The union represents several interests during the grievance process, not just the interest of the member bringing the grievance. Once an employee bargaining unit designates a union, the members of that bargaining unit agree that the union is the exclusive representative of all the unit members.[27] The union advocates for the individual member during the grievance process and is obligated to do so.[28] But at times, the union must sacrifice the interests of individual employees for the sake of the larger bargaining collective in a unionized workforce.[29] The betterment of the entire unit is at stake in each and every grievance,[30] including Mr. Peterson's grievance. The union maintains considerable discretion over grievance matters.[31] The union's duty

to the membership is critical when it decides not to take a dispute with management to arbitration, which can be expensive for the union.[32] This is not an attorney client relationship.

In an effort to bolster his claim that his union representative is an attorney, Mr. Peterson distorts the state's role in "requiring" union grievance proceedings. Mr. Peterson argues that "the State requires the employee pursue a mandatory grievance process before he can file suit." [Pet. Br. 2] He goes on to argue "the State has explicitly and emphatically decreed that attorneys may not represent employees in Mr. Peterson's situation, but only union officials may do so." [Pet. Br. 7, 4, 9] The state employer is not forcing Mr. Peterson into the grievance process. The Alaska Legislature requires state agencies to enter into collective bargaining agreements providing grievance procedures.[33] The state is required to recognize the union as the member's exclusive representative at all times, and work exclusively with the union during the grievance process.[34]

---

[32] *See Kollodge v. State*, 757 P.2d 1028, 1036 (Alaska 1988) (the union did not breach its duty to fairly represent the member when it decided not to arbitrate, given that after careful review, the union felt it did not have a strong chance of prevailing at arbitration).

[33] AS 23.40.240; AS 23.40.110(a)(5); *Barnica v. Kenai Peninsula Borough School Dist.*, 46 P.3d 974, 977 (Alaska 2002)(plurality).

[34] *Id. See also* AS 23.40.210(a). The legislature determined that these rules best serve the State of Alaska by engendering harmonious and cooperative relations between state employers and its employees.

Mr. Mertz's assistance of Mr. Peterson during the grievance process does not create a joint privilege between the union and Mr. Mertz either. [Tr. 020-021] The presence of union representatives at meetings between attorneys and clients destroys the attorney-client privilege.[35] Labor law disfavors the involvement of privately retained counsel in the grievance process because it bypasses the union and undermines the strength of the union's exclusive representation.[36] Furthermore, the union is not Mr. Mertz's agent.[37] Thus, communications Mr. Mertz had with the union are not subject to a privilege.

III. The Court Has Limited Authority Outside Of Rulemaking To Create New Privileges

Because Mr. Peterson's union file is not protected by the attorney-client privilege, only a newly created union testimonial privilege would prevent its disclosure in discovery.[38] No Alaska court has recognized such a privilege, and no other jurisdiction

37 *Cf. American Nat. Watermattress Corp. v. Manville*, 642 P.2d 1330, 1333-1334 (Alaska 1982) (statement of facts given by a prospective client to an attorney's agent is protected by the attorney-client privilege. The union is not an agent of Mr. Peterson's private counsel).

38 *Noffke v. Perez*, 178 P.3d 1141, 1150 (Alaska, 2008).

has created such an extensive privilege in civil courts.[39] This Court should decline to create a union testimonial privilege given its decision to codify the law of privileges in Alaska and to stop creating new common-law privileges, coupled with the strong public policy reasons against such a new privilege.

A. The Court has already decided not to adopt new privileges as a matter of common law

This Court decided in 1979 to limit the creation of new common-law evidentiary privileges by codifying the law of privileges.[40] The Court hired Professor Stephen Saltzburg of the University of Virginia School of Law to work with local practitioners to codify Alaska's privileges.[41] This Court has not adopted a common-law privilege since this project.[42] Under Alaska law, the Court through its rulemaking

---

[39] New York courts have arguably adopted the union testimonial privilege in limited circumstances during management investigations into employee wrongdoing. *Seelig v. Shepard* 152 Misc.2d 699, 699-700 (N.Y. Sup. Ct. 1991); *City of Newburgh v. Newman*, 70 A.D.2d 362, 365-66 (3d Dept. 1979) (neither case involved civil litigation).

[40] In the 1970's, there was nationwide debate whether to cap the number of privileges in state and federal courts, or whether to allow individual courts to fashion common law privileges. Congress, for instance, enacted Federal Rule of Evidence 501, a rule that leaves the recognition of testimonial privileges in the hands of the courts to be developed as part of common law. Symposium, *Giving Codification A Second Chance – Testimonial Privileges And the Federal Rules of Evidence*, 53 Hastings L.J. 769, 770; 790 (2002).

[41] Various back up documents to SCO 364 are illustrative of this process, and are attached as Appendix 1.

[42] The last common-law privilege was adopted in *Allred v. State*, 554 P.2d 411 (Alaska 1976) and it was the psychotherapist-patient privilege. *See B.H. v. State*, 1995 WL 17220341 (Alaska App. 1995) (unpublished opinion) (declining to adopt the parent-child privilege noting that new privileges should be adopted by changes to court rules).

function or the Legislature through statute balances the policy benefits of creating a new testimonial privilege against the threat that the new privilege will shield too much evidence from the trier of fact.[43] The Court will occasionally recognize more limited privileges but only if that recognition is required by a constitutional provision like the executive privilege doctrine.[44]

B. The Public and the Legislature must balance public policy when deciding the merits of this privilege

First, new testimonial privileges are disfavored because they suppress evidence and compromise the search for truth.[45] This is why the U.S. Supreme Court has repeatedly ruled against the recognition of new privileges beyond those already existing in common law.[46]

Beyond this, the legislature and the public must balance various interests when deciding the merits of a new privilege. Privileges create zones of silence which are disfavored.[47] And these zones of silence can have important unintended consequence to

our society. For instance, anti-discrimination laws prohibit discrimination on the basis of sex, marital status, changes in marital status, pregnancy, parenthood, age, race, disability, color, or national origin.[48] The legislature expressly applied this prohibition to unions by making it unlawful for unions to aid and abet in such discrimination.[49] If the Court establishes a union testimonial privilege, the union would have to aid and abet a member's discriminatory conduct by keeping it secret unless the employee signs a waiver.[50] This would undermine Alaska's anti-discrimination laws.[51]

A union testimonial privilege would also undermine the significance of the grievance process, arbitration of labor disputes, and the principle of self-governing. Grievance procedures in collective bargaining agreements between unions and management are mandatory in the sense that they preclude the use of other judicial remedies[52] so that the labor disputes can be handled internally. And when grievance

49 AS 18.80.260.

50 In *Am. Airlines Inc. v. Superior Court*, a plaintiff alleged that his union representative had information that would support his claims of racial discrimination. At deposition, the union representative refused to answer questions relevant to discrimination he had witnessed on the basis that his discussions with other employees about derogatory remarks were protected by a union representative-union member evidentiary privilege. The court denied the privilege noting that such a privilege could severely compromise investigations into claims of harassment, discrimination, and unlawful conduct. *Am. Airlines Inc., v. Superior Court*, 114 Cal.App.4th, 881, 890 (Cal App. 4th 2004).

51 *Id.*

52 *Barnica v. Kenai Peninsula Borough School Dist.*, 46 P.3d 974, 977 (Alaska 2002)(plurality).

procedures have arbitration as a final step, that system promotes harmonious and cooperative government employer-employee relations.[53] The grievance process encourages the early resolution of disputes by discussion and conciliation before disputes escalate to unmanageable proportions.[54] For these reasons, courts typically give primacy to contractual grievance/arbitration clauses.[55] Mr. Peterson prevents the union and the state from weighing the merits of his grievance by not exhausting his administrative remedies, and he should not be allowed to withhold evidence of his failure to exhaust.[56]

C. Courts in other jurisdictions have sometimes created privileges by statutory implication but only if an underlying statute truly makes no sense absent a privilege

Sometimes courts recognize new privileges when their creation is implied in statute,[57] but the Alaska Legislature has not implied the creation of a union testimonial

---

54 *Id.*

55 *Id.*

56 These policy concerns outweigh the unfounded concerns cited by Mr. Peterson. [Pet. Br. 24-28] First, Mr. Peterson is entitled to the state's internal documents if no privilege attaches. [Pet. Br. 27] Moreover, concerns over the privacy of collective bargaining strategies are unfounded. [Pet. Br. 27]. The union may petition the Alaska Labor Relations Agency (ALRA), a quasi-judicial executive branch agency, for redress if that were to occur. AS 23.40.110(a)(1);120-140. ALRA could issue a cease and desist letter, thereby prohibiting that conduct. *Alaska Comm. Colleges' Federation of Teachers, Local No. 2404 v. Univ. Of Alaska*, 669 P.2d 1299, 1305 (Alaska 1983). The union grievance proceedings will continue to function even if the union file is not subject to a privilege in subsequent litigation raised by the former employee. [Pet. Br. 28]

57 *Welfare Rights Organization v. Crisan*, 661 P.2d 1073, 1077 (Cal. 1983).

privilege in any statute. The Alaska Legislature at times creates civil court privileges and when it does so, its intention is crystal clear.[58]

Mr. Peterson relies on *Welfare Rights Organization v. Crisan*, a case in which a California court recognized a privilege as implied in statute.[59] The statute provided that an applicant for welfare benefits could be represented by counsel or by an "authorized representative" at an administrative hearing regarding the denial or termination of benefits.[60] In *Crisan*, the state subpoenaed the records of an authorized representative before the administrative hearing.[61] The California Supreme Court held that the subpoena request was improper because the statute creating the right to a hearing required, by implication, that communications with an authorized representative be privileged for purposes of the hearing.[62] *Crisan* did not establish a court privilege for such communications, only a privilege for purposes of the administrative hearing created by the statute.[63] And *Crisan* did not create a new evidentiary privilege as a matter of

62 661 P.2d 1073, 1077 (Cal. 1983).

63 *Am. Airlines Inc., v. Superior Court*, 114 Cal.App.4th 881, 889 (Cal App. 4th 2004). The *Crisan* holding would be akin to creating a testimonial privilege for Mr. Peterson during the grievance process with the union.

judicial policy; rather, it held that the legislature impliedly created the privilege because the statute equated "authorized representative" with "counsel."[64]

Courts have rejected the extension of *Crisan* to labor relations laws because those laws do not equate union representation to counsel. In *McCoy v. Southwest Airlines*, plaintiffs in a civil wrongful termination suit sought the union testimonial privilege, arguing that a union representative is equal to a lay advocate.[65] The federal court correctly noted that it could not provide such a privilege in a civil proceeding absent a specific statute to that effect, like the one in *Crisan*.[66] The court made a fundamental distinction; when a statute equates lay advocacy to counsel, the legislature has created an unfair trap if it does not provide a privilege between the representative and the claimant.[67] But because no such inducements were present in the labor relations statutes in *McCoy* for purposes of civil litigation, the court did not recognize the privilege.[68] Similarly, in *Am. Airlines Inc. v. Superior Court*, the court held that even if a statute creates some form of representation, the statute does not create an evidentiary privilege in all forums.[69] The privilege has to be implied in the words of the

67 *Id.*

68 *Id.*

69 *Am. Airlines Inc., v. Superior Court*, 114 Cal.App.4th, 881, 888

statute.[70] In *Crisan,* the statute expressly pertained to authorized advocates before a tribunal under a narrowly drawn legislative administrative hearing scheme.[71] On the other hand, labor relations statutes only have general declarations of public policy that employees have the freedom to designate representatives "to negotiate the terms and conditions" of employment.[72] That general language, the court reasoned, does not create any specific proceedings or hearings from which it can be inferred the existence of an all encompassing privilege.[73]

This Court should also decline to create a union testimonial privilege based on the reasoning in *Crisan*, because no Alaska statute equates union representatives with counsel.

(Cal App. 4th 2004).

70 *Id.*

71 *Id.*

72 *Id.*

73 *Id.* at 890. The amicus advances a similar argument; that because union members must be free to engage in union activities under AS 23.40.110(a)(1) and because the Alaska Labor Relations Agency (ALRA) has the authority to curtail unfair labor practices, this Court may create a union testimonial privilege. [Am. Br. 2-3] Unlike in *Crisan*, PERA does not establish a statutory privilege, because it says nothing about lay advocacy or civil court privileges. AS 23.40.070-260. This Court interprets PERA under its plain meaning and cannot stretch its provisions to include the union testimonial privilege. *Univ. of Alaska Classified Employees Assoc, et. al. v. Univ. of Alaska*, 988 P.2d 105, 108 (Alaska 1999). Moreover, the amicus arguments were not made by Mr. Peterson to the trial court and have been waived. *Millette v. Millette,* 177 P.3d 258, 267 (Alaska 2008) ("It is well established that issues are waived for purposes of appeal if not adequately raised [in the trial court].").

IV. Other Jurisdictions Have Declined To Adopt The Union Testimonial Privilege

Courts sometimes find that communications between a union and its members are confidential within forums devoted exclusively to the resolution of labor-management disputes.[74] However, once the union concludes its representation and the member either pursues civil litigation or is summoned to a criminal court proceeding, courts find that the member cannot withhold evidence on the basis of a union testimonial privilege.[75]

The cases Mr. Peterson cites recognize a privilege only while the union is actively representing the member in a forum devoted to the resolution of labor-management dispute. [Pet. Br. 11-19] For instance, in *Cook Paint & Varnish Company*, a private employer sought details of the union steward's conversations with various employees shortly before the employee's grievance went to arbitration.[76] Unlike in *Cook Paint & Varnish*, in this case the state only subpoenaed the union file after the

---

74 *See* Michael Moberly, *Extending A Qualified Evidentiary Privilege To Confidential Communications Between Employees And Their Union Representatives*, 5 Nev. L.J. 508, 568-569 (2004-2005).

75 *See e.g. Patterson v. Heartland Industrial Partners, LLP*, 225 F.R.D. 204, 207 (N.D. Ohio 2004)(rejecting the assertion of an "NLRA union privilege" during pretrial civil discovery); *In re Grand Jury Subpoena*, 926 A.2d 280, 284 (N.H. 2007)(rejecting a union privilege argument during a grand jury proceeding); *In Re Grand Jury Subpoenas Dated January 20, 1998*, 995 F. Supp. 332, 334 (E.D.N.Y. 1998) (declining to create a new common law union testimonial privilege under Federal Rule of Evidence 501); *American Airlines Inc., v. Superior Court*, 114 Cal.App.4th 881, 889 (Cal App. 4th 2004) (rejecting the union testimonial privilege); *McCoy v. Southwest Airlines*, 211 F.R.D. 381, 387 (C. Dist. Cal. 2002) (same).

76 *Cook Paint and Varnish Company*, 258 N.L.R.B. 1230, 1231-32 (1981).

union refused to take the grievance to arbitration and after Mr. Peterson filed his lawsuit. Similarly, the other cases Mr. Peterson cites involve a request for information while the union still represented the member either in a forum devoted to the resolution of labor-management disputes or pursuant to a management investigation.[77]

Because the State did not request discovery from the union or Mr. Peterson during the grievance proceedings, the cases Mr. Peterson cites do not support the creation of a union testimonial privilege in this case.

V. Due Process Concerns Do Not Require A Union Testimonial Privilege

Mr. Peterson argues that due process requires this Court to create a union testimonial privilege. [Pet. Br. 20-24] This Court should decline to consider this argument because it was inadequately raised in the superior court; due process was so

---

[77] *U.S. Department of Treasury*, 38 F.L.R.A. 1300, 1303 (1991) (employer sought a union steward's interactions with the member while the union was still representing the employee); *Int'l Bhd. Of Elec. Workers v. Pub. Util. Dist. 1*, Dec. 7656-A, 2003 WA PERC LEXIS 46 (Wash. Pub. Employment Relations Comm'n June 11, 2003) (employer made the request while a grievance was ongoing); *N.H. Troopers Ass'n v. N.H. Dept. of Safety*, PELRB Decision No. 94-74, 5 (August 31, 1994)(an employer committed an unfair labor practice by ordering union representatives to disclose information while the threat of disciplinary action and investigation remained); *City of Newburgh v. Newman*, 70 A.D.2d 362, 366 (N.Y.A.D. 1979) (The questioning of a union official as to his observations and communications with a member facing disciplinary proceedings was held to deter members from seeking advice, so the practice was banned); *Seelig v. Shepard*, 152 Misc.2d 703 (N.Y. Sup. Ct. 1991) (a New York trial court modified an administrative subpoena where the state employer had yet to take any action against a union member). *Ill. Educ. Labor Rel. Bd. v. Homer Cmty. Consol. Sch. Dist., No. 208*, 547 N.E.2d 182, 183-84; 186 (Illinois 1989)(The court, through a combination of statute and common law, ruled that collective bargaining strategy notes were subject to a privilege in a hearing before The Illinois Educational Relations Board).

under-briefed that Judge Pallenberg did not even address the argument in his ruling.[78] But even if this Court does consider the argument, it fails because there is no threat to Mr. Peterson's due process rights as he is being afforded a fair trial on his claims in superior court.

The Court employs the three-part balancing test from *Matthews v. Eldridge* for determining due process requirements.[79] First, the court considers the private interest that will be affected by the official action; second, the risk of an erroneous deprivation of such interest through the procedures used, and the probable value, if any, of additional or substitute procedural safeguards; and finally, the Government's interest, including the function involved and the fiscal and administrative burdens that the additional or substitute procedural requirement would entail.[80]

The risk of erroneous deprivation of Mr. Peterson's employment interest if the privilege is not recognized is low.[81] Under the current procedures, Mr. Peterson has been afforded three important opportunities to be heard; all of which provide checks

---

78 *Millette v. Millette*, 177 P.3d 258, 267 (Alaska 2008) ("It is well established that issues are waived for purposes of appeal if not adequately raised [in the trial court]."). *State v. Public Safety Employees Ass'n* --- P.3d ----, 2011 WL 3241866 (Alaska 2011) *citing Barnett v. Barnett*, 238 P.3d 594, 598 (Alaska 2010).

79 *Bigley v. Alaska Psychiatric Institute*, 208 P.3d 168, 181 (Alaska 2009); *Mathews v. Eldridge*, 424 U.S. 319, 335 (1976).

80 *Id.*

81 Mr. Peterson does not have a right to state employment but he has a sufficient property interest in his state employment to evoke due process concerns. *Nichols v. Eckert*, 504 P.2d 1359, 1363 (Alaska 1973).

against erroneous deprivation. First, the state, the union, and Mr. Peterson held a pretermination meeting before the state terminated his employment. [Exc. 125] After that meeting, where Mr. Peterson was afforded an opportunity to be heard why he falsified the application, the state decided to terminate Mr. Peterson's employment. [*Id.*] Then, the grievance process ensued, further protecting against erroneous deprivations of Mr. Peterson's employment property interests.[82] Mr. Peterson had an opportunity to be heard and represent his interests through the less formal and less expensive grievance process, which is handled by his union.[83] Third, Alaska law places no impediment on an employee's right to obtain direct review of the employer's decision to terminate the employee even after the union fairly refuses to take the dispute to arbitration.[84] Thus, Mr. Peterson is afforded one last due process check to make sure the state did not violate the covenant of good faith and fair dealing in terminating his employment interest.[85]

The additional safeguard Mr. Peterson seeks — an evidentiary privilege — is not required by due process. Mr. Peterson, by filing this lawsuit, has put the union

---

82 *See Armstrong v. Meyers*, 964 F.2d 948 (9th Cir. 1992) (three-step grievance and arbitration procedure provided employee with due process).

83 *See Tedesco v. City of Stamford*, 610 A.2d 574, 582-83 (Conn., 1992).

84 *Casey v. City of Fairbanks,* 670 P.2d 1133, 1138 (Alaska 1983).

85 Under federal law, Mr. Peterson would never be able to assert his contract claims in a court of law unless the union breached its duty to fairly represent him during the grievance process. *Armstrong v. Meyers*, 964 F.2d 948 (9th Cir. 1992) (three-step grievance and arbitration procedure provided employee with due process); *Vaca v. Sipes,* 386 U.S. 171, 191 (1967).

grievance process squarely at issue.[86] The State is being sued for breach of good faith and fair dealing. [Exc. 001-008] One of the issues for trial is whether the state breached its duty of good faith and fair dealing during the grievance process, and the union file goes directly to this issue. [*Id.*] Additionally, the privilege sought would protect Mr. Peterson from his failure to exhaust his administrative remedies. The requested privilege is an attempt to obtain an advantage by keeping truth and evidence away from the trier of fact which is not an appropriate due process safeguard, especially after it is the employee who initiates this type of lawsuit; not the state.

Finally, under the third part of the *Matthews v. Eldridge* analysis, the Court must consider the Government's interest in not creating this privilege.[87] Contract claims require exhaustion of remedies.[88] If union members can evade the final stages of the grievance process, thereby depriving the state and the union a full opportunity to resolve a dispute, litigation costs will go up. Cases that could otherwise be disposed of at summary judgment will needlessly turn into jury trials where the union member's version of exhaustion will remain unchallenged to the trier of fact.

The risk of erroneous deprivation of Mr. Peterson's employment interest does not merit the creation of a new testimonial privilege in this case.

---

86 *Supra* note 24.

87 *Bigley v. Alaska Psychiatric Institute*, 208 P.3d 168, 181 (Alaska 2009); *Mathews v. Eldridge*, 424 U.S. 319, 335, (1976).

88 *Grant v. Anchorage Police Dept.*, 20 P.3d 553, 557 n. 16 (Alaska 2001) *citing Knight v. Am. Guard & Alert, Inc.* 714 P.2d 788, 791-92 (Alaska 1986).

The Government's interest in upholding the sanctity of the grievance process is a substantial factor weighing against this new privilege.

CONCLUSION

The Court should not create a new common-law privilege in order to keep relevant evidence away from the State. The Court should affirm the decision of the trial court below.

DATED this 21st day of September, 2011.

ABA No.: 0412106

APPENDIX

Alaska Court System

State of Alaska

OFFICE OF ADMINISTRATIVE DIRECTOR
303 K STREET
ANCHORAGE, ALASKA
99501

March 6, 1978

Professor Stephen Saltzburg
Associate Professor
University of Virginia
School of Law
Charlottesville, Virginia 22901

Dear Professor Saltzburg:

Enclosed please find a draft of the proposed Alaska Rules of Evidence with revisions made by the Committee on Rules of Evidence appointed by the Alaska Supreme Court. Also enclosed is a list of specific questions and requests for revision and clarification, as well as a copy of the committee's preliminary revision and various letters submitted by Alaskan attorneys and organized bar groups commenting on the preliminary revision.

As you will note, the revised draft of the committee includes numerous changes to your original proposal; they are not described at length. To the extent that no reason is given for the revisions of the committee in the materials enclosed, I would hope that you will find the revisions self-explanatory. In addition to the specific questions submitted to, the committee would very much enjoy hearing comment by you on any of the revisions which we have made in the event that you think such comment might be appropriate.

Please bear in mind that, in drafting revisions to your original proposals, the committee has worked under the assumption that we, as Alaskan attorneys, are probably more familiar with the realities of legal practice in Alaska and specific Alaskan case law than you might be. However we fully realize that we would not, either individually or as a committee, be justified in claiming any particular expertise in the law of evidence, and certainly not the type of expertise which you possess. Therefore, in the event it appears that, in making changes to acommodate peculiarly Alaskan interests, this committee has ended up with proposals which would in the long

run be undesirable or untenable, please do not hesitate to inform us of this fact.

The committee would very much appreciate hearing from you as to a tentative date when we could meet with you to discuss the particular questions and requests which we are forwarding, as well as the revision as a whole. Since I have recently abandoned ship and am no longer a member of the State Judiciary, you can call or write me directly at the United States Attorney's Office in Anchorage, 805 W. Fourth Avenue Room 249, Anchorage, Alaska 99501, (907) 277-1491.

I would like to apologize to you for the delay in getting these materials to you, but circumstances involved with my job changeover made the delay unavoidable. I look forward to hearing from you in the near future.

Very truly yours,

Alexander O. Bryner
Chairman
Committee on Rules of Evidence

MEMORANDUM TO PROFESSOR STEVEN SALTZBURG

REGARDING: REVISED PRELIMINARY COMMITTEE REDRAFT

OF PROPOSED ALASKA RULES OF EVIDENCE

Rule 106. Request for Addition to Commentary: The committee would request Professor Saltzburg to draft additions to the commentary on Rule 106, as revised, explicitely stating that the trial court has broad discretion in formulating specific mechanisms for deletion of privileged or irrelevant information; also that material deemed by the court to be privileged or irrelevant and, therefore, not subject to disclosure under this Rule, should be preserved under seal by the trial court for the purpose of appeal.

Rule 107. Additional Commentary: The committee's deletion of originally proposed Rule 107 reflects the view that, while judicial comment on the weight or effect of evidence should not, per se, be encourage, the Court, throughout a trial and, specifically, in the course of giving instructions such as those pertaining to credibility of accomplices and the weight to be given to out of court admissions by the accused in a criminal matter, is in effect commenting on the weight of evidence. Since comment by the judge has not constituted a problem in the past and proposed Rule 106 appeared potentially problematical, no specific rule precluding comment was deemed necessary.

Article II. Explanation and Request for Revision of Commentary: Article II has been redrafted in it's entirety. Much of the redraft was simply stylistic in nature, but substantial portions were revised to conform the Rule with

committee's impressions concerning the reality of judicial notice in the state of Alaska. Very few libraries in the state of Alaska contain current copies of statutes in effect in all states and territories of the United States. Similarly, very few libraries have full sets of regional reporters. There are numerous widespread areas of the state in which superior and district courts may regularly be holding sessions where lack of adequate research facilities constitutes a real problem. The committee's view was that the essential difference between mandatory judicial notice without request and mandatory or optional judicial notice upon request of a party was simply that, in the latter circumstances, the requesting party would be under an obligation to assure that correct information concerning the present state of the law or fact sought to be noted was made available to the court.

Due to lack of adequate research facilities in numerous relatively remote locations, it was deemed preferable to place the burden of providing adequate information upon which to base judicial notice on the requesting party, who would usually be in a position to anticipate the need for a request well in advance of trial, with sufficient time to obtain the requisite information. The extensive revision of Article II will require appropriate corresponding revision of the commentary pertaining to this Article.

Rule 203(a). Question and Request for Consideration of Possible Revision: The committee would like Professor Saltzburg to consider the possibility of adding additional language to the section permitting mandatory instructions to the jury with

respect to incontrovertible matters such as jurisdiction and venue. While it is no doubt true that the court cannot direct the jury in a criminal case to find as true noticed facts which are of an important or disputable nature, members of the committee felt that as to minor or incontrovertible issues, the court might properly instruct the jury in a binding fashion to accept as true a fact judicially noted.

Rule 203(a). Request for Addition to Commentary. The committee would like the commentary to this section to provide specifically that the meaning of the word "tenor" as used in the section is synonymous with the word "substance." Although "substance" was deemed a clearer word by the committee, "tenor" was retained to maintain continuity with the Federal Rules.

Rule 303. Request for Additional Commentary: The commentary to Rule 303, as revised by the committee, should indicate that the committee reinstated in full the language of the United States Supreme Court Rule from which the original Alaska proposal was drafted. Reinstatement of the U.S. Supreme Court Rule was decided on due to the advantage of the commentary on that rule provided in the form of the Advisory Committee's note contained in the Appendix to the Federal Rules of Evidence. See, e.g., Federal Rules of Evidence Annotated by the Federal Judicial Center, at 230-33 (Mathew Bender 1975). The committee was of the opinion that the Advisory Committee's note would be of substantial benefit in clarifying the intent and practical application of Rule 303.

Rule 303(a). Request for Additional Commentary: The committee would like to have additional commentary similar to

the language of the Advisory Committee's note to the United States Supreme Court Rule to the effect that Rule 303(a) does not apply to the presumption of innocence in a criminal case. Additionally, the commentary should make explicit that, in order to meet the presumption, the accused need not actually offer affirmative of evidence if evidence brought out on cross-examination or on direct examination in the course of the prosecution's case in chief is in itself sufficient.

Rule 404(a)(2)(ii). Request for Additional Commentary: Commentary should be added specifically stating that a hearing in camera should normally be on record with the right to cross-examination, the extent remaining in the court's discretion. The court additionally would have discretion to keep the record of proceedings in camera sealed pending appellate review in the event that it rules inadmissible the character evidence in question.

Rule 405(b). Request for Additional Commentary: The committee felt that it would be helpful to have specific examples given of the types of charges or cases in which character is an essential element of the charge or defense for the purpose of applying Rule 405(b).

Rule 410. Request for Additional Commentary. The committee's amendment of subsection (b)(1) of Rule 410 should be specifically dealt with in the commentary. The commentary should reflect that the committee's amendment of subsection (b)(1) was adopted to obviate the possibility of use of the word "impeachment", as it appeared in the original proposal, being misconstrued as limiting the use of prior inconsistent

statements beyond what is currently permissible under the Alaska Supreme Court's ruling in Beavers v. State.

Rule 412. Possible Redraft of Commentary: In light of the fact that the committee forwarded the original draft of Rule 412, along with one specific alternative, both without recommendation subject to the committee's statements appended as a footnote to Rule 412, the commentary applying to Rule 412 may have to be redrafted in accordance with the final version of the Rule adopted by the Alaska Supreme Court. It should be noted that the original proposal constitutes a narrowing of the current provisions of Criminal Rule 26(g) in that it would preclude a third party from having standing to assert violations of 5th Amendments rights vicariously. Although vicarious assertion of 5th Amendments rights is generally not permitted in other jurisdictions (see Dimmick v. State), the history of adoption of Criminal Rule 26 makes it clear that that Rule was specifically adopted to confer standing to assert 5th Amendment rights vicariously. See State v. Sears (1976). In the event that the Alaska Supreme Court should adopt Rule 412 as originally proposed, the commentary should explicitely reflect the change with respect to the issue of standing. The commentary in its present form is silent on the issue.

Rule 501. Request for Additional Commentary: The committee would like the commentary to Rule 501 to indicate specifically that, with the exception of the additional words "organization, or entity", the Rule is identical to former United States Supreme Court Rule 501.

commentary does not deal with this omission, and it is not clear whether the omission is inadvertent, stylistic, or substantive. It is generally the committee's view that in instances where a proposed Alaska Rule follows a Federal or United States Supreme Court Rule verbatim with the exception of several words, to avoid possible confusion and misinterpretation, the reason for the difference ought to be clarified in the commentary, even if the change is simply one of style.

Rule 503(d)(1). Additional Commentary: The committee's addition of the words "were used" in subsection 503(d)(1) was intended to cover instances where information given by an attorney--though initially given in the course of consultation for legitimate purpose--is subsequently used by the client to commit a crime.

Rule 504(b). Question: The committee did not understand exactly why this subsection adopted the language of the United States Supreme Court Rule verbatim except in changing the word "or" or "and" in the phrase "and persons who are participating. . . ." Use of the disjunctive "or" seems preferable. Can this be clarified?

Rule 504(c). Question: Although the committee was somewhat reluctant to change the proposed draft without more information, members of the committee were concerned as to whether there is any good reason to allow survival of privileges such as the attorney-client or physician-patient privilege after the death of the client/patient. If there is no good justification for survival of the privilege, then should it not terminate upon death of the client or patient?

Rule 504(d)(1). Question: Why isn't the language of the United States Supreme Court Rule 504(d)(3), with the addition of the word "physical", sufficient here? As is, the grammatical structure of Rule 504(d)(1) appears to be rather awkward and difficult to understand.

Rule 504(d)(4). Request for Revision of Commentary: It was the sense of the committee that the language of the commentary to the effect that "control over disclosure placed largely in the hands of a person in whom the patient has already manifested confidence" is largely unfounded in reality. Almost invariably, physicians or psychiatrists testify in involuntary commitment proceedings by court appointment, and, from the inception, there is little or no real physician-patient relationship in existence. The committee feels that this fact should be stated as the actual basis for the exception to the privilege, rather than the commentary as it now stands.

Rule 505. Request for Revision of Commentary: The privilege provided for in Rule 505 has been substantially amended by the committee, and spousal immunity has been deleted. The commentary should be revised accordingly. Additionally, the committee would like to include specific commentary with respect to some of the revised provisions. As to Rule 505(b)(4)(C), the commentary should specify that the exception contained in the subparagraph is not intended to be restricted solely to the natural or adoptive child of the spouse. With respect to Rule 505(b)(10), the committee thought that clarification as to the scope of the exception

created should be provided in the commentary by a specific statement that a communication between spouses is not confidential if it is made in the context of an agency relationship between the spouses, or in the context of any primarily business and non-marital relationship in which the marital relationship between the spouses is merely incidental to the business or non-marital communication. With respect to Rule 505(d) the committee would like to add to the commentary that a communication is not confidential if the context indicates that it either is not intended to be kept secret by the spouse making the communication or is not made by the communicating spouse as a result of the marital relationship. In general, the committee would appreciate comment on its revised form of Rule 505.

Request for Commentary Pertaining to Omission of United States Supreme Court Rule 509: The "secrets of state" privilege encompassed by former United States Supreme Court Rule 509 is properly omitted from the Alaska Rules of Evidence in the judgment of the committee; however, the committee thinks that commentary with reference to omission of the provision should make it clear that the omission does not justify the conclusion that all "state secrets" ought to be unprivileged; the only inference to be drawn from the omission is that, to the extent that any "state secrets" should be privileged, the problem of privilege should be left for resolution by legislation or regulation.

Rule 509. The committee would like to have Professor Saltzburg's view with respect to Rule 509 as to whether

political subdivisions ought to have a right to withhold the name of an informant.

Rule 509(c)(3). Question: The committee thinks that the language of this subsection needs substantial clarification. It was simply difficult for the committee to understand the subsection and how it is to be implemented. In this regard, the committee's own sentiments were joined by the comments of the Juneau Bar Association submitted to the committee with respect to Rule 509 generally.

Privileges Generally; Question: The committee voted to submit to Professor Saltzburg the question of whether consideration should be given to creation of a parent/child privilege, with further consideration to the alternative of allowing the party called as a witness to be holder of the privilege.

Rule 612. Request for Additional Commentary: By an odd twist of draftsmanship, the present version of Alaska Civil Rule 43 appears to treat the necessary foundation for refreshing memory and admitting evidence under the past recollection recorded doctrine by the same criteria. This unfortunate confusion has been perpetuated in a specific decision of the Alaska Supreme Court, Gilbert v. Zamarello. The committee would like to have the commentary with respect to Rule 612 make it clear that documents or materials used for the purpose of refreshing memory need not meet the foundational requirements for admission of evidence under the past recollection recorded doctrine. Additionally, with respect to subsection 612(d), the committee believes that it would be

appropriate to add to the commentary a statement that actual dismissal should be regarded as a last resort available to the court, and not regularly used.

Rule 613(b)(2). Request: The committee would appreciate consideration and comment on the views stated with respect to Rule 613(b)(2) by the Tanana Valley Bar Association and by Mr. Murphy. As noted in a footnote to the committee revision, the statements of the Tanana Valley Bar Association and of Mr. Murphy echo the sentiments of a minority of the committee.

Rule 615. Request for Additional Commentary: Although the strict language of the rule applies only to presence in court of non-testifying witnesses--i.e., the opportunity to hear the testimony of other witnesses--the committee believes that the commentary ought to make it clear that the intent of the rule is not only to prevent non-testifying witnesses from actually hearing the testimony of other witnesses, but generally to prevent non-testifying witnesses from obtaining the opportunity to conform their testimony to the prior testimony of others. For this reason, the commentary should reflect that under normal circumstances, when the exclusionary rule is invoked, the court should instruct all witnesses to refrain from discussing their testimony with other witnesses outside the courtroom.

Rule 703. Question with Respect to Commentary: The committee has doubts as to whether the commentary pertaining to Rule 703, at pages 3 and 4, relating to categories of "unreliable evidence", items number 1 and 2, are actually valid or accurate. Clarification would be appreciated

Rule 704. Additional Commentary: The committee would like the commentary to this Rule specifically to reflect that, in permitting an opinion to be voiced as to ultimate questions, the Rule does not contemplate admissibility of opinions as to the guilt or innocence of the accused in a criminal matter.

Rule 705(b). The committee amendment of Rule 705(b) reflects the belief that use of the term "in camera", as opposed to "out of the presence of the jury", may be misleading, and, in any event, inordinately restrictive. The committee thinks that the commentary should reflect that the precise mechanism for determination of whether the requirements of Rule 705 are satisfied should be left to the sound discretion of the court, and tht these mechanisms may include side bar proceedings as well as proceedings out of the presence of jury or in camera. Perhaps the confusion arises due to differences in practice in various jurisdictions. In the state of Alaska, when hearing out of the presence of jury is required, common procedure is to send the jury out of the courtroom; in other jurisdiction, common procedure may be for the jury to remain seated while the judge discusses issues with counsel in the judge's chambers. Substantive proceedings conducted "in camera"--i.e., actually in the judge's chambers--are unusual in the state of Alaska.

Rule 706. Additional Commentary: The committee revision omits subsection (b) of the original proposed rules, covering the topic of compensation of experts. The omission is due to the fact that compensation of experts is already covered by Administrative Rule 9(c), and the subject of compensation was

not deemed an appropriate concern for the Rules of Evidence. The committee does suggest, however, that the commentary to Rule 706, in noting the omission of the originally proposed subsection (b), suggest to the Alaska Supreme Court that Administrative Rule 9 be revised to provide for more realistic compensation of expert witnesses, and to include specific provision for payment of experts by the court when, in the exercise of its discretion, the court elects to appoint experts; there should also be provision for a specific mechanism for advance payment of such witnesses.

Rule 803. Additional Commentary: The commentary should reflect that the committee voted to number, rather than to letter the subsections of Rule 803 in order to conform the subsections to the counterpart federal rule and to facilitate comparison and cross-referencing between the state and federal provisions.

Rule 804(a)(5). Question: The committee voted to submit to Professor Saltzburg the question whether Rule 804(a)(5) is repetitive and unnecessary in light of the provisions of Rule 803(w) [803 (23) as renumbered]. 804(a)(5) and 803(w) provide an identical exception; since 803(w) makes its exception applicable to all situations regardless of the availability of the witness, it appears adequately to cover those cases encompassed by Rule 804(a)(5), where the witness is unavailable. This may, in fact be, be the reason why there is no parallel provision in the corresponding Federal Rule.

Rule 901. Additional Commentary, Revision to Commentary and Question: The committee was of the view that the

provisions of originally proposed Rule 901(b), since they constituted mere examples, should more appropriately appear in the commentary rather than in the text. These examples should be joined in with existing commentary in an appropriate fashion. Specifically with reference to example 5, the committee voted to have the example rewritten as follows:

> 5. Since all voice identification is not a subject of expert testimony an opinion may be stated regardless of whether the requisite familiarity was acquired solely for the purpose of litigation, in this respect resembling visual identification of a person rather than identification of hand-writing.

The committee also wanted to refer to Professor Saltzburg the question whether specific reference to administrative regulations as well as statutes and rules might be desirable in example 10.

Rule 1004. Additional Commentary: The committee thought that the commentary should make it clear that this section applies to situations in which neither the original nor a duplicate, as defined by the rules, is available.

Rule 1005. Additional Commentary: The committee was of the view that additional language clarifying this provision should be included. As is, considerable effort is required to understand exactly how Rule 1005 relates to Rules 1002, 1003, 1004. A more specific explanation in the commentary of the relationships of these rules to each other would assist in better understanding and more accurate interpretation of these rules.

Rule 1101. Additional Commentary: The committee thinks that additional commentary should be added specifying that the

revisions made by the committee to the originally proposed draft are the result of the committee's view that inapplicability of the Rules of Evidence to various types of proceedings should be specifically provided for in the statutes or rules governing the excluded proceedings. To a large measure, this situation already exists in Alaska law. Specifically with reference to subsection (b), the committee wanted the commentary to reflect that the subsection and the Alaska Rules of Evidence do not apply to extradiction proceedings, but do apply to habeas corpus proceedings.

General Request: The committee voted to request Professor Saltzburg to consider the California Code of Evidence and the benefits and drawbacks of its structure and substance compared to the rules presently under consideration. Specifically, the committee would like to hear comment on the feasibility and desirability of a general definitions section such as that contained in the California Code of Evidence.

Memorandum to the Committee

I have tried to carefully review all of the changes, questions and suggestions made by the Committee. What I have done in light of your comments and actions is to supply you with a draft accompanied by an appropriate Reporter's Comment for every Rule that you have indicated that you propose to adopt. At times I have vigorously disagreed with the approach that you have chosen. In such cases I have supplied an alternative rule. It is my hope that you might consider the alternative that I have put forth and perhaps adopt it. But, assuming that you stay with your original preference, I hope that you will be willing to send my alternative rules along with yours to the Supreme Court. I have tried to confine myself to disagreeing only in the very few places where I think that the disagreement is fundamental and where I think that the Supreme Court ought to consider the competing drafts.

As I have gone through the material that you sent and commented upon it, I have pulled no punches. If I disagreed, I said so.

It seems to me unnecessary that I travel to Alaska to meet with the Committee. I don't think that I can add anything to what I have put in writing, and I have a pretty good idea from your comments as to what was on your minds. By providing you with alternative drafts, the drafting is over for all practical purposes. I would think that you could get something to the Supreme Court very quickly.

Of course, as I indicated in my letter to Mr. Bryner, he can call me at any time if he has questions.

If I thought that I could do any good by coming there, I would not hesitate to do so. But I really think that I would slow down the work. When you see what I have provided, I think that you will agree

with me that it is complete and that you will have no additional need for my services.

I would like to think that with this final submission I have given you the very best in service in terms of drafting a Code of Evidence for the State of Alaska. I received the material from Mr. Bryner on March 11, a Saturday. I spent 15-hour days doing nothing but going over the material doing what was to have been my spring vacation here. At the end of seven or eight days, I think I have a final product that you will like.

I am sending a copy of the comments that I have made and the alternative drafts of the Rules to Gerry Dubie at the Alaska Court System. I thought that he should have it for his records.

There was some confusion as to the way in which the Committee was going to respond to the material that I submitted to the Supreme Court. But I think that this confusion arose out of a transition between a Committee that once headed by Justice Erwin in the current Committee. In any event, I doubt that it was your fault, and I will note the confusion for the Supreme Court's administrative staff.

In choosing to be blunt in my comments, I intended to be helpful, not impolite. It struck me that I would be doing noone a service by being less than candid at this distance.

Please do not hesitate to call me if you have any questions. I respect the job that the Committee did in going over the draft, and I hope that the Committee understands why I have been concerned with certain changes.

One of the things that I have tried to do is to add in all the recent cases that have come down since I first drafted these Rules. Sometimes this required handwritten additions. But it really makes

the set a complete version of what has happened in Alaska Evidence since Alaska became a state.

My hope now is that you will keep the Rules and the comments together. I also hope that they will go to the Supreme Court relatively soon and that the Supreme Court will consider the Rules and comments together. If you think that a comment needs changes or additions, there is no reason you cannot make additions or changes. You can either change the comment directly, or indicate that the Committee has a note it is adding. However you want to do this would be fine with me. You might even consider taking the Reporter's Comments and adopting them as Committee's Comments. But there is no single right way to do this. Whatever you do will be fine with me.

ROBERT D. BACON
CLERK OF COURT

POUCH U
JUNEAU, ALASKA 99811
(907) 465-3410

June 5, 1979

TO: Alaska Attorneys and Judges

FROM: Robert D. Bacon
Clerk of the Supreme Court

Enclosed you will find a complete copy of the new Alaska Rules of Evidence, which will take effect on August 1, 1979.

Many of you have the blue paperbound copies of the rules issued by the Alaska Bar Association in May in conjunction with the continuing legal education program on the new rules. You will want to note that the Supreme Court has modified Rule 412 since that time, and the final, revised version appears in the enclosed set. In addition, non-substantive editorial corrections have been made in about half a dozen rules under the supervision of the Alaska Supreme Court. In case of discrepancies, the enclosed text is official and is the one which will be applied by the courts.

Book Publishing Company, official publishers of the Alaska Rules of Court, will publish the Rules of Evidence, together with the complete text of the commentary by Prof. Stephen A. Saltzburg of the University of Virginia, as a new Volume I-A of the Alaska Rules of Court. Subscribers should receive that volume late this summer or early this fall. The commentary has been modified since the Bar Association institutes in May to reflect the final changes in the text of the rules.

Users with suggestions for improvements in the form or substance of these or other Alaska court rules are urged to send them to this office. All suggestions are given careful consideration by the Alaska Supreme Court.

Rules

Alaska R. Evidence 501 2

AUTHORITIES PRINCIPALLY RELIED UPON

Evidence Rule 501 [in relevant part]:

Rule 501. Privileges Recognized Only as Provided.

Except as otherwise provided by the Constitution of the United States or of this state, by enactments of the Alaska Legislature, or by these or other rules promulgated by the Alaska Supreme Court, no person, organization, or entity has a right to …(3) refuse to produce any object or writing…

ARGUMENT

I. Most Jurisdictions that have Considered Similar Issues have found a Privilege.

The State claims that no jurisdiction has ever adopted a privilege like the one here. But in fact most jurisdictions that have considered the issue have adopted or recognized a privilege when the law allows (or, as here, requires) lay representation in employment hearings or where important confidential communications of union members with union officials was threatened:

Welfare Rights Org. v. Crisan, 661 P.2d 1073 (Cal. 1983);
City of Newburgh v. Newman, 421 NYS 2d 673 (1979);
Seelig v. Shepard, 578 N.Y.S.2d 965 (Supr. Ct. 1991);
District No. 1-PCD v. Apex Mar Co, 296 AD 2d 32 (N.Y. App. Div. 2002);
In Re Grand Jury Subpoenas, 995 F. Supp. 332, 336 (E.D. NY 1998);
International Union v. Garner, 102 F.R.D. 108 (M.D. Tenn. 1984);
Woods v. N.J. Dept of Education, 858 F.Supp. 51, 55 (D. N.J. 1993);
NLRB v. Jackson Hospital Corporation, 257 F.R.D. 302, 311-12 (D.D.C.2009);
Cook Paint and Varnish Co., 258 NLRB 1230 (1981);
Berbiglia, Inc., 233 NLRB 1476, 1495 (1977), aff'd 602 F.2d 839 (8th Cir. 1979);
U.S. Dep't of Treasury, 38 F.L.R.A. 1300, 1302 (1991);
N.H. Troopers Ass'n v. N.H. Dept of Safety, No. P-0754:2, PELRB Decision No. 94-94-74 (N.H. Public Employee Relations Board, 1994);
IBEW Local 77, 2003 WL 21658695 (Wash. Publ Employment Relations Comm'n, 2003).[1]

The fallacy in the State's argument is that it defines the "privilege" so narrowly, i.e., a privilege between union members and union lay advocates in litigation following an administrative process involving the union member's employment status. In fact, all the listed cases recognize the critical need for maintaining confidentiality in union member

---

[1] There are also cases in which courts recognized a full labor relations privilege, which would encompass cases like the instant one, but in situations in which union bargaining strategy was involved, *Ill. Educ. Labor Relations Bd. v. Homer Cmty Consol. Sch. Dist.*, 547 N.E. 2d 182 (Ill. 1989); and *Patterson v. Heartland Indus. Partners*, 225 F.R.D. 204 (N.D. Ohio 2004), holding that the First Amendment Freedom of Association prevents the disclosure of confidential labor relations information.

relations when substantial member rights are at issue, and they all lead to the conclusion that this case – in which the State mandated a lay union advocate in a vital process to which due process rights attach – easily falls within the same logic.

II. This Court is Free to Adjudicate the Rights of the Litigant Before It.

The State argues that this court has made a policy decision not to recognize new privileges in case law, but only through formal rule changes. It claims that the Supreme Court has failed to recognize any new privileges through case law after the Rules of Evidence were promulgated in 1979. But in fact this court has done so four times since 1979:

> *Confidentiality privilege for non-attorneys working with attorneys*, American National Watermattress Corp. v. Manville, 642 P.2d 1330, 1333-4 (Alaska 1982);
>
> *Executive privilege*, Doe v. Alaska Superior Court, Third Judicial District, 721 P.2d 617 (Alaska 1986);
>
> *Conditional privilege for publication of defamatory material in employer-employee relationship*, Schneider v. Pay'NSave, 723 P.2d 619 (Alaska 1986);
>
> *Deliberative process privilege*, Capital Information Group v. Office of Governor, 923 P.2d 29 (Alaska 1996).

In none of those cases did the court indicate any hesitation to consider and rule on the privilege questions before it. Indeed, the introductory sentence of Evidence Rule 501 indicates that privileges based on the federal and state constitutions are in addition to the privileges enumerated in the Rules, as they must be since this court has a duty to enforce

rights protected by the constitutions. The State urges the court to refuse to give relief to actual parties whose constitutional rights have been violated, in favor of a lengthy rulemaking process for future cases. This court has never chosen to ignore the rights of litigants in front of it, and the State has given no reasons why it should do so now.

III. The State Already has the Discovery Tools to Learn the Facts at Issue.

The State claims that recognition of a privilege between a litigant and his lay advocate would make it "impossible" to learn the facts regarding exhaustion of administrative remedies. Yet a privilege would not prevent the State from making ordinary discovery of relevant facts. And the main fact the State now claims it must prove – that Mr. Peterson did not take the last possible step in the administration process, of appealing to the union's board after his union advocate decided not to demand arbitration – has been admitted from the start. Indeed the State, in its deposition of Mr. Peterson, asked him whether he had appealed his advocate's refusal to take the matter to arbitration to the union's board, and received a full answer describing both the fact that he had not done so and the reasons it would have been futile. [TR 292-297, App. A] In short, the underlying facts are discoverable and have already been discovered. The State has shown no compelling need to invade advocate-client confidentiality in order to find out more. What the State really is after is confidences shared between a client and his advocate.

The State admits in its brief that it is actually fishing for anything else that may be helpful to it, such as whether "...Mr. Peterson's explanations for his failure to report felonies surfaced only during the grievance process...and [whether] Mr. Peterson made false

statements to his union...and if there are other grievances in the file involving Mr. Peterson..." [Respondent's brief, p. 10, fn. 24]. Obviously the State could have asked about such facts through normal discovery, without demanding to see the communications between Mr. Peterson and his advocate. While the State is free to do discovery to find out facts, there is nothing that would justify wiping out the confidentiality of a litigant with his advocate, merely so that the other side can fish for something that might be helpful.

In short, the State can discover all relevant facts through normal discovery without any need to invade the communications between client and advocate, a relationship in which Mr. Peterson, along with all union members, have an expectation of privacy.

IV. Due Process is Not Optional in this Litigation

The State claims that due process is not even required at this stage, i.e., in litigation, because the State gave Mr. Peterson due process already, in the administrative phase. In that phase, the State says, it benevolently refrained from demanding the private communications between Mr. Peterson and his advocate. So it doesn't matter that now that privacy is being invaded.

This creative argument fails because it would deny due process, i.e., the critical right to private communications with one's advocate, if at any point in the process a litigant knew that at some later point all his private communications could be revealed to the State. As the California Supreme Court said in *Crisan, op.cit.*, the legislature cannot have intended that the only advice a lay advocate could give his client is, "don't talk to me."

Moreover, this court has never held that in either of the two phases of union

member litigation – the administrative process or the court process –due process is optional. Both phases are vital to an employee's rights. The State's broad claim that by according due process in only some isolated parts of the process, it is excused from offering due process in other parts, implicates the whole scheme under which the State requires public employees to go through both phases, and in which it prohibits attorneys from participating in the first phase. It is not necessary for this court to decide now whether due process is denied by the State's imposition of a rule disallowing attorney representation in the administrative phase, but the breadth of the State's claim that it does not need to provide due process in the courtroom phase if it grants it in the administrative phase is sweeping. We urge the court to decide for the Petitioner on narrow grounds, i.e., that he has a right to confidentiality with his union lay advocate; but the State's argument does raise the question of whether it is even constitutional to require an employee to go through a process in which lawyers are prohibited and lay advocates are not allowed to maintain client confidentiality.

V. Confidentiality Between Grievant and Advocate Promotes Fair and Efficient Process.

The State argues that the "grievance process" would be damaged if it cannot invade the confidentiality of a public employee's communications with his advocate. The opposite is the case. As it is, there is substantial skepticism among state employees about whether the administrative process is anything but a time-consuming charade with an outcome that is preordained in almost all cases. If the employee knows that he cannot speak openly to his own advocate, it is all the more likely that that employee will consider the administrative process to be a farce, intended by the State to delay resolutions and force workers to seek

employment elsewhere or just forget about seeking an objective adjudication of grievances.

VI. The State's Statement of "Facts" is Biased and Aimed at Prejudicing the Court

Finally, we note that the State's characterization of the facts is an unbalanced ad hominem attack on Mr. Peterson, by setting out highly contested factual claims as if they were true. There are serious fact issues regarding whether Mr. Peterson had *any* convictions for felonies as an adult; whether a Department of Labor employee instructed him not to put down convictions from thirty years earlier on his job application; whether the State knew about his record as a young person, investigated it, and told him it was not a problem, two years before this job action against him; whether the same State that now claims surprise by his use of another name during part of his life prosecuted him twelve years ago for using the other name instead of his own. On the other side, the State ignores the fact that he has been a solid citizen and member of the community since leaving his home in another state to start a new life thirty years ago, and that he was steadily employed, using his own name, until the State brought up facts that it had known about and excused for years. In short, the court should not be swayed by a one-sided recitation of the background facts that should be left to the jury to consider.

Conclusion

The State's brief fails to show any substantial case law that would allow the State to invade the private communications between a litigant and his advocate. The fact that the State itself mandates that the litigant use a lay advocate and not an admitted attorney is itself

questionable, but to then use that requirement as a wedge to invade private communications vital to due process should not be allowed. The trial court's order should be reversed and the case sent back for trial.

Respectfully submitted this 7th of October, 2011.

Place: Juneau, Alaska

APPENDIX A

Page 290

people, four people -- five, four -- I've said in front of three people that I don't really know some embarrassing stuff. And it's like -- and then guess what? There is going to be five more people that have to talk about it, and five more.

And you know what? I'm good to go. If I have to stand up in a front of a courtroom and tell everybody what happened to me, and why, bring it. Because you know what? It doesn't change the fact that this is wrong. It's wrong. All -- and all I wanted to do was the right thing, Mr. Ptacin. Ask Pat. I tried to do the right thing. And I said, "Hey" -- I mean -- I'm sorry. I'm so sorry.

Q. No, it's okay.

A. I didn't have control right there for a second, and I'm sorry.

This is -- it's sad to me. It's really sad, because I know people that are at JAMHI. You know what? I have to call a few people tonight and tell them that nothing you tell those people is sacred. Nothing. (Witness crying.) It doesn't matter if it's your priest, your union, your lawyer.

That's what this is about to me,

Page 291

and it's not going to stop with just this. I can't let it. Not you guys. There is a thing with the union now. It's -- and if I have to spend my time doing that, I'm comfortable up on the hill. And if I -- and I've never come down -- and I've never left there without -- because it's always about the right thing. If you go up the hill -- that's still my belief, that if you go next door to the building and you're right -- and that's what Tim Kelly taught me -- that if you go -- if you're real, if you're sincere with your thing, whatever you're going there for, you will prevail. And that -- and that's what this is all about.

And I may have made some mistakes, but -- and, you know, whatever. I'm just a little disappointed that JAMHI, you know, had to sell me out. So, you know.

MR. MERTZ: Let's see if John's got some more questions.

THE WITNESS: I'm sorry.

Q. Yeah. That's okay.

I don't want to talk too much about the union grievance process, because we've got issues there, but --

A. Yeah.

Page 292

Q. -- can you at least tell me -- and, again, just stop it if you, you know -- do you recall why -- and I'll show you. This is all I have so far. I've got an e-mail from Dick Isett to Mertl, or Benthe Mertl-Posthumus.

A. I got a good recording if you want it.

Q. What's the recording of?

A. The one of Dick saying, "Everything's going to be great." And I had a meeting with -- it was a message he left on my phone.

MR. MERTZ: Okay. That's separate from what he's talking about.

THE WITNESS: Okay.

Q. Yeah. But it says --

A. I have two, if you want to hear them.

Q. We'll wait on that.

It says, "Hello, Benthe. Mr. Peterson has not appealed my decision not to arbitrate his grievance. The union hereby withdraws Union Case" -- and then it goes on to list it.

And this is all the information that I have about your union grievance process, going to the union to talk about what happened. (Handing.)

Page 293

A. Oh. Oh. And I asked him for arbitration over and over. I don't know really what -- I don't know really what that is. I don't know. It -- you talk about stuff, but --

Q. Did you -- and, again, stop if you want me to stop, but --

A. I'm sorry.

Q. -- did the union send you any kind of letter saying that you had an ability to file or to --

A. Maybe.

Q. -- go for --

A. I know he told me that it would be pointless, because he said, "We're the people -- we're the people that make that decision, and I'm telling you right now that it's pointless. But you can -- if you don't believe me, you can file a grievance, file an appeal. You can arbitrate. You can file for arbitration. You can file an appeal for our decision, but it's going to be pointless, because we're the people who make up the decision," and ---

Q. So you actually had a conversation with --

A. Many, yeah.

Page 294

Q. -- with Dick about this very issue?
A. Yeah. Yeah. In fact, he told me that it was all going to be all pretty much settled. That's a good recording or message that he left. "I had a great meeting with this Mertl-Posthumus" --
MR. MERTZ: Okay. Now, he's asking you about something else.
THE WITNESS: Okay.
MR. MERTZ: It's the question of whether to press the state for an arbitration.
THE WITNESS: He told me to forget it.
MR. MERTZ: And then after Dick had decided they wouldn't ask for arbitration, then there is what he told you about whether you should appeal.
THE WITNESS: Yeah. Yeah. He said, "Don't -- don't -- you can appeal this arbitration, but you can't" --
Q. Did you do that through a phone call, a talk with Dick?
A. Oh, I'm sure it was on the phone, because I never saw him.
Q. You never did that in e-mail or

Page 295

anything?
A. Doubtful.
Q. He never sent you an e-mail?
A. He sent me lots -- well, a few e-mails, but --
Q. And you consider all of these conversations between you and Dick are privileged?
MR. MERTZ: Well, he's obviously willing to tell you about it. And this particular one, about the futility of that final appeal, is something you ought to know, which is why I'm not making an objection.
Q. Right. Right. And that's what I need to know.
A. Yeah. He said --
Q. What's the --
A. -- don't -- he said, "You can do it." He made it sound like -- you know what, honestly? He sounded -- he didn't sound like Josh Lovett, but it was the same pretense, like -- no, it was completely -- I'm sorry. Scratch that. It was completely different.
But in the same tone, he said, "You can appeal it, but we're the ones that make the decision if it's going to be approved." And so

Page 296

why bother?
Q. Do you have any notes from this or any --
A. No. I remember it, though, because he said -- he explained --
Q. Do you have any -- do you have anything, paperwise, that would confirm this?
A. I can look, but I don't think -- I don't think so.
Q. You folks have the union records. I don't. I've never seen them. And --
A. Oh, that's what I heard.
MR. PTACIN: Is there a way to get through this stuff, do a priv. log or anything for -- at least on this issue?
MR. MERTZ: Yeah. My recollection is that there is nothing in writing about this, other than that e-mail to Benthe that you mentioned. But I'm going to look.
MR. PTACIN: Okay.
MR. MERTZ: And if there is something, I'll give it to you.
THE WITNESS: I'll look too. I'll look tonight. I save --
MR. MERTZ: See if you've got

Page 297

anything. Tell me if you find anything, and I'll look through the records.
THE WITNESS: Okay.
MR. MERTZ: And if there's something, you'll get it.
MR. PTACIN: At least on this issue, yeah.
THE WITNESS: Yeah.
MR. PTACIN: At least get that far.
THE WITNESS: Yeah. Because I remember him telling me that it was pointless. But he was like kind of weird about it, because he said, "But you can go ahead and do that anyway," (enunciating) you know, in his Dick Isett voice.
MR. PTACIN: Yeah. We'll mark that in, just for good measure.
(Exhibit 11 duly marked.)
BY MR. PTACIN:
Q. As far as union questions, I'll just -- hold that open, waiting for the judge to rule on those issues for now.
A. Yeah. I don't mind.
Q. Now, unemployment. In one of your responses, you'd mentioned that you had been taking some unemployment --

INTEREST OF *AMICUS CURIAE*

The American Federation of Labor and Congress of Industrial Organizations (AFL-CIO) is a federation of 56 national and international labor organizations with a total membership of approximately 11.5 million working men and women.[1] The petitioner in this case, Russell Peterson, Jr., was represented in the grievance process by a representative of the Alaska State Employees Association, which is affiliated with the AFL-CIO through its parent union the American Federation of State, County and Municipal Employees. This case presents an important and recurring question for the AFL-CIO and its affiliates: the extent to which confidential communications between employees and their union representatives made during the grievance process are protected from disclosure in subsequent litigation involving the employee and the employer.

STATEMENT OF THE CASE

Petitioner Russell Peterson, Jr. (Peterson) was employed by the Alaska Department of Labor in a bargaining unit represented by the Alaska State Employees Association, AFSCME Local 52, AFL-CIO (ASEA). Petitioner's Excerpt (hereinafter Pet. Exc.) 142, 146. After he was fired from his position with the Department of Labor, Peterson filed a grievance pursuant to the collective bargaining agreement between the State of Alaska and the ASEA. Pet. Exc. 146. The agreement states clearly that only the union, and not private counsel, may

[1] Both parties have consented in writing to the filing of this brief *amicus curiae*.

represent an employee in the grievance process. Pet. Exc. 20. Pursuant to this provision, a non-lawyer representative of the ASEA handled Peterson's grievance. Pet. Exc. 20-21. The ASEA and the State were unable to resolve Peterson's grievance and the union decided not to pursue the grievance to arbitration. Pet. Exc. 128. Peterson then filed this suit for unjust termination in superior court. Pet. Exc. 2-8.

In court, the State subpoenaed the ASEA's entire grievance file pertaining to Peterson and subpoenaed the ASEA's Business Manager to appear for a deposition. Pet. Exc. 50. Peterson objected to the State's attempt to discover Peterson's communications with the ASEA during the grievance process and moved for a protective order, contending that the grievance-related confidential communications at issue were privileged. Pet. Exc. 34, 38-45. The superior court rejected this argument and denied Peterson's motion for a protective order. Pet. Exc. 146-151. Peterson then petitioned this Court for interlocutory review of the superior court's discovery order, which this Court granted. *See* Order Granting Pet. for Rev. 1.

SUMMARY OF ARGUMENT

A public employer's demand to discover confidential grievance-related communications between an employee and his union representative constitutes an unfair labor practice in violation of the Alaska Public Employment Relations Act. (PERA). Rather than require parties to commence wasteful satellite litigation by filing unfair labor practice charges under that law, this Court should, by means of

its supervisory authority over the discovery process, permit employees and their unions to assert a limited privilege for confidential grievance-related communications in court. The recognition of this limited privilege is necessary to permit the proper functioning of PERA's mandatory grievance and arbitration system and to ensure that labor disputes are, to the greatest degree possible, resolved through contractual dispute-resolution processes rather than through litigation.

ARGUMENT

A public employer's demand to discover confidential communications between an employee and his union representative made during the mandatory grievance and arbitration process interferes with the employee's right to union representation in violation of the Alaska Public Employment Relations Act (PERA). AS 23.40.070 et. seq. Alaska's civil discovery rules generally permit a party to "obtain discovery regarding any matter, not privileged which is relevant to the subject matter involved in the pending action." Alaska R. Civ. P. 26(b)(1). No express privilege exists under Alaska's Rules of Evidence for confidential grievance-related communications between employees and their union representatives. *See* Alaska R. of Evid. 501 – 509. In order to harmonize PERA's strong public policy in favor of contractual resolution of labor disputes with the civil discovery rules' presumption in favor of disclosure, this Court should recognize a statutory-based limited privilege for confidential grievance-related communications between employees and their union representatives.

1. The NLRB has held that an employer's demand to discover confidential communications between an employee and his union representative made during the grievance process interferes with the employee's right to union representation and therefore will not be enforced. *See Cook Paint and Varnish Co.*, 258 NLRB 1230 (1981). The NLRB's ruling has been followed by every state court and public employment labor relation board that has addressed the question. *Ill. Ed. Lab. Rel. Bd. v. Homer Cmty. Consol. Sch. Dist.*, 547 N.E.2d 182, 188 (Ill. 1989); *Seelig v. Shepard*, 578 N.Y.S.2d 965 (N.Y. Sup. Ct. 1991); *Int'l Bhd. of Elec. Workers v. Pub. Util. Dist. 1*, Dec. 7656-A, 2003 WA PERC LEXIS 46, 55 (Wash. Pub. Employment Relations Comm'n, June 11, 2003); *N.H. Troopers Ass'n v. N.H. Dept. of Safety*, Dec. 94-74 (N.H. Pub. Employee Relations Bd., Aug. 31, 1994), *available at* http://www.nh.gov/pelrb/decisions/board/documents/1994-074.pdf. Thus, there is unanimous agreement that an employer's attempt to discover confidential grievance-related communications between an employee and his union representative interferes with the employee's protected rights.[2]

---

[2] Neither of the cases cited by the State in its Brief in Opposition to Petition for Review, *see* Resp. Br. in Opp., p. 8 n.11, are to the contrary. In *Atwood v. Burlington Indus. Equity, Inc.*, 908 F.Supp. 319 (M.D.N.C. 1995), the court held that the presence of a non-lawyer union representative at pre-litigation meetings between employees and an attorney destroyed the attorney-client privilege. *Atwood* is factually inapposite because the conversations did not occur during the grievance or arbitration process. In *Walker v. Huie*, 142 F.R.D. 497 (D. Utah 1992), the court held that a citizen injured by a police officer could discover communications made between the officer and a union representative during internal employer disciplinary proceedings. However, the plaintiff in *Huie* was a stranger to the collective bargaining process in which the communications took place, so that case is distinguishable as well.

The logic of these decisions is unassailable. The grievance process is a mechanism by which a union, performing its statutory role as the exclusive representative of all the employees in the bargaining unit, is able to exercise its statutory responsibility to enforce the terms of the collective bargaining agreement through "the continuing administration of the contract" and thus "protect the interest[s] of . . . employee[s]" in the terms and conditions of employment set forth in that contract. *Republic Steel Corp. v. Maddox*, 379 U.S. 650, 652-53 (1965). Allowing an employer to compel the disclosure of confidential grievance-related communications would necessarily inhibit the union from "obtaining needed information from employees" that is critical to the union's ability to perform its statutory duty as exclusive representative to police the agreement. *Cook Paint*, 258 NLRB at 1232. Likewise, requiring such disclosure would materially interfere with the union's representation of individual employees in the grievance process by "restrain[ing] employees in their willingness to candidly discuss matters with their chosen, statutory representatives." *Ibid.* In other words, "[t]he right to union representation would be meaningless if, upon disclosing the facts needed for representation, the disclosure were then available to the employer upon asking. The union representative would become little more than a conduit." *N.H. Troopers Ass'n*, *supra*, at 5.

This same logic applies with equal force to the union's statutory responsibilities under PERA. PERA was enacted by the Alaska Legislature "to promote harmonious and cooperative relations between government and its

employees and to protect the public by assuring effective and orderly operations of government." AS 23.40.070. An important mechanism for accomplishing this purpose is the statutory requirement that every public sector collective bargaining agreement must "include a grievance procedure which shall have binding arbitration as its final step." AS 23.40.210(a). *Accord United Steelworkers of America v. Warrior & Gulf Navigation Co.*, 363 U.S. 574, 578 (1960) ("The present federal policy is to promote industrial stabilization through the collective bargaining agreement. A major factor in achieving industrial peace is the inclusion of a provision for arbitration of grievances in the collective bargaining agreement."). In order to ensure that labor disputes are resolved through the grievance and arbitration procedure rather than in court, public employees in Alaska "must first exhaust their contractual or administrative remedies, or show that they were excused from doing so, before pursuing a direct action against their employer." *Cozzen v. Municipality of Anchorage*, 907 P.2d 473, 475 (Alaska 1995).[3]

The relevant provisions of PERA are modeled on Sections 7 and 8(a)(1) of the National Labor Relations Act (NLRA), 29 U.S.C. §§ 157 & 158(a)(1). Like the NLRA, PERA makes it an unfair labor practice for "[a] public employer or an

---

[3] Once a grievance is decided by an arbitrator, that decision is given "great deference" by this Court, which "will only vacate an arbitration award arising out of a collective bargaining agreement where it is the result of gross error – those mistakes that are both obvious and significant," *State v. Pub. Safety Employees Ass'n*, 235 P.3d 197, 201 (Alaska 2010), further ensuring that labor disputes are resolved through the grievance and arbitration procedure rather than in court.

agent of a public employer" to "interfere with, restrain, or coerce an employee in the exercise of the employee's rights guaranteed in AS 23.40.080." AS 23.40.110(a)(1). That section of PERA, like Section 7 of the NLRA, guarantees the right of Alaska public employees to "form, join, or assist an organization to bargain collectively through representatives of their own choosing." AS 23.40.080. For this reason, "[r]elevant decisions of the National Labor Relations Board and federal courts [are] given great weight" in interpreting PERA. 8 AAC 97.240. *See also Alaska Pub. Employees Ass'n v. Department of Admin., Div. of Labor Relations*, 776 P.2d 1030, 1032 (Alaska 1989) ("We have followed federal decisions interpreting the NLRA when the provisions of the NLRA are similar to state statutes.").

Given the similarities between the relevant provisions of PERA and the NLRA, the Alaska Labor Relations Agency (ALRA), the body charged with enforcing PERA, would undoubtably reach the same conclusion as the NLRB reached in *Cook Paint* and would hold that an employer's demand to discover confidential grievance-related communications between an employee and his union representative constitutes an impermissible unfair labor practice.[4] Faced with such a discovery request, whether in the form of a civil subpoena or otherwise, the affected employee and/or his union could file an unfair labor

[4] Because ALRA expressly permits non-lawyers to represent parties before the agency, 8 AAC 97.355(a), there can be little doubt that ALRA would find that an employer's attempt to discover communications between an employee and a non-lawyer union representative made in preparation for an ALRA proceeding constitutes an unfair labor practice and would not permit that discovery to occur.

practice charge with ALRA and would be entitled to an order enjoining the employer's unlawful discovery effort.

2. In this case, Peterson chose to assert his PERA-protected rights by objecting to the State's discovery requests in superior court, rather than filing an unfair labor practice charge with ALRA. Under Alaska Rule of Evidence 501 and the Court's supervisory authority over the discovery process, this Court should sustain Peterson's objection and rule that employees and their unions may assert a limited privilege against being forced to disclose confidential grievance-related communications in court without having to engage in the time-consuming and wasteful extra step of instituting collateral litigation before ALRA by filing an unfair labor practice charge to challenge an employer's discovery request.

The Alaska Rules of Evidence state that "no person, organization, or entity has a privilege to . . . refuse to disclose any matter; or . . . refuse to produce any object or writing . . . [e]xcept as otherwise provided by the Constitution of the United States or of this state, by enactments of the Alaska Legislature, or by these or other rules promulgated by the Alaska Supreme Court." Alaska R. Evid. 501. Although "[p]rivileges in litigation are not favored and should be narrowly construed," Alaska courts recognize that "where some major public policy clearly articulated in a constitutional provision, statute, or court rule clearly outweighs the truth-seeking function . . . a privilege should be recognized." *Russell v. Anchorage*, 706 P.2d 687, 693 (Alaska App. 1985).

There is no explicit privilege in the Alaska Rules of Evidence for confidential grievance-related communications between an employee and a union representative. Alaska R. Evid. 501 – 509. Because the grievance belongs to the union rather than the grievant, Alaska's lawyer-client privilege does not apply. *See* Alaska R. Evid. 503(b) (privilege only applies to "confidential communications . . . between the client . . . and the client's lawyer"). That is so even if the union were to designate one of its attorneys, rather than a lay union representative, as the person responsible for representing the union's interest in the grievance. *See Peterson v. Kennedy*, 771 F.2d 1244, 1258 (9th Cir. 1985) ("We do not believe that an attorney who is handling a labor grievance on behalf of a union as part of the collective bargaining process has entered into an 'attorney-client' relationship in the ordinary sense with the particular union member who is asserting the underlying grievance.").[5] The proper functioning of PERA's mandatory grievance and arbitration system, however, requires, some protection for – to paraphrase Alaska's lawyer-client privilege rule – "confidential

[5] A union attorney does, of course, have an attorney-client relationship with the union itself and, in some cases, may also establish an attorney-client relationship with an employee where the attorney "specifically agree[s] . . . to provide direct representation to [the employee] as an individual client." *Peterson*, 771 F.2d at 1261. *See also Bachner v. Air Line Pilots Ass'n.*, 113 F.R.D. 644, 648 (D. Alaska 1987) (same). For example, a union may provide or pay for a private attorney for an individual employee as a benefit of union membership. In this situation, "a tripartite attorney-client relationship exists" between the employee, the union's lawyer, and the private attorney. *Raymond v. N.C. Police Benevolent Ass'n, Inc.*, __ S.E.2d __, 2011 N.C. LEXIS 224 (N.C., April 8, 2011).

communications made for the purpose of facilitating the rendition of [grievance-related representative] services to the [employee]." Alaska R. Evid. 503(b).

The protection extended to such confidential grievance-related communications need not be absolute. The United States Supreme Court has long recognized "limited" or "qualified" privileges for certain confidential communications not otherwise protected by the evidentiary rules, such as a limited privilege for confidential Executive Branch conversations and correspondence. *United States v. Nixon*, 418 U.S. 683, 708 (1974). *See also Fed. Open Market Comm. of Fed. Reserve Sys. v. Merrill*, 443 U.S. 340, 360 (1979) (recognizing a "limited" or "qualified" privilege against disclosure of certain monetary policy directives by Federal Reserve); *United States v. Nobles*, 422 U.S. 225, 238-39 (1975) (applying the work product doctrine in the criminal context, while explaining that "[t]he privilege derived from the work-product doctrine" is "qualified," "not absolute"). Similarly, this Court has recognized a "qualified" privilege for "confidential . . . internal governmental communications" necessary to "protect the deliberative and mental processes of decision makers," *Capital Information Group v. State of Alaska*, 923 P.2d 29, 33-34 (1996) (quoting *Doe v. Alaska Superior Court*, 721 P.2d 617, 622-23 (Alaska 1986)), based on the conclusion that "the public policy rationale upon which the Supreme Court relied in *United States v. Nixon* is equally applicable to our state government," *Doe*, 721 P.2d at 623.

When a party invokes a limited privilege, the superior court must apply a "balancing test" to determine the applicability and scope of the privilege. *Capital Information Group*, 923 P.2d at 37. First, the party asserting the privilege must make a "threshold showing" that the communication is covered by the privilege. *Ibid.* "If [the party asserting the privilege] . . . meets the threshold requirements, then there is a presumptive privilege and the party seeking disclosure must make a sufficient showing that the need for production outweighs the need for secrecy." *Ibid. See also Doe*, 721 P.2d at 626 ("[W]hen a formal specific claim of . . . privilege is asserted, a presumptive privilege attaches.").

Because PERA – an "enactment[] of the Alaska Legislature," Alaska R. Evid. 501 – explicitly requires the inclusion of a mandatory grievance and arbitration procedure in every public sector collective bargaining agreement, and because the effective operation of PERA's mandatory contractual dispute-resolution system constitutes a "major public policy clearly articulated in a . . . statute," *Russell*, 706 P.2d at 693, this Court has authority under Rule 501 to recognize a privilege for confidential grievance-related communications between employees and their union representatives. For reasons similar to those that motivated this Court to recognize a limited deliberative process privilege for confidential internal government communications, this Court should recognize a limited privilege for such grievance-related communications, thus creating a "presumption in favor of nondisclosure." *Capitol Information Group*, 923 P.2d at 37.

3. The precise nature of the limited privilege required by PERA flows from the role that the grievance and arbitration procedure plays in the collective bargaining process.

"[A]rbitration of labor disputes under collective bargaining agreements is part and parcel of the collective bargaining process itself." *Steelworkers*, 363 U.S. at 578. It is the grievance and arbitration process that provides "a common law of the shop which implements and furnishes the context of the agreement." *Ibid.* The union's obligation, as the "exclusive representative of *all the employees* in the bargaining unit," AS 23.40.100 (emphasis added), is to enforce the collective bargaining agreement in a manner that establishes a "common law of the shop" most favorable to all the employees. Although "[t]he rights of individual employees concerning . . . conditions of employment are a major focus of the negotiation and administration of collective bargaining contracts," *Smith v. Evening News*, 371 U.S. 195, 200 (1962), "[t]he bargaining representative . . . is responsible to, and owes complete loyalty to, the interests of all whom it represents," *Ford Motor Co. v. Huffman*, 345 U.S. 330, 338 (U.S. 1953).

The grievance, therefore, is controlled by the union. By "giv[ing] the union discretion to supervise the grievance machinery and to invoke arbitration," "frivolous grievances are ended prior to the most costly and time-consuming step in the grievance procedure[]," "both sides are assured that similar complaints will be treated consistently and major problem areas in the interpretation of the collective bargaining contract can be isolated and perhaps resolved." *Vaca v.*

Sipes, 386 U.S. 171, 191 (1967). In contrast, "[i]f the individual employee could compel arbitration of his grievance regardless of its merit, the settlement machinery provided by the contract would be substantially undermined," and "a significantly greater number of grievances would proceed to arbitration," "greatly increas[ing] the cost of the grievance machinery and . . . overburden[ing] the arbitration process as to prevent it from functioning successfully." *Id.* at 191-92.

Without a proper recognition of the employee's right to freely confer with his union representative during the grievance process, PERA's policy of "promot[ing] harmonious and cooperative relations between government and its employees and . . . protect[ing] the public by assuring effective and orderly operations of government" through contractual resolution of labor disputes would be thwarted. See AS 23.40.070. Permitting the State to discover the contents of confidential grievance-related communications will "discourag[e] the communication of relevant information by employees . . . to [union representatives]" in the grievance process, *Upjohn Co. v. United States*, 449 U.S. 383, 392 (1981), because employees will justifiably fear that such communications will be discoverable in subsequent litigation. Employee reluctance to communicate with the exclusive bargaining representative will, in turn, substantially interfere with the union's ability to represent employees in the grievance process, as "[t]he first step in the resolution of any legal problem is ascertaining the factual background and sifting through the facts with an eye to the legally relevant." *Id.* at 390-91. And this, in turn, would wreak havoc on the

mandatory exhaustion-of-remedies requirement that is designed to resolve labor disputes in the grievance and arbitration procedure without the necessity of court involvement. If employees refuse to cooperate with a union's investigation, the union will lack the information it needs to effectively settle cases or decide which grievances to take to arbitration, ultimately leading to fewer labor disputes resolved through contractual means and more cases that will be heading to the Alaska courts.

There are two important lessons to be drawn from the foregoing description of the collective bargaining process with regards to the scope and application of a limited privilege for confidential grievance-related communications between an employee and a union.

First, the limited privilege would only operate where the parties to the underlying grievance are the same, or in privity to, the parties in the subsequent lawsuit, and where the lawsuit involves the same basic facts or occurrences as the grievance. In other words, the scope of the limited privilege is co-extensive with what would constitute an unfair labor practice under PERA. In the language of Alaska's civil procedure rules, where a public employer's discovery request would violate PERA, "the burden . . . of the proposed discovery" on the statutorily-protected right of an employee to union representation in the grievance process, as well as on the right of the union to enforce the collective bargaining agreement through the grievance procedure, strongly "outweighs its likely benefit" to the employer. Alaska R. Civ. P. 26(b)(1).

Moreover, to allow discovery of confidential grievance-related communications between an employee and the union would permit a public employer to obtain in litigation what it is forbidden by PERA from obtaining in the mandatory grievance and arbitration process. Such a rule would create "a trap by inducing confidential communications and then allowing them to be used against the [employee]." *Welfare Rights Org. v. Crisan*, 661 P.2d 1073, 1077 (Cal. 1983). It could not have been the Alaska legislature's intent to create a mandatory grievance and arbitration system for public employees in which "the only sound advice the authorized [union] representative could give [an employee] was, 'Don't talk to me.'" *Id.* at 1077 n.3.

In contrast, where discovery is sought by a party other than the public employer, or where the subject matter of the lawsuit is different from that of the underlying grievance, the limited privilege would not apply. Such a discovery request would instead be evaluated through the usual framework of Rule 26, which provides that a court may limit discovery "if it determines that . . . the burden or expense of the proposed discovery outweighs its likely benefit," as, for example, where "the discovery sought . . . is obtainable from some other source that is more convenient, less burdensome, or less expensive." Alaska R. Civ. P. 26(b)(2)(A). For example, where the subject of the lawsuit differs from the grievance, such as in the investigation of a criminal violation, the benefit of discovery often outweighs the burden on PERA-protected rights, because "[n]owhere is the public's claim to each person's evidence stronger than in the

context of a valid grand jury subpoena," *In re Grand Jury Subpoena*, 926 A.2d 280, 284 (N.H. 2007) (quoting *In re Sealed Case*, 676 F.2d 793, 806 (D.C. Cir. 1982)). *See also Dep't of Justice v. FLRA*, 39 F.3d 361 (D.C. Cir. 1994); *In re Grand Jury Subpoenas*, 995 F. Supp. 332 (E.D.N.Y. 1998).

The second lesson to be drawn from the role that the grievance and arbitration procedure plays in collective bargaining is that any privilege ultimately belongs to the union. Even though the grievant employee may assert the privilege initially, the union remains free to waive it in furtherance of the union's obligations to the bargaining unit as a whole.[6] That is because in some cases the union must be able to waive the confidentiality of its communications with employees in the grievance process in order to fulfill its broader "responsib[ility] to . . . the interests of all whom it represents." *Huffman*, 345 U.S. at 338. For example, where the union is called to represent the competing interests of two or more employees, the union is entitled to take a position that furthers the interest of the bargaining unit as a whole – as long as it does so "in good faith and in a nonarbitrary manner," *Vaca*, 386 U.S. at 194 – even if taking such a position requires the union to waive the confidentiality of its communications with an individual grievant:

---

[6] Like the client in a lawyer-client relationship, the employee also can waive the limited privilege by testifying to a confidential communication or disclosing a confidential document in his possession. In such a case, the union still can, however, assert the limited privilege as a defense to disclosing any confidential communications that only the union possesses.

> "Just as a union must be free to sift out wholly frivolous grievances which would only clog the grievance process, so it must be free to take a position on the not so frivolous disputes. Nor should it be neutralized when the issue is chiefly between two sets of employees. Conflict between employees represented by the same union is a recurring fact. To remove or gag the union in these cases would surely weaken the collective bargaining and grievance processes."

Humphrey v. Moore, 375 U.S. 335, 349-50 (1964).

4. When the limited privilege described above is applied to the facts of this case, it is clear that the confidential grievance-related communications between Peterson and the ASEA should be protected from disclosure.

The State seeks discovery of Peterson's communications with the ASEA for the purpose of "show[ing] that most of his lawsuit should be dismissed for failure to exhaust administrative remedies." Resp. Opp. to Pet. for Rev. at 4. As an initial matter, the State acknowledges that "the union, under its own authority, decided not to seek arbitration of Mr. Peterson's grievance." *Id.* at 3. Because an employee exhausts his contractual remedies when he requests that the union take his grievance to arbitration and the union refuses, *Casey v. Fairbanks*, 670 P.2d 1133, 1138-39 (Alaska 1983), the State requires no further discovery regarding exhaustion. Even if the law were, as the State argues, that "[i]f Mr. Peterson disagreed with the union's decision not to seek arbitration, he was required to appeal it with the union internally," Resp. Opp. to Pet. for Rev. at 3, the State still would not require discovery of Peterson's confidential grievance-related communications because a non-privileged communication from the ASEA to the State already in the record clearly states that Peterson did not appeal the union's

decision not to seek arbitration of his grievance. *See* Pet. Exc. 128 (e-mail from ASEA to State stating "Mr. Peterson has not appealed [the union's] decision not to arbitrate his grievance.").

Moreover, the State could easily obtain the information it says it needs by serving Peterson with an interrogatory or a request to admit concerning his efforts to exhaust contractual and internal union remedies. That is, the *fact* of whether Peterson sought to appeal the union's decision not to seek arbitration is not a communication "made for the purpose of facilitating the rendition of [grievance-related representative] services to the [employee]," Alaska R. Evid. 503(b), and therefore is not protected from discovery by the limited privilege. *See Upjohn*, 449 U.S. at 395-96 ("The protection of the privilege extends only to *communications* and not facts. A fact is one thing and a communication concerning that fact is an entirely different thing." (Internal quotation marks and brackets omitted)). Thus, even if clear evidence that Peterson did not appeal the union's decision not to take his grievance to arbitration were not already in the record, the State still could not show that it requires access to the ASEA's entire grievance file to ascertain this particular fact.

More generally, the State's effort to obtain its sought-after discovery constitutes an unfair labor practice under PERA and therefore the limited privilege should apply. If the State is permitted to discover confidential communications between Peterson and the ASEA, other public employees will be loath to participate in the PERA-mandated grievance and arbitration procedure for fear that

their statements to the union could later be used against them if they were to bring a suit in court. This result would undermine the Alaska legislature's purpose in enacting PERA of "promot[ing] harmonious and cooperative relations between government and its employees" through mandatory arbitration, AS 23.40.070. It would also wreak havoc on this Court's exhaustion requirement that aims to keep labor disputes in the grievance and arbitration procedure and out of court by applying "great deference to an arbitrator's decision," *Pub. Safety Employees Ass'n*, 235 P.3d at 201. If employees refuse to cooperate with union investigations, the union will be unable to gather the information necessary to decide whether to take cases to arbitration, ultimately leading to more cases in Alaska courts.

Finally, if the State were permitted to obtain its sought-after discovery, the ASEA's ability to enforce its collective bargaining agreement with the State would be substantially impaired, as its ability to investigate future grievances by interviewing employees would be restrained by its knowledge that any communications with employees during the investigatory process will be discoverable in subsequent litigation. This would leave the union without the ability "to settle the majority of grievances short of the costlier and more time-consuming step[]" of arbitration, placing a "dampening effect on the entire grievance procedure." *Vaca*, 386 U.S. at 192-93.

CONCLUSION

For the reasons stated, the superior court's order denying Peterson's motion for a protective order regarding his communications with union officials should be reversed.

Office of Senator Bettye Davis

February 17, 2011

Senator Hollis French, Chair
Senate Judiciary Committee

RE: Request for Hearing CSSCR 2(STA), 27-LS00031\B -"Proposing amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore."

Dear Senator French:

Senator Davis respectfully requests a hearing on the CSSCR 2(STA) before the Senate State Affairs Committee. CSSCR 2(STA) amends the Uniform Rules to change the title and provides for new roles and responsibilities for the temporary presiding officers. The intent is to provide more opportunities for legislators to function in leadership positions without changing the current leadership structure.
Included in this hearing package are the following:

1. Sponsor Statement
2. Current version of CSSCR 2, 27-LS0031\B
3. Explanation of Committee Substitute
4. Sectional Summary 2/8/2011
5. Current Uniform Rules 1-4
6. Fiscal Note (prepared by (S)STA 2/15/2011
7. Documents:
    - NCSL "Inside the Legislative Process" – The most recent (1999) report of roles and responsibilities of temporary presiding officers in all the states and territories
    - NCSL "Examples of duties of the Senate Pro Tem (as of February, 2011)"
    - Center for American Women and Politics: "Women in State Legislatures 2011;" and "Women in Elective Office 2011."

Please provide for in-person and teleconference testimony.
Also, please do not schedule a hearing February 21-24, and March 2-6, 2011 due to scheduling conflicts.
Please contact me if you need additional information.

Sincerely,

Thomas S. Obermeyer
Legislative Assistant, 907-465-3762

Senator Bettye Davis

SCR 2, 27-LS0031 - "Proposing amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore."

SPONSOR STATEMENT

SCR 2 amends Uniform Rules 1 and 4 to increase the roles and responsibilities of Presiding Officers Pro Tempore. The term "pro tempore" is derived from the Latin phrase "for a time." To make the titles more consistent throughout the Rules and to recognize increased status and duties of Presiding Officers Pro Tempore in the leadership of both houses, Sections 1 and 2 of Uniform Rule 1 change the titles of *Temporary Presiding Officers* to *Presiding Officers Pro Tempore* and *Permanent Presiding Officers* to *Regular Presiding Officers*.

Section 4, Rule 4, Uniform Rules is amended and establishes that in the absence of both the Regular Presiding Officer (Senate President/Speaker of the House) and in the absence of the Majority Leader, the Presiding Officer Pro Tempore previously elected in Uniform Rule 1(b) serves as the Presiding Officer Pro Tempore.

The result of the language amending section 4 of SCR 2 in the original bill is that the Presiding Officer Pro Tempore elected at the start of the first session of a Legislature, in addition to the Presiding Officer Pro Tempore's duties set out in Uniform Rule 1(b), will continue for both sessions to serve as a "backup" in the absence of the regular presiding officer (President of the Senate/Speaker of the House) and Majority Leader. These changes effectively create a third permanent position in the leadership without changing the present leadership structure. The Regular Presiding Officer, the Majority Leader and the Presiding Office Pro Tempore may temporarily relinquish the chair to any member.

These changes in the Uniform Rules mean that in addition to the few minutes of prominent duties, honor, and high visibility assigned to the Presiding Officer Pro Tempore to help organize the houses at the beginning of every two year session, the Presiding Officer Pro Tempore may function in capacities delegated in the absence of the Regular Presiding Officer and Majority Leader.

Office of Senator Bettye Davis

Explanation of Committee Substitute for SCR 2

The Committee Substitute for SCR 2, 27-LS0031\B, amends the language on page 2, Section 4, Rule 4 to restore unchanged the present leadership order in the absence of the regular presiding officer(s) (President of the Senate/ Speaker of the House). The original draft unintentionally placed the presiding officer pro tempore before the majority leader in the absence of the regular presiding officer. The Committee Substitute establishes that in the absence of both the regular presiding officer and the majority leader, the presiding officer pro tempore previously elected in the Uniform Rule 1(b) serves as the presiding officer pro tempore.

The result of the language amending Section 4 of SCR 2 is that the presiding officer pro tempore elected at the start of the first session of a legislature, in addition to the presiding officer pro tempore's duties set out in Uniform Rule 1(b), will continue for both sessions to serve as a "backup" in the absence of the regular presiding officer and majority leader.

ALASKA STATE LEGISLATURE

UNIFORM RULES

ADOPTED 1981

by the

TWELFTH LEGISLATURE - FIRST SESSION

AS AMENDED 1985, 1988, 1989, 1991, 1998, 2001, 2003, 2004, 2008

Legislative Affairs Agency

ORGANIZATION OF FIRST SESSION

Rule 1. Organization of First Session. (a) At the time for convening of the first regular session of a legislature the lieutenant governor calls each house to order separately and calls the roll of members whose election has been certified. The lieutenant governor then administers the oath of office to the new members and, pending the election of temporary presiding officers, preserves order and decorum in the house.

(b) When the house by a majority vote of the full membership of the house selects a temporary presiding officer, the temporary presiding officer assumes the chair and the lieutenant governor withdraws. The temporary presiding officer then calls for nominations for a permanent presiding officer and the nominee receiving a majority vote of the full membership of the house becomes the permanent presiding officer for the two-year duration of the legislature. If a permanent presiding officer is not elected by the seventh legislative day, on the eighth legislative day the temporary presiding officer shall call for nominations for a permanent presiding officer from the floor. A roll call vote shall be taken on the persons nominated. Election of a permanent presiding officer requires a majority vote of the full membership of the house.

(c) Pending the organization of the house a secretary assigned by the Legislative Council assists the lieutenant governor and the temporary and permanent presiding officers in the performance of their duties.

(d) The Uniform Rules of the Legislature of the previous regular session or any authorized revision of those rules are used as the temporary rules until the Rules Committee reports on and the legislature in joint session adopts permanent uniform rules.

(e) The presiding officer shall announce, not later than the day following election, the appointment of a Committee on Committees consisting of five members including the presiding officer. The presiding officer chairs the Committee on Committees. The committee is responsible for nominating the members of the standing committees as set out in Rule 20 and the member who is to chair each standing committee to serve for the two-year duration of the legislature. The membership of each committee shall total to an uneven number. On each standing committee the minority is entitled to the number of seats that is proportional to the number of minority members compared to the total house membership or to one seat, whichever is greater. In calculating the number of seats the minority is entitled to, fractional numbers that represent the minority proportional entitlement to a seat shall be ignored. The report of the Committee on Committees is subject to approval by a majority vote of the full membership of the house. For purposes of this subsection "minority" means a group of members who have organized and elected a minority leader and who constitute at least 25 percent of the total house membership.

ORGANIZATION OF SECOND SESSION

Rule 2. Organization of Second Session. The presiding officer of each house during the first regular session presides during the second regular session or any special session and administers the oath to any new members.

LEGISLATIVE SESSION STAFF

Rule 3. Legislative Session Staff. (a) Each house elects an internal administrative officer (a chief clerk in the house and a secretary in the senate) to serve for the two-year duration of the legislature. The officer is nominated by the Rules Committee and elected by a majority vote of the full membership of the house. The chief clerk and secretary are responsible for the selection and supervision of the staff of their offices and are subject to the direction of the presiding officer and Rules Committee according to law and legislative rule.

(b) The Rules Committee of each house is responsible for the selection and direction of the session staff assigned to each chamber (sergeant-at-arms and their assistants, pages and messengers) and is the source of approval for hiring session assistants for standing, special, and joint committees and caucuses and secretarial help to be assigned to individual members. The Rules Committees of the house and senate shall decide jointly and within the amount budgeted for session staff the compensation and conditions of employment of those working under their individual supervision. The director of administrative services of the Legislative Affairs Agency shall assist and make recommendations to the Rules Committees regarding staff compensation and related matters.

(c) The sergeant-at-arms shall attend all sessions of the house unless absent for the purpose of discharging the duties of the office. The sergeant-at-arms shall maintain order on the floor of the chamber and in the galleries and adjoining hallway, and assure that any person not permitted by law or legislative rule to be present in the chamber is removed from the chamber. The sergeant-at-arms shall assure that a member does not leave the chamber during a call of the house, and shall act to secure the attendance in the chamber of members missing during a call of the house.

DUTIES OF THE PRESIDING OFFICER

Rule 4. Duties of the Presiding Officer. The presiding officer of each house has the duties set forth in Section 575, MASON'S MANUAL OF LEGISLATIVE PROCEDURE, 2000 edition, when not inconsistent with these Uniform Rules. In the absence of the regular presiding officer, the majority leader of the house serving ex officio as presiding officer pro tempore shall preside; except that the regular presiding officer may temporarily relinquish the chair to any member.

Background

Inside the Legislative Process is a nationally-recognized, valuable research tool, providing some of the best information on state legislative processes. It is produced through a cooperative effort between the American Society of Legislative Clerks and Secretaries (ASLCS) and the National Conference of State Legislatures (NCSL).

In 1975, ASLCS authorized its first comprehensive survey of the structure, size, function and operations of the clerks' and secretaries' offices in the 50 state legislatures. The survey proved to be an extraordinarily useful document, not only to the Society's members but also to the NCSL and to others who are interested in the management and procedures of legislative chambers. The data proved so beneficial that the surveys have been continued. Surveys were conducted in 1975, 1979, 1982, 1985, 1988, 1992, 1996, 1997, 1998, 1999, 2000, 2002, 2004, 2006 and 2008.

The publication format for *Inside the Legislative Process* has changed over the years. In 1975, the data were compiled into charts for use by ASLCS members. From 1979 through 1992, editions were published every three to four years as stand-alone books. Beginning with the 1996 edition, *Inside the Legislative Process* became a publication with its information divided among several general topic tabs in a three-ring binder.

Topics Covered by Various Editions

Legislatures deal with a large number of parliamentary issues—too many to be addressed in a single survey. As a result, the topics covered by each edition of *Inside the Legislative Process* typically vary.

Year*	Topics Covered
1979 (available in printed format only)	Selection and duties of the clerk and secretary; staff; parliamentary authority; journals; calendars; bills; committee process; legislative procedures; public information offices; publications; computerization; roll call voting systems; fiscal information; recording of session or committee meetings
1982 (available in printed format only)	Office of the chief clerk and secretary; salaries and benefits; bill processing; printing of legislative documents; referral of bills to committee; calendaring process; advance public notice of committee meetings; taping of committee meetings and floor sessions; parliamentary authority; public information; media coverage; computerization
1985 (available in printed format only)	Office of the chief clerk and secretary; salaries, benefits and personnel policies; printing of legislative documents; referral of bills to committee; calendaring process; advance public notice of committee meetings; committee consideration and reporting of bills; taping committee meetings and floor sessions; conference committee procedures; media coverage; electronic roll call voting systems; computerization
1988 (available in printed format only)	Calendaring process; handling of floor amendments; voting practices; consent calendars; introduction and referral of bills; courtesy or personal resolutions; ceremonial practices (including prayer practices); referral of bills to committee; appointment of standing committee chairs and members; standing committee size and structure; committee scheduling during the session; legislative party caucuses; bill processing; printing of legislative documents; capitol facilities; salaries, benefits and leave policies

1991 (available in printed format only)	Legislative organization; regular, extraordinary or special sessions; committee consideration of bills; committee report information; advance notice of committee meetings and open meeting requirements; expediting the legislative process; readings of bills; processing of bills; debate; taping committee meetings and floor sessions; public information; printing (of legislative documents); document charges; the journal; selection of the principal clerk; selection of other chamber offices; staff functions; parliamentary authority; fringe benefits; leave plans and time
1996	Opening day of session; new member orientation; mechanisms used to streamline bill processing; sponsorship limits for legislation; referral of bills, standing committees; subcommittees; conference committees; floor amendments; vote requirements; roll call voting machines and practices; censure, expulsion and other disciplinary actions
1997	Rules committees; access to printed legislative documents; electronic access to legislative documents; communicating with legislators
1998	Engrossing process; enrolling procedures; the calendaring process; end-of-session logjam; the veto process
1999	Legislative party caucuses; legislative leaders; recording legislative proceedings; media or public information services; the principal clerk or secretary (which also includes info on other job positions within the office); parliamentary authority
2000	Legislative organizational sessions; transition process; germaneness requirements; reconsideration processes; the legislative journal; archiving legislative documents
2002	Bill prefiling; personal, congratulatory, ceremonial or courtesy resolutions; prayer practices; open meetings and notice requirements
2004	Regular and special or extraordinary sessions; committee procedures
2006	Floor Amendment procedures; automation of journal production
2008	Readings of bills; mandatory roll call votes; messaging

Legislative Leaders

Leadership positions. At the beginning of each legislative session, decisions are made concerning leadership positions. Among the first is the determination of which titles will be used and the number of individuals who may hold each position. The most common leadership titles are president of the Senate, speaker of the House, majority leader and minority leader. However, there usually are no limits to the names and numbers of leadership positions that may exist, and table 99-2.13 illustrates the variety used by legislative chambers.

Selection and terms. Once titles and the number of individuals to hold each position have been set, the actual selection of legislative leaders commences. It is one of the key steps taken to organize a legislative chamber, and tables 99-2.14 through 99-2.18 illustrate how state legislatures choose their leaders.

The presiding officer—that is, the president of the Senate or speaker of the House—typically is elected by a vote of the full body. However, in the states shown below, the person who is elected by the people to serve as lieutenant governor acts as the president of the Senate.

Alabama
Arkansas
California
Connecticut
Delaware
Georgia
Idaho
Indiana
Michigan
Mississippi
Missouri
Nebraska
Nevada
New Mexico
New York
North Carolina
North Dakota
Oklahoma
Pennsylvania
Rhode Island
South Carolina
South Dakota
Texas
Vermont
Virginia
Washington

The president pro tem selects other caucus leaders in three states. In Alabama, the president pro tem appoints the Senate majority leader and assistant majority leader. The Senate assistant majority leader and the majority whip are appointed by this leader in Connecticut. In the Indiana Senate, the president pro tem chooses the majority leader, assistant majority leader and majority whip.

The majority leader appoints other caucus leaders in the Connecticut Senate and House, Florida Senate and House, Iowa Senate, Minnesota Senate, Oregon Senate and Rhode Island Senate. The specific leaders who are selected by the majority leader are:

Connecticut Senate	Assistant majority leader, majority whip
Connecticut House	Deputy majority leader
Florida Senate	Majority whip
Florida House	Majority floor leader, majority caucus chair
Iowa Senate	Majority caucus secretary
Minnesota Senate	Majority whip, majority caucus secretary
Oregon Senate	Assistant majority leader, majority whip
Rhode Island Senate	Majority whip

In the Delaware House, the speaker pro tem is the most senior member of the majority caucus. The chairman of the District of Columbia Council is elected by the citizens of Washington, D.C.

In most legislatures, there is no limit to the number of years that an individual may hold a leadership position. However, 24 chambers reported that some of their leadership positions have term limits—either official or unwritten. Table 99-2.19 highlights these limits.

Roles and responsibilities. The roles and responsibilities of legislative leaders vary considerably among the states. Shown below are brief synopses of the duties typically associated with selected leadership positions. Tables 99-2.20 through 99-2.36 provide more detailed information on leaders' duties.

President of the Senate. The president is the principal leader of the Senate. The president typically will 1) preside over the daily sessions of the Senate, 2) preserve order in the chamber, 3) state parliamentary motions, 4) rule on parliamentary questions, 5) appoint committee chairs and members, 6) refer bills to committee, 7) sign legislation, writs and warrants, and 8) act as the official spokesperson for the chamber. In about 26 states, the lieutenant governor serves as the president of the Senate, and many of these duties often are assumed by the president pro tem.

President pro tem of the Senate. The primary roles assigned to the president pro tem are to 1) preside over the Senate in the president's absence, 2) exercise the powers and duties of the president in his or her absence, and 3) assume other duties as assigned by the president. Sometimes, this is an honorary position, with few substantive duties assigned. In states where the lieutenant governor presides over the Senate, the president pro tem often assumes duties associated with a president.

Speaker of the House or Assembly. The speaker is the principal leader of the House or Assembly. The speaker typically will 1) preside over the daily sessions of the House or Assembly, 2) preserve order in the chamber, 3) state parliamentary motions, 4) rule on parliamentary questions, 5) appoint committee chairs and members, 6) refer bills to committee, 7) sign legislation, writs and warrants, and 8) act as the official spokesperson for the chamber.

Speaker pro tem. The primary roles assigned to the speaker pro tem are to 1) preside over the House or Assembly in the speaker's absence, 2) exercise the powers and duties of the speaker in his or her absence, and 3) assume other duties as assigned by the speaker. In some states, this is an honorary position, with few substantive duties assigned.

Majority leader or majority floor leader. The primary functions of a majority leader usually relate to floor duties. The majority leader 1) is the lead speaker for the majority party caucus during floor debates, 2) develops the calendar, and 3) assists the president or speaker with program development, policy formation and policy decisions.

Majority whip. The duties of the majority whip are to 1) assist the floor leader, 2) ensure member attendance, 3) count votes, and 4) generally communicate the majority position on issues.

Majority caucus chair. The majority caucus chair generally 1) develops the majority caucus agenda with other principal leaders, 2) presides over the majority caucus meetings, and 3) assists with the development of policy.

Majority caucus secretary. The main responsibility of the majority caucus secretary is to keep records of caucus meetings.

Minority leader or minority floor leader. The minority leader is the principal leader of the minority party caucus. The minority leader is responsible for 1) developing the minority position, 2) negotiating with the majority party, 3) directing minority caucus activities on the chamber floor, and 4) leading floor debate for the minority caucus.

Minority Whip. The major responsibilities for the minority whip are to 1) assist the minority leader on the chamber floor, 2) count votes, and 3) ensure attendance of minority party members.

Minority caucus chair. The minority caucus chair 1) presides over caucus meetings and 2) assists the minority leader with policy development.

Minority caucus secretary. The main responsibility of the minority caucus secretary is to keep records of caucus meetings.

12. Tennessee: The speaker pro tem of the Senate also sets calendars or agendas.

NCSL

Examples of Duties of the Senate President Pro Tem

(as of February 2011)

Alabama Senate

Rule 21. Messages may be called at any stage of business by the President Pro Tempore or in his/her absence, then the Majority Leader, except while a matter is being considered, while the yeas and nays are being called, or while the ballots are being counted.

Rule 36. During the period between the end of the regular session and the convening of the next regular session, or, in the first year of a quadrennium, between the Organizational Session and the regular session, members may deliver bills to the Secretary of the Senate, which shall be known as "pre-filing." Such bills shall be numbered by the Secretary in the order of receipt and otherwise processed for introduction when the regular session has been convened. Pre-filed bills shall be assigned by the President, or his/her designee, with the concurrence of the President Pro Tempore, or his/her designee, to a standing committee for study and shall be formally referred to the same committee upon commencement of the regular session; provided, however, that no bill shall be pre-filed under this rule after the commencement of the last regular session of the Legislature in any quadrennium and before the organizational session following the general election.

Rule 42. In the absence of the President when the Senate convenes, the President Pro Tempore shall preside except as provided for in Rule 1; however, any other rule to the contrary notwithstanding, when the President of the Senate chooses not to preside, the President Pro Tempore shall preside. Should the President Pro Tempore not be in the chamber or choose not to preside, the Majority Leader shall preside and/or designate in writing a member to preside or until such time as the President or the President Pro Tempore, as the case may be, assumes or reassumes the presidential duties of the Chair; provided, however, that such delegation may not continue to the next legislative day.

Rule 45. When more than one member rises seeking recognition, the Presiding Officer shall decide which member to recognize. The President Pro Tempore shall be recognized first when rising for a Point of Order, as well as for the purpose of taking up House messages, executive messages, and other matters of serious import for the operation of the Senate. The Majority Leader, in the absence of the President Pro Tempore, shall have priority when seeking recognition.

Rule 47. (a) The Senate President Pro Tempore may designate the Majority Leader to perform the duties of the Senate President Pro Tempore in his/her absence, with the exception of signing of bills and resolutions, which only the President and President Pro Tempore are constitutionally allowed to do. The President Pro Tempore shall be an additional voting member of all Senate Standing Committees, superseding the number of members of each standing committee as set out in Rule 48, including Local Legislation No. 1, but excluding all other local legislation committees unless he/she is a member of another local legislation committee by geographical circumstance. The President Pro Tempore may designate in writing to the Secretary of the Senate the name of a member who is not already a member of the committee to represent him or her as a voting member under this rule. Such substitution shall be for a term of not less than one year unless such member so appointed dies or resigns from the Senate, or resigns from the committee so appointed under this rule.
(b) There shall be a Senate Committee on Assignments which shall be composed of the President Pro Tempore, the Lieutenant Governor, the Senate Majority Leader and three additional members appointed by the President Pro Tempore. The Committee on Assignments shall appoint the Chairperson, Vice Chairperson and membership of all Senate Standing Committees and Select Committees. The Committee may reappoint the membership of the committees, and may rename the leadership of the committees. Any such change in committee membership, or the chairman or vice-chairman thereof, shall only be authorized by a majority vote of the membership of the Committee

on Assignments. Actions of this committee shall be reported to the Senate by the President Pro Tempore or in his/her absence by the Senate Majority Leader as such appointments are approved. …

Rule 54. A bill or resolution carrying an appropriation may be referred to a committee other than the appropriate finance and taxation committee if the subject matter requires such referral in the judgment of the President Pro Tempore. However, such bill or resolution shall also be referred to and reported by the appropriate committee on finance and taxation after being given a second reading.

Rule 68. The Secretary shall provide the Chairperson of each standing committee with a stamp with which to make endorsements on bills. Each standing committee of the Senate shall be furnished a secretary or clerk by the Secretary of the Senate. Office space shall be provided to the President Pro Tempore, the Senate Majority Leader, and to the Chairpersons of standing committees as such space is made available to the Senate.

Rule 82. Any motion relating to creating or filling a vacancy in the office of President Pro Tempore shall be in writing with a day certain for the vote, which day certain may not be less than five legislative days after the motion is filed. Any vote relating to the removal of a member serving as President Pro Tempore shall prevail only with a concurrence of a two-thirds vote of the elected members of the Senate.

Arizona Senate

Rule 2. … H. The President shall have the right to name any member as President Pro Tempore to serve during the President's absence, which appointment may extend throughout the session unless terminated by the Senate. The President may appoint any other member as temporary President Pro Tempore to serve for a limited period of time in the absence of the President and President Pro Tempore. In the absence or omission of such an appointment, the Senate shall proceed to elect a President Pro Tempore to act during the absence of the President.

Arkansas Senate

Rule 1.02. The President shall have the right to name any member to perform the duties of the Chair, but such substitution shall not extend beyond adjournment; provided, however, that in case of the absence of the President Pro Tempore, he may make such appointment for a period not exceeding ten (10) days, with the approval of the Senate at the time the same is made.

Rule 2.01. (a) At the beginning of every regular session of the General Assembly the Senate shall elect from its members an officer to be styled "President Pro Tempore" of the Senate, who shall perform all the duties of the President of the Senate during his absence, except as otherwise provided in these Rules. At the beginning of each regular session, the President Pro Tempore shall appoint four (4) Assistant President Pro Tempores, one from each of the current Congressional Districts. At least three (3) of the Assistant President Pro Tempores shall be a member of the majority party. The President Pro Tempore shall designate one of the four Assistant President Pro Tempores to perform all the duties of the President Pro Tempore during his or her absence.
(b) Beginning with the 87th General Assembly, the President Pro Tempore shall not serve more than one term in the office nor shall the President Pro Tempore be Chairman of any Class "A", "B" or Class "C" Committee nor the Joint Budget Committee.
(c) The President Pro Tempore shall have the authority to convene the members of the Senate between sessions for the purpose of addressing any matter that affects the business of the full Senate.

Rule 5.01. The Chaplain shall be selected daily by the President Pro Tempore or his designee and shall attend the commencement of that day's session of the Senate and open the same with prayer.

Rule 7.02. … (c) All vacancies on Class "A", Class "B" and Class "C" Committees of the Senate shall be filled by the President Pro Tempore on the basis of seniority or as provided by law or by other Rules of the Senate. In the temporary absence of the Chairman and the Vice-Chairman, the member next in rank and seniority, and soon, as often as the case may happen, shall act as Chairman. In case of a permanent vacancy in the Chairmanship or Vice-Chairmanship of any committee, the President Pro Tempore shall appoint another Chairman or Vice-Chairman within the first three (3) days of the next regular or special session of the General Assembly.

Rule 10.05. In the absence of a quorum, five (5) members shall be appointed by the President Pro Tempore to compel the attendance of absent members. In all calls of the Senate, the doors shall be closed, the names of the members shall be called by the Secretary of the Senate, and the absentees noted. Those for whom no sufficient excuse is made may, by order of the majority of those present, be sent for by members to be appointed by the President Pro Tempore for that purpose and their attendance secured and retained. The Senate shall determine upon what conditions they may be discharged. Members who voluntarily appear shall, unless the Senate otherwise directs, be immediately admitted to the Senate Chamber, and they shall report the names to the Secretary of the Senate to be entered upon the Journal as present. At any time after the roll call has been completed, the Presiding Officer may entertain a motion to adjourn. If the Senate adjourns, all proceedings under this section shall be vacated.

Rule 20.01. The President Pro Tempore shall appoint all conference committees which 1 shall be ordered from the Senate from time to time, and unless otherwise directed by the Senate, the same number of Senators shall be named to serve on the conference committees as are named to serve on such committees by the House.

California Senate

Rule 2. The President pro Tempore, Assistant President pro Tempore, Vice Chair of the Committee on Rules, or senior member present shall call the Senate to order at the hour stated and, if a quorum is present, shall proceed with the order of business

Rule 7. The President pro Tempore shall take the Chair and call the Senate to order at the hour of the meetings of the Senate. The President pro Tempore is the Presiding Officer of the Senate.

It shall be the particular responsibility of the President pro Tempore to secure the prompt and businesslike disposition of bills and other business before the Senate. He or she shall maintain order in the Senate Chamber and, in case of a disturbance or disorderly conduct outside the bar or in the gallery, he or she shall have the power to order the same cleared.

The President pro Tempore shall serve ex officio as a member of all Senate and joint committees of which he or she is not a regular member, with all of the rights and privileges of that membership except the right to vote. In counting a quorum of any of these committees, the President pro Tempore may not be counted as a member.

The Assistant President pro Tempore or the Vice Chair of the Committee on Rules shall, in the absence of the President pro Tempore, perform the duties, and have all powers and authority, of the President pro Tempore.

Rule 8. The President pro Tempore of the Senate may name a Senator to perform the duties of the Chair in his or her absence. The Senator so named shall be vested, during that time on the floor, with all the powers of the President pro Tempore, and the Senator who performs these duties shall be known as the Assistant President pro Tempore.

In the absence of the President pro Tempore, the Assistant President pro Tempore, or the Vice Chair of the Committee on Rules, any Senator may perform the duties of the Chair.

Rule 10.5. On the first day of each session, the President pro Tempore, members of the Committee on Rules, Secretary of the Senate, and Sergeant at Arms shall be elected by a majority vote of the duly elected and qualified Members of the Senate and shall serve until their successors are elected and qualify. The Committee on Rules shall appoint an Assistant Secretary, a Minute Clerk, a Chaplain, and other employees with such duties as the committee requires.

Rule 11. The Committee on Rules shall consist of the President pro Tempore of the Senate, who shall be the chair of the committee, and four other Members of the Senate to be elected by the Senate. There is a vacancy on the committee in the event a member ceases to be a Member of the Senate or resigns from the Committee on Rules. Any vacancy occurring during a summer, interim study, or final recess, except in the case of the President pro Tempore, shall be filled by the remaining members of the Committee on Rules. A vacancy occurring at any other time shall be filled by election by the Senate.

The Committee on Rules shall appoint all other committees of the Senate and shall designate a chair and vice chair of each committee.

In making committee appointments, the Committee on Rules shall give consideration to seniority, preference, and experience. However, in making committee appointments, the Committee on Rules shall, as far as practicable, give equal representation to all parts of the state.

Rule 38.5. Every amendment proposed must be germane. In order to be germane, an amendment must relate to the same subject as the original bill, resolution, or other question under consideration.

A point of order may be raised that the proposed amendment or an amendment now in the bill, resolution, or other question under consideration is not germane, so long as the question is within control of the body. In that case the President pro Tempore shall decide whether the point of order is well taken. In the absence of the President pro Tempore, the Vice Chair of the Committee on Rules shall decide whether the point of order is well taken. If, in the opinion of the President pro Tempore or the Vice Chair of the Committee on Rules, the point of order is well taken, the question of germaneness shall on his or her motion be referred to the Committee on Rules for determination. The Committee on Rules shall make its determination by the following legislative day. If the point of order is raised and referral is made on the last legislative day preceding a joint recess, the Committee on Rules shall make its determination before adjourning for the recess. ...

Colorado Senate

Rule 1. (a) Unless otherwise ordered, the regular hour of meeting of the Senate shall be 10 o'clock a.m. on Mondays, and 9 o'clock a.m. on other days. The hour of adjournment shall be as ordered.

(b) The President of the Senate, or in the President's absence the President pro tempore, shall take the chair every day promptly at the hour to which the Senate stands adjourned, shall call the Senate to order, shall lead or designate another Senator to lead the members in a recitation of the pledge of allegiance to the flag of the United States of America, and on the ascertainment of a quorum, shall proceed to business.

(c) If at the hour for the convening of the Senate, the President and the President pro tempore shall be absent, the senior Senator present shall call the Senate to order and shall continue to preside, with all the powers, privileges, and duties of the President, until the President or President pro tempore shall appear.

Rule 12. ... (b) At the beginning of each regular session convening after a general election and at such other times as may be necessary, the Senate shall, by a majority vote of all members elected, elect one of its members as President, and another member as President pro tempore, who shall, during the absence or inability of the President to serve, preside over the Senate and exercise and perform all the powers, privileges, and duties of the President. In addition, in the event of the death, resignation, disability, or absence from the state of the President, the President pro tempore, as acting President, shall exercise all the powers and duties of the President when the General Assembly is not in session, but the exercise of such powers and duties by the President pro tempore shall continue only until the General Assembly shall meet or until the disability or absence from the state of the President is removed, whichever shall first occur. In the event of the death, resignation, disability, or absence from the state of the President pro tempore, then the majority floor leader shall succeed to the office of acting President pro tempore.

(c) Neither the President, President pro tempore, nor any acting or temporary presiding officer shall be excused from or prohibited from voting on any question because of so presiding, but shall not vote on appeals from such person's decision.

Connecticut Senate

Rule 6. If the President while presiding, wishes to leave the chair, the president pro tempore shall preside, or, in the absence of the president pro tempore, the president pro tempore's designee shall preside for a period not exceeding one day.

Rule 7. Within one week after appointment, the President Pro Tempore shall nominate a chaplain and up to three

deputy chaplains, and if such nominations are confirmed by the Senate by a majority vote, the candidates so nominated and confirmed shall serve for the 2011 and 2012 sessions.

Rule 9. ... (b) On any day that is not scheduled as a session day, the President Pro Tempore and the Minority Leader, or their designees, may call the Senate into session for purposes of transacting business of a procedural nature by filing with the clerk or the clerk's designee a written instruction to conduct a pro forma Senate session with or without the presence of a senator. Said direction shall include a written motion to adopt the day's Senate agenda and act on all items as indicated and incorporate the items by reference into the Senate journal and Senate transcript. Said motion shall be read into the record and shall have the same force and effect as if the Senate were convened with a presiding officer and senator.

Rule 18. The majority leader, other leaders of the majority party in the Senate and the chairperson and vice chairpersons of each standing and select committee shall be appointed by the president pro tempore of the Senate. Chairpersons and vice chairpersons shall serve at the pleasure of the president pro tempore and the majority leader. The clerks of the standing and select committees and the chairpersons of the subcommittees thereof shall be appointed by the chairpersons of the respective committees with the approval of the president pro tempore of the Senate. The minority leader shall be elected by the members of the minority party in the Senate and the other leaders of the minority party in the Senate shall be appointed by the minority leader. The minority leader shall appoint ranking minority members to each standing and select committee. Such ranking members shall serve at the pleasure of the minority leader. All standing and select committee members shall be appointed by the president pro tempore by the fifth regular session day of the first year of the term, except to fill a vacancy caused by death or incapacity or resignation from the Senate or from a committee; and except that the president pro tempore may appoint any member elected after the fifth regular session day of the first year of the term to any committee within five calendar days after the member takes the oath of office. Not more than nine senators shall be appointed to any standing committee, except that the joint standing committees on Appropriations and Finance, Revenue and Bonding shall consist of not more than eleven senators. The member first named shall be chairperson. The chairperson of each committee may appoint one of the members of the committee as clerk thereof. All Senate leaders, standing committee assignments, chairpersons, vice chairpersons and clerks and subcommittee chairpersons shall serve for both the 2011 and the 2012 sessions.

Delaware Senate

Rule 9. ... C. President Pro Tem's pre-filed list.
(1) A bill or resolution filed with the Secretary may, in the discretion of the President Pro Tem, be placed upon the "President Pro Tem's pre-filed list" and the bill or resolution shall at such time be assigned to a Committee by the President Pro Tem. Copies of the President Pro Tem's pre-filed list shall be distributed to members prior to its reading by the Reading Clerk. The President Pro Tem's pre-filed list shall be read as soon as practicable by the Reading Clerk.

Rule 18. The President Pro Tempore shall appoint all committees; however, the President Pro Tempore, on at the Pro Tem's own initiative or upon order of the Senate, may appoint special or select committees.

Florida Senate

Rule 1.1. A President and a President Pro Tempore shall be elected for a term of two (2) years at the organization session preceding the regular session of each odd-numbered year. They shall take an oath to support the Constitution of the United States and the Constitution of the State of Florida, and for the true and faithful discharge of the duties of office. The Majority Party may, by caucus called by the President, elect a President Designate and a President Pro Tempore Designate, and their names shall be certified to the Secretary. The President may designate a Majority Leader whose name shall be certified to the Secretary. The Minority Party may, by caucus, elect a Minority Leader and a Minority Leader Pro Tempore, and their names shall be certified to the Secretary at the organization session. All elected officers are to hold office until their successors are chosen and qualified or until the expiration of their term, whichever shall occur first.

Rule 1.7. (1) The President may name any Senator to perform the duties of the chair.
(2) If for any reason the President is absent and fails to name a Senator, the President Pro Tempore shall assume the duties of the chair.

(3) If the President resigns, he or she may, prior to resignation, designate a member of his or her party to assume the duties of the chair until a permanent successor is elected.
(4) In the event the chair is vacated permanently, nothing herein shall preclude the Senate from electing a presiding officer. If the chair is vacated permanently during a session of the Legislature, a new presiding officer must be elected within seven (7) days of the vacancy. If the chair is vacated permanently while the Legislature is not in session, the President's designee shall convene the Senate no later than thirty (30) days after the vacancy for the purpose of electing a new presiding officer. The election shall be the Senate's first order of business. In the event that a designation is not made pursuant to subsection (3) of this Rule, the President Pro Tempore shall assume the duties of the designee in convening the Senate to elect a new presiding officer.

Georgia Senate

Rule 1-1.2. (a) A President Pro Tempore shall be elected by the Senate from among its members by a majority of the Senators voting, provided the total vote constitutes a quorum. The President Pro Tempore shall act as President in case of the temporary disability of the President of the Senate. In case of the death, resignation, or permanent disability of the President of the Senate or in the event of the succession of the President of the Senate to the executive power, the President Pro Tempore shall become President of the Senate and shall receive the same compensation and allowances as the Speaker of the House of Representatives. The General Assembly shall provide by law for the method of determining disability as provided in this Paragraph.
(b) Whenever from any cause the President of the Senate shall be absent, the President Pro Tempore shall preside. If both shall be absent, the Secretary of the Senate shall call the Senate to order and shall preside until the election of an acting presiding officer, which said election shall be the first business of the Senate. The acting presiding officer shall preside until the return of one of the first named officers, at which time his or her functions shall cease.
(c) The President of the Senate may, during a day's session, name the President Pro Tempore or the designee of the President to perform the duties of the Chair during any part of that day, but no longer.
(d) While presiding, or in the absence of the President of the Senate, the President Pro Tempore shall have the same powers and duties as the President of the Senate.

Rule 1-1.3. When the President Pro Tempore or any other Senator is presiding, he or she shall not vote unless the Senate shall be equally divided, or unless his or her vote, if given to the minority, will make the division equal. The presiding Senator shall vote in all elections. In all cases where a fixed constitutional vote is required to pass a bill or measure under consideration, and said bill or measure shall lack only one vote to pass the same, the presiding Senator shall vote, and his or her vote shall be counted the same as that of any other member.

Rule 2-1.1. The Committee on Assignments shall be composed of the President Pro Tempore of the Senate, the Majority Leader, the Majority Caucus Chairperson, the Majority Whip, the Majority Caucus Vice-Chair, the Majority Caucus Secretary, and two Senators appointed by the President of the Senate. The President Pro Tempore or his designee shall serve as Chair of the committee. The Chair shall vote only to break a tie. Actions of this committee shall be reported to the Senate by the committee chairperson as necessary. The meetings of this committee shall be closed to the public.

Rule 2-1.2. There shall be a Committee on Administrative Affairs composed of the President of the Senate, the President Pro Tempore, the Majority Leader, the Minority Leader, the Secretary of the Senate, and three members appointed by the President of the Senate. This Committee shall have the responsibility of employing, supervising, disciplining, and setting the compensation of all aides, secretaries and other personnel for the Senate, including the Senate Budget and Evaluation, Senate Press and Senate Research offices. The Committee shall supervise the purchase and allotment of supplies for the Senate. This Committee shall also supervise and approve all out-of-state travel of members of the Senate and staff.

Rule 2-7.3. The Committee of the Whole shall not proceed with the business before it whenever a vote on any question shall disclose the fact that no quorum of the Senate is present. Whenever it is suggested that a quorum is not present, the President Pro Tempore or his or her designee shall satisfy himself or herself of the fact by actual count of the Committee and shall report the same to the Committee; and the President Pro Tempore or his or her designee shall, on his or her own motion, order that the Committee immediately rise, and he or she shall report the fact of the absence of a quorum to the Senate.

Rule 8-1.2. When two or more Senators shall rise at the same time, the President shall name the Senator entitled to proceed; provided, however, the President shall recognize the President Pro Tempore, the Majority Leader, and the Minority Leader, in that order of precedence, should any of them rise to speak, prior to recognizing any other Senator.

Hawaii Senate

Rule 5. (1) In case the President and Vice-President shall be absent at the hour to which the Senate had adjourned, the member of the majority party having the longest tenure in the Senate shall preside until a President pro tempore is chosen. If two or more members are equally qualified to preside, the eldest qualified member shall preside.
(2) The President pro tempore shall be invested with all of the powers and shall perform all the duties of the President. Whenever the President pro tempore is required to sign a bill or other instrument, the Clerk shall attach to such bill or instrument a certificate stating that such President pro tempore was duly elected and is authorized to so sign.

Idaho Senate

Rule 1. (A) The President of the Senate is the Lieutenant Governor and, in his absence or inability to serve, the President Pro Tempore shall perform with like privilege and authority all functions and duties of the President. The President shall vote only when the Senate is equally divided, but this restriction shall apply only to the President and not to the President Pro Tempore or any other Senator who may be in the Chair. The presiding officer shall never cast more than one vote. ...

Rule 3. (A) At the first meeting of the Senate at which a quorum shall be present, the Senate shall proceed to elect a President Pro Tempore and a Secretary and shall adopt temporary rules which, unless otherwise specifically stated, shall be the permanent rules of the preceding session. ...

Rule 6. (A) The President may, in the temporary absence or temporary incapacity of the President Pro Tempore, or with his consent, designate, either verbally or in writing, any Senator to perform the duties of the Chair who shall, during such time, be invested with all powers and privileges of the President except that of signing bills and joint resolutions, but such appointment shall not extend beyond an adjournment.
(B) Succession to Office of President Pro Tempore of the Senate. Upon the death, removal, permanent incapacity or resignation from office of the President Pro Tempore of the Senate, during a legislative session, the Senate shall proceed to elect a new President Pro Tempore. In the event of the President Pro Tempore's death, removal, resignation or permanent incapacity between legislative sessions, the Senate Majority Leader (and in the event of his death, removal, resignation or permanent incapacity to act as interim President Pro Tempore, the Senate Assistant Majority Leader) shall act as interim President Pro Tempore with all of the duties, powers and prerogatives of the office, to serve until the next session of the Legislature, at which time a new President Pro Tempore shall be elected.

Rule 7. ... (C) All employees of the Senate shall be selected by an attache committee, which committee shall be appointed by the Senate leadership, and the employees so selected shall be subject to the approval of the Senate. There shall be paid to the employees of the Senate, for all services rendered by them, such compensation as may be determined by Senate leadership. The President Pro Tempore is authorized to retain such personnel as deemed necessary during the interim.
(D) Subject to the overall supervision of the President Pro Tempore, the Secretary of the Senate shall have general responsibility for all Senate employees, although doorkeepers, watchmen, janitors, pages, and others charged with housekeeping functions, shall be immediately responsible to the Sergeant at Arms.

Rule 19. (A) The following standing committees shall be appointed by the leadership under the direction of the President Pro Tempore, by and with the advice and consent of the Senate; the number of members on each committee shall be fixed in the order of appointment, and such order shall be read into the Journal; provided that the President Pro Tempore shall appoint a majority of each committee and the chairman of each committee from the membership of the political party having a majority in the Senate: ...

Indiana Senate

Rule 1. ... (b) The announced convening time of the Senate may be changed after the Senate has adjourned with the agreement of the President Pro Tempore and the Minority Floor Leader. ...

Rule 3. Every Senator shall be present at all meetings of the Senate unless excused by the President Pro Tempore.

Rule 9. (a) The President Pro Tempore shall preside over the Senate when the President is absent or steps down from the Chair. Whenever presiding over the Senate, the President Pro Tempore shall at any time have the right to designate a member of the Senate to preside in place of the President Pro Tempore. In the absence of the President and the President Pro Tempore, the Majority Leader shall preside over the Senate.
(b) In the case of death or resignation of the President Pro Tempore, the Majority Caucus Chair shall serve as Temporary President Pro Tempore until the election of a President Pro Tempore by the members of the Senate pursuant to subsection (d) of this rule. If the Majority Caucus Chair is unable to serve as Temporary President Pro Tempore, the individuals holding the following positions shall serve as Temporary President Pro Tempore in the order listed:
(1) Majority Floor Leader.
(2) Majority Whip.
(3) Assistant President Pro Tempore.
(4) Assistant Majority Floor Leader. If two (2) individuals hold the position of Assistant Majority Floor Leader, the individual having served in that position the longest shall serve as Temporary President Pro Tempore.
(c) Whenever the Majority Caucus Chair, or any member listed in the order of succession, files with the Ranking Member of the Committee on Rules and Legislative Procedure a written statement suggesting that the President Pro Tempore is unable to perform the duties of the office because of incapacity, the Ranking Member shall convene the Committee within twenty-four (24) hours to decide the question. The President Pro Tempore, who serves as Chair of the Committee, shall not preside over the meeting of the Committee under this rule. However, the President Pro Tempore shall be permitted to vote on the question as a member of the committee. If the Committee finds that the President Pro Tempore is unable to perform the duties of the office, the Majority Caucus Chair shall serve as Temporary President Pro Tempore until the election of an Acting President Pro Tempore by the caucus of the President Pro Tempore pursuant to subsection (e) of this rule. If the Majority Caucus Chair is unable to serve as Temporary President Pro Tempore, the individuals holding the following positions shall serve as Temporary President Pro Tempore, in the order listed:
(1) Majority Floor Leader.
(2) Majority Whip.
(3) Assistant President Pro Tempore.
(4) Assistant Majority Floor Leader. If two (2) individuals hold the position of Assistant Majority Floor Leader, the individual having served in that position the longest shall serve as Temporary President Pro Tempore.
(5) Assistant Caucus Chair. If two (2) individuals hold the position of Assistant Caucus Chair, the individual having served in that position the longest shall serve as Temporary President Pro Tempore.
(6) Assistant Majority Whip.
(d) If the President Pro Tempore dies or resigns when the Senate is in session, the full Senate shall meet within forty-eight (48) hours to elect a new President Pro Tempore. If the President Pro Tempore dies or resigns when the Senate is not in session, the full Senate shall meet within five (5) calendar days to elect a new President Pro Tempore.
(e) If the President Pro Tempore is found unable to perform the duties of the office under subsection (c) when the Senate is in session, the caucus of the President Pro Tempore shall meet within forty-eight (48) hours to elect an Acting President Pro Tempore. If the President Pro Tempore is found unable to perform the duties of the office under subsection (c) when the Senate is not in session, the caucus of the President Pro Tempore shall meet within five (5) calendar days to elect an Acting President Pro Tempore. The full Senate is not required to meet to approve the election of an Acting President Pro Tempore by the caucus.
(f) The Temporary President Pro Tempore and the Acting President Pro Tempore shall exercise all of the duties and powers granted to the President Pro Tempore under the Standing Rules and Orders of the Senate.
(g) The Acting President Pro Tempore shall serve until the Committee on Rules and Legislative Procedure determines that the President Pro Tempore is able to resume the duties of the office. The Committee shall meet within twenty-four (24) hours to determine the question upon receipt of a written statement from the President Pro Tempore that the President Pro Tempore is able to resume the duties of the office. The President Pro Tempore, who

serves as Chair of the Committee, shall not preside over the meeting of the Committee under this Rule. However, the President Pro Tempore shall be permitted to vote on the question as a member of the committee.

Rule 17. ... (d) A motion to adjourn may be made only by the President Pro Tempore or Senator designated by the President Pro Tempore.

Rule 21. The first item of business at the first regular session of a term of the General Assembly shall be the election of the following:
The President Pro Tempore
The Principal Secretary

Rule 23. (a) The President Pro Tempore shall appoint the following:
(1) Majority Floor Leader.
(2) Majority Whip.
(3) Assistant President Pro Tempore.
(4) Assistant Majority Floor Leader(s).
(5) Assistant Majority Whip.
(6) Assistant Majority Caucus Chair(s).
(7) Assistant Majority Secretary of the Senate.
(8) Postmaster of the Senate.
(9) Principal Doorkeeper of the Senate.
(10) Majority Attorney of the Senate.
(11) Deputy Secretary of Operations.
(12) Acting Principal Secretary of the Senate, if the Principal Secretary is removed, suspended, unable to serve, or resigns.
(13) Chief Legal Counsel. ...

Rule 24. The officers and employees of the Senate shall be responsible to and under the direction of the President Pro Tempore or President Pro Tempore-elect.

Rule 32. (a) The President Pro Tempore or President Pro Tempore-elect shall appoint the chairperson and members of each of the standing committees and subcommittees thereto. The appointments to standing committees and subcommittees shall be reported to the Senate by the President Pro Tempore and recorded in the Journal.
(b) The chairpersons and members of the standing committees and subcommittees thereof shall continue for the term of the General Assembly unless removed by the President Pro Tempore or unable to serve.
(c) All vacancies on any committee or subcommittee shall be filled by appointment by the President Pro Tempore or President Pro Tempore-elect of the Senate.

Rule 49. (a) Whenever the President Pro Tempore of the Senate shall assign a filed Senate bill or joint resolution to a standing committee, the assignment shall be made within seven (7) calendar days following the last day for filing Senate bills and joint resolutions and shall cause the bill or joint resolution with the committee assignment to be set forth on a bill filing list. ...

Rule 51. Bills and resolutions pre-filed prior to a session or during recess after organization day may be assigned and released by the President Pro Tempore or President Pro Tempore-elect of the Senate to a standing committee for consideration and will be introduced the first or a subsequent day on which the Senate is convened.

Rule 84. (a) If the Senate dissents in House amendments, the President Pro Tempore may appoint a conference committee, and if the House dissents in Senate amendments, the Speaker may request by the appointment of House conferees, that the President Pro Tempore appoint a conference committee.
(b) The Senate conference committee consists of two Senators, with the first listed Senator being the Senate Chairperson. Advisors may be appointed at any time by the President Pro Tempore.
(c) Senate conferees may be changed or removed at any time by the President Pro Tempore, who shall give written notice to the Office of the Minority Leader of the change.

(d) The appointment of a conference committee and any change of conferees shall be reported by the President Pro Tempore to the Senate and posted in the information center for the Senate committee meetings and on the Senate bulletin boards.

Rule 87. (a) All bills passed by both Houses shall be printed in enrolled form and shall be certified as accurate by the first author of the bill, the President of the Senate, the President Pro Tempore, and the Principal Secretary. One copy of each enrollment shall be furnished to the author at the time of that certification.

Iowa Senate
Rule 53. The senate shall elect, from its membership, a president pro tempore. When the president is absent, the president pro tempore shall preside, except when the chair is filled by temporary appointment by the president or the majority leader.

The president pro tempore, when presiding, shall perform duties as prescribed in rule 52, paragraphs 1 and 2.

The president pro tempore shall serve as a member of the legislative council and as a member of the senate committee on rules and administration.

Kentucky Senate

Rule 26. ... The President may designate any Senator to preside in the absence of both the President and President Pro Tem and to perform all duties of the President, including duties as a member of the Committee on Committees. This designation by the President may be made from time to time or for any period of time as the President may designate.

Rule 27. ... Any decision made by the President shall be subject to appeal to the Senate. During the pendency of any appeal to the Senate from a decision of the chair, the President shall vacate the chair and call the President Pro Tem to preside. When the President Pro Tem is presiding on an appeal to the Senate from a decision of the President, no motion or business shall be in order except the motion on appeal from the decision of the President, and that motion shall not be debatable. Upon an appeal, the question put to the Senate shall be stated as follows: "Shall the decision of the President stand as the judgment of the Senate? An 'Aye' vote shall support the President's ruling, and a 'Nay' vote shall oppose the President's ruling." The ruling of the President shall be sustained unless a majority of the members elected to the Senate oppose the ruling.

Rule 28. The Senate shall elect a President Pro Tem, who shall perform the duties of the President when the President is absent from the Senate, or when empowered by the President to perform the duties of the chair.

Rule 37. There shall be a Committee on Committees composed of the President, the President Pro Tem, the Majority Floor Leader, the Majority Caucus Chairman, the Majority Whip, the Minority Floor Leader, the Minority Caucus Chairman, and the Minority Whip of the Senate.

The majority of this committee shall have full power to act on all matters referred to the committee either by these rules or by action of the Senate. A meeting of the Committee on Committees may be called by the President, the Majority Floor Leader, or a majority of the committee members.

The President shall be Chairman of the Committee on Committees, and in the President's absence, the Majority Floor Leader shall serve as Chairman.

All bills and resolutions bearing the force and effect of law shall, upon their introduction, be automatically referred to the Committee on Committees which shall refer same to the proper committee not later than the third day in which the Senate is in session after the date of introduction.

The Committee on Committees shall have supervision and control over all employees of the Senate whether elected by the Senate or appointed by the Committee on Committees or provided by the Legislative Research Commission, and the Committee on Committees shall see that they perform all of their duties to the Senate and the members thereof. The Committee on Committees is empowered to discharge any or all of said employees and officers except

the constitutional officers of the Senate. The Committee on Committees shall appoint the members of all standing and special committees and shall fill any vacancies thereon.

Louisiana Senate

Rule 3.4. A. The President Pro Tempore shall be elected by the members of the Senate from among the members thereof in the same manner as the President. He shall be elected every four years, and his election shall be the next order of business following election of the President.
B. He may be removed from office in the same manner as the President.
C. A vacancy in the office of President Pro Tempore shall be filled in the same manner as the original election.

Rule 3.5. The President Pro Tempore shall:
(1) In the absence of the President, preside or call a member to preside over the Senate.
(2) Upon the death or resignation of the President, assume the powers, duties, and emoluments of the President until a president is elected as provided in Senate Rule 3.2.
(3) In case of the disability or temporary absence of the President, assume the powers, duties, and responsibilities of the President until the termination of the disability or absence. The Senate shall make appropriate financial recompense to the President Pro Tempore for his service during such time.
(4) Determine the meeting time of the Senate, with concurrence of the Senate.
(5) Perform such other duties as are assigned to him by the President, the Senate, the state constitution or laws, the Joint Rules of the Senate and House, the Senate rules, or otherwise by the Legislature.

Maine Senate

Rule 201. The President shall:
...3. Appoint all committees, a Sergeant-at-Arms, an Assistant Sergeant-at-Arms, a President Pro Tempore to perform the duties of the Chair during the President's absence and chamber staff, unless the Senate otherwise directs. Name a Senator to perform the duties of the President when the President Pro Tempore is absent. The President may rescind these appointments at any time; ...

Rule 202. The President Pro Tempore shall:
1. Preside at the time to which the Senate has adjourned when the President is absent;
2. When the President assumes the office of Governor, exercise the powers and duties of the office of President until the vacancy in the Senate created by the President's succession to the office of Governor is filled, the Senator so elected is seated and a President is elected.

Michigan Senate

Rule 1.104. a) A President pro tempore, Assistant President pro tempore, and Associate President pro tempore shall be elected by a vote of a majority of the Senators elected and serving. They shall be elected at the first session of a quadrennium. All officers elected by the Senate are to hold office until their successors are elected and qualified or until the expiration of their term, whichever occurs first. ...

Minnesota Senate

Rule 14.2. The President may call a member to preside. In the absence of the President, the President Pro Tem, the Chair of the Committee on Rules and Administration, or the Chair's designee, shall preside over the Senate. In the absence of the President and the Chair, the Senate may select a member to perform the duties of the President. Substitutions do not extend beyond adjournment.

Mississippi Senate

Rule 9. There shall be elected a President Pro Tempore in the manner provided in Section 5-1-15, Mississippi Code of 1972. The President Pro Tempore shall not be eligible for appointment as chairman of any standing Senate committee, with the exception of the Rules Committee.

Rule 10. In the election of the President Pro Tempore, the candidate receiving the lowest number of votes shall be dropped after the first ballot and on each succeeding ballot until one (1) candidate receives a majority of all votes cast, and the vote shall be by viva voce vote on roll call of the members.

Rule 11. In the absence of the President, or at the President's request, the President Pro Tempore shall act in the President's stead, assuming the duties and responsibilities herein granted to the President.

Rule 65. (1) There shall be a standing Committee on Rules which shall consist of the President (who shall be a nonvoting member), the President Pro Tempore, and four (4) Senators, each having served at least four (4) years in the Senate, one (1) from each Congressional District of the State as constituted on January 1, 2004, to be selected by the Senators from their respective congressional districts by caucus. The voting precinct of the Senator representing such district shall determine the congressional district caucus in which the Senator shall participate and for which the Senator may hold membership on the Rules Committee. The President Pro Tempore shall serve as chairman of the committee; the vice chairman shall be appointed by the President Pro Tempore from among the Senators on the committee. ...

Missouri Senate

Rule 10. The president pro tem shall be parliamentarian of the senate and may decide all points of order, and in his absence such points of order may be decided by the chairman of the Committee on the Judiciary and Civil and Criminal Jurisprudence, except in either case, the point of order may be referred by the then acting parliamentarian, to the Committee on Parliamentary Procedure for consideration and determination. All rulings on points of order shall be subject to an appeal to the senate and all questions and points of order shall be noted by the secretary with the decision thereon.

Rule 12. All committees listed in Rule 25 shall be appointed by the president pro tem of the senate, except as otherwise provided. The minority party members shall be chosen by the minority party in the manner determined by the minority party caucus.
At the beginning of each session the caucus chairman of the minority party may file with the secretary of the senate a statement setting forth the method by which minority party members are to be appointed as determined by the minority party caucus, but if no such statement is filed, the minority party members shall be appointed to committees by the minority floor leader.

Rule 13. The president pro tem shall be chosen by the senate, and if the president pro tem so chosen is absent, or his office vacant, the senate may proceed to elect an interim president pro tem to hold the office during such absence or other incapacity, at the pleasure of the senate.

Rule 14. The president pro tem shall sign all acts, joint resolutions and addresses. All writs, warrants and subpoenas issued by order of the senate shall be under his or her hand attested by the secretary.

Rule 16. Stenographers and reporters wishing to take down the debates and proceedings of the senate may be admitted by the president pro tem to the reporters' table on the floor of the senate for that purpose, and under such further regulations as the senate may prescribe, but no persons, including members of the senate, other than members of the press, shall be permitted to sit at the press table while the senate is in session.

Rule 17. Subject to the unanimous approval of the president pro tem and the majority and minority floor leaders as to time and duration, live or taped news media broadcasts of sessions of the senate may be made by broadcast media representatives. Reporters and technicians to effectuate such broadcasts or taping may be admitted to the chamber for this purpose, but no apparatus or procedure shall be used which will interfere with the usual procedure of the senate. All recording or broadcasting shall be done from areas reserved or set aside for such activities by news media representatives by the president pro tem.

Rule 25. The president pro tem of the senate shall appoint the following standing committees: ...

Rule 27. The Committee on Parliamentary Procedure shall be composed of three members: the president pro tem, the chairman of the Committee on the Judiciary and Civil and Criminal Jurisprudence, and the minority floor leader.

Rule 31. 1. The standing committees of the senate on Administration, Appropriations, and such other committees as the president pro tem shall designate, may function within the state unless otherwise approved by the president pro tem during the interim between the end of the first regular session and the commencement of the second regular

session, at such times and places as are considered necessary to consider bills and other matters referred to them, to hold hearings, hear testimony, receive evidence, make such studies as are deemed necessary and to perform any other necessary legislative function pertinent to their respective powers and duties.
2. The actual and necessary expenses of each committee functioning during the interim pursuant to the provisions of this rule, and the expenses of its members and the research and clerical personnel assigned to it incurred in attending meetings of the committee or of any subcommittee thereof, shall be paid from the senate contingent fund upon the approval of the chairman of the committee on administration and the president pro tem of the senate.

Montana Senate

Rule S10-30. President, President pro tempore, and other officers. (1) The Senate shall, at the beginning of each regular session, and at other times as may be necessary, elect a Senator as President and a Senator as President pro tempore.
(2) The Senate shall choose its other officers and is the judge of the elections, returns, and qualifications of the Senators.

Rule S10-60. Succession. (1) In case of the absence or disqualification of the President, the President pro tempore of the Senate shall perform the duties of the President until the vacancy is filled or the disability removed.
(2) Whenever the President pro tempore of the Senate is of the opposite political party from that of the President, the following procedure applies:
(a) If the President dies while in office, the members of the Senate have the right to immediately nominate and elect an acting President of the same party.
(b) If the President is absent for 2 or more legislative days or at any time after the 85th legislative day or at any time during special session of the Legislature and wants to appoint an acting President during the President's absence, the President may do so, or the members of the Senate have the right to immediately nominate and elect an acting President of the President's caucus.
(c) An acting President of the Senate has the powers of the President and supersedes the powers of the President pro tempore.

Nevada Senate

Rule 2. President Pro Tem and Other Presiding Officers. 1. Except as otherwise provided in subsection 2:
(a) The President Pro Tem has all the power and shall discharge all the duties of the President during his absence or inability to discharge the duties of his office.
(b) In the absence or inability of the President Pro Tem to discharge the duties of the President's office, the Chair of the Standing Committee on Legislative Operations and Elections shall serve as the presiding officer. In the absence or inability of the Chair, the Vice Chair of the Standing Committee on Legislative Operations and Elections shall serve as the presiding officer. In the absence or inability of the Vice Chair of the Standing Committee on Legislative Operations and Elections, the Senate shall elect one of its members to serve as the presiding officer. A member who is serving as the presiding officer has all the power and shall discharge all the duties of the President until the absence or inability which resulted in the member serving as the presiding officer has ended.
2. When the President Pro Tem or another member is serving as the presiding officer, the President Pro Tem or other member may vote on any question for which he is otherwise qualified to vote as a member. If the Senate is equally divided on the question, the President Pro Tem or other member may not give an additional deciding vote or casting vote pursuant to Senate Standing Rule No. 31 or Section 17 of Article 5 of the Nevada Constitution.

New Jersey Senate

Rule 1:4. At the organization meeting, the Senate shall elect a President, a President, *pro tempore*, and a Secretary, each of whom shall continue in office at the pleasure of the Senate. The votes of 21 or more members are required for the election of each of those officers and for their removal from office. Vacancies in those offices shall be filled at the next meeting of the Senate

Rule 3:9. a. If the President desires to temporarily vacate the Chair during any meeting, the President shall request the President, *pro tempore*, or name another Senator to preside. While presiding the President, *pro tempore*, or other Senator shall exercise the powers and duties of the President.
b. When the President is absent, the President, *pro tempore*, shall possess all the powers and discharge all the duties of the President.

New Mexico Senate

Rule 1-2. The other officers of the senate shall be:
(a) a president pro tempore;
(b) one chaplain;
(c) one chief clerk;
(d) three assistant chief clerks; and
(e) one sergeant-at-arms.

Rule 4-5. The president pro tempore when acting as president, or any member of the senate while acting as presiding officer of the senate, shall be invested with all the powers and duties conferred by these rules upon the president. Whenever the president is not in the chair, the president pro tempore or some member designated by the president pro tempore, or elected by the senate, shall preside.

Rule 9-1. There shall be a committee known as the "committees' committee", which shall be composed of the president pro tempore, the majority floor leader, the majority whip, the minority floor leader, the minority whip and five members of the majority party and one member of the minority party appointed by the president pro tempore, by and with the consent of the senate; provided if a vacancy is created on the committees' committee for any reason, the president pro tempore or the appropriate caucus if the vacancy is that of a party leader, may fill the vacancy. The chairman of the committees' committee shall be the president pro tempore. The vice chairman shall be selected by the members of the committees' committee. ...

Rule 9-13-1. There shall be a committee known as the senate ethics committee, which shall be composed of the president pro tempore, the majority floor leader, the majority whip, the minority floor leader, the minority whip, the majority caucus chairman, the minority caucus chairman and one member of the senate minority party appointed by the senate minority floor leader. The senate ethics committee is designated as the committee to which all matters pertaining to ethics shall be referred. The president pro tempore shall chair the senate ethics committee. ...

Rule 10-1. When the senate resolves itself into the committee of the whole, the president pro tempore, or a senator designated by him or the senate, shall preside.

North Carolina Senate

Rule 4. Convening and presiding in absence of President. – In the absence of the President, the President Pro Tempore or a Senator designated by the President Pro Tempore shall convene or reconvene the Senate and preside, and during such time shall be vested with all powers of the President of the Senate except that of casting a vote in case of a tie when the President Pro Tempore or the designated Presiding Officer has already voted on the question as a Senator. In the event of the absence of the President and President Pro Tempore at any time fixed for the reconvening of the Senate, the Senate shall be called to order by a member designated by the President Pro Tempore, or if no member is designated, by the Deputy President Pro Tempore of the Senate. If no member has been designated and the Deputy President Pro Tempore is also absent, the Senate shall be called to order by the Chair of the Committee on Rules and Operations of the Senate who shall designate some member to act as Presiding Officer.

Rule 9. Parliamentarian to be appointed by the President Pro Tempore. – The President Pro Tempore shall appoint from among the members of the Senate a Parliamentarian. In the absence of the Parliamentarian, the Chair of the Committee on Rules and Operations of the Senate shall act as Parliamentarian.

Rule 17. ... (g) The President Pro Tempore may authorize and provide for the broadcasting of Senate sessions via television or Internet.

Rule 31. Appointment of committees. – The President Pro Tempore of the Senate shall have the exclusive right and authority to appoint the membership of all committees, regular and select, and to appoint committee chairs and vice-chairs and to establish select committees, but this does not exclude the right of the Senate by resolution to establish select committees. Upon the recommendation of the Committee on Rules and Operations of the Senate, the Senate

may alter the name, number, and composition of the standing committees by a majority vote of the Senators present and voting.

Rule 34. (a) … The President Pro Tempore shall have the exclusive right and authority to determine the total number of members and the number of members of each political party of each committee. No Senator shall hold membership on more than 12 standing committees unless the Committee on Rules and Operations of the Senate provides otherwise. …
(b) The President Pro Tempore and the Deputy President Pro Tempore may serve as ex officio members of each Senate committee and subcommittee.

Rule 37. Committee of the Whole Senate. … Only the President Pro Tempore, the Deputy President Pro Tempore, or the Chair of the Committee on Rules and Operations of the Senate may move to resolve into the Committee of the Whole Senate. … The Chair shall be the President Pro Tempore of the Senate or his designee.

Rule 57. Conference committee. – The President Pro Tempore of the Senate, or in the President Pro Tempore's absence, the Deputy President Pro Tempore, upon motion, shall appoint a conference committee when the Senate fails to concur in amendments or committee substitutes put by the House to a bill originating in the Senate, or when the House of Representatives fails to concur in amendments or committee substitutes put by the Senate to a bill originating in the House. Senate conferees shall include the primary sponsor of the bill. In considering the bill committed to the conferees, only such matters as are germane to the bill shall be considered by the conferees, and the conference report shall deal only with such matters. The matters referred to the conference committee by the conference committee chairs shall go to and be considered by the conferees appointed by the Senate and the House of Representatives. While the bill is in conference committee, the Senate's position shall be determined by a majority of the Senate conferees. Upon agreement by the Senate and House of Representatives, a conference report shall be drafted reflecting the matters considered and agreed upon by the conferees. The conference report shall not be amended.

Rule 60. Pages. – (a) The President Pro Tempore of the Senate shall appoint pages. The President Pro Tempore, or such person as the President Pro Tempore may designate, shall supervise the pages and assign to them their duties. Each page shall be at least 15 years of age or be in the ninth grade at the time of service. …

Rule 66. President to sign papers. – All addresses and all warrants and subpoenas issued by order of the Senate, shall be signed by the President, the President Pro Tempore, or the Deputy President Pro Tempore. All acts and resolutions shall be signed by the President, the President Pro Tempore, the Deputy President Pro Tempore, or by a Senator designated by the President Pro Tempore to act as Presiding Officer.

Rule 72. Assignment of seats; offices. – (a) The President Pro Tempore of the Senate shall assign seats in the Senate Chamber to the members elected. The President Pro Tempore, when assigning seats, may give preferential consideration to the respective members according to the length of service which each member has rendered in the Senate. No incumbent appointed to fill an unexpired term in the immediate preceding session shall retain the seat if requested by a Senator elected to said session.
(b) Not later than two weeks after the initial committee assignments become final, the President Pro Tempore of the Senate is authorized to make assignments of committee rooms and offices to designated committees, chairs, and members of the Senate. In making such assignments of individual offices, the President Pro Tempore may give preferential consideration to the respective members according to the length of service which each member has rendered in the Senate.

North Dakota Senate

Rule 202. President Pro Tempore. In the absence of the President of the Senate, or during refusal of the President to act, the President Pro Tempore shall exercise all rights and prerogatives of the President. While the Legislative Assembly is in session, the President Pro Tempore shall sign all vouchers for payment of money out of the appropriation for the Legislative Assembly.

Oklahoma Senate

Rule 1-3. INTERPRETATION. When the Senate is in daily session, interpretation of the rules shall be made by the President Pro Tempore or by an elected member of the Senate designated by the President Pro Tempore as Presiding Officer pursuant to Senate Rule 2-4; when a committee is meeting, interpretation of the rules shall be made by the committee chair, or in the chair's absence the vice-chair, of the committee; and at all other times interpretation of the rules shall be made by the President Pro Tempore of the Senate. ...

Rule 2-1. OFFICERS. Officers of the Senate shall be:
The President, who shall be the Lieutenant Governor of the State of Oklahoma;
The President Pro Tempore, who shall be the Presiding Officer of the Senate;
Such other officers as may be designated by the Majority and Minority caucuses; provided, the Majority Floor Leader shall serve as acting President Pro Tempore in the event that the President Pro Tempore vacates the office on a temporary basis. If the President Pro Tempore shall vacate the office on a permanent basis, the Majority Floor Leader shall serve as acting President Pro Tempore until such time as the Senate shall elect a new President Pro Tempore; and
The Secretary.

Rule 2-2. ELECTION. The President Pro Tempore shall be elected by a majority of the members of the Senate when the Senate convenes on the first Tuesday after the first Monday in January of each odd-numbered year. The Secretary of the Senate, who shall not be a member of the Senate, shall be elected by a majority of the members following election of the President Pro Tempore and announcement of the other officers.

Rule 2-4. DUTIES OF THE PRESIDENT PRO TEMPORE.
A. The President Pro Tempore shall be the chief executive officer of the Senate and shall prescribe all policies not otherwise provided by law or by the rules. The President Pro Tempore shall serve as Presiding Officer of the Senate during its daily sessions but may designate another member of the Senate to serve as Presiding Officer at such times as the President Pro Tempore deems appropriate. Wherever the title "Presiding Officer" appears in the rules it shall mean the President Pro Tempore or an elected member of the Senate designated by the President Pro Tempore as Presiding Officer.
B. The President Pro Tempore may refer any matter concerning exercise of the Senate's discretionary powers and duties under Section 30 of Article V of the Oklahoma Constitution to a standing committee or select committee as the President Pro Tempore deems appropriate.
C. The President Pro Tempore shall determine the duties to be performed for the Senate by the Secretary of the Senate and shall designate a Chief of Staff to be responsible for staff duties not assigned to the Secretary of the Senate. The President Pro Tempore or a designee shall be responsible for the issuance of all warrants and vouchers and the maintenance of an accurate account of expenditures by the Senate.

Rule 3-1. EXECUTIVE ASSISTANTS. Each member of the Senate shall be entitled to designate an executive assistant. Executive assistants shall serve at the discretion of, and perform such duties as prescribed by, the individual member of the Senate for whom employed, subject to such policies as may be established by the President Pro Tempore.

Rule 3-2. LEADERSHIP STAFF. The President Pro Tempore shall be entitled to employ a leadership staff. Leadership staff shall serve at the discretion of, for such compensation pursuant to law as may be determined by, and perform such duties as prescribed by, the President Pro Tempore.

Rule 3-3. SERVICE STAFF. The Chief of Staff, subject to the review and supervision of the President Pro Tempore, shall be authorized to employ service staff. Service staff shall be employed according to policies established by the President Pro Tempore and shall receive such compensation pursuant to law as may be determined by, and perform such duties as prescribed by, the President Pro Tempore.

Rule 4-2. MANDATORY AUDIT. The President Pro Tempore shall cause an audit of the Senate's expenditures to be made at least once each fiscal year.

Rule 4-3. PHYSICAL PROPERTY. The President Pro Tempore shall be responsible for the physical property of the Senate and for that portion of the Capitol assigned to the Senate. The Chief of Staff, under direction of the President

Pro Tempore, shall be authorized to perform routine repairs, maintenance and upkeep on such property and facilities.

Rule 4-4. SUPPLIES AND EQUIPMENT. The use of Senate supplies and equipment, including Senate postage meters, is restricted to official Senate business. Questions of compliance shall be resolved by the President Pro Tempore or, at the discretion of the President Pro Tempore, the Rules Committee.

Rule 6-1. PROPOSALS. Any member of the Senate may submit in writing to the President Pro Tempore a proposal for study or consideration by the Senate, subject to such deadlines for interim studies as may be established by the President Pro Tempore.

Rule 7-1. TYPES AND NUMBER. There shall be two types of Senate committees established by the President Pro Tempore, to-wit: standing committees and select committees. The President Pro Tempore shall appoint the chair and vice-chair of each standing committee and of each select committee.

The President Pro Tempore may establish, and appoint the members of, as many ad hoc subcommittees of each standing committee as the President Pro Tempore deems appropriate. There shall be as many select committees as are created by the President Pro Tempore.

Rule 7-2. MEMBERSHIP. Membership on standing committees and on select committees shall be subject to the following:
A. The President Pro Tempore shall appoint, subject to the approval of the Senate, the Majority Caucus members and the chair and vice-chair of each standing committee.
...
D. The President Pro Tempore shall appoint all members of select committees.
E. The President Pro Tempore and Majority Floor Leader shall each be ex officio and voting members of all standing and select Senate committees.

Rule 7-4. DUTIES OF LEGISLATION COMMITTEES. Each legislative committee shall be responsible for the formulation of legislative programs and determination of nonlegislative matters within the jurisdiction prescribed by the President Pro Tempore; shall inquire into the administration and execution of all laws within the same jurisdiction; shall consider such proposals as may be submitted to the committee by the President Pro Tempore; and shall be responsible for the continuing codification of all laws within the prescribed jurisdiction.

Rule 8-1. COMMITTEE OF THE WHOLE. Without prior notice, the Senate may, by motion approved by a majority of the members of the Senate, declare itself a Committee of the Whole, at which time the President Pro Tempore or a member designated by the President Pro Tempore shall chair the Committee of the Whole. Rules applicable to other Senate committees shall be applied to the Committee of the Whole, except those rules relating to notice.

Rule 10-2. GALLERIES AND HALLWAYS. The President Pro Tempore or a designee is empowered to assign seats in the galleries of the Senate and is empowered to order the galleries and hallways of the Senate cleared to preserve order or to ensure the safety of the members of the Senate. ...

Rule 10-5. CALL OF THE SENATE. The Senate may, by majority vote of the members present, operate under Call of the Senate, in which case the President Pro Tempore is empowered to compel the attendance of all members of the Senate and is empowered to confine the members of the Senate to the chamber.

Rule 10-10. SENATE LOUNGE AND ANTEROOMS. The President Pro Tempore may prescribe policies restricting the use of the Senate lounge and any rooms adjoining the lounge or the Senate chamber.

Oregon Senate

Rule 7.01. Election of Presiding Officer; Pro Tempore Presiding Officer. (1) The members of the Senate shall elect by a roll call vote a President of the Senate. A constitutional majority (16) is required to elect a President. (2) The members shall also elect by a roll call vote a President pro tempore of the Senate. A constitutional majority (16) is required to elect a President pro tempore.

Pennsylvania Senate

Rule IV

1. (a) The Senate shall, at the beginning and close of each regular session and at such other times as may be necessary, elect one of its Members President Pro Tempore, who shall perform the duties of the Lieutenant Governor in any case of absence or disability of that officer, and whenever the office of Lieutenant Governor shall be vacant. (Const. Art. 2, Sec. 9)

(b) The vote of a majority of the Members voting shall be required to elect a President Pro Tempore. Except at the beginning and close of each regular session, the Senate shall only elect a President Pro Tempore when the office has become vacant and the vote of the majority of the Members elected shall be required to vacate the office of a seated President Pro Tempore.

Rule V

1. The President Pro Tempore shall:

(a) Appoint the Chairmen, Vice-Chairmen and members of the Standing Committees of the Senate as soon after the election of the President Pro Tempore as possible.

(b) Appoint members to special committees whenever authorized.

(c) Fill all vacancies occurring in standing and special committees.

(d) Refer to the appropriate standing committee, every bill and joint resolution which may be introduced in the Senate or received from the House of Representatives. Such referral shall be at the President Pro Tempore's convenience but not later than the succeeding legislative day.

(e) Appoint and have under the President Pro Tempore's direction such Senate employees as are authorized by law.

(f) Vote last on all questions when occupying the Chair.

2. The President Pro Tempore may:

(a) Name any Senator to preside in the absence of the President, or if both the President and President Pro Tempore are absent the Majority Leader, or the Majority Leader's designee, shall preside. The Majority Leader, during such time, shall be vested with all powers of the President. This authority shall not extend beyond a day's adjournment.

Rule XV

1. There shall be the following permanent Standing committees, the Chairmen, the Vice-Chairmen and members thereof to be appointed by the President Pro Tempore as soon as possible after his election in sessions convening in odd-numbered years or such other times as may be necessary. The composition of each Standing Committee shall reasonably reflect the party composition of the Senate membership. …

2. (a) The President Pro Tempore shall be an ex-officio voting Member of all standing committees and subcommittees and not included in the number of committee members herein provided except that the President Pro Tempore shall not be an ex-officio Member of the Committee on Ethics and Official Conduct. …

Rule XX

1. The President Pro Tempore shall appoint three Senators to comprise a Committee of Conference. Two shall be from the majority party and one from the minority party. …

Rhode Island Senate

Rule 1.6. "President Pro Tempore" is a member of the senate elected to that position, who presides over the senate in the absence of the president of the senate.

South Carolina Senate

Rule 1. … B. At various times as he or she deems necessary during the session, the President *Pro Tempore* is authorized to make a motion to provide for the convening of the Senate in statewide session for the exclusive purpose of the introduction and referral of bills, receipt of communications and committee reports and the reading and passage of local legislation to which all members of an affected delegation have given their consent for the bill to be taken up, and to adjourn immediately thereafter. Any such motion shall provide the specific dates during which the motion shall apply and shall provide that the Senate must convene at 11:00 a.m. and adjourn not later than 12:30 p.m. on each such day and such motion must be made at least two (2) days prior to the beginning of the period for which it applies.

C. The President *Pro Tempore* or his designee, when, in his opinion, it is impractical or dangerous to hold a regularly scheduled session(s) of the Senate, may declare the body adjourned to some other time. Such actions are to be taken only in times of great emergency including, but not limited to, natural disasters, severe weather, and acts of God.

Rule 7. A. If a Senator in speaking, or otherwise, violates the Rules of the Senate, the presiding officer shall, or any member may, by raising a point of order, call him to order; and when a member is called to order by the President or under a point of order, he or she shall sit down and may not proceed without leave of the Senate, unless the President takes the point of order under advisement. The President may call for the Sense of the Senate on any question of order. Every question of order must be decided by the President, without debate, and Senators shall have the right to appeal the decisions of the President to the full Senate. When the decision of the President is appealed, the President *Pro Tempore* or his or her designee shall preside and the President shall retire from the chamber during the pendency of the appeal and the Senate's debate and action on the motion to appeal. The question before the Senate shall be "Shall the ruling of the President be overridden?" and after not more than thirty (30) minutes, fifteen (15) minutes for and fifteen (15) minutes against, of debate it shall be decided by a majority vote of the membership.
...

South Dakota Senate

Rule S1-1. President pro tempore presides in absence of president. If the president is absent or unable to serve, the president pro tempore shall act as presiding officer of the Senate. The acts of the president pro tempore have the same validity as those of the president.

Rule S2-2. Seating assignments. The president pro tempore of the Senate, with the advice of the minority leader, shall make the seating assignments for the floor of the Senate.

Rule S3-1. Elective officers. The officers of the Senate are a president pro tempore of the Senate, a secretary of the Senate and such other officers necessary to conduct the business of the Senate, who shall be formally elected by a majority vote of the members-elect of the Senate. Employees necessary to conduct the business of the Senate shall be appointed by the president pro tempore and their appointment shall be announced at the opening of the session.

Rule S4-2. Chairs of standing committees. The president pro tempore of the Senate shall serve as the chair of the legislative procedure committee. For other committees, the member of a committee announced first is the chair. In the absence of the chair, the member announced next shall act as chair, and so on as often as necessary.

Rule S4-3. Referral of bills to committee. Upon the first reading of a bill, the president pro tempore of the Senate or his designee shall assign that bill to an appropriate committee for hearing.

Tennessee Senate

Rule 3. SPEAKER PRO TEMPORE. The Speaker of the Senate shall appoint a Speaker pro tempore who shall perform such duties as assigned by the Speaker. The Speaker pro tempore shall serve at the pleasure of the Speaker. The Speaker pro tempore shall preside during the absence of the Speaker, except that the Speaker shall have the right to name any member to perform the duties of the Chair for a period not to extend beyond an adjournment. In the absence of the Speaker and the Speaker pro tempore, it shall be the duty of the Clerk to call the Senate to order and call the roll for the election of a temporary speaker. In the event of an interim vacancy in the office of Speaker, through death or resignation, or in the event of disability, the Speaker pro tempore shall conduct the necessary business of the Senate only until such time as an election can be held in the Senate to fill the vacancy.

Texas Senate

Rule 1.02. The Senate shall, at the beginning and close of each session, and at such other times as may be necessary, elect one of its members President Pro Tempore, who shall perform the duties of Lieutenant Governor in any case of absence or disability of the Lieutenant Governor.

Rule 1.03. If the office of Lieutenant Governor becomes vacant, the President Pro Tempore of the Senate shall convene the Committee of the Whole Senate within 30 days after the vacancy occurs. The Committee of the Whole Senate shall elect one of its members to perform the duties of the Lieutenant Governor in addition to the duties of

Senator until the next general election. If the Senator so elected ceases to be a Senator before the election of a new Lieutenant Governor, another Senator shall be elected in the same manner to perform the duties of the Lieutenant Governor until the next general election. Until the Committee of the Whole Senate elects one of its members for this purpose, the President Pro Tempore shall perform the duties of the Lieutenant Governor.

Utah Senate

Rule SR-20.03. The President may call a Senator to the chair as President Pro Tempore and that Senator has the power of the President while conducting. This substitution does not extend beyond adjournment.

Vermont Senate

Rule 6. As soon as may be after the convening of each biennial session, the President of the Senate, the President pro tempore, and one senator elected by the Senate shall comprise the committee to be known as the Committee on Committees. The Committee on Committees shall appoint the members, on the part of the Senate, of the permanent joint standing committee on Joint Rules, and all committees of the Senate, and all other committees requiring appointment of members of the Senate, unless otherwise provided by statute; but any appointment so made may, on motion of a senator, be overruled by the Senate; in which case the Senate shall, on nomination of a senator, immediately fill the vacancy. Any motion to overrule the appointments of the Committee on Committees must be made not later than the next legislative day following the announcement of the committee appointments to the Senate. …

Rule *17.* The President pro tempore shall perform all the duties of the President during the latter's absence.

Rule 36. The Orders of the Day shall then be taken up. At the request of the President pro tempore, unless a majority of the Senate objects, bills or resolutions may be taken up out of their normal sequence. …

Virginia Senate

Rule 2. (a). There shall be elected by the Senate, on the first day of the session following the election of the Senate, a President pro tempore who shall serve for a term of four years and be a senior member in the Senate.
(b). In the event of the absence, disability or vacancy in the office of the Lieutenant Governor, the President pro tempore shall carry out the duties of the Lieutenant Governor as presiding officer. Further, the President pro tempore shall be the Chairman of the Commission on Interstate Cooperation of the Senate.
(c). The President pro tempore shall have the right to name in open session, or if he is absent, in writing, a Senator to perform the duties of the presiding officer, but such substitution shall not extend beyond an adjournment of a daily session, except by unanimous consent of those present.
(d). In the event of a vacancy in the office of the Lieutenant Governor, or whenever the powers and duties of the Governor shall devolve upon the Lieutenant Governor, the President pro tempore shall have the right to name, in writing, a Senator to perform the duties of the presiding officer during his absence; and the Senator so named shall have the right to name, in open session, or in writing, if he is absent, a Senator to perform the duties of the presiding officer, but such substitution shall not extend beyond adjournment of a daily session, except by unanimous consent of those present.

Rule 7. The Senate shall elect 11 Pages and five Pages shall be appointed by the following: one by the Lieutenant Governor; one by the President pro tempore; one by the chairman of the caucus of the majority party; one by the majority leader; and one by the minority leader. The Pages shall be no less than 13 and no more than 14 years of age at the time of election or appointment, shall be residents of the Commonwealth of Virginia, and shall be elected or appointed for a term of one year. No Page shall be eligible for reelection. Any such Page so elected or appointed may be suspended or dismissed for cause by the Clerk of the Senate.

Rule 19. (a). A Committee on Rules, which shall be in addition to the foregoing standing Committees, 17 Senators, consisting of the standing Committee Chairs; the President pro tempore, if the person is not a Chair; the Majority Leader, if the person is not a Chair; the Minority Leader; and members to comprise the 17. ….

Rule 50. The Senate may go into the Committee of the Whole only upon the affirmative vote of a majority of the members elected. When the Senate shall resolve itself into the Committee of the Whole, the President shall leave the

Chair and the President pro tempore shall preside in the Committee. If the President pro tempore is absent from the Senate, then the Senate shall elect a chairman to preside therein. ...

Washington Senate

Rule 2. 1. Upon the organization of the senate the members shall elect one of their number as president pro tempore who shall have all the powers and authority and who shall discharge all the duties of lieutenant governor acting as president during the lieutenant governor's absence. The senate shall also elect a vice-president pro tempore who will serve in the absence of the lieutenant governor and the president pro tempore.
2. In the absence of the president pro tempore, and vice president pro tempore, or with their consent, the president shall have the right to name any senator to perform the duties of the chair, but such substitution shall not extend beyond an adjournment, nor authorize the senator so substituted to sign any documents requiring the signature of the president.

West Virginia Senate

Rule 4. The President of the Senate shall appoint a President *pro tempore,* who, during the absence of the President, shall preside and perform all the duties of the President.

Wisconsin Senate

Rule 1. (1) The senate shall elect, by roll call vote, one of its members to serve as president and one to serve as president pro tempore. The president and president pro tempore shall serve for the biennial session unless separated by death, resignation, or removal by the adoption of a resolution by a majority of the current membership. ...

Rule 2. (1) When the president is absent or unable to preside over the senate sitting in session, the president pro tempore may preside and assume all of the duties enumerated under rule 4. The substitution does not extend beyond adjournment and ends upon the president's return or the election of a new president. ...

Rule 3. Duties of president pro tempore and majority leader. When the president is separated by death, resignation, or removal from office, or is otherwise unable to serve, all of the powers and duties of the president not enumerated in rule 4 devolve upon the president pro tempore until a president is elected. When both the president and president pro tempore are separated by death, resignation, or removal from office, or are otherwise unable to serve, all of the powers and duties of the president not enumerated under rule 4 devolve upon the majority leader until a president is elected

WOMEN IN STATE LEGISLATURES 2011

In 2011, 1,718, or 23.3% of the 7,382 state legislators in the United States are women. Women currently hold 415, or 21.1%, of the 1,971 state senate seats and 1,303, or 24.1%, of the 5,411 state house or assembly seats. Since 1971, the number of women serving in state legislatures has more than quintupled.

Year	Women Legislators	% of Total Legislators	Year	Women Legislators	% of Total Legislators	Year	Women Legislators	% of Total Legislators
1971	344	4.5	1989	1,270	17.0	2002	1,682	22.7
1973	424	5.6	1991	1,368	18.3	2003	1,654	22.4
1975	604	8.0	1993	1,524	20.5	2004	1,659	22.5
1977	688	9.1	1995	1,532	20.6	2005	1,674	22.7
1979	770	10.3	1997	1,605	21.6	2006	1,681	22.8
1981	908	12.1	1998	1,617	21.8	2007	1,732	23.5
1983	991	13.3	1999	1,664	22.4	2008	1,751	23.7
1985	1,103	14.8	2000	1,670	22.5	2009	1,797	24.3
1987	1,170	15.7	2001	1,666	22.4	2010	1,809	24.5
						2011	**1,718**	**23.3**

The party breakdown for women serving in state legislatures in 2011 is:

	Total Legislators		State Senators		State Reps.	
	#	%	#	%	#	%
Democrats	1,052	61.2	259	62.4	793	60.8
Republicans	649	37.8	144	34.7	505	38.8
Nonpartisans*	11	0.6	11	2.7	----	----
Progressives	4	0.2	---	---	4	0.3
Independent	2	0.1	1	0.2	1	0.1
Total	1,718	99.9	415	100.0	1,303	100.0

The states with the highest percentages of women state legislators are:

State	% Women	State	% Women
Colorado	40.0	Washington	31.3
Vermont	37.8	Maryland	30.9
Arizona	34.4	Illinois	29.4
Hawaii	32.9	Connecticut	28.9
Minnesota	31.8	Nevada	28.6

The states with the lowest percentages of women state legislators are:

State	% Women	State	% Women
South Carolina	9.4	Wyoming	15.6
Oklahoma	12.8	Louisiana	16.0
Alabama	13.6	West Virginia	16.4
Mississippi	14.4	Pennsylvania	16.6
North Dakota	14.9	Kentucky	18.1

Women in State Legislative Leadership
Three women serve as presidents of senates: Michelle L. Fischbach (R-MN), Therese Murray (D-MA), and M. Teresa Paiva-Weed (D-RI). Two women serve as speakers of state houses: Rebecca Lockhart (R-UT) and Sheila Y. Oliver (D-NJ).

Women of Color in State Legislatures
Of the 1,718 women legislators serving nationwide, 349 or 20.3% are women of color. They include 96 senators and 253 representatives; 331 are Democrats, 16 are Republicans, and two are non-partisan. Women of color constitute 4.7% of the total 7,382 state legislators.

The First Women Legislators
In 1894, the first women state legislators were elected to serve in the United States. Three Republican women were elected to the Colorado House of Representatives: Clara Cressingham; Carrie C. Holly; Frances Klock. The first woman state senator, Democrat Martha Hughes Cannon, was elected to the Utah State Senate in 1896.+

---

* In Nebraska, where the legislature is unicameral, legislators are elected on a nonpartisan basis.

WOMEN IN ELECTIVE OFFICE 2011

In 2011, 89 women serve in the U.S. Congress. Seventeen women serve in the Senate and 72 women serve in the House. The number of women in statewide elective executive posts is 68, while the proportion of women in state legislatures is 23.3 percent.

CONGRESS

In 2011, women hold **89**, or **16.6%**, of the 535 seats in the 112th U.S. Congress — **17**, or **17.0%**, of the 100 seats in the Senate and **72**, or **16.6%**, of the 435 seats in the House of Representatives. Congresswoman Nancy Pelosi (D-CA), who was the first woman Speaker of the House, is now minority leader.

Seventeen (12D, 5R) women serve in the **Senate: Kelly Ayotte** (R-ND), **Barbara Boxer** (D-CA); **Maria Cantwell** (D-WA); **Susan Collins** (R-ME); **Dianne Feinstein** (D-CA); **Kirsten Gillibrand** (D-NY); **Kay Hagan** (D-NC); **Kay Bailey Hutchison** (R-TX); **Amy Klobuchar** (D-MN); **Mary Landrieu** (D-LA); **Claire McCaskill** (D-MO); **Barbara Mikulski** (D-MD); **Lisa Murkowski** (R-AK); **Patty Murray** (D-WA); **Jeanne Shaheen** (D-NH); **Olympia Snowe** (R-ME); and **Debbie Stabenow** (D-MI).

Seventy-two women from 27 states serve in the House of Representatives; **48** are Democrats and **24** are Republicans. In addition, three Democratic women serve as the Delegates to the House from Guam, the Virgin Islands and Washington, DC.

STATEWIDE ELECTIVE EXECUTIVE OFFICES

In 2011, **68** women hold statewide elective executive offices across the country; women hold **21.6%** of the 315 available positions. Among these women, **38** are Democrats, **29** are Republicans, and **1** was elected in a nonpartisan race.

STATE LEGISLATURES

In 2011, **1,718**, or **23.3%**, of the 7,382 state legislators in the United States are women. Women hold **415**, or **21.1%**, of the 1,971 state senate seats and **1,303**, or **24.1%**, of the 5,411 state house seats. Since 1971, the number of women serving in state legislatures has more than quintupled.

STATE LEGISLATURE (cont.)

The states with the **highest percentages** of women state legislators are:

State	% Women	State	% Women
Colorado	40.0	Washington	31.3
Vermont	37.8	Maryland	30.9
Arizona	34.4	Illinois	29.4
Hawaii	32.9	Connecticut	28.9
Minnesota	31.8	Nevada	28.6

MUNICIPAL OFFICIALS

As of August 2010, among the 100 largest cities in the U.S., 7 had women mayors. One is African American (Stephanie Rawlings-Blake, Baltimore). In order of city population,[1] the mayors are:

City	Mayor	Rank
Houston, TX	Annise D. Parker	5
Baltimore, MD	Stephanie Rawlings-Blake	21
Fresno, CA	Ashley Swearengin	40
Tampa, FL	Pam Iorio	59
Stockton, CA	Ann Johnston	73
Glendale, AZ	Elaine M. Scruggs	85
Chula Vista, CA	Cheryl Cox	94

As of August 2010, of the 249 mayors of U.S. cities with populations 100,000 and over, 33, or 13.3%, were women, including two African Americans, and one Asian/Pacific Islander. Of the 1156 mayors of U.S. cities with populations 30,000 and above, 202, or 17.5%, were women.[2]

PERCENTAGES OF WOMEN IN ELECTIVE OFFICES

Resolution Relating to Limiting Campaign Expenditures
SPONSOR STATEMENT

"A democracy cannot function effectively when its constituent members believe laws are being bought and sold."
– US Supreme Court Justice John Paul Stevens

Many Americans recognize that the ability of large contributions from corporations, wealthy individuals and organizations to political candidates harms the ability of citizens to have a voice in their own government. Prior to the landmark United States Supreme Court ruling of Citizens United v. Federal Election Commission, 130 S. Ct. 876 (2010), unlimited independent expenditures from corporations and unions was prohibited. Now, corporations and unions can make unlimited independent expenditures supporting or opposing a candidate for public office. This directly goes against the American idea of one person one vote, when one corporation can spend more than thousands.

This decision only made the cynicism most Americans feel about politics stronger. If people feel as if their vote does not matter, then voter participation will continue to decline.

The massive amount of money in politics following this decision is exploding the expense of campaigns, making it difficult for new or unknown candidates to enter a race. More and more, the money spent by corporations and unions is going to negative attacks ads that often misinform voters rather than promote productive discussion. Allowing unlimited campaign donations by corporations and unions takes the focus for candidates away from individual voters to those whose money can afford to sway hundreds of votes.

Unless the United States Supreme Court reverses these rulings, the only way to reverse the harmful effects of these decisions is to amend the Constitution of the United States. This resolution calls upon the Alaska State Legislature to urge the United States Congress and the President of the United States to work across party lines and propose a constitutional amendment to prohibit corporations, wealthy individuals and unions from making unlimited independent expenditure.

I ask that you support this resolution to support the democratic process and ensure that everyone has an equal voice in government.

SENATE JOINT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY SENATORS WIELECHOWSKI, French, Ellis, Egan, Paskvan

Introduced:
Referred:

A RESOLUTION

Urging the United States Congress and the President of the United States to work to amend the Constitution of the United States to prohibit corporations, unions, and individuals from making unlimited independent expenditures supporting or opposing candidates for public office.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS a vast majority of Americans recognize that the influence of large contributions by corporations, wealthy individuals, and organizations harms the ability of average citizens to have a voice in their own government; and

WHEREAS the narrow five to four decision of the United States Supreme Court in Citizens United v. Federal Election Commission, 130 S. Ct. 876 (2010), allows corporations and unions to make unlimited independent expenditures supporting or opposing a candidate for public office; and

WHEREAS unlimited independent expenditures from corporations and unions were prohibited until the ruling of the United States Supreme Court in Citizens United v. Federal Election Commission; and

WHEREAS much of the hundreds of millions of dollars being spent by corporations and unions since the ruling of the United States Supreme Court in Citizens United v. Federal Election Commission is going to negative ads, which often misinform voters rather than lead to a productive discussion of the states' and nation's most important issues; and

WHEREAS, unless the United States Supreme Court reverses its ruling, the only way to reverse the harmful effects of the Citizens United ruling is to amend the Constitution of the United States; and

WHEREAS, while not addressed by the United States Supreme Court's ruling in Citizens United, unlimited independent expenditures made by individuals also distort the political process and ability of all American citizens to have an equal voice in government;

BE IT RESOLVED that the Alaska State Legislature urges the United States Congress and the President of the United States to work across party lines to propose a constitutional amendment to prohibit corporations, unions, and individuals from making unlimited independent expenditures.

COPIES of this resolution shall be sent to the Honorable Barack Obama, President of the United States; the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress; all other members of the 112th United States Congress; and the presiding officers of the legislatures of each of the other 49 states.

SENATOR BILL WIELECHOWSKI

MEMORANDUM

DATE: 8 February 2012

TO: Senator Hollis French
Attn: Cindy Smith

FROM: Senator Bill Wielechowski

SUBJ: Hearing request for SJR13

Hi Cindy,

I am writing to request a hearing in the Senate Judiciary Committee for SJR13. SJR13 would resolve the Alaska State Legislature to urge the U.S. Congress and President to move to amend the Constitution of the United States to ban unlimited corporate, individual, and union expenditures supporting or opposing candidates for public office.

This resolution acknowledges the Citizens United ruling by the U.S. Supreme Court in 2010 and moves to restore integrity to political campaigns by keeping unchecked amounts of money out.

Included with this letter you will find:

1. Sponsor statement.
2. Current version of SJR13 and one previous version.
3. Back up material from the Center for Responsive Politics.
4. An Anchorage Daily News editorial in support of SJR13.

My legislative aide Thomas Presley is assigned to this legislation. His direct line is 465-6252. Thank you for your consideration of this request.

Sincerely,

Bill Wielechowski

Senator Bill Wielechowski

House State Affairs Committee

RE: House Joint Resolution 33

I am here today to represent Juneau's chapter of Move to Amend. Move to Amend has chapters all around the state in Anchorage, Kenai, Juneau, Prince of Wales, and Sitka as well as chapters around the Nation. Move to Amend's mission is to amend the US Constitution to limit the amount corporations can spend in our elections.

Right now, we live in a political climate where we are bombarded by endless commercials and advertisements either supporting one candidate or smearing another. After the Citizens United decision nearly $4 billion was spent during the 2010 Congressional Election. And, according to the Center for Responsive Politics, "in the Congressional races of 2010, the candidate who spent the most money won 85% of the House seats and 83% of the Senate." Citizen's United has given the politicians with the most corporate support an upper hand in our elections.

The US Government was designed to be "of the people, for the people, and by the people" and the election process is fundamental for achieving that goal. Not only can anyone vote, but anyone can run for office. But right now, the playing field is not even. Anyone can run, but without campaign finance limitations, not everyone has an equal opportunity to win. By allowing unlimited campaign contributions, the political system has essentially been rigged against hardworking Americans who can't afford to compete with for-profit corporations, unions, special interest groups, and wealthy individuals.

By passing this resolution, Alaska would be asserting itself as a state whose Representatives support fair campaigns and are dedicated to faithfully representing the average American.

Thank you for your time.

Outside Spending

Campaign contributions and lobbying expenditures are not the only ways that money is used influence public policy decisions.

Thus far, outside groups (parties, super PACs, corporations, unions, other groups, etc.) have spent **$55,573,113** during the 2012 election cycle to run ads, make phone calls, distribute literature and engage in other activities to sway the electorate about candidates and issues.

Organizations not directly affiliated with political parties accounted for **$51,794,091** of that amount, of which **$45,012,210** was spent by **305** super PACs.

A January 2010 Supreme Court decision (*Citizens United v. Federal Election Commission*) now permits corporations and unions to make such expenditures from their treasuries directly and through other organizations. The decision allows such activity to take place without complete or immediate disclosure of who funds such communications, preventing voters from understanding who is truly behind many political messages.

Our View: Leash the PAC spending beast

Alaska lawmakers right to call for limits on super PAC spending

It's only a resolution but it's a good one.

Sen. Bill Wielechowski has introduced a resolution in the Alaska Senate calling on Congress and the president to back a constitutional amendment that would ban unlimited contributions to third-party groups to support or oppose political candidates.

Rep. Les Gara has introduced a similar resolution in the House. Such an amendment requires a two-thirds vote of Congress and the support of three-fourths of the states. That's a long climb.

And it's an iffy proposition in the Alaska Legislature as well.

It's still a stand worth taking.

In 2010, the Alaska Legislature was swift to respond to the Supreme Court decision that granted personal free speech rights to corporations, unions and other organizations, essentially equating money with speech and allowing unlimited contributions to independent groups fighting for or against a candidate.

The court's decision was a classic example of abstract exercise and legal logic without regard to the reality of our political system.

The practical exercise of free speech in 21st century American political campaigns costs money. Lots of money. Giving corporations and unions free rein to spend as much as they can gives the well-heeled few an overwhelming advantage in electoral campaigns.

The restrictions are a joke. Corporate giving is restrained in that there can be no coordination with a candidate's campaign. Fact is, there doesn't need to be any direct contact to coordinate a campaign, for one side to skew a campaign, for one side to dominate the media and the message. And who believes there won't be contact? As fig leafs go, this one doesn't cover anything.

Had the Supreme Court set out to encourage corporate influence over the U.S. electoral process, they couldn't have done much better than their January 2010 ruling.

Obviously, political self-interest comes into play here. There was bipartisan support for disclosure in 2010, but limiting super PACs (PAC meaning political action committee) may help Democrats more than Republicans. So Alaska Republicans may hesitate to sign on. If Democrats gained by the court ruling, they might be the ones hesitating.

No one should hesitate. Alaska has had workable campaign contribution rules that allowed everyone -- corporations, unions, other organizations and individuals -- to support candidates and causes but within

limits that didn't allow moneyed interests too disproportionate an influence. Money still mattered but not enough to drown individual voices and arguments on the merits.

Equating money with speech has the practical effect of muting some speech while vastly amplifying other speech. And it's not an independent exercise of citizens' rights. It's a ticket for special interests to dominate campaigns and serve themselves.

Alaskans across the political spectrum should stand against that.

Special interests should have their shot; the founders counted on that. They just shouldn't have a bottomless ammo box.

BOTTOM LINE: Resolution against unlimited campaign spending is the right stand.

Alaska State Legislature

Senator Hollis French

SPONSOR STATEMENT

SJR 19 – Constitutional Amendment: Redistricting Board

Senate Joint Resolution 19 would amend Article VI, Section 8 of the Alaska Constitution, pertaining to the Redistricting Board. This constitutional amendment would transform both the selection process and the composition of the Redistricting Board. The current selection process has consistently resulted in redistricting plans that favor the political party in power at the time. This does Alaskans a disservice.

Instead of an appointed Redistricting Board, SJR 19 would implement a new process of board members being selected by lottery. It would also increase the number of members from five to fourteen. The Redistricting Board would have equal representation from all political parties, consisting of:

- Five who are registered with the largest political party in the state
- Five who are registered with the second largest political party in the state
- Four members who are not affiliated with either of the two largest political parties in the state

The members of the Board would be selected from a pool established by the Division of Elections. The pool of sixty registered voters would consist of fifteen from each of Alaska's four judicial districts. To qualify for the pool, the individual must have voted in the preceding four general elections in Alaska and must not have changed their political affiliation during that time. The pool would be made up of three subdivisions: one-third would be affiliated with the largest political party in the state based on registration, one-third would be affiliated with the second largest political party, and one-third would be unaffiliated with either of the two largest political parties.

From that pool of sixty, the Division of Elections would use a lottery system to select two board members from each judicial district. The eight members chosen by lottery will then select the remaining six members from the pool established in accordance with composition requirements.

The drawing of legislative district boundaries should be as non-partisan as possible. The composition of the Board is the key to this effort. SJR 19 would ensure that the members of the Redistricting Board draw fair, balanced district boundaries that best serve Alaskans.

BILL NO. SJR19

Analysis

Passage of this resolution would require the constitutional amendment to appear on the 2012 general election ballot. The cost of providing information about the constitutional amendment in the Official Election Pamphlet, as required by AS 15.58, is $1.5. Should the addition of this resolution require printing an 8-1/2 by 18 inch ballot, the cost will increase to $22.0.

CS HB 6 (JUD) amended in the House:
Removing a Regent
Sponsor Statement

This bill creates a statutory due process procedure under which the governor may suspend or remove a University of Alaska regent for good cause.

This bill is in response to a 2007 incident in which a regent was federally indicted on multiple counts of fraud. He refused to resign his position until impeachment proceedings began. The board of regents' by-laws do not set forth a procedure remove a regent. Legislative legal counsel has concluded that regents serve at the pleasure of the governor and thus can be removed. An informal attorney general's opinion states that the governor does not have the authority to remove a regent without cause (implying that he can do so with just cause). That AG opinion concluded that the governor does have the authority to remove a regent so long as cause is established and due process granted.

It should be noted that, during the Twenty-Fifth Legislature, letters were sent by the House Judiciary Committee to the Board of Regents asking that it, under the authority of AS 14.40.170(b)(1), adopt procedures for the suspension and removal of a regent. But the board has not done so.

It is important to acknowledge that the constitution does bear upon this bill due to the governor's powers being enumerated in Article III of the Alaska Constitution while the board of regents is established in Article VII, section 6. The Alaska Supreme Court has ruled that the UA is subject to a degree of legislative control. For example, the legislature can, without approval of the regents, dispose of UA land. Additionally, the legislature has, through law, provided the UA with a broad degree of autonomy, however this implies that the UA is still subject to laws enacted by the legislature. The legislature has been given broad authority under the constitution, indeed the only constitutional constraints on the power of the legislature to make laws regarding other agencies of the State of Alaska deal with the rules of court and the repeal of initiatives. In effect this legislation provides a check upon the powers of the university.

This bill will allow the suspension or removal of a regent for cause under a due process procedure. It will protect both the regent's interests and the university's interests.

House Bill 6:
Removing a Regent
Sectional Analysis for CS HB 6 (JUD) (27-LS0027\O)

Section 1[1] sets forth the legislative findings and purposes of the bill. The legislature finds that the framers of the Alaskan Constitution intended to insulate the University of Alaska from politics, that the legislature delegated the power of self-governance to the UA under AS 14.40.170(b), and that the legislature has the power to create laws that pertain to the university. The purposes of the bill are to clarify that the governor may only suspend or remove a regent with good cause and that the governor must afford a regent procedural due process. Finally, the legislative findings in this section affirm the insulation of the university and the board of regents from the executive and legislative branches and from politics in the suspension or removal of regents.

Section 2[2] adds a new section, AS 14.40.155, to AS 14.40, the chapter which governs the University of Alaska Board of Regents. AS 14.40.155 is patterned after statutory removal procedures for certain other boards, such as the Workers Compensation Appeals Commission. See AS 23.30.007(j).

AS 14.40.155(a) sets forth the procedure for the governor to suspend a regent. The governor must provide the regent with notice and an opportunity for a hearing.

AS 14.40.155(b) allows the governor to remove a regent for good cause by providing the regent with a charging document (an "accusation") and the opportunity for a hearing and for judicial review. Good cause is defined in subsection (g) to include a violation of the Executive Branch Ethics Act that results in a recommendation of removal, a conviction of a felony, conviction of a misdemeanor involving a crime of dishonesty or the University of Alaska, malfeasance or nonfeasance in office, or failure to continue to meet the qualification requirements of a regent.

AS 14.40.155(c) allows a regent to request, at any time, a hearing to either defend against a possible suspension, or lift a suspension once it has been imposed.

AS 14.40.155(d) permits the governor to delegate the conduct of the hearing to the Office of Administrative Hearings. The standard of proof to be used in the hearing for removal for "good

---

[1] Page 1, lines 5-14 through page 2, lines 1-11
[2] Page 2, lines 12-31 through page 4, lines1-3

cause" is "clear and convincing" evidence, one of the highest standards of proof that is required in civil suits.

AS 14.40.155(e) states that the Administrative Procedures Act (AS 44.62.330-44.62.630) applies to all of the proceedings of this section.

AS 14.40.155(f) requires the governor to file a copy of the accusation, the findings on each allegation in the accusation, and a complete record of the removal and/or suspension proceedings with the lieutenant governor.

Section 3[3] is an applicability clause that allows AS 14.40.155 to apply to conduct occurring before, on or after the effective date of the Act.

MEMORANDUM April 17, 2007

SUBJECT: Removal of a University Regent (HB 237)
(Work Order No. 25-LS0839\A)

TO: Representative Bob Lynn
Attn: Nancy Manly

FROM: Jean M. Mischel
Legislative Counsel

You asked whether the governor may remove a University regent. In my opinion, the answer is yes. In fact, the constitutional authority of the legislature to restrict or otherwise control the removal or suspension of a regent by the governor is the subject of considerable debate. Unlike boards and commissions controlled by art. III, sec. 26 of the constitution, nothing in art. VII, sec. 3, which establishes the Board of Regents, provides for legislative control over removal of the regents and therefore the governor's removal authority appears to be unrestricted.

Article VII, sec. 3 provides:

> The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session . . . .

A limitation on removal of some executive officers may be interposed by law, but arguably only as to persons who hold appointment under art. III, sec. 26 of the state constitution. Article III, sec. 26 states:

> When a board or commission is at the head of a principal department or a regulatory or quasi-judicial agency, its members shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, *and may be removed as provided by law* . . . .

Even with the additional legislative authority over sec. 26 boards, the Alaska Supreme Court interpreted that authority very narrowly. When the Court was faced with the question of the extent of legislative authority over sec. 26 boards and commissions, the Court found that the confirmation power of the legislature provided in art. III, secs. 25 (principal department heads) and 26, is merely a limited delegation of the executive appointment power to the legislature and stated:

> As to this issue, we think the provision of Sections 25 and 26 of Article III are clear and unambiguous. Thus, we conclude that Sections 25 and 26

> mark the full reach of the delegated, or shared, appointive function to Alaska's legislative branch of government. (Bradner v. Hammond, 553 P.2d 1, 7 (Alaska 1976))

The University's status as a "body corporate" does not imply a legislative role in removal of a regent (apart from the impeachment process available to the legislature as to all civil officers). Though the University, alone in the constitution, expressly holds corporate status, the Alaska Supreme Court has said that members of other public corporations established by law serve at the pleasure of the governor. (Walker v. Alaska State Mortgage Association, 416 P.2d 245 (Alaska 1966)) The Court stated:

> The Association's three board members from the Board of Commissioners of the Alaska Housing Authority are appointed by the governor and serve at his pleasure. Therefore, the governor is empowered to remove any member of the governing board of the Association at his pleasure.

Id. at 240 (citations omitted).

I am aware of a recent informal attorney general opinion that suggests in a footnote that the legislature has some authority over removal of a regent without any judicial support for that position. The addition of legislative control over suspension of a regent is even more questionable. I do not know how a court would view the kind of intrusion proposed in HB 237 into the governor's appointment and removal authority, but perhaps the court would be persuaded by the governor's support of this concept.

If I may be of further assistance, please advise.

MEMORANDUM

State of Alaska
Department of Law

To: Talis J. Colberg
Attorney General

Thru: Craig J. Tillery
Deputy Attorney General

From: Michael A. Barnhill
Assistant Attorney General
Labor and State Affairs Section

Date: February 2, 2007

File No: 663-06-0103

Tel. No.: (907) 465-3600

Fax: (907) 465-2520

Subject: Governor's Power to Remove a University of Alaska Regent

We have been asked whether the Governor has the power to remove a University of Alaska regent without cause. In our view, the answer is no.

We acknowledge that this question has been posed to different counsel and different conclusions reached. Legislative counsel has concluded in a written opinion that regents serve at the pleasure of the governor and may be removed at any time. University of Alaska counsel has concluded in a verbal opinion that a regent may be removed only through impeachment by the legislature.

For the reasons set forth below, we do not fully agree with the conclusions of either legislative counsel or university counsel. That being said, we do agree with both legislative counsel and university counsel that impeachment is an option that may be pursued in order to remove a regent. But we disagree with university counsel that it is the only option.

The basis for our views is grounded primarily in the constitution and discussions of the framers regarding the University of Alaska during the constitutional convention. We start there.

I. Historical Background

The University of Alaska was created by the territorial legislature in 1935. ch. 49, SLA 1935. The Board of Regents was created at that time as well, with the governor empowered to appoint regents subject to confirmation by a joint session of the legislature. *Id.* at sec. 3. The term of a regent was eight years and a regent was to serve "until their successors are appointed and have qualified." *Id.* The original statute made no mention

of how a regent should be removed. This law has essentially remained unchanged through today, though the number of regents was increased to eleven in 1975. *See* AS 14.40.120; 14.40.140; AS 14.40.150.

From the University's inception through statehood we are aware of no instance of a governor removing a regent prior to the end of a regent's term. We recognize that it is possible such could have happened, but it would take further historical research to determine this.

The constitutional convention considered the University of Alaska several times during the course of the convention. Before considering these passages, however, it is important to understand that the territory of Alaska had suffered from a fragmented executive branch with several elected officials and multiple governing boards designed to erode the power of the federally appointed governor. A fundamental goal of the convention was to establish a strong governor who was completely in control of the executive branch of government.[1]

During the consideration of the executive branch article, however, concerns were raised regarding the appropriate place for the University of Alaska within the constitutional design for the new government. These concerns were often expressed in terms of the need to insulate education from politics. Alaska Constitutional Convention Proceedings at 2043, 2246. During the discussions of the provisions that ultimately

---

[1] Delegate Fischer later wrote, "[Territorial] government was neither responsible nor responsive to the people. As a result, convention delegates were ready to make basic structural changes so the people could hold the governor wholly responsible for the conduct of state administration." V. Fischer, Alaska's Constitutional Convention at 106 (1975).

became sections 25 and 26 of Article III,[2] questions were raised concerning the extent to which these sections governed appointments to the Board of Regents. The chair of the Executive Branch Committee, Victor Rivers, and a member of that Committee, Katherine Nordale, both responded that section 26 of Article III only applied to "principal departments" and that the University of Alaska was not a principal department. Alaska Constitutional Convention Proceedings at 2034, 2037, 2246. Therefore, in their mind, the University of Alaska did not fall under section 26 of Article III.

Other delegates, however, remained concerned that in order to insulate the University from politics it needed to be made explicit that the University was not subject to section 26 of Article III. In particular, certain delegates were concerned that if section 26 did apply to the University, that the Board of Regents' appointment of a president would be subject to approval by the governor. Accordingly, these delegates sought to amend section 26 to state that the provision did not apply to the University of Alaska. Alaska Constitutional Convention Proceedings at 2245-2258. Ultimately, these attempts failed because the members of the Executive Branch committee persuaded the convention that section 26 simply did not apply to the University of Alaska. Alaska Constitutional Convention Proceedings at 2246, 2257. Moreover, several delegates noted that a separate article was being drafted to govern the University of Alaska. *Id.* at 2247-48, 2250, 2255.

During the debate, some delegates expressed observations as to the status of the University. The chair of the Executive Committee, Victor Rivers, stated that the Executive Branch article would have no impact on the University:

---

[2] Section 25. Department Heads. The head of each principal department shall be a single executive unless otherwise provided by law. He shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, and shall serve at the pleasure of the governor, except as otherwise provided in this article with respect to the secretary of state.

Section 26. Boards and Commissions. When a board or commission is at the head of a principal department or a regulatory or quasi-judicial agency, its members shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, and may be removed as provided by law. They shall be citizens of the United States. The board or commission may appoint a principal executive officer when authorized by law, but the appointment shall be subject to the approval of the governor.

> Walsh: May I ask a question, Mr. Rivers? I think to clarify in the minds of several people here it might be well for me, that [as] one of those serving on the Board of Regents of the University of Alaska, composed of eight members, and the Board of Regents select the President of the University. The governor, as I understand it, does not have the power of the removal of the president of the University. It is a matter for the Board. Would this situation change that, Mr. Rivers?
>
> Rivers: No, in regard to the University, this would not affect their present setup. They are a private corporation, or rather a nonprofit corporation, and under the specific law providing for their make-up, and you would still have a board of regents appointed by the governor and confirmed by the legislature, and the powers as you now have them would be identical to what they now are as I visualize them.

Id. at 2033-34. Delegate Taylor stated that the "University is not a part of the Territorial government whatsoever; it is an independent agency." *Id.* at 2253. Notably, Delegate Nordale expressed the view that by explicitly putting the University in a separate article it would "make it very clear that it can never be dissolved and that it is not part of the executive branch of government." *Id.* at 2256.

Later in the convention, the Executive Branch committee proposed language regarding the University. Chair Rivers introduced the language as follows:

> Mr. President, you have heard the reading of this article and it was considered important that in the constitution there be included an article of this type. It gives the University, as a corporate body, the authority to receive and hold property which will be granted to them under the enabling act. It also gives them the authority for administering and disposing of that according to law. It sets up the board of regents and the governing body of the University, and I think the main point of this article has is that constitutionally the University of Alaska shall be the only state university in Alaska.

Id. at 2792. Perhaps notably, the Executive Branch committee saw fit to clear the language of the proposed article with the President of the University prior to bringing it to the floor of the convention.[3] *Id.*

II. Analysis

With this summary of the constitutional history of the University in mind, we think it is fair to draw the following conclusions. First, the convention intended to create a very strong governor with full appointive power. Second, despite the strong governor model, the convention nevertheless intended to insulate the University from politics, including the governor. Third, the convention intended that the University would not be subject to section 26 of Article III of the Alaska Constitution. Fourth, the convention intended to constitutionalize the existence of the University. Finally, some members of the convention believed that the University resided outside the executive branch of government in 1955 and that the constitution preserved that status.[4]

Nowhere in the convention minutes is there any discussion regarding removal of a regent.[5] But the above conclusions are sufficient to give us pause that the governor's power to remove certain executive branch appointees without cause extends to the University Board of Regents. This view is consistent with the views previously expressed by this office. In 1979, we opined:

> Under the state constitution, the University of Alaska is 'governed' by the Board of Regents. Alaska Const., art. VII, § 3. The regents are appointed by the governor, subject to confirmation by the legislature. Id. They serve for terms of eight years. Thus, while the regents are appointed by and are responsible to the governor, they do not serve at his pleasure but rather for fixed terms, and they may, therefore, be

---

[3] In other words, it is doubtful that President Patty, the University president at the time, would have approved this language if he thought it allowed the governor to remove a regent without cause.

[4] By observing this latter point, we do not conclude that in fact the convention succeeded in fully removing the University from the executive branch.

[5] Though at one point, Chair Rivers states that "[t]he law could provide no doubt for means of removal . . ." *Id.* at 2255-56. He appears to be referring to the chief executive of the University, not the regents, however.

> removed from office solely for cause. 67 C.J.S. Officers § 120 (1978); 63 Am. Jur.2d Public Officers and Employees § 189 (1972). As a result, the governor's supervision over the university is made distinctly indirect. Unless the members of the Board of Regents commit acts of malfeasance, misfeasance, or nonfeasance sufficient to constitute cause for their removal, the governor possesses no check upon them and no power to direct their activities.

1979 Inf. Op. Att'y Gen. 1 (Jan. 23; J-66-103-79). We have reiterated this view over the years[6] and see no reason to stray from it today.

For the reasons expressed above, the University is accorded unique constitutional status. We must be mindful of these reasons when considering the applicability of Alaska Supreme Court precedents. A number of these cases have been cited by other counsel, but we doubt that a court would find them controlling on the issue of whether the governor may remove a regent without cause. For instance, *Walker v. Alaska State Mortgage Assoc.*, 416 P.2d 245 (Alaska 1966) does not involve the University of Alaska, but rather pertains to a board of a public corporation that does not have a unique constitutional status. The cases involving the University do not have issues that directly implicate the political independence of the University, one of the reasons for the University's unique constitutional status. *See, e.g., University of Alaska v. Nat'l Aircraft Leasing,* 536 P.2d 121 (Alaska 1975) (University is instrumentality of state for purposes of sovereign immunity); *McGrath v. University of Alaska,* 813 P.2d 1370 (Alaska 1991) (legislature may subject University to Administrative Procedures Act). Instead, we think a court if faced with the issue of whether the governor may remove a regent without cause would be more likely to focus on the constitutional history of the University set forth above.

Finally, legislative counsel contends that under AS 39.05.060(d) regents serve at the pleasure of the governor and may be removed at any time. This interpretation is at odds with the express intention of the constitutional convention that the University be insulated from politics. Moreover, review of the fairly lengthy legislative history of this statute demonstrates that the legislature never intended AS 39.05.060(d) to reach the

---

[6] In 1998, an assistant attorney general stated that, "Regents are considered to be sort of in a class by themselves. We've always advised the governor that it's inadvisable to remove the regents at a change of an administration. Legal complications may ensue." 1998 Anchorage Daily News (quoting AAG James Baldwin).

Board of Regents. This statute was originally enacted as part of the State Organization Act of 1959, under which the executive branch of the new State of Alaska was formed. *See* ch. 64, SLA 1959. The University of Alaska is not within the scope of this Act—it was not mentioned in the Act and was left out of the organization of the executive branch accomplished by this Act. *Id.* When initially enacted, AS 39.05.060 only referred to boards that were explicitly mentioned in the State Organization Act of 1959. While the scope of AS 39.05.060 has both expanded and contracted over the years, it has never been broadened to include the Board of Regents.[7]

In summary, we conclude that the Governor may only remove a regent if cause is established, preferably at a hearing prior to removal. We would be happy to address in another memo the evidence necessary to establish cause, and the criteria for an appropriate hearing process.

MAB:ajh

---

[7] We note, however, that it may be possible for the legislature to provide for removal of a regent through enactment of a statute consistent with the constitution. Such a statute would have to preserve the University's politically independent constitutional status and probably could only provide for removal if it were for some cause that was established at a hearing prior to removal.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB006

Analysis

This bill authorizes the Governor to remove a member of the University of Alaska Board of Regents for good cause and establishes procedures for removal. The procedures include an opportunity for a hearing. Under section 2, the hearing function could be delegated by the Governor to the Office of Administrative Hearings (OAH). Removals likely would be infrequent. OAH, therefore, does not anticipate that this bill would result in an appreciable increase in caseload and expects to be able to provide any hearing related services required with existing authorized personnel. The cost to OAH of performing the services would be recovered from the Office of the Governor through interagency receipts, based on the time commitment required for hearings.

SENATE CS FOR CS FOR HOUSE BILL NO. 6(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES GRUENBERG, Peggy Wilson, Lynn, Gardner

A BILL

FOR AN ACT ENTITLED

"An Act authorizing the governor to remove or suspend a member of the Board of Regents of the University of Alaska for good cause; and establishing a procedure for the removal or suspension of a regent."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS AND PURPOSES. (a) The legislature finds that

(1) the framers of the Constitution of the State of Alaska intended to insulate the University of Alaska and the Board of Regents from politics, but did not intend to immunize the University of Alaska and the Board of Regents from appropriate nonpolitical legislative and executive branch oversight;

(2) the legislature has the power to pass laws that pertain to the University of Alaska; and

(3) under AS 14.40.170(b)(1), the legislature has delegated to the Board of

Regents the power to "adopt reasonable rules, orders, and plans with reasonable penalties for the good government of the university and for the regulation of the Board of Regents"; however, it is not clear that the Board of Regents has the constitutional authority to suspend or remove an officer who has been appointed by the governor and confirmed by the legislature.

(b) The purposes of AS 14.40.155, added by sec. 2 of this Act, are to

(1) clarify that the governor may remove a regent only for good cause;

(2) prescribe a due process procedure under which the governor may remove a regent for good cause;

(3) prescribe a due process procedure under which, in certain circumstances, the governor may suspend a regent; and

(4) accomplish each of the above purposes in a manner that ensures the University of Alaska and the Board of Regents remain insulated from politics.

*** Sec. 2.** AS 14.40 is amended by adding a new section to read:

Sec. 14.40.155. Suspension and removal of regents. (a) The governor may, after providing notice and an opportunity for a hearing, suspend a member of the Board of Regents while a final disposition is pending on

(1) a criminal complaint, presentment, information, or indictment involving a felony in any jurisdiction;

(2) an information or formal criminal charges of a misdemeanor described under (g)(3) of this section;

(3) a probable cause determination of a knowing ethics violation under AS 39.52 that results in an accusation under consideration before the personnel board;

(4) a written complaint under consideration before the governor, signed under oath by the person making the complaint, that alleges malfeasance or nonfeasance in office as described in (g)(4) of this section, if the governor determines, after an investigation, that there is probable cause to believe that malfeasance or nonfeasance in office has occurred; a determination of probable cause under this paragraph

(A) must specify with particularity the factual basis for the determination;

(B) must include objective evidence of substantial and material

malfeasance or nonfeasance; and

(C) may not be based on political differences or the discretionary performance of a lawful act or a prescribed duty; or

(5) a formal allegation or charge by a professional or occupational licensing body alleging or finding a violation of licensing statutes or regulations that is related to the regent's ability or fitness to serve as a regent.

(b) The governor may remove a member of the Board of Regents for good cause by providing to the member an accusation and an opportunity for a hearing and judicial review.

(c) Notwithstanding the procedure under AS 44.62.390, a regent who has been suspended under (a) of this section may, at any time, request a hearing to

(1) defend against the grounds for the suspension stated in the accusation; or

(2) lift the suspension.

(d) If a hearing is to be held under this section, the governor shall delegate the conduct of the hearing to the office of administrative hearings under AS 44.64.030(b). If a hearing is requested, the hearing officer shall prepare a proposed decision under AS 44.62.500(b)

(1) to remove a regent based on clear and convincing evidence of good cause for removal;

(2) not to remove a regent; or

(3) to continue a suspension or lift a suspension of a regent.

(e) AS 44.62.330 - 44.62.630 apply to all proceedings under this section.

(f) After a final decision by the governor that suspends a regent under (a) of this section or removes a regent for good cause under (b) of this section, the governor shall file with the lieutenant governor a copy of the allegations made against the former regent, the governor's findings on each of the allegations, and a complete record of the suspension or removal proceedings.

(g) In this section, "good cause" means

(1) a violation of AS 39.52 (Alaska Executive Branch Ethics Act) that results in a recommendation of removal under AS 39.52.410(b)(3);

(2) a conviction of a felony in any jurisdiction;

(3) a conviction of a misdemeanor in any jurisdiction if the misdemeanor involves

(A) dishonesty;

(B) breach of trust; or

(C) the University of Alaska;

(4) substantial and material malfeasance or nonfeasance in office that is not based on political differences or the discretionary performance of a lawful act or prescribed duty; in this paragraph "malfeasance or nonfeasance in office" includes

(A) misconduct in office;

(B) an inability to serve for an extended period of time;

(C) neglect of duty;

(D) incompetence;

(E) unjustified failure to perform the duties of the Board of Regents;

(5) a violation of a professional or occupational licensing statute or regulation that is related to the regent's fitness to serve as a regent, resulting in the revocation or suspension of a professional or occupational license issued under state law; or

(6) a failure to possess the qualifications of a regent under AS 14.40.130.

*** Sec. 3.** AS 44.64.030(a) is amended to read:

(a) The office shall conduct all adjudicative administrative hearings required under the following statutes or under regulations adopted to implement the statutes:

(1) AS 04.11.510(b)(1) and (c) (alcoholic beverages license);

(2) AS 05.15 (charitable gaming);

(3) AS 05.20 (recreational devices);

(4) AS 05.90.001 (special racing events);

(5) AS 06 (banks, financial institutions, and fund claims), except as provided otherwise by AS 06.60.590;

(6) AS 08 (occupational licensing), other than AS 08.08,

AS 08.18.125, and AS 08.62.046;

(7) AS 10.06 (Alaska Corporations Code);

(8) AS 10.13 (Alaska BIDCO Act);

(9) AS 10.25.375 (Electric and Telephone Cooperative Act);

(10) AS 10.50.408 (limited liability companies);

(11) AS 14.11.016 (education-related facility grants);

(12) AS 14.18 (discrimination in public education);

(13) AS 14.25.006 (teachers' retirement system);

(14) AS 14.25.175 (waiver of adjustments under teachers' defined benefit plan);

(15) AS 14.40.155 (suspension and removal of regents);

(16) [(15)] AS 14.48 (postsecondary educational institutions);

(17) [(16)] AS 17.20 (Alaska Food, Drug, and Cosmetic Act), other than AS 17.20.060 and 17.20.360;

(18) [(17)] AS 21.09, AS 21.22.190, AS 21.27, except under AS 21.27.420(d), AS 21.34, AS 21.36, AS 21.69, AS 21.86.200, AS 21.87, and AS 21.96 (insurance);

(19) [(18)] AS 25.27 (child support services);

(20) [(19)] AS 32.06 (Uniform Partnership Act);

(21) [(20)] AS 34.45 (unclaimed property);

(22) [(21)] AS 34.55.024 and 34.55.026 (Uniform Land Sales Practices Act);

(23) [(22)] AS 36.30 (State Procurement Code), other than AS 36.30.627(a)(2);

(24) [(23)] AS 38.05.065 (contracts for sale of state land);

(25) [(24)] AS 39.30.165 (supplemental benefits system);

(26) [(25)] AS 39.30.335 (teachers' and public employees' health reimbursement arrangement plan);

(27) [(26)] AS 39.35.006 (public employees' retirement system);

(28) [(27)] AS 39.35.522 (waiver of adjustments under public employees' defined benefit plan);

(29) [(28)] AS 39.45.055 (public employees' deferred compensation program);

(30) [(29)] AS 39.52 (Alaska Executive Branch Ethics Act);

(31) [(30)] AS 43.23 (permanent fund dividends);

MEMORANDUM March 29, 2012

SUBJECT: Retroactivity questions (SCS CSHB 6( )
(Work Order No. 27-LS0027\G))

TO: Representative Max Gruenberg
Attn: Ted Madsen

FROM: Jean M. Mischel
Legislative Counsel

As I understand your question, you have asked about the effect of removing the applicability provision in sec. 4 of the above-referenced draft in its entirety. That section provides for the applicability of AS 14.40.155, added by sec. 2 of the bill, to conduct or acts occurring before, on, or after the effective date of the Act. AS 01.10.090 provides that "no statute is retrospective unless expressly declared therein." Removal of sec. 4, then, would result in the prospective application only of sec. 2 of the Act. Even without removing sec. 4, however, I do not know whether a court would uphold a retroactive application of the good cause definition, particularly as it relates to past criminal convictions of a sitting regent. At this time during session, I am unable to fully analyze that question, although the Department of Law may have an opinion as the language originated there.

If I may be of further assistance, please advise.

MEMORANDUM March 29, 2012

SUBJECT: Retroactive applicability (Amendment to SCS CSHB 6( )
(Work Order No. 27-LS0027\G.1))

TO: Senator John Coghill
Attn: Karen Lidster

FROM: Jean M. Mischel
Legislative Counsel

You have asked about the legal implications of removing the retroactive applicability language in the above-referenced bill and replacing it with "on-going effect" language. Section 4 of the bill currently provides that the suspension and removal of a regent provisions added by sec. 2 of the bill apply to "all conduct and acts occurring *before*, on, or after the effective date of" the Act. In my opinion, removal of the retroactive effect and inclusion of specific language that clarifies the applicability of the Act to conduct that has a continuing effect on or after the effective date of the Act, eliminates a risk of violating due process and *ex post facto* protections in the constitution, particularly with respect to the effect of prior convictions.

The issue is, however, complicated by (1) the nature of the Act as it applies to removal of a regent that may not, under certain circumstances, affect constitutional rights of a regent, and (2) unresolved questions about the current ability of the governor to remove a regent so that the Act may be interpreted as having no significant effect on the existing rights of a regent.[1] In fact, one could argue that HB 6 provides more, not less, legal protection over a regent's appointment. At this point in the session, I am unable to provide a thorough legal review of these and related questions. If a court does find that due process and *ex post facto* considerations apply to an appointment of a regent and that HB 6 represents a change in the law that in some way limits the rights of a regent, then the

---

[1] In section 1 of the bill at page 1, lines 9 - 11, the legislature finds that the framers of the constitution "did not intend to immunize the University of Alaska and the Board of Regents from appropriate nonpolitical legislative and executive branch oversight", and at page 2, lines 2 -3 concedes that "it is not clear that the Board of Regents has the constitutional authority to suspend or remove an officer who has been appointed by the governor and confirmed by the legislature." The purpose of the bill as provided at page 2, line 6 is to "clarify that the governor may remove a regent only for good cause", not to change the law with respect to a regent's appointment or removal.

general rule of retroactivity applies (as discussed below) and clarifying the applicability provision may be warranted.

Article 1, section 15, Constitution of the State of Alaska provides that "no law impairing the obligation of contracts shall be passed." Courts have compared this to the prohibition of *ex post facto* criminal laws. Under AS 01.10.090 no statute is retrospective unless expressly declared in the statute. Even when the legislature attempts to provide for express retroactive application of a new statute, as in HB 6, courts have sometimes invalidated the provision on constitutional grounds. Courts have also implied retroactivity when no express provision exists.

The Alaska Supreme Court has previously held that a civil statute will be considered retroactive if it "gives to pre-enactment conduct a different legal effect from that which it would have had without the passage of the statute." *Eastwind, et. al. v. State of Alaska*, 951 P.3d 844, 848 (Alaska 1997). The rationale for the prohibition on *ex post facto* criminal laws is obvious: the avoidance of additional penalties that were unanticipated at the time of a criminal conviction. The Alaska Supreme Court has explained the rationale for limitations on retroactivity for civil laws as follows:

> the reason for the statutory presumption against retrospective legislation is that people in conducting their business should be able to rely on existing laws with reasonable certainty.

Id. at 847 (Alaska 1997) (citations omitted).

In *Catholic Bishop of Northern Alaska v. John Does,* 141 P.3d 719 (Alaska 2006), the Alaska Supreme Court had the opportunity to compare legislative intent to apply both criminal and civil statutory amendments retroactively. In that case, the legislature had been advised by legal counsel that retroactive application of the criminal law to revive time barred claims would violate constitutional prohibitions on passing *ex post facto* laws. The court viewed the legislative history and, on the basis of a lack of similar discussion and express intent to allow a revival of previously time barred civil claims, the court refused to apply the new law retroactively in the criminal or civil context.

A simple analysis of amendment G.1 under the general rule leads to the conclusion that removal of the express retroactivity provision and inclusion of the continuing effect requirement for actions makes the statute apply prospectively only. On the other hand, due process and fairness considerations may have defeated the retroactive application of the arguably new standards set out in HB 6 for removal even without amendment G.1. If, however, a court found that the standards did not in fact change the legal rights of a regent, the express retroactive application in HB 6 may have been upheld by a court, at least in the civil context. The amendment changes the effect of HB 6 so that it may not be applied to prior conduct unless the conduct has a continuing effect after the effective date of the Act. The problem, however, is in defining precise circumstances in which conduct has a continuing effect, particularly with respect to prior convictions or license

revocations. I have attempted to avoid any due process and *ex post facto* issues by describing a continuing effect for those purposes. I trust that I have captured your intent in that regard.

If I may be of further assistance, please advise.

House Bill 6:
Removing a Regent
Explanation of changes between
CS for HB 6 (27-LS0027\O.A) to SCS for CS for HB 6 ( ) (27-LS0027\G)

At the suggestion of the Board of Regents, several changes have been incorporated into the "G" version.

Section 1: (a)(3) has been changed to state that it is not clear whether the Board of Regents has the constitutional authority to suspend or remove a regent. There was also one grammatical change to (b)(1) changing "with" to "for."

Section 2: (a) contains a minor grammatical change.

Section 2: (a)(3) contains a minor grammatical change.

Section 2: (a)(4) has been changed to make the suspension procedure, in the case of a complaint of malfeasance or nonfeasance in office, more rigorous. The "G" version now requires: (1) a sworn complaint, (2) the governor must investigate the allegations, and then (3) find "probable cause" to proceed further. "Probable cause" is defined to require a statement of the specific factual bases for the allegations plus objective evidence of substantial and material malfeasance or nonfeasance. The new language will also prohibit proceedings based on political differences or the discretionary performance of a lawful act or a prescribed duty. This paragraph also contains a few minor grammatical changes.

Section 2: (a)(5) was changed to require a formal allegation or charge by a licensing board to proceed under this provision, AS 14.40.155(a)(5).

Section 2: (d) was changed to require that, if a hearing is to be held, the Office of Administrative Hearings conduct it. The hearing officer will be required to issue a decision.

Section 2: (g)(4) was changed to make the removal procedure, in the case of malfeasance and nonfeasance in office, more rigorous. The new language will also prohibit removals based on political differences or the discretionary performance of a lawful act or a prescribed duty.

Section 2: (g)(5) was changed to clarify that a violation of a professional or occupational licensing statute or regulation that results in the revocation or suspension of a professional or occupational licensing statute be found to suspend or remove a regent under this provision, AS 14.40.155(g)(5).

Section 2: (g) also contains a few minor grammatical changes.

Section 3 was added to include these hearings to the list of hearings conducted by the Office of Administrative Hearings.

A BILL

FOR AN ACT ENTITLED

"An Act authorizing the governor to remove or suspend a member of the Board of Regents of the University of Alaska for good cause; and establishing a procedure for the removal or suspension of a regent."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS AND PURPOSES. (a) The legislature finds that

(1) the framers of the Constitution of the State of Alaska intended to insulate the University of Alaska and the Board of Regents from politics, but did not intend to immunize the University of Alaska and the Board of Regents from appropriate nonpolitical legislative and executive branch oversight;

(2) the legislature has the power to pass laws that pertain to the University of Alaska; and

(3) under AS 14.40.170(b)(1), the legislature has delegated to the Board of

Regents the power to "adopt reasonable rules, orders, and plans with reasonable penalties for the good government of the university and for the regulation of the Board of Regents"; however, it is not clear that the Board of Regents has the constitutional authority to suspend or remove an officer who has been appointed by the governor and confirmed by the legislature.

(b) The purposes of AS 14.40.155, added by sec. 2 of this Act, are to

(1) clarify that the governor may remove a regent only for good cause;

(2) prescribe a due process procedure under which the governor may remove a regent for good cause;

(3) prescribe a due process procedure under which, in certain circumstances, the governor may suspend a regent; and

(4) accomplish each of the above purposes in a manner that ensures the University of Alaska and the Board of Regents remain insulated from politics.

*** Sec. 2.** AS 14.40 is amended by adding a new section to read:

Sec. 14.40.155. Suspension and removal of regents. (a) The governor may, after providing notice and an opportunity for a hearing, suspend a member of the Board of Regents while a final disposition is pending on

(1) a criminal complaint, presentment, information, or indictment involving a felony in any jurisdiction;

(2) an information or formal criminal charges of a misdemeanor described under (g)(3) of this section;

(3) a probable cause determination of a knowing ethics violation under AS 39.52 that results in an accusation under consideration before the personnel board;

(4) a written complaint under consideration before the governor, signed under oath by the person making the complaint, that alleges malfeasance or nonfeasance in office as described in (g)(4) of this section, if the governor determines, after an investigation, that there is probable cause to believe that malfeasance or nonfeasance in office has occurred; a determination of probable cause under this paragraph

(A) must specify with particularity the factual basis for the determination;

(B) must include objective evidence of substantial and material

malfeasance or nonfeasance; and

(C) may not be based on political differences or the discretionary performance of a lawful act or a prescribed duty; or

(5) a formal allegation or charge by a professional or occupational licensing body alleging or finding a violation of licensing statutes or regulations that is related to the regent's ability or fitness to serve as a regent.

(b) The governor may remove a member of the Board of Regents for good cause by providing to the member an accusation and an opportunity for a hearing and judicial review.

(c) Notwithstanding the procedure under AS 44.62.390, a regent who has been suspended under (a) of this section may, at any time, request a hearing to

(1) defend against the grounds for the suspension stated in the accusation; or

(2) lift the suspension.

(d) If a hearing is to be held under this section, the governor shall delegate the conduct of the hearing to the office of administrative hearings under AS 44.64.030(b). If a hearing is requested, the hearing officer shall prepare a proposed decision under AS 44.62.500(b)

(1) to remove a regent based on clear and convincing evidence of good cause for removal;

(2) not to remove a regent; or

(3) to continue a suspension or lift a suspension of a regent.

(e) AS 44.62.330 - 44.62.630 apply to all proceedings under this section.

(f) After a final decision by the governor that suspends a regent under (a) of this section or removes a regent for good cause under (b) of this section, the governor shall file with the lieutenant governor a copy of the allegations made against the former regent, the governor's findings on each of the allegations, and a complete record of the suspension or removal proceedings.

(g) In this section, "good cause" means

(1) a violation of AS 39.52 (Alaska Executive Branch Ethics Act) that results in a recommendation of removal under AS 39.52.410(b)(3);

(2) a conviction of a felony in any jurisdiction;

(3) a conviction of a misdemeanor in any jurisdiction if the misdemeanor involves

(A) dishonesty;

(B) breach of trust; or

(C) the University of Alaska;

(4) substantial and material malfeasance or nonfeasance in office that is not based on political differences or the discretionary performance of a lawful act or prescribed duty; in this paragraph "malfeasance or nonfeasance in office" includes

(A) misconduct in office;

(B) an inability to serve for an extended period of time;

(C) neglect of duty;

(D) incompetence;

(E) unjustified failure to perform the duties of the Board of Regents;

(5) a violation of a professional or occupational licensing statute or regulation that is related to the regent's fitness to serve as a regent, resulting in the revocation or suspension of a professional or occupational license issued under state law; or

(6) a failure to possess the qualifications of a regent under AS 14.40.130.

* **Sec. 3.** AS 44.64.030(a) is amended to read:

(a) The office shall conduct all adjudicative administrative hearings required under the following statutes or under regulations adopted to implement the statutes:

(1) AS 04.11.510(b)(1) and (c) (alcoholic beverages license);

(2) AS 05.15 (charitable gaming);

(3) AS 05.20 (recreational devices);

(4) AS 05.90.001 (special racing events);

(5) AS 06 (banks, financial institutions, and fund claims), except as provided otherwise by AS 06.60.590;

(6) AS 08 (occupational licensing), other than AS 08.08,

AS 08.18.125, and AS 08.62.046;

(7) AS 10.06 (Alaska Corporations Code);

(8) AS 10.13 (Alaska BIDCO Act);

(9) AS 10.25.375 (Electric and Telephone Cooperative Act);

(10) AS 10.50.408 (limited liability companies);

(11) AS 14.11.016 (education-related facility grants);

(12) AS 14.18 (discrimination in public education);

(13) AS 14.25.006 (teachers' retirement system);

(14) AS 14.25.175 (waiver of adjustments under teachers' defined benefit plan);

(15) AS 14.40.155 (suspension and removal of regents);

(16) [(15)] AS 14.48 (postsecondary educational institutions);

(17) [(16)] AS 17.20 (Alaska Food, Drug, and Cosmetic Act), other than AS 17.20.060 and 17.20.360;

(18) [(17)] AS 21.09, AS 21.22.190, AS 21.27, except under AS 21.27.420(d), AS 21.34, AS 21.36, AS 21.69, AS 21.86.200, AS 21.87, and AS 21.96 (insurance);

(19) [(18)] AS 25.27 (child support services);

(20) [(19)] AS 32.06 (Uniform Partnership Act);

(21) [(20)] AS 34.45 (unclaimed property);

(22) [(21)] AS 34.55.024 and 34.55.026 (Uniform Land Sales Practices Act);

(23) [(22)] AS 36.30 (State Procurement Code), other than AS 36.30.627(a)(2);

(24) [(23)] AS 38.05.065 (contracts for sale of state land);

(25) [(24)] AS 39.30.165 (supplemental benefits system);

(26) [(25)] AS 39.30.335 (teachers' and public employees' health reimbursement arrangement plan);

(27) [(26)] AS 39.35.006 (public employees' retirement system);

(28) [(27)] AS 39.35.522 (waiver of adjustments under public employees' defined benefit plan);

(29) [(28)] AS 39.45.055 (public employees' deferred compensation program);

(30) [(29)] AS 39.52 (Alaska Executive Branch Ethics Act);

(31) [(30)] AS 43.23 (permanent fund dividends);

(32) [(31)] AS 43.70 (Alaska Business License Act);

(33) [(32)] AS 44.50 (notaries public);

(34) [(33)] AS 44.77 (claims against the state);

(35) [(34)] AS 45.48.080(c) (breach of security involving personal information);

(36) [(35)] AS 45.30.040 (mobile homes);

(37) [(36)] AS 45.55 (Alaska Securities Act);

(38) [(37)] AS 45.57 (Takeover Bid Disclosure Act);

(39) [(38)] AS 46 (water, air, energy, and environmental conservation), other than AS 46.03.820, 46.03.850, AS 46.39, and AS 46.40;

(40) [(39)] AS 47.32 (licensing by the Department of Health and Social Services);

(41) [(40)] AS 47.45 (longevity bonuses).

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. AS 14.40.155, added by sec. 2 of this Act, applies to all conduct and acts occurring before, on, or after the effective date of this Act.

House Bill 6:
Removing a Regent
Explanation of changes between
CS for HB 6 (27-LS0027\O.A) to SCS for CS for HB 6 ( ) (27-LS0027\L)

At the suggestion of the Board of Regents several changes have been incorporated into the "L" version.

Section 1 (a)(3) has been changed to state that it is not clear whether the Board of Regents has the constitutional authority to suspend or remove a regent.

Section 2 (a)(4) has been changed to make the suspension procedure, in the case of a complaint of malfeasance or nonfeasance in office, more rigorous. The "L" version new requires: (1) a sworn complaint, (2) the governor must investigate the allegations, and then (3) find "probable cause" to proceed further. "Probable cause" is defined to require a statement of the specific factual bases for the allegations plus objective evidence of substantial and material malfeasance or nonfeasance. The new language will also prohibit proceedings based on political differences or the discretionary performance of a lawful act or a prescribed duty.

Section 2 (a)(5) was changed to require a formal allegation or charge by a licensing board to proceed under this provision, AS 14.40.155(a)(5).

Section 2 (d) was changed to require that, if a hearing is to be held, the Office of Administrative Hearings conduct it.

Section (g)(5) was changed to clarify that a violation of a professional or occupational licensing statute or regulation that results in the revocation or suspension of a professional or occupational licensing statute be found to suspend or remove a regent under this provision, AS 14.40.155(g)(5).

Section 2 (g) also contains a few minor grammatical changes.

Section 3 was added to include these hearings to the list of hearings conducted by the Office of Administrative Hearings.

(1) the framers of the Constitution of the State of Alaska intended to insulate the University of Alaska and the Board of Regents from politics, but did not intend to immunize the University of Alaska and the Board of Regents from appropriate nonpolitical legislative and executive branch oversight;

(2) the legislature has the power to pass laws that pertain to the University of Alaska; and

(3) under AS 14.40.170(b)(1), the legislature has delegated to the Board of

Regents the power to "adopt reasonable rules, orders, and plans with reasonable penalties for the good government of the university and for the regulation of the Board of Regents"; however, it is not clear that the Board of Regents has the constitutional authority to suspend or remove an officer who has been appointed by the governor and confirmed by the legislature.

(b) The purposes of AS 14.40.155, added by sec. 2 of this Act, are to

(1) clarify that the governor may remove a regent only with good cause;

(2) prescribe a due process procedure under which the governor may remove a regent for good cause;

(3) prescribe a due process procedure under which, in certain circumstances, the governor may suspend a regent; and

(4) accomplish each of the above purposes in a manner that ensures the University of Alaska and the Board of Regents remain insulated from politics.

*** Sec. 2.** AS 14.40 is amended by adding a new section to read:

Sec. 14.40.155. Suspension and removal of regents. (a) The governor may, after providing notice and an opportunity for a hearing, suspend a member of the Board of Regents while final disposition is pending on

(1) a criminal complaint, presentment, information, or indictment involving a felony in any jurisdiction;

(2) an information or formal criminal charges of a misdemeanor described under (g)(3) of this section;

(3) a probable cause determination of a knowing ethics violation under AS 39.52 that results in an accusation under consideration by the personnel board;

(4) a written complaint under consideration by the governor, signed under oath by the person making the complaint, that alleges malfeasance or nonfeasance in office described under (g)(4) of this section, if the governor determines, after investigation, that there is probable cause to believe that malfeasance or nonfeasance in office has occurred; a determination of probable cause under this paragraph

(A) must specify with particularity the factual basis for the determination;

(B) must include objective evidence of substantial and material

malfeasance or nonfeasance; and

(C) may not be based on political differences or discretionary performance of a lawful act or prescribed duty; or

(5) a formal allegation or charge by a professional or occupational licensing body alleging or finding a violation of licensing statutes or regulations that is related to the regent's ability or fitness to serve as a regent.

(b) The governor may remove a member of the Board of Regents for good cause by providing to the member an accusation and an opportunity for a hearing and judicial review.

(c) Notwithstanding the procedure under AS 44.62.390, a regent who has been suspended under (a) of this section may, at any time, request a hearing to

(1) defend against the grounds for the suspension stated in the accusation; or

(2) lift the suspension.

(d) If a hearing is to be held under this section, the governor shall delegate the conduct of the hearing to the office of administrative hearings under AS 44.64.030(b). If a hearing is requested, the hearing officer may prepare a proposed decision under AS 44.62.500(b)

(1) to remove a regent based on clear and convincing evidence of good cause for removal;

(2) not to remove a regent; or

(3) to continue a suspension or lift a suspension of a regent.

(e) AS 44.62.330 - 44.62.630 apply to all proceedings under this section.

(f) After a final decision by the governor that suspends a regent under (a) of this section or removes a regent for good cause under (b) of this section, the governor shall file with the lieutenant governor a copy of the allegations made against the former regent, the governor's findings on each of the allegations, and a complete record of the suspension or removal proceedings.

(g) In this section, "good cause" means

(1) a violation of AS 39.52 (Alaska Executive Branch Ethics Act) that results in a recommendation of removal under AS 39.52.410(b)(3);

(2) a conviction of a felony in any jurisdiction;

(3) a conviction of a misdemeanor in any jurisdiction if the misdemeanor involves

(A) dishonesty;

(B) breach of trust; or

(C) the University of Alaska;

(4) malfeasance or nonfeasance in office, including

(A) misconduct in office;

(B) an inability to serve for an extended period of time;

(C) neglect of duty;

(D) incompetence;

(E) unjustified failure to perform the duties of the Board of Regents;

(5) a violation of a professional or occupational licensing statute or regulation that is related to the regent's fitness to serve as a regent, resulting in the revocation or suspension of a professional or occupational license issued under state law; or

(6) a failure to possess the qualifications of a regent under AS 14.40.130.

*** Sec. 3.** AS 44.64.030(a) is amended to read:

(a) The office shall conduct all adjudicative administrative hearings required under the following statutes or under regulations adopted to implement the statutes:

(1) AS 04.11.510(b)(1) and (c) (alcoholic beverages license);

(2) AS 05.15 (charitable gaming);

(3) AS 05.20 (recreational devices);

(4) AS 05.90.001 (special racing events);

(5) AS 06 (banks, financial institutions, and fund claims), except as provided otherwise by AS 06.60.590;

(6) AS 08 (occupational licensing), other than AS 08.08, AS 08.18.125, and AS 08.62.046;

(7) AS 10.06 (Alaska Corporations Code);

(8) AS 10.13 (Alaska BIDCO Act);

(9) AS 10.25.375 (Electric and Telephone Cooperative Act);

(10) AS 10.50.408 (limited liability companies);

(11) AS 14.11.016 (education-related facility grants);

(12) AS 14.18 (discrimination in public education);

(13) AS 14.25.006 (teachers' retirement system);

(14) AS 14.25.175 (waiver of adjustments under teachers' defined benefit plan);

(15) AS 14.40.155 (suspension and removal of regents);

(16) [(15)] AS 14.48 (postsecondary educational institutions);

(17) [(16)] AS 17.20 (Alaska Food, Drug, and Cosmetic Act), other than AS 17.20.060 and 17.20.360;

(18) [(17)] AS 21.09, AS 21.22.190, AS 21.27, except under AS 21.27.420(d), AS 21.34, AS 21.36, AS 21.69, AS 21.86.200, AS 21.87, and AS 21.96 (insurance);

(19) [(18)] AS 25.27 (child support services);

(20) [(19)] AS 32.06 (Uniform Partnership Act);

(21) [(20)] AS 34.45 (unclaimed property);

(22) [(21)] AS 34.55.024 and 34.55.026 (Uniform Land Sales Practices Act);

(23) [(22)] AS 36.30 (State Procurement Code), other than AS 36.30.627(a)(2);

(24) [(23)] AS 38.05.065 (contracts for sale of state land);

(25) [(24)] AS 39.30.165 (supplemental benefits system);

(26) [(25)] AS 39.30.335 (teachers' and public employees' health reimbursement arrangement plan);

(27) [(26)] AS 39.35.006 (public employees' retirement system);

(28) [(27)] AS 39.35.522 (waiver of adjustments under public employees' defined benefit plan);

(29) [(28)] AS 39.45.055 (public employees' deferred compensation program);

(30) [(29)] AS 39.52 (Alaska Executive Branch Ethics Act);

(31) [(30)] AS 43.23 (permanent fund dividends);

(32) [(31)] AS 43.70 (Alaska Business License Act);

(33) [(32)] AS 44.50 (notaries public);

(34) [(33)] AS 44.77 (claims against the state);

(35) [(34)] AS 45.48.080(c) (breach of security involving personal information);

(36) [(35)] AS 45.30.040 (mobile homes);

(37) [(36)] AS 45.55 (Alaska Securities Act);

(38) [(37)] AS 45.57 (Takeover Bid Disclosure Act);

(39) [(38)] AS 46 (water, air, energy, and environmental conservation), other than AS 46.03.820, 46.03.850, AS 46.39, and AS 46.40;

(40) [(39)] AS 47.32 (licensing by the Department of Health and Social Services);

(41) [(40)] AS 47.45 (longevity bonuses).

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. AS 14.40.155, added by sec. 2 of this Act, applies to all conduct and acts occurring before, on, or after the effective date of this Act.

The Honorable Representative Max Gruenberg
The Honorable Senator Hollis French

Re: House Bill 6 – Suspension or Removal of a Regent for Good Cause

Dear Representative Gruenberg & Senator French:

I am writing to express the Board of Regents' appreciation for the careful consideration you have given to HB 6. Circumstances warranting the removal of a regent have arisen rarely in the long history of the University. However, the present members of the Board of Regents and administration of the University of Alaska share your concern that the University and State of Alaska not have to face another such situation without a clear path to resolution.

At the same time, the Board has two major concerns regarding HB 6:

1. An administrative suspension or removal is likely to result in prolonged and expensive legal challenges by the affected regent.[1] Such challenges may disrupt and call into question the validity of board action; and
2. An administrative removal provision that may be initiated by one person, required only to sign a complaint, is much more likely to be used and thus may be subject to abuse through frivolous or politically motivated complaints. That problem is exacerbated if the grounds for removal include subjective grounds, e.g., "neglect of duty," "incompetence," "unjustified failure to perform . . . duties . . ."[2]

These concerns are not theoretical. The University recently took advantage of historically low interest rates to refinance existing bonds, saving the University and the state millions of dollars over the life of the bonds. Each time bonds are issued the University is required to certify that ***there is no litigation potentially affecting the validity of the board's action***. An accused regent who refuses to step aside, despite an objective reason to do so, is entirely likely to take action to tie the board and University in knots while he seeks injunctions & files appeals to keep his seat. This litigation would involve at least the board and the governor, and potentially the new regent, and would result in significant costs and disruption.

At the same time, regents who are wrongly accused under proposed AS 14.40.155(a)(4) or (g)(4) may be forced to resign or seek defense & indemnity from the University rather than

---

[1] Article VII, Section 3 of the Constitution providing for appointment of regents does not provide for removal of regents "in accordance with law." By contrast, that authority was explicitly granted the governor for Executive Branch boards and commissions by Article III, Section 26. That difference, as well as constitutional proceedings indicating an intent to insulate the board from political interference, will provide a suspended or removed regent with a basis for a challenge to administrative removal that courts cannot readily dismiss.

[2] See proposed AS 14.40.155(a)(4) and (g)(4).

incur the expense of defending against subjective or frivolous charges. Regents occasionally take actions that are unpopular with students and parents, such as raising tuition or fees, discontinuing a little used program, or with single individuals, such as terminating a problematic professor, etc. A regent appointed by one governor may become a political nuisance to a successor. It is important to note that regents serve as volunteers, and are in no position to incur the expense of defending frivolous charges. While a court may eventually establish that there were no grounds for suspension, in the interim an effective and appropriate regent may have been forced to resign and/or the validity of board action needlessly called into question.

An impeachment hearing is an unfortunate and unlikely scenario. However, it has the advantage of being completely legally defensible if it comes to pass. On March 9, 2012, the Board of Regents adopted Bylaw 20, attached. That bylaw creates a process that confronts a regent who has engaged in alleged misconduct with investigation and, in the worst case scenario, a public referral for possible impeachment. The Board believes this is an appropriate intermediate step that avoids the legal questions and potential disruptions that may result if the Legislature cedes its authority over regent removal to the governor.

At the same time, the Board recognizes that it is within the province of the Legislature to pass laws it deems appropriate. If you determine to advance HB 6, the Board of Regents respectfully requests that you consider the following amendments for the stated reasons:

- The Board does have statutory authority to regulate its internal operations as a "Board." However, the board does not believe it has or should have the legal authority to remove or suspend regents, in contravention of appointments made by the governor and approved by the legislature. The Board of Regents asks that you substitute the following for the language at Page 1, Section 1, Line 14
    - Alternative language: *(3) "under AS 14.40.170(b)(1), the legislature has delegated to the Board of Regents the power to 'adopt reasonable rules, orders and plans with reasonable penalties for the good government of the university and for the regulation of the Board of Regents, however, it is not clear that the Board has the constitutional authority to suspend or remove an officer who has been appointed by the governor and confirmed by the legislature."*

- The allegations that would form the basis for suspension or removal under AS 14.40.155(a)(4) or (g)(4) are subjective. Some are also duplicative of other processes or ambiguous. The Board of Regents asks that you change the following language to provide for a probable cause standard for suspension, to require objective evidence and prohibit findings based on political differences.
    - Alternative language at Page 2, Section 2, Line 22: *(4) a written complaint under consideration by the governor, signed under oath by the person making the complaint, that alleges malfeasance or nonfeasance in office described under (g)(4) of this section, if the governor determines, after investigation, that there is probable cause to believe that such malfeasance or nonfeasance*

in office has occurred. A finding of probable cause shall specify with particularity the factual basis for the finding, shall include objective evidence of substantial and material malfeasance or nonfeasance, and shall not be based on political differences or discretionary performance of a lawful act or prescribed duty; or

- Alternative language at Page 3, Section 2, Line 26: *(4) malfeasance or nonfeasance in office, including the following, but provided that a finding of good cause under this section shall require substantial and material malfeasance or nonfeasance, and shall not be based on political differences or discretionary performance of a lawful act or prescribed duty*

- The Board of Regents asks that you tighten the language at Page 2, Section 2, Line 24, and page 4, line 2. As written these bases for suspension or removal require only "proceedings," do not require that the alleged misconduct involve a matter that is properly before the licensing body, and do not require a formal allegation or charge.
  - Alternative language: *(5) A formal allegation or charge by a professional or occupational licensing body, alleging or finding a violation of the relevant licensing statutes or regulations that is related to the regent's ability or fitness to serve as a regent*;

Thank you again for your thoughtful consideration of this matter. Please do not hesitate to let me know if you have questions or concerns.

Sincerely,

Patricia A Jacobson

UNIVERSITY OF ALASKA BOARD OF REGENTS

RESOLUTION REGARDING REFERRAL FOR POSSIBLE IMPEACHMENT

WHEREAS Article VII, Section 3 of the Alaska Constitution creates the Board of Regents and provides for appointment of regents by the governor, subject to confirmation by a majority of the members of the legislature; and

WHEREAS Article II, Section 20 authorizes impeachment and removal from office of all civil officers, including members of the Board of Regents; and

WHEREAS the proceedings of the constitutional convention make clear that the framers intended to insulate the University of Alaska and the Board of Regents from politics, including action by the governor; and

WHEREAS those same proceedings and the Alaska Supreme Court have made clear that the university is not a principal department of the executive branch, and thus is not subject to Article III, Section 26 which authorizes removal of members of certain executive branch boards or commissions "as provided by law;" and

WHEREAS Article VII, Section 3 of the Alaska Constitution does not provide for removal of regents by the governor or in accordance with law, as is the case with a board or commission at the head of a principle department in the executive branch;

WHEREAS the Board of Regents lacks the constitutional authority to remove regents who have been duly appointed by the governor and approved by the legislature; and

WHEREAS suspension or removal of a regent by means other than those specified in the constitution is likely to lead to legal challenges by the affected and any newly appointed member, disruption of the board and legal uncertainty for the university;

NOW THEREFORE the Board of Regents adopts Bylaw 20 to provide for referral of regents for possible impeachment

BE IT FURTHER RESOLVED that this resolution be conveyed to The Alaska State Legislature, with a copy to be incorporated into the official minutes of the March 9, 2012 meeting of the Board of Regents.

University of Alaska Statewide System
Bylaws of the Board of Regents

BL20. Referral of a Regent for Possible Impeachment

A. Upon a simple majority vote of the whole board finding that it is in the best interests of the university to do so, the board may refer a regent to the senate with a recommendation that the senate consider impeachment of the regent.

B. Grounds for referral may include:

1. A criminal complaint, presentment, information, indictment or conviction involving a felony in any jurisdiction;

2. An information, formal criminal charges or conviction of a misdemeanor involving dishonesty, breach of trust, or the University of Alaska;

3. A probable cause determination of a knowing ethics violation under AS 39.52 that results in an accusation under consideration by the personnel board, or a recommendation of removal from office under AS 39.52.410(b)(3);

4. Circumstances indicating: conduct that necessarily brings the university into disrepute; material, repeated and documented neglect of duty; or a regent's inability to serve for an extended period;

5. Judicial proceedings involving or an adjudication of incompetence;

6. A formal allegation or charge, or a final decision, by a professional or occupational licensing body, alleging or finding a violation of the relevant licensing statutes or regulations that is related to the regent's ability or fitness to serve as a regent; or

7. Failure to possess the qualifications of a regent under AS 14.40.130.

C. The following process shall be followed in considering a motion to refer for possible impeachment. Consistent with AS 44.62.310(d)(5), the Open Meetings Act does not apply and all meetings regarding a possible referral shall be conducted in executive session. The process shall maintain confidentiality consistent with the circumstances and the requirements of the review:

1. Any member may request an executive session to discuss appointment of a review committee;

2. The board may consider a motion to appoint a review committee. If a simple majority of the whole board approves the motion:

a. The chair shall appoint a review committee of not less than three members and provide written notice to the affected member of the makeup of the committee and the stated grounds for possible referral;

b. The review committee shall gather information relevant to the stated grounds for referral, offer the affected member an opportunity to comment on the information gathered, and make a written report of its review, findings and recommendation to the secretary of the board. The report shall be confidential unless a referral for impeachment is made, at which point any further release shall be made in accordance with this bylaw and applicable law. The secretary shall immediately distribute the report to all members of the board, including the affected member.

3. The chair shall schedule a meeting to consider the report, to occur at least 14 calendar days after distribution. The board shall consider information the affected member provides in response to the report that is relevant to the issue of referral and consistent with the question before the board.

4. The board shall consider whether it is in the best interests of the university to refer the affected member for possible impeachment.

   a. In accordance with AS 39.52.120(a)(4), *Roberts Rules of Order* and this bylaw, the affected member may not participate in the vote, but is considered an active member for purposes of the required majority.

5. If the motion passes by the required majority the secretary immediately shall transmit the motion, the report and any written response or materials provided by the affected member to the president of the senate.

   a. The board shall reconvene in public session and the motion shall be entered in the official minutes of the board.

RE: Changes to Senate CS for CS HB 7 (JUD)

The Senate Judiciary Committee changed the penalties relating to the possession of organic herbs that contain synthetic cannabinoids.

1) Possession of 12 grams or more of organic herbs that contain synthetic cannabinoids as a misconduct in the fourth degree (Class C felony).

2) Possession of 6-12 grams of organic herbs that contain synthetic cannabinoids as a misconduct in the fifth degree (Class A misdemeanor).

3) Possession of 6 grams and under of organic herbs that contain synthetic cannabinoids as a misconduct in the sixth degree (Class B misdemeanor).

Other penalties relating to the selling and manufacturing of the synthetic cannabinoids, which are listed as a scheduled IIIA controlled substance, remain unchanged. The pure liquid form of these synthetic cannabinoids remains a class C felony for possession of 3 grams or more, a class A misdemeanor for under 3 grams.

An effective of July 1, 2011 was added to give adequate notice to the public and store owners who are selling these materials.

A title change has been done to reflect to the two changes.

A BILL

FOR AN ACT ENTITLED

"An Act classifying certain substances as schedule IIIA controlled substances and relating to penalties for possession of those substances; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.71.040(a) is amended to read:

(a) Except as authorized in AS 17.30, a person commits the crime of misconduct involving a controlled substance in the fourth degree if the person

(1) manufactures or delivers any amount of a schedule IVA or VA controlled substance or possesses any amount of a schedule IVA or VA controlled substance with intent to manufacture or deliver;

(2) manufactures or delivers, or possesses with the intent to manufacture or deliver, one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a schedule VIA controlled substance;

(3) possesses

(A) any amount of a schedule IA or IIA controlled substance;

(B) 25 or more tablets, ampules, or syrettes containing a schedule IIIA or IVA controlled substance;

(C) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(i) three grams or more containing a schedule IIIA or IVA controlled substance **except a controlled substance in a form listed in (ii) of this subparagraph;**

(ii) 12 grams or more containing a schedule IIIA controlled substance listed in AS 11.71.160(f)(7) - (16) that has been sprayed on or otherwise applied to tobacco, an herb, or another organic material;

(D) 50 or more tablets, ampules, or syrettes containing a schedule VA controlled substance;

(E) one or more preparations, compounds, mixtures, or substances of an aggregate weight of six grams or more containing a schedule VA controlled substance;

(F) one or more preparations, compounds, mixtures, or substances of an aggregate weight of four ounces or more containing a schedule VIA controlled substance; or

(G) 25 or more plants of the genus cannabis;

(4) possesses a schedule IIIA, IVA, VA, or VIA controlled substance

(A) with reckless disregard that the possession occurs

(i) on or within 500 feet of school grounds; or

(ii) at or within 500 feet of a recreation or youth center; or

(B) on a school bus;

(5) knowingly keeps or maintains any store, shop, warehouse, dwelling, building, vehicle, boat, aircraft, or other structure or place that is used for keeping or distributing controlled substances in violation of a felony offense under this

chapter or AS 17.30;

(6) makes, delivers, or possesses a punch, die, plate, stone, or other thing that prints, imprints, or reproduces a trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of these upon a drug, drug container, or labeling so as to render the drug a counterfeit substance;

(7) knowingly uses in the course of the manufacture or distribution of a controlled substance a registration number that is fictitious, revoked, suspended, or issued to another person;

(8) knowingly furnishes false or fraudulent information in or omits material information from any application, report, record, or other document required to be kept or filed under AS 17.30;

(9) obtains possession of a controlled substance by misrepresentation, fraud, forgery, deception, or subterfuge; or

(10) affixes a false or forged label to a package or other container containing any controlled substance.

*** Sec. 2.** AS 11.71.050(a) is amended to read:

(a) Except as authorized in AS 17.30, a person commits the crime of misconduct involving a controlled substance in the fifth degree if the person

(1) manufactures or delivers, or possesses with the intent to manufacture or deliver, one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than one ounce containing a schedule VIA controlled substance;

(2) possesses

(A) less than 25 tablets, ampules, or syrettes containing a schedule IIIA or IVA controlled substance;

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than

(i) three grams containing a schedule IIIA or IVA controlled substance **except a controlled substance in a form listed in (ii) of this subparagraph;**

(ii) 12 grams but more than six grams containing a

schedule IIIA controlled substance listed in AS 11.71.160(f)(7) - (16) that has been sprayed on or otherwise applied to tobacco, an herb, or another organic material;

(C) less than 50 tablets, ampules, or syrettes containing a schedule VA controlled substance;

(D) one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than six grams containing a schedule VA controlled substance; or

(E) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a schedule VIA controlled substance; or

(3) fails to make, keep, or furnish any record, notification, order form, statement, invoice, or information required under AS 17.30.

*** Sec. 3.** AS 11.71.060(a) is amended to read:

(a) Except as authorized in AS 17.30, a person commits the crime of misconduct involving a controlled substance in the sixth degree if the person

(1) uses or displays any amount of a schedule VIA controlled substance;

(2) possesses one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(A) less than one ounce containing a schedule VIA controlled substance;

(B) six grams or less containing a schedule IIIA controlled substance listed in AS 11.71.160(f)(7) - (16) that has been sprayed on or otherwise applied to tobacco, an herb, or another organic material; or

(3) refuses entry into a premise for an inspection authorized under AS 17.30.

*** Sec. 4.** AS 11.71.160(f) is amended to read:

(f) Schedule IIIA includes**, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation that contains any quantity of the following substances or that contains any of its salts, isomers,**

whether optical, position, or geometric, or salts of isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation:

(1) hashish;

(2) hash oil or hashish oil;

(3) tetrahydrocannabinols;

(4) parahexyl;

(5) dronabinol (synthetic) in sesame oil and encapsulated in a soft gelatin capsule in a U.S. Food and Drug Administration approved drug product; [AND]

(6) nabilone**;**

(7) (6aR,10aR)-9-(hydroxymethyl)-6,6-dimethyl-3-(2-methyloctan-2-yl)-6a,7,10,10a-tetrahydrobenzo[c]chromen-1-ol, also known as HU-210;

(8) (6aS,10aS)-9-(hydroxymethyl)-6,6-dimethyl-3-(2-methyloctan-2-yl)-6a,7,10,10a-tetrahydrobenzo[c]chromen-1-ol, also known as Dexanabinol or HU-211;

(9) 1-pentyl-3-(1-naphthoyl)indole, also known as JWH-018;

(10) 1-Butyl-3-(1-naphthoyl)indole, also known as JWH-073;

(11) (2-methyl-1-propyl-1H-indol-3-yl)-1-naphthalenyl-methanone, also known as JWH-015;

(12) 1-pentyl-3-(4-chloro-1-naphthoyl)indole, also known as JWH-398;

(13) 1-pentyl-3-(2-methoxyphenylacetyl)indole, also known as JWH-250;

(14) 1-hexyl-3-(1-naphthoyl)indole, also known as JWH-019;

(15) 1-(2-(4-(morpholinyl)ethyl))-3-(1-naphthoyl)indole, also known as JWH-200;

(16) 2-[(1R,3S)-3-hydroxycyclohexyl]-5-(2-methyloctan-2-yl)phenol, also known as CP 47, 497, and its dimethyloctyl (C8) homologue; in this paragraph, "homologue" means a chemical compound in a series in which each compound differs by one or more alkyl functional groups on an alkyl side

chain.

SENATE CONCURRENT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Introduced:
Referred:

A RESOLUTION

Suspending Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, concerning House Bill No. 7, relating to classifying certain substances as schedule IIIA controlled substances.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

That under Rule 54, Uniform Rules of the Alaska State Legislature, the provisions of Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, regarding changes to the title of a bill, are suspended in consideration of House Bill No. 7, relating to classifying certain substances as schedule IIIA controlled substances.

ALASKA
PRIMARY CARE ASSOCIATION

The Honorable Representative Muñoz
Alaska State House
State Capitol, Room 403
Juneau, Alaska 99801

Re: Support for HB 7 Synthetic Cannabinoids

March 7, 2011

Dear Representative Muñoz,

The Alaska Primary Care Association (APCA) supports passage of HB 7 Synthetic Cannabinoids. Although the substances addressed in the bill present tremendous public safety risks and dangers, the APCA also wants to point out that these substances cause serious health risks and dangers. Impacting the cardiovascular and central nervous systems, the use of these substances often requires medical attention, and too often emergency room and hospitalizations.

To promote improved health outcomes for Alaska and to bring down health care costs, it is important for Alaska to take steps to alert the public that these substances are harmful and to prevent them from being readily available. Passage of HB 7 will do both. The primary care centers operated by the members of the APCA often treat patients with substance abuse problems and are daily faced with the associated challenges in assisting these patients, including uncompensated costs for clinic care and wait lists for drug treatment programs. Less access to harmful substances will help.

The APCA represents 25 health care organizations operating 142 Community Health Center (CHC) clinic sites, as well as other primary care safety net providers throughout Alaska that serve medically underserved populations and communities. The CHCs provided primary care services to 87,000 patients (1 in 9 Alaskans) last year.

In closing, the Alaska Primary Care Association strongly supports HB 7 and encourages the Alaska State Legislature to pass this important bill to not only promote public safety, but to promote a healthier Alaska.

Respectfully,

Shelley S. Hughes
Government Affairs Director

March 1, 2011

The Honorable Hollis French
Alaska State Senate
State Capitol, Room 417
Juneau, Alaska 99801

Dear Senator French:

Today you received a letter from the Department of Corrections in response to questions raised during a Senate Judiciary Committee hearing on SB 17. We would like to provide you with more detailed information in response to the committee's inquiry on the number of inmates incarcerated in the State of Alaska for drug charges and to those incarcerated on charges specific to marijuana.

As of December 31, 2010:

- Total inmate population was 5,604
- 2.7% of all unique inmates had at least one of their convictions involve marijuana.
- Of all drug-related convictions, 14.7% involved marijuana.
- 63 unique offenders have been convicted on drug related charges only.
- 1 (one) unique offender has been convicted on marijuana-related charges only
- 1 other offender has been convicted of marijuana and some other drug offense only. In other words, this person has been convicted of only drug related offenses, one of which was for a marijuana related offense.

It is our hope that the committee finds this additional information helpful. Please feel free to contact my office at any time if you need further information or have questions.

Sincerely,

Joseph Schmidt
Commissioner

Drafted by: J.W. Hartle

ORDINANCE OF THE CITY AND BOROUGH OF JUNEAU, ALASKA

Serial No. 2011-05

An Ordinance Amending the Penal Code to Prohibit the Manufacture, Assembly, Distribution, Marketing, Sale, Use, or Possession of Substances Containing Synthetic Cannabinoids, and Providing for a Penalty.

WHEREAS, the City and Borough is aware that substances containing synthetic cannabinoids were and are manufactured, or assembled for, or marketed, sold or offered for sale to, residents of the municipality, including minors; and

WHEREAS, local law enforcement personnel and "first responders" indicate there is an increased use of synthetic cannabinoids, currently marketed and sold under a variety of names, including "K2", "Spice", "Black Mamba", "Blue Pearl", "Genie", "DaScents", "Spike", and "Zohai"; and

WHEREAS, some users of the synthetic cannabinoids endanger the public by operating vehicles while under the influence and endanger the welfare of first responders; and

WHEREAS, some users reportedly experience severe reactions, resulting in unconsciousness, seizures, and hospitalization; and

WHEREAS, users of the drug report the effects are similar to marijuana and LSD usage, include blurred vision, extremely elevated blood pressure, irregular heart rates, hallucinations, delusions, vomiting, euphoria, "highs", and disturbing side effects including feelings of excruciating pain, agitation and loss of control; and

WHEREAS, products containing synthetic cannabinoids are not tested by the Food and Drug Administration (U.S. Department of Agriculture) or other governmental regulatory agencies for human consumption and may contain chemicals detrimental to the health and welfare of those ingesting them; and

WHEREAS, medical studies and treatises note deleterious health risks and adverse effects associated with the use of synthetic cannabinoids and products containing the synthetic cannabinoids; and

WHEREAS, despite packaging warning purchasers the products are not for human consumption, the warnings are not being heeded; and

WHEREAS, synthetic cannabinoids are banned in many states and municipalities throughout the United States as a danger to public health and welfare; and

WHEREAS, the smoke emanating from the burning or incineration of synthetic cannabinoids may cause adverse effects on bystanders or those in the vicinity of such activity; and

WHEREAS, it is in the best interest of the City and Borough to prohibit the manufacturing, assembly, possession, use, sale, marketing, or offering for sale of synthetic cannabinoids within the boundaries of the City and Borough to protect the health, safety and welfare of its citizens.

NOW, THEREFORE, BE IT ENACTED BY THE ASSEMBLY OF THE CITY AND BOROUGH OF JUNEAU, ALASKA:

Section 1. Classification. This ordinance is of a general and permanent nature and shall become a part of the City and Borough Code.

Section 2. New Chapter. CBJ Title 42 Penal Code, is amended by adding a new chapter, to read as follows:

Chapter 42.35

SYNTHETIC CANNABINOIDS

42.35.100 Sale of synthetic cannabinoids.

(a) It shall be unlawful for any person or entity to knowingly manufacture, assemble, distribute, dispense, sell, attempt to sell, give, trade, barter, transfer, or to otherwise furnish in a single transaction any product or combination of products containing synthetic cannabinoids, such as products commonly known as "K2", "Spice", "Genie", "DaScents", "Zohai" or similar products. Synthetic cannabinoids contain one or more of the following chemical compounds:

(1) HU-210: (6aR, 1OaR)-9-(hydroxymehty1)-6,6 dimethyl-3-(2methyloctan-2-yl)-6a,7,10,10a-tetrahydrobenzo[c]chromen-1-o1, or 6aR-trans-3-(1,1-Dimethylheptyl)-6a,7,10,10a-tetrahydro-1-hydroxy-6,6-dimethyl-6H-dibenzo[b,d]pran-9-methanol;

(2) HU-211: (6aS, 10aS)-9- (hydroxmethy1)-6,6-dimethyl-3-(2-methyloctan-2-y1)-6a,7,10,10a-tetsahydrobenzo[c]chromen-1-ol)(also known as Dexanabinol);

(3) CP47,497 and homologues: 2-[(lR,3S)-3-hydroxycyclohexyl]-5-(2-methyloctan-2-y1)phenol;

(4) JWH-018: 1-Pentyl-3-(1-naphthoyl)indole;

(5) JWH-019: 1-Hexyl-1-(1-naphthoyl)indole);

(6) JWH-073: 1-Butyl-3-(1-napthoyl)indole;

(7) JWH-081: 1-pentyl-3-(4-methoxy-1-napthoyl)indole, (also known as 4-methoxynapthalen-1-yl-(1-pehtylindol-3-yl)methanon);

(8) JWH-200: 1-[2-(4-morpholinyl)ethyl]-3-(1-naphthoyl)indole;

(9) JWH-250: 1-pentyl-3-(2-methoxyphenlacetyl)indole, (also known as 2-(2-methoxypehyl)-1-(1-pentylindol-3-yl)ethonone;

(10) JWH-398: 1-Pentyl-3-(4-chloro-1-napthoyl)indole);

(11) TEMPP: 1-(3 trifluoromethylphenyl) piperazine;

(12) BZP: N-benzylpiperazine; or

(13) Any other synthetic cannabinoids or derivatives, salts, isomers, or salts of isomers with similar chemical structure and pharmacological activity as the substances described above.

(14) This prohibition shall also apply to any other equivalent compound, substance, or derivative, whether described as tobacco, herbs, incense, food, nutrient, spice or any blend thereof which, when smoked or ingested, mimics the effects of a controlled substance, regardless of whether the substance is marketed for the purpose of being smoked or ingested.

(b) It shall be unlawful for any person or entity to recklessly manufacture, assembly, distribute, sell, market, display for sale, or offer for sale within the City and Borough products containing synthetic cannabinoids described in subsection (a).

(c) Products containing synthetic cannabinoids may not be possessed, ingested, burned, incinerated or ignited in the City and Borough.

(d) A person or entity violating the provisions of subsections (a) shall be guilty of a Class A misdemeanor. A person or entity violating the provisions of subsection (b) shall be guilty of a Class B misdemeanor. A person or entity violating the provisions of subsection (c) shall be guilty of an infraction.

(e) If, after multiple violations by the same person or entity, the City Attorney and the Juneau Police Department determine the imposition of criminal penalties or civil fines will not be effective in enforcing this section, the City Attorney may seek any other remedies provided by law, including injunctive relief.

(f) It is not an offense under this section if the person or entity was acting at the direction of an authorized agent of the City and Borough to enforce or ensure compliance with this section.

(g) Any product described in subsection (a) found in the illegal possession of any person or entity may be confiscated and destroyed by the City and Borough.

(h) This section does not apply to drugs or substances lawfully prescribed or drugs or substances approved by the federal Food and Drug Administration or drugs or substances specifically permitted by State law.

Section 3. Amendment to Section. CBJ 03.30.065 Penal code fine schedule, is amended to read:

03.30.065 Penal code fine schedule.

Pursuant to sections 03.30.010--03.30.015 of this chapter, the following offense which is amenable to disposition without court appearance may be disposed of upon payment of the fine listed to the municipal clerk of the court. If a person charged with this offense appears in court and is found guilty, the penalty imposed for the offense may not exceed the fine amount for the offense listed in the following schedule:

PENAL CODE FINE SCHEDULE

CBJ	Offense	No. of Offenses	Fine
...	...	...	...
42.20.220	Truancy	1st 2nd 3rd and subseq.	100.00 MCA*
42.35.100 (c)	Possession or use of synthetic cannabinoid	1st	$100.00
		2nd	200.00
		3rd and subseq.	300.00

Section 4. The sections, paragraphs, sentences, clauses, phrases and words of this ordinance are separable, and if any word, phrase, clause, sentence, paragraph or section of this ordinance shall be declared unconstitutional, invalid or unenforceable by the valid judgment or decree of a Court of competent jurisdiction, such unconstitutionality, invalidity or unenforceability shall not affect any of the remaining words, phrases, clauses, sentences, paragraphs and sections of this ordinance.

Section 5. This ordinance shall be automatically repealed 30 days after the effective date of a State statute criminalizing substantially the same conduct. The City Attorney shall notify the Assembly if and when this occurs.

//

//

//

//

Section 6. Effective Date. This ordinance shall be effective 30 days after its adoption.

Adopted this 28th day of February, 2011.

Bruce Botelho, Mayor

REPRESENTATIVE CATHY MUÑOZ

CS HB7 (JUD) - Ban on Controlled Substances

A new synthetic cannabinoid, commonly known as K2 or Spice, has become readily available at local stores and over the internet. Some users of this chemical compound experience severe adverse reactions including hallucinations, nausea, vomiting, agitation, and panic attacks.

The synthetic cannabinoid is a combination of herbal and chemical compounds that commonly produce a reaction similar to the use of marijuana. The popularity is increasing, especially among youth, due to easy accessibility, low cost, and the difficulty of detection on drug tests.

The first introduction to K2 came to my attention through an individual's story. Within moments of inhaling K2 the young man experienced adverse reactions that included severe vomiting, loss of reality, inability to walk and talk, and violent outbursts. Without the quick reaction of those nearby there may have been tragic ending to this story. Many similar stories have surfaced in communities throughout Alaska. To date, nine states have successfully enacted laws to prohibit synthetic cannabinoids.

HB7 will classify certain synthetic cannabinoids as schedule IIIA controlled substance. Schedule IIIA includes materials, compounds and mixtures which contain similar synthetic chemicals. It is important that we get ahead of this growing problem and I urge your support for the passage of this bill.

BILL NO. CSHB7 (JUD)

Analysis

This proposed legislation would add certain synthetic cannabinoids to the schedule IIIA list of controlled substances. This bill would become effective immediately.

The Alaska Scientific Crime Detection Laboratory (Crime Laboratory) provides analysis of suspected controlled substances, issues reports, and provides expert testimony for the state of Alaska. For calendar year 2010 the laboratory received 1,267 requests for controlled substances analysis. A full time position is capable of analyzing 480 requests per year. The Controlled Substances Section of the Crime Lab currently has 2.5 full time staff assigned to it.

Once controlled, it is anticipated that the Crime Laboratory will receive significant requests for analysis related to the newly controlled substances. With the large presence of internet sales, and the ability for manufacturers to rapidly change the substances present in the materials sold, any suspected of containing these newly controlled substances will require scientific analysis at the Crime Laboratory.

This new position would come at an initial cost of $126,800. This includes a starting salary with benefits of $96,000, a work station start up cost of $7,300 for equipment , $2,000 for supplies, and there will be $3,000 in travel funds required for the ongoing training and education necessary for an analyst to maintain their expertise and certifications. There is an expected $5,000 in contractual costs as well, and this position also requires an initial $3,500 to obtain licensing required for the laboratory's LIMS database. Subsequently, there is a yearly 18% maintenance fee for that license. In addition to the above considerations involved with this new position, the Crime Laboratory would be required to obtain the standards necessary to analyze these nine new chemicals and their various isomers. This would be a one-time cost of $10,000.

In addition to the ongoing salary, benefits, and necessary travel costs relative to this position, all positions utilize an ongoing $2,000 for supply needs, and there is an ongoing licensing and maintenance cost of $5,600 per year. Therefore, the initial cost for this position would be $126,800, with a subsequent ongoing cost of $106,600.

BILL NO. CSHB007(JUD)

Analysis

This bill adds several chemical forms of synthetic cannabinoids to Schedule IIIA of Alaska's prohibited substance schedules. The bill also adds salts, isomers, and other forms of Schedule IIIA substances to the same schedule. Currently, marijuana is a Schedule VIA prohibited substance. The anticipated fiscal impact is zero, however, if litigation ensues there will be addition costs in defending this litigation.

(Revised 1/27/2011 OMB)

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB007(JUD)

Analysis

This legislation makes synthetic cannabinoids a schedule IIIA controlled substance.

Currently, possession of a schedule IIIA is a Class A misdemeanor if the amount possessed is less than 3 grams (AS 11.71.050) or a Class C Felony if the amount possessed is over 3 grams (AS 11.71.040).

Manufacturing or delivering a schedule IIIA controlled substance is a Class B felony (AS 11.71.030). The sentences for these crimes range anywhere from 0 - 10 years.

The current average daily cost to house an inmate is $136.44. Therefore, housing an offender could cost the department anywhere from $0.0 (no time served) to $498.1 (for a 10-year sentence).

The Department of Corrections is unable to determine the fiscal impacts of the passage of this legislation, as we cannot estimate the total number of convictions that will occur.

Chemicals Used in "Spice" and "K2" Type Products Now Under Federal Control and Regulation

DEA Will Study Whether To Permanently Control Five Substances

MAR 01 - WASHINGTON, D.C. – The United States Drug Enforcement Administration (DEA) today exercised its emergency scheduling authority to control five chemicals (JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol) used to make so-called "fake pot" products. Except as authorized by law, this action makes possessing and selling these chemicals or the products that contain them illegal in the United States. This emergency action was necessary to prevent an imminent threat to public health and safety. The temporary scheduling action will remain in effect for at least one year while the DEA and the United States Department of Health and Human Services (DHHS) further study whether these chemicals should be permanently controlled.

Chemicals like K-2 and Spice are designated as Schedule I substances, the most restrictive category under the Controlled Substances Act.

The Final Order was published today in the *Federal Register* to alert the public to this action. These chemicals will be controlled for at least 12 months, with the possibility of a six month extension. They are designated as Schedule I substances, the most restrictive category under the Controlled Substances Act. Schedule I substances are reserved for those substances with a high potential for abuse, no accepted medical use for treatment in the United States and a lack of accepted safety for use of the drug under medical supervision.

Over the past couple of years, smokeable herbal products marketed as being "legal" and as providing a marijuana-like high, have become increasingly popular, particularly among teens and young adults. These products consist of plant material that has been coated with research chemicals that claim to mimic THC, the active ingredient in marijuana, and are sold at a variety of retail outlets, in head shops, and over the Internet. These chemicals, however, have not been approved by the FDA for human consumption, and there is no oversight of the manufacturing process. Brands such as "Spice," "K2," "Blaze," and "Red X Dawn" are labeled as herbal incense to mask their intended purpose.

Since 2009, DEA has received an increasing number of reports from poison control centers, hospitals and law enforcement regarding these products. At least 16 states have already taken action to control one or more of these chemicals. The Comprehensive Crime Control Act of 1984 amends the Controlled Substances Act (CSA) to allow the DEA Administrator to place a substance temporarily in schedule I when it is necessary to avoid an imminent threat to the public safety. Emergency room physicians report that individuals that use these types of products experience serious side effects which include: convulsions, anxiety attacks, dangerously elevated heart rates, increased blood pressure, vomiting, and disorientation.

"Young people are being harmed when they smoke these dangerous 'fake pot' products and wrongly equate the products' 'legal' retail availability with being 'safe'," said DEA Administrator Michele M. Leonhart. "Parents and community leaders look to us to help them protect their kids, and we have not let them down. Today's action, while temporary, will reduce the number of young people being seen in hospital emergency rooms after ingesting these synthetic chemicals to get high."

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA-345F]

Schedules of Controlled Substances: Temporary Placement of Five Synthetic Cannabinoids Into Schedule I

AGENCY: Drug Enforcement Administration (DEA), U.S. Department of Justice.

ACTION: Final order.

SUMMARY: The Administrator of the Drug Enforcement Administration (DEA) is issuing this final order to temporarily place five synthetic cannabinoids into the Controlled Substances Act (CSA) pursuant to the temporary scheduling provisions. The substances are 1-pentyl-3-(1- naphthoyl)indole (JWH-018), 1-butyl-3-(1-naphthoyl)indole (JWH-073), 1- [2-(4-morpholinyl)ethyl]-3-(1-naphthoyl)indole (JWH-200), 5-(1,1-dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol (CP-47,497), and 5-(1,1-dimethyloctyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol (cannabicyclohexanol; CP-47,497 C8 homologue). This action is based on a finding by the Administrator that the placement of these synthetic cannabinoids into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety. As a result of this order, the full effect of the CSA and its implementing regulations including criminal, civil and administrative penalties, sanctions and regulatory controls of Schedule I substances will be imposed on the manufacture, distribution, possession, importation, and exportation of these synthetic cannabinoids.

FOR FURTHER INFORMATION CONTACT: Christine A. Sannerud, PhD, Chief, Drug and Chemical Evaluation Section, Office of Diversion Control, Drug Enforcement Administration, 8701 Morrissette Drive, Springfield, VA 22152, telephone (202) 307-7183, fax (202) 353-1263, or e-mail ode@usdoj.gov.

DATES: Effective Date: March 1, 2011.

SUPPLEMENTARY INFORMATION:

Background

The Comprehensive Crime Control Act of 1984 (Pub. L. 98-473), which was signed into law on October 12, 1984, amended section 201 of the CSA (**21 U.S.C. 811**) to give the Attorney General the authority to temporarily place a substance into Schedule I of the CSA for one year without regard to the requirements of 21 U.S.C. 811(b) if he finds that such action is necessary to avoid imminent hazard to the public safety. The Attorney General may extend the temporary scheduling up to six months during pendency of proceedings under 21 U.S.C. 811(a)(1). A substance may be temporarily scheduled under the emergency provisions of the CSA if it is not listed in any other schedule under section 202 of the CSA (**21 U.S.C. 812**) or if there is no exemption or approval in effect under 21 U.S.C. 355 for the substance. The Attorney General has delegated his authority under 21 U.S.C. 811 to the DEA Administrator (28 CFR 0.100).

As per section 201(h)(4) of the CSA (**21 U.S.C. 811**(h)(4)), the Deputy Administrator, now Administrator, transmitted notice of her intention to temporarily place JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol into Schedule I of the CSA to the Assistant Secretary for Health of the Department of Health and Human Services (HHS) in a letter dated October 6, 2010. In response to this notification, the

Assistant Secretary of Health, HHS communicated in a letter dated November 22, 2010, to the then-DEA Acting Administrator that there are no exemptions or approvals in effect for JWH-018, JWH- 073, JWH-200, CP-47,497, and cannabicyclohexanol under Section 505 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 355). The substances are not listed in any other schedule in **21 U.S.C. 812**.

A notice of intent to temporarily place JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol into Schedule I of the CSA was published in the Federal Register on November 24, 2010 (75 FR 71635). Before making a finding that temporarily placing a substance into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety, the Administrator must consider three of the eight factors (factors 4, 5, and 6) set forth in section 201(c) of the CSA (**21 U.S.C. 811**(c)). These factors are the history and current pattern of abuse, the scope, duration, and significance of abuse, and what, if any, risk there is to the public health, including actual abuse, diversion from legitimate channels, and clandestine importation, manufacture, or distribution. 21 U.S.C. 811(h)(3).

The temporary placement of these five synthetic cannabinoids into Schedule I of the CSA is necessary in order to avoid an imminent hazard to the public safety. First, these substances are not intended for human consumption, but there has been a rapid and significant increase in abuse of these substances in the United States. As a result of this abuse, synthetic cannabinoids are banned in at least 18 states in the United States and several countries, and all five branches of the U.S. military prohibit military personnel from possessing or using synthetic cannabinoids. Second, law enforcement has seized synthetic cannabinoids in conjunction with controlled substances and based on self-reports to law enforcement and health care professionals, synthetic cannabinoids are abused for their psychoactive properties. Third, numerous state and local public health departments and poison control centers have issued health warnings describing the adverse health effects associated with synthetic cannabinoids. Based on scientific data currently available, these five substances have the potential to be extremely harmful and, therefore, pose an imminent hazard to the public safety.

History and Current Pattern of Abuse

A "cannabinoid" is a class of chemical compounds in the marijuana plant that are structurally related. The cannabinoid [Delta]9- tetrahydrocannabinol (THC) is the primary psychoactive constituent of marijuana. "Synthetic cannabinoids" are a large family of chemically unrelated structures functionally (biologically) similar to THC, the active principle of marijuana.

Two of the five synthetic cannabinoids (CP-47,497 and cannabicyclohexanol) were synthesized in the early 1980s for research purposes

[[Page 11076]]

in the investigation of the cannabinoid system. JWH-018, JWH-073, and JWH-200 were prepared in the mid-1990s and evaluated to further advance understanding of drug-receptor interactions regarding the cannabinoid system. Developed and evaluated as research tools, no other known legitimate uses have been identified for these five synthetic cannabinoids. Furthermore, these five synthetic cannabinoids are not intended for human consumption.

The emergence of these five synthetic cannabinoids represents a recent phenomenon in the U.S. designer drug market. Since the initial identification of JWH-018 by U.S. forensic laboratories, many additional synthetic cannabinoids including JWH-073, JWH-200, CP- 47,497, and cannabicyclohexanol have been identified in related herbal incense products and plant food. These synthetic cannabinoids have purported psychotropic effects when smoked or ingested. These substances are typically found in powder form or are dissolved in appropriate solvents, such as acetone, before being sprayed on the plant material contained in the herbal incense products.

The popularity of these THC-like synthetic cannabinoids has significantly increased throughout the United States, and they are being abused for their psychoactive properties as reported by law enforcement, the medical community, and through scientific literature.

Some of the product names include, but are not limited to, "Spice," "K2," and many more. Due to sophisticated marketing, the products that contain these five THC-like synthetic cannabinoids are perceived as "legal" alternatives to marijuana despite the fact that they are typically advertised as herbal incense or plant food (Bonsai- 18) by Internet retailers, tobacco shops, head shops, and other domestic brick and mortar retail venues, and labeled "Not For Human Consumption." No evidence exists that these synthetic cannabinoids have value as an additive to herbal incense products due to the absence of odor associated with the substances.

Based on law enforcement encounters, these five substances are typically found laced on plant material. The plant material is packaged in small pouches or packets, and is being sold over the Internet, in tobacco and smoke shops, drug paraphernalia shops, gas stations, and convenience stores as herbal incense products, giving customers of all ages direct access to these five substances. Research articles propose that the packaging is professional and conspicuous, targeting young people, possibly eager to use cannabis, but who are afraid of the judicial consequences and/or association with illicit drugs.

According to Internet discussion boards and law enforcement encounters reported directly to DEA, these five synthetic cannabinoids are being both abused alone and/or being sprayed on plant material (which is then smoked). The most common route of administration of these synthetic cannabinoids is by smoking (using a pipe, a water pipe, or rolling the drug-spiked plant material in cigarette papers).

These five synthetic cannabinoids alone or spiked on plant material have the potential to be extremely harmful due to their method of manufacture and high pharmacological potency. There is little information regarding the pharmacology, toxicology, and safety of these substances in humans given the minimal amount of pre-clinical investigations undertaken regarding these substances; therefore, the full danger of these drugs has not yet been determined.

As of January 31, 2011, 18 states in the United States and other countries have controlled one or more of the five synthetic cannabinoids. Moreover, all five branches of the military prohibit their personnel from possessing or using synthetic cannabinoids associated with products such as Spice and K2.

Scope, Duration, and Significance of Abuse

According to forensic laboratory reports, the initial appearance of these synthetic cannabinoids in herbal incense products in the United States occurred in November 2008 when U.S. Customs and Border Protection first encountered products such as Spice.

The increasing abuse of the five synthetic cannabinoids is demonstrated by the increase in federal, state, and local law enforcement activity associated with these substances. The National Forensic Laboratory Information System, a national repository for drug evidence analyses from forensic laboratories across the United States, has reported in excess of 500 exhibits containing synthetic cannabinoid from January 2010 through September 2010. These exhibits came from numerous states across the nation including Alabama, Arkansas, California, Florida, Hawaii, Iowa, Indiana, Kansas, Kentucky, Louisiana, Minnesota, Missouri, North Dakota, Nebraska, Nevada, Oklahoma, Pennsylvania, South Carolina, Tennessee, and Virginia.

Even though there is no evidence of legitimate non-research related use for these synthetic cannabinoids, multiple shipments of JWH-018 and JWH-073 have been encountered by U.S. Customs and Border Protection in 2010. One enforcement operation encountered five shipments of JWH-018 totaling over 50 kilograms (110.2 pounds) of powder. In addition, bulk loads of JWH-018 and JWH-200 have been encountered by law enforcement in 2010. For example, in Casper, Wyoming, DEA agents encountered large quantities of herbal incense products laced with the synthetic cannabinoid JWH-018 in conjunction with methamphetamine and other illegal drugs in execution of search and arrest warrants.

On March 24, 2010, the American Association of Poison Control Centers reported receiving 112 calls from 15 states related to synthetic cannabinoids to U.S. poison centers since 2009. Just nine months later, the number of calls increased to over 2,700 from 49 states and the District of Columbia.

What, If Any, Risk There Is to the Public Health

Health warnings have been issued by numerous state and local public health departments and poison control centers describing the adverse health effects associated with these synthetic cannabinoids and their related products, including agitation, anxiety, nausea, vomiting, tachycardia (fast, racing heartbeat), elevated blood pressure, tremor, seizures, hallucinations, paranoid behavior, and non-responsiveness.

Smoking these synthetic cannabinoids for the purpose of achieving intoxication and experiencing the psychoactive effects has been identified as a reason for emergency room visits and calls to poison control centers. In a fact sheet by the National Drug Court Institute, the problem of synthetic cannabinoid abuse is described as "significant and disturbing." This is supported by information that was communicated to DEA from one of the major private toxicology laboratories. Based on laboratory findings from drug screens for the period of July 2010 through November 2010, over 3,700 specimens tested positive for either JWH-018 or JWH-073. They also indicated that they were finding 30-35% positivity for specimens submitted by juvenile probation departments.

Case reports describe psychotic episodes, withdrawal, and dependence associated with use of these synthetic cannabinoids, similar to syndromes

[[Page 11077]]

observed in marijuana abuse. In addition, based on law enforcement encounters reported directly to DEA, when responding to incidents involving individuals who have reportedly smoked these synthetic cannabinoids, first responders report that these individuals have suffered from intense hallucinations. Moreover, emergency department physicians and toxicologists have reported the adverse health effects associated with smoking herbal incense products laced with these substances. Furthermore, based on law enforcement encounters, suspected Driving Under the Influence of Drug incidents are attributed to the smoking of synthetic cannabinoids. For example, in September 2010, police in Nebraska responded to an incident involving a teenage male who had careened his truck into the side of a residence. After striking the residence and several more items, the teen continued several more yards before coming to a complete stop. Prior to crashing the truck, the individual had driven past a junior high school and nearly struck a child. Upon further investigation, the driver of the vehicle admitted to smoking "Wicked X," a product marketed as "herbal incense" and known to contain synthetic cannabinoids, prior to the accident. Preliminary toxicology reports indicated that the individual did not have any alcohol or other illegal substances in his system.

Detailed chemical analyses by DEA and other investigators have found these synthetic cannabinoids spiked on plant material in herbal incense products marketed to the general public. Product analyses have found variations in both the synthetic cannabinoid found on the plant material and the amount. As proposed in scientific literature, the risk of adverse health effects is further increased by the fact that similar products vary in the composition and concentration of synthetic cannabinoids spiked on the plant material.

Self-reported abuse of these THC-like synthetic cannabinoids either alone (e.g., in pills with the substance in powder form) or spiked on plant material appear extensively on Internet discussion boards, and abuse has been reported to public health officials and law enforcement. The abuse of these substances spiked on plant material is corroborated by forensic laboratory analysis of products encountered by law enforcement.

According to the U.S. Customs and Border Protection, a number of the products and synthetic cannabinoids appear to originate from foreign sources. Product manufacturing operations encountered by law enforcement corroborate that the herbal incense products are manufactured in the absence of quality controls and devoid of regulatory oversight. Law enforcement has encountered the manufacture of herbal

incense products occurring in such places as residential neighborhoods. These products and associated synthetic cannabinoids are readily accessible via the Internet.

Based on the above data, the continued uncontrolled manufacture, distribution, importation, exportation, and possession of JWH-018, JWH- 073, JWH-200, CP-47,497, and cannabicyclohexanol pose an imminent hazard to the public safety. DEA is not aware of any recognized therapeutic uses of these synthetic cannabinoids in the United States.

DEA has considered the three criteria for placing a substance into Schedule I of the CSA (**21 U.S.C. 812**). The data available and reviewed for JWH-073, JWH-018, JWH-200, CP47,497, and cannabicyclohexanol indicate that these synthetic cannabinoids each has a high potential for abuse, no currently accepted medical use in treatment in the United States and a lack of accepted safety for use under medical supervision.

In accordance with the provisions of section 201(h) of the CSA (**21 U.S.C. 811**(h)) and 28 CFR 0.100, the Administrator has considered the available data and the three factors required to support a determination to temporarily schedule five synthetic cannabinoids: 1- butyl-3-(1-naphthoyl)indole, 1-pentyl-3-(1-naphthoyl)indole, 1-[2-(4- morpholinyl)ethyl]-3-(1-naphthoyl)indole, 5-(1,1-dimethylheptyl)-2- [(1R,3S)-3-hydroxycyclohexyl]-phenol, and 5-(1,1-dimethyloctyl)-2- [(1R,3S)-3-hydroxycyclohexyl]-phenol in Schedule I of the CSA and finds that temporary placement of these synthetic cannabinoids into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety.

Regulatory Requirements

With the issuance of this final order, JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol become subject to the regulatory controls and administrative, civil and criminal sanctions applicable to the manufacture, distribution, possession, importation, and exportation of a Schedule I controlled substance under the CSA.

1. Registration. Any person who manufactures, distributes, dispenses, imports, exports, or possesses JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol or who engages in research or conducts instructional activities with respect to JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol, or who proposes to engage in such activities, must be registered to conduct such activities in accordance with **21 U.S.C. 823** and **958**. Any person who is currently engaged in any of the above activities and is not registered with DEA must submit an application for registration and may not continue their activities until DEA has approved that application. Retail sales of Schedule I controlled substances to the general public are not allowed under the Controlled Substances Act.

2. Security. JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol are subject to Schedule I security requirements. Accordingly, appropriately registered DEA registrants must manufacture, distribute and store these substances in accordance with **1301.71**; **1301.72**(a), (c), and (d); **1301.73**; **1301.74**; **1301.75**(a) and (c); and **1301.76** of Title 21 of the Code of Federal Regulations as of March 1, 2011.

3. Labeling and packaging. All labeling and packaging requirements for controlled substances set forth in **Part 1302** of Title 21 of the Code of Federal Regulations shall apply to commercial containers of JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol. Current DEA registrants shall have thirty (30) calendar days from the effective date of this Final Order to be in compliance with all labeling and packaging requirements.

4. Quotas. Quotas for JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol will be established based on registrations granted and quota applications received pursuant to **part 1303** of Title 21 of the Code of Federal Regulations.

5. Inventory. Every DEA registrant who possesses any quantity of JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol is required to keep inventory of all stocks of these substances on hand pursuant to **1304.03**, **1304.04**, and **1304.11** of Title 21 of the Code of Federal Regulations. Every current DEA registrant who desires registration in Schedule I for JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol shall conduct an inventory of all stocks of these substances. Current DEA registrants shall have thirty (30) calendar days from the effective date of this Final Order to be in compliance with all inventory requirements.

6. Records. All registrants who handle JWH-018, JWH-073, JWH-200, CP-

[[Page 11078]]

47,497, or cannabicyclohexanol are required to keep records pursuant to **1304.03**, **1304.04**, **1304.21**, **1304.22**, and **1304.23** of Title 21 of the Code of Federal Regulations. Current DEA registrants shall have thirty (30) calendar days from the effective date of this Final Order to be in compliance with all recordkeeping requirements.

7. Reports. All registrants are required to submit reports in accordance with **1304.33** of Title 21 of the Code of Federal Regulations. Registrants who manufacture or distribute JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol are required to comply with these reporting requirements and shall do so as of March 1, 2011.

8. Order Forms. All registrants involved in the distribution of JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol must comply with order form requirements of **part 1305** of Title 21 of the Code of Federal Regulations as of March 1, 2011.

9. Importation and Exportation. All importation and exportation of JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol must be conducted by appropriately

registered DEA registrants in compliance with **part 1312** of Title 21 of the Code of Federal Regulations on or after March 1, 2011.

10. Criminal Liability. The manufacture, distribution, dispensation, or possession with the intent to conduct these activities; possession; importation; or exportation of JWH-018, JWH - 073, JWH-200, CP-47,497, or cannabicyclohexanol not authorized by, or in violation of the CSA or the Controlled Substances Import and Export Act occurring as of March 1, 2011 is unlawful.

Executive Order 12988

This final temporary scheduling order meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988 Civil Justice Reform.

Executive Order 13132

This final temporary scheduling order does not preempt or modify any provision of State law; nor does it impose enforcement responsibilities on any State; nor does it diminish the power of any State to enforce its own laws. Accordingly, this order does not have federalism implications warranting the application of Executive Order 13132.

Congressional Review Act

Pursuant to section 808(2) of the Congressional Review Act, the agency is not required to comply with the Act if it makes a good faith finding that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. It is in the public interest to schedule these cannabinoids immediately because they pose a public health risk. Use of materials spiked with these cannabinoids has been the cause of emergency room visits and calls to poison control centers. The adverse health effects associated with these synthetic cannabinoids and their related products include agitation, anxiety, nausea, vomiting, tachycardia (fast, racing heartbeat), elevated blood pressure, tremor, seizures, hallucinations, paranoid behavior, and non- responsiveness. The materials have been marketed on products that are available to the general public, and their manufacture is devoid of quality controls and unregulated.

This temporary scheduling action is taken pursuant to **section 811**(h), which is specifically designed to enable DEA to act in an expeditious manner to avoid an imminent hazard to the public safety from new or designer drugs or abuse of those drugs. Section 811(h) exempts the temporary scheduling order from standard notice and comment rulemaking procedures to ensure that the process moves swiftly. For the same reasons that underlie section 811(h), that is, DEA's need to move quickly to place these five cannabinoids into Schedule 1 because they pose a threat to public health, it would be contrary to the public interest to delay implementation of the temporary scheduling order by requiring DEA to undertake the procedures necessary to comply with the Congressional Review Act prior to the order taking effect.

Unfunded Mandates Reform Act of 1995

This final temporary scheduling order will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $126,400,000 or more (adjusting for inflation) in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Reporting and recordkeeping requirements.

Under the authority vested in the Attorney General by section 201(h) of the CSA (**21 U.S.C. 811**(h)), the Administrator hereby amends 21 CFR part 1308 as follows:

PART 1308--SCHEDULES OF CONTROLLED SUBSTANCES

- 1. The authority citation for part 1308 continues to read as follows:

  Authority: **21 U.S.C. 811**, **812**, **871**(b), unless otherwise noted.

- 2. **Section 1308.11** is amended by adding new paragraphs (g)(1), (2), (3), (4), and (5) to read as follows:

Sec. 1308.11 Schedule I.

* * * * *

(g) * * *

(1) 5-(1,1-Dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol, its optical, positional, and geometric isomers, salts and salts of isomers--7297 (Other names: CP-47,497)

(2) 5-(1,1-Dimethyloctyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol, its optical, positional, and geometric isomers, salts and salts of isomers--7298 (Other names: cannabicyclohexanol and CP-47,497 C8 homologue)

(3) 1-Butyl-3-(1-naphthoyl)indole, its optical, positional, and geometric isomers, salts and salts of isomers--7173 (Other names: JWH- 073)

(4) 1-[2-(4-Morpholinyl)ethyl]-3-(1-naphthoyl)indole, its optical, positional, and geometric isomers, salts and salts of isomers--7200 (Other names: JWH-200)

(5) 1-Pentyl-3-(1-naphthoyl)indole, its optical, positional, and geometric isomers, salts and salts of isomers--7118 (Other names: JWH- 018 and AM678)

Dated: February 18, 2011.

Michele M. Leonhart,
Administrator.

Memorandum

TO: Representative Cathy Muñoz
FROM: Chuck Burnham, Legislative Analyst
DATE: February 8, 2011
RE: Comparing States' Laws on Synthetic Cannabinoids to Selected Alaska Drug Laws
LRS Report 11.159

You asked us for information on states' laws on synthetic cannabinoids. Specifically, you asked for an account of where such substances appear on states' schedules of controlled substances and the crime classifications and penalties for possessing those substances. You also asked us to compare those other states' penalties for such crimes to those indicated for possession of substances in Alaska's controlled substance schedules IIA and IIIA.

We identified 11 states with laws prohibiting the possession of synthetic cannabinoids.[1] Classifications and penalties for a first criminal offense of possession in these states range from a Class B misdemeanor in Kentucky, which carries a maximum term of imprisonment of 90 days and a $250 fine, to an unclassified felony in Georgia, for which an offender is subject to a prison sentence of 2-15 years. In addition to the 11 states that have synthetic cannabinoid prohibitions in place, at least 21 states, including Alaska, are currently considering similar legislation.

In Alaska, as you know, controlled substances are placed on a given level within the schedule of controlled substances based on the degree of danger or probable danger a given drug poses to a person or the public. Those schedules range from "IA," containing the most dangerous substances, to "VIA," which are perceived to be the least dangerous drugs. Possession of a Schedule IIA controlled substance in Alaska constitutes the crime of "misconduct involving a controlled substance in the fourth degree." That offense is a Class C felony punishable by a maximum of 5 years in prison and a $50,000 fine. Please note, however, that the presumptive sentencing guideline in Alaska is far less severe, and a suspended sentence is possible for a first offense. Possession of a Schedule IIIA controlled substance in Alaska is a Class A misdemeanor for which an offender can receive a maximum of 1 year in prison and a $10,000 fine.[2]

The attached table summarizes crime classifications and penalties for possessing synthetic cannabinoids in the eleven states where that activity has been criminalized, and compares that information to the crime classification and penalties for possession of items on Alaska' controlled substances Schedules IIA and IIIA. Please note that the penalties listed in our table are either maximum sentences or ranges of incarceration periods. Actual penalties are generally subject to considerable discretion by the sentencing courts.

We hope this is helpful. If you have questions or need additional information, please let us know.

[1] Those states are Alabama, Georgia, Illinois, Kansas, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Oklahoma, and Tennessee. According to the National Conference of State Legislatures (NCSL), synthetic cannabinoids are "chemically engineered substances, similar to THC—the active ingredient in marijuana—that, when smoked or ingested, can produce a high similar to marijuana. Initially developed for research related to treatment of pain and the effects of cannabis on the brain, these substances have recently become a popular alternative to marijuana. The NCSL maintains information about these substances and states' responses to the issue at *http://www.ncsl.org/?tabid=21398*.

[2] Controlled Substance Schedules in Alaska are enumerated at AS § 11.71.140-190.

Comparing States' Laws on Synthetic Cannabinoids to Selected Alaska Drug Laws				
State	**Citation**	**Controlled Substance Schedule**	**Crime Classification** (1st Offense--Possession)	**Penalty**
Alaska	AS § 11.71.040 and § 12.55.125	Schedule IIA (as proposed in HB 7)	Class C felony	Maximum 5 years imprisonment and $50,000 fine (presumptive sentence is far less--suspended sentence possible)
	AS § 11.71.050	Schedule IIIA	Class A misdemeanor	Maximum 1 year imprisonment and $10,000 fine
Alabama	CA § 13A-12-213 to 14.1	Not scheduled	Class A misdemeanor	Sentencing guidelines: up to 32 month sentence typically allotted by court among probation, community corrections, county jail/work release or an alternative
Georgia	OCGA § 16-30-25 and 16-13-30	Schedule I	Unclassified felony	2-15 years imprisonment
Illinois	720 ILCS § 570/204 and 402(c) and 730 ILCS § 5/5-4.5-45 and 5-4.5-50	Schedule I	Class 4 felony	1-3 years imprisonment and $25,000 fine
Kansas	KSA § 21-36a06 and 4708	Schedule I	Class A non-person misdemeanor	Sentencing guidelines: typically, 10-12 months of probation
Kentucky	KRS § 218A.1427 and 534.040	Schedule I	Class B misdemeanor	Maximum imprisonment of 90 days and fine of $250
Louisiana	LSA § 40:966	Schedule I	Unclassified	Maximum 6 months in jail and $500 fine
Michigan	MCL § 333.7403	Schedule I	Unclassified misdemeanor	Maximum 1 year imprisonment and $2,000 fine
Mississippi	MC § 41-29-113 and 139	Schedule I	Unclassified misdemeanor or felony depending upon amount of drug	For example, 0.1 grams to 2 grams, up to 2 years imprisonment and $50,000 fine; 10-30 grams, 6-24 years imprisonment and up to $50,000 fine.
Missouri	MRS § 195.202, 558.011, and 560.016	Schedule I	Class A misdemeanor	Maximum 1 year imprisonment and $1,000 fine
Oklahoma	OSA 63 § 2-204 and § 2-402	Schedule I	Unclassified felony	2-10 years imprisonment and $5,000 fine
Tennessee	TCA § 39-17-438	Not scheduled	Class A misdemeanor	Sentencing guidelines--wide latitude to courts

Notes and Source: This table provides information gleaned from the *Lexis* database of state statutes on first offenses for possessing small amounts of synthetic cannabinoids or the referenced drug schedule, as applicable. Please note that a variety of crime-specific circumstances and elements of criminal procedure impact actual sentences.

Testimony for HB7

I would have to start by saying that I never thought I would have had a bad trip on synthetic herb, most times people have bad trips from mushrooms or acid but that herb I had was unlike anything I'd ever heard of. I had started smoking spice in February of this year and smoked on weekends. The appealing side of this herb was that it gave a marijuana like high for about 3 hours with just a couple of hits and the best part being that you didn't have to worry about drug tests because it passed for friends that I knew in the military so passing standard tests was not a problem.

Now another plus to this herb was that unlike normal weed, this herb is not supposed to produce any paranoia, and there was no sign of being high at all, such as no red eye, no half open eyes and you were able to basically be a functional stoner, you could be in public and not look or smell high in anyway. This of course was very appealing to me and many of my friends who also couldn't smoke weed because of drug tests at their jobs.

The brand of spice I had been smoking for about 6 months was called red dawn, spark 20. The herb I smoked the night of my incident was called spike, max. I only had 2 hits and less than 2 minutes later I was losing my perception of what was real in every way, it turned everything into a fuzzy cartoon like picture and I lost control of my legs that I couldn't walk at all. I couldn't talk. I could hear what I thought and what I wanted to say, but all I was spitting out was gibberish. This went on for what felt like many hours. I can remember thinking to myself that I wasn't actually going come out of this craziness and this might be how I end up dying! I remember telling my brother to call 911 and remember going into the ambulance and ending up in the hospital for a day. The doctors haven't had an incident with synthetic herb until that night and I had to basically be flushed out for 10 hours.

I know many people are still going to want to try spice but the fact it's just a bunch of chemicals sprayed on tobacco and nobody knows what the long term affects of this herb are and the scary thing is that this stuff is so easy to purchase. The price has dropped here in town from $53 a gram down to $30 a gram, which is just a bit more than the going rate for actual weed.

I would have thought this herb was completely harmless but the fact that a regular smoker such as myself could even have a bad experience as bad as mine was a huge eye opener to just how bad this stuff really is. The fact that it's very easy to get in town and that it only takes a little bit to get to a mind altering high is spooky. I know a large number of kids in town have had a substance abuse problem and this drug is dangerous because of the fact you can have an herb that twists reality in such a way that you can't tell what's real and what's a hallucination. I see this problem getting worse in the near future because it's a new drug that is easy to obtain and has a weed like high and at the same time has dangerous side effects.

Mat-Su Substance Abuse Prevention Coalition

Alaska House of Representatives

RE: Synthetic Cannabinoids

To Whom it May Concern,

The purpose of this correspondence is to support House Bill 7 that would list certain synthetic cannabinoids found in "K2" or "Spice" as Scheduled controlled substances which will provide law enforcement will have the necessary authority to prosecute the sell and possession of these substances. These drugs are currently being sold in several local venders which sends the social message that they are not harmful and social acceptable; thereby, increasing the risk for youth consumption and related consequences.

K2/Spice products are a mixture of herbal/spice plant products sprayed with potent psychotropic drugs, often contaminated with unidentified toxic substances which is marketed under variety of names including K2, Spice, Pep Spice, Spice Silver, Spice Gold, Spice Diamond, Smoke, Sence, Skunk, Yucatan Fire, Genie & Zohai and sold in variety of colors/flavors-usually sold in foil packaging

The growing popularity of these drugs is causing increasing alarm among law enforcement officials, lawmakers, and health care professionals across America. "Spice" has been banned by some U.S. domestic and overseas military commands as well as in Germany and other European countries because substances have been identified in the product to have the presence of chemicals with tetrahydrocannabinol (THC)-like effects.

The danger in smoking "Spice" is that the product is unregulated and not manufactured in a controlled environment. Smoking this product could be very harmful because the substance could also include unknown contaminants. Therefore, there is no way to accurately determine what the potential harmful effects could be. [1] Medical officials concur that smoking "Spice" can cause adverse effects to one's health. Hospitals have reported incidents of people, mostly

[1] 4Mind Hacks: Spice flow: the new street drug pharmacology December 01, 2009, Accessed 13 May 2010 and Wikipedia Accessed 13 May 2010

teenagers, visiting emergency rooms for: heart palpitations, respiratory issues, panic attacks, hallucinations, delusions, and, one case where a teen lapsed into a coma.[2]

The Mat-Su Substance Abuse Prevention Coalition seeks to reduce substance abuse among youth by advocating for and implanting evidence-based environmental strategies. These drugs are currently sold at local shops which increases access to the drug and sends the social message to young people that they are acceptable and not harmful.

I have attached legislation adopted by the state of Missouri which contains a list of the compounds used to create these drug which can be used by the Senate as a template to draft a similar bill/ordinance.

The Mat-Su Substance Abuse Prevention Coalition appreciates your time and consideration of this issue. If you would like any additional information, please contact the project coordinator, undersigned. Thank you for your time.

Sincerely,

Desiree Compton, for Mat-Su Substance Abuse Prevention Coalition

January 21, 2011

Representative Cathy Munoz
State Capitol Room 403
Juneau AK 99801

Dear Representative Munoz:

As the Chief of Police for the Fairbanks Police Department, I would like to extend my support of House Bill No. 7 "An Act classifying certain synthetic cannabinoids as schedule IIA controlled substances."

According to the U.S. Department of Justice Drug Enforcement Administration, these substances have no known therapeutic use and are known to cause a variety of effects including seizures, hallucinations, psychotic episodes, and non-responsiveness. In addition the Alaska Information Analysis Center (AKIAC) has reported in studies that subjects have reported having difficulties with balance, slurred speech, and being light headed.

These cannabinoids present a significant threat to the safety of Alaska's citizens as long as they remain unclassified. Without this new legislation a person who is under the influence of synthetic cannabinoids while operating a motor vehicle is not in violation of the law. This presents a clear danger to the citizens of Alaska, as someone could potentially be under the influence of a synthetic cannabinoid while driving and experience hallucinations, seizures, or a psychotic episode. This is not a hypothetical situation and the Fairbanks Police Department has already investigated a motor vehicle accident where the driver of the vehicle was having seizures as a result of consuming synthetic cannabinoids.

By classifying synthetic cannabinoids as a schedule II controlled substance, the act of operating a motor vehicle under the influence of a synthetic cannabinoid would become an illegal act. This bill would therefore have a direct impact on the safety of the citizens of the State of Alaska.

Sincerely

Laren Zager
Chief of Police
Fairbanks Police Department

Dear Representative Muñoz:

On behalf of our respective organizations, we would like to thank you for introducing HB 7, an Act classifying certain synthetic cannabinoids as schedule IIA controlled substances; and providing for an effective date.

We met recently to review proposed legislation and decided to unanimously support this bill.

Again, thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organizations can do to assist in the passage of this bill.

Sincerely,

Re: House Bill 7 and Senate Bill 17 - *Synthetic Cannabinoids*

Dear Representatives:

The Municipality of Anchorage supports the bills currently before the legislature. As I indicated last Friday before your Committee, the primary reasons to treat synthetic cannabinoids more serious than their organic equivalents is because the potency of the synthetics has been found to be up to 800 times greater than the organic, and the potency from sample to sample varies widely. We have evidence that this high potency induces hallucinogenic reactions and unpredictable behaviors that are far more dangerous to the user, and those who may come into contact with them, than marijuana. The variations in the strength of any one dose can cause users to get a mild reaction in one instance and fall into unconsciousness in another instance. We have had one death in Anchorage that can be directly attributed to the use of synthetic cannabinoids. The Municipality believes felony prosecution for the manufacture, production, distribution, and sale of synthetics is a necessary tool that should be available to law enforcement to discourage the use of these drugs.

The Municipality supports providing the State Crime Lab with necessary resources to test for these drugs. As of a couple of months ago, we were aware of only two labs nationally that could test for these products in blood or urine. One lab could test urine samples and the other could test blood samples. In order to successfully prosecute people in the chain of production and consumption, we need the capability of testing both seized products and the bodily fluids of users. If properly resourced, having these tests performed locally and having local technicians available to testify, may save both money and time over using out-of-state labs.

Please find included in our email the Powerpoint presentation our Traffic Safety Resource Prosecutor uses. We have been making these presentations to the local military, business groups, and governmental agencies. We look forward to providing additional testimony on the bills in the coming weeks. If you have any questions, please do not hesitate to contact me.

Sincerely,

Dennis A. Wheeler
Municipal Attorney

Re: HB 7 – Regulation of Synthetic Cannabinoids

Dear Representative Munoz,

On behalf of the Advisory Board on Alcoholism and Drug Abuse, I would like to express our appreciation of your bringing this important issue to the forefront. Synthetic marijuana or "cannabinoids" pose a grave risk to youth and adults, given the serious health consequences and impairments experienced by users of these drugs.

The dangers posed by synthetic marijuana are serious. While the base products may be natural, the chemicals used to mimic the properties of THC are not approved for human consumption. National news reports on the effects of these products include elevated heart rate and blood pressure, extreme anxiety, poisoning, nausea and vomiting, hallucinations, overdoses, and even addiction.

The American Association of Poison Control Centers reported more than 3,000 calls related to poisoning by synthetic marijuana products in 2010 – and nearly 400 calls since January 1 of this year. The U.S. Army banned use of synthetic marijuana by service members in August 2010. The U.S. Drug Enforcement Agency (DEA) exercised its emergency scheduling authority to **temporarily** control five chemicals used in synthetic marijuana products (JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol). This federal regulation is limited in duration (12-18 months), leaving Alaskans at risk after that time without the state taking action.

The effects of synthetic marijuana are being felt right here in Alaska. News reports of crimes involving these products have come from Fairbanks and Anchorage. The U.S. Army reported courts martial and non-judicial discipline of more than thirty soldiers in Alaska by December 2010. The Anchorage School District reports use by students (though not to the same extent as actual marijuana). Given the health consequences and the role synthetic marijuana can play in criminal activity, there is a more than adequate basis for the regulation of these products to protect the health and safety of Alaskans.

Thank you for your work to protect Alaskans from these harmful products.

Sincerely,

J. Kate Burkhart
Executive Director

Kendra Kloster

From: Scott Spickler [sspickler@gmail.com]
Sent: Monday, January 24, 2011 4:07 PM
To: Kendra Kloster
Subject: HB-7,SB17

To Representives Munoz and Kerttula and Senator Egan

I would like to voice my support for the passage of HB 7 and SB 17 banning synthetic marijuana and the chemical substances that these "Herbal Incense" are laced with.

I feel that for this product to be sold off the shelf by local businesses to anyone is a criminal act and the penalities should be severe enough to discourage the sale and distribution of this meth like product.

The target market for synthetic pot, in my opinion, is typically anyone that is trying to avoid drug use detection by their employers, (including the military), as well as students participating in school sports at districts that have a drug testing program in place.

While people over 18 should know better than to smoke this substance, many do not understand the consequences of inhaling the unregulated chemicals sprayed on these herbs. I fear that the drug is going to cause irreparable harm or death to someone, and sadly that someone will likely be under the age of 18 to get the public's attention and to shed the light on the potential harm that this product can cause. However, passage of a law to criminalize the sale and possession can help circumvent that concern.

The Federal Government regulates the importation of toys painted with lead from China, sometimes not all that well quite honestly. Alaska should join the ranks of several other states that have already passed legislation of this particular poison from being so readily available on store shelves.

We don't need to make it easy for people to gain access to this drug.

Thank you,

Scott Spickler

Sent: Tuesday, January 25, 2011 10:26 AM
To: Kendra Kloster
Subject: HB-7 and SB-17

Honorable Representatives Munoz and Kerttula, and Senator Egan:

Please support the above bills and outlaw synthetic cannabis products (Spice, K2, etc.).

- This family of drugs is intended to produce a high – thus users are impaired in any activities they may undertake (e.g. driving)
- These products appear to be falsely labeled and do not contain herbal plants, but rather cannabinoid compounds related to THC (active ingredient in pot); i.e., they lie

It would appear these products are a thinly veiled effort to bypass anti-marijuana rules to sell pot by-any-other-name. Whether it is pot or other, the stated intent is to produce a drugged high. That alone is sufficient to merit regulation as a controlled substance. At a minimum it should be so regulated – at best it would be made illegal. It's market is based on wriggling around anti-drug law. Let's close the door on the deceptive marketing of pot by-any-other-name. It is a drug (or group of drugs) being made available to the public essentially as an unregulated nutraceutical. This is a sham and should be ended.

Respectfully,

Frank Bergstrom

To: Kendra Kloster
Subject: HB-7/SB17

Dear Representatives Munoz and Kerttula and Senator Egan:

I would like express my support and encourage you to pass HB 7 and SB 17 banning synthetic marijuana and the chemical substances that lace these "Herbal Incense". These substances should not be sold to anyone for any reason. The sale of such material should be designated a criminal act with penalties severe enough to discourage their sale and distribution.

As an employer with strict drug use policies the legal sale of synthetic narcotics creates untold liability. I think it is safe to say that if my fully loaded boom truck is in an accident with your loved ones and the driver has been enjoying "Herbal Incense" prior to the accident you won't be satisfied with a defense that the product was sold over the counter by a local business and is legal. Dead is dead. Legalizing these materials creates a liability nightmare for employers, school sports programs and endangers the public.

Alaska has more than its share of substance abuse problems so lets join with other states that have already passed legislation of this particular poison from being so readily available on store shelves.

Sincerely,

To whom it may concern,

I would like to voice my opinion in favor of banning synthetic marijuana in Alaska. It's a very dangerous drug and it doesn't belong in our state.

I have seen what smoking this does to a person and it was a very scary experience. Vomiting, very intense hallucinations, and high heart rate just to name a few symptoms. I believe if I wasn't around during this episode this person very well could have died. I think it's just a matter of time before it does take someones life.

I hope Alaska follows in many other states footsteps and bans this substance.

SPONSOR STATEMENT

CSHB 50 (JUD)

An Act relating to the purchase of alcoholic beverages at a club and to access by certain persons under 21 years of age to a club's licensed premises when alcoholic beverages are present.

CS House Bill 50 (JUD) is an effort to support the young men and women serving in the armed services in Alaska, by clarifying language to make it easier for them to enjoy companionship in the clubhouses of service and patriotic organizations.

The young soldiers, airmen, sailors, marines and coast guard personnel stationed in Alaska face special challenges. Separation from loved ones, the rigors of barracks life and the monotony of three mess hall meals a day can take their toll on morale. Patriotic clubs – such as those operated by the American Legion, Veterans of Foreign Wars, Disabled American Veterans and others – are places to relax with buddies and enjoy the special understanding and support from others who have "been there" and understand the rigors of military life.

The Legislature recognized this value, and in 2006 passed SB 209 to allow these young men and women access to such clubs using their military ID cards. However, some language remains in statute that creates confusion as to when such access is permitted. CSHB 50 (JUD) will eliminate that confusion by making it clear that such access is not limited solely to special events. The House Judiciary Committee amended the bill to also allow access by their accompanying spouses.

It is important to note that CSHB 50 (JUD) makes no change in law that would allow service members under the age of 21 to purchase or consume alcohol in service clubs.

Your support of CSHB 50 (JUD) will be a clear demonstration that Alaska understands and works to address the special needs of those who defend our freedom.

Sectional Analysis

CSHB 50 (JUD)

Access to Licensed Premises

Section 1 removes the phrase "upon special occasions" from AS 04.1.10(d). The effect of this deletion would allow military personnel on active duty, who are extended club privileges by patriotic organizations, to purchase alcoholic beverages in the portion of the club that is a part of the club's licensed premises at times beyond just "special occasions." This extended privilege is also extended to their accompanying spouses.

Section 2 adds the phrase "is a guest or member of the club, or the spouse accompanying a guest, and the guest" to AS 04.11.110(g). The addition of this phrase would allow a person under 21 years of age to enter or remain on the premises of a patriotic organization that is licensed as a club under AS 04.11.110, when alcoholic beverages are present, if the person under 21 years of age is a guest or a member of the cub, and has proper military identification on their person. The amendments to this section add the requirement that for a person under 21 years of age to remain in the licensed premises portion of a patriotic club, the person must be either a guest or a member of the club.

Section 3 conforms AS 04.16.049 (Access of persons under 21 years of age to licensed premises), to the amendment set out in section 2 of the bill. This section adds a subsection to AS 04.16.049(a), which allows a person under 21 to enter or remain on the licensed premises under Title 4, if "the person is permitted on the premises under AS 04.11.110(g)."

Subject: HB 50 support

Gentlemen and Ladies,

I write this email in support of House Bill 50. This bill has been long in coming and I believe it will provide our younger heroes a better and more conducive venue to shed the pressures of military life. All too often, younger veterans are limited to on-base attractions. This allows them to congregate with their peers, but doesn't offer the mentorship opportunities that Patriotic Organizations such as the Veterans of Foreign Wars or the American Legion do. It should be noted that there is no age restriction for membership in the VFW, only that they be an American citizen, honorable service in the Armed Forces, and be the recipient of a qualifying campaign medal. As such, young (under 21) veterans may return from their deployment fresh from combat and be eligible for immediate membership, only to be told they can enter their club only during a special event. This is wrong and must be changed. I believe the verbiage in HB 50 will remove the confusion and correct this wrong.

John W. Mattison

Past Department of Alaska Commander (2008-2009)

VFW asks Saddler to get under-21 military into club

Bill wouldn't let them drink

Alaska Star 4/14/11

BY ZAZ HOLLANDER
Alaska Star

Officers at Eagle River's Veterans of Foreign Wars club enlisted Eagle River's Representative Dan Saddler in their mission to open the doors to active-duty service men and women – even those who aren't quite 21 yet.

House Bill 50 sponsored by Saddler would let soldiers under 21 enter licensed premises of patriotic clubs if they are members or guests of a member. It would not allow them to drink alcohol.

The bill also has a section that expands access to service and patriotic organizations for active-duty service men and women over 21. Some language in statute limits such access to "special occasions" only, Saddler wrote in an e-mail. HB 50 deletes this language.

Saddler called the bill "simply an access bill" and said he wanted to emphasize that the bill would not allow underage persons to drink.

"It simply clarifies that soldiers over 21 don't have to wait for a 'special occasion' to visit patriotic clubs, and that soldiers under 21 can visit if they are club members, or guests," he wrote.

Eagle River's VFW Post 9785 asked for Saddler's help several months ago while the legislator was at the post, according to John Mattison, the post quartermaster and himself a Vietnam-era veteran who retired as a U.S. Army major. Mattison talked to Saddler again by phone in late March.

"A young troop can enlist when he's 17, go through his training, go to Afghanistan, come back when he's 19," Mattison said. "He's eligible for the VFW but he can't come in. I wanted to untangle that mess."

But once inside, wouldn't it be pretty easy for an underage soldier to wander up to the bar and order a beer? Or get a friend to do the buying for him?

Mattison said the VFW doesn't go through a lot of bartenders, and the staff gets to know patrons.

"I don't see that as being a problem at all," he said. "We've talked to our bartenders. They said, 'No, it won't be a problem.' They card everybody they don't know."

In terms of someone buying for an underage member, Mattison said that could theoretically happen the way laws are written now – somebody can bring in an underage soldier as a guest, sit them at a table and buy the table a pitcher of beer.

The larger problem is that right now, an Afghanistan veteran can't come in the door of the VFW unless there's a special occasion, Mattison said. If the bill passes, the soldier could become a dues-paying member.

"Any time we get an Afghanistan or Iraqi vet in there, it's a special occasion, that's how we treat it," he said. "But we've got to sign them in as guests."

The bill remained in the House Judiciary Committee as of Tuesday.

"It's time to get to somewhere where I think is one of the nicest high school stadiums in the nation," Shackelford said of Huffer Stadium. "You can't beat the scenery."

ASAA has yet to finalize a playoff schedule for next year, and it's unclear how many games would be played at the stadium. In past years, the four semifinal (two each for the Large and Small Schools divisions) and the championship games were played in Anchorage. However, that number could be higher this year, as ASAA also voted to create a third, "Middle" division in football that

Sponsor Statement HB 55 Knife Rights Act

"An Act adding definitions of 'gravity knife' and 'switchblade' to the criminal law."

In Alaska, spring loaded knives are an important tool used by hunters, anglers, and craftsmen. According to the American Knife and Tool Institute, there are over 35.6 million Americans who carry and use some type of utilitarian knife which opens with one hand. In the United States, assisted-opening and one-hand-opening knives now make up 80 percent of all knives sold.

In recent years some jurisdictions have acted to restrict the type of knives individuals may carry. In a number of instances this has been done by attempting to define common pocketknives as switchblades, gravity knives, or other knives.

Frequently that switchblade definition is assigned to a knife capable of being opened with one hand and having a "bias towards closure". A "bias toward closure" simply means it has a spring, detent, or other mechanism, which maintains the knife in a closed position until the bias is overcome with applied pressure.

A knife of this configuration falls short of the definition of switchblade used in other states and by the federal government: "*...any knife having a blade which opens automatically (1) by hand pressure applied to a button or other device in the handle of the knife, or (2) by operation of inertia, gravity, or both.*"

Presently Alaskan's are able to purchases these knives in Alaska and online. They are used in the work environment and in recreation. This bill simply clarifies that one handed hunting and utility knives do not qualify as a switchblade and as such are legally owned.

The House Judiciary Committee added preemption language to the bill reserving the authority to regulate knives to the state with limited exceptions. This was done to preclude an individual who carried a knife in one community from being unknowingly in violation when traveling to another jurisdiction.

I would appreciate your support.

States Program

2012 Issue Briefs

Knife Definitions

Introduction

In an effort to limit the type of knives that can be legally imported into the United States, the Department of Homeland Secretary proposed revocation of the admissibility of certain knives with spring assisted opening mechanisms. This proposal would establish a new definition for qualifying switchblade knives.

Under the Switchblade Knife Act of 1958, a switchblade is defined as any knife with a blade which opens automatically by hand pressure applied to a button or other device in the handle of the knife, or by operation of inertia, gravity, or both. The proposed regulation would designate one-hand and assisted opening knives as being switchblades, even though the federal law does not declare these knives as switchblades.

Issue

Spring loaded knives are an important tool for hunters and anglers. According to the American Knife and Tool Institute, there are over 35.6 million Americans, including many who are hunters and anglers, who carry and use some type of utilitarian knife which opens with one hand. In the United States, assisted-opening and one-hand-opening knives are 80 percent of all knives sold. Spring loaded hunting knives should not qualify as switchblade knives.

Language

The Texas State Legislature passed H.B. No. 4456. This bill provided the state definition for qualifying switchblade knives.

1. "Switchblade knife" means any knife that has a blade that folds, closes, or retracts into the handle or sheath that opens automatically by pressure applied to a button or other device located on the handle, or opens or releases a blade from the handle or sheath by the force of gravity or by the application of centrifugal force.
2. The term (Switchblade) does not include a knife that has a spring, detent, or other mechanism designed to create a bias toward closure that requires exertion applied to the blade by hand, wrist, or arm to overcome the bias toward closure and open the knife.

Points of Interest

- Court cases in several states such as California, Illinois, Michigan, and Texas, have all ruled in favor of assisted-opening and one-hand opening knives. These knives are not considered switchblades because they do not possess the activating button or device on the handle of the knife.

Contact

For more information regarding this issue, please contact: Jennifer Lundy or Bethany O' Donovan (202) 543-6850; Jennifer@sportsmenslink.org or Bethany@sportsmenlink.org

2/15/2012

Dear Representative,

The possession of a knife in Alaska is not just a common practice, as it may be in other states, but in many cases the possession of a knife in Alaska is a necessity, which can determine the difference between life and death, between surviving and perishing.

Alaska currently has a prohibition on the possession of gravity knives and switchblade knives. Unfortunately, in many states the standard definition of these knives as used in Alaska's current statute, has resulted in the prosecution and jailing of people in possession of knives which are not, in fact, gravity knives or switchblade knives. Rather, these are folding pocket knives that are commonly used for hunting, fishing, camping, hiking, on worksites and other outdoor and everyday activities, and represent some 80% of the knives sold in the U.S. today.

In many states this definition has led to thousands of dollars in fines and court costs, for both the defendants and the jurisdictions prosecuting them. HB55 would clarify the definition of gravity knives and switchblade knives so it clearly does not include average, everyday knives that are commonly in possession by the public. HB55 protects honest law abiding Alaskans from potential legal jeopardy.

Knife Law Preemption Amendment:

Because knives are so prevalent in Alaska and possession is so common, knife laws around the state should be consistent. What is legal in Juneau should be legal in Barrow. Alaskans should be able to know that the law is consistent statewide. Alaskans already benefit from state firearms preemption, which makes the gun laws of Alaska consistent throughout the state. The same should hold true for knives.

Preemption would assure that if you change the definition of switchblades and gravity knives with HB55 ,it will apply statewide.

As we have seen in recent U.S. Supreme Court rulings, the Second Amendment is an individual right and that right has been incorporated to apply in the states. For this reason alone, all states should have knife preemption laws to assure that citizens are protected from onerous local laws, which infringe on their rights.

Beyond that argument, knife preemption laws make sense. Preemption allows law enforcement as well as citizens to know that what is legal in Anchorage is legal everywhere in Alaska.

It is for these reasons, as well as others, that Knife Rights strongly urges you to vote YES on HB55 and YES on the preemption amendment.

Court of Appeals of Alaska

785 P.2d 563; 1990 Alas. App. LEXIS 5

January 19, 1990

PRIOR HISTORY: [1]** Appeal in File Nos. A-2637/2638 from the Superior Court of the State of Alaska, Fourth Judicial District, Fairbanks, Trial Court Nos. 4FA-S88-0639CR & 4FA-S88-0374CR, Jay Hodges, Judge. Appeal in File Nos. A-2711/2783/2839 from the Superior Court of the State of Alaska, Third Judicial District, Anchorage, Trial Court Nos. 3AN-S88-1686CR, 3AN-S88-3460CR & 3AN-S88-2661CR, Mark C. Rowland, Judge.

CASE SUMMARY:

PROCEDURAL POSTURE: The state sought review of orders from two Superior Courts (Alaska), which dismissed the charges against defendants for first-degree misconduct involving weapons, a class C felony, in violation of Alaska Stat. § 11.61.200(a)(3).

OVERVIEW: All defendants were indicted by a grand jury for first-degree misconduct involving weapons. Defendants possessed a "butterfly knife" which is also known as a "balisong knife." The trial courts concluded that a butterfly or balisong knife was not a prohibited switchblade or gravity knife and dismissed the charges against defendants. The court affirmed the decision of the trial courts. The court found that the applicable statutes were ambiguous, and given that criminal statutes were to be strictly construed against the government, the court concluded that butterfly knives and balisong knives were not gravity knives and not a prohibited weapon. The court based its decision on the fact that butterfly knives were not switchblade knives nor were they sprung by a downward snap of the wrist. In fact, the court found that a number of motions, albeit quickly performed, were necessary to bring the knives to bear. These knives also do not fit the definition of automatic or semi-automatic. Finally, these knives did not appear to fit the common understanding of the term gravity knife or the way that the term was used in common usage.

OUTCOME: The court affirmed the judgments of the trial court that dismissed the charges against defendants for first-degree misconduct involving weapons.

CORE TERMS: knives, knife, gravity, butterfly, switchblade, blade, balisong, weapon, switchblade knife, concealed, handle, evidentiary hearings, sheath, button, wrist, automatically, dictionary, paralleled, videotape, spring, latch, common usage, force of gravity, centrifugal force, expert testimony, pocketknife, downward, felony, seized, locked

LEXISNEXIS(R) HEADNOTES

Criminal Law & Procedure > Criminal Offenses > Weapons > Possession > Elements

HN1 Alaska Stat. § 11.61.200(a)(3) makes it a felony to possess a "prohibited weapon." "Prohibited weapon" is defined in Alaska Stat. § 11.61.200(e)(1)(D) to include a "switchblade or gravity knife." Neither "switchblade" nor "gravity knife" is specifically defined in the statutes.

Criminal Law & Procedure > Criminal Offenses > Weapons > Possession > General Overview

HN2 The term "gravity knife" is a readily ascertainable and consistent definition. As commonly understood, a gravity knife is one in which the blade opens, falls into place, or is ejected into position by the force of gravity or by centrifugal force. Furthermore, in the Alaska Statute on prohibited weapons, the term "gravity knife" is used in conjunction with "switchblade knife." Alaska Stat. § 11.61.200(e)(1)(D).

Governments > Legislation > Interpretation

HN3 Criminal statutes should be strictly construed against the government.

COUNSEL: Robert D. Bacon, Assistant Attorney General, Office of Special Prosecutions and Appeals, Anchorage, and Grace Berg Schaible and Douglas B. Baily, Attorneys General, Juneau, for Appellants.

Marcia E. Holland, Assistant Public Defender, Fairbanks, and John B. Salem, Acting Public Defender, Anchorage, for Appellees Strange and Kempen.

Nancy J. Nolan, Assistant Public Defender, and John B. Salemi, Public Defender, Anchorage, for Appellees Strange, Stading, and Gonzales.

JUDGES: Bryner, Chief Judge, Coats and Singleton, Judges.

OPINION BY: SINGLETON

OPINION

[*564] Each of these defendants was indicted by a grand jury for first-degree misconduct involving weapons, a class C felony, in violation of AS 11.61.200(a)(3). HN1 This statute makes it a felony to possess a "prohibited weapon." "Prohibited weapon" **[**2]** is defined in AS 11.61.200(e)(1)(D) to include a "switchblade or gravity knife." Neither "switchblade" nor "gravity knife" is specifically defined in the statutes. *See State v. Weaver,* 736 P.2d 781, 782 (Alaska App. 1987). Each of these defendants possessed a "butterfly knife" which is also known as a "balisong knife." The sole question presented by these appeals is whether a butterfly or balisong knife is a prohibited switchblade or gravity knife.

Two evidentiary hearings were held: the first, in Fairbanks before Judge Jay Hodges involved John E. Strange and Rudy Kempen; the second, in Anchorage before Judge Mark C. Rowland involved Strange, again, Christopher A. Stading, and Troy Gonzales. Judge Hodges and Judge Rowland independently determined that a butterfly knife is not a prohibited weapon and therefore dismissed the charges against the defendants and the state appeals. We affirm.

Because neither gravity knife nor switchblade knife are defined in Alaska statutes, we must look to general usage for their meaning. AS 01.10.040. In determining the meaning of words in common usage, we generally look to the dictionary. *See Walker v. State,* 742 P.2d 790,

791 (Alaska App. 1987). **[**3]** The dictionary defines a switchblade knife or switchblade "as a pocketknife having the blade spring-operated so that pressure on a release catch causes it to fly open." *Webster's Third New International Dictionary of the English Language* Unabridged, 2314 (1966) (hereinafter *Webster's).* The butterfly or balisong knives which were seized in this case are identical to those described in *People v. Quattrone,* 211 Cal. App. 3d 1389, 260 Cal. Rptr. 44, 45 (Cal. App. 1 Dist. 1989) as follows:

> The butterfly knife sold by defendant has a fixed blade over two inches long. When not in use, a two-part handle is folded around the blade as a sheath and is secured by a latch at the base of the knife. To open, the latch is released, allowing the two halves of the sheath to swing down on pivots to form a handle exposing the blade. The handle may be **[*565]** secured manually or closed with the latch.

The knives introduced in evidence and demonstrated in the videotapes prepared at the evidentiary hearing satisfy this definition. It is not seriously contended that the butterfly or balisong knives are switchblade knives as we have defined that term. Rather, the contention is that they are gravity knives. In *Weaver,* we **[**4]** addressed the definition of gravity knives. We said:

> HN2↑The term [gravity knife] has a readily ascertainable and consistent definition. As commonly understood, a gravity knife is one in which the blade opens, falls into place, or is ejected into position by the force of gravity or by centrifugal force . . . .
>
> Furthermore, in the Alaska Statute on prohibited weapons, the term "gravity knife" is used in conjunction with "switchblade knife." AS 11.61.200(e)(1)(D). The ordinary person is therefore put on notice that a "gravity knife" must be similar to a switchblade in operating automatically or semi-automatically. The pertinent characteristics which a switchblade and a gravity knife have in common are that they are easily concealed and quickly brought to bear. These characteristics are indicative of knives which are used as weapons rather than tools. Some utility knives are quickly brought to bear, such as a fishing knife or hunting knife in a sheath, but are not easily concealed. Indeed, it is only when these utility knives are concealed that their possession is unlawful. AS 11.61.220(a)(1). An ordinary pocket knife may be concealed upon the person. AS 11.61.220(a)(1). However, an ordinary **[**5]** pocketknife is incapable of being quickly brought to bear.

Weaver, 736 P.2d at 782-83 (footnote omitted).

The two evidentiary hearings produced essentially the same evidence. At the first hearing in Fairbanks, the defendants called Wayne Ross, a local attorney, as a weapons expert to testify that the terms switchblade and gravity knife have a commonly accepted meaning in the weapons trade and that balisong or butterfly knives do not fall within either meaning. He testified that gravity knives, like switchblade knives are released by a button, but differ from switchblade knives in that they do not have a spring. Ross testified that gravity knives were developed by German paratroopers in World War II as a utility knife to cut parachute shrouds.

The state called Alaska State Trooper Jeffrey Hall at the first hearing in Fairbanks to show how easily butterfly knives could be brought to bear. He testified that butterfly knives were primarily used in the martial arts and in combat. He also testified that a butterfly knife was not within his understanding of the term switchblade knife or gravity knife. The defense also

put on a number of witnesses to testify that butterfly knives were **[**6]** readily available in commercial stores in Anchorage and Fairbanks.

Testimony before Judge Rowland at the second hearing in Anchorage paralleled testimony before Judge Hodges with one exception. Trooper Hall who had been called as a prosecution witness in Fairbanks was called as a defense witness in Anchorage. The state introduced a videotape of Alaska State Trooper John Johnston demonstrating the use of three of the butterfly knives which had been seized from defendant Strange. Trooper Johnston showed that the knives could be easily concealed on the body and could quickly be rbought to bear by a series of wrist movements utilizing centrifugal or inertial force. He indicated that he had only had about ten minutes experience with butterfly knives before making the videotape. He was able to bring the knives to bear quickly even though he took them as he found them without oiling them or working them to make them loose and easier to open.

Trooper Johnston's demonstration paralleled one given in *Quattrone,* where the officer was also able to rapidly open and lock the butterfly knife with one hand using three wrist movements. In that case, the officer testified that he needed only half **[**7]** an hour to perfect his technique. *Quattrone,* 260 Cal. Rptr. at 45.

[*566] A number of courts have considered whether butterfly or balisong knives qualify as prohibited switchblade or gravity knives. *See, e.g., Taylor v. United States,* 848 F.2d 715 (6th Cir. 1988); *Precise Imports Corporation v. Kelly,* 378 F.2d 1014 (2d Cir. 1967), *cert. denied,* 389 U.S. 973, 19 L. Ed. 2d 465, 88 S. Ct. 472 (1967); *Quattrone,* 211 Cal. App. 3d 1389, 260 Cal. Rptr. 44; *People v. Dolson,* 142 Misc. 2d 779, 538 N.Y.S.2d 393 (N.Y. Co. Ct. 1989); *People v. Mott,* 137 Misc. 2d 757, 522 N.Y.S.2d 429 (N.Y. Co. Ct. 1987). The courts, which disagree on whether butterfly knives are switchblades or gravity knives, have not been particularly helpful because of differences in statutory language. In *Quattrone,* the court dealt with California Penal Code § 653k which "defines an illegal switchblade as 'a spring-blade knife, snap-blade knife, gravity knife or any other similar type knife, [having a blade or blades] which can be released automatically . . . . by any type of mechanism whatsoever.'" *Quattrone,* 260 Cal. Rptr. at 46. In *Taylor,* the court dealt with the Switchblade Knife Act which defines a switchblade knife at 15 U.S.C. § 1241(b) as follows:

> The term "switchblade knife" means **[**8]** any knife having a blade which opens automatically --
>
> (1) by hand pressure applied to a button or other device in the handle of the knife, or
>
> (2) by operation of inertia, gravity or both.

Taylor, 848 F.2d at 716 n.1. Both of these definitions are broader than the definitions in our statute which simply uses the terms without further defining them. *Taylor* is also distinguishable because the court there relied heavily on an administrative interpretation of the Act in determining that balisong or butterfly knives were covered.

The New York cases dealt with New York Penal Code § 265.00(5) which stated that:

> "Gravity knife" means any knife which has a blade which is released from the handle or sheath thereof by the force of gravity or the application of centrifugal force which, when released, is locked in place by means of a button, spring, lever or other device.

The New York cases held balisong or butterfly knives not to be gravity knives because they were not locked in place by means of a button, spring, lever or other device when released. *Dolson,* 538 N.Y.S.2d 393; *Mott,* 137 Misc. 2d 757, 522 N.Y.S.2d 429. Our statute does not

have similar language.

Having carefully reviewed the statutes and **[**9]** the knives introduced into evidence and bearing in mind that HN3 criminal statutes should be strictly construed against the government, *see State v. Andrews,* 707 P.2d 900, 907 (Alaska App. 1985), *aff'd,* 723 P.2d 85 (Alaska 1986), we conclude that butterfly knives and balisong knives are not gravity knives.

A number of considerations lead us to this conclusion. First, butterfly knives are not "switchblade knives in which the blade is sprung by a downward snap of the wrist." *Webster's* at 993. As we have seen, these knives do not meet the definition of switchblade knives. Nor are they sprung by a downward snap of the wrist. In fact, a number of motions, albeit quickly performed, are necessary to bring the knives to bear. These knives also do not fit the definition of automatic or semi-automatic. Finally, these knives do not appear to fit the common understanding of the term gravity knife or the way that the term is used in common usage. *See, e.g., Quattrone,* 260 Cal. Rptr. at 47-48. It is instructive that the expert testimony in *Quattrone* apparently paralleled the expert testimony given at the two evidentiary hearings in this case regarding the meaning of the term "gravity **[**10]** knife."

The judgment of the superior court is AFFIRMED.

March 15, 2012

Dear Senator French

Subject: HB 55 ***"An Act adding definitions of 'gravity knife' and 'switchblade' to the criminal law."***

Please consider scheduling this legislation for a hearing at your earliest convenience. My office will be happy to assist you in any way we can. I am presently contacting other members of this body to answer any questions that they may have. Please feel free to contact us with any questions you have.

Attached is a committee package.

Included are the following:

- Carrier of the Bill (Rep Mark Neuman)
- Letter of Request
- Current version of the bill.
- Sponsor statement.
- 2012 Fiscal Notes

Please feel free to contact myself or my aide Rex Shattuck (465-2696) with any questions.

Thank you for your consideration.

Sincerely,

Mark Neuman

Representative Bob Lynn

HB 56
INCLUDE ARSON IN CRIMES OF CONSPIRACY

Sponsor Statement

House Bill 56 adds first and second degree arson to Alaska's conspiracy statute, which will provide strong deterrents to committing arson and close a loophole in current law. HB 56 was drafted after it became apparent during a committee hearing last session that arson is not currently included in Alaska's conspiracy statute. Because of this, arsonists may only be charged with a crime if the arson is attempted or completed, and they cannot be charged with the separate crime of conspiracy if two or more people are involved in the arson. This bill only adds first and second degree arson

- Conspiracy: an agreement by two or more people to commit a crime with at least one overt act committed towards the completion of the crime.
- Arson in the first degree: damaging property by fire or explosion and recklessly placing another person (including emergency personnel) in danger or serious physical injury. (Class A Felony)
- Arson in the second degree: knowingly damages a building by fire or explosion. (Class B Felony)
- Conspiracy to commit a Class A Felony (Arson One) is a Class B Felony.
- Conspiracy to commit a Class B Felony (Arson Two) is a Class C Felony.

HB 56 will fix those problems. Including arson in the conspiracy statute will provide stronger punishments, whether or not conspirators actually complete the arson. Under HB 56, if arson is committed, the conspiring arsonists can charged with *both* arson and conspiracy, rather than just arson under the current law. If the arson is not completed, however, this bill will allow conspirators to be prosecuted for conspiracy to commit arson, which is not punishable under current law.

If you have any questions, please contact Representative Gruenberg's legislative aide, Miles Brookes, at 465-4940.

Alaska State Legislature

House of Representatives

Representative Carl Gatto
Representative Max Gruenberg
Representative Bob Lynn

HB 56
INCLUDE ARSON IN CRIMES OF CONSPIRACY

Relevant Statutes

AS 11.31.120 Conspiracy

(a) An offender commits the crime of conspiracy if, with the intent to promote or facilitate a serious felony offense, the offender agrees with one or more persons to engage in or cause the performance of that activity and the offender or one of the persons does an overt act in furtherance of the conspiracy.

(b) If an offender commits the crime of conspiracy and knows that a person with whom the offender conspires to commit a serious felony offense has conspired or will conspire with another person or persons to commit the same serious felony offense, the offender is guilty of conspiring with that other person or persons to commit that crime whether or not the offender knows their identities.

(c) In a prosecution under this section, it is a defense that the defendant was merely present at the time that two or more other persons agreed to engage in or cause the performance of a serious felony offense.

(d) In a prosecution under this section, it is not a defense that a person with whom the defendant conspires could not be guilty of the crime that is the object of the conspiracy because of

(1) lack of criminal responsibility or other legal incapacity or exemption;

(2) belonging to a class of persons who by definition are legally incapable in an individual capacity of committing the crime that is the object of the conspiracy;

(3) unawareness of the criminal nature of the conduct in question or of the criminal purpose of the defendant; or

(4) any other factor precluding the culpable mental state required for the commission of the crime.

(e) If the offense that the conspiracy is intended to promote or facilitate is actually committed, a defendant may not be convicted of conspiring to commit that offense with another person for whose conduct the defendant is not legally accountable under AS 11.16.120(b).

(f) In a prosecution under this section, it is an affirmative defense that the defendant, under circumstances manifesting a voluntary and complete renunciation of the defendant's criminal intent, either (1) gave timely warning to law enforcement authorities; or (2) otherwise made proper effort that prevented the commission of the crime that was the object of the conspiracy. Renunciation by one conspirator does not affect the liability of another conspirator who does not join in the renunciation.

(g) Notwithstanding AS 22.10.030, venue in actions in which the crime of conspiracy is alleged to have been committed may not be based solely on the location of overt acts done in furtherance of the conspiracy.

(h) In this section,

(1) "overt act in furtherance of the conspiracy" means an act of such character that it manifests a purpose on the part of the actor that

the object of the conspiracy be completed;

(2) "serious felony offense" means an offense

(A) against the person under AS 11.41, punishable as an unclassified or class A felony;

(B) involving controlled substances under AS 11.71, punishable as an unclassified, class A, or class B felony;

(C) that is criminal mischief in the first degree under AS 11.46.475; or

(D) that is terroristic threatening in the first degree under AS 11.56.807.

(i) Conspiracy is

(1) an unclassified felony if the object of the conspiracy is murder in the first degree;

(2) a class A felony if the object of the conspiracy is a crime punishable as an unclassified felony other than murder in the first degree;

(3) a class B felony if the object of the conspiracy is a crime punishable as a class A felony;

(4) a class C felony if the object of the conspiracy is a crime punishable as a class B felony.

AS 11.46.400 Arson in the First Degree

(a) A person commits the crime of arson in the first degree if the person intentionally damages any property by starting a fire or causing an explosion and by that act recklessly places another person in danger of serious physical injury. For purposes of this section, "another person" includes but is not limited to fire and police service personnel or other public employees who respond to emergencies, regardless of rank, functions, or duties being performed.

(b) Arson in the first degree is a class A felony. Conspiracy "B"

AS 11.46.410 Arson in the Second Degree

(a) A person commits the crime of arson in the second degree if the person knowingly damages a building by starting a fire or causing an explosion.

(b) In a prosecution under this section, it is an affirmative defense

(1) that no person other than the defendant had a possessory, proprietary, or security interest in the building or that all persons having such an interest consented to the defendant's conduct; and

(2) that the sole intent of the defendant was to damage or destroy the building for a lawful purpose.

(c) Arson in the second degree is a class B felony. Conspiracy "C"

Memorandum

TO: Representative Max Gruenberg
FROM: Chuck Burnham, Legislative Analyst
DATE: February 21, 2012
RE: Legislative History: Arson as a Crime of Conspiracy
LRS Report 12.207

You asked whether the Alaska Legislature has considered adding the crimes of arson in the first or second degree to the offenses that can be prosecuted as crimes of conspiracy.

As you know, Alaska's current law on crimes of conspiracy is codified at AS § 11.31.120, which was enacted in 1994.[1] We located one measure—SB 343 (1991)—through which the Legislature contemplated including arson in the first and second degrees (AS § 11.46.100-110) among the crimes that could be prosecuted as conspiracy.[2]

The Senate approved CSSB 343 (JUD) AM on reconsideration by a vote of 18-2 on May 6, 1992, after which it received referrals to the House Judiciary and Finance Committees on May 8. The bill was forwarded to Finance on May 10 after receiving 4 "do pass" and one "no recommendation" votes in Judiciary. The bill received no further hearings before adjournment of the second session of the 17th Legislature on May 15, 1992. We located no subsequent measure seeking to include arson under the conspiracy statute.

Our review of committee minutes for SB 343 found no specific mention of the arson provisions of the bill. Where opposition was expressed, it was typically related to the broader topics of the impact, effectiveness, and necessity of conspiracy laws. Although supported by the Department of Law and Attorney General, SB 343 brought opposition from other individuals and groups—notably the American Civil Liberties Union—who believed existing laws were sufficient deterrents to the crimes considered in the bill. The Public Defender's Office and Office of Public Advocacy held the position that the crime of conspiracy was a "high cost experiment" and unlikely to induce guilty pleas, enhance penalties, or increase public safety.[3]

We hope this is helpful. If you have questions or need additional information, please let us know.

[1] Ch. 3 SLA 1994.

[2] We include a copy of the text of SB 343 (1991) as an attachment. We searched bills back to 1987 for crimes of conspiracy and arson. Although we believe our research to be through, there may be additional bills relevant to your request that we over looked due to variations in construction and wording.

Press Release

May 1, 2009

2009 Arson Awareness Week

May 3 - 9

(ANCHORAGE, Alaska) — Across the nation this week, fire officials are speaking out against Arson. The Alaska Department of Public Safety is joining in the educational push. According to the National Fire Protection Association, in 2005, an estimated 323,900 intentionally set fires were reported to U.S. fire departments. These fires resulted in 490 civilian fire deaths, three firefighter deaths, 1,500 civilian fire injuries and 7,600 firefighter injuries. These fires caused $1.102 billion in direct property damage.

In Alaska during 2005, six deaths were attributed to intentionally set fires. Last year, there were two people in Alaska killed by intentionally set fires.

The theme for the 2009 Arson Awareness Week is Arson for Profit. Nationwide, community officials are reporting a sharp increase of vehicle owners who are suspected of reporting their vehicle stolen and then destroying their vehicle by setting it on fire. There has also been an increase of vehicle arson arrests.

Arsons are often times done for financial reasons, to include collecting insurance money, liquidating property, dissolving businesses and concealing losses.

Arson for profit affects everyone through the loss of life, increased insurance premiums and related expenses for the fire and law enforcement professionals. It can be curtailed by a collaborative effort and cooperation of fire investigators, law enforcement, insurance professionals and the legal system.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 56

Analysis

HB 056 adds arson in the first and second degrees to those crimes defined as a "serious felony offense" in the statute defining conspiracy. With this amendment, the crime of conspiracy would prohibit persons from conspiring to commit arson in the first or second degree.

Passage of this legislation would have no foreseeable fiscal impact on the Department of Law.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 56

Analysis

This legislation is creating a new serious felony crime of conspiring to commit arson in the first degree and arson in the second degree. Therefore, the Department of Corrections has no information to determine the number of offenders that will be placed under the custody of the department.

The department will closely monitor potential future impacts of this legislation.

THE ALASKA ASSOCIATION OF FIRE & ARSON INVESTIGATORS

Representative Carl Gatto
Representative Max Gruenberg
Representative Bob Lynn

Reference: House Bill 56 - Arson

Dear Representatives:

The Alaska Association of Fire & Arson Investigators is in total support of House Bill 56 and would like to offer our assistance in any way, which would aid in the enactment of this bill.

It is our belief the enactment of this bill will provide a greater deterrent to the crime of arson and allow for the prosecution of arson/conspiracy cases, where the actual arson was not completed, but a crime nonetheless committed. This will put a closure to a loophole presently in the current law.

Please feel free to contact my office at 907-262-4792 or ghale@borough.kenai.ak.us.

Sincerely,

Gary E. Hale, President
Alaska Association of Fire & Arson Investigators

State Capitol
Juneau AK 99801-1182

Dear Representative Gatto:

On behalf of our respective organizations, we would like to thank you for introducing HB 56, an Act making arson in the first degree and arson in the second degree serious felonies for purposes of application of the crime of conspiracy.

We met recently to review proposed legislation and decided to unanimously support this bill.

Again, thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organizations can do to assist in the passage of this bill.

Sincerely,

John Lucking Jr., President
Alaska Peace Officers Association

To catch an arsonist

Juneau Crime Line announces new arson reward program

Posted: March 15, 2012 - 12:10am

By EMILY RUSSO MILLER

JUNEAU EMPIRE

After a reported 31 arsons in 13 months, the Juneau Crime Line is upping the ante in hopes of catch arsonists who have evaded police.

The nonprofit crime solving organization, which is Juneau's equivalent to Crime Stoppers, announced a new $1,500 arson reward program Wednesday to incentivize those with information about unlawful blazes to come forward.

"We're trying to get some information to help the police department to get these arsons to stop," longtime Crime Line board member Robin Paul said in a phone interview. "That's our main goal."

Crime Line tipsters, who are guaranteed anonymity, are usually awarded up to $1,000 when they provide information that is instrumental to cracking unsolved cases. But Paul hopes the extra $500 will prompt more leads.

"These arsons are something that have really been problematic for the community," she said.

Capital City Fire Marshal Daniel Jager said there were 31 arson incidents reported from January 2011 through February 2012, and that all of those cases are still open and active. Those include 11 vehicle fires, fire damage to the turf field at Adair-Kennedy Memorial Park and Thunder Mountain High School sports fields and the destruction of a Porta-Potty and to the Twin Lakes playground, according to a statement from Paul.

"All of these are still open, and we're still actively pursing leads on them," Jager said. "We haven't just forgot about them."

Perhaps the most troubling suspected arson was the vehicle and carport fire at the Crow Hill Condominiums last July that "could have resulted in tragedy if the fire had spread to the complex and trapped unaware sleeping residents," Paul said.

The perpetrator or perpetrators of that crime still remain at large.

CCFR and the Juneau Police Department work together to solve arson cases, with the fire marshal focused on the fire scene (the point of origin of the fire, whether an accelerant was used, etc.) while the police conduct the criminal investigation. But when leads wind down or "things go cold," as Paul put it, Crime Line can reignite a case by enticing informants to come forward with a monetary award.

"(Arson) is a very big concern for us, and I'm pleased to see the Crime Line is offering rewards to help us solve these issues," JPD spokesman Lt. David Campbell said in an interview.

He said arson not only poses danger to property and people, but to firefighters and others who respond to the scene.

Arson cases can be difficult to investigate and prosecute if there's not a confession or witness, Jager said, because potential physical evidence is not only destroyed in the flames, but also by firefighters while doing their job suppressing the fire. He said there's about a 2 percent arson conviction rate nationwide.

Jager said he hopes this new reward program will jog people's memory and cause them to think back to see if they remember anything out of the ordinary; and for those who know something, to come forward. The anonymity Crime Line affords is the key, he said.

"Sometimes people are a little more willing to do the right thing if they have a reward, but the key is not so much the money award, it's the fact that it can be done anonymously," he said. "They don't want people to know that they're involved and that's understandable. I think the Crime Line is a great avenue for people who aren't comfortable doing that in person."

Jager added, "The money helps, but for the most part, people, they're just concerned about potential ramifications."

The 31 arsons have come at a high price. Jager estimates the total damage from all the above instances is much more than $100,000, and the damage from the Crow Hill fire alone caused as much.

Local businesses — like Shattuck & Grummett Insurance and Malia Hayward State Farm Insurance — and other community members have stepped forward to pledge money to the special arson reward program. Crime Line is funded only by donations from the community.

This isn't the first time Crime Line has created a special reward program. According to the Crime Line website, more than $10,000 was pledged for the unsolved murder of Johnny L. Jack Sr. in October 1988 and the murder of Cindy Elrod nearly 30 years ago.

The group also offers up to $1,500 for reporting the purchase or distribution of oxycontin in the Juneau area.

Other popular programs are the $100 reward for reporting drunken driving, and the special graffiti program, sponsored by the city, also pays $100, according to the website.

The last suspected arson incident in Juneau area, Jager said, was a vehicle fire by Glacier Gardens, a botanical garden on Glacier Highway, about two weeks ago.

Sponsor Statement

Alaska Statutes already recognize that we have a right to use deadly force to protect our family, person, and property. HB 80 further clarifies that right exists not only in our home but also in any place that we have a right to be.

This legislation clarifies the individual's right to stand their ground and not second guess the consequence of protecting their family or self.

HB 80 strengthens the legal recognition of a basic human right to defend oneself by sending a message to the Judiciary and Law Enforcement that it is the criminal who has the duty to retreat.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 080

Analysis

House Bill 80 expands the places from which a person need not retreat before using deadly force in self defense to any place the person has a right to be. The Criminal Division anticipates an increase in cases, to both screen referrals and prosecute those that are accepted.

The fiscal impact of this legislation cannot be accurately determined at this time.

Mr. James Fayette
310 "K" Street, Suite 520
Anchorage Alaska 99501

Dear ~~Mr. Fayette~~ Jay,

The Senate Judiciary Committee has a bill under consideration, House Bill 80, which would significantly alter the law of self-defense in Alaska. Your experience as a veteran homicide prosecutor would be very valuable in helping the committee to understand the nuances of self-defense especially with respect to its application in actual cases.

I am inviting you to testify before the committee on Friday, March 16, 2012, starting at 1:30 p.m.

Sincerely,

Senator Hollis French

The Honorable Hollis French
Chair, Senate Judiciary Committee
State Capitol, Room 417
Juneau, AK 99801-1182

Re: *HB 80*

Dear Senator French:

Thank you for conducting the hearing before the Senate Judiciary Committee regarding the above-referenced bill. Please permit me to address two issues.

First, I hope it was made clear during his testimony that Assistant District Attorney Jay Fayette was testifying on his own behalf, and not on behalf of the Department of Law or the administration. We respect his right to express his views as a private citizen but there should be no confusion over whose views he purported to represent.

Secondly, we respectfully disagree with Mr. Fayette. Along with the 28 legislators who sponsored and co-sponsored this bill, the administration believes it has merit.

Alaskans are undoubtedly drawn to this state for many reasons, including the outdoor and recreational lifestyle. We believe, along with other states who have enacted similar legislation, that citizens have a right to protect themselves outside the home if confronted by deadly force. We acknowledge this may complicate certain prosecutions – and we appreciate your sensitivity to this factor as a former prosecutor – but in the final analysis the rights of citizens to defend themselves, both in and outside the home, should not rest on the convenience of prosecutors. Notwithstanding Mr. Fayette's anecdotal evidence, we are not convinced that the perpetrators of those crimes he described would have gone free had the law been in effect. The fact that defendants may attempt to take advantage of the law once it is on the books should not dissuade us from enacting laws that protect a citizen's right to legitimate self-defense outside the home.

Thank you for your consideration. If you have any questions or concerns about the administration's position, please feel free to contact me.

Sincerely,

Michael C. Geraghty
Attorney General

JOHN STRALEY, representing himself
Sitka, AK
POSITION STATEMENT: Testified in opposition to HB 381.

BRIAN JUDY, Alaska Liaison
National Rifle Association (NRA)
POSITION STATEMENT: Testified in support of HB 381.

CHUCK KOPP, representing himself
POSITION STATEMENT: Testified in strong support of HB 381, but suggested caution.

SUE MCLEAN, Director
Criminal Division
Department of Law (DOL)
POSITION STATEMENT: Testified that DOL is opposed to HB 381.

ACTION NARRATIVE

9:38:35 AM
CHAIR HOLLIS FRENCH called the Senate Judiciary Standing Committee meeting to order at 9:38 a.m. Senators McGuire, Wielechowski, Coghill, and French were present at the call to order.

HB 381-SELF DEFENSE

9:38:47 AM
CHAIR FRENCH announced the consideration of HB 318. [CSHB 381(JUD) was before the committee.] It was heard previously at which time testimony was taken from the sponsor and DOL and one public member.

JOHN STRALEY, representing himself, informed the committee that he has been a criminal defense investigator since 1984 and the author of several crime novels. Based on that experience he is speaking in opposition to HB 381. The current law works and protects citizens. It asks that people pause before using deadly force in potentially violent confrontations, whereas the proposed change is an invitation to gun fighting. He related that he has sat with dozens of criminal defendants after a homicide and although the circumstances are all different, a unifying theme is that almost all felt justified in the instant that they took a life. But later, and often just seconds later, these criminal defendants saw that their judgment was flawed or clouded and wrong. We don't need to send citizens the message that conflict should be quickly resolved by violence and that's what HB 381 does, he said.

9:43:27 AM

MR. STRALEY observed that the language in the bill sounds reasonable and like it's just a small change, but it's like changing a compass course a few degrees. Over time it will have a wide impact on Alaskan life. He related that his and other crime stories are about citizens bypassing the flawed and burdensome justice system to mete out moral vengeance. His stories clearly differentiate between the good guys and the bad guys and the good guys always win. But this bill isn't crafting a novel. Crafting legislation is a slow and deliberative process that considers the effects and consequences.

MR. STRALEY expressed his strong belief that this small change will increase gun violence and ironically it will offer the bad guys one less hurdle to jump for killings that they might want to commit. HB 381 doesn't require somebody to retreat or pause to consider the consequences. He suggested that if the committee isn't inclined to listen to him then it should listen to the Department of Law, and people like Rick Svobodny who have written to oppose this bill. HB 381 is well intentioned, but it sends the wrong message and the results will have deadly consequences, he concluded.

9:48:47 AM

BRIAN JUDY, Alaska Liaison, National Rifle Association (NRA), described HB 381 as important legislation that provides protection and assurance that a person doesn't have to retreat when he/she is lawfully in a place and feels threatened. He pointed out that existing Alaska law already specifies that a person has no duty to retreat if he/she is "on premises which the person owns or where the person resides or in a building

where the person works." The intent of HB 381 is to extend that to any place where a person has a legal right to be.

Under the proposed language of HB 381, a person who is dragged into an alley by a rapist or a person who is dragged into a car by a kidnapper has no duty to retreat and they may fight back with force. The NRA views it as common sense to be able to stand one's ground and meet force with force, he said.

MR. JUDY reiterated that law-abiding citizens shouldn't fear criminal prosecution when they stand their ground and defend themselves when in a place that they have a legal right to be. On behalf of the NRA he urged support for HB 381.

9:55:27 AM

CHUCK KOPP, representing himself, said he is speaking in strong support of the intent of HB 381 to help protect innocent citizens, but he has reservations about the unintended consequences as currently written.

MR. KOPP pointed out that existing law appropriately identifies in Title 11 that the use of deadly force is justified when used to defend against murder, felony assault, kidnapping, sexual assault, and sexual abuse of a minor when perpetrated in your home, place of work and anyplace you are protecting a family member. However, the law also recognizes that most uncomfortable aggressive or violent encounters don't rise to this level. Most occur in public places and there's a fundamental assumption in the law that people show deference and yield to one another in these shared access areas.

MR. KOPP said that while the sponsor statement says that this legislation makes it clear that it's the criminals who have a duty to retreat, the reality is that when violence erupts the ensuing investigation has difficulty determining who the criminal is in the matter.

MR. KOPP offered his belief that the current law establishes a correct balance between the right to defend oneself and the duty to yield. He cautioned that HB 381 may have the unintended impact of tipping the balance to an overzealous use of deadly force in self defense. He highlighted that the Department of Law drafted an amendment that addresses his concerns and carries forward the intent of the sponsor.

10:00:41 AM

SENATOR WIELECHOWSKI asked if he is expressing support for the proposed amendment that is on members' desks.

MR KOPP answered yes.

SENATOR MCGUIRE asked to hear from the Department of Law.

SUE MCLEAN, Director, Criminal Division, Department of Law (DOL), stated that while the proposed amendment may be a compromise, DOL is still opposed to HB 381. Mr. Judy suggested that the purpose of this law is to relieve a person of the fear of prosecution for defending him or herself, but what hasn't been said is that there is an extraordinary and unacceptable problem with prosecuting people after they have defended themselves. When a homicide or use of deadly force incident is being investigated, the state is aware that it has the burden to prove that a person did not act in self defense otherwise it will face a judgment of acquittal. This means that a case isn't filed when it appears that there's reasonable doubt.

10:03:48 AM
MS. MCLEAN provided the following illustrations where DOL declined to prosecute because it saw self defense:

- Mr. A was in a public park and came on to a woman. She called her boyfriend on her cell phone to report that a man was harassing her. The boyfriend possibly heard that the man was threatening his girlfriend. The boyfriend rushes to the park and approaches Mr. A with a baseball bat in his raised hand. Mr. A has a gun in his waistband and shoots the boyfriend. DOL reviewed the circumstances and determined it couldn't prove a) that Mr. A had started a violent incident and therefore couldn't claim self defense because it wasn't clear that he was in any way physically threatening the girlfriend; and b) that Mr. A knew that he could retreat. This was a situation that came up quickly and a bat absolutely is a deadly weapon so Mr. A was not charged. HB 381 will exacerbate this type of situation, she asserted.
- Mr. A was found stabbed to death and in a ditch. There was no eyewitness but the police learned that he was seen arguing with Mr. B earlier in the evening. Mr. B acknowledged that they had been arguing. Mr. B said Mr. A threw a coat over my head and I knew that he always carried a knife so I thought he was trying to catch me off guard so he could stab me. I ripped the coat off my head and I stabbed him. Because there were no eyewitnesses DOL knew it

couldn't prove that Mr. B's story wasn't true so he wasn't charged.

CHAIR FRENCH recessed the meeting from 10:06 a.m. to 10:25 a.m. due to a fire alarm.

10:25:26 AM
MS. MCLEAN provided a third example where the state did not file charges because it could not prove that the person did not act in self defense.

- The police were called because Mr. A was sitting on the curb and it appeared that his throat had been cut. Mr. A said he and Mr. B were in the adjacent apartment building and they were fighting. Mr. A was intoxicated. A woman in the apartment said she saw Mr. B cutting Mr. A but she didn't know what happened before that because she was in a different room, but she could hear them quarreling. Mr. B told the police that he and Mr. A were fighting. He said Mr. A tried to strangle me and I felt that I had to use deadly force to prevent my being killed. The intoxicated Mr. A said he didn't know where his hands were when he was fighting Mr. B. The state's perspective is that it didn't see a duty to retreat and couldn't disprove the reasonableness of Mr. B's use of force.

MS. MCLEAN noted that the packets have a copy of the jury instructions and use note that are typically given in cases where deadly force is used. It clearly states that a person may use deadly force unless he/she knows that he/she can safely retreat. The retreat duty doesn't apply in the specified circumstances like the home. These cases that are before a jury have already gone through a screening process in which DOL has assessed them and made a decision that there is no reasonable basis to claim self defense in the case and charged. That's an example of why it's troubling to have a bill in which it is alleged that people need protection from overzealous prosecutors who are prosecuting people who have legitimately acted in self defense.

10:29:20 AM
MS. MCLEAN emphasized that DOL believes that if this bill becomes law it will absolutely increase trials. A defense attorney now might advise a client to consider a resolution that would save some jail time, but under this bill the defense attorney is likely to advise a client to go to trial because he/she didn't have to retreat. Furthermore, this change in the

law would give unreasonable people a license to act unreasonable and not retreat. The prosecution won't be able to say that it wasn't reasonable for a person not to retreat when there's a law that says they the person didn't need to retreat.

10:33:45 AM
CHAIR FRENCH moved conceptual Amendment 1 and objected for discussion purposes.

AMENDMENT 1

Add at the end of paragraph (5):

Provided that such person may use deadly force against an intruder or attacker in a place that is not his or her residence without a duty to retreat only if the person reasonably believes that he or she or another is in imminent danger of death or serious bodily harm from which he or she or another can only be saved by the sue of deadly force against the intruder or attacker.

CHAIR FRENCH, noting that the amendment came from the Department of Law, asked DOL for an explanation.

MS. MCLEAN reiterated that DOL is opposed to this bill. The amendment attempts to say that a person that is in a place they have a right to be can use deadly force if the evidence shows that it was the only way that the person could have defended him/herself against death or serious physical injury.

10:36:09 AM
CHAIR FRENCH removed his objection to Amendment 1

SENATOR COGHILL asked for help understanding the nexus between "reasonably believes" [on line 3] and "only" [be saved] on line 4.

SENATOR WIELECHOWSKI interpreted it to mean that a person reasonably believes that they can only be saved by the use of deadly force.

CHAIR FRENCH agreed.

SENATOR COGHILL said that's the clarification he wanted; otherwise there could be two standards.

10:37:55 AM
CHAIR FRENCH observed that the instructions that the jury receives is helpful. He read the following reasonableness clause from the pattern jury instruction that is given in cases involving use of deadly force in defense of self or others:

> The reasonableness of a defendant's beliefs must be evaluated by the jury based on the circumstances of the situation facing the defendant, including any relevant knowledge the defendant had about the other person; physical attributes of all persons involved (including the defendant); and any prior experiences that could provide a reasonable basis for the defendant's beliefs.

SENATOR COGHILL observed that "reasonably" gives the mental state while "only" says that it's without regard to mental state.

SENATOR WIELECHOWSKI asked if "reasonably believes" is an objective standard or a subjective standard.

MS. MCLEAN explained that there are always two standards in self defense. First, there has to be proof of an actual subjective belief - the defendant has to actually believe it. Second, there has to be a subjective belief that the jury is willing to regard as reasonable.

10:39:30 AM
CHAIR FRENCH added that the reasonableness clause is somewhat subjective, but reasonable belief means that a reasonable person would have held such a belief under the same circumstance.

SENATOR COGHILL observed that the part people will have to look at is whether or not [the use of deadly force] was the only way out.

CHAIR FRENCH reminded the committee that it's the prosecution that will have to disprove the defense beyond a reasonable doubt. The defendant doesn't have to prove that their action was reasonable.

10:41:00 AM
SENATOR MCGUIRE asked how intoxication is treated.

MS. MCLEAN advised that intoxication is not a defense to a criminal act unless the charge is an intentional criminal act.

In the case of homicide it is first degree murder with the specific intent to kill and then the jury can consider it as how it impacted the defendant's ability to form an intent.

CHAIR FRENCH asked how it plays out in a self defense claim.

MS. MCLEAN replied you're talking about diminished capacity and the status of that defense is always up in the air in Alaska. Basically, if self defense is raised the jury will hear everything.

SENATOR MCGUIRE said she appreciates the sentiment of the bill and she intends to support it, but she's concerned about the use of alcohol and how this may be interpreted by young people who are already inclined to pull out a knife or gun to settle a dispute.

10:46:14 AM
CHAIR FRENCH announced that without further objection, conceptual Amendment 1 is adopted. He held HB 381 in committee.

CHAIR FRENCH recessed the meeting to a call of the chair at 10:46 a.m.

Shooter of Trayvon Martin a habitual caller to cops

By Frances Robles
frobles@MiamiHerald.com

PETER ANDREW BOSCH / MIAMI HERALD STAFF

Sybrina Fulton is the mother of Trayvon Martin, the Miami teenager who was killed by a neighborhood watch captain in Sanford, Florida.

The people at the Retreat at Twin Lakes had been missing bikes, grills and a few times thought strangers were casing their town houses.

When the homeowners association wanted to start a neighborhood watch, only one man stepped up: George Zimmerman, the 28-year-old who admitted to shooting an unarmed Miami Gardens teenager and who is now the focal point of a race-related scandal of national proportions.

Interviews with neighbors reveal a pleasant young man passionate about neighborhood security who took it upon himself to do nightly patrols while he walked his dog.

Licensed to carry a firearm and a student of criminal justice, Zimmerman went door-to-door asking residents to be on the lookout, specifically referring to young black men who appeared to be outsiders, and warned that some were caught lurking, neighbors said. The self-appointed captain of the neighborhood watch program is credited with cracking some crimes, and thwarting others.

But the killing of 17-year-old Trayvon Martin left the boy's family and attorneys convinced that the volunteer developed a twisted sense of entitlement, one that gave him a false sense of authority to enforce the rule of law in his tiny gated community. Trayvon's family's attorneys believe that led to racial profiling and murder.

"He would circle the block and circle it; it was weird," said Teontae Amie, 17. "If he had spotted me, he'd probably ask me if I lived here. He was known for being really strict."

Zimmerman called police 46 times since Jan. 1, 2011 to report disturbances, break-ins, windows left open and other incidents. Nine of those times, he saw someone or something suspicious.

"Hey, we've had some break-ins in my neighborhood, and there's a real suspicious guy at Retreat View Circle. This guy looks like he's up to no good," Zimmerman told a dispatcher on Feb. 26, the night of Trayvon's death.

According to 911 recordings released late Friday by Sanford police, Zimmerman said the person was walking slowly, looked drugged and appeared to be looking at people's houses. Police would later learn that Trayvon had gone to 7-Eleven during the NBA All Star game halftime to get Skittles and Arizona iced tea.

"These a--holes always get away," Zimmerman complained.

What happened next is unclear, and has already reverberated nationwide. Calls to 911 alerted police to a scuffle and someone crying for help. In one, the chilling howl stopped after the clear, crisp blast of a bullet. Trayvon was lying face down on the ground near a pathway that runs through the townhouse community.

One 911 caller sobbed to the dispatcher over not having helped the young man who wailed.

Zimmerman told police that was him crying for help and that Trayvon started the fight. He claimed self-defense and was not charged, flaring deep-seated racial tensions between blacks and police, who have a long history of distrust. On at least two prior occasions, the Sanford Police Department was accused of giving favorable treatment to relatives of officers involved in violent encounters with blacks.

In 2010, police waited seven weeks to arrest a lieutenant's son who was caught on video sucker-punching a homeless black man.

In 2005, two security guards — one the son of a longtime Sanford police officer and the other a department volunteer — killed a black man they said was trying to run them over. Black leaders complained of a lackluster investigation. The guards ultimately were acquitted.

"Zimmerman felt he was one of them; he felt he was a cop," said Trayvon's family attorney, Natalie Jackson, who accuses the police of protecting him.

The recent shooting raised troubling questions about whether the homeowners association knew its volunteer was armed with a Kel Tek 9mm semiautomatic handgun. Many residents — black and white — question Zimmerman's judgment and wonder why he would have engaged the teenager at all.

The answer may lie in police records, which show that 50 suspicious-person reports were called in to police in the past year at Twin Lakes. There were eight burglaries, nine thefts and one other shooting in the year prior to Trayvon's death.

In all, police had been called to the 260-unit complex 402 times from Jan. 1, 2011 to Feb. 26, 2012.

"He once caught a thief and an arrest was made," said Cynthia Wibker, secretary of the homeowners association. "He helped solve a lot of crimes."

Zimmerman told neighbors about stolen laptops and unsavory characters. Ibrahim Rashada, a 25-year-old African American who works at U.S. Airways, once spotted young

men cutting through the woods entering the complex on foot, and later learned items were stolen those days.

"It's a gated community, but you can walk in and steal whatever you want," Rashada's wife, Quianna, said.

They discussed the topic with Zimmerman when the watch captain knocked on their door late last year. Zimmerman seemed friendly, helpful, and a "pretty cool dude," Ibrahim Rashada said.

"He came by here and talked about carrying guns and getting my wife more involved with guns," he said. "He said I should have a weapon and that his wife took classes to learn how to use one.

"I do have a weapon, but I don't walk around the neighborhood with mine!"

Actually, he does not walk around the neighborhood at all.

"I fit the stereotype he emailed around," he said. "Listen, you even hear me say it: 'A black guy did this. A black guy did that.' So I thought, 'Let me sit in the house. I don't want anyone chasing me.' "

For walks, he goes downtown. A pregnant Quianna listened to her husband's rationale, dropped her head, and cried.

"That's so sad," she said. "I hope our child doesn't have to go through that."

Travis Williams, a black 16-year-old who wears dreadlocks, said last year a man came to his house and accused him of stealing a bicycle. The police even came and checked the serial numbers on the bike in his garage.

Problems in the 6-year-old community started during the recession, when foreclosures forced owners to rent out to "low-lifes and gangsters," said Frank Taaffe, a former neighborhood block captain.

"Just two weeks before this shooting, George called me at my girlfriend's house to say he saw some black guy doing surveillance at my house, because I had a left a window open," Taaffe said. "He thwarted a potential burglary of my house."

Taaffe sounded chagrined when he noted that the complex is now majority-minority. Census figures show Retreat at Twin Lakes is 49 percent white, non-Hispanic, 23 percent Hispanic, 20 percent African-American and 5 percent Asian.

He suspects Zimmerman got tired of thugs "and reached his breaking point," Taaffe said. "But why was he carrying a gun? Why not carry pepper spray or a Taser? That's bizarre-o."

Taaffe said Zimmerman was so normal that he came across as though he were "an engineer from Lockheed Martin." He did not show up to homeowner association meetings Rambo-style "wearing a bandana around his head with a bowie knife sticking out of his pocket," Taaffe said.

It's unclear what Zimmerman, who is married, does for a living, although he once owned a pressure washing company.

As for any past legal blemishes, he was once arrested for battery on a law enforcement officer when he interfered in a friend's arrest. The charge was reduced to simple battery, and he entered a plea that allowed him to have a clean record and qualify for a concealed weapons permit.

In a statement delivered to the Orlando Sentinel, his father, Robert Zimmerman, defended his son, who he said was a "Spanish-speaking minority with many black family members and friends."

"He would be the last to discriminate for any reason whatsoever," Robert Zimmerman wrote. "One black neighbor recently interviewed said she knew everything in the media was untrue and that she would trust George with her life. Another black neighbor said that George was the only one, black or white, who came and welcomed her to the community, offering any assistance he could provide. Recently, I met two black children George invited to a social event. I asked where they met George. They responded that he was their mentor."

He said the family prays for Trayvon and his parents every day.

At no time, the father wrote, did George Zimmerman follow or confront Trayvon, although the recording of the call to police shows the dispatcher asking him, "Are you following him?" and Zimmerman answered, "yeah."

"We don't need you to do that," the police dispatcher said.

Police volunteer program coordinator Wendy Dorival said she met Zimmerman in September at a community neighborhood watch presentation.

"I said, 'If it's someone you don't recognize, call us. We'll figure it out,' " Dorival said. "'Observe from a safe location.' There's even a slide about not being vigilante police. I don't know how many more times I can repeat it."

Police Chief Bill Lee said that although police do not encourage watch program volunteers to carry weapons, he recognizes a citizen's constitutional right to do so. No arrest was made, Lee said, because there was no evidence to disprove Zimmerman's account.

He has cooperated with the investigation and never retained an attorney, Lee said. His phone numbers are disconnected and no one answered the door at his home or his parents' home. His in-laws shooed a reporter away. After death threats and an avalanche of hate mail, Lee said Zimmerman went into hiding. Local station WFTV Channel 9 reported that he showed up with a truck last week and moved out.

"We are taking a beating over this," said Lee, who defends the investigation. "This is all very unsettling. I'm sure if George Zimmerman had the opportunity to relive Sunday, Feb. 26, he'd probably do things differently. I'm sure Trayvon would, too."

Florida students rally to arrest white neighborhood watch leader

College students plan to rally Monday in Sanford, Fla., and on the campus of Florida A&M University in Tallahassee. Rev. Al Sharpton is also planning a rally on Thursday.

An undated photo released by the Martin family shows 17-year-old Trayvon Martin who was shot and killed as he walked through a gated neighborhood in Sanford, Florida last month.

posted March 19, 2012 at 12:26 pm EDT

Orlando, Fla.

College students around Florida are rallying to demand the arrest of a neighborhood watch captain who shot an unarmed black teen last month.

Students were rallying Monday in front of the Seminole County criminal courts building in Sanford, Fla., and on the campus of Florida A&M University in Tallahassee.

The Rev. Al Sharpton is also planning a rally for a black Florida teenager fatally shot by a white neighborhood watch volunteer. Sharpton will hold the rally Thursday at the First Shiloh Baptist Church in Sanford.

RECOMMENDED: How much do you know about the US Constitution? A quiz

No charges have been filed in the February death of 17-year-old Trayvon Martin in a gated community near Orlando. Martin's family has criticized police for not arresting 28-year-old George Zimmerman, who admitted to shooting the teen but said he fired in self-defense. Martin was not armed.

Zimmerman had called police to report a suspicious person walking through the neighborhood. The teen had gone to a convenience store for candy.

Martin's family says 911 calls show the teen was terrified as he tried to flee Zimmerman.Sanford police released eight 911 calls late Friday.

The neighborhood watch volunteer, Zimmerman, tells a dispatcher in the first call that he is following 17-year-old Trayvon Martin. He says Martin is running, but the dispatcher tells him not to follow the teen.

"This guy looks like he is up to no good. He is on drugs or something," Zimmerman told the dispatcher from his SUV. He added that the black teen had his hand in his waistband and was walking around looking at homes. "These a-------. They always get away," Zimmerman said on a 911 call.

Martin's family said they are now more convinced than ever that Zimmerman should be charged in the shooting. Several of the 911 calls made by neighbors describe some sort of scuffle or fight outside, someone yelling for help and a gunshot.

"(Zimmerman) was chasing him, he was following him, and my son was afraid," Sybrina Fulton, Trayvon Martin's mother, told the AP. "He didn't know who this stranger was."

The Florida college students are demanding the arrest of Zimmerman . Zimmerman's father has said the man is Hispanic and is not racist.

Florida law allows a person to use deadly force if the person believes he or she is facing a deadly threat. The case has been turned over to the State Attorney's Office, which can file charges or present the case to a grand jury.

The Martin family has asked that the case be handled by the FBI, rather than local authorities.

Man who shot in self-defense now "cause celebre" at statehouse

March 7, 2012 By O. Kay Henderson

Jay Rodney Lewis (left) with
Senator Kent Sorenson.

A man who's now at the center of the legislature's debate over gun laws spent 112 days in jail before he was found "not guilty" of defending himself after two men chased him down in West Des Moines.

Forty-nine-year-old Jay Rodney Lewis, an ex-cop, shot one of the men threatening to attack him.

"I've become something of a cause celebre here in Iowa and it feels really strange. I mean, I'm just an ordinary guy," Lewis said during an interview with Radio Iowa.

"I got caught up in a very unfortunate situation and I went through hell…but in the end — when everything mattered — everything turned out right."

Senator Kent Sorenson, a Republican from Indianola, said the 911 tape shows Lewis did everything he could to avoid a confrontation.

"He is a victim, unjustly," Sorenson said Tuesday during remarks on the Senate floor. "…He was just defending himself against two racist thugs that were attacking him."

Lewis, a native of Kansas, is black. Because of his time in jail, Lewis lost his job and his home. Lewis lost all his worldly possessions, too, because apartment managers piled his belongings out on the curb for passersby to sift through and take away.

"You know, trying to keep things in perspective, I'm still trying to rebuild my life and it's very difficult, but it'll soon turn out all right," Lewis said. "I'm pretty sure."

After his release from jail, Lewis spent two nights sleeping in a car before a Des Moines church became aware of his situation and rented him a hotel room. Wearing donates clothes, Lewis made his way to the Iowa Senate Tuesday as Senator Sorenson cited the case as a reason for the Senate to take up a bill that cleared the House last week — legislation that would give Iowans the right to use "reasonable force" to stop a crime in a public place.

"This is a real person that is dealing with an issue now and the after-effects of that," Sorenson said. "He just did his God-given right of defending himself. We need to take action."

Lewis supports the bill that would allow people to use "reasonable force" to stop a crime in public. Current law — which stipulates that Iowans are to first try to get away from danger — isn't always workable, according to Lewis.

"You see what happens when you're held to a duty to retreat," Lewis said. "Sometimes it's not feasible to retreat and sometimes, as in my case, I did retreat and it did no good and yet the prosecution was still trying to hammer me for failing to retreat after I'd already retreated. I fact, I'd already retreated twice."

All 24 Republicans in the Senate have signed a document called a "discharge petition" in an effort to make the bill eligible for debate, but the ultimate decision about which bills are debated is made by Senate Democratic Leader Mike Gronstal. Senator Sorenson's not optimistic about the chances for this bill.

"We have Senator Gronstal, who I believe is basically a dictator in the senate and some people may laugh at that, but I believe it's true," Sorenson told reporters. "…That's because Senator Gronstal decides to do what he's so good at and that's Gron-stalling."

11.81.330. Justification: Use of nondeadiy force in defense of self

(a) A person is justified in using nondeadiy force upon another when and to the extent the person reasonably believes it is necessary for self-defense against what the person reasonably believes to be the use of unlawful force by the other person, unless

(1) the person used the force in mutual combat not authorized by law;
(2) the person claiming self-defense provoked the other's conduct with intent to cause physical injury to the other;
(3) the person claiming self-defense was the initial aggressor; or
(4) the force used was the result of using a deadly weapon or dangerous instrument the person claiming self-defense possessed while
(A) acting alone or with others to further a felony criminal objective of the person or one or more other persons;
(B) a participant in a felony transaction or purported transaction or in immediate flight from a felony transaction or purported transaction in violation of AS 11.71; or
(C) acting alone or with others in revenge for, retaliation for, or response to actual or perceived conduct by a rival or perceived rival, or a member or perceived member of a rival group, if the person using deadly force, or the group on whose behalf the person is acting, has a history or reputation for violence among civilians.

(b) A person who is not justified in using force in self-defense in the circumstances listed in (a)(1)--(3) of this section is justified in using force in self-defense if that person has withdrawn from the encounter and effectively communicated the withdrawal to the other person, but the other person persists in continuing the incident by the use of unlawful force.

SLA 1978, ch. 166, § 10; SLA 2004, ch. 124, § 17; SLA 2006, ch. 68, § 2, eff. Sept. 13, 2006.

11.81.335. Justification: Use of deadly force in defense of self

(a) Except as provided in (b) of this section, a person who is justified in using nondeadly force in self-defense under AS 11.81.330 may use deadly force in self-defense upon another person when and to the extent the person reasonably believes the use of deadly force is necessary for self-defense against

(1) death;
(2) serious physical injury;
(3) kidnapping, except for what is described as custodial interference in the first degree in AS 11.41.320;
(4) sexual assault in the first degree;
(5) sexual assault in the second degree;
(6) sexual abuse of a minor in the first degree; or
(7) robbery in any degree.

(b) A person may not use deadly force under this section if the person knows that, with complete personal safety and with complete safety as to others being defended, the person can avoid the necessity of using deadly force by leaving the area of the encounter, except there is no duty to leave the area if the person is

(1) on premises
(A) that the person owns or leases;
(B) where the person resides, temporarily or permanently; or
(C) as a guest or express or implied agent of the owner, lessor, or resident;
(2) a peace officer acting within the scope and authority of the officer's employment or a person assisting a peace officer under AS 11.81.380;
(3) in a building where the person works in the ordinary course of the person's employment; or
(4) protecting a child or a member of the person's household.

CREDIT(S)

SLA 1978, ch. 166, § 10; SLA 1990, ch. 4, § 10; SLA 2006, ch. 68, § 3, eff. Sept. 13, 2006.

11.81.620. Effect of ignorance or mistake upon liability

(b) A person is not relieved of criminal liability for conduct because the person engages in the conduct under a mistaken belief of fact, unless

(1) the factual mistake is a reasonable one that negates the culpable mental state required for the commission of the offense;
(2) the provision of law defining the offense or a related provision of law expressly provides that the factual mistake constitutes a defense or exemption; or
(3) the factual mistake is a reasonable one that supports a defense of justification as provided in AS 11.81.320 - 11.81.430.

****

11.81.350. Justification: Use of force in defense of property and premises

(a) A person may use nondeadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be the commission or attempted commission by the other of an unlawful taking or damaging of property or services.

(b) A person may use deadly force upon another when and to the extent the person reasonably believes it necessary to terminate what the person reasonably believes to be the commission or attempted commission of arson upon a dwelling or occupied building.

(c) A person in possession or control of any premises, or a guest or an express or implied agent of that person, may use

(1) nondeadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be the commission or attempted commission by the other of criminal trespass in any degree upon the premises;
(2) deadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be a burglary in any degree occurring in an occupied dwelling or building.

(d) Repealed by SLA 2006, ch. 68, § 7, eff. Sept. 13, 2006.

(e) A person

(1) in a vehicle, or forcibly removed from a vehicle, may use deadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be a carjacking of that vehicle at or about the time the vehicle is carjacked;
(2) outside of a vehicle may use deadly force upon another when and to the extent the person reasonably believes it is necessary to terminate what the person reasonably believes to be the theft of that vehicle when another person, other than the perceived offender, is inside of the vehicle; this paragraph does not apply to a person outside of a vehicle who is involved in a dispute with a person inside of the vehicle who is a household member of that person; in this paragraph, "household member" has the meaning given in AS 18.66.990.

(f) A person justified in using force under this section does not have a duty to leave or attempt to leave the area of the encounter before using force.

(g) In (e) of this section,

(1) "carjacking" means a robbery involving the taking or attempted taking of a vehicle from a person in possession of the vehicle;
(2) "vehicle" means a "motor vehicle" as defined in AS 28.40.100, an aircraft, or a watercraft.

Man guilty of murder in shooting of off-duty MP

Victim's mother says killer showed no remorse.

By CASEY GROVE
casey.grove@adn.com
Published: October 29th, 2010 12:02 PM
Last Modified: October 29th, 2010 12:02 PM

An Anchorage jury Thursday found Vongdeuane Vongthongdy guilty of first- and second-degree murder in the killing of an off-duty Fort Richardson sergeant outside a downtown bar in 2008.

The jury deliberated less than three hours. They also found Vongthongdy guilty of weapons misconduct for having a gun while drunk. He pleaded no contest to being a felon with a gun.

Vongthongdy, 28, was charged with shooting Sgt. Evan Minnear, 24, outside the Woodshed Lounge early on Nov. 30, 2008. It happened 16 days after Vongthongdy's release from jail for probation violations. He was jailed for failing to report to his probation officer and testing positive for marijuana and amphetamines. He was on probation for felony assault with a weapon, according to court documents.

Minnear was having a night out with friends. They were celebrating his return from a 15-month tour in Iraq that ended the previous spring, his mother, Julie Rushton, said this week. Rushton traveled from Indianapolis to attend the three-week trial.

When Vongthongdy fired a .40-caliber semiautomatic handgun into the air outside the bar, Minnear, a military policeman, approached him to diffuse the situation, prosecutors said. Some shoving occurred and Vongthongdy shot Minnear in the chest. Minnear later died in a hospital.

ADVERTISEMENT

It was unbelievable, Rushton said, that her son would survive a tour of duty in Iraq and get shot to death in Anchorage.

Rushton found out that her son was dead when a black car pulled into her driveway. An Army officer and a chaplain -- "just like on TV," she said -- broke the news.

Rushton was elated Thursday when the jury returned its verdict.

"I wasn't supposed to, but I was going, 'Yes! Yes!' Doing the old arm pump," she said outside the courtroom.

Still, the past two years have taken their toll on Rushton and her sister, Joni Breeden, who also attended the trial. The crying often left them with red, puffy eyes, and Rushton's hand trembled whenever she reached for something in her bag.

"You don't ever get over this. It's closing a chapter, I guess," Rushton said. "Basically, I'll be living with this for the rest of my life."

"It's been constant, day in, day out, since the murder," she said. "I don't know what I'm going to do with myself. I'm so used to getting home and putting my dogs away so I could be on the phone (with court)."

"I guess I need to get a hobby now."

Assistant District Attorney Mara Michaletz leaned over the railing in the courtroom and hugged Rushton for a half-minute or so while they both cried after the verdict.

Breeden said, "Any person who has a child can put themselves in that situation of, 'What if that was my child?' "

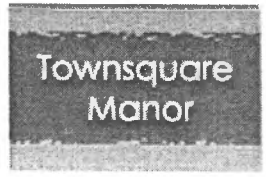
Enjoy the warmth of a gas-burning fireplace in a newer 2 bedroom, 2 bath condominium-style home at Townsquare Manor convenient to city-wide bike paths.



It was a privilege to prosecute a case in which the Anchorage police caught the suspect within minutes of the shooting, said prosecutor James Fayette.

Fayette said "it was a heads-up play" by Anchorage detective Lt. Steven Hebbe, who happened to be driving by the Woodshed when the first reports came in of shots being fired. Hebbe stopped Vongthongdy's getaway car within minutes, Fayette said.

"There was no question about who the shooter was," Fayette said. The defense didn't dispute that but contended Vongthongdy's state of mind at the time indicated he either didn't know he would kill Minnear or that he didn't intend to.

"Eventually, the jury I think reached the common-sense conclusion that when you shoot a man in the chest with a .40-caliber pistol, you intend to kill him."

"I just hope it gives this lady some peace," Fayette said, gesturing toward Rushton.

Rushton said she didn't see any reaction from Vongthongdy during the trial.

"I never saw one ounce of emotion come from him during all of this," she said. "I don't feel like he's felt any remorse, and that's something he can work on now sitting in prison."

Jury convicts Anchorage man in gang-related shooting

Man found guilty of assault in shootings near bar.

By CASEY GROVE
casey.grove@adn.com
Published: January 14th, 2011 12:08 PM
Last Modified: January 14th, 2011 12:09 PM

An Anchorage jury convicted a man Wednesday for what police testified was a gang-related shooting in September outside a downtown bar.

Mavaega Brandon Tautua, 21, was convicted on three felonies: two counts of first-degree assault and a count of felony possession of a firearm. He faces up to 28 years in prison for the assault charges.

Tautua shot a man Sept. 12 twice with a .38 caliber revolver after a fistfight between rival gang members broke out at the corner of D Street and Fourth Avenue. Tautua then shot at the fleeing men and hit an innocent woman on the sidewalk, prosecutor James Fayette said.

"It was clearly gang-related conduct; this guy was picking a fight," Fayette said Thursday. Tautua claimed he'd shot in self-defense, but there are five different legal definitions for that defense that his story did not stand up to, Fayette said.

Tautua said he and his two friends were confronted by a group of five, and he testified Monday that,

to defend himself, "I would have killed them all, I would have shot all of them."

"That's pretty chilling," Fayette said, especially considering Tautua answered in the affirmative later when asked if he would do the same thing if given another chance.

Police said the 19-year-old Angel Martin-Laura was shot in his left shoulder and buttocks. Friends took him to a hospital, where police said he was treated for his injuries and released.

ADVERTISEMENT

The innocent victim was shot in the shoulder and also has recovered.

Rookie police officer Jesus Rivera saw the shooting unfold from his patrol car and nabbed Tautua just after the shots were fired. Video cameras captured the shooting and arrest.

The Anchorage police officers' union referred to Rivera's police work in this incident during an ad campaign against officer layoffs by Mayor Dan Sullivan's administration.

Tautua testified in his defense, and denied being affiliated with a gang. He wore a bright red Boston Red Sox jacket and baseball cap the night of the shooting because the Sox are his favorite team, he said on the stand.

However, when a prosecutor cross- examined him, Tautua was not familiar with Fenway Park, the baseball club's home field, or famous players from its recent and past history, including David Ortiz or Ted Williams.

Gang intelligence detective Scott Lofthouse testified that stylized "B" logos and bright red Red Sox apparel are popular with gang members affiliated with the Bloods.

Tautua has a previous conviction for theft of a firearm from 2007. He is scheduled to face a judge for sentencing in May.

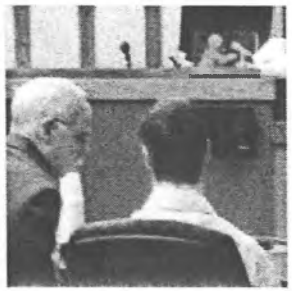
Rossiter found guilty in murder case

by **Maria Dudzak**

January 24, 2012 7:42 PM



19-year-old Devin Rossiter was found guilty in Ketchikan Superior Court Tuesday afternoon of second degree murder in the stabbing death of 45-year old Nick Stachelrodt . Rossiter was also found guilty of tampering with evidence.

The jury of six men and six women began deliberations at about 2:30 Friday afternoon, continued deliberations on Monday, and reached a decision late Tuesday morning.

Rossiter looked straight-ahead and showed no visible reaction when the verdicts were read by Superior Court Judge Trevor Stephens. After reading the verdicts, Stephens asked the defense and prosecution if either party wanted the jury to be polled. Assistant District Attorney James Scott said the State did not wish to poll the jury. Defense attorney Sam McQuerry requested that Stephens poll the jury.

All 12 jurors affirmed their verdicts were true and correct. Stephens then thanked and excused the jury.

Asked his reaction to the verdict, Scott said this is just one step in the process.

"And the only appropriate thing for me to say is to thank the jury very much for their service in what I'm sure was a difficult case, and to thank the entire community. The process will continue and thank you for inquiring."

McQuerry declined to comment.

On March 12th of last year, Rossiter, then 18, was knocking on the back doors of homes in the Vallenar View Trailer Park asking for cigarettes. Rossiter was twice refused cigarettes at the home of John and Mary Stachelrodt, the victim's elderly parents. When their son, Nick Stachelrodt returned home, he found Rossiter searching in his parent's vehicle, and asked him to leave. When Stachelrodt tried to pull Rossiter from the vehicle, Rossiter stabbed Stachelrodt twice in the upper chest, fatally wounding him. Rossiter fled, and Stachelrodt died minutes later.

Rossiter's sentencing hearing has been set for April 5th at 8:30 am in Ketchikan Superior Court. In the meantime, Rossiter is being held at the Ketchikan Correctional Center without bail. Murder in the 2nd degree carries a sentence of ten to 99 years.

Jurors fail to reach verdict in Michael Bostic stabbing case; judge sets new trial for end of January

by Sam Friedman / sfriedman@newsminer.com

Dec 21, 2011 | 15264 views | 138 | 10 | |

view slideshow (3 images)

FAIRBANKS - The jury in the Fairbanks road-rage murder trial returned a not guilty verdict Wednesday for the most serious charge of first-degree murder, but a mistrial was declared on the lesser charge of second-degree murder after the jury was unable to reach a unanimous decision. A new trial date has been set for late January.

Defendant Michael Bostic, 45, remains jailed on $1 million bail on the second degree murder charge, although his attorney asked for hearing to discuss bail in early January.

Enter your email here sign up now!

Bostic is accused of stabbing Tim Lund, 55, to death this spring near Frontier Outfitters. Defense attorneys said it was self-defense; prosecutors made the case that Bostic followed Lund to his job at Frontier Outfitters after a near car accident and that Bostic instigated a fight and intended to kill Lund.

The jurors were given instructions that, beyond a reasonable doubt, they needed to find Bostic's actions did not fit the legal definition of self-defense in order to convict him of first-degree murder, second-degree murder or even manslaughter. In a note to the court during deliberations,

the jury indicated it wanted clarification about the self-defense law, in particular, clarification about whether the aggressor in a fight can be said to be using self-defense.

After a week-long trial, the jury of nine men and three women deliberated Thursday afternoon and all day Friday and Monday.

They went home early Tuesday because a juror needed to go to a medical appointment. On Wednesday morning, the jurors indicated they were unable to reach a unanimous verdict and did not believe more deliberations would help. Superior Court Judge Paul Lyle sent them back the jury room to deliberate for three more hours.

He then asked them in writing if they might be able to issue a verdict without resolving the self-defense issue. The jury indicated they would be able to issue a verdict for the first-degree murder charge but not the second-degree murder charge. Before Lyle declared a mistrial on the lesser charge, he asked the jurors whether they thought their differences of opinion were "genuine and irreconcilable." By a show of hands, all the jurors indicated they did not believe they could come to a verdict.

Before sending the jury home for the last time, Lyle told them they were the "the most diligent" jury he had ever worked with.

The partial verdict and mistrial were declared about 6 p.m. The courtroom gallery was empty at the conclusion of the case except for a small group of Bostics' friends and two local TV reporters.

Dear Senator French

Subject: HB 80 An Act relating to self defense in any place where a person has a right to be.

Please consider scheduling this legislation for a hearing during the week beginning February 6, 2012. Joining me will be a leading national advocate to help in answering any questions the committee may have. Scheduling the hearing during that time will allow for the necessary travel arrangements to be made. Attached is a committee package.

Included are the following:

- Letter of Request
- Current version of the bill.
- Sponsor statement.
- 2012 Fiscal Notes
- Names of persons expected to testify (noting any off-net lines needed).

Please feel free to contact myself or my aide Rex Shattuck (465-2696) with any questions.

Thank you for your consideration.

Sincerely,

Representative Mark Neuman

Alaska State Legislature

Senator Lesil McGuire
Senator Joe Paskvan
Senator John Coghill

Senate Judiciary Committee

March 1, 2012

Mr. James Fayette
310 "K" Street, Suite 520
Anchorage Alaska 99501

Dear ~~Mr. Fayette~~, Jay,

The Senate Judiciary Committee has a bill under consideration, House Bill 80, which would significantly alter the law of self-defense in Alaska. Your experience as a veteran homicide prosecutor would be very valuable in helping the committee to understand the nuances of self-defense especially with respect to its application in actual cases.

I am inviting you to testify before the committee on Friday, March 16, 2012, starting at 1:30 p.m.

Sincerely,

Senator Hollis French

Alaska State Legislature

Please enter into the record my testimony to the House Finance Committee

Committee on HB 80 Date: March 30, 2011
Bill/subject

****

02 (4) protecting a child or a member of the person's household; or
03 **(5) in any place where the person has a right to be.**

The underlined portion of HB 80 (see above) extends the Castle Doctrine. I support this bill. It is a common sense addition to the Alaska law defining and supporting self defense.
Some of my reasons include:
1. Alaska is a huge state with many remote and rural off-road areas. Self defense is a necessity when police are not available.
2. Alaska has the highest rate of domestic violence in the U.S. Women need to know that they can defend themselves without going to prison.
3. Child molestation is very high in Alaska. Children need to know that they can defend themselves against attacks by larger, stronger adults without fear of reprisal.
Thank you for considering these reasons.
Peace through strength,

Barbara J Struble

Subject: YES on HB 80 - Thank you for this legislation

Follow Up Flag: Follow up
Flag Status: Flagged

Mr. Neuman,
Thank you for HB 80. You have my full support, and I am honored to support you and this effort. Below is the text I have been sending your colleagues, as I have been a victim of weapons violence - hopefully, never again. Thank you for your understanding of this important issue.

To Mr. or Ms. XXXXXX,
I strongly and respectfully request that you approve HB 80 extending the right to use force, including deadly force, for self-defense anywhere a person has a legal right to be. Responsible gun owners respect the law. Criminals don't care about laws, and thus will not be swayed by this one way or the other. When I had the several occasions to have been accosted by weapons-wielding criminals, I was unable to protect myself due to criminal-friendly laws on the books in MN. Had I been able to carry and defend myself, I feel sure that I would not have been a victim, and even though I could have shot, I probably would not have, should they have complied with my command to lay down their weapon and surrender, allowing me to wait for law enforcement assistance. It is a different story when it actually happens to you or your loved one, or your friend, and God willing, it never will. This will send a clear message to criminals in AK and hopefully elsewhere - threatening bodily harm will not be tolerated. We will not just hope everything turns out well if we run or submit to their demands. If someone does not want to carry and possibly protect themselves in such manner, that is their right. May they never experience what I have. Thank you. Respectfully,
Bob Ourso

Subject: House Bill 80: No-Duty-to-Retreat Legislation

Dear Representatives,

HB 80 would remove the duty-to-retreat in Alaska.

Under existing law, there is no-duty-to-retreat if a person is in their home, business, or on their own property. Introduced by state Representative Mark Neuman (R-15), HB 80 would extend the right to use force, including deadly force, for self-defense anywhere a person has a legal right to be.

I strongly support HB80. Extending this right is a common sense concept which is already the law in many States.

Please vote in favor of this bill.

Byron Davis
Anchorage, AK 99517

Subject: SUPPORT HB 80 No-Duty-to-Retreat

Please support HB 80 extending the right to use force, including deadly force, for self-defense anywhere we have a legal right to be.

A person's ability to protect themselves and others should extend beyond the property line. Crime occurs everywhere and being forced to "run away" as a first choice only makes it easier (safer) for criminals to ply their trade.

Sincerely,
Rod and Cathy Herrin
Wasilla

Subject: Response to HB 80

House Finance Committee:

As a law abiding citizen the laws and regulations need to protect and defend the people who stand up to defend the innocent, the weak, our families, in the act of protecting justice, freedom, and right living. By protecting the good Samaritan we reduce the crime and the work load placed on the public safety officers and state troopers because the criminal must watch out for the common citizen exercising his duty to uphold the law and repress lawless behavior. The repression of lawless behavior is as simple as protecting the person who stands up against perpetrators of crimes. This is freedom, where the responsibility is transferred to the good people who choose to protect themselves, their families, and surroundings. Thank you for your time and consideration. Please be very careful in the wording of requiring "retreat". I believe we should not retreat from criminal's because this implies it is wrong to stand up for what is right and gives argument to prosecute both citizen and law enforcement officials when deadly force is used to defend oneself, ones family, ones friends, the old lady being mugged....

Thank you

Charles Bohart

Subject: House Bill 80 Support

Dear Representative,

I encourage you to support Representative Neuman by voting to support House Bill 80 which allows honest, tax paying citizens to defend themselves and their property anywhere at any time. I am a gun owner and also have a concealed carry permit and very rarely do I go out without my weapon because of the increase in the amount of unstable people and criminals who can/will go off without any notice. The road rage murder in Fairbanks this weekend is a prime example. If the judicial system refuses to keep these people behind bars where they belong, then people need to have the right to defend themselves at all times, in all locations and at any cost.

Please take a look at the stats in Florida and what has happened with crime since they passed their liberal concealed carry bill. The horror stories of shooting sprees never happened, the crime rate had plummeted and there are fewer criminals on the street. On the fiscal side, the permanent removal of a dangerous person saves the State money which can then be used to support those who pay taxes. To prosecute the road rage person referenced above is going to cost the State hundreds of thousands of dollars and then the tax payers will have to pay $50-70,000 a year for the rest of his life. Had the other gentleman carried a concealed weapon, the State would be looking at a few thousand dollars to bury the criminal.

If the State, who is charged with the responsibility to protect its citizens, continues to fail in this obligation, every citizen has the right, and responsibility, to defend themselves. Take a few minutes and put yourself in the Fairbanks Road Rage victim's position. Ask yourself the following question. Would I be better off lying dead on the street, a victim of a deranged, knife wielding criminal, or would I be better off permanently ending his reign of criminal activities and terror? If you need help with the answer or a second opinion, read the article to your family and ask them what you should if you were caught in that same position and had the opportunity to defend yourself. I think the answer will be obvious so vote for yourself, your family, and give all of Alaska the opportunity to defend themselves.

Thanks for your time.

Subject: I support HB 80

Hello,

I urge you to support HB 80 which would extend the no-duty-to-retreat, the right to use force, including deadly force, for self-defense, that we enjoy on our private property, to anywhere a person has a legal right to be. Please remember that criminals by definition do not care if their action is against the law and police are rarely there to protect you when you need it. This law will help protect law abiding citizens. I do not believe it will foster rampant vigilantism as some anti-gun lobbies propose.

Sincerely,

Donald E. Carlson, 688 Senate Drive, Fairbanks, AK 99712, 907-378-8151

Subject: HB 80 No-Duty-to-Retreat Legislation
Attachments: Dennis Adamson.vcf

Dear Representative Neuman:

As a member of the House Finance Committee, I wanted you to know that I strongly support HB 80, the No Duty-to Retreat Legislation being considered this coming Wednesday. I have a daughter and three granddaughters living here and in the Matnauska Valley that I worry about 24/7. This legislation will increase the likelihood that they would defend themselves from predators without fear of legal repercussions. This is a right every citizen of Alaska and the United States should have.

Please do everything within your power to pass this legislation into law. You will be doing something that will benefit all Alaskan's relative to their personal defense and the defense of their families. I firmly believe that this legislation fully supports and enhances the protections provided in the 2nd Amendment of the U.S. Constitution. Good luck in your efforts to best serve Alaska.

Sincerely,

Dennis B. Adamson

Subject: HB 80

Under existing law, there is no-duty-to-retreat if a person is in their home, business, or on their own property. Introduced by state Representative Mark Neuman (R-15), HB 80 would extend the right to use force, including deadly force, for self-defense anywhere a person has a legal right to be.

I support this legislation, and I urge you to do so also.

Thanks

Subject: HB 80

Dear Representative Neuman,

I know you obviously support this bill but wanted to thank you and pass this along to you as well. I'm writing to as many as I can to support this very important bill.
I am writing to address the current House Bill 80, Self Defense bill.
I don't believe it goes quite far enough but is a very good start.
I've yet to talk to anyone here in Fairbanks that does not support such a bill. I work at the University of Alaska and talk to many people Conservative and Liberal alike.
I was once a medic for Chena Goldstream Fire and Rescue , during our training we were told that as EMTs we were obligated to render help if we could when needed. The problem I see with our current law is that you are obligated to retreat when there is trouble. This should be changed such that you are obligated to help if you have the ability to do so. Example, someone being attacked or whatever in a grocery store parking lot or anywhere for that matter. Should we run away or should we help if we can? If we can we should help and not be held liable for doing so. Of course this would also apply to defending ourself and or family. It is my opinion that we have a God given right to defend ourself and to whatever extent is required. At times it may be prudent for us to retreat if we so choose but in no case should there ever be a law that requires us to do so. No one should ever be required to run away if they can. That is what we have now. Florida has recently passed what I think is a very good approach to this issue. (See below) Its just a little embarrassing to have them realize the common sense wisdom before we do here in the State of Alaska. Please do not buy into the rhetoric that such a bill will cause an increase in violent crime. There are no statistics that I've found anywhere that would support such a statement plus as the law is now it virtually puts innocent law abiding citizens at risk.
While it is not as extensive as I would like it to be I would encourage and ask you to please support the passage of HB 80 self defense bill. I thank for you and for your time and consideration in this matter.

Subject: Support of House Bill 80

Dear Representatives,

Thank you for sponsoring House Bill 80, Self Defense. As an Alaskan living in an area outside of regular police response, I rely on the ability to protect myself and my family. Even though I am driving distance from Wasilla, with few troopers in our area, the response time to a 911 emergency call is 25 minutes. I know this because I have had to call in the past.

In 2006, I was alone at home with a 3 year old daughter. Shortly before midnight in early April, I had a car park in front of my house and the occupants were not part of the neighborhood. Five young men stood out in front of my yard and passed around something that resembled a bong. I saw the lighter ignite in front of each one of them. I called to report this incident. These people sat in a dark car on a dark night for 15 minutes in front of my home. I had no idea what their intentions were. When they drove off, they proceeded at about 10 mph with no lights on. It was 10 minutes after they departed before a trooper came through the neighborhood. He drove around a few minutes and did not find them. After this incident, I had an alarm system installed, but I know I may still need an additional way to protect myself in the event someone actually does breach the entrance of my house.

This protection may also be necessary outside my home. We travel to some pretty remote locations to camp and fish. Still having a young child traveling with me, I am relieved to know that if someone were to break into our camper with ill intentions, I can defend our lives and property.

Alaska is the Last Great Frontier and our citizens live here not just for the beauty of the state, but for the freedoms it offers. I truly appreciate your efforts to maintain those freedoms for law abiding citizens.

Respectfully,

Julie Gillette

Representative Neuman

I find it a bit difficult to undestand why this bill has not passed out of finance. After all, criminals never follow these laws anyway, only honest law abiding people like me do. I am a retirered Master Chief USN, also a retired Alaska State Trooper. If I were to see an event where I or others lives were endangered I am not trusted by our State Congress to act to prevent this crime from taking place other than on my property and in my home. I am well aware of when to and when not to use deadly force when absolutely necessary, as are many retired police officers living in Alaska. It appears some in our state congress think just because a peace officer has retired we turned dumb. Not so. Your efforts along with other clear thinking representatives to get HB 80 moving would be much appreciated.

Colonel Herrera,

Many more people are becoming aware of what is happening locally and nationally. We need more folks to become informed and involved and I am glad that you are making that step.

HB80 does not currently appear to have too much opposition in the House, but we may need the support when it goes through the Senate (which is likely to happen next session between January and April). If you aren't receiving the NRA alerts, I would recommend signing up for them as they are an excellent source for those wanting to keep abreast of legislation affecting our 2nd Amendment rights.

Thanks again for writing and be sure to contact me if you have questions or other concerns.

Representative Neuman, thank you for your quick response. I was made aware of your bill at a recent CPG meeting where they showed a 9-11 video. I also researched your website and the bill and found you and your co-sponsors. Although I'm new to being politically active, and I am still working full time at Ft Richardson, I'm learning as much as possible what actions I can take with my local representatives to support initiatives that will improve our Burough and State and protect us from not only "domestic threats", but "foreign threats" as well. If there's ever anything I can do to assist, please feel free to contact me. Although I lack experience, I am well motivated.

Subject: Please pass HB 80

Dear Ladies/Gentlemen, my name is LTC (Ret) Nick Herrera, and I'm a resident of Wasilla, and a retired Army officer. I served in the Army for 23 years fighting to protect this great country of ours and defend our rights. Even now, as a retiree, I am able to enjoy those rights in this great state of ours, but all too often there are elements in our State who choose the path of crime. It is incumbent on us to always be able to continue to protect those rights given to us by God to care for our fellow man and our families against those who would do us harm. HB 80 extends those rights to protect us against those criminal elements who would violate our rights and seek to destroy the peaceful lives we seek to live within our communities and endanger those we love and

hold dear to our lives. I strongly urge you to please pass HB 80 and strengthen the rights of good American law abiding citizen against those who seek to disrupt our peaceful communities. Far too long have criminals' rights been advocated while victims rights have been trampled upon. HB 80 gives US, law abiding citizens, our rights back and empowers us to rightfully use deadly force (as a last resort) if we deem it necessary and further protects us when and if we must make this difficult and life changing decision. I am too familiar with having to make this decision while serving in my Army and on deployments and it is a decision I NEVER EVER take/took lightly and without great thought and responsibility, nor is it a decision anyone of us should ever have to make, BUT if we have to make this to protect ourselves or those we love, we should be empowered with the necessary tools to effectively make that decision.

Thank you for supporting me, this State, and Representatives Neuman, Feige, Lyn, and Costello on passing HB 80.

Sincerely,

Nicolas Herrera

Thank you for being the prime sponsor of HB 381. If passed, it may spare law-abiding Alaskans and their families from extreme personal duress and the often debilitating financial costs of defending themselves in criminal and civil proceedings for having protected themselves or their loved ones by the proper and timely application of deadly force. Thank you again for your leadership in sponsoring this important and reasonable legislation.

MEMORANDUM March 28, 2011

SUBJECT: Sectional Summary of HB 116 am, a special 2011 Revisor's Bill Relating to a Criminal Law Issue (Work Order No. 27-LS0369\A.A)

TO: Representative Craig Johnson
Chair of the House Rules Committee

FROM: Gerald P. Luckhaupt
Assistant Revisor

This is a sectional summary of HB 116 am, a special 2011 revisor's bill. The bill is prepared under AS 01.05.036, which provides, in part, that the Legislative Affairs Agency, working in cooperation with the Revisor of Statutes

> shall make recommendations to the legislative council concerning deficiencies, conflicts, or obsolete provisions in and the need for reorganization or revision of the statutes, and, at the direction of the legislative council, shall prepare for submission to the legislature legislation for the correction or removal of the deficiencies, conflicts, or obsolete provisions, or to otherwise improve the form or substance of any portion of the statute law of this state. . . .

As a preliminary matter, please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill -- the bill itself is the best statement of its contents.

Section 1 of the bill amends AS 11.71.140(b) by correcting a misspelling of the drug "oxymorphone." AS 11.71.140(b) was enacted in 1982 and at that time a typographical error was made and "**oxymorphone**" was spelled incorrectly as "**oxymorphine**."

Section 2 of the bill amends AS 11.71.170(b)(11) by correcting a misspelling of the drug "lorazepam." AS 11.71.170(b)(11) was enacted in 1982 and at that time a typographical error was made and "**lorazepa*m***" was spelled incorrectly as "**lorazepa*n***."

Section 3 of the bill provides an applicability provision to clarify that the corrections that are being made in secs. 1 and 2 are not substantive changes to the law and that they apply generally to all persons who might be affected by AS 11.71.170(b)(11) before, on, or after the effective date of this bill. This provision is included out of an abundance of

caution to ensure that former or ongoing criminal prosecutions are not called into question.

Section 4 of the bill provides an immediate effective date.

If you have any questions about the bill or this summary, please contact me at your convenience.

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 116

Analysis

HB 116 corrects the spelling of a Schedule IVA controlled substance. Currently AS 11.71.170(b) incorrectly spells the substance "lorazepam" as "lorazepan". The bill corrects the spelling.

There is zero fiscal impact to the Department of Law from this bill.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 127(FIN)

Analysis

DOC averages two new incarcerations per year for the crime of enticement of a minor. This bill would increase the penalty for this crime from a Class C felony to a Class B felony. This change has the potential to increase mandays by 10,220 in FY12 thru FY17. Applying the current cost of care ($136.44 per day), the increase of cost could be in the range of $0.0 to $1,394.4 to DOC.

DOC averages two incarcerations per year for the crime of online enticement of a minor. This bill increases the penalty for this crime from a Class B felony to a Class A felony if the defendant was, at the time of the offense, a registered or required to register as a sex offender or child kidnapper. This would increase the penalty three years. This has the potential to increase mandays by 5,475 beginning in FY12 thru FY17. Applying the current daily cost of care ($136.44 per day), this could potentially increase costs in the range of $0.0 to $747.0 to DOC.

DOC averages one new incarceration per year for the crime of unlawful exploitation of a minor. This bill would increase the penalty for this crime from a Class B felony to a Class A felony. This would increase the penalty three years. This has the potential to increase mandays by 5,475 beginning in FY12 thru FY17. Applying the current daily cost of care ($136.44 per day) could potentially add costs in the range of $0.0 to $747.0 to DOC.

Other provisions that the department is unable to quantify at this time but will closely monitor for potential fiscal impact are as follows:

- Adding Monitoring a Person with a Global Positioning Device or Similar Technology Means
- Adding Child Kidnapper to 2(A) under AS12.63
- Adding Sending and Explicit Image of a Minor in the Degree and Second Degree to Statute
- Adding Crimes Involving Minors Committed Out of State, Specifically Online Enticement to Statute
- Adding Online Enticement of a Minor to Statute

This bill also provides clarifying changes to statute on appearances before a judge. The potential impacts of this change was previously identified and accounted for when the original legislation passed in 2010.

The Department of Corrections is unable to determine the fiscal impacts of the passage of this legislation and will closely monitor potential future fiscal impacts.

Re: CS for HB 127 (FIN) – Section 11
ACLU Review of Legal Issues

Chair French, Vice-Chair Wielechowski:

Thank you for the opportunity to submit written testimony with respect to the Committee Substitute (Finance) for House Bill 127.

As you know, the American Civil Liberties Union of Alaska represents thousands of members and activists throughout the state who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions. In that regard, we would like to advise the Committee of some issues with respect to CS for HB 127 (FIN), and in particular, Section 11.

Need to Revisit Unwarranted Expansion of 24 Hour Rule

Last year, HB 324 was passed (26th Legislature, Chapter No. 19, SLA 2010, Effective Date: July 1, 2010), amending Alaska Rule of Criminal Procedure 5 ***to permit a new arrestee to be held for up to 48 hours before the initial appearance before a judge or magistrate, rather than the 24 hour period***

which had long been the law. Section 11 of HB 127 would create consistency between the amended rule and the statute relating to pretrial detention. **Given the significant overcrowding issues which are rapidly being exacerbated in our detention facilities, and the numerous financial issues pressing on the Department of Corrections, of which the Legislature is aware, HB 127 presents a good opportunity to revisit whether the revision passed last year in HB 324 is the best policy for the State of Alaska.**

Under *Gerstein v. Pugh*, a probable cause hearing must be held without unreasonable delay. 420 U.S. 103 (1975). After *Gerstein*, a standard of 24 hours was adopted by most states and most circuits. Years later, a narrowly divided US Supreme Court stated that the initial appearance must be made only within 48 hours. *Riverside v. McLaughlin*, 500 U.S. 44 (1991). However, *Riverside* does not bind the states in their interpretation of their own constitutions.

In one accounting of state responses to *Gerstein*, most states had concluded that 24 hours was the appropriate term of detention before appearing before a magistrate or judge, and only seven states explicitly permitted more than 24 hours prior to an initial hearing. *Jenkins v. Chief Justice of Dist. Court Dept.*, 619 N.E.2d 324, 333-34 (Mass. 1993).

Since Alaska had guaranteed a 24-hour window for initial appearances for 18 years since the Riverside decision, the state courts may be hard pressed to see why a 48-hour window would not likely permit "unreasonable delay." The Alaska courts have not yet had a chance to rule on the dimensions of the "speedy trial" provision of Article I, section 11 as it relates to initial appearances, since Rule 5 has long guaranteed a 24-hour window of appearance. The Alaska Supreme Court could very well decide that the state constitutional provisions relating to speedy trial and due process require no more than a 24-hour window prior to initial appearance, just as the Massachusetts Supreme Court did in *Jenkins*.

Given that the currently existing rules of criminal procedure already provide an exception for defendants arrested far from urban centers and allow the prosecution to request a delay to gather more information where necessary for a bail hearing, the state's success over the last 18 years in providing an initial appearance within 24 hours strongly suggests that a delay of more than 24 hours would represent unnecessary delay, making the statute unconstitutional.

Increased Costs Resulting From Prison Over-Crowding.

In particular, as the Judiciary Committee is no doubt aware, **almost half of all Alaska prisoners are being held pretrial**, typically constituting 46 to 48% of all prisoners in Alaskan institutions. The high rate of pre-trial detention contributes substantially to the state of overcrowding in Alaska prisons and the need to build more of the prisons that cost our state dearly. Consider that the Department of Law reports that almost 27,000 new criminal cases were filed last year – roughly 6,000 felony cases and roughly 21,000 misdemeanor cases. If every one of those 27,000 arrests results in a single extra day in custody, that increase of 27,000 prisoner-days would impose a similar burden in on the correctional system as 74 prisoners spending a year in prison.

Every prisoner-year in custody costs roughly $45,000. **The cost of additional incarceration from the policy change contemplated in HB 127 could cost up to $3.3 million in increased costs every year**, just by adding a single day of initial incarceration for each arrest.

Extension of the post-arrest time that a prisoner can be kept in custody without any bail will merely serve to increase our prison population unnecessarily, mostly by increased incarceration of prisoners accused only of misdemeanors. **While there may be good intentions to make the 48 hour rule the exception – rather than the norm – common sense, experience of human nature, and the realities of the legal load encountered by modern court systems, support the idea that over time – and perhaps quickly – the 48 hour rule WILL become the norm.**

The Judiciary Committee should assist the Legislature in reversing course on this provision, and return to the 24-hour window Alaska observed for decades. We are not aware of any evidence of a single incident in which a prisoner was released wrongfully because of any limitation imposed by the 24-hour window before the initial appearance. Locking up thousands of people accused of misdemeanors for longer periods of time and spending millions of dollars to keep our prisons crowded is not good public policy.

Thank you again permitting us to share our concerns. Please feel free to contact the undersigned should you require any additional information.

Sincerely,

Jeffrey Mittman

Subject: RE: Message from 4th fl00r copier

Hello Cindy. Yes, scheduling modifications for both ex parte and long term orders with a maximum of three days notice will create scheduling problems for us. As you note, AS 18.66.120 provides for three days notice for ex parte modifications in DV cases (after all, they are only 20 days in duration and the respondent never had an opportunity to participate), but 20 days notice for long-term (six month) orders. There is less of a need for such a short scheduling time because the order is for a much longer period of time and the respondent had an opportunity to participate in the six-month hearing.

Although we do not have a fiscal note on this bill (because the conservatorship caseload is still pretty light), over time we will see a lot of these and it becomes very difficult to keep space open in judge's calendars to allow for all of the short-notice hearings. I would ask that the long-term modification notice period match 20 days established for the long-term modification for a long-term DV protective order.

Thanks for letting me know about this. Doug

CSHB 127(JUD) and SB 72

CSHB 127(JUD) (HB 127 in this comparison) and SB 72 are different in the following ways:

Section 6 of HB 127 and SB 72 – HB 127 makes minor changes to drafting in current law; it changes "has been charged by complaint . . ." to "is charged" to clarify that the law does not apply to a person who has been charged and then acquitted.

Section 7 of HB 127 and SB 72– often called the "sexting" provision, was changed to (1) require the state prove the culpable mental state that the offender acted with the intent to annoy or humiliate another person; and (2) changed the penalties so that a person who distributes an image to another person commits a class B misdemeanor, and a person who places the image on an Internet site accessible to the public commits a class A misdemeanor. No felony level offense is included in HB 127.

Section 9 of SB 72 – that clarified the culpable mental states for the crime of distribution of indecent material to minors, was removed from HB 127.

Sections 11 and 13 of HB 127 – were added to HB 127. They were originally in HB 175 and were added to HB 127 in the House Finance Committee. They change from 24 to 48 hours the statutory deadline within which law enforcement must bring an arrested person before a judicial officer. The law continues to require that law enforcement bring such a person before a judicial officer without unnecessary delay. This was debated extensively last year, and the court rules have already been changed from 24 to 48 hours. The statutes need to be changed to conform with the court rules.

Section 14 of HB 127 – changes the offense of failure to carry and present to a law enforcement officer proof of an operator's license from a class B misdemeanor to a violation. Although in Title 28 this offense is a misdemeanor, it is also on the bail schedule as a $50 correctible offense. HB 127 corrects this inconsistency. This change also was originally in HB 175.

Section 15 of HB 127 – corrects a similar (to section 14) inconsistency in the offense of failure to carry proof of automobile insurance. In Title 28 this is a class B misdemeanor, and it is also a correctible offense in the bail schedules. By changing this offense to an infraction, HB 127 corrects this inconsistency.

Section 17 of HB 127 – resolves a similar inconsistency in the penalty for burning a vehicle in the Knik River Public Use Area. In 2006 the legislature created the Knik River Public Use Area. The law authorizes the Department of Natural Resources to adopt regulations governing conduct in the area. AS 41.23.220(a) provides that a person who violates the new law or a regulation under the new law commits a violation. AS 41.23.220(b) requires the Alaska Supreme Court to establish a bail schedule for violations of the statutes and regulations. The law specifically requires that the violations be disposed of without court appearance. One of the regulations adopted prohibits burning a vehicle in the area; the bail was adopted in Supreme Court Order 1711 at $50.

In 2008 the legislature enacted AS 11.46.420, which adopted a new crime, arson in the third degree. This prohibits burning a vehicle on state or municipal land. The penalty for this crime is a class C felony.

These sections correct this inconsistency by excluding burning a vehicle on state land from the other prohibitions that are effective in the Knik River Public Use Area. This change was originally in HB 175.

Section 18 of HB 127 -- redrafts the law enacted last year allowing the Attorney General to issue administrative subpoenas for law enforcement to obtain limited information from an Internet service provider if there is reasonable cause to believe that an Internet service account has been used in connection with the crimes of online enticement of a minor, unlawful exploitation of a minor, distribution of child pornography, possession of child pornography, or distribution of indecent material to a minor.

The bill allows a designee of the attorney general, still within the Department of Law, to issue the administrative subpoenas. It corrects a problem with the service provisions of the law to allow service of the subpoenas in any manner authorized by law or acceptable to the Internet service provider. The bill clarifies that a person who does not obey a subpoena or ask the court to quash the subpoena may be guilty of contempt. The bill does not include a problematic provision of current law which requires either returning information to the Internet service provider or destroying it if a criminal prosecution is not undertaken. There are two problems with this: first, an Internet service provider does not need the documents returned

because they already have the information. Second, it is not good public policy for documents in the possession of a public agency be destroyed. It is better policy that this information is kept as part of a confidential police investigation. The bill also provides that a person may not bring a civil action against an Internet service provider for complying with an administrative subpoena.

Section 19 of HB 127 -- provides that the crime of unlawful exploitation of a minor is not included in the crimes that require an automatic waiver from juvenile to adult court for a person who is 16 or 17 years of age who is charged with commission of the offense.

Section 20 of HB 127 redrafts Rule 5(a)(1), Alaska Rules of Criminal Procedure, to correct a drafting error and to make the rule more readable. The rule was changed last year to extend the deadline from 24 to 48 hours for bringing an arrested person before a judicial officer. This change corrects the drafting error, which currently defines a term that is not used in the rule.

Honorable Sean Parnell
Governor
State of Alaska
PO Box 110001
Juneau, AK 99811-0001

OFFICE OF THE GOVERNOR
MAILROOM
FEB 16 2011

Dear Governor Parnell:

On behalf of our respective organizations, we would like to thank you for facilitating the introduction of House Bill 127 and Senate Bill 72, relating to the crimes of stalking, online enticement of a minor, unlawful exploitation of a minor, endangering the welfare of a child, sending an explicit image of a minor, harassment, distribution of indecent material to minors, and misconduct involving confidential information; relating to probation; and providing for an effective date.

We met recently to review proposed legislation and decided to unanimously support this bill.

Again, thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organizations can do to assist in the passage of this bill.

Sincerely,

John Lucking Jr., President
Alaska Peace Officers Association

Subject: SB 72 Statistics

Follow Up Flag: Follow up
Flag Status: Flagged

Hello Cindy. I was unable to attend your Monday hearing on SB 72 (the governor's crime bill), but I did listen to the recording of the hearing. During that hearing the committee wondered how many cases would be impacted by the increased penalties reflected in sections 3, 4 and 5 of the bill. I asked our data people how many times those offenses were charged in FY 10. There were 4 cases of online enticement under AS 11.41.452(d) (section 3) and 1 case under AS 11.41.452(e) (section 4). There were 7 cases filed under AS 11.41.455, (section 5 of the bill), though I can't tell from the numbers I received if any were under the provision that already makes these a class A felony.

Although whenever we compare case numbers with others in the criminal justice system we invariably end up with slightly different numbers, our numbers seem consistent with those included in the Department of Corrections fiscal note (an average of five cases per year for these three case types). If the committee's question is whether there are a lot of these case or just a few, I think the answer is just a few.

Doug

MEMORANDUM

STATE OF ALASKA

Department of Law - Criminal Division

To: Senate Judiciary Committee

Date: March 1, 2010

Thru: Richard Svobodny, Deputy Attorney General
Anne Carpeneti, Assistant Attorney General

From: Susan S. McLean SMc
Director, Criminal Division

Subject: **Other State Rules - First Appearance After Arrest**

General Considerations

The Fourth Amendment requires that a person must be released from custody after 48 hours if a court has not determined that there is probable cause for the arrest. *County of Riverside v. McLaughlin,* 500 U.S. 44, 57-59, 111 S.Ct. 1661, 1670-1671 (1991). Violation of the rule is but one factor to consider in determining whether to suppress a defendant's in-custody statements.

- Since probable cause (and the amount of bail) must be determined before an arrest warrant issues, a probable cause determination only applies to warrantless arrests.
- Since probable cause may be determined on the basis of affidavits and sworn testimony after a warrantless arrest, the defendant's presence is not required at a probable cause hearing.
- Many states require appearance before a magistrate without unnecessary delay, but most courts have not defined "without unnecessary delay" as a specific amount of time, and determine meaning on a case by case basis.

Only 3 of the 24 states which set specific time limits mandate appearance within 24 actual hours of arrest.

Summary - First Appearance Following Warrantless Arrest, By Total Number of States

3 states - 24 hours, calculated including weekends and holidays (AK, FL, MD)
1 state - 24 hours, weekends and holidays *may* be included or excluded (WA)
6 states - 24 hours, calculated *excluding* weekends and holidays (AZ, CT, DE, ID, MA, NH)

1 state - 36 hours, calculated *excluding* day of arrest, Sundays and holidays (MN)

7 states- 48 hours, including weekends and holidays (AL, AR, GA, HI, MS, NE, TX)
1 state - 48 hours, *excluding* Sunday, holiday, and days when court not in session (CA)
1 state - 48 hours, *excluding* Saturday, Sunday and holidays (ME)
1 state - 48 hours if 1st appearance is combined w/prob. cause hearing (court decision) (WI)

2 states - 72 hours, including weekends and holidays (NJ, WY)
1 state - 72 hours, *excluding* Saturday, Sunday and holidays (LA)
1 state - 72 hours is "without delay", if probable cause w/in 48 hours (court decision) (TN)
21 states - "without unnecessary delay" (CO, IL, IA, KS, KY, MI, MT, NV, NM, NY, NC, ND, OH, OK, OR, PA, RI, SD, UT, VT, WV)

2 states - "forthwith" (SC, VA)

1 state - "promptly" (repealed a 24- hour rule in 1995) (IN)

1 state - person must be released if not "charged" within 20 hours, but no provision for first appearance (MO)

State Time Limits for Initial Appearance Before Magistrate

State	Time Limit	Authority	Statutory language/construction
Alabama	48 hours - Warrantless arrest 72 hours - Arrest w/ warrant	Ala. R. Crim. P. 4.3(a)(1)(iii) Ala. R. Crim. P. 4.3(b)(2)(i)	
Alaska	24 hours, including weekends and holidays	Alaska R. Crim. P. 5(a)(1)	
Arizona	24 hours, excluding Sat., Sun and holidays	Ariz. R. Crim. P. 4.1(b) and Ariz. R. Crim. P. 1.3	*See, State v. Watkins,* 2008 WL 3171651 * 3 (Ariz. App. Aug.5, 2008) (Sat. Sun. and legal holiday excluded from calculation of 24 hrs; citing Rules 4.1(b) and 1.3))
Arkansas	48 hours Case law suggests that exception may exist for weekends and holidays	Ark. R. Crim. P. 4.1(e)	*See, Larson v. Dorney,*__ F.Supp.__, Slip. Op. 2009WL 903392 *4 (W.D. Ark, April 1, 2009)(delay between arrest on Good Friday and appearance on Monday was "as promptly as calendar would allow")
California	48 hours, excluding Sundays and holidays. If 48 hours expires when court is not in session, then next judicial day.	CA Penal Code § 825(a)(1) CA Penal Code § 825(a)(2)	
Colorado	without unnecessary delay	CRSA. § 16-2-112 Colo. R. Crim. P. 5	
Connecticut	24 hours, excluding Sat., Sun. and holidays	CRS 54-1(g) Conn. Practice Book R. 37-1	Statutory language "promptly before the court sitting next regularly" means the next court day, excluding weekends and holidays. *State v. Pirowski,* 11 Conn. App. 238,240, 526 A.2d 562 (1996)
Delaware	24 hours, excluding Sundays and holidays	11 Del. C. § 1909	
Florida	24 hours, including weekends and holidays	Fla. R. Crim. P 3.130	
Georgia	48 hours –warrantless arrest 72 hours – arrest with warrant	Ga. Uniform St. Ct. R. 26.1 Ga. St § 17-4-62; Ga. St § 117-4-26	
Hawaii	48 hours	H.R.S. 803-9(5)	
Idaho	24 hours, excluding Sat., Sun. and holidays	I.C.R, Rule 5(b)	
Illinois	without unnecessary delay	I.L.C.S. § 109-1	*See, People v. Willis,* 831 N.E.2d, 531, 538 (Ill., 2005) Ill Court cites *McLaughlin* as requiring 48 hours, but delay is only one factor to be examined in deciding whether confession is voluntary. Court has not otherwise defined "unnecessary delay".

Indiana	" promptly" 24 hr. rule repealed, 1995 Ct. decision implies that more than 48 hours can pass before initial appearance before magistrate	Ind. Code § 35-33-7-1	*See, State v. Larson,* 776 N.W.2d, 254, 258 (Ind. 2009) – probable cause must be determined with 48 hours, but can be based on hearsay and written testimony. "Arrested person has no right to be physically present at probable cause hearing." Ind. law does not provide for a specific period of time in defining how "promptly" a person is brought before magistrate
Iowa	without unnecessary delay	I.C.A. 804.22	
Kansas	without unnecessary delay	KSA 2003 Supp. 22- 2901	*See, State v. Carrow,* 2006 WL 399251 *4 (Kan. App., Feb. 17, 2006) - cites *McLaughlin* as defining "without unreasonable delay" to mean that period of delay "cannot be longer than 48 hours, excluding weekends and holidays"
Kentucky	without unnecessary delay	Ky. R. Crim. P. 3.02(2)	
Louisiana	72 hours excluding Sat., Sun, holidays 48 hours probable cause hearing, which is not adversarial and conducted without presence of defendant	LSA – C.Cr. P. Art. 230-1(A) LSA –C. Cr. P. Art. 230.2(A)	
Maine	48 hours, excluding Sat., Sun and holidays	Me. R. Crim. P. 5(a)	
Maryland	24 hours, including weekends and holidays	Md. Rule 4-212(e) and (f)	Although statute does not specifically state "including weekends", it is clear from case law. *See, e.g., Odum v. State,* 846 A. 2d 145 (Md. App. 2004)
Massachusetts	24 hours, excluding weekends and holidays (see judicial interpretation re probable cause determination)	Mass. R. Crim. P. 7	"accused shall be brought before court then in session, and, if not at its next session". Language at the court's "next session" suggests that if an accused is arrested on Friday, the next session would be a regular court day. *See, Jenkins v. Chief Justice of Dist. Court Dept.,* 619 N.E.2d 324, 337,339 (Mass, 1993) holding that probable cause must be determined within 24 hours but that the determination may be made ex parte upon written documents.
Michigan	without unnecessary delay	M.C.L.A. § 764.13	
Minnesota	36 hours, excluding day of arrest, Sun. and holidays	49 M.S.A. R. Crim. P. 4.02(5)	

Mississippi	without unnecessary delay, within 48 hours	M.C.A. 99-3-17 Uniform Cnty and Cir R 6.03	
Missouri	None – must be charged within 20 hours, but no requirement of personal appearance	V.Ann.Mo.C. Art. 544.170	All persons who are arrested without warrant shall be released if not charged and held by warrant within 20 hours of arrest
Montana	without unnecessary delay	MCA 46-7-101	*See, St. v. Brown*, 933 P.2d 672, 675-676 (Mont. 1999) acknowledging *McLaughlin* 48 hour time limit for probable cause determination, and holding that to be one factor in deciding voluntariness of confession.
Nebraska	48 hours	Neb. Crim. Rule 5.1(b)(1)	
Nevada	without unnecessary delay -warrantless arrest 72 hours- arrest with warrant	N.R.S. 171-1771 N.R.S. 171-178	*See, Powell v. State,* 930 P.2d 1123 (Nev. 1997), acknowledging that *McLaughlin* requires probable cause hearing within 48 hours
New Hampshire	24 hours, excluding Sat., Sun. and holidays	N.R.S. § 594:20(a)	
New Jersey	72 hours, provided that complaint showing probable cause is filed within 12 hours of arrest	N.J. Crim. Rules 3:4-1 and 3:4-2	
New Mexico	without unnecessary delay	NMSA § 31-1-5	
New York	without unnecessary delay	McKinney's CPL § 140.20 sub1	
North Carolina	without unnecessary delay	N.C.G.S.A. § 15A-511	
North Dakota	without unnecessary delay	N.D.C.C. 2906-25 N.D. Crim. Rule 5(a)	
Ohio	without unnecessary delay	O.R.C. § 29.35.05 Ohio Crim. Rule 4(e)	
Oklahoma	without unnecessary delay	22 Okl. Stat. Ann. § 181	*See, Black v. State, 871 P.2d 35, 39 (Okl.Cr.*1994).Citing *McLaughlin*, court recognized that delay longer than 48 hours in taking defendant to probable cause hearing is unreasonable.
Oregon	without unnecessary delay		
Pennsylvania	without unnecessary delay	Pa.R.Crim.P. 519	
Rhode Island	without unnecessary delay (unless charged w/ offense under RI Gen Law. 12.13.1.1*)	Super. R. Crim. P., Rule 5 Dist. R. Crim. P., Rule 9	*Unless charged w/ offense under RI Gen Laws, 12.13.1.1 (charges carrying life sentence or firearm offenses committed by persons previously convicted of offense carrying life sentence), in which case 48 hrs., excluding Sat., Sun. and holidays
South Carolina	Shall be forthwith carried before a magistrate and a warrant of arrest procured	S.C. Code 1976§ 22-5-200	

South Dakota	without unnecessary delay	SDCL § 23A-4-1	*State v. Larson*, 776 N.W. 2d 254, 258 (S.D., 2009) persons arrested without warrant are constitutionally entitled to probable cause determination within 24 hours.
Tennessee	"without unnecessary delay" – Judicially defined – 72 hours for appearance before magistrate 48 hrs for probable cause, but hearing unnecessary	Tenn. R. Crim. P. 5(a)	Due process is violated if probable cause is not determined within 48 hours, but a full adversarial hearing is not necessary. If an individual is not brought before a magistrate within 72 hours there has been an unnecessary delay within the definition of Tenn. R. Crim. P. 5.1. *State v. Carter*, 16 SW 762, 766 (Tenn. 2000)
Texas	48 hours	V.Ann. Tex. C.C.P. Art 14.06	
Utah	without unnecessary delay- 48 hours probable cause, but arrestee need not be present	U.C.A. 1953 § 77-723 Utah Criminal Rule 7	
Vermont	without unnecessary delay	Vt. R. Crim. P. 3(g)	
Virginia	"forthwith"	Va. Code Ann. § 19.2-82	Accused and officer appear together "forwith" for probable cause hearing. Does not apply to arrests with warrant
Washington	(Warrantless arrest only) 24 hours, including weekends and holidays 48 hours prob. cause, but hearing not required	Wash. Cr.RLJ 3.2.1 (c) Wash. Cr.RLJ 3.2.1(a)	"must be brought before a court of limited jurisdiction as soon as practicable after the detention is commenced, but in any event before the close of business on the next court day." Sat, Sun and holidays may be considered court days
West Virginia	Without unnecessary delay	W.Va. Code Sex. 62-1-5 W.Va. R. Crim. P. 5	
Wisconsin	Within a reasonable time Judicial definition - 48 hours implicitly the reasonable time	W.S.A. § 970.01	If the initial appearance also serves as the *Riverside* probable-cause hearing it must be held within 48 hours barring extraordinary circumstances. In cases where a defendant's *Riverside (v. McLaughlin)* determination was properly made in a proceeding prior to the initial appearance, court looks at the individual circumstances of the case to determine a "reasonable time" from the defendant's arrest *State v. Evans*, 522 N.W. 2d, 554, 563 (Wis. App., 1994) (Held: 4 days over a weekend not unreasonable)
Wyoming	without unnecessary delay and in no event more than 72 hours	W. R Crim P. 5(a)

Re: Section 9 of House Bill 127

Dear Chairman Gatto and Vice-Chair Thompson,

The members of Media Coalition have asked me to communicate their concerns regarding H.B. 127 sec. 9. The trade associations and other organizations that comprise Media Coalition have many members throughout the country, including Alaska: publishers, booksellers and librarians as well as manufacturers and retailers of recordings, films, videos and video games and their consumers. Some of our members are plaintiffs in *American Booksellers Foundation for Free Expression (ABFFE) v. Burns* (preliminary injunction granted as *ABFFE v. Sullivan*) a First Amendment challenge to 11.61.128(a).

Section 9 of H.B. 127 would narrow AS 11.61.128(a) to only criminalize the distribution of material "harmful to minors" by an adult if the recipient is under 16 years old and the adult is reckless regarding the recipients age or the adult believes the recipient is less than 16 years old. The legislation would also add a knowledge requirement as to the content being sent to the minor.

This bill is an improvement on AS 11.61.128(a) which was enjoined October 21, but even with these changes the law would still violate the First Amendment and the Commerce Clause of the US Constitution. We welcome the opportunity to work with the Attorney General and this Committee to amend Section 9 to make it constitutionally sound. We believe that modest changes to the bill would cure the constitutional problems in Section 9 while still providing law enforcement with the means to protect minors from adults looking to prey on them.

We appreciate the chance to share our concerns with the Judiciary Committee. If you

Re: House Bill 127
ACLU Review of Constitutional Issues

Chair Gatto, Vice-Chair Thompson:

Thank you for the opportunity to submit written testimony with respect to House Bill 127.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout the State of Alaska who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions. In that respect, we wish to advise you of constitutional issues with the Bill.

As you may know, the ACLU of Alaska Foundation is currently representing several Alaska bookstores and others in *American Booksellers Foundation for Free Expression (ABFFE) v. Burns*. The federal court has already granted a preliminary injunction, on First Amendment grounds, against AS 11.61.128(a).

Section 9 of H.B. 127 would narrow AS 11.61.128(a) to only criminalize the distribution of material "harmful to minors" by an adult if the recipient is under 16 years old and the adult is reckless regarding the recipients age or the adult believes the recipient is less than 16 years old. The legislation would also add a knowledge requirement as to the content being sent to the minor.

This bill is an improvement on AS 11.61.128(a) which was enjoined October 21, but even with these changes the law would still violate the First Amendment and the Commerce Clause of the US Constitution. We welcome the opportunity to work with the Attorney General and this Committee to amend Section 9 to make it constitutionally sound. We believe that modest changes to the bill would cure the constitutional problems in Section 9 while still providing law enforcement with the means to protect minors from adults looking to prey on them.

Please feel free to contact the undersigned should you require any additional information. We are happy to reply to any questions that may arise, or to answer informally any questions which Members of the Committee may have.

Thank you again for the opportunity to share our thoughts.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

IN THE UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF ALASKA

AMERICAN BOOKSELLERS FOUNDATION FOR FREE EXPRESSION, et al., Plaintiffs, vs. DANIEL S. SULLIVAN, in his official capacity as ATTORNEY GENERAL OF THE STATE OF ALASKA, Defendant.	Case No. 3:10-cv-0193-RRB **ORDER GRANTING PRELIMINARY INJUNCTION**

I. MOTION PRESENTED

Pursuant to Fed. R. Civ. P. 65, Plaintiffs move for a preliminary injunction and other appropriate relief against enforcement of AS 11.61.128, both as amended by Sections 9-12 in Senate Bill No. 222, 26th Leg., 2d Sess., and as prior to amendment, which purports to limit access to materials deemed "harmful to minors." A copy of the statute at issue is found at Docket 7-2. Plaintiffs represent a spectrum of individuals and organizations – including booksellers, a photographer, libraries, and organizations representing booksellers, publishers, and other media interests – that communicate, disseminate, display, and

access a broad range of speech in the physical world as well as through the Internet. This matter has been fully briefed and the Court enters the following order.

II. BACKGROUND

In January of 2010, Alaska passed a bill, SB 222, that amended a variety of statutes with the stated intent of strengthening initiatives relating to sexual assault and domestic violence. The bill included Sections 9-12, which amended and (according to Plaintiffs) expanded an existing censorship law. These sections imposed what Plaintiffs complain are "severe content-based restrictions on the availability, display, and dissemination of constitutionally protected speech on the Internet and physically within the State of Alaska."[1]

Plaintiffs argue that the application of the amended act to the Internet violates the First, Fifth, and Fourteenth Amendments because: it restricts adults from engaging in protected speech on the Internet; it is substantially overbroad; it criminalizes protected speech among and to older minors; it is unconstitutionally vague; and requires that, for the determination of community standards, the relevant community be local, rather than the nation. In addition, Plaintiffs argue the application of

---

[1] Docket 7 at 8.

the amended act to the Internet violates the Commerce Clause because: it regulates speech that occurs wholly outside the borders of Alaska; it imposes an unjustifiable burden on the interstate commerce over the Internet; and it subjects online speakers to inconsistent state laws.

Plaintiffs do not challenge the Alaska laws criminalizing child pornography, sexual solicitation or luring of minors, or obscenity on the Internet. Plaintiffs also do not challenge the portions of SB 222 that do not amend AS 11.61.128.

III. STANDARD OF REVIEW

In order for the Court to grant a preliminary injunction, the Plaintiffs must demonstrate:

1. a strong likelihood of success on the merits,

2. the possibility of irreparable injury to Plaintiffs if preliminary relief is not granted,

3. a balance of hardships favoring the Plaintiffs, and

4. advancement of the public interest (in certain cases).[2]

A preliminary injunction requires Plaintiffs to show *probable* success on the merits, but only the *possibility* of irreparable harm.[3]

[3] *Id.*

IV. DISCUSSION

A. Likelihood of Success on the Merits

Plaintiffs argue that they are likely to be successful on the merits because the amended act bans a large amount of speech that adults have a constitutional right to receive, and because the amended act fails strict scrutiny, is overbroad, and violates the Commerce Clause.[4] Plaintiffs argue that 18 federal judges in five circuits have struck down state statutes forbidding Internet communications deemed harmful to minors like the one at issue here.[5] In response, the State argues that because the amended act

[5] *See PSInet, Inc. v. Chapman*, 362 F.3d 227 (4th Cir. 2004), reh'g. denied. 372 F.3d 671, aff'g 167 F. Supp. 2d 878 (W.D. Va. 2001); *Amer. Booksellers Found. for Free Expression v. Dean*, 342 F.3d 96 (2d Cir. 2003), aff'g 202 F. Supp. 2d 300 (D.Vt. 2002); *ACLU v. Johnson*, 194 F.3d 1149 (10th Cir. 1999), aff'g 4 F. Supp. 2d 1029 (D.N.M. 1998); *Southeast Booksellers Ass'n v. McMaster*, 371 F. Supp. 2d 773 (D.S.C. 2005); ACLU v. Napolitano, Civ. No. 00-0505 (D.Ariz. June 14, 2002) (permanent injunction), sub nom. ACLU v. Goddard, 2004 WL 3770439 (D. Ariz. Apr. 23, 2004) (statute as amended in 2003 permanently enjoined); *Cyberspace Commc'ns, Inc. v. Engler*, 142 F. Supp. 2d 827 (E.D. Mich. 2001) (summary judgment and permanent injunction), 55 F. Supp. 2d 737 (E.D. Mich. 1999) (preliminary injunction), aff'd, 238 F.3d 420 (6th Cir. 2000) (unpublished); *Am. Libraries Ass'n v. Pataki*, 969 F. Supp. 160 (S.D.N.Y. 1997). The COPA statute, a federal statute similar to the Amended Act, was held unconstitutional. *ACLU v. Gonzales*, 478 F. Supp. 2d 775 (E.D. Pa. 2007), aff'd sub nom. *ACLU v. Mukasey*, 534 F.3d 181 (3d Cir. 2008), cert. denied, 129 S. Ct. 1032 (2009). In addition, the Wisconsin Supreme Court found the Wisconsin statute unconstitutional for lacking an appropriate scienter requirement. *State v. Weidner*, 611 N.W. 2d. 684 (Wis. 2000).

is narrower than the other statutes found unconstitutional, they are unlikely to succeed on the merits.

The State provides little support for its conclusory statement. Even a cursory review of the cases cited by Plaintiffs reveal legitimate concerns regarding AS 11.61.128. In *Reno v. ACLU*,[6] a unanimous Supreme Court struck down a similar federal statute, agreeing with the District Court that the word "indecent" was too vague to provide the basis for a criminal prosecution.[7] Although the Alaska Statute enumerates what is "indecent" and contains a definition of what is considered "harmful to minors" (elements missing in the *Reno* case), the Third Circuit concluded that "harmful to minors" language in the Child Online Protection Act (COPA) did not save that Federal statute. The Third Circuit found that the COPA was not narrowly tailored so as to survive a strict scrutiny analysis.[8]

The Court concludes that there is a strong likelihood of success on the merits in this matter.

B. Likelihood of Irreparable Harm if the Injunction is Denied

Although there are no pending prosecutions under the Amended Act against any of the Plaintiffs, they argue they will suffer

[7] *Id.* at 861.

[8] *ACLU v. Mukasey*, 534 F.3d 181, 198 (3d Cir. 2008).

irreparable harm in the absence of an injunction because "the loss of First Amendment freedoms, for even minimal periods of time, unquestionably constitutes irreparable injury."[9]

The State argues that none of the Plaintiffs or any other entity brought suit under the original 2005 statute complaining that it infringed on their constitutional rights. Further, none of the Plaintiffs have alleged actual harms beyond a "chilling effect." Such a delay in seeking a preliminary injunction, the State argues, is a factor to be considered in weighing the relief. The State's brief provides examples of the types of activities that result in charges under this statute and notes that "the statute was designed and is employed in a way to stop predators from sexually grooming children and should be allowed to be used this way while the complaint is pending."[10] In response, Plaintiffs argue that they fear future prosecution and are chilled by the amended act. It is irrelevant, they argue, that no Plaintiff has been prosecuted thus far.

The Court agrees with Plaintiffs. "The alleged danger of this statute is, in large measure, one of self-censorship; a harm that can be realized even without an actual prosecution."[11] "[I]f

---

[9] *Elrod v. Burns*, 427 U.S. 347, 373 (1976).

[10] Docket 33 at 5.

[11] *Virginia v. Amer. Booksellers*, 484 U.S. 383, 392 (1988).

[Plaintiffs'] interpretation of the statute is correct, [they] will have to take significant and costly compliance measures or risk criminal prosecution."[12] While the State argues that it will not, in fact, pursue criminal charges against any of the Plaintiffs, nothing prevents the State from doing so absent an injunction from this Court.

C. Harm to Defendant vs. Harm to Plaintiffs

Plaintiffs argue the only legitimate harm that Defendant could allege is an inability to prosecute persons under the amended act. On the other hand, Plaintiffs are faced with unconstitutional restrictions on their communicative activities with the potential of a criminal charge hanging over them.[13]

The State complains that the amended act is designed to prosecute those predators who use pornography to groom children for sexual abuse, and that without this statute the State would have to wait until a child was actually sexually assaulted before intervening. The State argues this outweighs any chilling effect on the Plaintiffs. However, the State's argument is overstated, given other statutes that are available for prosecution of predators via the internet. Specifically, AS 11.41.452, which has been in place since November of 2005, addresses "online enticement

---

[12] *Id.*

[13] Docket 7 at 16.

of a minor." A person commits the crime of online enticement of a minor under this statute if that person, "being 18 years of age or older, knowingly uses a computer to communicate with another person to entice, solicit, or encourage the person to engage in an act described in AS 11.41.455." AS 11.41.455 addresses "unlawful exploitation of a minor" and prohibits inducing or employing a child under 18 years of age to engage in actual or simulated conduct that mirrors the conduct in the statute at issue in this case.

In short, the State has clear alternative options for prosecuting sexual predators.

D. Public Interest.

Plaintiffs argue a preliminary injunction would serve the public interest by upholding the constitutional rights of the public.[14] The State argues that it is not in the public's interest for the State to have to wait to act until a child has already been molested.[15] For the reasons identified in section C, the State's argument is not persuasive. The State has other mechanisms for prosecution of online predators.

---

[14] Docket 7 at 17.

[15] Docket 33 at 6.

V. CONCLUSION

In light of the foregoing, the Preliminary Injunction requested at **Docket 5** is **GRANTED.** Although the Attorney General has argued "the statute was designed and is employed in a way to stop predators from sexually grooming children and should be allowed to be used this way while the complaint is pending,"[16] the State has not provided the Court with a viable alternative that would both protect Plaintiffs during the pendency of this proceeding and allow the State to use the statute as it argues was "intended." Accordingly, the Preliminary Injunction prevents any enforcement of AS 11.61.128 until further Order of this Court, or until the parties enter into a stipulation that would eliminate the need for such an injunction. The oral argument scheduled for November 3, 2011, is **VACATED**.

IT IS SO ORDERED.

ENTERED this 20th day of October, 2010.

[16] Docket 33 at 5.

IN THE UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF ALASKA

AMERICAN BOOKSELLERS FOUNDATION FOR FREE EXPRESSION, et al.,

Plaintiffs,

vs.

DANIEL S. SULLIVAN, in his official capacity as ATTORNEY GENERAL OF THE STATE OF ALASKA,

Defendant.

Case No. 3:10-cv-0193-RRB

ORDER OF CLARIFICATION

Before the Court at Docket 48 is Defendant with a Motion for Clarification which is opposed by Plaintiffs at Docket 49.

The Court's Order at Docket 47 does not preclude law enforcement from seeking legitimate search warrants relating to violations of AS 11.41.452 or AS 11.41.455.

However, for the reasons set forth in its Order Granting Preliminary Injunction at Docket 47, AS 11.61.128 appears to be vague and over-broad on its face. Rather than specifically addressing the conduct apparently sought to be criminalized, i.e. the knowing transmittal of photographs of adult or prepubescent genitalia to a minor by one seeking to groom the minor for

exploitation, which would likely be a legitimate prohibition, the statute uses broad language that has been disfavored by many courts in the past. The Court has therefore found that Plaintiffs have shown a strong likelihood of success on the merits, a possibility of irreparable injury, and a balance of hardship favoring Plaintiffs.

Given the Court's previous order, AS 11.61.128 shall not be enforced pending further order of this Court.

IT IS SO ORDERED.

ENTERED this 17th day of November, 2010.

S/RALPH R. BEISTLINE
UNITED STATES DISTRICT JUDGE

IN THE UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF ALASKA

AMERICAN BOOKSELLERS FOUNDATION FOR FREE EXPRESSION, et al.,

Plaintiffs,

vs.

DANIEL S. SULLIVAN, in his official capacity as ATTORNEY GENERAL OF THE STATE OF ALASKA,

Defendant.

Case No. 3:10-cv-0193-RRB

ORDER REGARDING SECOND MOTION FOR CLARIFICATION

On October 20, 2010, at Docket 47, this Court entered a Preliminary Injunction prohibiting enforcement of A.S. § 11.61.128 until further Order of this Court, or until the parties enter into a stipulation that would eliminate the need for such an injunction. On January 5, 2011, at Docket 54, the Department of Law sought clarification of this Court's Order, specifically regarding its ability to defend against an appeal based on "the former A.S. § 11.61.128."

It is unclear what version of the statute the Department of Law is referencing. However, the Court notes that the Preliminary Injunction in this case specifically addresses changes made to the

statute in January 2010, pursuant to Alaska Bill SB 222, sections 9-12. It is these changes to which Plaintiffs have objected in this lawsuit. Accordingly, if individuals were charged under a previous form of the statute, this Preliminary Injunction does not prohibit the Department of Law from defending against any appeals based on a prior version of A.S. § 11.61.128.

ENTERED this 8th day of February, 2011.

A Girl's Nude Photo, and Altered Lives

By JAN HOFFMAN

LACEY, Wash. — One day last winter Margarite posed naked before her bathroom mirror, held up her cellphone and took a picture. Then she sent the full-length frontal photo to Isaiah, her new boyfriend.

Both were in eighth grade.

They broke up soon after. A few weeks later, Isaiah forwarded the photo to another eighth-grade girl, once a friend of Margarite's. Around 11 o'clock at night, that girl slapped a text message on it.

"Ho Alert!" she typed. "If you think this girl is a whore, then text this to all your friends." Then she clicked open the long list of contacts on her phone and pressed "send."

In less than 24 hours, the effect was as if Margarite, 14, had sauntered naked down the hallways of the four middle schools in this racially and economically diverse suburb of the state capital, Olympia. Hundreds, possibly thousands, of students had received her photo and forwarded it.

In short order, students would be handcuffed and humiliated, parents mortified and lessons learned at a harsh cost. Only then would the community try to turn the fiasco into an opportunity to educate.

Around the country, law enforcement officials and educators are struggling with how to confront minors who "sext," an imprecise term that refers to sending sexual photos, videos or texts from one cellphone to another.

But adults face a hard truth. For teenagers, who have ready access to technology and are growing up in a culture that celebrates body flaunting, sexting is laughably easy, unremarkable and even compelling: the primary reason teenagers sext is to look cool and sexy to someone they find attractive.

Indeed, the photos can confer cachet.

"Having a naked picture of your significant other on your cellphone is an advertisement that you're sexually active to a degree that gives you status," said Rick Peters, a senior deputy prosecuting attorney for Thurston County, which includes Lacey. "It's an electronic hickey."

In the fall of 2009, Margarite, a petite, pretty girl with dark hair and a tiny diamond stud in her nose, was living with her father, and her life was becoming troubled. Her relationship with her father's new wife was tense. Her grades were in a free fall.

Her social life was deteriorating. A good friendship with a girl had soured, abetted by a fight over a boy. This girl would be the one who would later brand Margarite's photo and forward it.

Margarite's former friend is tough and strong-willed, determined to stand out as well as fit in, according to those who know her. Her parents, recent immigrants, speak limited English and were not able to supervise her texting.

In the shifting power dynamics of middle school girls, the former friend understood well that she who sneers first sneers best. The flick of a cutting remark, swiftly followed by "Just kidding!" The eye roll. As the animosity between the two girls escalated, Margarite felt shunned by an entire group of girls and was eating lunch by herself. At home she retreated to her bedroom, alone with her cellphone and computer.

Her mother would later speculate that Margarite desperately needed to feel noticed and special. That December, just before the holidays, she took the photo of herself and sent it to Isaiah, a low-key, likable athlete she had recently gotten to know.

After the winter break, Margarite was preparing a fresh start. She would move back in with her mother and transfer to a school in a nearby district.

But one night in late January, a few days before her transfer, Margarite's cellphone began vibrating around 1 a.m., waking her. She was being bombarded by texts — alerts from worried friends, leers from boys she scarcely knew.

The next morning in her mother's car, Margarite lowered her head, hiding her reddened eyes, her terrible secret.

"Are you O.K.?" asked her mother, Antoinette, who like other parents and children who agreed to be interviewed asked to be identified by only first or middle names to protect their privacy.

"Yeah."

"Are you sure?"

"Yeah."

But her mother knew otherwise. Earlier that morning a parent had phoned Kirsten Rae, the principal of Margarite's school, Chinook Middle, complaining about a naked photo sent to her child. The child knew at least a dozen students who had received it.

The principal then called Antoinette. The police wanted to question Margarite. On the drive to school, the girl sobbed uncontrollably, feeling betrayed and degraded.

The school was buzzing. "When I opened my phone I was scared," recalled an eighth grader. "I knew who the girl in the picture was. It's hard to unsee something."

Meanwhile, another middle school principal in Lacey had begun investigating a sexting complaint that morning. Ms. Rae realized that Margarite's photo had gone viral.

Students were summoned to Ms. Rae's office and questioned by the police. Their cellphones were confiscated.

Ms. Rae went into crisis management. Parents were calling, wanting to know whether their children would be arrested and how she would contain the spread. She drafted a letter for school families. Administrators planned a districtwide voicemail to the families of middle school students. Chinook teachers would discuss the issue in homerooms the next day.

By late morning, Isaiah and Margarite's former friend had been identified and pulled out of class.

Then Isaiah's mother, Jennifer, got the call. "Naked?" she shouted. "How naked?"

When Jennifer, who works for an accountant, arrived at the school, she ran to Isaiah, a tall, slender boy with the startled air of an unfolding foal. He was weeping.

"I was in shock that I was in trouble," he recalled during a recent interview. "I didn't go out of my way to forward it, but I felt responsible. It was bad. Really bad."

He told the police that the other girl had pressured him into sending her Margarite's photo, vowing she just wanted to look at it. He said he had not known that their friendship had disintegrated.

How had the sexting from Margarite begun? "We were about to date, and you'll be like, 'Oh, blah blah, I really like you, can you send me a picture?' " Isaiah recalled.

"I don't remember if I asked her first or if she asked me. Well, I think I did send her a picture. Yeah, I'm pretty sure. Mine was, like, no shirt on.

"It is very common," he said. "I'd seen pictures on other boys' cellphones."

Mr. Peters, the county prosecutor, had been hearing that sexting was becoming a problem in the community. In a recent interview, he said that if the case had just involved photos sent between Isaiah and Margarite, he would have called the parents but not pressed charges.

"The idea of forwarding that picture was bad enough," he said. "But the text elevated it to something far more serious. It was mean-girl drama, an all-out attempt to destroy someone without thinking about the implications."

He decided against charging Margarite. But he did charge three students with dissemination of child pornography, a Class C felony, because they had set off the viral outbreak.

After school had been let out that day in late January, the police read Isaiah his rights, cuffed his hands behind his back and led him and Margarite's former friend out of the building. The eighth graders would have to spend the night in the county juvenile detention center.

The two of them and a 13-year-old girl who had helped forward the photo were arraigned before a judge the next day. (Margarite's former friend declined to be interviewed, as did the girl who helped her.)

Officials took away Isaiah's clothes and shoes. He changed into regulation white briefs and a blue jumpsuit. He was miserable and terrified.

"My socks got wet in the shower," Isaiah said.

WHERE TO DRAW THE LINE?

Sexting is not illegal.

Two adults sending each other naughty pictures, dirty language? Just garden-variety First Amendment-protected speech.

A November 2009 AARP article, "Sexting Not Just For Kids," reported approvingly on the practice for older people, too. In women's magazines and college students' blogs, coy guides include pragmatic tips like making sure to keep your face out of the photo.

But when that sexually explicit image includes a participant — subject, photographer, distributor or recipient — who is under 18, child pornography laws may apply.

"I didn't know it was against the law," Isaiah said.

That is because culturally, such a fine distinction eludes most teenagers. Their world is steeped in highly sexualized messages. Extreme pornography is easily available on the Internet. Hit songs and music videos promote stripping and sexting.

"Take a dirty picture for me," urge the pop stars Taio Cruz and Kesha in their recent duet, "Dirty Picture." "Send the dirty picture to me. Snap."

In a 2010 Super Bowl advertisement for Motorola, the actress Megan Fox takes a cellphone picture of herself in a bubble bath. "I wonder what would happen if I were to send this out?" she muses. The commercial continues with goggle-eyed men gaping at the forwarded photo — normalizing and encouraging such messages.

"You can't expect teenagers not to do something they see happening all around them," said Susannah Stern, an associate professor at the University of San Diego who writes about adolescence and technology.

"They're practicing to be a part of adult culture," Dr. Stern said. "And in 2011, that is a culture of sexualization and of putting yourself out there to validate who you are and that you matter."

The prevalence of under-age sexting is unclear and can often depend on the culture of a particular school or circle of students. An Internet poll conducted for The Associated Press and MTV by Knowledge Networks in September 2009 indicated that 24 percent of 14- to 17-year-olds had been involved in "some type of naked sexting," either by cellphone or on the Internet. A December 2009 telephone poll from the Pew Research Center's Internet and American Life Project found that 5 percent of 14- to 17-year-olds had sent naked or nearly naked photos or video by cellphone, and that 18 percent had received them. Boys and girls send photos in roughly the same proportion, the Pew survey found.

But a double standard holds. While a boy caught sending a picture of himself may be regarded as a fool or even a boastful stud, girls, regardless of their bravado, are castigated as sluts.

Photos of girls tend to go viral more often, because boys and girls will circulate girls' photos in part to shame them, explained Danah Boyd, a senior social media researcher at Microsoft and a fellow at Harvard University's Berkman Center for Internet and Society.

In contrast, when a boy sends a revealing photo of himself to a girl, Dr. Boyd noted, she usually does not circulate it. And, Dr. Boyd added, boys do not tend to circulate photos of

other boys: "A straight-identified boy will never admit to having naked photos of a boy on his phone."

Policy makers are beginning to recognize that a uniform response to these cases does not fit.

"I hate the word 'sexting,' " said Andrew J. Harris, an assistant professor of criminology at the University of Massachusetts in Lowell, who is leading a study of the practice among adolescents to help develop policies to address it. "We're talking about a lot of different behaviors and a lot of different motivations."

There is the high-tech flirt. The troubled attention-seeker. A couple's consensual exchanges. Drunken teenagers horsing around. Pressure from a boyfriend. Malicious distribution. A teenager who barrages another with unsolicited lewd photos or texts. Or, as in a 2009 Wisconsin case of "sextortion," a boy, pretending to be a girl online, who solicited explicit pictures of boys, which he then used as blackmail to compel those boys to have sex with him.

The content of the photos can vary widely too, from suggestive to sadistic.

Adults in positions of authority have been debating how to respond. Many school districts have banned sexting and now authorize principals to search cellphones. According to the National Conference of State Legislatures, at least 26 states have tried to pass some sort of sexting legislation since 2009.

"The majority of states are trying to put something in place to educate kids before and after the event," said Justin T. Fitzsimmons, a senior attorney at the National District Attorneys Association who specializes in Internet crimes against children. "We have to protect kids from themselves sometimes. We're on the cusp of teaching them how to manage their electronic reputations."

But if the Lacey students were convicted of dissemination of child pornography, they could be sentenced to up to 36 weeks in a juvenile detention center. They would be registered as sex offenders. Because they were under 15, however, after two years they could petition a court to remove their names from the registry, if they could prove they no longer posed a threat to the public.

PENALTIES AND PREVENTION

Rick Peters, the prosecuting attorney, never intended for the Chinook Middle School students to receive draconian sentences. But he wanted to send a scared-straight message to them, as well as to the community.

Yet when the local news media storm cascaded, the outcry was not about the severe penalties for a felony sexting conviction. It was about why Mr. Peters had not also arrested Margarite.

"She's a victim," Mr. Peters said. "She made an ill-advised decision to share that picture with her boyfriend. As far as she knew, that was as far as it would go.

"What good would come from prosecuting her? What lesson could we teach her that she hasn't already learned now 1,000 times over?"

Eventually a deal was brokered for the three teenagers who were charged. The offense would be amended from the child pornography felony to a gross misdemeanor of telephone harassment. Isaiah and the two girls who had initially forwarded Margarite's photo would be eligible for a community service program that would keep them out of court, and the case could be dismissed.

Those three students would have to create public service material about the hazards of sexting, attend a session with Margarite to talk about what happened and otherwise have no contact with her.

After Margarite and her mother approved the conditions, Mr. Peters signed off, pleased.

Throughout last spring, on Monday afternoons after school, Eric Fredericks, Isaiah's math teacher, met with the three students to help them develop their material.

Margarite's former friend made a PowerPoint presentation, with slides copied from the Internet.

The younger girl made a poster dense with warnings about sexting's consequences. She concluded: "I am a 13 year old teen that made a bad choice and got my life almost totaled forever. I regret what I did more than anything but I cant take it back."

Isaiah created a two-page brochure, citing studies from the Internet, accompanied by a tumble of adolescent feeling:

"Not only does it hurt the people that are involved in the pictures you send, it can hurt your family and friends around you, the way they see you, the way you see yourself. The ways they feel about you. Them crying because of your mistakes."

Ms. Rae has yet to distribute the material. Chinook, with 630 seventh and eighth graders, still has students who know those involved in last year's episode. She wants to give Isaiah, Margarite and the others more time to distance themselves.

While the case was on its way to resolution, prosecutors and district educators decided to put its aftershock to good use.

"After the story broke, parents called us because they didn't know about the law that could send kids to jail for a bad choice," said Courtney Schrieve, a spokeswoman for the North Thurston Public Schools. "Kids didn't know about it either. So we decided to turn this into an opportunity to educate teachers, parents and students."

In October, Ms. Rae, the police, prosecutors and Mr. Fitzsimmons of the National District Attorneys Association held separate forums about sexting for Lacey's teachers, parents and student delegations from the four middle schools.

The students then returned to their homerooms to teach classmates what they had learned.

Elizabeth Colón taught a session with Jon Reid. Both are eighth graders at Chinook.

"Most of the questions were about penalties," she said. "Kids wanted to know if they would get into trouble just for receiving the picture."

Jon spoke about long-term consequences. "I said that people may look at you differently," he said. "They'll know what kind of person you were, even though you changed."

One spring evening, the three students who had been disciplined met for a mediation session with Margarite and two facilitators from Community Youth Services. The searing, painful session, which included the students' parents and Mr. Fredericks, lasted several hours. Everyone was asked to talk about his or her role in the episode.

Mr. Fredericks listed all the people who had spent hours trying to clean the mess the students had created in a matter of seconds: police officers, lawyers, teachers, principals, hundreds of families.

Then it was Isaiah's turn. He looked Margarite in the eye. "He poured his heart out," Mr. Fredericks recalled. Isaiah said that he was ashamed of himself, but that most of all, he was sorry he had broken Margarite's trust. Then he asked for her understanding and forgiveness. "He cried," Mr. Fredericks said. "I choked up."

The former friend who had forwarded the photo, creating the uproar, was accompanied by her mortified father, an older sister and a translator. She came across as terse and somewhat perfunctory, recalled several people who were there.

One of the last to speak was Margarite's father, Dan, an industrial engineer.

"I could say it was everyone else's fault," Dan said. "But I had a piece of it, too. I learned a big lesson about my lack of involvement in her use of the phone and texting. I trusted her too much."

He had not expected the students to be punished severely, he continued. But they needed to understand that their impulsive actions had ramifications.

"When you walk out of here tonight, it's over, you're done with it," he said, looking around the room.

"Keep in mind that the only person this will have a lasting impact on," he concluded, is his daughter.

The photo most certainly still exists on cellphones, and perhaps on social networking sites, readily retrievable.

"She will have to live with this for the rest of her life."

THE VICTIM

When the police were finished questioning Margarite at Chinook in January 2010, her mother, a property manager, laid down the law. For the time being, no cellphone. No Internet. No TV.

Margarite, used to her father's indulgence and unfettered access to technology, was furious.

But the punishment insulated Margarite from the wave of reaction that surged online, in local papers and television reports, and in texted comments by young teenagers throughout town. Although the police and the schools urged parents to delete the image from their children's phones, Antoinette heard that it had spread to a distant high school within a few days.

The repercussions were inescapable. After a friend took Margarite skating to cheer her up, he was viciously attacked on his MySpace page. Kids jeered, telling him to change schools and go with "the whore."

The school to which Margarite had transferred when she moved back in with her mother was about 15 miles away. She badly wanted to put the experience behind her. But within weeks she was recognized. A boy at the new school had the picture on his cellphone. The girls began to taunt her: Whore. Slut.

Margarite felt depressed. Often she begged to stay home from school.

In January, almost a year to the day when her photo went viral, she decided to transfer back to her old district, where she figured she at least had some friends.

The episode stays with her still. One recent evening in her mother's condominium, Margarite chatted comfortably about her classes, a smile flashing now and then. But when the moment came to recount the events of the winter before, she slipped into her bedroom, shutting the door.

As Antoinette spoke about what had happened, the volume on the television in Margarite's room grew louder.

Finally, she emerged. The smell of pizza for supper was irresistible.

What is it like to be at school with her former friend?

"Before I switched back, I called her," Margarite said. "I wanted to make sure the drama was squashed between us. She said, were we even legally allowed to talk? And I said we should talk, because we'd have math together. She apologized again."

What advice would Margarite give anyone thinking of sending such a photo?

She blushed and looked away.

"I guess if they are about to send a picture," she replied, laughing nervously, "and they have a feeling, like, they're not sure they should, then don't do it at all. I mean, what are you thinking? It's freaking stupid!"

States Struggle With Minors' Sexting

By JAN HOFFMAN

In the last two years, legislators have been weighing graduated responses to sexting between minors. Some legal scholars refer to the images as "self-produced child pornography."

Some states have amended their statutes on child pornography, obscenity or Internet crimes. Many allow juvenile offenders to be charged with a misdemeanor or a lesser offense, so they can qualify for diversion programs and have their records expunged.

A few states have tried to define a sexting offense.

The laws have had a mixed response. While many experts, educators and parents applaud the lessening of sanctions for what is often seen as thoughtless adolescent risk-taking, others deplore the establishment of a new crime that could not only intrude on First Amendment rights but could also sweep more children into the court system.

As Susan Hanley Duncan notes in a recent article in the Oregon Law Review about such legislation, the states disagree philosophically about the nature of the offense, which participants should be punished and which factors may aggravate or mitigate the criminal charge.

Provisions in a new Nebraska law punish those who forward an image but not its creator. A proposed law in Ohio would charge minors who produced the image as well.

A proposal in North Dakota would increase sanctions for someone who circulated a photo with the intention to humiliate the minor. Conversely, a few states, like Texas, propose to grant immunity to minors who destroy the image or report it to the authorities within 48 hours.

Not only do states disagree about who should be prosecuted, they also differ over how to define the content to be criminalized.

Some states propose new misdemeanor crimes for minors who exchange photos that are "lewd and lascivious." Others would create a misdemeanor for minors who send a minor's "nude" images — a category that might not survive First Amendment challenges.

Pennsylvania is proposing relatively mild sanctions for minors who transmit images of "sexually explicit conduct," but the depiction of activities like penetration, sadism and masturbation could bring more severe penalties.

New Jersey is considering a bill that would send first-time juvenile offenders to educational diversion programs. Other proposed bills would require schools to provide students and parents with information on sexting and require stores that sell cellphones to give customers pamphlets on it.

Some district attorneys have made such cases a priority but, using prosecutorial discretion, have designed specialized diversion programs.

Mathias H. Heck Jr., prosecuting attorney for Montgomery County, Ohio, requires teenagers charged with sexting to turn in their cellphones, perform community service and receive education about age-appropriate sexual behavior and the legal and social consequences of sexting. Since the six-month program was started about two years ago, about 60 teenagers have attended.

SENATE CS FOR CS FOR HOUSE BILL NO. 127(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act relating to the crimes of stalking, sexual assault in the third degree, sexual assault in the fourth degree, unlawful exploitation of a minor, distribution of child pornography, online enticement of a minor, endangering the welfare of a child, sending an explicit image of a minor, harassment, and misconduct involving confidential information; making the installation, enabling, or use of keystroke loggers or other devices criminal use of a computer; relating to probation; relating to the subpoena power of the attorney general in cases involving use of an Internet service account; relating to an appearance before a judicial officer after arrest; relating to conditions of probation in criminal cases involving sex offenses; relating to penalties for operating a vehicle without possessing proof of motor vehicle liability insurance or a driver's license; relating to penalties for certain arson offenses; amending Rule 5(a)(1), Alaska Rules of Criminal Procedure, and Rule 43.10, Alaska Rules of Administration; and providing for

an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.41.270(b)(3) is amended to read:

(3) "nonconsensual contact" means any contact with another person that is initiated or continued without that person's consent, that is beyond the scope of the consent provided by that person, or that is in disregard of that person's expressed desire that the contact be avoided or discontinued; "nonconsensual contact" includes

(A) following or appearing within the sight of that person;

(B) approaching or confronting that person in a public place or on private property;

(C) appearing at the workplace or residence of that person;

(D) entering onto or remaining on property owned, leased, or occupied by that person;

(E) contacting that person by telephone;

(F) sending mail or electronic communications to that person;

(G) placing an object on, or delivering an object to, property owned, leased, or occupied by that person;

(H) following or monitoring that person with a global positioning device or similar technological means;

(I) using, installing, or attempting to use or install a device for observing, recording, or photographing events occurring in the residence, vehicle, or workplace used by that person, or on the personal telephone or computer used by that person;

*** Sec. 2.** AS 11.41.270(b) is amended by adding a new paragraph to read:

(5) "device" includes software.

*** Sec. 3.** AS 11.41.425(a) is amended to read:

(a) An offender commits the crime of sexual assault in the third degree if the offender

(1) engages in sexual contact with a person who the offender knows is

(A) mentally incapable;

(B) incapacitated; or

(C) unaware that a sexual act is being committed;

(2) while employed in a state correctional facility or other placement designated by the commissioner of corrections for the custody and care of prisoners, engages in sexual penetration with a person who the offender knows is committed to the custody of the Department of Corrections to serve a term of imprisonment or period of temporary commitment; [OR]

(3) engages in sexual penetration with a person 18 or 19 years of age who the offender knows is committed to the custody of the Department of Health and Social Services under AS 47.10 or AS 47.12 and the offender is the legal guardian of the person**; or**

(4) while employed in the state by a law enforcement agency as a peace officer, or while acting as a peace officer in the state, engages in sexual penetration with a person with reckless disregard that the person is in the custody or the apparent custody of the offender, or is committed to the custody of a law enforcement agency.

*** Sec. 4.** AS 11.41.425 is amended by adding a new subsection to read:

(c) In this section, "peace officer" has the meaning given in AS 01.10.060.

*** Sec. 5.** AS 11.41.427(a) is amended to read:

(a) An offender commits the crime of sexual assault in the fourth degree if

(1) while employed in a state correctional facility or other placement designated by the commissioner of corrections for the custody and care of prisoners, the offender engages in sexual contact with a person who the offender knows is committed to the custody of the Department of Corrections to serve a term of imprisonment or period of temporary commitment; [OR]

(2) the offender engages in sexual contact with a person 18 or 19 years of age who the offender knows is committed to the custody of the Department of Health and Social Services under AS 47.10 or AS 47.12 and the offender is the legal guardian of the person**; or**

(3) while employed in the state by a law enforcement agency as a peace officer, or while acting as a peace officer in the state, engages in sexual

contact with a person with reckless disregard that the person in the custody or the apparent custody of the offender, or is committed to the custody of a law enforcement agency.

* **Sec. 6.** AS 11.41.427 is amended by adding a new subsection to read:

(c) In this section, "peace officer" has the meaning given in AS 01.10.060.

* **Sec. 7.** AS 11.41.452(d) is amended to read:

(d) Except as provided in (e) of this section, online enticement is a class **B** [C] felony.

* **Sec. 8.** AS 11.41.452(e) is amended to read:

(e) Online enticement is a class **A** [B] felony if the defendant was, at the time of the offense, required to register as a sex offender or child kidnapper under AS 12.63 or a similar law of another jurisdiction.

* **Sec. 9.** AS 11.46.740(a) is amended to read:

(a) A person commits the offense of criminal use of a computer if, having no right to do so or any reasonable ground to believe the person has such a right, the person knowingly

(1) accesses, causes to be accessed, or exceeds the person's authorized access to a computer, computer system, computer program, computer network, or any part of a computer system or network, and, as a result of or in the course of that access,

(A) [(1)] obtains information concerning a person;

(B) [(2)] introduces false information into a computer, computer system, computer program, or computer network with the intent to damage or enhance the data record or the financial reputation of a person;

(C) [(3)] introduces false information into a computer, computer system, computer program, or computer network and, with criminal negligence, damages or enhances the data record or the financial reputation of a person;

(D) [(4)] obtains proprietary information of another person;

(E) [(5)] obtains information that is only available to the public for a fee;

(F) [(6)] introduces instructions, a computer program, or other information that tampers with, disrupts, disables, or destroys a computer, computer system, computer program, computer network, or any part of a computer system or network; or

(G) [(7)] encrypts or decrypts data**; or**

(2) installs, enables, or uses a keystroke logger or other device or program that has the ability to record another person's keystrokes or entries on a computer; or

(3) uses a keystroke logger or other device or program to intercept or record another person's keystrokes or entries on a computer when those entries are transmitted wirelessly or by other non-wired means.

*** Sec. 10.** AS 11.51.100(a) is amended to read:

(a) A person commits the crime of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person

(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;

(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person **is**

(A) [IS] registered or required to register as a sex offender **or child kidnapper** under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;

(B) [HAS BEEN] charged by complaint, information, or indictment with a violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or

(C) [HAS BEEN] charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; or

(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child.

* **Sec. 11.** AS 11.61 is amended by adding a new section to read:

Sec. 11.61.116. Sending an explicit image of a minor. (a) A person commits the offense of sending an explicit image of a minor if the person, with intent to annoy or humiliate another person, distributes an electronic photograph or video that depicts the genitals, anus, or female breast of that other person taken when that person was a minor under 16 years of age.

(b) In this section,

(1) "computer" has the meaning given in AS 11.46.990;

(2) "distributes" means to deliver the image to another person by sending the image to the other person's computer or telephone;

(3) "Internet" has the meaning given in AS 11.46.710(d).

(c) Sending an explicit image of a minor is

(1) a class B misdemeanor if the person distributes the image to another person;

(2) a class A misdemeanor if the person distributes the image to an Internet website that is accessible to the public.

* **Sec. 12.** AS 11.61.120(a) is amended to read:

(a) A person commits the crime of harassment in the second degree if, with intent to harass or annoy another person, that person

(1) insults, taunts, or challenges another person in a manner likely to provoke an immediate violent response;

(2) telephones another and fails to terminate the connection with intent to impair the ability of that person to place or receive telephone calls;

(3) makes repeated telephone calls at extremely inconvenient hours;

(4) makes an anonymous or obscene telephone call, an obscene electronic communication, or a telephone call or electronic communication that threatens physical injury or sexual contact;

(5) subjects another person to offensive physical contact; or

(6) **except as provided in AS 11.61.116,** publishes or distributes electronic or printed photographs, pictures, or films that show the genitals, anus, or female breast of the other person or show that person engaged in a sexual act.

* **Sec. 13.** AS 11.76 is amended by adding new sections to read:

Sec. 11.76.113. Misconduct involving confidential information in the first degree. (a) A person commits the crime of misconduct involving confidential information in the first degree if the person violates AS 11.76.115 and obtains the confidential information with the intent to

(1) use the confidential information to commit a crime; or

(2) obtain a benefit to which the person is not entitled, to injure another person, or to deprive another person of a benefit.

(b) Conviction under this section does not limit a person's ability to obtain civil relief from another person.

(c) Misconduct involving confidential information in the first degree is a class A misdemeanor.

Sec. 11.76.115. Misconduct involving confidential information in the second degree. (a) A person commits the crime of misconduct involving confidential information in the second degree if the person, without legal authority or the consent of another person, knowingly obtains confidential information about the other person.

(b) In this section, "confidential information" includes

(1) information that has been classified confidential by law;

(2) information encoded on an access device, identification card issued under AS 18.65.310, or driver's license.

(c) Conviction under this section does not limit a person's ability to obtain civil relief from another person.

(d) Misconduct involving confidential information in the second degree is a class B misdemeanor.

* **Sec. 14.** AS 12.05 is amended by adding a new section to read:

Sec. 12.05.030. Crimes involving minors committed outside state. In addition to any other jurisdictional basis expressed or implied in law, a person may be prosecuted under the laws of this state for conduct occurring outside the state for a violation of (1) AS 11.41.452 if the other person with whom the defendant communicated was in the state; or (2) AS 11.61.116 if the minor whose image is published or distributed was in the state.

* **Sec. 15.** AS 12.10.010(a) is amended to read:

(a) Prosecution for the following offenses may be commenced at any time:

(1) murder;

(2) attempt, solicitation, or conspiracy to commit murder or hindering the prosecution of murder;

(3) felony sexual abuse of a minor;

(4) sexual assault that is an unclassified, class A, or class B felony or a violation of **AS 11.41.425(a)(2) - (4)** [AS 11.41.425(a)(2) OR (3)];

(5) a violation of AS 11.41.425, 11.41.427, 11.41.450 - 11.41.458, AS 11.66.110 - 11.66.130, or former AS 11.41.430, when committed against a person who, at the time of the offense, was under 18 years of age;

(6) kidnapping.

* **Sec. 16.** AS 12.25.150(a) is amended to read:

(a) A person arrested shall be taken before a judge or magistrate without unnecessary delay, and in any event within **48** [24] hours after arrest, including Sundays and holidays. This requirement applies to municipal police officers to the same extent as it does to state troopers.

* **Sec. 17.** AS 12.55.100(e) is amended to read:

(e) In addition to other conditions imposed on the defendant, while on probation and as a condition of probation

(1) for a sex offense, as described in AS 12.63.100, the defendant

(A) shall be required to submit to regular periodic polygraph examinations;

(B) may be required to provide each electronic mail address, instant messaging address, and other Internet communication identifier that the defendant uses to the defendant's probation officer; the probation officer shall forward those addresses and identifiers to the Alaska state troopers and to the local law enforcement agency;

(2) if the defendant was convicted of a violation of AS 11.41.434 - 11.41.455, AS 11.61.125 - 11.61.128, or a similar offense in another jurisdiction, the defendant may be required to refrain from

(A) using or creating an Internet site;

(B) communicating with children under 16 years of age; [OR]

(C) possessing or using a computer**; or**

(D) residing within 500 feet of school grounds; in this subparagraph, "school grounds" has the meaning given in AS 11.71.900.

*** Sec. 18.** AS 12.55.125(i) is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, or promoting prostitution in the first degree under AS 11.66.110(a)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) **unlawful exploitation of a minor under AS 11.41.455(c)(2),**

online enticement of a minor under AS 11.41.452(e), or attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, or promoting prostitution in the first degree under AS 11.66.110(a)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, **online enticement of a minor under AS 11.41.452(d),** unlawful exploitation of a minor **under AS 11.41.455(c)(1),** or distribution of child pornography **under AS 11.61.125(e)(2)** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, **distribution of child pornography under AS 11.61.125(e)(1),** or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years.

* **Sec. 19.** AS 12.70.130 is amended to read:

Sec. 12.70.130. Arrest without warrant. The arrest of a person may also be lawfully made by a peace officer or a private person without a warrant upon reasonable information that the accused stands charged in the courts of another state with a crime punishable by death or imprisonment for a term exceeding one year, but

when arrested the accused must be taken before a judge or magistrate without unnecessary delay and, in any event, within **48** [24] hours after arrest, including Sundays and holidays, and complaint shall be made against the accused under oath setting out the ground for the arrest as in AS 12.70.120. Thereafter the answer of the accused shall be heard as if the accused had been arrested on a warrant.

*** Sec. 20.** AS 28.15.131 is amended by adding a new subsection to read:

(b) Violation of this section is an infraction.

*** Sec. 21.** AS 28.22.019(c) is amended to read:

(c) A person convicted under this section is guilty of **an infraction** [A CLASS B MISDEMEANOR] and **shall be sentenced to pay a mandatory fine of $500** [MAY BE PUNISHED AS PROVIDED IN AS 12.55, EXCEPT THAT A FINE OF AT LEAST $500 MUST BE IMPOSED].

*** Sec. 22.** AS 33.05.020(a) is repealed and reenacted to read:

(a) The commissioner shall appoint and make available to the superior court, when ordered under AS 12.55.015(a), a qualified probation officer for the active supervision of a person placed on probation for a felony offense. The commissioner may provide active supervision to a person placed on probation for a misdemeanor offense.

*** Sec. 23.** AS 41.23.220 is amended to read:

Sec. 41.23.220. Penalty. (a) **Except for conduct that is a violation of AS 11.46.420, a** [A] person who violates a provision of AS 41.23.180 - 41.23.230 or a regulation adopted under AS 41.23.180 - 41.23.230 is guilty of a violation as defined in AS 11.81.900.

(b) **Except for conduct that is a violation of AS 11.46.420, the** [THE] supreme court shall establish by order or rule a schedule of bail amounts for violations under (a) of this section that allow the disposition of a citation without a court appearance.

*** Sec. 24.** AS 44.23.080 is repealed and reenacted to read:

Sec. 44.23.080. Subpoena power of attorney general in cases involving use of an Internet service account. (a) If there is reasonable cause to believe that an Internet service account has been used in connection with a violation of AS 11.41.452,

11.41.455, or AS 11.61.125 - 11.61.128, and that the identity, address, and other information about the account owner will assist in obtaining evidence that is relevant to the offense, a law enforcement officer may apply to the attorney general for an administrative subpoena to obtain the business records of the Internet service provider located inside or outside of the state.

(b) If an application meets the requirements of (a) of this section, the attorney general may issue an administrative subpoena to the Internet service provider requiring the production of the following records:

(1) the name and other identifying information of the account holder;

(2) the address and physical location associated with the account;

(3) a description of the length of service, service start date, and types of service associated with the account.

(c) A subpoena issued under (b) of this section must prescribe a reasonable time after service for the production of the information.

(d) Service of a subpoena issued under (b) of this section may be by any method authorized by law or acceptable to the Internet service provider. At any time before the return date specified on the subpoena, the Internet service provider may petition a court of competent jurisdiction for the judicial district in which the provider resides or does business for an order modifying or quashing the subpoena or for an order sealing the court record.

(e) If the Internet service provider refuses to obey a subpoena issued under (b) of this section, the superior court may, upon application of the attorney general, issue an order requiring the Internet service provider to appear at the office of the attorney general with the information described in the subpoena.

(f) An Internet service provider who knowingly fails to produce the information required to be produced by the subpoena or court order is guilty of contempt under AS 09.50.010.

(g) Nothing in this section limits the authority of law enforcement from obtaining process from the court or through a grand jury subpoena to obtain the information described in (b) of this section.

(h) A person may not bring a civil action against an Internet service provider,

its officers, employees, agents, or other person for complying with an administrative subpoena issued under (b) of this section or a court order issued under (e) of this section.

*** Sec. 25.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DIRECT COURT RULE AMENDMENT. Rule 5(a)(1), Alaska Rules of Criminal Procedure, is amended to read:

(1) Except when the person arrested is issued a citation for a misdemeanor or a violation and immediately thereafter released, the arrested person shall be taken before the nearest available judge or magistrate without unnecessary delay **and in any event within 48 hours after arrest, including Sundays and holidays**. This appearance may be accomplished by the use of telephonic or television equipment pursuant to Criminal Rules 38.1 and 38.2. [NECESSARY DELAY WITHIN THE MEANING OF THIS PARAGRAPH (a) IS DEFINED AS A PERIOD NOT TO EXCEED FORTY-EIGHT HOURS AFTER ARREST, INCLUDING SUNDAYS AND HOLIDAYS.]

*** Sec. 26.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE AMENDMENT. The amendments to AS 41.23.220, made in sec. 23 of this Act, have the effect of changing Rule 43.10, Alaska Rules of Administration, by prohibiting the disposition of a violation of AS 11.46.420 without court appearance and forfeiture of bail amounts.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REPORT TO THE LEGISLATURE. On or before April 1, 2012, the Department of Law shall submit a report to the legislature concerning the total number of arraignments that were heard within 24 hours after a person's arrest and the total number of arraignments that were heard after 24 hours, but within 48 hours after a person's arrest. The report shall include this information for cases prosecuted by the State of Alaska. The Department of Corrections and the Alaska Court System shall cooperate with the Department of Law in preparing this report.

*** Sec. 28.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 16, 19, and 25 of this Act apply to arrests for offenses committed before, on, or after the effective date of this Act.

(b) Sections 1 - 15, 18, 20, 21, 23, and 26 of this Act apply to offenses committed on or after the effective date of this Act.

(c) Sections 22 and 24 of this Act apply to offenses occurring before, on, or after the effective date of this Act.

*** Sec. 29.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SEVERABILITY. Under AS 01.10.030, if any provision of this Act, or the application of it to any person or circumstance, is held invalid, the remainder of this Act and the application to other persons or circumstances is not affected.

*** Sec. 30.** This Act takes effect July 1, 2011.

SENATE CONCURRENT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE JUDICIARY COMMITTEE

Introduced:
Referred:

A RESOLUTION

Suspending Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, concerning House Bill No. 127, relating to the crimes of stalking, online enticement of a minor, unlawful exploitation of a minor, endangering the welfare of a child, sending an explicit image of a minor, harassment, and misconduct involving confidential information; relating to probation; relating to the subpoena power of the attorney general in cases involving use of an Internet service account; relating to an appearance before a judicial officer after arrest; relating to penalties for operating a vehicle without possessing proof of motor vehicle liability insurance or a driver's license; relating to penalties for certain arson offenses; and amending Rule 5(a)(1), Alaska Rules of Criminal Procedure, and Rule 43.10, Alaska Rules of Administration.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

That under Rule 54, Uniform Rules of the Alaska State Legislature, the provisions of Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, regarding

changes to the title of a bill, are suspended in consideration of House Bill No. 127, relating to the crimes of stalking, online enticement of a minor, unlawful exploitation of a minor, endangering the welfare of a child, sending an explicit image of a minor, harassment, and misconduct involving confidential information; relating to probation; relating to the subpoena power of the attorney general in cases involving use of an Internet service account; relating to an appearance before a judicial officer after arrest; relating to penalties for operating a vehicle without possessing proof of motor vehicle liability insurance or a driver's license; relating to penalties for certain arson offenses; and amending Rule 5(a)(1), Alaska Rules of Criminal Procedure, and Rule 43.10, Alaska Rules of Administration.

MEMORANDUM

Explanation of Changes SCS for CS for HB 127(JUD) Omnibus Crime Bill:

1. Deleted section 3 in version "I" which provided an increased penalty for enticement of a minor, first offense. The section had increased the penalty from a C to B felony, so this would keep a first offense a C felony.

2. Deleted sections 5 and 19 pertaining to unlawful exploitation of a minor – this provision needs to be reworked and the committee will commit to doing that over the interim. There were conforming amendments in sentencing sections to return to the current penalties..

3. Added language in Sections 3 through 6 to create penalties for police officers engaging in sex with a person in their custody, following those already in law for correctional officers. There are also conforming amendments in the sentencing section of the bill.

4. In section 21, the language providing for an attorney general's designee has been deleted (all other language remains the same as in version "I".

5. In section 24, the Department of Law is required to report on the number of arraignments heard within 24 hours and the total number after 24 hours but within 48 hours of a person's arrest. The report is due April 1, 2012.

From: Cindy Smith

RE: SCS for CS for HB 127 (FIN)

Please prepare a SCS for CS for SB 127(JUD) with the following changes:

1. Delete Section 3, with any necessary conforming amendments throughout the bill. (on line enticement 1st offense stays class B C)
2. Delete sections 5, with any conforming amendments through the bill (note - section 19 is deleted as well). (unlawful exploitation -> summer rewrite)
3. In section 28, delete the phrase "or the attorney general's designee" where it occurs and delete "i". new section "21"
4. Add language from amendment GS1840\A.1. (written to SB72, attached), with the following language change "that the person is in the custody or apparent custody of the offender" in each place that the provision is added. [Call me about this]. new section 3-6
5. Add a new section in uncodified law that requires that the Department of Law make a report to the Legislature by April 1, 2012 as to the number of bail cases that were heard within 24 hours and the number that exceeded 24 hours under the new 48-hour bail provisions. sec 24
6. Please look at the provisions in HB23, attached, and see if they comport with and can be added into the provisions of HB127 at Section 9. If so, please do that. If not, please give me a call. (amendment)

JUDICIARY COMMITTEE

TO: SB 72

Page 9, following line 6:

Insert a new bill section to read:

"* **Sec. 14.** AS 47.12.030(a) is amended to read:

(a) When a minor who was at least 16 years of age at the time of the offense is charged by complaint, information, or indictment with an offense specified in this subsection, this chapter and the Alaska Delinquency Rules do not apply to the offense for which the minor is charged or to any additional offenses joinable to it under the applicable rules of court governing criminal procedure. The minor shall be charged, held, released on bail, prosecuted, sentenced, and incarcerated in the same manner as an adult. If the minor is convicted of an offense other than an offense specified in this subsection, the minor may attempt to prove, by a preponderance of the evidence, that the minor is amenable to treatment under this chapter. If the court finds that the minor is amenable to treatment under this chapter, the minor shall be treated as though the charges had been heard under this chapter, and the court shall order disposition of the charges of which the minor is convicted under AS 47.12.120(b). The provisions of this subsection apply when the minor is charged by complaint, information, or indictment with an offense

(1) that is an unclassified felony or a class A felony and the felony is a crime against a person**, except a violation of AS 11.41.455**;

(2) of arson in the first degree;

(3) that is a class B felony and the felony is a crime against a person in which the minor is alleged to have used a deadly weapon in the commission of the

offense and the minor was previously adjudicated as a delinquent or convicted as an adult, in this or another jurisdiction, as a result of an offense that involved use of a deadly weapon in the commission of a crime against a person or an offense in another jurisdiction having elements substantially identical to those of a crime against a person, and the previous offense was punishable as a felony; in this paragraph, "deadly weapon" has the meaning given in AS 11.81.900(b); or

(4) that is misconduct involving weapons in the first degree under

(A) AS 11.61.190(a)(1); or

(B) AS 11.61.190(a)(2) when the firearm was discharged under circumstances manifesting substantial and unjustifiable risk of physical injury to a person."

Insert: "**relating to the subpoena power of the attorney general in cases involving use of an Internet service account;**"

Page 9, following line 6:

Insert a new bill section to read:

"***Sec. 14.** AS 44.23.080 is repealed and reenacted to read:

Sec. 44.23.080. Subpoena power of attorney general in cases involving use of an Internet service account. (a) If there is reasonable cause to believe that an Internet service account has been used in connection with a violation of AS 11.41.452, 11.41.455, or AS 11.61.125 - 11.61.128, and that the identity, address, and other information about the account owner will assist in obtaining evidence that is relevant to the offense, a law enforcement officer may apply to the attorney general or the attorney general's designee for an administrative subpoena to obtain the business records of the Internet service provider located within or outside the state.

(b) If an application meets the requirements of (a) of this section, the attorney general or the attorney general's designee may issue an administrative subpoena to the Internet service provider requiring the production of the following records:

(1) the name and other identifying information of the account holder;

(2) the address and physical location associated with the account;

(3) a description of the length of service, service start date, and types of

service associated with the account.

(c) A subpoena issued under (b) of this section shall prescribe a reasonable time after service for the production of the information.

(d) If the Internet service provider refuses to obey a subpoena issued under (b) of this section, the superior court may, upon application of the attorney general or the attorney general's designee, issue an order requiring the Internet service provider to appear at the office of the attorney general with the information described in the subpoena.

(e) An Internet service provider who knowingly fails to produce the information required to be produced by the subpoena or court order is guilty of contempt under AS 09.50.010.

(f) Nothing in this section limits the authority of law enforcement from obtaining process from the court or through a grand jury subpoena to obtain the information described in (b) of this section.

(g) A person may not bring a civil action against an Internet services provider, its officers, employees, agents, or other person for complying with an administrative subpoena issued under (b) of this section or a court order issued under (d) of this section."

Sponsor Statement
HB 23: Computer Privacy

The State of Alaska has a long tradition of protecting our citizens' privacy rights, and this bill would protect the privacy rights of Alaskan computer users by closing a loophole in existing law. Current law addresses what is commonly known as "hacking", that is surreptitiously accessing a computer or network, but does not address intercepting data as it is being entered. A keystroke logger is a device that is used to record keystrokes as they are being entered into a computer. Emerging technology can even record keystrokes remotely from up to 100 yards away. This bill would ban the installation or use of keystroke loggers or other devices that intercept data being entered on a computer without the consent of the computer's owner.

Keystroke logger manufacturers specifically advertise that their products cannot be detected or disabled by anti-virus or anti-spyware software or firewalls, and the devices are designed so computer users would not notice them unless they carefully inspected their computers every time they use their computers.

While some specific information like social security numbers or credit card information are protected by federal or other law, it is often difficult to prove that someone used or stole such information. Under this bill, all that would need to be proved is that someone installed a keystroke logger or enabled the ability to log keystrokes wirelessly or by other nonwired means on a computer they had no right to access.

This bill would not affect people using keystroke loggers on their own computers, parents monitoring their children's computer use, or law enforcement operating with a search warrant.

It should not matter whether information is stolen out of a computer, or as it is being typed into it. The victims' privacy is just as violated, and the law should recognize their rights.

SENATE CS FOR CS FOR HOUSE BILL NO. 127(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act relating to the crimes of stalking, sexual assault in the third degree, sexual assault in the fourth degree, unlawful exploitation of a minor, distribution of child pornography, online enticement of a minor, endangering the welfare of a child, sending an explicit image of a minor, harassment, and misconduct involving confidential information; relating to probation; relating to the subpoena power of the attorney general in cases involving use of an Internet service account; relating to an appearance before a judicial officer after arrest; relating to penalties for operating a vehicle without possessing proof of motor vehicle liability insurance or a driver's license; relating to penalties for certain arson offenses; amending Rule 5(a)(1), Alaska Rules of Criminal Procedure, and Rule 43.10, Alaska Rules of Administration; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.41.270(b)(3) is amended to read:

(3) "nonconsensual contact" means any contact with another person that is initiated or continued without that person's consent, that is beyond the scope of the consent provided by that person, or that is in disregard of that person's expressed desire that the contact be avoided or discontinued; "nonconsensual contact" includes

(A) following or appearing within the sight of that person;

(B) approaching or confronting that person in a public place or on private property;

(C) appearing at the workplace or residence of that person;

(D) entering onto or remaining on property owned, leased, or occupied by that person;

(E) contacting that person by telephone;

(F) sending mail or electronic communications to that person;

(G) placing an object on, or delivering an object to, property owned, leased, or occupied by that person;

(H) following or monitoring that person with a global positioning device or similar technological means;

(I) using, installing, or attempting to use or install a device for observing, recording, or photographing events occurring in the residence, vehicle, or workplace used by that person, or on the personal telephone or computer used by that person;

*** Sec. 2.** AS 11.41.270(b) is amended by adding a new paragraph to read:

(5) "device" includes software.

*** Sec. 3.** AS 11.41.425(a) is amended to read:

(a) An offender commits the crime of sexual assault in the third degree if the offender

(1) engages in sexual contact with a person who the offender knows is

(A) mentally incapable;

(B) incapacitated; or

(C) unaware that a sexual act is being committed;

(2) while employed in a state correctional facility or other placement

designated by the commissioner of corrections for the custody and care of prisoners, engages in sexual penetration with a person who the offender knows is committed to the custody of the Department of Corrections to serve a term of imprisonment or period of temporary commitment; [OR]

(3) engages in sexual penetration with a person 18 or 19 years of age who the offender knows is committed to the custody of the Department of Health and Social Services under AS 47.10 or AS 47.12 and the offender is the legal guardian of the person**; or**

(4) while employed in the state by a law enforcement agency as a peace officer, or while acting as a peace officer in the state, engages in sexual penetration with a person with reckless disregard that the person is in the custody or the apparent custody of the offender, or is committed to the custody of a law enforcement agency.

*** Sec. 4.** AS 11.41.425 is amended by adding a new subsection to read:

(c) In this section, "peace officer" has the meaning given in AS 01.10.060.

*** Sec. 5.** AS 11.41.427(a) is amended to read:

(a) An offender commits the crime of sexual assault in the fourth degree if

(1) while employed in a state correctional facility or other placement designated by the commissioner of corrections for the custody and care of prisoners, the offender engages in sexual contact with a person who the offender knows is committed to the custody of the Department of Corrections to serve a term of imprisonment or period of temporary commitment; [OR]

(2) the offender engages in sexual contact with a person 18 or 19 years of age who the offender knows is committed to the custody of the Department of Health and Social Services under AS 47.10 or AS 47.12 and the offender is the legal guardian of the person**; or**

(3) while employed in the state by a law enforcement agency as a peace officer, or while acting as a peace officer in the state, engages in sexual contact with a person with reckless disregard that the person in the custody or the apparent custody of the offender, or is committed to the custody of a law enforcement agency.

* **Sec. 6.** AS 11.41.427 is amended by adding a new subsection to read:

(c) In this section, "peace officer" has the meaning given in AS 01.10.060.

* **Sec. 7.** AS 11.41.452(e) is amended to read:

(e) Online enticement is a class **A** [B] felony if the defendant was, at the time of the offense, required to register as a sex offender or child kidnapper under AS 12.63 or a similar law of another jurisdiction.

* **Sec. 8.** AS 11.51.100(a) is amended to read:

(a) A person commits the crime of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person

(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;

(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person **is**

(A) [IS] registered or required to register as a sex offender **or child kidnapper** under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;

(B) [HAS BEEN] charged by complaint, information, or indictment with a violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or

(C) [HAS BEEN] charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; or

(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child.

* **Sec. 9.** AS 11.61 is amended by adding a new section to read:

Sec. 11.61.116. Sending an explicit image of a minor. (a) A person commits the offense of sending an explicit image of a minor if the person, with intent to annoy or humiliate another person, distributes an electronic photograph or video that depicts the genitals, anus, or female breast of that other person taken when that person was a

minor under 16 years of age.

(b) In this section,

(1) "computer" has the meaning given in AS 11.46.990;

(2) "distributes" means to deliver the image to another person by sending the image to the other person's computer or telephone;

(3) "Internet" has the meaning given in AS 11.46.710(d).

(c) Sending an explicit image of a minor is

(1) a class B misdemeanor if the person distributes the image to another person;

(2) a class A misdemeanor if the person distributes the image to an Internet website that is accessible to the public.

*** Sec. 10.** AS 11.61.120(a) is amended to read:

(a) A person commits the crime of harassment in the second degree if, with intent to harass or annoy another person, that person

(1) insults, taunts, or challenges another person in a manner likely to provoke an immediate violent response;

(2) telephones another and fails to terminate the connection with intent to impair the ability of that person to place or receive telephone calls;

(3) makes repeated telephone calls at extremely inconvenient hours;

(4) makes an anonymous or obscene telephone call, an obscene electronic communication, or a telephone call or electronic communication that threatens physical injury or sexual contact;

(5) subjects another person to offensive physical contact; or

(6) **except as provided in AS 11.61.116,** publishes or distributes electronic or printed photographs, pictures, or films that show the genitals, anus, or female breast of the other person or show that person engaged in a sexual act.

*** Sec. 11.** AS 11.76 is amended by adding new sections to read:

Sec. 11.76.113. Misconduct involving confidential information in the first degree. (a) A person commits the crime of misconduct involving confidential information in the first degree if the person violates AS 11.76.115 and obtains the confidential information with the intent to

(1) use the confidential information to commit a crime; or

(2) obtain a benefit to which the person is not entitled, to injure another person, or to deprive another person of a benefit.

(b) Conviction under this section does not limit a person's ability to obtain civil relief from another person.

(c) Misconduct involving confidential information in the first degree is a class A misdemeanor.

Sec. 11.76.115. Misconduct involving confidential information in the second degree. (a) A person commits the crime of misconduct involving confidential information in the second degree if the person, without legal authority or the consent of another person, knowingly obtains confidential information about the other person.

(b) In this section, "confidential information" includes

(1) information that has been classified confidential by law;

(2) information encoded on an access device, identification card issued under AS 18.65.310, or driver's license.

(c) Conviction under this section does not limit a person's ability to obtain civil relief from another person.

(d) Misconduct involving confidential information in the second degree is a class B misdemeanor.

* **Sec. 12.** AS 12.05 is amended by adding a new section to read:

Sec. 12.05.030. Crimes involving minors committed outside state. In addition to any other jurisdictional basis expressed or implied in law, a person may be prosecuted under the laws of this state for conduct occurring outside the state for a violation of (1) AS 11.41.452 if the other person with whom the defendant communicated was in the state; or (2) AS 11.61.116 if the minor whose image is published or distributed was in the state.

* **Sec. 13.** AS 12.10.010(a) is amended to read:

(a) Prosecution for the following offenses may be commenced at any time:

(1) murder;

(2) attempt, solicitation, or conspiracy to commit murder or hindering the prosecution of murder;

(3) felony sexual abuse of a minor;

(4) sexual assault that is an unclassified, class A, or class B felony or a violation of **AS 11.41.425(a)(2) - (4)** [AS 11.41.425(a)(2) OR (3)];

(5) a violation of AS 11.41.425, 11.41.427, 11.41.450 - 11.41.458, AS 11.66.110 - 11.66.130, or former AS 11.41.430, when committed against a person who, at the time of the offense, was under 18 years of age;

(6) kidnapping.

*** Sec. 14.** AS 12.25.150(a) is amended to read:

(a) A person arrested shall be taken before a judge or magistrate without unnecessary delay, and in any event within **48** [24] hours after arrest, including Sundays and holidays. This requirement applies to municipal police officers to the same extent as it does to state troopers.

*** Sec. 15.** AS 12.55.125(i) is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, or promoting prostitution in the first degree under AS 11.66.110(a)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) **unlawful exploitation of a minor under AS 11.41.455(c)(2), online enticement of a minor under AS 11.41.452(e), or** attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, or promoting prostitution in the first degree under AS 11.66.110(a)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor **under AS 11.41.455(c)(1)**, or distribution of child pornography **under AS 11.61.125(e)(2)** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, **distribution of child pornography under AS 11.61.125(e)(1),** or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant

has two prior convictions for sexual felonies, 99 years.

* **Sec. 16.** AS 12.70.130 is amended to read:

Sec. 12.70.130. Arrest without warrant. The arrest of a person may also be lawfully made by a peace officer or a private person without a warrant upon reasonable information that the accused stands charged in the courts of another state with a crime punishable by death or imprisonment for a term exceeding one year, but when arrested the accused must be taken before a judge or magistrate without unnecessary delay and, in any event, within **48** [24] hours after arrest, including Sundays and holidays, and complaint shall be made against the accused under oath setting out the ground for the arrest as in AS 12.70.120. Thereafter the answer of the accused shall be heard as if the accused had been arrested on a warrant.

* **Sec. 17.** AS 28.15.131 is amended by adding a new subsection to read:

(b) Violation of this section is an infraction.

* **Sec. 18.** AS 28.22.019(c) is amended to read:

(c) A person convicted under this section is guilty of **an infraction** [A CLASS B MISDEMEANOR] and **shall be sentenced to pay a mandatory fine of $500** [MAY BE PUNISHED AS PROVIDED IN AS 12.55, EXCEPT THAT A FINE OF AT LEAST $500 MUST BE IMPOSED].

* **Sec. 19.** AS 33.05.020(a) is repealed and reenacted to read:

(a) The commissioner shall appoint and make available to the superior court, when ordered under AS 12.55.015(a), a qualified probation officer for the active supervision of a person placed on probation for a felony offense. The commissioner may provide active supervision to a person placed on probation for a misdemeanor offense.

* **Sec. 20.** AS 41.23.220 is amended to read:

Sec. 41.23.220. Penalty. (a) **Except for conduct that is a violation of AS 11.46.420, a** [A] person who violates a provision of AS 41.23.180 - 41.23.230 or a regulation adopted under AS 41.23.180 - 41.23.230 is guilty of a violation as defined in AS 11.81.900.

(b) **Except for conduct that is a violation of AS 11.46.420, the** [THE] supreme court shall establish by order or rule a schedule of bail amounts for violations

under (a) of this section that allow the disposition of a citation without a court appearance.

* **Sec. 21.** AS 44.23.080 is repealed and reenacted to read:

Sec. 44.23.080. Subpoena power of attorney general in cases involving use of an Internet service account. (a) If there is reasonable cause to believe that an Internet service account has been used in connection with a violation of AS 11.41.452, 11.41.455, or AS 11.61.125 - 11.61.128, and that the identity, address, and other information about the account owner will assist in obtaining evidence that is relevant to the offense, a law enforcement officer may apply to the attorney general for an administrative subpoena to obtain the business records of the Internet service provider located inside or outside of the state.

(b) If an application meets the requirements of (a) of this section, the attorney general may issue an administrative subpoena to the Internet service provider requiring the production of the following records:

(1) the name and other identifying information of the account holder;

(2) the address and physical location associated with the account;

(3) a description of the length of service, service start date, and types of service associated with the account.

(c) A subpoena issued under (b) of this section must prescribe a reasonable time after service for the production of the information.

(d) Service of a subpoena issued under (b) of this section may be by any method authorized by law or acceptable to the Internet service provider. At any time before the return date specified on the subpoena, the Internet service provider may petition a court of competent jurisdiction for the judicial district in which the provider resides or does business for an order modifying or quashing the subpoena or for an order sealing the court record.

(e) If the Internet service provider refuses to obey a subpoena issued under (b) of this section, the superior court may, upon application of the attorney general, issue an order requiring the Internet service provider to appear at the office of the attorney general with the information described in the subpoena.

(f) An Internet service provider who knowingly fails to produce the

information required to be produced by the subpoena or court order is guilty of contempt under AS 09.50.010.

(g) Nothing in this section limits the authority of law enforcement from obtaining process from the court or through a grand jury subpoena to obtain the information described in (b) of this section.

(h) A person may not bring a civil action against an Internet service provider, its officers, employees, agents, or other person for complying with an administrative subpoena issued under (b) of this section or a court order issued under (e) of this section.

*** Sec. 22.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DIRECT COURT RULE AMENDMENT. Rule 5(a)(1), Alaska Rules of Criminal Procedure, is amended to read:

(1) Except when the person arrested is issued a citation for a misdemeanor or a violation and immediately thereafter released, the arrested person shall be taken before the nearest available judge or magistrate without unnecessary delay **and in any event within 48 hours after arrest, including Sundays and holidays**. This appearance may be accomplished by the use of telephonic or television equipment pursuant to Criminal Rules 38.1 and 38.2. [NECESSARY DELAY WITHIN THE MEANING OF THIS PARAGRAPH (a) IS DEFINED AS A PERIOD NOT TO EXCEED FORTY-EIGHT HOURS AFTER ARREST, INCLUDING SUNDAYS AND HOLIDAYS.]

*** Sec. 23.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE AMENDMENT. The amendments to AS 41.23.220, made in sec. 20 of this Act, have the effect of changing Rule 43.10, Alaska Rules of Administration, by prohibiting the disposition of a violation of AS 11.46.420 without court appearance and forfeiture of bail amounts.

*** Sec. 24.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REPORT TO THE LEGISLATURE. On or before April 1, 2012, the Department of

Law shall submit a report to the legislature concerning the total number of arraignments that were heard within 24 hours after a person's arrest and the total number of arraignments that were heard after 24 hours, but within 48 hours after a person's arrest.

*** Sec. 25.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 14, 16, and 22 of this Act apply to arrests for offenses committed before, on, or after the effective date of this Act.

(b) Sections 1 - 13, 15, 17, 18, 20, and 23 of this Act apply to offenses committed on or after the effective date of this Act.

(c) Sections 19 and 21 of this Act apply to offenses occurring before, on, or after the effective date of this Act.

*** Sec. 26.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SEVERABILITY. Under AS 01.10.030, if any provision of this Act, or the application of it to any person or circumstance, is held invalid, the remainder of this Act and the application to other persons or circumstances is not affected.

*** Sec. 27.** This Act takes effect July 1, 2011.

CSHB 127(FIN) -- STALKING AND EXPLOITATION OF A MINOR
BAIL CLEANUP

Themes:

HB 127: Strengthen and refine laws prohibiting stalking, online enticement of a child, unlawful exploitation of a child, and other conduct that hurts vulnerable people

HB 175: Correct inconsistencies between statutes and court rules

Highlights:

- Expands stalking law to prohibit new means of following and frightening victims
- Raises the crime and penalty for online enticement of a minor – classic grooming behavior that leads to child victimization
- Raises the penalty for unlawful exploitation of a minor (creating child pornography) to a class A felony for all offenders
- Prohibits "sexting" – that is sending an explicit image of a child under 16 with intent to annoy or humiliate the person
- Prohibits obtaining confidential information about another person; this would be a class B misdemeanor if a person obtains the information that is confidential by law without the consent of the person, and a class A misdemeanor if a person obtains the information with the intent to use it to commit a crime or obtain a benefit
- Makes conforming amendments in four areas where statutes conflict with court rules
    - Bail hearings – changes the statute to agree with the court rule adopted last year – which changes the deadline for bringing a person before a judge from 24 to 48 hours
    - Failure to carry and present a driver's license
    - Failure to carry and present proof of automobile insurance
    - Burning a vehicle on public property
- Clarifies law authorizing administrative subpoenas in child sexual exploitation investigations adopted last year

CSHB 127(FIN)
STALKING AND EXPLOITATION OF A MINOR AND BAIL CLEANUP
Sectional Analysis

Sections 1 and 2 expand the crime of stalking by amending the definition of "nonconsensual contact". Stalking prohibits a person from engaging in a course of conduct that places another in fear of death or physical injury. "Course of conduct" is defined as repeated acts of nonconsensual conduct. The bill adds two ways that a defendant may contact a victim that is beyond the victim's consent. First, it includes following or monitoring the victim with a global positioning device. Second, it includes 3installing or attempting to install a device for observing, recording, or photographing events in the home, workplace, or vehicle the victim uses, or on the personal telephone or computer that the victim uses.

Section 3 raises the classification of the crime of online enticement of a minor for a person who is not required to register as a sex offender or child kidnapper from a class C felony to a class B felony. This change, in addition to the amendments to AS 12.55.125(i) in the bill, would be to raise the penalty from a range of zero to two years for a first offense (maximum term of five years) to a range of five to 15 years for a first offense (maximum term of 99 years). Also refer to section 12 of this analysis.

Section 4 raises the classification of the crime of online enticement of a minor for a person who is required to register as a sex offender or child kidnapper from a class B felony to a class A felony. This change, in addition to the amendments to AS 12.55.125(i) in the bill, would be to raise the penalty from a range of one to three years (maximum term of 10 years) to a range of 15 to 30 years for a first offense (maximum term of 99 years). Also refer to section 12 of this analysis.

Section 5 raises the classification of the crime of unlawful exploitation of a minor from a class B felony to a class A felony for all offenders. Under current law the offense is a class A felony if the person has previously been convicted of unlawful exploitation of a minor, and it is a class B felony for other offenders. This change, in addition to the amendments to AS 12.55.125(i) in the bill, would be to raise the penalty from a range of two to 12 years or five to 15 years (depending on whether it is a first or second offense) to a range of 15 to 30 years for a first offense. Also refer to section 12 of this analysis.

Section 6 amends the crime of endangering the welfare of a child in the first degree by prohibiting a parent or guardian from leaving a child under 16 years of age with a person who is required to register as a child kidnapper or is charged with child kidnapping. The law currently prohibits a parent or guardian from leaving a child with a person required to register as a sex offender or who is charged with a sex offense.

Section 7 adopts a new crime – sending an explicit image of a minor. It would prohibit a person, acting with the intent to annoy or humiliate another person, from distributing an electronic photograph or video that depicts an image of a minor's genitals, anus, or female breast taken when the minor was under 16 years of age. The prohibited conduct would be a class B misdemeanor (maximum term of imprisonment 90 days) if the person distributes the image to one or more other persons, and a class A misdemeanor (maximum term of imprisonment one year) if the person distributes the image to an Internet website that is accessible to the public.

Section 8 makes a conforming amendment to AS 11.61.120(a)(6), harassment in the second degree, to make it clear that the new crime of sending an explicit image of a minor in **Section 7** is not included in the crime of harassment in the second degree.

Section 9 adopts two new crimes – misconduct involving confidential information in the first and second degrees. The second degree offense prohibits a person from obtaining the confidential information about another person without legal authority or consent to do so. This conduct would be a class B misdemeanor (maximum term of imprisonment 90 days).

Misconduct involving confidential information in the first degree would prohibit a person from violating the second degree prohibition *and* using the confidential information to commit a crime or to obtain a benefit to which a person is not entitled, or injure or deprive another person of a benefit. This conduct would be a class A misdemeanor (maximum term of imprisonment one year).

Section 10 clarifies that a person may be prosecuted for online enticement of a minor and for sending an explicit image of a minor if the minor whose image is published, or with whom the person communicated, was in this state, even if the defendant was in another jurisdiction at the time he or she committed the prohibited acts.

Section 11 amends AS 12.25.150(a) (relating to arrest) to conform to the provision in the bail reform legislation last year that changed the deadline for bringing a person arrested before a judicial officer from 24 hours to 48 hours of arrest.

Section 12 amends AS 12.55.125(i) (terms of imprisonment for persons who commit sex offenses) by conforming the terms of imprisonment for persons who commit unlawful exploitation of a minor or online enticement of a minor to the correct level in accord with the changes in **Sections 3 – 5** of the bill.

Section 13 amends AS 12.70.130 (relating to extraditions) to conform to the provision in the bail reform legislation last year that changed the deadline for bringing a person arrested before a judicial officer from 24 to 48 hours of arrest.

Section 14 changes the penalty for the offense of failure to possess and present upon request to a peace officer a person's driver's license when driving from a misdemeanor, similar to a class B misdemeanor, to an infraction. The offense currently is correctible, and would continue to be correctible. This offense is also currently on the bail schedule (Rule 43.1, Alaska Rules of Administration) at a $50 bail. It is not consistent to have an offense at the same time a misdemeanor, which generally requires a court appearance, and at the same time disposable under the bail schedule for a $50 bail amount. The bill removes this inconsistency.

Section 15 changes the penalty for the crime of failure to carry and present upon request to a peace officer proof of automobile insurance when driving from a class B misdemeanor to an infraction. Current law in statute requires a mandatory fine for this offense of at least $500; at the same time the offense is on the bail schedule for a bail amount of $500. It is correctible under current law and would continue to be correctible under the bill. Again, it is inconsistent to have a class B misdemeanor on the bail schedule for disposition without court appearance. The bill removes the inconsistency, and at the same time retains the bail amount of $500.

Section 16 clarifies the law by stating that while the Commissioner of Corrections provides probation officers to the superior court for the active supervision of person on probation for felony offenses, the Commissioner may, at his or her discretion, also provide probation officers for the active supervision of persons released for misdemeanor offenses.

Section 17 resolves a similar inconsistency in the penalty for burning a vehicle on the Knik River Public Use Area. In 2006 the legislature created the Knik River Public Use Area. The law authorizes the Department of Natural Resources to adopt regulations governing conduct in the area. AS 41.23.220(a) provides that a person who violates the new law or a regulation under the new law commits a violation. AS 41.23.220(b) requires the Alaska Supreme Court to establish a bail schedule for violations of the statutes and regulations. The law specifically requires that the violations be disposed of without court appearance. One of the regulations adopted prohibits burning a vehicle in the area; the bail was adopted in Supreme Court Order 1711 at $50.

In 2008 the legislature enacted AS 11.46.420, which adopted a new crime, arson in the third degree. This prohibits burning a vehicle on state or municipal land. The penalty for this crime is a class C felony.

These sections correct this inconsistency by excluding burning a vehicle on state land from the prohibitions that are effective in the Knik River Public Use Area.

Section 18 redrafts the law enacted last year allowing the Attorney General to issue administrative subpoenas for law enforcement to obtain limited information from an Internet service provider if there is probable cause to believe that an Internet service account has been used in connection with the crimes of online enticement of a minor, unlawful exploitation of a minor, distribution of child pornography, possession of child pornography, or distribution of indecent material to a minor.

The bill allows a designee of the attorney general, still within the Department of Law, to issue the administrative subpoenas. It corrects a problem with the service provisions of the law to allow service of the subpoenas in any manner authorized by law or acceptable to the Internet service provider. The bill clarifies that a person who does not obey a subpoena or ask the court to quash the subpoena may be guilty of contempt. The bill does not include a problematic provision of current law which requires either returning information to the Internet service provider or destroying it if a criminal prosecution is not undertaken. There are two problems with this: first, an Internet service provider does not need the documents returned because they already have the information. Second, it is not good public policy for documents in the possession of a public agency be destroyed. It is better policy that this information is kept as part of a confidential police investigation. The bill also provides that a person may not bring a civil action against an Internet service provider for complying with an administrative subpoena.

Section 19 provides that the crime of unlawful exploitation of a minor is not included in the crimes that require an automatic waiver from juvenile to adult court for a person who is 16 or 17 years of age and who is charged with commission of the offense.

Section 20 redrafts Rule 5(a)(1), Alaska Rules of Criminal Procedure, to correct a drafting error and to make the rule more readable. The rule was changed last year to extend the deadline from 24 to 48 hours for bringing an arrested person before a judicial officer. This change corrects the drafting error, which currently defines a term that is not used in the rule.

Section 21 notes that the changes included in **Section 17** of the bill have the effect of changing Rule 43.10, Alaska Rules of Administration (the bail schedule) by prohibiting the disposition of cases involving burning a vehicle on state land without a court appearance by mailing to the court a bail amount of $50.

Section 22 provides the applicability provisions.

Section 23 provides a severability section.

Section 24 adopts a July 1, 2011 effective date.

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 127

Analysis

This bill expands the crime of stalking by adding to the definition of nonconsensual contact, monitoring the victim with a GPS device and using or installing a device to record or photograph events concerning the victim. It also increases penalties for unlawful exploitation of a minor, online enticement of a minor, and provides for the prosecution of offenders from out of state. Finally, this bill adopts new offenses to include: sending explicit images of a minor, and misconduct involving confidential information.

Passage of this legislation will have no fiscal impact on the department.

FISCAL NOTE #2

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 127

Analysis

This bill amends the law relating to stalking by adding to the definition of nonconsensual conduct methods of contacting people with modern technology such as global positioning systems. It makes a clarifying amendment to AS 11.51.100, which prohibits endangering the welfare of a minor. It adopts new statutes to prohibit sending an explicit image of a minor and misconduct involving confidential information. It also increases the penalties for the crimes of online enticement of a minor and unlawful exploitation of a minor. The bill makes it clear that the commissioner of corrections may, in his or her discretion, provide supervised probation to a person on probation for conviction of a misdemeanor.

Although the bill would adopt new crimes we believe that they can be prosecuted with current resources.

FISCAL NOTE #3

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 127

Analysis

This bill expands the definition of "nonconsensual contact" under stalking; creates a new crime for sending an explicit image of a minor without the consent of the minor's parent; and creates new crimes for obtaining confidential information of another person.

The bill also provides for the prosecution of an out of state individual for online enticement of a minor if the communications involve an individual in the State of Alaska. Finally, the bill specifically permits the Department of Corrections to provide active supervision to a person placed on probation for a misdemeanor offense.

Expanding the definition of nonconsensual contact, creating additional crimes, and providing for supervised misdemeanor probation will likely result in an increase in cases assigned to the Public Defender Agency. It is not possible to reliably predict the number of cases that will be assigned to the Agency, however. The Agency, therefore, submits an indeterminate fiscal note.

FISCAL NOTE #4

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 127

Analysis

DOC averages two new incarcerations per year for the crime of enticement of a minor. This bill would increase the penalty for this crime from a Class C felony to a Class B felony. This change has the potential to increase mandays by 10,220 in FY12 thru FY17. Applying the current cost of care ($134.21 per day), the increase of cost could be in the range of $0.0 to $1,371.60 to DOC.

DOC averages two incarcerations per year for the crime of online enticement of a minor. This bill increases the penalty for this crime from a Class B felony to a Class A felony if the defendant was, at the time of the offense, a registered or required to register as a sex offender or child kidnapper. This would increase the penalty three years. Applying the current daily cost of care ($134.21 per day), this could potentially increase costs in the range of $0.0 to $734.80 to DOC.

DOC averages one new incarceration per year for the crime of unlawful exploitation of a minor. This bill would increase the penalty for this crime from a Class B felony to a Class A felony. This would increase the penalty three years. This has the potential to increase mandays by 5,475 beginning in FY12 thru FY17. Applying the current daily cost of care ($134.21 per day) could potentially add costs in the range of $0.0 to $734.80 to DOC.

Other provisions that the department is unable to quantify at this time but will closely monitor for potential fiscal impact are as follows:

- Adding Monitoring a Person with a Global Positioning Device or Similar Technology Means
- Adding Child Kidnapper to 2(A) under AS12.63
- Adding Sending and Explicit Image of a Minor in the Degree and Second Degree to Statute
- Adding Crimes Involving Minors Committed Out of State, Specifically Online Enticement to Statute
- Adding Online Enticement of a Minor to Statute

FISCAL NOTE #5

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 127(JUD)

Analysis:

If this bill becomes law, Unlawful Exploitation of a Minor would be a class A felony when committed by an adult or juvenile. Under the Juvenile Delinquency statutes (AS 47.12.030), when a juvenile 16 or older is alleged to have committed an A felony against a person, juvenile jurisdiction does not apply and the juvenile is transferred to the adult system. Increasing the charge class for Unlawful Exploitation of a Minor to an A felony therefore would result in these older juveniles being "autowaived' into the adult system, where they would be subject to adult sentencing guidelines.

Criminal laws that are amended or are increased in the severity of their charge class include Stalking, Online Enticement of a Minor, Unlawful Exploitation of a Minor, Endangering the Welfare of a Child (First Degree), Harassment (Second Degree), and Distribution of Indecent Material to Minors. The bill creates three new offenses: Sending An Explicit Image of a Minor, Misconduct Involving Confidential Information (First Degree), and Misconduct Involving Confidential Information (Second Degree). The bill also adds a clarifying section to Title 12 (Sentencing and Probation) to clarify that a person may be prosecuted under Alaska law for committing Online Enticement of a Minor or Sending an Explicit Image of a Minor even though the defendant may be in another state when the offense was committed. The bill also makes changes to sentencing guidelines of Title 12 to reflect the changes in charge class that are proposed for Unlawful Exploitation of a Minor and Online Enticement of a Minor.

If this bill passes, there would be no financial impact to the Division of Juvenile Justice budget.

FISCAL NOTE #6

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 127(FIN)

Analysis

This bill expands the definition of "nonconsensual contact" under stalking, specifically prohibits the sending of an explicit image of a minor through various electronic and printed means, and creates a new crime for obtaining the confidential information of another person.

The bill also provides for the prosecution of an out of state individual for online enticement of a minor if the state nexus requirment is met. The bill also specifically allows the Department of Corrections to place a misdemeanant on supervised probation.

The expansion of the definition of "nonconsensual contact", the creation of additional crimes, and increasing the supervision of probationers will likely increase the number of criminal defense cases assigned to the Office of Public Advocacy. The agency is not able to reliably predict the number of new cases, and therefore, the agency cannot precisely predict the resulting fiscal impact on the agency. Accordingly, OPA has submitted an indeterminate fiscal note.

Sponsor Statement for CSHB 168(JUD)

"An Act requiring the amount of the security given by a party seeking an injunction or order vacating or staying the operation of a permit affecting an industrial operation to include an amount for the payment of wages and benefits for employees and payments to contractors and subcontractors that may be lost if the industrial operation is wrongfully enjoined."

Under current law the cost to bring a public litigant lawsuit against a legally permitted project is in effect zero. There is very little risk in bringing a suit. All the risk is borne by the defendants. These actions do shutdown projects at significant costs to working Alaskans, businesses and the state treasury. **CSHB 168(JUD)** seeks to remedy the situation by leveling the playing field.

CSHB168(JUD) parallels the requirements of Alaska Civil Rule 65(c). As written, 65(c) states: *"no restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained".*

At the request of the Department of Law, **HB168** was amended to more closely mirror the language of Alaska Civil Rule 65(c) in order to clarify that the proposed statute would not change the court rule. The court already has the ability to require security. **CSHB168(JUD)** simply requests that part of the court's deliberation process should include payment of wages and benefits for employees, payments to contractors and sub-contractors of the industrial operation that is shutdown. The amount of security and how it is calculated is totally within the hands of the court.

MEMORANDUM April 11, 2012

SUBJECT: EPA concerns relating to posting security for injunction (CSHB 168(JUD); Work Order No. 27-LS0395\D)

TO: Senator Hollis French
Attn: Cindy Smith

FROM: Dennis C. Bailey
Legislative Counsel

You have provided me with a copy of a letter written in 2006 from the U.S. Environmental Protection Agency to then Utah Governor Jon Huntsman, Jr., relating to a bill which had been passed by the Utah Legislature that involved posting a bond in order to request a stay or injunction of a new federal or state environmental permit or approval. You have asked for an opinion concerning the letter and whether CSHB 168(JUD) may raise issues for the EPA similar to those expressed in the letter regarding the Utah bill.

The 2006 Utah bill, HB 100 (copy enclosed), provided that the bond would have to cover costs and damages to a person including lost wages, salaries, benefits. The bond could be large and could deter organizations from seeking stays of permits and other project approvals pending appeal, no matter how compelling their case. The Utah bill requires a an entity that does business in the state to file a bond with the state division of corporations when it requests a stay or injunction in environmental litigation. The bill establishes fees and requires a hearing to establish the bond amount, allows for administrative rules for posting the bond, and requires that an entity that fails to post a bond be administratively dissolved and provides for license revocations. The bill lists a number of federal and state laws to which the bonding requirement applies.

The EPA letter expressed concern over the Utah legislation, noting that the legislation may create "impediments to the public's ability to challenge permits and other projects in state and federal court as required by various environmental statutes" and over "whether important parts of the State's federally approved environmental programs would meet federal requirements for EPA approval." The EPA letter said that the state must provide the same opportunity for judicial review as would be available under the federal program. Apparently in response to the EPA concerns, the Utah governor vetoed the bill based on the conclusion that the bill was preempted by federal law.[1]

---

[1] The governor's veto message relied on federal preemption: state law "stands as an obstacle to the accomplishment and execution of the full purposes and objectives of

By comparison, CSHB 168(JUD) also applies to a court considering the amount of security that must be provided by a person seeking an injunction or order vacating or staying the operation of a permit that affects an industrial operation. The court must consider costs that an industrial operation may incur if the operation is wrongly enjoined and must include an amount for payment of wages and benefits for employees and payment to contractors and subcontractors of the industrial operation. An industrial operation is defined to include construction, energy or timber activity, and oil, gas, and mineral exploration, development, and production.

You asked whether the concerns expressed in the EPA letter could also apply to CSHB 168(JUD). The short answer is yes. Although the 2006 Utah HB 100 has a different structure than CSHB 168(JUD), it was an attempt to accomplish the same purpose as CSHB 168(JUD), i.e., requiring a person applying for an injunction or stay to pay a greater bond that covers specified amounts. The EPA expressed concerns mainly relating to federal preemption and affects of the bill on federal approval of state environmental programs. Because of similarities between the Utah bill and the Alaska bill, it seems possible that the EPA could have similar concerns with CSHB 168(JUD), but only the EPA could give a definitive response to this question.

If I may be of further assistance, please advise.

MAR 0 2 2006

Honorable Jon Huntsman, Jr.
Governor, State of Utah
Utah State Capitol Complex
East Office Building, Suite E220
PO Box 142220
Salt Lake City, Utah 84114-2220

Dear Governor Huntsman:

I am writing to indicate that legislation recently approved by the 2006 Utah Legislature, House Bill No. 100 (HB 100), is of potential concern to the U.S. Environmental Protection Agency (EPA). EPA is very reluctant to become involved with the actions of a State's legislature. However, this pending legislation raises concerns about whether important parts of the State's federally-approved environmental programs would meet federal requirements for EPA approval. In the spirit of partnership, we offer the following for your consideration, particularly in light of EPA's experience with similar legislative actions and court decisions in the states of Virginia, Oregon, and Montana.

I have been advised by EPA's attorneys that the pending Utah legislation may create impediments to the public's ability to challenge permits and other project approvals in state and federal courts as required by various environmental statutes. As you may know, for a state to assume responsibility for federal environmental programs, that State must provide the same opportunity for judicial review as would be available under the federal program.

If our reading of the pending legislation is correct, it would require entities to post a bond in order to request a stay or injunction of a new federal or State environmental permit or approval. In addition to covering potential damages to the permit applicant, the bond would have to cover costs and damages to any person, including employees' lost wages, salaries, and benefits, and lost State and local tax revenues. The size of the bond could be very large. Thus, the bond requirement could deter organizations from seeking stays of permits and other project approvals pending appeal, no matter how compelling their case.

Also, as noted above, HB 100 would extend to entities seeking a stay or injunction in federal court. This appears to conflict with federal law as we know of no authority under federal law for the State to impose this burden on access to federal court. In addition, HB 100 would prevent entities that fail to post the required bond from doing business within the State of Utah. This too would impede the ability of organizations to seek a stay or injunction in federal or state court.

In sum, it appears that the pending legislation could burden rights to judicial review of permitting decisions and project approvals in Utah and impact the federal-approvability of State environmental programs. I welcome your insights as to whether our understanding of the pending legislation is accurate, and the opportunity to work together to carefully consider the ramifications of the pending legislation. If you need more information, you may call me or Steve Tuber of my staff at (303) 312-6241.

Sincerely yours,

Kerrigan D. Clough /fo

STATE OF UTAH

JON M. HUNTSMAN, JR.
GOVERNOR

OFFICE OF THE GOVERNOR
SALT LAKE CITY, UTAH
84114-2220

GARY R. HERBERT
LIEUTENANT GOVERNOR

March 21, 2006

The Honorable Greg J. Curtis
Speaker of the House
and
The Honorable John L. Valentine
President of the Senate

Dear Speaker Curtis and President Valentine:

After careful consideration and study, I have decided to veto H.B. 100, ENVIRONMENTAL LITIGATION BOND, and have transmitted it to the Lieutenant Governor for filing.

This bill seeks to impose new requirements on Utah corporations that initiate lawsuits under the National Environmental Policy Act of 1969, the Atomic Energy Act of 1964, or any of the twenty other federal environmental statutes referenced in the bill. Specifically, it provides that any Utah corporation filing a federal environmental action and "requesting a stay or injunction to a new permit or approval" must "post a corporate surety bond or cash equivalent" in an "amount that will cover the payment of reasonably foreseeable costs and damages suffered in Utah by any person because of the delay caused by the environmental litigation." H.B. 100 at 3 ln. 67, 5 ln. 120-24 (General Session 2006). The amount of the bond would have to be sufficient to cover everything from "employees' lost wages, salaries, and benefits" to "lost net revenue, including local and state tax revenues." *Id.* at 5 ln. 125-26. Any Utah corporation failing to post such a bond upon initiating litigation covered by the bill would be subject to administrative dissolution and other penalties. *See id.* at 5 ln. 139-46.

I have great respect for the sponsors and proponents of H.B. 100, and admire their sincere desire to make our State a better place. Nevertheless, consistent with my oath to "support, obey and defend the Constitution of the United States and the Constitution of this State," Utah Const. art. IV, § 10, I cannot sign this bill into law. The Supremacy Clause of the U.S. Constitution provides that laws enacted by Congress "shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any state to the Contrary notwithstanding." U.S. Const. art. VI, § 2. An analogous clause in our State

Constitution similarly provides that "Utah is an inseparable part of the Federal Union and the Constitution of the United States is the supreme law of the land." Utah Const. art. I, § 3. These provisions make clear that, where a properly enacted federal law conflicts with a State law, the federal law necessarily preempts its State counterpart.

H.B. 100 conflicts with federal law inasmuch as it seeks to impose additional requirements — *i.e.*, bonding requirements that are not imposed by, and are inconsistent with, federal law — on Utah corporations seeking injunctive relief under federal environmental statutes. By so doing, the bill threatens to "'stand[] as an obstacle to the accomplishment and execution of the full purposes and objectives of Congress.'" *Pacific Gas & Electric Co. v. State Energy Resources Conservation & Development Comm'n*, 461 U.S. 190, 204 (1983) (quoting *Hines v. Davidowitz*, 312 U.S. 52, 67 (1941)).

For the foregoing reasons, I consider this bill preempted by federal law, and therefore cannot allow it to take effect.

Sincerely,

Jon M. Huntsman, Jr.
Governor

BILL TRACKING REPORT: 2006 Bill Tracking UT H.B. 100

2006 Bill Text UT H.B. 100

VERSION: Enrolled

VERSION-DATE: March 10, 2006

SYNOPSIS: LONG TITLE

General Description:

This bill requires entities that do business in the state to file a bond with the Division of Corporations and Commercial Code when it begins the environmental litigation.

DIGEST:

Highlighted Provisions:

This bill:

. defines terms;

. requires an entity doing business in Utah to file a bond with the division when it requests a stay or injunction in environmental litigation;

. authorizes the division to:

. establish a fee for the bond filing;

. hold a hearing to establish the bond amount;

. make rules for posting the bond; and

. administratively dissolve an entity or revoke its authority to do business for failure to post a bond;

. requires the division to dissolve an entity or revoke its authority to do business if another state with a similar law has revoked an entity's certificate of existence;

. provides for revocation of licenses an entity holds, including professional licenses; and

. makes technical changes.

Monies Appropriated in this Bill:

None

Other Special Clauses:

None

[A> (U) THE SURFACE MINING CONTROL AND RECLAMATION ACT OF 1977, *30 U.S.C. SEC. 1201* THROUGH 1328; <A]

[A> (V) TITLE 19, CHAPTER 2, AIR CONSERVATION ACT; <A]

[A> (W) TITLE 19, CHAPTER 3, RADIATION CONTROL ACT; <A]

[A> (X) TITLE 19, CHAPTER 4, SAFE DRINKING WATER ACT; <A]

[A> (Y) TITLE 19, CHAPTER 5, WATER QUALITY ACT; <A]

[A> (Z) TITLE 19, CHAPTER 6, PART 1, SOLID AND HAZARDOUS WASTE ACT; <A]

[A> (AA) TITLE 19, CHAPTER 6, PART 2, HAZARDOUS WASTE FACILITY SITING ACT; <A]

[A> (BB) TITLE 19, CHAPTER 6, PART 3, HAZARDOUS SUBSTANCES MITIGATION ACT; <A]

[A> (CC) TITLE 19, CHAPTER 6, PART 6, SOLID WASTE MANAGEMENT ACT; <A]

[A> (DD) THE ADMINISTRATIVE PROCEDURES ACT, *5 U.S.C. SEC. 701* THROUGH 706, WHEN THE ACTION OR COMPLAINT REQUESTS JUDICIAL REVIEW OF ANY FEDERAL AGENCY ACTION BY THE: <A]

[A> (I) ENVIRONMENTAL PROTECTION AGENCY; <A]

[A> (II) U.S. ARMY CORPS OF ENGINEERS; <A]

[A> (III) U.S. DEPARTMENT OF THE INTERIOR; <A]

[A> (IV) U.S. DEPARTMENT OF AGRICULTURE; OR <A]

[A> (V) U.S. DEPARTMENT OF TRANSPORTATION; OR <A]

[A> (EE) TITLE 63, CHAPTER 46B, ADMINISTRATIVE PROCEDURES ACT, WHEN THE ACTION OR COMPLAINT REQUESTS JUDICIAL REVIEW OF ANY AGENCY ACTION BY THE: <A]

[A> (I) UTAH DEPARTMENT OF ENVIRONMENTAL QUALITY; <A]

[A> (II) UTAH DEPARTMENT OF NATURAL RESOURCES; <A]

[A> (III) UTAH DEPARTMENT OF TRANSPORTATION; OR <A]

[A> (IV) UTAH SCHOOL AND INSTITUTIONAL TRUST LANDS ADMINISTRATION. <A]

[A> (2) THE DIVISION SHALL REQUIRE AN ENTITY REGISTERED WITH THE DIVISION TO POST A CORPORATE SURETY BOND OR CASH EQUIVALENT: <A]

[A> (A) IN AN AMOUNT THAT WILL COVER THE PAYMENT OF THE REASONABLY FORESEEABLE COSTS AND DAMAGES SUFFERED IN UTAH BY ANY PERSON BECAUSE OF THE DELAY CAUSED BY THE ENVIRONMENTAL LITIGATION, INCLUDING: <A]

[A> (I) EMPLOYEES' LOST WAGES, SALARIES, AND BENEFITS; AND <A]

[A> (II) LOST NET REVENUE, INCLUDING LOCAL AND STATE TAX REVENUES; <A]

[A> (B) WRITTEN BY A SURETY LICENSED TO DO BUSINESS WITHIN THE STATE; <A]

[A> (C) IN FAVOR OF THE STATE, FOR THE BENEFIT OF ANY PERSON INJURED IN UTAH BY THE ENVIRONMENTAL LITIGATION; AND <A]

[A> (D) CONDITIONED UPON: <A]

[A> (I) THE PAYMENT OF COURT COSTS AND REASONABLE ATTORNEY'S FEES TO THE PREVAILING PARTY INCIDENT TO ANY SUIT UPON THE BOND; AND <A]

[A> (II) THE UNSUCCESSFUL ENVIRONMENTAL LITIGATION. <A]

[A> (3) THE DIVISION MAY ESTABLISH A FEE TO BE PAID WHEN POSTING THE BOND BY FOLLOWING THE PROCEDURES AND REQUIREMENTS OF SECTION 63-38-3.2 . <A]

[A> (4) BY FOLLOWING THE PROCEDURES AND REQUIREMENTS OF TITLE 63, CHAPTER 46A, UTAH ADMINISTRATIVE RULEMAKING ACT, THE DIVISION SHALL MAKE RULES GOVERNING THE PROCEDURES FOR POSTING THE BOND. <A]

[A> (5) THE DIVISION SHALL HOLD A FORMAL ADJUDICATIVE PROCEEDING TO DETERMINE THE BOND AMOUNT BY FOLLOWING THE PROCEDURES AND REQUIREMENTS OF TITLE 63, CHAPTER 46B, ADMINISTRATIVE PROCEDURES ACT. <A]

[A> (6) IF AN ENTITY FAILS TO FILE THE BOND REQUIRED BY SUBSECTION (2): <A]

[A> (A) THE DIVISION SHALL ADMINISTRATIVELY DISSOLVE THE ENTITY OR REVOKE ITS AUTHORITY TO DO BUSINESS; <A]

[A> (B) THE ENTITY IS NO LONGER AUTHORIZED TO TRANSACT BUSINESS IN UTAH; AND <A]

[A> (C) ANY LICENSE HELD BY THE ENTITY, INCLUDING A PROFESSIONAL LICENSE, SHALL BE REVOKED BY THE APPROPRIATE STATE OR LOCAL AUTHORITY. <A]

[A> (7) A PERSON, AS DEFINED IN SECTION 68-3-12, CLAIMING DAMAGES AS A RESULT OF ANY ENVIRONMENTAL LITIGATION PURSUED BY AN ENTITY REGISTERED WITH THE DIVISION MAY FILE A CLAIM UPON THE BOND FOR DAMAGES AGAINST BOTH THE PRINCIPAL AND THE SURETY. <A]

[A> (8) THE TOTAL AGGREGATE LIABILITY ON THE BOND TO ALL PERSONS MAKING CLAIMS MAY NOT EXCEED THE AMOUNT OF THE BOND. <A]

[A> (9) IF ANY OTHER STATE HAS A PROVISION OF LAW SUBSTANTIALLY SIMILAR TO THIS SECTION, AND THE OTHER STATE HAS ADMINISTRATIVELY DISSOLVED AN ENTITY, REVOKED AN ENTITY'S CERTIFICATE OF EXISTENCE OR LICENSE, OR REVOKED THE ENTITY'S AUTHORITY TO TRANSACT BUSINESS IN THAT STATE: <A]

[A> (A) THE DIVISION SHALL ADMINISTRATIVELY DISSOLVE THE ENTITY OR REVOKE ITS AUTHORITY TO DO BUSINESS; AND <A]

[A> (B) THE ENTITY IS NO LONGER AUTHORIZED TO TRANSACT BUSINESS IN UTAH. <A]

Section 2. Section 16-6a-1410 is amended to read:

16-6a-1410. Grounds for administrative dissolution.

The division may commence a proceeding under Section 16-6a-1411 for administrative dissolution of a nonprofit corporation if:

(1) the nonprofit corporation does not pay when they are due any taxes, fees, or penalties imposed by this chapter or other applicable laws of this state;

(2) the nonprofit corporation does not deliver its annual report to the division when it is due;

(3) the nonprofit corporation is without:

(a) a registered agent; or

(b) a registered office;

(4) the nonprofit corporation does not give notice to the division that:

(a) its registered agent or registered office has been changed;

(b) its registered agent has resigned;

(c) its registered office has been discontinued; or

(d) the nonprofit corporation's period of duration stated in its articles of incorporation expires [D> . <D] [A> ; OR <A]

[A> (5) THE NONPROFIT CORPORATION DOES NOT POST A BOND REQUIRED BY SECTION 13-1A-10 . <A]

Section 3. Section 16-6a-1515 is amended to read:

16-6a-1515. Grounds for revocation.

The division may commence a proceeding under Section 16-6a-1516 to revoke the authority of a foreign nonprofit corporation to conduct affairs in this state if:

(1) the foreign nonprofit corporation does not deliver its annual report to the division when it is due;

(2) the foreign nonprofit corporation does not pay when they are due any taxes, fees, or penalties imposed by this chapter or other applicable laws of this state;

(3) the foreign nonprofit corporation is without a registered agent or registered office in this state;

(4) the foreign nonprofit corporation does not inform the division under Section 16-6a-1509 or 16-6a-1510 that:

(a) its registered agent or registered office has changed;

(b) its registered agent has resigned; or

(c) its registered office has been discontinued;

(5) an incorporator, director, officer, or agent of the foreign nonprofit corporation signs a document knowing it is false in any material respect with intent that the document be delivered to the division for filing; [D> or <D]

(6) the division receives a duly authenticated certificate from the division or other official having custody of corporate records in the state or country under whose law the foreign nonprofit corporation is incorporated stating that the foreign nonprofit corporation has dissolved or disappeared as the result of a merger [D> . <D] [A> ; OR <A]

[A> (7) THE FOREIGN NONPROFIT CORPORATION DOES NOT POST A BOND REQUIRED BY SECTION 13-1A-10 . <A]

Section 4. Section 16-10a-1420 is amended to read:

16-10a-1420. Grounds for administrative dissolution.

The division may commence a proceeding under Section 16-10a-1421 for administrative dissolution of a corporation if:

(1) the corporation does not pay when they are due any taxes, fees, or penalties imposed by this chapter or other applicable laws of this state;

(2) the corporation does not deliver a corporate or annual report to the division when it is due;

(3) the corporation is without a registered agent or registered office in this state;

(4) the corporation does not give notice to the division that its registered agent or registered office has been changed, that its registered agent has resigned, or that its registered office has been discontinued; [D> or <D]

(5) the corporation's period of duration stated in its articles of incorporation expires [D> . <D] [A> ; OR <A]

[A> (6) THE CORPORATION DOES NOT POST A BOND REQUIRED BY SECTION 13-1A-10 . <A]

Section 5. Section 48-2a-802 is amended to read:

48-2a-802. Judicial dissolution.

On application by or for a partner or the director of the division, a district court having competent jurisdiction may decree dissolution of the limited partnership [A> : <A]

[A> (1) <A] whenever it is not reasonably practicable to carry on the business in conformity with the partnership agreement [D> or <D] [A> ; <A]

[A> (2) <A] for failure to comply with the requirements of this chapter [D> . <D] [A> ; OR <A]

[A> (3) THE PARTNERSHIP DOES NOT POST A BOND REQUIRED BY SECTION 13-1A-10 . <A]

Section 6. Section 48-2c-1206 is amended to read:

48-2c-1206. Grounds for administrative dissolution.

The division may dissolve a company under Section 48-2c-1207 if:

(1) the company does not pay when due, any taxes, fees, or penalties imposed by this chapter or other applicable laws of this state;

(2) the company does not file its annual report with the division when it is due;

(3) the company is without a registered agent or registered office in this state; [D> or <D]

(4) the company fails to give notice to the division that:

(a) its registered agent or registered office has been changed;

(b) its registered agent has resigned;

(c) its registered office has been discontinued; or

(d) the company's period of duration has expired [D> . <D] [A> ; OR <A]

[A> (5) THE COMPANY DOES NOT POST A BOND REQUIRED BY SECTION 13-1A-10 . <A]

LOAD-DATE: March 11, 2006

Rule 65. Injunctions.

(a) **Preliminary Injunction.**

(1) *Notice.* No preliminary injunction shall be issued without notice to the adverse party.

(2) *Consolidation of Hearing With Trial on Merits.* Before or after the commencement of the hearing of an application for a preliminary injunction, the court may order the trial of the action on the merits to be advanced and consolidated with the hearing of the application. Even when this consolidation is not ordered, any evidence received upon an application for a preliminary injunction which would be admissible upon the trial on the merits becomes part of the record on the trial and need not be repeated upon the trial. This subdivision (a) (2) shall be so construed and applied as to save the parties any rights they may have to trial by jury.

(b) **Temporary Restraining Order -- Notice -- Hearing -- Duration.**A temporary restraining order may be granted without written or oral notice to the adverse party or that party's attorney only if (1) it clearly appears from specific facts shown by affidavit or by the verified complaint that immediate and irreparable injury, loss, or damage will result to the applicant before the adverse party or that party's attorney can be heard in opposition, and (2) the applicant's attorney certifies to the court in writing the efforts, if any, which have been made to give the notice and the reasons supporting the claim that notice should not be required. Every temporary restraining order granted without notice shall be endorsed with the date and hour of issuance; shall be filed forthwith in the clerk's office and entered of record; shall define the injury and state why it is irreparable and why the order was granted without notice; and shall expire by its terms within such time after entry, not to exceed 10 days, as the court fixes, unless within the time so fixed the order, for good cause shown, is extended for a like period or unless the party against whom the order is directed consents that it may be extended for a longer period. The reasons for the extension shall be entered of record. In case a temporary restraining order is granted without notice, the motion for a preliminary injunction shall be set down for hearing at the earliest possible time and takes precedence of all matters except older matters of the same character; and when the motion comes on for hearing the party who obtained the temporary restraining order shall proceed with the application for a preliminary injunction and, if the party does not do so, the court shall dissolve the temporary restraining order. On two days' notice to the party who obtained the temporary restraining order without notice or on such shorter notice to that party as the court may prescribe, the adverse party may appear and move its dissolution or modification and in that event the court shall proceed to hear and determine such motion as expeditiously as the ends of justice require.

(c) **Security.** No restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained. No such security shall be required

of the state or a municipality or of an officer or agency thereof, or unless otherwise ordered by the court, in domestic relations actions or proceedings.

A surety upon a bond or undertaking under this rule submits to the jurisdiction of the court and irrevocably appoints the clerk of the court as the surety's agent upon whom any papers affecting the surety's liability on the bond or undertaking may be served. The surety's liability may be enforced on motion without the necessity of an independent action. The motion and such notice of the motion as the court prescribes may be served on the clerk of the court who shall forthwith mail copies to the persons giving the security if their addresses are known.

(d) **Form and Scope of Injunction or Restraining Order.** Every order granting an injunction and every restraining order shall set forth the reasons for its issuance; shall be specific in terms; shall describe in reasonable detail, and not by reference to the complaint or other document, the act or acts sought to be restrained; and is binding only upon the parties to the action, their officers, agents, servants, employees, and attorneys, and upon those persons in active concert or participation with them who receive actual notice of the order by personal service or otherwise.

(e) **Standing Preliminary injunctions in Domestic Relations Actions.** The presiding judge of each judicial district may issue a standing injunction which restrains the parties in all domestic relations actions, except dissolutions, domestic violence actions and uniform reciprocal enforcement actions, from:

(1) removing any child who is the subject of the action from the State of Alaska without the written consent of the other party;

(2) disposing of, encumbering or transferring any marital property without the written consent of the other party, except reasonably using funds for the parties or the parties' children's personal and necessary expenses; and

(3) threatening, harassing, or harming the other party.

Such a standing injunction shall be effective against a party upon receipt of a copy of the standing injunction by the party or the party's attorney.

Subject: HB 168

Cindy - The following people will be providing testimony on HB 168:

Rachael Petro, Alaska State Chamber of Commerce (@ Anch LIO)
Mike Satre - Council of Alaska Producers (in person)
Mike Jungries - Resource Development Council (@ Anch LIO)
Bob Dickson - The Alliance (will try to be @ Anch LIO but may need approval for an offnet)
Barbara Huff - Teamsters (may testify in person or submit written testimony)

Will the bills be taken in the order on the schedule and do you have any idea how long HB343 might go. Resources Committee meets from 1 to 3 p.m. if we get off the floor on time - Rep. Feige is not chairing this week so he will be presenting HB168.

Thanks
lh

MEMORANDUM February 28, 2011

SUBJECT: Security for injunction (HB 168, Work Order No. 27-LS0395\B)

TO: Representative Eric Feige
Co-Chair of the House Resources Committee
Attn: Linda Hay

FROM: Dennis C. Bailey
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Applies to a court considering the amount of security that must be provided by a person seeking an injunction or order vacating or staying the operation of a permit that affects an industrial operation. The court's consideration of the costs that an industrial operation may incur if the operation is wrongly enjoined must include an amount for payment of wages and benefits for employees, and payment to contractors and subcontractors of the industrial operation.

Defines an industrial operation to include a construction, energy, or timber activity and oil, gas, and mineral exploration, development and production.

Does not prohibit a person who is wrongly enjoined from other relief or otherwise limit the amount that a person may recover in the action.

DCB:ljw
11-144.ljw

Alaska Statute to be amended by CSHB 168(JUD)

AS 09.40.230. Authorization for injunction.

When it appears that (1) the plaintiff is entitled to the relief demanded, and the relief or any part of it includes restraining the commission or continuance of some act, the commission or continuance of which during the litigation would produce injury to the plaintiff; or (2) the defendant is doing, or threatens or is about to do, or is procuring or suffering to be done some act in violation of the plaintiff's rights concerning the subject of the action and tending to render the judgment ineffectual; or (3) the defendant threatens or is about to remove or dispose of property or a part of it with intent to delay or defraud creditors, an injunction may be allowed to restrain such act, removal, or disposition.

Alaska Rules of Procedure
Rule 65. Injunctions.

(a) Preliminary Injunction.

(1) Notice. No preliminary injunction shall be issued without notice to the adverse party.

(2) Consolidation of Hearing With Trial on Merits. Before or after the commencement of the hearing of an application for a preliminary injunction, the court may order the trial of the action on the merits to be advanced and consolidated with the hearing of the application. Even when this consolidation is not ordered, any evidence received upon an application for a preliminary injunction which would be admissible upon the trial on the merits becomes part of the record on the trial and need not be repeated upon the trial. This subdivision (a) (2) shall be so construed and applied as to save the parties any rights they may have to trial by jury.

(b) Temporary Restraining Order -- Notice -- Hearing -- Duration. A temporary restraining order may be granted without written or oral notice to the adverse party or that party's attorney only if (1) it clearly appears from specific facts shown by affidavit or by the verified complaint that immediate and irreparable injury, loss, or damage will result to the applicant before the adverse party or that party's attorney can be heard in opposition, and (2) the applicant's attorney certifies to the court in writing the efforts, if any, which have been made to give the notice and the reasons supporting the claim that notice should not be required. Every temporary restraining order granted without notice shall be endorsed with the date and hour of issuance; shall be filed forthwith in the clerk's office and entered of record; shall define the injury and state why it is irreparable and why the order was granted without notice; and shall expire by its terms within such time after entry, not to exceed 10 days, as the court fixes, unless within the time so fixed the order, for good cause shown, is extended for a like period or unless the party against whom the order is directed consents that it may be extended for a longer period. The reasons for the extension shall be entered of record. In case a temporary restraining order is granted without notice, the motion for a preliminary injunction shall be set down for hearing at the earliest possible time and takes precedence of all matters except older matters of the same character; and when the motion comes on for hearing the party who obtained the temporary restraining order shall proceed with the application for a preliminary injunction and, if the party does not do so, the court shall dissolve the temporary restraining order. On two days' notice to the party who obtained the temporary restraining order without notice or on such shorter notice to that party as the court may prescribe, the adverse party may appear and move its dissolution or modification and in that event the court shall proceed to hear and determine such motion as expeditiously as the ends of justice require.

(c) Security. No restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained. No such security shall be required of the state or a municipality or of an officer or agency thereof, or unless otherwise ordered by the court, in domestic relations actions or proceedings.

A surety upon a bond or undertaking under this rule submits to the jurisdiction of the court and irrevocably appoints the clerk of the court as the surety's agent upon whom any papers affecting the surety's liability on the bond or undertaking may be served. The surety's liability may be enforced on motion without the necessity of an independent action. The motion and such notice of the motion as

the court prescribes may be served on the clerk of the court who shall forthwith mail copies to the persons giving the security if their addresses are known.

MEMORANDUM February 29, 2012

SUBJECT: Security for an injunction for industrial operations (CSHB 168(JUD), Work Order No. 27-LS0395\D)

TO: Senator Dennis Egan
Attn: Dana Owen

FROM: Dennis C. Bailey DCB
Legislative Counsel

You have asked whether the bill requirements for specified injunctions require a rule change, and what voting requirements are applicable.

CSHB 168(JUD) (referred to herein as HB 168) amends AS 09.40.230 by adding a new subsection that requires a party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation to give security in an amount determined by a court for costs and damages that may be incurred by an industrial operation that has been wrongfully enjoined or restrained. It also requires that the amount determined by the court "must include an amount for the payment of wages and benefits for the employees of an industrial operation and the contractors and subcontractors of the operation."

The new subsection added by HB 168 parallels the requirements of Alaska Civil Rule 65(c), which requires a court to require a person seeking an injunction to provide security to protect a person who may be wrongfully restrained or enjoined. Civil Rule 65(c) reads:

> (c) **Security.** No restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained. No such security shall be required of the state or a municipality or of an officer or agency thereof, or unless otherwise ordered by the court, in domestic relations actions or proceedings. A surety upon a bond or undertaking under this rule submits to the jurisdiction of the court and irrevocably appoints the clerk of the court as the surety's agent upon whom any papers affecting the surety's liability on the bond or undertaking may be served. The surety's liability may be enforced on motion without the necessity of an independent action. The

> motion and such notice of the motion as the court prescribes may be served on the clerk of the court who shall forthwith mail copies to the persons giving the security if their addresses are known.

Civil Rule 65(c) exists to protect the interests of a party who is the subject of a temporary restraining order or a preliminary injunction. The analysis used by a court issuing a preliminary injunction is set out as follows:

> The showing required to obtain a preliminary injunction depends on the nature of the threatened injury. If the plaintiff faces the danger of "irreparable harm" and if the opposing party is adequately protected, then we apply a "balance of hardships" approach in which the plaintiff "must raise 'serious' and substantial questions going to the merits of the case; that is, the issues raised cannot be 'frivolous or obviously without merit.'" [State v. Kluti Kaah Native Vill. of Copper Ctr., 831 P.2d 1270, 1273 (Alaska 1992) (citations omitted).] If, however, the plaintiff's threatened harm is less than irreparable or if the opposing party cannot be adequately protected, then we demand of the plaintiff the heightened standard of a "clear showing of probable success on the merits." [Id. at 1272 (quoting A.J. Indus., Inc. v. Alaska Pub. Serv. Comm'n, 470 P.2d 537, 540 (Alaska 1970)), modified in other respects, 483 P.2d 198 (Alaska 1971).]

HB 168 differs from Civil Rule 65(c) because, under HB 168, (1) the security requirement applies not only to a temporary restraining order or a preliminary injunction, but also includes "an order vacating or staying the operation of a permit that affects an industrial operation"; and (2) the amount of the security determined by the court must include "an amount for the payment of wages and benefits for employees and payment to contractors and subcontractors of the industrial operation."

The security requirement for an order staying a permit may arise in the context of a preliminary injunction, although the issue is less clear with an order vacating the operation of a permit. Vacating the operation of a permit is more likely to be the final result of litigation rather than the subject of a preliminary injunction. To the extent that HB 168 requires this security for a final judgment, it may change Appellate Rule 204. ~~is just~~ involves On the other hand, if HB 168 applies only to interlocutory orders, the issue ~~is just~~ Civil Rule 65.

Under existing Civil Rule 65(c), the court could consider and include an amount for wages, benefits, and contract payments. However, HB 168 requires some amount for wages, benefits, and contract payments to be covered by security, so HB 168 does appear to limit the court's discretion under Civil Rule 65(c). The question is whether this is a rule of "practice and procedure" that requires a two-thirds vote.

Article IV, sec. 15 provides:

> **Section 15. Rule-Making Power.** The supreme court shall make and promulgate rules governing the administration of all courts. It shall make and promulgate rules governing practice and procedure in civil and criminal cases in all courts. These rules may be changed by the legislature by two-thirds vote of the members elected to each house.

Rule 39(e) of the Uniform Rules requires:

> (e) If a bill or portion of a bill contains matter changing a supreme court rule governing practice and procedure in civil or criminal cases, the bill must contain a section expressly citing the rule and noting what change is being proposed. The section containing the change in a court rule must be approved by an affirmative vote of two-thirds of the full membership of each house. If the section effecting a change in the court rule fails to receive the required two-thirds vote, the section is void and without effect and is deleted from the bill. The fact that a bill contains a section which changes a court rule shall also be noted in the title of the bill.

In order to decide whether a court rule change requires a two-thirds vote, a determination must be made whether the change to the court rules is

(1) a substantive change to court rules, e.g., limitations of actions, burden of proof, presumption, creation of courts, and matters of jurisdiction, which may be changed without special voting requirements;

(2) a matter of practice or procedure of the courts, e.g., forms of action, how an action is commenced, the manner of notice, pleading and motion practice, joinder, pre-trial practice, discovery, the conduct of trial, stay of proceedings, enforcement procedures, post-trial procedures, appeal, venue evidence and special proceedings such as adoption and probate; or

(3) a rule of administration which is protected from legislative modification based on principles of separation of power.[1]

Whether the measure creates a substantive court rule change requiring no special voting requirements or a change to a matter of practice and procedures, which would require a two-thirds vote, is a close question. The problems created by this distinction are readily acknowledged by the court:

> We then turned to the definitions of the terms "procedural" and "substantive." . . . But while this distinction claims venerable origins, it has been recognized that the definition falls far short of drawing an

---

[1] See, Manual of Legislative Drafting, p. 48 - 51, for a general discussion of these categories.

> unequivocal line. Decisions on the method of enforcing a right often affect substantive rights, and the regulation of substantive rights may have an impact upon judicial procedure.

State v. Native Village of Nunapitchuk, 156 P.3d 389, 397 (Alaska 2007) (citations omitted).

An argument could be made that the proposed change offered by HB 168, even if it limits the court's discretion in determining the amount of security required, would be considered a substantive matter. The Alaska Supreme Court found that AS 09.60.060, which allowed the court to require security for costs and attorneys fees, to be a substantive matter. Ware v. Anchorage, 439 P.2d 793, 794 (Alaska 1968). The court said, "The authorities generally agree that substantive law creates, defines and regulates rights, while procedural law prescribes the method of enforcing the rights." The court acknowledged differing decisions on similar facts in both state and federal courts, but concluded that AS 09.60.060 enacted a substantive change to the court rules. The court reasoned that the Act created a new right in the resident defendant and a new liability in the nonresident plaintiff which are separate and apart from, and go beyond, the procedure of computing and assessing costs and attorney's fees. Ware, at 795.

In the more recent case, Nunapitchuk, supra, the court concluded that changes to Civil Rule 82, which relates to attorneys fees, is a rule of practice and procedure that would require a two-thirds vote, but the change to the public interest litigant exception to the attorney fees rules was a rule of substantive law that could be changed by the legislature without a two-thirds vote. Further, the court concluded that when deciding whether the changes to the public interest litigant attorney fees provisions impede access to the courts, the court would not strike the statute down entirely but would determine whether application of the statute would impede access to the courts on a case-by-case basis.

A court considering whether a court rule change and a two-thirds vote is required for HB 168 could take a position similar to Ware and conclude that the changes relating to posting security creates a new liability and is, therefore, a substantive change. Or, a court could conclude that the changes are a procedural change that would require a two-thirds vote. The Manual of Legislative Drafting, at page 49, does include "stay of proceedings" as a subject of "practice and procedure." However, how the issue would be decided cannot be predicted with any certainty.

The current bill draft takes the approach that the change is a substantive change. Taking this approach presumes that a two-thirds vote is not required but runs the risk that a court could conclude that the measure makes a procedural change, so a court rule change had actually occurred, and because a two-thirds vote was required, but not obtained, the change is invalid. With respect to the voting requirement, the safest procedure would be to treat the measure as requiring a rule change and obtain the two-thirds vote required to approve a rule change.

Also, please be aware of the constitutional issue relating to payment of security under the holding in Patrick v. Lynden Transport., 765 P.2d 1375 (Alaska 1988). That case involved a statute that required payment of security for court costs and attorney fees when the plaintiff is a nonresident as a condition for maintaining the lawsuit in Alaska. The court found that access to the courts is a fundamental right, analyzed the case on equal protection grounds under the Alaska Constitution, and relied heavily on the residency versus non-residency issues presented by the case to reach the conclusion that the statute was unconstitutional.

HB 168 differs from the issue present in Patrick v. Lynden. In Patrick v. Lynden the plaintiff could not maintain the action without filing security for costs and fees. In contrast, HB 168 does not explicitly deny access to the courts, although, arguably it may have the same effect by denying access to restraining order or preliminary injunction. Another important difference is that HB 168 does not involve residency issues comparable to those in Patrick v. Lynden, which were used by the court as the basis for the court's decision.

In short, Patrick v. Lynden established that access to the courts is a fundamental right. Whether the payment for security by a party seeking an injunction under HB 168 infringes on the right of access to the courts is unknown.

If I may be of further assistance, please advise.

MEMORANDUM March 21, 2011

SUBJECT: Constitutionality of HB 168 relating to security for injunction (Work Order No. 27-LS0395\B)

TO: Representative Max Gruenberg
Attn: Gretchen Staft

FROM: Dennis C. Bailey DCB
Legislative Counsel

You have asked me to review constitutional considerations with respect to HB 168 in light of two decisions, Patrick v. Lynden Transport., 765 P.2d 1375 (Alaska 1988) and Ware v. City of Anchorage, 439 P.2d 793 (Alaska 1968).

HB 168 amends AS 09.40.230 by adding a new subsection that requires a party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation to give security in an amount determined by a court for costs and damages that may be incurred by an industrial operation that has been wrongfully enjoined or restrained. It also requires that the amount determined by the court "must include an amount for the payment of wages and benefits for the employees of an industrial operation and the contractors and subcontractors of the operation."

The new subsection added by HB 168 parallels the requirements of Alaska Civil Rule 65(c), which requires a court to require a person seeking an injunction to provide security to protect a person who may be wrongfully restrained or enjoined. Civil Rule 65(c) reads:

> (c) **Security.** No restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained. No such security shall be required of the state or a municipality or of an officer or agency thereof, or unless otherwise ordered by the court, in domestic relations actions or proceedings. A surety upon a bond or undertaking under this rule submits to the jurisdiction of the court and irrevocably appoints the clerk of the court as the surety's agent upon whom any papers affecting the surety's liability on the bond or undertaking may be served. The surety's liability may be enforced on motion without the necessity of an independent action. The

> motion and such notice of the motion as the court prescribes may be served on the clerk of the court who shall forthwith mail copies to the persons giving the security if their addresses are known.

Civil Rule 65(c) exists to protect the interests of a party who is the subject of a temporary restraining order or a preliminary injunction. The analysis used by a court issuing a preliminary injunction is set out as follows:

> The showing required to obtain a preliminary injunction depends on the nature of the threatened injury. If the plaintiff faces the danger of "irreparable harm" and if the opposing party is adequately protected, then we apply a "balance of hardships" approach in which the plaintiff "must raise 'serious' and substantial questions going to the merits of the case; that is, the issues raised cannot be 'frivolous or obviously without merit.'" [State v. Kluti Kaah Native Vill. of Copper Ctr., 831 P.2d 1270, 1273 (Alaska 1992) (citations omitted).] If, however, the plaintiff's threatened harm is less than irreparable or if the opposing party cannot be adequately protected, then we demand of the plaintiff the heightened standard of a "clear showing of probable success on the merits." [Id. at 1272 (quoting A.J. Indus., Inc. v. Alaska Pub. Serv. Comm'n, 470 P.2d 537, 540 (Alaska 1970)), modified in other respects, 483 P.2d 198 (Alaska 1971).]

HB 168 differs from Civil Rule 65(c) because under HB 168, (1) the security requirement applies not only to a temporary restraining order or a preliminary injunction, but also includes "an order vacating or staying the operation of a permit that affects an industrial operation"; and (2) requires that the amount of the security determined by the court must include "an amount for the payment of wages and benefits for employees and payment to contractors and subcontractors of the industrial operation."

Arguably, the change proposed by HB 168 applying the security requirement to a stay of the operation of a permit, could be in the form of an injunction, although the issue is less clear with an order vacating the operation of a permit, which seems more likely to be the result of litigation rather than the subject of a preliminary injunction. On the other hand, application for injunctive relief and the associated security under Civil Rule 65(c) may be interpreted not to apply to an "order" that is not in the form of an injunction.

With respect to the requirement that the court include an amount for wages and contract payments, the bill does not specify an amount that is required, and does not affect the discretion of the judge to determine the amount. The bill does not explicitly say that the amount of security is the amount of the payments for wages and contract payments. However, an argument could be made that HB 168 was intended to impose a requirement that the full amount of the wages and contracts must be included in the amount of the security.

Whether HB 168 actually changes the application of Civil Rule 65(c) may determine whether a two-thirds vote is required. An argument can be made that the court has the same authority both before and after enactment of HB 168. Under this argument, the court could apply the new provisions under HB 168 and require security for a preliminary injunction relating to the vacation or stay of a permit using existing law, and, also under existing law, the court could consider and include an amount for wages, benefits and contract payments. Under this interpretation, the bill does not enact a change to a court rule. If, however, HB 168 is interpreted to require wages, benefits, and contract payments to be covered by security, then HB 168 may be interpreted to change a court rule.

In Ware v. City of Anchorage, 439 P.2d 793 (Alaska 1968), the court addressed the issue of whether the statute that required a nonresident to post security for litigation costs and attorney fees was invalid based on the argument that the legislature may not make a court rule relating to practice and procedure, it may only change a court rule under art. IV, sec. 15 of the Alaska Constitution. Article IV, sec. 15 provides:

> **Section 15. Rule-Making Power.** The supreme court shall make and promulgate rules governing the administration of all courts. It shall make and promulgate rules governing practice and procedure in civil and criminal cases in all courts. These rules may be changed by the legislature by two-thirds vote of the members elected to each house.

Rule 39(e) of the Uniform Rules requires:

> (e) If a bill or portion of a bill contains matter changing a supreme court rule governing practice and procedure in civil or criminal cases, the bill must contain a section expressly citing the rule and noting what change is being proposed. The section containing the change in a court rule must be approved by an affirmative vote of two-thirds of the full membership of each house. If the section effecting a change in the court rule fails to receive the required two-thirds vote, the section is void and without effect and is deleted from the bill. The fact that a bill contains a section which changes a court rule shall also be noted in the title of the bill.

In order to decide whether a court rule change requires a two-thirds vote, a determination must be made whether the change to the court rules is

(1) a substantive change to court rules, e.g., limitations of actions, burden of proof, presumption, creation of courts, and matters of jurisdiction, which may be changed without special voting requirements;

(2) a matter of practice or procedure of the courts, e.g., forms of action, how an action is commenced, the manner of notice, pleading and motion practice, joinder, pre-trial practice, discovery, the conduct of trial, stay of proceedings, enforcement

procedures, post-trial procedures, appeal, venue evidence and special proceedings such as adoption and probate; or

(3) a rule of administration which is protected from legislative modification based on principles of separation of power.[1]

Whether the measure creates a substantive court rule change requiring no special voting requirements or a change to a matter of practice and procedures, which would require a two-thirds vote, is a close question. The problems created by this distinction are readily acknowledged by the court.

> We then turned to the definitions of the terms "procedural" and "substantive." . . . But while this distinction claims venerable origins, it has been recognized that the definition falls far short of drawing an unequivocal line. Decisions on the method of enforcing a right often affect substantive rights, and the regulation of substantive rights may have an impact upon judicial procedure.

State v. Native Village of Nunapitchuk, 156 P.3d 389, 397 (Alaska 2007) (citations omitted).

An argument could be made that the proposed change offered by HB 168, even if it limits the court's discretion in determining the amount of security required, would be considered a matter of procedure. The Alaska Supreme Court found that AS 09.60.060, which allowed the Court to require security for costs and attorneys fees, to be a substantive matter. Ware v. Anchorage, 439 P.2d 793, 794 (Alaska 1968). The Court said, "The authorities generally agree that substantive law creates, defines and regulates rights, while procedural law prescribes the method of enforcing the rights." The Court acknowledged differing decisions on similar facts in both state and federal courts, but concluded that AS 09.60.060 enacted a substantive change to the court rules. The Court reasoned that the act created a new right in the resident defendant and a new liability in the nonresident plaintiff which are separate and apart from, and go beyond, the procedure of computing and assessing costs and attorney's fees. Ware, at 795.

In the more recent case, Nunapitchuk, supra, the court concluded that changes to Civil Rule 82, which relates to attorneys fees, is a rule of practice and procedure that would require a two-thirds vote, but the change to the public interest litigant exception to the attorney fees rules was a rule of substantive law which could be changed by the legislature without a two-thirds vote. Further, the court concluded that when deciding whether the changes to the public interest litigant attorney fees provisions impede access

---

[1] See, Manual of Legislative Drafting, p. 48 - 51 for a general discussion of these categories.

to the courts, the court would not strike the statute down entirely but would determine whether application of the statute would impede access to the courts on a case-by-case basis.

A court considering whether a court rule change and a two-thirds vote is required for HB 168 could take a position similar to Ware and conclude that the changes relating to posting security creates a new liability and is, therefore, a substantive change. Or, a court could conclude that the changes are a procedural change which would require a two-thirds vote. How the issue would be decided cannot be predicted with any certainty.

The current bill draft takes the approach that the change is a substantive change. Taking this approach presumes that a two-thirds vote is not required but runs the risk that a court could conclude that the measure makes a procedural change so a court rule change had actually occurred, and because a two-thirds vote was required, but not obtained, the change is invalid. With respect to the voting requirement, the safest procedure would be to treat the measure as requiring a rule change and obtain the two-thirds vote required to approve a rule change.

You also asked about the constitutionality of HB 168 in light of the holding in Patrick v. Lynden Transport., 765 P.2d 1375 (Alaska 1988). That case involved a statute that required payment of security for court costs and attorney fees when the plaintiff is a nonresident as a condition for maintaining the lawsuit in Alaska. The court found that access to the courts is a fundamental right, analyzed the case on equal protection grounds under the Alaska Constitution, and relied heavily on the residency versus non-residency issues presented by the case to reach the conclusion that the statute was unconstitutional.

HB 168 differs from the issue present in Patrick v. Lynden. In Patrick v. Lynden the plaintiff could not maintain the action without filing security for costs and fees. In contrast, HB 168 does not explicitly deny access to the courts, although, arguably it may have the same effect by denying access to restraining order or preliminary injunction. Another important difference is that HB 168 does not involve residency issues comparable to those in Patrick v. Lynden Transport and that were used by the court as the basis for the court's decision.

In short, the precedent established in Patrick v. Lynden does not determine whether HB 168 is constitutional, although it does establish that access to the courts is a fundamental right. Whether the requirements of HB 168 infringe on that right is an open question.

If I may be of further assistance, please advise.

FISCAL NOTE #4

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 168(JUD)

Analysis

HB 168 requires a party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation to give security in an amount determined by the court for costs that may be incurred and damages that may be suffered by an industrial operation that has been wrongfully enjoined or restrained. This security would include an amount for the payment of wages and benefits for employees and payment to contractors and subcontractors of the industrial operation.

There will be no anticipated fiscal impact to the Department of Natural Resources.

27-19-306. Security for damages. (1) Subject to 25-1-402, on granting an injunction or restraining order, the judge shall require a written undertaking to be given by the applicant for the payment of the costs and damages that may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained. Except as provided in subsection (2), the undertaking:

(a) must be fixed at a sum that the judge considers proper; and

(b) may be waived:

(i) in domestic disputes; or

(ii) in the interest of justice.

(2) (a) If a party seeks an injunction or restraining order against an industrial operation or activity, the judge shall require a written undertaking to be filed by the applicant. The amount of the written undertaking must be set in an amount that includes all of the wages, salaries, and benefits of the employees of the party enjoined or restrained during the anticipated time that the injunction or restraining order will be in effect. The amount of the written undertaking may not exceed $50,000 unless the interests of justice require. The written undertaking must be conditioned to indemnify the employees of the party enjoined or restrained against lost wages, salaries, and benefits sustained by reason of the injunction or restraining order.

(b) As used in subsection (2)(a), "industrial operation or activity" includes but is not limited to construction, mining, timber, and grazing operations.

(3) Within 30 days after the service of the injunction, the party enjoined may object to the sufficiency of the sureties. If the party enjoined fails to object, all objections to the sufficiency of the sureties are waived. When objected to, the applicant's sureties, upon notice to the party enjoined of not less than 2 or more than 5 days, shall justify before a judge or clerk in the same manner as upon bail on arrest. If the sureties fail to justify or if others in their place fail to justify at the time and place appointed, the order granting the injunction must be dissolved.

(4) This section does not prohibit a person who is wrongfully enjoined from filing an action for any claim for relief otherwise available to that person in law or equity and does not limit the recovery that may be obtained in that action.

ANCHORAGE CHAMBER
of COMMERCE

March 27, 2012

Representative Eric Feige
Resources Co-Chair
State Capitol Rm. 126
Juneau, AK 99801-1182

Re: Support for House Bill 168: Injunction Security: Industrial Operation

Dear Representative Feige,

The Anchorage Chamber of Commerce supports House Bill 168 (HB 168), Injunction Security: Industrial Operation and urges efforts to ensure its passing this legislative session. This bill includes provisions that will strengthen efforts to ensure Alaska's energy and economic future through resource development projects.

The Anchorage Chamber is Alaska's largest business organization. Established in 1915, we currently represent nearly 1,100 business members, comprised of nearly 63,000 of Anchorage's 175,000 employees.

Recently, we surveyed our membership and from the results developed four legislative priorities as follows: Increase Oil Production; Ensure energy security in Anchorage and Southcentral; Update and Build New Infrastructure; and Ensure Fiscally Responsible Budget and Stable Tax Policy.

We recognize that in the past there have been several cases where courts have issued injunctions, or stays, against companies engaged in critical development projects. This led to project delays, curtailed employment, and, in particular, prevented the completion of much needed resource development projects to meet energy demands and secure our economic future.

We believe the success of all four of our priorities is severely limited by potential litigation. By imposing a penalty and requiring a bond to be posted in the event of a stay or injunction, the cost to the party bringing the suit is increased, preventing frivolous lawsuits and project delays.

Please support HB168 and ensure its passage this session.

Thank you for your continued support.

Subject: HB 168

Jennifer Harrison, Emily Fehrenbacher, and I met with Alida and talked briefly with Dana last week regarding HB 168. Thank you for spending the time with us. Dana suggested that I write a letter to Senator Egan to express my concerns about the bill. My comments are below. Please pass them on to the Senator prior to Tuesday's hearing. Thank you.

QUESTIONS ABOUT HB 168 (AN ACT REQUIRING THE AMOUNT OF THE SECURITY GIVEN BY A PARTY SEEKING AN INJUNCTION. . . .)

If enacted, this act would be a significant barrier to attempts by ordinary citizens, organizations, unions, and possibly even the State to ensure that permitted industrial operations are conducted in a responsible way. It is important that the potential effects of the bill be carefully examined:

I. **What is the purpose of the proposed legislation?**

If the bond is required when the preliminary injunction is granted, as is normally the case, the act would do nothing to prevent frivolous lawsuits. A frivolous lawsuit will not result in the grant of preliminary injunctive relief. To grant a preliminary injunction, a judge must determine that the plaintiffs have a likelihood of success on the merits and will suffer irreparable harm if the injunction is not issued. If those findings can be made (even if ultimately found to be in error), the lawsuit is not frivolous.

If the lawsuit is unsuccessful, no bond will be required. (But see next question.)

It is only plaintiffs who are in danger of winning that need to be concerned about having to post what would almost certainly be a very large bond. In other words, it is lawsuits that present legitimate permit inadequacies or permit violations that will be deterred, not frivolous ones.

II. **What would be some of the difficulties for courts in applying the law?**

One ambiguity in the law involves when in the litigation the bond must be posted. Bonds are ordinarily required when a preliminary injunction is granted. HB 168 can be read to require the bond when the relief is requested: "A party **seeking** a restraining order. . . shall give security. . . " Requiring a bond in order to **request** a preliminary injunction would be a highly unusual requirement and would, itself, almost surely result in litigation, placing a further burden on the courts.

The bill requires also that the security be "in an amount the court considers proper for costs that may be incurred and damages that may be suffered by an industrial operation that has been wrongfully enjoined or restrained, including an amount for the payment of wages and benefits for employees and payment to contractors and subcontractors. . . ." Determining the amount of the bond would almost certainly require a judge to take evidence about the number of employees, their wages, their benefits, as well as information about the number of contractors and subcontractors and what the industrial operation pays them. It would necessarily require a determination of the length of time likely to be involved between the issuance of the injunction and its possibly being found to be wrongfully issued. In other words, determining the bond amount would require a trial within a trial.

The determination of the amount of the bond would be difficult enough in ongoing operations, but would be virtually impossible in situations in which permits are allegedly wrongfully issued but the operations have not yet begun. The bond amount in this situation would necessarily be based on speculation. Do people not yet working suddenly get paid?

Presumably the wages of employees and payments to contractors would be intended ultimately to go to the employees and contractors, who would not be parties to the lawsuit. Ordinarily, of course,damages go only to parties. Will there be a mechanism to ensure that employees and contractors are paid by the defendant? Would the court need to oversee this aspect of the case?

III. **How large a bond would be required and would it prohibit virtually everyone from filing a lawsuit?**

It takes only a little thought to realize that wages, benefits, payments to contractors, etc. can add up to huge amounts of money. The bond could run into millions of dollars. And the judge would be required to impose such a bond: the plaintiff "**shall** give security." Ordinary citizens such as landowners, fishermen, farmers, native groups, as well as most organizations and unions would not be able to post such a large bond. Meritorious claims will be abandoned.

IV, **Would the act be constitutional?**

The act would present a serious issue as to whether it impermissibly restricts the right to petition the government, guaranteed by both the Alaska and the U.S. Constitutions. (The Alaska Constitution provides that the "right of the people. . . to petition the government shall never be abridged." Article I, Section 6. The First Amendment to the U.S. Constitution provides for the right to "petition the Government for a redress of grievances.")

This bill may violate the Equal Protection Clause. It imposes a burden on litigants seeking relief against "a construction, energy, or timber activity and oil, gas, and mineral exploration, development, and production." (Presumably, the bill means to refer to corporations or companies carrying out those activities.) Litigants seeking injunctions against companies in other types of activities, e.g., bill collection, retail sales, manufacturing, are not subject to such onerous bonding requirements. Under the Equal Protection Clause, the government may differentiate between classes of people only if there is a rational basis for doing so. *Kadrmas* v. *Dickinson Public Schools*, 487 U.S. 450, 462 (1988). So what can the rational relationship be in this instance? Sponsors of the legislation say it is meant to prevent frivolous litigation. However, as explained above, the bill would not do that. There can be no rational basis for imposing more onerous requirements on ordinary citizens seeking to prevent harm from mineral production than on those seeking to prevent harm from, say, the sales of harmful products.

V. Would the act have unintended consequences?

Does this bill threaten to undo the delegation to Alaska of the U.S. Environmental Protection Agency's pollution prevention programs? The EPA can delegate to the states only if access to the courts is not restricted by the states. 40 C.F.R. section 123.60 (setting out judicial review requirements for delegated State programs); 40 C.F.R. section 123.63 (criteria for withdrawing State programs when the programs no longer comply with regulatory requirements).

Would this bill also affect the State's ability to administer the Surface Mining Control and Reclamation Act, Chapter 27, Alaska Statutes. In order for the state to regulate surface mining, Alaska's SMCRA had to be approved by the U.S. Interior Department and it had to be consistent with the federal statute. Any amendment to the state regulatory program cannot take effect until the Secretary of the Interior approves of it in notice and comment rulemaking. The federal act at 30 U.S.C. section 1264 provides for temporary relief from approval decisions but does not authorize bonds, as does HB 168. In provisions for citizen suits under 30 U.S.C. section 1270, federal law states that the "court **may** [not "shall," as in HB 168] require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure." emphasis added. FRCP 65 is much less onerous than HB 168. Would this act put Alaska's surface mining regulatory program in jeopardy?

VI. What legitimate purpose, not already provided for in the Alaska Rules of Civil Procedure, would this bill serve?

Alaska Rule of Civil Procedure 11 provides for penalties for attorneys or parties who file frivolous lawsuits: "The signature of an attorney or party constitutes a certificate by the signer that the signer has read the pleading. . . that to the best of the signer's knowledge, information, and belief formed after reasonable inquiry it is well grounded in fact and is warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law, and that it is not interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless expense in the cost of litigation."

Alaska Rule of Civil Procedure 65(c) already provides for bonds: "No restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such cost and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained."

Alaska Rule of Civil Procedure 82 makes Alaska one of the only--if not the only--state in the union with a requirement that a losing party pay the opponents legal fees: "Except as otherwise provided by law or agreed to by the parties, the prevailing party in a civil case shall be awarded attorney's fees calculated under this rule."

It is hard to see any purpose HB 168 serves, except to prevent citizens from petitioning the courts to require certain industrial operations to behave responsibly.

Senate Labor and Commerce Committee
March 13, 2012
Testimony of Carl Portman, Deputy Director,
Resource Development Council for Alaska
HB168, Injunctive Security for Industrial Operations

Chairman Egan and members of the committee, thank you for the opportunity to testify this afternoon on HB168, Injunctive Security for Industrial Operations. RDC appreciates the scheduling of this bill and we recognize the many other issues demanding the committee's time.

One of RDC's top legislative priorities is to support efforts to bring more accountability to the appeals and litigation process for community and resource development projects. HB 168 makes progress in this regard by ensuring opponents to projects have some "skin in the game."

Under current law, plaintiffs have little incentive not to file lawsuits and appeals and seek injunctions to stop development projects. Seeking injunctions costs plaintiffs very little while the project sponsors endure the high costs of uncertainty and delay. The discovery phase in these types of cases can cost hundreds of thousands of dollars to the State and project proponents. Even when projects are not enjoined, the uncertainty of litigation can effectively stop progress on projects.

It is not just the project sponsor who is adversely affected by these injunctions. The employees of project sponsors, contractors, and their employees often are burdened with the direct and immediate impacts of a stay on a permit, which causes construction and development to shut down. Often those hurt the most are workers and their families, because when projects are enjoined, workers are often laid off. Under existing law, judges have not required opponents of developing Alaska's resources to post bonds or other security to cover the economic harm to the project and to the workforce caused by parties seeking injunctions.

HB 168 does not limit the ability of citizens to sue. What it does do is require a bond in those cases where an injunction is requested before the case is adjudicated.

HB168 strikes an appropriate balance by removing incentives for filing ideologically-based challenges designed simply to delay projects while still preserving the right to bring meritorious challenges.

Examples of ideologically-based challenges abound throughout Alaska. The timber industry in Southeast Alaska would be in better shape today if a bond was required before timber sales are enjoined. That industry has been decimated by endless appeals and litigation over federal timber sales. Recent headlines included yet more legal challenges that may further delay exploratory drilling in the Alaska OCS, drilling that has yet to occur on leases sold in 2008. Litigation in the arctic OCS is delaying the State's goal to increase throughput in TAPS through new OCS development. While these cases are in federal jurisdiction, litigation in State court is likely to increase with the primacy assumed over the water program.

The ability of project proponents to weather the storm of an unfounded stay of activities varies based on project economics and the strength of the balance sheets of those developing the projects. A worker who loses employment because of a court ordered stay might not have the lasting power to wait out what are often lengthy legal proceedings. It is fitting that this bill was referred to this committee, as both labor and commerce are directly impacted. This bill can provide some accountability to mitigate disruption of commerce while protecting the interests of workers engaged in projects that may be subject to challenges.

RDC encourages this committee to pass this bill. Thank you again for hearing this bill and allowing time for our testimony.

Alaska Conservation Alliance

"A Strong Economy and Healthy Environment Go Hand in Hand"

March 12, 2012

Senator Dennis Egan
State Capitol, Rm. 510
Juneau, AK 99801-1182

Dear Sen. Egan,

The Conservation Alliance opposes HB 168, which would require Alaskans to post a bond or security when seeking a stay or injunction against a government-issued permit affecting an industrial operation. The Alaska Conservation Alliance represents over 30 conservation groups across the state with a combined membership of over 38,000 Alaskans.

HB 168 puts corporate and foreign interests above Alaskans and their communities.

To begin, this legislation is not aimed at frivolous lawsuits. Already, a frivolous lawsuit will not receive a stay or preliminary injunction, because a court can't issue those remedies unless it first determines that the plaintiff is likely to win and that "irreparable harm" would result without the stay or injunction. Instead, this legislation is targeted at lawsuits with merit, and this legislation imposes its burden at the expense of ordinary Alaskans and their communities. Under HB 168, the Alaskan seeking an injunction or stay will be required to post a bond that is typically unaffordable to all but the most wealthy corporations and individuals. In sum, the bill penalizes all but the wealthy and deters meritorious claims before they are adjudicated at all.

Further, when a case against a permit is brought forward by an Alaskan, it is questioning the permitting process used by the issuing governmental agency or illegal practices by industry. Thus, an injunction or stay will only be issued when government hasn't done its job properly, or when a corporation is violating the law or the terms of its permit, as determined by judicial review. Requiring a citizen to pay for a governmental error or corporate crime puts a chilling effect on a long tradition of protecting American whistleblowers in our democracy.

In fact, this legislation is so broad that it may even prevent the State itself from enforcing violations of law. It applies to any "party" seeking temporary injunctive relief, which sometimes includes the State when attempting to enforce violations of law occurring under an industrial permit. In those cases, the State will be subject to the bill's bond requirements, a cost the enforcement agencies have no budget to incur.

810 N Street, Suite 203 | Anchorage, AK 99501 | 907-258-6171 | F: 907-258-6177
www.akvoice.org | www.twitter.com/ACAAlliance
www.facebook.com/AlaskaConservationAlliance

HB 168 would block Alaskans from protecting their communities and way of life by preventing them from challenging government-issued permits that have resulted in legally redressible injuries. It would force Alaskans challenging a permit to post a bond equal to potential damages suffered by an industrial operation. This remedy protects wealthy corporations – many of which merely do business in Alaska and/or are from foreign countries – over resident Alaskans who live, work, and raise their families in this great state. The bond will in many cases exceed $1 million, which effectively prevents almost any Alaskan from filing a suit to challenge what may be a fast-tracked, sloppy agency decision.

HB 168 violates the Alaska Constitution.

Beyond being bad policy, the bill is also likely unconstitutional for two reasons. First, it violates the Equal Protection clause by targeting those litigants who challenge permits for industrial operations, and protecting only industrial operations. This discriminates unconstitutionally against local landowners, community groups, native organizations, commercial and sport fishers and hunters, and other Alaskans who seek to ensure that state agencies are doing their jobs.

Second, in practice it would often deny access to courts, in violation of Due Process rights, for Alaskans who do not have the financial resources to post the required bond but have an otherwise valid claim. It is not hard to imagine a landowner or a community that does not have the millions to post the bond this bill would require. That person or community would be prohibited from protecting the land it has owned for decades yet is now threatened by a major industrial operation.

HB 168 is poorly drafted and would be extraordinarily difficult for a court to apply.

The bill contains several provisions that are ambiguous or make no sense and would be challenging for a court to enforce. For example, the bill purports to require a bond for an order "vacating" a permit. However, a court will vacate a permit only at the conclusion of a case, after finding that the issuing agency actually violated the law. That is not a situation where bonds come into play. Bonds are instead required only for temporary injunctions or stays, in case the person does not ultimately prevail. It would make no sense and serve no purpose to require a bond of the party who has won the case. If that is the intent of the bill, then it is merely a punitive and unconstitutional attempt to prevent successful litigants from obtaining the relief to which they are entitled.

Similarly, the bill purports to require the bond to cover damages wrongfully suffered by "an industrial operation." An industrial operation, in turn, is defined in the bill as various activities. But damages are suffered only by litigants, such as persons, corporations, or organizations. There is no precedent for measuring or awarding damages to an activity rather than a party, and the very concept is bizarre and seemingly impossible to apply.

Further, the legislation is ambiguous as to the point at which a bond would be required. Departing from current court rules, the bill requires a bond from a party "seeking" a stay, preliminary injunction, or vacatur. If that were read to require a bond whenever a case was filed against an industrial permit, it would effectively require an exorbitant fee at the time of filing—an unconstitutional requirement and drastic change to current court procedures. Further, if the bill were interpreted to require bonds whenever a stay or preliminary injunction is sought, and before the court orders one, its main impact would be to deter likely meritorious claims from ever being raised—again a clear violation of constitutional rights.

For the reasons stated above, the Alaska Conservation Alliance opposes HB 168. The only purpose the bill would serve is to keep regular Alaskans out of court and to protect sloppy permitting decisions that could greatly impact Alaska's future.

Sincerely,

Andy Moderow
Executive Director
Alaska Conservation Alliance

Re: HB 168, Injunctive Security: Industrial Operations

Dear Senator Egan:

Thank you for scheduling the first reading of HB168, Injunctive Security for Industrial Operations, last week. RDC appreciates the scheduling of this bill and we recognize the many other issues demanding the committee's time. Because your plans for public testimony on the bill were frustrated by a full agenda, I am providing the following written support for this bill at this time.

RDC is a statewide, non-profit, membership-funded organization founded in 1975. The RDC membership is comprised of individuals and companies from Alaska's oil and gas, mining, timber, tourism, and fisheries industries, as well as Alaska Native corporations, local communities, organized labor, and industry support firms. RDC's purpose is to link these diverse interests together to encourage a strong, diversified private sector in Alaska and expand the state's economic base through the responsible development of our natural resources.

One of RDC's top legislative priorities is to support efforts to bring more accountability to the appeals and litigation process for community and resource development projects. HB 168 makes progress in this regard by ensuring opponents to projects have some "skin in the game."

Under current law plaintiffs have little incentive not to file lawsuits and appeals and seek injunctions to stop development projects. Seeking injunctions costs plaintiffs very little while the project sponsors endure the high costs of uncertainty and delay. The discovery phase in these types of cases can cost hundreds of thousands of dollars to the State and project proponents. Even when projects are not enjoined, the uncertainty of litigation can effectively stop progress on projects.

It is not just the project sponsor who is adversely affected by these injunctions. The employees of project sponsors, contractors, and their employees often are burdened

121 West Fireweed Lane, Suite 250, Anchorage, Alaska 99503-2035
Phone: 907-276-0700 Fax: 907-276-3887 Email: resources@akrdc.org Website: akrdc.org

with the direct and immediate impacts of a stay on a permit, which causes construction and development to shut down. Often those hurt the most are workers and their families, because when projects are enjoined, workers are often laid off. Under existing law, judges have not required opponents of developing Alaska's resources to post bonds or other security to cover the economic harm to the project and to the workforce caused by parties seeking injunctions.

HB 168 does not limit the ability of citizens to sue. What it does do is require a bond in those cases where an injunction is requested before the case is adjudicated. HB168 strikes an appropriate balance by removing incentives for filing ideologically based challenges designed simply to delay projects while still preserving the right to bring meritorious challenges.

Examples of ideologically based challenges abound throughout Alaska. Last week I visited with the Alaska Forest Association and it caused me to reflect on whether the timber industry in Southeast Alaska would be in better shape today if a bond had been required before the scores of timber sales had been appealed resulting in stays and injunctions. That industry has been decimated by endless appeals and litigation over federal timber sales. The headlines just last week included yet more legal challenges that may further delay exploratory drilling in the Alaska OCS, drilling that has yet to occur on leases sold in 2008. Litigation in the arctic OCS is delaying the State's goal to increase throughput in TAPS through new OCS development. While many of these cases are in federal jurisdiction, litigation in State court is also common and is likely to increase with the primacy assumed over water program.

The ability of project proponents to weather the storm of an unfounded stay of activities varies based on project economics and the strength of the balance sheets of those developing the projects. A worker who loses employment because of a court ordered stay might not have the lasting power to wait out what are often lengthy legal proceedings. It is fitting that this bill was referred to the Labor and Commerce committee, as both labor and commerce will benefit from its passage. HB168 can provide some accountability to mitigate disruption of commerce while protecting the interests of workers engaged in projects that may be subject to ideologically based challenges.

RDC appreciates the Labor and Commerce Committee hearing this bill and encourages the committee to pass this bill from committee as soon as possible.

Regards,

Rick Rogers, Executive Director
Resource Development Council for Alaska

February 1, 2012

The Honorable Dennis Egan
Alaska State Senate
Chairman, Senate Labor & Commerce Committee
Capitol Room 510
Juneau, AK 99801

Re: Litigation Reform and House Bill 168

Dear Senator Egan,

The Alaska State Chamber of Commerce (Alaska Chamber) is an organization dedicated to improving the business climate in Alaska. The Alaska Chamber represents hundreds of statewide businesses from Ketchikan to Barrow that share a common goal: to make Alaska a viable and competitive place to do business. Today, I am writing in support of House Bill (HB) 168 – Injunction Security.

As you may have learned last week while meeting with Alaska Chamber Fly-In attendees, litigation reform as it relates to resource development in Alaska is one of Alaska Chamber's top three priorities for the 2012 Legislative Session. Currently, there is virtually no risk to discourage opponents of natural resource projects to file lawsuits and appeals against projects. Under existing state law there is no requirement for those who file the lawsuits to post bonds which adequately cover the economic harm to the project proponent or workers, frequently resulting in a halt on projects altogether. Often the discovery phase in litigation can cost the State of Alaska and project proponents hundreds of thousands of dollars in attorney's fees.

HB 168 seeks to improve a penalty on frivolous lawsuits. By requiring a bond to be posted in the event of an injunction, the cost to the party bringing the suit forward is increased. This bill seeks to level the legal playing field without infringing on any parties right to bring a legitimate issue to court. We are hopeful that HB 168 will enjoy the bipartisan support it received in 2011 in the House of Representatives.

These are just a few reasons why I respectfully urge you, on behalf of Alaska Chamber members, to schedule HB 168 for a hearing in the Senate Labor and Commerce Committee as soon as possible. Thank you for your prompt consideration of this request.

Sincerely,

Rachael A. Petro
President/CEO

HB 168: A Hole So Big You Could Drive A Mine Through It

The Alaska State House of Representatives recently passed H.B. 168. If passed by the Senate and signed by Governor Parnell, this bill would undercut the ability of Alaskans to protect their economic and traditional ways of life, their communities, and their air and water quality. It does this by seeking to require judges to force people challenging government permits to post bonds equal to the potential economic loss of the permit holder as well as others.[i]

In many cases such bonds would be so expensive as to render judicial review meaningless. Just like the Humpty Dumpty of children's lore, once the damage is done, all the king's horses and all the king's men can't put it back together again – just ask Prince William Sound residents and fishermen. That the courts are not directly precluded from reviewing the legality of the permit matters not at all – ask those same people from Prince William Sound what good a court judgment did for them.

The truth is that independent judicial review of agency decisions is essential to ensuring that the development of Alaska's resources is done in a responsible manner, and we Alaskans should not be scared into thinking otherwise. The check and balance on bureaucratic decisions provided by the courts ensures that those decisions are rational and supported by law. The judiciary already has the ability to impose bonds where appropriate,[ii] and to prevent, and sanction those who file, frivolous lawsuits.[iii] And to require a person to post a bond before he or she can petition the government for a redress of grievances is unconstitutional.[iv] Further, this bill threatens to undo the delegation to Alaska of the Environmental Protection Agency's pollution prevention programs, as EPA can only support such delegation if access to the courts is not restricted.[v]

The Bottom Line:

H.B. 168 creates a hole so big you could drive a mine through it.

April 10, 2011

[i] H.B. 168 provides, in relevant part:

> A party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation shall give security in an amount the court considers proper for costs that may be incurred and damages that may be suffered by an industrial operation that has been wrongfully enjoined or restrained, including an amount for the payment of wages and benefits for employees and payment to contractors and subcontractors of the industrial operation.

[ii] *See e.g.*, Alaska Rule of Civil Procedure 65(c) ("No restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained.")

[iii] Proponents of H.B. 168 claim that it is needed to "impose a penalty" on frivolous lawsuits. *See* http://www.housemajority.org/spon.php?id=27hb168-114 (statement of bill sponsor Representative Eric Feige). Yet, Alaska Rule of Civil Procedure 11 already provides authority to the courts to prevent and sanction frivolous lawsuits. Among other things, it provides that

> The signature of an attorney or party constitutes a certificate by the signer that the signer has read the pleading, motion, or other paper; that to the best of the signer's knowledge, information, and belief formed after reasonable inquiry it is well grounded in fact and is warranted by existing law or a good faith argument for the extension, modification, or reversal of existing law, and that it is not interposed for any improper purpose, such as to harass or to cause unnecessary delay or needless expense in the cost of litigation..

Proponents of H.B. 168 claim that it is needed to "impose a penalty" on frivolous lawsuits. *See* http://www.housemajority.org/spon.php?id=27hb168-114 (statement of bill sponsor Representative Eric Feige).

[iv] The Alaska Constitution provides that "[t]he right of the people ... to petition the government shall never be abridged." Alaska Constitution, Article I, Section 6. The First Amendment to the United States Constitution provides, "*Congress shall make no law ... abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.*"

Similar bills in other states have been vetoed (by Republican Governors) as unconstitutional. *See* http://www.standard.net/topics/utah-legislature/2011/02/28/note-legislature-first-amendment-covers-tree-huggers-too

[v] *See* 40 C.F.R. § 123.60 (judicial review requirements for delegated State programs); 40 C.F.R. § 123.63 (criteria for withdrawing State programs when the programs no longer comply with regulatory requirements); *see also Akaik Native Community v. United States Environmental Protection Agency*, 625 F.3d 1162, 1168 (9th Cir. 2010) (judicial review must provide meaningful opportunity for public participation in the permitting process).

March 11, 2012

Dear Senators and Representatives,

I am writing to you to appeal to your sense of moral decency to help us maintain our rights as private citizens.

Mr. Feige's proposed HB 168 creates an undue burden on access to the courts, which is guaranteed by the First Amendment of the Constitution -- "*Congress shall make no law...abridging the freedom of speech...and to petition the Government for a redress of grievances*" -- and the Alaska Constitution: "*right of the people.... to petition the government shall not be abridged.*" Industrial activities as discussed in the proposed bill have the potential to do personal, physical, emotional and financial harm. Nationally, there are hundreds, if not thousands, of documented instances where permits, rubber-stamped through the system, have been inadequate to protect citizens, and where industrial corporations have neglected to follow rules and regulations, resulting in property damage, injuries and deaths. This bill would deny Alaskans who do not have unlimited financial resources, but do have a valid grievance, from protecting their property or themselves from harm.

Clearly, the intent of the bill is to protect corporations' profits and prevent Alaskans from having recourse against fast-tracked, careless or illegal permitting by government agencies. A recent example of rubber-stamping a permit was the Wishbone Hill Air Quality Permit. This permit was issued by the Alaska Department of Environmental Conservation (DEC) despite numerous false assumptions and fraudulent information provided by the mining corporation in the permit application. DEC clearly without the personnel to double check all the details assumed the application was accurate. Fortunately an astute group of citizens with independent experts was able to catch these errors and the permit application was withdrawn. How many times is a permit issued despite glaring omissions and false information because there is no one outside the permittng agency reviewing it? How possibly could a group of land owners come up with millions of dollars to post the bond that this bill would require just to try to

protect their families and their property from potentially flawed industrial plans and permits? Obviously, they can't. As such, this bill violates their individual rights.

Remember, it could very well be you, a family member, or a friend who will have no recourse against poor-quality permitting or a morally corrupt corporation that fails to follow regulations resulting in personal injury, destroyed property, damaged or uninhabitable homes.

The right thing to do is reject this bill. There are already statutes that provide for compensation for a business being wrongfully restrained, as well as sanctions for frivolous lawsuits. Injunctions and stays are only issued after a judge determines that the stringent requirements for such relief have been met and that the lawsuit has merit. So, this new law is unnecessary, and all it would do is circumvent the rights of individual Alaskans and small communities.

"...the moral test of government is how that government treats those who are in the dawn of life, the children; those who are in the twilight of life, the elderly; those who are in the shadows of life; the sick, the needy and the handicapped." ~ Last Speech of Hubert H. Humphrey

Alaska has made one very large step in the right direction. Recognizing that industrial activities can pose serious health hazards, the international community and many global financial lending institutions now view Health Impact Assessments (HIA) as an essential component, on par with the economic impact study, in assessing a project's viability. The state of Alaska has recently developed an HIA program and commissioned Dr. Paul Anderson to perform an HIA for the Wishbone Hill Coal Mine.

A critical question to ask now is how this information will be used. It appears that Alaska legislation needs to catch up with the global economy. We need statutes that not only mandate HIA's for large industrial (mining, power generation, factories, etc) endeavors, the statutes need to ensure they are prepared by independent experts and become part of the permitting process, that recognized hazards are prevented by correcting the permit before the start of operations, and that they are fully enforced with adequate penalties and fines to ensure compliance.

Regarding the Wishbone Hill Coal Mine HIA, the Alaska Department of Natural Resources (DNR) is "editing" the draft. This is like allowing the tobacco companies to rewrite the medical research that links smoking to cancer. That sounds ridiculous, doesn't it? So why is DNR allowed to censor the contents of the HIA, and exclude what the agency disagrees with? The HIA should be an independent study and the entire product released to the public for review, not just what the mining corporation and DNR are willing to allow the public to see.

Currently many environmental protection regulations are willfully violated because it is less costly for the corporation to pay the fines than follow the law. When it comes to people's health, that should not be an acceptable option. As the saying goes, an ounce of prevention is worth a pound of cure. It is much more costly in the long run, never mind the priceless value of human life, to try to clean up a toxic mess and pay for cancer treatment, than it is to prevent it in the first place.

I respectfully ask to you reject HB 168 on the grounds it is immoral and unconstitutional. I also hope you will see the necessity of updating Alaska's industrial permitting regulations, including the need for HIA's to play a strong role in industrial project designs and permitting.

I would be happy to discuss these topics with you further. I can be reached at the address, phone numbers, or email provided.

Sincerely yours,

Michele Prevost, MD

SIERRA CLUB
FOUNDED 1892

TRUSTEES FOR ALASKA
SUSTAIN | PROTECT | REPRESENT

March 26, 2012

Dear Sen. French:

The Sierra Club and Trustees for Alaska oppose HB 168, which would require an Alaskan litigant to post a bond or security when a court issues a stay or injunction against a government-issued permit affecting an industrial operation. The Sierra Club is the nation's largest grassroots environmental organization working to explore, enjoy and protect the planet with roughly 1,200 members in Alaska. Trustees for Alaska was established in 1974 as an Alaska non-profit public interest law firm working to protect and sustain Alaska's natural environment on behalf of Native villages, community groups, and local and national conservation groups by providing legal services, policy advice, and strategic counsel free of charge. Trustees for Alaska has been in the forefront of issues large and small which continue to shape Alaska's environmental future – oil and gas development, mining, toxic wastes, air and water pollution, public land use, and protection of marine resources.

HB 168 Is Likely Unconstitutional.

First and foremost, our members and clients are concerned that HB 168 will take away their basic constitutional rights. The bill is likely unconstitutional for three reasons. First, it violates the Equal Protection clause by targeting litigants who challenge permits for industrial operations, and protecting only industrial operations. This discriminates unconstitutionally against local landowners, community groups, native organizations, commercial and sport fishers and hunters, and other Alaskans who seek to ensure that state agencies are doing their jobs.

Second, in practice it would often deny access to courts, in violation of Due Process rights, for Alaskans who do not have the financial resources to post the required bond but have an otherwise valid claim. This bond would have to cover potential damages including employees' lost wages, salaries, and contractors. The size of these bonds could easily and quickly add up to millions of dollars. Most Alaskans do not have the financial resources to post the required bond, but have an otherwise valid claim. Those people would be prohibited from protecting the land they have owned for decades yet is threatened by a major industrial operation. Even large non-profit organizations like the Sierra Club, do not have millions to post the bond this bill would require, despite frequently having legitimate issues with government-issued permits.

Third, HB 168 is a change to court rules, which violates the Alaska Constitution unless the bill is approved by two-thirds of each house and specifically states that it is a change to court rules. Currently, Civil Rule 65(c) and Appellate Rules 204(d) and 603(a)(2) govern the bonds that would be affected by HB 168. Indeed, the bill closely parallels the language of Civil Rule 65(c).

HB 168 is Poorly Drafted and Would Be Extraordinarily Difficult for a Court To Apply.

The bill contains several provisions that are ambiguous or make no sense and would be challenging for a court to enforce. For example, the bill purports to require a bond for an order "vacating" a permit. However, a court only vacates a permit at the conclusion of a case, after finding that the issuing agency actually violated the law.[1] That is not a situation where bonds come into play. Bonds are generally required only for temporary injunctions or stays, in case the person does not ultimately prevail. It would make no sense and serve no purpose to require a bond of the party who has won the case. If that is the intent of the bill, then it is a punitive and unconstitutional attempt to prevent successful litigants from obtaining the relief to which they are entitled.

Similarly, the bill purports to require the bond to cover damages wrongfully suffered by "an industrial operation." An industrial operation, in turn, is defined in the bill as various activities. But damages are suffered only by litigants, such as persons, corporations, or organizations. There is no precedent for measuring or awarding damages to an activity rather than a party, and the very concept is bizarre and likely impossible to apply.

Further, the legislation is ambiguous regarding the point at which a bond would be required. Departing from current court rules, the bill requires a bond from a party "seeking" a stay, preliminary injunction, or vacatur. If that were read to require a bond whenever a case was filed against an industrial permit, it would effectively require an exorbitant fee at the time of filing – an unconstitutional requirement and drastic change to current court procedures. Further, if the bill were interpreted to require bonds whenever a stay or preliminary injunction is sought, and before the court orders one, its main impact would be to deter likely meritorious claims from ever being raised—again a clear violation of constitutional rights.

<u>HB 168 Jeopardizes Delegation of Various Federal Enforcement Programs and Funding for Those Programs.</u>

HB 168 will likely have unintended legal and financial consequences for Alaska. Alaska has various federally delegated legal programs, including the Surface Mining Control and Reclamation Act, the National Pollutant Discharge Elimination System program in the Clean Water Act, Clean Air Act permitting programs, and the Resource Conservation and Recovery Act program. The Department of Natural Resources and Department of Environmental Conservation administer these federal programs, which require compliance with federal regulations. Those regulations include providing the same opportunity for judicial review as would be available under the federal program.

The bond requirement in HB 168 is not required under federal law and is a deterrent to citizens challenging unlawful permits. It is also a deterrent to seeking preliminary injunctive relief, no matter how compelling the case or egregious the legal violation. As such, it is very possible that the federal agencies administering these statutes, such as the Department of Interior and Environmental Protection Agency, could decide to de-delegate these programs from the State,

---

[1] In that case, the challenger has won the case, which by definition, is not a frivolous lawsuit.

which would remove Alaska's control over permitting and result in agency programs being defunded.

HB 168 Likely Stops Meritorious Lawsuits.

This legislation is not aimed at stopping frivolous lawsuits. A frivolous lawsuit would not receive a stay or preliminary injunction, because a court can't issue those remedies without first determining that the plaintiff is likely to prevail and that "irreparable harm" would result without the stay or injunction. Instead, this legislation is targeted at lawsuits with merit, but imposes its burden at the expense of ordinary Alaskans and their communities. Under HB 168, the Alaskan seeking an injunction or stay will be required to post a bond that is typically unaffordable to all but the most wealthy corporations and individuals. Stated another way, the bill penalizes all but the extraordinarily wealthy and deters meritorious claims before they are adjudicated at all.

Further, when a case against a permit is brought by an Alaskan, it questions the permitting process used by the issuing governmental agency or illegal practices by industry. As a result, an injunction or stay would only be issued when government hasn't followed procedure, applied the proper standards, or when a corporate permittee is violating the law or the terms of its permit, as determined by judicial review. Requiring a citizen to pay for a governmental error or corporate malfeasance creates a chilling effect on a long tradition of protecting whistleblowers in our democracy.

In fact, this legislation is so broad that it may even prevent the State itself from enforcing violations of law. It applies to any "party" seeking temporary injunctive relief, which sometimes includes the State when attempting to enforce violations of law occurring under an industrial permit. In those cases, the State will be subject to the bill's bond requirements, a cost the enforcement agencies have no budget to incur.

HB 168 would block Alaskans from protecting their communities and way of life by preventing them from challenging government-issued permits that have resulted in legally redressible injuries. It would force Alaskans challenging a permit to post a bond equal to potential damages suffered by an industrial operation. This remedy protects wealthy corporations – many of which merely do business in Alaska and/or are from foreign countries – over resident Alaskans who live, work, and raise their families in this great state. The bond will in many cases exceed $1 million, which effectively prevents almost any Alaskan from filing a suit to challenge what may be a fast-tracked, sloppy agency decision. Obviously this is the intent of the legislation—to keep Alaskans from exercising their constitutional rights.

Conclusion

HB 168 is unconstitutional, bad policy making. The only purpose it serves is to keep Alaskans who care about agency decision-making out of court while protecting sloppy permitting decisions that could impact Alaska's economic future. It also protects out-of-state and foreign corporations over Alaskans who live, work, recreate, and subsist in this great state. For these reasons the Sierra Club and Trustees for Alaska oppose HB 168.

Sincerely,

Emily Fehrenbacher, Associate Regional Representative

The Honorable Hollis French
Alaska State Senate
Chairman, Senate Judiciary Committee
Capitol Room 417
Juneau, AK 99801

Re: CS House Bill 168 (JUD)

Dear Senator French,

The Alaska State Chamber of Commerce (Alaska Chamber) is an organization dedicated to improving the business climate in Alaska. The Alaska Chamber represents hundreds of statewide businesses from Ketchikan to Barrow that share a common goal: to make Alaska a viable and competitive place to do business. Today, I am writing in support of Committee Substitute House Bill (CS HB) 168 (JUD) – Injunction Security.

As you may have learned early this session while meeting with Alaska Chamber Fly-In attendees, litigation reform as it relates to resource development in Alaska is one of Alaska Chamber's top three priorities for the 2012 Legislative Session. Currently, the cost to challenge a legally permitted project in Alaska is virtually nothing. Instead, the risk is borne by defendants. Often the discovery phase in litigation can cost the State of Alaska and project proponents hundreds of thousands of dollars in attorney's fees. Such delays put Alaskans out of work creating personal hardship and potentially increasing State service costs.

CS HB 168(JUD) seeks to level the legal playing field without infringing on any parties right to bring a legitimate issue to court by requesting the court consider wages and benefits of workers as well as payments to contractors. We are hopeful that CS HB 168(JUD) will enjoy the bipartisan support it received in 2011 in the House of Representatives.

These are just a few reasons why I respectfully urge you, on behalf of Alaska Chamber members, to schedule CS HB 168(JUD) for a hearing in the Senate Judiciary Committee as soon as possible. Thank you for your prompt consideration of this request.

Sincerely,

Rachael A. Petro
President/CEO

CHICKALOON VILLAGE TRADITIONAL COUNCIL

Chickaloon Native Village
(Nay'dini'aa Na')

Gary Harrison, Traditional Chief

Doug Wade, Chairman/Elder

Ricky Harrison, Vice-Chairman

Penny Westing, Secretary

Jesse Lanman, Elder Member

Larry Wade Elder Member

Burt Shaginoff, Elder Member

Albert Harrison, Elder Member

Jennifer D. Harrison, Executive Director

RESOLUTION to Oppose Irresponsible Coal Development

RESOLUTION # 110817-02

WHEREAS, Chickaloon Village Traditional Council is an Indigenous Government with full power and authority to act for Chickaloon Native Village, and/or Chickaloon Village (Nay'dini'aa Na'); and

WHEREAS, Chickaloon Village is part of the Athabascan Nation and is a distinct, independent political community, and as such is qualified and exercises powers of self-government by reason of its original Tribal sovereignty as passed down from its ancestors since time immemorial; and nothing in this resolution shall be in conflict therewith; and

WHEREAS, Chickaloon Native Village is a Federally-recognized Tribal Government in Alaska (Federal Register, Volume 58, Number 202, November 24, 1982), with full power and authority to negotiate with the Federal Government; and

WHEREAS, Chickaloon Village Traditional Council did not cede, terminate, extinguish, or relinquish their original, possessory and aboriginal rights; and

WHEREAS, Chickaloon Village Traditional Council is the governing body of Chickaloon Village as recognized by the Chickaloon Tribal citizens; and has a responsibility to provide a government for the good health and welfare of its Tribal citizens, address any needs in its community; and

WHEREAS, Chickaloon Village Traditional Council's strategic plan identifies the following as a long-term goal: Protect, enhance and restore our ancestral lands, water and air and ensure respectful, healthy development; and

NOW THEREFORE BE IT RESOLVED, that Chickaloon Village Traditional Council opposes all irresponsible coal mining in our Cultural and Traditional areas which we have relied upon since the beginning of time and continues to be inextricably linked to our spiritual and cultural way of life; and

THEREFORE BE IT FURTHER RESOLVED, that Chickaloon Village Traditional Council authorizes and delegates authority to the Traditional Council Chairman, Vice-Chairman, Traditional Chief, or the Executive Director to act on behalf of the Chickaloon Village Traditional Council for this project/program.

It is hereby certified that this resolution was duly considered and approved this 17th day of August, 2011, X unanimous; or with a majority vote of _____ affirmative; _____ negative; _____ abstention, and/or _____ absent votes.

Douglas Wade,
Chairman

Penny Westing,
Secretary

Gary Harrison,
Traditional Chief

A. Court discretion on amount of bond

According to Rep. Feige, the sponsor of H.B. 168:

"The bill does put a fair amount of latitude in the judge's hands. Court rule 65(c) is obviously the precedent, I mean there's an existing court rule that allows for bonds and security to be posted. This bill is simply an additional emphasis on the part of the Legislature to give the judge certain things that he or she shall consider when it comes to that security or bond, and the rest is left up to the judge -- the amount is all on the judge's part, we don't set any specific amount. We're not trying to tell the judge what to do, we're just asking that the judge considers certain things related to these kinds of industrial operations." (Senate Labor & Commerce Committee Hearing, March 20, 2012)

"The bond amounts are not determined by the legislation, they're determined by the judge. . . . There's nothing in HB 168 that specifies an amount, in fact it's very clear that it puts the responsibility for specifying an amount on the presiding judge." (Senate Labor & Commerce Committee Hearing, March 13, 2012)[1]

[1] The bill sponsor has also stated that the intent is not to change the existing Alaska Civil Rule 65(c), which requires the posting of security when the court issues a temporary restraining order or preliminary injunction but leaves the amount of the bond to the court's discretion. According to Rep. Feige: "HB 168, once again, parallels the requirements of Alaska Civil Rule 65(c). As written, 65(c) states 'No restraining order or preliminary injunction shall issue except upon the giving of security by the applicant in such sum as the court deems proper for the payment of such costs and damages as may be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained.' . . . We were very conscious of not trying to change the court rule." (Senate Labor & Commerce Committee Hearing, March 13, 2012) For the reasons discussed in the text, the language and meaning of H.B. 168 do not mirror those of Rule 65(c).

The relevant language in the bill is as follows:

> "A party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation shall give security in an amount the court considers proper for costs that may be incurred and damages that may be suffered by an industrial operation that has been wrongfully enjoined or restrained, including an amount for the payment of wages and benefits for employees and payment to contractors and subcontractors of the industrial operation."

The phrase "in an amount the court considers proper" arguably gives the court the discretion to determine the amount. At the same time, the phrase following the comma "including an amount for the payment of wages . . . " is logically read as modifying the earlier "an amount the court considers proper" and is most readily interpreted as requiring that the "amount considered proper" include an amount for wages and benefits and payment to contractors and subcontractors. Even if the bill is read as giving the judge the discretion to decide the ultimate amount ("an amount the court considers proper"), it seems clear that that amount must include an amount for wages etc. Thus, Rep. Feige's assertion that the bill simply asks the judge to "consider" certain things is untenable.

The bill could be modified in a number of ways to achieve Rep. Feige's intent. For example, the bill could be modified to read as follows:

> "A party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation shall give security in an amount the court considers proper, after considering among other things lost wages and benefits for employees and payment to contractors and subcontractors of the industrial operation, for costs that may be incurred and damages that may be suffered by an industrial operation that has been wrongfully enjoined or restrained."

Or as follows:

> "A party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation shall give security in an amount the court considers proper for costs that may be incurred and damages that may be suffered by an industrial operation that has been wrongfully enjoined or restrained. In determining the proper security amount, the court shall consider, among other things, including an amount for the payment of wages and benefits for employees and payment to contractors and subcontractors of the industrial operation."

B. Vacating a permit

According to Rep. Feige:

> "It is the option of a litigant to sue or not to sue. If they feel they have been wronged they certainly have that right and this bill does not prevent them from bringing a lawsuit to bear. You can or cannot request an injunction as part of that lawsuit. The bill does not keep people from access to the courts. It has been our observation that whenever an injunction is requested it generally falls out of two reasons. One, there is a legitimate concern that somehow the operation continuing would have an adverse effect on the plaintiff. But in a lot of cases the object is not necessarily any kind of wrong that is harming the plaintiff but is simply an objection to the project simply because the project is, and the objective of the injunction is simply to delay the project. This bill at least provides some measure of deterrence to that." (Senate Labor & Commerce Committee Hearing, March 20, 2012)

This testimony indicates that the goal of the bill is not to make it too expensive for people to bring legitimate challenges to industrial operations, but to deter litigants from seeking injunctions simply to delay the project. In addition, as the minutes of a House Judiciary Committee hearing show, Rep. Feige emphasized during committee meetings in 2011 that his intent was to reduce frivolous lawsuits:

> "There should be some kind of risk placed on the plaintiff in order to 'weed out' frivolous lawsuits ... since even when frivolous, they are still lawsuits and still result in costs and damages being incurred and suffered as the result of a stay, with serious implications for the state's economy." (Minutes, House Judiciary Committee Meeting, March 21, 2011)

Unfortunately, the bill as drafted goes well beyond the goals of preventing frivolous lawsuits and deterring injunctions merely to delay projects. The relevant language is as follows:

> "A party seeking a restraining order, preliminary injunction, or order vacating or staying the operation of a permit that affects an industrial operation shall give security . . . ."

There are two problems with this language. First, the phrase "[a] party seeking . . . shall give security" suggests that the security must be posted at the time that a party requests the restraining order or other identified relief, rather than at the time that the court orders the requested relief, as is done under Rule 65(c). If the bill were interpreted this way, the security requirement would be a much more onerous burden than under current Rule 65(c).

The second problem is the phrase "or order vacating . . . the operation of a permit." An order vacating the operation of a permit is not a form of preliminary relief, but a form of permanent relief granted by a court along with a final judgment in the plaintiff's favor. The phrase thus expands the security requirement beyond the preliminary relief addressed by Rule 65(c) -- and, according to Rep. Feige, intended to be addressed by HB 168 -- to the primary form of permanent relief in a successful legal challenge to a permit. Thus, the bill addresses not just preliminary injunctions, but also permanent relief, and not just frivolous lawsuits, but meritorious, successful lawsuits. In other words, the bill requires litigants who bring a meritorious, successful challenge to a wrongly issued permit (or permit violations) to post security covering the lost employment costs flowing from the vacation of a permit for an illegally operating industrial project. Besides being an unconstitutional impairment of the right to petition the government, this aspect of the bill goes far beyond what its sponsor asserts is the goal of the bill. In addition, since a plaintiff would generally include the request for an order vacating the permit in the complaint as part of the request for relief, the bill indicates that a plaintiff must post security at the time of "seeking" this relief -- that is, when the complaint is filed. This result goes well beyond what is allowed under Rule 65(c), poses a severe burden on the right to petition the government, and goes well beyond the goal of the bill as described by the bill's sponsor.

These two problems with HB 168 are easily remedied. First, the phrase "A party seeking..." can be replaced with "A party who obtains..." Second, the phrase "or order vacating" can be deleted.

HB 168 -- governments and departments

Thu 3/29/2012 10:25 AM

From: Daven Hafey

To: dave@akvoice.org, andy@akvoice.org, Jedediah Smith, Lissa Hughes

Hey folks,

Just had an interesting conversation and email exchange regarding indirect implications of HB 168. Please see below language:

http://www.legis.state.ak.us/basis/get_documents.asp?session=27&docid=9674

Highlighted below, from memo linked above, the Alaska Civil Rule specifically exempts state and municipalities from the bonding. I don't see that the bill does. And yet, they've secured zero fiscal notes from all of the resource agencies. If there is a hearing it would be good for us to get questions to Senators to ask of all agencies if they have injunction authority for covered projects (I have found a couple of examples from DNR (oil lease and dam safety) and something from Fish and Game that we can provide to Senators) and if so how they see this bill impacting their ability to protect the public interest. Best, I think, to wait on this until any hearing - if the sponsor hasn't thought of this yet, and none of the agencies have brought it up and indeed this would cause them trouble they will need to get an amendment drafted if they want to move the bill forward. This usually takes another meeting and, when it is something sort of big like tieing State agency hands, can indicate that a bill didn't receive proper scrutiny earlier in the legislative process, which can help support not taking further action.

The new subsection added by HB 168 parallels the requirements of Alaska Civil

Rule 65(c), which requires a court to require a person seeking an injunction to provide

security to protect a person who may be wrongfully restrained or enjoined. Civil

Rule 65(c) reads:

(c) Security. No restraining order or preliminary injunction shall

issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may

be incurred or suffered by any party who is found to have been wrongfully enjoined or restrained. No such security shall be required of the state or a

municipality or of an officer or agency thereof, or unless otherwise ordered by the court, in domestic relations actions or proceedings

. A surety upon a bond or undertaking under this rule submits to the jurisdiction of the court and irrevocably appoints the clerk of the court as the surety's agent upon whom any papers affecting the surety's liability on the bond or undertaking may be served. The surety's liability may be enforced on motion without the necessity of an independent action....

SUBJ: Fiscal Note Update

Updated fiscal notes for the following bill have been printed today. Please give the bill file to the page delivering this message and it will be returned to you after the changes have been made.

Thank you.

RETRIEVE

CS FOR HOUSE BILL NO. 168(JUD)
"An Act requiring the amount of the security given by a party seeking an injunction or order vacating or staying the operation of a permit affecting an industrial operation to include an amount for the payment of wages and benefits for employees and payments to contractors and subcontractors that may be lost if the industrial operation is wrongfully enjoined."

Please schedule HB 168 for a hearing in SJUD.

Take Action

House Bill 168, security injunction for industrial operations, is in the Senate Judiciary Committee, chaired by Sen. Hollis French and has yet to be scheduled for a hearing. This legislation has bipartisan support, having passed the house 33-6. Contact Sen. French and ask him to schedule a hearing on this bill. There are only 13 days left in the legislative session and if this bill is not passed by the Senate, it will die.

Take Action

April 10, 2012

Senator Hollis French
Alaska State Senate
State Capitol Room 417
Juneau AK, 99801

Dear Senator French:

I am writing on behalf of Cook Inletkeeper's 2500+ plus Alaskan members to strongly oppose HB 168.

This misguided legislation is unnecessary because our courts already have the discretion to address frivolous lawsuits. More importantly, this bill infringes on Alaskans' constitutional rights to access the courts, by erecting insurmountable economic hurdles for Alaskans bringing valid claims.

Alaska is already the only state in the nation with "loser pays" rules, and anyone aggrieved enough to file a complaint will make doubly sure their claims are valid. Furthermore, the high bar for successfully obtaining injunctive relief already ensures plaintiffs have strong claims.

Thank you and I hope you'll agree HB 168 is superfluous and should not pass.

Very truly yours,

Bob Shavelson
Inletkeeper

Dear Honorable Members of the Senate:
My name is Jai Crapella. I have lived in Alaska since 2001 and co-own a small business in Gustavus. I am writing in regard to HB 168 – The Industrial Security: Industrial Operation Bill. At first glance, this bill seems unconstitutional. It appears to purposefully limit the access of the courts by creating a security bond mechanism that will be too expensive for every day Alaskans to overcome—like myself, my small business, or others like me. Upon further review of this bill, it becomes more alarming. This bill not only would limit my access to the courts, but it would also limit my community watchdog group, regional and statewide organizations, local governments, and tribal governments' access to the courts. The further I read, the more unconstitutional and unethical this bill appears.

I understand that this bill was likely intended to allow large mine or proposals like the Pebble to move forward without meaningful opposition from concerned residents and organizations. But this bill extends far beyond environmental organizations and the residents of the Bristol Bay Borough. This would affect my ability, or my community's ability to call attention to an operation's permit violation, if we ever were aware of one. In the event of a state-issued permit violation, we would be forced to risk unrealistic amounts of money simply to enter the court and hold an operation accountable for a violation of their permit. How is this fair or ethical to Alaskans? This is regress in democracy, not progress.

I am also aware that other states have attempted to pass similar bills, but were warned by the EPA that they were overstepping their bounds and attempting to sidestep the Right to Due Process. Yet the Alaska Legislature moves forward with this bill. Why?

With all due respect, I ask you to please not move HB 168 from the Senate Judiciary Committee. This bill is bad news for Alaskans, particularly future generations.

Thank you for your consideration of these comments.

Regards,

Jai Crapella

Dear Senator French,

Please do not support HB 168. The bill would require Alaskans to put up money when they blow the whistle on sloppily issued permits, and when a project delay is needed to prevent irreparable harm to our air, land, and water. Responsible development requires a robust permitting process, and part of that is preserving the courts check on agency decisions or corporate actions. By mandating Alaskans "pay to play" before moving forward with a claim against an improperly issued permit, that important check is being diminished. Please stop this bill and make sure Alaskans have more options, rather than fewer, to protect our clean air, land, and water.

H.B. 168, A Bad Bill

I urge you to oppose H.B. 168. This bill would prevent most individuals, groups and local governments with legitimate concerns to oppose any permit in the state. How this bill fits into the framework of a democratic process is beyond me.

A person or group would have to be extremely wealthy to consider opposition to any permit or project, no matter how harmful or ill-advised it may be. Legitimate opposition in the courts is a given in a modern democracy. Eliminating it, or making it prohibitively expensive, destroys the democratic right.

Homer AK 99603

Senate Judiciary Committee
Alaska State Legislature
Juneau AK

Dear Senate Judiciary Committee Members:

I strongly oppose HB 168, that would require posting of a bond or security when challenging a government permit for an industry project. This bill will unfairly hamper citizens and other public interest parties, or even just affected property owners from challenging state permits or industrial developments that have not followed proper procedures or could affect the public's clean air or water. It makes the system lop-sided so that people who do not have big bucks, like a corporation or government, have no way to afford a court challenge in the case of a bad decision made by the State or a corporation. Where is the balance and commonsense in tilting the system away from fairness and putting it out of reach of the average person?

It is already expensive to go to court. This is usually the place of last resort to resolve issues but requiring the posting of a bond by Alaskans will put a chilling effect on citizen efforts to watchdog government and corporations. In a democracy, this is part of the system of checks and balances. Citizens need the tools to keep an eye on what government and corporations are doing, especially in this era of so much corporate wrongdoing.

There is already a means to eliminate frivolous lawsuits. Judges make that decision summarily if a case does not have merit. But if a case does have merit, there should not be a bond requirement that puts a lawsuit financially out of reach of those who are trying to protect their land, their community, or the common resources we all share. These court reviews are an important part of our state's system of checks and balances. This law seems to me to be unfair as well because it does not protect everyone equally, but rather gives an unfair advantage to corporations, which usually have more money than citizens anyway. It would not be fair to set up right from the beginning a "David and Goliath" scenario whereby a poor landowner could not challenge an illegally issued permit for some industrial activity near that person's private property because they could not post a bond.

Do not put good government and the tools to protect ourselves out of reach by passing HB 168. This is a bad idea that will let wrongful decisions by government or corporations affect our state in ways that maybe they did not even intend. To me, it appears to be another way to curtail the public in reviewing permits and challenging bad decisions. Don't take the people out of the process by passing this ill-conceived bill.

Sincerely,

Nina Faust

April 8, 2012

Dear Senator French,

I urge you to oppose **HB 168** (bill that would remove the right of Alaskans to challenge bad permits)… and **vote NAY!!**

The bill is problematic, and contrary to the public interest, in so many ways.

This bill is attempting to amend Title 9, Code of Civil Procedure, of the Alaska Statutes, and text of the bill does not limit its jurisdiction to state permits. So, if passed, the bill would cover any permit, regardless of the issuer, for an "industrial operation." I don't know if the bill's intent is that it be limited to state permits. In any event, my comments apply to the use or disposal of public lands (e.g., state, local, etc.) that may come before a court covered by Title 9.

Lawyers are expensive, and these high costs, as a practical matter, prohibit legal action against the state or other entities for most folks. Frivolous lawsuits are already thrown out of court, so this bill wouldn't affect that.

What this bill would affect, however, are cases that have merit; that are, for example, well grounded in law, code, regulation, or other authority. Basically, this bill, with respect to permitting of "industrial operations" would trample the due process rights of potentially aggrieved or affected individuals, organizations, local governments or other entities.

The public has a fundamental right to meaningfully participate in and challenge agency actions with respect to disposal of the public's interest in our public lands, air, and water. We have the right to ensure that all laws and regulations are adhered to in all agency actions. This bill would effectively remove this right to meaningfully participate and challenge. The effect would be to allow bad, improper, inappropriate permits; ones that are harmful and contrary to the public interest; or ones that fail to comply with law or regulation to be issued without challenge.

This is an extraordinarily bad bill, and it should not see the light of day.

Sincerely,

John Strasenburgh

Dear Charlie:

I've been getting lots of emails letting me know about this bad bill.
I am sure you are getting lots of emails about it too. I wondered if it could be as bad as people said. I just finished reading the current version of the bill, and I find it hard to believe that any elected official would support this bill. First, it insults the courts by implying that our judges issue injunctions on cases that don't have merit. Then, it insults Alaskans by saying if you don't have money you don't have access to the courts. It's actually worse than insulting, it seeks to take power away from the powerless and give power to the powerful. Alaska is an extraordinary state with extraordinary riches. Some of us see the riches in the resources that give us world class salmon runs, unparalleled recreation, and natural beauty that brings the rest of the world to visit. Others see the
riches in the income that extracting the resources can bring.
Unfortunately, extracting all the resources will result in an Alaska without world class salmon runs, unparalleled recreation and natural beauty that the rest of the world wants to visit. Finding the balance between those views is the job of the legislature, tipping the balance toward the extractors is not. You were elected to represent people, not industry. Please vote "no" when HB168 comes before the Senate.

Sincerely,
Ruth D. Wood, Talkeetna

The Honorable Senator French, Chair
Senate Judiciary Committee
State Senate Alaska State Capital
Juneau, Alaska 99801-1182

RE: Oppose HB168

Dear Senator and Members of the Senate Judiciary Committee,

My name is Robert Maxand and have resided in Wrangell my entire life. I have been a longshoreman, delivered oil with Standard Oil, and owned my own construction company until I retired several years ago. I recently learned about HB168 and felt compelled to contact you to express my concern and request that this bill be stopped.

HB 168 will have immediate and perilous impact on the public's right to access the courts. I understand that you may all have your targets set on stopping environmental groups from impeding large mines or timber sales. The real impact will come on the backs of everyday Alaskans who will no longer be able to protect their property or family against permit violators.

Let me give you an example. In the '80s, my family lived next to a cement plant in Wrangell. I eyed employees dumping barrels of waste in the muskeg, just off the property line. The Corps of Engineers happened to be in town, so I contacted them. They investigated and ordered the company to stop dumping. My kids played in those woods, and a hell of a lot more often than kids do today. So I was worried.

Had HB 168 been in place, and I wanted to file an injunction to stop this outfit from dumping waste in the woods and water near my home and family, I could have been required to pay a handsome fee, just to see that the harm was stopped and justice was done.

Here's another example. Several years ago the Mental Health Trust authorized heavy logging on a view shed just above the major highway in our town, at about 7-mile. Those who lived out the road were upset, and rightly so. The logging outfit that bought the sale clear - cut from damn near the top of the mountain to the highway, with no buffers. We were told this type of logging would prevent landslides. Are you kidding me? Well the landslides are starting to happen. If community members sought an injunction against what were obviously irresponsible activities by this company, they would have had to pass the hat and collected their coins to buy access to the court system.

Folks, this is un-American. Period. What's next, we need to get bonded to vote? Do yourselves, and us the little guys, a favor and drop this idea dead in its tracks.

I appreciate your consideration and I hope you folks do the right thing.

Respectfully,

Robert Maxand

Subject: HB 168, THE BOND REQUIREMENT BILL-VOTE NO PLEASE

If HB 168 were enacted, state authority over water discharge, surface mining, pollutant discharge, congestion mitigation, and air quality would likely be rescinded by the feds due to the unequal judicial review caused by this bill. This information is from DNR's Director of the Office of Project Management and Permitting.

This bill is poorly written. What the heck does "wrongfully enjoined" mean?

Our system of checks and balances can only function when concerned citizens, groups and local governments have a real opportunity to participate in the judicial and permit regulatory system.

Please consider this.

Subject: HB 168 Concerns

Dear Senator French
I'd like to take a moment to express concerns at HB 168 sponsored by Rep. Feige (R-Chickaloon). HB 168 places a significant financial barrier between Alaskans who want to exercise their right to challenge a permit using the court system by requiring a bond to be posted. The bill impacts any Alaskan or Alaskan group, including local and/or tribal governments, which may want to stop an improperly permitted project from moving forward. This goes against the right for citizens to be participants in their own homeland to exercise their right to access the court system . As a concerned citizen and resident of Alaska, I urge you to oppose this bill and allow it to pass out of committee. Thank you for your time and for supporting the rights of all Alaskans.

Sincerely,

To: Sen. Hollis French
Subject: Constituent commentary on HB 168

Good day Senator French,

Being a constituent of yours, I thought it appropriate to send you my thoughts on HB 168. I have been a resident of Alaska since April 3, 1967. During that time, I have witnesses quite a good bit of development from both the private and public sectors. Some of these projects have been quite successful and beneficial to the citizens of alaska i.e.(Trans-Alaska pipeline) and some projects i.e.(barley grain project) not so successful and beneficial. What has remained constant throughout the history of Alaska before statehood and continuing to the present is the will of the people to be heard regardless of socio-economic status or privilege. However, HB 168 if passed, may begin to chip away at the citizen's voice by suggesting to the court that a lawsuit security should include loss of employee wages and expenditures incurred by contractors and sub-contractors of a permitted industrial project. Currently, the court already has the power to decide what just costs should be in cluded in a security. In my opinion, HB 168 seems somewhat frivolous and redundant; and perhaps, a waste of the Senate's precious time and energy during the last weeks of the legislative session. In conclusion, I would hope the Senate sees no logical reason to pass HB 168. I thank you and the Senate in advance for giving me the opportunity to speak my voice in opposing HB 168. Sincerely, Rod Meeks, a concerned Alaskan citizen

Subject: I do NOT support HB 168

Hello Mr. Chairman and Members of the Senate Judiciary Committee,

I do not support HB 168. This bill would put a significant financial burden upon a person challenging an "industrial operation" in Alaska since this person would need to post a bond as part of the legal process. Few entities, including municipalities, or individuals, would be able to post enough of a bond to cover the costs which the bill states need to be included, i.e. "payment of wages and benefits for employees, and payment to contractors and subcontractors of the industrial operation . . ." This bill would make it virtually impossible for someone to challenge an "industrial operation" for that reason.

I believe the legal injunction route, albeit cumbersome at times, is absolutely necessary. HB 168 would essentially remove the court route as an option for questioning permits that appear dubious or flawed. I do not want to see "industrial operations" immune to adequate and meaningful scrutiny...whether that comes from the state ADEC offices or a public interest "greenie" group such as the Sierra Club, etc.
The ability to use the courts to challenge an improper industrial operation is essential to protect the public's interests.

Thank You,

Jeremy Robida

Dear Senators,

I am writing to ask you to OPPOSE HB 168.

This bill would essentially take away any Alaskan's right to Due Process by making it financially impossible to seek review or question compliance of bureaucratic decisions or the actions of a permit holder.

It would essentially take away our right to blow the whistle on polluters of our air or water. It would ask us to pay thousands of dollars in bonds to ensure that our claims are true BEFORE taking them to court.

Do not be counted as a politician who voted to take away our citizen's right to question what you do or what is happening to our resources.

Dear Senator Hollis,

I am writing in opposition to HB168. It discriminates against those with concerns and directly supports unrestricted development imperiling our environment.

We need to be encouraged to be advocates protecting our environment; clean air and clean water.

This bill discourages and in most cases eliminates the ability for Alaskan citizens to actively safeguard our nonrenewable resources. This cannot be left to unrestricted governmental action.

Thank you.

Subject: HR168 - The Corporate Takeover (and Destruction) of Alaska

Categories: Staff responded

Thank you for reading this email. Please excuse the provocative subject line as so many times emails such as this are sorted by subject.

I am a regular visitor from Louisiana. I visit southern Alaska about every other year for the last 20 years. My wife and I chose Alaska out of every place on earth. It is the last of it's kind. It is the only one we have as Americans. It is absolutely critical it be preserved for every generation. Exploitation of natural resources must be done we extreme sensitivity to not degrade the Wild Alaska. Error should always be done on the conservative side, always leaving it alone when there is any doubt. Individuals and groups without "deep pockets" must be able to intervene.

I visit Ketchikan and have watched the clear cutting of the virgin forest. It is no longer the Ketchikan I once saw on my honeymoon. Forests are allowed to "naturally regenerate", a euphemism for rape and run forestry. Corporate interests want to exploit all of Alaska's natural resources and will do so unless anyone can stop them. Bill HR168 is a "BULLY Bill". It is a threat. It is intimidation. The representatives that support this bill will identify themselves as the Corporate raiders of America's last pristine place. I beg you to not be one of them. It is a matter of trust for the generations to come. I shall share this with everyone I know.

Again, thank you for your time to read this.....Charlie Caron of Louisiana

Dear Senator French:

I urge you to do what you can to squelch HB 168. This Legislation would essentially block ordinary Alaska citizens from fighting corporate and political takeover of our Alaskan heritage. Under this Bill decisions by State agencies often at the beck and call of a Governor who is well-funded by corporate interests would trump ordinary citizens rights for the simple reason that we lack the financial reserves of those corporate interests. That's not democracy.

Thank you

Subject: Support legal rights- do not pass HB 168

Categories: Staff responded

Senate Judiciary Committee,

I am writing to ask you to not pass HB 168, the "Industrial Security: Industrial Operation Bill" aka "Pay to Play Bill".

This is the most outrageous proposed legislation I have ever seen. It will take away Alaskans' rights to use the legal process to oppose irresponsible agency decisions. This "pay to play" system would require Alaskan residents to pay for correcting department mistakes or permit violations.

HB 168 proposes that anyone seeking an injunction on an industrial operation would have to post a "security bond" that covers all lost corporate profits, contractor payments, and employee wages and benefits for the life of the court case. In many cases this bond could costs millions of dollars. This will effectively bar the majority of Alaskans from the courts.

Additionally, if Alaskans did try to litigate in response to an agency decision, under HB 168 the process of determining the bond amount (potential corporate profits, employee wages, etc for the duration of the court case) will result in endless time spent squabbling in court. I understand it requires resources for the courts to debate the merits of agency decisions, but that is a much better use of resources then on endless debates over the amount and nature of a bond before beginning the litigation process.

Access to the courts is a key part of the checks and balances for our democracy. By removing Alaskans' ability to realistically access the courts, HB 168 would effectively strip us of our constitutionally-protected right of Due Process.

This bill is bad public policy and unconstitutional. Do not pass it out of the judiciary committee.

Sincerely,
Megan McBride

March 29, 2012

Dear Senators French and Wielechowski,

My name is Daven Hafey. I currently reside at Aurora Harbor Main 47, Juneau, Alaska. My legislators are Senator Dennis Egan and Representative Beth Kerttula.

I am writing in regard to HB 168, the Industrial Security: Industry Operation Bill. As a 29 year old Alaskan, I cannot stress enough how damaging this bill will be for my generation. If enacted, HB 168 would severely restrict my generation's access to the courts, a principle I assumed was constitutionally protected. We can speak with as much hyperbole or technical language as we'd like, but the real implications of this bill would mean that my generation, and the generations after mine would be limited in their ability to access the court system. As I read this bill, I am amazed that in a country that reveres the democratic process as much as ours does, we would be so close to enacting legislation that effectively strips an essential part of the democratic process from us.

I cannot speak for every individual or organization, nor can I speak to every injunction. What I can say with confidence is that there are instances in which permits are issued with mistakes, instances in which permit holders violate the terms of their permits, or both. When individuals, organizations, municipalities, or tribal governments become aware of those mistakes or violations, they currently have the accessibility to file an injunction to rectify any wrongs committed. Those injunctions that do reach the court are the cases with merit; they are the sound cases that deserve to be heard. HB 168 would effectively limit the accessibility of cases with merit to be heard in our courts.

HB 168 does not defend against frivolous lawsuits. Our courts already have the ability to assess cases to determine which ones are frivolous and which ones have merit. Those that are frivolous are not heard. Those with merit are. We do not need new legislation that does what is already being done. And we certainly do not need legislation whose objective is to punish individuals and/or organizations with sound cases by requiring them to pay for governmental errors or corporate violations.

Additionally, the states of Oregon, Utah, and Montana have already attempted legislation similar to HB 168. None were successful from what I understand, as they were all found to be unconstitutional or in violation of federal regulation.

I am not advocating for ever more injunctions and court cases. I am advocating for responsibility. As a young Alaskan concerned about the future he gets to inherit, I am requesting the Legislature to maintain and protect my generation's ability to access our courts if and when needed. To suggest that I should be prepared to post a security bond of potentially millions of dollars simply to bring a sound case to court is unreasonable and out of touch. Please respect my generation and protect our access to the courts. Please do not let HB 168 pass through the Senate Judiciary Committee.

Regards,

Daven Hafey
Juneau

Subject: HB168

Categories: Staff responded

Dear Senator French,

I am writing to express my concern with HB168 and ask that the bill not be moved forward. HB 168 would adversely affect the checks and balances already put into place to ensure that the development of Alaska's resources is done in a responsible manner.

As I am sure you know, a preliminary injunction is an order that the court issues *before* it issues a final decision. Because decisions can take a long time, sometimes the harm that is being litigated (e.g., the logging of a particular stand of trees) would happen before the lawsuit had a chance to finish. Preliminary injunctions essentially put everything on hold, maintaining the status quo until the court has time to reach its final decision on an issue.

The problem that HB 168 says it is going to solve is not a a problem at all-- by their very nature, preliminary injunctions are never issued where the lawsuit itself is frivolous. In order to get a preliminary injunction, the group advocating for it, has to make a strong showing of success on the merits of the case. This means that a group will never get a preliminary injunction unless it has a very good chance of winning. This makes it clear that HB 168 is actually there to make it financially impossible for environmental groups to bring good lawsuits, not stop them from bringing bad ones.

This law would detrimentally impact some of the most important checks we have in making sure that development is done sensibly and within the governing laws and regulations already put into place.

Thank you for your consideration.

Sincerely,

Jessica M. Cler

Alaska Conservation Alliance
"A Strong Economy and Healthy Environment Go Hand in Hand"

April 10, 2012

Senator Hollis French
State Capitol
Juneau, AK 99801-1182

Dear Sen. French,

The Conservation Alliance opposes HB 168, which would require Alaskans to post a bond or security when seeking a stay or injunction against a government-issued permit affecting an industrial operation. The Alaska Conservation Alliance represents over 30 conservation groups across the state with a combined membership of over 38,000 Alaskans.

HB 168 puts corporate and foreign interests above Alaskans and their communities.

To begin, this legislation is not aimed at frivolous lawsuits. Already, a frivolous lawsuit will not receive a stay or preliminary injunction, because a court can't issue those remedies unless it first determines that the plaintiff is likely to win and that "irreparable harm" would result without the stay or injunction. Instead, this legislation is targeted at lawsuits with merit, and this legislation imposes its burden at the expense of ordinary Alaskans and their communities. Under HB 168, the Alaskan seeking an injunction or stay will be required to post a bond that is typically unaffordable to all but the most wealthy corporations and individuals. In sum, the bill penalizes all but the wealthy and deters meritorious claims before they are adjudicated at all.

Further, when a case against a permit is brought forward by an Alaskan, it is questioning the permitting process used by the issuing governmental agency or illegal practices by industry. Thus, an injunction or stay will only be issued when government hasn't done its job properly, or when a corporation is violating the law or the terms of its permit, as determined by judicial review. Requiring a citizen to pay for a governmental error or corporate crime puts a chilling effect on a long tradition of protecting American whistleblowers in our democracy.

In fact, this legislation is so broad that it may even prevent the State itself from enforcing violations of law. It applies to any "party" seeking temporary injunctive relief, which sometimes includes the State when attempting to enforce violations of law occurring under an industrial permit. In those cases, the State will be subject to the bill's bond requirements, a cost the enforcement agencies have no budget to incur.

810 N Street, Suite 203 | Anchorage, AK 99501 | 907-258-6171 | F: 907-258-6177
www.akvoice.org | www.twitter.com/ACAAlliance
www.facebook.com/AlaskaConservationAlliance

HB 168 would block Alaskans from protecting their communities and way of life by preventing them from challenging government-issued permits that have resulted in legally redressible injuries. It would force Alaskans challenging a permit to post a bond equal to potential damages suffered by an industrial operation. This remedy protects wealthy corporations – many of which merely do business in Alaska and/or are from foreign countries – over resident Alaskans who live, work, and raise their families in this great state. The bond will in many cases exceed $1 million, which effectively prevents almost any Alaskan from filing a suit to challenge what may be a fast-tracked, sloppy agency decision.

HB 168 violates the Alaska Constitution.

Beyond being bad policy, the bill is also likely unconstitutional for two reasons. First, it violates the Equal Protection clause by targeting those litigants who challenge permits for industrial operations, and protecting only industrial operations. This discriminates unconstitutionally against local landowners, community groups, native organizations, commercial and sport fishers and hunters, and other Alaskans who seek to ensure that state agencies are doing their jobs.

Second, in practice it would often deny access to courts, in violation of Due Process rights, for Alaskans who do not have the financial resources to post the required bond but have an otherwise valid claim. It is not hard to imagine a landowner or a community that does not have the millions to post the bond this bill would require. That person or community would be prohibited from protecting the land it has owned for decades yet is now threatened by a major industrial operation.

HB 168 is poorly drafted and would be extraordinarily difficult for a court to apply.

The bill contains several provisions that are ambiguous or make no sense and would be challenging for a court to enforce. For example, the bill purports to require a bond for an order "vacating" a permit. However, a court will vacate a permit only at the conclusion of a case, after finding that the issuing agency actually violated the law. That is not a situation where bonds come into play. Bonds are instead required only for temporary injunctions or stays, in case the person does not ultimately prevail. It would make no sense and serve no purpose to require a bond of the party who has won the case. If that is the intent of the bill, then it is merely a punitive and unconstitutional attempt to prevent successful litigants from obtaining the relief to which they are entitled.

Similarly, the bill purports to require the bond to cover damages wrongfully suffered by "an industrial operation." An industrial operation, in turn, is defined in the bill as various activities. But damages are suffered only by litigants, such as persons, corporations, or organizations. There is no precedent for measuring or awarding damages to an activity rather than a party, and the very concept is bizarre and seemingly impossible to apply.

Further, the legislation is ambiguous as to the point at which a bond would be required. Departing from current court rules, the bill requires a bond from a party "seeking" a stay, preliminary injunction, or vacatur. If that were read to require a bond whenever a case was filed against an industrial permit, it would effectively require an exorbitant fee at the time of filing—an unconstitutional requirement and drastic change to current court procedures. Further, if the bill were interpreted to require bonds whenever a stay or preliminary injunction is sought, and before the court orders one, its main impact would be to deter likely meritorious claims from ever being raised—again a clear violation of constitutional rights.

For the reasons stated above, the Alaska Conservation Alliance opposes HB 168. The only purpose the bill would serve is to keep regular Alaskans out of court and to protect sloppy permitting decisions that could greatly impact Alaska's future.

Sincerely,

Andy Moderow
Executive Director
Alaska Conservation Alliance

Bill File

March 11, 2012

Dear Senators and Representatives,

I am writing to you to appeal to your sense of moral decency to help us maintain our rights as private citizens.

Mr. Feige's proposed HB 168 creates an undue burden on access to the courts, which is guaranteed by the First Amendment of the Constitution -- "*Congress shall make no law...abridging the freedom of speech...and to petition the Government for a redress of grievances*" -- and the Alaska Constitution: "*right of the people.... to petition the government shall not be abridged.*" Industrial activities as discussed in the proposed bill have the potential to do personal, physical, emotional and financial harm. Nationally, there are hundreds, if not thousands, of documented instances where permits, rubber-stamped through the system, have been inadequate to protect citizens, and where industrial corporations have neglected to follow rules and regulations, resulting in property damage, injuries and deaths. This bill would deny Alaskans who do not have unlimited financial resources, but do have a valid grievance, from protecting their property or themselves from harm.

Clearly, the intent of the bill is to protect corporations' profits and prevent Alaskans from having recourse against fast-tracked, careless or illegal permitting by government agencies. A recent example of rubber-stamping a permit was the Wishbone Hill Air Quality Permit. This permit was issued by the Alaska Department of Environmental Conservation (DEC) despite numerous false assumptions and fraudulent information provided by the mining corporation in the permit application. DEC clearly without the personnel to double check all the details assumed the application was accurate. Fortunately an astute group of citizens with independent experts was able to catch these errors and the permit application was withdrawn. How many times is a permit issued despite glaring omissions and false information because there is no one outside the permittng agency reviewing it? How possibly could a group of land owners come up with millions of dollars to post the bond that this bill would require just to try to

protect their families and their property from potentially flawed industrial plans and permits? Obviously, they can't. As such, this bill violates their individual rights.

Remember, it could very well be you, a family member, or a friend who will have no recourse against poor-quality permitting or a morally corrupt corporation that fails to follow regulations resulting in personal injury, destroyed property, damaged or uninhabitable homes.

The right thing to do is reject this bill. There are already statutes that provide for compensation for a business being wrongfully restrained, as well as sanctions for frivolous lawsuits. Injunctions and stays are only issued after a judge determines that the stringent requirements for such relief have been met and that the lawsuit has merit. So, this new law is unnecessary, and all it would do is circumvent the rights of individual Alaskans and small communities.

"...the moral test of government is how that government treats those who are in the dawn of life, the children; those who are in the twilight of life, the elderly; those who are in the shadows of life; the sick, the needy and the handicapped." ~ Last Speech of Hubert H. Humphrey

Alaska has made one very large step in the right direction. Recognizing that industrial activities can pose serious health hazards, the international community and many global financial lending institutions now view Health Impact Assessments (HIA) as an essential component, on par with the economic impact study, in assessing a project's viability. The state of Alaska has recently developed an HIA program and commissioned Dr. Paul Anderson to perform an HIA for the Wishbone Hill Coal Mine.

A critical question to ask now is how this information will be used. It appears that Alaska legislation needs to catch up with the global economy. We need statutes that not only mandate HIA's for large industrial (mining, power generation, factories, etc) endeavors, the statutes need to ensure they are prepared by independent experts and become part of the permitting process, that recognized hazards are prevented by correcting the permit before the start of operations, and that they are fully enforced with adequate penalties and fines to ensure compliance.

Regarding the Wishbone Hill Coal Mine HIA, the Alaska Department of Natural Resources (DNR) is "editing" the draft. This is like allowing the tobacco companies to rewrite the medical research that links smoking to cancer. That sounds ridiculous, doesn't it? So why is DNR allowed to censor the contents of the HIA, and exclude what the agency disagrees with? The HIA should be an independent study and the entire product released to the public for review, not just what the mining corporation and DNR are willing to allow the public to see.

Currently many environmental protection regulations are willfully violated because it is less costly for the corporation to pay the fines than follow the law. When it comes to people's health, that should not be an acceptable option. As the saying goes, an ounce of prevention is worth a pound of cure. It is much more costly in the long run, never mind the priceless value of human life, to try to clean up a toxic mess and pay for cancer treatment, than it is to prevent it in the first place.

I respectfully ask to you reject HB 168 on the grounds it is immoral and unconstitutional. I also hope you will see the necessity of updating Alaska's industrial permitting regulations, including the need for HIA's to play a strong role in industrial project designs and permitting.

I would be happy to discuss these topics with you further. I can be reached at the address, phone numbers, or email provided.

Sincerely yours,

Michele Prevost, MD

Subject: HB168 Injunction Security - Industrial Operations

Categories: Staff responded

Senators,

Millrock Resources is a public company listed on the TSX Venture Exchange. Our main operating office is in Anchorage, Alaska. The company raises venture capital financing on the public markets, acquires mineral rights and expends the funds searching for metallic minerals throughout Alaska. We leverage our capital by jointly exploring mineral properties with major mining companies. In our short five-year history we have been successful in bringing millions of dollars of mineral resource investment to Alaska, employed Alaskans in far-flung corners and consumed supplies and services from numerous Alaska companies.

Alaska has excellent potential for the discovery of new mineral deposits but investors have a negative view of the state because of the constant threat of lawsuits against developers and the permitting agencies. Resource developers face court battles from the earliest exploration stages and perpetually thereafter throughout the project construction and extraction process. We view purposefully obstructive, frivolous litigation as the single largest deterrent to resource development in the state and our ability as a company to continue to bring venture capital to Alaska.

There is presently no financial risk to litigants that bring suit "in the public interest" against developers of operations that have been reviewed and permitted through public process by state and federal agencies. Injunctions against development cause great loss to the people of Alaska. HB168 will force litigants to post financial surety against the financial loss incurred by developers and potential employees and service providers to targeted resource developments. Reduction of frivolous or unnecessary lawsuits will therefore be decreased and the business climate of Alaska significantly improved.

Millrock Resources and myself personally urge you to move this legislation.

Yours truly,

Gregory A. Beischer

Categories: Staff responded

I am writing in support of House Bill 168,

Under current law the cost to bring a public litigant lawsuit against a legally permitted project is in effect zero. There is very little risk in bringing a suit. All the risk is borne by the defendants. These actions do shutdown projects at significant costs to working Alaskans, businesses and the state treasury. **CSHB 168(JUD)** seeks to remedy the situation by leveling the playing field.
CSHB 168(JUD) parallels the requirements of Alaska Civil Rule 65(c). As written, 65(c) states: *"no restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who enjoined or restrained is found to have been wrongfully enjoined or restrained".*

At the request of the Department of Law, **HB 168** was amended to more closely mirror the language of Alaska Civil Rule 65(c) in order to clarify that the proposed statute would not change the court rule. The court already has the ability to require security. **CSHB 168(JUD)** simply requests that part of the court's deliberation process should include payment of wages and benefits for employees, payments to contractors and subcontractors of the industrial operation that is shutdown. The amount of security and how it is calculated is totally within the hands of the court.

My husband and I are in agreement on the issue. Help stop needless litigation that costs, taxpayers and businesses that want to work in AK money.

Honorable Hollis French
Honorable Bill Wielechowski
Chair and Vice-Chair, Senate Resources Committee
Capitol Building
Juneau, Alaska 99801

April 10, 2012

Dear Senators French and Wielechowski,

The Juneau Chamber of Commerce Board of Directors encourages the passage of HB 168 on behalf of its members and the community of Juneau.

The Chamber Board believes that special interest groups, opponents of natural resource projects and extreme environmental organizations have abused the legal system and subverted the intent of environmental law by regularly filing frivolous public interest lawsuits. These tactical lawsuits serve to delay, subvert and shut down responsible development and job creation in Alaska with no financial risk to those special interest groups using the court system to delay, increase risk to developers and increase project costs and create job loss.

Under existing State law, judges have not required opponents of natural resource projects to post a bond or other security to cover the economic harm to the project or the affected workforce.

HB 168 addresses these abuses, places the same financial burden on those organizations seeking to use the legal system as a tactical tool but does not discourage individuals and organizations from perusing legal remedy against questionable development.

Therefore, the Juneau Chamber of Commerce urges the passage of HB 168.

Sincerely,

Cathie Roemmich, CEO
Juneau Chamber of Commerce

Cindy Smith

Subject: HB 168

Categories: Staff responded

Greetings Senator Hollis,

As an mineral exploration company business conducting work in Alaska I believe that HB 168 would help protect my company from unfair and unwarranted legal action brought by vandals with an axe to grind against mineral resource development. We firmly believe in the rule of law and believe everyone should be accountable under the law for their actions. However, as you well know, spurious law suits can tie up resources and cause delays that can be fatal to a project if they come at a critical time. There needs to be accountability to discourage spurious legal actions.

I encourage you to ensure that HB 168 is heard as soon as possible in this session.

Thank you for all your hard work and good luck as the session comes to a close.

April 5, 2012

Honorable Hollis French
Honorable Bill Wielechowski
Chair and Vice-Chair, Senate Resources Committee
Capitol Building
Juneau, AK 99801-1182

Dear Senators French and Wielechowski:

We are writing on behalf of the Alaska Miners Association in support of House Bill 168, Injunction Security – Industrial Operations.

The Alaska Miners Association is a non-profit membership organization established in 1939 to represent the mining industry in Alaska. The AMA is composed of more than 1400 individual prospectors, geologists and engineers, vendors, suction dredge miners, small family mines, junior mining companies, and major mining companies. Our members look for and produce gold, silver, platinum, lead, zinc, copper, coal, limestone, sand and gravel, crushed stone, armor rock, and other materials.

Under current law, there is effectively no cost for third party to bring a lawsuit against a legally permitted project. The key point is that the project at that point holds a valid permit that has been through Alaska's extensive permitting processes. The state has as a substantial interest in terms of economic development and regulatory certainty for its permittees to be able to proceed once the permit is issued.

The proposed bill carefully parallels the requirements of Alaska Civil Rule 65(c). As written, 65(c) states: "no restraining order or preliminary injunction shall issue except upon the giving of security by the applicant, in such sum as the court deems proper, for the payment of such costs and damages as may be incurred or suffered by any party who enjoined or restrained is found to have been wrongfully enjoined or restrained".

It is clear that the proposed statute will not change or modify the court rule. Thus, the capacity for the court to require security already exists, and the bill simply extends that capacity to consideration in the court's deliberation process to payment of wages and benefits for employees, payments to contractors and subcontractors of an industrial operation if it is shutdown. The calculation itself is up to the court.

HB168 will improve the business climate of the State of Alaska, protect Alaska's many hard working employees and contractors, and decrease regulatory uncertainty.

We urge passage of this bill.

Sincerely,

Fred Parady, CSP

SIERRA CLUB
FOUNDED 1892

TRUSTEES FOR ALASKA
SUSTAIN | PROTECT | REPRESENT

March 26, 2012

Dear Sen. French:

The Sierra Club and Trustees for Alaska oppose HB 168, which would require an Alaskan litigant to post a bond or security when a court issues a stay or injunction against a government-issued permit affecting an industrial operation. The Sierra Club is the nation's largest grassroots environmental organization working to explore, enjoy and protect the planet with roughly 1,200 members in Alaska. Trustees for Alaska was established in 1974 as an Alaska non-profit public interest law firm working to protect and sustain Alaska's natural environment on behalf of Native villages, community groups, and local and national conservation groups by providing legal services, policy advice, and strategic counsel free of charge. Trustees for Alaska has been in the forefront of issues large and small which continue to shape Alaska's environmental future – oil and gas development, mining, toxic wastes, air and water pollution, public land use, and protection of marine resources.

HB 168 Is Likely Unconstitutional.

First and foremost, our members and clients are concerned that HB 168 will take away their basic constitutional rights. The bill is likely unconstitutional for three reasons. First, it violates the Equal Protection clause by targeting litigants who challenge permits for industrial operations, and protecting only industrial operations. This discriminates unconstitutionally against local landowners, community groups, native organizations, commercial and sport fishers and hunters, and other Alaskans who seek to ensure that state agencies are doing their jobs.

Second, in practice it would often deny access to courts, in violation of Due Process rights, for Alaskans who do not have the financial resources to post the required bond but have an otherwise valid claim. This bond would have to cover potential damages including employees' lost wages, salaries, and contractors. The size of these bonds could easily and quickly add up to millions of dollars. Most Alaskans do not have the financial resources to post the required bond, but have an otherwise valid claim. Those people would be prohibited from protecting the land they have owned for decades yet is threatened by a major industrial operation. Even large non-profit organizations like the Sierra Club, do not have millions to post the bond this bill would require, despite frequently having legitimate issues with government-issued permits.

Third, HB 168 is a change to court rules, which violates the Alaska Constitution unless the bill is approved by two-thirds of each house and specifically states that it is a change to court rules. Currently, Civil Rule 65(c) and Appellate Rules 204(d) and 603(a)(2) govern the bonds that would be affected by HB 168. Indeed, the bill closely parallels the language of Civil Rule 65(c).

HB 168 is Poorly Drafted and Would Be Extraordinarily Difficult for a Court To Apply.

The bill contains several provisions that are ambiguous or make no sense and would be challenging for a court to enforce. For example, the bill purports to require a bond for an order "vacating" a permit. However, a court only vacates a permit at the conclusion of a case, after finding that the issuing agency actually violated the law.[1] That is not a situation where bonds come into play. Bonds are generally required only for temporary injunctions or stays, in case the person does not ultimately prevail. It would make no sense and serve no purpose to require a bond of the party who has won the case. If that is the intent of the bill, then it is a punitive and unconstitutional attempt to prevent successful litigants from obtaining the relief to which they are entitled.

Similarly, the bill purports to require the bond to cover damages wrongfully suffered by "an industrial operation." An industrial operation, in turn, is defined in the bill as various activities. But damages are suffered only by litigants, such as persons, corporations, or organizations. There is no precedent for measuring or awarding damages to an activity rather than a party, and the very concept is bizarre and likely impossible to apply.

Further, the legislation is ambiguous regarding the point at which a bond would be required. Departing from current court rules, the bill requires a bond from a party "seeking" a stay, preliminary injunction, or vacatur. If that were read to require a bond whenever a case was filed against an industrial permit, it would effectively require an exorbitant fee at the time of filing – an unconstitutional requirement and drastic change to current court procedures. Further, if the bill were interpreted to require bonds whenever a stay or preliminary injunction is sought, and before the court orders one, its main impact would be to deter likely meritorious claims from ever being raised—again a clear violation of constitutional rights.

<u>HB 168 Jeopardizes Delegation of Various Federal Enforcement Programs and Funding for Those Programs.</u>

HB 168 will likely have unintended legal and financial consequences for Alaska. Alaska has various federally delegated legal programs, including the Surface Mining Control and Reclamation Act, the National Pollutant Discharge Elimination System program in the Clean Water Act, Clean Air Act permitting programs, and the Resource Conservation and Recovery Act program. The Department of Natural Resources and Department of Environmental Conservation administer these federal programs, which require compliance with federal regulations. Those regulations include providing the same opportunity for judicial review as would be available under the federal program.

The bond requirement in HB 168 is not required under federal law and is a deterrent to citizens challenging unlawful permits. It is also a deterrent to seeking preliminary injunctive relief, no matter how compelling the case or egregious the legal violation. As such, it is very possible that the federal agencies administering these statutes, such as the Department of Interior and Environmental Protection Agency, could decide to de-delegate these programs from the State,

---

[1] In that case, the challenger has won the case, which by definition, is not a frivolous lawsuit.

which would remove Alaska's control over permitting and result in agency programs being defunded.

HB 168 Likely Stops Meritorious Lawsuits.

This legislation is not aimed at stopping frivolous lawsuits. A frivolous lawsuit would not receive a stay or preliminary injunction, because a court can't issue those remedies without first determining that the plaintiff is likely to prevail and that "irreparable harm" would result without the stay or injunction. Instead, this legislation is targeted at lawsuits with merit, but imposes its burden at the expense of ordinary Alaskans and their communities. Under HB 168, the Alaskan seeking an injunction or stay will be required to post a bond that is typically unaffordable to all but the most wealthy corporations and individuals. Stated another way, the bill penalizes all but the extraordinarily wealthy and deters meritorious claims before they are adjudicated at all.

Further, when a case against a permit is brought by an Alaskan, it questions the permitting process used by the issuing governmental agency or illegal practices by industry. As a result, an injunction or stay would only be issued when government hasn't followed procedure, applied the proper standards, or when a corporate permittee is violating the law or the terms of its permit, as determined by judicial review. Requiring a citizen to pay for a governmental error or corporate malfeasance creates a chilling effect on a long tradition of protecting whistleblowers in our democracy.

In fact, this legislation is so broad that it may even prevent the State itself from enforcing violations of law. It applies to any "party" seeking temporary injunctive relief, which sometimes includes the State when attempting to enforce violations of law occurring under an industrial permit. In those cases, the State will be subject to the bill's bond requirements, a cost the enforcement agencies have no budget to incur.

HB 168 would block Alaskans from protecting their communities and way of life by preventing them from challenging government-issued permits that have resulted in legally redressible injuries. It would force Alaskans challenging a permit to post a bond equal to potential damages suffered by an industrial operation. This remedy protects wealthy corporations – many of which merely do business in Alaska and/or are from foreign countries – over resident Alaskans who live, work, and raise their families in this great state. The bond will in many cases exceed $1 million, which effectively prevents almost any Alaskan from filing a suit to challenge what may be a fast-tracked, sloppy agency decision. Obviously this is the intent of the legislation—to keep Alaskans from exercising their constitutional rights.

Conclusion

HB 168 is unconstitutional, bad policy making. The only purpose it serves is to keep Alaskans who care about agency decision-making out of court while protecting sloppy permitting decisions that could impact Alaska's economic future. It also protects out-of-state and foreign corporations over Alaskans who live, work, recreate, and subsist in this great state. For these reasons the Sierra Club and Trustees for Alaska oppose HB 168.

JUDICIARY COMMITTEE
REPRESENTATIVE CARL GATTO, CHAIR

HB 169
Sponsor Statement

"An Act relating to the review of proposed regulations by the Legislative Affairs Agency; and providing for an effective date."

HB 169 closes gaps in the regulation review statutes. The Legislative Affairs Agency (LAA) attorneys review proposed regulations, including those from newly enacted legislation and at the request of a standing committee, the Administrative Regulations Review Committee, and the Legislative Council. However, if the attorney finds that the proposed regulations fail to meet statutory standards, the only legislative entities they are allowed to notify are the Administrative Regulation Review Committee, the Speaker of the House, and the President of the Senate. Additionally, LAA cannot currently notify anyone if the regulation meets statutory standards.

HB 169 allows LAA to notify the committee or council that requested the review that the regulations do not meet statutory standards. In addition, if the proposed regulation implements newly passed legislation, LAA would be able to consult with and notify the prime sponsor of that legislation, if the prime sponsor is still a sitting legislator. Finally, HB 169 allows LAA to notify the requester of the review if the attorney determines that the regulations meet statutory standards.

HB 169 is a simple fix to two minor problems in an otherwise functioning review system. It will give the benefits of the review process to those who need it most. If you have any questions, please contact Melanie Lesh, Judiciary Committee Aide, at 465-4990.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 169

Analysis

This Legislation has zero fiscal impact on the Legislative Affairs Agency.

Sec. 24.20.105. Review of proposed regulations.

(a) The Legislative Affairs Agency may review each proposed regulation that is subject to AS 44.62.010 - 44.62.300 (Administrative Procedure Act). A review of proposed regulations under this section must be conducted by an attorney employed by that agency.

(b) Reviews shall be conducted under (a) of this section in the following order of priority:

(1) proposed regulations that would implement newly enacted legislation;

(2) proposed regulations requested in writing to be reviewed by a standing committee, the Administrative Regulation Review Committee, or the legislative council as implicating major policy development.

(c) Under AS 44.62.190(a)(7), the notice of proposed action, along with a copy of the proposed regulation, shall be furnished electronically by the state agency to the

(1) Legislative Affairs Agency;

(2) chairs of the standing committees with jurisdiction over the subject of the proposed regulation;

(3) Administrative Regulation Review Committee;

(4) legislative council.

(d) Within available staff resources and priorities set by the legislative council, the Legislative Affairs Agency shall assign one or more attorneys to conduct a review of proposed regulations. The review shall evaluate

(1) the legality and constitutionality of the proposed regulation;

(2) whether the state agency has statutory authority to adopt the proposed regulation to implement, interpret, make specific, or otherwise carry out a statute; and

(3) whether the proposed regulation is consistent with the applicable statutes.

(e) In conducting its review under this section, the assigned attorney may consult with the Department of Law, the committee or council that requests the review under (b)(2) of this section, and the state agency proposing the regulation change. If the assigned attorney determines that the proposed action fails to meet the standards set out in (d) of this section, the assigned attorney shall notify, in writing, the Department of Law, the state agency, the Administrative Regulation Review Committee, the president of the senate, and the speaker of the house of representatives.

(f) In addition to the review specified in (d) of this section, the assigned attorney shall notify the Administrative Regulation Review Committee, the president of the senate, and the speaker of the house of representatives of any provision of the proposed regulation that may be inconsistent with legislative intent and appropriate for additional legislative oversight as a result.

(g) Except as provided in this section, the Legislative Affairs Agency may not release any information regarding its review of a proposed regulation under this section.

(h) The process of review of a proposed regulation under this section does not affect a state agency's authority to complete its proposed action regarding the regulation. Suggestions for changes to a proposed regulation made by the Legislative Affairs Agency are not binding on a state agency.

(i) No action may be brought for the failure of the Legislative Affairs Agency to conduct a legal review under this section.

(j) The provisions of (b) - (i) of this section do not apply to proposed regulations of the Board of Game or the Board of Fisheries.

(k) In this section, "proposed regulation" means a proposed adoption, amendment, or repeal of a regulation.

History -

(Sec. 2 ch 164 SLA 2004)

Cross References -

For provision exempting written notification provided under (e) of this section from the general right to inspect public records, see AS 40.25.120(a)(11).

MEMORANDUM February 18, 2011

SUBJECT: Review of Proposed Regulations by the Legislative Affairs Agency (Work Order No. 27-LS0559\A)

TO: Representative Carl Gatto
Chair of the House Judiciary Committee

FROM: Terri Lauterbach
Legislative Counsel

Enclosed is a draft of a bill you requested to "fix some flaws" in AS 24.20.105, as we discussed after the meeting of the Administrative Regulation Review Committee (ARRC) on Tuesday.[1]

Section 1. This section of the bill accomplishes several things:

(1) The new language on page 1 allows the reviewing attorney in LAA to consult with the prime sponsor of the relevant bill if the attorney is reviewing proposed regulations that implement newly enacted legislation. You only asked specifically for the prime sponsor to get copies of memos denoting possible legal flaws determined in these kinds of reviews, but I thought it was probably in keeping with your goal to also add this consultation aspect as well. Let me know if I erred in this regard and I can remove the language. Also, please note that I have limited this consultation requirement to situations when the prime sponsor is still a member of the legislature. In addition to the logistics that may be difficult when the prime sponsor is no longer a member, it seems to me in keeping with the confidential nature of these reviews that only sitting legislators be included in the review process under AS 24.20.105.

(2) The first two lines on page 2 allow LAA review memos to be sent to a standing committee or to the Legislative Council if they have requested a review of some proposed regulations because of their "major policy implications." Under current law,

---

[1] Although I drafted the enclosed bill, Lisa Kirsch's name appears in the upper right-hand corner of page 1. This has been done so that, if you introduce the bill, legislators and staff will have a full-time attorney to call with questions or amendments related to the bill. As I mentioned at the ARRC meeting, I am only half-time. Lisa Kirsch reviewed proposed regulations under AS 24.20.105 for most of the past three years, and is knowledgeable about the issues addressed in this bill draft. Feel free to call either one of us about the draft.

these entities can request a review and that request is given priority status under AS 24.20.105(b)(2), but the law, through an oversight in the original legislation, does not allow them to get the memo that could result from the review. Current law allows these memos to go only to the Department of Law, the state agency proposing the regulations, the ARRC, the senate president, and the speaker of the house. (See AS 24.20.105(e) and the restriction on LAA's disclosure under AS 24.20.105(g).)

(3) Lines 3 - 7 on page 2 allow LAA review memos to be sent to the prime sponsor of the relevant legislation if a review of proposed regulations that implement newly enacted legislation shows legal problems of the type described in AS 24.20.105(d). As with the consultation requirement for prime sponsors described above in (1), I have limited this memo-sharing requirement to prime sponsors who are still sitting legislators.

(4) Lines 7 - 10 on page 2 require LAA to communicate to a standing committee or the Legislative Council the results of a review that was requested by either of them in situations where the reviewer has not found legal flaws. Currently, AS 24.20.105 only allows LAA to communicate with respect to reviews where legal flaws are perceived, and that makes sense with respect to the vast number of reviews, as the relevant entities would normally be interested only if the reviewing attorney sees problems. However, with respect to a review requested under AS 24.20.105(b)(2), it seems to me that it would make sense for LAA to be able to respond that a review has been completed but that no problems were found. I have deliberately not required this communication to be in writing so that a phone call could suffice; the requester, of course, could always request that the "no problems" response be in writing.

Sec. 2. This section clarifies that the new provisions of section 1 apply to any reviews ongoing in LAA at the time the bill takes effect even if the notice of proposed regulations was issued before the effective date of the bill.

Sec. 3. This section gives the bill an immediate effective date. There are no impediments I can think of that would keep LAA from immediately being able to implement any of the new provisions of section 1.

HB 215

<TARGET><BILL>HB 215</BILL><SUBJECT>HB 215</SUBJECT><COMM>SJUD27</COMM></TARGET>

ALASKA GASLINE DEVELOPMENT CORP.
GAS FOR ALASKANS

March 15, 2012

Joe Dubler
Vice President/Chief Financial Officer
Alaska Gasline Development Corporation
3301 C Street, Suite 100
Anchorage, Alaska 99503

Dear Mr. Dubler:

The question you have asked me to address is whether the shipment of natural gas recovered below the 68th Parallel in the pipeline currently under consideration by the Alaska Gasline Development Corporation ("AGDC") could expose the state to liability under AS 43.90.440(a).

AGDC has been very careful and deliberate to avoid creating liability under AS 43.90.440(a). The answer to your question is no.

The potential liability you have asked about arises in the context of the Alaska Gasline Inducement Act ("AGIA" at AS 43.90). AGIA authorized the Commissioner of Revenue and the Commissioner of Natural Resources, acting jointly (the "Commissioners"), to award a license which, under AS 43.90.110 entitles the licensee to certain inducements.

The stated purpose of AGIA (AS 43.90.010) is to encourage expedited construction of a natural gas pipeline that (1) facilitates commercialization of North Slope gas resources in the state; (2) promotes exploration and development of oil and gas resources on the North Slope in the state; (3)maximizes benefits to the people of the state from the development of oil and gas resources in the state; and (4) encourages oil and gas lessees and other person to commit to ship natural gas from the North Slope to a gas pipeline system for transportation to markets in this state or elsewhere. To further that purpose, the inducements in AS 43.90.110 include (1) matching state contributions for certain qualifying expenditures; (2) the benefit of an Alaska Gasline Inducement Act coordinator who has the authority prescribed in AS 43.90.250 (the "License Inducements") -- I note that AS 43.90.250 contains no explicit grant of authority to the coordinator. The application requirements set forth in AS 43.90.130 include a "thorough description of a proposed natural gas pipeline project for transporting natural gas from the North Slope to market. . . ."

In addition to the License Inducements, Article 3 of AGIA sets forth a "resource inducement" (AS 43.90.310), which is accompanied by a gas production tax exemption (AS 43.90.320), and a system of inducement vouchers (AS 43.90.330).

The foregoing summarization of AGIA provisions clearly demonstrate (as emphasized by the underlining) that AGIA's focus is on the transportation of "North Slope" natural gas. The definitions provisions of AGIA make it clear (as set forth below in this opinion) that "North Slope" means north of the 68th Parallel.

The potential liability to the state arises under AS 43.90.440(a). In that subsection, the state grants to the licensee assurances that the licensee has exclusive enjoyment of the inducements provided under this chapter before the commencement of commercial operations. If, before the commencement of commercial operations, the state extends to another person preferential royalty or tax treatment or grant of state money for the purpose of facilitating the construction of a competing natural gas pipeline project in this state, and if the licensee is in compliance with the requirements of the license and with the requirements of state and federal statutes and regulations relevant to the project, the licensee is entitled to payment from the state of an amount equal to three times the total amount of the expenditures incurred and paid by the licensee that are qualified expenditures for the purposes of AS 43.90.110 that the licensee incurred in developing the licensee's project before the date that the state first extended preferential treatment to another person.

For purposes of the liability described in the preceding paragraph, a "competing natural gas pipeline project" means a project designed to accommodate throughput of more than 500,000,000 cubic feet a day of North Slope gas to market. (AS 43.90.440(c)(1)). AGIA defines "North Slope" to mean that part of the state that lies north of 68 degrees North latitude. (AS 43.90.900(16)).

It follows that the shipment of natural gas in any quantity cannot create a "competing natural gas pipeline project" if the gas is not "North Slope" gas, and gas is not "North Slope" gas unless it is recovered north of 68 degrees North latitude. As long as the AGDC pipeline is not designed to accommodate throughput of more than 500,000,000 cubic feet a day of North Slope gas to market, the liability provisions of AS 43.90.440(a) will not apply.

Sincerely,

Kenneth E. Vassar

MEMORANDUM April 15, 2011

SUBJECT: Review of CSHB 215(FIN) am (Work Order No. 27-LS0741\E.A)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee
Attn: Cindy Smith

FROM: Donald M. Bullock Jr.
Legislative Counsel

You asked for a review of CSHB 215(FIN) am (bill) to identify constitutional or statutory conflict. You specifically want to know how *Moore v. State*[1] may apply to the bill.

Local or special legislation.

Sections 1 - 4 of the bill relate to covenants in AS 38.35.120(a) that the Alaska Housing Finance Corporation (AHFC) would not be bound to agree to as a condition of receiving a right-of-way lease. The covenants in AS 38.35.120(a) were enacted by the legislature and the bill would make several of those covenants inapplicable to a lease entered into with AHFC. Carving out an exception to AHFC raises a question under art. II, sec. 19, Constitution of the State of Alaska, as to whether the exclusion unique to AHFC makes the bill a "local or special act" that is contrary to the prohibition. A general Act that excludes the same covenants for any gas pipeline could avoid the "local or special" question. The fact that AHFC is a public corporation and government instrumentality[2] may be a factor considered by the court if faced with a challenge under art. II, sec. 19.

Another factor that may be considered under a challenge under art. II, sec. 19, is the policy expressed in AS 38.35.010(a) of the Right-of-Way Leasing Act. AS 38.35.010(a) reads as follows:

> (a) The natural resources of this state in crude oil and natural gas and in its land for transportation of these resources and their products by pipeline toward markets both in and out of the state are capable of making a significant contribution to the general welfare of the people of this state.

---

[1] 553 P.2d 8 (Alaska 1976).

[2] AS 18.56.020.

> It is the policy of this state that the development, use, and control of a pipeline transportation system be directed to make the maximum contribution to the development of the human resources of this state, the increase in the standard of living for all of its residents, the advancement of existing and potential sectors of its economy, the strengthening of free competition in its private enterprise system, and the careful protection of its incomparable natural environment.

That policy, considered along with the enactment of ch. 7, SLA 2010, which created the Joint In-State Gasline Development Team in AHFC,[3] expresses the state policy to develop an in-state pipeline and have that project developed by AHFC.

In *Baxley v. State*,[4] the Alaska Supreme Court considered an Act that provided relief to a legislative enactment that gave effect to modifications of four state oil and gas leases in the Northstar Oil Field.[5] The Court concluded that the Act was not special legislation, "[b]ecause the Act's exclusive focus on the Northstar leases reflects their unique nature, and because the Act fairly and substantially relates to legitimate state purposes[.]"

AHFC would not be required to agree to the covenants from which it is excluded under the bill. Considering the state policy expressed in AS 38.35.010 and the enactment of AS 38.34 (that requires AHFC to develop a gas pipeline project), it is likely that a court would find that the favorable treatment of AHFC in the bill relates to legitimate state purposes. It is reasonable to expect that a court would find that bill does not violate art. II, sec. 19, Constitution of the State of Alaska.

Standing and the limitations on actions relating to the right-of-way lease.

Sections 5 and 6 of the bill amend AS 38.35.200. Currently, AS 38.35.200 limits standing to object to a right-of-way lease, the period in which an objection must be raised, and the issues relating to the issuance of the right-of-way lease that are subject to judicial review.[6] The period for raising an objection is 60 days after the commissioner of

---

[3] AS 38.34.030.

[4] 958 P.2d 422 (Alaska 1998).

[5] 958 P.2d at 424.

[6] Sec. 38.35.200. Judicial review of decisions of commissioner on application. (a) An applicant or competing applicant or a person who has a direct financial interest affected by the lease who raises objections within 60 days of the publication of notice under AS 38.35.070 are the only persons with standing to seek judicial review of a decision of the commissioner under AS 38.35.100.

(b) The only grounds for judicial review of a decision of the commissioner are

natural resources (commissioner) publishes notice that an application for a right-of-way lease has been received under AS 38.35.070.

In *Moore v. State*, the case you mentioned in your request, the Alaska Supreme Court stated, "Whether a party has standing to obtain judicial resolution of a controversy depends on whether the party has sufficient personal stake in the outcome of the controversy."[7] The plaintiffs in *Moore*, who for the most part were commercial fishermen, claimed that they would be adversely affected if oil exploration and production were to be allowed in Kachemak Bay. The court concluded that the plaintiffs' interest in the outcome is essentially economic, and, "As such, it clearly meets the injury-in-fact requirement for standing."[8] Under the decision in *Moore*, the direct financial interest requirement for standing in the present AS 38.35.200 and in the proposed amended version may be satisfied by a person whose livelihood may be affected by a right-of-way lease or an action related to that lease. To secure standing, a person must raise the required objection with 60 days after the notice of an application has been published.

Section 5 of the bill limits standing to the same persons as in current law -- a competing applicant, a person that has a direct financial interest affected by the lease, and the applicant. The bill moves the placement of the naming of the applicant so that the amended AS 38.35.200(a) makes the 60-day period to object applicable to the competing applicant and the person with the directly affected financial interest, but removes the applicant from the requirement to raise an objection during the 60-day limitation period. This is logical because the basis for the applicant's appeal may not arise until the commissioner's decision on the application.

Section 5 further amends AS 38.35.200(a) by adding judicial review of "**an action described in (c) of this section**." Under the amended language, an applicant is not subject to the limitations in AS 38.35.200(c), which is added by sec. 6 of the bill. However, a competing applicant or a person with the affected direct financial interest must make an objection within the 60-day period described in AS 38.35.200(a) to have standing to seek judicial review. Although other provisions of law may provide for appeals of a state commissioner or agency action described in AS 38.35.200(c), the subsection is, after making an exception for the applicant under AS 38.35.200(a), prefaced with the phrase "notwithstanding any contrary provision of law. . . ." If a

---

(1) failure to follow the procedures set out in this chapter; or

(2) abuse of discretion so capricious, arbitrary, or confiscatory as to constitute a denial of due process. (Sec. 1 ch. 72 SLA 1972; am. Sec. 19 ch. 3 FSSLA 1973)

[7] *Moore v. State*, 553 P.2d 8, 23 (Alaska 1976).

[8] 553 P.2d at 24.

conflicting law is applicable but does not have a similar "notwithstanding" limitation, the conflict likely would be resolved in favor of the limitations in AS 28.35.200(c).

There may be an access to the courts issue raised if an action that is the basis for a person to seek judicial review is not reasonably foreseen during the 60-day period. The impacted person may still try to access the courts and challenge the 60-day period to acquire standing as barring access to the courts. Whether a court would set aside the 60-day period to acquire standing is difficult to predict; the outcome may depend on the issue that is presented and the alleged risk or harm.

In any case, the amended AS 38.35.200 is an incentive for anyone with even the remotest possibility of being affected by a right-of-way lease or an action related to that lease to raise an objection to preserve standing.

Applicability of art. VIII, sec. 10 of the Alaska constitution.

Article VIII, sec. 10, Constitution of the State of Alaska, prohibits leases of state lands "without prior public notice and other safeguards of the public interest as may be prescribed by law." The Right-of-Way Leasing Act provides for public notice, a hearing, and findings by the commissioner of natural resources before granting a right-of-way lease application, in whole or in part.

AS 38.35.020 authorizes the commissioner to grant a noncompetitive right-of-way lease. The requirements that must be met to be eligible for a right-of-way lease are within AS 38.35, as well as the process for applying. A person seeking a right-of-way lease begins the process by filing an application[9] that is followed by the publication of a notice stating that an application has been received.[10] It is the publication of this notice that starts the 60-day period for raising an objection and it is during this 60-day period that a person must establish standing to pursue judicial review under AS 38.35.200, as amended by the bill.

Consistent with the requirements in art. VIII, sec. 10 of the constitution, by enacting AS 38.35.070 the legislature required prior public notice before the commissioner may approve a lease application. AS 38.35.080 requires a public hearing and requires the commissioner to prepare an analysis of the application, which is made available at least 30 days before the date set for the hearing.

After the hearing, AS 38.35.100 requires the commissioner to determine and make a written finding on an application as to whether "the applicant is fit, willing, and able to perform the transportation or other acts proposed in a manner that will be required by the

---

[9] AS 38.35.050.

[10] AS 38.35.070.

present or future public interest." If the commissioner finds the application may be granted, the commissioner may grant the application in whole or in part. The limitations in AS 38.35.200 in current law limit standing to seek judicial review of a decision made under AS 38.35.100.

Article VIII, sec. 10 of the state constitution requires that no lease of state land "shall be made without prior public notice and other safeguards of the public interest as may be prescribed by law." The legislature has prescribed that there be notice of a right-of-way application (AS 38.35.070), analysis and public hearing (AS 38.35.080), and a decision by the commissioner based on written findings (AS 38.35.100). Whether this process satisfies the requirements in art. VIII, sec. 10, is a question of law which thus far has not been addressed by the Alaska Supreme Court. Under AS 38.35.200(c), as added by the bill, a claim alleging the invalidity must be brought within 60 days after the effective date of the Act enacting the subsection, and a claim alleging that an action will deny rights under the state constitution must be brought within 60 days after the date of an action.

The limitations on bringing a claim under AS 38.35.200(c) are set by law; the equitable remedy of laches is not applicable. With regard to the defense of laches, which is discussed in the *Moore* case, the Alaska Supreme Court wrote:[11]

> The defense of laches is inapplicable to an action at law. Although this proposition has never been directly asserted by the court, this was our implicit conclusion in *State v. Alex*, 646 P.2d 203, 215 (Alaska 1982). Moreover, limiting the defense of laches to equitable actions is in accord with the case law of virtually every other jurisdiction. When a party is seeking to enforce a legal right, as opposed to invoking the discretionary equitable relief of the courts, the applicable statute of limitations should serve as the sole line of demarcation for the assertion of the right.

In *Moore v. State*, the defendants raised the defense of laches, and were successful in obtaining summary judgment in their favor on that basis on the lower court.[12] The Supreme Court reversed after reviewing the timing of events in the lease sale, from the call for nominations, through the lease sale, the issuance of the leases, the issuance of the first permits in November 1974, and the filing of the plaintiff's suit in December 1974.[13] The court found that the plaintiffs were "not guilty of inexcusable delay" and sufficient prejudice had not been established on the record.[14]

Actions by the Department of Environmental Conservation.

In the course of considering HB 215, concern was expressed over the effect of limiting review of the actions in the proposed AS 38.35.200(c) on the authority delegated to the Department of Environmental Conservation by the United States Environmental Protection Agency. AS 38.35.200(d) was added in the House Judiciary Committee and was adopted in CSHB 215(JUD) to avoid this conflict.

This analysis may not be conclusive or address every issue raised by CSHB 215(JUD) am given the limited time available as the session ends. If you do hear the bill in your committee, you may wish to seek additional comments from the Department of Law, who would defend the enacted provisions of the bill.

If I may be of further assistance, please advise.

Cindy,

At the Senate Judiciary hearing yesterday on HB 215, Senator French requested that our attorney, John Hutchins, send the case citations for the U.S Supreme Court case he was discussing. That citation is *Yakus v. United States*, 321 U.S. 414 (1944).

In addition to the citation, I have also attached the court's opinion for Senator French and other committee members to review. We also thought it would be helpful to provide *Lloyd A. Fry Roofing Co. v. EPA*, 554 F.2d 885 (8th Cir. 1977), which much more explicitly uses *Yakus* to uphold a shorter period to bar a challenge to constitutionality.

We hope this helps answer some of the questions on this topic.

We are also working on putting together a response to Senator Paskvan's request relating to the Clean Water Act and the extent of federal jurisdiction. This is a complex area of law that is ever evolving. We will get a response to the committee on this as soon as possible.

Thank you.

United States Court of Appeals,
Eighth Circuit.
LLOYD A. FRY ROOFING CO., Appellant,
v.
UNITED STATES ENVIRONMENTAL PROTECTION AGENCY et al., Appellees.

No. 76-1731.
Submitted March 15, 1977.
Decided May 11, 1977.

Alleged air polluter sought injunction against enforcement of Environmental Protection Agency's notice of violation and EPA order. The United States District Court for the Western District of Missouri, Elmo B. Hunter, J., 415 F.Supp. 799, dismissed and plaintiff appealed. The Court of Appeals, Matthes, Senior Circuit Judge, held (1) preenforcement review in the district court of notice of violations issued by the environmental protection agency under the Clean Air Act is precluded; (2) plaintiff must assert its claims as a defense or counterclaim in any action brought by the administrator; (3) statute providing that petition for review of administrator's action in promulgating any implementation plan may be filed only in the appropriate court of appeals and must be filed within 30 days of promulgation was applicable even though plaintiff challenged regulation as being unconstitutionally vague on its face.

Affirmed.

The importance which administrator of environmental protection agency is to accord to alleged polluter's efforts to comply with requirements of Clean Air Act is a matter of discretion. Clean Air Act, § 113(a)(4) as amended 42 U.S.C.A. § 1857c-8(a)(4).

***886** Thomas J. Leittem, Kansas City, Mo., for appellant; John H. Altergott, Jr., Kansas City, Mo., on the brief.

Maryann Walsh, Atty., Land and Natural Resource Div., Appellate Section, U. S. Dept. of Justice, Washington, D. C., for appellee; Peter R. Taft, Asst. Atty. Gen., Edmund B. Clark, Atty., and Todd M. Joseph, E. P. A., Washington, D. C., on the brief.

Before MATTHES, Senior Circuit Judge, and WEBSTER and HENLEY, Circuit Judges.

MATTHES, Senior Circuit Judge.

The primary question for determination on this appeal is whether an alleged violator of section 113(a)(1) of the Clean Air Act, 42 U.S.C. s 1857c-8(a)(1), is empowered to maintain a pre-enforcement action to test the validity of an abatement order issued by the Administrator of the Environmental Protection Agency (EPA). This is a question of first impression in the courts of appeals. Lloyd A. Fry Roofing Company (plaintiff) filed such an action against the United States Environmental Protection Agency, Russell Train, as EPA Administrator, Jerome H. Svore, as EPA Administrator for Region VII, and Earl J. Stephenson, as Director of the Enforcement Division for Region VII. The district court granted defendants' motion to dismiss the action

(Cite as: 554 F.2d 885)

for lack of subject matter jurisdiction and plaintiff has appealed from the dismissal.

I

Plaintiff operates an asphalt roofing plant in North Kansas City, Missouri. A by-product of its operation is a mixture of asphalt particles and gas which, after passing through the plant's air pollution control system, is emitted as a plume from a 100 foot high stack.

Effective January 5, 1969 the EPA Administrator approved certain regulations known as "Air Quality Standards and Air Pollution Control Regulations for the Kansas City Metropolitan Area," which had been submitted by Missouri as part of the state implementation plan pursuant to section 110(a) of the Clean Air Act, 42 U.S.C. s 1857c-5. Regulation V Restriction of Emission of Visible Air Contaminants prohibits the discharge of air contaminants of a certain density, except where failure to meet the requirement stems solely from the presence of "uncombined water." Regulation V provides in pertinent part as follows:

A. Restrictions Applicable to All Installations

No person may discharge into the ambient air from sources of emission whatsoever any air contaminant a.) of a shade or density equal to or darker than designated as No. 1 on the Ringelmann Chart, or b.) of such capacity (sic) as to obscure an observer's view to a degree equal to or greater than does smoke designated as No. 1 on the Ringelmann Chart.

B. Exceptions

***887** 2. Where the presence of uncombined water is the only reason for failure of an emission to meet the requirements of Section A of this Regulation V, such sections shall not apply.

C. Method of Measurement

The Ringelmann Chart shall be the standard in grading the shade or opacity of visible air contaminant emissions. The Executive Secretary may with the consent of the source operator employ any other means of measurement which give comparable results of greater accuracy.

On September 25, 1975, defendant Svore, as Regional Administrator of EPA, issued a notice informing plaintiff that it was in violation of Regulation V. The notice was based on visual smoke readings which indicated that the opacity of the plume from plaintiff's stack exceeded that allowable under Regulation V. Plaintiff requested an opportunity to confer with EPA representatives concerning the alleged violation. A formal evidentiary hearing was held on November 7, 1975 at EPA's Region VII office in Kansas City. By letter of January 9, 1976, plaintiff was directed to install sampling ports and scaffolding on the main stack in preparation for an EPA stack test. Plaintiff consented to the stack test, but refused to install the necessary equipment at its own expense. On March 9, 1976, defendant Stephenson, as Director of the Enforcement Division for Region VII, issued an order pursuant to section 113(a) (1) of the Clean Air Act, 42 U.S.C. s 1857c-8(a)(1) directing plaintiff to eliminate opacity violations within the time schedule set forth therein.

On April 13, 1976, plaintiff filed a verified complaint seeking a temporary restraining order and a preliminary injunction to set aside the notice of violation and order as being unlawful, arbitrary, and capricious. Additionally, plaintiff sought a declaratory judgment finding Regulation V unconstitutional. Plaintiff alleged, in effect, that it was in compliance with the regulation because it was emitting a "wet" plume of less than twenty percent opacity and that the regulation was unconstitutionally vague because it contained no definition of "uncombined water" and failed to advise the industry of the scope of prohibited conduct. Jurisdiction was asserted under the Administrative Procedure Act, 5 U.S.C. s 701 et seq., the federal question statute, 28 U.S.C. s 1331, the statute conferring jurisdiction over cases arising under statutes affecting commerce, 28 U.S.C. s 1337, and the mandamus statute, 28 U.S.C. s 1361.

On May 6, 1976, defendants filed a motion to dismiss the complaint insofar as it sought pre-enforcement review of the abatement order and judicial review of Regulation V. Defendants' motion to dismiss was based upon contentions that Congress intended to preclude pre-enforcement review of EPA abatement orders and to make the United States Court of Appeals the exclusive forum for review of federally approved state implementation plans. On June 25, 1976, the district court filed a judgment granting de-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

fendants' motion to dismiss. The court concluded, in an accompanying memorandum opinion, that it lacked jurisdiction to grant the relief requested in plaintiff's complaint. See Lloyd A. Fry Roofing Co. v. United States Environmental Protection Agency, 415 F.Supp. 799 (W.D.Mo.1976).

II

We address, initially, the question whether the district court correctly ruled that it lacked jurisdiction to review the abatement order issued against plaintiff. Plaintiff argues, and the defendants concede, that even in the absence of any provision for judicial review there is a strong presumption in favor of judicial review of final agency action, and that to preclude such review there must be a showing of "clear and convincing evidence" of a contrary legislative intent, Abbott Laboratories v. Gardner, 387 U.S. 136, 141, 87 S.Ct. 1507, 18 L.Ed.2d 681 (1967); see Dunlop v. Bachowski, 421 U.S. 560, 567, 95 S.Ct. 1851, 44 L.Ed.2d 377 (1975); Ortego v. Weinberger, 516 F.2d 1005, 1009 (5th Cir. 1975); Garvey v. Freeman, 397 F.2d 600, 605 (10th Cir. 1968). The crux of the controversy is whether the ***888** pertinent legislative history and the statutory scheme demonstrate that Congress intended to foreclose judicial review of an EPA compliance order in an action for pre-enforcement review instituted by an alleged violator.

Under section 113(a)(1) of the Clean Air Act, 42 U.S.C. s 1857c-8(a)(1), [FN1] whenever ***889** the Administrator finds that any person is in violation of a state implementation plan he must notify the alleged violator and the applicable state of his finding. If the violation continues unabated for thirty days, the Administrator may either issue an abatement order, which does not become effective until after the alleged violator has had an opportunity to confer with the Administrator, see 42 U.S.C. s 1857c-8(a)(4), or may commence a civil action for appropriate relief in the district court, pursuant to 42 U.S.C. s 1857c-8(b). Violators are subject to a fine of up to $25,000 for each day of violation and imprisonment for up to one year, see id. s 1857c-8(c).

FN1. Section 113 of the Clean Air Act, 42 U.S.C. s 1857c-8 provides in full:

s 1857c-8. Federal enforcement procedures Determination of violation of applicable implementation plan or standard; notification of violator; issuance of compliance order or initiation of civil action upon failure to correct; effect of compliance order; contents of compliance order

(a)(1) Whenever, on the basis of any information available to him, the Administrator finds that any person is in violation of any requirement of an applicable implementation plan, the Administrator shall notify the person in violation of the plan and the State in which the plan applies of such finding. If such violation extends beyond the 30th day after the date of the Administrator's notification, the Administrator may issue an order requiring such person to comply with the requirements of such plan or he may bring a civil action in accordance with subsection (b) of this section.

(2) Whenever, on the basis of information available to him, the Administrator finds that violations of an applicable implementation plan are so widespread that such violations appear to result from a failure of the State in which the plan applies to enforce the plan effectively, he shall so notify the State. If the Administrator finds such failure extends beyond the 30th day after such notice, he shall give public notice of such finding. During the period beginning with such public notice and ending when such State satisfies the Administrator that it will enforce such plan (hereafter referred to in this section as "period of federally assumed enforcement"), the Administrator may enforce any requirement of such plan with respect to any person

(A) by issuing an order to comply with such requirement, or

(B) by bringing a civil action under subsection (b) of this section.

(3) Whenever, on the basis of any information available to him, the Administrator finds that any person is in violation of section 1857c-6(e) of this title (relating to new source performance standards), section 1857c-7(c) of this title (relating to standards

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

for hazardous emissions), or section 1857c-10(g) of this title (relating to energy-related authorities) is in violation of any requirement of section 1857c-9 of this title (relating to inspections, etc.), he may issue an order requiring such person to comply with such section or requirement, or he may bring a civil action in accordance with subsection (b) of this section.

(4) An order issued under this subsection (other than an order relating to a violation of section 1857c-7 of this title) shall not take effect until the person to whom it is issued has had an opportunity to confer with the Administrator concerning the alleged violation. A copy of any order issued under this subsection shall be sent to the State air pollution control agency of any State in which the violation occurs. Any order issued under this subsection shall state with reasonable specificity the nature of the violation, specify a time for compliance which the Administrator determines is reasonable, taking into account the seriousness of the violation and any good faith efforts to comply with applicable requirements. In any case in which an order under this subsection (or notice to a violator under paragraph (1)) is issued to a corporation, a copy of such order (or notice) shall be issued to appropriate corporate officers.

Civil action for appropriate relief; jurisdiction; venue; notice to appropriate State agency

(b) The Administrator may commence a civil action for appropriate relief, including a permanent or temporary injunction, whenever any person

(1) violates or fails or refuses to comply with any order issued under subsection (a) of this section; or

(2) violates any requirements of an applicable implementation plan (A) during any period of Federally assumed enforcement, or

(B) more than 30 days after having been notified by the Administrator under subsection (a)(1) of this section of a finding that such person is violating such requirement; or

(3) violates section 1857c-6(e), 1857c-7(c), or 1857c-10(g) of this title; or

(4) fails or refuses to comply with any requirement of section 1857c-9 of this title.

Any action under this subsection may be brought in the district court of the United States for the district in which the defendant is located or resides or is doing business, and such court shall have jurisdiction to restrain such violation and to require compliance. Notice of the commencement of such action shall be given to the appropriate State air pollution control agency.

Penalties

(c)(1) Any person who knowingly

(A) violates any requirement of an applicable implementation plan (i) during any period of Federally assumed enforcement, or (ii) more than 30 days after having been notified by the Administrator under subsection (a)(1) of this section that such person is violating such requirement, or

(B) violates or fails or refuses to comply with any order issued by the Administrator under subsection (a) of this section, or

(C) violates section 1857c-6(e), section 1857c-7(c), or section 1857c-10(g) of this title

shall be punished by a fine of not more than $25,000 per day of violation, or by imprisonment for not more than one year, or by both. If the conviction is for a violation committed after the first conviction of such person under this paragraph, punishment shall be by a fine of not more than $50,000 per day of violation, or by imprisonment for not more than two years, or by both.

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

> (2) Any person who knowingly makes any false statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this chapter or who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this chapter; shall upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than six months, or by both.

[1][2] Section 702 of the Administrative Procedure Act, 5 U.S.C. s 702, does not confer jurisdiction to review agency action where the regulatory statute itself precludes judicial review, see Califano v. Sanders.--U.S. --, 97 S.Ct. 980, 985, 51 L.Ed.2d 192 (1977). Section 113 of the Act contains no provision specifically providing for pre-enforcement judicial review of an EPA abatement order, nor does it expressly preclude such review. A congressional intent to limit review need not be express, but may be drawn from a statute's legislative history, purpose, and design, see Consumer Federation of America v. FTC, 169 U.S.App.D.C. 136, 515 F.2d 367, 370 (1975); Hahn v. Gottlieb, 430 F.2d 1243, 1249 (1st Cir. 1970). Our analysis begins, then, with a brief review of the legislative history of section 113, particularly the process by which it was enacted as part of the Clean Air Act Amendments of 1970, Pub.L.No. 91-604, 84 Stat. 1676 et seq.[FN2]

> FN2. The legislative history of the 1970 Amendments is fully discussed in Bonine, The Evolution of "Technology Forcing" in the Clean Air Act, Environment Reporter Monograph No. 21 (July 25, 1975) (hereinafter cited as Bonine); Luneburg, Judicial Review Under the Clean Air Act Amendments of 1970, 15 B.C.Ind. & Com.L.Rev. 667-78 (1974); Bolbach, The Courts and the Clean Air Act, Environment Reporter Monograph No. 19, at 1-3 (July 12, 1974); Comment, The Aftermath of the Clean Air Amendments of 1970: The Federal Courts and Air Pollution, 14 B.C.Ind. & Com.L.Rev. 724-28 (1973); Note, Clean Air Act Amendments of 1970: A Congressional Cosmetic, 61 Geo.L.J. 153-59 (1972); see also Train v. Natural Resources Defense Council, 421 U.S. 60, 95 S.Ct. 1470, 43 L.Ed.2d 731 (1975).

In 1970 the Ninety-First Congress began considering proposals to amend the Air Quality Act of 1967, Pub.L.No. 90-148, 81 Stat. 485 et seq. (1967) to provide a more effective program to improve air quality. In considering amendments to the previous legislation, Congress expressed an awareness of the need to expedite the implementation and enforcement of air quality standards, see, e. g., H.R.Rep.No. 91-1146, 91st Cong., 2d Sess. (1970), reprinted in 1970 U.S.Code Cong. & Admin.News, p. 5356; S.Rep.No. 91-1196, 91st Cong., 2d Sess. (1970). In the area of enforcement, the House bill, H.R. 17255, 91st Cong., 2d Sess. (1970) directed the Secretary of Health, Education and Welfare to issue a notice of violation to persons who failed to comply with state implementation plan requirements not being enforced by the states. The House proposal further authorized the Secretary to request the Attorney General to bring suit in cases where the state's failure to enforce its implementation plan extends more than thirty days after notification of violation. In a new section 112, the House provided for federal enforcement ***890** of federal emission standards for stationary sources. The House Amendments contained no language either specifically providing for or limiting judicial review.

The bill reported out by the Senate Committee on Public Works as S. 4358, 91st Cong., 2d Sess. (1970), established a new section 116(a) directing the Secretary to issue an abatement order to any person in violation of a state implementation plan not being enforced by the state or any federal stationary source emission standard requiring compliance to begin within seventy-two hours. The Secretary was additionally authorized to institute a civil action to obtain compliance with abatement orders. The Senate measure contained language specifically providing for pre-enforcement judicial review. The pertinent provision read as follows:

> (5) Any person subject to (an abatement order) and who undertakes compliance with such order shall not be foreclosed from instituting in the United States district court for the district in which the alleged violation occurred an action against the Secretary to challenge such order.

The House and Senate approved bills [FN3] were

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

then referred to a Conference Committee for reconciliation. The conferees, in reconciling the two bills, followed in the main the Senate measure, which as a whole, was more stringent and detailed than its House counterpart. See generally Bonine, supra note 2, at 11-21; Berlin, Federal Aid for Air and Solid Wastes Programs, Environmental Reporter Monograph No. 5, at 5 (October 2, 1970). The measure which emerged from the Conference Committee, and which was subsequently enacted into law as section 113 of the Act, 42 U.S.C. s 1857c-8, contained no language either providing for or limiting review. A reading of the report of the Conference Committee, see 1970 U.S.Code Cong. & Admin.News, p. 5374, sheds no light on the reason for the deletion of the Senate-approved language preserving the right to pre-enforcement review.

> FN3. The House and Senate bills, H.R. 17255 and S. 4358, are reprinted in full in A Legislative History of the Clean Air Amendments of 1970 (Jan. 1974) (prepared by the Environmental Policy Div., Cong. Research Serv., Library of Cong., for the Senate Comm. on Public Works, Serial No. 93-18).

Defendants point to the "silent deletion" as evidence of a "clear and convincing congressional intent" to preclude review. It is their theory that a person subject to an EPA abatement order can obtain review only by asserting his claim as a counterclaim or defense to a criminal or civil enforcement action commenced by the EPA pursuant to 42 U.S.C. s 1857c-8(b). This theory was adopted in large part by the district court, see Lloyd A. Fry Roofing Co. v. United States Environmental Protection Agency, supra at 805. Plaintiff contends that a more reasonable inference to be drawn from the deletion is that the Conference Committee recognized that the right to pre-enforcement review is so well established that specific provision for it need not be made. Thus, plaintiff argues, the deletion was meant to have no substantive effect.

[3] We recognize, of course, that there being no express provision in the Act prohibiting pre-enforcement judicial review of EPA abatement orders, the Agency bears a heavy burden to overcome the strong presumption favoring such review, see Dunlop v. Bachowski, supra, 421 U.S. at 567, 95 S.Ct. 1851. Nevertheless, the legislative history, when viewed together with the statutory language, the structure of the statutory scheme, and its design, does not support plaintiff's conclusion. First, the action of the Conference Committee in deleting language that would have expressly preserved the right to pre-enforcement review, although not by itself conclusive, strongly suggests that the intent of the omitted portion was rejected in the bill as passed, see Gulf Oil Corp. v. Copp Paving Co., 419 U.S. 186, 200, 95 S.Ct. 392, 42 L.Ed.2d 378 (1974).

Secondly, as defendants note in their brief, pre-enforcement judicial review is ***891** wholly inconsistent with the enforcement mechanism established by Congress. Section 113 of the Act, 42 U.S.C. s 1857c-8, provides for two alternative methods of enforcement. If a violation of the Act continues unabated for more than thirty days after issuance of a notice of violation, the Agency may either (1) immediately commence a civil action for injunctive or other relief; or (2) issue a compliance order, which is not effective until after an informal administrative conference. Under the second alternative, if the order issued by the Agency is not met within the specified time or informal efforts to abate prove unsatisfactory, the Agency is authorized to initiate an action in the district court to compel compliance. Pre-enforcement review would severely limit the effectiveness of the conference procedure as a means to abate violations of the Act without resort to judicial process. Under plaintiff's reading of the statute, the Agency could easily side-step the possibility of pre-enforcement review by filing suit in the district court without prior issuance of an order pursuant to s 1857c-8(a)(1).

While this is a case of first impression, prior case law is entirely consistent with our conclusion. In West Penn Power Co. v. Train, 522 F.2d 302, 312 (3d Cir. 1975), for example, West Penn filed a complaint in the district court seeking injunctive and declaratory relief protecting it from any duty to comply with certain emission standards established as part of Pennsylvania's implementation plan after the Agency issued a notice of violation. In holding that the district court properly dismissed West Penn's complaint for lack of jurisdiction, the Third Circuit stated that at least two alternate avenues for relief would be available. First, the court noted, West Penn could seek redress in the state courts. Id. at 311. In describing the second route to relief the court stated as follows:

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

The second route to relief is opened by 42 U.S.C. s 1857c-8(a)(4) * * *. At the time West Penn brought this action, it had received only a notice of violation from Train. After receiving the notice, West Penn had the opportunity both for informally negotiating its differences with Train and for presenting its cause to a federal district court, should EPA take formal steps to enforce the regulations allegedly violated by West Penn. Thus West Penn has future relief available to it in both the state and federal courts.

Id. at 312 (emphasis added); accord, Reichhold Chemicals v. EPA, 8 Envir.Rep.Cases 1207 (7th Cir., June 2, 1975).

The Clean Air Act Amendments of 1970 were "a drastic remedy to what was perceived as a serious and otherwise uncheckable problem." Union Electric Co. v. EPA, 427 U.S. 246, 256, 96 S.Ct. 2518, 2525, 49 L.Ed.2d 474 (1976). Upon issuance of an EPA compliance order, the alleged violator is subject to penalties of up to $25,000 per day of violation and up to one year imprisonment. Plaintiff can protect itself from the unconscionable accumulation of large fines, however, by invoking the equitable doctrine of laches if the Agency fails to act promptly to seek enforcement.[FN4]

> FN4. Considering the heavy penalty to which a violator may be subjected, the Administrator is admonished to proceed expeditiously to institute enforcement proceedings in the event the alleged violator fails to comply with the timetable set forth in the abatement order so as to minimize any penalty which may be imposed.

[4] In sum, we are mindful that the pre-enforcement issue presents a close question. But we are persuaded by the legislative history of the Clean Air Act Amendments of 1970 to hold that plaintiff lacks authority to initiate and maintain litigation to challenge the EPA's order issued on March 9, 1976, and that plaintiff must assert its claims as a defense or counterclaim in any action brought by the Administrator of EPA under section 113 of the Clean Air Act, 42 U.S.C. s 1857c-8. The scales are balanced in favor of defendants by the action of the Conference Committee in deleting section 116(a)(5) of the Senate bill, which specifically and unequivocally sanctioned a pre-enforcement action by an alleged violator. Certainly Congress fully comprehended its power to grant access to ***892** the federal courts by any aggrieved person. And likewise, Congress knew that it could withhold such right. The course of passage of the House and Senate bills referred to supra convincingly demonstrate and reinforce this conclusion. The deletion of section 116(a)(5) of the Senate bill by the Conference Committee and the failure of the Congress itself to reincorporate a similar provision in the amended Clean Air Act impel us to rule that the Congress knowingly meant to and did foreclose plaintiff from maintaining this action.

For the foregoing reasons, we hold that the district court correctly determined that it lacked jurisdiction to review the disputed order.

III

We turn then to plaintiff's contention that the district court erroneously determined that it was without jurisdiction to review the constitutionality of Regulation V of the state implementation plan.

Section 307(b)(1) of the Clean Air Act, 42 U.S.C. s 1857h-5(b)(1) [FN5] provides that review of the action of the Administrator in approving state implementation plans may be had within thirty days of such approval in the appropriate court of appeals. The district court held that since plaintiff had failed to challenge Regulation V in the court of appeals within thirty days or promulgation, its constitutional claims "were presented out of time and in the wrong forum." 415 F.Supp. at 806. It is plaintiff's contention that the exclusive jurisdiction of the court of appeals is not applicable here because the Regulation is challenged as being unconstitutionally vague on its face. [FN6] In plaintiff's view, a challenge based solely on a constitutional claim could not have been made in a section 307(b)(1) proceeding.

> FN5. Section 307(b)(1) provides:
>
> (b)(1) A petition for review of action of the Administrator in promulgating any national primary or secondary ambient air quality standard, any emission standard under section 1857c-7 of this title, any standard of performance under section 1857c-6 of this title, any standard under section 1857f-1 of this title (other than a standard required to be

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

> prescribed under section 1857f-1(b)(1) of this title), any determination under section 1857f-1(b)(5) of this title, any control or prohibition under section 1857f-6c of this title, or any standard under section 1857f-9 of this title may be filed only in the United States Court of Appeals for the District of Columbia. A petition for review of the Administrator's action in approving or promulgating any implementation plan under section 1857c-5 of this title or section 1857c-6(d) of this title, or his action under section 1857c-10(c)(2)(A), (B), or (C) of this title or under regulations thereunder, may be filed only in the United States Court of Appeals for the appropriate circuit. Any such petition shall be filed within 30 days from the date of such promulgation, approval, or action, or after such date if such petition is based solely on grounds arising after such 30th day.
>
> FN6. Plaintiff argues that Regulation V does not provide a definite standard to advise industry of the scope of prohibited conduct, particularly because it contains no definition of the term "uncombined water."

[5] We disagree. Plaintiff's attack on the constitutionality of Regulation V falls directly within the purview of section 307(b)(1). As we noted in Union Electric Co. v. EPA, 515 F.2d 206 (8 Cir. 1975), the court of appeals, in reviewing the Administrator's action in approving state implementation plans, determines whether the Administrator's decision was arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with the law, id. at 214; see 5 U.S.C. s 706. In making this determination, the court necessarily considers whether the plan itself is constitutional. See South Terminal Corp. v. EPA, 504 F.2d 646, 655 (1st Cir. 1974).

[6] Plaintiff's contention that the section 307(b)(1) time limitation on its ability to challenge the constitutionality of the regulation does not comport with the requirements of due process is similarly without merit, cf. Union Electric Co. v. EPA, 427 U.S. 246, 96 S.Ct. 2518, 49 L.Ed.2d 474 (1976). In **Yakus v. United States, 321 U.S. 414, 64 S.Ct. 660, 88 L.Ed. 834 (1944)**, the Supreme Court ruled that a sixty day period allowed for protest of wartime price controls established under the Emergency *893 Price Control Act was not unreasonably short. The standard to be applied is whether the period allowed can be said to be reasonable under the circumstances, **id. at 435, 64 S.Ct. 660.** As we have noted, the purpose of the 1970 Amendments was to intensify federal efforts to check what was perceived to be a serious problem of air pollution. The thirty day time limit is fully consistent with the legislative purpose. Moreover, in section 110 of the Act, 42 U.S.C. s 1857c-5, Congress provided for reasonable notice and public hearings prior to the approval of a state implementation plan by the Administrator. The time limit is "not arbitrary but is designed to get issues resolved promptly and thereby prevent delay in cleaning the air." Granite City Steel Co. v. EPA, 501 F.2d 925, 926 (7th Cir. 1974).

Having failed to seek review of Regulation V of the state implementation plan within thirty days of the date of promulgation, plaintiff is now barred from doing so.

IV

[7] Finally, plaintiff argues that it was entitled to pre-enforcement review of its claim that the EPA failed to comply with certain duties mandated by statute. It is plaintiff's contention that the Administrator did not take into account its good faith and attempts to comply with the applicable requirements, in violation of section 113(a)(4) of the Act, 42 U.S.C. s 1857c-8(a)(4). We need not decide whether pre-enforcement review is available in this instance since the Administrator's order specifically stated that the " seriousness of (the) violation and any good faith efforts to comply" had been considered. Plaintiff is apparently challenging not a failure to consider this factor, but rather a failure to accord it controlling importance. This is plainly a matter of discretion.

The judgment is affirmed.

C.A.Mo. 1977.

Supreme Court of the United States.
YAKUS
v.
UNITED STATES.
ROTTENBERG et al.
v.
SAME.

Nos. 374, 375.
Argued Jan. 7, 1944.
Decided March 27, 1944.

Albert Yakus, Benjamin Rottenberg, and B. Rottenberg, Inc., were convicted of making sales of wholesale cuts of beef at prices above maximum prices prescribed by Revised Maximum Price Regulation in violation of the Emergency Price Control Act, the convictions were affirmed, 137 F.2d 850, and the defendants bring certiorari.

Affirmed.

Mr. Justice RUTLEDGE, Mr. Justice ROBERTS, and Mr. Justice MURPHY, dissenting.

On Writs of Certiorari to the United States Circuit Court of Appeals for the First Circuit.

Congress has constitutional authority to prescribe commodity prices as a war emergency measure, and the Emergency Price Control Act as amended by the Inflation Control Act was adopted in exercise of that power. Emergency Price Control Act of 1942, § 1 et seq., 50 U.S.C.A.App. § 901 et seq.; Inflation Control Act of 1942, § 1 et seq., 50 U.S.C.A.App. § 961 et seq.

It is enough to satisfy the requirements of the Emergency Price Control Act that the Administrator finds that prices fixed will tend to achieve the objective of preventing inflation and will conform to statutory standards, and that the court in an appropriate proceeding can see that substantial basis for those findings is not wanting. Emergency Price Control Act of 1942, § 1 et seq., 50 U.S.C.A.App. § 901 et seq.

The essentials of the "legislative functions" are the determination of legislative policy and its formulation and promulgation as a defined and binding rule of conduct, and the essentials are preserved when Congress has specified the basic conditions of fact upon whose existence or occurrence, ascertained from relevant data by a designated administrative agency, it directs that its statutory command shall be effective.

There is no principle of law, or provision of Constitution, which precludes Congress from making criminal the violation of an administrative regulation, by one who has failed to avail himself of an adequate separate procedure for adjudication of its validity, or which precludes the practice of splitting the trial for violations of administrative regulations by committing the determination of the issue of its validity to the agency which created it, and the issue of violation, to court which is given jurisdiction to punish violations.

Where the Emergency Price Control Act created the Emergency Court of Appeals with exclusive jurisdiction to determine validity of price regulations prescribed by Price Administrator and foreclosed any further or other considerations of the validity of a regulation as a defense to prosecution for violation of regulation, the act does not contravene the Sixth Amendment or work an unconstitutional legislative interference with the judicial power. Where the Emergency Price Control Act prescribed the method of achieving legislative inflation and laid down standards to guide Administrator's determination of both occasion for exercise of price-fixing power and particular prices to be established, the standards were sufficiently definite to enable Congress, the courts, and the public to ascertain whether the Administrator has conformed to those standards, and the act is not an unconstitutional "delegation of legislative power". Emergency Price Control Act of 1942, § 1 et seq., 50 U.S.C.A.App. § 901 et seq., Inflation Control Act of 1942, § 1 et seq., 50 U.S.C.A.App. § 961 et seq.

the Emergency Price Control Act of January 30, 1942, 56 Stat. 23, 50 U.S.C.App.Supp. II, s 901 et seq., 50 U.S.C.A. Appendix, s 901 et seq., as amended by the Inflation Control Act of October 2, 1942, 56 Stat. 765, 50 U.S.C.App.Supp. II, s 961 et seq., 50 U.S.C.A. Appendix, s 961 et seq., involves an unconstitutional delegation to the Price Administrator of the legislative power of Congress to control prices; (2) whether s 204(d) of the Act was intended to preclude consideration by a district court of the validity of a maximum price regulation promulgated by the Administrator, as a defense to a criminal prosecution for its violation; (3) whether the exclusive statutory procedure set up by ss 203 and 204 of the Act for administrative and judicial review of regulations, with the accompanying stay provisions, provide a sufficiently adequate means of determining the validity of a price regulation to meet the demands of due process; and (4) whether, in view of this available method of review, s 204(d) of the Act, if construed to preclude consideration of the validity of the regulation as a defense to a prosecution for violating it, contravenes the Sixth Amendment, or works an unconstitutional legislative interference with the judicial power.

Petitioners in both of these cases were tried and convicted by the District Court for Massachusetts upon several counts of indictments charging violation of ss 4(a) and 205(b) of the Act by the willful sale of wholesale cuts of best at prices above the maximum prices prescribed by ss 1364.451—1364.455 of Revised Maximum Price Regulation No. 169, 7 Fed.Reg. 10381 et seq. Petitioners have not availed themselves of the procedure set up by ss 203 ****665** and 204 by which any person subject to a maximum price regulation may test its validity by protest to and hearing before the Administrator, whose determination may be ***419** reviewed on complaint to the Emergency Court of Appeals and by this Court on certiorari, see Lockerty v. Phillips, 319 U.S. 182, 63 S.Ct. 1019, 87 L.Ed. 1339. When the indictments were found the 60 days period allowed by the statute for filing protests had expired.

In the course of the trial the District Court overruled or denied offers of proof, motions and requests for rulings, raising various questions as to the validity of the Act and Regulation, including those presented by the petitions for certiorari. In particular petitioners offered evidence, which the District Court excluded as irrelevant, for the purpose of showing that the Regulation did not conform to the standards prescribed by the Act and that it deprived petitioners of property without the due process of law guaranteed by the Fifth Amendment. They specifically raised the question reserved in Lockerty v. Phillips, supra, whether the validity of a regulation may be challenged in defense of a prosecution for its violation although it had not been tested by the prescribed administrative procedure and complaint to the Emergency Court of Appeals. The District Court convicted petitioners upon verdicts of guilty. The Circuit Court of Appeals for the First Circuit affirmed, 137 F.2d 850, and we granted certiorari, 320 U.S. 730, 64 S.Ct. 190.

I.

The Emergency Price Control Act provides for the establishment of the Office of Price Administration under the direction of a Price Administrator appointed by the President, and sets up a comprehensive scheme for the promulgation by the Administrator of regulations or orders fixing such maximum prices of commodities and rents as will effectuate the purposes of the Act and conform to the standards which it prescribes. The Act was adopted as a temporary wartime measure, and provides in s 1(b) for its termination on June 30, 1943, unless sooner ***420** terminated by Presidential proclamation or concurrent resolution of Congress. By the amendatory act of October 2, 1942, it was extended to June 30, 1944.

Section 1(a) declares that the Act is 'in the interest of the national defense and security and necessary to the effective prosecution of the present war', and that its purposes are:

'to stabilize prices and to prevent speculative, unwarranted, and abnormal increases in prices and rents; to eliminate and prevent profiteering, hoarding, manipulation, speculation, and other disruptive practices resulting from abnormal market conditions or scarcities caused by or contributing to the national emergency; to assure that defense appropriations are not dissipated by excessive prices; to protect persons with relatively fixed and limited incomes, consumers, wage earners, investors, and persons dependent on life insurance, annuities, and pensions, from undue impairment of their standard of living; to prevent hardships to persons engaged in business, * * * and to the Federal, State, and local governments, which would result from abnormal increases in prices; to assist in securing adequate production of commodities and facilities; to prevent a post emergency collapse of

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

values; * * *.'

The standards which are to guide the Administrator's exercise of his authority to fix prices, so far as now relevant, are prescribed by s 2(a) and by s 1 of the amendatory Act of October 2, 1942, and Executive Order 9250, 50 U.S.C.A.Appendix, s 901 note, promulgated under it. 7 Fed.Reg. 7871. By s 2(a) the Administrator is authorized, after consultation with representative members of the industry so far as practicable, to promulgate regulations fixing prices of commodities which 'in his judgment will be generally fair and equitable and will effectuate the purposes of this Act' when, in his judgment, their prices 'have risen or threaten to rise to an extent or in a manner inconsistent with the purposes of this Act.'

***421** The section also directs that

'So far as practicable, in establishing any maximum price, the Administrator shall ascertain and give due consideration to the prices prevailing between October 1 and October 15, 1941 (or if, in the case of any commodity, there are no prevailing prices between such dates, or the prevailing prices between such dates are not generally representative because of abnormal ****666** or seasonal market conditions or other cause, then to the prices prevailing during the nearest two-week period in which, in the judgment of the Administrator, the prices for such commodity are generally representative) * * * and shall make adjustments for such relevant factors as he may determine and deem to be of general applicability, including * * *. Speculative fluctuations, general increases or decreases in costs of production, distribution, and transportation, and general increases or decreases in profits earned by sellers of the commodity or commodities, during and subsequent to the year ended October 1, 1941.'

By the Act of October 2, 1942, the President is directed to stabilize prices, wages and salaries 'so far as practicable' on the basis of the levels which existed on September 15, 1942, except as otherwise provided in the Act. By Title I, s 4 of Executive Order No. 9250, he has directed 'all departments and agencies of the Government' 'to stabilize the cost of living in accordance with the Act of October 2, 1942.'[FN1]

FN1 The parties have not discussed in briefs or on argument, and we do not find it necessary to consider, the precise effect of this direction to stabilize prices 'so far as practicable' at the levels obtaining on September 15, 1942, upon the standards laid down by Section 2(a) of the Act and the discretion which they confer on the Administrator.

Revised Maximum Price Regulation No. 169 was issued December 10, 1942, under authority of the Emergency Price Control Act as amended and Executive Order No. 9250. The Regulation established specific maximum ***422** prices for the sale at wholesale of specified cuts of beef and veal. As is required by s 2(a) of the Act, it was accompanied by a 'statement of the considerations involved' in prescribing it. From the preamble to the Regulation and from the Statement of Considerations accompanying it, it appears that the prices fixed for sales at wholesale were slightly in excess of those prevailing between March 16 and March 28, 1942,[FN2] and approximated those prevailing on September 15, 1942. Findings that the Regulation was necessary, that the prices which it fixed were fair and equitable, and that it otherwise conformed to the standards prescribed by the Act, appear in the Statement of Considerations.

FN2 The use of the March 16-28, 1942, base period is explained by the fact that wholesale meat prices had already been stabilized at approximately that level by Maximum Price Regulation No. 169 as originally issued on June 19, 1942, 7 Fed.Reg. 4653, and by the General Maximum Price Regulation issued April 28, 1942, 7 Fed.Reg. 3153, which forbade the sale of most commodities at prices in excess of the highest price charged by the seller during March, 1942. The Statement of Considerations accompanying the latter, 2 C.C.H. War Law Service—Price Control, 42,081, explains in some detail the considerations impelling the Administrator to the conclusion that stabilization at the levels obtaining in March, 1942 would be fair and equitable and would effectuate the purposes of the Act; it considers the price levels prevailing during October 1-15, 1941, and gives reasons why price stabilization at those levels would not be practicable. The Statement of Considerations accompanying Maximum Price Regulation No. 169 as originally issued, 2 C.C.H War Law Ser-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

vice—Price Control, 43,369A, refers to this discussion in explanation of the continuance of the use of March, 1942, levels as a base.

[1] That Congress has constitutional authority to prescribe commodity prices as a war emergency measure, and that the Act was adopted by Congress in the exercise of that power, are not questioned here, and need not now be considered save as they have a bearing on the procedural ***423** features of the Act later to be considered which are challenged on constitutional grounds.

[2] Congress enacted the Emergency Price Control Act in pursuance of a defined policy and required that the prices fixed by the Administrator should further that policy and conform to standards prescribed by the Act. The boundaries of the field of the Administrator's permissible action are marked by the statute. It directs that the prices fixed shall effectuate the declared policy of the Act to stabilize commodity prices so as to prevent war-time inflation and its enumerated disruptive causes and effects. In addition the prices established must be fair and equitable, and in fixing them the Administrator is directed to give ****667** due consideration, so far as practicable, to prevailing prices during the designated base period, with prescribed administrative adjustments to compensate for enumerated disturbing factors affecting prices. In short the purposes of the Act specified in s 1 denote the objective to be sought by the Administrator in fixing prices—the prevention of inflation and its enumerated consequences. The standards set out in s 2 define the boundaries within which prices having that purpose must be fixed. It is enough to satisfy the statutory requirements that the Administrator finds that the prices fixed will tend to achieve that objective and will conform to those standards, and that the courts in an appropriate proceeding can see that substantial basis for those findings is not wanting.

The Act is thus an exercise by Congress of its legislative power. In it Congress has stated the legislative objective, has prescribed the method of achieving that objective—maximum price fixing—and has laid down standards to guide the administrative determination of both the occasions for the exercise of the price-fixing power, and the particular prices to be established. Compare Field v. Clark, 143 U.S. 649, 12 S.Ct. 495, 36 L.Ed. 294; ***424**Hampton Jr. & Co. v. United States, 276 U.S. 394, 48 S.Ct. 348, 72 L.Ed. 624; Currin v. Wallace, 306 U.S. 1, 59 S.Ct. 379, 83 L.Ed. 441; Mulford v. Smith, 307 U.S. 38, 59 S.Ct. 648, 83 L.Ed. 1092; United States v. Rock Royal Co-op., 307 U.S. 533, 59 S.Ct. 993, 83 L.Ed. 1446; Sunshine Anthracite Coal Co. v. Adkins, 310 U.S. 381, 60 S.Ct. 907, 84 L.Ed. 1263; Opp Cotton Mills v. Administrator, 312 U.S. 126, 657, 61 S.Ct. 524, 85 L.Ed. 624; National Broadcasting Co. v. United States, 319 U.S. 190, 63 S.Ct. 997, 87 L.Ed. 1344; Kiyoshi Hirabayashi v. United States, 320 U.S. 81, 63 S.Ct. 1375, 87 L.Ed. 1774.

The Act is unlike the National Industrial Recovery Act of June 16, 1933, 48 Stat. 195, considered in Schechter Poultry Corp. v. United States, 295 U.S. 495, 55 S.Ct. 837, 79 L.Ed. 1570, 97 A.L.R. 947, which proclaimed in the broadest terms its purpose 'to rehabilitate industry and to conserve natural resources.' It prescribed no method of attaining that end save by the establishment of codes of fair competition, the nature of whose permissible provisions was left undefined. It provided no standards to which those codes were to conform. The function of formulating the codes was delegated, not to a public official responsible to Congress or the Executive, but to private individuals engaged in the industries to be regulated. Compare Sunshine Anthracite Coal Co. v. Adkins, supra, 310 U.S. at page 309, 60 S.Ct. at page 915, 84 L.Ed. 1263.

[3][4][5] The Constitution as a continuously operative charter of government does not demand the impossible or the impracticable. It does not require that Congress find for itself every fact upon which it desires to base legislative action or that it make for itself detailed determinations which it has declared to be prerequisite to the application of the legislative policy to particular facts and circumstances impossible for Congress itself properly to investigate. The essentials of the legislative function are the determination of the legislative policy and its formulation and promulgation as a defined and binding rule of conduct—here the rule, with penal sanctions, that prices shall not be greater than those fixed by maximum price regulations which conform to standards and will tend to further the policy which Congress has established. These essentials are preserved when Congress has specified the basic conditions of fact upon whose existence or occurrence, ***425** ascertained from relevant data by a designated administrative agency, it

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

directs that its statutory command shall be effective. It is no objection that the determination of facts and the inferences to be drawn from them in the light of the statutory standards and declaration of policy call for the exercise of judgment, and for the formulation of subsidiary administrative policy within the prescribed statutory framework. See Opp Cotton Mills v. Administrator, supra, 312 U.S. at pages 145, 146, 61 S.Ct. at pages 532, 533, 85 L.Ed. 624, and cases cited.

[6][7] Nor does the doctrine of separation of powers deny to Congress power to direct that an administrative officer properly designated for that purpose have ample latitude within which he is to ascertain the conditions which Congress has made prerequisite to the operation of its legislative command. Acting within its constitutional power to fix prices it is for Congress to say ****668** whether the data on the basis of which prices are to be fixed are to be confined within a narrow or a broad range. In either case the only concern of courts is to ascertain whether the will of Congress has been obeyed. This depends not upon the breadth of the definition of the facts or conditions which the administrative officer is to find but upon the determination whether the definition sufficiently marks the field within which the Administrator is to act so that it may be known whether he has kept within it in compliance with the legislative will.

[8][9][10][11] As we have said: 'The Constitution has never been regarded as denying to the Congress the necessary resources of flexibility and practicality * * * to perform its function.' Currin v. Wallace, supra, 306 U.S. at page 15, 59 S.Ct. at page 387, 83 L.Ed. 441. Hence it is irrelevant that Congress might itself have prescribed the maximum prices or have provided a more rigid standard by which they are to be fixed; for example, that all prices should be frozen at the levels obtaining during a certain period or on a certain date. See Union Bridge Co. v. United States, 204 U.S. 364, 386, 27 S.Ct. 367, 374, 51 L.Ed. 523. Congress is not confined ***426** to that method of executing its policy which involves the least possible delegation of discretion to administrative officers. Compare McCulloch v. Maryland, 4 Wheat. 316, 413 et seq., 4 L.Ed. 579. It is free to avoid the rigidity of such a system, which might well result in serious hardship, and to choose instead the flexibility attainable by the use of less restrictive standards. Cf. Hampton v. United States, supra, 276 U.S. pages 408, 409, 48 S.Ct. at pages 351, 352, 72 L.Ed. 624. Only if we could say that there is an absence of standards for the guidance of the Administrator's action, so that it would be impossible in a proper proceeding to ascertain whether the will of Congress has been obeyed, would we be justified in overriding its choice of means for effecting its declared purpose of preventing inflation.

[12] The standards prescribed by the present Act, with the aid of the 'statement of the considerations' required to be made by the Administrator, are sufficiently definite and precise to enable Congress, the courts and the public to ascertain whether the Administrator, in fixing the designated prices, has conformed to those standards. Compare Kiyoshi Hirabayashi v. United States, supra, 320 U.S. at page 104, 63 S.Ct. at page 1387, 87 L.Ed. 1774. Hence we are unable to find in them an unauthorized delegation of legislative power. The authority to fix prices only when prices have risen or threaten to rise to an extent or in a manner inconsistent with the purpose of the Act to prevent inflation is no broader than the authority to fix maximum prices when deemed necessary to protect consumers against unreasonably high prices, sustained in Sunshine Anthracite Coal Co. v. Adkins, supra, or the authority to take possession of and operate telegraph lines whenever deemed necessary for the national security or defense, upheld in Dakota Cent. Tel. Co. v. State of South Dakota, 250 U.S. 163, 39 S.Ct. 507, 63 L.Ed. 910, 4 A.L.R. 1623; or the authority to suspend tariff provisions upon findings that the duties imposed by a foreign state are 'reciprocally unequal and unreasonable', held valid in Field v. Clark, supra (143 U.S. 649, 12 S.Ct. 504, 36 L.Ed. 294).

***427** The directions that the prices fixed shall be fair and equitable, that in addition they shall tend to promote the purposes of the Act, and that in promulgating them consideration shall be given to prices prevailing in a stated base period, confer no greater reach for administrative determination than the power to fix just and reasonable rates, see Sunshine Anthracite Coal Co. v. Adkins, supra, and cases cited; or the power to approve consolidations in the 'public interest', sustained in New York Cent. Securities Corp. v. United States, 287 U.S. 12, 24, 25, 53 S.Ct. 45, 48, 77 L.Ed. 138 (Compare United States v. Lowden, 308 U.S. 225, 60 S.Ct. 248, 84 L.Ed. 208); or the power to regulate radio stations engaged in chain broadcasting 'as public interest, convenience or necessity requires', upheld in National Broadcasting Co. v. United States,

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

supra, 319 U.S. at page 225, 63 S.Ct. at pages 1013, 1014, 87 L.Ed. 1344; or the power to prohibit 'unfair methods of competition' not defined or forbidden by the common law, Federal Trade Commission v. R. F. Keppel & Bro., 291 U.S. 304, 54 S.Ct. 423, 426, 78 L.Ed. 814; or the direction that in allotting marketing quotas among states and producers due consideration**669 be given to a variety of economic factors, sustained in Mulford v. Smith, supra, 307 U.S. at pages 48, 49, 59 S.Ct. at page 652, 653, 83 L.Ed. 1092; or the similar direction that in adjusting tariffs to meet differences in costs of production the President 'take into consideration' 'in so far as he finds it practicable' a variety of economic matters, sustained in Hampton Jr. & Co. v. United States, supra (276 U.S. 394, 48 S.Ct. 349, 72 L.Ed. 624); or the similar authority, in making classifications within an industry, to consider various named and unnamed 'relevant factors' and determine the respective weights attributable to each, held valid in Opp Cotton Mills v. Administrator, supra.

II.

We consider next the question whether the procedure which Congress has established for determining the validity of the Administrator's regulations is exclusive so as to preclude the defense of invalidity of the Regulation in this criminal prosecution for its violation under ss 4(a) and *428 205(b). Section 203(a) sets up a procedure by which 'any person subject to any provision of (a) regulation (or) order' may within 60 days after it is issued 'file a protest specifically setting forth objections to any such provision and affidavits or other written evidence in support of such objections.' He may similarly protest later, on grounds arising after the expiration of the original sixty days. The subsection directs that within a reasonable time and in no event more than thirty days after the filing of a protest or ninety days after the issue of the regulation protested, whichever is later, 'the Administrator shall either grant or deny such protest in whole or in part, notice such protest for hearing, or provide an opportunity to present further evidence in connection therewith. In the event that the Administrator denies any such protest in whole or in part, he shall inform the protestant of the grounds upon which such decision is based, and of any economic data and other facts of which the Administrator has taken official notice.'

Section 204(c) creates a court to be known as the Emergency Court of Appeals consisting of United States district or circuit judges designated by the Chief Justice of the United States. Section 204(a) authorizes any person aggrieved by the denial or partial denial of his protest to file a complaint with the Emergency Court of Appeals within thirty days after the denial, praying that the regulation, order or price schedule protested be enjoined or set aside in whole or in part. The court may issue such an injunction only if it finds that the regulation, order or price schedule 'is not in accordance with law, or is arbitrary or capricious.' Subsection (b). It is denied power to issue a temporary restraining order or interlocutory decree. Subsection (c). The effectiveness of any permanent injunction it may issue is postponed for thirty days, and if review by this Court is sought upon writ of certiorari, as authorized by subsection (d), its effectiveness is further *429 postponed until final disposition of the case by this Court by denial of certiorari or decision upon the merits. Subsection (b).

Section 204(d) declares:

'The Emergency Court of Appeals, and the Supreme Court upon review of judgments and orders of the Emergency Court of Appeals, shall have exclusive jurisdiction to determine the validity of any regulation or order issued under section 2, * * * of any price schedule effective in accordance with the provisions of section 206, * * * and of any provision of any such regulation, order, or price schedule. Except as provided in this section, no court, Federal, State, or Territorial, shall have jurisdiction or power to consider the validity of any such regulation, order, or price schedule, or to stay, restrain, enjoin, or set aside, in whole or in part, any provision of this Act authorizing the issuance of such regulations or orders, or making effective any such price schedule, or any provision of any such regulation, order, or price schedule, or to restrain or enjoin the enforcement of any such provision.'

In Lockerty v. Phillips, supra, we held that these provisions conferred on the Emergency Court of Appeals, subject to review by this Court, exclusive equity jurisdiction to restrain enforcement of price regulations of the Administrator and that they withdrew such jurisdiction from all other courts. This was accomplished by the exercise of the constitutional power of Congress to prescribe the jurisdiction of **670 inferior federal courts, and the jurisdiction of all state

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

courts to determine federal questions, and to vest that jurisdiction in a single court, the Emergency Court of Appeals.

[13] The considerations which led us to that conclusion with respect to the equity jurisdiction of the district court, lead to the like conclusion as to its power to consider the validity of a price regulation as a defense to a criminal prosecution for its violation. The provisions of s 204(d), conferring*430 upon the Emergency Court of Appeals and this Court 'exclusive jurisdiction to determine the validity of any regulation or order', coupled with the provision that 'no court, Federal, State, or Territorial, shall have jurisdiction or power to consider the validity of any such regulation', are broad enough in terms to deprive the district court of power to consider the validity of the Administrator's regulation or order as a defense to a criminal prosecution for its violation.

That such was the intention of Congress appears from the report of the Senate Committee on Banking and Currency, recommending the adoption of the bill which contained the provisions of s 204(d). After pointing out that the bill provided for exclusive jurisdiction of the Emergency Court and the Supreme Court to determine the validity of regulations or orders issued under section 2, the Committee said: 'The courts in which criminal or civil enforcement proceedings are brought have jurisdiction, concurrently with the Emergency Court, to determine the constitutional validity of the statute itself.' Sen.Rep. 931, 77th Cong., 2d Sess., p. 25. That the Committee, in making this statement, intended to distinguish between the validity of the statute and that of a regulation, and to permit consideration only of the former in defense to a criminal prosecution, is further borne out by the fact that the bill as introduced in the House had provided that the Emergency Court of Appeals should have exclusive jurisdiction to determine the validity of the provisions of the Act authorizing price regulations, as well as of the regulations themselves. H.R. 5479, 77th Cong., 1st Sess., printed in Hearings before Committee on Banking and Currency, House of Representatives, 77th Cong., 2d Sess., on H.R. 5479, pp. 4, 7, 8.

Congress, in thus authorizing consideration by the district court of the validity of the Act alone, gave clear indication that the validity of the Administrator's regulations*431 or orders should not be subject to attack in criminal prosecutions for their violation, at least before their invalidity had been adjudicated by recourse to the protest procedure prescribed by the statute. Such we conclude is the correct construction of the Act.

III.

We come to the question whether the provisions of the Act, so construed as to deprive petitioners of opportunity to attack the Regulation in a prosecution for its violation, deprive them of the due process of law guaranteed by the Fifth Amendment. At the trial, petitioners offered to prove that the Regulation would compel them to sell beef at such prices as would render it impossible for wholesalers such as they are, no matter how efficient, to conduct their business other than at a loss. Section 4(d) declares that 'Nothing in this Act shall be construed to require any person to sell any commodity * * *.' Petitioners were therefore not required by the Act, nor so far as appears by any other rule of law, to continue selling meat at wholesale if they could not do so without loss. But they argue that to impose on them the choice either of refraining from sales of beef at wholesale or of running the risk of numerous criminal prosecutions and suits for treble damages authorized by Sec. 205(e), without the benefit of any temporary injunction or stay pending determination by the prescribed statutory procedure of the Regulation's validity, is so harsh in its application to them as to deny them due process of law. In addition they urge the inadequacy of the administrative procedure and particularly of the sixty days period afforded by the Act within which to prepare and lodge a protest with the Administrator.

[14] In considering these asserted hardships, it is appropriate to take into account the purposes of the Act and the circumstances attending its enactment and application as a war-time emergency measure. The Act was adopted January*432 30, 1942, **671 shortly after our declaration of war against Germany and Japan, when it was common knowledge, as is emphasized by the legislative history of the Act that there was grave danger of war-time inflation and the disorganization of our economy from excessive price rises. Congress was under pressing necessity of meeting this danger by a practicable and expeditious means which would operate with such promptness, regularity and consistency as would minimize the sudden development of commodity price disparities, accentuated by commodity shortages occasioned by the war.

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

Inflation is accelerated and its consequences aggravated by price disparities not based on geographic or other relevant differentials. The harm resulting from delayed or unequal price control is beyond repair. And one of the problems involved in the prevention of inflation by establishment of a nation-wide system of price control is the disorganization which would result if enforcement of price orders were delayed or sporadic or were unequal or conflicting in different parts of the country. These evils might well arise if regulations with respect to which there was full opportunity for administrative revision were to be made ineffective by injunction or stay of their enforcement in advance of such revision or of final determination of their validity.

Congress, in enacting the Emergency Price Control Act, was familiar with the consistent history of delay in utility rate cases. It had in mind the dangers to price control as a preventive of inflation if the validity and effectiveness of prescribed maximum prices were to be subject to the exigencies and delays of litigation originating in eighty-five district courts and continued by separate appeals through eleven separate courts of appeals to this Court, to say nothing of litigation conducted in state courts. See Sen. Rep. No. 931, 77th Cong., 2d Sess., pp. 23-5.

***433** [15] Congress sought to avoid or minimize these difficulties by the establishment of a single procedure for review of the Administrator's regulations, beginning with an appeal to the Administrator's specialized knowledge and experience gained in the administration of the Act, and affording to him an opportunity to modify the regulations and orders complained of before resort to judicial determination of their validity. The organization of such an exclusive procedure especially adapted to the exigencies and requirements of a nation-wide scheme of price regulation is, as we have seen, within the constitutional power of Congress to create inferior federal courts and prescribe their jurisdiction. The considerations which led to its creation are similar to, and certainly no weaker than, those which led this Court in Texas & P.R. v. Abilene Cotton Oil Co., 204 U.S. 426, 27 S.Ct. 350, 51 L.Ed. 553, 9 Ann.Cas. 1075, and the long line of cases following it, to require resort to the Interstate Commerce Commission and the special statutory method provided for review of its decisions in certain types of cases involving railway rates. As with the present statute, it was thought desirable to preface all judicial action by resort to expert administrative knowledge and experience, and thus minimize the confusion that would result from inconsistent decisions of district and circuit courts rendered without the aid of an administrative interpretation. In addition the present Act seeks further to avoid that confusion by restricting judicial review of the administrative determination to a single court. Such a procedure, so long as it affords to those affected a reasonable opportunity to be heard and present evidence, does not offend against due process. Bradley v. City of Richmond, 227 U.S. 477, 33 S.Ct. 318, 57 L.Ed. 603; First Nat. Bank v. Board of Com'rs Weld County, 264 U.S. 450, 44 S.Ct. 385, 68 L.Ed. 784; Anniston Mfg. Co. v. Davis, 301 U.S. 337, 57 S.Ct. 816, 81 L.Ed. 1143.

[16] Petitioners assert that they have been denied that opportunity because the sixty days period allowed for filing a protest is insufficient for that purpose; because the procedure***434** before the Administrator is inadequate to ensure due process; because the statute precludes any interlocutory injunction staying enforcement of a price regulation before final adjudication of its validity; because the trial of the issue of validity of a regulation is excluded from the criminal trial for its violation; and because in any case there is nothing in the statute to prevent their conviction for violation of a regulation before they could secure a ruling on its validity. A sufficient answer to all these contentions is that petitioners have ****672** failed to seek the administrative remedy and the statutory review which were open to them and that they have not shown that had they done so any of the consequences which they apprehend would have ensued to any extent whatever, or if they should, that the statute withholds judicial remedies adequate to protect petitioners' rights.

[17][18] For the purposes of this case, in passing upon the sufficiency of the procedure on protest to the Administrator and complaint to the Emergency Court, it is irrelevant to suggest that the Administrator or the Court has in the past or may in the future deny due process. Action taken by them is reviewable in this Court and if contrary to due process will be corrected here. Hence we have no occasion to pass upon determinations of the Administrator or the Emergency Court, said to violate due process, which have never been brought here for review, and obviously, we cannot pass upon action which might have been taken

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

on a protest by petitioners, who have never made a protest or in any way sought the remedy Congress has provided. In the absence of any proceeding before the Administrator we cannot assume that he would fail in the performance of any duty imposed on him by the Constitution and laws of the United States, or that he would deny due process to petitioners by 'loading the record against them' or denying such hearing as the Constitution prescribes. Plymouth Coal Co. v. Commonwealth of Pennsylvania, 232 U.S. 531, 545, 34 S.Ct. 359, 363, 58 L.Ed. 713; ***435**Hall v. Geiger-Jones Co., 242 U.S. 539, 554, 37 S.Ct. 217, 222, 61 L.Ed. 480, L.R.A. 1917F, 514, Ann.Cas.1917C, 643; State of Minnesota v. Probate Court, 309 U.S. 270, 277, 60 S.Ct. 523, 527, 84 L.Ed. 744, 126 A.L.R. 530, and cases cited. Only if we could say in advance of resort to the statutory procedure that it is incapable of affording due process to petitioners could we conclude that they have shown any legal excuse for their failure to resort to it or that their constitutional rights have been or will be infringed. Natural Gas Co. v. Slattery, 302 U.S. 300, 309, 58 S.Ct. 199, 203, 82 L.Ed. 276; Anniston Mfg. Co. v. Davis, supra, 301 U.S. at pages 356, 357, 57 S.Ct. at page 825, 81 L.Ed. 1143; State of Minnesota v. Probate Court, supra, 309 U.S. at pages 275, 277, 60 S.Ct. at pages 526, 527, 84 L.Ed. 744, 126 A.L.R. 530. But upon a full examination of the provisions of the statute it is evident that the authorized procedure is not incapable of affording the protection to petitioners' rights required by due process.

The regulations, which are given the force of law, are published in the Federal Register, and constructive notice of their contents is thus given all persons affected by them. 44 U.S.C. s 307, 44 U.S.C.A. s 307. The penal provisions of the statute are applicable only to violations of a regulation which are willful. Petitioners have not contended that they were unaware of the Regulation and the jury found that they knowingly violated it within eight days after its issue.

[19] The sixty days period allowed for protest of the Administrator's regulations cannot be said to be unreasonably short in view of the urgency and exigencies of wartime price regulation.[FN3] Here the Administrator is required to act initially upon the protest within thirty days after it is filed or ninety days after promulgation of the challenged regulation, by allowing the protest wholly or in part, or denying it or setting it down for hearing. (Section 203(a). ***436** But we cannot say that the Administrator would not have allowed ample time for the presentation of evidence.[FN4] And under s 204(a) petitioners could have applied**673 to the Emergency Court of Appeals for leave to introduce any additional evidence 'which could not reasonably' have been offered to the Administrator or included in the proceedings before him, and could have applied to the Administrator to modify or change his decision in the light of that evidence.

FN3 For numerous instances in which comparable or shorter periods for resort to administrative relief as a prerequisite to proceeding in the courts have been held to be sufficient, see, e.g., Bellingham Bay, etc., Co. v. City of New Whatcom, 172 U.S. 314, 19 S.Ct. 205, 43 L.Ed. 460, (10 days); Campbell v. City of Olney, 262 U.S. 352, 43 S.Ct. 559, 67 L.Ed. 1021 (20 days); Wick v. Chelan Electric Co., 280 U.S. 108, 50 S.Ct. 41, 74 L.Ed. 212 (18 days); Phillips v. Commissioner, 283 U.S. 589, 51 S.Ct. 608, 75 L.Ed. 1289 (60 days); Opp Cotton Mills v. Administrator, 312 U.S. 126, 657, 61 S.Ct. 524, 87 L.Ed. 624 (40 days).

FN4 Revised Procedural Regulation No. 1, 7 Fed.Reg. 8961, authorized by s 203(a), contain detailed provisions for extending the time for presentation of evidence when appropriate. ss 1300.30(c), 1300.33, 1300.35(a)(3).

[20] Nor can we say that the administrative hearing provided by the statute will prove inadequate. We hold in Bowles v. Willingham, 321 U.S. 503, 64 S.Ct. 641, that in the circumstances to which this Act was intended to apply, the failure to afford a hearing prior to the issue of a price regulation does not offend against due process. While the hearing on a protest may be restricted to the presentation of documentary evidence, affidavits and briefs, the Act contemplates, and the Administrator's regulations provide for, a full oral hearing upon a showing that written evidence and briefs 'will not permit the fair and expeditious disposition of the protest'. s 203(a); Revised Procedural Regulation No. 1, s 1300.39, 7 Fed.Reg. 8961. In advance of application to the Administrator for such a hearing we cannot well say whether its denial in any particular case would be a denial of due process. The Act requires the Administrator to inform the protestant

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

of the grounds for his decision denying a protest, including all matters of which he has taken official notice. s 203(a). In view of the provisions for the introduction of further evidence both before and after the Administrator has announced his determination, we cannot say that if petitioners had filed a protest adequate*437 opportunity would not have been afforded them to meet any arguments and evidence put forward by the Administrator, or that if such opportunity had been denied the denial would not have been corrected by the Emergency Court.

[21][22] The Emergency Court has power to review all questions of law, including the question whether the Administrator's determination is supported by evidence, and any question of the denial of due process or any procedural error appropriately raised in the course of the proceedings. No reason is advanced why petitioners could not, throughout the statutory proceeding, raise and preserve any due process objection to the statute, the regulations, or the procedure, and secure its full judicial review by the Emergency Court of Appeals and this Court. Compare White v. Johnson, 282 U.S. 367, 374, 51 S.Ct. 115, 118, 75 L.Ed. 388.[FN5]

FN5 Nor is the inconvenience to petitioners of being required to make their objection to the Administrator in Washington, D.C., sufficient to outweigh the public interest, in the circumstances of this case, in having a centralized, unitary scheme of review of the regulations. The protest procedure is designed to be conducted primarily upon documentary evidence. Sec. 203(a); Revised Procedural Regulation No. 1, ss 1300.29—1300.31, 1300.39. There would thus be no purpose in the personal presence of the protestant unless the protest were set for hearing by the Administrator, and in such a case the hearing may be held at any place designated by the Administrator and before a person designated by him. Id., ss 1300.39, 1300.42. The Emergency Court of Appeals is likewise authorized to 'hold sessions at such places as it may specify' and does in fact hold sessions throughout the country as needed. s 204(c); Rule 4(a) of its Rules of Procedure, 50 U.S.C.App. Supp. II following s 924, 50 U.S.C.A. Appendix following section 924.

[23] In the circumstances of this case we find no denial of due process in the statutory prohibition of a temporary stay or injunction. The present statute is not open to the objection that petitioners are compelled to serve the public as in the case of a public utility, or that the only method by which they can test the validity of the regulations*438 promulgated under it is by violating the statute and thus subjecting themselves to the possible imposition of severe and cumulative penalties. See Ex parte Young, 209 U.S. 123, 28 S.Ct. 441, 52 L.Ed. 714, 13 L.R.A.,N.S., 932, 14 Ann.Cas. 764; Wilcox v. Consolidated Gas Co., 212 U.S. 19, 53, 54, 29 S.Ct. 192, 200, 53 L.Ed. 382, 48 L.R.A.,N.S., 1134, 15 Ann.Cas. 1034; Missouri Pac. R. Co. v. Tucker, 230 U.S. 340, 33 S.Ct. 961, 57 L.Ed. 1507; Oklahoma Operating Co. v. Love, 252 U.S. 331, 40 S.Ct. 338, 64 L.Ed. 596. For as we have seen, s 4(d) specifically provides that **674 no one shall be compelled to sell any commodity, and the statute itself provides an expeditious means of testing the validity of any price regulation, without necessarily incurring any of the penalties of the Act. Compare Wadley Southern R. Co. v. State of Georgia, 235 U.S. 651, 667—669, 35 S.Ct. 214, 220, 221, 59 L.Ed. 405.

The petitioners are not confronted with the choice of abandoning their businesses or subjecting themselves to the penalties of the Act before they have sought and secured a determination of the Regulation's validity. It is true that if the Administrator denies a protest no stay or injunction may become effective before the final decision of the Emergency Court or of this Court if review here is sought. It is also true that the process of reaching a final decision may be time-consuming. But while courts have no power to suspend or ameliorate the operation of a regulation during the pendency of proceedings to determine its validity, we cannot say that the Administrator has no such power or assume that he would not exercise it in an appropriate case.

[24] The Administrator, who is the author of the regulations, is given wide discretion as to the time and conditions of their issue and continued effect. Section 2(a) authorizes him to issue such regulations as will effectuate the purposes of the Act, whenever, in his judgment, such action is necessary. Section 201(d) similarly authorizes him 'from time to time' to issue regulations when necessary and proper to effectuate the purposes of the Act. One of the objects of the protest provisions is to enable the Administrator more

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

fully to inform himself as to the wisdom *439 of a regulation through evidence of its effect on particular cases. In the light of that information he is authorized by s 203(a) to grant or deny a protest 'in whole or in part.' And s 204(a) authorizes the Administrator to modify or rescind a regulation 'at any time.'[FN6] Moreover s 2(a) further authorizes the issue, in the Administrator's judgment, of temporary regulations, effective for sixty days, 'establishing as a maximum * * * the price * * * prevailing with respect to any commodity * * * within five days prior to the date of issuance of such temporary regulations. * * *'

FN6 Revised Procedural Regulation No. 1 authorizes the filing at any time of a petition to amend a regulation, (s 1300.20) and authorizes the Administrator to treat a protest as a petition for amendment as well (s 1300.49).

[25][26] Under these sections the Administrator may not only alter or set aside the regulation, but he has wide scope for the exercise of his discretionary power to modify or suspend a regulation pending its administrative and judicial review. Hence we cannot assume that petitioners, had they applied to the Administrator, would not have secured all the relief to which they were entitled. The denial of a right to a restraining order or interlocutory injunction to one who has failed to apply for available administrative relief, not shown to be inadequate, is not a denial of due process. Natural Gas Co. v. Slattery, supra, 302 U.S. at page 310, 58 S.Ct. at page 204, 82 L.Ed. 276.

[27] In any event, we are unable to say that the denial of interlocutory relief pending a judicial determination of the validity of the regulation would in the special circumstances of this case, involve a denial of constitutional right. If the alternatives, as Congress could have concluded, were war-time inflation or the imposition on individuals of the burden of complying with a price regulation while its validity is being determined, Congress could constitutionally make the choice in favor of the protection of the public interest from the dangers of inflation. Compare *440 Miller v. Schoene, 276 U.S. 272, 48 S.Ct. 246, 72 L.Ed. 568, in which we held that the Fourteenth Amendment did not preclude a state from compelling the uncompensated destruction of private property in order to preserve important public interests from destruction.

[28][29][30] The award of an interlocutory injunction by courts of equity has never been regarded as strictly a matter of right, even though irreparable injury may otherwise result to the plaintiff. Compare **675Scripps-Howard Radio, Inc., v. Federal Communications Comm., 316 U.S. 4, 10, 62 S.Ct. 875, 880, 86 L.Ed. 1229, and cases cited. Even in suits in which only private interests are involved the award is a matter of sound judicial discretion, in the exercise of which the court balances the conveniences of the parties and possible injuries to them according as they may be affected by the granting or withholding of the injunction. Meccano, Ltd., v. John Wanamaker, 253 U.S. 136, 141, 40 S.Ct. 463, 465, 64 L.Ed. 822; Rice & Adams Corp. v. Lathrop, 278 U.S. 509, 514, 49 S.Ct. 220, 222, 73 L.Ed. 480. And it will avoid such inconvenience and injury so far as may be, by attaching conditions to the award, such as the requirement of an injunction bond conditioned upon payment of any damage caused by the injunction if the plaintiff's contentions are not sustained. Prendergast v. New York Tel. Co., 262 U.S. 43, 51, 43 S.Ct. 466, 469, 67 L.Ed. 853; Ohio Oil Co. v. Conway, 279 U.S. 813, 815, 49 S.Ct. 256, 257, 73 L.Ed. 972.

[31] But where an injunction is asked which will adversely affect a public interest for whose impairment, even temporarily, an injunction bond cannot compensate, the court may in the public interest withhold relief until a final determination of the rights of the parties, though the postponement may be burdensome to the plaintiff.[FN7] *441 Virginian R. Co. v. United States, 272 U.S. 658, 672, 673, 47 S.Ct. 222, 228, 71 L.Ed. 463; Petroleum Exploration v. Public Service Commission, 304 U.S. 209, 222, 223, 58 S.Ct. 834, 841, 842, 82 L.Ed. 1294; Dryfoos v. Edwards, D.C., 284 F. 596, 603, affirmed 251 U.S. 146, 40 S.Ct. 106, 64 L.Ed. 194; see Beaumont, S.L. & W.R. Co. v. United States, 282 U.S. 74, 91, 92, 51 S.Ct. 1, 7, 8, 75 L.Ed. 221. Compare State of Wisconsin v. State of Illinois, 278 U.S. 367, 418—421, 49 S.Ct. 163, 171—173, 73 L.Ed. 426. This is but another application of the principle, declared in Virginian Ry. Co. v. System Federation No. 40, 300 U.S. 515, 552, 57 S.Ct. 592, 601, 81 L.Ed. 789, that 'Courts of equity may, and frequently do, go much further both to give and withhold relief in furtherance of the public interest than they are accustomed to go when only private interests are involved.'

FN7 Congress has sought to minimize the burden so far as would be consistent with the

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

public interest by providing expeditious procedure for the review, on protest and complaint, of a regulation's validity. Thus a protest must be filed within 60 days (s 203(a); the Administrator must take initial action on it within a reasonable time but not more than 30 days after its filing or 90 days after the issuance of the regulation (s 203(a); the complaint to the Emergency Court must be filed within 30 days (s 204(a); that Court is directed to 'prescribe rules governing its procedure in such manner as to expedite the determination of cases of which it has jurisdiction' (s 204(c); in order to promote that end as many judges as are needed may be designated to serve on it, it may sit in divisions, and may hold sessions at such places as it may specify (s 204(c), and in fact it does sit in various parts of the country as the convenience of the parties may require; under its rules it is 'always * * * open for the transaction of business' (Rule 4(a), 50 U.S.C.App., Supp. II following s 924, 50 U.S.C.A. Appendix following section 924); petitions for certiorari to review its decisions must be filed within 30 days (s 204(d); and this Court is directed to advance on the docket and expedite the decision of all cases from the Emergency Court (s 204(d). We cannot assume that the Administrator, who has a vital interest in the prompt and effective enforcement of the Act, would unreasonably delay action upon a protest; if he should, judicial remedies are not lacking, see Safeway Stores v. Brown, Em.App., 138 F.2d 278, 280.

[32] Here, in the exercise of the power to protect the national economy from the disruptive influences of inflation in time of war Congress has seen fit to postpone injunctions restraining the operations of price regulations until their lawfulness could be ascertained by an appropriate and expeditious procedure. In so doing it has done only what a court of equity could have done, in the exercise of its discretion to protect the public interest. What the courts ***442** could do Congress can do as the guardian of the public interest of the nation in time of war. The legislative formulation of what would otherwise be a rule of judicial discretion is not a denial of due process or a usurpation of judicial functions.****676** Cf. Demorest v. City Bank Farmers Trust Co., 321 U.S. 36, 64 S.Ct. 384.[FN8]

FN8 For other instances in which Congress has regulated and restricted the power of the federal courts to grant injunctions, see: 1. Section 16 of the Judiciary Act of 1789, 1 Stat. 82, Judicial Code s 267, 28 U.S.C. s 384, 28 U.S.C.A. s 384, denying relief in equity where there is adequate remedy at law. 2. Section 5 of the Act of March 2, 1793, 1 Stat. 334, Judicial Code, s 265, 28 U.S.C. s 379, 28 U.S.C.A. s 379, prohibiting injunction of state judicial proceedings. 3. Act of March 2, 1867, 14 Stat. 475, 26 U.S.C. s 3653, 26 U.S.C.A. Int.Rev.Code, s 3653, prohibiting suits to enjoin collection or enforcement of federal taxes. 4. The Johnson Act of May 14, 1934, 48 Stat. 775, 28 U.S.C. s 41(1), 28 U.S.C.A. s 41(1), restricting jurisdiction to enjoin orders of state bodies fixing utility rates. 5. Act of Aug. 21, 1937, 50 Stat. 738, 28 U.S.C. s 41(1), 28 U.S.C.A. s 41(1), similarly restricting jurisdiction to enjoin collection or enforcement of state taxes. 6. Section 17 of the Act of June 18, 1910, 36 Stat. 557 and s 3 of the Act of Aug. 24, 1937, 50 Stat. 752, 28 U.S.C. ss 380 and 380a, 28 U.S.C.A. ss 380, 380a, requiring the convening of a three-judge court for the granting of temporary injunctions in certain cases and allowing a temporary restraining order by one judge only to prevent irreparable injury. 7. The Norris-La Guardia Act, 47 Stat. 70, 29 U.S.C. ss 101—115, 29 U.S.C.A. ss 101—115, regulating the issue of injunctions in labor disputes and prohibiting their issue 'contrary to the public policy' declared in the Act. In several cases such statutes were held to be merely declaratory of a previously obtaining rule for the guidance of judicial discretion. See e.g. In re State Railroad Tax Cases, 92 U.S. 575, 613, 23 L.Ed. 663 (Act of March 2, 1867); Matthews v. Rodgers, 284 U.S. 521, 525, 52 S.Ct. 217, 219, 76 L.Ed. 447 (Judicial Code s 267); Great Lakes Dredge & Dock Co. v. Huffman, 319 U.S. 293, 297, 63 S.Ct. 1070, 1072, 87 L.Ed. 1407 (Act of Aug. 24, 1937).

[33] Our decisions leave no doubt that when justified by compelling public interest the legislature may

authorize summary action subject to later judicial review of its validity. It may insist on the immediate collection of taxes. Phillips v. Commissioner, 283 U.S. 589, 595—597, 51 S.Ct. 608, 611, 75 L.Ed. 1289, and cases cited. It may take possession of property presumptively abandoned by its owner, prior to determination of *443 its actual abandonment, Anderson Nat. Bank v. Luckett, 321 U.S. 233, 64 S.Ct. 599. For the protection of public health it may order the summary destruction of property without prior notice or hearing. North American Cold Storage Co. v. City of Chicago, 211 U.S. 306, 29 S.Ct. 101, 53 L.Ed. 195, 15 Ann.Cas. 276; Adams v. City of Milwaukee, 228 U.S. 572, 584, 33 S.Ct. 610, 613, 57 L.Ed. 971. It may summarily requisition property immediately needed for the prosecution of the war. Compare United States v. Pfitsch, 256 U.S. 547, 41 S.Ct. 569, 65 L.Ed. 1084. As a measure of public protection the property of alien enemies may be seized, and property believed to be owned by enemies taken without prior determination of its true ownership. Central Union Trust Co. v. Garvan, 254 U.S. 554, 556, 41 S.Ct. 214, 65 L.Ed. 403; Stoehr v. Wallace, 255 U.S. 239, 245, 41 S.Ct. 293, 296, 65 L.Ed. 604. Similarly public necessity in time of war may justify allowing tenants to remain in possession against the will of the landlord, Block v. Hirsh, 256 U.S. 135, 41 S.Ct. 458, 65 L.Ed. 865, 16 A.L.R. 165; Marcus Brown Holding Co. v. Feldman, 256 U.S. 170, 41 S.Ct. 465, 65 L.Ed. 877. Even the personal liberty of the citizen may be temporarily restrained as a measure of public safety. Kiyoshi Hirabayashi v. United States, supra; cf. Jacobson v. Commonwealth of Massachusetts, 197 U.S. 11, 25 S.Ct. 358, 49 L.Ed. 643, 3 Ann.Cas. 765. Measured by these standards we find no denial of due process under the circumstances in which this Act was adopted and must be applied, in its denial of any judicial stay pending determination of a regulation's validity.

IV.

[34] As we have seen Congress, through its power to define the jurisdiction of inferior federal courts and to create such courts for the exercise of the judicial power, could, subject to other constitutional limitations, create the Emergency Court of Appeals, give to it exclusive equity jurisdiction to determine the validity of price regulations prescribed by the Administrator, and foreclose any further or other consideration**677 of the validity of a regulation as a defense to a prosecution for its violation.

*444 [35][36][37] Unlike most penal statutes and regulations whose validity can be determined only by running the risk of violation, see Douglas v. City of Jeanette, 319 U.S. 157, 163, 63 S.Ct. 877, 881, 882, 87 L.Ed. 1324, the present statute provides a mode of testing the validity of a regulation by an independent administrative proceeding. There is no constitutional requirement that that test be made in one tribunal rather than in another, so long as there is an opportunity to be heard and for judicial review which satisfies the demands of due process, as is the case here. This was recognized in Bradley v. City of Richmond, supra, and in Wadley Southern R. Co. v. State of Georgia, supra, 235 U.S. at pages 667, 669, 35 S.Ct. at pages 220, 221, 59 L.Ed. 405, and has never been doubted by this Court. And we are pointed to no principle of law or provision of the Constitution which precludes Congress from making criminal the violation of an administrative regulation, by one who has failed to avail himself of an adequate separate procedure for the adjudication of its validity, or which precludes the practice, in many ways desirable, of splitting the trial for violations of an administrative regulation by committing the determination of the issue of its validity to the agency which created it, and the issue of violation to a court which is given jurisdiction to punish violations. Such a requirement presents no novel constitutional issue.

[38] No procedural principle is more familiar to this Court than that a constitutional right may be forfeited in criminal as well as civil cases by the failure to make timely assertion of the right before a tribunal having jurisdiction to determine it. O'Neil v. State of Vermont, 144 U.S. 323, 331, 12 S.Ct. 693, 696, 36 L.Ed. 450; Barbour v. State of Georgia, 249 U.S. 454, 460, 39 S.Ct. 316, 317, 63 L.Ed. 704; Whitney v. People of State of California, 274 U.S. 357, 360, 362, 380, 47 S.Ct. 641, 642, 643, 650, 71 L.Ed. 1095. Courts may for that reason refuse to consider a constitutional objection even though a like objection had previously been sustained in a case in which it was properly taken. Seaboard Air Line R. Co. v. Watson, 287 U.S. 86, 53 S.Ct. 32, 77 L.Ed. 180, 86 A.L.R. 174. While this Court in its *445 discretion sometimes departs from this rule in cases from lower federal courts, it invariably adheres to it in cases from state courts, see Brandeis J. concurring in Whitney v. People of State of California, supra, 274 U.S. at page 380, 47 S.Ct. at page 650, 71 L.Ed. 1095, and it could hardly be maintained that it is beyond legislative power to make the rule inflexible in all cases. Com-

pare Woolsey v. Best, 299 U.S. 1, 57 S.Ct. 2, 81 L.Ed. 3, with Ex parte Siebold, 100 U.S. 371, 25 L.Ed. 717.

For more than fifty years it has been a penal offense for shippers and interstate rail carriers to fail to observe the duly filed tariffs fixing freight rates—including, since 1906, rates prescribed by the Commission—even though the validity of those rates is open to attack only in a separate administrative proceeding before the Interstate Commerce Commission. 49 U.S.C. ss 6(7), 10(1), 49 U.S.C.A. ss 6(7), 10(1); Armour Packing Co. v. United States, 209 U.S. 56, 81, 28 S.Ct. 428, 435, 52 L.Ed. 681; United States v. Adams Express Co., 229 U.S. 381, 388, 33 S.Ct. 878, 57 L.Ed. 1237. It is no defense to a prosecution for departure from a rate fixed by the filed tariffs that the rate is unreasonable or otherwise unlawful, where its infirmity has not first been established by an independent proceeding before the Interstate Commerce Commission, and the denial of the defense in such a case does not violate any provision of the Constitution. United States v. Vacuum Oil Co., D.C., 158 F. 536, 539—541; Lehigh Valley R. Co. v. United States, 3 Cir., 188 F. 879, 887, 888. See also United States v. Standard Oil Co., D.C., 155 F. 305, 309, 310, reversed on other grounds, 7 Cir., 164 F. 376. Compare Pennsylvania R. Co. v. International Coal Min. Co., 230 U.S. 184, 196, 197, 33 S.Ct. 893, 895, 896, 57 L.Ed. 1446; Arizona Grocery Co. v. Atchison, T. & S.F.R. Co., 284 U.S. 370, 384, 52 S.Ct. 183, 184, 76 L.Ed. 348. Similarly it has been held that one who has failed to avail himself of the statutory method of review of orders of the Secretary of Agriculture under the Packers and Stockyards Act of 1921, or of the Federal Radio Commission under the Radio Act of 1927, cannot enjoin threatened prosecutions for violation of those orders, United States v. Corrick, 298 U.S. 435, 440, 56 S.Ct. 829, 831, 80 L.Ed. 1263; ***446 **678**White v. Johnson, supra, 282 U.S. at pages 373, 374, 51 S.Ct. at page 118, 75 L.Ed. 388. See also Natural Gas Co. v. Slattery, supra, 302 U.S. at pages 309, 310, 58 S.Ct. at pages 203, 204, 82 L.Ed. 276.[FN9]

> FN9 Compare the provisions of the Packers and Stockyards Act, 7 U.S.C. ss 194 and 195, 7 U.S.C.A. ss 194, 195, and of the Commodity Exchange Act, 7 U.S.C. s 13a, 7 U.S.C.A. s 13a, imposing criminal sanctions, and those of the Federal Trade Commission Act as amended, 15 U.S.C. ss 45(g)-(l), 15 U.S.C.A. s 45(g—l), imposing heavy penalties, for violation of an administrative order which has become final by its affirmance upon the exclusive statutory method of review provided, or by the expiration of the time allowed for review without resort to the statutory procedure.

The analogy of such a procedure to the present, by which violation of a price regulation is made penal, unless the offender has established its unlawfulness by an independent statutory proceeding, is complete and obvious. As we have pointed out such a requirement is objectionable only if by statutory command or in operation it will deny, to those charged with violations, an adequate opportunity to be heard on the question of validity. And, as we have seen, petitioners fail to show that such is the necessary effect of the present statute, or that if so applied as to deprive them of an adequate opportunity to establish the invalidity of a regulation there would not be adequate means of securing appropriate judicial relief in the course either of the statutory proceeding or of the criminal trial. During the present term of court we have held that one charged with criminal violations of an order of his draft board may not challenge the validity of the order if he has failed to pursue to completion the exclusive administrative remedies provided by the Selective Training and Service Act of 1940. Falbo v. United States, 320 U.S. 549, 64 S.Ct. 346; and see Bowles v. United States, 319 U.S. 33, 63 S.Ct. 912, 87 L.Ed. 1194. We perceive no tenable ground for distinguishing that case from this.

We have no occasion to decide whether one charged with criminal violation of a duly promulgated price regulation ***447** may defend on the ground that the regulation is unconstitutional on its face. Nor do we consider whether one who is forced to trial and convicted of violation of a regulation, while diligently seeking determination of its validity by the statutory procedure may thus be deprived of the defense that the regulation is invalid. There is no contention that the present regulation is void on its face, petitioners have taken no step to challenge its validity by the procedure which was open to them and it does not appear that they have been deprived of the opportunity to do so. Even though the statute should be deemed to require it, any ruling at the criminal trial which would preclude the accused from showing that he had had no opportunity to establish the invalidity of the regulation by resort to the statutory procedure, would be re-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

viewable on appeal on constitutional grounds. It will be time enough to decide questions not involved in this case when they are brought to us for decision, as they may be, whether they arise in the Emergency Court of Appeals or in the district court upon a criminal trial.

[39][40][41] In the exercise of the equity jurisdiction of the Emergency Court of Appeals to test the validity of a price regulation, a jury trial is not mandatory under the Seventh Amendment. Cf. Block v. Hirsh, supra, 256 U.S. at page 158, 41 S.Ct. at page 460, 65 L.Ed. 865, 16 A.L.R. 165. Nor has there been any denial in the present criminal proceeding of the right, guaranteed by the Sixth Amendment, to a trial by a jury of the state and district where the crime was committed. Subject to the requirements of due process, which are here satisfied, Congress could make criminal the violation of a price regulation. The indictment charged a violation of the regulation in the district of trial, and the question whether petitioners had committed the crime thus charged in the indictment and defined by Congress, namely, whether they had violated the statute by willful disobedience of a price regulation promulgated by the ***448** Administrator, was properly submitted to the jury. Cf. Falbo v. United States, supra.

Affirmed.

****679** Mr. Justice ROBERTS.

I dissent. I find it unnecessary to discuss certain of the questions treated in the opinion of the court. I am of opinion that the Act unconstitutionally delegates legislative power to the Administrator. As I read the opinion of the court it holds the Act valid on the ground that sufficiently precise standards are prescribed to confine the Administrator's regulations and orders within fixed limits, and that judicial review is provided effectively to prohibit his transgression of those limits. I believe that analysis demonstrates the contrary. I proceed, therefore, to examine the statute.

The Powers Conferred.

When, in his judgment, commodity prices have risen, or threaten to rise, 'to an extent or in a manner inconsistent with the purposes' of the Act the Administrator may establish 'such maximum price or maximum prices as in his judgment will be generally fair and equitable and will effectuate the purposes' of the Act.

'So far as practicable' in establishing any maximum price he is to ascertain the prices prevailing in a specified period in 1941 but may use another period nearest to that specified because necessary data for the period specified is not available; and may make adjustments 'for such relevant factors as he may determine and deem to be of general applicability,' including several factors mentioned. Before issuing any regulation he shall 'so far as practicable' advise with representative members of the industry affected.

Any regulation may provide for adjustments and reasonable exceptions which, in the Administrator's judgment,***449** are necessary and proper to effectuate the purposes of the Act. If, in his judgment, such action is necessary or proper to effectuate the purposes of the Act, he may, by regulation or order, regulate or prohibit speculative or manipulative practices or hoarding in connection with any commodity (50 U.S.C.A.Appendix s 902, 50 U.S.C.A.Appendix s 902).

It will be seen that whether, and, if so, when, the price of any commodity [FN1] shall be regulated depends on the judgment of the Administrator as to the necessity or propriety of such price regulation in effectuating the purposes of the Act.

FN1 The Act gives the Administrator no power with respect to wages, and limits his powers as respects fishery commodities (50 U.S.C.A.Appendix, s 902(i), 50 U.S.C.A.Appendix, s 902(i)), and agricultural commodities (50 U.S.C.Appendix, s 903, 50 U.S.C.A.Appendix, s 903).

The Supposed Standards for the Administrator's Guidance.

The Act provides that any regulation or order must be 'generally fair and equitable' in the Administrator's judgment; but coupled with this injunction is another that the order and regulation must be such as, in the judgment of the Administrator, is necessary or proper to effectuate the purposes of the Act.

I turn, therefore, to the stated purposes to ascertain what, if any, limits the statute places upon the Administrator's exercise of his powers.

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

Section 1(a), 50 U.S.C.Appendix, s 901(a), 50 U.S.C.A.Appendix, s 901(a), states seven purposes, which should be set forth separately as follows:

'to stabilize prices and to prevent speculative, unwarranted, and abnormal increases in prices and rents;'

In order to exercise his power anent this purpose the Administrator will have to form a judgment as to what stabilization means, and what are speculative, unwarranted and abnormal increases in price. It hardly need be said that men may differ radically as to the connotation of these terms and that it would be very difficult to convict ***450** anyone of error of judgment in so classifying a given economic phenomenon.

'to eliminate and prevent profiteering, hoarding, manipulation, speculation, and other disruptive practices resulting from abnormal market conditions or scarcities caused by or contributing to the national emergency;'

To accomplish this purpose the Administrator must form a judgment as to what constitutes profiteering, hoarding, manipulation or speculation. As if the administrative****680** discretion were not sufficiently broad there is added the phrase 'other disruptive practices', which seems to leave the Administrator at large in the formation of opinion as to whether any practice is disruptive.

'to assure that defense appropriations are not dissipated by excessive prices;'

It is not clear—to me at least—what is the limit of this purpose. I can conceive that an honest Administrator might, without laying himself open to the charge of exceeding his powers, make any kind of order or regulation based upon the view that otherwise defense appropriations by Congress might be dissipated by what he considers excessive prices. How his exercise of judgment in connection with this purpose could be thought excessive it is impossible for me to say.

'to protect persons with relatively fixed and limited incomes, consumers, wage earners, investors, and persons dependent on life insurance, annuities, and pensions, from undue impairment of their standard of living;'

The Administrator's judgment that any price policy will tend to affect the classes mentioned in this purpose from what he may decide to be 'undue impairment of their standard of living' would seem to be so sweeping that it would be impossible to convict him of an error of judgment in any conclusion he might reach.

'to prevent hardships to persons engaged in business, to schools, universities, and other institutions, and to the ***451** Federal, State, and local governments, which would result from abnormal increases in prices;'

Of course Congress might have included in the catalogue of beneficiaries churches, hospitals, labor unions, banks and trust companies and other praiseworthy organizations, without rendering the 'standard' any more vague.

'to assist in securing adequate production of commodities and facilities;'

Here is a purpose which seems, to some extent at least, to permit the easing of price restrictions; for it would appear that diminishment of price would hardly assist in promoting production. Thus the Administrator, and he alone, is to balance two competing policies and strike the happy mean between them. Who shall say his conclusion is so indubitably wrong as to be properly characterized as 'arbitrary or capricious'.

'to prevent a post emergency collapse of values;'

This purpose, or 'standard', seems to permit adoption by the Administrator of any conceivable policy. I have difficulty in envisaging any price policy in support of which some economic data or opinion could not be cited to show that it would tend to prevent post emergency collapse of values.

These seven purposes must, I submit, be considered as separate and independent. Any action taken by the Administrator which, in his judgment, promotes any one or more of them is within the granted power. If, in his judgment, any action by him is necessary or appropriate to the accomplishment of one or more of them, the Act gives sanction to his order or regulation.

Reflection will demonstrate that in fact the Act sets no limits upon the discretion or judgment of the Administrator. His commission is to take any action with respect to prices which he believes will preserve what he deems a sound economy during the emergency and prevent what he considers to be a disruption of such a sound economy ***452** in the post war period. His judgment, founded as it may be, on his studies and

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

investigations, as well as other economic data, even though contrary to the great weight of current opinion or authority, is the final touchstone of the validity of his action.

I shall not repeat what I have said in Bowles v. Willingham, 321 U.S. 503, 64 S.Ct. 641. I have there quoted the so-called standards prescribed in the National Industrial Recovery Act. Comparison of them with those of the present Act, and perusal of what was said concerning them in A.L.A. Schechter Poultry Corp. v. United States, 295 U.S. 495, 55 S.Ct. 837, 79 L.Ed. 1570, 97 A.L.R. 947, leaves no doubt that the decision is now overruled. There, as here, the 'code' or regulation, to become effective, had to be found by the Executive to 'tend to effectuate the policy' of the Act. (See footnote 3, p. 521.)

****681** The Administrator's Procedure.*

I have not yet spoken of the statutory provisions respecting the permissible procedure of the Administrator in imposing prices. Sec. 202(a), 50 U.S.C.Appendix, s 922(a), 50 U.S.C.A.Appendix, s 922(a) authorizes him to make such studies and investigations and to obtain such information as he deems necessary or proper to assist him in prescribing any regulation or order, or in the administration and enforcement of the Act and regulations, orders, and price schedules thereunder. The remaining subsections give him broad powers to compel disclosure of information. And he may take official notice of economic data and other facts, including facts found as a result of his investigations and studies (s 203(b), 50 U.S.C.Appendix, s 923(b), 50 U.S.C.A.Appendix, s 923(b).

Each regulation or order must be accompanied by a 'statement of the considerations involved' in its issue (s 2(a), 50 U.S.C.Appendix, s 902(a) 50 U.S.C.A.Appendix, s 902(a). This is not a statement or finding of fact. Webster defines a term 'consideration' as 'that which is, or should be, considered as a ground of opinion or action; motive; reason.' The citizen, ***453** therefore, is merely to be advised of the reasons for the Administrator's action.

How is he to proceed if he desires to challenge that action? The answer is found in s 203, 50 U.S.C.Appendix, s 923, 50 U.S.C.A.Appendix, s 923. Within a specified time after the issue of a regulation any person subject to any provision of it may file a protest 'specifically setting forth objections to any such provision and affidavits or other written evidence in support of such objections.' The Administrator may receive statements in support of the regulations and incorporate them in his proceedings. Within a time fixed he must (1) grant or deny the protest in whole or in part, (2) note it for hearing, or (3) provide an opportunity to present further evidence. His is the choice.

If he denies the protest in whole or in part he must inform the protestant of the grounds upon which his decision was based and of any economic data or other facts of which he has taken official notice.

This, then, is the first opportunity the protestant has to know on what the Administrator has based his 'considerations' or reasons for action. As the Emergency Court of Appeals held in Lakemore Company v. Brown, 137 F.2d 355, 359:[FN2]

> FN2 In citing cases decided by that court, I do so with no thought that in construing the Act's provisions that court has erred. On the contrary, I cite its interpretations of the statute as supporting my views that, as properly construed, the Act is invalid.

'Thus, consistently with statutory requirements, the Administrator could have waited until he had entered his order denying the protest before informing the protestant of the economic data of which he had taken official notice and of the economic conclusions which he had derived therefrom and the other grounds upon which the denial was based.'

And it is to be observed that, after seeing the protestant's affidavits and the evidence, the Administrator may load the record with all sorts of material, articles, opinions, ***454** compilations, and what not—pure hearsay—subject to no cross-examination, to persuade the court that his order could, 'in his judgment', promote one of the 'purposes' of the Act.

Thus is the 'record' weighted against formal complaint in court.

Chatlos v. Brown, Em.App., 136 F.2d 490, Spaeth v. Brown, Em.App., 137 F.2d 669, and Bibb Manufacturing Co. v. Bowles, Em.App., 140 F.2d 459, amongst other cases, indicate the sort of da-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

ta—although they do not exclude the use of other sorts—on which the Administrator seems to be accustomed, and to be entitled, to act. He need make no findings of fact.

The Court Review.

The protestant who is aggrieved by the denial or partial denial of his protest may, within a set time, file a complaint with a specially created Emergency Court of Appeals 'specifying his objections and praying that the regulation, order, or price schedule protested be enjoined or set aside in whole or in part.' The court is given exclusive jurisdiction and all other courts ****682** are forbidden to take jurisdiction to grant such relief. The court may set aside the order, dismiss the complaint, or remand the proceeding. Upon the filing and service of the complaint, the Administrator is to certify and file a transcript of such portion of the proceedings before him as are material to the complaint (s 204(a), 50 U.S.C.Appendix, s 924(a), 50 U.S.C.A.Appendix, s 924(a).

The section proceeds:

'No objection to such regulation, order, or price schedule, and no evidence in support of any objection thereto, shall be considered by the court, unless such objection shall have been set forth by the complainant in the protest or such evidence shall be contained in the transcript. If application is made to the court by either party for leave to introduce additional evidence which was either offered to the Administrator and not admitted, or which could not ***455** reasonably have been offered to the Administrator or included by the Administrator in such proceedings, and the court determines that such evidence should be admitted, the court shall order the evidence to be presented to the Administrator. The Administrator shall promptly receive the same, and such other evidence as he deems necessary or proper, and thereupon he shall certify and file with the court a transcript thereof and any modification made in the regulation, order, or price schedule as a result thereof; except that on request by the Administrator, any such evidence shall be presented directly to the court.'

It is not difficult to picture the plight of the protestant. The Administrator's statement of considerations, without more, constitutes proof in the cause.

In Montgomery Ward & Co. v. Bowles, Em.App., 138 F.2d 669, 670, the Administrator in his statement of considerations said that he took official notice of three propositions of the most general scope. No evidence in support of these or of any other facts upon which he relied was included in the transcript. The complainant suggested to the court the omission of pertinent matter, namely, the evidence in support of the propositions of which the Administrator said he took official notice, the evidence of various other assertions of fact in his opinion, and the particular facts and evidence upon which he based the conclusions expressed in his statement of considerations that 'the maximum prices established in this regulation are fair and equitable.' The Administrator objected to the suggestion and the court rejected it. It was held that the Act requires 'only a summary statement of the basic facts which justify the regulation.'

Referring to s 204(b), 50 U.S.C. Appendix, s 924(b), 50 U.S.C.A.Appendix, s 924(b), the court held that the requirement that the complainant must establish 'to the satisfaction of the court' that the regulation, order, or price schedule is not in accordance with law or is arbitrary or capricious throws upon the protestant ***456** the burden 'to bring forward and satisfactorily prove the invalidating facts', and added: 'Unless and until he does so the regulation is to be taken as valid and the existence of a state of facts which justify it is to be assumed without the necessity of proof thereof by the Administrator.'

The court added that the protestant is given means of carrying this burden by filing affidavits and other evidence, but omits to refer to the fact that these affidavits and other evidence must be addressed to the Administrator's order and his most general and sweeping statement of considerations, which merely means his reasons for making the order. These affidavits and this evidence under the procedure prescribed are to be put in before the protestant even knows what data the Administrator relied upon or sees the Administrator's opinion denying his protest. It is hardly necessary to dilate upon the burden thus placed on a protestant or the extent to which he is compelled to fill the record with what he may think relevant matter only to find that he has been shooting at straws. The court further adverted to the fact that the Act permits the protestant to state in detail in connection with his protest the nature and sources of any further evidence not subject to his control upon which he believes he can rely in support of the facts alleged in

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

his protest. Here again the protestant is under the same handicap. He must disclose all he has in mind to the Administrator before the Administrator****683** makes any disclosure to him of the facts and data upon which that official has relied.

Finally the court refers to the privilege given the protestant to file a brief with the Administrator and to 'request an oral hearing', without mentioning the facts that the brief can be addressed only to the reasons given in the statement of consideration, and that the Administrator is at liberty to deny the request.

A procedure better designed to prevent the making of an issue between parties can hardly be conceived.

***457** And the extent of the burden is further emphasized by what the Emergency Court of Appeals has said in Lakemore Co. v. Brown, supra:

'It is objected that the Administrator thus in effect has prejudged the case; that as witness, immune from cross-examination, he has rendered an opinion which concludes the matter which is before him as judge.

'This overlooks the fact that the Administrator, from the necessities of the case, does not come with a virgin mind to the consideration of a protest. He has previously performed the official act of issuing the regulation, the terms of which of course reflect his conclusions on many economic, administrative and legal questions. In this sense, he necessarily approaches consideration of a protest with certain 'preconceived notions'—to use complainant's phrase. It is the object of the protest procedure to give the Administrator a chance to reconsider any challenged provisions in the regulation in the light of further evidence or arguments which may be advanced by the protestant. What the Administrator did here was to lay his cards on the table in the protest proceedings, offering protestant an opportunity to play its trump cards, if it had any.

'Of course such statements of economic conclusions thus incorporated in the record are not 'evidence.' Section 204(a) requires the transcript of the protest proceedings, filed in this court, to 'include a statement setting forth, so far as practicable, the economic data and other facts of which the Administrator has taken official notice.' Insofar as any economic generalizations or conclusions formulated by the Administrator constitute indispensable steps in his process of reasoning in denying the protest, it is for this court to say whether they have any rational basis, in performance of our statutory duty to consider whether the regulation or order should be set aside in whole or in part as being 'arbitrary or capricious.' This is so, whether the Administrator includes such generalizations and conclusions***458** in his opinion accompanying the denial of the protest or, as in this case, incorporates them into the record of the protest proceedings at an earlier stage in order to afford protestant an opportunity for rebuttal.'

To this may be added what the Emergency Court said in Madison Park Corporation v. Bowles, 140 F.2d 316, 324:

'We do not decide that this Court should limit the application of the term 'generally fair and equitable' standards mentioned in the law and in discussions of its enactment while pending in Congress. It may be possible that a case will occur in which the effect of a regulation established by the Administrator clearly will be shown to be generally unfair and inequitable on grounds not mentioned. But in such a case the reasons must be clear and compelling. The Act provides the Administrator may establish such rents as in his judgment will be generally fair and equitable. Review in this Court is plainly limited. It may not substitute its judgment for the judgment of the Administrator, but may act in review only when it finds the regulation is not in accordance with law or is arbitrary and capricious. Thus if the Court finds any reasonable basis to support the view that the regulation deals fairly and equitably with the industry concerned, the regulation must stand.' (Italics in original.)

When these cumulative burdens placed upon the protestant who seeks review are fairly appraised it becomes apparent that he must carry an insupportable load, and that, in truth, the court review is a solemn farce in which the Emergency Court of Appeals, and this court, on certiorari, must go through a series of motions which look like judicial review but in fact are nothing but a catalogue of reasons why, under the scheme of the Act, the courts are unable to say that the Administrator has exceeded the discretion vested in him.

****684** No court is competent, on a mass of eco-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

nomic opinion consisting of studies by subordinates of the Administrator, ***459** charts and graphs prepared in support of the studies, and economic essays gathered hither and yon, to demonstrate, beyond doubt, that the considerations or conclusions of the Administrator from such material cannot support the Administrator's judgment that what he has done by way of regulation or price schedule tends to prevent post war collapse of values, or to prevent dissipation of defense appropriations through excessive prices, or to prevent impairment of the standard of living of persons dependent on life insurance, or to prevent hardship to schools—to enumerate but a few of the stated purposes of the Act.

It is not surprising that, in the thirty-one cases decided by the Emergency Court of Appeals of which I have found reports, complaints have been dismissed in twenty-eight, and but three have been remanded to the Administrator for further proceedings.[FN3] Two of the three involved no question of merits under the statutory provisions.

FN3 Armour & Co. v. Brown, Em.App., 137 F.2d 233; Montgomery Ward & Co. v. Bowles, Em.App., 138 F.2d 669; Hillcrest Terrace Corp. v. Brown, Em.App., 137 F.2d 663.

The War Power.

The Emergency Court of Appeals in Taylor v. Brown, 137 F.2d 654, overruled a challenge to the constitutional validity of the Act's delegation of legislative power to the Administrator by invocation of the 'War Power' of Congress, the powers embodied in Article I, Section 8, of the Constitution 'to declare War', 'to raise and support Armies', 'to provide and maintain a Navy,' and 'to make all Laws which shall be necessary and proper for carrying into Execution' those powers. After showing, what needs no argument, that these powers of Congress are very different from those to be exercised in peace, the court then—without a sign that it realizes the great gap in the process—assumes that one of Congress' war powers is the power to transfer its legislative function to a delegate. By the ***460** same reasoning it could close this court or take away the constitutional prerogatives of the President as 'War measures'.

I am not sure how far this court's present opinion adopts the same view. There are references in it to the war emergency, and yet the reasoning and the authorities cited seem to indicate that the delegation would be good in peace time and in respect of peace time administration. And the Emergency Court of Appeals, in spite of its decision in Taylor v. Brown, supra, and its statement in Philadelphia Coke Co. v. Bowles, 139 F.2d 349, that, as the Act is an exercise of the war power and therefore does not deprive citizens of property without due process, has, nevertheless, weighed provisions of the Act as against the guaranty of the Fifth Amendment in Wilson v. Brown, 137 F.2d 348, and in Avant v. Bowles, 139 F.2d 702.

I am sure that my brethren, no more than I, would say that Congress may set aside the Constitution during war. If not, may it suspend any of its provisions? The question deserves a fair answer. My view is that it may not suspend any of the provisions of the instrument. What any of the branches of government do in war must find warrant in the charter and not in its nullification, either directly or stealthily by evasion and equivocation. But if the court puts its decision on the war power I think it should say so. The citizens of this country will then know that in war the function of legislation may be surrendered to an autocrat whose 'judgment' will constitute the law; and that his judgment will be enforced by federal officials pursuant to civil judgments, and criminal punishments will be imposed by courts as matters of routine.

If, on the contrary, such a delegation as is here disclosed is to be sustained even in peacetime, we should know it.

Mr. Justice RUTLEDGE, dissenting.

I agree with the Court's conclusions upon the substantive issues. But I am unable to believe that the trial afforded***461** the petitioners conformed to constitutional requirements. The matter is of such importance as requires a statement of the reasons for dissent.

****685** The Emergency Price Control legislation is unusual, if not unique. It is streamlined law in both substance and procedure. More than any other legislation except perhaps the Selective Service Act, 50 U.S.C.A.Appendix, s 301 et seq., in the combined effect of its provisions it attenuates the rights of affected individuals. The Congress regarded this as necessary, though it sought to preserve as much of individual right as it felt was consistent with control-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

ling wartime inflation. To that judgment we owe all deference, saving only what we owe to the Constitution.

War such as we now fight calls into play the full power of government in extreme emergency. It compels invention of legal, as of martial tools adequate for the times' necessity. Inevitably some will be strange, if also life-saving, instruments for a people accustomed to peace and the normal working of constitutional limitations. Citizens must surrender or forego exercising rights which in other times could not be impaired. But not all are lost. War expands the nation's power. But it does not suspend the judicial duty to guard whatever liberties will not imperil the paramount national interest.

I.

Judged by normal peacetime standards, over-all nation-wide price control hardly has accepted place in our institutions. Notwithstanding the considerable expansion of recent years in this respect, the extension has been piecemeal. [FN1] Until now it has not enveloped the entire economy.[FN2] Whether control so extensive might be upheld in some emergency not created by war need not now be decided.***462** That it can be supported in the present circumstances and for the declared purposes there can be no doubt. It is enough, as the Court points out, that legal foundation exists in the nation's power to make war, as this has been given to Congress and the Chief Executive. Cf. Kiyoshi Hirabayashi v. United States, 320 U.S. 81, 63 S.Ct. 1375, 87 L.Ed. 1774.[FN3]

FN1 Cf., e.g., Nebbia v. New York, 291 U.S. 502, 54 S.Ct. 505, 78 L.Ed. 940, 89 A.L.R. 1469.

FN2 Perhaps the nearest previous approach to control so extensive was in the National Industrial Recovery legislation.

FN3 Cf. note 18 infra.

The foundation has relevance for each of the issues. And generally it has significance for the application of peacetime precedents. Decisions made then with limitations, explicit or implied, not affected by influence of the war power and the conditions of a state of war, cannot be wholly conclusive in their limiting effect upon the exercise of war-making authority. Care must be taken therefore, in applying them, both to see that they are observed so far as the dominant necessity permits and to be equally sure they are not misapplied to hamstring essential authority.[FN4]

FN4 It goes without saying that whatever scope is allowed for operation of governmental authority in peace continues to be effective in war.

As it is with the substantive control, so it is with delegating legislative power. War begets necessities for this, as for imposing substantive controls, not required by the lesser exigencies of more normal periods. In this respect certainly there is as much room for difference as exists when Congress is dealing wholly with internal matters and when it is acting with the President about foreign affairs. Cf. United States v. Curtiss-Wright Export Corp., 299 U.S. 304, 57 S.Ct. 216, 81 L.Ed. 255. Not only the broader power of Congress, but its conjunction in the particular delegation with the wider authority of the President, both as chief magistrate and as commander-in-chief, goes to sustain the greater delegation. Cf. Kiyoshi Hirabayashi v. United States, supra. But the present legislation, as the Court's opinion demonstrates,***463** does not go beyond the limits allowed by peacetime precedents in the substantive delegation.[FN5]

FN5 E.g., the administrator has no power to adopt codes of fair competition generally, such as was given under N.I.R.A. His principal function is single, to determine and make effective by regulation the maximum price at which a commodity may be sold. The task is vast and complex, in comparison with previously sustained price-fixing delegations, by virtue of the number of industries and items affected and the nation-wide scope of the authority. But the focus of the price-fixing function is narrow, although powerful, in its incidence upon a particular industry or operator.

****686** II.

My difficulty arises from the Act's procedural provisions. They too are unusual. That is true, though each save one has been used before, and sustained, in separate applications. No previous legislation has presented quite this combination of procedural devices.[FN6] In the combination, if in nothing more,

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

unique quality would be found. But there is more.

FN6 Cf. Judicial Review of Price Orders under the Emergency Price Control Act (1942) 37 Ill.L.Rev. 256, 263-264; and other materials cited infra notes 20, 21.

Congress sought to accomplish two procedural objectives. One was to afford a narrow but sufficient method for securing review and revision of the regulations. At the same time the Act created broad and ready methods for enforcement. The short effect of the procedure is to give the individual a single channel for questioning the validity of a regulation, through the protest procedure and the Emergency Court of Appeals, with review of its decisions here on certiorari. Section 204. On the other hand, the varied and widely available means for enforcement include criminal proceedings, suits in equity, and suits for recovery of civil penalties, in the federal district courts and in the state courts. Section 205(a), (b), (c). See also ***464**Section 205(d), (e), (f).[FN7] And in all these enforcement proceedings the mandate of Section 204(d) is that the court shall have no 'jurisdiction or power to consider the validity of' a regulation, order or price schedule. The statute thus affords the individual, to question a regulation's validity, one route and that a very narrow one, open only briefly. The administrator and others, to enforce it, have many. And in the enforcement proceedings the issues are cut down so that, in a practical sense, little else than the fact whether a violation of the regulation as written has occurred or is threatened may be inquired into.[FN8]

FN7 By Section 205(f)(1), (2) licensing authority is given to the administrator, with special provisions for suspension for not more than twelve months by proceedings in state, territorial or federal district courts.

FN8 It is conceded that questions concerning the validity of statutory provisions, as distinguished from regulations, remain determinable by enforcing courts. See Sen. Rep. No. 931, 77th Cong., 2d Sess., 24-25, and compare H.R. 5479, 77th Cong., 1st Sess., printed in Hearings before Committee on Banking and Currency on H.R. 5479, 77th Cong., 2d Sess., 4, 7-8.

Disparity in remedial and penal measures does not necessarily invalidate the procedure, though it has relevance to adequacy of the remedy allowed the individual.[FN9] Congress has broad discretion to open and close the doors to litigation. In doing so it may take account of the necessities presented by such a situation as it was dealing with here. To follow the usual course of legislation and permit challenge by restraining orders, injunctions, stay orders and the normal processes of litigation would have been, in this case, to lock the barn door after the horse had been stolen. There was therefore compelling reason for Congress to balance the scales of litigation unevenly, if only it did not go too far. In no other way could it protect the paramount national interest. If the result, within the permissible limits, is harsh or inconvenient for ***465** the individual, that is but part of the price he, with all others, must pay for living in a nation which ordinarily gives him so much of protection but in a world which has not been organized to give it security against events so disruptive of democratic procedures.

FN9 Cf. Parts IV, V, infra.

I have no difficulty with the provision which confers jurisdiction upon the Emergency Court of Appeals to determine the validity of price regulations or, if that had been all, with the mandate which makes its jurisdiction in that respect exclusive. Equally clear is the power of Congress to deprive the other federal courts of jurisdiction to issue stay orders, restraining orders, injunctions or other relief to prevent the operation of price regulations or to set them aside. So much may be rested on Congress' plenary authority to define and control the jurisdiction of the federal courts. Constitution, Article III, Section 2; Lockerty v. Phillips, 319 U.S. 182, 63 S.Ct. 1019, 87 L.Ed. 1339. It may be taken too, for the purposes of this case, that Congress' power to channel enforcement of ***687** federal authority through the federal courts sustains the like prohibitions it has placed on the state courts.[FN10] Without more, the statute's provisions would seem to be unquestionably within the Congressional power. Cf. Myers v. Bethlehem Shipbuilding Corp., 303 U.S. 41, 58 S.Ct. 459, 82 L.Ed. 638.

FN10. The Moses Taylor, 4 Wall. 411, 18 L.Ed. 397; Bowles v. Willingham, 321 U.S. 503, 64 S.Ct. 641; cf. Claflin v. Houseman, Assignee, 93 U.S. 130, 23 L.Ed. 833; Plaquemines Tropical Fruit Co. v. Hender-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

son, 170 U.S. 511, 18 S.Ct. 685, 42 L.Ed. 1126.

Congress however was not content to create a single national tribunal, give it exclusive jurisdiction to determine all cases arising under the statute, and deny jurisdiction over them to all other courts.[FN11] It provided for enforcement***466** by civil and criminal proceedings in the federal district courts and in the state courts throughout the country.

FN11 This it might have done, subject only to the requirement that the procedure specified for the single competent court afford a constitutionally adequate mode for determining the issues. Myers v. Bethlehem Shipbuilding Corp., supra. In case criminal jurisdiction were conferred, observance of the requirements of Article III, s 2, and of the Fifth and Sixth Amendments concerning such trials would be required. Cf. text infra, Parts V, VI.

This, too, it could do, though only if adequate proceedings, in the constitutional sense, were authorized. And I agree that the enforcing jurisdiction would not be made inadequate merely by the fact that no stay order or other relief could be had pending the outcome of litigation. Confronted as the nation was with the imminent danger of inflation and therefore the necessity that price controls should become effective at once and continue so without interruption at least until invalidated in particular instances, Congress could require individuals to sustain, in deference to the paramount public interest, whatever harm might ensue during the period of litigation and until each had demonstrated the invalidity of the regulation as it affected himself.[FN12] Runaway inflation could not have been avoided in any other way. The lid had to go on, go on tight and stay tight. This necessity united with the general presumption of validity which attaches to legislation [FN13] and Congress' power to control the jurisdiction of the courts to sustain its denial of power to all courts, including the enforcing courts, the Emergency Court and this one,[FN14] to suspend operation of the regulations pending final determination of validity.

FN12 Cf. L'Hote v. New Orleans, 177 U.S. 587, 20 S.Ct. 788, 44 L.Ed. 899; Welch v. Swasey, 214 U.S. 91, 29 S.Ct. 567, 53 L.Ed. 923; Hamilton v. Kentucky Distilleries & Warehouse Co., 251 U.S. 146, 40 S.Ct. 106, 64 L.Ed. 194.

FN13 Metropolitan Casualty Ins. Co. v. Brownell, 294 U.S. 580, 55 S.Ct. 538, 79 L.Ed. 1070; United States v. Carolene Products Co., 304 U.S. 144, 152—154, 58 S.Ct. 778, 783, 784, 82 L.Ed. 1234.

FN14 By Section 204(b) of the Act, the effectiveness of a judgment of the Emergency Court enjoining or setting aside the regulation, in whole or in part, is postponed until the expiration of thirty days from its entry and, if certiorari is sought here within that time, the postponement continues until this Court's denial of the writ becomes final or until other final disposition of the case by this Court. By Section 204(d) the Emergency Court and this Court are given exclusive jurisdiction to determine the validity of the regulation and all other courts are denied 'jurisdiction or power to consider' this question and to stay, restrain, enjoin or set aside any provision of the regulation or its enforcement. The net effect is to deprive all courts of power to suspend operation of the regulation pending final decision on its validity and to keep it in force until a final judgment of the Emergency Court, or of this Court on review of its decision, becomes effective.

467** The crux of this case comes, as I see it, in the question whether Congress can confer jurisdiction upon federal and state courts in the enforcement proceedings, more particularly the criminal suit, and at the same time deny them 'jurisdiction or power to consider the validity' of the regulations for which enforcement is thus sought. This question which the Court now says 'presents no novel constitutional issue' was expressly and carefully reserved in Lockerty v. Phillips, supra. The prohibition*688** is the statute's most novel feature. In combination with others it gives the procedure a culminating summary touch and presents questions different from those arising from the other features.

The prohibition is unqualified. It makes no distinction between regulations invalid on constitutional

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

grounds and others merely departing in some respect from statutory limitations, which Congress might waive, or by the criterion whether invalidity appears on the face of the regulation or only by proof of facts. If the purpose and effect are to forbid the enforcing court to consider all questions of validity and thus to require it to enforce regulations which are or may be invalid for constitutional reasons, doubt arises in two respects. First, broad as is Congress' power to confer or withhold jurisdiction, there has been none heretofore to confer it and at the same time deprive the parties affected of opportunity to call in question in a criminal trial whether the law, be it statute or ***468** regulation,[FN15] upon which the jurisdiction is exercised squares with the fundamental law. Nor has it been held that Congress can forbid a court invested with the judicial power under Article III to consider this question, when called upon to give effect to a statutory or other mandate.

FN15 Cf. text infra, Part III, at notes 16, 17.

It is one thing for Congress to withhold jurisdiction. It is entirely another to confer it and direct that it be exercised in a manner inconsistent with constitutional requirements or, what in some instances may be the same thing, without regard to them. Once it is held that Congress can require the courts criminally to enforce unconstitutional laws or statutes, including regulations, or to do so without regard for their validity, the way will have been found to circumvent the supreme law and, what is more, to make the courts parties to doing so. This Congress cannot do. There are limits to the judicial power. Congress may impose others. And in some matters Congress or the President has final say under the Constitution. But whenever the judicial power is called into play, it is responsible directly to the fundamental law and no other authority can intervene to force or authorize the judicial body to disregard it. The problem therefore is not solely one of individual right or due process of law. It is equally one of the separation and independence of the powers of government and of the constitutional integrity of the judicial process, more especially in criminal trials.

III.

The idea is entirely novel that regulations may have a greater immunity to judicial scrutiny than statutes have, with respect to the power of Congress to require the courts to enforce them without regard to constitutional requirements.***469** At a time when administrative action assumes more and more of the law-making function,[FN16] it would seem the balance of advantage, if any, should be the other way. But there is none. The statute has impact upon individuals only through the regulations. They are in effect part of the Act itself, unless invalid. If invalid, they rule, just as the statute does, until set aside. And, in respect to constitutional requirements, they have no more immunity than the statute itself.[FN17]

FN16 There hardly can be question that whenever an administrative agency, acting within the discretion validly conferred upon it by Congress, promulgates a regulation or issues an order of general applicability it is 'making the law,' as effectively as is Congress when it enacts a specific prescription, by whatever name this may be called. United States v. Grimaud, 220 U.S. 506, 31 S.Ct. 480, 55 L.Ed. 563; Avent v. United States, 266 U.S. 127, 45 S.Ct. 34, 69 L.Ed. 202; United States v. Michigan Portland Cement Co., 270 U.S. 521, 46 S.Ct. 395, 70 L.Ed. 713.

FN17 Cf. the dissenting opinion of Mr. Justice Roberts. The notion that Congress somehow could cut off review of regulations for constitutional invalidity when it could not do so for statutes, of which suggestions appear in the legislative history and the briefs, was not adhered to in the oral argument as to regulations void on their face and is not tolerable when the effect would be to make the courts instruments for enforcing unconstitutional mandates. Cf. Part VI, infra.

Clearly Congress could not require judicial enforcement of an unconstitutional statute. The same is true of an unconstitutional****689** regulation. And it is conceded that Congress could not have compelled judicial enforcement of all price regulations, without regard to their validity, if it had not given opportunity for attack upon them through the Emergency Court or if that opportunity is inadequate. But because the opportunity is afforded and is deemed adequate in the unusual circumstances, at any rate for some of its purposes, and because it was not followed, the Court holds that criminal enforcement must be given and the enforcing court cannot consider the question of validity.

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

*470 If I understand it, the argument to sustain the conviction, in its broadest form, rests upon the proposition that Congress, by providing in one proceeding a constitutionally adequate mode for deciding upon the validity of a law or regulation, and requiring this to be followed within a limited time, can cut off all other right to question it and make that determination, or the failure to secure it in time, conclusive for all purposes and in all other proceedings. The proposition cannot be accepted in that broad form. To do so would mean, for instance, that if in this case a regulation had prescribed one maximum price for sales by merchants of one race or religion and a lower one for distributors of another, the judicial power of the United States would have to be exercised to convict the latter for selling at the formers' price, if they had not availed themselves of the limited review afforded by this Act. It hardly would be consistent with accepted ideas of due process or equal protection for any court to impose penalty or restraint in such a case. FN18 And I cannot imagine this Court as sustaining such a conviction or any other as imposing it.FN19

FN18 See note 17 supra. The unique circumstances involved in Kiyoshi Hirabayashi v. United States, 320 U.S. 81, 63 S.Ct. 1375, 87 L.Ed. 1774, confine that case to its facts, including the particular emergency with which legislation there under review had dealt, as respects the issue of equal protection.

FN19 Cf. notes 23, 33 infra.

The illustration is extreme and improbable of occurrence. But it serves to test the broad contention. Such a doctrine established as generally applicable would contain seeds of influence too dangerous for acceptance, more especially for the determination of criminal matters. No authority compels or enjoins this. And I am unwilling to give the idea adherence in particular applications without stating qualification which confines its possible effects *471 to situations where the gravest dangers to the nation's interest exist and cannot be escaped in any other way.

The question narrows therefore to the inquiry, in what circumstances and under what conditions may Congress, by offering the individual a single chance to challenge a law or an order, foreclose for him all further opportunity to question it, though requiring the courts to enforce it by criminal processes? This question is the most important one in the case and demands explicit attention. 'It is easy enough to say that a party has enough of a remedy if statutory review of the order is available and if he does not choose to employ that procedure he should be foreclosed from raising elsewhere the questions that could have been raised in that proceeding.' FN20 But to make this easy assumption is at once to decide the rock-bottom issue and, in my opinion, one this Court has not determined heretofore with effects upon the criminal process like those produced in this case.FN21

FN20 McAllister, Statutory Roads to Review of Federal Administrative Orders (1940) 28 Calif.L.Rev. 129, 166.

FN21 Ibid. Cf. Judicial Review of Price Orders Under the Emergency Price Control Act (1942) 37 Ill.L.Rev. 256, 263; Stason, Timing of Judicial Redress from Erroneous Administrative Action (1941) 25 Minn.L.Rev. 560, 575, 576-581; Administrative Features of the Emergency Price Control Act (1942) 28 Va.L.Rev. 991, 998, 999; Reid and Hatton, Price Control and National Defense (1941) 36 Ill.L.Rev. 255, 283-284. For an analysis of litigation under this Act see Sprecher, Price Control in the Courts (1944) 44 Col.L.Rev. 34.

IV.

It is true that in a variety of situations and for a variety of reasons a person is foreclosed from raising issues, including some constitutional ones, where he has failed to exercise an earlier opportunity. Thus ordinarily issues cannot be raised on appeal which were not presented in *472 the **690 trial court. And a variant is that federal questions not raised in the state courts generally will not be considered here.FN22

FN22 The foreclosure may be founded upon notions of waiver, comity, putting an end to litigation, securing orderly procedure or the advantages of having available for consideration in the later stages the informed judgment of the trial tribunal, or some combination of these and other considerations. Cf. Stason, Timing of Judicial Review from Erroneous Administrative Action (1941) 25

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

Minn.L.Rev. 560, 576-581; Berger, Exhaustion of Administrative Remedies (1939) 48 Yale L.J. 980, 1006. And the rule against allowing collateral attack, where a judgment is involved, is relevant to the broad problem of foreclosure.

But such instances of foreclosure, whether legislative or judicial in origin, do not support the broader basis of argument in this case. Two things are to be emphasized. One is that the previous opportunity is in an earlier phase of the same proceeding, not as here a separate and independent one of wholly different character. In other words, the determination of guilt or other matter ultimately in issue is not cut up into two separate, distinct and independent proceedings in different tribunals, in which neither body has power to consider and decide all the issues, but each can determine them only in part. The other thing for stress is that the foreclosure by failure to take the earlier chance is not universally effective. And this is true particularly of constitutional questions, some of which may be raised at any time.[FN23] While Congress has plenary power to confer *473 or withhold appellate jurisdiction, cf. Ex parte McCardle, 7 Wall. 506, 19 L.Ed. 264, it has not so far been held, and it does not follow, that Congress can confer it, yet deny the appellate court 'power to consider' constitutional questions relating to the law in issue.

FN23 Commonly it is said that 'jurisdictional' questions, particularly concerning the court's power to deal with the subject matter, may be raised at any stage or in a collateral attack. And this seems to be true also of some other constitutional issues through challenge to judgments by habeas corpus proceedings long after the judgment has become final. Cf., e.g., Ex parte Virginia, 100 U.S. 339, 25 L.Ed. 676; Ex parte Siebold, 100 U.S. 371, 25 L.Ed. 717; Johnson v. Zerbst, 304 U.S. 458, 58 S.Ct. 1019, 82 L.Ed. 1461, 146 A.L.R. 357; Mooney v. Hollohan, 294 U.S. 103, 55 S.Ct. 340, 79 L.Ed. 791, 98 A.L.R. 406. Compare Revised Rules of the Supreme Court of the United States 27, paragraph 6; cf. Weems v. United States, 217 U.S. 349, 362, 30 S.Ct. 544, 547, 54 L.Ed. 793, 19 Ann.Cas. 705; Columbia Heights Realty Co. v. Rudolph, 217 U.S. 547, 30 S.Ct. 381, 54 L.Ed. 877, 19 Ann.Cas. 854; Brasfield v. United States, 272 U.S. 448, 47 S.Ct. 135, 71 L.Ed. 345; Mahler v. Eby, 264 U.S. 32, 45, 44 S.Ct. 283, 288, 68 L.Ed. 549.

If the foreclosure is not always effective when the earlier phase of litigation is wholly judicial, it hardly should be when this consists of administrative or of both administrative and judicial proceedings, still less when these are civil in character and the later enforcement phase is criminal. In the enforcement of administrative orders the courts have been assiduous, perhaps at times extremely so,[FN24] to see that constitutional protections to the persons affected are observed. By trial and error, ways have been found to give the administrative process scope for effective action and yet to maintain individual security against abuse, especially in respect to constitutional rights.[FN25] The instances closest **691 to the problem here have provided for attaching penalties, including criminal sanctions, to violations of orders. But generally by one method or another means have been supplied for postponing their impact, at any rate irrevocably, until after the order's validity has *474 been established.[FN26] And in that effort this Court has joined.[FN27]

FN24 Compare Ohio Valley Water Co. v. Ben Avon Borough, 253 U.S. 287, 40 S.Ct. 527, 64 L.Ed. 908; Crowell v. Benson, 285 U.S. 22, 52 S.Ct. 285, 76 L.Ed. 598; St. Joseph Stock Yards Co. v. United States, 298 U.S. 38, 56 S.Ct. 720, 80 L.Ed. 1033; Utah Fuel Co. v. National Bituminous Coal Comm., 306 U.S. 56, 59 S.Ct. 409, 83 L.Ed. 483; with Myers v. Bethlehem Shipbuilding Corp., 303 U.S. 41, 58 S.Ct. 459, 82 L.Ed. 638.

FN25 E.g., compare Federal Trade Commission v. Gratz, 253 U.S. 421, 40 S.Ct. 572, 64 L.Ed. 993, with National Labor Relations Board v. Mackay Radio & Telegraph Co., 304 U.S. 333, 58 S.Ct. 904, 82 L.Ed. 1381; cf. also Morgan v. United States, 298 U.S. 468, 56 S.Ct. 906, 80 L.Ed. 1288; Id., 304 U.S. 1, 58 S.Ct. 999, 82 L.Ed. 1129; United States v. Morgan, 307 U.S. 183, 59 S.Ct. 795, 83 L.Ed. 1211. FN26 Thus, in some cases review and en-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

forcement are concentrated exclusively in the same court. Cf. National Labor Relations Act, 49 Stat. 449, 29 U.S.C. s 151 et seq., 29 U.S.C.A. s 151 et seq., giving the circuit courts of appeal exclusive jurisdiction to review and enforce the board's orders, to which no penalty attaches until the board has sought and obtained an order from the court for enforcement. With this done, there is no danger the individual will be sentenced for crime for failure to comply with an invalid order. And there is none that the court will be called upon to lend its hand in enforcing an unconstitutional edict or, for that matter, one merely in excess of statutory authority. Likewise, when there is provision for stay or suspension of the order pending determination of its validity, e.g., the Securities Act of 1933, 48 Stat. 81, 15 U.S.C. s 77i, 15 U.S.C.A. s 77i; the Securities Exchange Act of 1934, 48 Stat. 902, 15 U.S.C. s 78v, 15 U.S.C.A. s 78v; the Public Utility Holding Company Act of 1935, 49 Stat. 835, 15 U.S.C. s 79x, 15 U.S.C.A. s 79x. And this is true where the enforcing court is not forbidden to consider the validity of the order, a prohibition entirely novel to the Emergency Price Control Act.

FN27 Cf. Wadley Southern Ry. v. Georgia, 235 U.S. 651, 35 S.Ct. 214, 59 L.Ed. 405, and authorities cited. In notable instances, also, where no specific provision has been made for either judicial review or avoiding the irrevocable impact of possibly invalid administrative action, and review has not been expressly denied, the courts have been ready to find means for review and for averting the impact of the penalty until it has been had. E.g., Ex parte Young, 209 U.S. 123, 28 S.Ct. 441, 52 L.Ed. 714, 13 L.R.A., N.S., 932, 14 Ann.Cas. 764; cf. Southern Ry. Co. v. Virginia, 290 U.S. 190, 54 S.Ct. 148, 78 L.Ed. 260.

Whatever may be the limitations on judicial review in criminal proceedings under other administrative enforcement patterns,[FN28] no one of these arrangements goes as far as the combination presented by this Act. It restricts the individual's right to review to the protest procedure and appeal through the Emergency Court of Appeals. Both are short-cut proceedings, trimmed almost to the bone of due process, even for wholly civil purposes, and pared down further by a short statute of limitations. Protest must be filed within the sixty-day period. After that time, no protest can be made and no review can be ***475** had, except upon grounds arising later. Section 203(a).[FN29] The only right is to submit written evidence and argument to the administrator. Section 203(c). There is none to present additional evidence to the court.[FN30] Necessarily there is none of cross-examination. No court can ****692** suspend the order unless or until a judgment of the Emergency Court invalidating it becomes final.[FN31] The penalties, civil and criminal, attach at once on violation and, it would seem, until the contrary is decided, with finality.[FN32] At any rate ***476** that is the statute's purport. In short, the statute as drawn makes not only the regulation but also the penalties immediately and fully effective without regard to whether protest is made, the protest proceeding is carried to conclusion, or what the conclusion may be, except, and this is by inference, that violation after the order finally is held invalid may not be punishable.

FN28 Cf. McAllister, op. cit. supra, note 20; and note 26 supra.

FN29 Apparently it is contemplated that the 'affidavits or other written evidence' submitted in support of the objections be filed with the protest, though later submissions may be made at times and under regulations prescribed by the administrator, or when ordered by the Emergency Court, or to that court when the administrator requests. Sections 203(a), 204(a). The administrator is authorized to permit filing of protest after the sixty days have expired solely on grounds arising after that time. Section 203(a). He is required to grant or deny the protest, in whole or in part, notice the protest for a hearing, or provide an opportunity to present further evidence, within thirty days after the protest is filed or ninety days after issuance of the regulation or order, or in the case of a price schedule ninety days from the effective date, whichever occurs later. Ibid.

FN30 Cf. note 29 supra. In the Emergency Court of Appeals, 'no objection to (the) reg-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

ulation * * * and no evidence in support of any objection thereto, shall be considered * * * unless such objection' has been set forth in the protest or such evidence is in the transcript. Additional evidence can be admitted only if it was 'either offered to the Administrator and not admitted (by him) or * * * could not reasonably have been offered to * * * or included by the Administrator in such proceedings.' In that case it is to be presented to the administrator, received by him and certified to the court together with any modification he may make in the regulation. Where the administrator so requests, however, such additional evidence 'shall be presented directly to the court.' Section 204(a).

FN31 Cf. note 14 supra.

FN32 That is true whether the infraction occurs before or after the time for protest or appeal has passed and, it would seem, notwithstanding the protestant may proceed with all diligence. The statute makes no provision for relieving from its penal sanctions one who follows the protest procedure to the end in case the protest eventually is sustained, if meanwhile he disobeys the order. Punishment is not made dependent on or required to await the outcome of that proceeding. Rather, the enforcing court is commanded not to consider validity. The command is unqualified, unvarying and universal. It is cast in the compelling terms of 'jurisdiction.' Under the statute's provisions, it applies as much when trial and conviction occur before the Emergency Court's decision is final as afterwards.

This is the scope and reach of the statute. It is greater than any this Court heretofore has sustained.[FN33] It places *477 the affected individual just where the Court, speaking through Mr. Justice Lamar in Wadley Southern Ry. Co. v. Georgia, 235 U.S. 651, 662, 35 S.Ct. 214, 218, 59 L.Ed. 405, said he could not be put: 'He must * * * obey what may finally be held to be a void order, or disobey what may ultimately be **693 held to be a lawful order.' Yet the Court holds this special proceeding 'adequate' and therefore effective to foreclose all opportunity for defense in a criminal prosecution on the ground the regulation is void.

FN33 Cf. Bradley v. Richmond, 227 U.S. 477, 33 S.Ct. 318, 57 L.Ed. 603, which involved a state prosecution for violating a state law. In affirming the conviction this Court rejected the contention that the administrative determination on which prosecution rested was unconstitutional. But it would not follow from the fact a state might thus condition its criminal proceedings consistently with the Fourteenth Amendment's requirement of due process that Congress can do likewise for federal criminal trials. Cf. infra Part V. Wadley Southern Ry. Co. v. Georgia, supra, also involved a state suit for civil penalty for violation of a state administrative order, to which the limitations of the Sixth Amendment would not apply. The dicta which the Court regards as pointing to the validity of the procedure here do not sustain it, not only for this reason, but because the special procedure was different, did not purport to foreclose defense to enforcement if not followed, and expressly asserted that, if followed, penalty could be imposed only for violations taking place after the order was adjudicated valid, not beforehand. This case involves the very risk the Court there said could not be imposed.

Other instances relied on by the Court involve only civil, not criminal consequences, or distinguishable instances of criminal prosecution, and therefore have no conclusive bearing here. As the Court seems to recognize, the question now presented was not presented or considered in Armour Packing Co. v. United States, 209 U.S. 56, 28 S.Ct. 428, 52 L.Ed. 681, or in United States v. Adams Express Co., 229 U.S. 381, 33 S.Ct. 878, 57 L.Ed. 1237. And it was not involved or determined in the cited decisions, either here or in the inferior federal courts, dealing with carriers who violate tariffs framed and filed by themselves and thereby become subject to penalty. The same is true of the cases holding that threatened criminal prosecution for violation of administrative orders cannot be enjoined.

In these decisions, none of the statutes for-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

bade the enforcing court 'to consider the validity' of the orders, none afforded a special proceeding so summary as that provided here, and only United States v. Vacuum Oil Co., D.C., 158 F. 536, raised a constitutional question relevant here. Falbo v. United States, 320 U.S. 549, 64 S.Ct. 346, involved a different procedure and a different and more urgent problem. Compare Part VII infra. It may be doubted the decision's effect is to preclude the enforcing court from examining constitutional questions affecting the order's validity.

This is no answer. A procedure so summary, imposing such risks, does not meet the requirements heretofore considered essential to the determination or foreclosure of issues material to guilt in criminal causes. It makes no difference that petitioners did not follow the special procedure. The very question, posed in the Court's own terms, is whether, if they had followed it, the remedy would be adequate constitutionally. It cannot be, under previously accepted ideas, if for one who follows it to a favorable judgment the penalty yet may fall. That question the Court does not decide. Unless it is decided, the question of adequacy, in any sense heretofore received, has not been determined, or an entirely new conception of adequacy has been approved.

***478** V.

But there is a deeper fault, even if we assume what neither the statute nor the Court's opinion today justifies, that a potential offender who successfully challenges the constitutionality of a regulation or begins a challenge on constitutional grounds in the Emergency Court at any time before or during the criminal prosecution, cannot be convicted, at least until after final decision that the order is valid. There still remain those cases where he has either challenged unsuccessfully in the Emergency Court or has not challenged at all. In them the would-be offender is subject to criminal prosecution without a right to question in the criminal trial the constitutionality of the regulation on which his prosecution and conviction hinge. And this seems to be true without distinction as to the character of the ground on which he seeks to make the issue. To say that this does not operate unconstitutionally on the accused because he has the choice of refraining from violation or of testing the constitutional questions in a civil proceeding beforehand entirely misses the point. The fact is that if he violates the regulation he must be convicted, in a trial in which either an earlier and summary civil determination or the complete absence of a determination forecloses him on a crucial constitutional question. In short, his trial for the crime is either in two parts in two courts or on only a portion of the issues material to guilt in one court. This may be all very well for some civil proceedings. But, so far as I know, criminal proceedings of this character never before have received the sanction of Congress or of this Court. That, like many other criminals, an offender here can be punished for making the wrong guess as to the constitutionality of the regulation, I have no doubt. But that, unlike all other criminals, he can be convicted on a trial in two parts, one so summary and civil and the other criminal ***479** or, in the alternative, on a trial which shuts out what may be the most important of the issues material to his guilt, I do deny.

The Sixth Amendment guarantees to the accused 'in all criminal prosecutions * * * the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed * * *.' By Article III, Section 2, 'The Trial of all Crimes, except in Cases of Impeachment, shall be by Jury; and such Trial shall be held in the State where the said Crimes shall have been committed * * *.' And, by the same section, 'The judicial Power,' which is vested in the supreme and inferior courts by Section 1, 'shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made * * * under their Authority.'

By these provisions the purpose hardly is to be supposed to authorize splitting up a criminal trial into separate segments, with some of the issues essential to guilt triable before one court in the state and district where the crime was committed and others, equally essential, triable in another court in a highly summary civil proceeding held elsewhere, or to dispense with trial on them because that proceeding has not been followed.[FN34] If the validity of the ***480** order, on constitutional or other grounds, has any ****694** substantial relationship to the petitioners' guilt, and it cannot be denied that it does, the short effect of the procedure is to chop up their trial into two separate, successive and distinct parts or proceedings, in each of which only some of the issues determinative of guilt can be tried, the two being connected only by the thread of finality which runs from the decision of the

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

first into the second. The effect is to segregate out of the trial proper issues, whether of law or of fact, relating to the validity of the law for violation of which the defendants are charged, and to leave to the criminal court only the determination of whether a violation of the regulation as written actually took place and whether in some other respect the statute itself is invalid. If Congress can remove these questions, it can remove also all questions of validity of the statute or, it would seem, of law.

> FN34 Nor, according to accepted notions of the criminal process, has it ever been contemplated that some of the issues of fact should be provable by confrontation of witnesses and others by written evidence only, when other evidence is or may be available. If, for instance, Congress should define an act as a crime, but should require that in the trial issues relating to the validity of the law furnishing the basis for the charge should be proven only by affidavit, though others by the normal processes of proof, the proceeding hardly could be held to comport with the kind of trial the Constitution, and more particularly the Sixth Amendment requires. And if Congress should go further and provide for determination of the issues triable only by affidavit in a court or other body sitting elsewhere than in the state and district of the crime, with other issues triable before a court with a jury empanelled there, but with that court compelled to give finality to the other's findings against the accused, the departure from constitutional requirements would seem to be only the more obvious. This is not far in effect, if it is at all, from what has been done here.

The consequences of this splitting hardly need further noting. On facts and issues material to validity of the regulation the persons charged are deprived of a full trial in the state or district where the crime occurs, even if the Emergency Court sits there, as it is not required to do. Their right to try those constitutional issues both of fact and of law on which a criminal conviction ultimately will hinge, is restricted rigidly to the introduction of written evidence before the administrator in a proceeding barely adequate, even under special circumstances like these, to meet the requirements of due process of law in civil proceedings. The court which makes the decision on these issues cannot consider the facts constituting the violation. It has no power to pass judgment of guilty or not guilty upon the whole of the evidence. It can only pronounce ***481** the law valid or invalid in a setting wholly apart from any charge of crime, from the facts alleged as its commission, and from the usual protections which surround its trial.

On the other hand the special tribunal's judgment, rendered it may be on disputed facts as well as law, becomes binding against the accused, in the later proceeding. He cannot then dispute it, regardless of whether meanwhile the facts have changed[FN35] or new and additional evidence has been discovered and might be tendered with conclusive effect, if it were admissible. He can tender no evidence on what may be the most vital issue in his case and one, it may likewise be, that the evidence then available would sustain overwhelmingly. The trial court must shut its eyes to all such offers of proof and, moreover, to any such issue of law.

> FN35 His only remedy is to begin a new protest proceeding (s 203(a)), which is not only as limited in character as the original one, but under the administrator's procedural regulations must be 'filed within * * * sixty days after the protestant has had, or could reasonably have had, notice' of the changed facts. Revised Procedural Regulation 1, s 1300.26. Cf. notes 29, 30 supra.

VI.

A procedure so piecemeal, so chopped up, so disruptive of constitutional guaranties in relation to trials for crime, should not and, in my judgment, cannot be validated, as to such proceedings, under the Constitution. Even war does not suspend the protections which are inherently part and parcel of our criminal process. Such a dissection of the trial for crime could be supported, under our system, only upon some such notions as waiver and estoppel or res judicata, whether or not embodied in legislation.[FN36] These too are strange and inadequate vehicles for trying whether ****695** the citizen has been guilty of criminal conduct. They bar defense, while keeping prosecution open, before it begins. ***482** Res judicata, by virtue of a judgment in some prior civil proceeding, where different constitutional guaranties relating to the mode and course of trial have play, has not done

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

duty heretofore to replace either proof of facts before a jury or decision of constitutional questions necessary to make up the sum of guilt in the criminal proceeding itself. Congress can invade the judicial function in criminal cases no more by compelling the court to dispense with proof, jury trial or other constitutionally required characteristics than it can by denying all effect of finality to judicial judgments. Cf. Schneiderman v. United States, 320 U.S. 118, concurring opinion at pages 167, 168, 63 S.Ct. 1333, at pages 1356, 1357, 87 L.Ed. 1796. And while, as noted above, notions of waiver and estoppel have had place in criminal proceedings to an extent not wholly defined, in some instances harshly and artificially,[FN37] they have not had effect heretofore to enable Congress to force a waiver of defense upon the individual by offering a choice between two kinds of trial, neither of which satisfies constitutional requirements for criminal trials. Certainly when the consequences are so novel and far reaching as they may be under this procedure, both for the individual and for the judicial system, these conceptions should not be given legal establishment to bring them into being.

FN36 Cf. note 22 supra.

FN37 Compare Johnson v. Zerbst, 304 U.S. 458, 58 S.Ct. 1019, 82 L.Ed. 1461, 146 A.L.R. 357; Glasser v. United States, 315 U.S. 60, 62 S.Ct. 457, 86 L.Ed. 680; with Patton v. United States, 281 U.S. 276, 50 S.Ct. 253, 74 L.Ed. 854, 70 A.L.R. 263; Adams v. United States ex rel. McCann, 317 U.S. 269, 63 S.Ct. 236, 87 L.Ed. 268, 143 A.L.R. 435.

To state the question often is to decide it. And it may do this by failure to reveal fully what is at stake. The question is not merely whether the protest proceeding is adequate in the constitutional sense for some of the purposes pertinent to that proceeding. It is rather what effect shall be given to the civil determination in the later and entirely different criminal trial. It is whether, by substituting that civil proceeding for decision of basic issues in the criminal trial itself, Congress can foreclose ***483** the accused from having them decided in that trial and thereby deprive him of the protections in trial guaranteed all persons charged with crime and thus of full and adequate defense. It is not the equivalent of that sort of defense to force one to initiate a curtailed civil suit or to cut him off shortly from all defense on the issues allocated to it, if he does not do so. Again, the question is not merely whether the individual can waive his constitutional trial of the issue of validity. It is rather whether Congress can force him to do so in the manner attempted and, beyond this, whether he and Congress together, in the combined effects of what they do, can so strip the criminal forum of its power and of its duty to abide the law of the land. And if the issue is further whether Congress can do this in some situations, respecting some issues, under more usual safeguards, the question requires attention to these important limitations.[FN38]

FN38 Cf. note 41 infra.

The procedural pattern is one which may be adapted to the trial of almost any crime. Once approved, it is bound to spawn progeny. If in one case Congress thus can withdraw from the criminal court the power to consider the validity of the regulations on which the charge is based, it can do so for other cases, unless limitations are pointed out clearly and specifically. And it can do so for statutes as well. In short the way will have been found to avoid, if not altogether the power of the courts to review legislation for consistency with the Constitution,[FN39] then in part at least their obligation to observe its commands and more especially the guaranteed protections of persons charged with crime in the trial of their causes. This is not merely control or definition of jurisdiction. It ***484** is rather unwarranted abridgement of the judicial power in the criminal process, unless at the very least it is confined specifically to situations where the special ****696** proceeding provides a fair and equal substitute for full defense in the criminal trial or other adequate safeguard is afforded against punishment for violating an order which itself violates or may violate basic rights. So much should not be accomplished merely by giving to the failure to take advantage of opportunity for summary civil determination, coupled with a short statute of limitations upon its availability, the effect of a full and final criminal adjudication. To do this hardly observes the substance of 'adequacy' in criminal trials.

FN39 Cf. McLaren, Can a Trial Court of the United States Be Completely Deprived of the Power to Determine Constitutional Questions? (1944) 30 A.B.A.J. 17.

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

From what has been said it seems clear that Congress cannot forbid the enforcing court, exercising the criminal jurisdiction, to consider the constitutional validity of an order invalid on its face. Any other view would permit Congress to compel the courts to enforce unconstitutional laws. Nor, in my opinion, can Congress forbid consideration of validity in all cases, if it can in any, where the invalidity appears only from proof of facts extrinsic to the regulation. Again the racial or religious line is obvious and pertinent. If, for instance, one charged criminally with violating the regulation should tender proof it was being enforced in a manner to deny him the equal protection of the laws, because of his racial or religious connections, it is difficult to believe the evidence could be excluded consistently with the judicial obligation. The Constitution does not make judicial observance or enforcement of its basic guaranties depend on whether their violation appears from the face of legislation or only from its application to proven facts. Snowden v. Hughes, 321 U.S. 1, 64 S.Ct. 397; Yick Wo v. Hopkins, 118 U.S. 356, 373, 374, 6 S.Ct. 1064, 1072, 1073, 30 L.Ed. 220; United States v. Carolene Products Co., 304 U.S. 144, 152—154, 58 S.Ct. 778, 783, 784, 82 L.Ed. 1234.

For legislation not void on its face, a presumption of constitutionality attaches and remains until it is proven ***485** invalid or so in operation. In such cases there is no unfairness, nor any invasion of the court's paramount obligation, in requiring one who would avoid the regulations' impact to show they are not what they appear to be or that they are made to operate otherwise than as they purport or were intended. But it is one thing to say that burden must be borne within the enforcement proceeding itself and another to say it must be carried entirely outside it. To require the defendant to prove invalidity in such a situation in the criminal trial itself, upon a showing of violation of the statute, is wholly permissible. But for the court to be unable to receive tendered evidence which might disclose the statute's invalid character and effect, is quite different. Certainly, under the circumstances of this case, it would seem to be as much a violation of individual right and as much an invasion of the judicial function for Congress to command the court not to receive the evidence, regardless of its character or effect, as for it to direct the court to enforce a law or an order void on its face.

VII.

To sanction conviction of crime in a proceeding which does not accord the accused full protection for his rights under the Fifth and Sixth Amendments, and which entails a substantial legislative incursion on the constitutionally derived judicial power, if indeed this ever could be sustained, would require a showing of the greatest emergency coupled with an inability to accomplish the substantive ends sought in any other way. No one questions the seriousness of the emergency the Price Control Act was adopted to meet. And it has been urged with great earnestness that the nation's security in the present situation requires that the statute's procedure, followed in this case, be sustained to its full extent.

That argument would be more powerful if enforcement of the statute, and thus maintenance of price control, were ***486** dependent upon accepting every feature. No doubt to impose the criminal sanction as has been done in this case implements the enforcement process with the deterrent effects which usually accompany that sanction. But neither its use nor enforcement of the statute's substantive prohibitions requires that the criminal court shall not consider the validity of the regulations.

With the arsenal of other valid legal weapons available, there can be no lack of speedy and effective measures to secure compliance. The regulations are effective until invalidated. They cannot be suspended by any court, pending final decision here, if the last source of relief is sought. All ****697** the armory of equity, and with it the sanctions of contempt, are available to keep the regulations in force and to prevent violations, at least until decision here is sought and had that the regulations are invalid. The same weapons are available to enforce them permanently if they are found valid. Apart from defense when charged with crime, the individual's only avenue of escape, and that not until final decision of invalidity has been made, is by protest and appeal through the single route prescribed. Finally, in addition to all this, the dealer may be punished for crime if he violates the regulation wilfully and cannot show it is invalid either in his defense or by securing a judgment to this effect through the protest procedure. In either case, in view of the statute's curtailment of his substantive rights and the consequent increase in the burden of proving facts sufficient to nullify the regulation,[FN40] his chance for escape ***487** becomes remote, to say the least. In view of all these resources and advantages, the asser-

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

tion hardly is sustained that enforcement requires also depriving the accused of his opportunity for full and adequate defense in his criminal trial.

FN40 That burden is heavy, as this case illustrates. Petitioners attacked the regulation's constitutionality on the ground that, by compelling them to sell at prices less than cost, it deprived them of their property without due process of law. And, on the same ground, they urged the regulation violates the statute's requirement that the price fixed allow margins which are 'generally fair and equitable.' But the Fifth Amendment does not insure a profit to any given individual or group not under legal compulsion to render service, where doing so would contravene an enacted policy of Congress sustainable on a balance of public necessity and private hardship. Cf. the Court's opinion herein and authorities cited; also Bowles v. Willingham, 321 U.S. 503, 64 S.Ct. 641. And in this case both the statute's basic purpose and its terms, as well as the legislative history, cf. Sen.Rep. No. 931, 77th Cong., 2d Sess. 15, show that Congress intended to forbid only a price so low that the trade in general, not merely some individual dealers or groups, could not have the margin prescribed. Bowles v. Willingham, supra. Petitioners' offers of proof, in this respect, which the trial court rejected, went only to show that they, or at most the meat wholesalers of Boston, could sell beef only at a loss. Harsh as this may seem in individual instances, it was Congress' judgment that the interests of dealers who could not operate profitably at a level of prices permitting a fair margin generally to the trade, would have to give way, in the acute prevailing circumstances, to the paramount national necessity of keeping prices stabilized and that judgment, by virtue of those circumstances, was for Congress to make. Accordingly the tendered proof hardly was sufficient to raise an issue of confiscation giving ground for setting aside the regulation.

It is likely that by far the greater number of challenges would arise on grounds of supposed confiscation, in which this burden would have to be met. Once it is made clear just what that burden is, the fear hardly seems justified that enforcement would swamp the agency with litigation. In any event the remedy for that would be by providing a more adequate enforcing staff, not by cutting off defense to criminal prosecutions based on invalid orders.

War requires much of the citizen. He surrenders rights for the time being to secure their more permanent establishment. Most men do so freely. According to our plan others must do so also, as far as the nation's safety requires. But the surrender is neither permanent nor total. The great liberties of speech and the press are curtailed but not denied. Religious freedom remains a ***488** living thing. With these, in our system, rank the elemental protections thrown about the citizen charged with crime, more especially those forged on history's anvil in great crises. They secure fair play to the guilty and vindication for the innocent. By one means only may they be suspended, even when chaos threatens. Whatever else seeks to dispense with them or materially impair their integrity should fail. Not yet has the war brought extremity that demands or permits them to be put aside. Nor does maintaining price control require this. The effect, though not intended, of the provision which forbids a criminal court to 'consider the validity' of the law on which the charge of crime is founded, in my opinion, would be greatly to ****698** impair these securities. Hence I cannot assent to that provision as valid.

Different considerations, in part at any rate, apply in civil proceedings. FN41 But for the trial of crimes no procedure***489** should be approved which dispenses with trial of any material issue or splits the trial into disjointed segments, one of which is summary and civil, the other but a remnant of the ancient criminal proceeding.

FN41 Cf. concurring opinion in Bowles v. Willingham, 321 U.S. 503, 64 S.Ct. 641. Limitations applicable solely to criminal proceedings fall to one side. Giving the decision in the special proceeding, or failure to seek it after reasonable opportunity, the effect of res judicata in later civil proceedings does not therefore deprive the party affected of opportunity for full and adequate defense in his criminal trial, where not only his rights of property, but his liberty or his life may be

© 2012 Thomson Reuters. No Claim to Orig. US Gov. Works.

at stake.

However widely the character of the special remedy may be varied to meet different urgencies, with consequences of foreclosure for civil effects, the foreclosure of criminal defense should be allowed, if at all, only by a procedure affording its substantial equivalent, in relation to special constitutional issues and in such a manner that the failure to follow it reasonably could be taken as an actual, not a forced waiver. Thus, possibly foreclosure of criminal defense could be sustained, when validity turns on complex economic questions, usually of confiscatory effects of legislation, and proof of complicated facts bearing on them. But, if so, this should be only when the special proceeding is clearly adequate, affording the usual rights to present evidence, cross-examine, and make argument, characteristic of judicial proceedings, so that, if followed, the party would have a substantial equivalent to defense in a criminal trial. And the opportunity should be long enough so that the failure to take it reasonably could be taken to mean that the party intends, by not taking it, to waive the question actually and not by forced surrender. So safeguarded, the foreclosure of such questions in this way would not work a substantial deprivation of defense.

In respect to other questions, such as the drawing of racial or religious lines in orders or by their application, of a character determinable as well by the criminal as by the special tribunal, in my opinion the special constitutional limitations applicable to federal criminal trials, and due enforcement of some substantive requirements as well, require keeping open and available the chance for full and complete defense in the criminal trial itself.

The judgment should be reversed.

I am authorized to say that Mr. Justice MURPHY joins in this opinion.

U.S. 1944.
Yakus v. U. S.

SENATE CS FOR CS FOR HOUSE BILL NO. 215( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES CHENAULT, Neuman, Fairclough, Johnson, Hawker, Olson, Feige, Millett, Thompson, Pruitt, Saddler, Tammie Wilson, Dick, Costello

A BILL

FOR AN ACT ENTITLED

"An Act relating to the judicial review of a right-of-way lease or other authorization for the development, construction, or initial operation, of an oil or gas pipeline on state land; and relating to the lease of a right-of-way by the Alaska Gasline Development Corporation for a gas pipeline transportation corridor."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 38.34.050(c) is amended to read:

(c) Notwithstanding any contrary provision of law, the Department of Natural Resources shall grant the **Alaska Gasline Development Corporation, a subsidiary of the Alaska Housing Finance Corporation created under AS 18.56.086,** [ALASKA HOUSING FINANCE CORPORATION] a right-of-way lease under AS 38.35 for the gas pipeline transportation corridor **at no cost or rental fee** if

(1) [THE CORPORATION SUBMITS] a complete right-of-way lease application under AS 38.35.050 **is submitted**;

(2) the lease application is made the subject of notice and other

reasonable and appropriate publication requirements under AS 38.35.070; and

(3) the **Alaska Gasline Development Corporation** [CORPORATION] agrees to be bound by the right-of-way lease covenants set out in AS 38.35.120**, except for the covenants in AS 38.35.120(a)(1), (2), (5), and (7); notwithstanding AS 38.35.120(b), a right-of-way lease subject to this paragraph is valid and of legal effect**.

*** Sec. 2.** AS 38.35.100(d) is amended to read:

(d) The commissioner shall include in a conditional lease each requirement and condition of the covenants established under AS 38.35.120**, except that, for a lease entered into under AS 38.34.050(c), the covenants in AS 38.35.120(a)(1), (2), (5), and (7) may not be included**. The commissioner may also require that the lessee agree to additional conditions that the commissioner finds to be in the public interest. In place of the covenant established under AS 38.35.120(a)(9), the commissioner shall require the lessee to agree that it will not transfer, assign, pledge, or dispose of in any manner, directly or indirectly, its interest in a conditional right-of-way lease or a pipeline subject to the conditional lease, unless the commissioner, after considering the public interest and issuing written findings to substantiate a decision to allow the transfer, authorizes the transfer. The commissioner shall also require the lessee to agree not to allow the transfer of control of the lessee without the approval of the commissioner; as used in this subsection, "transfer of control of the lessee" means the transfer of 30 percent or more, in the aggregate, of ownership interest in the lessee in one or more transactions to one or more persons by one or more persons.

*** Sec. 3.** AS 38.35.120(a) is amended to read:

(a) **Except as provided in AS 38.34.050(c), a** [A] noncompetitive lease of state land for a right-of-way for an oil or natural gas pipeline valued at $1,000,000 or more may be granted only upon the condition that the lessee expressly covenants in the lease, in consideration of the rights acquired by it under the lease, that

(1) it assumes the status of and will perform all of its functions undertaken under the lease as a common carrier and will accept, convey, and transport without discrimination crude oil or natural gas, depending on the kind of pipeline involved, delivered to it for transportation from fields in the vicinity of the pipeline

subject to the lease throughout its route both on state land obtained under the lease and on the other land; it will accept, convey, and transport crude oil or natural gas without unjust or unreasonable discrimination in favor of one producer or person, including itself, as against another but will take the crude oil or natural gas, depending on the kind of pipeline involved, delivered or offered, without unreasonable discrimination, that the Regulatory Commission of Alaska shall, after a full hearing with due notice to the interested parties and a proper finding of facts, determine to be reasonable in the performance of its duties as a common carrier; however, a lessee that owns or operates a natural gas pipeline

(A) subject to regulation either under the Natural Gas Act (15 U.S.C. 717 et seq.) of the United States or by the state or political subdivisions with respect to rates and charges for the sale of natural gas, is, to the extent of that regulation, exempt from the common carrier requirement in this paragraph;

(B) that is a North Slope natural gas pipeline (i) is required to operate as a common carrier only with respect to the intrastate transportation of North Slope natural gas, as that term is defined in AS 42.06.630, and (ii) is not required to operate as a common carrier as to a liquefied natural gas facility or a marine terminal facility associated with the pipeline, and is not otherwise required to perform its functions under the lease as a common carrier; for purposes of this subparagraph, "North Slope natural gas pipeline" means all the facilities of a total system of pipe, whether owned or operated under a contract, agreement, or lease, used by a carrier for transportation of North Slope natural gas, as defined by AS 42.06.630, for delivery, for storage, or for further transportation, and including all pipe, pump, or compressor stations, station equipment, tanks, valves, access roads, bridges, airfields, terminals and terminal facilities, including docks and tanker loading facilities, operations control centers for both the upstream part of the pipeline and the terminal, tanker ballast treatment facilities, fire protection system, communication system, and all other facilities used or necessary for an integral line of pipe, taken as a whole, to carry out transportation, including an extension or

enlargement of the line;

(2) it will interchange crude oil or natural gas, depending on the kind of pipeline involved, with each like common carrier and provide connections and facilities for the interchange of crude oil or natural gas at every locality reached by both pipelines when the necessity exists, subject to rates and regulations made by the appropriate state or federal regulatory agency;

(3) it will maintain and preserve books, accounts, and records and will make those reports that the state may prescribe by regulation or law as necessary and appropriate for purposes of administration of this chapter;

(4) it will accord at all reasonable times to the state and its authorized agents and auditors the right of access to its property and records, of inspection of its property, and of examination and copying of records;

(5) it will provide connections, as determined by the Regulatory Commission of Alaska under AS 42.06.340, to facilities on the pipeline subject to the lease, both on state land and other land in the state, for the purpose of delivering crude oil or natural gas, depending on the kind of pipeline involved, to persons (including the state and its political subdivisions) contracting for the purchase at wholesale of crude oil or natural gas transported by the pipeline when required by the public interest;

(6) it shall, notwithstanding any other provision, provide connections and interchange facilities at state expense at such places the state considers necessary if the state determines to take a portion of its royalty or taxes in oil or natural gas;

(7) it will construct and operate the pipeline in accordance with applicable state laws and lawful regulations and orders of the Regulatory Commission of Alaska;

(8) it will, at its own expense, during the term of the lease,

(A) maintain the leasehold and pipeline in good repair;

(B) promptly repair or remedy any damage to the leasehold;

(C) promptly compensate for any damage to or destruction of property for which the lessee is liable resulting from damage to or destruction of the leasehold or pipeline;

(9) it will not transfer, assign, or dispose of in any manner, directly or indirectly, or by transfer of control of the carrier corporation, its interest in a right-of-way lease, or any rights under the lease or any pipeline subject to the lease to any person other than another owner of the pipeline (including subsidiaries, parents, and affiliates of the owners), except to the extent that the commissioner, after consideration of the protection of the public interest (including whether the proposed transferee is fit, willing, and able to perform the transportation or other acts proposed in a manner that will reasonably protect the lives, property, and general welfare of the people of Alaska), authorizes; the commissioner shall not unreasonably withhold consent to the transfer, assignment, or disposal;

(10) it will file with the commissioner a written appointment of a named permanent resident of the state to be its registered agent in the state and to receive service of notices, regulations, decisions, and orders of the commissioner; if it fails to appoint an agent for service, service may be made by posting a copy in the office of the commissioner, filing a copy in the office of the lieutenant governor, and mailing a copy to the lessee's last known address;

(11) the applicable law of this state will be used in resolving questions of interpretation of the lease;

(12) the granting of the right-of-way lease is subject to the express condition that the exercise of the rights and privileges granted under the lease will not unduly interfere with the management, administration, or disposal by the state of the land affected by the lease, and that the lessee agrees and consents to the occupancy and use by the state, its grantees, permittees, or other lessees of any part of the right-of-way not actually occupied or required by the pipeline for the full and safe utilization of the pipeline, for necessary operations incident to land management, administration, or disposal;

(13) it will be liable to the state for damages or injury incurred by the state caused by the construction, operation, or maintenance of the pipeline and it will indemnify the state for the liabilities or damages;

(14) it will procure and furnish liability and property damage insurance from a company licensed to do business in the state or furnish other security or

undertaking upon the terms and conditions the commissioner considers necessary if the commissioner finds that the net assets of the lessee are insufficient to protect the public from damage for which the lessee may be liable arising out of the construction or operation of the pipeline.

*** Sec. 4.** AS 38.35.120(b) is amended to read:

(b) **Except as provided in AS 38.34.050(c), for** [FOR] a right-of-way lease granted under this chapter for an oil or natural gas pipeline valued at $1,000,000 or more to be valid and of legal effect, it must contain the terms required to be inserted under the provisions of AS 38.35.110 - 38.35.140. **Except as provided in AS 38.34.050(c), an** [AN] oil or natural gas pipeline right-of-way lease granted under this chapter that does not contain the required terms is null and void and without legal effect and does not vest any interest in state land or any authority in the carrier granted the lease.

*** Sec. 5.** AS 38.35.200 is amended by adding new subsections to read:

(c) Except as provided for an applicant under (a) of this section, notwithstanding any contrary provision of law, an action or decision of the commissioner or other state officer or agency concerning the issuance or approval of a necessary right-of-way, permit, lease, certificate, license, or other authorization for the development, construction, or initial operation of a natural gas pipeline by the Alaska Gasline Development Corporation, a subsidiary created by the Alaska Housing Finance Corporation under AS 18.56.086, that uses a right-of-way subject to this chapter may not be subject to judicial review, except that a claim alleging the invalidity of this subsection must be brought within 60 days after the effective date of this Act, and a claim alleging that an action will deny rights under the Constitution of the State of Alaska must be brought within 60 days following the date of that action. A claim that is not filed within the limitations established in this subsection is barred. A complaint under this subsection must be filed in superior court, and the superior court has exclusive jurisdiction. Notwithstanding AS 22.10.020(c), except in conjunction with a final judgment on a claim filed under this subsection, the superior court may not grant injunctive relief, including a temporary restraining order, preliminary injunction, permanent injunction, or stay against the issuance of a necessary right-of-

way, permit, lease, certificate, license, or other authorization for the development, construction, or initial operation of a natural gas pipeline by the Alaska Gasline Development Corporation, a subsidiary created by the Alaska Housing Finance Corporation under AS 18.56.086. In this subsection, "natural gas pipeline" means all the facilities of a total system of pipe for transportation of natural gas for treatment or conditioning, delivery, storage, or further transportation, and including all pipe, pump and compressor stations, station equipment, and all other facilities used or necessary for an integral line of pipe to carry out the transportation of the gas.

(d) An appeal of a permitting decision by the Department of Environmental Conservation under AS 46.03 or AS 46.14 that is made under authority delegated to the Department of Environmental Conservation by the United States Environmental Protection Agency is not included in the actions or decisions described in (c) of this section.

*** Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION AND LEGISLATIVE INTENT. It is the intent of the legislature that a right-of-way lease subject to AS 38.34.050(c), as amended by sec. 1 of this Act, AS 38.35.100(d), as amended by sec. 2 of this Act, AS 38.35.120(a), as amended by sec. 3 of this Act, and AS 38.35.120(b), as amended by sec. 4 of this Act, that is entered into between the commissioner of natural resources and the Alaska Gasline Development Corporation, a subsidiary of the Alaska Housing Finance Corporation created under AS 18.56.086, before the effective dates of secs. 1 - 4 of this Act be amended as soon as practicable after the effective dates of secs. 1 - 4 of this Act to conform to the requirements of AS 38.34.050(c), as amended by sec. 1 of this Act, AS 38.35.100(d), as amended by sec. 2 of this Act, AS 38.35.120(a), as amended by sec. 3 of this Act, and AS 38.35.120(b), as amended by sec. 4 of this Act.

*** Sec. 7.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTIONS. The revisor of statutes shall change the catch lines of

(1) AS 38.34.050 from "Cooperation and access to information" to "Cooperation; information sharing; permits, use of state resources, and leases"; and

(2) AS 38.35.200 from "Judicial review of decisions of commissioner on

application" to "Judicial review."

MEMORANDUM March 2, 2012

SUBJECT: Change of title of HB 215 in the other body
(Work Order No. 27-LS0741\X)

TO: Representative Mike Chenault
Attn: Tom Wright

FROM: Donald M. Bullock Jr.
Legislative Counsel

Enclosed is a draft SCS CSHB 215( ) that will require a title change in the Senate.

Please advise the sponsoring committee to request a final version of the enclosed concurrent resolution to waive the Uniform Rules that prohibit a title change in the second body.

If I may be of further assistance, please advise.

SENATE CONCURRENT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Introduced:
Referred:

A RESOLUTION

Suspending Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, concerning House Bill No. 215, relating to the judicial review of a right-of-way lease or the development or construction of an oil or gas pipeline on state land; and relating to the lease of a right-of-way by the Alaska Housing Finance Corporation for a gas pipeline transportation corridor.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

That under Rule 54, Uniform Rules of the Alaska State Legislature, the provisions of Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, regarding changes to the title of a bill, are suspended in consideration of House Bill No. 215, relating to the judicial review of a right-of-way lease or the development or construction of an oil or gas pipeline on state land; and relating to the lease of a right-of-way by the Alaska Housing Finance Corporation for a gas pipeline transportation corridor.

MEA
MATANUSKA ELECTRIC ASSOCIATION

March 13, 2012

Senator Hollis French
716 W. 4th Avenue, Suite 500
Anchorage, AK 99501-2133

Subject: HB 215

Dear Senator French:

Matanuska Electric Association (MEA) provides electrical service to 57,000 households, businesses, schools and government facilities in a service territory spanning Eagle River to Trapper Creek (south to north) and Big Lake to Sheep Mountain (west to east). A long term opportunity for MEA customers is the prospect of a new power generation facility located in the northern end of the Mat-Su Borough near Talkeetna. In planning for a 15 to 20-year timeline, MEA will require natural gas from the AGDC's bullet line delivered to the northern sector of our service territory to lower electric power costs and increase reliability of service in that area.

While the ASAP project does not contemplate any gas off-take along its route, the current State-granted rights-of-way do contain provisions to assure that in the future such service could be requested. Unfortunately, HB 215 would retroactively remove the RCA requirement to adjudicate connection requests (AS 38.35.120(a)5). This would likely eliminate any possibility for MEA access to this pipeline. MEA would have objected during the DNR hearings held before granting the existing rights-of-way if there was no guarantee of future access.

MEA's concerns were previously communicated to Mr. Fauske at a public hearing in Anchorage. We believe that good public policy warrants requiring all pipelines to provide access to our citizens with RCA as the adjudicating agency, if necessary.

Sincerely,

Evan J. Griffith
General Manager

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 215

Analysis

Current Alaska statutes limit challenges of pipeline right-of-way leasing decisions to lease applicants, competing applicants and persons with a direct financial interest who raise an objection within 60 days a right-of-way lease application is noticed; and restrict the grounds for judicial review to procedural errors. HB 215 would amend existing statutes to impose the same limits on judicial review, including the requirement to raise an objection within 60 days of notice of the initial lease application, to all permitting and licensing decisions associated with development and construction of a pipeline that uses a state right-of-way.

There would be no fiscal impact on the Department of Natural Resources.

BILL NO. HB 215

Analysis

Current Alaska statutes limit challenges of pipeline right-of-way leasing decisions to lease applicants, competing applicants and persons with a direct financial interest who raise an objection within 60 days a right-of-way lease application is noticed; and restrict the grounds for judicial review to procedural errors. HB 215 would amend existing statutes to impose the same limits on judicial review, including the requirement to raise an objection within 60 days of notice of the initial lease application, to all permitting and licensing decisions associated with development and construction of a pipeline that uses a state right-of-way. HB 215 would also create an exemption to the common carrier requirements of AS 38.35 in favor of the Alaska Housing Finance Corporation for the lease of a gas line right-of-way.

REPRESENTATIVE MIKE CHENAULT
SPEAKER OF THE HOUSE

MEMORANDUM

TO: Senator Hollis French, Chair
Senate Judiciary Committee

FROM: Representative Mike Chenault
Speaker of the House

DATE: April 12, 2011

~~RE: Request for Hearing-Committee Substitute for House Bill 215 (JUD) am~~

Please consider this request to schedule House Bill 215: *Judicial Review of Pipeline/ROW,* before your committee at your earliest possible convenience. Back-up for the legislation will be sent to your committee aide shortly.

Thank you for your consideration of my request.

SPONSOR STATEMENT

COMMITTEE SUBSTITUTE for HOUSE BILL 215 (JUD) am

"An Act relating to judicial review of a right-of-lease or the development or construction of an oil or gas pipeline on state land; and relating to the lease of a right-of-way by the Alaska Housing Finance Corporation for a gas pipeline transportation corridor."

The objective of House Bill 215 is to prohibit the filing of lawsuits that have the potential to delay construction of in-state gaslines. The provisions under House Bill 215 modify current statute and the provisions only apply to state land rights-of-way. Claims may be filed only by an applicant, a competing applicant or a person who has a direct financial interest affected by the lease of a right-of-way. The requests for judicial review must be filed within 60 days of the publication of notice for a right-of-way lease application. Judicial review may only be granted for claims challenging the validity of the statute or challenging a denial of rights under the state constitution. Any claim will be barred unless it is filed within the 60 day time frame. The Department of Environmental Conservation, under the Clean Water and Clean Air Acts, is exempted from the provisions pertaining to judicial review.

All claims are to be filed in Alaska Superior Court which will have exclusive jurisdiction to determine the proceeding. The court will not have the jurisdiction to grant any injunctive relief with the exception of an issuance of a final judgment.

This legislation is modeled after the Trans-Alaska Pipeline legislation, 43 USC, Chapter 34, that was adopted by Congress in 1973 (43 USC, Chapter 43, Sec. 1652 (d).) Similar legislation to House Bill 215 was passed by the Alaska State Legislature in 1973, Senate Bill 3, related to the TAPS line.

The bill also allows the Alaska Gasline Development Authority (AGDC) to move from a common carrier requirement to a contract carrier option. This change is necessary to pursue a successful open season and project financing for an in-state gasline.

SECTIONAL ANALYSIS

COMMITTEE SUBSTITUTE for HOUSE BILL 215 (JUD) am: "*An Act relating to the judicial review of a right-of-way lease or the development or construction of an oil or gas pipeline on state land; and relating to the lease of a right-of-way by the Alaska Housing finance Corporation for a gas pipeline transportation corridor.*"

Section 1: Amends AS 38.34.050(c), Cooperation and access to information. Adds language that excludes covenants found in AS 38.35.120(a) (1), (2) and (5) from the covenants required to be included in the lease. These covenants refer to a common carrier pipeline which is not applicable to the AGDC (Alaska Gasline Development Corporation) proposal. The AGDC gas pipeline proposal is to be that of a contract carrier. Without the removal of the specific covenants, AGDC will be impacted in its ability to finance the project.

Also adds language that a right-of-way lease is valid and of legal effect notwithstanding AS 38.35.120(b). This allows AGDC to continue its work through the summer under the assumption that AGDC has the ability to operate under this take or pay approach.

Section 2: Amends AS 38.35.100(d), Decision on application. Conforming language to note the changes found in Section 1.

Section 3: Amends AS 38.35.120(a), Covenants required to be included in lease. Conforming language to note the changes found in Section 1.

Section 4: Amends AS 38.35.120(b), Covenants required to be included in lease. Conforming language to note the changes found in Section 1.

Section 5: Amends AS 38.35.200(a), Judicial review of decisions of commissioner on application. Adds language that is intended to limit the ability of those with objections to natural gas pipeline construction to stop necessary projects. Allows a competing applicant or a person with a direct financial interest affected by the lease of a right-of-way to raise an objection within 60 days of the application or 60 days after the effective date of this legislation. Allows an applicant standing to seek judicial review anytime in the process.

Representative_Mike_Chenault@legis.state.ak.us

Section 6: Adds a new subsection to AS 38.35.200, Judicial review of decisions of commissioner on application. This subsection (c) is modeled after the Trans-Alaska Pipeline Authorization Act provision to foreclose lawsuits against any phase of development and/or construction. This subsection only allows those who have standing to bring about an action alleging that an action will deny rights under the state Constitution or challenging the invalidity of this section. The complaint must be filed in a state Superior Court and the court may not grant injunctive relief with the exception of a final judgment. Exempts an appeal of a permitting decision by the Department of Environmental Conservation under AS 46.03 (Environmental Conservation) and AS 46.14 (Air Quality Control) that is delegated to the department by the Environmental Protection Agency.

Section 7: Amends uncodified law by adding a new section for Revisor's Instructions. Changes the catch line of AS 38.35.200 from "Judicial review of decisions of commissioner on application" to "Judicial review."

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 215

Analysis

Current Alaska statutes limit challenges of pipeline right-of-way leasing decisions to lease applicants, competing applicants and persons with a direct financial interest who raise an objection within 60 days a right-of-way lease application is noticed; and restrict the grounds for judicial review to procedural errors. HB 215 would amend existing statutes to impose the same limits on judicial review, including the requirement to raise an objection within 60 days of notice of the initial lease application, to all permitting and licensing decisions associated with development and construction of a pipeline that uses a state right-of-way.

There would be no fiscal impact on the Department of Natural Resources.

BILL NO. CSHB 215(JUD)

Analysis

HB 215 relates to judicial review of a right-of-way lease or the development or construction of an oil or gas pipeline on state land. No additional resources or staff is expected; therefore, there is no fiscal impact to the corporation.

LexisNexis®

MONTY D. MOORE, Appellant, v. STATE OF ALASKA, DEPARTMENT OF NATURAL RESOURCES; and AMERICAN COPPER & NICKEL CO., INC., Appellees.

Supreme Court No. S-8624, No. 5209

SUPREME COURT OF ALASKA

992 P.2d 576*; *1999 Alas. LEXIS 158*; *147 Oil & Gas Rep. 215*; *30 ELR 20218

November 26, 1999, Decided

PRIOR HISTORY: [**1] Appeal from the Superior Court of the State of Alaska, Third Judicial District, Anchorage,. Superior Court No. 3AN-97-3992 CI. Sigurd E. Murphy, Judge pro tem.

DISPOSITION: The superior court's decision AFFIRMED.

CASE SUMMARY:

PROCEDURAL POSTURE: Appellant, company that located and recorded mining claims on state-selected federal land, appealed an order of the Superior Court, Third, Judicial District (Alaska), which upheld decision of appellee, commissioner of state natural resource agency, to void the mining claims.

OVERVIEW: Appellant acquired mining rights on federal land the State had selected under the Alaska Statehood Act, Pub. L. No. 85-508, § 6(g), 72 Stat. 339, 341-42 (1958) prior to the federal government's approval of the land selection. Appellant did not challenge appellee's determination that it was not qualified to do business in Alaska because it failed to register with the appropriate state agency. The court concluded that appellant acquired mining rights at the time of location, rather than an ephemeral claim in waiting, because the State had a present, substantial interest in state-selected lands prior to approval by the federal government. Appellee's decision to void appellant' mining rights was correct because appellee acted within its authority, was entitled to find that appellant was not qualified to conduct business in Alaska and thus not qualified to acquire mining rights under *Alaska Stat. § 38.05.190(a)*.

OUTCOME: Order affirmed because appellant acquired mining rights at time of location, not an ephemeral claim in waiting, and since appellant was not qualified to conduct business in the state, appellant was not qualified to acquire mining rights.

COUNSEL: Thomas E. Meacham, Anchorage, for Appellant.

Lawrence Z. Ostrovsky, Assistant Attorney General, Anchorage, and Bruce M. Botelho, Attorney General, Juneau, for Appellee State of Alaska, Department of Natural Resources.

Joseph J. Perkins, Jr. and Barbara F. Fullmer, Guess & Rudd P.C., Anchorage, for Appellee American Copper & Nickel Company, Inc.

JUDGES: Before: Matthews, Chief Justice, Eastaugh, Fabe, Bryner, and Carpeneti, Justices.

OPINION BY: CARPENETI

OPINION

[*576] OPINION

CARPENETI, Justice.

I. *INTRODUCTION*

Pacific Rainier, Inc. (PRI) located and recorded mining claims on state-selected federal land. At the time, the federal government had not conveyed the land. Upon determining [**2] that PRI was not qualified to do business in Alaska, and thus not allowed to acquire min-

ing rights in this state, the Commissioner of the Department of Natural Resources voided PRI's claims. The superior court upheld the commissioner's decision. The president [*577] of PRI, Monty D. Moore, appealed to this court, arguing that a locator on state-selected federal lands does not acquire mining rights voidable by the state because the state has no rights to convey until the federal government tentatively approves the transfer. In addition, Moore argues that such rights accrue by operation of law upon tentative approval by the federal government, and under Alaska law he has two years after that approval to qualify to do business in Alaska and thus acquire the rights. We disagree. Because a locator acquires mining rights at the time of location, and the commissioner properly voided the rights PRI acquired, we affirm.

II. *FACTS & PROCEEDINGS*

In early 1996, PRI located and recorded certificates of location under state law [1] to more than 200 mining claims and prospecting sites on land north of Denali Highway near Paxson. The locations were made on federal land that the state had [**3] selected pursuant to Section 6 of the Alaska Statehood Act; [2] however, the federal government had not yet "tentatively approved" [3] the state's land selection or transferred patent.

1 *See AS 38.05.185-275.*

2 Pub. L. No. 85-508, § 6(g), 72 Stat. 339, 341-42 (1958), *reprinted in* 48 U.S.C.A. note preceding § 21 (West 1987).

3 The act of issuing tentative approval constitutes the formal transfer of land management authority from the United States to the State of Alaska regarding any particular Statehood Act land selections. *See id.*:

> Following the selection of lands by the State and the tentative approval of such selection by the Secretary of the Interior or his designee, but prior to the issuance of final patent, the State is hereby authorized to execute conditional leases and to make conditional sales of such selected lands . . . .

Later that year, American Copper & Nickel Company, Inc. (ACNC), a company claiming to have located, staked, and recorded [**4] many of PRI's locations before PRI had, informed the Division of Mining that PRI was not a corporation qualified to do business in Alaska and therefore was not qualified to acquire exploration and mining rights under Alaska law. ACNC requested that the division resolve the issue as soon as possible because the conflicting claims were causing investors to withhold financing for ACNC's drilling program. [4] Shortly thereafter, the division director nullified and voided PRI's claims on the grounds brought forward by ACNC.

4 ACNC indicated that the United States Bureau of Land Management had given ACNC permission to conduct drilling on the state-selected lands. The state concurred. Prior to conveyance from the United States to the state, a locator may obtain permits to drill from the federal land manager and other permitting authorities with the state's concurrence. *See* Alaska National Interest Lands Conservation Act § 906(k)(1), *43 U.S.C.A. § 1635(k)(1) (West 1986)*; *see also 11 Alaska Administrative Code 86.115(a)* (1999).

[**5] Moore appealed this decision to the Commissioner of the Department of Natural Resources (commissioner) and ACNC intervened. [5] Moore argued, among other things, that no rights were transferred from the state to PRI that were presently voidable by the state because PRI's selections were on federal lands. As such, he contended, the state had no mining rights to convey at the time of location, and thus there were no rights to void. Moore further asserted that under Alaska law, he had two years after the federal government tentatively approved the state's land selection to qualify to do business in Alaska and to obtain the mining rights to the locations.

5 On appeal before this court, ACNC raises for the first time the claim that Moore is not the locator or owner of the claims in question, and lacks standing to assert claims on behalf of PRI. Moore responds that because he is the president and the sole shareholder of PRI, this court should hold that he has standing to defend the corporation's interests in administrative and judicial proceedings. Alternatively, Moore argues that ACNC has waived this issue because it failed to raise it below. Moore's latter contention is correct; failure to raise the issue of capacity to sue below results in a waiver of that defense. *See Jackson v. Nangle, 677 P.2d 242, 250 n.10 (Alaska 1984)* (citations omitted).

[**6] In March 1997, the commissioner upheld the division director's decision, primarily on the basis that PRI was not qualified to engage in business in Alaska. In addition, the commissioner held that mining rights can be established on state-selected lands prior to [*578] tentative approval by the federal government, and that such claims are subject to Alaska mining laws. The commissioner upheld this decision on reconsideration. Moore then appealed to the superior court, which affirmed the decision.

This appeal followed.

III. *STANDARD OF REVIEW*

This case raises questions of law concerning the application of state mining laws. Because resolution of these questions does not require agency expertise, we employ the substitution of judgment test. [6] However, we give "some weight" to any long-standing agency statutory interpretation. [7] On questions of law, the duty of this court "is to adopt the rule of law that is most persuasive in light of precedent, reason and policy." [8]

6 *See Handley v. State, Dep't Of Revenue, 838 P.2d 1231, 1233 (Alaska 1992).*

[**7]

7 *See Peninsula Marketing Ass'n v. State, 817 P.2d 917, 922 (Alaska 1991)* (citing *State, Dep't Of Revenue v. Alaska Pulp America, Inc., 674 P.2d 268, 274 (Alaska 1983)).*

8 *Guin v. Ha, 591 P.2d 1281, 1284 n.6 (Alaska 1978).*

IV. *DISCUSSION*

A. *Statutory Framework*

Under Alaska law, mining rights on state lands are acquired through the process of "location." [9] This process entails the discovery and marking of the claim, the posting of a notice at the claim site, and the recording of a certificate of location. [10] Through location, a locator acquires a mining claim priority against subsequent locators to the selected claims. [11]

9 *See AS 38.05.195.*

10 *See 11 AAC 86.200*-215 (1996). In addition, there are annual rent and labor requirements. *See AS 38.05.210*-211; *see also 11 AAC 86.215*-221 (1999).

11 *See AS 38.05.275*, which provides in part:

> (a) Mining locations made on state land, including shoreland, tideland or submerged land, or state selected land . . . acquire for the locator mining rights . . . subject to existing claims and to any denial of or restriction in the tentative approval of state selection or patent of the land to the state.
>
> (b) In this section, "state selected land" . . . means land for which the state has filed a selection application with the United States under Sec. 6 of the Alaska Statehood Act, as amended, regardless of the validity or effect of the application, if the selection described in the application has not been rejected or relinquished . . . .

[**8] Locations may be made on state-selected lands prior to the federal government's actual conveyance of the land to the state. [12] State-selected land is land for which the state has filed a selection application with the United States under Section 6 of the Alaska Statehood Act, regardless of the validity or effect of the application, if the selection has not been rejected or relinquished. [13] However, because the state does not have management authority over the land until tentative approval, the location is made at the locator's risk. [14] Nevertheless, locators of claims on state-selected land still acquire prior rights against subsequent locators; these prior rights, upon the land's conveyance, mature [*579] into mining claims, leasehold locations, or prospecting sites. [15]

12 *See id.*; *see also 11 AAC 86.115* (1999), which provides in part:

> LOCATIONS ON STATE-SELECTED LAND.
>
> (a) A location made on state-selected land that has not been conveyed to the state by the federal government through tentative approval or patent is made at the locator's risk. Because the state does not have management authority over the land unless the selection has been conveyed and cannot authorize exploration work or mining until that time, the locator is responsible for obtaining any necessary permits from the federal land manager and other permitting authorities.
>
> (b) A location made on state-selected land in accordance with this chapter creates prior rights against subsequent locators and becomes a mining claim, leasehold location, or prospecting site when the federal government conveys the selection to the state through tentative approval or patent, whichever occurs first, unless the conveyance restricts or bars the location, or unless a state mineral closure is in effect on the date of conveyance. If a state leasing restriction is in effect on the date of conveyance, a location made before the conveyance is subject to that restriction. If the land is closed to mineral entry or restricted to leasing after the date of the conveyance, valid location that was made before the conveyance is unaffected.

[**9]

13 *See AS 38.05.275(b)*; *see also 11 AAC 86.115.*

14 *See 11 AAC 86.115.*

15 *See id.*

Finally, in order for a foreign corporation to locate a mining claim in Alaska, it must be qualified to do business in the state. [16] To qualify, a foreign corporation must obtain a certificate of authority by registering with the Alaska Department of Commerce and Economic Development. [17] However, an unqualified corporation that acquires an interest in exploration or mining rights by operation of law has two years to become qualified or to dispose of the interest to a qualified person. [18]

16 *See AS 38.05.190(a)(5).*

17 *See AS 10.06.705-735*; *see also 11 AAC 88.185(33).*

18 *See AS 38.05.190(b).*

B. *PRI Acquired Mining Interests That Were Properly Voidable by the State.*

PRI took the proper steps to locate claims and [**10] thus acquire mining rights on locations near Paxon. As previously discussed, these rights are in the nature of a priority against subsequent locators. [19] Because the claims were on state-selected land that had not been conveyed by the federal government, PRI was an "at-risk" locator whose priority rights were contingent upon the federal government's tentative approval of the land selection. [20]

19 *See AS 38.05.275.*

20 *See 11 AAC 86.115.*

However, when the Division of Mining learned that PRI was not qualified to do business in Alaska because it failed to register with the Department of Commerce and Economic Development, the division voided and nullified PRI's mining claim priority rights. This extinguished any current or future claim based upon the voided locations. Moore does not challenge the division's finding that PRI was not qualified to conduct business in Alaska. [21]

21 In Moore's appeals before the commissioner and before the superior court, he argued that the locations were made on behalf of Pacific Rainer Roofing, Inc., a corporation qualified to do business in Alaska, and not PRI. However, he has abandoned this argument on appeal before this court.

[**11] Nevertheless, Moore argues -- in spite of unambiguous statutory language to the contrary -- that the commissioner erred as a matter of law in holding: (1) that a locator on state-selected lands acquires mining rights at the time of location, which would be subject to nullification for the locator's failure to be qualified to do business in the state; and (2) that Moore would not acquire mining rights by operation of law when the federal government tentatively approved the state-selected lands, and thus have two years from that time to qualify to do business in the state. He contends that because the state has no property interest in state-selected federal lands until tentative approval, the state has no interest to presently convey. According to Moore, the state only conveys an "ephemeral option" to "stand in line," or a "claim in waiting," which becomes a mining right by operation of law upon tentative approval. Thus, Moore contends that upon tentative approval PRI would acquire an interest in mining rights by operation of law and would then have two years to become qualified or to dispose of this interest to a qualified person. [22] We disagree.

22 *See AS 38.05.190(b).*

[**12] First, we note that Moore appears to be dissecting the right of priority against subsequent locators out of the "bundle of sticks" comprising mining rights. However, a priority right is intertwined within that bundle. For this reason, Moore's argument is fatally flawed. If there is no mining right for the state to void, there is no mining right for the state to convey, including a mining claim priority contingent upon the ultimate conveyance of the land. Thus, Moore's locations on state-selected land would be worthless. In reality, the term "mining rights" is used both in *AS 38.05.275(a)* and in *AS 38.05.190* and it means the same thing in both sections. Moore would have acquired "mining rights" under subsection 275(a) on state-selected land except that subsection [*580] 190(a) prohibits corporations not qualified to do business in Alaska from acquiring "mining rights." Since Moore's acquisition of "mining rights" would have been by location, not by operation of law, the operation of law exception of subsection 190(b) does not apply.

Second, the state does in fact have conveyable property interests in state-selected land prior to tentative approval by the federal government, albeit interests [**13] contingent upon that approval. The United States Supreme Court has held that where a state follows all of the appropriate selection procedures to perfect its land selection claims, it generally acquires vested rights in the selected land at the time of selection. [23] To this end, the Court stated:

It is . . . well settled that a claimant to public land who has done all that is required under the law to perfect his claim acquires rights against the government and that his right to a legal title is to be determined as of that time, and also that this rule is based upon the theory that by virtue of his compliance with the requirements he has an equitable title to the land; that in equity it is his and the government holds it in trust for him. But it is said that, as the selection is subject to the approval of the Secretary of the Interior, no right can become vested, nor

equitable title be acquired, thereunder, unless and until his approval is had, and therefore that the rule just stated is not applicable here. To this we cannot assent. The words relied upon are not peculiar to this land grant, but are found in many others. Their purpose is to cast upon the Secretary the duty [**14] of ascertaining whether the selector is acting within the law, in respect of both the lands relinquished and the land selected, and of approving or rejecting the selection accordingly. [24]

23 *See Wyoming v. United States, 255 U.S. 489, 497, 65 L. Ed. 742, 41 S. Ct. 393 (1921)*; *Payne v. New Mexico, 255 U.S. 367, 371, 65 L. Ed. 680, 41 S. Ct. 333 (1921).*

24 *Payne, 255 U.S. at 371.*

Alaska case law also supports the proposition that the state acquires present, conveyable rights in lands selected by the state prior to tentative approval or conveyance by the federal government. In *Sabo v. Horvath*, [25] we held that a grantor who had not yet received his patent under the Alaska Homesite Act [26] nevertheless had a sufficient interest to convey the land by quitclaim deed. [27] We reasoned that Congress's silence on the issue of alienability in the Act was "quite significant" because Congress "knew how specifically to [**15] prohibit alienation." [28] We stated that though "various other events were necessary prior to the issuance of patent," the grantor had "complied with a substantial portion of his obligation under the statute and regulations. . ." and the "mere fact that steps remained [to be taken] before issuance of [a] patent . . ." did not preclude "the existence of an alienable right, where there has been basic compliance with the statutory demands." [29] Our reasoning in *Sabo* applies here.

25 *559 P.2d 1038 (Alaska 1976).*

26 *43 U.S.C.A. § 687a (West 1986).*

27 *See Sabo*, 559 P.2d at 1042.

28 *Id.*

29 *Id.*

Like the Homesite Act, the Statehood Act does not expressly prohibit the creation of *any* third-party interests in state-selected land prior to tentative approval by the federal government. [30] The state may not execute conditional leases or make conditional sales of such [**16] selected lands, but it is not expressly prohibited from establishing priority rights in third-persons through location. [31] Moreover, upon selection of lands, the state has complied substantially with applicable laws and regulations. Generally, all that remains to be done is a land survey, as well as review and approval by the federal government. [32] The rights the state acquires do not ensure tentative approval or ultimate transfer of [*581] these lands, but they are more than mere expectancies. The state itself would have to take some action before it would lose the right to patent of selected land. [33]

30 *See* Alaska Statehood Act, Pub. L. No. 85-508, § 6(g), 72 Stat. 339, 341-42 (1958), *reprinted in* 48 U.S.C.A. note preceding § 21 (West 1987).

31 *See id.*

32 *See id.*

33 *See id.*

In sum, the state has a present, substantial interest in state-selected lands prior to tentative approval by the federal government. Moreover, state [**17] law expressly grants prior rights to locators against subsequent locators on state-selected lands. [34] Recorded certificates of location memorialize an appropriation of a valuable property right from the state. [35] These rights become mining claims when the federal government conveys the selection to the state. [36] It is incorrect to assert these rights are merely "ephemeral claims in waiting." Rather, they are present, contingent rights in real property which may ripen, by successive steps, into a patent. [37] "Each of [the] steps, including the issuance of the patent, relates back and includes the original and primary location." [38] Thus, PRI, as a locator of state-selected lands, acquired mining rights at the time of location.

34 *See AS 38.05.275*; *see also 11 AAC 86.115(b).*

35 *See AS 27.10.050*; *AS 38.05.195.*

36 *See AS 27.10.050*; *AS 38.05.195.*

37 *See Kile v. Belisle, 759 P.2d 1292, 1294 n.9 (Alaska 1988)* (holding state claimant had no possessory interest in location on state-selected land where the conveyance had not received tentative approval from BLM, but rather had gained priority rights against subsequent locators that matured into a right of exclusive possession upon BLM's tentative approval); *see also Garside v. Norval*, 1 Alaska 19, 23 (D. Alaska 1888).

[**18]

38 *Garside*, 1 Alaska at 23.

Because the commissioner, acting within his authority, [39] was entitled to find that PRI was not qualified to conduct business in Alaska and thus not qualified to acquire mining rights under *AS 38.05.190(a)*, his decision voids and nullifies PRI's mining rights.

39 *See AS 38.05.020.*

C. *The Superior Court Did Not Abuse Its Discretion in Awarding Costs and Attorney Fees.*

Moore also argues that because the superior court erred in its determination that the state and ACNC had

prevailed on the merits, it erred in awarding costs and attorney fees against PRI. Because we affirm the decisions of the commissioner and lower court, we affirm the award of attorney fees.

V. *CONCLUSION*

The commissioner was correct in finding that a locator on state-selected land acquired mining rights at the time of location. These rights were susceptible to nullification [**19] for the locator's failure to qualify to locate mining claims in the state. We therefore AFFIRM the superior court's decision.

MEMORANDUM April 15, 2011

SUBJECT: Review of CSHB 215(FIN) am (Work Order No. 27-LS0741\E.A)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee
Attn: Cindy Smith

FROM: Donald M. Bullock Jr.
Legislative Counsel

You asked for a review of CSHB 215(FIN) am (bill) to identify constitutional or statutory conflict. You specifically want to know how *Moore v. State*[1] may apply to the bill.

Local or special legislation.

Sections 1 - 4 of the bill relate to covenants in AS 38.35.120(a) that the Alaska Housing Finance Corporation (AHFC) would not be bound to agree to as a condition of receiving a right-of-way lease. The covenants in AS 38.35.120(a) were enacted by the legislature and the bill would make several of those covenants inapplicable to a lease entered into with AHFC. Carving out an exception to AHFC raises a question under art. II, sec. 19, Constitution of the State of Alaska, as to whether the exclusion unique to AHFC makes the bill a "local or special act" that is contrary to the prohibition. A general Act that excludes the same covenants for any gas pipeline could avoid the "local or special" question. The fact that AHFC is a public corporation and government instrumentality[2] may be a factor considered by the court if faced with a challenge under art. II, sec. 19.

Another factor that may be considered under a challenge under art. II, sec. 19, is the policy expressed in AS 38.35.010(a) of the Right-of-Way Leasing Act. AS 38.35.010(a) reads as follows:

> (a) The natural resources of this state in crude oil and natural gas and in its land for transportation of these resources and their products by pipeline toward markets both in and out of the state are capable of making a significant contribution to the general welfare of the people of this state.

---

[1] 553 P.2d 8 (Alaska 1976).

[2] AS 18.56.020.

> It is the policy of this state that the development, use, and control of a pipeline transportation system be directed to make the maximum contribution to the development of the human resources of this state, the increase in the standard of living for all of its residents, the advancement of existing and potential sectors of its economy, the strengthening of free competition in its private enterprise system, and the careful protection of its incomparable natural environment.

That policy, considered along with the enactment of ch. 7, SLA 2010, which created the Joint In-State Gasline Development Team in AHFC,[3] expresses the state policy to develop an in-state pipeline and have that project developed by AHFC.

In *Baxley v. State*,[4] the Alaska Supreme Court considered an Act that provided relief to a legislative enactment that gave effect to modifications of four state oil and gas leases in the Northstar Oil Field.[5] The Court concluded that the Act was not special legislation, "[b]ecause the Act's exclusive focus on the Northstar leases reflects their unique nature, and because the Act fairly and substantially relates to legitimate state purposes[.]"

AHFC would not be required to agree to the covenants from which it is excluded under the bill. Considering the state policy expressed in AS 38.35.010 and the enactment of AS 38.34 (that requires AHFC to develop a gas pipeline project), it is likely that a court would find that the favorable treatment of AHFC in the bill relates to legitimate state purposes. It is reasonable to expect that a court would find that bill does not violate art. II, sec. 19, Constitution of the State of Alaska.

Standing and the limitations on actions relating to the right-of-way lease.

Sections 5 and 6 of the bill amend AS 38.35.200. Currently, AS 38.35.200 limits standing to object to a right-of-way lease, the period in which an objection must be raised, and the issues relating to the issuance of the right-of-way lease that are subject to judicial review.[6] The period for raising an objection is 60 days after the commissioner of

---

[3] AS 38.34.030.

[4] 958 P.2d 422 (Alaska 1998).

[5] 958 P.2d at 424.

[6] Sec. 38.35.200. Judicial review of decisions of commissioner on application. (a) An applicant or competing applicant or a person who has a direct financial interest affected by the lease who raises objections within 60 days of the publication of notice under AS 38.35.070 are the only persons with standing to seek judicial review of a decision of the commissioner under AS 38.35.100.

(b) The only grounds for judicial review of a decision of the commissioner are

natural resources (commissioner) publishes notice that an application for a right-of-way lease has been received under AS 38.35.070.

In *Moore v. State*, the case you mentioned in your request, the Alaska Supreme Court stated, "Whether a party has standing to obtain judicial resolution of a controversy depends on whether the party has sufficient personal stake in the outcome of the controversy."[7] The plaintiffs in *Moore*, who for the most part were commercial fishermen, claimed that they would be adversely affected if oil exploration and production were to be allowed in Kachemak Bay. The court concluded that the plaintiffs' interest in the outcome is essentially economic, and, "As such, it clearly meets the injury-in-fact requirement for standing."[8] Under the decision in *Moore*, the direct financial interest requirement for standing in the present AS 38.35.200 and in the proposed amended version may be satisfied by a person whose livelihood may be affected by a right-of-way lease or an action related to that lease. To secure standing, a person must raise the required objection with 60 days after the notice of an application has been published.

Section 5 of the bill limits standing to the same persons as in current law -- a competing applicant, a person that has a direct financial interest affected by the lease, and the applicant. The bill moves the placement of the naming of the applicant so that the amended AS 38.35.200(a) makes the 60-day period to object applicable to the competing applicant and the person with the directly affected financial interest, but removes the applicant from the requirement to raise an objection during the 60-day limitation period. This is logical because the basis for the applicant's appeal may not arise until the commissioner's decision on the application.

Section 5 further amends AS 38.35.200(a) by adding judicial review of "**an action described in (c) of this section**." Under the amended language, an applicant is not subject to the limitations in AS 38.35.200(c), which is added by sec. 6 of the bill. However, a competing applicant or a person with the affected direct financial interest must make an objection within the 60-day period described in AS 38.35.200(a) to have standing to seek judicial review. Although other provisions of law may provide for appeals of a state commissioner or agency action described in AS 38.35.200(c), the subsection is, after making an exception for the applicant under AS 38.35.200(a), prefaced with the phrase "notwithstanding any contrary provision of law. . . ." If a

---

(1) failure to follow the procedures set out in this chapter; or

(2) abuse of discretion so capricious, arbitrary, or confiscatory as to constitute a denial of due process. (Sec. 1 ch. 72 SLA 1972; am. Sec. 19 ch. 3 FSSLA 1973)

[7] *Moore v. State*, 553 P.2d 8, 23 (Alaska 1976).

[8] 553 P.2d at 24.

conflicting law is applicable but does not have a similar "notwithstanding" limitation, the conflict likely would be resolved in favor of the limitations in AS 28.35.200(c).

There may be an access to the courts issue raised if an action that is the basis for a person to seek judicial review is not reasonably foreseen during the 60-day period. The impacted person may still try to access the courts and challenge the 60-day period to acquire standing as barring access to the courts. Whether a court would set aside the 60-day period to acquire standing is difficult to predict; the outcome may depend on the issue that is presented and the alleged risk or harm.

In any case, the amended AS 38.35.200 is an incentive for anyone with even the remotest possibility of being affected by a right-of-way lease or an action related to that lease to raise an objection to preserve standing.

Applicability of art. VIII, sec. 10 of the Alaska constitution.

Article VIII, sec. 10, Constitution of the State of Alaska, prohibits leases of state lands "without prior public notice and other safeguards of the public interest as may be prescribed by law." The Right-of-Way Leasing Act provides for public notice, a hearing, and findings by the commissioner of natural resources before granting a right-of-way lease application, in whole or in part.

AS 38.35.020 authorizes the commissioner to grant a noncompetitive right-of-way lease. The requirements that must be met to be eligible for a right-of-way lease are within AS 38.35, as well as the process for applying. A person seeking a right-of-way lease begins the process by filing an application[9] that is followed by the publication of a notice stating that an application has been received.[10] It is the publication of this notice that starts the 60-day period for raising an objection and it is during this 60-day period that a person must establish standing to pursue judicial review under AS 38.35.200, as amended by the bill.

Consistent with the requirements in art. VIII, sec. 10 of the constitution, by enacting AS 38.35.070 the legislature required prior public notice before the commissioner may approve a lease application. AS 38.35.080 requires a public hearing and requires the commissioner to prepare an analysis of the application, which is made available at least 30 days before the date set for the hearing.

After the hearing, AS 38.35.100 requires the commissioner to determine and make a written finding on an application as to whether "the applicant is fit, willing, and able to perform the transportation or other acts proposed in a manner that will be required by the

---

[9] AS 38.35.050.

[10] AS 38.35.070.

present or future public interest." If the commissioner finds the application may be granted, the commissioner may grant the application in whole or in part. The limitations in AS 38.35.200 in current law limit standing to seek judicial review of a decision made under AS 38.35.100.

Article VIII, sec. 10 of the state constitution requires that no lease of state land "shall be made without prior public notice and other safeguards of the public interest as may be prescribed by law." The legislature has prescribed that there be notice of a right-of-way application (AS 38.35.070), analysis and public hearing (AS 38.35.080), and a decision by the commissioner based on written findings (AS 38.35.100). Whether this process satisfies the requirements in art. VIII, sec. 10, is a question of law which thus far has not been addressed by the Alaska Supreme Court. Under AS 38.35.200(c), as added by the bill, a claim alleging the invalidity must be brought within 60 days after the effective date of the Act enacting the subsection, and a claim alleging that an action will deny rights under the state constitution must be brought within 60 days after the date of an action.

The limitations on bringing a claim under AS 38.35.200(c) are set by law; the equitable remedy of laches is not applicable. With regard to the defense of laches, which is discussed in the *Moore* case, the Alaska Supreme Court wrote:[11]

> The defense of laches is inapplicable to an action at law. Although this proposition has never been directly asserted by the court, this was our implicit conclusion in *State v. Alex*, 646 P.2d 203, 215 (Alaska 1982). Moreover, limiting the defense of laches to equitable actions is in accord with the case law of virtually every other jurisdiction. When a party is seeking to enforce a legal right, as opposed to invoking the discretionary equitable relief of the courts, the applicable statute of limitations should serve as the sole line of demarcation for the assertion of the right.

In *Moore v. State*, the defendants raised the defense of laches, and were successful in obtaining summary judgment in their favor on that basis on the lower court.[12] The Supreme Court reversed after reviewing the timing of events in the lease sale, from the call for nominations, through the lease sale, the issuance of the leases, the issuance of the first permits in November 1974, and the filing of the plaintiff's suit in December 1974.[13] The court found that the plaintiffs were "not guilty of inexcusable delay" and sufficient prejudice had not been established on the record.[14]

Actions by the Department of Environmental Conservation.

In the course of considering HB 215, concern was expressed over the effect of limiting review of the actions in the proposed AS 38.35.200(c) on the authority delegated to the Department of Environmental Conservation by the United States Environmental Protection Agency. AS 38.35.200(d) was added in the House Judiciary Committee and was adopted in CSHB 215(JUD) to avoid this conflict.

This analysis may not be conclusive or address every issue raised by CSHB 215(JUD) am given the limited time available as the session ends. If you do hear the bill in your committee, you may wish to seek additional comments from the Department of Law, who would defend the enacted provisions of the bill.

If I may be of further assistance, please advise.

DMB:ljw

Sec. ⏩38.35.120⏪. Covenants required to be included in lease.

(a) A noncompetitive lease of state land for a right-of-way for an oil or natural gas pipeline valued at $1,000,000 or more may be granted only upon the condition that the lessee expressly covenants in the lease, in consideration of the rights acquired by it under the lease, that

(1) it assumes the status of and will perform all of its functions undertaken under the lease as a common carrier and will accept, convey, and transport without discrimination crude oil or natural gas, depending on the kind of pipeline involved, delivered to it for transportation from fields in the vicinity of the pipeline subject to the lease throughout its route both on state land obtained under the lease and on the other land; it will accept, convey, and transport crude oil or natural gas without unjust or unreasonable discrimination in favor of one producer or person, including itself, as against another but will take the crude oil or natural gas, depending on the kind of pipeline involved, delivered or offered, without unreasonable discrimination, that the Regulatory Commission of Alaska shall, after a full hearing with due notice to the interested parties and a proper finding of facts, determine to be reasonable in the performance of its duties as a common carrier; however, a lessee that owns or operates a natural gas pipeline

(A) subject to regulation either under the Natural Gas Act (15 U.S.C. 717 et seq.) of the United States or by the state or political subdivisions with respect to rates and charges for the sale of natural gas, is, to the extent of that regulation, exempt from the common carrier requirement in this paragraph;

(⏩B⏪) that is a North Slope natural gas pipeline (i) is required to operate as a common carrier only with respect to the intrastate transportation of North Slope natural gas, as that term is defined in AS 42.06.630, and (ii) is not required to operate as a common carrier as to a liquefied natural gas facility or a marine terminal facility associated with the pipeline, and is not otherwise required to perform its functions under the lease as a common carrier; for purposes of this subparagraph, "North Slope natural gas pipeline" means all the facilities of a total system of pipe, whether owned or operated under a contract, agreement, or lease, used by a carrier for transportation of North Slope natural gas, as defined by AS 42.06.630, for delivery, for storage, or for further transportation, and including all pipe, pump, or compressor stations, station equipment, tanks, valves, access roads, bridges, airfields, terminals and terminal facilities, including docks and tanker loading facilities, operations control centers for both the upstream part of the pipeline and the terminal, tanker ballast treatment facilities, fire protection system, communication system, and all other facilities used or necessary for an integral line of pipe, taken as a whole, to carry out transportation, including an extension or enlargement of the line;

(2) it will interchange crude oil or natural gas, depending on the kind of pipeline involved, with each like common carrier and provide connections and facilities for the interchange of crude oil or natural gas at every locality reached by both pipelines when the necessity exists, subject to rates and regulations made by the appropriate state or federal regulatory agency;

(3) it will maintain and preserve books, accounts, and records and will make those reports that the state may prescribe by regulation or law as necessary and appropriate for purposes of administration of this chapter;

(4) it will accord at all reasonable times to the state and its authorized agents and auditors the right of access to its property and records, of inspection of its property, and of examination and copying of records;

(5) it will provide connections, as determined by the Regulatory Commission of Alaska under AS 42.06.340, to facilities on the pipeline subject to the lease, both on state land and other land in the state, for the purpose of delivering crude oil or natural gas, depending on the kind of pipeline involved, to persons (including the state and its political subdivisions) contracting for the purchase at wholesale of crude oil or natural gas transported by the pipeline when required by the public interest;

(6) it shall, notwithstanding any other provision, provide connections and interchange facilities at state expense at such places the state considers necessary if the state determines to take a portion of its royalty or taxes in oil or natural gas;

(7) it will construct and operate the pipeline in accordance with applicable state laws and lawful regulations and orders of the Regulatory Commission of Alaska;

(8) it will, at its own expense, during the term of the lease,

(A) maintain the leasehold and pipeline in good repair;

(B) promptly repair or remedy any damage to the leasehold;

(C) promptly compensate for any damage to or destruction of property for which the lessee is liable resulting from damage to or destruction of the leasehold or pipeline;

(9) it will not transfer, assign, or dispose of in any manner, directly or indirectly, or by transfer of control of the carrier corporation, its interest in a right-of-way lease, or any rights under the lease or any pipeline subject to the lease to any person other than another owner of the pipeline (including subsidiaries, parents, and affiliates of the owners), except to the extent that the commissioner, after consideration of the protection of the public interest (including whether the proposed transferee is fit, willing, and able to perform the transportation or other acts proposed in a manner that will reasonably protect the lives, property, and general welfare of the people of Alaska), authorizes; the commissioner shall not unreasonably withhold consent to the transfer, assignment, or disposal;

(10) it will file with the commissioner a written appointment of a named permanent resident of the state to be its registered agent in the state and to receive service of notices, regulations, decisions, and orders of the commissioner; if it fails to appoint an agent for service, service may be made by posting a copy in the office of the commissioner, filing a copy in the office of the lieutenant governor, and mailing a copy to the lessee's last known address;

(11) the applicable law of this state will be used in resolving questions of interpretation of the lease;

(12) the granting of the right-of-way lease is subject to the express condition that the exercise of the rights and privileges granted under the lease will not unduly interfere with the management, administration, or disposal by the state of the land affected by the lease, and that the lessee agrees and consents to the occupancy and use by the state, its grantees, permittees, or other lessees of any part of the right-of-way not actually occupied or required by the pipeline for the full and safe utilization of the pipeline, for necessary operations incident to land management, administration, or disposal;

(13) it will be liable to the state for damages or injury incurred by the state caused by the construction, operation, or maintenance of the pipeline and it will indemnify the state for the liabilities or damages;

(14) it will procure and furnish liability and property damage insurance from a company licensed to do business in the state or furnish other security or undertaking upon the terms and conditions the commissioner considers necessary if the commissioner finds that the net assets of the lessee are insufficient to protect the public from damage for which the lessee may be liable arising out of the construction or operation of the pipeline.

(⏭b⏮) For a right-of-way lease granted under this chapter for an oil or natural gas pipeline valued at $1,000,000 or more to be valid and of legal effect, it must contain the terms required to be inserted under the provisions of AS 38.35.110 - 38.35.140. An oil or natural gas pipeline right-of-way lease granted under this chapter that does not contain the required terms is null and void and without legal effect and does not vest any interest in state land or any authority in the carrier granted the lease.

(c) The commissioner may insert in any right-of-way lease other reasonable provisions and conditions required by the public interest.

(d) The lease will also contain terms and conditions that are reasonably necessary to obligate the lessee, to the extent reasonably practicable, to

(1) prevent conflicts with other existing uses of the land involving a superior public interest;

(2) protect state and private property interests;

(3) prevent any significant adverse environmental impact, including but not limited to the erosion of the surface of the land, and damage to fish and wildlife and their habitat;

(4) restore and revegetate during the term and at termination of the lease; and

(5) protect the interests of individuals living in the general area of the right of way who rely on the fish, wildlife, and biotic resources of the area for subsistence purposes.

(e) In the event the commissioner proposes to offer a lease or leases to two or more lessees for the same pipeline, the commissioner may include terms in the lease or leases which establish

the limit of the obligations and liabilities of each lessee arising under this chapter or under the lease or leases.

MEMORANDUM

Date: April 10, 2012

To: Senator Hollis French

From: Representative Peggy Wilson PW

RE: **Hearing Request for HB 216 "Regulations: Informative Summary/Bills"**

I respectfully request a hearing in the Senate Judiciary Committee for HB 216, "An Act relating to fiscal notes for bills directing or resulting in the adoption, amendment, or repeal of regulations, and to the notice required for the proposed adoption, amendment, or repeal of a regulation; and providing for an effective date

Attached are:

- HB 216 Request for Hearing
- HB 216 version L
- HB 216 Sponsor Statement
- HB 216 Fiscal Note
- HB 216 Support letters (2)

Steven Weaver, from Department of Law, will be available to answer questions.

The contact for HB 216 is Sheila Finkenbinder, 465-6887.

Thank you for considering this important piece of legislation.

SENATE CS FOR CS FOR HOUSE BILL NO. 216(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES PEGGY WILSON, Lynn, Costello, Kawasaki, Kerttula, Johnson

A BILL

FOR AN ACT ENTITLED

"An Act relating to fiscal notes for bills directing or resulting in the adoption, amendment, or repeal of regulations, and to the notice required for the proposed adoption, amendment, or repeal of a regulation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 24.08.035 is amended by adding new subsections to read:

(f) In addition to the other requirements of this section, if a bill directs an agency in the executive branch of state government to adopt, amend, or repeal a regulation or will result in an agency's adopting, amending, or repealing a regulation, the department affected shall include in the fiscal note for the bill a specific time by which the agency shall adopt, amend, or repeal the regulation. If the agency is not able to meet the deadline set in the fiscal note, the agency shall

(1) set a new deadline; and

(2) report to the Administrative Regulation Review Committee the new deadline and the reasons for being unable to meet the deadline set in the fiscal

note.

(g) In (f) of this section, "agency" includes the Alaska Housing Finance Corporation, the Alaska Industrial Development and Export Authority, the Alaska Energy Authority, the Alaska Public Offices Commission, and the Alaska Oil and Gas Conservation Commission, but does not include other boards or commissions.

* **Sec. 2.** AS 44.62.200 is amended by adding a new subsection to read:

(d) When a state agency, other than the Regulatory Commission of Alaska, the Board of Fisheries, or the Board of Game, posts, furnishes, or otherwise provides a notice of the proposed adoption, amendment, or repeal of a regulation under AS 44.62.190, a brief description of the changes made by the proposed adoption, amendment, or repeal must accompany the notice. However, if, under AS 44.62.190(a), the notice is published in a newspaper or trade or industry publication or is broadcast, this subsection does not require that the brief description otherwise required by this subsection accompany the publication or the broadcast. To the extent practicable, the brief description shall be written in clear, easily readable language that a person without a legal background is able to understand. Notwithstanding AS 44.62.300, an action may not be brought for failure of the brief description to comply with the requirements of this subsection relating to the description of the changes or its clarity and readability.

* **Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) AS 24.08.035(f) and (g), enacted by sec. 1 of this Act, apply to bills that are filed on or after the effective date of this Act.

(b) AS 44.62.200(d), enacted by sec. 2 of this Act, applies to the proposed adoption, amendment, or repeal of a regulation on or after the effective date of this Act.

* **Sec. 4.** This Act takes effect July 1, 2012.

SPONSOR STATEMENT
House Bill 216

"An Act relating to fiscal notes for bills directing or resulting in the adoption, amendment, or repeal of regulations, and to the notice required for the proposed adoption, amendment, or repeal of a regulation; and providing for an effective date."

HB 216 will accomplish two goals relating to changes to state regulations; increasing the speed with which regulations are written, and describing in plain, easy-to-understand language all regulations that are adopted, amended or repealed.

Legislators and the public have often been frustrated by the fact that months, or even years, sometimes pass between the time that a bill is passed by the legislature and the time the regulation is implemented. The result is; Alaska residents, businesses and legislators are confused about what the change means. As an example: as we were looking at the governor's House Bill 110, on oil taxes, we didn't have proof of what regulations were currently being enforced because the ACES regulations hadn't even been written - three years after we passed the legislation. The same confusion can impact individuals who are unclear about when, or if, new regulations concerning their business or recreational activities take effect. HB 216 states that any bill requiring creation or modification of any regulation must include a regulation completion deadline.

The other problem addressed by this bill is the confusion and lack of understanding of many proposed regulation changes or new additions. This confusion is caused by the legalese used to describe proposed regulations. This language, while accurately and legally describing proposed regulations, is difficult to understand by the average individual. HB 216 will require that all proposed regulation changes include descriptions, in plain English, of what the original regulation does and what the proposed change will do.

Passage of this legislation will encourage public participation in the regulation review process, as people find it easier to understand what the regulations mean to them. It will also help speed passed legislation to implementation when regulations are completed in a set, scheduled timeframe.

Based on input from committee members and the Department of Law, several amendments were passed in the State Affairs and Judiciary committees that help to clarify the language used in the bill. No substantive changes have been made to the original intent of the bill.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 216

Analysis

"An Act relating to deadlines in bills directing the adoption of regulations and to the informative summary required for the proposed adoption, amendment, or repeal of a regulation."

If a proposed bill will require regulations or result in a change to existing regulations, Section 1 would require agencies to state in the fiscal note for the bill a time by which the agency is to adopt, amend, or repeal the regulation. If the agency does not meet the deadline, it would set a new deadline and report to the Administrative Regulation Review Committee the new deadline and the reasons for not meeting the deadline that was established in the fiscal note.

Section 2 would require for a notice, posted on the Online Public Notice site or furnished electronically by a state agency, proposing adoption, amendment, or repeal of existing regulations, that a brief description accompany the notice and be written in clear, easily readable language that a person without a legal background is able to understand. The Regulatory Commission of Alaska, the Board of Fisheries, and the Board of Game would be exempt from Section 2.

No fiscal impact is expected as a result of Section 1. The fiscal impact resulting from Section 2 for future legislation is expected to be minimal. If the cost cannot be absorbed within an agency's budget, agencies will reflect this in the note for future legislation.

Representative Peggy Wilson
State Capitol
Room 408
Juneau, Alaska 99801

Dear Representative Wilson,

I am writing to express the Alaska Municipal League's support for HB216, particularly the amendments to Section 2, Chapter 3 of AS 44.62.045.

It makes perfect sense to require the agencies to provide an informative summary of proposed regulations which describe how the amendments will change existing regulation "in clear, easily readable language that a person without a legal background is able to understand."

AML was forced to hire legal counsel (at a cost of over $8,000) to analyze sections of the new regulations proposed by APOC dealing with comprehensive revisions to Public Official and Legislative Finance Disclosure and Campaign Disclosure. It is AML's job to keep local elected officials and their municipal employees current on legislation, regulations and statutes that affect their local governments. When the agencies are unwilling to help us understand these regulations, we must do what we can to obtain the information.

In late 2010, the Alaska Public Offices Commission (APOC) published proposed revisions for public review and comment. AML requested from APOC, some explanation of what changes were encompassed in the new proposed regulations, as the document was approximately 125 pages long. APOC refused to provide any detailed explanation of the changes; in fact, the staff told us they had been instructed not to answer any questions about the proposed regulations. Without clarification of the new regulations, it makes it much more difficult to comment. We then hired legal counsel to perform a side-by-side examination of the old regulations and the new regulations. Only after enlisting the support from the Governor's office and many legislators were we able to secure additional information from APOC.

Most municipalities have numerous boards and commissions made up of community volunteers who are subject to APOC financial disclosure regulations. These private citizens are not equipped by training, nor do they have the time to understand and translate new regulations without the help from APOC. A plain, clear, easily readable explanation of the changes would have helped local officials understand and comment

on the new regulations. It appears to me that APOC, while drafting changes, could have done computerized "track" changes as the drafting process was taking place.

The opportunity for public comment on new regulations will not result in any substantive input if the adopting agency does not assist the public in understanding new regulatory changes. It also is quite ironic that the agency tasked with keeping government more transparent refuses to help the public understand proposed regulations.

It should not be difficult for an agency to comply with HB216, as they presumably understand what changes they are proposing and how they will affect the public. It is unreasonable to expect members of the public to read, translate, cross-reference and understand new regulation without some explanation from the authors.

Again, AML supports the adoption of HB216, as it will assist elected and volunteer municipal officials better understand how they are regulated by state agencies.

Thank you for the opportunity to comment.

Sincerely,

Kathie Wasserman

March 14, 2012

Senator Bill Wielechowski, Chairman
Senate State Affairs Committee
Alaska State Legislature
State Capitol, Room 3
Juneau AK 99801

RE: Support for CS FOR HOUSE BILL NO. 216

Dear Chairman Wielechowski and Committee Members,

United Fishermen of Alaska is the largest statewide commercial fishing trade association, representing 37 commercial fishing organizations participating in fisheries throughout the state and its offshore federal waters. The UFA Board of Directors recently met and discussed HB 216 which calls for specific time for adoption to be included in fiscal notes on proposed legislation, and also calls for "a brief description of the changes made by the proposed adoption, amendment, or repeal..." in public notices on regulatory changes, other than by the Board of Fisheries, Board of Game, or Regulatory Commission of Alaska.

The bill continues, "...This brief description shall be written in clear, easily readible language that a person without a legal background is able to understand."

UFA supports the passage of CSHB 216. Commercial fisheries participants are directly affected by numerous regulations within the Departments of Labor, Environmental Conservation, Revenue, and Commerce, Community and Economic Development. We observe that regulatory changes posted for public comment are often very confusing to the target audience of individuals that will be affected. When asked for clarification, State agency officials have been reticent on clarification of the intent and effects on proposed regulations once these are posted for public comment, leaving confusion in the minds of those who comment. This leaves the public in the position of attempting to pose clarifying questions within their comment letters, and lacking the answers to those questions to inform their comments. It also causes frustration and wasted time for the public.

We feel that HB 216 will help reduce confusion in regulatory changes in the future as an important improvement in the public process, and should save time in the long run for the agencies involved, and for the public.

Thank you for your consideration,

Mark Vinsel
Executive Director

Sponsor Statement HB 224
Banning the Sale of Products Containing Nicotine to a Minor

Faced with lagging sales, given the unpopularity and banning of smoking in many public places, tobacco companies are investing in new and innovative ways to deliver their product. Some of the newest items on the market, called "dissolvable products" are mints, lozenges, strips and toothpicks containing nicotine. These products slowly dissolve in the mouth and deliver a nicotine hit between 0.6 and 3.0 mg per item while a cigarette contains 1 mg of nicotine (Brandweek, 2008). Some have legitimate uses for promoting smoking cessation and providing smokers relief when they are in situations where they cannot smoke. However, the opportunity for abuse is wide with the over the counter availably of dissolvable products containing nicotine.

HB 224 makes it illegal to sell or give a product containing nicotine to a minor. Under this bill an individual is fined $300 if convicted of selling or giving a product contacting nicotine to a individual under 19. HB 224 addresses the need for minors to access products that are regulated and marked for smoking cessation, such as nicotine gum, by allowing a minor to purchase products containing nicotine with the prescription of a health care provider, obtain it from an parent or legal guardian or from an state approved tobacco cessation program. Also, an 18 year old or older can purchase from a pharmacist independently.

There is a very real risk that increased nicotine use in youth and adolescents promotes addiction to nicotine at a young age and could encourage future tobacco use and addiction (Science Daily, 2003). A recent Harvard School of Public Health study found dissolvable nicotine products to be toxic if ingested by children (Harvard School of Public Health, 2010). A 14-year old boy in England was hospitalized after overdosing on nicotine gum (Vapure News, 2009).

Many of the products containing nicotine that are entering the market now look and taste like candy. A study conducted by student volunteers in Virginia surveyed 1400 teens and 42% identified Camel Orbs as a candy based on their packaging (Virginia Foundation for Healthy Youth, 2010). According to Brandweek, a professional publication on brand identity marketing, "camel dissolvable will not be positioned as a smoking cessation or reduced risk product, per the company" (Brandweek, 2008). Products containing nicotine are not subject to FDCA Chapter IX , the regulations that govern tobacco (Chicago Breaking News, 2011).

Without the regulation of products containing nicotine by the state there is an increased chance of children becoming addicted to nicotine, and tobacco later in life. Many of these products are new to the market and have not yet been introduced in Alaska. HB 224 takes a proactive approach to encouraging the responsible use of dissolvable nicotine products.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 224

Analysis

HB 224 adds a new AS 11.76.109 making it a violation (punishable by a fine of $300-$500) to sell a non-tobacco product containing nicotine to persons under 19. (Sales of tobacco to persons under 19 are already a violation under AS 11.76.100.) An employer can also be prosecuted for negligently failing to advise an employee making the sale of this prohibition. The bill excepts products approved by the FDA as tobacco cessation products (e.g., nicotine patches) if they are marketed as such and are provided to the individual by one of four routes (prescribed by a health care professional, given to the person by a parent or guardian, supplied through a DHSS-administered tobacco cessation program, or provided by a pharmacist even without a prescription to a customer 18 or older).

There should be no anticipated fiscal impact on the Department of Law. Although there might be a slight increase in prosecutions, it should fall within Law's ability to handle with current resources.

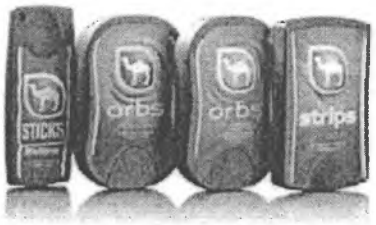
R.J. Reynolds Preps Dissolvable Tobacco

Oct 9, 2008

- Mike Beirne



R.J. Reynolds Tobacco will dive deeper into the smokeless category next year by nationally distributing Camel Snus and introducing in test markets dissolvable alternatives to cigarettes called Camel Sticks, Camel Orbs and Camel Strips.

The new products, grouped under the Camel Dissolvables banner, are smokeless and spit-free; they are made from finely milled tobacco and held together with food grade binders. The products will launch in the first quarter in Columbus, Ohio, Portland, Ore., and Indianapolis. The Camel Dissolvables Sticks can be placed in the mouth like a toothpick or broken into a piece that is placed between the upper lip and gum, where it dissolves after 10 minutes. RJR recommends the same usage for Orbs, which is a pellet that lasts about 15 minutes, and Strips, which dissolve after about 3 minutes.

The three forms of smokeless tobacco will be packed in plastic, child-resistant packaging. Strips will come in Fresh mint flavor and Sticks in Mellow; Orbs will be available in both flavors. Camel Dissolvables deliver between 0.6 to 3.1 milligrams of nicotine, while cigarette smokers typically inhale about 1 mg per cigarette.

Advertising is still being developed, but a company rep said print ads, direct marketing, sampling (at bars and nightclubs) and POP will support. The Reynolds American unit currently has a company policy that restricts advertising cigarettes in consumer publications. That self-imposed ban does not apply to other tobacco products and trade publications. Gyro, Philadelphia, and Agent 16, New York, are the lead agencies.

By introducing the products in select test markets, RJR hopes to find out which forms of Camel Dissolvables are the most popular, and how demographics or usage determines preferences. The product concept partly evolved from consumer feedback, following a test of Camel Snus in 2006. Camel Snus is also spitless, but some smokers said they didn't care for loose tobacco or pouched smokeless products, particularly ones they had to remove from their mouth after use.

The smokeless category has been a magnet for cigarette makers with sales averaging 5% to 7% annually, per various estimates. Although there is a growing body of literature contending that smokeless tobacco is less harmful than smoking cigarettes, a 2007 study by the American Cancer Society found that male smokers who switched to smokeless had higher death rates than men who quit or never smoked. Camel Dissolvables will not be positioned as a smoking cessation or reduced risk product, per the company.

"The consumer should be aware of the information available about the potential risks of each tobacco product. There are none that are safe and there are none that are without risks," said RJR rep David Howard.

In addition to introducing the new dissolvable alternatives, RJR will expand distribution for Camel Snus (pronounced *snooze*) by offering retailers countertop and under the counter refrigerator units to keep the product cold.

In 2006, Reynolds American acquired Conwood, the second largest maker of smokeless products in the U.S. Philip Morris USA's smokeless products include Marlboro Snus and Marlboro Snuff. Altria, Philip Morris' parent company, expects to close by January on its purchase of UST, the holding company for U.S. Smokeless Tobacco, the largest smokeless product company and maker of Skoal and Copenhagen.

Tobacco Company's New, Dissolvable Nicotine Products Could Lead to Accidental Poisoning in Infants and Youth

0 Content blocked by your organization

For immediate release: Monday, April 19, 2010

Boston, MA—A tobacco company's new, dissolvable nicotine pellet--which is being sold as a tobacco product, but which in some cases resembles popular candies--could lead to accidental nicotine poisoning in children, according to a new study from the Harvard School of Public Health (HSPH), the Northern Ohio Poison Control Center, the Centers for Disease Control and Prevention (CDC) and the Food and Drug Administration (FDA). The researchers also say the candy-like products could appeal to young people and lead to nicotine addiction as well.

The study appears in an advance online edition of the journal *Pediatrics* on April 19, 2010 and will appear in a later print issue.

In 2009, the R.J. Reynolds Tobacco Company launched a dissolvable nicotine product called Camel Orbs, which according to the company's promotional literature contains 1 mg nicotine per pellet and is flavored with cinnamon or mint. The company also introduced Camel Strips (to contain 0.6 mg nicotine per strip) and Sticks (to contain 3.1 mg nicotine per strip).

It appears that the product is intended as a temporary form of nicotine for smokers in settings where smoking is banned. However, the potential public health effect could be disastrous, particularly for infants and adolescents, said Professor Gregory N. Connolly, lead author of the study and director of the Tobacco Control Research Program at HSPH.

Ingestion of tobacco products by infants and children is a major reason for calls to poison control centers nationwide. In 2007, 6,724 tobacco-related poisoning cases were reported among children five years of age and under. Small children can experience nausea and vomiting from as little as 1 mg of nicotine.

"This product is called a 'tobacco' product, but in the eyes of a 4-year-old, the pellets look more like candy than a regular cigarette. Nicotine is a highly addictive drug and to make it look like a piece of candy is recklessly playing with the health of children," said Connolly.

The researchers computed, based on median body weight, how much nicotine ingestion would lead to symptoms of poisoning in children: A one-year-old infant could suffer mild to moderate symptoms of nicotine poisoning by ingesting 8 to 14 Orbs, 14 Strips or 3 Sticks; ingesting 10 to 17 Orbs, 17 Strips or 3 to 4 Sticks could result in severe toxicity or death. A four-year-old child could have moderate symptoms by ingesting 13 to 21 Orbs, 14 Strips or 4 Sticks and could suffer severe toxicity or death by consuming 16 to 27 Orbs, 27 Strips or 5 Sticks. The researchers report that a poison control center in Portland, Oregon, a test market for Orbs, reported a case in which a three-year old ingested an Orbs pellet.

R.J. Reynolds claims that Orbs packaging is "child resistant," but the researchers say adults could unknowingly leave the pellets out in the open where children could easily access them. The researchers also say that the candy-like appearance and flavoring and ease-of-use of the product could appeal to children.

we should put child health risks on record

"Unintentional Childhood Poisonings Through Ingestion of Conventional and Novel Tobacco Products," Gregory N. Connolly, Patricia Richter, Alfred Aleguas Jr., Terry F. Pechacek, Stephen B. Stanfill, Hillel R. Alpert, *Pediatrics,* online April 19, 2010.

Cindy,

Here is the information for HB 229. Let me know if you need printed versions.

I have provided existing statute and administrative code. I'm not sure if you want to print them for the committee or not.

HB229

As amended in HB 229, AS.08.54.610(e) will provide the guiding industry with greater operational flexibility though further reduce the already minimal supervisory requirements for assistant guides. When considered relative to "supervision"[1] and "participation"[2], as currently defined in regulation, the net effect will be to increase to potential pool of licensed guides that will **not have** to "supervise" assistant guides accompanying clients. If the words "participation" and "supervision" were defined in regulation in accordance with generally accepted meanings concerns would be reduced. However, "supervision"[1] as currently defined permits the following by an assistant guide:

- Have no direct (face to face) contact with the contracting guide for the entire hunting season
- If hunt less than five days in duration no contact with the "supervising" guide is required
- Without input from a "supervising" guide make all decisions regarding daily methods for conducting the hunt, including:
  - Hunting methods
  - Trophy judging
  - Stalking
  - Harvest methods
  - Trophy care .

The requirement for the contracting or supervising guide to "participate" in the hunt when the assistant guide is alone in camp with the client can be met by a variety of methods. These include (12 AAC 75.250(c)[3] "...in-person contact, radio contact, telephone contact, and signaling." The term "signaling" provides a multitude of options such as smoke signals, signal mirror, or, just flying several thousand feet above the camp (assuming someone is in camp) and tilting the wings. It is doubtful any of these, other than "in-person contact", would conform to general perceptions of "participation".

The minimal requirements for "supervision" and "participation" might be rationalized if the requirements for an assistant guide license were high. However, the current regulatory requirements are:

- 18 years old
- Have first card
- Be recommended by a guide (*may substitute an approved guide school for requirement*)
- Have hunted in Alaska for 30 days for each of two years.
- Have harvested one big game animal (*small moose run over by "pick-up truck" would count*).

An individual meeting these qualifications for an assistant guide license, with the exception of booking hunts, can provide most if not all services allowed by a registered guide license. The latitude afforded assistant guides to provide services is considerably greater for than in such licensed or "Certificate of Fitness" professions such as barber/hairdresser or plumbers or electricians. With these professions a minimum of 2000 hours for barber/hairdressers, and 8000 hours for

electricians and plumbers, of training and supervision are required before assuming the professional responsibilities accorded to assistant guides. Please see table 1.

State issued License	Direct Supervision	Class-room Instr.	Test	Source
Plumber Cert. of	8000 hours[a]	1000 hours (may be part of 8000 hrs)	Yes[b]	8 AAC 90.130(1) [a] 8 AAC.90.115 [b]
Electrician	8000 hours [c]	1000 hours (may be part of 8000 hrs)	Yes [b]	8 AAC 90.160. [c] 8 AAC.90.115 [b]
Hairdresser/Barber	1650[d]	350	Yes[e]	12 AAC 09.0029(B) [d] 12 AAC 09.005 [e]
Assistant Guide	None	None	None	

Table 1.

By Statute the State of Alaska requires non-residents of various classes to be accompanied by a class of licensed guide while hunting for sheep or goats or brown/grizzly bears. With the exception of "second degree of kindred" a non-resident must engage the services of a licensed guide before harvesting any of these species. As previously indicated, HB 229, AS.08.54.610(e) will essentially increase the "pool" of licensed guide the **DO NOT** have to supervise assistant guides providing a State mandated service. The already weak "participation" and "supervisory" definitions in regulation contribute in part to the follow:

1. Assistant guides conducting hunts for species they have never seen
2. Assistant guides having to "learn as they go" (at the expense of the client and resource)
3. Assistant guides failing the guiding examination at higher than to be expected rates.

As currently structured in regulation, a lifelong resident of Alaska, regardless of hunting experience can not accompany a non-resident friend for sheep or goats or brown/grizzly. However, an eighteen year-old that has never seen or hunted any of the species can as an assistant guide satisfy the requirement of a non-resident being accompanied by a guide for certain species. **With this situation it is difficult to understand how it is in the best interest of the resource or the well-being of the non-resident hunter to be required to use the services of a licensed professional guide.**

In Conclusion

If the current construction of the regulations regarding "qualifications" and "supervision" and "participation" are consistent with legislative intent there:

1. May be no need for requiring non-residents to be accompanied by a class of licensed guide.
2. May be other licensing processes that would be less cumbersome to administer and regulate and more suited to the intended purposes of licensing guides. An example might be the Commercial Driver's License ((CDL).

If the current construction of the regulations regarding "qualifications" and "supervision" and "participation" are inconsistent with legislative intent then:

1. Empanel a over-sight committee to review the current regulatory structure
2. Convey to the guiding industry, through a resolution, what is expected by way of standards and objectives.

I would like to take this opportunity to thank Representative Eric Feige (R) and his staff for their efforts in developing HB299 and this committee for taking the time to hear the bill.
Again, thank you.

(1)

12 AAC 75.250. PARTICIPATION IN A HUNT. (a) Repealed 6/2/2011.

(b) A registered guide-outfitter who contracts to guide a hunt and who is participating in a hunt as required in AS 08.54.630(b)(3) shall be in communication, either personally or through an agent, with the assistant guide, who is in the field with the client, at least once during the hunt if the hunt is longer than five days.

(c) In this section, "communication" includes in-person contact, radio contact, telephone contact, and signaling.

(d) A registered guide-outfitter who contracts to outfit a hunt shall

(1) before leaving a client in the field, advise the client of the date, time, and location at which the registered guide-outfitter will pick up the client and the course of action the client should follow if the registered guideoutfitter is unable to pick up the client as planned;

(2) either personally or through a class-A assistant guide, an assistant guide, or a licensed transporter, transport the client into and out of the field at the planned date, time, and location, unless prevented by weather, mechanical problems, or other safety concerns; and

(3) check on or communicate with a client in the field as agreed to before transporting that client.

(2)

12 AAC 75.240. SUPERVISION. (a) A registered guide-outfitter who contracts to guide a hunt shall plan, direct, and monitor the big game hunting services provided to the client.

(b) At the conclusion of the hunt, a registered guide-outfitter who contracts to guide a hunt shall evaluate the performance of the assistant guide, class-A assistant guide, or registered guide-outfitter involved in the hunt to determine whether the big game hunting services provided to the client were satisfactory.

-18-

(c) To comply with (b) of this section, the contracting registered guide-outfitter shall verbally communicate, by telephone or radio, or in person, with the client and the assistant guide, class-A assistant guide, or registered guideoutfitter involved in the hunt, separately or together, at least once within 10 days after the conclusion of the hunt. The contracting registered guide-outfitter shall obtain the necessary information to evaluate the performance of the assistant guide, the class-A assistant guide, or registered guide-outfitter and determine whether the big game hunting services were provided safely, in accordance with state and federal law, and to the satisfaction of the client.

(d) The contracting registered guide-outfitter shall make a good faith effort to verbally communicate with the client to obtain the necessary information to evaluate the performance of the assistant guide, class-A assistant guide, or registered guide-outfitter. If the attempt to verbally communicate with the client is unsuccessful, the contracting registered guide-outfitter shall write to the client and request the necessary information to evaluate the performance of the assistant guide, the class-A assistant guide, or registered guide-outfitter. The contracting registered guideoutfitter shall write to the client within 60 days after the conclusion of the hunt.

(e) A registered guide-outfitter shall document on the hunt record the date the registered guide-outfitter complied with the verbal, or if applicable the written, client communication requirements in (c) and (d) of this section.

(f) The contracting registered-guide outfitter or a noncontracting registered guide-outfitter or class-A assistant guide supervising an assistant guide shall be available in the same guide use area, or an adjacent guide use area with a common border, to direct and monitor the big game hunting services provided to the client, except during times when

(1) an emergency situation exists that requires the guide's assistance; or

(2) the contracting registered guide-outfitter or noncontracting registered guide-outfitter or class-A assistant guide supervising the hunt is outside the guide use area or neighboring guide use area while

(A) in transit with meat or trophies in that or a neighboring guide use area;

(B) in transit with food, supplies, or clients directly associated with conducting guided hunts in that or a neighboring guide use area; or

(C) conducting important duties that are essential for completion of current contracted hunts.

(g) Repealed 7/30/2006.

(h) In this section, "emergency situation" means a situation in which a person is in a remote area and

(1) is involuntarily experiencing an absence of food, water, shelter, or medical care required to sustain life or health;

(2) is lost;

(3) is unable to perform the functions necessary for survival, leading to a high risk of death or serious and permanent health problems without the assistance of the guide; or

(4) the guide's presence is necessary for a family medical condition.

SPONSOR STATEMENT – HB 229

An Act relating to activities, including violations and penalties, under the supervision of the Big Game Commercial Services Board.

HB 229 makes changes in statute recommended by members of the Big Game Commercial Services Board addressing changes to rules regarding the administration and licensing of guides.

Big game guides are regulated under statute and regulation and oversight is provided by the Big Game Commercial Service Board. The proposed changes provide more flexibility in where guides can work when contracting with another guide, allows a registered guide-outfitter more flexibility in the use of class-A guides, and changes penalties for minor procedural violations by guides.

Sectional Analysis – HB 229(JUD) Version E

Sec. 1: Provides additional authority to the Big Game Commercial Services Board to create regulations to administer the regulation of big game guides. Under current statute, the board is limited to regulations that are "required" under statute.

Sec. 2: Creates a provision in statute for a retiree status license that recognizes those that have earned a guide license. No privileges are granted under the license to provide guiding services.

Sec. 3: Clarifies language to specify that a guide-outfitter may provide the services of a class-A assistant guide under the control of a contracting guide-outfitter, anywhere the contracting guide-outfitter is licensed to contract hunts.

Sec. 4: Changes the requirements for a registered guide-outfitter to require them to primarily be in the field supervising, participating in, and conducting a hunt as defined under regulation by the board, unless a class-A assistant guide is conducting the hunt as regulated by the board.

Sec. 5: Provides the board with the power to suspend or revoke a license of someone engaged in conduct involving unprofessionalism, moral turpitude, or gross immorality.

Sec. 6: Changes penalties for certain violations to allow a court to order the board to suspend a license instead of requiring a court to order the board to suspend a license.

Sec. 7: Authorizes the department to set a fee for the new retired master guide-outfitter license.

Sec. 8: Conforming language to specify the holder of a retired guide license may not guide.

Sec. 9: Provides an effective date for Sections 3, 4, and 5 of the bill of April 1, 2013.

Sect. 10: Provides for an immediate effective date for sections of the bill other than Sections 3, 4, and 5.

Boards & Commissions Factsheets
BIG GAME COMMERCIAL SERVICES

Board: Big Game Commercial Services Board
Board identification number: 042

Department: DEPARTMENT OF COMMERCE COMMUNITY AND ECONOMIC DEV

Authority: AS 08.54.591; Const. Art III Section 26

Status: Active

Sunset date: 6/30/2012

Requirements: Legislative Confirmation and Financial Disclosure

Prohibitions: None

Term: 4 years

Description: 9 members - 8 appointed by Governor: 2 members who are licensed registered guide-outfitters; 2 members who are licensed transporters, 1 member of the Board of Game chosen by the Board of Game and who does not hold a guide or transport license, 2 members who represent private landholders affected by guided hunting or transportation activities/services and who do not hold a license under this board, and 2 public members.

Function: Licenses and regulates the activities of providers of commercial services to big game hunters in the interest of the state's wildlife resources.

Chair: Governor selects

Special facts: Big Game Commercial Services Board replaced the Guide Board which was repealed on 6/30/89. Serve at the pleasure of the governor. The governor may select the chair. A majority constitutes a quorum. A member who has served all or part of two successive terms may not be reappointed unless four years have elapsed since the person last served on the Board.

Compensation: Standard Travel and Per Diem. No additional compensation.

Meetings: At least twice annually, plus panel meetings; 14 days maximum.

(Revised 11/28/2011 OMB)

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 229 (RES)

Analysis

HB 229 makes changes in statute recommended by members of the Big Game Commercial Services Board addressing changes to rules regarding the administration and licensing of guides. The proposed changes provide more flexibility in where guides can work when contracting another guide, allows a registered guide-outfitter more flexibility in the use of class-A guides, and changes penalties for minor procedural violations by guides.

The CS for HB 229 adds a new section to include a new type of license category: Retired Master Guide-Outfitter.

There is no anticipated fiscal impact to the Division as a result of this legislation.

ALASKA

PROFESSIONAL HUNTERS ASSOCIATION, INC.

HC 60 Box 229C, Copper Center, AK 99573
Phone: 907-822-3755 Fax: 907-822-3752
Email:office@alaskaprohunter.orgwww.alaskaprohunter.org

Dear Representative Feige,

I'm writing thank you for sponsoring HB 229 and affirm the support of the Alaska Professional Hunters Association for this important bill. As the sitting president of the APHA and a lifelong Alaskan and second generation Registered Guide I know firsthand how burdensome unclear and, or, contradictory statutes and regulations can be. HB 229 will alleviate some of this burden by clarifying the relationship between Registered Guides when they work for each other and, at the same time, protecting the value of the Class A Assistant Guide license. The APHA also appreciates the creation of a retired, non-active, license so that respected, retired guides can stay licensed and not cut into fixed, retirement incomes. This is essential to maintaining the social continuity, of an industry that respects its elders and provides a career path that includes substantial time as an apprentice.

The APHA has always pushed for greater professional competency and accountability. For this reason we vigorously support giving the Big Game and Commercial services board the ability to suspend or revoke guide or transporter licensed for unprofessional behavior, moral turpitude and gross immorality. Having operators, representing themselves as guides, who are amoral or chronically immoral or unprofessional hurts our membership in a business that relies on reputation and word of mouth business. Alaska deserves to have the best and most ethical guides harvesting its big game resource.

In closing I want to once again thank the honored members or the legislature that have taken the time to consider HB 229 and carry it through the process on the behalf of me and my organizations livelihoods! I also want to state that many APHA members have spent their personal time advising and working on drafting HB 229 as recognition of the collaborated effort between your office and our membership. For the sake of brevity I have only used a few examples of the positive aspects of HB 229 but we do support the bill in its entirety.

Thank You,

Gary LaRose

Big Game Commercial Services Board

February 9, 2012

Dear Senator Menard and Representative Feige,

The Big Game Commercial Serves Board supports House Bill 229 and Senate Bill 190 for improving the guide industry in Alaska. The Board was reinstated 7 years ago and has worked on these concerns during the meetings. These changes are housekeeping measures the board feels are needed for a healthy industry. The Board was unanimous in the vote in support of submitting this Bill and its contents. We respectfully ask for the passage of this legislation.

Sincerely,

Paul Johnson

Paul Johnson
Chair, BGCSB

Dear Representative Feige,

Thank you for your sponsorship and support of HB229 which will provide for a retired status master guide-outfitter license. I initially proposed this provision some 2-3 years ago and had about given up hope for the possibility of passage. While it has not yet passed, hope springs eternal?
I will support passage of the combined HB 229 / SB 190 in any manner possible. Please call on me if I can help.

Sincerely,
dickgun

To: Sen. Linda Menard; Sen. Charlie Huggins
Cc: Rep. Eric Feige
Subject: SB 190 and HB 229

Senator Menard and Senator Huggins,

Thank you for Sponsoring SB190. I've lived in Wasilla since 1984, got my registered guide license in 1986, started our family run business – Alaska Remote Guide Service in 1987, and upgraded my registered guide-outfitter license to master guide-outfitter status a few years back. To my knowledge, there have been no changes to the Big Game Commercial Service Board Statutes since 1994 or before. I think your bill and Representative Feige's HB229 help address some key issues in bringing the statutes current with several changes that have taken place since then in the guide industry. Most of us in the industry want to do what is right, but it is very hard to understand what that is, even after reading the statutes and regulations several times. In fact I was in a working group at the BGCSB meeting in Fairbanks two years ago, when we were discussing supervision and participation issues. Several guides were present along with some top level enforcement personnel. I think it's fair to say that all of us were at least some what confused about what was expected by us in the statutes.

I've been in attendance at every commercial service board meeting for the past several years, and worked in and led several committees that dealt with several issues in this bill. The key concerns that most interested me personally were 08.54.610 (d) and (e). The current requirement in 08.54.610 (e) (1) that the bill asks to delete, works fine for large operations that are lucky enough to have a lodge or main camp in the same Guide Use Area where they hunt. Everybody gets flown to the lodge to start with and then head out hunting from there. By so doing, this requirement has been met. In operations where the main camp or lodge is in a different guide use area or in many smaller operations, meeting this requirement can be a lot more complicated, and requiring the guide to do so can actually impact the quality of the client's hunt and the service that the guide is able to provide.

While the above mentioned points in the bill are my main focus, I fully agree with and support every provision that your bill deals with. I have spent a lot of personal time and effort to help get these issues put forward. As this bill moves forward, feel free to contact me concerning any questions or concerns that may arise, and let me know how I can help. Thank you again for you help!

Sincerely,

Wayne Kubat

Sponsor Statement HB 234
"An Act relating to picketing at a funeral."

The death of a loved one is one of life's most tragic events. More than 46 states across the country have enacted laws protecting families at funerals during their time of grief. These laws establish standards of conduct which respect the family's need for respect and privacy during this difficult time while also allowing others to express their viewpoints.

HB 234 brings Alaska in line with the majority of states and adopts the guidelines which govern conduct during a funeral. HB 234 is modeled after the guidelines used by our national cemeteries and requires that:

- Picketing that disrupts a funeral, will not take place within 150 feet of the boundary of the cemetery, church, or other facility where the funeral services are occurring, and
- Disruptive picketing not take place one hour before or one hour after the service.

This bill asks anyone within the area of a funeral service to conduct themselves in a respectful manner for the duration of the service. HB 234 looks out for the interests of the grieving families while preserving the rights of others to voice their opinions.

I strongly urge your support of HB 234.

High Court Rules For Anti-Gay Protesters At Funerals

by NINA TOTENBERG

Nicholas Kamm/AFP/Getty Images

Members of the Westboro Baptist Church of Topeka, Kan., staged a protest across the street from a high school in Hyattsville, Md., a day before the Supreme Court ruling.

March 2, 2011

text size A A A

The U.S. Supreme Court has ruled that protesters at military funerals cannot be sued for inflicting emotional distress on the family of a dead soldier. The vote was 8 to 1.

When Marine Lance Cpl. Matthew Snyder was killed in Iraq, his funeral in Westminster, Md., drew thousands to pay their respects. But it also drew a protest from the Rev. Fred Phelps and six other members of the Westboro Baptist Church, based in Topeka, Kan.

Phelps and other church members have traveled the country for years, picketing hundreds of military funerals to communicate their belief that "God hates the USA" for its tolerance of homosexuality, particularly in the military.

The picketers did not contend that Snyder was gay. Rather, their message, as Phelps puts it, was that "the whole country is given over to sodomy and to sodomite enablers."

The picketers followed their usual practice at the Snyder funeral. They alerted police in advance and followed instructions to set up their protest on public property, at a site 1,000 feet away from the church, near the vehicle entrance.

Speech is powerful. It can stir people to action, move them to tears of both joy and sorrow, and ... inflict great pain. On the facts before us, we cannot react to that pain by punishing the speaker.

Though the protest was peaceful and ended before the funeral began, the picketers carried signs with messages offensive to many, including "Thank God for Dead Soldiers," "Fags Doom Nations" and "America Is Doomed."

- Chief Justice John Roberts, in the majority opinion

Albert Snyder, the father of the dead Marine, did not see the signs until later when he viewed TV coverage. He says the picketers turned his son's funeral into a circus, taking away his "last moment" with his son.

"This was a funeral. This wasn't a parade going down the street. I shouldn't have to look away from anything at my own child's funeral," Snyder says. "That's absurd."

Snyder sued Phelps and his church for intentional infliction of emotional distress.

"These people targeted me and my family, and they have done this to over 200 other military men and women's families," Snyder says, his voice rising. "I want to know how you would feel if somebody stood 30 feet away from the main vehicle entrance of a church where you're trying to bury your mother, with a sign that says, 'Thank God for dead sluts.' You tell me that shouldn't be illegal. Is 'fag' any worse than 'slut'?"

A jury agreed with Snyder and awarded him $5 million in damages. But the Supreme Court set aside that verdict Wednesday.

Writing for the court majority, Chief Justice John Roberts said that as repugnant as many of the signs were, they were still plainly related to public, rather than private, matters. They focused on "the political and moral conduct of the United States and its citizens," he said, and speech of such public concern is protected by the First Amendment.

Our profound national commitment to free and open debate is not a license for the vicious verbal assault that occurred in this case.

- Justice Samuel Alito, who cast the lone dissenting vote

Although Westboro may have chosen to protest the funeral to gain publicity for its views, said the chief justice, and although those views may be particularly hurtful to the dead soldier's father, that does not mean the church members' right of free speech can be curtailed or punished. And a jury award amounts to punishment, Roberts contended, by imposing a penalty for expressing an unpopular viewpoint.

"Speech is powerful," Roberts said in conclusion. "It can stir people to action, move them to tears of both joy and sorrow, and — as it did here — inflict great pain. On the facts before us, we cannot react to that pain by punishing the speaker. As a nation we have chosen a different course — to protect even hurtful speech on public issues to ensure that we do not stifle public debate."

Reaction to the decision was markedly muted, given the outrage voiced by veterans groups and politicians at the time the case was argued in the Supreme Court.

The Democratic and Republican leaders of the Senate, along with 40 other members of Congress, filed a brief on Snyder's side. But on Wednesday, reaction on Capitol Hill was nowhere to be found, except in a couple of written statements.

Lawyer Gene Schaerr, who filed a brief in the case for the American Legion, said he was heartened by the fact that the court specifically mentioned that 43 states have enacted laws that put a buffer zone of 100 feet or more around funeral sites. Such laws would not have affected the protest in this case, since protesters were 1,000 feet away.

Nonetheless, says Schaerr, the decision "sends a clear signal to the lower courts that they should not interpret anything in this opinion as casting any doubt about those statutes." The court, however, specifically left open that question, noting that restrictions on the time, place and manner of protests are appropriate in some circumstances.

Wednesday's 8-to-1 ruling came as no surprise to First Amendment scholars, both right and left. They note that the decision is in line with many court decisions protecting the rights of fringe groups — from Nazis marching in Skokie, Ill., to flag burners at a Republican convention in Texas.

University of Chicago law professor Geoffrey Stone notes that Wednesday's ruling fits neatly into that tradition, calling it a "classic case." The only surprise, maintained Stone, was that anyone dissented.

Justice Samuel Alito was the lone dissenter. He viewed the protesters' speech as targeting a private person — the father of the dead soldier — and said that the First Amendment does not give license to such outrageous conduct.

"In order to have a society in which public issues can be openly and vigorously debated," wrote Alito, "it is not necessary to allow the brutalization of innocent victims."

LEGISLATIVE RESEARCH REPORT

DECEMBER 9, 2011

REPORT NUMBER 12.113

FUNERAL PROTEST LAWS IN OTHER STATES

PREPARED FOR REPRESENTATIVE BILL THOMAS, JR.

BY ROGER WITHINGTON, LEGISLATIVE ANALYST

SUMMARY 1

STATE LAWS PERTAINING TO FUNERAL PROTESTS 2

Table 1: Summary of State Funeral Protest Laws, May 2011 3

CHALLENGED AND UNCONSTITUTIONAL STATE FUNERAL PROTEST LAWS 3

LIST OF ATTACHMENTS 5

You asked for information on funeral protest laws. Specifically, you wished to know how many states currently have a law regulating funeral protests and what each state law stipulates. You also wanted to know for each state that currently has a funeral protest law if violating the restriction is considered a felony or misdemeanor offense. In addition, you asked if any of the state laws have been challenged and if any have been found unconstitutional.

SUMMARY

As you may know, for a number of years the Westboro Baptist Church of Topeka, Kansas has been protesting, among other events, military funerals. These protests have garnered the Church a great deal of national attention.[1] The Church's primary message at these protests is that God hates the United

[1] Summary information was extracted from Kathleen Ann Ruane, *Funeral Protests: Selected Federal Laws and Constitutional Issues*, Congressional Research Service, March 22, 2011, and the Westboro Baptist Church's website.

States for its tolerance of homosexuality. As punishment for its tolerance, God is killing soldiers "in righteous judgment against an evil nation."

As a result of these protests, state and local governments have adopted measures that create "buffer zones" that ban protests of funerals within a certain distance of the services and that establish time restrictions as to when protests can occur in relation to a funeral service. Additionally, the federal government has passed similar bans on protests at military funerals in federally controlled cemeteries.

STATE LAWS PERTAINING TO FUNERAL PROTESTS

According to the National Conference of State Legislatures (NCSL), 46 states currently have some form of a funeral protest law. In Table 1, we provide a summary of these state laws; we include a more detailed summary of each state's law in Attachment A.

Of the 31 states identified in Table 1 that impose a restriction on the time in which a protest may take place in relation to the funeral service, 22 specify that a protest may not occur any time one hour prior to, during, or one hour after the conclusion of the funeral or memorial service. The remaining nine states specify a time restriction range from 30 minutes to 120 minutes before and after the service.

As you can see from Table 1, 39 states create a "buffer zone" that restricts protests of funerals within a certain distance of the service. These buffer zones range from 150 feet to 1,500 feet. The most typical distance, used by 15 states, is 500 feet.

Seven states—California, Florida, Idaho, Louisiana, Maine, Rhode Island, and Virginia—chose not to create time or distance buffer zones but instead appear to have amended their disorderly conduct or disturbing the peace statues to include protests at funeral or memorial services.

Thirty-six states classify the first violation of these funeral protest laws as misdemeanors. Although several states classify the second offense as a felony, two states—Indiana and Michigan—classify the first offense as a felony.

TABLE 1: SUMMARY OF STATE FUNERAL PROTEST LAWS, MAY 2011

Regulation	States
Time Requirement	Alabama, Arizona, Arkansas, Connecticut, Delaware, Georgia, Illinois, Iowa, Kansas, Kentucky, Michigan[1], Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Texas, Utah, Vermont, West Virginia, Wisconsin, Wyoming
Distance Requirement	Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Washington, West Virginia, Wisconsin, Wyoming
First Offense Classified as a Misdemeanor	Alabama, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Iowa, Kansas, Kentucky, Maryland, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, Wyoming

Source: *Funeral Protest Regulation Statutory Provisions,* National Conference of State Legislatures, May 18, 2011, Jon Griffin, Policy Associate, Fiscal Affairs Program, National Conference of State Legislatures, 303-364-7700 ext. 1529.

Notes: (1) Michigan law authorizes local governments to create laws that restrict funeral protests from one hour immediately before, or during, or two hours immediately following a service.

In Attachment B, we provide a sample of funeral protest laws from ten states—Alabama, Colorado, Connecticut, Idaho, Minnesota, Montana, New Mexico, Oklahoma, Rhode Island, and Washington.

According to the NCSL, all four of the states that do not currently have a funeral protest law—Alaska, Hawaii, Nevada, and Oregon—considered such a measure during the last legislative session. Measures in Alaska and Hawaii are still active, while the measures in Nevada and Oregon have failed. Additionally, many states sought to amend their existing laws. We include, as Attachment C, a NCSL summary of all state legislation considered during the last legislative session that pertains to funeral protests.

Re: HB 234: Funeral Picketing and Protests
ACLU Review of Constitutional Issues

Dear Co-Chairs Saddler & Thompson:

Thank you for the opportunity to provide written testimony with respect to House Bill 234.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout Alaska who seek to preserve and expand the individual freedoms and civil liberties guaranteed by the United States and Alaska Constitutions. From that perspective, we wish to advise the Committee of our concern that the proposed bill, if enacted, would violate the rights of free speech and free assembly under the Alaska Constitution and the United States Constitution.

Bill Overview

The current draft of HB 234 proposes to amend the existing disorderly conduct statute, to criminalize the act of "knowingly engag[ing] in picketing with reckless disregard" that the picketing occurs within 150 feet of the boundaries of a "cemetery, mortuary, church, or other facility" and either during a funeral at that location or within an hour of the start or end of the funeral.

The bill goes on to define the term "funeral," excluding a funeral procession from that definition. The bill also defines "picketing" as "protest activities . . . that disrupt or are undertaken to disturb a funeral."

Freedom of Speech

Under the First Amendment to the United States Constitution, people have the freedom to speak without government interference. The freedom of speech is not absolute, ***but government regulation of speech imposes a heavy burden on the government to justify the nature of its regulation and to show that alternative means of vindicating the government interests were inadequate.***

A. The Bill Would Regulate Speech on Sidewalks, a Traditional Public Forum

The present bill directly regulates speech on its face. "[P]rotest activities" are expressive activity, by the very basic meaning of the word "protest." "Picketing" has long been recognized as expressive activity. *See, e.g., Carey v. Brown*, 447 U.S. 455 (1980).

Based on the broad scope of the bill and the real world context of the activities regulated, the bill would criminalize certain expressive activity both on one's own private property – assuming the private property lay within 150 feet of a cemetery or church – as well as on a sidewalk or public park, which are recognized as "traditional public forums" for public speech. *Hill v. Colorado*, 530 U.S. 703, 716 (2000).

Given that the bill directly regulates speech **on one's own property and in traditional public forums**, the bill will be subject to the most careful scrutiny by a court, demanding that the restriction be "necessary to serve a compelling state interest and that it is narrowly drawn to achieve that end." *Frisby v. Schultz*, 487 U.S. 474, 481 (1988) (citation omitted).

B. The Bill is Not Content-Neutral, But Only Regulates Protest Activities

"The right to free speech . . . may not be curtailed simply because the speaker's message may be offensive to his audience." *Hill*, 530 U.S. at 716. For that reason, most restrictions on speech must be content-neutral, meaning that the regulation of speech may not refer to the content of the speech. *Madsen v. Women's Health Center, Inc.*, 512 U.S. 753, 763 (1994). By contrast, content-neutral restrictions on speech in a public forum describe the time, place, and manner in which speech may be made, and must be narrowly tailored to serve a substantial government interest. *Ward v. Rock Against Racism*, 491 U.S. 781, 799 (1989). Examples of a content-neutral regulation would include an ordinance against using a loudspeaker over a particular volume or after a certain hour.

In the recent funeral picketing case, the United States Supreme Court did admit that some state laws establishing a buffer zone would be analyzed differently (which does not necessarily mean that they would be *constitutional*), but only to "the extent [such state] laws are content neutral." *Snyder v. Phelps*, 131 S. Ct. 1207, 1218 (2011).

HB 234 appears to refer to the content of speech, and is thus not content-neutral. The term "protest activities" suggests that only the speech of those presenting a negative viewpoint would be affected by the regulation. Under the bill, a person loudly stating that the US military is contributing to the decline of moral values would presumably be engaged in "protest activities," while a person loudly stating that we must honor our veterans would not be engaged in "protest activities."[1] *Frisby*, 487 U.S. at 482. Therefore, the conduct prohibited is not merely traditional picketing, but protesting, oppositional speech. *Snyder*, 131 S. Ct. at 1219 (noting that the claims of the offended plaintiffs "turned on the content and viewpoint of the message conveyed, rather than any interference with the funeral itself").

Heightening the inference that the bill is intended to discriminate between those presenting supporting views and those presenting opposing views at a funeral, the bill also prohibits activities that "disrupt or are undertaken to disturb a funeral." But in the context of the bill's language, activities that "disrupt" or "disturb" would likely be viewed in light of their content, rather than a neutral standard. "Disrupting" or "disturbing" entails that the activities run contrary to the purpose or plan of the funeral. Loud noises, such as amplified speech or, as has become more common at funerals, the loud revving of motorcycle engines may be viewed as non-disruptive when the expressive conduct accords with the purpose of the funeral, but disruptive when it is not. **Favoring certain expressive activity over another in regulating picketing violates the First Amendment.** *Carey*, 447 U.S. at 470. Notably, in one of the only cases upholding such a law, the parties *stipulated* that the law was content-neutral, rather than contesting the law's neutrality. *Phelps-Roper v. Strickland*, 539 F.3d 356, 361 (6th Cir. 2008).

C. The Legislative History Suggests Lack of Content-Neutrality

Finally, the legislative history suggests that the bill was not intended to be content-neutral. The Sponsor Statement indicates that the bill "asks anyone within the area of a funeral service to conduct themselves in a respectful manner." Sponsor Statement, HB 234. While most – if not indeed nearly all – of us, can agree that permitting funerals to proceed in a peaceful, quiet environment is a laudable goal, nonetheless the state may not legislate "respectful" behavior on the streets and sidewalks of Alaska, nor in the front yards of its citizens. *Olmer v. City of Lincoln*, 192 F.3d 1176, 1180-81 (8th Cir. 1999) (holding that an ordinance prohibiting sign-holding outside churches was unconstitutional because it went "beyond the church building and

---

1. A protest is defined by the Merriam-Webster dictionary as an "act of objecting or a gesture of disapproval." By contrast, the general definition of "picketing" is merely "posting at a particular place."

church property, and seeks to forbid peaceful communication on property belonging to the public, even though the communication may be completely truthful, and even though there is absolutely no physical interference with access to the church"). If "protest activities" that "disrupt" or "disturb" are any activities that are "disrespectful," the law clearly discriminates based on the content of the speech and cannot stand.

D. No Compelling Governmental Interest in Restricting Speech at Funerals

Given that the bill is not content-neutral, the question is then whether "protecting families at funerals during their time of grief" is a compelling state interest justifying a restriction on free speech. **The Constitution requires that "to shut off discourse solely to protect others from hearing it is . . . dependent upon a showing that substantial privacy interests are being invaded in an *essentially intolerable manner*."** *Snyder*, 131 S. Ct. at 1220 (emphasis added). The only cases in which the U.S. Supreme Court has upheld such laws have been content-neutral laws relating to the privacy of one's home. *Frisby*, 487 U.S. at 487-88 (upholding content-neutral ordinance banning picketing of a single home which made the resident a "prisoner" in his own home); *Rowan v. Post Office Dept.*, 397 U.S. 728, 738 (1970) (upholding statute permitting mail recipient to halt offensive mailings to his residence).

We emphasize that a funeral is a solemn occasion and that families in grief should be accorded the respect that such an occasion deserves. However, funerals are also traditionally public events, frequently held in places of worship or funeral homes that are open to the public. In Anchorage, for instance, numerous cathedrals and churches occupy the downtown area, as does a large cemetery. In Juneau, a Catholic cathedral and a Russian Orthodox church sit three blocks from the State Capitol. Expecting that one will neither see nor hear anything offensive in a heavily-trafficked public space is not reasonably comparable to an expectation that one can retire to one's private home without running a gantlet of protestors.

While the members of the Westboro Baptist Church espouse an abhorrent ideology and express it in the most repulsive terms, this bill would affect all funerals and all protestors. Protesting a funeral, especially that of a public figure, may express an important view opposing an ideology or history of bad acts committed by the person being buried. Funerals are frequently centered around a eulogy, an opportunity to say complimentary things about the deceased. A protest outside a funeral may be an opportunity to present an alternative viewpoint about the deceased and to communicate it to passers-by.

Alternatively, when the death of an individual occurs under circumstances giving rise to matters of public concern, the funeral may be the locus of public debate. Famously, the lynching death of Emmett Till resulted in a dramatic funeral in Chicago which thousands of people attended; a dramatic moment that galvanized the civil rights movement. **A municipality could use the bill, for instance, to characterize angry or upset attendees at a funeral for a victim of a police shooting as "protestors" and arrest the attendees for disorderly conduct. A bill that restricts the freedom of speech on the basis of content is available for all kinds of mischief.**

E. The Bill Is Not Narrowly Tailored and Does Not Leave Adequate Avenues for Expression

Because the bill extends to 150 feet in every direction from a church, mortuary, funeral home, or cemetery where a funeral may take place, and extends from an hour before to an hour after a funeral, HB 234 unconstitutionally restricts speech in that it is neither narrowly tailored nor does it leave adequate avenues for expression. The only recognized constitutional interest at stake is the right of a listener in a private place to avoid being a captive audience to a message the listener has no desire to hear. *Phelps-Roper v. Strickland*, 539 F.3d at 364.

Funeral attendees are not a captive audience to a quiet protest, provided the protest does not enter the church or block the entrance to the church. *Olmer*, 192 F.3d at 1180-81. Funeral attendees may have to walk or drive past protestors holding signs that offend them, and might wish to avert their eyes for the period they would otherwise be exposed to the offensive messages. Clearly, protestors can be excluded from the funeral home, mortuary, cemetery, or church where the service takes place. **Thus, the statute is not narrowly tailored to the government interest in avoiding making funeral attendees a captive audience to the protest.**

Further, a primary function of a mortuary or funeral home is to serve as a space for funeral services. *Some funeral homes may hold more than one funeral in a day.* Given the length of services and the one hour window before and after the service when a protest may not take place, **HB 234 – as currently drafted – could prohibit even unrelated protests near a funeral home, for potentially many hours out of any given day.**

Since some important public buildings – likely sites for protests – are close to funeral homes, this would impose a serious burden. For instance, there is a funeral home across the street from the Atwood Building in Anchorage. An Episcopal church lies across the street from the Dena'ina Convention Center. A labor demonstration against a particular employer lacks the same efficacy if performed offsite. Employees at a business located next door to church, mortuary, funeral home, or cemetery would be unable to mount an effective protest about labor conditions if their protests had to start and stop every time a funeral was taking place. As an example, the Sheraton Hotel in Anchorage lies across the street from the municipal cemetery in the middle of downtown. Employees at similarly situated businesses could be seriously chilled from engaging in meaningful protests and could conduct regular, continuing protests only at the risk that someone would define their protests as "disrupt[ing]" the funeral service.

Last, the bill leaves open little alternative for those who actually wish to protest the church, funeral home, or cemetery in question, by mandating that the protestors stay at least 150 feet away from the property within an hour before or after funerals. Someone may seek to picket a church, such as to bring attention to victims of sexual assault. Someone may seek to picket a funeral home or a cemetery, such as in a labor dispute or a dispute about the policies of the business. While such protests may incidentally impact funeral attendees, the alternative would thwart the free expression of employees or those with legitimate concerns about the church, funeral home, or cemetery. Taken as a whole, the law would leave few alternatives open to those

who seek to protest outside public or private buildings that happen to be located near a church, funeral home, or cemetery, as well as those who seek to picket the church, funeral home, or cemetery itself.

The bill is not narrowly tailored to the legitimate state interests because the protestor must engage in picketing with "reckless disregard," rather than knowledge, that the picketing takes place within 150 feet of the site of a funeral and within one hour before or one hour after the funeral. "Recklessness" refers to a criminal law standard that a person consciously disregards a substantial risk of a certain condition being present. AS 11.81.900(a)(3). Presumably, there is a substantial "risk" that a funeral will take place at a church, funeral home, mortuary, or cemetery at any time. This standard unreasonably imposes on a protestor the duty of discovering whether or not a funeral is ongoing, recently took place, or will take place within an hour of a protest. Employees protesting labor conditions at the Sheraton will thus be required to find out if any funerals are taking place in the municipal cemetery on a day when they decide to protest. **Protesters should not be burdened with such a duty to discover whether a funeral is taking place at any given time.** Imposing the burden on protesters to discover when and whether a nearby church, cemetery, or funeral home is conducting a funeral leaves the law unreasonably ill-tailored to legitimate state interests and imposes an unconstitutional "protest at your own risk" policy.

Drafting Considerations

We suggest the Committee may wish to consider:

The protests staged by the Westboro Baptist Church express abhorrent views, for which the ACLU has no sympathy. Further, the manner in which they protest is deeply offensive. **The great maxim of free speech is that for all evil speech, "the remedy to be applied is *more speech*, not enforced silence."** *Whitney v. California*, 274 U.S. 357, 378 (1927).

Rather than seeking to prohibit fools from saying foolish and hurtful words, we as a community should come together to show our appreciation for our service members and others in our community whose funerals may be subject to these protests. If the protests of a handful of people inspire a thousand people to come out to show their support and respect at a funeral, does that tribute not outweigh the ill words of a few? The true voice of Alaska should come out when a misguided minority threatens their protests, so we may show why their words are folly.

Second, the members of the Westboro Baptist Church thrive on the controversy and attention generated by their activity. They also thrive on the attorneys' fees generated when legislatures and municipal assemblies act hastily to prevent them from protesting. As truly painful as it is to watch such a protest unfold, it will surely be more galling to pay from the state treasury to facilitate more protests and more litigation by a tiny group of hateful individuals whose message has already received too much attention.

Conclusion

We hope that the Military and Veterans' Affairs Special Committee will recognize that these are just some of the constitutional infirmities in House Bill 234.

Thank you again for letting us share our concerns. Please feel free to contact the undersigned if you have any questions or wish additional information.

Sincerely,

Jeffrey Mittman

MEMORANDUM March 10, 2011

SUBJECT: Amendment to AS 11.61.110 (disorderly conduct) adding picketing or protesting at a funeral as an offense (Work Order No. 27-LS0627\A)

TO: Representative Bob Herron
Attn: Rob Earl
Representative Bill Thomas
Attn: Kaci Schroeder

FROM: Doug Gardner
Director

You asked for a bill that would limit picketing and protests at a funeral, and requested a criminal law solution as a way to achieve this limitation. I chose to amend AS 11.61.110, to add picketing or protesting at a funeral to the offense of Disorderly Conduct. Enclosed is a draft that I believe accomplishes your request. Given the extensive constitutional issues presented by this bill, I have briefly outlined the issues that may come up if this bill is introduced. If you would like more detail, please advise, and I can provide it.

Overview

At present, in excess of 45 states have passed laws that in one way or another, are very similar to the attached draft bill. Much of the litigation involving various state funeral protest laws has been concentrated in the states that comprise the Sixth Circuit (KY., MI., OH., and TN.), and the Eighth Circuit (AR., IA., MN., MO., NE., S.D.) federal courts. An observation about this trend is that the Westboro Baptist Church, which is a party to or involved in virtually all of these cases is based in Topeka, Kansas, and engages in protest activities with more frequency in areas near the church's home town. Given the volume of litigation in the Sixth and Eighth Circuit courts, and eventually at the appellate level, I chose to draft this bill based on lessons learned in litigation in these circuits, and to base this bill on state statutes that have passed constitutional muster. However, it is important to observe, that the U. S. Supreme Court has yet to address a criminal law involving funeral picketing or protests. The recent high profile decision in *Snyder v. Phelps*, 2011 WL 709517 (U.S.), was a decision that involved civil litigation for money damages, and not a criminal law, so the decision, while instructive, does not resolve some of the issues that are unique to criminal law in the context of free speech.

Snyder v. Phelps

With that backdrop, I want to briefly address and summarize the recent decision in *Snyder v. Phelps* issued by the Supreme Court last week. Mr. Snyder sued Westboro Church leader Albert Phelps in a civil action based on the theory that picketing, and the content of that picketing by Westboro Church at his son's funeral (Snyder's son was a Lance Corporal in the United States Marine Corps, and died as a result of injuries sustained in Iraq in the line of duty), was done in a way that intentionally caused him emotional distress. Some of the slogans on the pickets that Mr. Snyder acknowledged in court proceedings that he could briefly see the tops of from his position in the motorcade to the funeral, included "Thank God for Dead Soldiers," "Fags Doom Nations," "America is Doomed," "Priests Rape Boys," and "You're Going to Hell."

The first question for the *Snyder* Court was whether the highest protection afforded speech by the First Amendment of the U. S. Constitution applied to Westboro's speech. The Court concluded, that while offensive to many, the issues raised by Westboro's picket signs were public speech entitled to the "highest rung" of protection in the hierarchy of First Amendment protections. As a consequence, the Court decided that the jury verdict for over $10 million returned at trial in the lower district court had to be set aside because the public speech of Westboro was protected by the First Amendment, and as a consequence was not actionable in a claim for money damages by Mr. Snyder.

In *Snyder*, Chief Justice Roberts, writing for the majority of the Court, observed that after the protest in 2006 by Westboro church at Mr. Snyder's son's funeral, the Maryland Legislature passed a law that prohibits picketing within 100 feet of a funeral service or procession, and noted that Westboro's picketing would have complied with that law. The Court clearly wanted to point out that its decision in *Snyder* did not address Maryland's picketing law, and that "to the extent [law's like Maryland's] are content neutral, they raise very different questions from the tort verdict at issue in [*Snyder*]." However, Chief Justice Roberts noted that the Supreme Court has, in past cases where a law was content neutral, allowed time, place, and manner restrictions and regulation of public speech. These situations were noted by the Chief Justice as picketing around a home and a buffer zone between protesters and an abortion clinic entrance. *Snyder v. Phelps*, 2011 WL 709517 p.17-18 (U.S.), *citing Frisby v. Schultz*, 487 U.S. 474, 479 (1988) (holding that a state has a significant interest in banning targeted picketing in front of private residences where individuals are captive audiences); *Madsen v. Women's Health Center, Inc.*, 512 U.S. 753, 768 (1994) (court rejected a 300 foot buffer zone around an abortion clinic as overly broad restriction, but court approved a 36 foot buffer zone around clinic entrance).

Eighth Circuit Cases

The Eighth Circuit Court of Appeals, in *Olmer v. Lincoln*, 192 F.3d 1176 (8th Cir. 1999), decided in the context of an ordinance that restricted picketing of churches and other religious premises 30 minutes before during and after a funeral service, that while the state has a significant interest in banning targeted speech in front of a person's home

where individuals are captive audiences, that churches are distinguishable, and that the state's interest regarding a church is not as great. As a consequence, the Eighth Circuit cases where funeral protest ordinances or statutes have been litigated have been found unconstitutional, because the state interest in regulating public speech has not been significant enough to justify the state-imposed time, place, and manner restrictions. So, when addressing a content neutral restriction on speech, the Eighth Circuit Court of Appeals has not found funeral protest statutes constitutional, based on the state's failure to meet the first of the three-part test that the court applied in *Olmer*: (1) does the statute regulating speech serve a significant state interest; (2) is the statute narrowly tailored; and (3) does it leave open ample alternative channels of communication.

Despite the *Olmer* decision, a recent decision by a trial court in the Eighth Circuit regarding a Nebraska state criminal statute banning funeral protests within 300 feet of a cemetery, etc., and one hour before until one hour after a funeral, was upheld as constitutional. *Phelps-Roper v. Heineman*, 720 F.Supp.2d 1090 (D. Nebraska 2010). In *Heineman*, the trial court distinguished the *Olmer* decision, finding that the Nebraska statute, which included findings articulating the state's interest in protecting families of the deceased, demonstrated a significant state interest. The trial court also held, that despite the *Olmer*, decision, that it considered grieving family members a captive audience at a funeral, who may be under stress and may suffer emotional harm under circumstances at a funeral where they are unable to avoid pickets and protests. The *Heineman* case is on appeal to the Eighth Circuit Court of Appeals. In summary, the *Heineman* court found that in the case of the content neutral Nebraska statute: (1) the state demonstrated a significant state interest in protecting family members; (2) the statute was narrowly tailored both in time restrictions (hour before until an hour after the funeral with a 300 foot buffer); and that (3) alternate means of speech to communicate Westboro's messages exist (buffer zone is limited to an hour before until an hour after funeral and protesting outside the buffer zone is not restricted in any way at any time).

Sixth Circuit Cases

For purposes of this brief summary, it is not necessary to go into too much detail regarding funeral protests case law in the Sixth Circuit. In *Phelps-Roper v. Bob Taft*, 523 F.Supp.2d 612 (N.D. Ohio 2007), the trial court judge considered an Ohio statute essentially the same as the Nebraska statute in *Heineman*, which created a "fixed" buffer zone of 300 feet[1] around a church or other place where a funeral was being held. The

[1] Most of the state funeral protest statutes I reviewed provided for a 300 foot buffer zone between protesters and funeral attendees. I would note, that while the *Heineman* court and the *Taft* court found 300 foot buffer zones narrowly tailored and allowing alternative channels for speech, other courts have found 300 foot buffer zones overly broad, burdening substantially more speech than necessary to further the government's interest. See *Phelps-Roper v. County of St. Charles*, 2011 WL 227561 (E.D. MO.). I drafted this bill consistent with a 200 foot buffer, which is more conservative than the buffer found in

Ohio statute also imposed a "floating" buffer zone of 300 feet around a funeral procession. The court found the floating buffer unconstitutional, as has every court that I am aware of that has considered the "floating" buffer zone. I would note that on appeal, the Ohio attorney general's office made the decision not to cross-appeal or litigate the part of the trial court's decision involving the floating buffer zone, so I will not address that issue further. With regard to the "fixed" buffer zone, both the trial court and the Sixth Circuit Court of Appeals found the Ohio funeral protest statute content neutral, and constitutional for essentially the same reasons that the *Heineman* trial court did in Nebraska. *Phelps-Roper v. Strickland*, 539 F.3d 356 (6th Cir. 2008).

Alaska Law and Summary of Drafting Issues

In drafting the enclosed bill amending AS 11.61.110, to add a funeral picketing and protest provision to the offenses comprising disorderly conduct in Alaska, I tried to track both the legislative finding language in Revised Statute of Nebraska § 28-1320.01 to 28-1320.03 (2008), and the language of the statute itself. By tracking the Nebraska language and legislative findings and intent, the draft bill focuses on: (1) a statute that has already been found to be content-neutral; (2) a judicial finding of a strong state interest in protecting family members of the deceased, as opposed to a broader group of funeral attendees; (3) statutory language that only restricts picketing focused on a funeral, similar to the language of the ordinance in *Frisby*, 487 U.S. at 482; and (4) a statute that has been held to allow alternative channels for communication.

In Alaska, if the proposed amendments to AS 11.61.110 are scrutinized by the courts as time, place, and manner, content neutral restrictions on speech, the state will have to demonstrate that these restrictions are narrowly tailored, supported by a significant state interest, and leave open ample alternative channels for expression. *Prentzel v. State*, 1988 WL 1511365 (Alaska App.), *quoting Clark v. Community for Creative Non-Violence*, 468 U.S. 288 (1984). As with any constitutional challenge, the outcome of litigation is always difficult to predict, based on the facts and circumstances of each case, and based on the different outcomes observed in the analysis by the Sixth and Eighth Circuit Courts of Appeal. Please review the enclosed draft, and let me know how you would like to proceed. As you requested, I am also sending a copy of this draft to Representative Thomas's office.

most state statutes, but you may wish to narrow this buffer zone, perhaps to 150 feet as was done by Congress in 18 U.S.C.S 1388 (prohibition on disruption of funerals at Arlington National Cemetery) or to 100 feet as adopted by the State of Maryland in MD. Code Ann., Criminal Law, § 10-205 (West. 2010).

Sectional CSHB 234 (STA)
"An Act relating to picketing at a funeral."

Section 1: Legislative Intent.

(a) Legislature finds that families have a protected right to mourn the deaths of relatives peacefully and they are members of a captive audience.

(b) Legislature finds that individuals have a constitutional right to free speech and that the two must be balanced to provide families a time to grieve peacefully and provide others a right to convey their message.

Sec. 2: Amended to read: Disorderly Conduct

(8) The person knowingly engages in picketing with reckless disregard that picketing occurs

(A) Inside of a cemetery, mortuary, church, or other facility or within 150 feet of the outer boundary.

(B) One hour before, during and one hour after the funeral.

Sec. 3: Amended to read: Definitions

(1) Funeral- a ceremony in connection with deceased person but does not include the procession.

(3) Picketing- means an act directed toward a funeral that disrupts or disturbs that funeral.

SENATE CONCURRENT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Introduced:
Referred:

A RESOLUTION

Suspending Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, concerning House Bill No. 234, relating to picketing or protests at a funeral.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

That under Rule 54, Uniform Rules of the Alaska State Legislature, the provisions of Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, regarding changes to the title of a bill, are suspended in consideration of House Bill No. 234, relating to picketing or protests at a funeral.

Dear Representative Thomas:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing HB 234 an act relating to picketing or protests at a funeral.

The APOA Executive Board's Legislative Committee recently reviewed this proposed legislation and decided to unanimously support this bill.

We thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organization can do to assist in the passage of this bill.

Sincerely,

John Lucking, Jr.

FISCAL NOTE #1

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 234

Analysis

HB 234 amends the crime of disorderly conduct by adding the prohibition of engaging in picketing within 150 feet of a cemetery, church, and so on and within 60 minutes of the beginning or end of the funeral.

Disorderly conduct is a class B misdemeanor with a maximum term of imprisonment of 10 days.

The estimated fiscal impact of the bill is zero. The estimate does not include costs related to any legal challenges to the legislation, if it is enacted into law.

ALASKA STATE LEGISLATURE

REPRESENTATIVE LES GARA
REPRESENTATIVE BILL THOMAS

House Bill 255
Sponsor Statement

Alaska's Ban on Texting, and Other Typing and Reading Words on Video Screens.

In December of 2011 one court ruled that Alaska's current law, which bans looking at video screens and increases the criminal penalties for injuries when they are caused by that conduct, was not worded clearly. Other courts have indicated they may rule similarly. The ruling stated that the current law did not bar texting while driving a moving vehicle.

This bi-partisan legislation reestablishes what the 2008 Legislature intended – that typing or reading messages on a video screen is covered by Alaska law as criminal conduct. It is widely recognized that texting while driving a vehicle can kill or severely injure innocent people, as well as the driver. This bill is crafted to remain consistent with the existing legislation. It exempts certain emergency uses and mapping devices, and simply adds that the law passed in 2008 banning using video screens in a moving vehicle also includes a ban on typing or reading on a computer, cell phone, or other video or computer screen in a moving vehicle. The language is written so that similar activities on social media sites will be covered, and prohibited while people are driving a vehicle.

The bill recognizes that other legislators have filed legislation on a separate subject – talking on and dialing cell phones while driving. Alaska currently has no per se ban on that activity. This bill does not address that issue at all. It leaves the debate on that subject for the bills on that subject that have been filed. The bill is simply aimed at clarifying the law passed in 2008 so that activity such as texting or reading texts is banned.

Finally, working with law enforcement and first responders, we were advised that some police and firefighters use wireless technology to receive crime or health related information. We agreed on a provision to allow emergency responders to receive information, but not respond while the vehicle is moving. The bill has received support from the Alaska Association of Chiefs of Police, Alaska Peace Officers Association, Anchorage Fire Department, and State Farm Insurance Companies.

ALASKA STATE LEGISLATURE

REPRESENTATIVE LES GARA
REPRESENTATIVE BILL THOMAS

House Bill 255
Sectional Analysis

Section 1.
Section one of the bill amends the uncodified law of Alaska by adding a new section providing for a statement of purpose by the legislature regarding the bill. In essence, the statement of purpose reflects that while the legislature is of the opinion that AS 28.35.161 currently prohibits the use of a cellular telephone, computer, personal data assistant or any other similar means for texting or communicating while driving a motor vehicle, that the purpose of the bill is to further clarify that use of these types of devices in the manner currently provided by AS 28.35.161, is prohibited conduct.

Section 2.
Section two of the bill adds the phrase "while texting, while communicating on a computer" to AS 28.35.162(a) to clarify that texting or communicating on a computer is included as prohibited conduct by the existing language of the bill." Section two of the bill also splits the offense into two prosecution theories of prohibited conduct. The first theory utilizes the existing language of the statute regarding the prohibited conduct of driving a motor vehicle while the vehicle has a television, video monitor, portable computer, or any other similar means capable of providing a visual display that is in full view of the driver in a normal driving position while the vehicle is in motion and the monitor or visual display is operating while the person is driving. The second prosecution theory added by the bill by adding a new subsection (a)(2) to AS 28.35.161, prohibits the conduct of driving a motor vehicle while the person is reading or typing a text message or other nonvoice communication on a cellular telephone, personal data assistant, computer or any other similar means capable of providing a visual display that is in view of the driver in a normal driving position while the vehicle is in motion and the person is driving.

Section 3.
Section three amends the existing language of AS 28.35.161(b) to make the existing language of this subparagraph, which restricts installation of equipment set out in either AS 28.35.161(a)(1) or 28.38.161(a)(2), consistent with the additional language added by section two of the bill.

Section 4.
This section of the bill replaces the existing use of the term 'verbal' with "voice," to clarify that this bill continues, as AS 28.35.161 does at present, to allow the conduct of for example "voice" communication on a cellular telephone or other device, as distinguished from the existing prohibited conduct as clarified by section two of the bill, which includes texting, typing a text message or reading a text message, watching television etc., while driving.

January-May: State Capitol • Juneau, AK 99801-1182 • (907) 465-2647 • Fax (907) 465-3518

Representative_Les_Gara@legis.state.ak.us

Section 5.
This section adds a new exemption for police, fire, and emergency personnel to view information on a screen device, whether installed or wireless. The exemption was crafted with input from law enforcement, and applies only to viewing information that the person reasonably believes is necessary to respond to a health, safety, or criminal matter. Current statute exempts only devices "installed" in emergency vehicles. It was brought to the attention of the bill sponsor that some police and fire departments in smaller communities do not have equipment installed in their vehicles and rely on wireless devices to receive information. This provision permits the viewing of information only, and does not allow the driver to type a response while driving. This exemption also intends to capture rapidly changing technologies, as current communication devices may not be installed in vehicles in the future.

Section 6.
Provides an immediate effective date.

RE: HB 255, An Act prohibiting the driver of a motor vehicle from reading or typing a text message or other nonvoice message or communication on a cellular telephone, computer, or personal data assistant while driving a motor vehicle

Dear Representative Gara,

The Alaska Association of Chiefs of Police, Inc. (AACOP) represents Criminal Justice executives across Alaska; from Anchorage to Annette Island, Barrow to Bethel and Kotzebue to Ketchikan. Our 120 Members direct local, state and federal criminal justice agencies. We collaborate and work together toward one goal: making our state and communities safer.

AACOP leadership recently met to evaluate the impact on public safety of pending legislation before the 27th Alaska Legislature. One of the bills evaluated was HB 255, *An Act prohibiting the driver of a motor vehicle from reading or typing a text message or other nonvoice message or communication on a cellular telephone, computer, or personal data assistant while driving a motor vehicle.* **We are writing to express our unreserved support for this bill as it is currently drafted.**

I know that in your discussions with Cordova Chief Bob Griffiths, he expressed the importance of having enough flexibility within the statute to support public safety use of mobile devices that were not physically connected to their vehicles. Many small agencies do not have computers in their cars and must rely on mobile devices for emergency communications, alerts, and computer checks. While officers are taught to stop their vehicles to use these devices, in emergency cases this may not be possible. We appreciate the Legislature recognizing this need while still addressing the overall elimination of distracted driving.

If you have need of additional testimony from any of our members as the bill proceeds through the committee process, please do not hesitate to contact us.

Respectfully,

Thomas L. Clemons

Re: State Farm Support for HB 255

Dear Representative Gara:

State Farm, the largest insurer of autos in Alaska, strongly supports HB 255, which prohibits drivers from reading or typing a text message or other non-voice message on cell phones, computers or personal data assistants. The bill clarifies this conduct is illegal in Alaska and provides for stiff penalties as a deterrent. Statistics establish without a doubt this bill will immediately begin to reduce accidents, reduce property damage, help to keep insurance costs down and most importantly save lives.

Please include this letter of support in your bill file and in all committee hearings. If we can provide you any further information or assistance, please let me know.

Sincerely,

Sheldon E. Winters
Lobbyist for State Farm Insurance Companies

LEGISBRIEF

BRIEFING PAPERS ON THE IMPORTANT ISSUES OF THE DAY

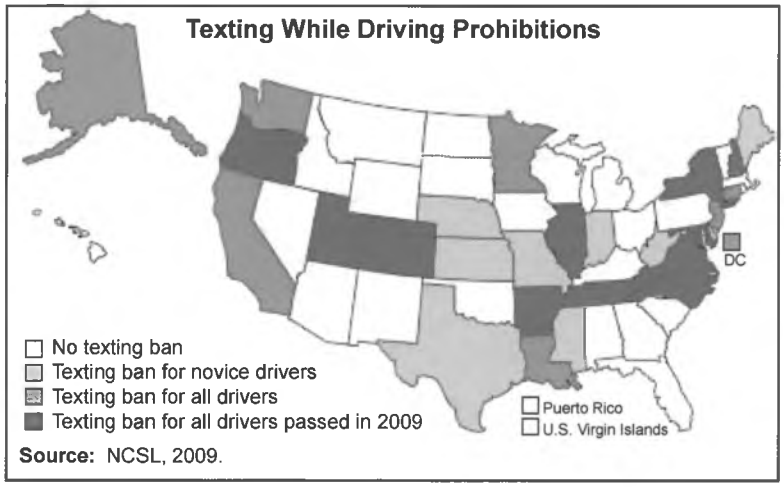
NOVEMBER-DECEMBER 2009 VOL. 17, NO. 48

Addressing Distracted Driving

By Melissa Savage

Driver inattention causes nearly 80 percent of vehicle crashes.

According to the National Highway Traffic Safety Administration, nearly 80 percent of vehicle crashes and 65 percent of near-crashes involve some form of driver inattention, often caused by tending to children in the back seat, talking with other passengers, or events happening outside the car. Talking on a cell phone and texting while driving have recently gained attention and have been the target of state legislation.



One trillion text messages were sent last year, according to the International Association for the Wireless Telecommunications Industry. That's up about 20 billion over the last three years. Many of these text messages were sent by drivers.

Only 20 states collect cell phone use information at crash scenes.

Tracking the problem can be difficult. Only 25 states collect cell phone use information at crash scenes. The National Occupant Protection Use Survey, conducted at randomly selected intersections by the U.S. Department of Transportation, found that 1 percent of observed drivers were manipulating a hand-held device, and 6 percent of observed drivers were using hand-held cell phones.

Studies using cameras and other tracking devices in personal vehicles found that drivers who send and receive text messages while driving had more than 20 times the risk of a crash or near crash than a driver who was not using a phone. Drivers who text messaged while driving took their eyes off the road for an average of 4.6 seconds during a 6-second interval; this equates to traveling the length of a football field at 55 mph without looking at the road. Talking on a cell phone while driving slightly increased the risk of a crash or near crash, but not to the same degree as text messaging.

No state completely bans phone use for all drivers.

State Action State distracted driving laws frequently are mislabeled as prohibitions on cell phones in the car. In fact, no state completely bans all phones for all drivers. Instead, state legislation usually addresses a range of issues, including particular wireless technologies and specific

National Conference of State Legislatures

Executive Director
William T. Pound

Denver
7700 East First Place
Denver, Colorado 80230

Washington, D.C. 20001
Phone (202) 624-5400

drivers. California, Connecticut, New York, New Jersey, Oregon, Washington and the District of Columbia prohibit all drivers from using hand-held phones. Other states have targeted only school bus drivers and teens. In 17 states and the District of Columbia, school bus drivers cannot use a cell phone while operating a bus; in 21 states and the District of Columbia, new drivers cannot use a cell phone while driving.

Every state has considered bills related to distracted driving.

Since 2000, legislatures in every state, the District of Columbia and Puerto Rico have considered bills related to distracted driving or, more specifically, to driver cell phone use. In 2009, legislators in 46 states considered 198 driver distraction bills. Maine's 2009 distracted driving law covers all types of distraction, not just cell phone use. The law defines "operation of a motor vehicle while distracted" as non-vehicle-operation activity by drivers; if they cannot safely operate the vehicle, they are violating the law.

The most common driver distraction measure—prohibiting texting while driving—was debated in 27 legislatures in 2009. As of September, 18 states and the District of Columbia outlaw text messaging while driving for all drivers. Eleven of those states passed laws in 2009.

Federal Action U.S. Transportation Secretary Ray LaHood convened a September 2009 summit to address the dangers of text messaging and other distractions behind the wheel. The summit, organized by the U.S. Department of Transportation's Research and Innovative Technology Administration, convened senior transportation officials; elected officials, including state legislators; safety advocates; law enforcement personnel; and academics to discuss how to combat distracted driving.

President Obama recently released Executive Order 13513, which prohibits federal employees from text messaging while driving vehicles owned, leased or rented by the federal government or privately owned vehicles on official government business. The order also prohibits federal employees from using federal government-supplied electronic equipment while driving. The Department of Transportation will propose three separate rulemakings to: 1) ban the use of cell phones and other electronic devices by rail operators; 2) restrict cell phone use and ban text messaging by truck and interstate bus operators; and 3) revoke the commercial driver's licenses of school bus drivers convicted of texting while driving.

Congress is considering a federal ban on texting while driving.

Congress also is considering a federal ban on texting while driving. Legislation introduced in both the U.S. House and Senate (H.R. 3535, S. 1536) would authorize withholding 25 percent of a state's highway funds if it fails to enact a law by a certain date to prohibit text messaging while driving. If passed, the federal legislation—Avoiding Life-Endangering and Reckless Texting by Drivers Act" (ALERT Drivers Act)—could authorize withholding a possible total of $4.4 billion from the states and the District of Columbia, based on 2009 apportionments.

A second bill (S. 1938) introduced in the U.S. Senate would create a new grant program to encourage states to enact legislation that bans texting while driving, requires drivers using a cell phone to use a hands-free device, and prohibits drivers under age 18 from using any cell phone while driving. The grant program would be funded by redirecting unused surpluses from the existing federal grant program to states for encouraging enactment of a primary seat belt law.

Kenai Judge Throws Out Texting-While-Driving Case

December 22, 2011 | By Matthew Simon | Channel 2 News

0 0 Tweet

KENAI, Alaska — A Kenai judge says the 2008 law intended to make texting-while-driving illegal is not enforceable.

The state's screen device law does not include the word "text." Lawmakers say by not mentioning texting in the part of the bill allowing people to talk on phones means it is an implied illegal action.

However, on Dec. 1 Magistrate Jennifer Wells cited the lack of the word texting as the specific reason for tossing out the case against a man charged with texting-while-driving.

"Whether the 25th Legislature did, indeed, intend the statute to prohibit texting, or whether the statute has gotten the reputation because legislators and law enforcement wish this were true, is perhaps irrelevant," Wells writes. "From the court's perspective, because A.S. 28.35.161 creates misdemeanor and felony penalties, it is particularly important that the statute be clear."

"And we all thought that included texting," says Rep. Les Gara, D-Anchorage. "We intended for that to include texting."

Advertisement

If a state appeal of Wells ruling fails, Gara plans on making a proposal.

"Probably the smartest thing to do is, and the quickest way to fix this for the legislature, is find a criminal bill that's about to pass. Add an amendment to it that clarifies that we meant for texting to be illegal while you're driving."

The amendment, Gara says, would have language specifying all typing while driving is illegal.

For Rep. Mike Doogan, D-Anchorage, that is not good enough.

"All of the evidence we have is letting people talk on the cell phone while driving is a bad idea, Doogan says.

Like the National Transportation Safety Board, Doogan wants an all out ban on drivers using cell phones. His bill, and others like it, have stalled in Juneau.

"The first time there is a four car pileup that kills a bunch of people, that bill's going to pass," Doogan says. "But do I think it's going to pass before that, not really."

Gara says he is just trying to remove politics from the process by focusing on what lawmakers intended to originally accomplish.

"We should not allow people to text while they're driving," Gara says. "That leads to death. That leads to serious injury."

Anchorage Police Spokesperson Marleen Lammers says the department has only issued 10 screen violation tickets for this year.

Department of Law lawyers disagree with the Kenai judge. According to Gara their lawyers say they still intend to continue prosecuting cases, and most state courts will continue to hear them.

House Finance Co-Chair Bill Stolze, R-Chugiak, was one of the few lawmakers who voted against this law back in 2008.

"I voted that way because the law failed to keep up with changing technology," Stolze says. "I don't know if his (Gara) proposal is well thought out because we haven't been effective at trying to define technology."

House Speaker Mike Chenault, R-Nikiski, agrees with Gara, saying the law was intended to stop texting-while-driving and should be revised if there is any lingering confusion.

"I can see that happening, if there's a question in the law," Chenault says. "Rep. Gara's solution would work."

However, when it comes to other cell phone bills stalling in the legislature, Chenault says there are already existing laws protecting drivers.

It's time to explicitly ban texting while driving in Alaska

By **Charles Ward**

6 comments »

Latest by LM 22 hours 16 min ago

A rather quirky decision by a Kenai judge last month created some wiggle room for those of us (yes, us, because I've done it too) who stupidly choose to text, email or Facebook while behind the wheel.

Fortunately, one of the first bills prefiled for consideration in the 2012 legislative session aims to tighten up any ambiguity in a law that certainly seemed on the surface to bar all kinds of silly behind-the-wheel activities, including texting.

Currently, Alaska state law prohibits driving if "the vehicle has a television, video monitor, portable computer, or any other similar means capable of providing a visual display that is in full view of a driver in a normal driving position while the vehicle is in motion; and ... the monitor or visual display is operating while the person is driving." While the law does have exemptions — 11 in fact — for screens that provide information like the car's status, GPS information and people making voice calls, texting is not given an express exemption. For most folks, texting without looking at a screen is all but impossible. Siri and other voice recognition software might change that, and perhaps there are some touch typists for tiny keyboards, but those special cases are 1) unusual and 2) don't violate the intent of the law, which is to keep drivers' eyes on the road, not on an electronic device.

Nevertheless, Magistrate Jennifer Wells ruled the law as written wasn't enough to explicitly ban texting while driving, the Associated Press reported on Dec. 25, 2011. Usually, the terms "activist judge" and "legislating from the bench" are code for "the judge ruled against my side," but here, it seems Wells is reading vagueness into the law that just isn't there. The AP reported she believed the law was vague because California wrote two separate laws, one covering distracting screens and the other banning texting. Why Wells decided to be persuaded by California's solution to a

problem Alaska's legislators answered for their own state is for her to answer. But it strikes of reaching for a different solution to a problem the Alaska Legislature had already figured out. Simply put, anyone who looks at a screen to text should have run afoul of Alaska's statute, and been subject to a citation if caught.

Regardless of whether the ambiguity is real or imagined, hopefully it will no longer exist come the Legislature's adjournment in April (May? June?). Reps. Les Gara and Bill Thomas have introduced House Bill 255, which explicitly bans texting while driving. Hopefully, it winds its way through the Legislature this term and onto Gov. Sean Parnell's desk for his signature, because texting while driving is a practice I and every other driver needs to end. It creates a great danger — not only to ourselves, but others on the road.

Distracted driving is a contributing factor in half, or 3 million, of the traffic accidents in the U.S. in a given year, according to AAA. Car and Driver magazine conducted a June 2009 test that suggested texting while driving (even just reading the texts) can be more dangerous than drunken driving. There's simply no way to keep both eyes on the road when typing on a tiny keyboard or reading a screen, and the practice needs to not just stop, but be stopped by law enforcement because of the danger created to everyone on the road, not just the texter/driver.

Many driving laws are tradeoffs between safety and convenience, otherwise we'd be required to drive 10-ton roll cages at 5 mph down Egan Drive after a daily inspection by a state trooper. At one extreme, the National Transportation Safety Board recently called for the outright ban of all cell phone usage while driving — talking, texting, hands-free, the works. A complete ban would be overkill and would face incredibly tough sledding in state legislatures. But a ban on texting while driving would get rid of one of the worst road distractions out there, while still leaving the convenience of mobile communication as an option. Texting while driving has been banned once in Alaska, but if it takes different wording in a new law to make the prohibition stick, it's worth the Legislature's time. Let's hope we see quick action on the Gara/Thompson bill this term.

Fairbanks Head-on Crash is Attributed to Drunken Texting

Originally printed at http://www.ktva.com/news/local/Fairbanks-Head-on-Crash-is-Attributed-to-Drunken-Texting--114660904.html

By Fairbanks Daily News-Miner
January 26, 2011

FAIRBANKS - An early morning head-on collision on Phillips Field Road is being blamed on an untimely text message by a suspected drunken driver.

Roger Dean Ostbloom, 40, was reportedly sending a text message from his phone on Sunday while driving his Ford F-150 pickup westbound and drifted into the oncoming lane of traffic. Ostbloom looked up and realized he was about to collide with a Chevy Avalanche.

Fairbanks Police arrived at 12:29 a.m. to find both vehicles with severe front-end damage.

Adam Strom, the driver of the Avalanche, suffered a broken femur in the accident and was taken to Fairbanks Memorial Hospital for surgery.

Ostbloom told police he was texting and saw the oncoming vehicle immediately before impact. Strom said he slowed in an attempt to avoid a collision.

Ostbloom, who was not hospitalized, also smelled of alcohol and had watery eyes and slurred speech, according to charging documents. A chemical test showed he had a breath-alcohol content of 0.097, slightly more than the legal limit of 0.08.

He was charged with driving a motor vehicle with a screen device operating, a law that makes texting while driving illegal. He was also charged with felony second-degree assault and driving under the influence of alcohol.

It's been illegal to text while driving in Alaska since 2008, but texting arrests remain uncommon in Alaska. Two local people were arrested for the offense last year, but neither was involved in an accident.

Cindy Cashen, administrator for the Alaska Highway Safety Office, said studies show texting while driving is a particularly risky form of "distracted driving." Authorities, however, are rarely in a position to blame texting as the primary cause of an accident.

"Unfortunately, the data doesn't show it's a very serious problem, but that's because it's very difficult to enforce," Cashen said.

Police say driver in fatal accident was texting

By KYLE HOPKINS
(12/09/11 19:37:30)

The 19-year-old charged in a fatal Anchorage hit-and-run had been texting on her iPhone when her car struck and killed a village man on Easter Sunday, police say.

"OMG OMG OMG," Ashley Nichole Bashore texted to a friend shortly after the crash that knocked pedestrian Hubert Tunuchuk, 28, out of his shoes and into the intersection, according to paperwork filed Thursday by state prosecutors.

Instead of stopping or calling 911, prosecutors say, Bashore drove to a friend's house where she said her SUV had "hit a mangy Rottweiler without a collar."

Arrested Wednesday night following a months-long investigation, Bashore pleaded not guilty Thursday to three felonies: Criminally negligent homicide, leaving the scene of an accident and tampering with evidence.

The tampering charge stems from Bashore's attempt to delete text messages sent in the days after the April 24 collision, prosecutors say.

Bashore entered the courtroom in tears, attempting to hide her face with shackled hands. A bailiff warned a distraught woman in the gallery to stop trying to communicate with Bashore, who sat sobbing at the end of a line of prisoners. She pulled her prison shirt to her face, her fingernails painted a soft green.

Several of Tunuchuk's family members watched from the back of the room.

"Everybody's affected by what happened. Her family. My family. Everyone involved," said his aunt, Esther Stauffer. "I just feel so sorry for her. She's so young. If she had made the right choice when that happened, then perhaps we wouldn't be here today."

Esther's husband, Geoffrey, said he feels sorry for the 19-year-old too. But he's also angry.

"I feel like maybe she's just scared for herself. She tried to hide this and we lived the last six months not knowing if they were ever going to be able to charge the person," Geoffrey Stauffer said.

The village of Chefornak, a Yup'ik community of about 400 people in Western Alaska, sent Tunuchuk to the state vocational-technical school in Seward to study power plant operations. He was in Anchorage on April 24 with friends to celebrate Easter and planned to stay at the Stauffers' house, the couple said.

Early Sunday morning, Tunuchuk was intoxicated and walking behind two friends westbound on the Tudor Road overpass above the Seward Highway, according to a document filed by prosecutors. Had he been driving, his blood-alcohol level would have been above the legal limit, said traffic

investigator Michael Busey.

Tunuchuk was in the roadway, near the narrow sidewalk curb of the overpass, according to prosecutors. A Hyundai Sante Fe driven by Bashore approached heading eastbound, prosecutors say.

As Bashore came across the overpass, the front of the SUV struck Tunuchuk on the passenger side, prosecutors say. Tunuchuk was thrown into the intersection where the Seward Highway off-ramp meets Tudor. Busey could not say how far he traveled. At some point before or after the collision, the Sante Fe drove up onto the curb, the investigator said.

Someone called 911 at about 3:15 a.m. to report the incident, police said at the time.

Tunuchuk survived for about three hours, according to police.

"We thought at first he was going to make it. ... Unfortunately he just lost too much blood," said Geoffrey Stauffer, who along with his wife placed a cross at the scene of the crash. It's still there.

Police say Bashore fled the scene, driving to a friend's house and telling the story of hitting a dog. She smelled of marijuana following the accident, according to the police investigation. But Busey said there's no way to determine whether she was high the night of the collision.

Police had few leads at first, prosecutors said, but a piece of trim from the Sante Fe and a Crimestoppers tip soon led police to the vehicle. While Bashore is not the registered owner of the SUV, she drove it on a regular basis, Busey said.

Police seized Bashore's iPhone, finding that all texts sent before April 26, two days after the collision, had been deleted, according to prosecutors and police. A review of her phone records revealed Bashore was "likely texting immediately before or at the time of the collision," according to paperwork filed by prosecutors.

Bashore eventually told a friend that she had hit a person and did so because she was texting, according to the prosecutor's memo.

A profile for Bashore appears on exploretalent.com, a website where hopeful performers post resumes and photos. She wants to be a model and once appeared in a horror movie filmed in the Butte, the profile says. "I enjoy swimming, biking, instant messaging and texting with friends," the profile says.

An Anchorage grand jury handed up the three-count indictment of Bashore on Wednesday -- more than seven months after the hit-and-run. Busey and another traffic investigator arrested Bashore on Wednesday night at her home in West Anchorage, a police spokesman said.

Efforts to establish details of the crash, along with DNA testing, the phone seizure and review by prosecutors all contributed to the length of the investigation, Busey said.

"Putting it all together just takes time, unfortunately," he said.

Before her arrest in the hit-and-run, Bashore had no criminal record as an adult. Three months after the collision that killed Tunuchuk, she was ticketed for speeding more than 20 mph over the speed limit, court records show.

Tunuchuk was about two weeks from graduating from the power plant operations training, his aunt said. He had planned to spend a couple of months fishing in Bristol Bay before returning to the

village, she said.

Bashore's bail was set at $2,500 cash with a court-ordered third-party custodian required for release, a police spokesman said. Bashore is also forbidden from driving while on bail, he said.

Texting while driving: Legislature should clear up ambiguous law

12.27.11 - 11:50 pm
Editorial

Texting while driving is foolish.

It's dangerous.

It shows willful disregard for the safety of others.

Alaska's legislators and Gov. Sean Parnell apparently agreed on all of that when they approved a bill in 2008 outlawing texting while driving. At least, that's what they thought they were doing.

It turns out the law, according to a couple of judges, doesn't actually use the words "texting while driving." That led a Kenai judge to dismiss a case brought against a 21-year-old driver who had been charged under the law. And a judge in Fairbanks has advised magistrates to not accept cases brought under the law because of some ambiguity.

No one can possibly argue that texting while driving should be a permissible practice.

The fastest way to clear this up is for the Legislature to quickly approve clear language during its next session, which opens in January. The state is appealing the decision of the Kenai judge, but the judicial process can consume quite a bit of time before an issue is resolved. The Legislature can act quicker.

And it should.

The U.S. Centers for Disease Control and Prevention found in a 2010 study that 9 percent of U.S. drivers reported they "regularly" or "fairly often" text or email while driving. The agency also noted "Texting while driving is especially dangerous because it combines visual, manual and cognitive distractions."

The Legislature has already had the debate on this topic. There's no need to rehash the issue.

What is needed is a quick fix and some clear language so we can reduce the prevalence of texting while driving.

nation and world

Many drivers admit to behavior they say is dangerous

By Ashley Halsey III
The Washington Post

Posted: 01/06/2012 12:00:00 AM PST

WASHINGTON — American drivers once again have identified their enemy as themselves.

When quizzed in an annual survey, they have admitted they often are guilty of the very behaviors they view as a menace on the road.

Almost everyone said that drunken driving was unacceptable, and three-quarters described drunken drivers as a serious threat. Yet 14 percent of them said that within the year, they had driven with an alcohol level probably near or above the legal limit, AAA's Foundation for Traffic Safety reported.

The June survey of 3,147 people used online technology said to create a representative cross-section of the U.S. population. People were asked about their driving habits in the month, or year, preceding that.

Cellphone use and sending text messages were dangerous, 94 percent said, but more than a third said they had read texts or e-mails while driving. A quarter of them also said they had sent messages. Two-thirds said they had talked on their cellphones, and a third said they do so regularly.

"This 'Do as I say, not as I do' attitude that persists among drivers needs to change before we can experience a traffic-safety culture where safe driving is the norm," Peter Kissinger, head of the foundation, said in a statement.

The foundation said that 74 percent of drivers felt it was unacceptable to go more than 15 mph above the speed limit on a freeway, but more than half admitted they had done that.

Although

94 percent said the same excessive speeding was unacceptable on a residential street, a quarter of them admitted they had gone more than 15 mph above the limit.

Nearly all drivers said that when a traffic light turns red, people should stop if they can do so safely, but 37 percent said they had run a red light.

Falling asleep behind the wheel was identified as a serious problem by 96 percent of drivers, but a third of drivers said they had nodded off at least once.

The safety value of a seat belt has been long established, and 86 percent of drivers agreed they should be used, but almost a quarter of drivers said they had not used one at least once in the month before they were surveyed. Nineteen percent said they had failed to do so more than once.

Recent federal data showed that 32,885 people

advertisement

Print Powered By FormatDynamics

were killed in vehicle crashes in 2010, the lowest number in 60 years. The drop has been attributed to better safety features in vehicles: seat-belt improvements, safer air bags, better vehicle stabilization, advancements in highway design, and high-profile campaigns against drunken and distracted driving.

"We are moving in the right direction when it comes to safety on our roads, but we need to do much more," Kissinger said. "Changing driver behaviors is not rocket science. It's harder."

Texting And Driving Worse Than Drinking and Driving

Published: Thursday, 25 Jun 2009 | 11:54 AM ET
By: Phil LeBeau
CNBC Reporter

Admit it.

You've done it.

You've been driving down the side street (and yes, the highway as well) when your phone, blackberry, or whatever you use to call and text with goes off.

You immediately grab it, even though you are driving in traffic and really shouldn't.

It's a dangerous and terrible habit American drivers have developed.

The folks at **Car and Driver Magazine have now documented** just dangerous it can be.

Rigging a car with a red light to alert drivers when to brake, the magazine tested how long it takes to hit the brake when sober, when legally drunk at .08, when reading and e-mail, and when sending a text. The results are scary. Driving 70 miles per hour on a deserted air strip Car and Driver editor Eddie Alterman was slower and slower reacting and braking when e-mailing and texting.

The results:

- Unimpaired: .54 seconds to brake
- Legally drunk: add 4 feet
- Reading e-mail: add 36 feet
- Sending a text: add 70 feet

When I took the test for reading e-mail or texting, I was just as slow to react. On average, it took me four times longer to hit the brake. Mike Austin at Car and Driver told me in blunt terms that I was "way worse" than the average driver.

None of this should surprise you.

Sure, the headline about texting and driving being more dangerous than drinking and driving got your attention.

Maybe that's because the American public correctly views drinking and driving as wrong. But when it comes to texting and driving, we are not as outraged.

Probably because many of us have done it and still do it (even though it's banned in 14 states).

Sadly, it will likely take more accidents and more deaths to change that attitude. There are countless stories of teens dying in accidents because the driver was texting while driving.

Unfortunately, I fear there will be more. Too many people have become too accustomed to checking e-mail or sending a text while behind the wheel, even though it's as dangerous as drinking and driving.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB255

Analysis

This bill prohibits the driver of a motor vehicle from reading or typing a text message or other nonvoice message or communication on a cellular telephone, computer, or personal data assistant while driving a motor vehicle.

The agency is not anticipating a significant impact to the current case load or fiscal cost increase with the passage of the legislation. However, the Office of Public Advocacy will monitor for a future potential fiscal impact. Therefore, at this time, the Agency submits a zero impact fiscal note.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** HB 255
2012 LEGISLATIVE SESSION

Analysis

House Bill 255 amends AS 28.35.161(a) and other statutes to specifically ban texting while driving and communicating on a computer while driving. Because the current law banning driving with a screen device operating has generally be interpreted to include by inference a ban on the behaviors specifically banned in HB 255, the court system does not anticipate any fiscal impact from the passage of this bill.

(Revised 1/17/2012 OMB)

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 255(JUD)

Analysis

Police are currently charging the conduct of texting while driving under AS 28.35.161, and the Department of Law has taken the position that the statute currently prohibits this conduct on appeal from a decision from a magistrate that current law does not prohibit this conduct. Clarifying the law would be helpful.

There should be no fiscal impact to the Department from this bill.

MEMORANDUM

Date: 21 February 2012

To: Sen. Hollis French,
Chair (S) JUD

From: Rep. Lindsey Holmes & Rep. Kurt Olson

RE: (S) JUD Scheduling Request for HB 274

We respectfully request that the Senate Judiciary committee schedule our bill, HB 274: "An Act relating to the exemption of certain acts and transactions from the provisions dealing with unfair methods of competition and unfair or deceptive acts or practices," for a hearing.

I have attached the only version of the bill, the sponsor statement, a copy of a relevant judicial order, and the fiscal note.

Please contact Rep. Holmes' aide James R. Waldo at james.waldo@legis.state.ak.us or 465.6597 if you have any questions.

Representative Lindsey Holmes

House Bill 274 Sponsor Statement

An Act relating to the exemption of certain acts and transactions from the provisions dealing with unfair methods of competition and unfair or deceptive acts or practices.

In 2010, the Department of Law filed suit against two pharmaceutical companies for committing violations of Alaska's Consumer Protection Act ("CPA") for engaging in misleading and deceptive marketing practices. The complaint alleges that Janssen Pharmaceutical Company and Astra Zenica Pharmaceuticals mislead and deceived doctors and others by promoting the antipsychotic drugs Risperdal and Seroques for uses not approved by the federal Food and Drug Administration ("FDA"). In many cases Alaska's Medicaid program paid for these off-label prescriptions.

In October of 2012, the federal court ruled that Alaska's Consumer Protection Act may not apply to the state's claims because the FDA regulates drug labeling. The court relied on AS 45.50.481 which exempts any act or transaction regulated by state or federal law from the CPA. Thus, even though the Food, Drug, and Cosmetic Act does not preempt state law, the court is concerned that AS 45.50.481 may prevent the state from pursuing these claims under the CPA. Although the state strongly disagrees with the court, and has argued against the court's reasoning, the court has suggested very strongly that the state's claims are exempt from the CPA. This creates a potential inadvertent loophole when federal laws may regulate conduct, but do not explicitly preempt state law.

Such a loophole could lead to situations, like the case of off-label prescriptions, where the federal government has a law regulating conduct but does not actually enforce the law to protect consumers. The state takes the position that when no effective enforcement by the federal agencies is taken, then these laws do not effectively "prohibit" the bad conduct, and the state should be allowed to bring CPA claims, even under the existing statute. However, to make the state's intention in AS 45.50.481 crystal clear, the legislature should take action.

House Bill 274 closes this potential loophole by removing the reference to federal law in AS 45.50.481. In cases where federal law preempts state law, the State will still be prevented from pursuing claims. This will, however, ensure the State's ability to defend Alaskan consumers where the federal government is not doing so.

Please join me in supporting HB 274 so that the State of Alaska can more effectively protect Alaskan consumers.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 274

Analysis

HB 274 amends Alaska's Consumer Protection Act ("CPA") by removing the exemption for conduct regulated and prohibited by federal law. Currently, the CPA does not apply to any conduct that is regulated and prohibited by state or federal law. The State of Alaska can control enforcement of state law, but is powerless to control the enforcement by federal regulators. Thus, the state cannot take enforcement action against a CPA violator if the conduct is "regulated" and "prohibited" under any federal statute or regulation, even if that conduct is not preempted by federal law. This bill would remove the exemption for conduct regulated by federal law, and would allow the state to pursue CPA violations as long as the conduct is not (1) regulated and prohibited by state law, or (2) preempted by federal law.

We anticipate no fiscal impact to the Department of Law from this bill.

IN THE UNITED STATES DISTRICT COURT

FOR THE DISTRICT OF ALASKA

STATE OF ALASKA, Plaintiff, vs. JANSSEN ORTHO LLC; ORTHO-MCNEIL-JANSSEN PHARMACEUTICALS INC.; and ASTRAZENECA PHARMACEUTICALS LP, Defendant.	Case No. 3:11-cv-0002-RRB **ORDER REGARDING DEFENDANTS' MOTION TO DISMISS, DISMISSING PLAINTIFF'S STRICT LIABILITY CLAIM, and REQUESTING FURTHER BRIEFING REGARDING THE SAFE HARBOR PROVISION**

I. INTRODUCTION

Defendants jointly move to dismiss both counts in the Amended Complaint pursuant to Federal Rule of Civil Procedure 12(b)(6) and the U.S. Supreme Court decisions in Bell Atlantic Corp. v. Twombly, 550 U.S. 544 (2007), and Ashcroft v. Iqbal, 556 U.S. 662, 129 S. Ct. 1937 (2009), arguing that Plaintiff has not alleged, and cannot allege, facts necessary to establish the claims against either Defendant. Moreover, they argue that Plaintiff's fraud-based claims fail because they are not alleged with the particularity required by Federal Rule of Civil Procedure 9(b).

Plaintiff has opposed the Motion to Dismiss, and Defendant has replied. This matter having been fully and adequately briefed, the

Court does not find that oral argument would be helpful at this time.

II. STANDARD OF REVIEW

A motion under Rule 12(b)(6) may be granted "only if it is clear that no relief could be granted under any set of facts that could be proven consistent with the allegations." In deciding this motion, not only must the Court accept all material allegations in the Complaint as true, but the Complaint must be construed, and all doubts resolved, in the light most favorable to the Plaintiff.

The United States Supreme court has recently and specifically addressed the pleading requirements in a civil action:

> Under Federal Rule of Civil Procedure 8(a)(2), a pleading must contain a "short and plain statement of the claim showing that the pleader is entitled to relief." As the Court held in Twombly, . . . the pleading standard Rule 8 announces does not require "detailed factual allegations," but it demands more than an unadorned, the-defendant-unlawfully-harmed-me accusation. . . . . A pleading that offers "labels and conclusions" or "a formulaic recitation of the elements of a cause of action will not do." . . . .
>
> To survive a motion to dismiss, a complaint must contain sufficient **factual matter**, accepted as true, to "state a claim to relief that is plausible on its face." . . . A claim has facial plausibility when the plaintiff pleads factual content that allows the court to draw the reasonable inference that the defendant is liable for the misconduct alleged. . . .
>
> Two working principles underlie our decision in Twombly. First, the tenet that a court must accept as true all of the allegations contained in a complaint is inapplicable to legal conclusions. **Threadbare recitals of**

> **the elements of a cause of action, supported by mere conclusory statements, do not suffice**. . . . Second, only a complaint that states a plausible claim for relief survives a motion to dismiss. . . . Determining whether a complaint states a plausible claim for relief will . . . be a context-specific task that requires the reviewing court to draw on its judicial experience and common sense. . . .[1]

Under Federal Rule of Civil Procedure 9(b), a claim for fraud must be pled with particularity, specifying "the who, what, when, where, and how" of the fraud.[2] Where a complaint asserts claims that are "grounded in fraud" or which "sound in fraud . . . the pleading as a whole must satisfy the particularity requirement of Rule 9(b)."[3] The parties disagree as to whether the Alaska UTPA claims alleging intentional misconduct must satisfy Rule 9(b).

III. FACTS

This lawsuit involves two prescription medicines approved by the U.S. Food and Drug Administration ("FDA"): Seroquel®, marketed and sold by AstraZeneca, and Risperdal®, marketed and sold by Janssen. Both medications are approved by the FDA for the treatment

---

[2] See Kearns v. Ford Motor Co., 567 F.3d 1120, 1124 (9th Cir. 2009).

[3] Id.

of certain mental health conditions.[4] Plaintiff, the State of Alaska, has filed a two-count Amended Complaint against the Defendants - one count alleging violations of the Alaska Unfair Trade Practices and Consumer Protection Act ("UTPA"), AS 45.50.471, and the other captioned "Strict Liability - Failure To Warn." Plaintiff seeks: (1) damages for the value of all payments that Alaska allegedly expended through its Medicaid program for purchasing defendants' medicines for indications that were not "medically accepted" ("reimbursement costs"); (2) injunctive relief; (3) penalties of $25,000 for each separate violation of the Alaska UTPA; and (4) treble damages, punitive damages, interest, and costs and attorneys' fees.

The Complaint describes methods by which Defendants wrongfully marketed their drugs. These include allegedly deceiving physicians and consumers "regarding the comparative safety, efficacy, and superiority of Risperdal and Seroquel over traditional or other atypical antipsychotics . . . aggressive market[ing] and promot[ing] Risperdal and Seroquel for indications that are not approved by the FDA and for which the efficacy and safety of the drugs have never been established."[5]

---

[4] See Docket 49 at ¶ 13.

[5] See Docket 49, ¶¶ 14- 23.

IV. DISCUSSION

A. The Requirements Of Iqbal/Twombly and Rule 9(b)

Defendants argue that the Amended Complaint contains only conclusory allegations that Defendants have "engaged in false and misleading marketing, advertising and sales campaigns," and is otherwise entirely devoid of facts amounting to fraud or deception, and therefore has failed to allege necessary facts under Twombly/Iqbal, and falls short of the specificity required by Rule 9(b).

1. Twombly/Iqbal

Plaintiff argues it is only required to provide "a short and plain statement of the claim" for relief under Fed. R. Civ. P. 8(a)(2), noting that in 2002, the Supreme Court reaffirmed the principle that "Rule 8(a)'s simplified pleading standard applies to all civil actions, with limited exceptions."[6] Plaintiff argues that Twombly and Iqbal do not require a departure from Rule 8(a)'s established requirements. Rather, the Supreme Court clarified the Rule 8(a) standard, stating that a complaint must contain "only enough facts to state a claim to relief that is plausible on its face."[7]

---

[6] Swierkiewicz v. Sorema NA., 534 U.S. 506, 513 (2002).

[7] Twombly, 550 U.S. at 570; see also Iqbal, 129 S. Ct. 1937 (continued...)

The Ninth Circuit recently juxtaposed Swierkiewicz, Twombly, Iqbal, and two other Supreme Court cases that addressed Rule 8(a), and concluded that although the cases are "perplexing" when considered together, there are two common principles shared by all of them:

> First, to be entitled to the presumption of truth, allegations in a complaint or counterclaim **may not simply recite the elements of a cause of action**, but must contain sufficient allegations of underlying facts to give fair notice and to enable the opposing party to defend itself effectively. Second, the factual allegations that are taken as true must plausibly suggest an entitlement to relief, such that it is not unfair to require the opposing party to be subjected to the expense of discovery and continued litigation.[8]

Here, the Court agrees with Defendants that the Complaint lacks facts adequate to meet this standard. Generalized statements such as "the companies have engaged in false and misleading marketing, advertising and sales campaigns" and have "successfully deceived Alaskan physicians and Alaskan consumers," are inadequate. Use of the words "representing," "advertising," "engaging," "concealing," "suppressing," and "omitting" - without allegations of underlying facts which the Court can presume are true for

---

[7](...continued)
(extending the standard articulated in Twombly to "all civil actions and proceedings in the United States district courts.")

[8] Star v. Baca, 652 F.3d 1202, 1216 (9th Cir. 2011) (emphasis added).

purposes of considering a motion to dismiss - are inadequate under Iqbal/Twombly.

2. Rule 9(b)

While Fed. R. Civ. P. 8(a)(2) requires a party's pleading to contain "a short and plain statement of the claim showing that the pleader is entitled to relief," Fed. R. Civ. P. 9(b) requires that, when fraud is alleged, "a party must state with particularity the circumstances constituting fraud...." A plaintiff may allege a unified course of fraudulent conduct and rely entirely on that course of conduct as the basis of that claim. In that event, the claim is said to be "grounded in fraud" or to "sound in fraud," and the pleading, as a whole, must satisfy the particularity requirement of Rule 9(b).[9] "Fraud can be averred by specifically alleging fraud, or by alleging facts that necessarily constitute fraud (even if the word 'fraud' is not used)."[10] "Averments of fraud must be accompanied by the who, what, when, where, and how of the misconduct charged."[11]

Where fraud is not an essential element of a claim, only those allegations of a complaint which aver fraud are subject to Rule

---

[9] Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1103-04 (9th Cir. 2003).

[11] Id. at 1106.

9(b)'s heightened pleading standard.[12] Any averments which do not meet that standard should be "disregarded," or "stripped" from the claim for failure to satisfy Rule 9(b).[13] To the extent a party does not aver fraud, the party's allegations need only satisfy the requirements of Rule 8(a)(2).[14]

Rule 9(b)'s particularity requirement also applies to state law causes of action.[15] A state law statutory cause of action pled in federal court must satisfy Rule 9(b) when fraud is a "necessary element" of the claim under that statute or when the claim is "grounded in fraud" because it relies exclusively on a "unified course of fraudulent conduct."[16] Defendants assert that the Complaint must meet Rule 9(b)'s heightened pleading requirements because Plaintiff's claims are grounded in fraud. Plaintiff disagrees.

In order to determine whether a particular claim or allegation is tantamount to fraud, the Ninth Circuit refers to the elements of

[16] Id. at 1103.

a state common law fraud claim.[17] In Alaska, common law fraud claims require a showing of (1) a false representation of fact; (2) knowledge of the falsity of the representation; (3) intention to induce reliance; (4) justifiable reliance; and (5) damages.[18] A review of the Alaska UTPA reveals that fraud is addressed specifically in AS 45.50.471(b)(1) and (12). The State makes claims under sections (b)(4), (6), (8), (11) and (12). Section (8) refers to intentional conduct, while sections (4), (6) and (11) could conceivably apply to both intentional and negligent conduct. The Amended Complaint suggests that Defendants routinely violated the UTPA by engaging in deceptive trade practices that involved "knowing and intentionally" engaging in certain activities.[19] While the Complaint may not be grounded in fraud, it bears a strong suggestion of averring fraud.

The Court finds that Plaintiff has failed to meet the requisite pleading standard under Twombly and Iqbal. Plaintiff requests leave to amend its Complaint. Courts are free to grant a party leave to amend whenever "justice so requires," Fed. R. Civ.

---

[17] See Kearns v. Ford Motor Co., 567 F.3d 1120, 1127 (9th Cir. 2009).

[18] Shehata v. Salvation Army, 225 P.3d 1106, 1114 (Alaska 2010).

[19] Docket 49 at 10-11.

P. 15(a)(2), and requests for leave should be granted with "extreme liberality."[20]

Accordingly, Plaintiff shall be given leave to amend its Complaint to comply with the standard set by Twombly and Iqbal. In so doing, Plaintiff is cautioned to consider the requirements of Fed. R. Civ. P. 9(b) with regard to fraud. Any fraud claims which do not meet the requirements of Rule 9(b) will be subject to dismissal.

B. Motion to Dismiss under Rule 12(b)(6) for Failure Establish Causation

Under Federal Medicaid law, states may implement a Medicaid program, and Alaska has chosen to do so.[21] Alaska's Medicaid program provides medical assistance, including a prescription drug program, to low-income state residents. Alaska's Department of Health and Human Services has created a Preferred Drug List ("PDL"), which informs consumers and providers about those medicines - the "Preferred Drugs" - for which Alaska Medicaid will provide reimbursement without restriction.[22] Seroquel and risperidone are listed as Preferred Drugs.

---

[20] Owens v. Kaiser Found. Health Plan, Inc., 244 F.3d 708, 712 (9th Cir. 2001).

[21] See 42 U.S.C. §§ 1396-1-1396w-5.

[22] See 7 AAC 120.140.

Defendants argue that because Risperdal and Seroquel are on Alaska's PDL, and because Alaska continues to reimburse for non-medically accepted indications of Risperdal and Seroquel, Alaska cannot establish causation. But Plaintiff argues that its allegations are focused on the fact that, as a direct result of Defendants' actions, Alaska Medicaid has paid for prescriptions issued for indications that were non-medically accepted, FDA-approved, or supported by the compendia. It argues that Alaska Medicaid has paid tens of millions of dollars for prescriptions of Risperdal and Seroquel because "Janssen and AstraZeneca aggressively marketed and promoted Risperdal and Seroquel for indications that are not approved by the FDA and for which the efficacy and safety of the drugs have never been established." Plaintiff argues that "but for" Defendants' unlawful conduct, Alaska would not have reimbursed for Defendants' defective drugs because the prescriptions would never have been issued.

Defendants also argue that Plaintiff cannot establish "but for" causation because Alaska continues to reimburse for non-medically accepted indications. The State argues that it simply does not have a system in place to effectively monitor each and every prescription that is reimbursed. Furthermore, Defendants' proximate causation argument is based on the theory that Alaska physicians' independent medical judgment regarding whether to

prescribe Risperdal or Seroquel to a particular patient is the intervening cause that relieves Defendants from liability. Alaska notes that this argument has been squarely rejected at the pleading stage in similar cases.[23]

The Court is not persuaded that Plaintiff cannot show causation. Although Defendants argue that the lack of restrictions on reimbursement for Seroquel and Risperdal under the Alaska Medicaid program eliminates a causal connection between Defendants' supposed actions and the State's alleged harm, the possibility remains that the State could prove that but for Defendants' actions, a number of prescriptions for Seroquel and Risperdal would never have been issued in Alaska.[24] The Court further notes that the rationale of the Eleventh Circuit in the Ironworkers case is inapplicable here. In Ironworkers, the 11th Circuit reasoned that:

> The insurers, under the terms of the insurance policies, consciously exposed themselves to pay for all prescriptions of Seroquel, including those that were medically unnecessary or inappropriate-even if such prescription were birthed by fraud. In light of such broad exposure, conventionally a rational insurer would have charged its enrollees higher premiums than it would have if its policies offered more limited prescription drug coverage. These higher premiums, in turn, would compensate the insurer for this increased number of prescription payments, including payments for

---

[23] See Docket 69 at 16.

[24] Whether or not that number is ultimately quantifiable is another issue entirely.

> prescriptions that were medically unnecessary or inappropriate. . . . [C]onsequently, the district court had to dismiss their claims because they failed to allege plausibly that Astrazeneca's false representations caused them to suffer economic injury.[25]

But Alaska Medicaid does not collect premiums, and adults are responsible for a $2.00 co-payment for each new or refilled prescription.[26] Accordingly, the pass-on argument is inapplicable here. The Motion to Dismiss on these grounds is denied.

C. Plaintiff's UTPA Claim & The "Safe Harbor" Provision

Defendants argue that the claims under the UTPA are barred because they fall within the UTPA's "safe harbor" provision. Alaska Statute 45.50.481(a)(1) exempts unfair acts and practices from the purview of the UTPA "where the business is both regulated elsewhere and the unfair acts and practices are therein prohibited."[27] The State argues that because its UTPA claims satisfy neither of these two requirements, Defendants' argument necessarily fails. In contrast, Defendants argue that allegations of unlawful off-label marketing are addressed and remedied, if

---

necessary, by the FDA, acting within its comprehensive regulatory and enforcement scheme, and not by the states or private litigants. Defendants argue that the purported practices at issue here are expressly prohibited by the FDCA and FDA regulations, and note that other courts have found these types of claims are barred by the safe harbor provision.[28] This Court, however, notes that not all "safe harbor" provisions are created equally. Accordingly, decisions from other jurisdictions are not particularly helpful in this analysis.

1. Is the Conduct "Regulated Elsewhere"?

The State complains that Defendants carried out their misconduct by marketing Risperdal and Seroquel to Alaska physicians for the treatment of various conditions or symptoms which have not received FDA-approval. It is unlawful, under Alaska law, for Defendants to market their drugs for such indications. The State argues that Defendants have not shown, nor can they, that the FDA regulates the content of the communications from Defendants' sales representatives to Alaska physicians.

---

[28] See, e.g., State of New Mexico v. AstraZeneca and State of New Mexico v. Janssen, LP, Nos. D-101-cv-2009-00652 and D-101-cv-2008-01144, Tr. at 73-76 (N.M. First Judicial Ct. July 22, 2011); McDaniel v. AstraZeneca, No. CV-2008-5448, Tr. at 28-29 (Ark. Cir. Ct. July 18, 2011); McDaniel v. AstraZeneca, No. CV-2008-544 (Ark. Cir. Ct. July 21, 2011). Defendant has provided the Court with copies of these opinions.

In response, Defendants allege that the Federal Food Drug and Cosmetic Act ("FDCA"),[29] and the FDA's regulations promulgated thereunder, expressly apply to such interactions, and heavily regulate this conduct.[30] FDA regulations provide that advertising of an FDA-approved prescription drug must be "consistent with and not contrary to" the drug's FDA approved labeling.[31] They further argue that any promotional material distributed by sales representatives constitutes "labeling" and its content is extensively regulated under the FDCA.[32]

---

[29] 21 U.S.C. §§ 301-399(d).

[30] See 21 C.F.R. § 314.81(b)(3)(i) (requiring an applicant to "submit [to the FDA] specimens of mailing pieces and any other labeling or advertising devised for promotion of the drug product at the time of initial dissemination of the labeling and at the time of initial publication of the advertisement for a prescription drug product").

[31] See 21 C.F.R. § 201.100(d)(1) ("Any labeling . . . whether or not it is on or within a package from which the drug is to be dispensed, distributed by or on behalf of the manufacturer . . . [must be] consistent with and not contrary to such approved or permitted labeling."); Professional Product Labeling, Public Meeting, 60 Fed. Reg. 52,196-02 (Oct. 5, 1995) (a drug's approved labeling "serves as the basis for product promotion. FDA regulations specify that all advertising claims made about a product be consistent with its approved labeling (21 C.F.R. § 202.1(e)(4))").

[32] See 21 C.F.R. § 202.1(l)(2) (stating that labeling includes, inter alia, "[b]rochures, booklets, mailing pieces, detailing pieces, file cards, bulletins, calendars, price lists, catalogs . . . letters . . . film strips . . . sound recordings, exhibits, literature, and reprints and similar pieces of printed,

(continued...)

Assuming that Defendants' conduct is regulated by the FDA, the Court turns to the second prong.

2. Does the Regulation Prohibit the Unfair Acts and Practices Alleged?

The State alleges that Defendants have failed to identify a single statute—other than the UTPA—prohibiting Defendants, through their sales representatives or otherwise, from making false statements or misrepresentations to Alaska physicians. To the contrary, Defendants argue, the FDCA prohibits manufacturers from "misbranding" a drug by including a description in the labeling, promoting, or advertising of an intended use of that drug that has not been approved by the FDA.[33] The FDCA also prohibits manufacturers from advertising or promoting a drug in a manner that is inconsistent with the drug's approved labeling.[34] The FDCA prohibits a manufacturer from distributing any promotional labeling or advertising to healthcare professionals or to consumers that is false or misleading, or lacking in fair balance. Accordingly, the

---

[32](...continued)
audio,or visual matter descriptive of a drug and references published . . . for use by medical practitioners, pharmacists, or nurses, containing drug information supplied by the manufacturer, packer, or distributor of the drug and which are disseminated by or on behalf of its manufacturer, packer, or distributor . . . .").

[33] See 21 U.S.C. § 331(a).

[34] See 21 C.F.R. § 201.100(d)(1).

FDCA and its regulations clearly prohibit any alleged promotion that is inconsistent with a drug's approved labeling or that is false or misleading, and Alaska may not use the UTPA to create a private right of action to enforce the FDCA.[35]

Certainly, Defendants have made a strong case that their actions fall under the safe harbor provision of the Alaska UTPA.

3. Certification to the Alaska Supreme Court

Plaintiff complains that a finding that Defendants' actions fall under the safe harbor provision would render the UTPA superfluous and leave the State without a remedy. This is so because the FDCA does not provide a private right of action under federal law for the claims asserted in Count I of the Complaint. Consequently, Plaintiff argues, if the Court were to find Alaska's UTPA claims exempted, the end result is a finding that the UTPA's safe harbor provision provides Defendants with complete preemption, and thus complete immunity – something that is neither required by federal law nor intended by the Alaska legislature. In that event, Plaintiff requests that this Court certify this issue to the Alaska Supreme Court for a final determination of whether Alaska's UTPA claims are exempted under section 45.50.481 – that is, whether

---

[35] See 21 U.S.C. § 337(a) ("[A]ll such proceedings for enforcement, or to restrain violations, of [the FDCA] shall be by and in the name of the United States.")

Defendants' alleged unfair acts and practices are regulated elsewhere and therein prohibited.

However, regardless of the intent of the Alaska legislature, or the patent unfairness of leaving the State without a remedy, this Court concludes that the Alaska Supreme Court is in no better position than this Court to determine whether Defendants' "business is both regulated elsewhere and the unfair acts and practices are therein prohibited."[36] Indeed, the question appears to turn on the interpretation of Federal law as much, or more, than Alaska law.

Furthermore, this Court is troubled by the Alaska Supreme Court's holding that Alaska Statute 45.50.481(a)(1) "exempts only those acts or transactions **which are the subject of ongoing, careful regulation.**"[37] The Alaska Supreme Court found in Matanuska Maid that to define "regulate" as merely "subject to any prohibitory law" would severely limit the applicability of the UTPA.[38] In other words, a prohibition on certain conduct, without more, cannot satisfy the requirements of AS 45.50.481. The question remains, therefore, whether the existing regulatory scheme

---

[37] Matanuska Maid, Inc. v. Alaska, 620 P.2d 182, 186 (Alaska. 1980) (emphasis added).

[38] Id.

governing Defendants' actions actually has any teeth. Further briefing on this issue appears warranted.

D. Plaintiff's Strict Liability Failure To Warn Claim

Defendants also urge the Court to dismiss Alaska's strict liability claim. Defendants assert two grounds for dismissal: (1) Alaska lacks standing to assert the claim; and (2) Alaska's strict liability claim is barred by the economic loss rule.

Regarding the economic loss rule, Defendants argue that Plaintiff's strict liability claim fails because there is no plausible nexus between the alleged failure to warn and Plaintiff's alleged damages, as required under Alaska's intermediate approach to the economic loss rule. As noted by the Alaska Supreme Court, "if the dangerous defect did not cause the loss, the seller of a dangerously defective product can avoid a strict liability claim."[39] Defendants seem to argue, therefore, that Alaska's strict liability claim is barred by the economic loss rule because the State's alleged damages are not tied to any physical injury or harm.

Plaintiff argues that no such requirement exists. Instead, "[w]hen a defective product creates a situation potentially dangerous to persons or other property, and loss occurs as a result of that danger, strict liability is an appropriate theory of

---

[39] N. Power & Eng'g v. Caterpillar Tractor Co., 623 P.2d 324, 330 n.10 (Alaska 1981).

recovery[.]"[40] Plaintiff argues that "[w]hen used off-label, Defendants' drugs can and do have serious side effects." Thus, when Alaska physicians prescribe Risperdal and Seroquel for indications not approved by the FDA, the products create a situation potentially dangerous to persons – here, Alaska Medicaid subscribers. The Complaint specifically pleads that Defendants' drugs have created a situation dangerous to Alaska consumers.[41] Accordingly, Plaintiff argues, the required loss occurred when Alaska Medicaid provided reimbursement for non-medically accepted indications of Risperdal and Seroquel—a loss Alaska would not have incurred absent Defendants' illegal off-label marketing of their drugs. Thus, the loss occurred as a result of the danger manufactured by Defendants.

In response, Defendants note that Plaintiff nowhere alleges that any individuals suffered the supposed side effects. Furthermore, the State consistently alleges that its damages claim derives from "Defendants illegal off label marketing of their

---

[40] Pratt & Whitney Canada, Inc. v. Sheehan, 852 P.2d 1173, 1177 (Alaska 1993).

[41] See Docket 49 at ¶ 12 ("Janssen and AstraZeneca knew or should have known but failed to warn—and affirmatively misled—Alaska, Alaskan physicians, and Alaskan consumers regarding Risperdal's and Seroquel's association with the development of diabetes, diabetes-related conditions, including weight gain, and other serious, even life threatening medical conditions.").

drugs," not from a failure to disclose side effects. Because the State's alleged loss did not result from the alleged defective condition, Defendants argue, the failure to warn claim should be dismissed.

The Court agrees with Defendants on this issue, and finds support even in the Alaska Supreme Court case cited by the State. In Pratt & Whitney, The Alaska Supreme Court summarized the history of strict liability law in Alaska, and the evolution of the law as it applies to purely economic losses.[42] The application of strict liability originally applied only to those cases where injury to a human being resulted from a defective product.[43] Eventually, the law evolved to include recovery for injury solely to the product itself.[44] "When a defective product creates a situation potentially dangerous to persons or other property, and loss occurs as a result of that danger, strict liability in tort is an appropriate theory of recovery, even though the damage is confined to the product itself."[45] Furthermore, "the requirement that the loss occur under

---

[42] Id. at 1176-78.

[43] Id. at 1176, citing Clary v. Fifth Avenue Chrysler Center, 454 P.2d 244 (Alaska 1969).

[45] Id., citing Northern Power.

dangerous circumstances is necessary because . . . allowing recovery solely on proof that a defect *could* endanger persons or property is too speculative."[46]

Plaintiff asks this Court to take the Alaska Supreme Court's guidance regarding strict liability to an unprecedented level, and allow a claim for strict liability to lie where the losses are purely economic, and no physical harm has occurred. The "loss" contemplated by the Alaska Supreme Court simply did not include the type of economic losses Plaintiff claims here.[47] Having so concluded, the Court does not reach Defendants' standing argument.

Plaintiff's claim for strict liability is accordingly **DISMISSED.**

V. CONCLUSION

In light of the foregoing, the Court **DENIES** Defendants' Motion to Dismiss with respect to the arguments discussed in sections A and B of this Order. Plaintiff may be permitted to amend its

---

[46] Id., citing Northern Power, 623 P.2d at 329 n. 11 (emphasis original).

[47] The Court is not persuaded by the State's argument that it should follow Judge Ridner's findings in the Zyprexa litigation in Alaska Superior Court. Judge Ridner found that the economic loss rule allowed a claim for strict liability in the Zyprexa litigation. However, Judge Ridner specifically relied on the fact that physical injuries to persons were alleged. No physical injuries have been alleged in this case.

Complaint pending resolution of the Safe Harbor argument (Section C).

The Court **GRANTS** Defendants' Motion to Dismiss Plaintiff's claim regarding Strict Liability (Section D).

With respect to the Safe Harbor Provision argument (Section C), further briefing is required. Plaintiff shall file a Sur-Reply to Defendants' Reply regarding this issue on or before **November 21, 2011**. Defendants shall file additional responsive briefing on or before **December 5, 2011**. All parties should address what enforcement, if any, exists as to the applicable Federal regulations.

Upon receipt of the further briefing, this Court will issue a further order regarding the Motion to Dismiss. If the matter is not completely dismissed, the Court will at that time set a deadline for the filing of Plaintiff's Second Amended Complaint.

IT IS SO ORDERED.

ENTERED this 31st day of October, 2011.

MEMORANDUM February 8, 2012

SUBJECT: HB 291, relating to the posting of notices at U.S. Post Offices (Work Order No. 27-LS1074\A)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee

FROM: Pamela Finley
Revisor of Statutes

HB 291 has been referred to the Senate Judiciary Committee. I would appreciate your scheduling the bill for a hearing at your earliest convenience.

The bill amends four statutes to delete a requirement that certain public notices be posted at a post office. The reason for this is that, since at least August 2007, the U.S. Postal Service has prohibited the posting of nongovernmental notices on postal service property. See enclosed postal service bulletin. The statutes amended are AS 03.35.030 (petitions concerning controlled livestock districts), AS 34.35.175(d) (personal property lien sales), AS 34.45.050(b) (consignee and bailee lien sales), and AS 43.20.270(d) (tax lien sales). It is offered as a special revisor's bill --- rather than part of the regular revisor's bill --- because there are different ways to fix the problem, which involve different policy choices. The bill as drafted simply deletes the requirement that a notice be posted at the post office. In this respect, it follows section 1, ch. 62, SLA 2010, which deleted the requirement from AS 09.35.140 (concerning sales on execution).

If you have any questions, please contact me (465-6656).

Enclosure

Rules and Regulations Governing Conduct on Postal Service Property

Applicability

These rules and regulations apply to all real property under the charge and control of the U.S. Postal Service®, to all tenant agencies, and to all persons entering in or on such property. These rules and regulations must be kept posted at a conspicuous place on all such property. These rules and regulations shall not apply to:

a. Any portions of real property, owned or leased by the Postal Service™, that are leased or subleased by the Postal Service to private tenants for their exclusive use.

b. With respect to restrictions on soliciting, electioneering, collecting debts, vending, and advertising on sidewalks along the street frontage of Postal Service property falling within the property lines of the Postal Service that are not physically distinguishable from adjacent municipal or other public sidewalks and any paved areas adjacent to such sidewalks that are not physically distinguishable from such sidewalks.

Recording Presence

Except as otherwise ordered, properties must be closed to the public after normal business hours. Properties also may be closed to the public in emergency situations and at such times as may be necessary for the orderly conduct of business. Admission to properties when closed to the public may be limited to authorized individuals who may be required to sign the register and display identification when requested by Security Force personnel or other authorized individuals.

General Restrictions

Preservation of Property

Littering, spitting, creating any hazard to persons or things, throwing articles of any kind from a building, climbing upon the roof or any part of the building, or willfully destroying, damaging, or removing any property or any part thereof is prohibited.

Conformity with Signs and Directions

All persons in and on property shall comply with official signs of a prohibitory or directory nature and with the directions of Security Force personnel or other authorized individuals.

Inspection

Purses, briefcases, and other containers brought into, while on, or being removed from the property are subject to inspection. However, items brought directly to a Postal Service facility's customer mailing acceptance area and deposited in the mail are not subject to inspection, except as provided by the *Administrative Support Manual*, part 274. A person arrested for violation of this part may be searched incident to the arrest. Vehicles and their contents brought into, while on, or being removed from restricted nonpubiic areas are subject to inspection. Persons entering these areas who object and refuse to consent to the inspection of the vehicle, its contents, or both may be denied entry. After entering the area without objection, consent to inspection shall be implied. A full search of the person and the vehicle driven or occupied by that person may accompany an arrest.

Specific Restrictions

Disturbances

Disorderly conduct, or conduct that creates loud and unusual noise or obstructs the usual use of entrances, foyers, corridors, offices, elevators, stairways, and parking lots, or that otherwise tends to impede or disturb the public employees in the performance of their duties or otherwise impedes or disturbs the general public in transacting business or obtaining the services provided on Postal Service property is prohibited.

Gambling

Participating in games for money or other personal property, the operation of gambling devices, the conduct of a lottery or pool, or the selling or purchasing of lottery tickets is prohibited on postal premises. This does not apply to state lottery tickets at vending facilities operated by licensed blind persons where such lotteries are authorized by state law.

Alcoholic Beverages, Drugs, and Smoking

Anyone under the influence of alcohol or any drug that has been defined as a "controlled substance" may not enter Postal Service property or operate a motor vehicle on Postal Service property. The possession, sale, or use of any "controlled substance" (except when permitted by law) or the sale or use of any alcoholic beverage (except as authorized by the Postmaster General or designee) on Postal Service premises is prohibited. The term "controlled substance" is defined in Title 21, *United States Code* section 802. Smoking is prohibited in all Postal Service buildings and office space, including public lobbies.

Soliciting, Electioneering, Collecting Debts, Vending, and Advertising

Soliciting alms and contributions, campaigning for election to any public office, collecting private debts, commercial soliciting and vending, displaying or distributing commercial advertising, soliciting signatures on petitions, polls, or surveys (except as otherwise authorized by Postal Service regulations), and impeding entrance to or departure from Post Offices™ are prohibited on Postal Service property. These prohibitions do not apply to the following:

a. Commercial or nonprofit activities performed under contract with the Postal Service or pursuant to the provisions of the Randolph-Sheppard Act.

b. Posting notices on employee bulletin boards as authorized by Title 39 *Code of Federal Regulations* (CFR) 243.2.

c. The solicitation of U.S. Postal Service and other federal military or civilian personnel for contributions by recognized agencies as authorized by the *Manual on Fund Raising Within Federal Service*, issued under Executive Order 12353.

Public Assembly and Public Address

Leafleting, distributing literature, picketing, and demonstrating by members of the public are prohibited in lobbies and other interior areas open to the public. Public assembly and public address, except when conducted or sponsored by the Postal Service, are prohibited in lobbies and other interior areas open to the public.

Depositing Literature

Depositing or posting of handbills, flyers, pamphlets, signs, posters, placards, or other literature (except official Postal Service and other governmental notices and announcements) on the grounds, walks, driveways, parking and maneuvering areas, exteriors of buildings, and other structures, or on the floors, walls, stairs, racks, counters, desks, writing tables, window ledges, or furnishings in interior public areas on Postal Service premises is prohibited. This does not apply to the following:

a. Posting notices on employee bulletin boards as authorized by 39 CFR 243.2.

b. Interior space assigned to tenants for their exclusive use.

Photographs for News, Advertising, or Commercial Purposes

Photographs for news purposes may be taken in entrances, lobbies, foyers, corridors, or auditoriums when used for public meetings except where prohibited by official signs or Security Force personnel or other authorized personnel or a federal court order or rule. Other photographs may be taken only with the permission of the local postmaster or installation head.

Dogs and Other Animals

Dogs and other animals (except those used to assist persons with disabilities) must not be brought onto Postal Service property for other than official purposes.

Vehicular and Pedestrian Traffic

Drivers of all vehicles in or on Postal Service property must be in possession of a current and valid driver's license and vehicle registration, and the vehicle must display all current and valid tags and licenses required by the jurisdiction in which it is registered. Drivers who have had their privilege or license to drive suspended or revoked shall not drive any vehicle in or on Postal Service property during such period of suspension or revocation.

Drivers of all vehicles in or on Postal Service premises shall drive in a careful and safe manner at all times and must comply with signals and directions of Security Force personnel, other authorized individuals, and all posted traffic signs.

Blocking of entrances, driveways, walks, loading platforms, or fire hydrants is prohibited.

Parking without authority, parking in unauthorized locations or in reserved locations, or parking continuously in excess of 18 hours without permission or contrary to the direction of posted signs is prohibited. Supplemental specific traffic directives may be issued by the postmaster or installation head. When issued and posted, such directives shall have the same force and effect as if made a part hereof.

Voter Registration

Voter registration may be conducted on Postal Service property only with the approval of the postmaster or installation head. See 39 CFR 232.1(h)(4) for the conditions that apply to voter registration activities on Postal Service property.

Weapons and Explosives

No person while on Postal Service property may carry firearms, other dangerous or deadly weapons, or explosives, either openly or concealed, or store the same on Postal Service property, except for official purposes.

Nondiscrimination

No person entering on postal property shall be subjected to discrimination on the basis of race, color, sex, religion, national origin, age (40 years of age or older), or disability (physical or mental) in using any of the services offered by the U.S. Postal Service.

Penalties and Other Law

Alleged violations of these rules and regulations are heard, and the penalties prescribed herein are imposed, either in a federal district court or by a federal magistrate in accordance with applicable court rules. Questions regarding such rules must be directed to the managing counsel for the office involved.

Individuals found guilty of violating these rules and regulations are subject to a fine of not more than $50 or imprisonment of not more than 30 days, or both. Nothing contained in these rules and regulations shall be construed to abrogate any other federal laws or regulations or any state or local laws and regulations applicable to any area in which the property is situated.

Enforcement

Security Force personnel will exercise the powers of special police and are responsible for enforcing the regulations in this notice in a manner that will protect U.S. Postal Service property. Postal Inspectors, Office of Inspector General Special Agents, and anyone designated by the Chief Postal Inspector may also enforce these regulations.

State Capitol, Room 417
Juneau, Alaska 99801-1182

Re: Hearing Request re: HB 291 – Public Notices Posted At Post Offices

Dear Senator French:

The Department of Law would appreciate scheduling of the above bill for a hearing in your committee, at your earliest convenience. The bill would remove the requirement of posting certain public notices in a post office.

We have reviewed the bill and have found no legal concerns.

If you have any questions, please feel free to contact me.

Sincerely,

MICHAEL C. GERAGHTY
ATTORNEY GENERAL

HOUSE BILL 296 ~ Sponsor Statement
House Judiciary Committee

"An Act relating to service of process on prisoners; relating to the crime of escape; relating to the definition of 'correctional facility'; amending Rule 4, Alaska Rules of Civil Procedure; and providing for an effective date."

HB 296, addresses ambiguities that have risen from recent court cases involving prisoner issues. It clarifies the permissible method of personally serving process on incarcerated prisoners. It also clarifies the second and fourth degree escape statutes. The bill does three things;

1. For the purpose of service of process on state prisoners HB296 references the definition of "correctional facility" in AS 33.30.901 to clarify the manner in which incarcerated prisoners can be served civilly while incarcerated. The bill also makes it clear that the statute setting for the procedure for personally serving incarcerated persons, AS 09.05.030, is an indirect amendment to Alaska Civil 4. These changes will ensure there is a standardized legal process for serving process on prisoners. It will cure the problem in Hertz v. Carothers 225 P.3d 571 (Alaska 2010), that caused the Alaska Supreme Court to hold that prison officials were not peace officers who could serve legal summons and complaints on incarcerated prisoners.

2. This bill also defines what constitutes the crime of escape in the second degree. The result in Bridge v. State 258 P.3d 923 (Alaska 2011) was suggested for Legislative review from the Legal Services Annual Report (Dec. 2011). Bridge, was charged with driving with a suspended license, a class A misdemeanor. He could not post bail and was therefore held in jail. He was then transferred to a halfway house. He left the facility without permission and was caught. As a result of the escape he was charged with escape in the second degree, a class B felony. The Alaska Court of Appeals found that although Bridge was in the custody of the Department of Corrections, he was not "confined", because the halfway house did not have staff whose duty it was to prevent prisoners from leaving. This bill defines escape in the second degree as being from a "secure correctional facility" while under detention for a misdemeanor. Further, a "secure correctional facility" is defined as using construction or security fixtures or officers or other persons that are authorized to prevent persons under detention from departing such facilities without unlawful authorization. Other escapes by misdemeanants are fourth degree escapes, a class A misdemeanor. This bill will

codify the holding in Bridge and will avoid future questions as to what constitutes escape in the second degree.

3. This bill deletes the repeal of provisions passed by the legislature in 2007, AS 12.55.100(f) and AS 33.16.150(g), requiring electronic monitoring as a special condition of probation or parole for offenders whose offense was related to a criminal street gang. Repealing the December 31, 2012 sunset date will continue to provide the court system and the Department of Corrections an important tool to keep neighborhoods safe from gang related crime.

This bill provides clearer guidelines for civil service of process of persons under the custody of the Department of Corrections removing question raised in Hertz v. Carothers 225 P.3d 571 (Alaska 2010). The bill refines escape in the second degree answering questions from Bridge v. State 258 P.3d 923 (Alaska 2011). This bill is necessary to avoid future litigation that may arise involving these issues.

Please contact Rep. Gruenberg's legislative aides, Miles Brookes or Ted Madsen, at 465-4940 with any questions.

HB 296 - Crime of Escape & Definition of Correctional Facility

Sectional Analysis for CS for HB296 (27-LS1199\E)

Section 1[1] adds a new subsection that defines a correctional facility for the purpose of AS 09.05.050 as a "prison, jail, camp farm, halfway house, group home, or other placement designated by the commissioner for the custody, care and discipline of prisoners (AS 33.30.901(4).

Section 2[2] defines that escape from a "secure correctional facility" while under official detention for a misdemeanor is escape in the second degree, a class B felony.

Section 3[3] adds a new subsection to AS 11.56.310 defining a secure correctional facility.

Section 4[4] repeals Section 3, ch.27, SLA 2007

Section 5[5]amends Rule 4, Alaska Rules of Civil Procedure to reflect changes indirectly made in section 1 of this act.

Section 6[6]states that changes to sections 2 and 3 apply to offenses on or after the effective date of this act.

Section 7[7]provides for an immediate effective date.

Supreme Court of Alaska.

Sidney HERTZ, Appellant,
v.
Dan CAROTHERS, Appellee.

No. S-13245. | Feb. 12, 2010. |
Rehearing Denied March 10, 2010.

Synopsis

Background: Prisoner's civil rights action against State was dismissed and Superior Court awarded attorney's fees to the State. State attempted to execute judgment against prisoner trust account. Prisoner objected. The Superior Court, First Judicial District, Juneau, Patricia A. Collins, J., held that prisoner was properly served, trust account was subject to execution, and that State's attorney should not be sanctioned. Prisoner appealed.

Holdings: The Supreme Court, Christen, J., held that:
1 State did not comply with notice requirements, but prisoner was not prejudiced;
2 statutes governing prisoner trust accounts did not conflict with one another;
3 statute allowing disbursement of prisoner trust accounts in order to satisfy judgments was not an ex post facto law;
4 statute did not violate contract clause; and
5 attorney's failure to comply with notice requirements did not warrant sanctions.

Affirmed in part, reversed in part.

West Headnotes (13)

1 **Appeal and Error**
Cases Triable in Appellate Court

Supreme Court reviews issues of statutory interpretation, as well as questions about the constitutionality of statutes, de novo.

2 **Appeal and Error**
Costs and Allowances

Decisions whether to sanction attorneys are reviewed for abuse of discretion.

3 **Appeal and Error**
Proceedings Preliminary to Trial

A judge's refusal to recuse him- or herself is reviewed under the abuse of discretion standard.

4 **Execution**
Notice of levy

State did not comply with notice requirements in rule governing permissible methods for serving a summons in State's action seeking to execute judgment against prisoner trust account, but failure did not prejudice prisoner; prison guard who delivered documents to prisoner was not a peace officer or person specially appointed to serve process with the meaning of the rule, but prisoner had actual notice. Rules Civ.Proc., Rule 4.

5 **Execution**
Property in custody of agent or depositary

Prisons
Money and finances; inmate accounts

Prisons
Wages or earnings

Statutes
Nature and subject-matter of statute

Statute providing for prisoners to be compensated for their work in prison and wages to be placed in trust account did not conflict with statute allowing for disbursement of prisoner trust account to satisfy a judgment; statutes were not criminal statutes, as prisoner asserted, and therefore did not have to be strictly construed against the State. AS 09.38.030(f)(5), 33.30.201(d).

6 **Constitutional Law**
Sentencing and Imprisonment

Execution
Property in custody of agent or depositary

Statute allowing disbursement of prisoner trust accounts in order to satisfy judgments was not an ex post facto law, where statute did not criminalize behavior that was previously not

criminal and it had no bearing on the defense of any crime. U.S.C.A. Const. Art. 1, § 10, cl. 1; AS 09.38.030(f)(5).

7 **Constitutional Law**
Punishment in general
Constitutional Law
Criminal Proceedings

Any statute which punishes as a crime an act previously committed, which was innocent when done, which makes more burdensome the punishment for a crime, after its commission, or which deprives one charged with a crime of any defense available according to law at the time when the act was committed, is prohibited as ex post facto. U.S.C.A. Const. Art. 1, § 10, cl. 1.

8 **Constitutional Law**
Contracts with states in general
Execution
Property in custody of agent or depositary

Statute allowing disbursement of prisoner trust accounts in order to satisfy judgments did not violate contract clause; statute did not impair prisoners' ability to seek enforcement of the *Cleary* consent decree which set minimum standards for conditions of prisoner confinement and procedures for prisoners to file grievances for non-compliance with decree. U.S.C.A. Const. Art. 1, § 10, cl. 1; Const. Art. 1, § 15; AS 09.38.030(f)(5).

9 **Judgment**
Construction and operation of judgment

The *Cleary* consent decree sets minimum standards for conditions of prisoner confinement including food, medical care, and dental care and provides procedures for prisoners to file grievances for non-compliance with the decree.

10 **Prisons**
Access to Courts and Public Officials

An inmate's right to be free of state interference with his right of access to the court system is not absolute.

11 **Constitutional Law**
Prisoners and pretrial detainees

A statute is constitutional if it does not impermissibly interfere with, or burden, an inmate's right of access to the court and is sufficiently related to a legitimate government interest.

12 **Attorney and Client**
Liability for costs; sanctions

State's counsel's failure to comply with notice requirements in State's action to execute judgment against prisoner trust account did not warrant sanctions against counsel under civil rule of procedure or rules of professional conduct; there was no evidence that State's counsel intended to deprive prisoner of his right to notice. Rules Civ.Proc., Rules 4, 95(b).

13 **Appeal and Error**
Disqualification of judge

Prisoner waived for appellate review his argument that trial judge should have recused herself in State's action to execute a judgment against prisoner trust account, where prisoner failed to move for disqualification in the superior court.

Opinion

OPINION

CHRISTEN, Justice.

I. INTRODUCTION

This is the second time we have addressed Sidney Hertz's objections to the State's attempt to execute a judgment against his prisoner trust account. In *Hertz v. Carothers* [1] (*Hertz I*), Hertz challenged the State's right to execute on his prisoner trust account to satisfy a judgment for Alaska Civil Rule 82 attorney's fees entered after Hertz lost a prisoner civil rights lawsuit against the State. There, we affirmed the validity of AS 09.38.030(f) which excludes prisoners from an exemption for low wage earners. Following *Hertz I,* the State again levied on Hertz's trust account to satisfy the remainder of its judgment. Hertz now challenges the levy on the grounds that (1) he was not served properly; (2) "ambiguities" between AS 09.38.030(f) and AS 33.30.201(d) should be resolved in his favor; (3) AS 09.38.030(f)(5) is an *ex post facto* law; and (4) AS 09.38.030(f)(5) violates the contract clauses of the Alaska and United States Constitutions. We reverse the court's ruling that Hertz was properly served but affirm the court's rulings that Hertz's prisoner trust account is subject to execution and that the State's attorney should not be sanctioned. We also hold that AS 09.38.030(f) is not an *ex post facto* law and that it does not violate the contract clause of the Alaska Constitution or the contract clause of the United States Constitution.

II. FACTS AND PROCEEDINGS

Hertz is an inmate at Spring Creek Correctional Center ("SCCC"). In July 2004 he sued the Alaska Department of Corrections ***573** and several of its employees for alleged civil rights violations. [2] The superior court dismissed Hertz's civil rights suit and awarded Rule 82 attorney's fees of $3,225 to the State. [3] The fee award was later reduced to a judgment. [4] When the State attempted to execute against Hertz's prisoner trust account to satisfy the judgment, Hertz claimed exemptions under AS 09.38.030(a) and (b). [5] Specifically, he argued that his wages were exempt from execution because they fell below the statutory minimum in AS 09.38.030. [6] Alternatively, he argued that the statute was invalid under several different theories. [7] In our January 2008 decision, *Hertz I,* we affirmed the superior court's order rejecting Hertz's claims of exemption. [8] We also affirmed the validity of AS 09.38.030(f). [9]

On March 14, 2008, the State again sought to execute against Hertz's prisoner account to satisfy the remaining portion of its judgment. The State's service instructions directed the Alaska State Troopers (Judicial Services) to serve the writ of execution and creditor's affidavit on Superintendent Turnbull at SCCC. The service instruction form contained a separate section entitled "Instructions for Serving Notices on the Debtor," which directed that a copy of the State's creditor's affidavit, notice of levy and sale of property, notice of right to exemptions, claim of exemptions form, and judgment debtor booklet be served on Hertz. On June 12, 2008, a trooper served the writ of execution on Superintendent Turnbull. The trooper did not serve any documents on Hertz.

It is undisputed that Hertz had actual knowledge of the State's attempt to execute against his prisoner trust account by June 17, 2008, when he sent a letter to the superior court challenging the State's "theft" of his money based in part on lack of notice. When the State's counsel realized that Hertz had not been served, she faxed the documents that should have been served on Hertz to SCCC. A prison guard personally delivered them to Hertz on June 19, 2008.

Hertz responded to the faxed documents by filing several claims of exemption in which he argued that (1) improper service voids the levy; (2) "ambiguities" between AS 33.30.201(d)-which provides that the "primary purpose" of the prisoner trust account is to make funds available for prisoners' use at the time of release-and AS 09.38.030(f)(5)-which allows the execution of judgments against prisoner accounts-must be construed against the government; and (3) $185 in his trust account was not subject to execution because he had received it in the form of gifts from family and friends and the money should have been retained by the commissioner pursuant to AS 33.30.201(d).

On August 5, 2008, the superior court denied Hertz's claims of exemption, citing *Hertz I.* The superior court reasoned that our court "has ruled that a prisoner's trust account may be subject to execution," and noted that there is no exception in the statutory scheme for money acquired by gift. Finally, the court rejected Hertz's argument that the errors in the State's service should negate the writ because "there is no prejudice by [the] delayed service and no showing of a knowing violation of the statute." The superior court rejected Hertz's motion for reconsideration.

Hertz appeals.

III. STANDARDS OF REVIEW

1 2 3 We review issues of statutory interpretation, as well as questions about the constitutionality of statutes, de novo.[10] "Decisions whether to sanction attorneys are reviewed *574 for abuse of discretion."[11] "A judge's refusal to recuse him- or herself is reviewed under the abuse of discretion standard."[12]

IV. DISCUSSION

A. The Execution on Hertz's Prisoner Trust Account Was Invalid Because the State Failed To Properly Serve Him.

4 The State argues that it was in technical compliance with AS 09.38.085(a)(1) because it served Hertz with a notice of levy, a claim of exemptions form, a creditor's affidavit, and a judgment debtor's handbook. But the State misses the crux of Hertz's argument. Hertz's challenge is not to the sufficiency of the documents served; he challenges the State's method of service.

Several statutes and rules describe the notice the State was required to provide Hertz before levying on his trust account. Alaska Statute 09.38.080(c) requires that "[b]efore, at the time of, or within three days after the levy, the creditor shall serve on the individual [debtor] a notice under AS 09.38.085." Alaska Statute 09.38.085 describes the content of the required notices, and AS 09.38.500, the definitions section of the Alaska Exemptions Act, specifies the method for serving the notices. The term "serve notice" in AS 09.38.080(c) means "to give the person to be served a written personal notice in the same manner a summons in a civil action is served, or to mail the notice to the person's last known address by first-class mail and by using a form of mail requiring a signed receipt."[13] Hertz was served personally, not by mail, so we turn to the civil rules.

Civil Rule 4 identifies the permissible methods for serving a summons in a civil action. It requires service to "be made by a peace officer, by a person specially appointed by the Commissioner of Public Safety for that purpose or, where a rule so provides, by registered or certified mail." The rule defines "peace officer" as "any officer of the state police, members of the police of any incorporated city, village or borough, United States Marshals and their deputies, other officers whose duty it is to enforce and preserve the public peace, and ... persons specially appointed." Special appointments "shall only be made by the Commissioner of Public Safety after a thorough investigation of each applicant."[14]

After the State's counsel learned that the trooper had failed to serve Hertz as instructed, she faxed the documents to SCCC. A prison guard delivered them to Hertz on June 19, 2008. But the State did not argue, and the record does not show, that the prison guard who served Hertz was a "peace officer" or a person "specially appointed to serve process" within the meaning of Civil Rule 4. We agree with the superior court that the delay in service was not prejudicial to Hertz, but the State was still required to use an authorized method of service. The record does not show that the State complied with Civil Rule 4.[15]

We are mindful that our ruling regarding service may appear to elevate form over substance because Hertz had actual knowledge of the levy by June 16, 2008. But we are loathe to carve out exceptions to the important rules for service of process. These rules enable courts to verify that service has actually been made; they are vital to ensuring that litigants receive the due process to which they are entitled, and they are broadly applicable. Creating an exception merely to avoid requiring the State to properly serve Hertz is fraught with precedential danger. Such an exception, though seemingly narrow, could be applied in future cases to relax the notice requirements for litigants *575 who might not have received the actual notice Hertz enjoyed. This danger would be especially acute in cases involving requests for entry of default judgment. Given the serious consequences of execution, i.e., the involuntary confiscation of a debtor's property, we must insist on strict compliance with the legislature's statutory scheme and the service requirements of Civil Rule 4.[16]

B. Alaska Statutes 33.30.201(d) and 09.38.030(f)(5) Do Not Conflict and Are Not Ambiguous.

5 Alaska Statute 33.30.201(d) provides for prisoners to be compensated for their work in prison and for their wages to be placed in a trust account for the "primary purpose" of being available to them at the time of release. But AS 09.38.030(f) provides that "[a]ll money in an incarcerated person's account at a correctional facility is available for disbursement under a notice of levy under this subsection ... (5) to satisfy other judgments entered against a prisoner in litigation against the state." Hertz argues that the "primary purpose" language of

AS 33.30.201(d) conflicts with the disbursement scheme in AS 09.38.030(f). Citing this "ambiguity" Hertz argues that "[a]mbiguities in criminal statutes must be narrowly read and construe[d] strictly against the government."

In *Hertz I,* we upheld the state's ability to execute on prisoner accounts despite an exemption for low-wage earners and those who are paid semi-monthly.[17] We noted that AS 09.38.030(f)(5) specifically eliminates the low-wages exemption when low wages are paid to prisoners.[18]

Hertz's present challenge to AS 09.38.030(f)(5) is technically barred by the doctrine of res judicata;[19] he was required to raise all of his challenges to the statute in *Hertz I.*[20] But Hertz's argument is unavailing even on the merits. Alaska Statute 33.30.201 states that prisoner wages shall be disbursed pursuant to a specified order of priority and that remaining funds are to be given to the prisoner when he or she is released, subject to exceptions. After all disbursements are paid in the statutorily required order of priority, subsection .201(f) states that remaining funds are subject to lien, attachment, garnishment, execution, or similar procedures to encumber money or property. This provision does not conflict with AS 09.38.030(f)(5). Alaska Statutes 33.30.201(c) and (f) identify the priorities for which a prisoner's trust account can be invaded, and AS 09.38.030(f) explains that prisoners do not enjoy the benefit of the exemption for earnings and liquid assets enunciated in AS 09.38.030 generally. Both statutes contemplate and accommodate the execution and garnishment of prisoner trust accounts.

To the extent that Hertz argues that these statutes must be construed against the State because they are "criminal statutes," he is mistaken. The fact that these statutes govern the administration of prisoner trust accounts does not make them "criminal statutes." Hertz has cited no authority and we have found none supporting his assertion that statutes should be strictly construed against the State merely because they apply to convicted felons. Alaska Statutes 09.38.030 and 33.30.201 are civil statutes, they are not ambiguous, and they do not conflict. After all disbursements are made from a prisoner's trust account pursuant to the statute's order of priority, all remaining funds are subject to execution.

***576 C. Alaska Statute 09.38.030(f)(5) Is Not an *Ex Post Facto* Law.**

6 Hertz asserts that AS 09.38.030(f)(5) is an *ex post facto* law. The basis for this argument is that this statute was passed in 1995, after the State entered into a consent decree to resolve litigation challenging the conditions of confinement for Alaska prisoners.[21] Hertz argues that the adoption of AS 09.38.030(f)(5) in the wake of the *Cleary* consent decree creates the appearance that AS 09.38.030(f)(5) "was enacted solely for the purpose of circumventing the *Cleary* [Final Settlement Agreement and Order]."

7 We have adopted the United States Supreme Court's view that:

> any statute which punishes as a crime an act previously committed, which was innocent when done; which makes more burdensome the punishment for a crime, after its commission; or which deprives one charged with a crime of any defense available according to law at the time when the act was committed, is prohibited as *ex post facto.*[22]

Alaska Statute 09.38.030(f)(5) does not criminalize behavior that was previously not criminal and it has no bearing on the defense of any crime; it is not an *ex post facto* law.

D. Alaska Statute 09.38.030(f)(5) Does Not Violate the Contract Clause.

8 Hertz argues that AS 09.38.030(f)(5) violates the contract clause of the United States Constitution and the contract clause of the Alaska Constitution by "substantial[ly] impair[ing]" his contractual right to allege noncompliance with the *Cleary* consent decree. He supports this argument by pointing out that "this Court has admitted that AS 09.38.030(f)(5) was to discourage prisoner litigation." Our court has explained:

> Article I, section 15 of the Alaska Constitution provides: "No law impairing the obligation of contracts ... shall be passed." Because the language of the contract clause of the Alaska Constitution is nearly identical to that of the federal Contract Clause, we apply the same two-part analysis to alleged violations of the Alaska and federal contract clauses. We first ask "whether the change in state law has operated as a substantial impairment of a contractual relationship." If there is a substantial impairment, we then examine "whether the impairment is reasonable and necessary to serve an important public purpose."
>
> ....
>
> Under the first prong of the contract clause test, we consider: (1) whether there is a contractual relationship, (2)

whether the law impairs the contractual relationship, and (3) whether the impairment is substantial.[[23]]

9 The *Cleary* consent decree sets minimum standards for conditions of prisoner confinement including food, medical care, and dental care. It also provides procedures for prisoners to file grievances for non-compliance with the decree.[24] After exhausting the "administrative grievance procedure," an inmate may file suit in superior court. In this case, the State does not challenge Hertz's assertion that the *Cleary* consent decree established a contractual relationship between the State and inmates in the custody of the State of Alaska,[25] arguing instead that even if such a contractual relationship exists, AS 09.38.030(f) does not impair it. We agree; AS 09.38.030(f) does not impair prisoners' ability to seek enforcement of the *Cleary* consent decree. We do not need to decide ***577** whether the *Cleary* consent decree constitutes a binding contract.

10 11 Civil Rule 82 provides for the award of attorney's fees to the prevailing party of a civil lawsuit. Civil Rule 82 was in effect when the *Cleary* consent decree was entered, November 1, 1990. The consent decree addresses certain conditions of confinement; it does not immunize prisoners from attorney's fee awards or exempt inmate trust accounts from execution to satisfy fee awards. Alaska Statute 09.38.030(f)(5) allocates some of the State's cost of defending lawsuits to the non-prevailing prisoner, thereby discouraging frivolous claims.[26] "An inmate's right to be free of state interference with his right of access to the court system is not absolute."[27] A statute is constitutional if it "does not impermissibly interfere with, or burden, an inmate's right of access to the court and is sufficiently related to a legitimate government interest."[28] Alaska Statute 09.38.030(f)(5) does not prevent or stifle a prisoner's ability to pursue legitimate claims against the government.

The specter of Rule 82 fees tempers the litigiousness of most civil litigants; we see no reason to make a special exception for inmates. Alaska Statute 09.38.030(f)(5) merely reflects the State's interest in discouraging frivolous prisoner litigation, a legitimate goal we have repeatedly upheld.[29] We are not convinced that permitting the State to collect judgments from prisoner trust accounts impairs the right of prisoners to seek enforcement of the *Cleary* consent decree,[30] and we hold that AS 09.38.030(f)(5) does not violate the Alaska or federal prohibition against impairment of contracts.

E. There Was No Misconduct by the State's Attorney.

12 Hertz asserts that the superior court erred by failing to sanction the State's counsel under Professional Conduct Rule 95(b) for (1) failing to have him served by a peace officer; and (2) for lying because she "never intended to serve Hertz with the Writ."

The superior court correctly decided that Hertz's claims of attorney misconduct are meritless. There is no evidence that the State's counsel acted inappropriately during the course of her efforts to collect the State's judgment. At most, there is evidence that a mistake was made at the time of service. Ironically, Hertz's allegation of misconduct arises from counsel's rush to arrange for personal delivery of the documents that would notify Hertz of his right to claim exemptions; the State's attorney likely faxed the documents to SCCC for immediate delivery in order to comply with AS 09.38.080(c), which requires the debtor to receive notice "[b]efore, at the time of, or within three days after the levy."

Even though the State failed to comply with Civil Rule 4, there is no evidence that the State's counsel intended to deprive Hertz of his right to notice. Hertz admits that he received the relevant documents by fax just days after he learned of the levy and apparently shortly after the State's attorney discovered the mistake. The superior court appropriately declined to sanction the State's attorney.

F. Hertz Waived His Argument that Judge Collins Should Have Recused Herself Because of Apparent Bias Against Prisoners.

13 Hertz argues that the superior court judge created an appearance of impropriety by ruling on his claim of exemptions before receiving his response to the State's objections. ***578** [31] We see no evidence of any bias in the record. And Hertz waived the issue in any event by failing to move for disqualification in the superior court.[32]

IV. CONCLUSION

We REVERSE the court's ruling that Hertz was adequately served, but hold that AS 33.30.201(d) and AS 09.38.030(f)(5) do not conflict and are not ambiguous, that AS 09.38.030(f)(5) is not an *ex post facto* law, and that AS 09.38.030(f)(5) does not violate the contract clause of the Alaska Constitution or United States Constitution. We AFFIRM the superior court's rulings that Hertz's trust account is subject to execution and that the State's attorney should not be sanctioned.

CARPENETI, Chief Justice and FABE, Justice, not participating.

258 P.3d 923
Court of Appeals of Alaska.

Wendell D. BRIDGE, Appellant,
v.
STATE of Alaska, Appellee.

No. A–10176. | Aug. 5, 2011.

Synopsis

Background: Defendant, who left halfway house without permission while awaiting trial on misdemeanor charge, was convicted in the Superior Court, Fourth Judicial District, Fairbanks, Michael A. MacDonald, Randy M. Olsen, JJ., of second-degree felony escape. He appealed.

Holdings: The Court of Appeals, Mannheimer, J., held that:
1 jury instruction defining term "correctional facility" was improper, and
2 retrial of defendant would not violate double jeopardy.

Reversed.

Bolger, J., filed dissenting opinion.

West Headnotes (2)

1 **Escape**
Nature and elements of offenses in general

For purposes of interpreting the second-degree escape statute, the term "correctional facility," which is statutorily defined as "premises used for the confinement of persons under official detention," applies only to situations where staff at the facility have a duty to physically prevent inmates from leaving without permission, and not to situations where the facility simply houses defendants who were placed there by the Department of Corrections pending their trial or sentencing. AS 11.56.310, 11.81.900(b)(9).

2 **Double Jeopardy**
Particular grounds for relief

Retrial of defendant on charge of second-degree escape would not violate double jeopardy based on trial court's failure to properly instruct jury on term "correctional facility," as required to properly convict defendant of second-degree escape; if on retrial, the State were to believe that it would be unable to establish that halfway house defendant left without permission qualified as a "correctional facility," then the State could ask the trial court to enter judgment against defendant on lesser offense of fourth-degree escape under statute which prohibited any act of "remov[ing] oneself from official detention for a misdemeanor." U.S.C.A. Const.Amend. 5; AS 11.56.310, 11.56.330(a)(1).

Attorneys and Law Firms

Before: COATS, Chief Judge, and MANNHEIMER and BOLGER, Judges.

Opinion

OPINION

MANNHEIMER, Judge.

This appeal requires us to clarify the meaning of the term "correctional facility" for purposes of the second-degree escape statute, AS 11.56.310. Under subsection (a)(1)(A) of this statute, a person commits the felony of second-degree escape if they unlawfully remove themselves "from a correctional facility" while they are under official detention for any crime, even a misdemeanor.

The term "correctional facility" is defined in AS 11.81.900(b)(9) as "premises ... used for the confinement of persons under official detention". The question posed in this appeal is whether the word "confinement" is equivalent to "residence" or "placement"—so that the term "correctional facility" would encompass *any* facility or residence where a prisoner has been ordered to remain by the Department of Corrections. Bridge argues that "confinement" has a narrower meaning

WestlawNext © 2012 Thomson Reuters. No claim to original U.S. Government Works.

—that it applies only when a prisoner's mandated residence at a particular facility is physically enforced by guards and restraints.

For the reasons explained in this opinion, we agree with Bridge that, at least for purposes of interpreting the second-degree escape statute, the phrase "premises used for the confinement of persons under official detention" must be given a narrower meaning than "residence" or "placement"—that it applies only to situations where a prisoner's residence is physically enforced.

Underlying facts

The defendant in this case, Wendell D. Bridge, was charged with a misdemeanor (driving with a suspended license). Because Bridge was unable to make bail, he was remanded to the custody of the Department of Corrections pending his trial.

***925** Bridge was initially confined at the Fairbanks Correctional Center. However, when the Department of Corrections conducted their prisoner classification of Bridge, they concluded that he was eligible for placement at the Northstar Center, a halfway house operated by a private corporation in Fairbanks. The Northstar Center has a contract with the Department of Corrections for housing low-security misdemeanor defendants who are awaiting trial or sentencing. Pursuant to this contract, and pursuant to the Department of Corrections' classification decision, Bridge was placed at the Northstar Center.

Because Bridge was charged with a crime, was unable to make bail, and was in the legal custody of the Department of Corrections, he was under "official detention"—and he remained under official detention even after he was transferred to the Northstar Center. [1]

On New Year's Day 2005, Bridge left the Northstar Center without permission. The Northstar staff notified the police, and the district court later issued a warrant for Bridge's arrest. He was arrested some fifteen months later and charged with second-degree escape.

In the superior court, Bridge argued that the Northstar Center was not a "correctional facility", and thus his act of walking away from the Center did not constitute second-degree escape. To help resolve this controversy, the superior court held a hearing at which the parties presented evidence concerning Bridge's status at the Northstar Center and the types of security measures employed at the Center. Based on the evidence presented at this hearing, the superior court concluded that the Northstar Center would qualify as a "correctional facility" for purposes of the escape statute (assuming the jury viewed the evidence in the light most favorable to the State).

Later, at Bridge's trial, in keeping with this pre-trial ruling, the superior court instructed the jury that "a halfway house under contract with the Department of Corrections ... is a correctional facility for ... individuals placed there by [the Department] for purposes of confinement [awaiting trial or sentencing]." Because it was undisputed that Bridge walked away from the Northstar Center without permission and without justification, the jury convicted Bridge of second-degree escape.

In this appeal, Bridge renews his argument that the Northstar Center did not qualify as a "correctional facility" for purposes of the escape statute. If Bridge is correct, then his act of leaving the Northstar Center without permission did not constitute second-degree escape; instead, his action constituted the lesser offense of fourth-degree escape under AS 11.56.330(a)(1). (This statute prohibits *any* act of "remov[ing] oneself from official detention for a misdemeanor".)

This Court's decision in State v. Crosby

This Court's decision in *State v. Crosby,* 770 P.2d 1154 (Alaska App.1989), is the primary appellate court decision construing the term "correctional facility" for purposes of Alaska's second-degree escape statute. Both Bridge and the State discuss *Crosby* at length in their briefs. Accordingly, to meaningfully address the arguments in the parties' briefs, we must examine the *Crosby* decision in some detail.

The defendant in *Crosby* was a sentenced prisoner who was released from prison on furlough to a residential drug treatment program, Akeela House. [2] Shortly after Crosby arrived at this residential facility, he walked away. [3] The State charged Crosby with second-degree escape, alleging (in the words of the statute) that he removed himself "from a correctional facility while under official detention." [4] The superior court ruled that Akeela House was *not* a "correctional facility" ***926** for purposes of the escape statute, and the State then appealed. [5]

The term "correctional facility" is defined in AS 11.81.900(b); it means "[any] premises ... used for the confinement of persons under official detention". [6] In

Crosby, the State took the position that, under this definition, the term "correctional facility" applied to *any* facility utilized by the Department of Corrections to house prisoners.[7] But this Court rejected the State's reading of the statutory definition.

This Court's explanation of why we rejected the State's interpretation of the statute is lengthy and somewhat difficult to follow, but the salient point of our analysis was that the statutory definition of "correctional facility" does not encompass any and all premises used for the *placement* or *custody* of persons under official detention. Rather, the statute defines "correctional facility" as premises used for the *confinement* of persons under official detention. *Crosby,* 770 P.2d at 1155.

Because our criminal code contained no definition of "confinement", we engaged in a lengthy analysis of the potential meanings of this word in the context of an escape statute. We concluded that the concept of "confinement" seemed to focus "not so much [on] the extent to which [a person's] freedom is restrained[, but rather on] *the specific manner* in which the restraints are imposed and enforced". *Id.* at 1157 (emphasis added).

We then offered two different explanations of why Crosby's placement at the Akeela House residential treatment center did not constitute "confinement"—and, thus, why Akeela House was not a "correctional facility" for purposes of the second-degree escape statute. Our decision to offer two different explanations appears to stem from the fact that the trial court record did not offer a clear answer as to whether Akeela House employed security guards or utilized physical restraints or barriers to keep residents from leaving the premises without permission.

This Court's first explanation of why Crosby was not in "confinement" at Akeela House was that, even though the conditions of Crosby's furlough from prison required him to remain at Akeela House, this restraint on his liberty was not "imposed or enforced in ways that amount to actual confinement". *Ibid.* We noted that "there [was] no indication" Akeela House had armed guards, physical restraints or barriers, or other security measures to physically prevent Crosby from leaving. *Ibid.*

This Court's second explanation of why Crosby was not in "confinement" at Akeela House appears to be based on the alternate possibility that Akeela House did, in fact, use guards or physical restraints to prevent residents from leaving without permission. We declared that "[any such] restrictions that Akeela House [placed] on its residents" were imposed for the purpose of furthering its treatment plan, and not because Akeela House was the agent of the Department of Corrections for the purpose of "maintaining security over its prisoners". *Ibid.* "Thus," we concluded, "to the extent that Akeela House relies on restrictive measures amounting to actual confinement, [this] confinement is clearly not confinement by the state." *Ibid.*

This second rationale appears to be squarely predicated on the fact that Crosby was a *furloughed* prisoner—*i.e.,* someone who had been granted "an authorized leave of absence from actual confinement for a designated purpose and period of time". AS 33.30.901(9) (the definition of "furlough"). In other words, the Department of Corrections had affirmatively decided to relinquish physical custody of Crosby for the purpose of allowing him to participate in the residential drug treatment program at Akeela House. Under the terms of Crosby's furlough, he was obligated to participate in this residential treatment program—but the Department apparently trusted Crosby to do just that, and the Department took no steps (either directly, or through agreement with Akeela ***927** House) to physically confine Crosby to the treatment facility. Rather, in the words of AS 33.30.091(9), Crosby was on a "leave of absence from actual confinement".

In sum, our decision in *Crosby* appears to have been ultimately based on the fact that the defendant was on furlough at the time he engaged in his unauthorized departure from Akeela House. But in our discussion of this issue, we suggested that even when a person is under official detention and living at a residential facility, the person is not "confined" there, for purposes of the escape statute, unless (1) the person is required to reside at the facility, (2) the person's required residency is enforced by guards or by physical restraints on the person's ability to leave, and (3) the guards or physical restraints are used at the behest of, or under the agency of, the Department of Corrections for the purpose of maintaining security over its prisoners, rather than for the private purposes of the corporation or group that runs the facility.

We note that the Alaska Legislature has not enacted a statutory definition of "confinement", nor has the legislature altered the statutory definition of "correctional facility", since we decided *Crosby* in 1989.

Bridge's argument on appeal

In his brief to this Court, Bridge focuses on the portion of *Crosby* where we suggested that "confinement" hinges "not

so much [on] the extent to which [a person's] freedom is restrained[, but rather on] the specific manner in which the restraints are imposed and enforced". [8]

Bridge devotes the majority of his brief to a discussion of the lack of security measures at the Northstar Center. According to the testimony presented at the evidentiary hearing in this case, the Northstar Center is a "non-secure" facility, in that it does not have guards, or a security fence, or even surveillance cameras. Inmates wear their own clothes, they have their own money, and they are not locked inside the facility. The members of the Northstar staff do not carry weapons, and they are instructed not to try to physically restrain inmates who leave the premises.

Relying on the absence of guards and physical restraints at the Northstar Center, Bridge argues that the Northstar Center is not a "correctional facility" because he was not subjected to "confinement" in the sense of physical restraints on his freedom. The problem with Bridge's argument is that it hinges on a portion of *Crosby* that appears to be dictum.

As we explained above, the *Crosby* decision offered two different explanations of why Crosby's residence at Akeela House did not constitute "confinement". The first explanation —*i.e.,* the portion of *Crosby* that Bridge relies on—dealt with the fact that Akeela House *apparently* did not utilize guards or physical restraints to keep residents from leaving without permission. But the record was unclear on this point, so this Court offered a second, alternative explanation for why Crosby's residence at Akeela House did not constitute "confinement". And under this second explanation, it was *irrelevant* whether Akeela House used guards or physical restraints to maintain control of its residents. This Court stated that even if Akeela House *did* utilize guards or physical restraints to keep residents from leaving, this would not constitute "confinement" for purposes of the escape statute —because these guards and physical restraints were not employed at the behest of the Department of Corrections, but rather were employed for the private purposes of Akeela House. [9]

Under this second rationale, the question of whether (or to what degree) the defendant in *Crosby* was subjected to physical restraints on his liberty during his residence at Akeela House was moot. The answer to this question made no difference to this Court's decision. Thus, our discussion of what type of restraint might constitute "confinement" for purposes of the escape statute became dictum.

928 *The question of "confinement" revisited

Bridge was not on furlough at the Northstar Center. That is, unlike the defendant in *Crosby,* no one had authorized Bridge to embark on a "leave of absence from actual confinement". Rather, Bridge was a misdemeanor defendant who was awaiting trial, and who had been remanded to the custody of the Department of Corrections because he was unable to make bail. Because of this, Bridge's case requires us to re-examine the question of what constitutes "confinement" for purposes of the escape statute.

The State's main argument in this appeal is that Bridge should be deemed to have escaped from "confinement" because the Department of Corrections placed Bridge at the Northstar Center in lieu of housing him at the Fairbanks Correctional Center. The State points out that Bridge knew that he was legally obligated to remain at the Northstar Center: Bridge was a prisoner who was being held in custody awaiting his trial, and he remained a prisoner even though he had been granted the benefit of waiting for his trial at a non-prison facility.

The State's description of Bridge's status is correct, but the State's argument is essentially the same one we rejected in *Crosby.* In *Crosby,* the State argued that the term "correctional facility" applied to *any* facility utilized by the Department of Corrections to house prisoners. [10] But as this Court noted in *Crosby,* the statutory definition of "correctional facility" does not encompass any and all premises used for the *placement* or *custody* of persons under official detention. Rather, the statute defines "correctional facility" as premises used for the *confinement* of persons under official detention. *Crosby,* 770 P.2d at 1155. Thus, we must decide whether the legislature intended the word "confinement" to mean something more specific or limited than "placement" or "custody".

One basic difficulty in answering this question is the fact that the word "confinement", like the word "convicted", can mean different things, depending on the context. [11]

For example, AS 33.30.065 authorizes the Department of Corrections to allow a prisoner to serve their term of imprisonment, or to serve their period of temporary commitment while awaiting trial, by living at home under electronic monitoring. One might speak of these prisoners as being "confined" to their residence, even though no one is

guarding them, and even though they are permitted to leave their home for various authorized purposes.

But as we noted in *Crosby,* the commentary to the draft provisions of our current escape statutes suggests that the word "confinement" was being used in a more restrictive sense—the sense of actual physical restraints placed on a person's movement, enforced by officers whose duty is to keep the person from leaving without permission:

> [T]he tentative draft commentary to AS 11.56.310 ... suggests that escapes from "correctional facilities" were designated as [a higher degree of crime] because of the heightened danger posed by inmates who seek to remove themselves from secure facilities:
>
> > The Code classifies all escapes from correctional facilities ... as escape in the second degree, a class B felony. Existing law differentiates between an escapee who has committed a felony and one who has committed a misdemeanor; an escape by a misdemeanant is classified as a misdemeanor. The [Criminal Code Revision] Subcommission concluded that the danger to society resulting from correctional facility escapes is substantial, regardless of whether the escapee is a felon or misdemeanant. The classification of all correctional facility escapes as serious felonies is consistent with the Code provision on the justifiable use of force in preventing an escape from a correctional facility[.]

***929** *Crosby,* 770 P.2d at 1155, quoting Alaska Criminal Code Revision, Tentative Draft, Vol. 4 (1977), pp. 47–48.

This passage from the commentary to the Tentative Draft suggests that the drafters intended to draw a distinction between (1) all prisoners who unlawfully depart from the premises where they have been placed by the Department of Corrections, and (2) those prisoners who unlawfully depart from a facility where there are restraints or limitations on the prisoners' movement, and where corrections officers or other facility staff, acting as agents of the Department, are charged with the duty of preventing the prisoners from departing without permission. It is in these latter circumstances that an escape or attempted escape from the facility poses a heightened danger.

This was the context in which the *Crosby* court remarked that the word "confinement", as used in the statutory definition of "correctional facility", and as interpreted in the context of the second-degree escape statute, "seems to deal not so much with the extent to which [a person's] freedom is restrained as with the specific manner in which the restraints are imposed and enforced." *Crosby,* 770 P.2d at 1157.

In other words, there would be no "confinement" if a prisoner is subject only to *legal* restraints on their physical liberty, in the form of a Department of Corrections order directing them to reside at a particular facility. Rather, "confinement" would exist only when the prisoner's residence at the facility is forcibly maintained.

We note that the legislature appears to have used the word "confined" in this same narrow sense in AS 33.30.181(a), a statute that deals with prisoners whom the Department of Corrections has placed in a community restitution center. This statute declares that a prisoner who has been placed in one of these centers "shall be confined to the center at all times" *except* when the person is at work, or is traveling to and from work (or to attend a job interview), or is absent for another purpose specially approved by the commissioner. In this statute, the phrase "confined to the [community restitution] center" clearly means something more narrow than "placed in a community restitution center" or "classified to a community restitution center".

As we noted earlier in this opinion, this is not the only sense in which people use the words "confine" or "confinement". These words can mean different things in different contexts.

For example, when our supreme court declared in *Rust v. State* that the Commissioner of Corrections has the sole discretion to designate "the prison facility to which the prisoner is to be confined", [12] it is clear that the supreme court was using the word "confined" in the broader sense of "placed".

Similarly, it may make good sense to give the word "confinement" a broader meaning for purposes of interpreting AS 33.30.193, the statute that guarantees prisoners meaningful access to the courts for the purpose of challenging "the conditions of the prisoner's confinement". And it would seem that a broader interpretation of "confinement" might be justified when interpreting AS 33.30.211(b), the statute which provides that copies of a prisoner's pre-sentence report "and any other information ... that may affect the person's rehabilitation" shall be transmitted to the superintendent of the correctional facility in which the prisoner is "confined". For the same reasons, a broader interpretation of "confinement" might be warranted when interpreting AS 33.36.010, the statute which declares that it is the policy of the State of Alaska "not to transfer a resident inmate [to a facility] outside of [this] state"

under the Interstate Corrections Compact "if [the] inmate's continued confinement in Alaska will better facilitate [their] rehabilitation or treatment".

In Judge Bolger's dissenting opinion, he asserts that the definition of "confinement" that we adopt in the present case will have manifold unfortunate consequences—because that same definition will apply in all of the contexts we have just mentioned, as well as several other contexts that Judge Bolger lists in his dissent. We disagree.

***930** **1** The limited question before us is the proper interpretation of "confinement" for purposes of interpreting the scope of the second-degree escape statute. Our definition of "confinement" for this particular purpose does not necessarily govern the meaning of this term for other purposes —because it is possible for the same word or phrase to have different meanings in different contexts. For example, this Court has repeatedly recognized that the word "conviction" can mean different things, depending on the context of the statute or rule being construed. *See Larson v. State,* 688 P.2d 592, 597–98 (Alaska App.1984); *Kelly v. State,* 663 P.2d 967, 971–72 (Alaska App.1983).

In the present appeal, our task is to identify the conduct that constitutes an escape from confinement for purposes of the second-degree escape statute. This statute declares that any escape from a "correctional facility" is a class B felony, even when the defendant's underlying criminal conduct (or charged conduct) is only a misdemeanor.

As we explained in *Crosby,* and as we explained earlier in this opinion, the commentary to the Tentative Draft of our criminal code suggests that the legislature's underlying justification for this decision was the perception that escapes from correctional facilities pose a significantly greater degree of danger than other escapes, even when the defendant's underlying crime or criminal charge is not itself particularly serious.

But this rationale—the greater potential danger posed by an escape from "confinement"—does not appear to apply to situations like the one presented in Bridge's case: situations where a prisoner simply walks away from a residence where they have been directed to stay. Rather, the legislature's rationale appears to apply only when the restrictions on a prisoner's physical liberty are enforced by officers whose duty is to keep the person from leaving without permission.

We agree with the State that a prisoner can be "confined" in a facility, for purposes of the second-degree escape statute, even though that facility does not have "gun tower[s] or a fence topped with barbed wire to keep [prisoners] in place". The paramount distinction between "placement" at a facility and "confinement" at a facility is the presence of corrections officers or other people whose duty is to prevent unauthorized departures from the facility—because the increased danger posed by escapes or attempted escapes from such facilities stems from the conflict or risk of conflict between the prisoner and these officers.

Thus, for instance, a work farm that has no towers and no restraining wall or fence could still be a place of "confinement" if it was staffed by corrections officers whose duty was to prevent prisoners from leaving without permission. But on the other hand, the fact that a halfway house has a wall or fence running around the perimeter of its lawn would not, of itself, convert the halfway house to a place of "confinement" if, as in Bridge's case, no officer or staff member had the duty to stop residents from leaving the halfway house without permission.

For these reasons, we agree with Bridge that the superior court was wrong to instruct Bridge's jury that the Northstar Center was a "correctional facility" simply because it housed defendants who were placed there by the Department of Corrections pending their trial or sentencing. The Northstar Center's status as a "correctional facility" hinged on an additional question of fact: whether prisoners' residence at the Center was forcibly maintained by corrections officers or by other guards or staff members acting as agents of the Department of Corrections (either formally or *de facto*).

The procedural posture of Bridge's case

During the pre-trial proceedings in Bridge's case, the superior court ruled that it was irrelevant what types of restraints or controls were placed on prisoners at the Northstar Center. Instead, the superior court ruled that *any* halfway house was a "correctional facility" if, under contract with the Department of Corrections, it housed defendants who were in custody awaiting trial or sentencing.

At Bridge's trial, the jurors were instructed in accordance with the superior court's ruling. That is, the jurors were told: "A ***931** halfway house under contract with [the] Department of Corrections ... is a correctional facility for pre-sentenced individuals placed there by [the Department] for purposes of confinement." In addition, the trial judge barred the defense attorney from arguing that the Northstar Center did not qualify as a "correctional facility" because the Center did not impose physical restraints on the freedom of its residents.

As we have explained, this jury instruction and this ruling were wrong. If the staff of the Northstar Center had no duty to physically prevent inmates from leaving without permission, then the Northstar Center was not a "correctional facility"-not a facility where prisoners were "confined".

For this reason, Bridge is entitled to a new trial on the charge of second-degree escape.

2 In a single sentence at the end of his opening brief, Bridge asserts that the double jeopardy clause bars the State from retrying him on this charge. This is incorrect. The flaw in Bridge's trial is that the jurors were misinstructed, in the government's favor, on an element of the offense. The constitution does not bar a retrial under these circumstances. [13]

If the State believes that it will be unable to establish that the Northstar Center qualifies as a "correctional facility" under the test we have announced here, then the State may ask the superior court to enter judgement against Bridge on the lesser offense of fourth-degree escape under AS 11.56.330(a)(1)—the statute which prohibits any act of "remov[ing] oneself from official detention for a misdemeanor".

The judgement of the superior court is REVERSED.

BOLGER, Judge, dissenting.

We recently held that a prisoner at a halfway house was "confined" in a "correctional facility" for purposes of the good-time credit statute. [1] I believe that the escape statute should be construed the same way. The requirement of armed guards is not mentioned in the text or history of this statute or in the numerous other criminal procedure statutes where these terms are used.

The central issue in this case is whether Northstar Center is a "correctional facility"—that is, a "premises ... used for the confinement of persons under official detention." [2] We considered the meaning of the term "confinement" when we addressed another section of the escape statute in *Beckman v. State*. [3] We concluded that Beckman was subject to "confinement" when he was allowed to attend residential treatment at Akeela House. [4] But Beckman was not confined "under an order of a court," as required by the definition of "official detention," because he was released to attend Akeela House as a condition of his probation. [5]

The legislature amended the definition of "official detention" in 1991. [6] The amendment was intended to overrule two of our cases that had construed this term narrowly. [7] I believe that the amendment corrected an ambiguity in the term "confinement" as it had been previously construed. The definition of "official detention" now includes "actual or constructive restraint" imposed by a court order. [8] When this definition is inserted into the definition of "correctional facility," that term now includes a facility designated for "confinement" under the constructive restraint of a court order. In other words, the statute now includes facilities where the prisoners are constructively restrained ***932** as well as facilities with barbed wire and armed guards.

The terms "confinement" and "correctional facility" are used in many criminal statutes. The definition of "correctional facility" that we construe in this case will also determine the scope of correctional facility litigation, [9] liability for sexual assault, [10] liability for promoting contraband, [11] the responsibility for victim notification in domestic violence cases, [12] the liability for correctional facility surcharges, [13] and the deadline for sex offender registration. [14] None of these applications suggest that this term should be limited to facilities with armed guards.

These terms are also used to define the requirements for criminal punishment. Various statutes require that a person sentenced to imprisonment must report to serve a term of "confinement" at a "correctional facility," [15] that he will accrue good-time credit if he follows the rules of the "correctional facility" where he is "confined," [16] that he will be returned to "confinement" in a "correctional facility" if he violates parole, [17] and that he will begin probation upon his release from "confinement in a correctional facility." [18]

My point is that these terms are used throughout the criminal statutes, and they should be construed consistently. [19] I would read the terms that apply to the escape statute in the same way that we have applied those terms to the good-time credit statute. In other words, I agree with the trial judge's instruction in this case—a halfway house is a "correctional facility" for those pretrial detainees who are placed there by the Department of Corrections.

Footnotes

1 The term "official detention" is defined as "custody, arrest, surrender in lieu of arrest, or actual or constructive restraint under an order of a court in a criminal or juvenile proceeding, other than an order of conditional bail release". AS 11.81.900(b)(40).

REPRESENTATIVE CATHY MUÑOZ

MEMORANDUM

To: Honorable Hollis French, Chair
Cindy Smith, Aide
Senate Judiciary Committee

From: Rep. Cathy Muñoz

Date: April 7, 2012

Re: Hearing request for CSHB 343 (JUD) am; bill packet

I respectfully request a hearing on CSHB 343 (JUD) am, relating to the disclosure of children's information, in the Senate Judiciary Committee at your earliest convenience.

Attached to this memo please find:

- HB 343 – the latest and earlier versions
- A sponsor statement for the latest version of the bill, which also contains an explanation of the differences between the various versions of the bill
- A sectional analysis for the latest version of the bill
- Fiscal notes
- Various back-up documents including letters of support

The contact for the bill is Christopher Clark, 465-4712.

Thank you.

Alaska State Capitol, Room 403 Juneau, Alaska 99801 (907) 465-3744

REPRESENTATIVE CATHY MUÑOZ

SPONSOR STATEMENT
CSHB 343 (JUD) AM

"An Act relating to disclosure of records of the Department of Health and Social Services pertaining to children in certain circumstances; and providing for an effective date."

House Bill 343 was introduced at the request of the Alaska Department of Health and Social Services to:

1) Assure that the Division of Juvenile Justice and the Office of Children's Services could exchange information to provide necessary services to children without undue delay.

2) Allow individuals with a legitimate interest – such as former clients who once were children in state custody, their parents, or guardians – to receive information about delinquency history and health records from the Division of Juvenile Justice to help them apply for jobs, obtain student loans, or get health care.

3) Clarify current law regarding public disclosure of juvenile information which state officials say is cumbersome and difficult to interpret. The legislation strives to preserve legislative intent of balancing public safety through disclosing appropriate information on serious offenders while protecting the confidentially of offenders who pose less risk to society.

The House Health and Social Services Committee made one change to the original bill on March 15, 2012. Under Section 4, the public disclosure provision, page 5, line 15, it amended the measure to exclude misconduct involving weapons in the fifth degree. The disclosure provisions of the bill now apply to misconduct involving weapons in the first through fourth degrees.

The House Judiciary Committee made one change to CSHB 343 (HSS) on March 28, 2012. Under Section 4, it amended when the department could disclose information involving a minor who has committed a serious crime so that it could do so only if a court has adjudicated the youth as delinquent. The original bill required three steps before such a disclosure: (1) having the state file a petition seeking adjudication of a minor as a delinquent; (2) having a court arraign a minor on that petition; and, (3) having a court find that probable cause exists that a minor committed the offense.

The House approved an amendment to the bill on April 6, 2012, that would allow a court to review an objection to the Office of Children's Service's disclosing information to the Division of Juvenile Justice. The person making such a motion would bear the burden of establishing by a preponderance of the evidence that such a disclosure would not be in a child's best interest.

CSHB 343 (JUD) am is supported by the Division of Juvenile Justice and the Office of Children's Services, which also supported the above changes made in committee and on the House floor.

Date: April 7, 2012

Re: Sectional analysis of CSHB 343 (JUD) am, relating to the disclosure of children's records

---

Kindly note that a sectional analysis of a bill or resolution should not be considered an authoritative interpretation of the measure itself. The legislation itself is the best statement of its contents.

Section 1. Amends AS 47.10.093(b), the state law on the disclosure of agency records that relates to children in need of aid, by adding two new subsections to allow the state Office of Children's Services to:

- Disclose confidential information regarding a child's case to a licensed child placement agency as needed to provide services for that child. See subsection (14), page 2, lines 30-31.
- Exchange current and historical case management records with the state Division of Juvenile Justice and agencies in other jurisdictions that are responsible for delinquent minors. It also would allow a court to review an objection to the Office of Children's Service's disclosing information to the Division of Juvenile Justice. The person making such a motion would bear the burden of establishing by a preponderance of the evidence that such a disclosure would not be in a child's best interest. See subsection (15), page 3, lines 1-7.

Section 2. Amends AS 47.12.310(b), the state law on agency records that relates to delinquent minors, by adding two new subsections to allow the state Division of Juvenile Justice to:

- Disclose confidential information regarding a case of a minor, who is subject to the jurisdiction of a court, to a licensed child placement agency as needed to provide services for that child. See subsection (L), page 4, lines 14-16.
- Exchange current and historical case management records with the state Office of Children's Services and agencies in other jurisdictions that are responsible for child protection services. See subsection (M), page 34, lines 17-21.

Section 3. Amends AS 47.12.310(f), the state law on agency records that relates to delinquent minors, by allowing the Division of Juvenile Justice to adopt regulations delineating what information it may release to someone who has a legitimate interest in a minor who is subject to the jurisdiction of the state

---

Department of Health and Social Services. The provision also allows the division to set standards for identifying a legitimate interest in such records. See page 4, lines 26-31, and page 5, line 1.

Current law does not allow the division to release certain information about minors while they were under the jurisdiction of a court. A problem arises when former clients ask the agency for records about their contacts with the department while they were minors. The existing law would allow the agency to release information only if a minor's charges had been adjusted or if the minor had been placed on informal probation. Anything related to adjudications would not be available for release. This restriction can hurt those who need records for legitimate reasons such as applying for a job, obtaining student loans, or getting health care. This proposal is intended to help them as well as parents, guardians, or others who have a legitimate interest in this.

Section 4. Repeals and reenacts AS 47.12.315, the statute on public disclosure of information in agency records relating to certain minors. See page 5, lines 2-31, and page 6, lines 1-18.

This allows the Department of Health and Social Services to disclose information to the public, upon request, concerning a minor who is subject to the law on delinquent minors, AS 47.12. A child is someone who is at least 13 years of age at the time of committing a felony offense such as murder, manslaughter, assault, kidnapping, and other crimes as described under AS 11.41 as well as arson in the first or second degree, burglary in the first degree, distribution of child pornography, promoting prostitution in the first degree, misconduct involving a controlled substance in the first, second, or third degrees involving distribution or possession with intent to deliver, or misconduct involving weapons in the first through fifth degrees.

Current law allows public disclosure on informal adjustments for specified crimes or offenders who were previously adjudicated on any felony and are petitioned again for another felony.

The bill allows the Department of Health and Social Services to disclose information involving a minor who has committed a serious crime only if a court has adjudicated the youth as delinquent.

This new section will ensure that a juvenile's arrest on a charge that was determined by a judge to lack legal sufficiency will not be subject to public disclosure.

Other subsections describe what may be disclosed and prohibit releasing names of victims and out-of-home care providers. They allow the agency to disclose information electronically recovered from a computer database and prohibit the release of records after five years from the date the state is first required or authorized to make a disclosure. They would allow the department to petition a court for an order prohibiting disclosure if the court finds the crime was an isolated incident and the minor does not present any further danger to the public or if the victim agrees disclosure is inappropriate.

The final subsection defines out-of-home provider as someone who is other than a child's legal parents and with whom that minor is in state custody. This includes a foster parent, a child's relative, and a person who seeks to adopt or become a guardian of the minor.

Section 5. Amends uncodified law by adding a new section to allow the Department of Health and Social Services to adopt regulations as necessary to implement the changes made by this legislation.

Section 6. Provides for an immediate effective date for section 5.

Section 7. Provides an effective date for sections 1 through 4 of July 1, 2012.

STATE OF ALASKA

DEPARTMENT OF HEALTH AND SOCIAL SERVICES

DIVISION OF JUVENILE JUSTICE

*Sean Parnell, **GOVERNOR***

February 24, 2012

Representative Cathy Muñoz
Alaska State Capitol Room 403
Juneau AK, 99801

Dear Representative Muñoz:

Thank you for your sponsorship of House Bill 343. The Division of Juvenile Justice fully supports this bill.

This bill makes several improvements to Alaska law regarding sharing and disclosure of juvenile information. Sections 1 and 2 clarify the authority of the Office of Children's Services (OCS) and the Division of Juvenile Justice (DJJ) to share records with each other to assist clients and to protect the public. Since 1999, when the Department of Health and Social Services split the Division of Family and Youth Services into two divisions (OCS and DJJ), there has been inconsistent understanding of the ability of these two agencies to share case information. The bill would amend AS 47.10.093 and AS 47.12.310 by stating clearly the legal authority for the sister divisions to provide necessary care and services without undue delay.

This bill will also provide clarification in AS 47.12.310 to allow individuals with a legitimate interest (e.g. former clients, parents, guardians) to receive information from the Division of Juvenile Justice to facilitate employment, health care, and other needs. The Division of Juvenile Justice routinely receives inquiries from former clients seeking information about their delinquency history, but statute has not been clear about our ability to provide this information to them. The change provided in the bill would allow the Division to develop regulations that provide this clarity. The changes proposed in Section 3 of the bill also will ensure that the state is in alignment with the federal HIPAA law. These changes are important to make because of the increasing frequency with which agencies and employers use barrier crimes and background checks to determine the fitness of candidates for employment and services, and the increased expectation that individuals have access to their own health care information.

Section 4 of the bill makes changes to AS 47.12.315, which allows public access to information regarding certain juvenile offenders. The original intention of this 1997 law was to increase the availability of some types of juvenile information to the general public. However, the practical application of this law has proved to be challenging. Division staff have found the law difficult to interpret and convey to juvenile offenders and the public. The changes proposed will expedite the ability of division staff to determine whether information on a particular juvenile or offense can be disclosed. The revision to the public disclosure law preserves the legislative intent of balancing public safety and confidentiality of juvenile records by disclosing appropriate information regarding more serious offenders while preserving confidentially of offenders posing less risk to the community.

Thank you for your leadership on these issues. The Division of Juvenile Justice looks forward to providing research and testimony in support of House Bill 343.

Respectfully,

Barbara Henjum

February 27, 2012

Representative Cathy Munoz
Alaska State Capitol
Room 403
Juneau, AK 99801

Dear Representative Munoz:

Thank you for sponsoring House Bill 343 Disclosure of Children's Records.

The Office of Children's Services supports this bill because it will allow improvements in our ability to exchange necessary, important information with our sister agency, the Division of Juvenile Justice. While throughout most of Alaska it is understood that our agencies can share information regarding our clients to ensure efficient use of resources and the best approaches to working with their families, occasional misunderstanding about this relationship among Departmental staff, attorneys, families, and judges can lead to confusion, withholding of information, and even court action to suppress sharing of information when actually the exchange can lead to better case management and more appropriate services for the child.

Many national organizations, including the Child Welfare League of America, have noted the benefits and importance of improved coordination between juvenile justice and child protection agencies.

The bill also includes provisions recommended by our Office that will facilitate better information sharing between child protection and juvenile justice agencies and Alaska's child placement agencies. These agencies license foster homes and place children in them. Both Juvenile Justice and Children's Services rely on child placement agencies to provide services for youth under our jurisdiction; better coordination with these agencies will only improve our ability to serve them.

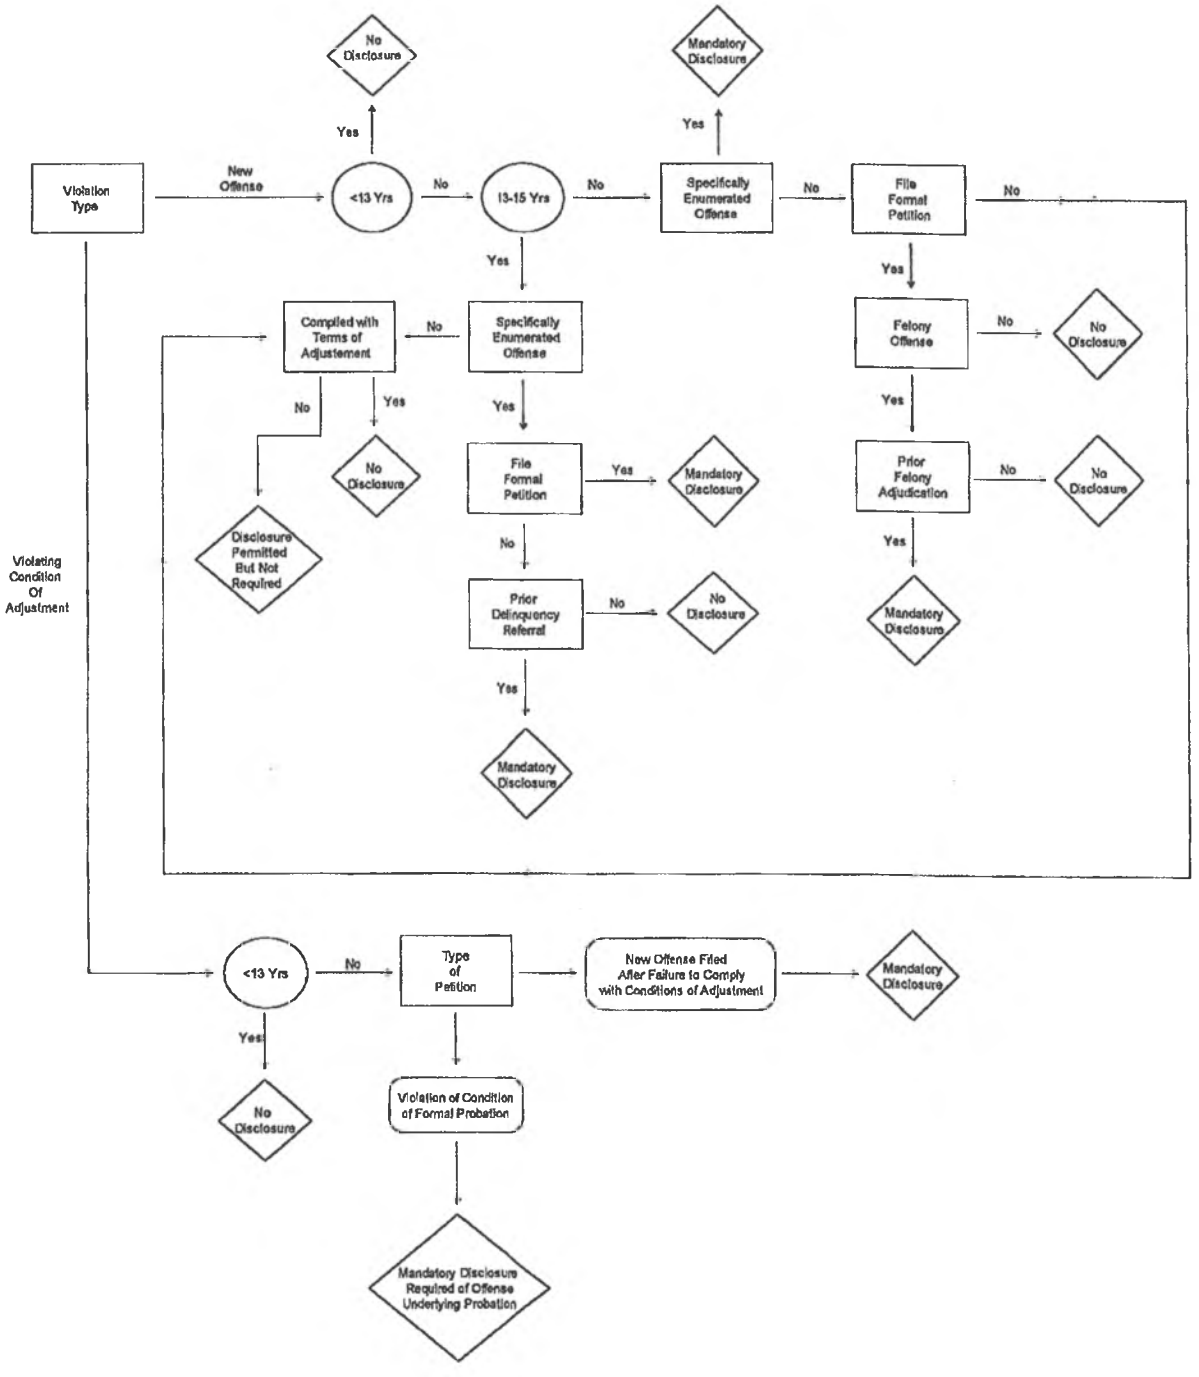
Please contact me if I can answer any questions or be of other assistance.

Sincerely,

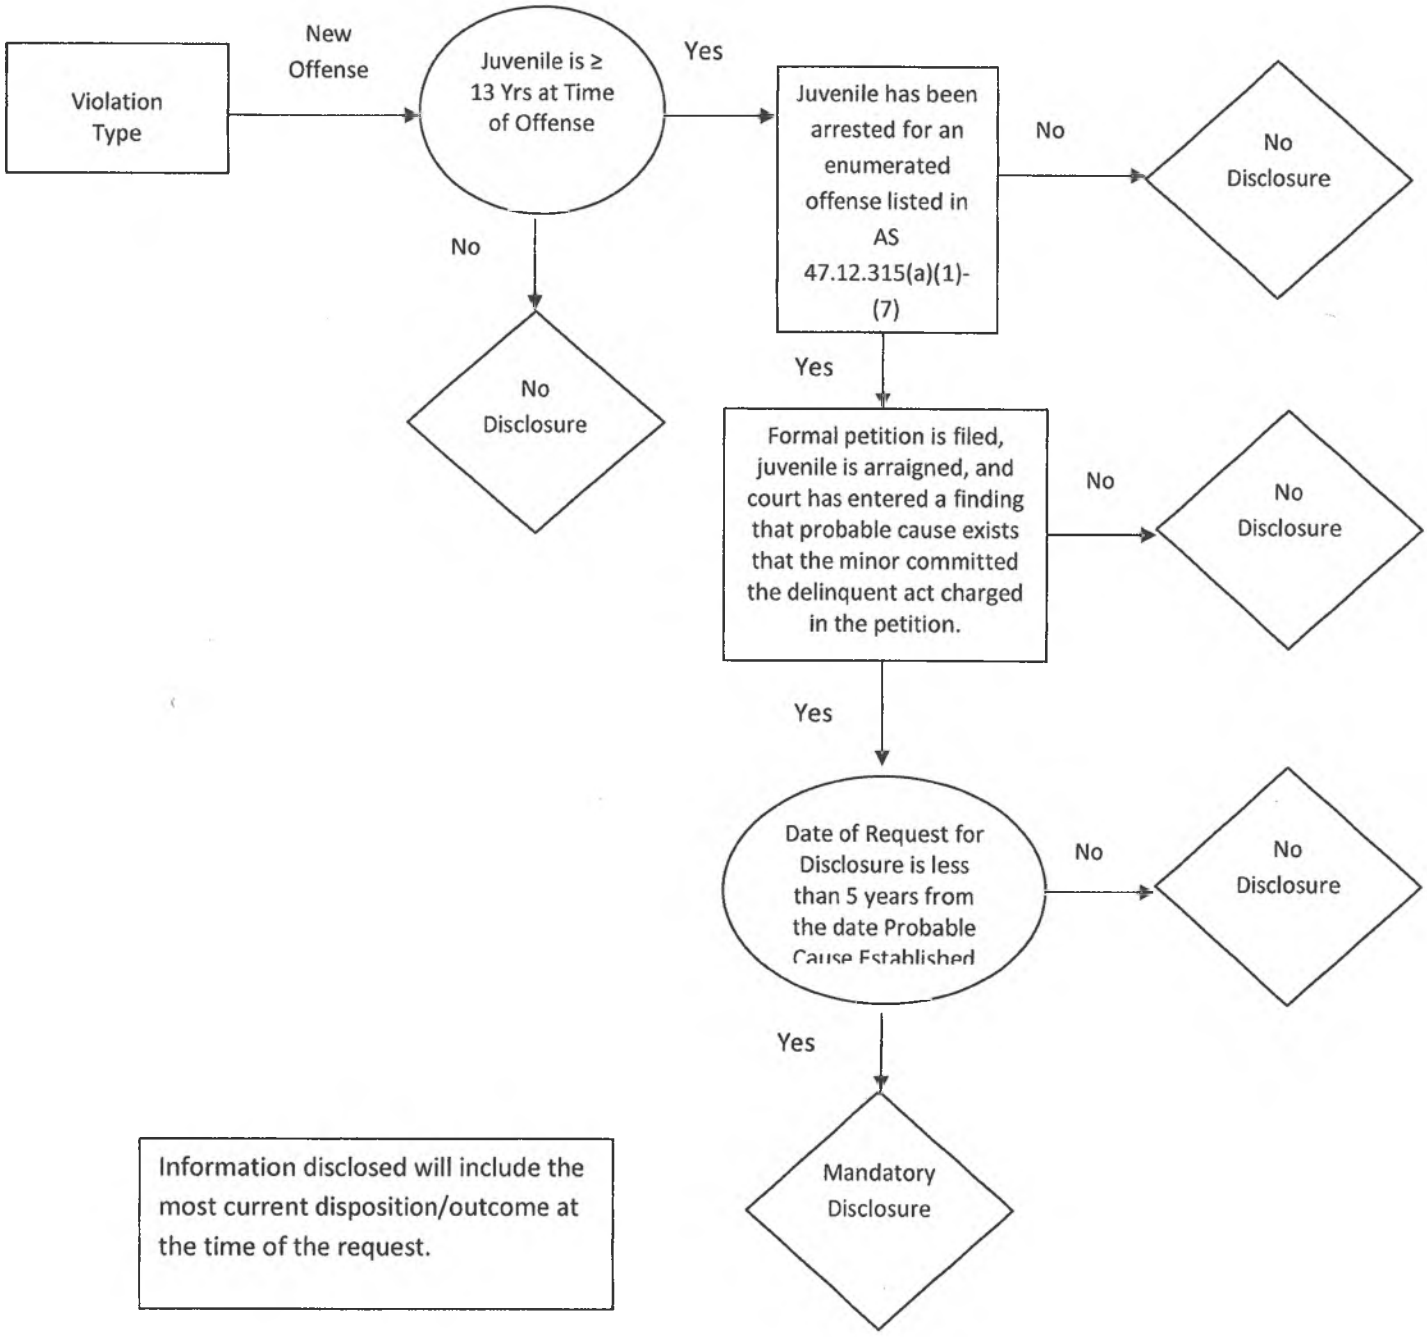
C. Lawton

Christy Lawton
Director

CURRENT DISCLOSURE LAW



PROPOSED JUVENILE DISCLOSURE LAW – 2/6/2012



CSHB 343 (HSS): Disclosure of Children's Information

Side-by-Side Comparison of AS 47.12.315

Public Disclosure of information in department records relating to certain minors

Current Law	How HB 343 Would Change It
Information shall be disclosed for a minor at least 13 years old, who has a history of an informal adjustment action for any offense referred after 9/2/92, and an adjustment plan is being implemented following a current referral for one of the following offenses: 1. A crime against a person punishable as a felony; 2. A crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime; 3. Arson under AS 11.46.400 – 11.46.410 4. Burglary under AS 11.46.300 5. Distribution of child pornography under AS 11.61.125; 6. Promoting prostitution in the first degree under AS 11.66.110; or 7. Misconduct Involving a Controlled Substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050.	The proposal requires that the minor alleged to have committed one of the listed offenses be petitioned to a court on the offense, and that the court find probable cause that the offense was committed, for information on the offense to be publicly disclosable. The proposal changes #2 of the enumerated offenses from "a crime in which the minor employed a deadly weapon," to "Misconduct Involving Weapons in the First through Fifth Degrees." NOTE: the H-HSS Committee amended the bill to <u>exclude</u> Misconduct Involving Weapons in the Fifth Degree.
Information MAY be disclosed for a minor at least 13 years of age who knowingly fails to comply with all the terms of an informal adjustment for any offense referred after 9/2/92.	The proposal does not allow for discretionary public disclosure of information when minors fail to comply with terms of an informal adjustment.
Information shall be disclosed for a minor when the Department has filed a petition for adjudication, the minor was at least 13 years old at the time of the offense, and the petition is filed for any offense as a result of the minor's failure to comply with terms of an informal adjustment plan.	The proposal requires that, for information on an offense to be disclosed publicly, a minor must be alleged to have committed one of the "enumerated offenses" above (1-7); the offense must be petitioned to a court; and the court must find probable cause. Previous noncompliance with an informal adjustment plan does not determine whether the information is disclosable.
Information shall be disclosed for a minor when the Department has filed a petition for adjudication, the minor was at least 13 years old at the time of the offense, the offense occurred after 1/1/98, the offense resulted in a court order, and the minor violated a condition of the court order.	The proposal requires that, for information on an offense to be disclosed publicly, a minor must be alleged to have committed one of the "enumerated offenses" above (1-7); the offense must be petitioned to a court; and the court must find probable cause. A violation of a court order connected to the petitioned offense does not determine whether the information is disclosable.

CSHB 343 (HSS): Disclosure of Children's Information

Side-by-Side Comparison of AS 47.12.315

Public Disclosure of information in department records relating to certain minors

Current Law	How HB 343 Would Change It
Information shall be disclosed for a minor at least 13 years old and a petition for adjudication is filed for commission of: 1. An offense against a person punishable as a felony 2. An offense in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime; 3. Arson under AS 11.46.400 – 11.46.410 4. Burglary under AS 11.46.300 5. Distribution of child pornography under AS 11.61.125; 6. Promoting prostitution in the first degree under AS 11.66.110; or 7. Misconduct Involving a Controlled Substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050.	The proposal requires that a court must find probable cause on a petition filed on one of these "enumerated offenses (1-7). The proposal also changes #2 of the enumerated offenses from "a crime in which the minor employed a deadly weapon," to "Misconduct Involving Weapons in the First through Fifth Degrees." NOTE: the H-HSS Committee amended the bill to exclude Misconduct Involving Weapons in the Fifth Degree from public disclosure.
Information shall be disclosed for a minor at least 16 years old and a petition is filed for commission of a felony and the minor has previously been adjudicated or convicted of a felony offense.	The proposal requires that, for information on an offense to be disclosed publicly, a minor must be alleged to have committed one of the "enumerated offenses" above (1-7); the offense must be petitioned to a court; and the court must find probable cause that the minor committed the offense. Previous adjudication on a felony offense does not determine whether or not information on one of these offenses is disclosable.
Information to be disclosed shall include the name of the minor, the name or names of the minor's parent or guardian, the alleged offense exclusive of information that identifies the victim, and, when available, the outcomes of the proceeding in the court when a petition is filed or the action required by the Dept.	No change.
If the agency or a court determines that the matter should be dismissed or minor is not delinquent and case dismissed, the minor may request that the department disclose the disposition of the matter.	The Department will release most current outcome information at the time of the request.

CSHB 343 (HSS): Disclosure of Children's Information

Side-by-Side Comparison of AS 47.12.315

Public Disclosure of information in department records relating to certain minors

Current Law	How HB 343 Would Change It
When disclosing information under this statute, the Dept. may not disclose the name of an out-of-home care provider with whom the minor was living at the time the minor was alleged to have committed the offense if the minor had been placed in out-of-home care with that provider on other than a permanent or long-term basis.	No change under the proposal except to move the final phrase: "if the minor had been placed in out-of-home care with that provider on other than a permanent or long-term basis." A new subsection (h) defines the out-of-home care providers who provide care on other than a permanent or long-term basis and their names are not to be disclosed.
If the Dept. maintains the information to be disclosed by electronic means that can be recovered from a computer data base, the Dept. may disclose the info in that medium.	No change under the proposal except to add the phrase "or other state or municipal agency" to this subsection.
The Dept. may not release information about a minor under this section if the offense allegedly committed by the minor occurred before 1/1/98. The authority to release information under this section is limited to 5 years from the date the Dept. is first authorized to make the disclosure. However, the limitation of this section does not apply if the Dept. determines that during the 5-year period the minor knowingly failed to make all restitution payments or committed a felony.	The Dept. may not release information under this section after 5 years from the date the department or other agency is first required or authorized to make the disclosure under this section.
When disclosure of information is dependent on the minor's previous conviction or adjudication as a delinquent, or on the minor's failure to comply with all terms required or imposed, the Dept. shall consider the minor's previous conviction or delinquency adjudication, or a term or condition required or imposed on the minor, that occurred before 9/2/97, but may not consider a conviction or adjudication that occurred, or a term or condition that was required or imposed, earlier than five years before 9/2/97.	Since the proposal does not require a previous adjudication or failure to comply with an adjustment for information to be disclosable, this subsection will not apply.

AS 47.12.315. Public disclosure of information in agency records relating to certain minors.

(a) Notwithstanding AS 47.12.310, when an agency takes action under AS 47.12.040(a)(1) to adjust a matter, or when under AS 47.12.040(a)(2) the court directs the agency to adjust the matter, the agency

(1) shall, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense, if the minor was, under AS 47.12.020, previously alleged to be a delinquent minor on the basis of the minor's commission of at least one offense and, on the basis of that allegation, a state agency has, under AS 47.12.040(a), been asked to make a preliminary inquiry to determine if any action on that matter is appropriate, and, if the minor is alleged to be a delinquent minor on the basis of the minor's commission of another offense, exercise of agency jurisdiction is based on the minor's alleged commission of that other offense, and that other offense is one of the following:

(A) a crime against a person that is punishable as a felony;

(B) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(C) arson under AS 11.46.400 - 11.46.410;

(D) burglary under AS 11.46.300;

(E) distribution of child pornography under AS 11.61.125;

(F) promoting prostitution in the first degree under AS 11.66.110; or

(G) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; and

(2) may, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense if the minor has knowingly failed to comply with all terms and conditions required of the minor by the agency to adjust the matter under AS 47.12.060(b).

(b) The department shall publicly disclose the name of a minor, the name or names of the minor's parent, parents, or guardian, and the alleged offense exclusive of information that identifies the victim of the offense, and, when available, the outcome of proceedings before the court if, under AS 47.12.040(a)(1)(B) or AS 47.12.040(a)(2), the department files with the court a petition seeking adjudication of the minor as a delinquent based on

(1) the minor's alleged commission of an offense, the minor was at least 13 years of age at the time of commission of the offense, and the minor has knowingly failed to comply with all the terms and conditions required of the minor by the department or imposed on the minor in a court order entered under AS 47.12.040(a)(2) or 47.12.120;

(2) the minor's alleged commission of an offense set out in this paragraph and the minor was at least 13 years of age at the time of commission of the offense; the provisions of this paragraph apply to the minor's commission of

(A) a crime against a person that is punishable as a felony;

(B) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(C) arson under AS 11.46.400 - 11.46.410;

(D) burglary under AS 11.46.300;

(E) distribution of child pornography under AS 11.61.125;

(F) promoting prostitution in the first degree under AS 11.66.110; or

(G) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; or

(3) the minor's alleged commission of a felony and the minor was 16 years of age or older at the time of commission of the offense when the minor has previously been convicted or adjudicated a delinquent minor based on the minor's commission of an offense that is a felony.

(c) If, under AS 47.12.060(a), the agency determines that a matter should be dismissed or if, under AS 47.12.120(c), the court finds that a minor is not delinquent and dismisses the case against the minor, the minor may request the department to disclose information about the matter or the case to the public. If the minor makes a request under this subsection, the department shall disclose to the public information about the disposition of the matter or case under AS 47.12.060(a) or 47.12.120(c), as appropriate, exclusive of information that identifies the victim of the alleged offense.

(d) When required by this section to disclose information,

(1) the department or other agency may not disclose the name of an out-of-home care provider with whom the minor was living at the time the minor was alleged to have committed the offense if the minor had been placed in out-of-home care with that provider on other than a permanent or long-term basis; in this paragraph, "out-of-home care provider" means an agency or person, other than the child's legal parents, with whom a child who is in the custody of the state under AS 47.10.080(c)(1) or (3), 47.10.142, or AS 47.14.100(c) is currently placed; "agency or person" includes a foster parent, a relative other than a parent, a person who has petitioned for adoption of the child, and a residential child care facility;

(2) if the department or other agency maintains the information to be disclosed by electronic means that can be recovered from a computer data base, the department or agency may disclose the information in that medium.

(e) The department or an agency may not release information about a minor under this section if the offense allegedly committed by the minor on which the information is based occurred before January 1, 1998. The authority to release information under this section is limited to five years from the date the department or other agency is first required or authorized to make the disclosure. However, the limitation of this section does not apply if the department or other agency determines that during the five-year period the minor

(1) has knowingly failed to make all restitution payments required of the minor by AS 47.12.060(b) or 47.12.120(b)(4); or

(2) has committed a crime punishable as a felony.

(f) When disclosure is required under this section, the department may petition the court for an order prohibiting the disclosure. The court may grant the petition if, on the basis of information presented in the petition or at an in camera hearing held on the petition, the court finds that

(1) the crime was an isolated incident and the minor does not present any further danger to the public; or

(2) the victim agrees that disclosure is inappropriate.

(g) In this section, when disclosure of information is dependent on the minor's previous conviction or adjudication as a delinquent, or on the minor's failure to comply with all terms and conditions required of or imposed on the minor, the department or other agency required to make the disclosure shall consider the minor's previous conviction or delinquency adjudication, or a term or condition required or imposed on the minor, that occurred before September 2, 1997, but may not consider a conviction or adjudication that occurred or a term or condition that was required or imposed earlier than five years before September 2, 1997.

FISCAL NOTE #1

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 343(HSS)

Analysis

This bill makes changes to the statutes governing the disclosure of information and records of minors involved in Child in Need of Aid or Juvenile Delinquency proceedings. These changes allow for the disclosure of information needed to administer services, rehabilitation and supervision to and from state, municipal, and child placement agencies that are responsible for delinquent minors and child protection services. The Office of Public Advocacy does not anticipate a fiscal impact from these changes and therefore submits a zero impact fiscal note.

BILL NO. CSHB 343(HSS)

Analysis

The proposed bill will:
1. Provide statutory clarification for information sharing between the Office of Children's Services and the Division of Juvenile Justice (DJJ) for the administration of services, protection, rehabilitation, or supervision of any child or for actions by that agency to protect the public safety;
2. Allow individuals with a legitimate interest (such as former clients of DJJ, parents, legal guardians, and others) access to information in agency records; and
3. Streamline the public disclosure law while ensuring appropriate disclosure of certain information to protect the public.

There will be no fiscal impact to DJJ with this bill.
