain words; we found that the witness identified petitioners before either said anything. One petitioner claimed he was singled out to wear a hat; we found that the witness' identification "d[id] not appear . . . based on the fact that he remembered that [the attacker] had worn a hat." *Ibid.*

Thus, far from indicating that improper police conduct is a prerequisite, *Coleman* merely held that there had been no influence on the witness. In fact, in concluding that the lineup was not "'so impermissibly suggestive as to give rise to a very substantial likelihood of irreparable misidentification,'" *Coleman* indicates that the two-step inquiry is not truncated at the threshold by the absence of police misconduct.

Third, the majority emphasizes that we should rely on the jury to determine the reliability of evidence. See *ante,* at 15–16. But our cases are rooted in the assumption that eyewitness identifications upend the ordinary expectation that it is "the province of the jury to weigh the credibility of competing witnesses." *Kansas* v. *Ventris*, 556 U. S. 586, 594, n. (2009). As noted, jurors find eyewitness evidence unusually powerful and their ability to assess credibility is hindered by a witness' false confidence in the accuracy of his or her identification. That disability in no way depends on the intent behind the suggestive circumstances.

The majority's appeals to protecting the jury's domain, moreover, appeared in dissent after dissent from our decisions. See *Foster* v. *California*, 394 U. S. 440, 447 (1969) (Black, J., dissenting) ("[T]he jury is the sole tribunal to weigh and determine facts" and "must . . . be allowed to hear eyewitnesses and decide for itself whether it can recognize the truth"); *Simmons*, 390 U. S., at 395 (Black, J., concurring in part and dissenting in part) ("The weight of the evidence . . . is not a question for the Court but for the jury"). So too does the majority's assurance that other constitutional protections like the Sixth Amendment rights to compulsory process and confrontation can suffice to expose unreliable identifications. Compare *ante*, at 6, with *Foster*, 394 U. S., at 448–449 (Black, J., dissenting) ("The Constitution sets up its own standards of unfairness in criminal trials," including the Sixth Amendment "right to compulsory process" and "right to

confront . . . witnesses"). So too does the majority's appeal to leave reliability to the rules of evidence. Compare *ante*, at 17, with *Foster*, 394 U. S., at 448 (Black, J., dissenting) ("'Rules of evidence are designed in the interests of fair trials'"), and *Stovall*, 388 U. S., at 306 (Black, J., dissenting) ("[T]he result . . . is to put into a constitutional mould a rule of evidence"). Those arguments did not prevail then; they should not prevail here.

Fourth, the majority suggests that applying our rule beyond police-arranged suggestive circumstances would entail a heavy practical burden, requiring courts to engage in "preliminary judicial inquiry" into "most, if not all, eyewitness identifications." *Ante*, at 13, 18. But that is inaccurate. The burden of showing "impermissibly suggestive" circumstances is the defendant's, so the objection falls to the defendant to raise. And as is implicit in the majority's reassurance that Perry may resort to the rules of evidence in lieu of our due process precedents, trial courts will be entertaining defendants' objections, pretrial or at trial, to unreliable eyewitness evidence in any event. The relevant question, then, is what the standard of admissibility governing such objections should be. I see no reason to water down the standard for an equally suggestive and unreliable identification simply because the suggestive confrontation was unplanned.

It bears reminding, moreover, that we set a high bar for suppression. The vast majority of eyewitnesses proceed to testify before a jury. To date, *Foster* is the only case in which we have found a due process violation. 394 U. S., at 443. There has been no flood of claims in the four Federal Circuits that, having seen no basis for an arrangement-based distinction in our precedents, have long indicated that due process scrutiny applies to all suggestive identification procedures. See *Dunnigan* v. *Keane*, 137 F. 3d 117, 128 (CA2 1998); *United States* v. *Bouthot*, 878 F. 2d 1506, 1516 (CA1 1989); *Thigpen* v. *Cory*, 804 F. 2d 893, 895 (CA6

1986); see also *Green* v. *Loggins*, 614 F. 2d 219, 223 (CA9 1980). Today's decision nonetheless precludes even the possibility that an unintended confrontation will meet that bar, mandating summary dismissal of every such claim at the threshold.

Finally, the majority questions how to "rationally distinguish suggestiveness from other factors bearing on the reliability of eyewitness evidence," such as "poor vision" or a prior "grudge," *ante*, at 13–14, and more broadly, how to distinguish eyewitness evidence from other kinds of arguably unreliable evidence. *Ante,* at 14–15. Our precedents, however, did just that. We emphasized the "'formidable number of instances in the records of English and American trials'" of "miscarriage[s] of justice from mistaken identification." *Wade*, 388 U. S., at 228. We then observed that "'the influence of improper suggestion upon identifying witnesses probably accounts for more miscarriages of justice than any other single factor.'" *Id.*, at 229. Moreover, the majority points to no other type of evidence that shares the rare confluence of characteristics that makes eyewitness evidence a unique threat to the fairness of trial. Jailhouse informants, cf. *ante,* at 15, unreliable as they may be, are not similarly resistant to the traditional tools of the adversarial process and, if anything, are met with particular skepticism by juries.

It would be one thing if the passage of time had cast doubt on the empirical premises of our precedents. But just the opposite has happened. A vast body of scientific literature has reinforced every concern our precedents articulated nearly a half-century ago, though it merits barely a parenthetical mention in the majority opinion. *Ante*, at 14. Over the past three decades, more than two thousand studies related to eyewitness identification have been published. One state supreme court recently appointed a special master to conduct an exhaustive survey of the current state of the scientific evidence and conclud-

ed that "[t]he research . . . is not only extensive," but "it represents the 'gold standard in terms of the applicability of social science research to law.'" *State* v. *Henderson,* 208 N. J. 208, 283, 27 A. 3d 872, 916 (2011). "Experimental methods and findings have been tested and retested, subjected to scientific scrutiny through peer-reviewed journals, evaluated through the lens of meta-analyses, and replicated at times in real-world settings." *Ibid.;* see also Schmechel, O'Toole, Easterly, & Loftus, Beyond the Ken? Testing Jurors' Understanding of Eyewitness Reliability Evidence, 46 Jurimetrics 177, 180 (2006) (noting "nearly unanimous consensus among researchers about the [eyewitness reliability] field's core findings").

The empirical evidence demonstrates that eyewitness misidentification is "'the single greatest cause of wrongful convictions in this country.'"[5] Researchers have found that a staggering 76% of the first 250 convictions overturned due to DNA evidence since 1989 involved eyewitness misidentification.[6] Study after study demonstrates

that eyewitness recollections are highly susceptible to distortion by postevent information or social cues;[7] that jurors routinely overestimate the accuracy of eyewitness identifications;[8] that jurors place the greatest weight on eyewitness confidence in assessing identifications[9] even though confidence is a poor gauge of accuracy;[10] and that suggestiveness can stem from sources beyond police-orchestrated procedures.[11] The majority today nevertheless adopts an artificially narrow conception of the dangers of suggestive identifications at a time when our concerns should have deepened.

III

There are many reasons why Perry's particular situation might not violate due process. The trial court found

Bull. 315 (1995).

[11] See Brief for Wilton Dedge et al. as *Amici Curiae* 8, n. 13.

that the circumstances surrounding Blandon's identification did not rise to an impermissibly suggestive level. It is not at all clear, moreover, that there was a very substantial likelihood of misidentification, given Blandon's lack of equivocation on the scene, the short time between crime and confrontation, and the "fairly well lit" parking lot. App. 56. The New Hampshire Supreme Court, however, never made findings on either point and, under the majority's decision today, never will.

* * *

The Court's opinion today renders the defendant's due process protection contingent on whether the suggestive circumstances giving rise to the eyewitness identification stem from improper police arrangement. That view lies in tension with our precedents' more holistic conception of the dangers of suggestion and is untethered from the evidentiary interest the due process right protects. In my view, the ordinary two-step inquiry should apply, whether the police created the suggestive circumstances intentionally or inadvertently. Because the New Hampshire Supreme Court truncated its inquiry at the threshold, I would vacate the judgment and remand for a proper analysis. I respectfully dissent.

Senator Lesil McGuire

Sponsor Statement for 210

"An Act relating to crimes against children."

On February 8, 2012 the Children's Justice Task Force (CJA) a federally-mandated, state-wide multidisciplinary group presented their findings to the Joint Senate Judiciary and HESS Committees with their system recommendations for improvement through criminal legislation. I became aware through this presentation, research, and other important conversations that we have shortcomings in the current criminal laws regarding the prosecution of harm to children.

Those that suffer from these short comings are Alaska's children and the numbers are staggering. In 2008, approximately 12,400 children were likely victims of at least one incident of maltreatment, which breaks down to 34 children per day. In the instance of a child death, 1 out of every 5 was related to maltreatment.

SB 210 works with the recommendations from CJA to create tougher penalties on crimes committed against a child. The bill includes several different measures including modifying statutes to create increased criminal liability for assaults to children, strengthens statutes regarding exposure of children to drugs, increases penalties when a parent intentionally withholds adequate food or liquids, and creates a criminal law that prohibits an incarcerated person from contacting a victim prior to trial and sentencing.

Together, the Legislature can assist our future generations by providing them with laws that protect their rights and create safer communities for their growth and development. I urge your support for this legislation.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR MCGUIRE

A BILL

FOR AN ACT ENTITLED

"An Act relating to crimes against children; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 11.41.220(a) is amended to read:

(a) A person commits the crime of assault in the third degree if that person

(1) recklessly

(A) places another person in fear of imminent serious physical injury by means of a dangerous instrument;

(B) causes physical injury to another person by means of a dangerous instrument; or

(C) while being 18 years of age or older,

(i) causes physical injury to a child under **12** [10] years of age and the injury would cause a reasonable caregiver to seek medical attention from a health care professional in the form of diagnosis or treatment;

(ii) causes physical injury to a child under **12** [10] years

of age on more than one occasion;

(2) with intent to place another person in fear of death or serious physical injury to the person or the person's family member, makes repeated threats to cause death or serious physical injury to another person;

(3) while being 18 years of age or older, knowingly causes physical injury to a child under 16 years of age but at least **12** [10] years of age and the injury reasonably requires medical treatment;

(4) with criminal negligence, causes serious physical injury under AS 11.81.900(b)(56)(B) to another person by means of a dangerous instrument; or

(5) commits a crime that is a violation of AS 11.41.230(a)(1) or (2) and, within the preceding 10 years, the person was convicted on two or more separate occasions of crimes under

(A) AS 11.41.100 - 11.41.170;

(B) AS 11.41.200 - 11.41.220, 11.41.230(a)(1) or (2), 11.41.280, or 11.41.282;

(C) AS 11.41.260 or 11.41.270;

(D) AS 11.41.410, 11.41.420, or 11.41.425(a)(1); or

(E) a law or ordinance of this or another jurisdiction with elements similar to those of an offense described in (A) - (D) of this paragraph.

* **Sec. 2.** AS 11.51.100(a) is amended to read:

(a) A person commits the crime of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person

(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;

(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person is

(A) registered or required to register as a sex offender or child kidnapper under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;

(B) charged by complaint, information, or indictment with a

violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or

(C) charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; [OR]

(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child**; or**

(4) recklessly fails to provide adequate food or liquids to a child, causing protracted impairment of the child's health.

*** Sec. 3.** AS 11.51.100(f) is amended to read:

(f) Endangering the welfare of a child in the first degree under (a)(1)**, (2), or (4)** [OR (2)] of this section is a class C felony.

*** Sec. 4.** AS 11.81.900(56) is amended to read:

(56) "serious physical injury" means

(A) physical injury caused by an act performed under circumstances that create a substantial risk of death; [OR]

(B) physical injury that causes serious and protracted disfigurement, protracted impairment of health, protracted loss or impairment of the function of a body member or organ, or that unlawfully terminates a pregnancy; **or**

(C) physical injury to a person under 12 years of age that causes

(i) serious disfigurement;

(ii) impairment of health, by serious bruising or other injury, that reasonably requires medical evaluation or treatment by a health care professional;

(iii) loss or impairment of the function of a body member or organ; or

(iv) serious impediment of blood circulation or breathing;

* **Sec. 5.** This Act takes effect July 1, 2012.

(5) commits a crime that is a violation of AS 11.41.230(a)(1) or (2) and, within the preceding 10 years, the person was convicted on two or more separate occasions of crimes under

(A) AS 11.41.100 - 11.41.170;

(B) AS 11.41.200 - 11.41.220, 11.41.230(a)(1) or (2), 11.41.280, or 11.41.282;

(C) AS 11.41.260 or 11.41.270;

(D) AS 11.41.410, 11.41.420, or 11.41.425(a)(1); or

(E) a law or ordinance of this or another jurisdiction with elements similar to those of an offense described in (A) - (D) of this paragraph.

*** Sec. 2.** AS 11.51.100(a) is amended to read:

(a) A person commits the crime of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person

(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;

(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person is

(A) registered or required to register as a sex offender or child kidnapper under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;

(B) charged by complaint, information, or indictment with a

violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or

(C) charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; [OR]

(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child**; or**

(4) recklessly fails to provide adequate food or liquids to a child, causing protracted impairment of the child's health.

*** Sec. 3.** AS 11.51.100(f) is amended to read:

(f) Endangering the welfare of a child in the first degree under (a)(1)**, (2), or (4)** [OR (2)] of this section is a class C felony.

*** Sec. 4.** AS 11.81.900(56) is amended to read:

(56) "serious physical injury" means

(A) physical injury caused by an act performed under circumstances that create a substantial risk of death; [OR]

(B) physical injury that causes serious and protracted disfigurement, protracted impairment of health, protracted loss or impairment of the function of a body member or organ, or that unlawfully terminates a pregnancy; **or**

(C) physical injury to a person under 12 years of age that causes

(i) serious disfigurement;

(ii) impairment of health, by serious bruising or other injury, that reasonably requires medical evaluation or treatment by a health care professional;

(iii) loss or impairment of the function of a body member or organ; or

(iv) serious impediment of blood circulation or breathing;

* **Sec. 5.** This Act takes effect July 1, 2012.

DOL suggests

SB 210

*** Sec. 4.** AS 11.81.900(56) is amended to read:

(56) "serious physical injury" means

(A) physical injury caused by an act performed under circumstances that create a substantial risk of death; [OR]

(B) physical injury that causes serious and protracted disfigurement, protracted impairment of health, protracted loss or impairment of the function of a body member or organ, or that unlawfully terminates a pregnancy; **or**

BILL NO. SB 210

Analysis

SB 210 makes changes to the substantive assault law by adopting new crimes addressing harm to children under 12 years old and to disabled children under 16 years old.

It also adopts new crimes prohibiting exposure to the use, manufacture, display, or delivery of controlled substances. It also makes changes in the crime of criminal nonsupport, and sentencing factors for crimes involving child victims.

The fiscal impact to Department of Law is indeterminate.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB210-ACS-TRC-2-24-12

Analysis

Senate Bill 210 amends the definitions of certain crimes, including assault and endangering the welfare of a minor, by making certain activities either new crimes or more serious crimes. This could have the effect of changing the number and types of criminal cases that are filed with and handled by the court system.

Although the court does not anticipate a significant increase in new cases or in felony case filings, the changes made in this bill will likely result in at least some changes in the number or types of fiings. The precise impact of the changes is speculative, however, and the court therefore submits an indeterminate fiscal note.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB210

Analysis

This bill amends AS 11.41.200(a) by adding several components regarding children to the definitions of assault in the first, second, and third degrees. Assault in the first degree is modified by including the following: an adult *intentionally* causing "serious bodily harm" to a child under 16 years of age with a disability, an adult *recklessly* causing "serious bodily harm" to a child under 12 years of age, and an adult *recklessly* causing "serious bodily harm" on multiple occasions to a child under the age 16 with a disability. Assault in the first degree is a class A felony that carries a sentence of up to 20 years imprisonment.

Assault in the second degree is modified by including the following: an adult *knowingly* causing serious "bodily harm" to a child under 16 years of age with a disability, an adult *recklessly* causing "physical injury" to a child under 12 years of age, and an adult recklessly causing "physical injury" on multiple occasions to a child under the age of 16 with a disability. Assault in the second degree is a class B felony that carries a sentence of up to 10 years imprisonment.

Assault in the third degree is modified by changing the age range, from 10 years of age to 12 years of age, when an adult causes physical injury to a child and the injury would cause a reasonable caregiver to seek medical attention from a healthcare professional and changes the age arrange from 10-16 years of age to 12-16 years of age when an adult *knowingly* causes "physical injury to a child and the injury reasonably requires medical treatment. Assault in the third degree is a class C felony that carries a sentence of up to five years imprisonment.

Additionally, this bill amends the crime of endangering the welfare of a minor by including exposing the child to various controlled substances. Penalties for violation of this provision range from a class A misdemeanor to a class B felony with a potential sentence of up to 10 years imprisonment. This bill also makes several changes to the statutes defining criminal non-support by including monetary support ordered in another jurisdiction and basic sustenance to the definition of "support," among others.

Finally, this bill makes changes to AS 12.55.155 by adding as an aggravator for sentencing crimes that resulted in serious bodily harm to a child that resulted in extended or substantial impairment to the child's mental health.

Although the Public Defender Agency cannot predict the number of new cases that will be charged nor the number of cases that will be upgraded to more serious felonies under this bill, these modifications are likely to increase the level, and therefore the cost, at which these cases are charged and litigated. The Agency, therefore, submits an indeterminate fiscal note.

2012 LEGISLATIVE SESSION

BILL NO. SB210

Analysis

This bill amends AS 11.41.200 (Assault in the first degree) by adding sections to include a person 18 years of age or older, causing serious bodily harm to a child under the age of 16 years who has a disability, or a child under the age of 12 years. The bill also amends AS 11.41.210 (Assault in the second degree) by making similar changes.

The bill amends AS 11.51.100 (Endangering the welfare of a child in the first degree) by adding a section making it a crime to recklessly expose a child to the unlawful manufacture, use, display, or delivery of a schedule IA – VIA controlled substance, and by setting new penalties.

The bill makes changes to AS 11.51.120 (Criminal nonsupport) regarding monetary support and necessary food and water.

The bill amends AS 12.55.155 (Factors in aggravation and mitigation) by adding a new section regarding children who were seriously harmed that resulted in protracted and substantial impairment of the child's mental health.

The bill amends AS 28.15.046 (licensing of school bus drivers) to prevent the Department of Administration, Division of Motor Vehicles, from issuing a license to an applicant who has been convicted of "Endangering the welfare of a minor in the first degree" in the previous 20 years.

Finally, this bill amends AS 47.10.086 (Reasonable efforts) and AS 47.10.990 (Definitions) by adding sections referencing "Serious bodily harm."

Passage of this legislation will have no fiscal impact on the Division of Alaska State Troopers.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB210

Analysis

This bill creates tougher penalties on crimes committed against a child. This bill impacts the Division of Motor Vehicles (DMV) by adding to the list of disqualifying offenses for school bus drivers. In addition to the current disqualifying offenses listed in AS 28.15.046, the DMV would be prohibited from issuing a school bus endorsement to someone who has been convicted of a newly created offense in SB 210 within 20 years of the time of application.

It is anticipated that this bill will have no fiscal impact on the Division of Motor Vehicles (DMV).

KTVA Alaska

Mom Arrested for Emotional, Physical Abuse of Adopted Children
Anya James, 50, was arrested Tuesday and is charged with ten counts of kidnapping and six counts of first-degree assault.
By Colleen Kelly

An Anchorage mom has been arrested for subjecting her six adopted children to years of emotional and physical abuse, according to Anchorage police.

Following an eight-month investigation, 50-year-old Anya James now faces criminal offenses for the gross mistreatment of her children. James was arrested Tuesday and is charged with ten counts of kidnapping and six counts of first-degree assault.

APD Detective Chris Thomas began the investigation in early October 2010 after receiving a claim of child abuse against four of James' children living in her Hillside home. That same month, several of James' children were removed from the home and hospitalized due to severe malnourishment.

The investigation further revealed that due to malnourishment, James' adopted children endured stunted growth, which prevented some of them from going through puberty during their teenage years.

According to police, the children were confined to small rooms with alarms rigged up to the doors and windows to alert James if the children tried to escape. The mother also used audio and video monitors to oversee the children's activity and conversations.

Despite three functioning bathrooms inside the home, the children were forced to use a bucket filled with kitty litter instead of a toilet placed inside the small rooms.

James is currently booked at the Anchorage Jail; her bail is set at $100,000 cash plus third-party custodian. She will not have contact with any of her adopted children or minors under 16 years old, according to police. She will be arraigned in Superior Court Wednesday afternoon at the Nesbitt Courthouse in downtown Anchorage.

Between 2000 and 2010, James fostered and adopted six children and collected more than $750,000 in adoption subsidies from the State of Alaska.

If you have information about children living under James' care before 2000, contact Anchorage Police Detective Chris Thomas at 786-2628.

Lily Doss-Puder entered her plea before state Superior Court Judge Michael Wolverton, who scheduled sentencing for May, the office said.

The case against her arose last June, when her son was admitted to the hospital for emergency surgery and doctors found three sewing needles in his stomach. Anchorage Police Detective Chris Thomas investigated and, in a review of the child's medical records, found a pattern of injuries to the boy dating to June 2009, the District Attorney's office said.

When Thomas interviewed Doss-Puder, she admitted inserting the needles into her son's stomach, intentionally cutting the webbing of his hand with a knife and intentionally hitting him on the head with a 2-pound weight, the office said.

In exchange for her pleas, Doss-Puder will be sentenced to 18 years in prison with six years suspended, and she won't be allowed to contact her son until he is 18, the District Attorney's office said.

<TARGET><BILL>SB 212</BILL><SUBJECT>SB 212</SUBJECT><COMM>SJUD27</COMM></TARGET>

CS FOR SENATE BILL NO. 212(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR MCGUIRE

A BILL

FOR AN ACT ENTITLED

"An Act relating to crimes of human trafficking; establishing the Human Trafficking Task Force to evaluate services available to victims of human trafficking; and relating to the recommendations and report of the task force."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

HUMAN TRAFFICKING TASK FORCE. (a) The Human Trafficking Task Force is established in the Department of Law. The attorney general, or the attorney general's designee, shall serve as the chair of the task force. The task force consists of representatives of the Department of Law, the Department of Public Safety, the Department of Health and Social Services, and two members, appointed by the governor, representing nongovernmental health and social services organizations that provide services to victims of human trafficking. The task force shall examine the prevalence of the crimes of human trafficking in the state and the services that are available to victims of the crimes of human trafficking under

AS 11.41.360 and 11.41.365.

(b) The task force established in (a) of this section shall submit a report to the legislature by January 15, 2013. The report must include a current assessment of services currently available to victims of human trafficking, recommendations for improving services to victims of human trafficking, and the following information:

(1) the number of human trafficking cases reported to state and local law enforcement agencies in the state since 2007;

(2) the number of human trafficking cases prosecuted under Alaska law;

(3) the number of human trafficking cases state and local law enforcement agencies have investigated in cooperation with federal law enforcement agencies;

(4) the services currently available in the state to victims of human trafficking, including services provided by state agencies, federal agencies, or nongovernmental agencies relating to

(A) medical or psychological counseling;

(B) emergency shelter;

(C) translation;

(D) other assistance related to safe housing and legal services.

(c) The task force established in (a) of this section shall solicit information and input from local, state, and federal agencies, nongovernmental organizations, and other interested persons. The task force shall hold at least one public meeting and shall provide reasonable public notice, teleconference capability, and an opportunity for interested organizations, groups, or individuals to provide written or oral comments. Minutes of meetings and written comments provided to the task force shall be included in the report provided under (b) of this section.

(d) The state agency members of the task force shall be employees of their respective agencies, designated by the attorney general, the commissioner of public safety, or the commissioner of health and social services. Expenses, other than the personnel expenses, of the state agency members of the task force shall be shared by the Department of Law, the Department of Public Safety, and the Department of Health and Social Services. The nongovernmental health and social service organizations whose members are appointed by the governor shall be responsible for their members' costs in participating on the task force.

* **Sec. 2.** Section 1 of this Act is repealed June 1, 2013.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 212

Analysis

SB 212 creates a Human Trafficking Task Force in the Department of Law. Representatives from the Departments of Public Safety and Health and Social Services will participate with the Department of Law.

The task force would be required to assess the prevalence of human trafficking in the State Of Alaska since 2007, the number of prosecutions, and the services available to victims of human trafficking.

The fiscal impact would be $4,000 for travel costs and other costs associated with the task force

Senator Lesil McGuire

Sponsor Statement for SB212

"An Act relating to crimes of human trafficking; establishing the Human Trafficking Task Force to evaluate services available to victims of human trafficking; and relating to the recommendations and report of the task force."

Human Trafficking is a major problem facing Alaska and has captured the attention of Governor Parnell, Senator Murkowski, members of the Alaska State Legislature as well as non-profit and community organizations, eliciting the same resounding response "How can we help stop this?"

Suggestions from organizations such as the Polaris Project, the Department of Law, and the Anchorage Police Department have not provided clear answers to this question.

The goal of this legislation is developing a task force that will assist in answering these questions directly.

The task force proposed in SB 212 would be established under the Department of Law. The attorney general or their designee would serve as chair. The task force would consist of representatives from the Department of Law, the Department of Public Safety, and the Department of Health and Social Services.

The legislature would receive a report from the members of the task force by January 15, 2013 on the following information:

1. The number of human trafficking cases reported to the state and local law enforcement agencies in the state since 2007:
2. The number of human trafficking cases prosecuted under Alaska law;
3. The number of human trafficking cases state and local law enforcement agencies have investigated in cooperation with federal law enforcement agencies;
4. The services currently available in the state to victims of human trafficking, including services provided by state agencies, federal agencies, or non-governmental agencies relating to:

a. Medical or psychological counseling;
b. Emergency shelter
c. Translation services
d. Other assistance related to safe housing and legal services.

Obtaining this information through an established task force will provide a full spectrum analysis so that we can begin to address these issues and bring together important agencies and individuals that work separately, but with the same goals.

Please join me with your support to help the State of Alaska understand and combat the complex issue of Human Trafficking.

Covenant House Alaska

February 28, 2012

Senator Lesil McGuire
State Capitol Room 125
Juneau AK, 99801

Dear Senator McGuire,

Thank you for introducing SB 212: "An Act relating to crimes of human trafficking; establishing the Human Trafficking Task Force to evaluate services available to victims of human trafficking; and relating to the recommendations and report of the task force."

Covenant House Alaska (CHA) has been working to prevent human trafficking of youth and protect victims once they disclose abuse for the last several years. Based on reports from youth and law enforcement, CHA knows that the frequency and severity of trafficking cases is increasing. It is often difficult for youth to disclose and report trafficking activities because of the emotional manipulation, coercion and fear "pimps" impart on victims. CHA knows that youth are being violently forced into sex trafficking and held against their will. Youth have also reported being slowly led into trafficking by men acting as boyfriends or providers, only to end up in the rough world of drug houses and prostitution. The end result is repeated and systematic physical abuse and rape.

CHA appreciates the introduction of SB 212 and the deliberate work of the Alaska State Legislature to investigate the nature of this crime, its victims and the perpetrators. The Task Force will shine light on a world that few understand or recognize, yet the world of sex trafficking is alive in our state.

Thank you for your continued and committed work to protect victims of all ages in Alaska. Your advocacy is appreciated!

Sincerely,

Deirdre A Cronin

Sectional Analysis: CSSB 218 Version B

Sections 1 through 16 amend the theft provisions in statute to increase the financial trigger amounts for 2nd degree theft, 3rd degree theft, 4th degree theft, concealment of merchandise, removal of identification marks, issuance of bad checks, fraudulent use of an access device, vehicle theft, property damage (criminal mischief), criminal simulation, misapplication of property, and defrauding creditors.

Section 17 amends the crime of distribution of indecent materials to minors, in response to a recent decision by a federal district court judge. In response to the decision that the law is overbroad, the bill will require that the state prove the defendant intentionally distributed or possessed with intent to distribute, harmful material to another person that the offender knows if under 16 years of age or believes is under 16 years of age.

Section 18 clarifies in statute that in order for a person to be found guilty but mentally ill (GBMI), the fact finder must determine by proof beyond a reasonable doubt that when the defendant committed the crime he or she was guilty but mentally ill. This change is required by the decisions of the United States Supreme Court in *Apprendi v. New Jersey* and *Blakely v. Washington*, holding that the Sixth Amendment right to a jury trial requires that a factual finding that would increase the statutory maximum penalty for an offense must be submitted to a jury and proven beyond a reasonable doubt.

The court of appeals has said that a person who is found guilty but mentally ill does not qualify for parole release, including mandatory parole, until the person no longer suffers from a mental disease or defect that causes the defendant to be dangerous to the public. Because a person who is found GBMI may not qualify for mandatory parole, the factual decisions addressing whether the defendant is GBMI must be submitted to a jury (unless the defendant waives this requirement) and proven beyond a reasonable doubt.

Section 19: Under current law the defense, the prosecution, or the court may raise the question after a guilty verdict, of whether the defendant is guilty but mentally ill. This is possible if the issue has not been raised in the trial. The procedure for addressing this issue needs to be changed to reflect the constitutional requirements articulated in *Apprendi* and *Blakely*. **Section 19** makes these changes. It also adopts a procedure for giving notice 10 days before trial if the party intends to raise the issue after trial.

Section 20 clarifies that the jury must determine whether the defendant is guilty but mentally ill, unless the right is waived by the defendant. The court then determines the sentence.

Section 21 allows the testimony of a witness in a hearing addressing the competency of a defendant charged with a crime to be given by way of contemporaneous two-way video conference.

Section 22 is amended to recognize that current law has other provisions that require a different standard of proof in addition to those specified in the current statute.

Sections 23 and 24 add provisions to ensure that neither the prosecuting authority nor the defendant can, without mutual agreement, change the terms of a Rule 11, Alaska Rules of Criminal Procedure, agreement after it has been imposed. If a defendant, as part of a plea agreement under Rule 11, agrees to a particular period of probation the court may not, without the consent of the prosecution, reduce the period of probation. This has the effect of overruling the decision in *State v. Henry*, 240 P. 3d 846 (Alaska App. 2010). Judges, in sentencing a person who has violated a condition of probation, must still apply the *Chaney* criteria in deciding how much, if any, of the suspended period of incarceration should be imposed. However, the court may not reduce the period of probation or the period of suspended time (less the time imposed for the probation violation) without the agreement of the prosecuting authority.

Section 25 amends the sentencing law for murder in the first degree to change the burden of proof that the defendant subjected the victim to substantial physical torture or that the defendant was a peace officer who used the officer's authority to facilitate the murder. The current statute provides for a clear and convincing burden on the prosecution. Under the *Apprendi* and *Blakely* decisions, the state must prove these factors beyond a reasonable doubt to the jury.

Section 26 clarifies in statute that if a sentence is imposed on a defendant that would preclude the person from receiving good time, for example a person who has been convicted of the first degree murder of a peace officer, the jury (unless waived by the defendant) must determine the factual issue, in this example, that the victim was a peace officer, beyond a reasonable doubt. Additionally, if a court is sentencing a person who is subject to a presumptive range and the prosecution seeks to increase the range by proof of certain aggravating factors, the jury (unless waived) must determine the factual issue by proof beyond a reasonable doubt.

Section 27 includes guidance to the court in finding the aggravating factor that the defendant's conduct was the most serious in the definition of the offense. AS 12.55.155(c)(10). First, it provides that the jury must determine the facts supporting an allegation that the defendant's conduct was the most serious in the definition of the offense. Because finding a factor in aggravation allows the court to impose a higher term of imprisonment than the presumptive range, the finding by the jury (unless waived) is required by the *Apprendi/Blakely* decisions. After the jury makes this factual determination, the court then makes the legal decision that the factual decision justifies an increase in sentence because the conduct is the most serious in the definition of the offense. The crime of theft provides a good illustration of this. Theft in the second degree, a class C felony, prohibits a person from committing theft of property valued between $500 and $25,000. The maximum term for a class C felony is five years incarceration; the presumptive range is zero to two years for a first felony offense. If the jury finds that the defendant stole an amount close to $25,000, the court may then consider this conduct as the most serious in the definition of second degree theft.

Section 27 also codifies court decisions that clarify that once a factor in aggravation has been decided as required in *Apprendi/Blakely*, other factors in aggravation may be considered without a factual

determination beyond a reasonable doubt by the jury. Once one factor in aggravation is decided, the judge may sentence a person up to the maximum term; thus additional factors do not raise the maximum term. *Reandeau v. State*, 265 P.3d 1045 (Alaska App. 2011).

Sections 28 and 29 are conforming amendments to Sections 23 and 24.

Section 30 adds to Alaska Rules of Criminal Procedure, addressing the use of testimony by contemporaneous two-way video conference. It would allow testimony if the parties agree to its use or if the court finds it necessary under specific circumstances.

Section 31 provides additional indirect Court Rule amendments on the same topic.

Sections 32 – 34 include applicability provisions, conditional effect of the court rule change, and the effective date, July 1, 2012.

CS FOR SENATE BILL NO. 218(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act relating to property crimes; relating to the crime of distribution of indecent material to minors; relating to testimony by video conference; relating to persons found guilty but mentally ill; relating to sentencing procedures; relating to probation; relating to procedures for finding aggravating factors at sentencing; amending Rules 32.1 and 38.2, Alaska Rules of Criminal Procedure; adding Rule 38.3, Alaska Rules of Criminal Procedure; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.46.130(a) is amended to read:

(a) A person commits the crime of theft in the second degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$1,500** [$500] or more but less than $25,000;

(2) the property is a firearm or explosive;

(3) the property is taken from the person of another;

(4) the property is taken from a vessel and is vessel safety or survival equipment;

(5) the property is taken from an aircraft and the property is aircraft safety or survival equipment;

(6) the value of the property is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(A) an offense under AS 11.46.120, or an offense under another law or ordinance with similar elements;

(B) a crime set out in this subsection or an offense under another law or ordinance with similar elements;

(C) an offense under AS 11.46.140(a)(1), or an offense under another law or ordinance with similar elements; or

(D) an offense under AS 11.46.220(c)(1) or (c)(2)(A), or an offense under another law or ordinance with similar elements; or

(7) the property is an access device.

* **Sec. 2.** AS 11.46.140(a) is amended to read:

(a) A person commits the crime of theft in the third degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$250** [$50] or more but less than **$1,500** [$500]; **or**

(2) [REPEALED

(3)] the value of the property is less than **$250** [$50] and, within the past five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of theft or concealment of merchandise, or an offense under another law or ordinance with similar elements.

* **Sec. 3.** AS 11.46.150(a) is amended to read:

(a) A person commits the crime of theft in the fourth degree if the person commits theft as defined in AS 11.46.100 and the value of the property or services is less than **$250** [$50].

*** Sec. 4.** AS 11.46.220(c) is amended to read:

(c) Concealment of merchandise is

(1) a class C felony if

(A) the merchandise is a firearm;

(B) the value of the merchandise is **$1,500** [$500] or more; or

(C) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(i) the offense of concealment of merchandise under this paragraph or (2)(A) of this subsection, or an offense under another law or ordinance with similar elements; or

(ii) an offense under AS 11.46.120, 11.46.130, or 11.46.140(a)(1), or an offense under another law or ordinance with similar elements;

(2) a class A misdemeanor if

(A) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500]; or

(B) the value of the merchandise is less than **$250** [$50] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions of the offense of concealment of merchandise or theft in any degree, or an offense under another law or ordinance with similar elements;

(3) a class B misdemeanor if the value of the merchandise is less than **$250** [$50].

*** Sec. 5.** AS 11.46.260(b) is amended to read:

(b) Removal of identification marks is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than

$1,500 [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

* **Sec. 6.** AS 11.46.270(b) is amended to read:

(b) Unlawful possession is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

* **Sec. 7.** AS 11.46.280(d) is amended to read:

(d) Issuing a bad check is

(1) a class B felony if the face amount of the check is $25,000 or more;

(2) a class C felony if the face amount of the check is **$1,500** [$500] or more but less than $25,000;

(3) a class A misdemeanor if the face amount of the check is **$250** [$50] or more but less than **$1,500** [$500];

(4) a class B misdemeanor if the face amount of the check is less than **$250** [$50].

* **Sec. 8.** AS 11.46.285(b) is amended to read:

(b) Fraudulent use of an access device is

(1) a class B felony if the value of the property or services obtained is $25,000 or more;

(2) a class C felony if the value of the property or services obtained is **$1,500** [$50] or more but less than $25,000;

(3) a class A misdemeanor if the value of the property or services obtained is less than **$1,500** [$50].

* **Sec. 9.** AS 11.46.295 is amended to read:

Sec. 11.46.295. Prior convictions. For purposes of considering prior

convictions in prosecuting a crime of theft under AS 11.46.130(a)(6) or **11.46.140(a)(2)** [11.46.140(a)(3)], or in prosecuting the crime of concealment of merchandise under AS 11.46.220(c), a conviction for an offense under another law or ordinance with similar elements is a conviction of an offense having elements similar to those of an offense defined as such under Alaska law at the time the offense was committed. The court shall consider the date of a prior conviction as occurring on the date that sentence is imposed for the prior offense.

*** Sec. 10.** AS 11.46.360(a) is amended to read:

(a) A person commits the crime of vehicle theft in the first degree if, having no right to do so or any reasonable ground to believe the person has such a right, the person drives, tows away, or takes

(1) the car, truck, motorcycle, motor home, bus, aircraft, or watercraft of another;

(2) the propelled vehicle of another and

(A) the vehicle or any other property of another is damaged in a total amount of **$1,500** [$500] or more;

(B) the owner incurs reasonable expenses as a result of the loss of use of the vehicle, in a total amount of **$1,500** [$500] or more; or

(C) the owner is deprived of the use of the vehicle for seven days or more;

(3) the propelled vehicle of another and the vehicle is marked as a police or emergency vehicle; or

(4) the propelled vehicle of another and, within the preceding seven years, the person was convicted under

(A) this section or AS 11.46.365;

(B) former AS 11.46.482(a)(4) or (5);

(C) former AS 11.46.484(a)(2);

(D) AS 11.46.120 - 11.46.140 of an offense involving the theft of a propelled vehicle; or

(E) a law or ordinance of this or another jurisdiction with elements substantially similar to those of an offense described in (A) - (D) of

this paragraph.

*** Sec. 11.** AS 11.46.482(a) is amended to read:

(a) A person commits the crime of criminal mischief in the third degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with intent to damage property of another, the person damages property of another in an amount of **$1,500** [$500] or more;

(2) the person recklessly creates a risk of damage in an amount exceeding $100,000 to property of another by the use of widely dangerous means; or

(3) the person knowingly

(A) defaces, damages, or desecrates a cemetery or the contents of a cemetery or a tomb, grave, or memorial regardless of whether the tomb, grave, or memorial is in a cemetery or whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected;

(B) removes human remains or associated burial artifacts from a cemetery, tomb, grave, or memorial regardless of whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected.

*** Sec. 12.** AS 11.46.484(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fourth degree if, having no right to do so or any reasonable ground to believe the person has such a right

(1) with intent to damage property of another, the person damages property of another in an amount of **$250** [$50] or more but less than **$1,500** [$500];

(2) the person tampers with a fire protection device in a building that is a public place;

(3) the person knowingly accesses a computer, computer system, computer program, computer network, or part of a computer system or network;

(4) the person uses a device to descramble an electronic signal that has been scrambled to prevent unauthorized receipt or viewing of the signal unless the device is used only to descramble signals received directly from a satellite or unless the person owned the device before September 18, 1984; or

(5) the person knowingly removes, relocates, defaces, alters, obscures, shoots at, destroys, or otherwise tampers with an official traffic control device or damages the work upon a highway under construction.

*** Sec. 13.** AS 11.46.486(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fifth degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with reckless disregard for the risk of harm to or loss of the property or with intent to cause substantial inconvenience to another, the person tampers with property of another;

(2) with intent to damage property of another, the person damages property of another in an amount less than **$250** [$50]; or

(3) the person rides in a propelled vehicle knowing it has been stolen or that it is being used in violation of AS 11.46.360 or 11.46.365(a)(1).

*** Sec. 14.** AS 11.46.530(b) is amended to read:

(b) Criminal simulation is

(1) a class C felony if the value of what the object purports to represent is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of what the object purports to represent is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of what the object purports to represent is less than **$250** [$50].

*** Sec. 15.** AS 11.46.620(d) is amended to read:

(d) Misapplication of property is

(1) a class C felony if the value of the property misapplied is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property misapplied is less than **$1,500** [$500].

*** Sec. 16.** AS 11.46.730(c) is amended to read:

(c) Defrauding creditors is a class A misdemeanor unless that secured party, judgment creditor, or creditor incurs a pecuniary loss of **$1,500** [$500] or more as a

result to the defendant's conduct, in which case defrauding secured creditors is

(1) a class B felony if the loss is $25,000 or more;

(2) a class C felony if the loss is **$1,500** [$500] or more but less than $25,000.

*** Sec. 17.** AS 11.61.128(a) is amended to read:

(a) A person commits the crime of distribution of indecent material to minors if

(1) the person, being 18 years of age or older, **intentionally** [KNOWINGLY] distributes **or possesses with intent to distribute any material described in (2) and (3) of this subsection to either**

(A) a child that the person knows is under 16 years of age; or

(B) another person that the person believes is a child under 16 years of age;

(2) the person knows that the material [TO ANOTHER PERSON ANY MATERIAL THAT] depicts the following actual or simulated conduct:

(A) sexual penetration;

(B) the lewd touching of a person's genitals, anus, or female breast;

(C) masturbation;

(D) bestiality;

(E) the lewd exhibition of a person's genitals, anus, or female breast; or

(F) sexual masochism or sadism; **and**

(3) [(2)] the material is harmful to minors [; AND

(3) EITHER

(A) THE OTHER PERSON IS A CHILD UNDER 16 YEARS OF AGE; OR

(B) THE PERSON BELIEVES THAT THE OTHER PERSON IS A CHILD UNDER 16 YEARS OF AGE].

*** Sec. 18.** AS 12.47.040(b) is amended to read:

(b) To return a verdict under (a)(4) of this section, the **fact finder** [JURY] must find beyond a reasonable doubt that the defendant committed the crime and [FIND BY A PREPONDERANCE OF THE EVIDENCE] that, when the defendant committed the crime, the defendant was guilty but mentally ill as defined in AS 12.47.030.

*** Sec. 19.** AS 12.47.060(a) is amended to read:

(a) In a prosecution for a crime when the affirmative defense of insanity is not raised and when evidence of mental disease or defect of the defendant is not admitted at trial under AS 12.47.020, [AND THE DEFENDANT IS CONVICTED OF A CRIME,] the defendant **or** [,] the prosecuting attorney [, OR THE COURT ON ITS OWN MOTION] may raise the issue of whether the defendant is guilty but mentally ill. **A party that seeks a post-conviction determination of guilty but mentally ill must give notice 10 days before trial of intent to do so; however, this deadline is waived if the opposing party presents evidence or argument at trial tending to show that the defendant may be guilty but mentally ill.** A hearing must be held on this issue [AT OR] before the **same fact finder that returned the verdict of guilty under procedures set by the court. In cases decided by a jury, at the request of the defendant and with the concurrence of the prosecuting attorney, the court may decide the issue. A waiver of consideration by a jury must be in writing and in person before the court** [SENTENCING HEARING]. At the hearing, the **fact finder** [COURT] shall determine whether the defendant has been shown to be guilty but mentally ill **beyond a reasonable doubt, considering** [BY A PREPONDERANCE OF THE] evidence presented at the hearing and any evidence relevant to the issue that was presented at trial.

*** Sec. 20.** AS 12.47.060(b) is amended to read:

(b) If the **fact finder** [COURT] finds that a defendant is guilty but mentally ill, **the court** [IT] shall sentence the defendant as provided by law and shall enter the finding of guilty but mentally ill as part of the judgment.

*** Sec. 21.** AS 12.47.100 is amended by adding a new subsection to read:

(h) In a hearing to determine competency under this section, the court may allow a witness, including the psychiatrist or psychologist who examined the

defendant, to testify concerning the competency of the defendant by contemporaneous two-way video conference if the witness lives in a place from which people customarily travel by air to the court and the procedure allows the parties a fair opportunity to examine the witness. The video conference technician shall be the only person in the presence of the witness unless the court, in its discretion, determines that another person may be present. Any person present with the witness must be identified on the record. In this subsection, "contemporaneous two-way video conference"

(1) means a conference among people at different places by means of transmitted audio and video signals;

(2) includes all communication technologies that allow people at two or more places to interact by two-way video and audio transmissions simultaneously.

* **Sec. 22.** AS 12.55.025(i) is amended to read:

(i) Except as **otherwise** provided **in this chapter** [BY AS 12.55.125(a)(3), 12.55.145(d), 12.55.155(f), AND 12.55.165], the preponderance of the evidence standard of proof applies to sentencing proceedings.

* **Sec. 23.** AS 12.55.090(b) is amended to read:

(b) **Except as otherwise provided in (f) of this section, the** [THE] court may revoke or modify any condition of probation [,] or may change the period of probation.

* **Sec. 24.** AS 12.55.090 is amended by adding a new subsection to read:

(f) Unless the defendant and the prosecuting authority agree at the probation revocation proceeding or other proceeding, the court may not reduce the specific period of probation, or the specific term of suspended incarceration except by the amount of incarceration imposed for a probation violation, if

(1) the sentence was imposed in accordance with a plea agreement under Rule 11, Alaska Rules of Criminal Procedure; and

(2) the agreement required a specific period of probation or a specific term of suspended incarceration.

* **Sec. 25.** AS 12.55.125(a) is amended to read:

(a) A defendant convicted of murder in the first degree or murder of an unborn child under AS 11.41.150(a)(1) shall be sentenced to a definite term of imprisonment

of at least 20 years but not more than 99 years. A defendant convicted of murder in the first degree shall be sentenced to a mandatory term of imprisonment of 99 years when

(1) the defendant is convicted of the murder of a uniformed or otherwise clearly identified peace officer, firefighter, or correctional employee who was engaged in the performance of official duties at the time of the murder;

(2) the defendant has been previously convicted of

(A) murder in the first degree under AS 11.41.100 or former AS 11.15.010 or 11.15.020;

(B) murder in the second degree under AS 11.41.110 or former AS 11.15.030; or

(C) homicide under the laws of another jurisdiction when the offense of which the defendant was convicted contains elements similar to first degree murder under AS 11.41.100 or second degree murder under AS 11.41.110;

(3) [THE COURT FINDS BY CLEAR AND CONVINCING EVIDENCE THAT] the defendant subjected the murder victim to substantial physical torture;

(4) the defendant is convicted of the murder of and personally caused the death of a person, other than a participant, during a robbery; or

(5) [THE COURT FINDS BY CLEAR AND CONVINCING EVIDENCE THAT] the defendant is a peace officer who used the officer's authority as a peace officer to facilitate the murder.

*** Sec. 26.** AS 12.55.125 is amended by adding a new subsection to read:

(p) If the state seeks either (1) the imposition of a sentence under (a) of this section that would preclude the defendant from being awarded a good time deduction under AS 33.20.010(a) based on a fact other than a prior conviction; or (2) to establish a fact that would increase the presumptive sentencing range under (c)(2), (d)(2), (e)(4), (i)(1)(A) or (B), or (i)(2)(A) or (B) of this section, the factual question required to be decided shall be presented to a trial jury and proven beyond a reasonable doubt under procedures set by the court, unless the defendant waives trial by jury and either stipulates to the existence of the fact or consents to have the fact proven to the court

sitting without a jury. Written notice of the intent to establish a fact under this subsection must be served on the defendant and filed with the court as provided for notice under AS 12.55.155(f)(2).

* **Sec. 27.** AS 12.55.155 is amended by adding new subsections to read:

(i) If the state seeks to establish a factor in aggravation at sentencing under (c)(10) of this section,

(1) the assessment of the facts underlying the state's allegation that the defendant's conduct was among the most serious included in the definition of the offense shall be made by the trial jury under procedures set by the court and as provided in (f)(2) of this section, unless the defendant waives trial by jury, stipulates to the existence of the aggravating factor or to the facts alleged by the state, or consents to have the assessment proved under procedures set out in (f)(1) of this section; factual assertions underlying the state's allegation that the defendant's conduct was among the most serious included in the definition of the offense must be proved beyond a reasonable doubt;

(2) the legal decision concerning whether the defendant's conduct determined under (1) of this subsection was among the most serious included in the definition of the offense shall be made by the court under procedures set out in (f)(1) of this section.

(j) If one of the aggravating factors in (c) of this section is established as provided in (f)(1) and (2) of this section, the court may increase the term of imprisonment up to the maximum term of imprisonment. Any additional aggravating factor may then be established by clear and convincing evidence by the court sitting without a jury, including an aggravating factor that the jury has found not to have been established beyond a reasonable doubt.

* **Sec. 28.** AS 33.05.050 is amended to read:

Sec. 33.05.050. Report of probation officer. When directed by the court, the probation officer shall report to the court [,] with a statement of the conduct of the probationer while on probation. **Except as otherwise provided by law, the** [THE] court may then discharge the probationer from further supervision and may terminate the proceedings against the probationer, or may extend the probation, as shall seem

advisable.

*** Sec. 29.** AS 33.05.070(b) is amended to read:

(b) As speedily as possible after arrest**,** the probationer shall be taken before the court for the district having jurisdiction over the probationer. **Except as provided in AS 12.55.090(f),** [THEREUPON] the court may revoke the probation and require the probationer to serve the sentence imposed [,] or any lesser sentence [,] and, if imposition of sentence was suspended, may impose any sentence **that** [WHICH] might originally have been imposed, subject to the limitation specified in AS 12.55.086(c).

*** Sec. 30.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DIRECT COURT RULE AMENDMENT. The Alaska Rules of Criminal Procedure are amended by adding a new section to read:

Rule 38.3. Video Conference Testimony. (a) **In General.** In every trial, the testimony of witnesses shall be taken in open court, unless otherwise provided by statute or rule.

(b) **Testimony by Video Conference.** The parties may agree to take testimony from a witness at trial by contemporaneous two-way video conference presented in open court. Absent the parties' agreement, the court may authorize the contemporaneous two-way video conference testimony of a witness if

(1) the requesting party establishes that testimony by two-way video conference is necessary to further an important public policy;

(2) the requesting party establishes that the witness is unavailable; and

(3) the testimony is given under oath and subject to cross-examination.

(c) **Procedures for Taking Video Conference Testimony.** If the trial court authorizes video conference testimony under (b) of this rule, it shall determine the procedures for taking the contemporaneous two-way video conference testimony. The parties, the court, the trier of fact, and the public must be able to see and hear the witness; and the witness must see and hear the courtroom proceedings, including the defendant, as if the witness were sitting in the courtroom's witness stand. The persons who are present with the witness must be identified. The parties may move to exclude

any person other than the video conference technician from the witness's presence; the court, in its discretion, may exclude a person other than the video conference technician from the presence of the witness.

(d) **Definitions.**

(1) Contemporaneous Two-Way Video Conference. Contemporaneous two-way video conference means a conference among people at different places by means of transmitted audio and video signals. It includes all communication technologies that allow two or more places to interact by two-way video and audio transmissions simultaneously.

(2) Unavailable. In this rule, a witness is unavailable if

(A) by clear and convincing evidence the court finds under Rule 804(a)(4) or (5), Alaska Rules of Evidence, or Rule 15(e)(4), Alaska Rules of Criminal Procedure, that the witness is unavailable; or

(B) the parties agree that the witness is unavailable.

*** Sec. 31.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE AMENDMENT. (a) AS 12.55.125(p), enacted by sec. 26 of this Act, and AS 12.55.155(i) and (j), enacted by sec. 27 of this Act, have the effect of changing Rule 32.1, Alaska Rules of Criminal Procedure, by amending procedures for sentencing persons convicted of certain crimes.

(b) AS 12.47.100, as amended by sec. 21 of this Act, has the effect of changing Rule 38.2, Alaska Rules of Criminal Procedure, by providing procedures for televised appearance by witnesses in certain proceedings.

*** Sec. 32.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 1 - 17, 23, and 24 of this Act apply to offenses committed on or after the effective date of this Act.

(b) Sections 18 - 22 and 25 - 31 of this Act apply to proceedings occurring on or after the effective date of this Act for offenses occurring before, on, or after the effective date of this Act.

*** Sec. 33.** The uncodified law of the State of Alaska is amended by adding a new section to

read:

CONDITIONAL EFFECT. (a) Sections 26 and 27 of this Act take effect only if sec. 31(a) of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

(b) Section 21 of this Act takes effect only if sec. 31(b) of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

*** Sec. 34.** This Act takes effect July 1, 2012.

CS FOR SENATE BILL NO. 218(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act relating to property crimes; relating to the crime of distribution of indecent material to minors; relating to testimony by video conference; relating to persons found guilty but mentally ill; relating to sentencing procedures; relating to probation; relating to procedures for finding aggravating factors at sentencing; amending Rule 32.1, Alaska Rules of Criminal Procedure; adding Rule 38.3, Alaska Rules of Criminal Procedure; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.46.130(a) is amended to read:

(a) A person commits the crime of theft in the second degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$1,500** [$500] or more but less than $25,000;

(2) the property is a firearm or explosive;

(3) the property is taken from the person of another;

(4) the property is taken from a vessel and is vessel safety or survival equipment;

(5) the property is taken from an aircraft and the property is aircraft safety or survival equipment;

(6) the value of the property is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(A) an offense under AS 11.46.120, or an offense under another law or ordinance with similar elements;

(B) a crime set out in this subsection or an offense under another law or ordinance with similar elements;

(C) an offense under AS 11.46.140(a)(1), or an offense under another law or ordinance with similar elements; or

(D) an offense under AS 11.46.220(c)(1) or (c)(2)(A), or an offense under another law or ordinance with similar elements; or

(7) the property is an access device.

*** Sec. 2.** AS 11.46.140(a) is amended to read:

(a) A person commits the crime of theft in the third degree if the person commits theft as defined in AS 11.46.100 and

(1) the value of the property or services is **$250** [$50] or more but less than **$1,500** [$500]; **or**

(2) [REPEALED

(3)] the value of the property is less than **$250** [$50] and, within the past five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of theft or concealment of merchandise, or an offense under another law or ordinance with similar elements.

*** Sec. 3.** AS 11.46.150(a) is amended to read:

(a) A person commits the crime of theft in the fourth degree if the person commits theft as defined in AS 11.46.100 and the value of the property or services is less than **$250** [$50].

*** Sec. 4.** AS 11.46.220(c) is amended to read:

(c) Concealment of merchandise is

(1) a class C felony if

(A) the merchandise is a firearm;

(B) the value of the merchandise is **$1,500** [$500] or more; or

(C) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions in this or another jurisdiction of

(i) the offense of concealment of merchandise under this paragraph or (2)(A) of this subsection, or an offense under another law or ordinance with similar elements; or

(ii) an offense under AS 11.46.120, 11.46.130, or 11.46.140(a)(1), or an offense under another law or ordinance with similar elements;

(2) a class A misdemeanor if

(A) the value of the merchandise is **$250** [$50] or more but less than **$1,500** [$500]; or

(B) the value of the merchandise is less than **$250** [$50] and, within the preceding five years, the person has been convicted and sentenced on two or more separate occasions of the offense of concealment of merchandise or theft in any degree, or an offense under another law or ordinance with similar elements;

(3) a class B misdemeanor if the value of the merchandise is less than **$250** [$50].

*** Sec. 5.** AS 11.46.260(b) is amended to read:

(b) Removal of identification marks is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than

$1,500 [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

*** Sec. 6.** AS 11.46.270(b) is amended to read:

(b) Unlawful possession is

(1) a class C felony if the value of the property on which the serial number or identification mark appeared is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property on which the serial number or identification mark appeared is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of the property on which the serial number or identification mark appeared is less than **$250** [$50].

*** Sec. 7.** AS 11.46.280(d) is amended to read:

(d) Issuing a bad check is

(1) a class B felony if the face amount of the check is $25,000 or more;

(2) a class C felony if the face amount of the check is **$1,500** [$500] or more but less than $25,000;

(3) a class A misdemeanor if the face amount of the check is **$250** [$50] or more but less than **$1,500** [$500];

(4) a class B misdemeanor if the face amount of the check is less than **$250** [$50].

*** Sec. 8.** AS 11.46.285(b) is amended to read:

(b) Fraudulent use of an access device is

(1) a class B felony if the value of the property or services obtained is $25,000 or more;

(2) a class C felony if the value of the property or services obtained is **$1,500** [$50] or more but less than $25,000;

(3) a class A misdemeanor if the value of the property or services obtained is less than **$1,500** [$50].

*** Sec. 9.** AS 11.46.295 is amended to read:

Sec. 11.46.295. Prior convictions. For purposes of considering prior

convictions in prosecuting a crime of theft under AS 11.46.130(a)(6) or **11.46.140(a)(2)** [11.46.140(a)(3)], or in prosecuting the crime of concealment of merchandise under AS 11.46.220(c), a conviction for an offense under another law or ordinance with similar elements is a conviction of an offense having elements similar to those of an offense defined as such under Alaska law at the time the offense was committed. The court shall consider the date of a prior conviction as occurring on the date that sentence is imposed for the prior offense.

*** Sec. 10.** AS 11.46.360(a) is amended to read:

(a) A person commits the crime of vehicle theft in the first degree if, having no right to do so or any reasonable ground to believe the person has such a right, the person drives, tows away, or takes

(1) the car, truck, motorcycle, motor home, bus, aircraft, or watercraft of another;

(2) the propelled vehicle of another and

(A) the vehicle or any other property of another is damaged in a total amount of **$1,500** [$500] or more;

(B) the owner incurs reasonable expenses as a result of the loss of use of the vehicle, in a total amount of **$1,500** [$500] or more; or

(C) the owner is deprived of the use of the vehicle for seven days or more;

(3) the propelled vehicle of another and the vehicle is marked as a police or emergency vehicle; or

(4) the propelled vehicle of another and, within the preceding seven years, the person was convicted under

(A) this section or AS 11.46.365;

(B) former AS 11.46.482(a)(4) or (5);

(C) former AS 11.46.484(a)(2);

(D) AS 11.46.120 - 11.46.140 of an offense involving the theft of a propelled vehicle; or

(E) a law or ordinance of this or another jurisdiction with elements substantially similar to those of an offense described in (A) - (D) of

this paragraph.

*** Sec. 11.** AS 11.46.482(a) is amended to read:

(a) A person commits the crime of criminal mischief in the third degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with intent to damage property of another, the person damages property of another in an amount of **$1,500** [$500] or more;

(2) the person recklessly creates a risk of damage in an amount exceeding $100,000 to property of another by the use of widely dangerous means; or

(3) the person knowingly

(A) defaces, damages, or desecrates a cemetery or the contents of a cemetery or a tomb, grave, or memorial regardless of whether the tomb, grave, or memorial is in a cemetery or whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected;

(B) removes human remains or associated burial artifacts from a cemetery, tomb, grave, or memorial regardless of whether the cemetery, tomb, grave, or memorial appears to be abandoned, lost, or neglected.

*** Sec. 12.** AS 11.46.484(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fourth degree if, having no right to do so or any reasonable ground to believe the person has such a right

(1) with intent to damage property of another, the person damages property of another in an amount of **$250** [$50] or more but less than **$1,500** [$500];

(2) the person tampers with a fire protection device in a building that is a public place;

(3) the person knowingly accesses a computer, computer system, computer program, computer network, or part of a computer system or network;

(4) the person uses a device to descramble an electronic signal that has been scrambled to prevent unauthorized receipt or viewing of the signal unless the device is used only to descramble signals received directly from a satellite or unless the person owned the device before September 18, 1984; or

(5) the person knowingly removes, relocates, defaces, alters, obscures, shoots at, destroys, or otherwise tampers with an official traffic control device or damages the work upon a highway under construction.

*** Sec. 13.** AS 11.46.486(a) is amended to read:

(a) A person commits the crime of criminal mischief in the fifth degree if, having no right to do so or any reasonable ground to believe the person has such a right,

(1) with reckless disregard for the risk of harm to or loss of the property or with intent to cause substantial inconvenience to another, the person tampers with property of another;

(2) with intent to damage property of another, the person damages property of another in an amount less than **$250** [$50]; or

(3) the person rides in a propelled vehicle knowing it has been stolen or that it is being used in violation of AS 11.46.360 or 11.46.365(a)(1).

*** Sec. 14.** AS 11.46.530(b) is amended to read:

(b) Criminal simulation is

(1) a class C felony if the value of what the object purports to represent is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of what the object purports to represent is **$250** [$50] or more but less than **$1,500** [$500];

(3) a class B misdemeanor if the value of what the object purports to represent is less than **$250** [$50].

*** Sec. 15.** AS 11.46.620(d) is amended to read:

(d) Misapplication of property is

(1) a class C felony if the value of the property misapplied is **$1,500** [$500] or more;

(2) a class A misdemeanor if the value of the property misapplied is less than **$1,500** [$500].

*** Sec. 16.** AS 11.46.730(c) is amended to read:

(c) Defrauding creditors is a class A misdemeanor unless that secured party, judgment creditor, or creditor incurs a pecuniary loss of **$1,500** [$500] or more as a

result to the defendant's conduct, in which case defrauding secured creditors is

(1) a class B felony if the loss is $25,000 or more;

(2) a class C felony if the loss is **$1.500** [$500] or more but less than $25,000.

*** Sec. 17.** AS 11.61.128(a) is amended to read:

(a) A person commits the crime of distribution of indecent material to minors if

(1) the person, being 18 years of age or older, **intentionally** [KNOWINGLY] distributes **or possesses with intent to distribute any material described in (2) and (3) of this subsection to either**

(A) a child that the person knows is under 16 years of age; or

(B) another person that the person believes is a child under 16 years of age;

(2) the material is [TO ANOTHER PERSON ANY] material that **the person knows** depicts the following actual or simulated conduct:

(A) sexual penetration;

(B) the lewd touching of a person's genitals, anus, or female breast;

(C) masturbation;

(D) bestiality;

(E) the lewd exhibition of a person's genitals, anus, or female breast; or

(F) sexual masochism or sadism; **and**

(3) [(2)] the material is harmful to minors [; AND

(3) EITHER

(A) THE OTHER PERSON IS A CHILD UNDER 16 YEARS OF AGE; OR

(B) THE PERSON BELIEVES THAT THE OTHER PERSON IS A CHILD UNDER 16 YEARS OF AGE].

*** Sec. 18.** AS 11.66.140 is amended to read:

Sec. 11.66.140. Corroboration of certain testimony not required. In a prosecution under **AS 11.66.110 - 11.66.135** [AS 11.66.110 - 11.66.130], it is not necessary that the testimony of the person whose prostitution is alleged to have been compelled or promoted be corroborated by the testimony of any other witness or by documentary or other types of evidence.

*** Sec. 19.** AS 11.66.145 is amended to read:

Sec. 11.66.145. Forfeiture. Property used to institute, aid, or facilitate, or received or derived from, a violation of **AS 11.66.100 - 11.66.135** [AS 11.66.110 - 11.66.135] shall be forfeited.

*** Sec. 20.** AS 12.47.040(b) is amended to read:

(b) To return a verdict under (a)(4) of this section, the **fact finder** [JURY] must find beyond a reasonable doubt that the defendant committed the crime and [FIND BY A PREPONDERANCE OF THE EVIDENCE] that, when the defendant committed the crime, the defendant was guilty but mentally ill as defined in AS 12.47.030.

*** Sec. 21.** AS 12.47.060(a) is amended to read:

(a) In a prosecution for a crime when the affirmative defense of insanity is not raised and when evidence of mental disease or defect of the defendant is not admitted at trial under AS 12.47.020, [AND THE DEFENDANT IS CONVICTED OF A CRIME,] the defendant **or** [,] the prosecuting attorney [, OR THE COURT ON ITS OWN MOTION] may raise the issue of whether the defendant is guilty but mentally ill. **A party that seeks a post-conviction determination of guilty but mentally ill must give notice 10 days before trial of intent to do so; however, this deadline is waived if the opposing party presents evidence or argument at trial tending to show that the defendant may be guilty but mentally ill.** A hearing must be held on this issue [AT OR] before the **same fact finder that returned the verdict of guilty under procedures set by the court. In cases decided by a jury, at the request of the defendant and with the concurrence of the prosecuting attorney, the court may decide the issue. A waiver of consideration by a jury must be in writing and in person before the court** [SENTENCING HEARING]. At the hearing, the **fact finder** [COURT] shall determine whether the defendant has been shown to be guilty

but mentally ill **beyond a reasonable doubt, considering** [BY A PREPONDERANCE OF THE] evidence presented at the hearing and any evidence relevant to the issue that was presented at trial.

*** Sec. 22.** AS 12.47.060(b) is amended to read:

(b) If the **fact finder** [COURT] finds that a defendant is guilty but mentally ill, **the court** [IT] shall sentence the defendant as provided by law and shall enter the finding of guilty but mentally ill as part of the judgment.

*** Sec. 23.** AS 12.47.100 is amended by adding a new subsection to read:

(h) In a hearing to determine competency under this section, the court may allow a witness, including the psychiatrist or psychologist who examined the defendant, to testify concerning the competency of the defendant by contemporaneous two-way video conference if the witness would be required to travel more than 50 miles to the court or lives in a place from which people customarily travel by air to the court. In this subsection, "contemporaneous two-way video conference"

(1) means a conference among people at different places by means of transmitted audio and video signals;

(2) includes all communication technologies that allow people at two or more places to interact by two-way video and audio transmissions simultaneously.

*** Sec. 24.** AS 12.55.025(i) is amended to read:

(i) Except as **otherwise** provided **in this chapter** [BY AS 12.55.125(a)(3), 12.55.145(d), 12.55.155(f), AND 12.55.165], the preponderance of the evidence standard of proof applies to sentencing proceedings.

*** Sec. 25.** AS 12.55.090(b) is amended to read:

(b) **Except as otherwise provided in (f) of this section, the** [THE] court may revoke or modify any condition of probation [,] or may change the period of probation.

*** Sec. 26.** AS 12.55.090 is amended by adding a new subsection to read:

(f) Unless the defendant and the prosecuting authority agree at the probation revocation proceeding or other proceeding, the court may not reduce the specific period of probation, or the specific term of suspended incarceration except by the amount of incarceration imposed for a probation violation, if

(1) the sentence was imposed in accordance with a plea agreement under Rule 11, Alaska Rules of Criminal Procedure; and

(2) the agreement required a specific period of probation or a specific term of suspended incarceration.

*** Sec. 27.** AS 12.55.125(a) is amended to read:

(a) A defendant convicted of murder in the first degree or murder of an unborn child under AS 11.41.150(a)(1) shall be sentenced to a definite term of imprisonment of at least 20 years but not more than 99 years. A defendant convicted of murder in the first degree shall be sentenced to a mandatory term of imprisonment of 99 years when

(1) the defendant is convicted of the murder of a uniformed or otherwise clearly identified peace officer, firefighter, or correctional employee who was engaged in the performance of official duties at the time of the murder;

(2) the defendant has been previously convicted of

(A) murder in the first degree under AS 11.41.100 or former AS 11.15.010 or 11.15.020;

(B) murder in the second degree under AS 11.41.110 or former AS 11.15.030; or

(C) homicide under the laws of another jurisdiction when the offense of which the defendant was convicted contains elements similar to first degree murder under AS 11.41.100 or second degree murder under AS 11.41.110;

(3) [THE COURT FINDS BY CLEAR AND CONVINCING EVIDENCE THAT] the defendant subjected the murder victim to substantial physical torture;

(4) the defendant is convicted of the murder of and personally caused the death of a person, other than a participant, during a robbery; or

(5) [THE COURT FINDS BY CLEAR AND CONVINCING EVIDENCE THAT] the defendant is a peace officer who used the officer's authority as a peace officer to facilitate the murder.

*** Sec. 28.** AS 12.55.125 is amended by adding a new subsection to read:

(p) If the state seeks either (1) the imposition of a sentence under (a) of this

section that would preclude the defendant from being awarded a good time deduction under AS 33.20.010(a) based on a fact other than a prior conviction; or (2) to establish a fact that would increase the presumptive sentencing range under (c)(2), (d)(2), (e)(4), (i)(1)(A) or (B), or (i)(2)(A) or (B) of this section, the factual question required to be decided shall be presented to a trial jury and proven beyond a reasonable doubt under procedures set by the court, unless the defendant waives trial by jury and either stipulates to the existence of the fact or consents to have the fact proven to the court sitting without a jury. Written notice of the intent to establish a fact under this subsection must be served on the defendant and filed with the court as provided for notice under AS 12.55.155(f)(2).

*** Sec. 29.** AS 12.55.155 is amended by adding new subsections to read:

(i) If the state seeks to establish a factor in aggravation at sentencing under (c)(10) of this section,

(1) the assessment of the facts underlying the state's allegation that the defendant's conduct was among the most serious included in the definition of the offense shall be made by the trial jury under procedures set by the court and as provided in (f)(2) of this section, unless the defendant waives trial by jury, stipulates to the existence of the aggravating factor or to the facts alleged by the state, or consents to have the assessment proved under procedures set out in (f)(1) of this section; factual assertions underlying the state's allegation that the defendant's conduct was among the most serious included in the definition of the offense must be proved beyond a reasonable doubt;

(2) the legal decision concerning whether the defendant's conduct determined under (1) of this subsection was among the most serious included in the definition of the offense shall be made by the court under procedures set out in (f)(1) of this section.

(j) If one of the aggravating factors in (c) of this section is established as provided in (f)(1) and (2) of this section, the court may increase the term of imprisonment up to the maximum term of imprisonment. Any additional aggravating factor may then be established by clear and convincing evidence by the court sitting without a jury, including an aggravating factor that the jury has found not to have been

established beyond a reasonable doubt.

* **Sec. 30.** AS 33.05.050 is amended to read:

Sec. 33.05.050. Report of probation officer. When directed by the court, the probation officer shall report to the court [,] with a statement of the conduct of the probationer while on probation. **Except as otherwise provided by law, the** [THE] court may then discharge the probationer from further supervision and may terminate the proceedings against the probationer, or may extend the probation, as shall seem advisable.

* **Sec. 31.** AS 33.05.070(b) is amended to read:

(b) As speedily as possible after arrest, the probationer shall be taken before the court for the district having jurisdiction over the probationer. **Except as provided in AS 12.55.090(f),** [THEREUPON] the court may revoke the probation and require the probationer to serve the sentence imposed [,] or any lesser sentence [,] and, if imposition of sentence was suspended, may impose any sentence **that** [WHICH] might originally have been imposed, subject to the limitation specified in AS 12.55.086(c).

* **Sec. 32.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DIRECT COURT RULE AMENDMENT. The Alaska Rules of Criminal Procedure are amended by adding a new section to read:

Rule 38.3. Video Conference Testimony. (a) **In General.** In every trial, the testimony of witnesses shall be taken in open court, unless otherwise provided by statute or rule.

(b) **Testimony by Video Conference.** The parties may agree to take testimony from a witness at trial by contemporaneous two-way video conference presented in open court. Absent the parties' agreement, the court may authorize the contemporaneous two-way video conference testimony of a witness if

(1) the requesting party establishes that testimony by two-way video conference is necessary to further an important public policy;

(2) the requesting party establishes that the witness is unavailable; and

(3) the testimony is given under oath and subject to cross-examination.

(c) **Procedures for Taking Video Conference Testimony.** If the trial court authorizes video conference testimony under (b) of this rule, it shall determine the procedures for taking the contemporaneous two-way video conference testimony. The parties, the court, the trier of fact, and the public must be able to see and hear the witness; and the witness must see and hear the courtroom proceedings, including the defendant, as if the witness were sitting in the courtroom's witness stand. The persons who are present with the witness must be identified. The parties may move to exclude any person other than the video conference technician from the witness's presence; the court, in its discretion, may exclude a person other than the video conference technician from the presence of the witness.

(d) **Definitions.**

(1) Contemporaneous Two-Way Video Conference. Contemporaneous two-way video conference means a conference among people at different places by means of transmitted audio and video signals. It includes all communication technologies that allow two or more places to interact by two-way video and audio transmissions simultaneously.

(2) Unavailable. In this rule, a witness is unavailable if

(A) by clear and convincing evidence the court finds under Rule 804(a)(4) or (5), Alaska Rules of Evidence, or Rule 15(e)(4), Alaska Rules of Criminal Procedure, that the witness is unavailable;

(B) by clear and convincing evidence the court finds that under the circumstances the witness is unavailable; or

(C) the parties agree that the witness is unavailable.

*** Sec. 33.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE AMENDMENT. AS 12.55.125(p), enacted by sec. 28 of this Act, and AS 12.55.155(i) and (j), enacted by sec. 29 of this Act, have the effect of changing Rule 32.1, Alaska Rules of Criminal Procedure, by amending procedures for sentencing persons convicted of certain crimes.

*** Sec. 34.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 1 - 19, 25, and 26 of this Act apply to offenses committed on or after the effective date of this Act.

(b) Sections 20 - 24 and 27 - 33 of this Act apply to proceedings occurring on or after the effective date of this Act for offenses occurring before, on, or after the effective date of this Act.

*** Sec. 35.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. Sections 28 and 29 of this Act take effect only if sec. 33 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

*** Sec. 36.** This Act takes effect July 1, 2012.

CS FOR SENATE BILL NO. 110(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to human trafficking and sex trafficking, to punishment and fines for those offenses, and to peace officer powers to enforce human trafficking and sex trafficking laws in licensed premises; relating to conditions of probation in criminal cases involving sex offenses; including human trafficking in the first degree and sex trafficking in the first degree in the definition of 'serious felony offense' for the offense of conspiracy and including sex trafficking and online enticement of a minor in the definition of 'most serious felony' for sentencing; relating to prostitution and promoting prostitution; relating to the definition of 'sex offense'; including human trafficking and sex trafficking in the list of offenses that make hearings for certain delinquent minors public and require disclosure of the names of certain delinquent minors; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 04.06.110 is amended to read:

Sec. 04.06.110. Peace officer powers. The director and the persons employed for the administration and enforcement of this title may, with the concurrence of the commissioner of public safety, exercise the powers of peace officers when those powers are specifically granted by the board. Powers granted by the board under this section may be exercised only when necessary for the enforcement of the criminally punishable provisions of this title, regulations of the board, and other criminally punishable laws and regulations, including investigation of violations of laws against prostitution and **sex trafficking** [PROMOTING PROSTITUTION] described in **AS 11.66.100 - 11.66.135, human trafficking described in AS 11.41.355 - 11.41.365,** [AS 11.66.100 - 11.66.130] and laws against gambling, promoting gambling, and related offenses described in AS 11.66.200 - 11.66.280.

* **Sec. 2.** AS 04.11.370(a) is amended to read:

(a) A license or permit shall be suspended or revoked if the board finds

(1) misrepresentation of a material fact on an application made under this title or a regulation adopted under this title;

(2) continuation of the manufacture, sale, or service of alcoholic beverages by the licensee or permittee would be contrary to the best interests of the public;

(3) failure on the part of the licensee to correct a defect that constitutes a violation of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or other laws after receipt of notice issued by the board or its agent;

(4) conviction of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010;

(5) conviction of an agent or employee of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates a law, regulation, or ordinance;

(6) failure of the licensee to comply with the public health, fire, or safety laws and regulations in the state;

(7) use of the licensed premises as a resort for illegal possessors or users of narcotics, prostitutes, **human traffickers,** or **sex traffickers** [PROMOTERS OF PROSTITUTION]; in addition to any other legally competent evidence, the character of the premises may be proved by the general reputation of the premises in the community as a resort for illegal possessors or users of narcotics, prostitutes, **human traffickers,** or **sex traffickers** [PROMOTERS OF PROSTITUTION];

(8) occurrence of illegal gambling within the limits of the licensed premises;

(9) the licensee permitted a public offense involving moral turpitude to occur on the licensed premises;

(10) violation by a licensee of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010; or

(11) violation by an agent or employee of a licensee of a provision of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates the law, condition or restriction, regulation, or ordinance.

*** Sec. 3.** AS 11.31.120(h)(2) is amended to read:

(2) "serious felony offense" means an offense

(A) against the person under AS 11.41, punishable as an unclassified or class A felony;

(B) involving controlled substances under AS 11.71, punishable as an unclassified, class A, or class B felony;

(C) that is criminal mischief in the first degree under AS 11.46.475; [OR]

(D) that is terroristic threatening in the first degree under

AS 11.56.807;

(E) that is human trafficking in the first degree under AS 11.41.355; or

(F) that is sex trafficking in the first degree under AS 11.66.110.

* **Sec. 4.** AS 11.41 is amended by adding a new section to read:

Sec. 11.41.355. Human trafficking in the first degree. (a) A person commits the crime of human trafficking in the first degree if the person violates AS 11.41.360 by compelling or inducing another person to engage in sexual conduct, adult entertainment, or an act described in AS 11.41.455(a)(1) - (7), and the other person compelled or induced is under 18 years of age.

(b) Human trafficking in the first degree is an unclassified felony.

* **Sec. 5.** AS 11.41.360(a) is amended to read:

(a) A person commits the crime of human trafficking in the **second** [FIRST] degree if the person compels or induces another person to [COME TO THIS STATE TO] engage in sexual conduct, adult entertainment, or labor in the state by force or threat of force against any person, or by deception.

* **Sec. 6.** AS 11.41.360(c) is amended to read:

(c) Human trafficking in the **second** [FIRST] degree is a class A felony.

* **Sec. 7.** AS 11.41.365 is amended to read:

Sec. 11.41.365. Human trafficking in the third [SECOND] degree. (a) A person commits the crime of human trafficking in the **third** [SECOND] degree if the person obtains a benefit from the commission of human trafficking under **AS 11.41.355 or 11.41.360** [AS 11.41.360,] with reckless disregard that the benefit is a result of the trafficking.

(b) Human trafficking in the **third** [SECOND] degree is a class B felony.

* **Sec. 8.** AS 11.41.370 is amended by adding new paragraphs to read:

(4) "adult entertainment" means the conduct described in AS 23.10.350(f)(1) - (3);

(5) "sexual conduct" has the meaning given in AS 11.66.150.

* **Sec. 9.** AS 11.66.100(b) is amended to read:

(b) **Except as provided in (c) of this section, prostitution** [PROSTITUTION] is a class B misdemeanor.

*** Sec. 10.** AS 11.66.100 is amended by adding a new subsection to read:

(c) Prostitution is a class C felony if

(1) the person described in (a)(1) of this section is under 18 years of age; the age of the person is a circumstance that does not require proof of a culpable mental state; and

(2) the person described in (a)(2) of this section is 18 years of age or older and at least three years older than the person described in (a)(1) of this section.

*** Sec. 11.** AS 11.66.110(a) is amended to read:

(a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the first degree if the person

(1) induces or causes a person to engage in prostitution through the use of force;

(2) as other than a patron of a prostitute, induces or causes a person under 18 years of age to engage in prostitution; or

(3) induces or causes a person in that person's legal custody to engage in prostitution.

*** Sec. 12.** AS 11.66.110(c) is amended to read:

(c) Except as provided in (d) of this section, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree is a class A felony.

*** Sec. 13.** AS 11.66.120 is amended to read:

Sec. 11.66.120. Sex trafficking [PROMOTING PROSTITUTION] in the second degree. (a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the second degree if the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a prostitution enterprise other than a place of prostitution;

(2) procures or solicits a patron for a prostitute; or

(3) offers, sells, advertises, promotes, or facilitates travel that includes commercial sexual conduct as enticement for the travel; in this paragraph, "commercial sexual conduct" means sexual conduct for which anything of value is

given or received by any person.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the second degree is a class B felony.

* **Sec. 14.** AS 11.66.130 is amended to read:

Sec. 11.66.130. Sex trafficking [PROMOTING PROSTITUTION] in the third degree.

(a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the third degree if, with intent to promote prostitution, the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a place of prostitution;

(2) as other than a patron of a prostitute, induces or causes a person 18 years of age or older to engage in prostitution;

(3) as other than a prostitute receiving compensation for personally rendered prostitution services, receives or agrees to receive money or other property **under** [PURSUANT TO] an agreement or understanding that the money or other property is derived from prostitution; or

(4) engages in conduct that institutes, aids, or facilitates a prostitution enterprise.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the third degree is a class C felony.

* **Sec. 15.** AS 11.66.135 is amended to read:

Sec. 11.66.135. Sex trafficking [PROMOTING PROSTITUTION] in the fourth degree. (a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the fourth degree if the person engages in conduct that institutes, aids, or facilitates prostitution under circumstances not proscribed under AS 11.66.130(a)(4).

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the fourth degree is a class A misdemeanor.

* **Sec. 16.** AS 11.81.250(a) is amended to read:

(a) For purposes of sentencing under AS 12.55, all offenses defined in this

title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355,** and kidnapping, are classified on the basis of their seriousness, according to the type of injury characteristically caused or risked by commission of the offense and the culpability of the offender. Except for murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355,** and kidnapping, the offenses in this title are classified into the following categories:

(1) class A felonies, which characteristically involve conduct resulting in serious physical injury or a substantial risk of serious physical injury to a person;

(2) class B felonies, which characteristically involve conduct resulting in less severe violence against a person than class A felonies, aggravated offenses against property interests, or aggravated offenses against public administration or order;

(3) class C felonies, which characteristically involve conduct serious enough to deserve felony classification but not serious enough to be classified as A or B felonies;

(4) class A misdemeanors, which characteristically involve less severe violence against a person, less serious offenses against property interests, less serious offenses against public administration or order, or less serious offenses against public health and decency than felonies;

(5) class B misdemeanors, which characteristically involve a minor risk of physical injury to a person, minor offenses against property interests, minor

offenses against public administration or order, or minor offenses against public health and decency;

(6) violations, which characteristically involve conduct inappropriate to an orderly society but which do not denote criminality in their commission.

*** Sec. 17.** AS 12.55.035(b) is amended to read:

(b) Upon conviction of an offense, a defendant who is not an organization may be sentenced to pay, unless otherwise specified in the provision of law defining the offense, a fine of **not** [NO] more than

(1) $500,000 for murder in the first or second degree, attempted murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, kidnapping, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355** or misconduct involving a controlled substance in the first degree;

(2) $250,000 for a class A felony;

(3) $100,000 for a class B felony;

(4) $50,000 for a class C felony;

(5) $10,000 for a class A misdemeanor;

(6) $2,000 for a class B misdemeanor;

(7) $500 for a violation.

*** Sec. 18.** AS 12.55.085(f) is amended to read:

(f) The court may not suspend the imposition of sentence of a person who

(1) is convicted of a violation of AS 11.41.100 - 11.41.220, 11.41.260 - 11.41.320, **11.41.355 - 11.41.365** [11.41.360 - 11.41.370], 11.41.410 - 11.41.530, AS 11.46.400, or AS 11.61.125 - 11.61.128;

(2) uses a firearm in the commission of the offense for which the person is convicted; or

(3) is convicted of a violation of AS 11.41.230 - 11.41.250 or a felony and the person has one or more prior convictions for a misdemeanor violation of AS 11.41 or for a felony or for a violation of a law in this or another jurisdiction having similar elements to an offense defined as a misdemeanor in AS 11.41 or as a

felony in this state; for the purposes of this paragraph, a person shall be considered to have a prior conviction even if that conviction has been set aside under (e) of this section or under the equivalent provision of the laws of another jurisdiction.

*** Sec. 19.** AS 12.55.185(10) is amended to read:

(10) "most serious felony" means

(A) arson in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **online enticement of a minor,** or any unclassified or class A felony prescribed under AS 11.41; or

(B) an attempt, or conspiracy to commit, or criminal solicitation under AS 11.31.110 of, an unclassified felony prescribed under AS 11.41;

*** Sec. 20.** AS 12.55.125(i) is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, **sex trafficking** [OR PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree under AS 11.41.355** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the

defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) unlawful exploitation of a minor under AS 11.41.455(c)(2), online enticement of a minor under AS 11.41.452(e), or attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, **sex trafficking** [OR PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree under AS 11.41.355** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is

not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, online enticement of a minor under AS 11.41.452(d), unlawful exploitation of a minor under AS 11.41.455(c)(1), or distribution of child pornography under AS 11.61.125(e)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, distribution of child pornography under AS 11.61.125(e)(1), or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not

involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years.

*** Sec. 21.** AS 12.63.100(6) is amended to read:

(6) "sex offense" means

(A) a crime under AS 11.41.100(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit a sexual offense, or a similar offense under the laws of the other jurisdiction; in this subparagraph, "sexual offense" has the meaning given in AS 11.41.100(a)(3);

(B) a crime under AS 11.41.110(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit one of the following crimes, or a similar law of another jurisdiction:

(i) sexual assault in the first degree;

(ii) sexual assault in the second degree;

(iii) sexual abuse of a minor in the first degree; or

(iv) sexual abuse of a minor in the second degree; or

(C) a crime, or an attempt, solicitation, or conspiracy to commit a crime, under the following statutes or a similar law of another jurisdiction:

(i) AS 11.41.410 - 11.41.438;

(ii) AS 11.41.440(a)(2);

(iii) AS 11.41.450 - 11.41.458;

(iv) AS 11.41.460 if the indecent exposure is before a person under 16 years of age and the offender has a previous conviction for that offense;

(v) AS 11.61.125 - 11.61.128;

(vi) AS 11.66.110 or 11.66.130(a)(2) if the person who was induced or caused to engage in prostitution was 16 or 17 years of age at the time of the offense;

(vii) former AS 11.15.120, former 11.15.134, or assault with the intent to commit rape under former AS 11.15.160, former

AS 11.40.110, or former 11.40.200; [OR]

(viii) AS 11.61.118(a)(2) if the offender has a previous conviction for that offense;

(ix) human trafficking in the first degree under AS 11.41.355;

*** Sec. 22.** AS 15.80.010(9) is amended to read:

(9) "felony involving moral turpitude" includes those crimes that are immoral or wrong in themselves such as murder, manslaughter, assault, sexual assault, sexual abuse of a minor, unlawful exploitation of a minor, robbery, extortion, coercion, kidnapping, incest, arson, burglary, theft, forgery, criminal possession of a forgery device, offering a false instrument for recording, scheme to defraud, falsifying business records, commercial bribe receiving, commercial bribery, bribery, receiving a bribe, perjury, perjury by inconsistent statements, endangering the welfare of a minor, escape, promoting contraband, interference with official proceedings, receiving a bribe by a witness or a juror, jury tampering, misconduct by a juror, tampering with physical evidence, hindering prosecution, terroristic threatening, riot, criminal possession of explosives, unlawful furnishing of explosives, **sex trafficking, human trafficking** [PROMOTING PROSTITUTION], criminal mischief, misconduct involving a controlled substance or an imitation controlled substance, permitting an escape, promoting gambling, possession of gambling records, distribution of child pornography, and possession of child pornography;

*** Sec. 23.** AS 28.15.046(c) is amended to read:

(c) The department may not issue a license under this section to an applicant who has been convicted of any of the following offenses within 20 years of the time of application:

(1) sexual abuse of a minor in any degree under AS 11.41.434 - 11.41.440;

(2) sexual assault in any degree under AS 11.41.410 - 11.41.425;

(3) incest under AS 11.41.450;

(4) unlawful exploitation of a minor under AS 11.41.455;

(5) contributing to the delinquency of a minor under AS 11.51.130;

(6) a felony involving possession of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(7) a felony or misdemeanor involving distribution of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(8) **sex trafficking** [PROMOTING PROSTITUTION] in the first or second degree under AS 11.66.110 or 11.66.120;

(9) indecent exposure in the first or second degree under AS 11.41.458 or 11.41.460**;**

(10) human trafficking in the first degree under AS 11.41.355.

*** Sec. 24.** AS 47.12.110(d) is amended to read:

(d) Notwithstanding (a) of this section, a court hearing on a petition seeking the adjudication of a minor as a delinquent shall be open to the public, except as prohibited or limited by order of the court, if

(1) the department files with the court a motion asking the court to open the hearing to the public, and the petition seeking adjudication of the minor as a delinquent is based on

(A) the minor's alleged commission of an offense, and the minor has knowingly failed to comply with all the terms and conditions required of the minor by the department or imposed on the minor in a court order entered under AS 47.12.040(a)(2) or 47.12.120;

(B) the minor's alleged commission of

(i) a crime against a person that is punishable as a felony;

(ii) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(iii) arson under AS 11.46.400 - 11.46.410;

(iv) burglary under AS 11.46.300;

(v) distribution of child pornography under AS 11.61.125;

(vi) **sex trafficking** [PROMOTING PROSTITUTION]

in the first degree under AS 11.66.110; [OR]

(vii) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; or

(viii) human trafficking in the first degree under AS 11.41.355; or

(C) the minor's alleged commission of a felony and the minor was 16 years of age or older at the time of commission of the offense when the minor has previously been convicted or adjudicated a delinquent minor based on the minor's commission of an offense that is a felony; or

(2) the minor agrees to a public hearing on the petition seeking adjudication of the minor as a delinquent.

*** Sec. 25.** AS 47.12.315(a) is amended to read:

(a) Notwithstanding AS 47.12.310, when an agency takes action under AS 47.12.040(a)(1) to adjust a matter, or when, under AS 47.12.040(a)(2), the court directs the agency to adjust the matter, the agency

(1) shall, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense, if the minor was, under AS 47.12.020, previously alleged to be a delinquent minor on the basis of the minor's commission of at least one offense and, on the basis of that allegation, a state agency has, under AS 47.12.040(a), been asked to make a preliminary inquiry to determine if any action on that matter is appropriate, and, if the minor is alleged to be a delinquent minor on the basis of the minor's commission of another offense, exercise of agency jurisdiction is based on the minor's alleged commission of that other offense, and that other offense is one of the following:

(A) a crime against a person that is punishable as a felony;

(B) a crime in which the minor employed a deadly weapon, as

that term is defined in AS 11.81.900(b), in committing the crime;

(C) arson under AS 11.46.400 - 11.46.410;

(D) burglary under AS 11.46.300;

(E) distribution of child pornography under AS 11.61.125;

(F) **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110; [OR]

(G) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; **or**

(H) human trafficking in the first degree under AS 11.41.355; and

(2) may, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense if the minor has knowingly failed to comply with all terms and conditions required of the minor by the agency to adjust the matter under AS 47.12.060(b).

* **Sec. 26.** AS 11.41.360(b)(1) and 11.41.360(b)(3) are repealed.

* **Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 1, 2, 11 - 15, and 22 - 25 of this Act apply to offenses committed before, on, or after the effective date of the Act.

(b) Sections 3 - 10, 16 - 21, and 26 of this Act apply to offenses committed on or after the effective date of this Act.

* **Sec. 28.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the catch line of AS 11.66.110 from "Promoting prostitution in the first degree" to "Sex trafficking in the first degree."

* **Sec. 29.** This Act takes effect July 1, 2012.

MEMORANDUM

Date: March 15, 2012

TO: Leg Legal

FROM: Cindy Smith

RE: CS drafting request SB 218 (GS2627\A)

Please provide a Judiciary CS for SB 218 with the following changes:

1. Delete sections 1-3, Sections 5-11, Section 14, Sections 17–24, plus any appropriate applicability provisions.

2. Add all provisions of SB 186 LS0811\I.

3. Add amendment I.1 to SB 186 LS0811.I

4. Make all necessary conforming and title changes.

The Honorable Hollis French, Chair
Senate Judiciary Committee
State Capitol Room 417
Juneau, AK 99801

Re: Senate Bill 218 – relating to sex crimes and video conferencing

Dear Chair French:

Senate Bill 218 has been assigned to the Senate Judiciary Committee for your consideration. The Department of Law respectfully requests a hearing in the Judiciary Committee on the bill at your earliest convenience. SB 218 builds on and refines legislation enacted over the past several years to address serious problems of sexual exploitation of children and other victims.

A sectional analysis that describes each section of the bill is attached. I expect Annie Carpeneti, Legislative Liaison from the Department of Law, Criminal Division and representatives from the Department of Public Safety will testify regarding this legislation. Experienced law enforcement officers will also be available if needed.

Thank you for your consideration of this request.

Sincerely

Michael C. Geraghty
Attorney General

SENATE BILL 218
SEX TRAFFICKING AND HUMAN TRAFFICKING
SECTIONAL ANALYSIS

The increased scrutiny of crimes related to promoting prostitution of children in Alaska has prompted the proposed change in terminology from promoting prostitution to sex trafficking. There are good reasons for this change. First, a child who is put into prostitution by an adult should be considered and described as a victim, not a prostitute. The change in terminology will encourage this change. Second, a majority of law enforcement officers now refer to the crime of promoting prostitution of children as sex trafficking. Changing Alaska law will facilitate better communication and understanding.

Sections 1, 2, 7 -- 11, 14, 17 – 19, and 21 -- 24 change the statutes prohibiting promoting prostitution to prohibiting sex trafficking. The elements of the offenses remain the same. These sections also make conforming amendments to other laws that currently refer to the crime of promoting prostitution so that they cross-reference sex trafficking.

Section 3 adds the crimes of human trafficking in the first degree and sex trafficking in the first degree to the felonies described as "serious felony offenses" in the state's conspiracy law, AS 11.21.120. This change would enable the state to investigate and potentially prosecute offenders who work with other people to plan and engage in human trafficking or sex trafficking.

Section 4 amends the crime of distribution of indecent materials to minors, AS 11.61.128. This proposed amendment is in response to the recent decision by a federal district court judge holding the current version of the statute to be unconstitutional in violation of the first amendment, because it applies to conduct that is constitutionally protected. In response to the decision that the current law is overbroad, the bill would require that the state prove the defendant intentionally distributed, or possessed with intent to distribute, harmful material to another person that the offender knows is under 16 years of age or believes is under 16 years of age.

Sections 5 and 6 raise the penalty for being a patron of a prostitute, if the prostitute is a minor under 18 years of age, from a class B misdemeanor to a class C felony. It also specifies the legislative intent that the age of the prostitute is a circumstance that does not require proof of a culpable mental state.

Section 12: Under current law, no corroboration is required of the testimony of an alleged victim in a prosecution for promoting prostitution (sex trafficking) in the first, second, and third

degrees. The bill adds the crime of promoting prostitution (sex trafficking) in the fourth degree to those crimes that do not require corroboration of the testimony of an alleged victim.

Section 13: Under current law property used to facilitate or derived from a crime of promoting prostitution (sex trafficking) is subject to forfeiture. The bill adds the crime of prostitution to these crimes. Under the bill property used to facilitate or derived from the crime of prostitution would be subject to forfeiture.

Section 15 corrects an error in AS 11.81.250(b). Under current law the crime of promoting prostitution (sex trafficking) in the first degree under AS 11.66.110(a)(2) – where the person promoted is a child – is an unclassified felony. The bill adds this offense to the other offenses described as unclassified felonies in Alaska law.

Section 16 allows the testimony of a witness in a hearing addressing the competency of a defendant for being tried for a crime by way of contemporaneous two-way video conference. It allows this testimony if the witness would be required to travel more that 50 miles to attend the hearing in person or if the witness lives in a place where people customarily travel by air to the court site.

Section 19, in addition to conforming the definition of most serious felony to the changes in the sex trafficking provisions, also corrects an omission in the definition of most serious felony by including online enticement of a minor in the definition.

Section 20 adds a new provision to sex offender registration law that requires a person present in Alaska, who is convicted of an offense out of state that requires registration in that jurisdiction, to register in Alaska. This requirement would apply even if Alaska does not have a criminal provision similar to the crime in the other state that requires registration there. A person would be required to register for 15 years if convicted of one offense, and for life if convicted for two or more offenses.

Section 25 adopts Rule 38.3, Alaska Rules of Criminal Procedure, addressing the use of testimony by contemporaneous two-way video conference. It would allow this testimony if the parties agree to its use. If the parties do not agree, it would allow contemporaneous two-way video conference testimony if the court finds that its use is necessary to further an important public policy, the witness is unavailable, and the testimony is given under oath and is subject to cross-examination.

Section 26 addresses the applicability of the changes described above.

Section 27 is an instruction to the revisor of statutes regarding the heading of AS 11.66.110.

Section 28 provides for an effective date of July 1, 2012.

(Revised 8/17/2011 OMB)

STATE OF ALASKA **BILL NO.** SB 218
2012 LEGISLATIVE SESSION

Analysis

The bill changes the description of the crime of promoting prostitution under AS 11.66.110 – 11.66.135 from promoting prostitution in the first, second, third, and fourth degrees to sex trafficking in the first, second, third, and fourth degrees.

It adds the crimes of human trafficking in the first degree and sex trafficking in the first degree to the definition of "serious felony offense" under the conspiracy law.

The bill amends the crime of distribution of indecent materials to minors under AS 11.61.128 in response to the judicial decision that the current law is unconstitutional due to over breadth by requiring the prosecution to prove that the offender intentionally distributed, or possessed with the intent to distribute, harmful material to another person that the offender knows is under 16 years of age or believes is under 16 years of age.

It adopts a procedure for contemporaneous two-way videoconference in criminal trials where the court finds that it is necessary to further an important public policy, that the witness is unavailable, and the testimony is given under oath and subject to cross-examination. The bill would also allow contemporaneous two-way videoconference testimony in hearings addressing the competency of a defendant to be tried for criminal charges if the witness resides 50 or more miles away from the place of the hearing or the customary travel to the site of the hearing is by air.

The bill would require a person present in Alaska to register as a sex offender if the person is required to register as a sex offender in another jurisdiction.

STATE OF ALASKA **BILL NO.** SB 218
2012 LEGISLATIVE SESSION

Analysis

This proposed legislation would require a person who is required to register as a sex offender or child kidnapper in another jurisdiction to register in Alaska even if there is no substantive law in Alaska that is similar to the offense the person was convicted of.

For the department's Records & Identification bureau to continue to accomplish a core service of providing public access to current information regarding sex offenders in Alaska, the determination that a person must register as a sex offender or child kidnapper in Alaska because of their requirement to register in another jurisdiction must be made timely and must be based on information that has been validated.

Considerable research and analysis of the criminal history background of persons with sex offense convictions outside of Alaska would be required to determine whether the offense of conviction is a registerable offense under the current laws of that jurisdiction and whether or not the person is subject to that jurisdiction's registration requirements. Coordination with the jurisdiction's sex offender central registry office would need to occur to obtain source documents and other relevant information on the person.

Additionally, it is anticipated that the department would need to continually monitor the status of registration laws and legal cases affecting sex offender registration in all jurisdictions to ensure a person required to register in Alaska under proposed AS 12.63.100(6)(D) continued to be subject to the registration requirements of the jurisdiction that their offense was committed in.

The department anticipates that these additional efforts will require one new full-time Criminal Justice Planner position. This position would be responsible to review and evaluate offender records with out-of-state sex offense convictions to determine the requirement to register under proposed AS 12.63.100(6)(D), to coordinate with other jurisdictions' sex offender central registry offices, and to monitor sex offender registration laws in other jurisdictions and any changes for possible impact to currently registered offenders.

2012 LEGISLATIVE SESSION

BILL NO. SB 218

Analysis

This bill changes the name of the crime of "promoting prostitution" to "sex trafficking" in numerous sections in Alaska Statutes; makes changes to Alaska Statute to address recent court decisions regarding the distribution of indecent material to minors; adds AS 11.61.100 (Prostitution) to AS 11.66.145 (Forfeiture) relating to the forfeiture of property used in prostitution offenses; would define human trafficking and sex trafficking in the first degrees as serious felony offenses for purposes of the state conspiracy law; and requires a person who is required to register as a sex offender or child kidnapper in another jurisdiction to register in Alaska.

This bill will have no fiscal impact on the Division of Alaska State Troopers.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 218

Analysis

This bill changes the language used to describe conduct "promoting prostitution" to the phrase "sex trafficking," prohibits the intentional distribution of indecent material to persons known or believed to be less than 16 years of age, and prohibits possession with the intention to distribute indecent material to persons known or believed to be less than 16 years of age. This bill elevates the charge of prostitution from a B misdemeanor to an A misdemeanor if the subject person is under the age of 18. This bill includes "online enticement of a minor in the definition of "most serious felony." The bill also creates the crimes of: conspiracy to commit human trafficking, a class B felony which carries a sentence of up to 10 years imprisonment, and conspiracy to commit sex trafficking, a class A felony which carries a sentence of up to 20 years imprisonment. This bill amends the definition of "sex offense" for the purpose of sex offender registration requirements by including any conviction in another state that would require registration as a sex offender in that state.

Additionally, this bill amends Rule 38 of the Alaska Rules of Criminal Procedure by adding a new section that allows for testimony using two-way video conferencing. The bill also specifies that video conference testimony is allowed for witnesses whose testimony is used to determine competency of the defendant under this section, where the witness would be required to travel more than 50 miles to court, or where air travel to court is customary.

This bill will result in increases in felony cases and more complex sentencing for certain felonies. The Public Defender Agency does not have a reliable method for determining how many more persons may be charged for failing to register as a sex offender under the new definition or whether those charged would qualify for representation by the Public Defender. The Agency, therefore, submits an indeterminate fiscal note.

Date: 2/17/2012

(Revised 8/17/2011 OMB)

STATE OF ALASKA **BILL NO. SB 218**
2012 LEGISLATIVE SESSION

Analysis

This bill adds human trafficking in the first degree and sex trafficking in the first degree to the conspiracy statues (AS 11.31.120). A person convicted of this new crime would be subject to punishment for a Class B felony. The average sentence for a Class B felony is five years. The average daily cost of care in a DOC facility is $134.90. Therefore, one individual convicted of conspiring to commit sex trafficking in the first degree could cost the Department of Corrections $246,192.50 based on a five year *average* sentence.

In the past five years, DOC has seen an average of 2.4 convictions for promoting prostitution (sex trafficking). However, DOC does not have any historical data on conspiracy to commit sex or human trafficking, as this would be a new crime if this legislation were to pass. Therefore, DOC is currently unable to quanitfy the fiscal impacts of the passage of this legislation.

The Department will closely monitor the potential future fiscal impacts should this legislation pass.

Re: SB 218: Video Testimony and Sex Offender Registration
ACLU Review of Legal Issues

Dear Chair French and Vice-Chair Wielechowski:

Thank you for the opportunity to provide written testimony with respect to Senate Bill 218, which – amongst other provisions – permits judicial testimony by video conference and modifies the registration of sex offenders.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout Alaska who seek to preserve and expand the individual freedoms and civil liberties guaranteed by the United States and Alaska Constitutions. In that context, we wish to advise you of constitutional and policy issues with sections 16, 20, and 25 of the proposed legislation.

Section 16 Unconstitutionally Violates the Confrontation Clause

If enacted, Section 16 of SB 218 would permit, in the context of determining if a criminal defendant were mentally competent to stand trial, a witness, "including the psychiatrist or psychologist who examined the defendant," who would have to "travel more than 50 miles to the court or lives in a place from which people customarily travel by air to the court," to "testify

concerning the competency of the defendant by contemporaneous two-way video conference[.]"

Based on our review of court decisions, we believe the Alaska courts would likely rule that this provision violates the Confrontation Clauses of the federal and Alaska Constitutions. U.S. Const., Amend. VI ("In all criminal prosecutions, the accused shall enjoy the right . . . to be confronted with the witnesses against him"); Alaska Const., Art. I, § 11 ("In all criminal prosecutions, the accused shall have the right . . . to be confronted with the witnesses against him").

The U.S. Constitution's Confrontation Clause's "right to confront one's accusers is a concept that dates back to Roman times." *Crawford v. Washington*, 541 U.S. 36, 43 (2004). It is a "bedrock procedural guarantee" that "applies to both federal and state prosecutions." *Id.* at 42; *see Lemon v. State*, 514 P.2d 1151 (Alaska 1973).

This essential right serves four purposes: first, it "insures that the witness will give his statements under oath [by] impressing him with the seriousness of the matter," *Maryland v. Craig*, 497 U.S. 836, 846 (1990) (internal quotation omitted); second, it "ensur[es] that evidence admitted against an accused is reliable" by "forc[ing] the witness to submit to cross-examination, the greatest legal engine ever invented for the discovery of truth," *id.* (internal quotation omitted); third, it "permits the jury . . . to observe the demeanor of the witness in making his statement, thus aiding the jury in assessing his credibility," *id.* (internal quotation omitted); and fourth, it has a "strong symbolic purpose" of assuring everyone that the prosecution is fair, *id.* at 847. Confrontation "may confound and undo the false accuser, or reveal the child coached by a malevolent adult." *Id.* at 846–47 (internal quotation omitted).

Face-to-face confrontation is "the core of the values furthered by the Confrontation Clause," *id.* at 847 (internal quotation omitted) and "[t]he prosecution *must* produce . . . witnesses . . . against the defendant," *Melendez-Diaz v. Massachusetts*, 557 U.S. 305, 129 S. Ct. 2527, 2534 (2009) (emphasis in original). **The face-to-face confrontation may be denied only if, after a fact-based, "case-specific" inquiry, *Craig*, 497 U.S. at 855, a court determines that *"denial of such confrontation is necessary to further an important public policy and only where the reliability of the testimony is otherwise assured," id.* at 850 (emphasis added).**

The "necessary to further an important public policy" prong is not easily satisfied. While juvenile victims of sexual violence may be exempted from personally confronting the accused, the denial of face-to-face confrontation is only justified if "it is the presence of the defendant that causes the trauma." *Id.* at 856. But, even the desire to have a child witness avoid "courtroom trauma generally" is insufficient to deny face-to-face confrontation "because the child could be permitted to testify in less intimidating surroundings, albeit with the defendant present." *Id.* And, the court must determine that "the emotional distress . . . is more than *de minimis*, *i.e.*, more than mere nervousness or excitement or some reluctance to testify." *Id.* (internal quotation omitted);

Blume v. State, 797 P.2d 664, 674 (Alaska Ct. App. 1990). **Simple need for a witness's testimony,[1] expediency,[2] efficiency,[3]** security,[4] **"convenience and cost-saving,"[5]** and a desire not to leave a severely ill, elderly spouse's side[6] **do not satisfy *Craig*'s important public policy test** nor justify avoiding face-to-face in-person confrontation.[7]

While no court has squarely addressed if "the [federal] Confrontation Clause applies to pretrial competency hearings," *United States v. Hamilton*, 107 F.3d 499, 504 (7th Cir. 1997), such as those in Alaska Stat. § 12.47.100, an Alaska court might hold that the federal and state Confrontation Clauses do. West Virginia holds that a defendant is entitled to face-to-face confrontation in pretrial hearings to determine whether to transfer his case from juvenile to criminal court, *State v. Gary F.*, 432 S.E.2d 793, 800 (W. Va. 1993), and Pennsylvania applies the Confrontation Clauses to pretrial suppression hearings, *Commonwealth v. Atkinson*, 987 A.2d 743, 746 (Pa. Super. Ct. 2009).

The touchstone of a court's inquiry would be the Confrontation Clauses' purpose in a competency hearing. A competency hearing is "critically important," *see Gary F.*, 432 S.E.2d at 801, and "an adversarial proceeding and a critical stage in a criminal proceeding . . . . at which substantive rights may be preserved or lost," *Atkinson*, 987 A.2d at 747 (internal quotation omitted). Indeed, the competency hearing is how the court determines if a "defendant is unable to understand the proceedings against [him] or to assist in [his] own defense," and if not, the defendant "may not be tried, convicted, or sentenced for the commission of a crime so long as the incompetency exists." Alaska Stat. § 12.47.100(a). The court decides this issue through an adversarial process and "[t]he party raising the issue of competency bears the burden of proving the defendant is incompetent by a preponderance of the evidence." *Id.* at § 12.47.100(c).

The court bases its decision on the testimony of "at least one qualified psychiatrist or psychologist," *id.* at § 12.47.100(b), but the scientific expertise of the witness does not affect the

---

[1] *United States v. Yates*, 438 F.3d 1307, 1316 (11th Cir. 2006) (en banc).

[2] *Id.*

[3] *Commonwealth v. Atkinson*, 987 A.2d 743, 750 (Pa. Super. Ct. 2009).

[4] *Id.*

[5] *Id.* at 751.

[6] *Bush v. State*, 193 P.3d 203, 216 (Wyo. 2008).

[7] In *Melendez-Diaz*, the U.S. Supreme Court directly faced a request to "relax the requirements of the Confrontation Clause to accommodate the 'necessities of trial and the adversary process.'" *Melendez-Diaz*, 129 S. Ct. at 2540. The Court rejected this proposal because "[i]t is not clear whence we would derive the authority to do so. The Confrontation Clause may make the prosecution of criminals more burdensome, but that is equally true of the right to trial by jury and the privilege against self-incrimination. The Confrontation Clause – like those other constitutional provisions – is binding, and we may not disregard it at our convenience." *Id.* "It is a truism that constitutional protections have costs." *Coy v. Iowa*, 487 U.S. 1012, 1020 (1988).

Confrontation Clause analysis. "The prosecution *must* produce . . . witnesses . . . against the defendant," *Melendez-Diaz*, 129 S. Ct. at 2534 (emphasis in original), even if the witnesses are scientists offering forensic analysis. "Confrontation is one means of assuring accurate forensic analysis. . . . Confrontation is designed to weed out not only the fraudulent analyst, but the incompetent one as well." *Id.* at 2536–37. "[T]here is not a third category of witnesses, helpful to the prosecution, but somehow immune from confrontation." *Id.* at 2534.[8] **The importance of a pretrial competency hearing, with an adversarial process to determine critical rights, likely requires the full protections of the Confrontation Clauses.**

In conducting its inquiry of Section 16, an Alaska court will rely on the *Craig* test. *Blume*, 797 P.2d at 674; *Reutter v. State*, 886 P.2d 1298, 1307 (Alaska Ct. App. 1994) (using *Craig* to evaluate Alaska Stat. § 12.45.046, which allows child victims to testify via closed-circuit television).[9] Using the *Craig* test, **the Eight and Eleventh federal circuits determined "[t]he simple truth is that confrontation through a video monitor is not the same as physical face-to-face confrontation. . . . the two are not constitutionally equivalent."** *United States v. Yates*, 438 F.3d 1307, 1315 (11th Cir. 2006) (en banc), (emphasis added). **The Confrontation Clause "is most certainly compromised when the confrontation occurs though an electronic medium. Indeed, no court that has considered the question has found otherwise[.]"** *Id.* **"The virtual 'confrontations' offered by closed-circuit television systems fall short of the face-to-face standard because they do not provide the same truth-inducing effect."** *United States v. Bordeaux*, 400 F.3d 548, 554 (8th Cir. 2005).

Given (1) the criticism of two-way video testimony and (2) that the supposed benefits of Section 16, such as cost-savings, convenience, and efficiency, do not rise to an "important public policy," a court would likely conclude that Section 16 violates the federal and Alaska Confrontation Clauses. This is especially true because **the Alaska Supreme Court has expressly reserved its ability to interpret the Alaska Confrontation Clause more broadly than the federal one**, *Lemon*, 514 P.2d at 1154 n.5,[10] and because it has "the authority and, when necessary, duty to construe the provisions of the Alaska Constitution to provide greater protections than those arising out of the identical federal clauses," *Doe v. State*, 189 P.3d 999, 1005 (Alaska 2008).

This conclusion is even more inexorable given the Alaska Supreme Court's long-standing recognition that one of the "vital interests" of the Confrontation Clauses is to "enable[] the

---

[8] The two categories of witnesses are "those against the defendant and those in his favor. The prosecution *must* produce the former; the defendant *may* call the latter." *Melendez-Diaz*, 129 S. Ct. at 2534 (emphasis in original).

[9] The Sixth, Eighth, Ninth, Tenth, and Eleventh federal circuits apply the *Craig* test to evaluate two-way video conference testimony. *Yates*, 438 F.3d at 1313 (listing cases).

[10] The supreme courts of Illinois and Pennsylvania each interpreted their state Confrontation Clause more broadly than the federal one and each concluded that their state Clauses prohibit testimony by closed-circuit television. *People v. Fitzpatrick*, 633 N.E.2d 685, 688 (Ill. 1994); *Commonwealth v. Ludwig*, 594 A.2d 281, 281–82 (Pa. 1991).

defendant to demonstrate to the jury the witnesses' demeanor when confronted by the defendant so that the inherent veracity of the witness is displayed in the crucible of the courtroom," *Lemon*, 514 P.2d at 1153, and that testimony via video may alter "impressions of the witness' demeanor and credibility," *Stores v. State*, 625 P.2d 820, 828 (Alaska 1980).[11]

Even if a court did not completely overturn Section 16, that Section "must be construed to incorporate the requirements of *Craig*." *Reutter*, 886 P.2d at 1307. *Craig* would require that a court permit video testimony only if it "is necessary to further an important public policy," *Craig*, 497 U.S. at 850, which, as noted above, does not include efficiency, speed, convenience, or cost-savings. **At best, Section 16 would be functionally overturned because it would be the rare situation when the need for video testimony in a competency hearing satisfied *Craig*.**[12]

Section 25 Should Be Improved to Enhance Witnesses' Reliability and to Strengthen Its Constitutionality

Section 25's proposed addition to the Alaska Rules of Criminal Procedure tracks *Craig* and so it is likely secure from federal constitutional challenge.[13] **It should, however, be altered to enhance witnesses' reliability and to further buttress its presumed constitutionality.**

Craig and other courts note that the Confrontation Clause increases witnesses' reliability by exposing witness coaching. *E.g. Craig*, 497 U.S. at 847 (face-to-face confrontation may "reveal the child coached by a malevolent adult") (internal quotations omitted). Subpart (c) of Section 25 puts the onus on the parties to "move to exclude any person other than the video conference technician from the witness's presence[.]"

Given that witnesses who testify via video are more able to be coached (because someone in the video room, rather than in the courtroom, with the witness, may more easily coach him) and any coaching is harder to detect, **the Committee should amend the Rule and establish a default of**

---

[11] Video testimony causes the "most serious . . . [e]vidence distortion . . . because the picture conveyed may influence a juror's feelings about guilt or believability. . . . Variations in lens or angle, may result in failure to convey subtle nuances, including changes in witness demeanor such as a nervous twitch or paling and blushing in response to an important question . . . Furthermore, the camera itself is selective of what it relates to the viewer. Transmission of valuable first impressions may be impossible, and off-camera evidence is necessarily excluded while the focus is on another part of the body or another witness." *Stores*, 625 P.2d at 828 n.25.

[12] This analysis focused on Section 16's unconstitutionality, but the Committee should also consider practical problems with video testimony, such as the difficulties of having the witness physically use and interact with exhibits, counsel, and the court.

[13] Alaska courts could conclude, however, that the Rule violates the Alaska Confrontation Clause. *Lemon*, 514 P.2d at 1154 n.5

having just the video technician in the room with the witness, but permitting the parties to move to allow others to be present with him. To further caution against coaching, the Committee should also add a provision that a second camera should transmit to the courtroom a live feed of what the witness sees.[14]

Section 20 Is Unwise; It Shackles Alaska's Policy to Outside Jurisdictions

Section 20 adds a requirement that anyone who has been convicted of "a crime in another jurisdiction that requires the person to register as a sex offender or child kidnapper in that jurisdiction" must register with the Alaska sex offender registry. Alaska Stat. § 12.63.100(6) currently ensures that out-of-state offenders register in Alaska if they "committed or attempted to commit" one of Alaska Stat. § 12.63.100(6)'s offenses or "a similar offense [or] law of another jurisdiction." Section 20, then, serves only to unpin the Alaska registry from Alaska crimes and Alaska public policy.

This concern is not academic. Other states require registration for offenses that, if committed in Alaska, would not require the offender to register. In Alaska, for example, while most forms of indecent exposure require offenders to register, not all do: streaking (perhaps done as a prank),[15] is a misdemeanor in Alaska[16] and does not require registration.[17] Other states are more draconian; to continue to use the indecent exposure example, some states require registration for all forms, even for those variants that Alaska has omitted from registration.[18] If Section 20 is enacted, it would commit these individuals to register annually for at least 15 years[19] and suffer the ignominy and consequences of registration.

Registration is life-changing. The Department of Public Safety publishes, on an easily accessible website, each registrant's "name, aliases, address, photograph, physical description, description

---

[14] Not all coaching is intentional or malicious. Spectators may innocently influence testimony through their facial expressions and body language. Permitting the court, counsel, and the defendant to see what the witness sees enables them to notice and check that behavior.

[15] Associated Press, *Juneau High School Boys Disciplined for Streaking*, Oct. 28, 2009; Julia O'Malley, *Hey, Nude Hikers, What About the Bugs?*, Anchorage Daily News, May 19, 2010 (discussing nude hiking on Anchorage's trails).

[16] Alaska Stat. § 11.41.460.

[17] Alaska Stat. § 12.63.100(6)(C)(iv) (not requiring registration for indecent exposure so long as it was not "before a person under 16 years of age and the offender [does not have] a previous conviction for that offense").

[18] Including California (Cal. Penal Code § 290(c) for violating California's indecent exposure statute, Cal. Penal Code. § 314); Colorado (Colo. Rev. Stat. § 16-22-103 for violating Colorado's indecent exposure statute, Colo. Rev. Stat. § 18-7-302); and Oklahoma (Okla. Stat. tit. 57, § 582(A) for violating Oklahoma's indecent exposure statute, Okla. Stat. tit. 21, § 1021).

[19] 15 years is the briefest registration period in Alaska. Alaska Stat. §§ 12.63.010(d)(1), 12.63.020(a)(2).

of motor vehicles, license numbers of motor vehicles, and vehicle identification numbers of motor vehicles, place of employment, date of birth, crime for which convicted, date of conviction, place and court of conviction, length and conditions of sentence, and a statement as to whether the offender or kidnapper is in compliance with requirements of AS 12.63 or cannot be located." Alaska Stat. § 18.65.087(b). This "'impose[s] significant affirmative obligations and a severe stigma on every [registrant],'" *Doe*, 189 P.3d at 1009 (quoting *Smith v. Doe*, 538 U.S. 84, 111 (Stevens, J., dissenting)) (first alteration in original), and "through aggressive public notification of their crimes," *id.* (internal quotation omitted), causes registrants to risk "public shunning, picketing, press vigils, ostracism, loss of employment, and eviction, to threats of violence, physical attacks, and arson," *id.* at 1010 n.80.

If obligated to register, one must register each year for at least 15 years.[20] Once on the registry, there is "no mechanism" through which one "can petition the state or a court for relief from the obligations of continued registration and disclosure." *Id.* at 1017.

At least 136 jurisdictions have sex offender registries.[21] The State, if it enacts Section 20, will bind Alaska to each of these jurisdictions in an ever-changing, complex web. The Alaska Supreme Court held that Alaska's registry is "punitive" and, when applied "to defendants who committed their crimes before the legislature enacted [the Alaska Sex Offender Registration Act]," *Doe*, 189 P.3d at 1019, violates the Alaska *Ex Post Facto* Clause.[22]

The complex interaction between Alaska and each of these 135 jurisdictions may present future *ex post facto* issues, which may expose the State to expensive and lengthy litigation. Section 20 applies to offenses committed only after its enactment. But, how would it apply in the following example? (1) Another jurisdiction, like Alaska, does not require otherwise innocent college-student streakers to register. (2) A college student in that jurisdiction streaks on July 1, 2013. (3) The individual moves to Alaska on January 1, 2014 and does not have to register here. (4) On February 1, 2014, that jurisdiction amends its laws, with a retroactive date to January 1, 2010, to require streakers to register. Does that person now need to register in Alaska? With at least 135 other jurisdictions, this hypothetical is plausible and implicates the Alaska *Ex Post Facto* Clause. If the State incorrectly requires this individual to register, it would likely face an *ex post facto* challenge and a suit for civil damages. Section 20, rather than being clear and efficient, makes Alaska law more turbid and turbulent.

---

[20] Alaska Stat. §§ 12.63.010(d)(1), 12.63.020(a)(2).

[21] The Dru Sjodin National Sex Offender Public Website, administered by the U.S. Department of Justice, lists 136 jurisdictions with sex offender registries: the 50 States; the District of Columbia; the 4 territories of Guam, Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands; and 81 Native Tribes. United States Department of Justice National Sex Offender Public Website, *at* http://www.nsopw.gov/Core/PublicRegistrySites.aspx (last visited Mar. 7, 2012).

[22] Alaska Const., Art. I, § 15 ("No . . . ex post facto law shall be passed.").

No matter one's assessment regarding registration as a policy matter, clearly placement on the registry – because of its significant, irrevocable consequences – should never be done without intentional review and action by the Alaska Legislature. Were Section 20 to be enacted, individuals would be forced to register and bear the heavy costs associated thereto, even though they had not committed an offense that Alaska, in **its** sound policy judgment, had decided warrants registration.

Alaska should not abdicate its sovereignty and wisdom, it should not cede its policymaking to other jurisdictions, and it should not expose itself to needless constitutional litigation. The Legislature should continue to exercise its considered judgment in determining which offenses do justify registration. Section 20 would make Alaska's registry an appendage to all other jurisdictions.

Conclusion

We hope to work with the Judiciary Committee to address the above-noted problems with Senate Bill 218, so that final legislation would not impermissibly deprive Alaskans of their constitutional rights nor abdicate the Legislature's policy judgments about the offender registry.

Thank you again for letting us share our concerns. Please feel free to contact the undersigned should you have any questions or seek additional information.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

contemporaneous two-way video conference testimony of a witness if

(1) the requesting party establishes that testimony by two-way video conference is necessary to further an important public policy;

(2) the requesting party establishes that the witness is unavailable; and

(3) the testimony is given under oath and subject to cross-examination.

(c) **Procedures for Taking Video Conference Testimony.** If the trial court authorizes video conference testimony under (b) of this rule, it shall determine the procedures for taking the contemporaneous two-way video conference testimony. The parties, the court, the trier of fact, and the public must be able to see and hear the witness; and the witness must see and hear the courtroom proceedings, including the defendant, as if the witness were sitting in the courtroom's witness stand. The persons who are present with the witness must be identified. The parties may move to exclude any person other than the video conference technician from the witness's presence; the court, in its discretion, may exclude a person other than the video conference technician from the presence of the witness.

(d) **Definitions.**

(1) Contemporaneous Two-Way Video Conference. Contemporaneous two-way video conference means a conference among people at different places by means of transmitted audio and video signals. It includes all communication technologies that allow two or more places to interact by two-way video and audio transmissions simultaneously.

(2) Unavailable. In this rule, a witness is unavailable if

(A) by clear and convincing evidence the court finds under Rule 804(a)(4) or (5), Alaska Rules of Evidence, or Rule 15(e)(4), Alaska Rules of Criminal Procedure, that the witness is unavailable;

(B) by clear and convincing evidence the court finds that under the circumstances the witness ~~is unavailable;~~ or

(C) the parties agree that the witness is unavailable.

*** Sec 26.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 1, 2, 7 - 11, 14, 17 - 19, 21 - 24, and 27 of this Act

Ten years later, with the Adam Walsh Act of 2006, Congress again passed legislation increasing the categories of people that states were required to register as sex offenders and for how long they would have to do so.[98] The Act also authorized a national registry that would incorporate the information from every state registry.

The Adam Walsh Act significantly expands the federal requirements of who must register as a sex offender. The Act defines a sex offense as a "criminal offense that has an element involving a sexual act or sexual contact with another."[99] The law exempts consensual sexual conduct when the victim was at least 13 and the offender was no more than four years older.[100] For the first time, federal law under the Adam Walsh Act requires some juveniles to register (see Chapter VII, "Sex Offender Laws and Child Offenders").

The Adam Walsh Act creates three tiers or levels of registrants, determined solely by the conviction offense, with Tier I crimes the least serious and Tier III crimes the most serious. The tiers dictate the duration of the registry requirement.[101]

The Act also sets the frequency with which a former offender must update registry information: Tier I sex offenders must do so every year; Tier II sex offenders must do so every six months; and Tier III offenders must do so every three months. A registrant must not only register with local law enforcement in the jurisdiction where

---

in sexual acts involving penetration with victims of any age through the use of force or the threat of serious violence; and (2) engaging in sexual acts involving penetration with victims below the age of 12."

97 Ibid. Megan's Law is most commonly associated, however, with its community notification provisions, discussed below.

98 The act is named after a six-year-old boy who was abducted and murdered in 1981. Adam's severed head was found in a canal about 100 miles from his family home. The rest of his remains have never been found, nor has anyone been convicted of his murder. His father, John Walsh, is a prominent national victims' rights advocate and the host of the television show America's Most Wanted. "About John Walsh," http://www.amw.com/about_amw/John_Walsh.cfm (accessed January 14, 2007).

99 Adam Walsh Act, Title I, Sec. 111(5)(A)(i).

100 Ibid., Sec. 111(5)(C).

101 Ibid., Sec. 111. Tier III registrants are those who committed a sex crime punishable by more than one year in prison and comparable or more severe than aggravated sexual abuse, abusive sexual contact with a child under 13, kidnapping of a child by someone other than the guardian, any sex crime occurring after the offender was a Tier II offender. Ibid., Sec. 111(4). Tier II registrants are "those who are not a Tier III offender" and whose offense is against a minor, is punishable by imprisonment of more than one year, and is comparable or more severe to sex trafficking, coercion and enticement, transportation with intent to engage in criminal sexual activity, abusive sexual contact, involves the use of a minor in a sexual performance, solicitation of a minor to practice prostitution, production or distribution of child pornography, or if the sex offense occurs after the offender becomes a Tier I sex offender. Ibid. Sec. 111(3). A Tier I sex offender is defined as "a sex offender other than a Tier II or Tier III sex offender." Ibid. Sec. 111(2).

he or she resides, but must also register in the jurisdiction where he or she is employed or and goes to school.[102] The Act makes failure to register a violation of federal law, carrying with it a fine or imprisonment.[103] These registration requirements are applied to all registrants, for the duration of their registration. So, for example, a man convicted of soliciting an underage prostitute would have to register in the jurisdiction where he lives and also in the jurisdiction where he is employed (if different) and provide information about his employer to the police, even if his work does not involve contact with children.

One of the goals of the Act was to create more uniformity among state registration schemes, to avoid some of the confusion as to registration requirements when registrants moved to different states. However, since the Act does not limit the authority of states to go beyond federal law (see below), uniformity will still be elusive.

Moreover, the Act will preclude state officials from instituting registration laws they deem more reasonable or effective but which fall below the federal mandate.

In 1996 Congress authorized the creation of a national registry of offenders convicted of coercive, penetrative sex with anyone, sex with children under the age of 12, recidivists of any sexual offense, and sexually violent predators.[104] In 2005 the national registry went online with links to state online registries.[105] The Adam Walsh Act requires all states to upload their online sex offender database to the national database by 2009.[106]

State Registration Laws

> The only reason I am considered a sex offender is because I committed an offense that triggers registration. In any other context, my crime

102 Ibid. Sec. 113(a).
103 Ibid. Sec. 141. Failure to register is also a deportable offense for non-citizens.
104 The Pam Lyncher Sexual Offender Tracking and Identification Act of 1996, 42 USC. Sec. 14072. Pam Lyncher was a victim of sexual assault and the founder of Justice for All, a victims' rights group. She died with her two daughters when TWA Flight 800 crashed in New York in July 1996. Justice for All, "In Memory," http://www.jfa.net/memory.html (accessed September 8, 2006). The FBI maintains the registry. 42 USC. sec. 14072.

106 ibid.

would never be considered a sex offense, and I would not be considered a threat to society.
—Trent B., a Pennsylvania registrant convicted of streaking[107]

While federal law requires states to register former offenders convicted of certain offenses, it does not limit states' authority to increase the number of offenses that trigger registration or the duration of the requirement to register.

Expanding the Definition of Sex Offender

Most people assume that a registered sex offender is someone who has sexually abused a child or engaged in a violent sexual assault of an adult. A review of state sex offender registration laws by Human Rights Watch reveals that states require individuals to register as sex offenders even when their conduct did not involve coercion or violence, and may have had little or no connection to sex. For example:

- At least five states require registration for adult prostitution-related offenses;[108]
- At least 13 states require registration for public urination; of those, two limit registration to those who committed the act in view of a minor;[109]
- At least 29 states require registration for consensual sex between teenagers;[110] and

- At least 32 states require registration for exposing genitals in public;[111] of those, seven states require the victim to be a minor.[112]

Case study: Oklahoma

Oklahoma law treats any type of public exposure as a sex offense that triggers 10 years on the sex offender registry, even if the offender had no sexual or lascivious motivation or intent at the time he or she exposed him- or herself. According to a local newspaper, nearly 600 registrants appear on Oklahoma's website for engaging in indecent exposure.[113]

In 1999 a high school senior in Salina, Oklahoma was arrested for what his mother described to the local media as a "high school thing."[114] He reportedly exposed himself to a group of female freshman gym students on his way to the restroom.

Bell v. State
668 P.2d 829
Alaska App.,1983.
September 09, 1983

Term

668 P.2d 829

Court of Appeals of Alaska.
Willie B. BELL, Appellant,
v.
STATE of Alaska, Appellee.

No. 5821.
Sept. 9, 1983.

Christine Schleuss, Asst. Public Defender, Dana Fabe, Public Defender, Anchorage, for appellant.

W.H. Hawley, Jr., Asst. Atty. Gen., Anchorage, Wilson L. Condon, Atty. Gen., Juneau, for appellee.

Before BRYNER, C.J., and COATS and SINGLETON, JJ.

OPINION

BRYNER, Chief Judge.

Willie B. Bell appeals his convictions for promoting prostitution in the first degree in violation of AS 11.66.110(a)(2) and managing a prostitution enterprise in violation of AS 11.66.120(a)(1). He also appeals the sentence imposed. We affirm.

Bell was a twenty-nine-year-old army sergeant when he procured two sixteen-year-old girls, C.R. and M.J., and one fourteen-year-old girl, D.W., for prostitution. C.R. began living with Bell and engaging in prostitution after Bell promised to marry her and to buy her a new car and new clothing. At Bell's direction, D.W. and M.J. worked as prostitutes in May, 1980. On May 22, 1980, Bell assaulted M.J., claiming that she had been drinking instead of "working." Fearing that Bell would harm them, C.R. and M.J. left him and contacted police, who obtained a search warrant to record conversations between M.J., C.R. and Bell. A telephone conversation between Bell and C.R. and a conversation involving Bell, M.J. and C.R. were recorded pursuant to the warrant and used as evidence against Bell.

The indictment returned against Bell charged two counts of promoting prostitution in the first degree, alleging that he induced D.W. to engage in prostitution when she was under the age of sixteen (Count I) (AS 11.66.110(a)(2)), and that he induced C.R. to engage in prostitution by means of force (Count II) (AS 11.66.110(a)(1)). Count III of the indictment, as it went to the jury, alleged that Bell was guilty of attempted promotion of prostitution in the first degree, AS 11.66.110 (a)(1) and AS 11.31.100(a), regarding M.J. The indictment also alleged that Bell managed, supervised, controlled or owned a prostitution enterprise other than a house of prostitution in violation of AS 11.66.120(a)(1) (Count IV). Bell was convicted of Counts I and IV. On Count II, Bell was acquitted of the charge but convicted of the lesser-included offense of promoting prostitution in the third degree, AS 11.66.130. On Count III, Bell was found not guilty of the charge but guilty of the lesser-included offense of attempted promotion of prostitution in the third degree, AS 11.66.130 and 11.31.100(a). Bell was not sentenced on Counts II and III. Superior Court Judge Milton M. Souter sentenced Bell

to a five-year term with two years suspended on Count I, and a four-year term with three years suspended on Count IV. The sentences for these offenses were to run concurrently. Subsequently, Judge Souter refused to reduce the sentence.

On appeal, Bell argues that: (1) he should have been allowed to present a reasonable mistake of age defense to the charge contained in Count I; (2) a partially inaudible tape recording should not have been admitted into evidence; (3) the search warrant for recording of conversations was improperly issued and executed; (4) supplemental instructions given to the jury were unduly coercive; (5) the sentences imposed by the trial court violated his double jeopardy rights; and (6) Judge Souter gave improper consideration to a letter Bell wrote, while awaiting sentencing, to the fourteen-year-old daughter of another inmate.

I. MISTAKE OF AGE

Bell asserts that the trial court erred in refusing to give a proposed jury instruction providing for a reasonable mistake of age defense to the charge of inducing a person under the age of sixteen to engage in prostitution in violation of AS 11.66.110(a)(2).[FN1] Bell argues that AS 11.66.110(b) violates his due process rights under the United States and Alaska constitutions by expressly precluding mistake of age as a defense to the charge of violating AS 11.66.110(a)(2). We find this argument unpersuasive and conclude that the legislature may, consistent with the requirements of constitutional due process, preclude mistake of age from constituting a defense to the crime of promoting prostitution in the first degree.

FN1. AS 11.66.110 provides:

PROMOTING PROSTITUTION IN THE FIRST DEGREE.

(a) A person commits the crime of promoting prostitution in the first degree if he

(1) induces or causes a person to engage in prostitution through the use of force;

(2) as other than a patron of a prostitute, induces or causes a person under 16 years of age to engage in prostitution; or

(3) induces or causes a person in his legal custody to engage in prostitution.

(b) In a prosecution under (a) (2) of this section, it is not a defense that the defendant reasonably believed that the person he induced or caused to engage in prostitution was 16 years of age or older.

(c) Promoting prostitution in the first degree is a class B felony.

The jury was instructed on the elements of this offense. The court then instructed that:

It is not a defense to the crime charged in Count I of the Indictment that the defendant reasonably believed that the person he induced or caused to engage in prostitution was 16 years of age or older.

The instruction proposed by Bell stated:

It is a defense to Count I of the indictment, Inducing a Person Under 16 Years of Age to Engage in Prostitution, that the defendant reasonably and in good faith believed that the female person was of the age of

> sixteen years or older, even though, in fact, she was under the age of sixteen years. If from all the evidence you have a reasonable doubt as to the question whether defendant reasonably and in good faith believed that she was sixteen years of age or older, you must give the defendant the benefit of that doubt and find him not guilty.

It is apparent that the legislature considered procurement of a person under sixteen to be an aggravated form of promoting prostitution. The commentary to the Revised Criminal Code, 2 Senate Journal, Supplement No. 47, at 109 (1978), states that by denying a defendant the defense of reasonable mistake as to age, creation of strict liability was intended as to the element of the offense involving age of the victim.[FN2] Supporting the validity of the legislature's decision in this regard is the supreme court's opinion in *Hentzner v. State,* 613 P.2d 821 (Alaska 1980), in which the court held:

> FN2. *See also* Alaska Criminal Code Revision Part 4, at 103 (Tent. Draft 1977) (Commentary to AS 11.66.140).

> Where a crime involved may be said to be *malum in se,* that is, one which reasoning members of society regard as condemnable, awareness of the commission of the act necessarily carries with it an awareness of wrongdoing. In such a case the requirement of criminal intent is met on proof of conscious action, and it would be entirely acceptable to define the word "wilfully" to mean no more than a consciousness of the conduct in question.
> *Id.* at 826. *See also* *Wheeler v. State,* 659

P.2d 1241, 1254 n. 18 (Alaska App.1983).

Bell correctly states the well-recognized rule in this jurisdiction that criminal intent is a necessary ingredient of criminal liability and that one charged with criminal conduct must have an awareness or consciousness of wrongdoing. *Speidel v. State,* 460 P.2d 77, 78 (Alaska 1969). In *Speidel,* the awareness of wrongdoing was in the context of a larceny-type crime, for which courts have historically required a specific intent to wrongfully deprive. In *Alex v. State,* 484 P.2d 677 (Alaska 1971), the supreme court discussed the intent required for non-larceny crimes:

> However, as applied to crimes generally, what is imperative, is that an accused's act be other than simply inadvertent or neglectful. What is essential is not an awareness that a given conduct is a "wrongdoing" in the sense that it is proscribed by law, but rather, an awareness that one is committing the specific acts which are defined by law as a "wrongdoing." It is, however, no defense that one was not aware that his acts were wrong in the sense that they were proscribed by law. So long as one acts intentionally, with cognizance of his behavior, he acts with the requisite awareness of wrongdoing.

Id. at 681–82.[FN3]

> FN3. *See also State v. Rice,* 626 P.2d 104, 115 (Alaska 1981) (Matthews, J., concurring) (a statute prohibiting the transportation of illegally taken game was overbroad, because it included "within its ambit the conduct of people who have no reason to believe that what they are doing is criminal").

We believe this language is applicable to Bell's actions, since he was consciously

committing the acts proscribed by law. As an element of this offense, Bell was required to be aware that he was procuring women to engage in acts of prostitution. Indeed, the jurors in this case were instructed that they must be convinced beyond a reasonable doubt

> that the defendant engaged in conduct which caused or induced [D.W.] to engage in prostitution; [and] that the defendant engaged in said conduct with the specific intent to cause or induce [D.W.] to engage in prostitution.

Thus, while Bell was not required to know the age of those whom he procured, this is not to say that the offense did not require *mens rea* or a culpable mental state.

We also note that AS 11.66.110(b) is in accord with the common law view that there should be no exculpation for mistake where, if the facts had been as the actor believed them to be, his conduct would still be illegal or immoral. [FN4] As Bell recognizes on appeal, his conduct would still have been illegal even if D.W. had been sixteen or over. AS 11.66.130 (a)(2). [FN5] Moreover, although it might be arguable that the offense of prostitution should be considered a *malum prohibitum* crime, we think it manifest that *promoting* prostitution is an offense "which reasoning members of society regard as condemnable," and thus, is *malum in se.* Hentzner v. State, 613 P.2d at 826. Accordingly, there can be little doubt that *Hentzner* 's basic requirement of an awareness or consciousness of wrongdoing is satisfied, despite the fact that AS 11.66.110(b) precludes mistake of age as a defense to the offense of promoting prostitution in the first degree.

> FN4. In the landmark case of *Regina v. Prince,* L.4., 2 Cr.Cas.Res. 154 (1875), the defendant was convicted of taking a girl under sixteen years of age from under the

> care of her father, even though the defendant reasonably believed she was older. The defense of mistake of age was disallowed on the ground that removal of an unmarried girl from the lawful custody of her parents would have been a crime even had she been as old as he believed. Hence, the defendant acted at his peril.
>
> FN5. AS 11.66.130 provides, in relevant part:
>
> (a) A person commits the crime of promoting prostitution in the third degree if, with intent to promote prostitution, he ...
>
> (2) as other than a patron of a prostitute, induces or causes a person 16 years of age or older to engage in prostitution ....
>
> (b) Promoting prostitution in the third degree is a class A misdemeanor.

In continuing to press his claim that AS 11.66.110(b) imposes an unconstitutional standard, Bell relies upon *State v. Guest,* 583 P.2d 836 (Alaska 1978), in which the supreme court upheld a trial court's decision to instruct the jury on a defense of reasonable mistake of age in a statutory rape case. Following the reasoning of *Speidel* and *Alex,* the court stated that an intent requirement must be read into former AS 11.15.120 to save it from unconstitutionality. To refuse a defense of mistake of age in a statutory rape case, according to the *Guest* court, would be to impose significant criminal liability without any criminal mental element. *Id.* at 839.

Bell relies most heavily upon the following language in *Guest:*

> It has been urged in other jurisdictions that where an offender is aware he is

> committing an act of fornication he therefore has sufficient criminal intent to justify a conviction for statutory rape because what was done would have been unlawful under the facts as he thought them to be. We reject this view. While it is true that under such circumstances a mistake of fact does not serve as a complete defense, we believe that it should serve to reduce the offense to that which the offender would have been guilty of had he not been mistaken. Thus, if an accused had a reasonable belief that the person with whom he had sexual intercourse was sixteen years of age or older, he may not be convicted of statutory rape. If, however, he did not have a reasonable belief that the victim was eighteen years of age or older, he may still be criminally liable for contribution to the delinquency of a minor.

Id. (citations and footnotes omitted). The court cited in support of its position section 2.04(2) of the Model Penal Code (Proposed Official Draft 1962), which provides:

> Although ignorance or mistake would otherwise afford a defense to the offense charged, the defense is not available if the defendant would be guilty of another offense had the situation been as he supposed. In such case, however, the ignorance or mistake of the defendant shall reduce the grade and degree of the offense of which he may be convicted to those of the offense of which he would be guilty had the situation been as he supposed.

We believe the problem addressed in *Guest* is distinguishable from the issue at hand. As we have stated, Bell did not lack criminal intent; he intended to promote prostitution. *See Hentzner v. State,* 613 P.2d at 826; *Wheeler v. State,* 659 P.2d at 1251. The court in *Guest* was careful to point out that fornication was not itself a crime, so that it could not have been considered as a lesser-included offense of statutory rape. Also,

although the court went on to observe that Guest *might* still have been guilty of contributing to the delinquency of a minor under former AS 11.40.130 if he did not have a reasonable belief that his partner was under eighteen, it is clear that Bell was *necessarily* guilty of promoting prostitution in the third degree if the facts were as he supposed them to be.

This distinction is supported by analysis of other authorities. The revised criminal code contains no provision paralleling the second sentence of MPC § 2.04(2), quoted by the *Guest* court. Instead, AS 11.81.600(b)(2) provides:

> (b) A person is not guilty of an offense unless he acts with a culpable mental state with respect to each element of the offense, except that no culpable mental state must be proved
>
> (2) *if an intent to dispense with the culpable mental state requirement for that element clearly appears.*

(Emphasis added.) AS 11.66.110(b), by proscribing any defense to AS 11.66.110(a)(2) based upon mistake of age, clearly demonstrates a legislative intent to dispense with knowledge of age.

More importantly, despite the language of MPC § 204(2), the Model Penal Code takes essentially the same approach as the Revised Code to in its treatment of criminal intent for the offense of promoting prostitution. MPC § 251.2(2) (1980) makes the conduct proscribed by AS 11.66.130(a)(2)—promoting prostitution in the third degree—a misdemeanor, while § 251.2(3)(c) provides that the same conduct shall be a felony if "the actor promotes prostitution of a child under 16, *whether or not he is aware of the child's age.*" Similarly, New York Penal Law § 230.30 (1978), from which AS 11.66.110 appears to be derived, provides that it shall be a felony

to "knowingly" advance or profit from the prostitution of a person less than sixteen years old, while New York Penal Law § 15.20 (3) (1967) provides that

> Notwithstanding the use of the term "knowingly" in any provision of this chapter defining an offense in which the age of a child is an element thereof, knowledge by the defendant of the age of such child is not an element of any such offense and it is not, unless expressly so provided, a defense to a prosecution therefor that the defendant did not know the age of the child or believed such age to be the same as or greater than that specified in the statute.

We find it highly persuasive that these statutory schemes are, when applied to the precise conduct engaged in by Bell, in consonance with the approach taken in the Revised Code.

Under the Revised Alaska Criminal Code, it is Bell's intentional procurement of a person under the age of sixteen years for prostitution that renders him liable for first-degree promoting, regardless of his actual awareness of that person's age. The act of procuring another for purposes of prostitution is *malum in se,* without regard to the age of the person procured, and thus, as we have indicated, in a prosecution for procuring a person under the age of sixteen years, the intent to procure satisfies the minimal constitutional requirement of criminal intent. *Hentzner v. State,* 613 P.2d at 826. We hold that AS 11.66.110(b), which expressly dispenses with mistake of age as a defense to promoting prostitution in the first degree, does not violate due process of law. We therefore conclude that the trial court did not err in rejecting Bell's challenge to the instruction on mistake of age.

II. PARTIALLY INAUDIBLE TAPE

Bell argues that error occurred when a

recording of a telephone conversation between Bell and C.R. was played for the jury. At trial, Bell's attorney objected to admission of the recorded telephone conversation, contending that parts of the tape were substantially inaudible. The tape of another conversation was played without objection. Before this tape was played, the trial judge gave a cautionary instruction admonishing the jury to consider only what it actually heard on both tapes.[FN6]

FN6. The jury was instructed:

> [I] want to admonish the jury that there are portions of these tapes that are impossible to hear .... Consider only what you hear, only what you actually hear on the tapes, together with any other evidence .... But don't speculate what is on the tape where there isn't credible evidence .... The tapes are going to be hard to understand. Don't guess at what's on those tapes.

The trial court's decision to admit the phone tape is reversible error only if it constituted an abuse of discretion. *Robinson v. State,* 593 P.2d 621, 624 n. 5 (Alaska 1979). In *Dana v. State,* 623 P.2d 348 (Alaska App.1981), we considered the correctness of the trial court's admission of a tape which had "significant gaps" due to equipment failure. We held that there could be no abuse of discretion in admitting the flawed tape unless its prejudicial impact outweighed its probative value. *Id.* at 353–54.

In the present case, after weighing the possibility of prejudice against the probative value of the tape, and taking into account the other evidence at trial, the cautionary instruction, and the fact that most of the tape is audible, we conclude that Judge Souter did not abuse his discretion in admitting the tape.

III. ISSUANCE AND EXECUTION OF THE GLASS WARRANT

Bell argues that procedures outlined in the federal electronic surveillance act should supplement the requirements, enumerated in *State v. Glass,* 583 P.2d 872 (Alaska 1978), that must be met before electronic monitoring of conversations is permitted. We considered and rejected a similar argument in *Jones v. State,* 646 P.2d 243, 248 (Alaska App.1982). *See also Gallagher v. State,* 651 P.2d 1185, 1187 (Alaska App.1982). Our holdings in *Jones* and *Gallagher* are dispositive of this issue.

Bell also contends that probable cause for the issuance of a *Glass* warrant did not exist because it was not known whether relevant conversations would occur between Bell, M.J. and C.R., and because M.J. and C.R. were neither reliable nor credible. Bell's motion to suppress on this ground was denied at the omnibus hearing.

The judge's determination that probable cause existed is entitled to great deference by this court. *Spinelli v. United States,* 393 U.S. 410, 419, 89 S.Ct. 584, 590–91, 21 L.Ed.2d 637, 645 (1969). We find ample facts to support issuance of the search warrant. C.R. and M.J. stopped working for Bell less than a week before they testified at the proceeding to issue the *Glass* warrant. Since C.R. had worked for Bell for nearly six months and given him $5,000 of the money she made by prostitution, it was logical to assume she could contact him and that he would have some interest in talking to her. Although M.J. had worked for Bell for only a few weeks, the same reasoning applies. We believe the court correctly found that sufficient probable cause existed to issue the *Glass* warrant. *United States v. Ventresca,* 380 U.S. 102, 108, 85 S.Ct. 741, 745–46, 13 L.Ed.2d 684, 689 (1965); *Martel v. State,* 511 P.2d 1055, 1055 n. 1 (Alaska 1973); *Rosa v. State,* 633 P.2d 1027, 1029–30 (Alaska App.1981).

Bell, relying on *Spinelli v. United States,* and *Aguilar v. Texas,* 378 U.S. 108, 84 S.Ct. 1509, 12 L.Ed.2d 723 (1964), additionally contends that the search warrant should not have been issued because C.R. and M.J. were neither reliable nor credible. Bell's reliance on the rulings in *Aguilar* and *Spinelli* is misplaced, because those cases set forth criteria for ascertaining the reliability and credibility of informants who have provided hearsay information. Neither C.R. nor M.J. was a confidential informant; both testified personally and were under oath at the time. The magistrate thus had ample opportunity to assess their credibility. Accordingly, the *Aguilar-Spinelli* standards do not apply in this case, and Bell's argument is without merit.

Next, Bell argues that the recordings should have been suppressed because the police failed to comply with Alaska Rule of Criminal Procedure 37(b)(2), and because the police failed to mail a copy of the warrant and receipt to Bell in compliance with the provision of the warrant requiring that Criminal Rule 37(b)(1) and (2) be satisfied.[FN7]

FN7. Alaska R.Crim.P. 37 provides, in pertinent part:

> (b) *Execution and Return With Inventory.* The warrant shall be executed and returned within 10 days after its date. The officer taking property under the warrant
>
> (1) shall give to the person from whom or from whose premises the property was taken a copy of the warrant, a copy of the supporting affidavits, and receipt for the property taken, or
>
> (2) shall leave the copies and the receipt at the place from which the property was taken ....

The court ordered that a copy of the

warrant and receipt be mailed to Bell within ten days of May 27, 1980, when the warrant was executed. Officer George Novaky stated in an affidavit that, although he did not specifically advise Bell of the recording at the time of Bell's arrest and although Bell was not sent a copy of the search warrant, Novaky included information concerning the recording in police reports made available to Bell on June 16, 1980. Additionally, on June 13, 1980, Bell obtained actual notice of the recording when he appeared at a bail hearing with his attorney. At the bail hearing, Officer Michael Grimes testified that electronic surveillance was used to record Bell's conversation. Bell's attorney then declined to question Grimes, and the tape was played. It is unclear from the record whether Bell received notice of the recording in a copy of Officer Novaky's complaint at the time of his arraignment on May 28, 1980; consequently, we assume that Bell first received notice at the bail hearing on June 13, 1980—slightly more than two weeks after police recorded Bell's conversations.

Under the circumstances, Bell has shown no prejudice stemming from untimely notification of execution of the warrant authorizing his telephone conversation to be monitored and recorded. Nor does it appear that the late notification was the result of bad faith on the part of investigating officers. We hold that the untimely notice to Bell did not justify suppression of the recording made pursuant to the *Glass* warrant. *See* Gallagher v. State, 651 P.2d 1185 (Alaska App.1982).

IV. COERCIVE INSTRUCTION DURING DELIBERATIONS

Bell argues that a supplemental instruction issued by Judge Souter was coercive and that it was essentially an " *Allen* charge." FN8 We disagree. During deliberations, the jury sent a note to the judge inquiring if inability to agree on one count of the indictment constituted a hung jury. The judge replied:

FN8. *Allen v. United States,* 164 U.S. 492, 17 S.Ct. 154, 41 L.Ed. 528 (1896).

If you were to be unable to agree to a verdict on one Count of the Indictment, you would be a hung jury as to that one Count, but you would not be a hung jury as to the remaining Counts unless you were also unable to agree to your verdicts on them also. *In my opinion you have not deliberated long enough yet to be able to validly reach the conclusion that you cannot agree to a verdict on any one or more Counts of the Indictment.* [Emphasis added.]

The jury subsequently returned its verdicts on the four counts, as well as the two lesser-included offenses.

The Alaska Supreme Court proscribed *Allen* charges in *Fields v. State,* 487 P.2d 831, 836 (Alaska 1971). In *Fields,* the jury was instructed, after extensive deliberations and at least two prior communications indicating a deadlock, that it was required to continue deliberations until a unanimous verdict was reached. This instruction was found to be so coercive as to require reversal of the conviction. We find that Judge Souter's instruction lacked the coerciveness proscribed by *Fields.* We note in this regard that Standard 15–4.4(b) of the ABA Standards Relating to Trial by Jury specifically provides that a court may require continued deliberations if a jury is unable to agree.[FN9] In this case, the jury had not deliberated for an extended time, the communication did not unequivocally indicate a deadlock, and the court's instruction did not imply that the jury would be required to deliberate until unanimity was reached. Under these circumstances the supplemental instruction did not constitute an abuse of discretion and Bell's argument must fail.

FN9. ABA Standard Relating to Trial by Jury § 15–4.4(b) (1980)

provides:

> If it appears to the court that the jury has been unable to agree, the court may require the jury to continue their deliberations and may give or repeat an instruction as provided in paragraph (a). The court shall not require or threaten to require the jury to deliberate for an unreasonable length of time or for unreasonable intervals.

The Commentary to Standard 15-4.4(b) states:

> This paragraph confirms that a trial judge may send the jury back for further deliberations notwithstanding its indication that it has been unable to agree....
>
> ....
>
> There is no coercion if a court requires jurors to deliberate a reasonable length of time.

V. DOUBLE JEOPARDY

Bell additionally argues that his sentences on Count I [FN10] and Count IV [FN11] violate double jeopardy under *Whitton v. State,* 479 P.2d 302 (Alaska 1970). The *Whitton* court adopted the following analysis to determine whether or not a double jeopardy violation had occurred:

> FN10. Bell's conviction on Count I was for inducing or causing a person under 16 years of age [D.W.] to engage in prostitution, AS 11.66.110(a)(2). *See supra* n. 1.

> FN11. Conviction on count IV was for violating AS 11.66.120(a)(1), a class C felony, which provides:
>
> (a) A person commits the crime

> of promoting prostitution in the second degree if he
> (1) manages, supervises, controls, or owns, either alone or in association with others, a prostitution enterprise other than a place of prostitution ....
>
> AS 11.66.150(2) defines a "prostitution enterprise" as
> [A]n arrangement in which two or more persons are organized to render sexual conduct in return for a fee.
>
> The jury was instructed in the language of both these statutes.

The trial judge first would compare the different statutes in question, as they apply to the facts of the case, to determine whether there were involved differences in intent or conduct. He would then judge any such differences he found in light of the basic interests of society to be vindicated or protected, and decide whether those differences were substantial or significant enough to warrant multiple punishments ....

> If such differences in intent or conduct are significant or substantial in relation to the social interests involved, multiple sentences may be imposed, and the constitutional prohibition against double jeopardy will not be violated. But if there are no such differences, or if they are insignificant or insubstantial, then only one sentence may be imposed under double jeopardy.

Id. at 312 (footnotes omitted).

We must therefore compare AS 11.66.110(a)(2) and AS 11.66.120(a)(1) as applied to the facts of Bell's case, to determine whether differences in intent or conduct were involved in this case. Then, if there are differences, we must decide whether, in light of the societal

interests to be protected, the differences were so substantial as to warrant multiple punishment.

AS 11.66.110(a)(2) proscribes the conduct of inducing or causing a person under the age of sixteen to engage in prostitution. AS 11.66.120(a)(1) prohibits managing, supervising, controlling or owning a prostitution enterprise. We believe that, under the *Whitton* analysis, the offenses proscribed by the two statutes in question involve different intents and different conducts. Bell's conviction on Count I was based squarely upon his inducement of D.W. Bell's conviction under AS 11.66.120(a)(1), on the other hand, required proof of management of a prostitution enterprise. No showing of inducement is necessary to establish the offense, since a prostitution enterprise can be comprised entirely of persons who willingly take part in the business, without inducement or promotion. Clearly Bell's conduct in arranging for two or more people to provide sexual services for a fee, a part of which would accrue to him, goes beyond the act of inducing a single person under the age of sixteen to engage in prostitution. The finding that Bell managed a prostitution business with at least two women working for him involved the element of management and required proof of an enterprise, neither of which were involved in the inducement charge. We thus conclude that Bell's intent and conduct clearly differed on the two charges.

We must also determine whether such differences in intent or conduct are substantial in relation to the societal interests involved. As we have stated in connection with Bell's mistake of age claim, AS 11.66.110(a)(2) imposes criminal liability for non-forcible inducement of individuals under sixteen to engage in acts of prostitution with others. This liability is imposed without regard to any pecuniary gain on the part of the offender. We believe that the primary aim of

this provision is to protect individuals, particularly those who are young and therefore more vulnerable, from being led into committing acts of prostitution by the efforts of others. By contrast, AS 11.66.120 (a)(1) seeks to prevent and punish the commercial aspects of ongoing organized prostitution by subjecting persons who manage prostitution-related activities as business enterprises to sanctions greater than those applicable to persons who commit individual acts of prostitution, without regard to age of the persons managed. We therefore conclude that multiple punishment was appropriate in this case because of the differences in intent and conduct and because of the differing societal interests furthered by the two statutes in question.

VI. REFUSAL TO REDUCE SENTENCE

Finally, Bell contends that denial of the motion to reduce his sentence was error. While incarcerated prior to sentencing, Bell wrote a letter to L.S., the fourteen-year-old daughter of a fellow inmate. The letter was produced at the sentencing hearing, and the father of L.S. was called to testify. He stated that Bell had threatened him with violence if he did not testify favorably to Bell. Judge Souter stated that the threats convinced him to increase Bell's sentence by one year. The judge stated that, although the letter could easily be interpreted as an attempt "to strike a sexual relationship" with L.S., he would give Bell the "benefit of the doubt" and not consider it in sentencing him. Later, Bell moved for reconsideration of the sentence, based on discovery of a letter from the father of L.S. to Bell; the letter indicated that the father had committed perjury at Bell's sentencing. FN12 A hearing was subsequently held on Bell's motion to reconsider the sentence.

FN12. The letter from L.S.'s father, written to Bell prior to his sentencing, contained a postscript

> which stated, "Tell [L.S.] I love her and when I write I'll tighten it for you. I'll get you a picture 'a pose'."

Judge Souter refused to reduce Bell's sentence, reasoning that, in writing to L.S., Bell had been "attempting to arrange for [L.S.] to become a prostitute for him or to be involved with him in a sexual relationship." The original sentence was based on Judge Souter's belief that Bell had threatened L.S.'s father; at that point Judge Souter did not believe that Bell had "propositioned" L.S. On resentencing, Judge Souter changed his reasoning for Bell's sentence; he was persuaded that L.S.'s father had lied, but he was also persuaded that Bell *had* been trying to establish a sexual relationship with the fourteen-year-old L.S.[FN13]

> FN13. Judge Souter stated:
>
> > The court was not persuaded of this fact when the presentation of evidence concluded at the sentencing hearing, but the contents of the postscript [on the letter from L.S.'s father to Bell] have caused the court to re-examine this question and to resolve it contrary to the way it was resolved at the sentencing hearing.

Bell now claims that, because the trial court did not reduce his sentence after finding that Bell had not threatened L.S.'s father, double jeopardy was violated. However, he fails to cite any authority supporting his theory that failure to reduce a sentence may violate double jeopardy. Judge Souter's reinterpretation of Bell's letter to L.S. in light of the letter from L.S.'s father to Bell was not unreasonable. Nor can we find that Judge Souter abused his discretion in refusing to reduce the original sentence, based on his reinterpretation of the letter. Since there was no increase in the original sentence, no

violation of double jeopardy is involved.

Bell also contends that the effective increase in the period of incarceration based upon the letter was not justified under the sentencing goals set forth in *State v. Chaney*, 477 P.2d 441, 442 (Alaska 1970). The fact that Bell attempted to arrange a romantic involvement with a fourteen-year-old girl while he was incarcerated for promoting the prostitution of another girl under the age of sixteen indicates a lack of remorse on Bell's part and a greater need for deterrence of Bell himself; it therefore justifies imposition of a more severe sentence. We conclude that Bell's sentence was not clearly mistaken.

The conviction and sentence are AFFIRMED.

Alaska App.,1983.

SB 224 Evidence Rules: Union/Employee Privilege Sponsor Statement

Senate Bill 224 seeks to protect confidential information acquired by an agent of an employee's union in the course of providing that employee advocacy services relating to anticipated or ongoing disciplinary proceedings. Without the expectation of confidentiality, union members are hesitant to be fully forthcoming to their representative, severely hampering the union agent's ability to advise and represent the member and denying the employee the full and effective advocacy to which she or he is entitled.

The bill provides exceptions to this privilege, including being ordered by the court to disclose information concerning the commission of a crime, or if the employee consents to the disclosure. The bill also provides that where federal or state law preempts or conflicts with this act, the federal or state law prevails to the extent of the preemption or conflict.

Sectional Analysis

SB 224 Evidence Rules: Union/Employee Privilege

Section 1. This section amends Alaska Statute 09.25, adding a new section 09.25.405 that provides that confidential communications between an employee and an employee representative of an organization are privileged conversations when conducted in an advocacy setting in a disciplinary matter and provides for the definition of "organization."

Section 2. This section amends AS 23.40, adding a new section AS 23.40.065.

Subsection (a) provides that an individual cannot be compelled in any proceeding to disclose information acquired from an employee represented by the individual if such information was obtained in confidence by that individual in connection with providing advocacy services in regards to disciplinary proceedings of the employee.

Subsection (b) provides exception to the privilege.

Subsection (c) provides that a conflict between federal or state law, this statute is preempted and does not apply.

Subsection (d) defines "organization" and "proceeding."

Section 3. This section declares an indirect court rule change.

Section 4. This section provides that Sections 1 and 2 can only take effect upon a 2/3rds vote of both houses of the Legislature for Section 3.

SENATE BILL NO. 224

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE LABOR AND COMMERCE COMMITTEE

Introduced: 3/5/12
Referred: Labor and Commerce, Judiciary

A BILL

FOR AN ACT ENTITLED

"An Act making privileged certain communications between employees and employee union representatives; and amending Rule 402 and Rule 501, Alaska Rules of Evidence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 09.25 is amended by adding a new section to article 3 to read:

Sec. 09.25.405. Privileged communication between employees and employee advocates. Confidential communications between an employee and an individual who represents the employee on behalf of an organization in connection with the individual's providing advocacy services to the employee that are related to anticipated or ongoing disciplinary proceedings are privileged as provided under AS 23.40.065. In this section, "organization" has the meaning given in AS 23.40.065.

*** Sec. 2.** AS 23.40 is amended by adding a new section to article 1 to read:

Sec. 23.40.065. Privileged communication between employees and employee organizations. (a) An individual may not be compelled in a proceeding to

disclose information the individual acquired from an employee while the individual represented the employee on behalf of an organization, if the information was communicated

(1) in confidence; and

(2) in connection with the individual's providing advocacy services to the employee that are related to anticipated or ongoing disciplinary proceedings.

(b) Nothing in (a) of this section prohibits a person from disclosing information

(1) to prevent a crime that would cause serious physical injury or death or create a risk of imminent serious physical injury or death;

(2) in a civil or criminal proceeding against the organization;

(3) as required by the superior court following a hearing in camera;

(4) when, after being fully informed regarding the nature and extent of the privilege under this section, the employee waives the privilege in writing; or

(5) after the employee's death, on written consent by the employee's personal representative.

(c) If a provision of this section is preempted by federal law or is in conflict with a federal or state law in a particular situation, the provision does not apply to the extent of the preemption or conflict.

(d) In this section,

(1) "organization" means a labor or employee organization of any kind in which employees participate and which exists for the primary purpose of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, and conditions of employment;

(2) "proceeding" means

(A) a proceeding heard before a legislative, judicial, administrative, or other governmental body or official authorized to hear evidence under oath; or

(B) an arbitration, hearing, or meeting that is part of a grievance procedure conducted under a collective bargaining agreement.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to

read:

INDIRECT COURT RULE CHANGE. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, have the effect of amending Rules 402 and 501, Alaska Rules of Evidence, by creating a new privilege preventing a person from being compelled to testify or produce evidence in a court and precluding admissibility of certain evidence in certain cases.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, take effect only if sec. 3 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 224

Analysis

Senate Bill 224 creates a new evidentiary privilege for communications between an employee and their union — a union testimonial privilege. The privilege would apply to communications between a union member and the union when those communications relate to disciplinary proceedings. Importantly, the privilege applies not only to union grievance procedures but also to any subsequent civil court proceedings when the terminated union employee sues the employer for wrongful termination. The union member holds the privilege indefinitely under the bill. Although a zero fiscal note attaches to this bill, there are potential fiscal impacts to be considered, including whether this privilege will make it more difficult for the State of Alaska and other employers to defend the interests of workplace safety in wrongful termination cases. These concerns are currently before the Alaska Supreme Court in *Peterson v. State of Alaska*, Supreme Court No.:S-14233.

FISCAL NOTE #2

STATE OF ALASKA **BILL NO.** SB 224
2012 LEGISLATIVE SESSION

Analysis

This bill provides that confidential communications between an employee and a person who represents the employee on behalf of an organization related to disciplinary proceedings are privileged under AS 23.40.065.

The bill also provides that a person who represents an employee and obtains information from the employee in confidence and that is related to disciplinary proceedings may not be compelled to disclose the information in a proceeding held to take evidence under oath or an arbitration, hearing, or meeting, unless (1) to prevent crime that would cause serious injury or death; (2) in a civil or criminal proceeding against the organization; (3) as ordered in an in camera proceeding in superior court; (4) when the employee knowingly waives the privilege; and (5) after the employee's death, with consent from the employee's personal representative.

There is no fiscal impact anticipated to the department as a result of this legislation.

MEMORANDUM

Explanation of Changes SB 224 Evidence Rules: Union/Employee Privilege

1. The word "individual was replaced with the word "advocate" which is then a defined term in Section 2(d).

2. In Section 2 (b), the following changes were made:

   The provisions of (1) and (2) were changed to more closely track the language of similar provisions in existing privileges under Court Rules.

   Provision (3) was added to clarify that no privilege exists for matters of workplace safety.

FOR AN ACT ENTITLED

"An Act making privileged certain communications between employees and employee union representatives; and amending Rule 402 and Rule 501, Alaska Rules of Evidence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 09.25 is amended by adding a new section to article 3 to read:

Sec. 09.25.405. Privileged communication between employees and employee advocates. Confidential communications between an employee and an advocate who represents the employee on behalf of an organization in connection with an employee disciplinary proceeding are privileged as provided under AS 23.40.065. In this section, "advocate," "organization," and "proceeding" have the meanings given in AS 23.40.065.

* **Sec. 2.** AS 23.40 is amended by adding a new section to article 1 to read:

Sec. 23.40.065. Privileged communication between employees and employee organizations. (a) An advocate may not be compelled in a proceeding to

disclose information the advocate acquired from an employee while the advocate represented the employee on behalf of an organization, if the information was communicated

(1) in confidence; and

(2) in connection with the advocate's providing advocacy services to the employee that are related to disciplinary proceedings.

(b) Nothing in (a) of this section prohibits an advocate from disclosing information

(1) that an advocate receives from an employee to whom the advocate provides advocacy services, on behalf of an organization, if the advocate's services were sought, obtained, or used to enable or aid the employee in committing or planning to commit acts or omissions that the employee knew or reasonably should have known constitute fraud or a crime;

(2) in a proceeding concerning an alleged breach of either the organization's legal duty to the employee or the employee's legal duty to the organization;

(3) to prevent physical injury or death in a workplace;

(4) as required by the superior court following a hearing in camera;

(5) when, after being fully informed regarding the nature and extent of the privilege under this section, the employee waives the privilege; or

(6) after the employee's death, on written consent by the employee's personal representative.

(c) If a provision of this section is preempted by federal law or is in conflict with a federal or state law in a particular situation, the provision does not apply to the extent of the preemption or conflict.

(d) In this section,

(1) "advocate" means an individual who represents an employee on behalf of an organization in connection with a proceeding that is related to employee discipline;

(2) "organization" means a labor or employee organization of any kind in which employees participate and which exists for the primary purpose of dealing

with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, and conditions of employment;

(3) "proceeding" means

(A) a proceeding heard before a legislative, judicial, administrative, or other governmental body or official authorized to hear evidence under oath; or

(B) an arbitration, hearing, or meeting that is part of a grievance procedure conducted under a collective bargaining agreement.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE CHANGE. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, have the effect of amending Rules 402 and 501, Alaska Rules of Evidence, by creating a new privilege preventing a person from being compelled to testify or produce evidence in a court and precluding admissibility of certain evidence in certain cases.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, take effect only if sec. 3 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

FOR AN ACT ENTITLED

"An Act making privileged certain communications between employees and employee union representatives; and amending Rule 402 and Rule 501, Alaska Rules of Evidence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 09.25 is amended by adding a new section to article 3 to read:

Sec. 09.25.405. Privileged communication between employees and employee advocates. Confidential communications between an employee and an advocate who represents the employee on behalf of an organization in connection with an employee disciplinary proceeding are privileged as provided under AS 23.40.065. In this section, "advocate," "organization," and "proceeding" have the meanings given in AS 23.40.065.

*** Sec. 2.** AS 23.40 is amended by adding a new section to article 1 to read:

Sec. 23.40.065. Privileged communication between employees and employee organizations. (a) An advocate may not be compelled in a proceeding to

disclose information the advocate acquired from an employee while the advocate represented the employee on behalf of an organization, if the information was communicated

(1) in confidence; and

(2) in connection with the advocate's providing advocacy services to the employee that are related to disciplinary proceedings.

(b) Nothing in (a) of this section prohibits an advocate from disclosing information

(1) that an advocate receives from an employee to whom the advocate provides advocacy services, on behalf of an organization, if the advocate's services were sought, obtained, or used to enable or aid the employee in committing or planning to commit acts or omissions that the employee knew or reasonably should have known constitute fraud or a crime;

(2) in a proceeding concerning an alleged breach of either the organization's legal duty to the employee or the employee's legal duty to the organization;

(3) to prevent physical injury or death in a workplace;

(4) as required by the superior court following a hearing in camera;

(5) when, after being fully informed regarding the nature and extent of the privilege under this section, the employee waives the privilege; or

(6) after the employee's death, on written consent by the employee's personal representative.

(c) If a provision of this section is preempted by federal law or is in conflict with a federal or state law in a particular situation, the provision does not apply to the extent of the preemption or conflict.

(d) In this section,

(1) "advocate" means an individual who represents an employee on behalf of an organization in connection with a proceeding that is related to employee discipline;

(2) "organization" means a labor or employee organization of any kind in which employees participate and which exists for the primary purpose of dealing

with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, and conditions of employment;

(3) "proceeding" means

(A) a proceeding heard before a legislative, judicial, administrative, or other governmental body or official authorized to hear evidence under oath; or

(B) an arbitration, hearing, or meeting that is part of a grievance procedure conducted under a collective bargaining agreement.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE CHANGE. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, have the effect of amending Rules 402 and 501, Alaska Rules of Evidence, by creating a new privilege preventing a person from being compelled to testify or produce evidence in a court and precluding admissibility of certain evidence in certain cases.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, take effect only if sec. 3 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

MEMORANDUM

Date: April 4, 2012

TO: Leg Legal

FROM: Cindy Smith

RE: CS for SB 224 LS-1427

Please provide a Judiciary CS for SB 224, with the following changes:

Replace the term "individual" with the word "advocate" wherever it appears throughout the bill.

In Section 1, delete the words "the individual's providing advocacy" and delete the words "anticipated or ongoing".

In Section 2, delete the words "anticipated or ongoing" on page 2 at line 6.

Delete language in (1) and replace (1) with "furtherance of crime or fraud" language modelled on the lawyer's privilege Court Rule language, attached.

Delete language in (2) and replace with "breach of duty" provision modeled on attorney privilege attached.

Add a new provision under (b) that makes an exception when it is necessary to ensure workplace or public safety, or to fulfill any mandatory reporting requirements or other disclosures required by law.

In item (4) delete the words "in writing"

Add definition for "advocate" as follows: "an individual who represents the employee on behalf of an organization in connection with disciplinary proceedings under AS 23.40.065".

SENATE BILL NO. 224

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE LABOR AND COMMERCE COMMITTEE

Introduced: 3/5/12
Referred: Labor and Commerce, Judiciary

A BILL

FOR AN ACT ENTITLED

"An Act making privileged certain communications between employees and employee union representatives; and amending Rule 402 and Rule 501, Alaska Rules of Evidence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 09.25 is amended by adding a new section to article 3 to read:

Sec. 09.25.405. Privileged communication between employees and employee advocates. Confidential communications between an employee and an ~~individual~~ advocate who represents the employee on behalf of an organization in connection with ~~the individual's providing advocacy s~~ervices to the employee that are related to ~~anticipated or ongoing~~ disciplinary proceedings are privileged as provided under AS 23.40.065. In this section, "organization" has the meaning given in AS 23.40.065.

*** Sec. 2.** AS 23.40 is amended by adding a new section to article 1 to read:

Sec. 23.40.065. Privileged communication between employees and employee organizations. (a) An ~~individual~~ advocate may not be compelled in a proceeding to

disclose information the individual acquired from an employee while the individual represented the employee on behalf of an organization, if the information was communicated

(1) in confidence; and

(2) ~~in connection with~~ the individual's providing advocacy services to the employee that are related to ~~anticipated or ongoing~~ disciplinary proceedings.

(b) Nothing in (a) of this section prohibits a person from disclosing information

(1) to prevent a crime that would cause serious physical injury or death or create a risk of imminent serious physical injury or death;

(2) in a civil or criminal proceeding against the organization;

(3) as required by the superior court following a hearing in camera;

(4) when, after being fully informed regarding the nature and extent of the privilege under this section, the employee waives the privilege ~~in writing~~; or

(5) after the employee's death, on written consent by the employee's personal representative.

(c) If a provision of this section is preempted by federal law or is in conflict with a federal or state law in a particular situation, the provision does not apply to the extent of the preemption or conflict.

(d) In this section,

(1) "organization" means a labor or employee organization of any kind in which employees participate and which exists for the primary purpose of dealing with employers concerning grievances, labor disputes, wages, rates of pay, hours of employment, and conditions of employment;

(2) "proceeding" means

(A) a proceeding heard before a legislative, judicial, administrative, or other governmental body or official authorized to hear evidence under oath; or

(B) an arbitration, hearing, or meeting that is part of a grievance procedure conducted under a collective bargaining agreement.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to

read:

INDIRECT COURT RULE CHANGE. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, have the effect of amending Rules 402 and 501, Alaska Rules of Evidence, by creating a new privilege preventing a person from being compelled to testify or produce evidence in a court and precluding admissibility of certain evidence in certain cases.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. AS 09.25.405, enacted by sec. 1 of this Act, and AS 23.40.065, enacted by sec. 2 of this Act, take effect only if sec. 3 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

CONFIDENTIALITY NOTICE: This communication with its content and any attachments may contain confidential and/or legally privileged information. It is solely for the use of the intended recipient(s). Unauthorized interception, review, use, or disclosure is prohibited and may violate applicable laws including the Electronic Communications Privacy Act. If you are not the intended recipient, please contact the sender and destroy all copies of the communication.

Rule 501. Privileges Recognized Only as Provided.

Except as otherwise provided by the Constitution of the United States or of this state, by enactments of the Alaska Legislature, or by these or other rules promulgated by the Alaska Supreme Court, no person, organization, or entity has a privilege to:

(1) refuse to be a witness; or

(2) refuse to disclose any matter; or

(3) refuse to produce any object or writing; or

(4) prevent another from being a witness or disclosing any matter or producing any object or writing.

(Added by SCO 364 effective August 1, 1979)

Return to top

Rule 502. Required Reports Privileged by Statute.

A person, corporation, association, or other organization or entity, either public or private, making a return or report required by law to be made has a privilege to refuse to disclose and to prevent any other person from disclosing the return or report, if the law requiring it to be made so provides. A public officer of an agency to whom a return or report is required by law to be made has a privilege to refuse to disclose the return or report if the law requiring it to be made so provides. No privilege exists under this rule in actions involving perjury, false statements, fraud in the return or report, or other failure to comply with the law in question.

(Added by SCO 364 effective August 1, 1979)

Rule 503. Lawyer-Client Privilege.

(a) **Definitions.** As used in this rule:

(1) A client is a person, public officer, or corporation, association, or other organization or entity, either public or private, who is rendered professional legal services by a lawyer, or who consults a lawyer with a view to obtaining professional legal services.

(2) A representative of the client is one having authority to obtain professional legal services and to act on advice rendered pursuant thereto, on behalf of the client.

(3) A lawyer is a person authorized, or reasonably believed by the client to be authorized, to practice law in any state or nation.

(4) A representative of the lawyer is one employed to assist the lawyer in the rendition of professional legal services.

(5) A communication is confidential if not intended to be disclosed to third persons other than those to whom disclosure is in furtherance of the rendition of professional legal services to the client or those reasonably necessary for the transmission of the communication.

(b) **General Rule of Privilege.** A client has a privilege to refuse to disclose and to prevent any other person from disclosing confidential communications made for the purpose of facilitating the rendition of professional legal services to the client, (1) between the client or the client's representative and the client's lawyer or the lawyer's representative, or (2) between the client's lawyer and the lawyer's representative, or (3) by the client or the client's lawyer to a lawyer representing another in a matter of common interest, or (4) between representatives of the client or between the client and a representative of the client, or (5) between lawyers representing the client.

(c) **Who May Claim the Privilege.** The privilege may be claimed by the client, the client's guardian or conservator, the personal representative of a deceased client, or the successor, trustee, or similar representative of a corporation, association, or other organization, whether or not in existence. The person who was the lawyer at the time of the communication may claim the privilege but only on behalf of the client. The authority to do so is presumed in the absence of evidence to the contrary.

(d) **Exceptions.** There is no privilege under this rule:

(1) *Furtherance of Crime or Fraud.* If the services of the lawyer were sought, obtained or used to enable or aid anyone to commit or plan to commit what the client knew or reasonably should have known to be a crime or fraud; or

(2) *Claimants Through Same Deceased Client.* As to a communication relevant to an issue between parties who claim through the same deceased client, regardless of whether the claims are by testate or intestate succession or by inter vivos transaction; or

(3) *Breach of Duty by Lawyer or Client.* As to a communication relevant to an issue of breach of duty by the lawyer to the client or by the client to the lawyer; or

(4) *Document Attested by Lawyer.* As to a communication relevant to an issue concerning an attested document to which the lawyer is an attesting witness; or

(5) *Joint Clients.* As to a communication relevant to a matter of common interest between two or more clients if the communication was made by any of them to a lawyer retained or consulted in common, when offered in an action between any of the clients.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994; and by SCO 1522 effective October 15, 2003)

Rule 504. Physician and Psychotherapist-Patient Privilege.

(a) **Definitions.** As used in this rule:

(1) A patient is a person who consults or is examined or interviewed by a physician or psychotherapist.

(2) A physician is a person authorized to practice medicine in any state or nation, or reasonably believed by the patient so to be.

(3) **[Effective March 1, 1999.]** A psychotherapist is (A) a person authorized to practice medicine in any state or nation, or reasonably believed by the patient to be so, while engaged in the diagnosis or treatment of a mental or emotional condition, including alcohol or drug addiction, (B) a person

licensed or certified as a psychologist or psychological examiner under the laws of any state or nation or reasonably believed by the patient so to be, while similarly engaged, [OR] (C) a person licensed as a marital or family therapist under the laws of a state or nation or reasonably believed by the patient so to be, while similarly engaged, or (D) a person licensed as a professional counselor under the laws of a state or nation, or reasonably believed by the patient so to be, while similarly engaged.

(4) A communication is confidential if not intended to be disclosed to third persons other than those present to further the interest of the patient in the consultation, examination, or interview, or persons reasonably necessary for the transmission of the communication, or persons who are participating in the diagnosis and treatment under the direction of the physician or psychotherapist, including members of the patient's family.

(b) **General Rule of Privilege.** A patient has a privilege to refuse to disclose and to prevent any other person from disclosing confidential communications made for the purpose of diagnosis or treatment of the patient's physical, mental or emotional conditions, including alcohol or drug addiction, between or among the patient, the patient's physician or psychotherapist, or persons who are participating in the diagnosis or treatment under the direction of the physician or psychotherapist, including members of the patient's family.

(c) **Who May Claim the Privilege.** The privilege may be claimed by the patient, by the patient's guardian, guardian ad litem or conservator, or by the personal representative of a deceased patient. The person who was the physician or psychotherapist at the time of the communication is presumed to have authority to claim the privilege but only on behalf of the patient.

(d) **Exceptions.** There is no privilege under this rule:

(1) *Condition on Element of Claim or Defense.* As to communications relevant to the physical, mental or emotional condition of the patient in any proceeding in which the condition of the patient is an element of the claim or defense of the patient, of any party claiming through or under the patient, of any person raising the patient's condition as an element of that person's own case, or of any person claiming as a beneficiary of the patient through a contract to which the patient is or was a party; or after the patient's death, in any proceeding in which any party puts the condition in issue.

(2) *Crime or Fraud.* If the services of the physician or psychotherapist were sought, obtained or used to enable or aid anyone to commit or plan a crime or fraud or to escape detection or apprehension after the commission of a crime or a fraud.

(3) *Breach of Duty Arising Out of Physician-Patient Relationship.* As to a communication relevant to an issue of breach, by the physician, or by the psychotherapist, or by the patient, of a duty arising out of the physician-patient or psychotherapist-patient relationship.

(4) *Proceedings for Hospitalization.* For communications relevant to an issue in proceedings to hospitalize the patient for physical, mental or emotional illness, if the physician or psychotherapist, in the course of diagnosis or treatment, has determined that the patient is in need of hospitalization.

(5) *Required Report.* As to information that the physician or psychotherapist or the patient is required to report to a public employee, or as to information required to be recorded in a public office, if such report or record is open to public inspection, or as to information or matters contained in or reasonably raised by a report submitted under AS 08.64.336, other than information that would establish the identity of a patient, unless the court finds that it is necessary to admit the identifying information in order to serve the interests of justice.

(6) *Examination by Order of Judge.* As to communications made in the course of an examination ordered by the court of the physical, mental or emotional condition of the patient, with respect to the particular purpose for which the examination is ordered unless the judge orders otherwise. This exception does not apply where the examination is by order of the court upon the request of the lawyer for the defendant in a criminal proceeding in order to provide the lawyer with information needed so that the lawyer may advise the defendant whether to enter a plea based on insanity or to present a defense based on the defendant's mental or emotional condition.

(7) *Criminal Proceeding.* For physician-patient communications in a criminal proceeding. This exception does not apply to the psychotherapist-patient privilege.

(Added by SCO 345 effective August 1, 1979; amended by SCO 850 effective January 15, 1988; by SCO 1108 effective January 15, 1993; by

SCO 1153 effective July 15, 1994; by SCO 1337 effective March 1, 1999; and by SCO 1522 effective October 15, 2003)

Note: SCO 1108 incorporated changes in Evidence Rule 504(a)(3) made by the legislature in ch. 129 § 12 SLA 1992. This legislation added the language in subparagraph (a)(3), "or (C) a person licensed as a marital or family therapist under the laws of a state or nation or reasonably believed by the patient so to be, while similarly engaged."

SCO 1108 was entered for the sole reason that the legislature has mandated the above amendment. If ch. 129 § 12 SLA 1992 is invalidated by a court of competent jurisdiction, SCO 1108 shall be considered automatically rescinded.

Note to SCO 1337: Evidence Rule 504(a)(3) was amended by § 5 ch. 75 SLA 1998 to expand the definition of "psychotherapist" to include licensed professional counselors. Section 1 of this order is adopted for the sole reason that the legislature has mandated the amendment.

Rule 505. Husband-Wife Privileges.

(a) **Spousal Immunity.**

(1) *General Rule.* A husband shall not be examined for or against his wife, without his consent, nor a wife for or against her husband, without her consent.

(2) *Exceptions.* There is no privilege under this subdivision:

(A) In a civil proceeding brought by or on behalf of one spouse against the other spouse; or

(B) In a proceeding to commit or otherwise place a spouse, the property of a spouse or both the spouse and the property of the spouse under the control of another because of the alleged mental or physical condition of the spouse; or

(C) In a proceeding brought by or on behalf of a spouse to establish the spouse's competence or

(D) In a proceeding in which one spouse is charged with:

(i) A crime against the person or the property of the other spouse or of a child of either, whether such crime was committed before or during marriage.

(ii) Bigamy, incest, adultery, pimping, or prostitution.

(iii) A crime related to abandonment of a child or nonsupport of a spouse or child.

(iv) A crime prior to the marriage.

(v) A crime involving domestic violence as defined in AS 18.66.990.

(E) In a proceeding involving custody of a child.

(F) Evidence derived from or related to a business relationship involving the spouses.

(b) **Confidential Marital Communications.**

(1) *General Rule.* Neither during the marriage nor afterwards shall either spouse be examined as to any confidential communications made by one spouse to the other during the marriage, without the consent of the other spouse.

(2) *Exceptions.* There is no privilege under this subdivision:

(A) If any of the exceptions under subdivision (a) (2) of this rule apply; or

(B) If the communication was made, in whole or in part, to enable or aid anyone to commit or plan to commit a crime or a fraud; or

(C) In a proceeding between a surviving spouse and a person who claims through the deceased spouse, regardless of whether such claim is by testate or intestate succession or by inter vivos transaction; or

(D) In a criminal proceeding in which the communication is offered in evidence by a defendant who is one of the spouses between whom the communication was made; or

(E) In a proceeding under the Rules of Children's Procedure; or

(F) If the communication was primarily related to and made in the context of a business relationship involving both spouses or the spouses and third parties.

(Added by SCO 364 effective August 1, 1979; amended by SCO 823 effective August 1, 1987; by SCO 1269 effective July 15, 1997; and by SCO 1522 effective October 15, 2003)

Note to SCO 1269: Evidence Rule 505(a) was amended by § 70 ch. 64 SLA 1996. Section 13 of this order is adopted for the sole reason that the legislature has mandated the amendment.

Return to top

Rule 506. Communications to Clergymen.

(a) **Definitions.** As used in this rule:

(1) A member of the clergy is a minister, priest, rabbi, or other similar functionary of a religious organization, or an individual reasonably believed so to be by the person consulting the individual.

(2) A communication is confidential if made privately and not intended for further disclosure except to other persons present in furtherance of the purpose of the communication.

(b) **General Rule of Privilege.** A person has a privilege to refuse to disclose and to prevent another from disclosing a confidential communication by the person to a member of the clergy in that individual's professional character as spiritual adviser.

(c) **Who May Claim the Privilege.** The privilege may be claimed by the person, by the person's guardian or conservator, or by the person's personal representative if the person is deceased. The member of the clergy may claim the privilege on behalf of the person. The authority so to do is presumed in the absence of evidence to the contrary.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994)

Return to top

Rule 507. Political Vote.

Every person has a privilege to refuse to disclose the tenor of the person's vote at a political election conducted by secret ballot unless the vote was cast illegally.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1522 effective October 15, 2003)

Return to top

Rule 508. Trade Secrets.

A person has a privilege, which may be claimed by the person or the person's agent or employee, to refuse to disclose and to prevent other persons from disclosing a trade secret owned by the person, if the allowance of the privilege will not tend to conceal fraud or otherwise work injustice. When disclosure is directed, the judge shall take such protective measures as the interests of the holder of the privilege and of the parties and the furtherance of justice may require.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994)

Return to top

Rule 509. Identity of Informer.

(a) **Rule of Privilege.** The United States, the State of Alaska and sister states have a privilege to refuse to disclose the identity of a person who has furnished information relating to or assisting in an investigation of a possible violation of law to a law enforcement officer or member of a legislative committee or its staff conducting an investigation.

(b) **Who May Claim.** The privilege may be claimed by an appropriate representative of the public entity to which the information was furnished by the informer.

(c) **Exceptions.**

(1) *Voluntary Disclosure -- Informer a Witness.* No privilege exists under this rule if the identity of the informer or the informer's interest in the subject matter of the communication has been disclosed to those who would have cause to resent the communication by a holder of the privilege or by the informer's own action, or if the informer appears as a witness for the prosecution.

(2) *Testimony on Merits.*

(i) If a party claims that a government informer may be able to give testimony necessary to a fair determination of the issue of guilt, innocence, credibility of a witness testifying on the merits, or punishment in a criminal case, or of a material issue on the merits in a civil case to which the state is a party, and if the government invokes the privilege, the party shall be given an opportunity to show that the party's claim is valid. The judge shall hear all evidence presented by the party and the government, and both sides shall be permitted to be present with counsel during the presentation of evidence, subject to subdivision (c) (2) (ii) of this rule.

(ii) If the government requests an opportunity to submit to the court, by affidavit or testimony or otherwise, evidence concerning the information possessed by an informant, which submission might tend to reveal the informant's identity, the judge shall permit the government to make its submission without disclosure to the other party. Neither the attorney for the government, nor the other party or the other party's attorney may be present when the judge is examining the *in camera* submission. Although the submission generally will consist of affidavits, the judge may direct that witnesses appear before the judge, without the government or the other party present, to give testimony.

(iii) If the judge finds that there is a reasonable possibility that the informant can give the testimony sought, and if the government elects not to disclose the informant's identity, the judge shall, either on motion of a party or sua sponte, dismiss criminal charges to which the testimony would relate if the informant's testimony is material to guilt or innocence. In criminal

proceedings in which the informant's testimony is not material to guilt or innocence and in civil proceedings the judge may make any order that justice requires.

(iv) Evidence submitted to the judge shall be sealed and preserved to be made available to the appellate court in the event of an appeal, and the contents shall not otherwise be revealed without consent of the government.

(3) *Legality of Obtaining Evidence.*

(i) When a defendant challenges the legality of the means by which evidence was obtained by the prosecution and the prosecution relies upon information supplied by an informer to support its claim of legality, if the judge is not satisfied that the information was received from an informer reasonably believed to be reliable or credible the judge may require the identity of the informer to be disclosed. In determining whether or not to require disclosure, the judge shall hear any evidence offered by the parties and both the defendant and the government shall have the right to be represented by counsel.

(ii) If the judge determines that disclosure of the informant's identity is necessary, upon request by the prosecution the disclosure shall be made to the court alone, not to the defendant. The judge may, if necessary, examine the informant or other witnesses about the informant, but such examination will be *in camera* and neither the defendant nor the prosecution shall be present or represented.

(iii) If disclosure of the identity of the informer is made to the court and not to the defendant, the record thereof shall be sealed and preserved to be made available to the appellate court in the event of an appeal, and the contents shall not otherwise be revealed without consent of the prosecution.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994)

Return to top

Rule 510. Waiver of Privilege by Voluntary Disclosure.

A person upon whom these rules confer a privilege against disclosure of the confidential matter or communication waives the privilege if the person or

the person's predecessor while holder of the privilege voluntarily discloses or consents to disclosure of any significant part of the matter or communication. This rule does not apply if the disclosure is itself a privileged communication.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994)

Return to top

Rule 511. Privileged Matter Disclosed Under Compulsion or Without Opportunity to Claim Privilege.

Evidence of a statement or other disclosure of privileged matter is not admissible against the holder of the privilege if the disclosure was (a) compelled erroneously or (b) made without opportunity to claim the privilege.

(Added by SCO 364 effective August 1, 1979)

Return to top

Rule 512. Comment Upon or Inference From Claim of Privilege--Instruction.

(a) **Comment or Inference Not Permitted.** The claim of privilege, whether in the present proceeding or upon a prior occasion, is not a proper subject of comment by judge or counsel. No inference may be drawn therefrom.

(b) **Claiming Privilege Without Knowledge of Jury.** In jury cases, proceedings shall be conducted, to the extent practicable, so as to facilitate the making of claims of privilege without the knowledge of the jury.

(c) **Jury Instruction.** Upon request, any party against whom the jury might draw an adverse inference from a claim of privilege is entitled to an instruction that no inference may be drawn therefrom.

(d) **Application -- Self-Incrimination.** The foregoing subsections do not apply in a civil case with respect to the privilege against self-incrimination.

Re: Senate Bill 224

Dear Senator Egan:

On behalf of NEA-Alaska, I wish to express our support for Senate Bill 224, which makes privileged certain communications between employees and employee union representatives. It is important that members feel the conversations they have with their union representatives remain confidential. When members have the confidence to speak openly with union representatives, NEA-Alaska is better able to advocate for its members.

I thank you and the Senate Labor and Commerce committee for introducing and hearing this important legislation.

Sincerely,

Barb Angaiak

RE: Senate Bill 224, Privileged Communications

Dear Senator Egan:

On behalf of our Teamster Local 959 Business Representatives and the members that we represent around the state, we wish to thank the Committee for introducing this legislation in regards to the impact of privileged communications. Senate Bill 224 would allow free candid and confidential conversations between employees and their Business Representative. In addition, this bill allows the Business Representatives to fully investigate workplace disputes. Senate Bill 224 establishes privilege similar to the "attorney-client" privilege, between a Business Representative and member. This correlates to conversations that occur during the administration of the Collective Bargaining Agreement.

Additionally, previous legislatures have recognized other privileges for persons other than doctors, lawyers and spouse, such as:

- Evident Rule 503, protects communication between clients and lawyers' representatives;
- 08.63.200, protects communications between marital and family therapists and their patients;
- 08.95.900, protects communications between licensed social workers, their employees and clients;
- 08.86.200, protects communications made to "psychological associates";
- 08.80.315, protects records of pharmacists and communications between pharmacists and patients;
- 08.04.662, protects communications of accountants and their clients.

Considering the above examples and Senate Bill 224, we believe the merit of privilege is to ensure that members, clients, and patients can confide freely in their

Representatives or provide support in order to help them reduce problems, resolve litigations, and/or get appropriate service.

For these reasons, we thank you for introducing this important bill.

Sincerely,

RE: Support for Senate Bill 224 & House Bill 327

Dear Labor and Commerce Committee Member:

For almost 40 years Public Employees Local 71 has had the privilege to serve as a representative for the Labor Trades and Crafts positions with the State of Alaska and have added other Public Employee groups along the way. During this time we have worked with the employers to come to agreements on tough issues with our members and in most cases both sides have come away feeling better about the situation than going in.

What we do as a labor union is ensure that our union members will have representation in the work place as set out in the National Labor Relations Act and further expanded in the Weingarten decision that states that a union member had the right to have a union representative at investigatory meetings that could lead to discipline.

Public Employees deserve the same rights that union members in the private sector enjoy. It has been our experience that having the employee's representative present at such meetings expedites the resolution of grievances as well as fosters a cooperative relationship between the employer, the employee and the union.

We at Public Employees' Local 71 strongly urge you to support and employee's right to be represented in the work place.

Sincerely,

Robert Johnson

Re: SB 224: Union-Employee Privilege
ACLU Letter of Support

Dear Chair Egan & Vice-Chair Paskvan:

Thank you for the opportunity to provide this Letter in Support of Senate Bill 224.

The American Civil Liberties Union of Alaska (ACLU) represents thousands of members and activists throughout Alaska who seek to preserve and expand the individual freedoms and civil liberties guaranteed by the United States and Alaska Constitutions. **From that perspective, we wish to offer our statement of support for SB 224.**

Constitutional Values Served by the Bill

While we do not argue that SB 224 is required by the Alaska or federal Constitutions, we do note that the bill supports some of the important rights outlined by both constitutions.

The federal constitution prohibits passing any laws that would infringe "the right of the people peaceably to assemble, and to petition the Government for a redress of grievances." U.S. Const., Amend. I. The Alaska Constitution prohibits any violation of the right "peaceably to assemble, and to petition the government." Alaska Const., Art. I, Sec. VI.

Among many groups of people who may petition the government about their grievances are public employees who may wish to ask for changes in the terms of their employment or to complain about mistreatment. Contesting

unfair disciplinary treatment and communicating with a union representative are aspects of this right.

While confidentiality is not constitutionally required as to all communications relating to the right to seek redress of grievances, confidentiality can be an important element of promoting full and frank discussions of those grievances. The privilege as described in the bill will assist in promoting the rights of public employees to seek redress of grievances from the government, by ensuring that communications with union representatives will not be used against them later.

That the bill presents a qualified privilege which can be overcome "as required by the superior court following a hearing in camera" ensures that documents and communications that are appropriately disclosed in the interests of justice should be so disclosed. While the bill does not lay out the grounds by which the Superior Court should require disclosure, typical considerations by a court in such a circumstance include whether the information is available from another source, whether the party seeking the information has exhausted all other alternatives, whether the information sought is "highly relevant" or merely cumulative with other evidence, and whether the party seeking the information has a "compelling need" for it. *See, e.g., Newton v. National Brodcasting Co.*, 109 F.R.D. 522, 527 (D. Nev. 1985) (discussing how a qualified journalist privilege may be overcome).

The committee may wish to consider whether it wishes to give more specific guidance to any courts considering the privilege to decide how and when such a privilege should be overcome.

Conclusion

We hope that the Labor and Commerce Committee will pass SB 224.

Thank you again for letting us share our thoughts. Please feel free to contact the undersigned if you have any questions or wish additional information.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

TESTIMONY IN SUPPORT OF SB 224 ON PRIVILEGED UNION COMMUNICATIONS

I am here to testify in support of SB 224. From my own experience I can tell you that it is vital to the rights of individual workers and to the rights of workers to organize effectively.

For the past two years I have been litigating on behalf of a state employee who was fired under outrageous circumstances. To add to his injuries, the State adopted a litigation tactic that is unfair and offensive.

The state required him, like every other state employee, to pursue his claim through an administrative process before he was allowed to file a lawsuit. The state required him, like every other state employee, to use a union official as his advocate and banned attorneys from participating in the process.

Then, when the administrative process ended without resolving the dispute, he was free to bring a lawsuit; but when he did, *the state subpoenaed all the union records related to him*, including all correspondence and emails and notes of meetings between the employee and his union advocate, and even correspondence from his private attorney, related to tactics, to evaluations of the case, and to settlement positions. In short, according to the State, nothing that passes between the employee and his union advocate is private, no matter that for decades the unions and their members had thought they were private. It is a tactic that would be considered unethical and blatantly wrong if used against a litigant who had an attorney in the administrative phase; but here the state itself banned use of an attorney.

Why does this matter?

Confidentiality between an advocate and his client has for centuries been recognized as essential to a fair legal system. Allowing the other side in litigation to obtain all the information and correspondence that has always been considered private would destroy the relationship between advocate and client. This is so whether or not the advocate is an attorney. It would, as the California Supreme Court said, be ridiculous to think that the only advice a union advocate could tell his client would be, "Don't talk to me."

If there were no right to confidentiality, an employer could call a union advocate as a witness against his own client;

If there were no right to confidentiality between a union and its members, an employer could subpoena the other side's notes and minutes of private strategy sessions during collective bargaining sessions; this has already happened in other states.

If there were no right to confidentiality, an employer could subpoena confidential reports of wrongdoing so it could intimidate and punish workers who were reporting misconduct through their union;

If there were no right to confidentiality, no union member would ever talk to his union advocate and the entire system of administrative remedies for worker grievances would become a meaningless nullity.

Why is the Issue Coming up Now?

For decades this tactic was not used by the State or any other employer in Alaska. When it was tried Outside, it almost always failed. But now the Department of Law has decided to try it and has vigorously, if wrongly, defended it. It is on the table right now, being used against public employees right now, and if not challenged is likely to be used against all workers who are members of organized labor. In our case, the state superior court judge refused to stop the practice and said we should take it to the Legislature or to the Alaska Supreme Court. We did appeal his ruling to the Alaska Supreme Court, but it is likely to be many months before the court makes a ruling.

Why should the Legislature address it Now?

This obnoxious practice is before the Alaska Supreme Court. So why should the Legislature use its own judgment on it instead of letting the court do it?

The answer is that the Alaska Supreme Court is doing something different from what you are doing: It is examining whether the Department of Law's tactic violates the Constitution's requirement of due process. It is not deciding whether prohibiting the practice is a good idea. It is is far more difficult to establish a constitutional violation than to decide whether the tactic is basically unfair and repugnant.

You have the ability right now to decide whether union members should be protected from this outrageous tactic. We urge you to pass this bill.

JURISDICTIONAL STATEMENT 1

STATEMENT OF THE ISSUES PRESENTED FOR REVIEW 2

STATEMENT OF THE CASE 2

STANDARD OF REVIEW 4

SUMMARY OF ARGUMENT 4

ARGUMENT 5

I. Courts have consistently recognized a due process right to representation in legal proceedings involving employment rights. The right to representation includes the right to confidentiality between client and legal representative. 5

A. Employment is a right and a public employer may not deprive an employee of that right without due process 5

B. There is a constitutional right to counsel in civil cases arising from the due process clause 7

II. Confidentiality Between Advocate And Client Is Critical To Effective Representation 8

III. Courts And Labor Agencies Have Consistently Recognized Confidentiality As a Due Process Right Where Lay Advocates Are Permitted, But Have Varied In Whether There Is a Broader Union Privilege In Other Contexts. 10

A. State courts and agencies. 10

California: 10

New York: 11

Illinois:: 13

New Hampshire: 14

New Jersey: 15

B. Federal Courts: 15

C. Federal Administrative Agencies 18

D. Summary 20

IV. The courts universally agree that they can recognize a privilege when constitutional due process requires it; beyond that, it is a matter of whether courts or legislatures set the basic rules governing legal processes. 20

V. Joint privilege: Any reason not to recognize joint representation? Two positives make a negative? 23

VI. The Issues in this Case regarding Confidentiality Privileges Need a Thorough Review... 24

A. Lay representation in the courts of Alaska. 24

B. Mediations. 25

C. Statutory Permission for Lay Representation 26

D. Calling the advocate as a witness against his own client. 26

E. Demanding the state's confidential documents and subpoenaing its staff as witnesses. ..27

F. Confidentiality of collective bargaining strategy. 27

G. Role of unions in prelitigation dispute resolution. 28

PROVISIONS RELIED ON

U.S. Const. 1st Amend.

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

U.S. Const. 14th Amend. Sec. 1

Section. 1. All persons born or naturalized in the United States and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Alaska Const. Art. 1, Sec. 1. Inherent Rights.

This constitution is dedicated to the principles that all persons have a natural right to life, liberty, the pursuit of happiness, and the enjoyment of the rewards of their own industry; that all persons are equal and entitled to equal rights, opportunities, and protection under the law; and that all persons have corresponding obligations to the people and to the State.

Alaska Const. Art. 1, Sec. 7 Due Process.

No person shall be deprived of life, liberty, or property, without due process of law. The right of all persons to fair and just treatment in the course of legislative and executive investigations shall not be infringed.

Alaska Const. Art. 12, Sec. 6 Merit System.

The legislature shall establish a system under which the merit principle will govern the employment of persons by the State.

Alaska Statute 23.40.080. Rights of public employees.

Public employees may self-organize and form, join, or assist an organization to bargain collectively through representatives of their own choosing, and engage in concerted activities for the purpose of collective bargaining or other mutual aid or protection.

Alaska R. Evidence 408

Compromise and Offers to Compromise.

Evidence of (1) furnishing or offering or promising to furnish or (2) accepting or offering or promising to accept, a valuable consideration in compromising or attempting to compromise a claim which was disputed as to either validity or amount, is not admissible to prove liability for or invalidity of the claim or its amount. Evidence of conduct or statements made in compromise negotiations is likewise not admissible. This rule does not require the exclusion of any evidence otherwise discoverable merely because it is presented in the course of compromise negotiations. This rule also does not require exclusion when the evidence is offered for another purpose, such as proving bias or prejudice of a witness, negativing a contention of undue delay, or proving an effort to obstruct a criminal investigation or prosecution, but exclusion is required where the sole purpose for offering the evidence is to impeach a party by showing a prior inconsistent statement.

Alaska R. Evidence 501

Rule 501. Privileges Recognized Only as Provided.

Except as otherwise provided by the Constitution of the United States or of this state, by enactments of the Alaska Legislature, or by these or other rules promulgated by the Alaska Supreme Court, no person, organization, or entity has a privilege to:

(1) refuse to be a witness; or

(2) refuse to disclose any matter; or

(3) refuse to produce any object or writing; or

(4) prevent another from being a witness or disclosing any matter or producing any object or writing.

Collective Bargaining Agreement with the State for AFSCME Local 52, Sec. 103

Exclusive Representation.

The Employer will not negotiate or handle grievances with any individual or employee organization other than the Union with respect to terms and conditions of employment of bargaining unit members in the GGU. When individuals or organizations other than the Union request negotiations or seek to represent bargaining unit members in grievances or to otherwise represent bargaining unit members in Employer/employee matters, the Employer shall advise them that the Union is the exclusive representative for such matters. Similarly, the Union will so advise individuals or organizations making such requests.

JURISDICTIONAL STATEMENT

This case comes on a Petition for Review from an order of the trial court of the Hon. Philip M. Pallenberg, dated March 17, 2011. This court granted the Petition for Review on April 27, 2011, and ordered briefing. This court has jurisdiction under AS 22.05.010.

STATEMENT OF THE ISSUES PRESENTED FOR REVIEW

When a State of Alaska employee who is a union member is terminated, the State requires that the employee pursue a mandatory grievance process before he can file suit. The State requires that the employee be represented by the union in that process and does not allow a private attorney to participate. When the grievance process has ended and the employee then files suit, may the State, in the subsequent litigation, subpoena all internal union documents, communications, and files related to the member, including all communications between union officials and the member related to the grievance and all communications between the union and the member's private attorney working on the same matter? Does a lay advocate-client privilege similar to an attorney-client privilege apply when the party is not allowed to have his attorney represent him but only a lay advocate?

STATEMENT OF THE CASE

The petitioner, Russell Peterson, a former State employee, filed an action for unjust termination against the State.[1] [Exc. 1] Before filing the court case, he exhausted his administrative remedies by filing a grievance through his union, as required. [Exc. 51] Under the Collective Bargaining Agreement with the State, only a union representative was allowed to represent the employee in the grievance process; his private attorney was not permitted to

[1] The State claimed that Mr. Peterson had failed to note on his employment application that he had been convicted of a felony almost twenty years earlier. Mr. Peterson's defense is that he was told by a State employment officer that he did not need to list offenses that occurred so long ago, that he had a genuine confusion about whether old offenses were juvenile adjudications or adult convictions, and that the State had known about his record soon after he was hired and had decided that it was not a firing offense since he has had a clean record since moving to Alaska many years ago. [Exc. 1-6] These issues remain to be tried.

participate. [Exc. 20][2] After the grievance process ended and the employee filed suit, the State's attorney attempted to obtain discovery in several problematic ways, including a subpoena of all the union's records related to the member and his grievance, including all private communications, notes, and files related to the grievance, and all communications from Mr. Peterson's private attorney to the union.[3]

Mr. Peterson objected to this and related demands,[4] on the basis that communications with his union representatives should be considered privileged as the union representative was acting in the role of an attorney when no attorney was allowed, and that to allow one side in litigation to have access to all the private factual and strategic communications between the opposing party and his legal representative would violate due process. U.S.

---

[2] The entire collective bargaining agreement in effect at the time of the incidents in this case is at http://www.afscmelocal52.org/component/option,com_docman/task,doc_download/gid,258/.

[3] The initial subpoena was quashed by the court because the State's attorney had improperly used a court form intended for use in children's cases instead of a subpoena duces tecum to a deposition. [Exc 28, 31] The state's attorney then served a subpoena in proper form. [Exc. 50]

[4] The State also subpoenaed all records of Mr. Peterson's mental health provider, including a memo from his attorney to his psychiatrist outlining the likely course of litigation so that the stresses of the litigation could be factored into his mental health treatment. [Exc. 158-175] And the State seized hundreds of emails from and to Mr. Peterson which were transmitted over the State's email system during his employment, including emails to his union stewards and other union officials and emails to his private attorney, marked as "confidential." [*Id.*] The trial court ruled that the memo to the psychiatrist must be produced because by writing to someone other than the client, the attorney waived the client's privilege, notwithstanding the fact that the psychiatrist also had a privilege for patient/client communications. But the trial court ruled that the emails to and from union officials could not be seized because Mr. Peterson had a reasonable expectation of privacy in those communications. [Exc. 169-175] Neither of those rulings is the subject of this Petition.

Const., 14th Amend., Sec. 1; Alaska Const. Art. 1, Sec. 7.

On March 1, 2011, the trial court ruled that the State could obtain all the union records because the attorney/client privilege applies only to attorney representation, not to a non-lawyer advocate performing the same function. [Exc. 159-175] Petitioner contends that it is a fundamental violation of due process to permit one side in litigation to discover private communications, opinions, and strategies between the other party and his legal advocate. There had been a trial date but the court took it off the calendar so the State could pursue its discovery claims.

STANDARD OF REVIEW

Rulings on discovery and on discovery are generally reviewed for abuse of discretion. *Christensen v. NCH Corp.*, 956 P. 2d 468 (Alaska 1998). However, when, as here, the issue before the court is purely one of law, the court is not bound by the lower court's decision; consequently, the "clearly erroneous" standard used in reviewing a trial court's factual findings is inapplicable. *Day v. A & G Construction Co.*, 528 P.2d 440, 443 n.3 (Alaska 1974). The court will adopt the rule of law that is most persuasive in light of precedent, reason, and policy. *Guin v. Ha*, 591 P. 2d 1281 (Alaska 1979).

SUMMARY OF ARGUMENT

State and federal courts and administrative agencies have long recognized that when the government permits or – as in this case – *requires* lay advocates to be the sole legal representatives of employees in legal proceedings, the representation must have the same privilege of confidentiality that adheres when the advocate is a bar member. Some courts and agencies have recognized a broader union privilege that precludes the government from

forcing union officials to divulge confidential discussions during the collective bargaining process; the State's demands here may be an opening wedge for such a demand, but existence of a broader privilege need not be decided in this case. Where, as here, a constitutional due process right is at issue, the courts have universally held that a court may recognize a privilege without legislative action, and this court has done so on several occasions.

ARGUMENT

I. Courts have consistently recognized a due process right to representation in legal proceedings involving employment rights. The right to representation includes the right to confidentiality between client and legal representative.

A. Employment is a right and a public employer may not deprive an employee of that right without due process

Alaska has long recognized that employment is a right, and a public employer may not deprive an employee of that right without due process.[5] *See* Alaska Constitution, Art. I, Sec. 1, and Article 12, Section 6 ("This constitution is dedicated to the principle [...] that all persons have a natural right to . . . the enjoyment of the rewards of their own industry.").

Due process includes the right to notice and an opportunity to be heard.[6] When due process is implicated, there is a right to counsel, including in civil cases.[7] As this court held,

[5] *Hilbers v. Municipality of Anchorage*, 611 P.2d 31, 35 (Alaska 1980); *Herscher v. State, Dep't of Commerce*, 568 P.2d 996, 1002 (Alaska 1977).

[6] *Casey v. City of Fairbanks*, 670 P.2d 1133 (Alaska 1983).

[7] *Langfeldt-Haaland v. Saupe Enterprises, Inc.*, 768 P.2d 1144 (Alaska 1989); *Reynolds v. Kimmons*, 569 P.2d 799 (Alaska 1977).

> "The fundamental requisite of due process of law is the opportunity to be heard." Grannis v. Ordean, 234 U.S. 385, 394, 34 S.Ct. 779, 58 L.Ed. 1363, 1369 (1914) (citations omitted). *See* Nichols v. Eckert, 504 P.2d 1359 (Alaska 1973); Frontier Saloon, Inc. v. Alcoholic Beverage Control Board, 524 P.2d 657 (Alaska 1974). And, "[t]he right to be heard would be, in many cases, of little avail if it did not comprehend the right to be heard by counsel." Powell v. Alabama, 287 U.S. 45, 68-69, 53 S.Ct. 55, 64, 77 L.Ed. 158, 170 (1932).

Otton v. Zaborac, 525 P. 2d 537, 539 (Alaska 1974). Before a government employee may be fired, a hearing must be held at which the employee may present his own defense by testimony and other evidence in an adversarial hearing. *North Slope Borough v. Barraza*, 906 P.2d 1377 (Alaska 1995).[8] And this court has noted that the requirement of an adversarial hearing may, in limited circumstances under a collective bargaining agreement, be waived when there are "fair, reasonable, and efficacious procedures by which employer-employee disputes may be resolved." *Cassel v. State Dept of Admin.*, 14 P.3d 278, 286 (Alaska 2000). Persons who are employed other than "at will" have a sufficient property interest in continuing their employment absent just cause for their removal, to require that they be given notice and an opportunity to be heard under the due process clause of the Alaska constitution before their employment is terminated. *Casey v. City of Fairbanks*, 670 P2d 1133 (Alaska 1983).[9]

---

[8] *North Slope Borough v. Barazza* cited *Storrs v. Municipality of Anchorage*, 721 P.2d 1146 (Alaska 1986) and *Nichols v. Eckert*, 504 P.2d 1359, 1365 (Alaska 1973), for the right to an adversarial hearing with witnesses. *See also Cassel v. State, Department of Administration*, 14 P.3d 278, 286 (Alaska 2000), which affirms the right of a terminated public employee to present evidence, by testimony or otherwise, in his own defense.

[9] *See also FV American Eagle v. State*, 627 P.2d 284 (Alaska 1982); *Crutchfield v. State*, 627 P.2d 182 (Alaska 1980).

B. There is a constitutional right to counsel in civil cases arising from the due process clause

There is a constitutional right to counsel in civil cases arising from the due process clause, *Langfeldt-Haaland v. Saupe Enters*, 768 P.2d 1144 (Alaska 1989).[10] As noted above, this court has held that the "right to be heard" would be of little value if it did not include "the right to be heard by counsel."[11]

In this case, the State has prohibited private attorneys from appearing as counsel and mandated the use of union officials to represent the members. Section 103 of the collective bargaining agreement between the State and the General Government Unit of State employees is explicit regarding who may represent an employee and who may not:

> The Employer will not negotiate or handle grievances with any individual or employee organization other than the Union with respect to terms and conditions of employment of bargaining unit members in the GGU. When individuals or organizations other than the Union request negotiations or seek to represent bargaining unit members in grievances or to otherwise represent bargaining unit members in Employer/employee matters, the Employer shall advise them that the Union is the exclusive representative for such matters. Similarly, the Union will so advise individuals or organizations making such requests.

[Exc. 20] Thus the State has explicitly and emphatically decreed that attorneys may not represent employees in Mr. Peterson's situation, but only union officials may do so.

The question then is, what becomes of the rights associated with legal representation

---

[10] *Accord, Otton v. Zaborac*, 525 P.2d 537 (Alaska 1974).

[11] *Otton v. Zaborac*, 525 P.2d 537 (Alaska 1974), quoting from *Powell v. Alabama*, 287 U.S. 45, 68-69, 53 S.Ct. 55, 64, 77 L. Ed. 158, 10 (1932).

– such as client confidentiality – in a matter requiring constitutional due process standards, when the State has prohibited attorneys from representing a party.

II. Confidentiality Between Advocate And Client Is Critical To Effective Representation.

This court has consistently upheld the importance of confidentiality between a client and his legal representative. Evidence Rule 503 offers substantial protections for such communications in almost all instances. This court held that the attorney-client privilege extends to client communications with a non-lawyer working with a lawyer in legal representations.[12] Although the facts of that case differ from this case, the court made certain points that matter here:

> ...the very heart of the common-law privilege was to protect the facts given by the client to his attorney. The privilege was based on the necessity that an attorney have the full disclosure of the facts from his client.[13]

The court has also noted the important public policy purpose of the privilege:

> Other jurisdictions have held, however, that lawyer-client privilege is more than just a testimonial exclusion. "The privilege against disclosure is essentially a means for achieving a policy objective of the law. The objective is to enhance the value which society places upon legal representation by assuring the client full disclosure to the attorney unfettered by fear that others will be informed. . . . If client and counsel must confer in public view and hearing, both privilege and policy are stripped of value." The Sacramento Newspaper Guild v. Sacramento County Bd. of Supervisors, 263 Cal.App.2d 41, 53-54, 69 Cal.Rptr. 480 (1968) (since superseded by statute).[14]

---

[12] *American Nat. Watermattress Corp. v. Manville*, 642 P.2d 1330, 1333-1334 (Alaska 1982).

[13] *Id.* at 1334, citations omitted.

[14] *Cool Homes, Inc. v. Fairbanks North Star Borough*, 860 P.2d 1248, 1261 n.23 (Alaska, 1993).

The court has stated that the attorney-client privilege is entitled to "greater solicitude" than the physician-patient privilege.[15] This makes relevant the court's treatment of the physician-patient privilege. In *Allred v. State*, 554 P.2d 411 (Alaska 1976), the court found that a common law psychotherapist-patient privilege exists, based on consideration of the following factors that apply to all claims of privilege:

> Professor Wigmore has proposed four canons to be used as a basis for determining whether, for any particular relationship, a common law privilege is desirable. These are:
>
> > (1) The communications must originate in a confidence that they will not be disclosed.
> >
> > (2) This element of confidentiality must be essential to the full and satisfactory maintenance of the relation between the parties.
> >
> > (3) The relation must be one which in the opinion of the community ought to be sedulously fostered.
> >
> > (4) The injury that would inure to the relation by the disclosure of the communications must be greater than the benefit thereby gained for the correct disposal of litigation. 8 J. Wigmore, Evidence, § 2285. (Emphasis in original).[16]

The court found that the need for confidentiality is essential in order to make the relationship work. So the question then becomes, is the need to maintain confidentiality between a person in a legal dispute and his authorized advocate any less critical when the advocate is not a bar member; and does it make a difference that the State itself has prohibited private attorneys from participating in the process in this matter.

[16] 554 P.2d at 417.

III. Courts And Labor Agencies Have Consistently Recognized Confidentiality As a Due Process Right Where Lay Advocates Are Permitted, But Have Varied In Whether There Is a Broader Union Privilege In Other Contexts.[17]

A. State courts and agencies.

Several states have addressed this issue or related ones.

California: In California, the seminal case is *Welfare Rights Org. v. Crisan*, 661 P.2d 1073, 33 Cal 3d 766, 90 Cal. Rptr 919 (Cal. 1983). In *Crisan*, a statute permitted welfare recipients to be represented by lay advocates, although attorneys were not barred, as here. The California Supreme Court held that the privileges that would otherwise be applicable to an attorney-client relationship also apply to the lay relationship when the Legislature has created a system of lay representation. The court held,

> [T]he considerations which support the privilege are so generally accepted that the Legislature must have implied its existence as an integral part of the right to representation by lay persons. Otherwise that right would, in truth, be a trap by inducing confidential communications and then allowing them to be used against the claimant. We do not attribute such a sadistic intent to the Legislature.

661 P.2d at 1076-77.[18] The court also said,

---

[17] The best analyses of caselaw on this topic is found in these articles: Moberly, Michael D., Extending a Qualified Evidentiary Privilege to Confidential Communications between Employees and Their Union Representatives, 5 Nev. L.J. 508 (2004-2005); Rubinstein, Mitchell, Is a Full Labor Relations Evidentiary Privilege Developing?, 29 Berkeley J. Emp. & Lab. Law 221 (2008). Also useful is Goldman, David, Union Discovery Privileges, The Labor Lawyer Vol. 17. No. 2, p. 241 (2001), which analyzes the First Amendment protections against obtaining confidential union information on members and bargaining strategy under the First Amendment and other authorities.

[18] Other courts have noted that this privilege does not extend to immunizing underlying factual information known by the union official, see *American Airlines, Inc. v. Superior Court*, 8 Cal. Rptr. 3d 146 (Cal. App. 2004); *Walker v. Huie*, 142 F.R.D. 497, 500 (D.Utah 1992). The

> As Justice Broussard noted at oral argument, the Legislature could not have intended that the only sound advice the authorized representative could give was, "Don't talk to me."[19]

Subsequently a California appeals court held that *Crisan* did not create a broad union-member privilege but was limited to the situation where the state itself created a system of lay representation, or where "required by constitutional principles, state or federal." *American Airlines, Inc. v. Superior Court*, 8 Cal Rptr 3d 146, 114 Cal. App. 881 (Cal. App. 2004), citing *Crisan, id.*, 661 P.2 1073.

New York: In New York, there are two key cases. In *City of Newburgh v. Newman*, 70 A.D. 2D 362, 421 NYS 2d 673 (1979), a police commissioner had questioned an officer of a police union regarding his observations of and communications with a member who had sought union advice and assistance concerning discipline charges against him. The court upheld the ruling of the Public Employee Relations Board that such questioning was improper. It quoted with approval the board's finding that

> An aspect of the right of public employees to organization and representation is the privilege of consulting with appropriate union officials as to matters affecting them as employees. Such consultations are in the nature of internal communications and, like other internal union affairs, they may be deemed confidential by the union and the employees. To invade that confidentiality tends to inhibit the employees from seeking the advice of their union representatives as to matters affecting their interest and similarly to deter the representatives from proffering advice, if sought. Thus, questioning by responsible representatives of an employer as to private internal union affairs such as events transpiring during discussions relating to the rights of

---

defendants here have gone well beyond a discovery request for factual information and made a sweeping demand for materials that undoubtedly would be privileged if held by an attorney.

[19] *Welfare Rights Org. v. Crisan*, 661 P.2d 1073, 1076-77 (Cal. 1983).

> employees in the face of anticipated disciplinary charges interferes with the full measure of the protected right of organization and representation accorded by the Taylor Law.[20]

[70 A.D. 2D 364-5.] The court found that its ruling did not create a common-law privilege "on a par with that of attorney-client" but found that its ruling was "strictly limited to communications between a union member and an officer of the union, and operates as against the public employer, on a matter where the member has a right to be represented by a union representative." *Id.* at 366.

In *Seelig v. Shepard*, 578 N.Y.S. 2D 965, 152 Misc. 2d 699 (Supr. Ct. 1991), investigators sought testimony of a union official on his communications with members, and the official objected. The court summarized the need to protect such communications:

> Petitioner does not have, and, as I understand him, does not even claim to have, a broad common-law privilege, an analogue of the attorney-client privilege. There is, however, plainly a need, for the benefit of society as a whole, for unions to be free to function without harassment and interference from government. Accordingly, there arises, in the context of rules regulating relations between management and labor, a species of privilege for labor union leaders. If unions are to function, leaders must be free to communicate with their members about the problems and complaints of union members without undue interference. Members must be able to have confidence that what they tell their representatives on such subjects cannot be pried out of the representatives by an overzealous governmental agency. Union members must know and be secure in feeling that those whom they elect from among their ranks will be their spokespersons and representatives, not the unwilling agents of the employer. The union leadership councils must be free to confer among themselves, exchange views, make plans and arrive at negotiating strategies without intrusion from the organs of official power.

152 Misc. 2d at 701-2, 578 N.Y.S. 2d at 967. The court also held that requiring an official to

---

[20] The Taylor Law is New York State's statutory recognition of the rights of workers to organize and be represented through unions, the equivalent to Alaska Statutes 23.40.070-260 and specifically AS 23.40.080.

testify on communications with members could violate the members' associational rights under the First Amendment (U.S. Const. 1st Amend.) due to the chilling effect of compelled disclosure.[21]

Seelig was followed by *District No. 1-PCD v. Apex Mar Co.*, 296 AD 2d 32 (NY App. Div. 2002), in which the court found that an arbitrator illegally allowed an employer to demand a confidential statement by a union member made to a union official; it found that the demand "may have breached the confidentiality protections that have been recognized as attaching to communications between a union member and the union with respect to representation matters." *Id*, at fn. 2.[22]

Illinois: In Illinois a full labor relations privilege has been recognized. In *Illinois Educ. Labor Relations Bd. v. Homer Cmty. Consol. Sch. Dist.*, 547 N.E.2d 182 (Ill. 1989), a reverse situation occurred: During labor negotiations, a teachers union sought the school district's

---

[21] The court held,

> Petitioner contends that compelling his testimony would have a chilling effect on the associational rights of his members. Insofar as intra-Union communications on labor relations matters are concerned, the privilege I have described above is available to protect the members' rights. To the extent that questioning about communications made by petitioner to non-Union members is concerned, such questioning, allowed by the labor relations privilege described above, may well give rise to serious problems for the preservation of First Amendment rights. (*See, New York State Commn. on Govt. Integrity v Congel*, 142 Misc 2d 9 [Sup Ct 1988, Glen, J.], mod 156 AD2d 274 [1st Dept 1989], supra.) *Id* at 703.

[22] A Federal District Court, construing New York law, found that this privilege should be strictly construed to attempts by the employer to obtain confidential information and that it should not be expanded to a full equivalent to an attorney-client privilege. *In re Grand Jury Subpoenas*, 995 F. Supp. 332, 336 (E.D. NY 1998).

documents related to its bargaining strategy. The Illinois Supreme Court found the documents were subject to a qualified labor relations privilege, citing the four factors in *Wigmore* that this court cited in *Allred v. State*, 554 P.2d 411 (Alaska 1976), when it found a psychotherapist-patient privilege. The court also analogized the interest in confidentiality to that attorney work-product privilege (547 N.E. 2d at 187), and quoted from a National Labor Relations Board decision revoking subpoenas for union records of communications with members:

> ...requiring the Union to open its files to Respondent would be inconsistent with and subversive of the very essence of collective bargaining and the quasi-fiduciary relationship between a union and its members.[23]

New Hampshire: The New Hampshire Supreme Court addressed the situation in which a grand jury sought evidence from a union official as part of its criminal investigation, and found that whatever privilege may exist as to employer efforts to gain evidence from a union, there was insufficient reason to find such a privilege as to grand jury testimony. *In re Grand Jury Subpoena*, 926 A.2d 280 (N.H. 2007). The court acknowledged that a state administrative agency had declared an employer subpoena of union records to be an illegal and unfair labor practice, *New Hampshire Troopers Association v. New Hampshire Department of Safety, Division of State Police*, PELRB Decision No. 94-74 (August 31, 1994); and discussed at length in rulings by two federal labor relations boards that found such employer discovery to be illegal.

---

[23] *Berbiglia, Inc., v. NLRB*, 233 N.L. R. B 1476, 1495 (1977) *aff'd* 602 F.2d 839 (8th Cir. 1979). The Illinois court also noted that this labor privilege is qualified and could be overcome by a showing of necessity after an in camera inspection of the documents.

New Jersey: In *Rawlings v. Police Dept of Jersey City*, 627 A.2d 602 (N.J. 1993), a policeman was arrested for sale of drugs. The police department, as his employer, demanded an immediate drug test and sought the testimony of a union official who gave advice to the arrested member. The court rejected the claim that the official was in the position of a lawyer representing a client, with little analysis of what protections may apply, and applied the definition of "lawyer" in the state's evidence code literally.

B. Federal Courts:

Federal courts have held widely diverse opinions. The U.S. Supreme Court has not addressed this specific issue but several of its decisions are relevant to the rights of unions and union members.

In *NLRB v. J. Weingarten, Inc.*, 420 US 251 (1975), the Court held that a union member had a right to have a union representative present during an investigative interview by the employer and commented at length on the importance of allowing a worker to have representation during any interview or questioning. This right – now commonly referred to as the "Weingarten" right – is recognition that an employer may not invade the important relationship between union member and his union officials who are aiding him.[24]

In *Teamsters Local 391 v. Terry*, 494 U.S. 558, 567, 110 S.Ct. 1339, 108 L.Ed.2d 519 (1990), the Court held that there is a right to a jury trial in a suit by a member against a union for failure to represent and breach of its fiduciary duty; the court analyzed the nature of the fiduciary duty to protect its members' interests. It is a logical extension that forcing the

[24] The Supreme Court analyzed issues related to privileges in general in *Jaffee v. Redmond*, 518 U.S. 1 (1996), in which it recognized the psychotherapist-patient privilege.

union to reveal what it has learned in confidence as part of its mandated duty to represent its members in a legal proceeding would breach that relationship of trust by converting the union into management's agent for the collection and transmittal of information that employees might not otherwise choose to reveal.

The Supreme Court has also held that states may not refuse to allow lay representation in a case involving a non-attorney "jailhouse lawyer", except if inmates are given a reasonable alternative, *Johnson v. Avery*, 393 U.S. 483, 490 (1969). The underlying rule adopted by the court is that the party must have access to effective legal representation, whether by an attorney or by a lay advocate.[25]

In *Harvey's Wagon Wheel, Inc. v. NLRB*, 550 F.2d 1139, 1143 (9th Cir. 1976), the Ninth Circuit Court of Appeals found a privilege against a demand for disclosure to an employer of employee statements made to NLRB investigators during an official investigation, citing evidence that employees would not provide information that the NLRB needed in litigation if they knew that the employers could obtain the statements.

A Federal District Court in New York found that a union-member privilege existed but should be limited to attempts by the employer to obtain confidential information and that it should not be expanded to a full equivalent to an attorney-client privilege. *In re Grand Jury Subpoenas*, 995 F. Supp. 332, 336 (E.D. NY 1998).

The union-member privilege was recognized in *International Union v. Garner*, 102

---

[25] The Court has even granted a petition for writ of certiorari filed by a non-attorney jailhouse lawyer. *See Mitchell H. Rubinstein*, Jailhouse Lawyer Granted Cert. By Supreme Court, ADJUNCTLAWPROFESSORBLOG, Feb. 7, 2008, http://lawprofessors.typepad.com/adjunctprofs/2008/02/jailhouse-lawyer.html.

F.R.D. 108 (M.D. Tenn. 1984). The case involved an attempt by an employer to gain access to union authorization cards signed by members and was largely based on application of the First Amendment to confidentiality in the union-member relationship.

In *Patterson v. Heartland Indus. Partners*, 225 F.R.D. 204 (N.D. Ohio 2004), the court rejected a full labor relations privilege under labor principles, but accepted the proposition that First Amendment Freedom of Association principles prevent the disclosure of confidential labor relations information.

On the other hand, some federal courts have been less receptive to union confidentiality. In *Walker v. Huie,*142 F.R.D. 497, 500 (D.Utah 1992), the court found that there was no basis for a union-member privilege that would withstand the duty to testify before a grand jury.

A full union relations privilege was rejected by a magistrate judge in *Ahearn v. Rescare W. Va.*, 208 F.R.D. 565 (S.D. Va. 2002), who found that some protections applied but others did not. A district court rejected a claim of a general privilege of members with union officials, *Atwood v. Burlington Industries Equity, Inc.*, 908 F. Supp. 319 (MD N.C. 1995), and in *McCoy v. Southwest Airlines*, 211 F.R.D.381, 387 (C.D. Cal. 2002), a federal magistrate judge found that no privilege should apply to union representation in a grievance proceeding when there was no express statutory authorization for lay representation, as there was in *Crisan* (and there is in the instant case).

In contrast, in *Woods v. N.J. Dept of Education*, 858 F. Supp. 51, 55 (D. N.J. 1993), which involved Special Education hearings at which lay advocates are permitted, the court found that a privilege attached to communications with the advocate. In *NLRB v. Jackson*

Hospital Corporation, 257 F.R.D. 302, 311-12 (D. D.C. 2009), the court acknowledged the existence of a "de facto attorney-client privilege" where there is no actual attorney-client relationship but one entity is acting like the other's attorney, focusing on statements made by an individual to agency staff who the individual believed were providing him with legal advice. The court found that the "common interest" of the two in a common effort was sufficient to provide a privilege. Conversely, in *Nemecek v. Bd. Of Governors of the University of N.C.*, 2000 WL 33672978 (E.D. N.C. 2002), the court expressed skepticism regarding whether a privilege attached to a lay representative in the absence of a statute permitting lay representation.

C. Federal Administrative Agencies

The most frequently cited administrative ruling on this topic is *Cook Paint and Varnish Co.*, 258 NLRB 1230 (1981). The National Labor Relations Board found that the employer committed an unfair labor practice when it questioned a union steward who had been involved in another employee's grievance arbitration and threatened to discipline the steward if he did not turn over his notes. The Board held,

> Clearly, the scope of Respondent's questioning . . . impinged upon protected union activity. For while questions posed by Nulton may be termed "factual inquiries," the very facts sought were the substance of conversations between an employee and his steward, in the course of fulfilling his representational functions. Such consultation between an employee potentially subject to discipline and his union steward constitutes protected activity in one of its purest forms. To allow Respondent here to compel the disclosure of this type of information under threat of discipline manifestly restrains employees in their willingness to candidly discuss matters with their chosen, statutory representatives. Such actions by Respondent also inhibit stewards in obtaining needed information from employees since the steward knows that, upon demand of Respondent, he will be required to reveal the substance of his discussions or face disciplinary action himself. In short, *Respondent's probe into . .*

> *. protected activities has not only interfered with the protected activities of those two individuals but has also cast a chilling effect over all of its employees and their stewards who seek to candidly communicate with each other over matters involving potential or actual discipline.*

Cook Paint, 258 NLRB at 1232 [emphasis added]. *Cook Paint* built on the earlier NLRB decision in *Berbiglia, Inc.*, 233 NLRB 1476, 1495 (1977), *aff'd* 602 F.2d 839 (8th Cir. 1979), in which the Board noted that the employer was engaged in a "fishing expedition," and that forcing a union to open its files to the employer would be "subversive of the very essence of collective bargaining and the quasi-fiduciary relationship between a union and its members."

See also *U.S. Department of Treasury*,38 F.L.R.A. 1300, 1302 (1991), in which the Federal Labor Relations Agency held that when the employer required the union representative to disclose, under threat of disciplinary action, statements that the employee had made to the representative while the representative was representing him in a disciplinary proceeding, the conversations between the union representative and employee constituted protected union activity.

State administrative agencies in Washington and New Hampshire responsible for public sector labor-management relations held that unions were not required to disclose investigatory notes to employers for use in labor arbitrations. *N.H. Troopers Ass'n v. N.H. Dep't of Safety*, No. P-0754:2, PELRB Decision No. 94-74 (N.H. Pub. Employee Relations Bd. August 31, 1994),[26] (recognizing a labor relations privilege as against the employer, but not as against third parties); *IBEW, Local 77*, No. 15544-U-00-3932, 2003 WL 21658695 (Wash. Pub. Employment Relations Comm'n 2003).

---

[26] Available at http://www.nh.gov/pelrb/Decisions/1994/94-74.pdf.

D. Summary

Courts and administrative agencies in other jurisdictions have been uniform in holding that when lay representation is allowed or required, due process requires recognition of a confidentiality privilege between the party and the lay advocate, at least as to demands from the employer in civil litigation. Most courts that have considered the issue have declined to extend this to a more general labor union privilege or to extend it to confidentiality in grand jury proceedings. Courts and agencies have largely analyzed this issue in terms of the constitutional right of due process, the constitutional right to freedom of association under the First Amendment, and state and federal statutory rights to maintain unions.

In this case, in which lay union representation has been both authorized and mandated by the State, and that same State is now attempting to obtain confidential union files, there is no question that precedents in other jurisdictions would protect the files, notes, and communications of the union in connection with representation of its member. There are literally no cases that would find a lack of a privilege in these circumstances.

IV. The courts universally agree that they can recognize a privilege when constitutional due process requires it; beyond that, it is a matter of whether courts or legislatures set the basic rules governing legal processes.

A subsidiary issue is who has the authority to recognize a union-member privilege in whatever form it may take.

Every court that has reviewed this point has concluded that when a privilege must be recognized to satisfy a constitutional requirement, such as due process in connection with lay

representation, the courts are fully empowered to make such rulings.[27] Indeed, the opening language of the section of the Alaska Rules of Evidence on privileges, ER 501, explicitly states that a person may not refuse to testify or to produce materials "Except as otherwise provided by the Constitution of the United States or of this state, by enactments of the Alaska Legislature, or by these or other rules promulgated by the Alaska Supreme Court." In other words, when there is a constitutional basis for a privilege, it provides protections notwithstanding the fact that neither this court nor the legislature has codified it.

In states in which evidence codes – including recognition of privileges – is a legislative prerogative, not a creation of the courts, there has been a hesitation on the part of some judges to recognize privileges beyond what is necessary to comply with constitutional minimums, e.g., *American Airlines, Inc. v. Superior Court*, op. cit.; *McCoy v. Southwest Airlines*, op cit. It is important to note here that in California and New York, the evidence rules used in courts are creations of the legislatures[28] whereas in Alaska the Rules of Evidence are

---

[27] *Seelig*, op. cit.; *New York State Commn. on Govt. Integrity v Congel*, op. cit.; *Patterson v. Heartland Indus. Partners*, op. cit.; *International Union v. Garner*, op. cit.;

[28] California Evidence Code, found at www.leginfo.ca.gov; 2006 New York Code: Civil Practice Law and Rules, Secs. 4501-4548. It should be noted that in both *Crisan*, op. cit., in California, and *Seelig*, op. cit., in New York, the finding of a union-member privilege was not because of anything in the respective evidence code, but was result of a statutory scheme of lay representation that gave rise to a constitutional right of confidentiality. There is some confusion among the federal courts on recognition of privileges due to the fact that the Federal Rules are initially promulgated by the Supreme Court but then are reviewed and sometimes changed by Congress. As an example of the unsettled nature of the federal view on this matter, although Congress mandated that U.S. District Courts promulgate rules of confidentiality in mediations, the Ninth Circuit has questioned whether the District Courts actually have that authority. The *Facebook Inc. v. Pacific Northwest Software Inc.*, 2011 WL 1346951 (No 08-16745) (9th Cir. Apr. 11, 2011), in which the court stated in dicta, "It's doubtful that a district court can augment the list of privileges by local rule" and stated that

promulgated by the Alaska Supreme Court under its constitutional authority to prescribe rules of process in the courts. There is thus no reason to defer to the legislature in recognizing privileges or other rules of confidentiality.

The history of recognition of privileges in Alaska is instructive. This court recognized the psychotherapist-patient privilege as a matter of common law while ruling on a specific case and only later codified it through inclusion in the Rules of Evidence.[29] Likewise, this court has recognized common-law confidentiality privileges as to non-lawyers working with attorneys,[30] executive privilege,[31] deliberative process privilege,[32] and a conditional privilege for publication of defamatory material based on employer-employee relationship. In none of these cases did the court hold off from recognizing a privilege so that it could first be codified in court rules or so that the legislature could first enact such a privilege. Indeed, while some of those privileges (attorney-client, physician-patient, and several others) are now codified in the Rules of Evidence, several others (executive privilege, deliberative process privilege, conditional privilege regarding defamatory material) have not been added to the Evidence Rules although the court has recognized them and their constitutional basis.

---

privileges are created by federal common law, not local rules. But the rules and authorities for federal evidence rules are sui generis to the federal courts and have no relevance here.

[29] *Allred v. State*, 554 P.2d 411 (Alaska 1976).

[30] *Amer. Nat. Watermattress Corp v. Manville*, 642 P.2d 1330, 1333-4 (Alaska 1982).

[31] *Doe v. Alaska Superior Ct., Third Jud. Dist.*, 721 P. 2d 617 (Alaska1986).

[32] *Capital Info. Group v. Office of Governor*, 923 P. 2d 29 (Alaska 1996).

In short, when there are constitutional grounds for a privilege, the courts, including this one, have never hesitated in recognizing them without a prior codification in rule or in statute.

V. Joint privilege: Any reason not to recognize joint representation? Two positives make a negative?

One of the issues in this appeal concerns the fact that while the union lay representative was representing Mr. Peterson in his grievance, Mr. Peterson also had a private attorney advising him and attempting to advise the union advocate. The State has demanded all communications between the union and the private attorney. The State apparently contends that by communicating with a non-lawyer, the attorney waived the attorney-client privilege, at least as to those communications. What becomes of the confidentiality of Mr. Peterson's communications with his attorney, or his communications with his union representative, when the attorney and the representative confer?

The joint privilege has long been recognized in the criminal context in which attorneys for codefendants work together,[33] as well as in civil cases.[34] Here, the question boils down to the State's "two positives make a negative" claim, i.e., that a communication

---

[33] *See, e.g., US v. Austin*, 416 F. 3d 1016 (9th Cir. 2005); *US v. Henke*, 222 F. 3d 633 (9th Cir. 2000).

[34] In *NLRB v. Jackson Hospital Corp.*, 257 F.R.D. 302, 311-12 (D. D.C. 2009), the court found that the "principle of common interest" protected communications between two entities when they were pursuing a common interest and the cooperating in a joint legal effort.

between one person who has the right to maintain confidentiality of client communications (the private attorney), with another person with a confidentiality privilege (the union representative), results in the two privileges cancelling each other out so there is no longer *any* privilege. As strange as that result may seem, it was the rationale used by the trial court in permitting the State to obtain a confidential memo from the private attorney to his client's psychiatrist regarding how the litigation could affect his treatment. (Exc. 160-163). But applying the joint privilege approach, when two entities with a privilege communicate with a common interest in a common client, there is no logical reason that the privilege should not continue to apply. Any other result – such as two positives cancelling each other out and making a negative – would be absurd and contrary to the rationale for observing a privilege in the first place.

VI. The Issues in this Case regarding Confidentiality Privileges Need a Thorough Review.

Obviously we believe that in this case the trial court's order allowing the State to obtain confidential union records relating to its representation of Mr. Peterson should be reversed without delay. If the ruling is not reversed, there are far-reaching ramifications that should be noted.

A. Lay representation in the courts of Alaska.

It is an everyday occurrence for municipal prosecutions in Alaska to be handled by a paralegal, intern, or other non-admitted person; in other places police officers prosecute cases without lawyers. (We pointed out that the U.S. Supreme Court has held that jailhouse

lawyers who are not admitted may represent prisoners in the absence of an alternative,[35] and the Court has even granted a certiorari petition filed by such a non-admitted person on behalf of another prisoner.[36]) So non-lawyers have and will continue to present cases in Alaskan courts. If the trial court's literal interpretation that the privilege only applies to admitted bar members, the question then becomes whether communications between the non-lawyer doing the courtroom prosecution and others, e.g., in a police department or a municipal prosecutor's office, can be discovered by a defendant. If the trial court ruling stands, the question is an open one.

B. Mediations.

Many, perhaps most, mediators, are not lawyers, and there is no requirement that they be lawyers. In a typical mediation, the mediator may meet separately with each side and discuss confidential facts and confidential settlement positions. Although there is a rule barring admission into evidence of offers of compromise in subsequent litigation (Evidence Rule 408), it is entirely conceivable that a mediator could be subpoenaed to turn over notes and made to testify to his or her recollections of confidential information and positions.[37]

---

[35] *See Johnson v. Avery*, 393 U.S. 483, 490 (1969). The U. S. Supreme Court recognized that states may prohibit the practice of law by jailhouse lawyers only if the inmates are provided with a reasonable alternative to assistance from such laypersons.

[36] *Mitchell H. Rubinstein*, Jailhouse Lawyer Granted Cert. By Supreme Court, ADJUNCTLAWPROFESSORBLOG, Feb. 7, 2008, http://lawprofessors.typepad.com/adjunctprofs/2008/02/jailhouse-lawyer.html.

[37] This has happened in California, where the state Supreme Court recently held that the mediation provisions of state statutes made the mediator's testimony confidential and inadmissible. *Michael Cassel, Petitioner, v. The Superior Court of Los Angeles County*, 244 P.3d 1080, 51 Cal. 4th 113, 119 Cal. Rptr. 3d 437 (Cal. 2011).

Many mediators protect against this by requiring confidentiality agreements that preclude such a tactic, but a private contractual agreement may not prevent a court subpoena, if the courts do not recognize a privilege for communications with a non-lawyer mediator. If the tactic were to become widespread, it would grievously diminish the likelihood that parties to a dispute would agree to mediation and be frank with the mediator, knowing that the mediator could be forced to repeat what they say to the other side.[38]

C. Statutory Permission for Lay Representation.

To our knowledge, the State's mandate of lay representation in union member grievances is the only such instance in Alaska; but in other jurisdictions statutory systems of lay representation are more common, as in the California case cited above, *Welfare Rights Org. v. Crisan*, 661 P.2d 1073 (Cal. 1983), in which there was a statutory scheme for lay advocates in welfare entitlement hearings. Since the Legislature (or, as here, the executive branch as part of a collective bargaining agreement) can create lay representation systems, any future lay representation system would create the unintended breaches of confidentiality if the trial court decision were not overruled.

D. Calling the advocate as a witness against his own client.

In this case and in similar cases, if there is no privilege attached to client communications, a lay advocate could be called by the other side to testify against his or her own client. It has not arisen in this case yet, but if there is no privilege, there is nothing to

[38] Similarly, in arbitrations, a non-attorney arbitrator could be forced to divulge information that the parties thought confidential. There is also a question whether a judge or retired judge who acts as a settlement judge and hears confidences can be made to divulge them, since the judge would not be a lawyer-advocate for a client, and would not be, strictly speaking, acting as a judge in the matter.

prevent it from happening, in which case, a union member would be very foolish to share any information with his or her advocate.

E. Demanding the state's confidential documents and subpoenaing its staff as witnesses.

If the state can subpoena union documents related to the grievance process, then it is likely that the employee could demand the State's internal documents and subpoena its staff in the Division of Personnel, since in the grievance and arbitration phases, the state is represented by laypersons, not by attorneys. Internal discussions of strategy and settlement postures would be fair game. So far in this case, the State had resisted all efforts to obtain such materials, but it is likely that if the State succeeds in wiping out the employee's confidentiality rights in this phase, the employee would be justified in demanding the same access to all the State's confidential internal communications. The result would be balanced but hardly fair if neither side could have confidentiality in its internal communications.

F. Confidentiality of collective bargaining strategy.

If there is no confidentiality in union-member relations, it is conceivable that management could subpoena records of the union's collective bargaining strategy and strategic discussions, in which case the entire viability of unions as representatives of the workforce would be in grave jeopardy, and the union's fiduciary duty to its members would be impossible to maintain.[39]

---

[39] *See Teamsters Local 391 v. Terry*, 494 U.S. 558, 567, 110 S.Ct. 1339, 108 L.Ed.2d 519 (1990) (union has fiduciary duty to protect members' interests). Forcing the union to reveal what it has learned in confidence would breach that relationship of trust by converting it into management's agent for the collection and transmittal of information that employees might not otherwise choose to reveal.

G. Role of unions in prelitigation dispute resolution.

If there is no confidentiality in union-member representation, the entire value of unions as part of the administrative phase of dispute resolution would be lost, and either unions would be forced to lay off their lay staff and hire lawyers for all their grievances and do away with the system in which employees act as union stewards for members. The prelitigation administrative process would become meaningless without advocates and would simply be a time-waster before litigation.

CONCLUSION

The situation in this case has implications for the rights of individual employees as well as for sensible administration of justice. It is a constitutional right to have effective representation at hearings mandated by due process. If the representation is not by an attorney – and particularly where the State itself forbids attorney representation – it must at least have the essential safeguards that would apply if the advocate were an attorney, chief among which is confidentiality so that the client can safely share his or her side of the case without fear that it will all be divulged to the other side. When the employer that seeks to invade the confidential relationship is also the entity that prevented the employer from using an attorney as an advocate, it is all the more vital that the courts safeguard confidentiality and prevent this attack on due process and fair adjudications.

The court should reverse the trial court.

Respectfully submitted this 18th of July, 2011.

Alaska R. Civ. P. 26(b)(1) 4, 9
Alaska R. Civ. P. 45(d) 10
Alaska Rule of Evidence 501-509 ..... 1, 2, 3, 7, 10

AUTHORITIES PRINCIPALLY RELIED UPON

ALASKA STATUTES:

AS 23.40.110(a)(1), (5). Unfair Labor Practices.

(a) A public employer or an agent of a public employer may not

(1) interfere with, restrain, or coerce an employee in the exercise of the employee's rights guaranteed in AS 23.40.080 ;

(5) refuse to bargain collectively in good faith with an organization which is the exclusive representative of employees in an appropriate unit, including but not limited to the discussing of grievances with the exclusive representative.

AS 23.40.210(a). Agreement; Cost-Of-Living Differential.

(a) Upon the completion of negotiations between an organization and a public employer, if a settlement is reached, the employer shall reduce it to writing in the form of an agreement. The agreement may include a term for which it will remain in effect, not to exceed three years. The agreement shall include a pay plan designed to provide for a cost-of-living differential between the salaries paid employees residing in the state and employees residing outside the state. The plan shall provide that the salaries paid, as of August 26, 1977, to employees residing outside the state shall remain unchanged until the difference between those salaries and the salaries paid employees residing in the state reflects the difference between the cost of living in Alaska and living in Seattle, Washington. The agreement shall include a grievance procedure which shall have binding arbitration as its final step. Either party to the agreement has a right of action to enforce the agreement by petition to the labor relations agency.

COURT RULES

ALASKA RULES OF CIVIL PROCEDURE:

Rule 26(b)(1). General Provisions Governing Discovery; Duty of Disclosure.

b) **Discovery Scope and Limits.** Unless otherwise limited by order of the court in accordance with these rules, the scope of discovery is as follows:

(1) *In General.* Parties may obtain discovery regarding any matter, not privileged which is relevant to the subject matter involved in the pending action, whether it relates to the claim or defense of the party seeking discovery or to the claim or defense of any other party, including the existence, description, nature, custody, condition and location of any books, documents, or other tangible things and the identity and location of persons

having knowledge of any discoverable matter. The information sought need not be admissible at the trial if the information sought appears reasonably calculated to lead to the discovery of admissible evidence.

Rule 45(d). Subpoena.

(d) **Subpoena for Taking Depositions--Place of Examination.**

(1) Proof of service of a notice to take a deposition as provided in Rules 30(b) and 31(a) constitutes a sufficient authorization for the issuance by the clerk of the court for any judicial district of subpoenas for the persons named or described therein. The subpoena may command the person to whom it is directed to produce and permit inspection and copying of designated books, papers, documents, or tangible things which constitute or contain matters within the scope of the examination permitted by Rule 26(b), but in that event the subpoena will be subject to the provisions of Rule 26(c) and subparagraph (b) of this rule.

The person to whom the subpoena is directed may, within 10 days after the service thereof or on or before the time specified in the subpoena for compliance if such time is less than 10 days after service, serve upon the attorney designated in the subpoena written objection to inspection or copying of any or all of the designated materials. If objection is made, the party serving the subpoena shall not be entitled to inspect and copy the material except pursuant to an order of the court from which the subpoena was issued. The party serving the subpoena may, if objection has been made, move upon notice to the deponent for an order at any time before or during the taking of the deposition.

(2) A resident of the judicial district in which the deposition is to be taken may be required to attend an examination at any place within the district, unless otherwise ordered by the court. A nonresident of the judicial district in which the deposition is to be taken, and a nonresident of the state subpoenaed within the state, may be required to attend at any place within the district wherein the nonresident is served with a subpoena, unless otherwise ordered by the court.

ALASKA RULE OF EVIDENCE:

Rule 501. Privileges Recognized Only as Provided.

Except as otherwise provided by the Constitution of the United States or of this state, by enactments of the Alaska Legislature, or by these or other rules promulgated by the Alaska Supreme Court, no person, organization, or entity has a privilege to:

(1) refuse to be a witness; or

(2) refuse to disclose any matter; or

(3) refuse to produce any object or writing; or

(4) prevent another from being a witness or disclosing any matter or producing any object or writing.

(Added by SCO 364 effective August 1, 1979)

Rule 502. Required Reports Privileged by Statute.

A person, corporation, association, or other organization or entity, either public or private, making a return or report required by law to be made has a privilege to refuse to disclose and to prevent any other person from disclosing the return or report, if the law requiring it to be made so provides. A public officer of an agency to whom a return or report is required by law to be made has a privilege to refuse to disclose the return or report if the law requiring it to be made so provides. No privilege exists under this rule in actions involving perjury, false statements, fraud in the return or report, or other failure to comply with the law in question.

(Added by SCO 364 effective August 1, 1979)

Rule 503. Lawyer-Client Privilege.

(a) Definitions. As used in this rule:

(1) A client is a person, public officer, or corporation, association, or other organization or entity, either public or private, who is rendered professional legal services by a lawyer, or who consults a lawyer with a view to obtaining professional legal services.

(2) A representative of the client is one having authority to obtain professional legal services and to act on advice rendered pursuant thereto, on behalf of the client.

(3) A lawyer is a person authorized, or reasonably believed by the client to be authorized, to practice law in any state or nation.

(4) A representative of the lawyer is one employed to assist the lawyer in the rendition of professional legal services.

(5) A communication is confidential if not intended to be disclosed to third persons other than those to whom disclosure is in furtherance of the rendition of professional legal services to the client or those reasonably necessary for the transmission of the communication.

(b) General Rule of Privilege. A client has a privilege to refuse to disclose and to prevent any other person from disclosing confidential communications made for the purpose of facilitating the rendition of professional legal services to the client, (1) between the client or the client's representative and the client's lawyer or the lawyer's representative, or (2) between the client's lawyer and the lawyer's representative, or (3) by the client or the client's lawyer to a lawyer representing another in a matter of common interest, or (4) between representatives of the client or between the client and a representative of the client, or (5) between lawyers representing the client.

(c) Who May Claim the Privilege. The privilege may be claimed by the client, the client's guardian or conservator, the personal representative of a deceased client, or the

successor, trustee, or similar representative of a corporation, association, or other organization, whether or not in existence. The person who was the lawyer at the time of the communication may claim the privilege but only on behalf of the client. The authority to do so is presumed in the absence of evidence to the contrary.

(d) Exceptions. There is no privilege under this rule:

(1) Furtherance of Crime or Fraud. If the services of the lawyer were sought, obtained or used to enable or aid anyone to commit or plan to commit what the client knew or reasonably should have known to be a crime or fraud; or

(2) Claimants Through Same Deceased Client. As to a communication relevant to an issue between parties who claim through the same deceased client, regardless of whether the claims are by testate or intestate succession or by inter vivos transaction; or

(3) Breach of Duty by Lawyer or Client. As to a communication relevant to an issue of breach of duty by the lawyer to the client or by the client to the lawyer; or

(4) Document Attested by Lawyer. As to a communication relevant to an issue concerning an attested document to which the lawyer is an attesting witness; or

(5) Joint Clients. As to a communication relevant to a matter of common interest between two or more clients if the communication was made by any of them to a lawyer retained or consulted in common, when offered in an action between any of the clients.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994; and by SCO 1522 effective October 15, 2003)

Rule 504. Physician and Psychotherapist-Patient Privilege.

(a) Definitions. As used in this rule:

(1) A patient is a person who consults or is examined or interviewed by a physician or psychotherapist.

(2) A physician is a person authorized to practice medicine in any state or nation, or reasonably believed by the patient so to be.

(3) [Effective March 1, 1999.] A psychotherapist is (A) a person authorized to practice medicine in any state or nation, or reasonably believed by the patient to be so, while engaged in the diagnosis or treatment of a mental or emotional condition, including alcohol or drug addiction, (B) a person licensed or certified as a psychologist or psychological examiner under the laws of any state or nation or reasonably believed by the patient so to be, while similarly engaged, [OR] (C) a person licensed as a marital or family therapist under the laws of a state or nation or reasonably believed by the patient so to be, while similarly engaged, or (D) a person licensed as a professional counselor under the laws of a state or nation, or reasonably believed by the patient so to be, while similarly engaged.

(4) A communication is confidential if not intended to be disclosed to third persons other than those present to further the interest of the patient in the consultation, examination, or interview, or persons reasonably necessary for the transmission of the communication, or persons who are participating in the diagnosis and treatment under the direction of the physician or psychotherapist, including members of the patient's family.

(b) General Rule of Privilege. A patient has a privilege to refuse to disclose and to prevent any other person from disclosing confidential communications made for the purpose of diagnosis or treatment of the patient's physical, mental or emotional conditions, including alcohol or drug addiction, between or among the patient, the patient's physician or psychotherapist, or persons who are participating in the diagnosis or treatment under the direction of the physician or psychotherapist, including members of the patient's family.

(c) Who May Claim the Privilege. The privilege may be claimed by the patient, by the patient's guardian, guardian ad litem or conservator, or by the personal representative of a deceased patient. The person who was the physician or psychotherapist at the time of the communication is presumed to have authority to claim the privilege but only on behalf of the patient.

(d) Exceptions. There is no privilege under this rule:

(1) Condition on Element of Claim or Defense. As to communications relevant to the physical, mental or emotional condition of the patient in any proceeding in which the condition of the patient is an element of the claim or defense of the patient, of any party claiming through or under the patient, of any person raising the patient's condition as an element of that person's own case, or of any person claiming as a beneficiary of the patient through a contract to which the patient is or was a party; or after the patient's death, in any proceeding in which any party puts the condition in issue.

(2) Crime or Fraud. If the services of the physician or psychotherapist were sought, obtained or used to enable or aid anyone to commit or plan a crime or fraud or to escape detection or apprehension after the commission of a crime or a fraud.

(3) Breach of Duty Arising Out of Physician-Patient Relationship. As to a communication relevant to an issue of breach, by the physician, or by the psychotherapist, or by the patient, of a duty arising out of the physician-patient or psychotherapist-patient relationship.

(4) Proceedings for Hospitalization. For communications relevant to an issue in proceedings to hospitalize the patient for physical, mental or emotional illness, if the physician or psychotherapist, in the course of diagnosis or treatment, has determined that the patient is in need of hospitalization.

(5) Required Report. As to information that the physician or psychotherapist or the patient is required to report to a public employee, or as to information required to be recorded in a public office, if such report or record is open to public inspection, or as to information or matters contained in or reasonably raised by a report submitted under AS 08.64.336, other than information that would establish the identity of a patient, unless the court finds that it is necessary to admit the identifying information in order to serve the interests of justice.

(6) Examination by Order of Judge. As to communications made in the course of an examination ordered by the court of the physical, mental or emotional condition of the patient, with respect to the particular purpose for which the examination is ordered unless the judge orders otherwise. This exception does not apply where the examination is by order of the court upon the request of the lawyer for the defendant in a criminal

proceeding in order to provide the lawyer with information needed so that the lawyer may advise the defendant whether to enter a plea based on insanity or to present a defense based on the defendant's mental or emotional condition.

(7) Criminal Proceeding. For physician-patient communications in a criminal proceeding. This exception does not apply to the psychotherapist-patient privilege.

(Added by SCO 345 effective August 1, 1979; amended by SCO 850 effective January 15, 1988; by SCO 1108 effective January 15, 1993; by SCO 1153 effective July 15, 1994; by SCO 1337 effective March 1, 1999; and by SCO 1522 effective October 15, 2003)

Note: SCO 1108 incorporated changes in Evidence Rule 504(a)(3) made by the legislature in ch. 129 § 12 SLA 1992. This legislation added the language in subparagraph (a)(3), "or (C) a person licensed as a marital or family therapist under the laws of a state or nation or reasonably believed by the patient so to be, while similarly engaged."

SCO 1108 was entered for the sole reason that the legislature has mandated the above amendment. If ch. 129 § 12 SLA 1992 is invalidated by a court of competent jurisdiction, SCO 1108 shall be considered automatically rescinded.

Note to SCO 1337: Evidence Rule 504(a)(3) was amended by § 5 ch. 75 SLA 1998 to expand the definition of "psychotherapist" to include licensed professional counselors. Section 1 of this order is adopted for the sole reason that the legislature has mandated the amendment.

Rule 505. Husband-Wife Privileges.

(a) Spousal Immunity.

(1) General Rule. A husband shall not be examined for or against his wife, without his consent, nor a wife for or against her husband, without her consent.

(2) Exceptions. There is no privilege under this subdivision:

(A) In a civil proceeding brought by or on behalf of one spouse against the other spouse; or

(B) In a proceeding to commit or otherwise place a spouse, the property of a spouse or both the spouse and the property of the spouse under the control of another because of the alleged mental or physical condition of the spouse; or

(C) In a proceeding brought by or on behalf of a spouse to establish the spouse's competence or

(D) In a proceeding in which one spouse is charged with:

(i) A crime against the person or the property of the other spouse or of a child of either, whether such crime was committed before or during marriage.

(ii) Bigamy, incest, adultery, pimping, or prostitution.

(iii) A crime related to abandonment of a child or nonsupport of a spouse or child.

(iv) A crime prior to the marriage.

(v) A crime involving domestic violence as defined in AS 18.66.990.

(E) In a proceeding involving custody of a child.

(F) Evidence derived from or related to a business relationship involving the spouses.

(b) Confidential Marital Communications.

(1) General Rule. Neither during the marriage nor afterwards shall either spouse be examined as to any confidential communications made by one spouse to the other during the marriage, without the consent of the other spouse.

(2) Exceptions. There is no privilege under this subdivision:

(A) If any of the exceptions under subdivision (a) (2) of this rule apply; or

(B) If the communication was made, in whole or in part, to enable or aid anyone to commit or plan to commit a crime or a fraud; or

(C) In a proceeding between a surviving spouse and a person who claims through the deceased spouse, regardless of whether such claim is by testate or intestate succession or by inter vivos transaction; or

(D) In a criminal proceeding in which the communication is offered in evidence by a defendant who is one of the spouses between whom the communication was made; or

(E) In a proceeding under the Rules of Children's Procedure; or

(F) If the communication was primarily related to and made in the context of a business relationship involving both spouses or the spouses and third parties.

(Added by SCO 364 effective August 1, 1979; amended by SCO 823 effective August 1, 1987; by SCO 1269 effective July 15, 1997; and by SCO 1522 effective October 15, 2003)

Note to SCO 1269: Evidence Rule 505(a) was amended by § 70 ch. 64 SLA 1996. Section 13 of this order is adopted for the sole reason that the legislature has mandated the amendment.

Rule 506. Communications to Clergymen.

(a) Definitions. As used in this rule:

(1) A member of the clergy is a minister, priest, rabbi, or other similar functionary of a religious organization, or an individual reasonably believed so to be by the person consulting the individual.

(2) A communication is confidential if made privately and not intended for further disclosure except to other persons present in furtherance of the purpose of the communication.

(b) General Rule of Privilege. A person has a privilege to refuse to disclose and to prevent another from disclosing a confidential communication by the person to a member of the clergy in that individual's professional character as spiritual adviser.

(c) Who May Claim the Privilege. The privilege may be claimed by the person, by the person's guardian or conservator, or by the person's personal representative if the person is deceased. The member of the clergy may claim the privilege on behalf of the person. The authority so to do is presumed in the absence of evidence to the contrary.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994)

Rule 507. Political Vote.

Every person has a privilege to refuse to disclose the tenor of the person's vote at a political election conducted by secret ballot unless the vote was cast illegally.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1522 effective October 15, 2003)

Rule 508. Trade Secrets.

A person has a privilege, which may be claimed by the person or the person's agent or employee, to refuse to disclose and to prevent other persons from disclosing a trade secret owned by the person, if the allowance of the privilege will not tend to conceal fraud or otherwise work injustice. When disclosure is directed, the judge shall take such protective measures as the interests of the holder of the privilege and of the parties and the furtherance of justice may require.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994)

Rule 509. Identity of Informer.

(a) Rule of Privilege. The United States, the State of Alaska and sister states have a privilege to refuse to disclose the identity of a person who has furnished information relating to or assisting in an investigation of a possible violation of law to a law enforcement officer or member of a legislative committee or its staff conducting an investigation.

(b) Who May Claim. The privilege may be claimed by an appropriate representative of the public entity to which the information was furnished by the informer.

(c) Exceptions.

(1) Voluntary Disclosure -- Informer a Witness. No privilege exists under this rule if the identity of the informer or the informer's interest in the subject matter of the communication has been disclosed to those who would have cause to resent the communication by a holder of the privilege or by the informer's own action, or if the informer appears as a witness for the prosecution.

(2) Testimony on Merits.

(i) If a party claims that a government informer may be able to give testimony necessary to a fair determination of the issue of guilt, innocence, credibility of a witness testifying on the merits, or punishment in a criminal case, or of a material issue on the merits in a civil case to which the state is a party, and if the government invokes the privilege, the party shall be given an opportunity to show that the party's claim is valid.

The judge shall hear all evidence presented by the party and the government, and both sides shall be permitted to be present with counsel during the presentation of evidence, subject to subdivision (c) (2) (ii) of this rule.

(ii) If the government requests an opportunity to submit to the court, by affidavit or testimony or otherwise, evidence concerning the information possessed by an informant, which submission might tend to reveal the informant's identity, the judge shall permit the government to make its submission without disclosure to the other party. Neither the attorney for the government, nor the other party or the other party's attorney may be present when the judge is examining the in camera submission. Although the submission generally will consist of affidavits, the judge may direct that witnesses appear before the judge, without the government or the other party present, to give testimony.

(iii) If the judge finds that there is a reasonable possibility that the informant can give the testimony sought, and if the government elects not to disclose the informant's identity, the judge shall, either on motion of a party or sua sponte, dismiss criminal charges to which the testimony would relate if the informant's testimony is material to guilt or innocence. In criminal proceedings in which the informant's testimony is not material to guilt or innocence and in civil proceedings the judge may make any order that justice requires.

(iv) Evidence submitted to the judge shall be sealed and preserved to be made available to the appellate court in the event of an appeal, and the contents shall not otherwise be revealed without consent of the government.

(3) Legality of Obtaining Evidence.

(i) When a defendant challenges the legality of the means by which evidence was obtained by the prosecution and the prosecution relies upon information supplied by an informer to support its claim of legality, if the judge is not satisfied that the information was received from an informer reasonably believed to be reliable or credible the judge may require the identity of the informer to be disclosed. In determining whether or not to require disclosure, the judge shall hear any evidence offered by the parties and both the defendant and the government shall have the right to be represented by counsel.

(ii) If the judge determines that disclosure of the informant's identity is necessary, upon request by the prosecution the disclosure shall be made to the court alone, not to the defendant. The judge may, if necessary, examine the informant or other witnesses about the informant, but such examination will be in camera and neither the defendant nor the prosecution shall be present or represented.

(iii) If disclosure of the identity of the informer is made to the court and not to the defendant, the record thereof shall be sealed and preserved to be made available to the appellate court in the event of an appeal, and the contents shall not otherwise be revealed without consent of the prosecution.

(Added by SCO 364 effective August 1, 1979; amended by SCO 1153 effective July 15, 1994)

ISSUE PRESENTED FOR REVIEW

May an employee who has sued his former employer withhold relevant information in discovery by asserting a "union testimonial privilege," despite the fact that no such privilege currently exists under Alaska law, and despite the mandate of Alaska Rule of Evidence 501, which limits the creation of new evidentiary privileges?

STATEMENT OF THE CASE

I. Introduction

Mr. Peterson asks this Court to take the unusual step of creating a new evidentiary privilege for communications between an employee and his union — a union testimonial privilege. [Pet. Br. 3] No other jurisdiction has adopted such a privilege. Because new evidentiary privileges obscure the search for truth, because Alaska Rule of Evidence 501 limits the creation of new privileges, and because the proposed privilege would undermine important public policy goals, this Court should decline to adopt this new privilege.

Mr. Peterson sued his state employer for wrongful termination, and the state sought Mr. Peterson's union file in discovery pursuant to the Alaska Rules of Civil Procedure. [Exc. 001-008, 050] The subpoena for the union file was reasonably calculated to lead to the discovery of evidence which would establish that the state did not breach its duty of good faith and fair dealing in terminating Mr. Peterson and that Mr. Peterson failed to exhaust his administrative remedies.[1] Without access to Mr. Peterson's union file, the state will not be able to prove that Mr. Peterson failed to

---

[1] *Noffke v. Perez*, 178 P.3d 1141, 1150 (Alaska, 2008).

fully pursue the grievance procedure provided in his collective bargaining agreement. [Tr. 033-039]

Mr. Peterson's union communications are not subject to any existing evidentiary privileges.[2] Courts refuse to extend the attorney-client privilege because the union representative is not a lawyer to the individual member during a labor dispute.[3] And when Mr. Peterson's private counsel inserted himself into the grievance process, the union and the private counsel did not enter into a joint representation of Mr. Peterson, nor was the union acting as an agent of Mr. Peterson's private counsel, because the union represents all of its members during a dispute.[4] [Tr. 020-021] Accordingly, Mr. Peterson may not withhold the requested documents unless this Court creates a new evidentiary privilege.

This Court possesses a limited authority to create new privileges. Alaska Rule of Evidence 501 limits the creation of new common-law privileges — since its enactment in 1979, this Court has not created a new common-law privilege.[5] Moreover, a union testimonial privilege would undermine important public policy objectives --- for instance, it would undermine the exhaustion doctrine by making it

2 Alaska R. of Evid. 501-509.

3 *Walker v. Huie*, 142 F.R.D. 497, 501 (D. Utah 1992).

4 *Garcia v. Zenith Electronics Corp.*, 58 F.3d 1171, 1175-6 (7th. Cir. 1995) *citing Seymour v. Olin Corp.*, 666 F.2d 202, 208 (5th. Cir. 1982).

5 SCO 364 effective August 1, 1979. The last common-law privilege was adopted in *Allred v. State*, 554 P.2d 411 (Alaska 1976) and it was the psychotherapist-patient privilege.

impossible for an employer to prove that an employee failed to exhaust the grievance process provided by a collective bargaining agreement. This Court should permit the legislature to debate the policy implications of such a new privilege or seek public input before adopting this unique privilege, as the legislature has yet to enact a statute which even implies the creation of such a privilege.[6] No court has adopted a union testimonial privilege applicable to civil litigation.[7] And privileges that are similar to the union testimonial privilege, such as the lay advocate privilege, do not apply in the labor relations context because labor relations statutes do not equate union representatives to attorneys.[8]

Finally, due process does not require the union testimonial privilege. State employees are afforded multiple opportunities to be heard both before and after the State terminates their employment. [Exc. 125, 128, 001-008] And the rules of discovery

---

[6] Administrative Rule 44(e) permits this Court to adopt a new privilege but should submit notice to interested parties under this rule.

[7] Michael Moberly, *Extending A Qualified Evidentiary Privilege To Confidential Communications Between Employees And Their Union Representatives*, 5 Nev. L.J. 508, 568-569 (2004-2005). New York courts have arguably adopted the union testimonial privilege in limited circumstances. *Seelig v. Shepard* 152 Misc.2d 699, 699-700 (N.Y. Sup. Ct. 1991)(the case did not involve civil litigation); *See also, City of Newburgh v. Newman*, 70 AD.2d 362, 365-66 (3d Dept. 1979)(upholding an unfair labor practices decision of a labor relations board). Unlike courts in Alaska, New York courts have the authority to recognize new common law privileges and do not need to interpret whether statutory language and legislative history plainly demonstrate the legislature's intent to create a new privilege. *Am. Airlines, Inc. v. Superior Court*, 114 Cal.App.4th 881, 893 (Cal App. 4th 2004); Alaska Rules Of Evidence 501.

promote due process in that they ensure Mr. Peterson is not erroneously deprived of a property interest.[9]

The Court should decline to create a new evidentiary privilege for union communications, and thus should uphold the decision of the superior court allowing the state access to Mr. Peterson's union file.

II. Facts And Proceedings

Russell Peterson applied for a position as a Microcomputer/Network Technician II with the Division of Labor and Workforce Development ("the state") on January 16, 2007 and was hired on January 24, 2007. [Exc. 002-003] Unbeknownst to the state, Mr. Peterson falsified his employment application by certifying that he had never been convicted of a felony, when in fact he had been convicted of numerous felonies. [Exc. 016, 108, 110-111, 125] The employment application made it explicit that Mr. Peterson needed to disclose past felonies and applicants who fail to disclose are subject to termination. [Exc. 108-121].

In an odd twist of fate, it was Mr. Peterson's attorney, Mr. Mertz, who later tipped off the state to Mr. Peterson's undisclosed felony convictions. [Exc. 123-124] On June 1, 2009, Mr. Mertz sent a letter to Pat Shier, then Director of the State of Alaska Division of Retirement and Benefits. [*Id.*] In that letter, Mr. Mertz explained that Mr. Peterson had moved to Alaska in the late 1980's. [*Id.*] And that, in order to obtain

---

[9] Alaska R. Civ. P. 26(b)(1). In this case, Mr. Peterson is not erroneously deprived of a property interest if he failed to exhaust administrative remedies. *Grant v. Anchorage Police Dept.*, 20 P.3d 553, 557 n. 16 (Alaska 2001) *citing Knight v. Am. Guard & Alert, Inc.* 714 P.2d 788, 791-92 (Alaska 1986).

"a fresh start," Mr. Peterson used a name ("Joshua Warner"), date of birth, and social security number that were not his own. [*Id.*] Mr. Mertz explained that Mr. Peterson had worked for the state under this false identity during the 1980's and asked that the Division of Retirement and Benefits correct Mr. Peterson's Public Employment Retirement System tier and other longevity-related benefits to give Mr. Peterson credit for his work under the false identity. [*Id.*] The state began to investigate Mr. Peterson's claims, and learned that he had failed to disclose several out-of-state felony convictions when he applied for his job. [Exc. 125]

Upon discovering the falsification, and after holding a pretermination meeting, the State terminated Mr. Peterson's employment on August 21, 2009. [*Id.*]. Mr. Peterson, who was a member of the Alaska State Employees Association Union, Local 52, American Federation of State County and Municipal Employees, AFL-CIO ("the union"), sought reinstatement through the grievance process set out in the collective bargaining agreement between the union and the state.[10] [Exc. 125, 128]

The union represented Mr. Peterson through three steps of the grievance process. [Exc. 095-096, 125, 128] None of the union's explanations for the falsification convinced the state to change its position. [Exc. 128] At no time during the grievance process did the state or any of its representatives seek to review communications between Mr. Peterson and the union. [Exc. 095-096; Tr. 033-039]

---

[10] The Public Employment Relations Act (PERA) requires state employers and unions to enter collective bargaining agreements. The collective bargaining agreement must include a grievance process that has binding arbitration as its final step. AS 23.40.210(a)(2010).

In March, 2010, the union decided not to seek arbitration of Mr. Peterson's grievance under Step IV of the grievance process. [Exc. 128] If Mr. Peterson disagreed with that decision not to seek arbitration, he was required to appeal it with the union internally, but the state believes that he never did so, and thus failed to exhaust his administrative remedies.[11] [*Id.*] This failure would be fatal to his right to pursue his contract claims against the state in civil court.[12]

One month later, on April 30, 2010, Mr. Peterson filed a wrongful termination lawsuit in superior court. [Exc. 001-008]. In the complaint, Mr. Peterson alleges breach of the covenant of good faith and fair dealing, intentional infliction of emotional distress, and other ancillary causes of action. [*Id.*] Mr. Peterson claimed in his complaint that he exhausted his administrative remedies through the grievance process. [Exc. 004] Discovery ensued. [Tr. 184-187]

The state reviewed emails between Dick Isett (the union's business agent) and Benthe Mertl-Posthumus (the State's point person during the grievance process). [Exc. 128] Emails from Mr. Isett to Ms. Posthumous, which are hearsay, appear to indicate Mr. Peterson failed to appeal Mr. Isett's decision not to take this matter to arbitration. [*Id.*] Because Mr. Peterson's union file likely provides direct evidence of

---

[11] *See, e.g., Crowley v. State, Dept. of Health and Social Services, Office of Children's Services*, Not Reported in P.3d, 2008 WL 5352309, 4 (Alaska 2011) (unpublished) (holding that an employee had a duty to appeal a business agent's decision not to seek arbitration to the union's grievance review committee in order to have exhausted administrative remedies).

[12] *Grant v. Anchorage Police Dept.*, 20 P.3d 553, 557 n.16 (Alaska 2001) *citing Knight v. Am. Guard & Alert, Inc.* 714 P.2d 788, 791-92 (Alaska 1986).

Mr. Peterson's failure to exhaust that the state could use in its defense, the state issued a proper subpoena to the union on September 29, 2010. [Exc. 050] Neither the union nor the AFL-CIO ("the amicus") objected to production of the union file at the time of the request. But Mr. Peterson filed a motion to quash on October 11, 2010. [Exc. 034-085] Although Mr. Peterson never appears to argue the file is irrelevant to this litigation, he argues that the records should be protected by an evidentiary privilege. [*Id.*]

Mr. Peterson's motion to quash placed the state at a considerable disadvantage in obtaining discovery, which was initially set to close in December 2010. [Tr. 033-039] The state deposed Mr. Peterson and sought follow-up discovery, but still has not obtained direct evidence of whether Mr. Peterson exhausted his administrative remedies. [*Id.*][13] In March 2011, the superior court denied Mr. Peterson's motion to quash, noting that under Evidence Rule 501, a court may recognize new privileges only if compelled to by a constitutional right, by a statute, or by changes made to the evidence rules by this Court in its rulemaking authority. [Exc. 158-175]. Mr. Peterson petitioned for review, and his petition was granted.

---

[13] There have been several developments of the factual record regarding exhaustion since the superior court briefing took place in this case. On remand, if the Court adopts a union testimonial privilege, serious questions remain regarding whether Mr. Peterson waived the privilege in this case by asserting at his deposition that it was futile for him to exhaust administrative remedies with the union given the union's statements to him.

STANDARD OF REVIEW

Rulings on discovery are reviewed for abuse of discretion.[14] In determining whether a case presents facts warranting the recognition of a new privilege, certain general principles apply.[15] Foremost among these is the maxim that the public has the right to hear every man's evidence in a court of law.[16] Courts start with the primary assumption that there is a general duty to give what testimony one is capable of giving, and it is the party which seeks the exception from this principle that bears the burden of establishing a privilege.[17] New privileges suppress evidence and compromise the search for truth.[18]

ARGUMENT

I. The Union File Is Relevant And Discoverable Under The Alaska Rules of Civil Procedure

Under the Alaska Rules of Civil Procedure, the state is entitled to seek Mr. Peterson's union file.[19] The Court has stated that "discovery should normally proceed without judicial participation . . . 'in a manner demonstrating candor and common sense.'"[20] Alaska courts have adopted "a system of liberal pretrial discovery where parties may obtain discovery regarding any matter not privileged which is relevant to the subject matter involved in the pending action.[21] And "relevance for purposes of discovery is broader than for purposes of trial."[22] Accordingly, "[t]he information sought need not be admissible at the trial if the information sought appears reasonably calculated to lead to the discovery of admissible evidence."[23] Mr. Peterson does not appear to argue that his union file is not relevant or discoverable, absent a privilege. [Exc. 034-085] And the union file is relevant to more than Mr. Peterson's failure to exhaust administrative remedies.[24]

19 Alaska R. Civ. P. 26(b)(1).

20 *Langdon v. Champion*, 745 P.2d 1371, 1373 (Alaska 1987).

21 *Noffke v. Perez*, 178 P.3d 1141, 1150 (Alaska, 2008).

22 *Lee v. State,* 141 P.3d 342, 347 (Alaska 2006).

23 Civil Rule 26(b)(1).

24 Every employment contract in Alaska is subject to the implied covenant of good faith and fair dealing. *Smith v. Anchorage Sch. Dist.,* 240 P.3d 834, 844 (Alaska 2010). While lacking a precise definition, the covenant "generally requires employers to treat

Moreover, pursuant to Alaska R. Civ. P. 45(d), the union could have lodged an objection to the extent of the state's subpoena. Had an objection been lodged, the state could have worked with the union to narrow its requests and avoid areas of concern to the union. If the state thought the union was not providing all the documents it could, the state could have sought redress in superior court.[25]

II. The Union File Is Not Subject To An Existing Privilege Or Joint Privilege

Union representation during the grievance process does not form an attorney-client relationship between the union representative and the member. Attorney-client privilege in Alaska is governed by Evidence Rule 503, which applies to communications between a client and a "lawyer or the lawyer's representative." Courts routinely refuse to extend the attorney-client privilege to union representation

like employees alike and act in a manner that a reasonable person would regard as fair. *Mitchell v. Teck Cominco Alaska, Inc.*, 193 P.3d 751, 760 (Alaska 2008). Thus, one question for trial is whether the state treated Mr. Peterson fairly during the grievance process. Mr. Peterson's union file could lead to the discovery that some of Mr. Peterson's explanations for his failure to report felonies surfaced only during the grievance process and not before. [Exc. 094-097] Moreover, if Mr. Peterson made false or misleading statements to his union, the file could establish that Mr. Peterson is not a credible witness which is always at issue in a trial. [*Id.*] If there are other grievances in the file involving Mr. Peterson, they would tend to show bias of potential witnesses. [*Id.*] The State's request is merely intended to flush out and develop these factual issues for trial. [*Id.*]

[25] *See McCoy v. Southwest Airlines,* 211 F.R.D. 381, 384-385 (C. Dist. Cal. 2002)(where a non-party witness objects to the scope of discovery, the nonparty can prevent disclosure by objection and the party seeking discovery must then obtain an order from the court directing compliance).

because the relationship between a union and its members is not that of a lawyer and a client.[26]
