CHAIR JAMES said, "If any one of us has traveled ... and we talk to somebody who is a campaign chairman or something, it wouldn't necessarily happen with the legislator because the legislator is going to be traveling within their own district. ... It's 250 miles from one end of my district to the other and I live in one end, and if I go down the other end - sometimes I go down there for business and sometimes I go down there because I'm campaigning - and it's not like buying an airplane ticket because I don't fly to get there I get in my car and I drive. And then if it's legislative business I turn in the mileage and any expense I had as a legislative trip. If I'm going down there, and going to be campaigning, or having a fund-raiser or something, then I don't do that. I don't turn that in. And so there is a decision as to whether or not you're going on state business or not."

CHAIR JAMES said, "But generally when you're talking about traveling some place on state business, having a fund-raiser happens a lot when we have fund-raisers in Anchorage and I'm in Fairbanks. And so if I'm going to travel down there, even if I'm traveling on fund-raising money, my campaign account is an example, and I'm going to be there for several days, I'm going to do legislative business too, which could be in an election year considered to be almost campaigning too - if I'm going to be talking to the people that I want to talk about, about future issues (indisc.) help as to how things should be addressed. We have many times caucuses in Anchorage, and then we also have a fund-raiser when we have a caucus. To me the caucus is happening because we have the fund-raiser. I'll pay my way with my campaign account to get there. In fact, we don't usually get any reimbursement for going to a caucus anyway because it's a political issue. So, the only time that I would be down there on state business is if I'm going to be there for some kind of a hearing, some kind of a committee meeting, or something to that effect. And if it happens to be that there's a fund-raiser scheduled at that same time, then I either should pay for my way to get down there, under this law, or with my campaign funds, or I should go back home and come back again, one way or the other, or I shouldn't go to the fund-raiser. Now that may affect some of the ways we've been doing things in the legislature because it is true, if we happen to have committee meetings or something and there is a fund-raiser, that there probably are some cases in the past where I was paid to go to Anchorage and back because of the committee. I don't know of any specifics, but there could have been, and I don't know that that ever happened. But it's a possibility, probably not under the current campaign finance law where you can't do any fund-raising in the off-year, then that might not be the case. And so I didn't go to any -- but they had some fund-raisers in this last campaign year for the party, I didn't go to any of them. So I know I haven't done that. But this would make it perfectly clear, that if you're going anywhere to attend a fund-raiser - and the only ones I could think of would be going to Anchorage because that is where a lot of fund-raisers are happening. You don't use state funds to get

there, and I'm perfectly comfortable with that, I think it's a good thing to put into law."

CHAIR JAMES said, as far as the governor is concerned she believes that is also the case. That during an election year, it can't happen in the other three years before that, and it can't happen under this current law because there can't be any fund-raising in those three years. It's only in the year of the campaign that the advantage of the governor and the lieutenant governor is (indisc.) in their being able to travel the state on governmental business, and have a fund-raiser everywhere they go. Chair James indicated that is wrong in her estimation. It doesn't make it fair if the governor can travel all over the state, having fund-raisers and campaigning, and the challengers can't. What we're trying to do is to make a level playing field. She believes this is a rational way of doing it.

Number 0117

REPRESENTATIVE ELTON asked Ms. Barnett how comfortable she is now that the Legislative Ethics Committee is going to have this kind of oversight of the chief administrative officers of the State of Alaska which is under AS 24.60.

MS. BARNETT replied she still doesn't have the P version of the bill but is assuming that other section, page 47, must go under 39.50 or must appear in a different part.

MR. BROWN directed the members to page 1, line 21 of the amendment. He said it refers you to page 47 of Version P of the bill under the Executive Branch Ethics Act.

Number 0126

REPRESENTATIVE ELTON asked how does this effect, for example, the Democratic Party. Every year it has a fund-raiser that's a golf tournament in Anchorage, how would this affect participation. If a person were in Anchorage on business, would they have to return, and then go back assuming that part of those receipts go to the Democratic Party and then to candidates?

MR. BROWN replied, "Right now, all this party building fund-raising - governor's funds, House and Senate Majority fund, those are not fund-raising events for individual candidates. This ban wouldn't apply to those, this is not a very wide net, this net is cast specifically for fund-raisers for individual campaigns. And the biggest one I'd like is, it doesn't apply to campaigning it applies to fund-raising. You can still go kiss every baby you want to, and shake every hand you want to, and hand out a million little plastic flags, you just can't raise money. ... So I don't think it's an onerous intrusion upon the rights of the incumbents to continue behaving politically, it's just targeting a very specific form of their activity which is raising money for themselves. If they were raising money in the off-year for themselves, they'd be violating the Campaign Finance Act. So those have to be party fund-raisers."

CHAIR JAMES reiterated that when you are raising money for your campaign, it doesn't seem right to have the expense of that fund-raiser be paid for by the state, that's the issue. She emphasized, if you get there at state expense, you better pay it back with your campaign expense. It's that simple.

MS. BARNETT referred to Representative Elton's question. She said she's not quite sure that it is clear in this language that it is a fund-raising event solely for that legislator. Maybe there's a way to clean that up a little bit more. She said she's not arguing at all with the notion, or concept. Ms. Barnett said it could be confusing if there was a party fund-raiser where moneys ended up in that legislator's hand at a later point.

REPRESENTATIVE BERKOWITZ said, "When the legislator plans, I think that's the determining phrase, if the party plans, it is something else."

CHAIR JAMES mentioned she is also having a problem with that. She said she is thinking of some of the fund-raisers that occurred in the campaign year. In particular, a majority fund-raiser where individual checks were made out to candidates. She indicated she doesn't feel comfortable with saying that because it's a party event.

MR. BROWN explained, under the Campaign Finance Act, those are reportable either as contributions to the party or to your campaign. The clarity exists in the Campaign Finance Act. He said, "You would be planning to hold an event - if there was a basket with your name on it at the event. If there was only a basket that said 'House Majority Fund' at the event - you know under the law you have no guarantee of receipt of those funds in your personal campaign even though you might be shaking people (indisc.). So I don't know how to go beyond the clarity of an APOC [Alaska Public Offices Commission] has to go on, when very likely some of those funds will end up in your campaign coffer. But they're going through the party first, and they're reportable to the party, and then the party has to report its donation to you, and someone has to make that decision."

Number 0160

CHAIR JAMES reiterated that she understands the intent and that she is not comfortable with the language as well because it's not specific enough.

MS. BARNETT referred to 24.60.031. She said in the existing law there is something that says a legislator or a legislative employee may not accept money from an event held during a legislative session. She said this language may help:

> if a substantial purpose of the event is to raise money on behalf of the member for campaign purposes

MS. BARNETT stated she is a little more comfortable with that where it targets that person.

CHAIR JAMES said she is willing to put Amendment P.2 aside since we will be working on it between now and Saturday to come up with something that's more definitive.

MR. BROWN said, "I asked the drafter, 'Do we know what a fund-raising event is,' and she said 'yes, it's a fund-raising event,' just like you [Chair James] said. So there are times when you want to define, and there are times when you think the language is going to do the job itself. But I think it's -- if there's some gray

area, that's the point of concern here is what's a fund-raising event - if it's party building, if it's a majority event. So I'm happy to work with the drafter and actually put a definition in for the purposes of the subsection of the Legislative Ethics Code and the Executive Branch Ethics Act."

REPRESENTATIVE BERKOWITZ said, another thing, when you're looking at the executive branch, not all governors call Juneau home.

MR. BROWN responded, "It's like a tax home. You have to take a home and not have it, you can't have two. Juneau has to be your home, it is, the governor's house is here - some governor's have chosen not to reside in it - in a very regular basis and they might take exception to that." He said he didn't know if it is possible to craft a statute to enable the governor to say, "I don't want to live in Juneau..."

CHAIR JAMES said she would venture to say that wherever the governor lives that when he goes back and forth between Juneau and that place, he's paid for at state expense, so the same applies.

MR. BROWN remarked that only one of them can be - he can only come home in one direction, you can't be going home both ways. He said, "If you have a suggestion about giving the Chief Executive the option of declaring some other place in the capital city his or her home for the purposes of their term office, I think it would be to that governor's disadvantage to pick some place besides Juneau, unless the governor's really not going to spend very much time here. But if the governor's really going to spend (indisc.) time here..."

REPRESENTATIVE BERKOWITZ said he spends four months of the year here and this doesn't make Juneau his home. If he is living in Clark for example that would be his home.

MR. BROWN said, "That's fine, but I'm going to say it's probably to your advantage, as the governor who wants to raise money. By the way he was the last governor who ran as an incumbent, right. So that's the last time we dealt with this issue really since the last two governors (indisc.) haven't run for reelection - or three. But the issue here is, do you want to be able to come back to Lake Clark and have unlimited fund-raisers within 48 hours, or do you want to be able to come back to Juneau and do that. So you can give the person the option, but they still have to pick one place."

REPRESENTATIVE BERKOWITZ said he doesn't want, by law that we declare that Juneau is the governor's home.

REPRESENTATIVE ELTON stated that he is not totally bothered by that.

MR. BROWN said, "For the purposes of the subsection."

REPRESENTATIVE BERKOWITZ reported that he's raised the point, he's thrown it out there, we've chewed on it, and now he's letting it go.

Number 0196

REPRESENTATIVE HODGINS said, "While we were pondering about the definition of frivolous, I wonder if we should ponder about the

definition of high-centered. I think there's some important stuff in this amendment as I pointed out earlier. My discomfort with the language was discriminatory about my situation. If I traveled to Anchorage from Kenai which I do quite a bit on state business the day before a fund-raiser, I can't really, the way the existing law is, is I cannot really accept - I have to travel on my own nickel even it's going to be for state business if it's 48 hours. This amendment allows me to make a round-trip the day of the thing at my expense and then to attend a fund-raiser which I think is very appropriate. And I would hope that we would go ahead and move this amendment, or some portion of this amendment. I don't have any problem on waiting until Saturday even though I detest Saturday meetings. As long as we don't get high-centered, I'll be here. But if we continue to get high-centered I won't be here."

MR. BROWN suggested the committee adopt the amendment now. He said he can bring forward a definition of a fund-raising event, or we can take this away and come back with one remembering everything that's been discussed.

Number 0209

CHAIR JAMES announced if there's no objection, we'll just set P.2 aside and deal with it again on Saturday. She said this bill is not leaving this committee without this provision in it.

REPRESENTATIVE BERKOWITZ said he thinks we just got off-center.

20th Legislature(1997-1998)
Committee Minutes
HOUSE STATE AFFAIRS
Apr 21, 1998

SB 105 - ETHICS/LOBBYING/CAMPAIGN FINANCE

Number 0088

CHAIR JAMES announced the next order of business is CSSB 105(FIN) am, "An Act relating to legislative and executive branch ethics; relating to campaign finances for candidates for state office; relating to the conduct and regulation of lobbyists with respect to public officials; relating to the filing of disclosures by certain state employees and officials; making a conforming amendment to the definition of 'public official' for employment security statutes; and providing for an effective date."

Number 0090

BEN BROWN, Legislative Administrative Assistant to Senator Kelly Alaska State Legislature, came before the committee. He stated he distributed the revised work draft, LS0079\Q, Cramer, 4/20/98, that incorporates all the amendments made at the last meeting of the State Affairs Committee.

MR. BROWN also distributed Amendment Q.1 that reflects some concerns that other members of the House had, who probably won't have an opportunity to look at the bill in committee themselves.

Number 0096

REPRESENTATIVE MARK HODGINS asked if travel at state expense is included in the amendment.

MR. BROWN replied it is in both sections, the legislative ethics section and the executive branch ethics section. Mr. Brown referred to Section 17, page 15, AS 24.60.031 adds a new subsection on fund-raising during session. Section 74, page 48, AS 39.52.120. The provisions of the two are very similar and they do allow you to "double-back" as long as you pay for your trip - the most recent time you travel somewhere, then there's no 48 hours...

Number 0109

REPRESENTATIVE HODGINS had a question on Section 17, page 15, beginning on line 10.

> (2) legislator made a trip at state expense to a place, returned from that place, and then, within 48 hours, made a second trip to the place and the cost of the second trip was not paid for at state expense;

REPRESENTATIVE HODGINS said, "If I was in Fairbanks on state business, flew into Anchorage on my normal course of going home, and then I flew down to Kenai, and then returned, I haven't really returned to the place that I came from at state expense - which would be Fairbanks. ... I just wanted to make sure there's no problem. ... Let's say that I live in Fairbanks, and I flew on state business to Anchorage and then decided I was going to have a fund-raiser, and it was a heck of a lot cheaper for me to fly to

Kenai at my own money and back ... or I even traveled by car to Palmer and back at my own expense. Does then that absolve me from having to go back to Fairbanks before I have a fund-raiser?"

CHAIR JAMES stated she didn't believe the intent of this is to have you go back to Fairbanks.

Number 0127

REPRESENTATIVE HODGINS gave another example. He said, "Let's say that I lived in Kenai and I'm flying into Anchorage on state business, and then while I'm there I think, well I'm going to have a fund-raiser, there's a fund-raiser planned. Rather than go to Kenai again, if I just rented a car and drove to Palmer and back, made a trip out of town and back at my own expense, I guess that's what I'm asking. As long as you make a trip out of the location, and back at your own expense, it doesn't really matter where you go."

CHAIR JAMES indicated what she would do is reimburse the state out of her campaign money, the cost of getting from Kenai to Anchorage. If you're going to have a fund-raiser, you take your fund-raising money and pay your way to get there.

MR. BROWN stated if you look back at the beginning of prohibition, you may not travel at state expense to a place where you plan to hold a campaign fund-raising event. That's the initial rule you have to look at -- it's a matter of planning. He said, "The best way to protect yourself is to have the most - the leg immediately prior to the fund-raiser, not be paid for at state expense. Someone still might try to challenge you under this but that would be your best first line of defense. Don't pay the last leg of your journey with a state TR [travel request]."

Number 0149

MR. BROWN remarked, "I'm more concerned actually, because it just occurred to me while you were talking, that second might not work if you're really busy going back and forth, and it almost seems (indisc.) subsequent. (Indisc.). So I don't know that we've perfected this language yet, it's a thorny issue. And I don't think I see a problem sequential legs like you do. I think as long as your most recent leg -- we can only close it so tight and there's still going to be a tiny loophole and I think that's probably as tight as we can get it."

Number 0153

REPRESENTATIVE KIM ELTON said he agreed with Mr. Brown. Under the provisions, as amended, he believes the simplest way out the bind in that example would be, when you travel to Fairbanks at state expense, either drive to Anchorage at your own expense or fly to Anchorage at your own expense. Then you don't need to worry about it because you haven't arrived in Anchorage on a state TR.

Number 0159

REPRESENTATIVE HODGINS said his point is, can you cleanse it by taking a shorter trip someplace and going back. Obviously it's cheaper to buy a ticket to Kenai, and back and forth, or to drive to Palmer, back and forth, than it is to pay your own way from

Fairbanks.

Number 0175

CHAIR JAMES stated she doesn't believe this amendment will stay in the bill until the end. But it's very important to her because she doesn't believe they should be traveling on state expense for campaign fund-raising activities. She indicated she feels very strongly about it both on the legislative and governor's side. She would like to leave it in there.

REPRESENTATIVE HODGINS mentioned he agrees wholeheartedly, he's just looking at the loopholes.

Number 0215

REPRESENTATIVE HODGINS made a motion to adopt Amendment Q.1.

Number 0216

MR. BROWN suggested the committee adopt version Q as a work draft and then Amendment Q.1.

Number 0218

REPRESENTATIVE HODGINS amended his motion to adopt HCS CSSB 105, version Q, with the Amendment Q.1.

Number 0219

CHAIR JAMES said, "Before I accept that motion, let's say that we did have an amendment on the floor of Q.1, which will be displaced by this motion, to accept the CS Q and Q.1 the amendment, is there any objection."

REPRESENTATIVE ELTON asked Chair James to explain the motion. He indicated he heard a two-part motion that we adopt version Q and the amendment [Q.1].

CHAIR JAMES replied that's what they did.

Number 0225

REPRESENTATIVE HODGINS made a motion to adopt HCS CSSB 105, version LS0074\Q, there being no objections, that version was before the committee.

Number 0027

REPRESENTATIVE HODGINS made a motion to adopt Amendment Q.1.

Number 0289

REPRESENTATIVE ELTON objected. He said he would like to offer an amendment to the amendment on page 3, line 15 of the amendment.

Page 26, line 16 through 18:
Delete:

A person who requested an opinion, including a legislator, may not require admittance to an executive session of the committee when it is deliberating concerning the advisory opinion.

Number 0232

CHAIR JAMES objected. A roll call vote was taken. Representatives Berkowitz and Elton voted for the amendment. Representative Hodgins, Ivan, James and Ryan, voted against the amendment. The amendment to the amendment failed by a vote of 2-4.

CHAIR JAMES asked if there were any objections to Amendment Q.1. There being none, Amendment Q.1 was adopted.

Number 0240

CHAIR JAMES noted, "We have a fiscal note here, it's a draft, it's not signed, but we will probably have one signed before I move it on for $5,000 from the Attorney General's Office for additional staff time for the reporting that's required by this bill. So we need to move this fiscal note with it was well."

Number 0243

REPRESENTATIVE HODGINS made a motion to move HCS CSSB 105, version Q, as amended, with individual recommendations, and attached fiscal note.

Number 0246

REPRESENTATIVE ELTON objected.

CHAIR JAMES requested a roll call vote. Representatives Ryan, Hodgins, Ivan, James, Elton and Berkowitz voted to move HCS CSSB 105(STA). HCS CSSB 105(STA) moved from the House State Affairs Standing Committee.

20TH Legislature (1977-1998)
Committee Minutes
HOUSE FINANCE
April 24, 1998

SECTION 17: AS 24.60.031(c) BAN ON FUNDRAISING WHEN TRAVELING AT STATE EXPENSE This section adds new

subsections to the fundraising restrictions in the Legislative Ethics Code. Subsection (c) prevents travel at State expense to a place where a fundraiser is planned within 48 hours of the travel. It allows State-paid travel if the fundraiser is at least 48 hours after the travel occurs, if a subsequent trip (not paid for by the State) is made between the two locations, or if the travel is to convene or adjourn for a legislative session in the capital city. Subsection (e) defines `campaign fundraising event'.

Mr. Brown observed that the intent is that fundraising be allowed following the convening or adjourning travel. Similar language was added to the Executive Branch Ethics Act to govern the conduct of the Governor and Lieutenant Governor.

Co-Chair Therriault questioned how the provision would work. Members concluded that further clarification was needed. Mr. Brown stated that he had prepared an amendment to address a second trip. Representative Davies observed that Ethics Committee has advised him to apportion the cost of trips that include state and private business. He noted that it is difficult to apportion costs. He recommended that half of the cost be paid from campaign funds. He noted the imposition on the legislator's time. Mr. Brown stated that he is concern with the definition of fundraising event. He stated that would work with members for a better solution.

SENATE BILL NO. 89

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY SENATOR COGHILL

Introduced: 2/16/11
Referred: State Affairs, Judiciary

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees to use legislative mailing lists for campaign purposes and nonlegislative purposes; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; allowing legislators and legislative employees, in certain circumstances, to participate in partisan political activity while on state travel; prohibiting a public member of the Select Committee on Legislative Ethics from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with

by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

* **Sec. 2.** AS 24.60.030(i) is amended to read:

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;**

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

* **Sec. 3.** AS 24.60.030 is amended by adding a new subsection to read:

(j) Notwithstanding the limitations under (a)(2), (a)(4), and (c) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or

legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

*** Sec. 4.** AS 24.60.031 is amended by adding a new subsection to read:

(d) Notwithstanding the limitations under (a) and (b) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, during the state travel if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

*** Sec. 5.** AS 24.60.060(a) is amended to read:

(a) A legislator**,** [OR] legislative employee**, or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

*** Sec. 6.** AS 24.60.080(a) is amended to read:

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

Title 39. PUBLIC OFFICERS AND EMPLOYEES
Chapter 39.20. COMPENSATION, ALLOWANCES, AND LEAVE

Article 02. TRAVEL REGULATIONS

Sec. 39.20.110. Per diem allowance.

Officials and employees of the state agencies, while traveling on official business and away from their designated post of duty, shall be allowed, instead of their actual expenses for subsistence and all fees or tips, a per diem allowance to be prescribed by the commissioner of administration under the regulatory authority set out in AS 39.20.160 , and in consultation with the head of the agency concerned.

Sec. 39.20.120. Allowable expenses.

Except as provided in AS 39.20.110 - 39.20.170, only actual and necessary traveling expenses shall be allowed to an official or employee.

Sec. 39.20.130. Mileage allowance.

Officials and employees of state agencies shall, under regulations adopted by the commissioner of administration, and whenever the mode of transportation is authorized or approved as more advantageous to the state, be paid an amount, instead of actual expenses of transportation, not to exceed a mileage allowance set by the commissioner of administration for the use of privately-owned automobiles or airplanes, when engaged in official travel inside or outside their designated posts of duty or places of service. In addition to the mileage allowance, there may be allowed reimbursement for the actual cost of ferry fares, and bridge, road, and tunnel tolls. When two or more officials or employees are traveling in the same direction, and it is possible to share a privately-owned automobile or airplane, the mileage permitted shall be allowed only once.

Sec. ⏩39.20.140⏪. Travel costs and travel outside the state.

(a) The Department of Administration may not pay an official or employee for per diem or transportation costs unless the travel is clearly necessary to benefit the state.

(b) The Department of Administration may not reimburse an official or employee or pay for more than the lowest tourist class fare for the most direct route unless

(1) tourist class accommodation is not available;

(2) waiting for tourist class accommodation would occasion a delay harmful to the state; or

(3) the Department of Administration finds that travel by tourist class accommodation is not in the best interest of the state, and authorizes other accommodation.

(c) When the Department of Administration authorizes more expensive travel under (b)(3) of this section, it shall file a justification for that authorization with the travel voucher. When fares other than tourist class are authorized under (b) of this section, the Department of Administration may not reimburse the official or employee or pay for more than the lowest first class fare available.

(d) Officials and employees are authorized to travel only the least number of days necessary to transact the business involved, to secure return passage, and to return.

(e) Every official and employee shall, unless otherwise authorized by law to travel outside the state, obtain prior approval for travel outside the state from the head of the official's or employee's department or from an immediate supervisor, or from the Department of Administration if the official or employee is not within a department or is not under the direct supervision of an official or supervisor. If an employee deviates materially from the travel authorized under this section, the employee must obtain approval for the deviation from the person who approved the travel before the Department of Administration may reimburse the employee for the travel.

Sec. 39.20.150. Advances and recovery.

(a) An agency may advance, through proper disbursing methods, to a person entitled to per diem or mileage allowance under AS 39.20.110 - 39.20.170 the sums considered advisable considering the character and probable duration of the travel to be performed.

(b) Sums advanced and not used for allowable travel expense are recoverable by setoff against salary due, or otherwise, from the person to whom advanced, or the person's estate, by deduction from any amount due from the state, or by other legal methods of recovery that may be necessary.

Sec. 39.20.160. Regulations.

The fixing and payment under AS 39.20.110 - 39.20.170 of travel and per diem allowances and of advances and recovery and reimbursement of travel expenses shall be in accordance with regulations adopted by the commissioner of administration. The regulations shall be uniform for all officials and employees, and all agencies and departments. The regulations shall also govern the use of public transportation facilities by officials and employees. The regulations relate to the internal management of state agencies and their adoption is not subject to AS 44.62 (Administrative Procedure Act).

Sec. 39.20.170. Construction of AS 39.20.110 - 39.20.170.

AS 39.20.110 - 39.20.170 may not be construed to modify or repeal a law providing for the travel expenses of the governor, or members of the legislature, or members of boards or commissions of the state government.

Attachment 3

Prepared by: Ethics Committee
November 18, 2010

HISTORICAL PERSPECTIVE
LEGISLATIVE TRAVEL AND COLLATERAL CAMPAIGN ATIVITY

1993 - Chair of the Ethics Committee in September 1993 recommended

Use of State Funds and Property:
State funds (travel, per diem, or salary stipend) may not be claimed, received or accepted by legislators or legislative employees unless the primary purpose of the trip is official legislative business.

Incidental use of time in travel or pay status may be spent for personal purposes provided:

a.) No time, materials, equipment, or funds are spent in political activities; e.g. fund raising, handing out campaign literature, circulating petitions, or requesting support or assistance for any candidate or cause.
b.) No time, materials, equipment or funds are spent in lobbying activities of any kind.
c.) No unlawful activities are undertaken.

No action taken by the Committee.

1993- Memo from Speaker of the House, Ramona Barnes

In a memo dated September 21, 1993 from Speaker Barnes, she states,

> "During the legislative session each lawmaker is allowed one trip back to their district for legislative business. This applies to both majority and minority members. During the interim all requests from legislators for travel to NCSL and the Western Legislative Conference have been approved as have all travel requests by committee members wishing to attend their committee meetings. Additionally it has been my policy to approve travel requests by members appointed to various task forces and subcommittees to attend events that relate to the work they are involved in. All other travel requests are reviewed on a case by case basis. I approve all staff travel on a case by case basis when such travel is appropriate to their majority or minority status. With respect to attending campaign activities during a state paid trip that involved legislative business, it has not been allowed in the past and is not allowed now."

1993- Letter from Senate President Rick Halford

In a letter dated October 23, 1993, from Senate President, he states,

> "You specifically requested travel authorization information concerning attendance at campaign activities during a state paid trip. State paid travel is authorized for legislative business. Campaign activities are not an acceptable purpose for travelling at state expense."

1994- Ethics Committee suggested the following guidelines

Version 1: Campaign activity may occur provided the legislator completes no less than 7.5 hours per day of non-campaign related state business. The travel authorization request, filed in advance, must indicate what specific state business activities will be undertaken for a minimum of 7.5 hours per day and must indicate what type of campaign activity the legislator will be participating in. This does not apply to legislative employees. Legislative employees are not permitted to participate in campaign activities while in travel status.

No action taken by the Committee.

Version 2: Campaign activity may occur provided the legislator [or legislative employee] completes no less than 4 hours per day of state related business. The travel authorization request must be filed in advance.

No action taken by the Committee.

1995 - Ethics Committee: Open Issue regarding Legislation

What can or can't a legislator or legislative employee do while in "travel status?"

Ethics Committee Minutes: On February 3, 1994, the committee sent a letter to Legislative Council requesting the council to develop guidelines concerning travel, specifically campaign activities while in "travel status." Legislative Council did not respond to the request. The committee continues to receive inquiries on this issue. On February 13, 1995, the committee directed staff to send another letter to Legislative Council.

No response is on file in the Ethics Office.

1996 – Ethics Committee issues Advisory Opinion 96-05

The committee was asked the following by a legislator: Whether a legislator may accept payment for the costs of a trip on which the legislator conducted both legislative business and personal business? The committee concluded it is permissible for a legislator to accept state payment for the costs of a trip on which governmental business was conducted. The committee further noted that it does not have authority, in the context of advisory opinions, to use its judgment in lieu of a legislator's judgment in determining what is necessary state business or how much sate business is necessary to justify accepting state payment for a trip. The committee also cautioned that if a legislator or legislative employee were to intentionally use a façade of legislative business to obtain a government paid trip but were to fail to conduct any governmental business to justify governmental payment, the committee might well find a violation of AS 24.60.0309(a)(2). The committee also noted in the opinion the following statements: *"The ethics committee has, in the past, requested an explanation of legislative travel and per diem policy from Legislative Council. A response has not been forthcoming to date."*

1997/98 -- SB 105, Ethics/Lobbying/Campaign Finance

SB 105 was introduced on February 25, 1997 by the Senate Rules Committee by Request of the Legislative Ethics Committee. SB 105 was signed into law on July 15, 1998. An amendment to the bill, which was not adopted, addressed the subject of state paid travel and campaigning while on that trip. The amendment read as follows:

> SB 105H HCS CCSSB 105(STA) 4/23/98
> House CS for CS for Senate Bill No. 105(STA)
> Section 17. AS 24.60.031 is amended by adding new subsections to read:
>
> (c) A legislator may not travel at state expense to a place in which the legislator plans to hold a campaign fund raising event if the travel occurs less than 48 hours before the event is scheduled to begin. This subsection does not prohibit a legislator from holding a campaign fund raising event in a place to which the legislator travels at state expense if the
>
> (1) travel to the place is completed at least 48 hours before the event was scheduled to begin;
> (2) legislator made a trip at state expense to a place, returned from that place, and then, within 48 hours, made a second trip to the place and the cost of the second trip was not paid for at state expense; or
> (3) travel was to the capital city immediately before the beginning of a legislative session or from the capital city to the legislator's home immediately after the final adjournment of a regular or special legislative session.
>
> (d) In (c) of this section, an event is considered to be a campaign fund raising event only if the legislator, or another person acting on behalf of the legislator with the legislator's expense or implied permission,
>
> (1) asks for contributions for the legislator's campaign at the event;
> (2) announces that the legislator will accept contributions for the legislator's campaign at the event; or
> (3) otherwise uses the event in a manner that clearly demonstrates that a primary purpose of the event is to raise contributions for the legislator's campaign;
>
> the fact that a legislator received campaign contributions at an event is insufficient, without other evidence, to satisfy the proof required by this paragraph.

This subject was discussed at the following committee meetings:

- House State Affairs Committee meeting of April 9, 1998
- House State Affairs Committee meeting of April 16, 1998
- House State Affairs Committee meeting of April 21, 1998
- House Finance Committee meeting of April 24, 1998.

(Minutes from these meetings are attached for your reference.)

2010 – Ethics Committee Staff drafted two versions of possible clarifying statutory language

AS 24.60.030(a)(5) A legislator or legislative employee may use or authorize the use of state funds, facilities, equipment, services or another government asset or resource for the purpose of political fund raising or campaigning: this paragraph does not prohibit

Version 1 – add a new section (B)

(B) limited use of state funds while traveling on legislative business for political fund raising or campaigning purposes if the use

(i) is collateral or incidental to the normal, scheduled performance of official duties;
(ii) does not exceed 10 percent of the total time spent on the trip;
(iii) does not interfere with the performance of public duties, and
(iv) there is no additional cost to the state;

Version 2 – add a new section (B)

(B) limited use of state funds while traveling on legislative business for political fund raising or campaigning purposes if the use

(i) is collateral or incidental to the normal, scheduled performance of official duties;
(ii) does not exceed 10 percent of the total time spent on the trip;
(iii) does not interfere with the performance of public duties,
(iv) does not occur within 30 days of an election in which the legislator or legislative employee is a candidate for office,
(v) generate no additional cost to the state, and
(vi) the proportionate share of the actual cost of the use shall be reimbursed to the state;

No discussion. Item was not before the committee as an agenda item.

2010 - Ethics Committee issues Advisory Opinion 10-01 and then rescinded their action

The committee issued Advisory Opinion 10-01 on May 27, 2010 and then rescinded the opinion at the June 14, 2010 meeting and referred back to the August 19, 2008 letter to the Alaska Public Offices Commission for guidance in this area. AO 10-01 stated that it was the nature of the business conducted rather than whether it is paid for with state resources that should be the governing standard in determining whether an ethical violation has occurred. A statement signed by the legislator designating the primary nature and purpose of the business rather than whether is it paid for by state resources should suffice to govern whether or not collateral activities can or cannot occur. AS 24.60.030(a)(3).

The August 19, 2008 letter to APOC the committee stated a legislative resource, including money provided by the legislature to cover or reimburse costs incurred by a legislator or legislative employee while traveling on legislative business, is a government asset or resource. A government asset or resource may not be used for involvement in or support of or opposition to partisan political activity. AS 24.560.030(a)(2. A legislator or legislative employee may not use or authorize the use of government asset or resource for the purpose of political fund raising or campaigning. AS 24.60.030(a)(5).

20th Legislature(1997-1998)

Bill History/Action for 20 Legislature

BILL: SB 105 **SHORT TITLE:** ETHICS/LOBBYING/CAMPAIGN FINANCE

BILL VERSION: HCS CSSB 105(FIN) AM H

CURRENT STATUS: CHAPTER 74 SLA 98 **STATUS DATE:** 06/03/98

SPONSOR(s): RULES BY REQUEST OF LEGISLATIVE ETHICS COMMITTEE

TITLE: "An Act relating to legislative and executive branch ethics; relating to campaign finances for candidates for state or municipal office; relating to the conduct and regulation of lobbyists with respect to public officials; relating to the filing of disclosures by certain state employees and officials; making a conforming amendment to the definition of 'public official' for employment security statutes; and providing for an effective date."

20TH Legislature (1977-1998)
Committee Minutes
HOUSE STATE AFFAIRS
April 09, 1998

Number 0201

CHAIR JAMES asked Mr. Brown to address Amendment LS0074\L.2, Cramer, 4/3/98.

MR. BROWN explained Amendment L.2 deals with fund-raisers happening when people are traveling at state expense. This language puts a prohibition in place for legislators, governor and lieutenant governor. If you go somewhere at state expense it should have to be incidental if you end up staying there and holding a political fund-raiser it should not at any way be apparent to the public that that was part of the reason there at state expense. This puts a 48-hour ban in place to try to prevent that sort of activity.

Page 17, following line 5, insert a new bill section to read:

*Sec. 21. AS 24.60.031 is amended by adding a new subsection to read:

(c) a legislator may not travel at state expense to a place in which the legislator plans to hold a campaign fund raising event if the travel occurs less than 48 hours before the event is scheduled to begin. This subsection does not prohibit a legislator from holding a campaign fund raising event in a place to which the legislator traveled at state expense if the travel to the place is completed at least 48 hours before the event was scheduled to begin.

Page 48, following line 31, insert a new subsection to read:

(b) Except for travel to the capital city, an elected official may not travel at state expense to a place in which the official plans to hold a campaign fund raising event if the travel occurs less than 48 hours before the event is scheduled to begin. This subsection does not prohibit an elected official from holding a campaign fund raising event in a place to which the elected official traveled at state expense if the travel to the place is completed at least 48 hours before the event was scheduled to begin. In this subsection, "elected official" means the governor or the lieutenant governor.

Number 0210

REPRESENTATIVE BERKOWITZ stated, "I drive home at the end of session ... they want to have a fund-raising event for me when I get there, they can't do it."

MR. BROWN replied they can after 48-hours or if you don't take your state reimbursement for the drive. If it were 48-hours after you got home state expense would cover your reimbursement.

Number 0213

CHAIR JAMES stressed she didn't think that was ever the intent of this amendment, there should be an exception when you go home at the end of the legislative session. She suggested they include that as an amendment to this amendment.

MR. BROWN indicated that was discussed with the drafter as an exemption for adjourning travel not for convening travel.

REPRESENTATIVE BERKOWITZ remarked if you don't want people to travel at state expense solely or primarily to have a fund-raising event, and if that's the case why don't we just say it that way.

CHAIR JAMES asked for a motion to adopt Amendment L.2 for discussion and amending if needed.

Number 0222

REPRESENTATIVE HODGINS made a motion to adopt proposed Amendment L.2 for discussion.

REPRESENTATIVE RYAN objected.

CHAIR JAMES noted there is an objection. Chair James said she believes it should be amended that in the adjourning trip home, especially when they are limited to any campaigning while in the capital and there is so little time, going home should not be the issue.

REPRESENTATIVE HODGINS said he is totally against the amendment since he lives in Kenai and makes many trips to Anchorage. He indicated this means he can't go into Anchorage two days prior to, a function or committee meeting, or something like that. He will be voting against it if it is a 48-hour thing.

CHAIR JAMES responded it is not proper for her to fly from Fairbanks to Anchorage to attend fund-raising. She indicated she has either paid her own way or used her campaign funds to pay and has not traveled to Anchorage for a fund-raiser on state pay because she doesn't believe it's right.

Number 0234

REPRESENTATIVE HODGINS continued. He pointed out Kenai is so close to Anchorage that he will make several trips back and forth. If he has business the day before (an Oil and Gas Committee meeting) and travels on a state warrant and returns to Kenai and the following day travel to Anchorage on his own money for a fund-raiser that would unduly restrict him for the compensation of traveling the day before. He said they're assuming that you...

CHAIR JAMES stressed the four days is a problem in the amendment.

REPRESENTATIVE HODGINS read the amendment which addresses traveling at state expense and travel that occurs less than 48 hours before the event is scheduled to begin. He stressed if he makes a round-trip on Tuesday and attends a fund-raiser on Wednesday...

CHAIR JAMES reiterated this isn't going to work.

MR. BROWN remarked he believes the drafter deleted another sentence when she put the legislative language in there. He indicated at that time they were only dealing with the governor.

Number 0246

CHAIR JAMES noted the governor is what prompted them on the issue of whether or not he should be raising funds while they are in a legislative session when someone is running against him. She said, "We tried to solve on the floor ... so now he can't. That means he can go visit somebody, any place in the state, and have a fund-raiser while he's there. Unless we put something in here, that's still allowed. I don't think it should be, and I think it's fair for both of us to not." She asked that this amendment be withdrawn for now and move onto the next amendment.

Number 0254

REPRESENTATIVE HODGINS removed his motion to adopt Amendment L.2.

CHAIR JAMES indicated they need to talk to the drafter.

No action taken at this meeting.

20TH Legislature (1977-1998)
Committee Minutes
HOUSE STATE AFFAIRS
April 16, 1998

MR. BROWN explained Amendment P.2 deals with the ban of fund-raising by elected officials who have traveled somewhere at state expense for that fund-raiser. The problem with the way it was written is that the ban precluded a...

TAPE 98-52, SIDE B
Number 0004

MR. BROWN continued. That same place, within the 48 hours, and still be able to have a fund-raising event. Especially those on the road system near Anchorage would be penalized by that. He indicated that wasn't the intention that was a drafting error.

Sec. 17. AS 24.60.031 is amended by adding a new subsection to read:

(c) A legislator may not travel at state expense to a place in which the legislator plans to hold a campaign fund raising event if the travel occurs less than 48 hours before the event is scheduled to begin. This subsection does not prohibit a legislator from holding a fund raising event in a place to which the legislator traveled at state expense if the

(1) travel to the place is completed at least 48 hours before the event was scheduled to begin;

(2) legislator made a trip at state expense to a place, returned from that place, and then, within 48 hours, made a second trip to the place and the cost of the second trip was not paid for at state expense; or

(3) travel was to the capital city immediately before the beginning of a legislative session or from the capital city to the legislator's home immediately after the final adjournment of a regular or special legislative session.

Renumber the following bill sections accordingly.

Page 47, line 28:

Delete: "a new subsection"
Insert: "new subsections"

Page 47, following line 28:

Insert a new subsection to read:

(d) Except for travel to the capital city, the governor or the lieutenant governor may not travel at state expense to a place in which the official plans to hold a campaign fund raising event if the travel occurs less than 48 hours before the event is scheduled to begin. This subsection does not prohibit the governor or the lieutenant governor from holding a campaign fund raising event in a place to which the official traveled at state expense if the

(1) travel to the place is completed at least 48 hours before the event was scheduled to begin;

(2) official made a trip at state expense to a place, returned from that place, and then, within 48 hours, made a second trip to the place and the cost of the second trip was not paid for at state expense.

MR. BROWN said the prohibition doesn't exist right now. It's come up more as an issue in terms of the executive branch and concern about travel at state expense by the chief executive and then fund-raisers being held. He implied the same standard has been put in place for the governor, and the governor's home is considered to be Juneau for the purposes of the governor's term of office. Other than that, there is the same 48-hour ban and the go, come back, and go back again at personal expense or campaign expense exemption.

Number 0022

REPRESENTATIVE BERKOWITZ asked what's a campaign event. If someone slips him a check, is that a campaign event.

MR. BROWN responded no.

REPRESENTATIVE BERKOWITZ asked if he goes around collecting checks from people that's fine.

CHAIR JAMES replied, "No that's a campaign event. If somebody accidentally gives you one, or sends you one, gives you one when you're there - people do that all the time, but if you are making an effort to collect them (indisc. - interrupted) depends on who initiates it."

MR. BROWN added that we would hold that standard if an invitation went out, or a public announcement was made, or there was a guest list, or someone was coordinating the event.

Number 0029

REPRESENTATIVE BERKOWITZ said if he starts calling people and asking for money that doesn't seem to rise to the level of being an event.

MR. BROWN said he doesn't foresee that being a problem, of course for legislators, running for legislative office, this isn't going to happen during session anyway, this is an interim concern. For the governor, as SB 275 is now on its way through the system, it's a concern year-round. He implied that it's a heightened level of concern for the governor.

Number 0037

REPRESENTATIVE ELTON expressed that his heightened concern is for the governor and the lieutenant governor. He asked does this mean that if they're in Anchorage on business that they cannot have dinner with their campaign manager.

MR. BROWN replied he didn't think dinner with the campaign manager is a fund-raising event. If the campaign manager invited ten employees from the timber industry to sit down with the governor, and they were told ahead of time to please bring a check, that would be an event. He expressed the public policy goal is not to have the governor fly to Anchorage at state expense and attend that dinner.

REPRESENTATIVE ELTON indicated they may be discussing a fund-raising event that they will be setting up a month later.

MR. BROWN responded saying that's a strategy, that's not a fund-raising event. He said they didn't want to (indisc.) in that too wide here. It was just to ban a very specific organized type of fund-raising activity. It's a public perception thing, people will say, "Gosh I saw this public official on TV this morning cutting a ribbon, and I know tonight this public official is having a fund-raiser at so and so's house, and I know that this public official traveled to and from Anchorage - is paid by the state."

MR. BROWN implied Ms. Barnett recommended that if it were possible to apportion the cost of your trip, say it was 50 percent business and 50 percent campaign. He said that would be the squeaky clean way to do it, but in terms of enforcement and advising people, it just didn't seem that that was going to be a very workable statute. It seemed easier to say, if it's for state expense you travel at state expense, and if it's for campaign purposes you travel at campaign expense.

Number 0056

REPRESENTATIVE IVAN IVAN indicated he can respect the intent of the legislation to correct deficiencies that occurred several years ago, but it's getting to a borderline of controlling our thinking. He said, "The governor sitting down with his campaign manager, or me sitting down with someone that will help me ... and now his thoughts are going to be controlled."

CHAIR JAMES stated that she doesn't think that was the intent of the conversation. She said she thinks the intent was to try to define a fund-raising event and if it's still questionable, as to what a fund-raising event is, we might want to describe what it is and what it isn't. It's not questionable and would be easy to define. That the questions that Representative Berkowitz had - if somebody hands you an occasional check, when you're out on state business, or whatever, during a period of time, when it's okay to

accept a check, that certainly is not a fund-raising event. Chair James interpreted a fund-raising event as a place where people come, they either pay to come, or they're invited to attend and to bring their checkbook to an event. This could be any kind of event where more than a certain number of people come together for that purpose.

Number 0073

CHAIR JAMES said, "If any one of us has traveled ... and we talk to somebody who is a campaign chairman or something, it wouldn't necessarily happen with the legislator because the legislator is going to be traveling within their own district. ... It's 250 miles from one end of my district to the other and I live in one end, and if I go down the other end - sometimes I go down there for business and sometimes I go down there because I'm campaigning - and it's not like buying an airplane ticket because I don't fly to get there I get in my car and I drive. And then if it's legislative business I turn in the mileage and any expense I had as a legislative trip. If I'm going down there, and going to be campaigning, or having a fund-raiser or something, then I don't do that. I don't turn that in. And so there is a decision as to whether or not you're going on state business or not."

CHAIR JAMES said, "But generally when you're talking about traveling some place on state business, having a fund-raiser happens a lot when we have fund-raisers in Anchorage and I'm in Fairbanks. And so if I'm going to travel down there, even if I'm traveling on fund-raising money, my campaign account is an example, and I'm going to be there for several days, I'm going to do legislative business too, which could be in an election year considered to be almost campaigning too - if I'm going to be talking to the people that I want to talk about, about future issues (indisc.) help as to how things should be addressed. We have many times caucuses in Anchorage, and then we also have a fund-raiser when we have a caucus. To me the caucus is happening because we have the fund-raiser. I'll pay my way with my campaign account to get there. In fact, we don't usually get any reimbursement for going to a caucus anyway because it's a political issue. So, the only time that I would be down there on state business is if I'm going to be there for some kind of a hearing, some kind of a committee meeting, or something to that effect. And if it happens to be that there's a fund-raiser scheduled at that same time, then I either should pay for my way to get down there, under this law, or with my campaign funds, or I should go back home and come back again, one way or the other, or I shouldn't go to the fund-raiser. Now that may affect some of the ways we've been doing things in the legislature because it is true, if we happen to have committee meetings or something and there is a fund-raiser, that there probably are some cases in the past where I was paid to go to Anchorage and back because of the committee. I don't know of any specifics, but there could have been, and I don't know that that ever happened. But it's a possibility, probably not under the current campaign finance law where you can't do any fund-raising in the off-year, then that might not be the case. And so I didn't go to any -- but they had some fund-raisers in this last campaign year for the party, I didn't go to any of them. So I know I haven't done that. But this would make it perfectly clear, that if you're going anywhere to attend a fund-raiser - and the only ones I could think of would be going to Anchorage because that is where a lot of fund-raisers are happening. You don't use state funds to get

there, and I'm perfectly comfortable with that, I think it's a good thing to put into law."

CHAIR JAMES said, as far as the governor is concerned she believes that is also the case. That during an election year, it can't happen in the other three years before that, and it can't happen under this current law because there can't be any fund-raising in those three years. It's only in the year of the campaign that the advantage of the governor and the lieutenant governor is (indisc.) in their being able to travel the state on governmental business, and have a fund-raiser everywhere they go. Chair James indicated that is wrong in her estimation. It doesn't make it fair if the governor can travel all over the state, having fund-raisers and campaigning, and the challengers can't. What we're trying to do is to make a level playing field. She believes this is a rational way of doing it.

Number 0117

REPRESENTATIVE ELTON asked Ms. Barnett how comfortable she is now that the Legislative Ethics Committee is going to have this kind of oversight of the chief administrative officers of the State of Alaska which is under AS 24.60.

MS. BARNETT replied she still doesn't have the P version of the bill but is assuming that other section, page 47, must go under 39.50 or must appear in a different part.

MR. BROWN directed the members to page 1, line 21 of the amendment. He said it refers you to page 47 of Version P of the bill under the Executive Branch Ethics Act.

Number 0126

REPRESENTATIVE ELTON asked how does this effect, for example, the Democratic Party. Every year it has a fund-raiser that's a golf tournament in Anchorage, how would this affect participation. If a person were in Anchorage on business, would they have to return, and then go back assuming that part of those receipts go to the Democratic Party and then to candidates?

MR. BROWN replied, "Right now, all this party building fund-raising - governor's funds, House and Senate Majority fund, those are not fund-raising events for individual candidates. This ban wouldn't apply to those, this is not a very wide net, this net is cast specifically for fund-raisers for individual campaigns. And the biggest one I'd like is, it doesn't apply to campaigning it applies to fund-raising. You can still go kiss every baby you want to, and shake every hand you want to, and hand out a million little plastic flags, you just can't raise money. ... So I don't think it's an onerous intrusion upon the rights of the incumbents to continue behaving politically, it's just targeting a very specific form of their activity which is raising money for themselves. If they were raising money in the off-year for themselves, they'd be violating the Campaign Finance Act. So those have to be party fund-raisers."

CHAIR JAMES reiterated that when you are raising money for your campaign, it doesn't seem right to have the expense of that fund-raiser be paid for by the state, that's the issue. She emphasized, if you get there at state expense, you better pay it back with your campaign expense. It's that simple.

MS. BARNETT referred to Representative Elton's question. She said she's not quite sure that it is clear in this language that it is a fund-raising event solely for that legislator. Maybe there's a way to clean that up a little bit more. She said she's not arguing at all with the notion, or concept. Ms. Barnett said it could be confusing if there was a party fund-raiser where moneys ended up in that legislator's hand at a later point.

REPRESENTATIVE BERKOWITZ said, "When the legislator plans, I think that's the determining phrase, if the party plans, it is something else."

CHAIR JAMES mentioned she is also having a problem with that. She said she is thinking of some of the fund-raisers that occurred in the campaign year. In particular, a majority fund-raiser where individual checks were made out to candidates. She indicated she doesn't feel comfortable with saying that because it's a party event.

MR. BROWN explained, under the Campaign Finance Act, those are reportable either as contributions to the party or to your campaign. The clarity exists in the Campaign Finance Act. He said, "You would be planning to hold an event - if there was a basket with your name on it at the event. If there was only a basket that said 'House Majority Fund' at the event - you know under the law you have no guarantee of receipt of those funds in your personal campaign even though you might be shaking people (indisc.). So I don't know how to go beyond the clarity of an APOC [Alaska Public Offices Commission] has to go on, when very likely some of those funds will end up in your campaign coffer. But they're going through the party first, and they're reportable to the party, and then the party has to report its donation to you, and someone has to make that decision."

Number 0160

CHAIR JAMES reiterated that she understands the intent and that she is not comfortable with the language as well because it's not specific enough.

MS. BARNETT referred to 24.60.031. She said in the existing law there is something that says a legislator or a legislative employee may not accept money from an event held during a legislative session. She said this language may help:

> if a substantial purpose of the event is to raise money on behalf of the member for campaign purposes

MS. BARNETT stated she is a little more comfortable with that where it targets that person.

CHAIR JAMES said she is willing to put Amendment P.2 aside since we will be working on it between now and Saturday to come up with something that's more definitive.

MR. BROWN said, "I asked the drafter, 'Do we know what a fund-raising event is,' and she said 'yes, it's a fund-raising event,' just like you [Chair James] said. So there are times when you want to define, and there are times when you think the language is going to do the job itself. But I think it's -- if there's some gray

area, that's the point of concern here is what's a fund-raising event - if it's party building, if it's a majority event. So I'm happy to work with the drafter and actually put a definition in for the purposes of the subsection of the Legislative Ethics Code and the Executive Branch Ethics Act."

REPRESENTATIVE BERKOWITZ said, another thing, when you're looking at the executive branch, not all governors call Juneau home.

MR. BROWN responded, "It's like a tax home. You have to take a home and not have it, you can't have two. Juneau has to be your home, it is, the governor's house is here - some governor's have chosen not to reside in it - in a very regular basis and they might take exception to that." He said he didn't know if it is possible to craft a statute to enable the governor to say, "I don't want to live in Juneau..."

CHAIR JAMES said she would venture to say that wherever the governor lives that when he goes back and forth between Juneau and that place, he's paid for at state expense, so the same applies.

MR. BROWN remarked that only one of them can be - he can only come home in one direction, you can't be going home both ways. He said, "If you have a suggestion about giving the Chief Executive the option of declaring some other place in the capital city his or her home for the purposes of their term office, I think it would be to that governor's disadvantage to pick some place besides Juneau, unless the governor's really not going to spend very much time here. But if the governor's really going to spend (indisc.) time here..."

REPRESENTATIVE BERKOWITZ said he spends four months of the year here and this doesn't make Juneau his home. If he is living in Clark for example that would be his home.

MR. BROWN said, "That's fine, but I'm going to say it's probably to your advantage, as the governor who wants to raise money. By the way he was the last governor who ran as an incumbent, right. So that's the last time we dealt with this issue really since the last two governors (indisc.) haven't run for reelection - or three. But the issue here is, do you want to be able to come back to Lake Clark and have unlimited fund-raisers within 48 hours, or do you want to be able to come back to Juneau and do that. So you can give the person the option, but they still have to pick one place."

REPRESENTATIVE BERKOWITZ said he doesn't want, by law that we declare that Juneau is the governor's home.

REPRESENTATIVE ELTON stated that he is not totally bothered by that.

MR. BROWN said, "For the purposes of the subsection."

REPRESENTATIVE BERKOWITZ reported that he's raised the point, he's thrown it out there, we've chewed on it, and now he's letting it go.

Number 0196

REPRESENTATIVE HODGINS said, "While we were pondering about the definition of frivolous, I wonder if we should ponder about the

definition of high-centered. I think there's some important stuff in this amendment as I pointed out earlier. My discomfort with the language was discriminatory about my situation. If I traveled to Anchorage from Kenai which I do quite a bit on state business the day before a fund-raiser, I can't really, the way the existing law is, is I cannot really accept - I have to travel on my own nickel even it's going to be for state business if it's 48 hours. This amendment allows me to make a round-trip the day of the thing at my expense and then to attend a fund-raiser which I think is very appropriate. And I would hope that we would go ahead and move this amendment, or some portion of this amendment. I don't have any problem on waiting until Saturday even though I detest Saturday meetings. As long as we don't get high-centered, I'll be here. But if we continue to get high-centered I won't be here."

MR. BROWN suggested the committee adopt the amendment now. He said he can bring forward a definition of a fund-raising event, or we can take this away and come back with one remembering everything that's been discussed.

Number 0209

CHAIR JAMES announced if there's no objection, we'll just set P.2 aside and deal with it again on Saturday. She said this bill is not leaving this committee without this provision in it.

REPRESENTATIVE BERKOWITZ said he thinks we just got off-center.

20th Legislature(1997-1998)
Committee Minutes
HOUSE STATE AFFAIRS
Apr 21, 1998

SB 105 - ETHICS/LOBBYING/CAMPAIGN FINANCE

Number 0038

CHAIR JAMES announced the next order of business is CSSB 105(FIN) am, "An Act relating to legislative and executive branch ethics; relating to campaign finances for candidates for state office; relating to the conduct and regulation of lobbyists with respect to public officials; relating to the filing of disclosures by certain state employees and officials; making a conforming amendment to the definition of 'public official' for employment security statutes; and providing for an effective date."

Number 0090

BEN BROWN, Legislative Administrative Assistant to Senator Kelly Alaska State Legislature, came before the committee. He stated he distributed the revised work draft, LS0079\Q, Cramer, 4/20/98, that incorporates all the amendments made at the last meeting of the State Affairs Committee.

MR. BROWN also distributed Amendment Q.1 that reflects some concerns that other members of the House had, who probably won't have an opportunity to look at the bill in committee themselves.

Number 0096

REPRESENTATIVE MARK HODGINS asked if travel at state expense is included in the amendment.

MR. BROWN replied it is in both sections, the legislative ethics section and the executive branch ethics section. Mr. Brown referred to Section 17, page 15, AS 24.60.031 adds a new subsection on fund-raising during session. Section 74, page 48, AS 39.52.120. The provisions of the two are very similar and they do allow you to "double-back" as long as you pay for your trip - the most recent time you travel somewhere, then there's no 48 hours...

Number 0109

REPRESENTATIVE HODGINS had a question on Section 17, page 15, beginning on line 10.

> (2) legislator made a trip at state expense to a place, returned from that place, and then, within 48 hours, made a second trip to the place and the cost of the second trip was not paid for at state expense;

REPRESENTATIVE HODGINS said, "If I was in Fairbanks on state business, flew into Anchorage on my normal course of going home, and then I flew down to Kenai, and then returned, I haven't really returned to the place that I came from at state expense - which would be Fairbanks. ... I just wanted to make sure there's no problem. ... Let's say that I live in Fairbanks, and I flew on state business to Anchorage and then decided I was going to have a fund-raiser, and it was a heck of a lot cheaper for me to fly to

Kenai at my own money and back ... or I even traveled by car to Palmer and back at my own expense. Does then that absolve me from having to go back to Fairbanks before I have a fund-raiser?"

CHAIR JAMES stated she didn't believe the intent of this is to have you go back to Fairbanks.

Number 0127

REPRESENTATIVE HODGINS gave another example. He said, "Let's say that I lived in Kenai and I'm flying into Anchorage on state business, and then while I'm there I think, well I'm going to have a fund-raiser, there's a fund-raiser planned. Rather than go to Kenai again, if I just rented a car and drove to Palmer and back, made a trip out of town and back at my own expense, I guess that's what I'm asking. As long as you make a trip out of the location, and back at your own expense, it doesn't really matter where you go."

CHAIR JAMES indicated what she would do is reimburse the state out of her campaign money, the cost of getting from Kenai to Anchorage. If you're going to have a fund-raiser, you take your fund-raising money and pay your way to get there.

MR. BROWN stated if you look back at the beginning of prohibition, you may not travel at state expense to a place where you plan to hold a campaign fund-raising event. That's the initial rule you have to look at -- it's a matter of planning. He said, "The best way to protect yourself is to have the most - the leg immediately prior to the fund-raiser, not be paid for at state expense. Someone still might try to challenge you under this but that would be your best first line of defense. Don't pay the last leg of your journey with a state TR [travel request]."

Number 0149

MR. BROWN remarked, "I'm more concerned actually, because it just occurred to me while you were talking, that second might not work if you're really busy going back and forth, and it almost seems (indisc.) subsequent. (Indisc.). So I don't know that we've perfected this language yet, it's a thorny issue. And I don't think I see a problem sequential legs like you do. I think as long as your most recent leg -- we can only close it so tight and there's still going to be a tiny loophole and I think that's probably as tight as we can get it."

Number 0153

REPRESENTATIVE KIM ELTON said he agreed with Mr. Brown. Under the provisions, as amended, he believes the simplest way out the bind in that example would be, when you travel to Fairbanks at state expense, either drive to Anchorage at your own expense or fly to Anchorage at your own expense. Then you don't need to worry about it because you haven't arrived in Anchorage on a state TR.

Number 0159

REPRESENTATIVE HODGINS said his point is, can you cleanse it by taking a shorter trip someplace and going back. Obviously it's cheaper to buy a ticket to Kenai, and back and forth, or to drive to Palmer, back and forth, than it is to pay your own way from

Fairbanks.

Number 0175

CHAIR JAMES stated she doesn't believe this amendment will stay in the bill until the end. But it's very important to her because she doesn't believe they should be traveling on state expense for campaign fund-raising activities. She indicated she feels very strongly about it both on the legislative and governor's side. She would like to leave it in there.

REPRESENTATIVE HODGINS mentioned he agrees wholeheartedly, he's just looking at the loopholes.

Number 0215

REPRESENTATIVE HODGINS made a motion to adopt Amendment Q.1.

Number 0216

MR. BROWN suggested the committee adopt version Q as a work draft and then Amendment Q.1.

Number 0218

REPRESENTATIVE HODGINS amended his motion to adopt HCS CSSB 105, version Q, with the Amendment Q.1.

Number 0219

CHAIR JAMES said, "Before I accept that motion, let's say that we did have an amendment on the floor of Q.1, which will be displaced by this motion, to accept the CS Q and Q.1 the amendment, is there any objection."

REPRESENTATIVE ELTON asked Chair James to explain the motion. He indicated he heard a two-part motion that we adopt version Q and the amendment [Q.1].

CHAIR JAMES replied that's what they did.

Number 0225

REPRESENTATIVE HODGINS made a motion to adopt HCS CSSB 105, version LS0074\Q, there being no objections, that version was before the committee.

Number 0027

REPRESENTATIVE HODGINS made a motion to adopt Amendment Q.1.

Number 0229

REPRESENTATIVE ELTON objected. He said he would like to offer an amendment to the amendment on page 3, line 15 of the amendment.

Page 26, line 16 through 18:
Delete:

A person who requested an opinion, including a legislator, may not require admittance to an executive session of the committee when it is deliberating concerning the advisory opinion.

Number 0232

CHAIR JAMES objected. A roll call vote was taken. Representatives Berkowitz and Elton voted for the amendment. Representative Hodgins, Ivan, James and Ryan, voted against the amendment. The amendment to the amendment failed by a vote of 2-4.

CHAIR JAMES asked if there were any objections to Amendment Q.1. There being none, Amendment Q.1 was adopted.

Number 0240

CHAIR JAMES noted, "We have a fiscal note here, it's a draft, it's not signed, but we will probably have one signed before I move it on for $5,000 from the Attorney General's Office for additional staff time for the reporting that's required by this bill. So we need to move this fiscal note with it was well."

Number 0243

REPRESENTATIVE HODGINS made a motion to move HCS CSSB 105, version Q, as amended, with individual recommendations, and attached fiscal note.

Number 0246

REPRESENTATIVE ELTON objected.

CHAIR JAMES requested a roll call vote. Representatives Ryan, Hodgins, Ivan, James, Elton and Berkowitz voted to move HCS CSSB 105(STA). HCS CSSB 105(STA) moved from the House State Affairs Standing Committee.

April 24, 1998

SECTION 17: AS 24.60.031(c) BAN ON FUNDRAISING WHEN TRAVELING AT STATE EXPENSE This section adds new

subsections to the fundraising restrictions in the Legislative Ethics Code. Subsection (c) prevents travel at State expense to a place where a fundraiser is planned within 48 hours of the travel. It allows State-paid travel if the fundraiser is at least 48 hours after the travel occurs, if a subsequent trip (not paid for by the State) is made between the two locations, or if the travel is to convene or adjourn for a legislative session in the capital city. Subsection (e) defines `campaign fundraising event'.

Mr. Brown observed that the intent is that fundraising be allowed following the convening or adjourning travel. Similar language was added to the Executive Branch Ethics Act to govern the conduct of the Governor and Lieutenant Governor.

Co-Chair Therriault questioned how the provision would work. Members concluded that further clarification was needed. Mr. Brown stated that he had prepared an amendment to address a second trip. Representative Davies observed that Ethics Committee has advised him to apportion the cost of trips that include state and private business. He noted that it is difficult to apportion costs. He recommended that half of the cost be paid from campaign funds. He noted the imposition on the legislator's time. Mr. Brown stated that he is concern with the definition of fundraising event. He stated that would work with members for a better solution.

AAM 60.010 Introduction to Travel (01-11)

The travel policies of the State of Alaska are adopted by the Commissioner of the Department of Administration in accordance with AS 39.20.160. State agencies and travelers are required to comply with these policies whenever traveling on state business and are prohibited

Once the taxes are included they cannot be removed due to local city, borough, or municipality regulations. It is the traveler's responsibility to pay any taxes not removed prior to issuance of receipt.

AAM 60.070 Travel Advances (07-10)

Travel advances are limited to payments made prior to travel commencing, and are generally calculated at 80% of estimated meals and incidental expenses. Departments may authorize higher advances when circumstances warrant. Departments may choose to pay travel advances using either EDI, or through use of the Card at an ATM.

All travel advances require employee notification that any monies owed the State of Alaska by the traveler may be deducted from the employee's paycheck. The Travel Advance Authorization form, available on the Division of Finance web site, needs to be signed only once by a traveler for recovering all subsequent advances through payroll deductions. These forms should be kept on file by travel planners.

A traveler shall not receive an additional travel advance until the previous travel advance and trip has been reconciled and closed out.

Agencies may make exceptions to policies in this section when circumstances justify.

AAM 60.080 Interruption or Deviation of Travel for Traveler Convenience (07-10)

Any interruption or deviation from the most direct and efficient means of travel for traveler convenience requires prior approval at the agency level by the appropriate supervisor or designee. Such approvals must weigh the interests of the state as travelers are not automatically entitled to deviations for personal convenience.

Any additional time or expense resulting from an interruption or deviation for traveler convenience shall be borne solely by the traveler. Travelers are responsible for researching and purchasing air, car, and lodging for the personal portion of the travel on their own time. This is not a work function, and travel planners cannot research or purchase travel outside of the minimum itinerary required to conduct state business. The business itinerary must be documented in a state-authorized fare quote (see 3 below) when the travel is approved.

Travelers should be aware that personal deviations from the state-authorized itinerary may negate workers' compensation coverage. The

greater the personal deviation, the more likely the departure from the course of employment, and thereby workers' compensation coverage.

When a traveler interrupts business travel for personal reasons, the following apply:

1. Per diem, travel allowances, and reimbursements are calculated for the minimum itinerary that is required to conduct state business without regard for the actual itinerary that includes the deviation for personal convenience. For example, a traveler (Anchorage duty station) is traveling on state business (in Seattle) and the business is concluded at noon on Wednesday. For personal reasons the traveler will not return to the duty station until the following Monday. In this example, the traveler's entitlement to per diem, mileage, and other travel reimbursements ends an hour after the first flight that would get the traveler home Wednesday evening is scheduled to land. This entitlement is not increased if the Wednesday evening flight does not operate as scheduled, as travelers relinquish their right to reimbursement for flight delays once they choose to deviate from the business itinerary. See Personal Travel FAQs for other examples.

2. A traveler requesting approved personal air travel deviation for an alternate routing, personal discount coupons to purchase companion travel, or travel that increases airfare, will make the transportation arrangements for the entire trip on their own time. These arrangements will be purchased by the traveler using a personal form of payment instead of a state form of payment. Personal travel segments cannot be purchased at state-contracted rates. Exception: If the only deviation is an extension of dates on either end of the state-authorized dates, departments may opt to pay for the combined airfare when purchased if the personal portion can be recovered from the traveler's reimbursement after travel is complete.

3. A state-authorized fare quote must be obtained when the travel is approved for a price comparison to determine traveler reimbursement. The fare quote may be obtained and saved in E-Travel Online with the research option (no fee), or by calling the contracted travel agency (fee applies). After travel is complete, the traveler must present a copy of the ticket receipt or itinerary showing payment and the state-authorized fare quote to obtain reimbursement. If the traveler cannot produce a state-authorized fare quote, the travel planner will obtain a quote for the lowest fare currently available for the state routing, and any fees will be charged to the traveler. The state will reimburse the lesser amount of either the ticket purchased or the state-authorized fare quote.

4. Rental cars obtained for official state business are authorized only for the minimum business itinerary. The rental period may not extend to

the personal travel. See AAM 60.140 for clarification on personal travel involving privately owned vehicles.

5. Any additional time that reduces the traveler's work week related to indirect travel will be charged to annual leave, personal leave, or leave without pay. In the example 1 above, the employee's leave status would begin Thursday morning when the traveler could have returned to work based on the scheduled flights for the minimum business itinerary. Leave in conjunction with business travel must be documented in prior approval and supervisors are responsible for ensuring that leave is reported appropriately for travelers they supervise.

6. Per diem is allowed when a traveler is granted leave due to illness. However, the per diem allowance shall not be authorized for a period of illness exceeding three calendar days in any one period of absence. Per diem is not authorized if the traveler is hospitalized or otherwise has no actual and necessary business expenses requiring reimbursement.

7. Agencies must ensure that employees combining business and personal travel are well-informed and cautioned that airfares may result in a liability to the employee, should the reason for the business travel be cancelled. Employees leaving on vacation in conjunction with the business event will become responsible for all costs should the business event be cancelled. Employees opting not to travel if the business event is cancelled will be responsible for the cost of travel that the state cannot recover that was attributable to the personal portion of the airfare. The employee may be reimbursed, at the department's option, for the business portion of unused tickets. The business portion of unused tickets paid to employees must be monitored by the department as state assets until they are used or expire. Employees leaving the department prior to the expiration of such a ticket are required to return the state payment for any business portion that is still available for use by the employee.

8. Voluntary denied boarding compensation where the traveler voluntarily vacates his/her seat and takes a later flight may be retained by a traveler (viewed as an insignificant personal travel credit under ethics rules). A traveler cannot volunteer for denied boarding on an outbound flight unless the traveler has previously approved personal travel for the beginning of the travel period. Nor may a traveler volunteer for denied boarding if it may cause a delay in return to work. By accepting a voluntary bump on the return portion, the traveler puts himself on personal travel rather than state business. Travel status ends, no further per diem is allowed, and all state insurance coverage ceases for the duration of the trip. The traveler is

ADVISORY OPINION 2004-01

RE: Use of constituent information gathered by a legislator.

You are a legislator and therefore covered by the Legislative Ethics Code. You have requested an advisory opinion concerning facts and circumstances that you have related. The committee relies on facts that you have described in answering your questions. You have waived your right to confidentiality under AS 24.60.160(b).

Statement of Facts

You have asked the following questions:

1. Can constituent information gathered by a candidate who is subsequently elected to office be used by the legislator during his or her term of office?
2. Can constituent information gathered by a legislator be used by the legislator in his or her campaign for re-election and, if so, are there any restrictions on maintaining the database using state resources?

You characterized the information referred to in the questions as:

A. Voter information obtained from the Division of Elections for a small fee.
B. Information obtained from public sources such as Permanent Fund recipients and corporation and business licenses databases which can be downloaded by anyone from public agency internet sites for free or for a small fee.
C. Information gathered about individual constituents during a legislator's term, including email addresses, phone and fax numbers, and issue information.
D. Similar constituent information as in C obtained during a candidate's campaign.

Discussion

In this document
- "constituent" means a natural person residing within a legislator's district;
- "information" means contact information including name and address as well as any other information and facts known about the contact such as issues and legislation the contact is interested in;
- "database" means an organized body of related information which is in a format read by computer database programs.

1. Can constituent information gathered by a candidate who is subsequently elected to

office be used by the legislator during his or her term of office?

This question involves a legislator using, for legislative purposes, information gathered in the course of an election campaign, described in D above. This information was obtained using private resources. There is no prohibition in the ethics code on a legislator using private resources for legislative purposes, so a legislator may use for legislative purposes information gathered during non-legislative time without the use of legislative resources.

> 2. Can constituent information gathered by a legislator be used by the legislator in his or her campaign for re-election and, if so, are there any restrictions on maintaining the database using state resources?

It is assumed in this answer that "information gathered by a legislator" is information collected for the legislator, described in C above, with the help of legislative staff employed to handle constituent concerns using legislative equipment. This information is being gathered for the benefit of the legislator in performing public duties. As long as the purpose is to assist the legislator in performing current legislative duties, the building and maintenance of a database containing constituent information is permitted using legislative resources. As is the case with the files maintained by a legislator's office for legislative use, a database is considered to be the confidential property of the legislator.[1]

There is a general prohibition against using legislative resources for non-legislative purposes:

> (a) A legislator or legislative employee may not . . . (2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of either the legislator, legislative employee, or another person;

AS 24.60.030(a)(2). However there is an exemption for a de minimis use:

> [AS 24.60.030(a)(2)] does not prohibit (A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

We find that it is considered to be a de minimis use of public assets under AS 24.60.030(a)(2)(A) for a legislator to make a copy of a database created or maintained in the legislator's own office for personal or campaign use.[2]

In regard to voter information and other publicly available databases, the information described in A and B above, a legislator may obtain this information for legislative purposes. This information would probably be combined into the legislator's constituent database. As discussed above, a legislator can make a copy of the legislator's own database for personal or campaign purposes.

In the case of purchased databases, there may be copyright issues if a person copies a database rather than purchasing another license for separate use. If the legislator wants another copy of a commercial database, a separate license, if required, should be purchased with personal funds.

Conclusion

For the reasons stated above, the committee finds that constituent information gathered by a candidate using private resources can be used by that person if subsequently elected to serve as a legislator, and that constituent information gathered by a legislator using legislative resources such as staff time and

equipment for legislative purposes may be copied and used for personal or campaign use by a legislator as a de minimis use of public assets under AS 24.60.030(a)(2)(A).

Adopted by the Select Committee on Legislative Ethics on April 23, 2004

ADVISORY OPINION 2008-03

SUBJECT: Conflict of Interest – Use of Government Resources

RE: Use of state resources by legislative aides working for constituents.

Note: Advisory Opinion 08-03 supersedes and is contrary to Advisory Opinion 07-04 adopted on December 12, 2007.

You are a legislative employee and therefore covered by the legislative ethics code. You have requested an advisory opinion concerning facts and circumstances that you have related in connection with three examples. You have asked the committee to provide guidance, in the form of an advisory opinion, as to whether or not the aide in each example given can provide the services described in a manner that is in compliance with restrictions on the use of state resources under the Legislative Ethics Act.[1]

Statement of Facts

Example 1. A constituent asks a legislative aide to serve as her "personal representative" before the Alaska Workers' Compensation Board. The aide understands that this duty will require acting on behalf of the constituent in the matter by communicating with the Board and the employer, creating, typing, copying and delivering motions and hearing exhibits, and attending the hearing as the constituent's advocate. The aide undertakes and accomplishes this duty, and, when transmitting documents on the constituent's behalf, uses legislative letterhead as a coversheet listing the documents transmitted, the intended recipients of the documents, and "information regarding meetings/timeframes/etc."

Example 2. On a constituent's behalf, a legislative aide uses legislative phone lines and e-mail to communicate with the Alaska's Child Support Enforcement Division and negotiate a settlement between the constituent, the Alaska CSED, and the California CSED. The settlement may net the constituent as much as $85,000 in child support back-payments.

Example 3. A legislative aide uses legislative letterhead and e-mail to pursue an informal appeal of the Alaska Permanent Fund Division's denial of a constituent's dividend eligibility. The denial is based on the constituent's alleged failure to meet legal requirements of Alaska residency because the constituent left the state for a time to attend a religious post-secondary school. The aide convinces the division to

reverse the denial by arguing that, because the education sought was not available at Alaska schools, the break in Alaska residency does not disqualify the constituent from eligibility.

Discussion

In the examples given, a hypothetical aide uses either legislative letterhead or legislative e-mail in the course of providing assistance to a constituent. In our Advisory Opinion 07-02, we concluded that an incumbent legislator may use legislative letterhead to communicate on any matter if the matter has a legislative purpose. The same is true of any "official" means of communication used by a legislator (or the legislator's aide) for a legislative purpose. An aide's use of legislative letterhead, legislative e-mail, legislative fax, or any other mode of communication identifiable on its face as legislative is permissible if it is for a legislative purpose.

AS 24.60.030(a)(2) says, in part, that a legislative employee may not

> (2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of either the legislator, legislative employee, or another person;

The committee notes that, while "legislative action" is defined in AS 24.60.990, "nonlegislative purpose" is not defined. Its opposite, "legislative purpose," is not defined either. The committee concludes that legislative purpose has a broader meaning than "legislative action" that could include the provision of services for constituents with problems dealing with government agencies.

The Legislative Ethics Act refers to constituent services twice in AS 24.60.030.

AS 24.60.030(e)(2) says a legislator may not directly, or by authorizing another to act on the legislator's behalf,

> (2) state or imply that the legislator will perform or refrain from performing a lawful constituent service as a result of a person's decision to provide or not provide a political contribution, donate or not donate to a cause favored by the legislator, or provide or not provide a thing of value;

AS 24.60.030(i) implies that the practice of using legislative resources to resolve constituents' problems in forums outside of the legislature is permitted by the Act.[2] AS 24.60.030(i) states:

> (i) Except for supplying information requested by the hearing officer or the individual, board, or commission with authority to make the final decision in the case, or when responding to contacts initiated by the hearing officer or the individual, board, or commission with authority to make the final decision in the case, a legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the case unless the
> (1) contact is made in the presence of all parties to the hearing or the parties' representatives and the contact is made a part of the record; or
> (2) fact and substance of the contact is promptly disclosed by the legislator or legislative employee to all parties to the hearing and the contact is made a part of the record.

We also note that the practice of using legislative resources to assist constituents with problems with

government agencies is not a requirement of legislative office, but is the choice of individual legislators. Our intent is not to interfere with a legislator's method of performing constituent services but to provide guidelines with regard to the use of government resources for the private benefit of a person. Legislative offices are one of the viable and necessary avenues by which Alaskans can access state government to obtain or improve service for themselves.

For purposes of this opinion, the committee defines "performing constituent service" as assisting constituents in navigating state bureaucracy and developing a communication line between the state agency and the constituent. The legislative intent in performing constituent service is threefold; to move the constituent's concerns forward, to make sure everyone involved knows what they need to know and to urge the government agency to take timely action. Constituents often do not know about laws, rules or regulations governing a particular agency or it may be they just do not accept the relevant parameters. The fact that state agency personnel are aware legislative offices are looking over their shoulders is positive. Occasionally, engaging in a constituent problem brings to light shortcomings in a law or regulation. A legislator may ask for a formal legislative review of the law or regulation or may introduce legislation to correct or clarify a statute. This type of action provides a benefit to the public in general.

But where do you draw the line when performing constituent services and the use of public resources? The use of public resources to provide help to constituents dealing with government agencies is not prohibited under AS 24.60.030(a)(2) as a nonlegislative purpose. However, that same paragraph prohibits the use of public resources "for the private benefit of either the legislator, legislative employee, or another person . . . ."

This opinion will focus on two areas. First, there is a difference between performing constituent services as defined above and advocating for a constituent's private interest. Legislators and staff must never cross the line and involve themselves in advocating a constituent's private interest. "Advocate" is defined in Webster's New World Dictionary to mean; a person who pleads another's cause, a person who speaks or writes in support of something, or to be in favor of.[3] In that regard, legislative aides should not enter into ongoing litigation or administrative processes regardless of professional certification or expertise. The Act does not prohibit a legislative aide from performing these activities on personal time.

In Example 1 of this opinion, the legislative aide served as the "personal representative" for a constituent before the Worker's Compensation Board; in Example 2, the legislative aide negotiated a settlement with the Alaska Child Support Enforcement Division and an outside state agency; and in Example 3, the legislative aide pursued an appeal for a constituent and convinced a state division to repeal the denial. All these examples fall within the realm of constituent advocacy and provide a private benefit to the constituent. The private benefit referred to does not mean the outcome is favorable to the constituent such as the award of back child support or the successful resolution of a law suit resulting in a monetary award. The amount of time spent on a constituent issue also does not factor into private benefit. The amount of time may depend on the area of the state where the constituent lives and the level of services available. This factor alone could add to the number of hours working on a constituent issue.

The private benefit received by a constituent in these examples is the free representation before the Workers Compensation Board, the free services of a negotiator on a child enforcement issue and the free services in appealing a denial. All these services are customarily performed on a fee basis.

Further, in Example 1, legislative letterhead was used to pursue an informal appeal for a constituent before the Worker's Compensation Board. Advocating a constituent's position with the use of legislative letterhead, a state resource, is also not a permitted use of state resources. In this instance,

there is an appearance of impropriety in that the legislator is attempting to influence the outcome of an issue with a government agency to be in favor of the constituent. AS 24.60.010 states, ". . . a fair and open government requires that legislators and legislative employees conduct the public's business in a manner that preserves the integrity of the legislative process and avoids conflicts of interest or even appearances of conflicts of interest; . . . . "
Secondly, state resources should not be used for activities such as obtaining records from a medical doctor, picking up records from a facility, creating and typing reports or listings of items requested by a state agency, to name a few. This type of preparation work is the responsibility of the constituent. State resources used for these activities would constitute a private benefit. Further, allowing these activities to be performed with the use of state resources would open the door to equal access of state resources for all individuals. As stated earlier, the role of legislative staff is to be the conduit between the constituent and the government agency. Keep in mind, a legislative aide is certainly not prohibited from providing assistance to a constituent if a roadblock occurs, for example, obtaining requested documents.

Conclusion

It is an established legislative practice to use legislative aides, as part of regular duties, to provide assistance to constituents on issues with government agencies. This creates a rebuttable presumption that an aide who does so is performing a service that has a legislative purpose. Providing assistance to constituents as defined in this opinion does not provide a private benefit to the constituent. The volume of public resources that may be expended to provide constituent assistance is not considered to be a private benefit. The volume of public resources expended is dependent upon the facts of the particular case. Performing constituent services does not include advocating for the constituent's private interest and/or preparation work to present the issue to the government agency. It is understood that a constituent may receive a private benefit such as a monetary award for a favorable solution to an issue which in and of itself is not considered a private benefit under AS 24.60.030. -

Adopted by the Select Committee on Legislative Ethics on August 19, 2008.

A unanimous vote of the Committee.

[1] This opinion treats the three examples given as hypothetical, and, as requested, reviews them only for compliance with Legislative Ethics Act provisions relating to the use of state resources. Other laws may apply. For example, a person may not engage in the practice of law in the state unless the person is a

licensed and active member of the Alaska Bar. AS 08.08.210. There is no special exception from this prohibition for constituent advocacy by a legislator or legislative aide. The unauthorized practice of law is a misdemeanor. AS 08.08.230. The "practice of law," as defined in Alaska Bar Rule 63, includes:

> (b) either (i) representing another before a court or governmental body which is operating in its adjudicative capacity, including the submission of pleadings, or (ii) for compensation, providing advice or preparing documents for another which affect legal rights or duties.

[2] Advisory Opinion 05-01, legislative contacts with administrative decision makers, further clarifies the prohibitions and requirements of AS 24.60.030(i).

ADVISORY OPINION 10-01

SUBJECT: Conflict of Interest – Use of State Resources

RE: Conflict of Interest – State Paid Travel and Collateral Campaign Activities

Note: This advisory opinion was rescinded at the June 14, 2010 Ethics Committee meeting. Refer to the August 19, 2008 letter to the Alaska Public Offices Commission for guidance in this area. (The letter is attached as an addendum to this opinion.)

This opinion was initiated by the Select Committee on Legislative Ethics.

Question Presented

In an August 19, 2008 letter to the Alaska Public Offices Commission, this Committee held that a legislator who travels on legislative business using state resources may not engage in political campaigning or other partisan political party activities during the trip. In reaching this decision, the Committee examined the restrictions imposed upon legislators under AS 24.60.030(a)(2)[1] and 24.60.030 (a)(5)[2], as well as the legislative purposes set out in AS 24.60.010. The committee, at their February 17, 2010 meeting, asked for a review of this position.

Discussion

While we note the prohibitions in the statute above, we also believe that a practical solution exists which ensures compliance with the statutes, provides a practical solution to the issue presented, and incorporates other provisions of AS 24.60 to ensure compliance. In short, we believe that the nature of the business rather than whether it is paid for with state resources should be the governing standard in determining whether an ethical violation has occurred. A statement signed by a legislator designating the primary nature and purpose of the business rather than whether it is paid for by state resources should suffice to govern whether or not collateral activities can or cannot occur. Violations or false statements made in this designation can be enforced pursuant to AS 24.60.030(3)[3]. If a legislator gives as his or her primary or sole purpose for taking the trip as engaging in political campaigning or partisan political activity, then he or she would not be entitled to state paid travel expenses. On the other hand, if the legislator gives as his or her primary purpose traveling to and from the Legislative session, visiting constituents, or engaging in other legislative business, then they should not be barred from engaging in

other incidental activities like political campaigning or partisan political activity during the trip. While this requires reliance on the "honor system," legislators are held to similar standards in soliciting, accepting or receiving gifts.[4]

As has been explained to us, this issue arises primarily in the context of travel by legislators and how it affects different legislators from around the state in different ways. Some legislators are not required to use any state funds to travel to and from the session or to service their constituents. Other legislators use state funds to travel back and forth to Juneau for the session and/or to meet with their constituents. Issues have arisen about whether it is appropriate to engage in other types of activities when State funds have been used to pay for travel expenses in ether context.

Previous discussions have cited AS 24.60.030(a)(2) and (5) for the proposition that if any travel expenses are paid by the State of Alaska to cover or reimburse travel costs, it is a violation of the ethics statute to engage in any activities which are characterized as political campaigning or other partisan political activity. These arguments are based upon the specific language in the statute and also on the limited exceptions set out in the accompanying statutory language[5]. While facially sound, this argument creates significant differences in how different legislators must conduct their affairs in the performance of their duties. For example, all out of town legislators who are compensated for traveling to and from their home towns to Juneau at the beginning of the session would never be able to engage in political campaigning or other partisan political activity before the session began or after it expired. Arguably, a violation could also be alleged if a legislator returned home at the state expense and promptly engaged in political campaigning or other partisan political activity. Neither of these scenarios is faced by legislators who incur no travel costs for attending the Legislative session in Juneau. Additionally, many legislators' representation districts are vast in size and require significant travel expenses in order to properly represent their constituents. If a legislator accepts state money to pay for travel costs to visit his or her constituents, they cannot then engage in any activities characterized as political campaigning or other partisan political activity during the trip. Again, this is not an issue for legislators who do not have to incur travel costs to visit their constituents.

We believe this argument blurs the distinction between direct costs and indirect costs associated with travel by legislators. Another way to look at indirect costs is that they are incidental costs.[6] Because of the nature of the expense, travel costs can either be a direct or indirect expense of a particular endeavor. If a legislator incurs travel expenses for the sole purpose of engaging in non-legislative purposes, or partisan political activity, or for his or her private benefit, then use of state funds to facilitate those activities would not be appropriate or permitted. But when a legislator engages in multiple activities – legitimate legislative business and other activities which may have specific prohibitions in statute – while traveling, it is the primary purpose of the trip that dictates when state funds can be used to cover travel expenses. The tenor of AS 24.60.030 is to preclude direct use of public funds for non-legislative purposes and it is not clear that travel expenses for mixed activities was intended to be prohibited. The primary harm that this subsection prevents is the use of state resources for the direct purpose of political campaigning or partisan political party activity.

Additionally, this argument ignores the prohibitory language found in AS 24.60.030(a)(3). This statute makes it an ethical violation for a legislator or legislative employee to "...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds." Legislators are currently required to fill out a pre authorization travel form naming their purpose for engaging in the proposed travel.[7] This "statement" could be challenged or evaluated in light of the legislator's actual activities at a later time. Certainly, if a legislator made a false statement in this context, he or she would be in violation of AS 24.60.030(a)(3). These statements are a part of the public record and can and may be scrutinized by citizens who could file a complaint based upon the actual

activities of the legislator. This Committee would then be called upon to make a determination of whether a violation has occurred under AS 24.60.170.

This opinion is consistent with committee decisions addressing similar issues. For instance, in Advisory Opinion 96-05, a legislator requested an advisory opinion about whether it is appropriate to accept payment for the costs of a trip on which the legislator conducted both legislative business and personal business. The Select Committee issued the following opinion:

> The ethics committee cannot comment on whether you have complied with legislative policy with regard to travel and per diem allowances. Legislative Council is the body which sets those policies, and which is, together with the House and Senate leadership and the chair of legislative committees, responsible for interpreting and implementing that policy. The ethics committee notes that in approving a request for travel funds, the individual entrusted with approval authority is responsible for reviewing the purpose of the proposed trip and determining that the use of travel money is a valid use of public funds.

Id., at p. 1. The opinion goes on to state:

> It is permissible under the legislative ethics code for a legislator to accept state payment for the costs of a trip on which he or she conducted governmental business. As noted above, the committee does not have authority, in the context of advisory opinions, to use its judgment in lieu of a legislator's judgment in determining what is necessary state business or how much state business is necessary to justify accepting state payment for a trip.
>
> The committee also cautions that if a legislator or legislative employee were to intentionally use a facade of legislative business to obtain a government-paid trip but were to fail to conduct any governmental business to justify governmental payment, the committee might well find a violation of AS 24.60.030(a)(2).

Id., at p. 2.

Conclusion

In short, the enforcement provisions under AS 24.60.030(a)(3) provide sufficient protection against improper use of state funds for transportation costs.[8]

Adopted by the Select Committee on Legislative Ethics on May 27, 2010.

August 19, 2008

Holly Hill, Executive Director
Alaska Public Offices Commission
2221 East Northern Lights, Rom 128
Anchorage AK 99508-4149

Ms. Hill:

The Select Committee on Legislative Ethics (Committee) is writing in regard to a request (from the former executive director, Brooke Miles) for input concerning regulations to be drafted by the Alaska Public Offices Commission in 2008 on the subject of paid state travel and collateral campaign activity.

Review and discussion of Advisory Opinion 06-03-CD issued by the Alaska Public Offices Commission on October 31, 2006 occurred at four committee meetings; December 12, 2007, January 16, 2008, May 12, 2008, and August 19, 2008.

The Committee looked at the restrictions imposed by AS 24.60, the Legislative Ethics Act, on a legislator or legislative employee who while traveling on legislative business using legislative resources engages in political campaigning or other partisan political activity.

A legislative resource, including money provided by the legislature to cover or reimburse costs incurred by a legislator or legislative employee while traveling on legislative business, is a government asset or

resource. A government asset or resource may not be used by a legislator or legislative employee for involvement in or support of or opposition to partisan political activity. AS 24.60.030(a)(2). More specifically, a legislator or legislative employee may not use or authorize the use of a government asset or resource for the purpose of political fund raising or campaigning. AS 24.60.030(a)(5). (Partisan political activity, political fund raising and campaigning are herein referred to as "partisan political activity.")

The legislature may wish to revisit the absolute restriction in AS 24.60 in view of the vast difference between urban and rural areas in our state. Legislative districts vary greatly in the land mass encompassing a district. Both cost and time expended to visit areas within a district also vary greatly. Travel for a matter of legislative concern or for partisan political activity can be quite costly and time consuming. The extreme example of traveling to a remote area of the state for legislative business and then returning to the legislator's home base and again traveling to the same area for partisan political activity was discussed.

Based on these factors, the Committee looked at de minimis use of state resources as a possible solution. However, de minimis use of a legislative resource for partisan political activity is prohibited under AS 24.60. To allow de minimis use of state resources for partisan political activity would require a legislative change in AS 24.60. Currently the only exception for de minimis use of state resources is for personal reasons if there is no cost to the state or the cost is promptly reimbursed.

If the legislature adopted an exception to AS 24.60.030 to permit partisan political activity that required the legislator to reimburse the state for pro-rated costs of such activity then the use might be considered de minimis. A legislator or legislative employee could then attend an event, for example, that had the overtones of being campaign related or was actually campaign related while on a legislative business trip if the primary purpose of the trip was for a matter of legislative concern. Committee members very strongly stated that a legislative trip should not be planned or scheduled around a campaign activity and further underscored no additional expenses to the state must be incurred when conducting the partisan political activities.

Under a de minimis use exception, the allocation formula allowed under Executive Branch ethics and outlined in AO 06-03-CD is the method the Committee feels is most equitable and fair. The allocation of state funds would be determined based on the percentage of time spent on state business and the percentage of time spent on partisan political activity. The percentage of time spent on a partisan political activity would be used to determine the allocated cost for reimbursement to the state.

After considerable debate, the committee determined travel to and from the legislator's home district to attend a legislative session should be exempt from the requirement of allocating costs for partisan political activity.

We hope our comments will be helpful to the Commission in preparing draft regulations on this subject. I am available to answer any questions.

Sincerely,

Herman G. Walker, Jr.
Chair, Select Committee on Legislative Ethics

Cc: Ethics Committee Members

[1] In pertinent part, AS 24.60.030(a)(2) states, "A legislator or legislative employee may not ... use public funds, facilities, equipment, services, or another government asset or resource for a non-legislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of the legislator, legislative employee, or another person..."

[2] In pertinent part, AS 24.60.030(a)(5) makes it unethical to" use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning..."

[3] AS 24.60.030(a)(3) makes it an ethical violation for a legislator or legislative employee to "...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds."

[4] Under AS 24.60.080 only four types of gifts require disclosure. Legislators are held to the "honor system" in determining how to identify other gifts received. A gift log is no longer required by statute but recommended. *See also* AS 24.60.010 (7)"compliance with a code of ethics is an individual responsibility..."

[5] AS 24.60.030 has a number of noted exceptions to the general rules that state resources may not be used for partisan political activity or political campaigning. See AS 24.60.030(a)(2)(A)-(K), AS 24.60.030(a)(5)(A)-(E), AS 24.60.030(d) and AS 24.60.030(h).

[6] AS 24.60.030(h) allows incidental campaign activities during the employee's workday while on government time. If the activity is more than incidental the employee shall take leave time. A similar analogy could be made regarding legislative travel.

[7] Each legislator must complete a Senate, House, Finance Committee or Legislative Council Pre Travel Authorization Form prior to travel for legislative business and a Legislative Affairs Agency Travel Claim form to request reimbursement after travel has been completed. Additionally, the Senate and House each year approve guidelines for travel and per diem for legislators. Legislative Council has also a travel and per diem policy for both legislators and legislative employees.

[8] The Committee recommends that the Legislature consider amending AS 24.60.030 to clarify this matter.

Advisory Opinion 94-07

RE: Must participation in the Violent Crimes Compensation Commission Program be published in the journals?

You are a legislative employee covered by the legislative ethics code. You have filed a disclosure of participation in a state benefit program but asked that the committee refrain from publishing the disclosure in the journal.

Statement of Facts

The facts and circumstances that you have related, and on which the committee relies in answering your questions, are as follows:

You are a legislative employee, covered by the legislative code of ethics. During 1993, you received $763 from the Violent Crimes Compensation Program. You reported this participation in a state benefit program to the committee on February 15 but requested that the committee not publish the disclosure. The committee has chosen to treat your request for confidentiality as a request for an advisory opinion in order to give notice of its decision on the issue your request raises.

Discussion

Under AS 24.60.050(c), a legislator or legislative employee who participates in a state benefit or loan program that is not exempt under (a) of that section must disclose the participation. The programs and loans that are exempt from disclosure under subsection (a) are those that are generally available to members of the public, are subject to fixed, objective eligibility standards, and require minimal discretion in determining qualification. Under subsection (b), the committee publishes a list of programs designating those for which disclosure is required. Appendix G of the Standards of Conduct Handbook, prepared by the ethics committee and published in January 1993, lists those programs that must be reported. The Violent Crimes Compensation Program is one of the programs listed. Therefore, you are required to report your participation, which you did.

Under AS 24.60.050(c), the committee is required to

> promptly compile a list of the statements [of participation in programs or receipt of loans] indicating the loans and programs and amounts and send it to the presiding officer of each house who shall have it published in the supplemental journals within three weeks of the filing date.

The statute on its face does not provide any exceptions to the requirement that each person participating in a program or loan be included on the list that is published in the journals. However, the committee believes that an exception based on the constitutional right of privacy must be read into the publication requirement and should be applied in the case of programs such as the Violent Crimes Compensation Program.[1]

The committee staff contacted the Violent Crimes Compensation office to discuss the privacy issue. According to the staff of that office, the names of participants in the program and files relating to them are kept confidential. There is no public access through the commission to any information on an individual. They do publish an annual report from which any identifying information concerning individuals has been removed.

In Advisory Opinion 88-1, concerning disclosure of representation before a state agency, board, or commission under AS 24.60.100, the committee relied on the constitutional right to privacy and on the state supreme court's implementation of that right to find a limited exemption to the disclosure requirement imposed by the ethics code. The committee permitted the legislator-attorney to refrain from disclosing the name of a client whose privacy would be invaded by disclosure but did require disclosure of the existence of an unnamed client, the subject of the representation, and the body before which the matter was heard.

In Falcon v. Alaska Public Offices Com'n, 570 P.2d 469 (Alaska 1977), the court considered whether a doctor who had been appointed to the State Medical Board was required to reveal the names of patients on his financial disclosure statement. The court stated that whether a privacy invasion is justified turns on the precise nature of the privacy interest involved:

> There must be a "fair and substantial relation" between the statutory means and a legitimate governmental purpose. Thus to determine the validity of the disclosure provisions of the Conflict of Interest law, we must consider both the nature and the extent of the privacy invasion and the strength of the state interest requiring disclosure.

Id. at 476. (Footnotes omitted) In Falcon, the court found that the purposes of the Conflict of Interest law were to promote efficient, ethical government and preserve the integrity and fairness of the political process both in fact and in appearance. Those purposes are similar to the purposes of the legislative ethics code, stated at AS 24.60.010(1) and (2).[2] The court then considered how invasive the revelation of the names of the patients would be and noted that ordinarily disclosure of patients of a physician would involve only a minimal invasion of privacy but that in particular situations, the disclosure might have the effect of making public information that was confidential or sensitive. The court quoted a commentator on how to determine whether information should be considered sensitive:

> [s]ensitive information is that which a person desires to keep private and which, if disseminated, would tend to cause substantial concern, anxiety or embarrassment to a

reasonable person.

Id. at 479. The court gave an example of visits to a physician who specializes in contraceptive matters or abortions as private and sensitive information. The court then concluded: that the extent to which the governmental interest in promoting fair and honest government would not outweigh the individual's privacy interest in protecting sensitive personal information from public disclosure in those kinds of situations. Id. at 480.

Applying this analysis to your situation, the committee must decide whether your participation in the Violent Crimes Compensation program should be considered to be sensitive information. If the committee finds that the information is sensitive, it must weigh whether your privacy interest should take precedence over the governmental interest in public disclosure of your participation in the program. In making this judgment, the committee will consider the possibility of the appearance of impropriety in your participation as well as the possibility of actual impropriety. The committee will also consider the degree of influence you might have had because of your legislative position.

The committee finds that your participation in the Violent Crimes Compensation program should be considered sensitive personal information. You have expressed concern about having the events that happened made public and the committee finds that a reasonable person would have similar concerns. This conclusion is supported by the fact that the information is treated as confidential by the Violent Crimes Compensation Commission. Because the amount of money you received from the program was relatively small and because you do not occupy a position that can take official action or exert official influence over this state program, the committee finds that your name should not be made public.[3] However, in order to comply as completely as possible with the statutory requirements, the committee will publish the fact that a person required to make disclosures under the legislative code of ethics did participate in the program and will disclose the amount of the benefit that you and your family received. Your name will be kept confidential.

Conclusion

For the reasons stated above, the committee finds that under AS 24.60.050, you were required to report your participation in the Violent Crimes Compensation program to the committee but that your constitutional right to privacy requires the committee to keep your name confidential. Accordingly the committee will publish notice that a person required to disclose under AS 24.60.050 participated in that program and will report the amount you received.

Adopted by the Select Committee on Legislative Ethics on April 14, 1994. Members present and concurring in this opinion were:

Joseph P. Donahue, Chair
Representative Jerry Mackie
Representative Brian Porter
Margie MacNeille
Edith Vorderstrasse
Shirley McCoy

Members absent were:

Ed Granger, Vice-Chair
Senator Jay Kerttula
Senator Drue Pearce

ADVISORY OPINION 10-01

SUBJECT: Conflict of Interest – Use of State Resources

RE: Conflict of Interest – State Paid Travel and Collateral Campaign Activities

Note: This advisory opinion was rescinded at the June 14, 2010 Ethics Committee meeting. Refer to the August 19, 2008 letter to the Alaska Public Offices Commission for guidance in this area. (The letter is attached as an addendum to this opinion.)

This opinion was initiated by the Select Committee on Legislative Ethics.

Question Presented

In an August 19, 2008 letter to the Alaska Public Offices Commission, this Committee held that a legislator who travels on legislative business using state resources may not engage in political campaigning or other partisan political party activities during the trip. In reaching this decision, the Committee examined the restrictions imposed upon legislators under AS 24.60.030(a)(2)[1] and 24.60.030 (a)(5)[2], as well as the legislative purposes set out in AS 24.60.010. The committee, at their February 17, 2010 meeting, asked for a review of this position.

Discussion

While we note the prohibitions in the statute above, we also believe that a practical solution exists which ensures compliance with the statutes, provides a practical solution to the issue presented, and incorporates other provisions of AS 24.60 to ensure compliance. In short, we believe that the nature of the business rather than whether it is paid for with state resources should be the governing standard in determining whether an ethical violation has occurred. A statement signed by a legislator designating the primary nature and purpose of the business rather than whether it is paid for by state resources should suffice to govern whether or not collateral activities can or cannot occur. Violations or false statements made in this designation can be enforced pursuant to AS 24.60.030(3)[3]. If a legislator gives as his or her primary or sole purpose for taking the trip as engaging in political campaigning or partisan political activity, then he or she would not be entitled to state paid travel expenses. On the other hand, if the legislator gives as his or her primary purpose traveling to and from the Legislative session, visiting constituents, or engaging in other legislative business, then they should not be barred from engaging in

other incidental activities like political campaigning or partisan political activity during the trip. While this requires reliance on the "honor system," legislators are held to similar standards in soliciting, accepting or receiving gifts.[4]

As has been explained to us, this issue arises primarily in the context of travel by legislators and how it affects different legislators from around the state in different ways. Some legislators are not required to use any state funds to travel to and from the session or to service their constituents. Other legislators use state funds to travel back and forth to Juneau for the session and/or to meet with their constituents. Issues have arisen about whether it is appropriate to engage in other types of activities when State funds have been used to pay for travel expenses in ether context.

Previous discussions have cited AS 24.60.030(a)(2) and (5) for the proposition that if any travel expenses are paid by the State of Alaska to cover or reimburse travel costs, it is a violation of the ethics statute to engage in any activities which are characterized as political campaigning or other partisan political activity. These arguments are based upon the specific language in the statute and also on the limited exceptions set out in the accompanying statutory language[5]. While facially sound, this argument creates significant differences in how different legislators must conduct their affairs in the performance of their duties. For example, all out of town legislators who are compensated for traveling to and from their home towns to Juneau at the beginning of the session would never be able to engage in political campaigning or other partisan political activity before the session began or after it expired. Arguably, a violation could also be alleged if a legislator returned home at the state expense and promptly engaged in political campaigning or other partisan political activity. Neither of these scenarios is faced by legislators who incur no travel costs for attending the Legislative session in Juneau. Additionally, many legislators' representation districts are vast in size and require significant travel expenses in order to properly represent their constituents. If a legislator accepts state money to pay for travel costs to visit his or her constituents, they cannot then engage in any activities characterized as political campaigning or other partisan political activity during the trip. Again, this is not an issue for legislators who do not have to incur travel costs to visit their constituents.

We believe this argument blurs the distinction between direct costs and indirect costs associated with travel by legislators. Another way to look at indirect costs is that they are incidental costs.[6] Because of the nature of the expense, travel costs can either be a direct or indirect expense of a particular endeavor. If a legislator incurs travel expenses for the sole purpose of engaging in non-legislative purposes, or partisan political activity, or for his or her private benefit, then use of state funds to facilitate those activities would not be appropriate or permitted. But when a legislator engages in multiple activities – legitimate legislative business and other activities which may have specific prohibitions in statute – while traveling, it is the primary purpose of the trip that dictates when state funds can be used to cover travel expenses. The tenor of AS 24.60.030 is to preclude direct use of public funds for non-legislative purposes and it is not clear that travel expenses for mixed activities was intended to be prohibited. The primary harm that this subsection prevents is the use of state resources for the direct purpose of political campaigning or partisan political party activity.

Additionally, this argument ignores the prohibitory language found in AS 24.60.030(a)(3). This statute makes it an ethical violation for a legislator or legislative employee to "...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds." Legislators are currently required to fill out a pre authorization travel form naming their purpose for engaging in the proposed travel.[7] This "statement" could be challenged or evaluated in light of the legislator's actual activities at a later time. Certainly, if a legislator made a false statement in this context, he or she would be in violation of AS 24.60.030(a)(3). These statements are a part of the public record and can and may be scrutinized by citizens who could file a complaint based upon the actual

activities of the legislator. This Committee would then be called upon to make a determination of whether a violation has occurred under AS 24.60.170.

This opinion is consistent with committee decisions addressing similar issues. For instance, in Advisory Opinion 96-05, a legislator requested an advisory opinion about whether it is appropriate to accept payment for the costs of a trip on which the legislator conducted both legislative business and personal business. The Select Committee issued the following opinion:

> The ethics committee cannot comment on whether you have complied with legislative policy with regard to travel and per diem allowances. Legislative Council is the body which sets those policies, and which is, together with the House and Senate leadership and the chair of legislative committees, responsible for interpreting and implementing that policy. The ethics committee notes that in approving a request for travel funds, the individual entrusted with approval authority is responsible for reviewing the purpose of the proposed trip and determining that the use of travel money is a valid use of public funds.

Id., at p. 1. The opinion goes on to state:

> It is permissible under the legislative ethics code for a legislator to accept state payment for the costs of a trip on which he or she conducted governmental business. As noted above, the committee does not have authority, in the context of advisory opinions, to use its judgment in lieu of a legislator's judgment in determining what is necessary state business or how much state business is necessary to justify accepting state payment for a trip.
>
> The committee also cautions that if a legislator or legislative employee were to intentionally use a facade of legislative business to obtain a government-paid trip but were to fail to conduct any governmental business to justify governmental payment, the committee might well find a violation of AS 24.60.030(a)(2).

Id., at p. 2.

Conclusion

In short, the enforcement provisions under AS 24.60.030(a)(3) provide sufficient protection against improper use of state funds for transportation costs.[8]

Adopted by the Select Committee on Legislative Ethics on May 27, 2010.

Members present and concurring in this opinion were:
Senator John Coghill
Senator Gary Stevens (via teleconference)
Representative Les Gara (alternate member)
Representative Craig Johnson (alternate member)
Antoinette "Toni" Mallott

Members dissenting from this opinion were:

H. Conner Thomas, Chair
Gary J. Turner, public member
Dennis "Skip" Cook, public member

Member absent:

Herman G. Walker, Jr., public member

August 19, 2008

Holly Hill, Executive Director
Alaska Public Offices Commission
2221 East Northern Lights, Rom 128
Anchorage AK 99508-4149

Ms. Hill:

The Select Committee on Legislative Ethics (Committee) is writing in regard to a request (from the former executive director, Brooke Miles) for input concerning regulations to be drafted by the Alaska Public Offices Commission in 2008 on the subject of paid state travel and collateral campaign activity.

Review and discussion of Advisory Opinion 06-03-CD issued by the Alaska Public Offices Commission on October 31, 2006 occurred at four committee meetings; December 12, 2007, January 16, 2008, May 12, 2008, and August 19, 2008.

The Committee looked at the restrictions imposed by AS 24.60, the Legislative Ethics Act, on a legislator or legislative employee who while traveling on legislative business using legislative resources engages in political campaigning or other partisan political activity.

A legislative resource, including money provided by the legislature to cover or reimburse costs incurred by a legislator or legislative employee while traveling on legislative business, is a government asset or

resource. A government asset or resource may not be used by a legislator or legislative employee for involvement in or support of or opposition to partisan political activity. AS 24.60.030(a)(2). More specifically, a legislator or legislative employee may not use or authorize the use of a government asset or resource for the purpose of political fund raising or campaigning. AS 24.60.030(a)(5). (Partisan political activity, political fund raising and campaigning are herein referred to as "partisan political activity.")

The legislature may wish to revisit the absolute restriction in AS 24.60 in view of the vast difference between urban and rural areas in our state. Legislative districts vary greatly in the land mass encompassing a district. Both cost and time expended to visit areas within a district also vary greatly. Travel for a matter of legislative concern or for partisan political activity can be quite costly and time consuming. The extreme example of traveling to a remote area of the state for legislative business and then returning to the legislator's home base and again traveling to the same area for partisan political activity was discussed.

Based on these factors, the Committee looked at de minimis use of state resources as a possible solution. However, de minimis use of a legislative resource for partisan political activity is prohibited under AS 24.60. To allow de minimis use of state resources for partisan political activity would require a legislative change in AS 24.60. Currently the only exception for de minimis use of state resources is for personal reasons if there is no cost to the state or the cost is promptly reimbursed.

If the legislature adopted an exception to AS 24.60.030 to permit partisan political activity that required the legislator to reimburse the state for pro-rated costs of such activity then the use might be considered de minimis. A legislator or legislative employee could then attend an event, for example, that had the overtones of being campaign related or was actually campaign related while on a legislative business trip if the primary purpose of the trip was for a matter of legislative concern. Committee members very strongly stated that a legislative trip should not be planned or scheduled around a campaign activity and further underscored no additional expenses to the state must be incurred when conducting the partisan political activities.

Under a de minimis use exception, the allocation formula allowed under Executive Branch ethics and outlined in AO 06-03-CD is the method the Committee feels is most equitable and fair. The allocation of state funds would be determined based on the percentage of time spent on state business and the percentage of time spent on partisan political activity. The percentage of time spent on a partisan political activity would be used to determine the allocated cost for reimbursement to the state.

After considerable debate, the committee determined travel to and from the legislator's home district to attend a legislative session should be exempt from the requirement of allocating costs for partisan political activity.

We hope our comments will be helpful to the Commission in preparing draft regulations on this subject. I am available to answer any questions.

Sincerely,

Herman G. Walker, Jr.
Chair, Select Committee on Legislative Ethics

Cc: Ethics Committee Members

[1] In pertinent part, AS 24.60.030(a)(2) states, "A legislator or legislative employee may not ... use public funds, facilities, equipment, services, or another government asset or resource for a non-legislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of the legislator, legislative employee, or another person..."

[2] In pertinent part, AS 24.60.030(a)(5) makes it unethical to" use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning..."

[3] AS 24.60.030(a)(3) makes it an ethical violation for a legislator or legislative employee to "...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds."

[4] Under AS 24.60.080 only four types of gifts require disclosure. Legislators are held to the "honor system" in determining how to identify other gifts received. A gift log is no longer required by statute but recommended. *See also* AS 24.60.010 (7)"compliance with a code of ethics is an individual responsibility..."

[5] AS 24.60.030 has a number of noted exceptions to the general rules that state resources may not be used for partisan political activity or political campaigning. See AS 24.60.030(a)(2)(A)-(K), AS 24.60.030(a)(5)(A)-(E), AS 24.60.030(d) and AS 24.60.030(h).

[6] AS 24.60.030(h) allows incidental campaign activities during the employee's workday while on government time. If the activity is more than incidental the employee shall take leave time. A similar analogy could be made regarding legislative travel.

[7] Each legislator must complete a Senate, House, Finance Committee or Legislative Council Pre Travel Authorization Form prior to travel for legislative business and a Legislative Affairs Agency Travel Claim form to request reimbursement after travel has been completed. Additionally, the Senate and House each year approve guidelines for travel and per diem for legislators. Legislative Council has also a travel and per diem policy for both legislators and legislative employees.

[8] The Committee recommends that the Legislature consider amending AS 24.60.030 to clarify this matter.

MINUTES from June 16, 2010
FULL COMMITTEE MEETING
Anchorage LIO, Room 550

1. **CALL THE MEETING TO ORDER:** Chair Conner Thomas called the meeting to order at 12:05 p.m. Members present: Senator John Coghill, (via teleconference), Senator Gary Stevens, Representative Les Gara, (alternate for Rep Gardner), Representative Carl Gatto, Gary J. Turner, Dennis (Skip) Cook, Herman G. Walker, Jr., Antoinette (Toni) Mallott. Staff present: Joyce Anderson, Administrator. Also present: Brent Cole, Legal Counsel and Dan Wayne, LAA Legal Counsel (via teleconference).

2. **APPROVAL OF AGENDA:** Chair Thomas asked if there were any objections to the proposed agenda and hearing none, the agenda was approved.

3. **APPROVAL OF MINUTES:** Vice Chair Turner requested the word "almost" be inserted on page 4, third paragraph, first sentence, before "three years now". Member Walker made a motion to approve the minutes as amended. No objections.

4. **PUBLIC COMMENT:** Representative Craig Johnson stated he served as an alternate for Rep Gatto at the May 27th Ethics Committee meeting and wanted to clarify his position on the subject of legislative travel and campaign activity on the same trip. He did not believe it was a violation to have a conversation with a constituent on campaigning in a super market while traveling on state business. He did feel it would not be appropriate to schedule a state paid trip and a fundraiser at the same time. He further stated he believed there needed to be a balance between these two activities but questioned whether the Ethics Committee had the ability to do this within the structure of the law. Rep Johnson wanted the Committee to know for the record that he did not agree with what he and the Committee approved at the last meeting.

5. **CHAIR/STAFF REPORT:** Ms. Anderson informed the committee the NCSL's State Legislatures magazine, June edition, had published an article about 25 innovative web sites. The searchable database of more than 100 advisory opinions from 1984 to the present on our website was showcased. The article also mentioned disclosures could be filed online.

Ms. Anderson also informed the committee that she recently learned the audio from our Ethics Committee meetings were not available to the public and requested the Committee consider making them available, like other interim committees, on BASIS. The Committee determined the audios should be on BASIS. Sen Coghill suggested BASIS and the Ethics website be linked as well.

6. **REVIEW OF ACTION TAKEN AT MAY 27, 2010 MEETING - STATE PAID TRAVEL AND COLLATERAL CAMPAIGN ACTIVITIES:** Chair Thomas reminded members an advisory opinion was approved at the May 27 meeting authorizing collateral campaign activities when on a state paid trip as long as the trip was primarily for legislative business. The results were: YES: 5; NO: 3; with one member absent. A couple of days later, Rep Gara, who voted yes, requested reconsideration of his vote. (See his request via E-mail in meeting packet.)

Chair Thomas stated it was his role as chair to decide if the request was timely. Because the advisory opinion had already been made public, including notification to the Press, and advice had already been given out based on the opinion; he ruled the request was not timely. He stated he asked Ms. Anderson to contact each Committee member to see if there was any interest in rescinding the opinion. Several members expressed their interest in discussing this item further and possibly rescinding the advisory opinion.

Chair Thomas indicated if there was a motion today to rescind the committee's previous action and it passed, the item would be put on the table for discussion. Rep Gara made a motion to rescind the action taken by the Ethics Committee on May 27, 2010.

Discussion on State Paid Travel and Collateral Campaign Activities: Chair Thomas reminded members the Committee did not have the authority to set policy but only interpret the Legislative Ethics Act. The Chair gave the floor to Rep Gara to allow him the opportunity to explain his request to rescind and present his recommendations.

> Rep Gara summarized the E-mail he sent to members: We were given two options at the last meeting; one prepared by Mr. Brent Cole, outside legal counsel, and the other prepared by Mr. Dan Wayne, LAA Legal Counsel. He stated Mr. Cole's opinion was flawed in that campaign fundraising activities were permitted and Mr. Wayne's opinion was also flawed by banning of legitimate, free speech.

Rep Gara recommended accepting Mr. Cole's opinion focusing on the "primary purpose" rule and adding a statement indicating, **"fundraising on a state-paid trip can create the appearance of impropriety."**

The Chair asked Mr. Wayne if the Committee has the authority to make the type of modification Rep Gara is recommending and to also give his legal opinion on the freedom of speech issue. Mr. Wayne stated the Committee has the authority to interpret the statute based on the facts of the question and statutory language. He stated he understood Rep Gara's concerns.

Mr. Wayne pointed out in his updated opinion that if the political activity the person is engaged in is made possible by the use of state resources, and then s/he should not engage in it. The opinion included relevant examples. However, Mr. Wayne concluded the subject matter can be complicated and it would not be difficult to think of unusual conundrums that people could run into.

Sen Stevens agreed this issue was complicated and suggested the committee make it simple and clear for legislators to know when they are in violation and when they are not. He questioned if the legislature should be working this issue, not the Committee.

Member Walker stated that he understood the merit of Sen Stevens' position and Rep Gara's and believes this should be a legislative fix. The public members have been in favor of a legislative fix from the start. He stated there needs to be a balance between urban and rural legislators with the way the state is laid out. The balance should not be determined by this Committee.

Member Cook concurred with Member Walker stating he felt the Legislature should fix this issue, not the Committee. There are problems with both opinions but ultimately it's the statute that is the problem and needs to be addressed. He felt the statute was too absolute in that campaigning is prohibited and there are no exceptions, whatsoever. There are exceptions for everything else. If the Legislature can come up with a quick fix to the state jet issue (Administrator's Note: When this issue came to light, legislation was passed to address it the next legislative session), then they can fix and corrected this situation as well. Member Cook believes the Legislature does not want to loosen up the rules; they want the Ethics Committee to do it for them. As a member of the Committee, he is not willing to do what the Legislature should be doing. The Legislature passed the statute, let the Legislature fix it.

Member Mallott stated she was under the impression from the May 27 minutes that Sen Coghill was going to take this issue to the Legislature for review. Member Mallott also brought up a very common scenario that could occur while a legislator was visiting a village on state business. If a legislator declined an invitation to a potluck to discuss campaign issues, the legislator would be insulting the village and community. Potlucks are a common event in small villages.

Chair Thomas redirected the discussion and requested Mr. Cole to address Rep Gara's concerns before addressing Member Mallott's comments.

Mr. Cole stated it was not uncommon for a statute to be rewritten. He also stated it was not unusual to have two or three interpretations relating to the same statute. Legislators need guidance and he felt Mr. Wayne's interpretation allows for too many limitations for legislators while they are traveling on state business. He did not feel his opinion was "extreme", as some members had stated. He stated if legislators are on a state paid trip to a village, the legislator should be able to communicate with the people there on all facets.

Chair Thomas asked Mr. Cole if the Committee has the authority to revise the opinion as Rep Gara suggested. Mr. Cole stated he believed the Committee has the authority. It would first require rescinding the advisory opinion which has already been approved and then rewriting certain sections as the committee directed. However, he did not agree with Rep Gara's recommendation of prohibiting fundraising only.

Sen Stevens agreed with Mr. Cole's comment that legislators need guidance and it needs to be clear. If a legislator files paperwork to attend a meeting and states the meeting is the primary purpose of the trip, and he approves it as Senate President, and the legislator also attends a campaign fundraising event for himself or herself while on the trip, anyone can file a complaint saying that was not the primary purpose of the trip. In his opinion, it is obvious and clear to him that this person violated the ethics code.

Rep Gara agreed the issue is clarity. He did not agree with Mr. Wayne's opinion since it banned free speech. Rep Gara also stated he agreed that this was the Legislature's job but it was not realistic to expect it to pass. From past experience, even with the best intentions, it is difficult to pass a bill. That is why it is important to come up with something now; a rule that honors the statute but isn't unreasonable or with unintended circumstances.

Rep Gara stated Mr. Cole's opinion makes sense but liked the idea that the Ethics Committee could bar things that raise the appearance of impropriety. Chair Thomas added the Committee has in the past deemed the appearance of impropriety was not in and of itself an ethics code violation.

Mr. Cole stated he did not see how you could say fundraising raises the appearance of impropriety but then allows other candidate campaign activities. In his opinion all campaign activities raise the appearance of impropriety.

Rep Gatto agreed leeway was important but finding the right language was a difficult task. What a legislator might see and what another perceives as proper or improper can be very different.

Chair Thomas believed it boils down to the purpose of the trip; i.e., the specific set of circumstances. He does not believe they can come up with any rule that can guarantee a complaint won't ever be filed.

Sen Stevens stated that he was invited to attend two fundraisers the night before, which he did not attend, but questioned if the Committee was referring to personal fundraisers for the legislators on the state paid trip or any fundraiser. Mr. Wayne indicated there is another opinion on this subject. He believes the statute reads whether you are helping someone else raise money for their campaign or raising money for your campaign, it's all considered fundraising. This would include the situation where your name is listed on an invitation to a fundraiser. Mr. Wayne offered to look up the opinion and provide additional information. Sen Stevens then questioned if it included attending fundraisers for other candidates, such as a fundraiser for Sen Murkowski or President Obama. Member Cook stated the statute reads, "no partisan political activity", which includes all

levels of partisan political activity. Member Cook indicated that's the problem with the statute; it's very broad. Sen Stevens stated the words "primary purpose" definitely clarifies things for him and that he preferred the term.

Chair Thomas stated that there was a motion on the floor and asked each member to voice their opinion before taking a vote.

- Member Cook stated the Legislature should make the policy call through legislation.

- Sen Coghill stated he preferred Mr. Cole's opinion in that the term "primary purpose" was defined and was against rescinding the opinion.

- Rep Gara stated he would like a rule that meets the public's expectations – when on a state paid trip you are not going to a fundraiser on the same trip. He clarified the prohibition doesn't mean you shouldn't be able to talk to a voter or the press while on that trip. He is against the approved opinion and hopes the Committee comes up with a rational rule.

- *MEMBER MALLOTT'S COMMENTS WERE INAUDIBLE.*

- Member Walker had no comment at this time.

- Sen Stevens stated he was against rescinding the opinion without replacing it with something else. He believes in the honor system; i.e., signing paperwork that states the primary purpose of a trip is for legislative business. He believes the committee is delving in dangerous territory in that we are close to writing legislation which is not the Committee's job.

- Rep Gatto stated he was against rescinding the opinion.

- Chair Thomas agreed with Member Cook. The Legislature was clear when they wrote the current legislation. No state resources can be used for campaigning. He also agrees that the prohibition does not mean a legislator cannot talk on the phone about campaign issues. But he stated there are no exceptions in the current statute for the use of state resources and that is a concern that has been voiced by many members. He stated the Legislature should be addressing this issue. Chair Thomas explained that in August of 2008 the Ethics Committee's letter to APOC is what generated this discussion. There was an opinion drafted but never adopted. The Committee maintained its position that there were no exceptions in the statute.

Sen Stevens voiced concern and frustration over rescinding Mr. Cole's opinion due to the fact Legislators had been notified of the opinion and received advice based on the opinion and now the opinion may be rescinded today.

Chair Thomas agreed that it is frustrating to him as well, but if the current opinion is rescinded today and no other opinion is approved, the recommended advice to legislators and staff would be what was in place prior to adopting Mr. Cole's opinion in May. The advice provided after the May 27 opinion was adopted would stand and action taken by legislators and staff during the period the opinion was in force would not be in violation of the Act.

Chair Thomas asked Ms. Anderson to take a roll call vote. YEAS: Skip Cook, Rep Gara, Toni Mallott, Gary Turner, Herman Walker, Jr., Chair Thomas, NAYS: Sen Coghill, Rep Gatto, Sen Stevens. Motion to rescind the committee's May 27 action passes.

Chair Thomas suggested the members break for 10 minutes to review Mr. Wayne's advisory opinion.

Sen Stevens recommended legislators be notified immediately that Mr. Cole's advisory opinion was rescinded today. Ms. Anderson stated she would send out an "All Users" e-mail ASAP.

(Herman Walker leaves the meeting and does not return.)

1:40 p.m. - Members reconvened.

Mr. Wayne presented a revised draft of the 2008 advisory opinion not approved by the committee. He explained that he reviewed previous discussion on this subject and incorporated some of the examples in this opinion. He clarified his drafted opinion was to assist the Committee and not to advocate for any particular policy. The Committee can accept it, modify it or reject it.

(Sen Stevens temporarily leaves the meeting.)

Mr. Wayne proceeded to point out the changes he made from his first draft opinion. He changed the wording from "legislative resources" to "state resources" throughout the opinion to be consistent with the term used in statute. The examples will aid in understanding where the Committee might "draw the line". The long paragraph on page three is new and addresses the interpretation of the two prohibitions in statute in regard to legislators and staff traveling to and from legislative sessions. There was some discussion at previous meetings in relation to the term "incidental" and the long paragraph on page 3 and page 4 covers those concerns. The second paragraph on page 5 covers "inadvertent" campaign activity that many members voiced concerns about; for example, if you're approached by a constituent in the super market with a campaign related issue while traveling on a state paid business trip.

(Sen Stevens returns to the meeting.)

Sen Stevens requested a definition of the terms "political fundraising", "campaigning" and "partisan political activity". Mr. Wayne provided Sen Stevens some examples but explained there were no definitions in statute. Mr. Wayne indicated there are the

obvious examples of when you are campaigning, but there are also gray areas which may be more obvious or less obvious to some and fall subject to interpretation.

Rep Gara requested clarification regarding phone calls and a scenario during a month long special session. What if a legislator received a call from the press stating your opponent has accused you of doing something you did not and you feel you need to address it immediately, and you do, are you engaging in "political activity". Mr. Wayne stated he would have to know the facts of the subject matter that was before the press. Without the facts, he could not answer the question.

Vice Chair Turner commented that APOC also did not have definitions on these three terms. They have said it would greatly help them if there were definitions. He also commented that he did not fully agree with any of the options today and reminded the members there was still the option to adopt the Executive Branch's method, which was prompted by the use of the executive airplane by a sitting governor, such as portioning the expense out.

Members discussed what the next step should be. Rep Gara stated he could agree with members if the consensus was more discussion and more work on the issue. However, he was concerned about what was to be the rule in the meantime. He offered taking it to the Legislature, but felt time was of the essence. He felt that a ruling should be made today and requested feedback from members on his recommendation of adopting Mr. Cole's opinion with the exception of fundraising.

Sen Coghill indicated the pressing concerns were definitions, the freedom of speech issue, and when impropriety of fundraising occurs. He feels the Committee wants a rule that is "prescriptive" rather than something they can use as a guide. For example, the members want to be able to tell people when it is okay to fundraise rather than what is the impropriety in mixing legislative work with campaign work. He felt this was discussion for the Legislature, as was defining terms. He agreed that the statute was too narrow, but the Committee has been pretty clear about what an impropriety might look like. He voiced it was not impossible to get things passed in the Legislature it just takes tenacity. He felt the statute is what it is but there is also a record of the numerous discussions held on this issue and minutes available to the public that shows why the impasse is so difficult to navigate.

Members discussed the next step. Legislators asked what advice the Ethics office will be giving to legislators. Chair Thomas replied that the Committee will stand behind what the statute says and the position outlined in the committee's letter to APOC.

Rep Gara made a motion to accept Mr. Cole's opinion with the exception of fundraising, reiterating that he felt a rule needed to be in place today. If a ruling was not made today, he felt what could happen is that a complaint will be filed and then the Committee will be forced to come up with a rule. He disagrees with this practice.

The Chair disagreed with Rep Gara in that the Committee has already taken a position. The position the Committee has taken is outlined in the letter to APOC. What the Committee has not done is adopt an advisory opinion.

All members agreed there should not be a vote without Member Walker's presence. Rep Gara withdrew his motion.

Members reviewed the August 19, 2008 letter to APOC. Rep Gara noted that the freedom of speech issues continue to be a problem.

Chair Thomas concluded that the item today will be tabled for the next Committee meeting.

7. **ADJOURN**: Member Cook moved to adjourn the meeting at approximately 2:30 p.m. No objections.

Alaska State Legislature

Select Committee on
Legislative Ethics

Physical Address:
716 W. 4th Ave., Suite 230
Anchorage, AK 99510-1468
PH: (907) 269-0150
FAX: (907) 269-0152

Mailing Address:
P. O. Box 101468
Anchorage, AK
99510-1468

MINUTES from May 27, 2010
FULL COMMITTEE MEETING
Anchorage LIO, Room 220

1. **CALL THE MEETING TO ORDER:** Vice Chair Gary Turner called the meeting to order at 11:32 a.m. Roll call was taken by Joyce Anderson. Members present: Senator John Coghill, Senator Gary Stevens (attending by teleconference), Representative Les Gara (11:35 a.m.) alternate for Rep Gardner, Chair H. Conner Thomas (11:40 a.m.), Representative Craig Johnson (12:00) alternate for Rep Gatto, Gary J. Turner, Dennis (Skip) Cook, Antoinette (Toni) Mallott. Staff present: Joyce Anderson, Administrator. Absent: Herman G. Walker, Jr. Also present Brent Cole, Legal Counsel and Dan Wayne, LAA Legal Counsel (attending by teleconference).

2. **APPROVAL OF AGENDA:** Vice Chair Turner requested a motion to approve the agenda. Motion to move and approve the agenda made by Rep Johnson. No objections.

3. **APPROVAL OF MINUTES:** Sen Coghill motioned and moved to approve the minutes of the Senate Subcommittee meeting of February 17, 2010, and the Full Committee meeting minutes of February 17, 2010; no objections.

4. **PUBLIC COMMENT:** None.

5. **CHAIR/STAFF REPORT:**

   a. **Ethics disclosures:** Ms. Anderson stated that disclosures, filed between February 18th (deadline for annual disclosures) and April 18th (last day of session) will be published in the Legislative Journal at the end of June. The next publication of interim disclosures will be in January of 2011, unless deemed otherwise by House Clerk and Senate Secretary. A current list of disclosures submitted will be updated and posted on the Ethics website.
   b. There were eight late disclosures filed since the last committee meeting in February. Four were first time late filings and no fine was accessed; Rep Kawasaki, Rep Millett, Rep Stoltze and T. Bannister. The other four varied in reasons for lateness:

Rep Holmes was fined $25 for an inadvertent late filing; Sen Huggins was fined $25 for an inadvertent late filing; S. Long was fined $100 for a late filing; and Sen Dyson's late filing was waived since he had filed with APOC.

c. **Informal Advice Staff Report:** Ms. Anderson provided an explanation of the informal advice provided between November 1, 2009, and May 14, 2010. The report does not include routinely asked questions but questions involving more detailed advice. Ms. Anderson stated that the current method used in preparation of this report is tedious and time consuming. However, she is anticipating the availability of a database this summer which will simplify this task. The database is being developed by the State of Massachusetts and would be available free. Sen Coghill complemented Ms. Anderson on categorizing the report stating it was helpful to him to review advice in this manner.

6. **SECOND LEGAL OPINION:** Chair Thomas arrived at 11:40 a.m. and relieved Vice Chair Turner who was temporarily sitting in for him. Mr. Cole was not scheduled to arrive until 12Noon to present this item. Chair Thomas provided members a history of the subject and the discussions previously held leading up to this point, noting that there are members present today who were not present at prior meetings.

Chair Thomas referred members to the letter in today's meeting packet written by the Ethics Committee in response to APOC's (Alaska Public Offices Commission) request for the Ethics Committee's input concerning regulations on the subject of paid state travel and collateral campaign activity. At the time of this request, (December of 2007), APOC had no regulations in place. APOC's request is what generated the Ethics Committee to hold various discussions and ask for an advisory opinion on the subject. A draft opinion discussed at the January 2008 meeting was not approved or issued but the committee concluded there absolutely cannot be a mixing of state resources for campaigning or incidental partisan political activity. The Committee then wrote APOC stating the position of the Ethics Committee; however, no advisory opinion was ever adopted or a vote taken by the committee.

The Chair also noted that this issue comes up often, most recently, at his and Vice Chair Turner's confirmation hearings, where the House Judiciary Committee questioned both of them about the committee's advice and recommended that the Committee consider submitting a second opinion. The Chair stated that the question before them today is if they should adopt the second opinion or rely on the advice in the draft opinion written by Dan Wayne, LAA legal counsel.

The Chair asked Dan Wayne to go over his opinion and his view on Mr. Cole's second opinion. Mr. Wayne stated he reviewed Mr. Cole's opinion and indicated he did not agree with Mr. Cole's analysis. Mr. Wayne expressed that his opinion was based on **AS 24.60.030, "A legislator or legislative employee may not use public funds, utilities, equipment, services or another government asset or resource for a non-legislative purpose for involvement in or support of or opposition to partisan political activity or for the private benefit of either the legislator or legislative employee or another person."** Mr. Wayne provided the exceptions, as follows:

"This paragraph does not prohibit a) the limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duty. And either the cost or value of related use is nominal or the legislator or legislative employee reimburses the state for the cost of the use." If this were the only exception, "personal use" *could* encompass campaign use or political use. But there's another exception having to do with political campaigning, which is AS 24.60.030(a)(5), and states as follows: **"A legislator or legislative employee may not use or authorize the use of state funds, facilities, equipment, services or government asset or resource",** which is similar to the first exception he read.

He further stated, for the purpose of political fundraising or campaigning, there are five exceptions: **1) this paragraph does not prohibit a) the limited use of state property and resources for personal purposes.** This reiterates the "personal use" exception. It also says it doesn't prohibit the use of mailing lists, computer data or information obtained by a government agency and available to the general public for non-legislative purposes; it doesn't prohibit the storing or maintaining election campaign records in a legislator's office, and it doesn't prohibit a legislator from using a legislator's private office in the Capitol city during a legislative session and for the 10 days immediately before and the 10 days immediately after a legislative session. Also, a legislator is not prohibited from using photographs of him or herself.

He pointed out that what we don't see in this prohibition under 24.60.030(a)(5) is an exception that allows some sort of *de minimis* or case-by-case basis political campaign usage of state resources. In his opinion, he's said that's a "blanket" prohibition. If the exception had "allowed limited use of state property and resources for political purposes or political campaign purposes, or personal purposes including political campaign use," the statute would have so stated. Mr. Wayne stated he was willing to draft something else, if the Committee determined the statute should be interpreted otherwise.

The Chair asked if there were any questions. Sen Stevens asked Mr. Wayne to comment on what the words "primary purpose" means in the second opinion. Mr. Wayne explained that in his opinion the statute does not allow for any "splitting out" or any division between a primary purpose or secondary, minimal purpose as is the case with "personal, non-legislative" use of state resources. Mr. Wayne referred Sen Stevens to Mr. Cole for an explanation.

Sen Stevens pointed out that in Mr. Cole's opinion he mentioned the difference between a legislator who represents a district in downtown Anchorage versus one in rural Alaska with multiple cities/boroughs. For example, at the end of session, when he traveled to Homer from his Kodiak residence, his purpose was to explain what transpired in session. However, since people in Homer know he's running for office in August, it is very difficult reporting what the legislature did and report nothing on the fact that he's running for office. Sen Stevens felt that although this subject needs to simplified and clear and kept as separate as you can, it was very hard to do.

Member Cook stated he initially sided with the prohibition of campaigning with the use of state funds, however, can appreciate what legislators have said and their concerns.

He suggested adopting the formula that was developed when the state owned the aircraft for state travel; that if anyone is going to use the aircraft on state business, if campaigning occurred and exceeded 10%, then the legislator would reimburse the state. When there's reimbursement, you are not using state funds. The "limit" allows someone to address a campaign related question or issue if it inadvertently or unexpectedly comes up and would address concerns brought forth by Sen Stevens.

Rep Gara stated he agreed with Sen Stevens. He emphasized the importance of the word "for". For example, did you take the trip "for" the purpose of campaigning" or "for" a legislative purpose? "For" is the key word in the statute. He felt Mr. Coles' analysis was correct. Rep Gara stated that the practical matter is that people from Anchorage have an advantage over people from Kodiak or Nome, etc., because the reality of political campaigning is the activity is more prevalent in larger cities. If you're in Nome, most of your donations are going to come from outside of Nome. He pointed out the following example: I can go to a legislative meeting during the day in Anchorage and in the evening, I can go to a campaign activity after hours; others who come here for a legislative purpose cannot attend a campaign event after hours.

Vice Chair Turner stated that discussions on this have gone on for almost three years now. He respects the opinions and input from the legislators, but as he's gone on record in the past, there is an advantage to the incumbent, especially in an election year. For example, the challenger has to pay for his/her trip to Anchorage to campaign.

Chair Thomas asked Mr. Wayne about his footnote in his opinion (Draft Opinion 07-08) **"'Although legislators and legislative employees travel to the capital city and sometimes other locations within Alaska in order to participate in legislative sessions, the committee does not consider that travel, or travel outside of the capital, to be within the scope of this opinion...."** Mr. Wayne referred the Chair to wording from the letter written by the Ethics Committee to APOC in the second to last paragraph, **"After considerable debate, the committee determined travel to and from the legislator's home district to attend a legislative session should be exempt from the requirement of allocating costs for partisan political activity."** The Chair stated that the letter to APOC was written *after* Mr. Wayne's opinion was drafted and asked if Mr. Wayne could recollect background on the reasoning for his footnote. Mr. Wayne could not recollect the revolution of the footnote but recalled the committee having a lot of discussion about it and believed at the time there was no "black and white" legal authority to say that travel to and from the session from the home district was exempt, but that as a practical matter had been considered that way and the committee adopted that exception, informally, in their letter to APOC.

The Chair introduced Mr. Cole to the floor and requested that he provide the members a quick overview of his Second Legal Opinion.

NOTE: MR BRENT COLE'S TESTIMONY WAS INAUDIBLE; PLEASE REFER TO HIS SECOND LEGAL OPINION LETTER FOR DETAILS THAT MAY NOT BE IN THE MINUTES.

Mr. Cole explained that he was an "outsider" but aware of the issues and concerns by legislators as well as the general public. He stated his opinion was written with the existing statute in mind, regardless if it does not contain the best language or does not directly address the issue. Existing law has to be followed. He stated he did not focus on one or two provisions of the statute but encompassed all of the provisions in 24.60.030. Conflict of Interest and Unethical Conduct. Mr. Cole stated his opinion contained a melding of all concerns. His solution is provided in the second paragraph of his opinion stating, **"we believe that the nature of the business rather than whether it is paid for with state resources should be the governing standard in determining whether an ethical violation has occurred. A statement signed by a legislator designating the primary nature and purpose of the business rather than whether it is paid for by state resources should suffice to govern whether or not collateral activities can or cannot occur. Violations or false statements made in this designation can be enforced pursuant to AS 24.60.030(3) If a legislator gives as his her primary or sole purpose for taking the trip as engaging in political campaigning or partisan political activity, then s/he would not be entitled to state paid travel expenses."** Mr. Cole added that AS 24.60.030(a)(3) was not considered previously. AS 24.606.030(a)(3) makes it an ethical violation for a legislator or legislative employee to **"...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds."**

The Chair requested comments, consideration or discussion on using percentages.

TESTIMONY FROM THE CHAIR, MR. COLE AND MR. WAYNE IS INAUDIBLE. SEN STEVENS MENTIONS DIFFICULTY IN HEARING TESTIMONY. HOWEVER, SEN STEVENS IN HIS TESTIMONY COMMENTS ON THE DISCUSSION BETWEEN THE CHAIR, MR. WAYNE AND MR. COLE.

Sen Stevens believes the terms "de minimis" and/or "primary" are understandable but splitting the cost and dealing with percentages could be difficult and cumbersome. Sen Stevens also refers to page 4 of Mr. Cole's opinion, **"...the individual entrusted with approval authority is responsible for reviewing the purpose of the proposed trip..."** noting that this is another "check and balance" on the use of state funds. It is the President of the Senate and the Speaker of the House who are responsible for reviewing and examining a request for state paid travel and have the authority to question a request and in turn either approve or deny the request. Basically, legislators are under the "honor system" when it comes to a request for reimbursement for legislative travel.

DUE TO THE DIFFICULTY OF HEARING TESTIMONY, SEN STEVENS NOTIFIES THE MEMBERS HE MAY LEAVE THE MEETING. MS. ANDERSON ASKED SEN STEVENS TO NOTIFY THE CHAIR WHEN HE LEAVES.

Rep Gara recommended the members interpret the statute as presented in Mr. Cole's opinion. He stated there will be a lot of problems if we do not. He provided the following scenario in relation to attending a conference: The conference lasts 6 hours but you are normally you're up 18 hours a day which leaves the remaining 12 hours to be spent doing whatever you do on your personal time, whether you're at the movies, shopping, visiting friends, etc, it's all "personal time". However, in this instance your

"free" time is not "de minimis" to the time spent at the legislative conference. If the committee approves a rule that says, "other than de minimis use", the above example would not fit into the box. He provided another example: If you go to Washington, DC, you're going to want to see many of the attractions which may result in spending a substantial amount of your day doing non-legislative business. We cannot take a set of rules designed to prevent corruption and use them to prevent rational activity. When rural members come in for a Caucus meeting, over a period of 2-3 days, most of the time they spend here, they are not doing legislative business. The meetings end at two o'clock and afterwards, they're dining at a restaurant, etc.

Rep Gara stated he feels the whole legislative process favors the incumbent, although attempts to level the playing field are made by limiting campaign contributions and limiting fundraising activities during legislative session. If we reject Mr. Cole's opinion, the current rule disfavors the incumbent. He explained that during the AGIA special session here in Anchorage, that lasted about 30 days, he was able to campaign and go door-knocking after hours. Others who were here from out of town could not do this on their free time. He reiterated his previous statement: Were you there "for" the AGIA or were you there "for" campaigning? Additionally, he felt what we are doing is regulating someone's free time. If a fundraiser were held during the day during the AGIA session, that is a different story and the person would have violated the statute.

Mr. Cook stated the legislature approves the statutes and the committee is trying work within that framework and has been for the last three years. He feels the statutes are clear in that there is an explicit prohibition on the use of state resources for campaign related activities in that there are exceptions for personal use but no exceptions for political campaigning activity. The simplest way to fix this problem would be for the legislature to amend AS 24.60.030 and remove the prohibition on political campaigning activity or put limits on it in the statute, as was done with the Executive Branch and the state jet. Legislators and the public get upset with the Committee for trying to impose rules, but the committee is only interpreting the statutes that were passed by the legislature. He recommends fixing the statute instead of asking the Committee to interpret it. He would like to see a reimbursement formula similar to AS 39.52.120(f) in which public funds weren't being used for campaigning.

Sen Coghill stated he agreed with Member Cook. However, when a person is in the political arena, that person is always a political person. S/he will always be a policy person with a point of view of a political nature. Under Mr. Wayne's opinion a legislator is always going to be "unethical" because partisan or political activities occur all of the time. Sen Coghill believes the committee needs to address it.

Sen Coghill voiced his opinion on the power of the incumbency. He agreed with Rep Gara. In Mr. Cole's opinion, there are certain disadvantages to legislators and incumbents. He would like to see the term "primary purpose" addressed. He would like take this opinion and move forward with it even though there are questions on the definition of the term "primary". He stated he would be willing to work with Sen Stevens in defining "primary purpose". Sen Coghill also stated that if he were elected again, he would take this issue to the legislature. He felt Mr. Cole's opinion should be

adopted, even though there are questions about what is considered "primary" and he questioned whether the premise of an honor system is reasonable to move forward with.

Sen Coghill motioned that we accept Mr. Cole's legal opinion and adopt the opinion for the Ethics Committee.

Vice Chair Turner stated he had a concern with there being two different standards. One based on AS 39.52.120, with the 90/10 split, and Mr. Cole's opinion, with the term "primary purpose". He believes there will be a lot of questions on why the Executive Branch holds one set of standards and why the Legislature holds another. Mr. Cole stated that the answer would be because there is a specific statute for the Executive Branch and there is not one for the Legislative Branch. Mr. Cole further added that it is not easy to pass any legislation in regards to ethics. Having the issue brought out into the public eye may force the legislature to act. The decision today is going to create more interest, hopefully making legislators realize the legislature needs to get together and address the issue. The public is going to demand it. What's consistent with the statute and what's consistent with reality must be balanced. The difficulty with Alaska is that it's very diverse. It's not just the Republicans or Democrats, it involves urban and rural and incumbent and non-incumbent. It encompasses a lot of different interests competing, which makes this a challenge.

Rep Johnson stated if the motion is adopted, it would be much easier for Sen Coghill, Rep Gara and himself to clarify this in statute through legislation. This would be the opinion the committee would be operating under and this is the law as it stands now. He stated the statute could then be crafted to be consistent with the committee's opinion and put one of the legislative committee member's names on it. The statute would endorse what has been previously determined as unethical behavior by the committee.

The motion was brought before the members for a vote.

YEAS: Sen Stevens, Sen Coghill, Rep Johnson, Rep Gara, Toni Mallott. NAYS: Skip Cook, Gary Turner, Chair Thomas; motion passes.

7. **FY2011 BUDGET BRIEFING:**

   a. **Travel:** Ms. Anderson briefed the members that the Committee had requested an increase in travel due to the fact the travel budget has been consistently exceeded. The Committee also requested an upgrade in the Administrator position and an increase in time for the Secretary's position. The travel budget received a decrease of $2,500 for FY11, the Secretary's position changed from 50% time to 60% time with benefits, and there was no change in the Administrator position. Members were referred to a handout reflecting travel expenses for legislators. Sen Stevens stated he approves travel for senators and travel expenses should be coming out of Senate funds and not Ethics Committee funds. Ms. Anderson stated she would notify LAA Accounting of this change.

   b. **Ethics meeting with House Finance:** Vice Chair Turner provided an update to the members on his and Ms. Anderson's meetings on February 16, 2010, with House

Finance committee members regarding the Ethics budget. Here is a recap: Speaker Chenault was noncommittal. Reps Dahlstrom and Kerttula both who were favorable for a budget increase. Rep Thomas thought the requests were somewhat reasonable but was not comfortable increasing the budget. Sen Stevens was in favor of the increase. Rep Hawker first wanted to know if we had submitted our budget to the governor and if he had accepted it. Ms. Anderson stated the ethics budget has never been presented to the governor in the past and she doesn't think the committee required to do so. They were unsuccessful in meeting with Rep Stoltze after numerous attempts. Rep Gara recommended going to both the governor and legislature for budget requests.

c. **Annual Report:** Ms. Anderson proposed to the committee that an annual report be prepared to improve the visibility of Ethics Committee within the Legislature. Ms. Anderson did some research and found that other Ethics Committees have annual reports. The report would include statistics and goal planning. Ms. Anderson proposed that the report be submitted to legislators at the beginning of legislative session. Sen Coghill stated that when session starts he already has at least 50 annual reports to read through. Rep Gara cautioned against preparing a report. The most important items are already available, the rulings and the informal advice. He stated the time to prepare a report exceeds the need of additional work on the administrator's plate. Chair Thomas suggested Ms. Anderson draft a report and present it to the committee for input to see if it would be beneficial or not.

8. **LEGISLATIVE OVERSIGHT OF ETHICS COMMITTEE:** Vice Chair Turner stated he felt the Ethics Committee is becoming more politicized. The committee is experiencing budget decreases and intent language placed in the budget by the House Finance Subcommittee –Legislature, to name a few. He also noted there are no minutes or an audio recording of the finance meeting in which to review the actual comments by legislators. Also, at the February 16 meeting previously mentioned, it was evident that many legislators may have had issues with many of the Advisory Opinions the Committee has recently passed and informal advice given by the Administrator. As Member Cook mentioned earlier, the committee interprets what's in statute. Additionally, at his and Chair Thomas' confirmation hearings, they felt attacked by some House Judiciary committee members who questioned why the Committee would recommend legislative changes to statutes as well as suggesting that the Committee bend the rules as necessary to fit each fact specific situation. Vice Chair Turner also noted that the Administrator salary is not at the same salary level as her peers in similar positions and upon requesting a salary increase, it was declined again.

Based on the above reasons, Member Turner has come to the conclusion that the Committee should discuss the possibility of becoming a "Commission" like other states have done. This would mean becoming an independent state agency, much like APOC. Vice Chair Turner referred to the article in the packet where Kentucky legislators understood how difficult it could be to sit in judgment of colleagues on ethics issues, then walk out of the meeting and ask those same colleagues for support on a bill or amendment.

Vice Chair Turner, through the Chair, requested that Ms. Anderson present her research to the members. Ms. Anderson stated the difference between a Committee and a Commission is that a Committee is made up of legislators and public members and a Commission is made up of public members only. On the handout titled, "Research of Ethics Oversight Agencies", there are six states which have Legislative Ethics Committees and/or Commissions, eight states that have State Ethics Commissions, Executive and Legislative Branches under one body, and thirty three states are comprised of legislators, and the remaining three states differ from all of them.

(INAUDIBLE – MINTUES REFLECT THE RECOLLECTIONS OF MS. ANDERSON REGARDING THIS QUESTION) Sen Coghill asked Ms. Anderson if she attended any seminars at the COGEL (Council on Governmental Ethics Laws) conference in December 2009 or talked to other participants about this concept and also the subject of budget issues. Ms. Anderson responded she attended a seminar on the subject of budgets and stated other jurisdictions have had problems with their budgets when a controversial decision or decisions were made by the ethics body.

Rep Gara stated that he understood Vice Chair Turner's concern and has witnessed some of it too, where the conduct of legislators was inappropriate toward the public members of the ethics committee, but did not believe that changing the status of Committee was going to change this type of conduct. APOC is a Commission and they get just as much, if not more than the Ethics Committee. Their budget has gone up and down as well. In the end, the Legislature has to approve the budget anyway.

Vice Chair Turner indicated Member Walker was in favor of this idea as well. Vice Chair Turner had hoped this would be a way to gain a little more independence. Under a Commission, the decision on the Administrator's salary would not be influenced by a legislator who may have a difficulty with the Administrator of the Ethics Committee or the committee itself. Having worked in the University system, salary levels are determined through the HR system without political influence. Additionally, the treatment received at the confirmation hearings for public members was influenced by the decision rendered by the Ethics Committee, and not by their personal service or qualifications, which is the point of a confirmation hearing.

Members agreed to table the item for the next meeting where Member Walker would have an opportunity to participate in this discussion.

Rep Johnson did not feel changing the status of the committee would change anything. He did not believe Vice Chair Turner's example of the University system applied, due to the fact the University is part of a collective bargaining unit. Sen Coghill noted there's always room for improvement. He understood Vice Chair Turner's point, with regard to the Committee becoming politicized where this can be an advantage or disadvantage. Sen Coghill noted that he's been on a lot of boards in the past and witnessed decisions from political influence, and unfortunately, it is not an uncommon practice. Rep Johnson stated he sat through the board of Fish & Game confirmations and the political influence is very notable. He apologized if the confirmation hearing was more brutal

than it should have been. He personally appreciates the public members' service on the Ethics Committee and asked the members not to take it personally.

Ms. Anderson stated this has been a challenging year for the Ethics office. Ms. Anderson stated that APOC is now fully staffed after being understaffed for many years. They are now able to perform audits which they have not been staffed to do in the past. The same is true for the ethics office. Her position started out as 80% time and then increased to 90% and is now 100%. During that time period her workload increased. Even before the increase in time, the hours worked were close to 95% to 98%. The ethics office now has a permanent part-time staff person. Now that APOC and the Ethics office have more resources, both agencies are able to do more than just maintain the office. There is time to conduct research and be proactive instead of just reactive. For example, the office reviewed legislative candidate web sites to ensure "solicitations for contributions during a legislative session" were not listed on the web site. Quite a few legislators were notified and removed the prohibiting language. More oversight has been occurring this year than in the past and some of it has not been received very well. Ms. Anderson feels this is unfortunate. The ethics office, in being proactive, is trying to prevent a complaint from being filed against a legislator or a staff person for violating the ethics code.

Chair Thomas recognized and acknowledged testimonies before him today and recommended more follow up on this subject at the next meeting.

9. **OTHER BUSINESS**: Sen Stevens requested to speak on an issue that is not on the agenda. Chair Thomas allowed Sen Stevens to proceed. Sen Stevens stated that he feels sometimes the ethics committee/office goes beyond its responsibilities and look for things to get involved in that the committee should not. One of which has caused consternation among staff and members of the legislature is in regards to the legislature's Accomplishment Book. It is a booklet that the majority publishes every year at the end of every session. It contains detail about what transpired regarding fiscal matters and accomplished legislation. It is his understanding that Ethics staff has now stated the Accomplishment Book is a campaign issue and cannot be distributed two months before the election. He disagrees with this statement because the booklet has been published after session every year and he does not feel this is a campaign-related-item. He would like the Committee members to address this.

Chair Thomas did not know what advice was provided and asked Ms. Anderson if she could respond. Ms. Anderson stated she was aware that Accomplishment Booklets are printed every year and stated that perhaps the staff person she spoke with may have misunderstood the comments she provided. Ms. Anderson stated she had originally met with the staff person regarding another issue and then asked about the Accomplishment Booklet and how it was going to be distributed. The staff person replied that it had already been distributed by E-mail. Ms. Anderson stated she went on to explain an Ethics statute states such a booklet cannot be "mass mailed" during the 60 days before an election if the publication is "from a legislator or about a legislator." She proceeded to pointed out to Sen Stevens that she did not say the booklet could not be distributed.

Sen Stevens stated it may have been a misunderstanding but he was making it clear now that he will allow any Senator to hand out any of the booklets at any time up to the day of an election. He asked Ms. Anderson if she had any objection. Ms. Anderson replied by stating "no" to his question and explaining the statute talks about a "mass mailing" but it does not talk about handing out individual Booklets. Mass mailing means it would be mailed to a group of individuals. Sen Stevens reiterated that is not up to the Ethics office to decide whether or not a Senator can do a mass mailing of the booklet to everyone in their district at any time.

Ms. Anderson replied that she would have to research the statute further about the definition of a "mass mailing" and get back to Sen Stevens. She read AS 24.60.030(c) which states, **unless approved by the committee, during a campaign period for an election in which the legislator or legislative staff employee is a candidate, the legislator or legislative employee may not use or permit another to use state funds, other than funds to which the legislator is entitled to under 24.10.110** (which is a legislator's personal allowance account) **to print or distribute a mass mailing to individuals eligible to vote for the candidate. Campaign period begins 60 days for the date of an election."**

Sen Stevens suggest there be a legal opinion and disagreed with the interpretation. He further stated the booklet was not a campaign item and that it contained the accomplishments of the legislature. Ms. Anderson stated the committee previously issued an advisory opinion on the subject and she would pull the opinion for reference. Sen Stevens stated he was not referring to any mass mailing other than how the Accomplishment Booklet could be distributed. He stated it should be up to the legislator to determine the distribution method and not Ethics. Chair Thomas recommended Sen Stevens request formal advice or a legal opinion. Sen Stevens stated he did not want a legal opinion and reiterated that he believed the Accomplishment Booklet could be published and distributed any way a legislator wanted.

Rep Gara requested a re-visit to an existing opinion regarding a link on a campaign web site that would take the viewer to a legislative website. He stated APOC had referred him to the Ethics office as they thought Ethics had a ruling on this topic. Ms. Anderson stated that APOC is the deciding authority on what can and cannot be on a Campaign website, not the Ethics Committee. She will forward a copy of her paperwork on this issue to Rep Gara.

10. **ADJOURN**: Member Turner made a motion to adjourn the meeting at 2:00 p.m

Committee forwards amended legislative ethics bill

Posted: March 31, 2011 - 9:17pm

By CHRIS STEIN

THE ASSOCIATED PRESS

JUNEAU — A bill aimed at clarifying recurring ethical questions among legislators was passed out of the Senate State Affairs on Thursday.

The committee stripped out two provisions of the bill before sending it to the Senate Judiciary Committee, but lawmakers said the bill will undergo further deliberations in the Judiciary Committee before reaching the Senate floor.

Bill sponsor Sen. John Coghill, R-North Pole, objected to the committee's removal of a clause allowing lawmakers to campaign on legislative business, a practice currently prohibited.

The committee also removed a clause from the bill that allowed lawmakers to use their mailing list for political purposes.

For legislators who live in rural areas, attending a partisan event, such as political party luncheon, is often easiest done after attending a legislative event like a committee meeting, Coghill said.

"In fairness to those who live outside of urban areas of Alaska, I think it's a fair question to answer," Coghill said.

Committee chair Sen. Bill Wielechowski, D-Anchorage, said both changes were made because the committee did not feel that lawmakers should be using state resources for political reasons.

"The problem is if you're using state funds to travel from one place to another, my personal opinion is you shouldn't be doing partisan activities," Wielechowski said.

Coghill said he proposed the bill to address ethical quandaries that he has dealt as a member of the Select Committee on Legislative Ethics.

State Affairs Comte. Approves Ethics Changes – SB 89

Senator John Coghill – Senate District F

For Immediate Release: March 31, 2011

Senate State Affairs Committee Approves
Legislative Ethics Changes, Passes SB 89

(Juneau) – The Senate State Affairs Committee today moved SB 89, which better defines ethical issues for legislators and staff. Among other changes, the bill provides better definitions for gifts; constituent advocacy efforts are given better guidelines; it adds training requirements for volunteers; and makes some conforming changes.

"A remaining concern that has been looking for a solution since 1993 is how state travel impacts some areas of Alaska more than others," said bill sponsor Sen. John Coghill, R-North Pole. "Unfortunately, the State Affairs Committee chose to remove this section from SB 89.

"For convenience, most non-session committee work is done in urban centers, allowing most legislators to conduct state business, civic business, personal business, and political business in their area. Legislators from outside of the urban centers, who are required to travel for state business to do committee work, must leave their home, civic or employment business and, because they are travelling for legislative business, they are forbidden by law to do any partisan activity alongside those urban legislators who are at liberty to do it all.

"The proposal that I put forward has three clear policy positions; (1) it prohibits any campaign fundraising while on state travel, (2) it prohibits partisan activity during regular business hours, 8 am to 5pm and, (3) it makes some exception for luncheons that are partisan.

"My attempt to clarify these tough ethical questions has not found the answer yet, but I think they are worth working on to get to a clear policy for legislators."

SB 89 was moved from the State Affairs committee on to the next committee of referral, the Senate Judiciary committee.

Coghill introduces ethics bill

The Associated Press
Published: February 18th, 2011 10:16 PM
Last Modified: February 18th, 2011 10:16 PM

JUNEAU -- Lawmakers could participate in some partisan political activities while on state travel under a measure introduced by Sen. John Coghill.

The Republican hopes to provide clarity to an issue he says the legislative ethics committee, on which he serves, has grappled with for years. He expects a debate over what's ethical and what's fair, noting that some people believe incumbents have an inherent advantage.

He considers the issues separate. He says candidates have more fundraising options than sitting legislators.

There are exceptions to legislator politicking: Legislators cannot participate in partisan activities while on state travel if they fall during normal workday hours, on election day, within 30 days of an election in which the lawmaker is running, or are for fundraising.

ADVERTISEMENT

The measure also would let lawmakers use legislative mailing lists for campaign purposes.

NOTES

CS FOR SENATE BILL NO. 89(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR COGHILL

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; requiring the Select Committee on Legislative Ethics to maintain a public record of certain ethics disclosures made by legislators and legislative employees; prohibiting a public member of the Select Committee on Legislative Ethics from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to

refrain from disclosure under the Legislative Ethics Act; relating to the applicability of certain provisions of the Legislative Ethics Act to certain legislative employees, volunteers, and interns; establishing a seat for an alternate public member on the Select Committee on Legislative Ethics; clarifying the requirements related to participation by alternate public members and alternate legislative members in the proceedings of the committee; amending the definition of 'legislative employee' in the Legislative Ethics Act; and repealing a procedure for appointment of alternate legislative members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under

this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

*** Sec. 2.** AS 24.60.030(i) is amended to read:

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;**

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

*** Sec. 3.** AS 24.60.050(c) is amended to read:

(c) A legislator or legislative employee who participates in a program or receives a loan that is not exempt from disclosure under (a) of this section shall file with the committee by the date required under AS 24.60.105 a disclosure stating the amounts of the loans outstanding or benefits received during the preceding calendar

year from nonqualifying programs. If the committee requests additional information necessary to determine the propriety of participating in the program or receiving the loan, it shall be promptly provided. The committee shall **maintain the disclosure as a public record and promptly forward the information contained in the disclosure** [PROMPTLY COMPILE A LIST OF THE STATEMENTS INDICATING THE LOANS AND PROGRAMS AND AMOUNTS AND SEND IT] to the presiding officer of each house who shall have it published in the supplemental journals on or before the next regularly scheduled publication of ethics disclosures. If a legislator or legislative employee asks the committee to keep any part of the disclosure confidential and a quorum of the committee determines by vote of a majority of committee members that making the entire disclosure public would cause an unjustifiable invasion of personal privacy, the committee may elect to publish only the fact that a person has participated in the program and the amount of benefit that the unnamed person received. The committee shall maintain the disclosure of the name of the person as confidential and may only use the disclosure in a proceeding under AS 24.60.170. If the disclosure becomes part of the record of a proceeding under AS 24.60.170, the disclosure may be made public as provided in that section.

*** Sec. 4.** AS 24.60.060(a) is amended to read:

(a) A legislator, [OR] legislative employee, **or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

*** Sec. 5.** AS 24.60.080(a) is amended to read:

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250 or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a

lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event**,** [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event**, and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

*** Sec. 6.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this

subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a

legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

*** Sec. 7.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and occupation of the donor, a general description of the matter of legislative concern with respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the

Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

*** Sec. 8.** AS 24.60.105 is amended by adding a new subsection to read:

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate state or federal law, including the United States Constitution and the Constitution of the State of Alaska, or a rule, adopted formally by a trade or profession, that state or federal law requires the person to follow. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

*** Sec. 9.** AS 24.60.112 is amended to read:

Sec. 24.60.112. Applicability to volunteers and educational trainees. A **person who works more than 30 days as a** legislative volunteer or educational trainee shall be considered to be a legislative employee for purposes of compliance with AS 24.60.030 - 24.60.039, 24.60.060, 24.60.080, 24.60.085, **24.60.155,** 24.60.158 - 24.60.170, 24.60.176, and 24.60.178. If a person believes that a legislative volunteer or educational trainee has violated the provisions of one of those sections, the person may file a complaint under AS 24.60.170. The provisions of AS 24.60.170

apply to the proceeding.

*** Sec. 10.** AS 24.60.130(h) is amended to read:

(h) A member is disqualified from participating as a member in any proceeding before the committee involving a complaint against the member or an employee whose work is supervised by the member or an advisory opinion requested by the member. If a regular legislative member of the committee is disqualified under this subsection from participating in a proceeding involving a complaint, the member's alternate shall be designated under **AS 24.60.131** [(n) OF THIS SECTION].

*** Sec. 11.** AS 24.60.130(o) is amended to read:

(o) Notwithstanding (h) [AND (n)] of this section **and AS 24.60.131**, if a complaint before the committee alleges a violation of this chapter by a group of legislators that includes a legislative member of the committee and that member's alternate, the member and alternate member are disqualified from serving on the committee with regard to the complaint. If the two disqualified members of the committee are members of the majority organizational caucus, the presiding officer of the house in which the two disqualified members serve shall appoint from that house an alternate to serve with regard to the complaint. If one of the two disqualified legislative members of the committee is not a member of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate to serve with regard to the complaint. If a complaint alleges a violation of this chapter that includes all legislative members of the majority organizational caucus of one house, the presiding officer of that house shall appoint from the other house an alternate to serve with regard to the complaint. If the complaint alleges a violation of this chapter that includes all legislative members of a minority organizational caucus of one house, the leader of that minority organizational caucus shall appoint from the other house an alternate to serve with regard to the complaint.

*** Sec. 12.** AS 24.60 is amended by adding a new section to read:

Sec. 24.60.131. Alternate members. (a) When appointing members of the legislature to serve on the committee under AS 24.60.130(b), the speaker of the house of representatives or the president of the senate, as appropriate, shall appoint an

alternate member for each regular member. The alternate member shall have the same qualifications for appointment to the committee as the regular member for whom the alternate stands as alternate. The alternate member's appointment is subject to confirmation as required for appointment of the regular member.

(b) When selecting public members to serve on the committee under AS 24.60.130(b), the Chief Justice of the Alaska Supreme Court shall select one alternate public member. The alternate public member's selection is subject to ratification as required for selection of the regular public members.

(c) Subject to (d) of this section, if a regular member of the committee or a subcommittee is unable to participate in a proceeding other than a proceeding under AS 24.60.170, the chair of the committee or subcommittee that holds the proceeding shall designate the regular member's alternate to participate in place of the regular member at the proceeding, and the alternate shall participate for the duration of that proceeding unless the alternate is unable to participate.

(d) If a regular member of the committee or a subcommittee or an alternate member appointed under (a) or (b) of this section participates at the commencement of a proceeding under AS 24.60.170, the member shall participate for the duration of the proceeding unless the member is disqualified under AS 24.60.130(h) or is unable to continue participating. If the participating member is disqualified under AS 24.60.130(h) or becomes unable to participate, the chair of the committee or subcommittee that holds the proceeding shall designate the member's alternate to participate in place of the member for the duration of the proceeding unless the alternate is disqualified or is unable to participate.

(e) If both a regular legislative member and that member's alternate appointed under (a) of this section are not available to participate at the commencement of a proceeding under AS 24.60.170 because they are disqualified under AS 24.60.130(h), the presiding officer of the house in which the two members serve shall appoint from that house an alternate and designate that alternate to participate in the proceeding; however, if the two members who are not available to participate are not members of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate and

designate that alternate to participate in the proceeding.

(f) A designation under (c) - (e) of this section shall be treated as confidential to the same extent that the identity of the subject of a complaint is required to be kept confidential.

*** Sec. 13.** AS 24.60.155 is amended to read:

Sec. 24.60.155. Legislative ethics course. A person **who serves for more than 30 days as a legislative volunteer or educational trainee or** who is a legislator, legislative employee, or public member of the committee shall complete a legislative ethics course administered by the committee under AS 24.60.150(a)(4) within 10 days of the first day of the first regular session of each legislature. However, a person **who begins a period of service of more than 30 days as a volunteer or trainee or** who first takes office or begins employment after the 10th day of the first regular session of a legislature shall complete the course required by this section within 30 days after the person's first day of service and, thereafter, as required by this section. The committee may grant a person additional time to complete the course required by this section.

*** Sec. 14.** AS 24.60.990(a)(11) is amended to read:

(11) "legislative employee" means a person, other than a legislator, who is compensated by the legislative branch in return for regular or substantial personal services, regardless of the person's pay level or technical status as a full-time or part-time employee, independent contractor, or consultant; it includes public members and staff of the committee; it does not include individuals who **are hourly employees who** perform functions that are incidental to legislative functions, [INCLUDING SECURITY, MESSENGER, MAINTENANCE, AND PRINT SHOP EMPLOYEES,] and other employees designated by the committee;

*** Sec. 15.** AS 24.60.130(n) is repealed.

AMENDMENT

OFFERED IN THE SENATE BY SENATOR COGHILL

TO: CSSB 89(STA)

Page 1, line 7, following "**instances;**":

Insert "**allowing legislators and legislative employees, in certain circumstances, to participate in partisan political activity while on state travel;**"

Page 5, following line 26:

Insert new bill sections to read:

"*** Sec. 3.** AS 24.60.030 is amended by adding a new subsection to read:

(j) Notwithstanding the limitations under (a)(2), (a)(4), and (c) of this section and subject to other state or federal laws, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, if

(1) the participation is incidental to the purpose of the travel;

(2) the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity; and

(3) the legislator or legislative employee does not participate in the activity

(A) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(B) on a state or municipal election day;

(C) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(D) by fund raising for a political party or campaign.

*** Sec. 4.** AS 24.60.031 is amended by adding a new subsection to read:

(d) Notwithstanding the limitations under (a) and (b) of this section and subject to other state or federal laws, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, if

(1) the participation is incidental to the purpose of the travel;

(2) the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity; and

(3) the legislator or legislative employee does not participate in the activity

(A) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(B) on a state or municipal election day;

(C) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(D) by fund raising for a political party or campaign."

Renumber the following bill sections accordingly.

Page 13, following line 24:

Insert a new bill section to read:

"* **Sec. 17.** AS 24.60.990(a) is amended by adding a new paragraph to read:

(17) "state travel" means travel with transportation or overnight lodging that is provided or paid for with state resources."

Renumber the following bill section accordingly.

"The word 'inchoate,' not much used in ordinary discourse, means 'just begun.' 'undeveloped.' The common law has given birth to three general offences which are usually termed 'inchoate' or 'preliminary' crimes – attempt, conspiracy, and incitement. A principal feature of these crimes is that they are committed even though the substantive offence is not successfully consummated. An attempt fails, a conspiracy comes to nothing, words of incitement are ignored – in all these instances, there may be liability for the inchoate crime." Andrew Ashworth, *Principles of Criminal Law* 395 (1991).

MEMORANDUM January 24, 2012

SUBJECT: Amendment T.5 drafting issues (CSSB 89(STA))
(Work Order No. 27-LS0452\T.5)

TO: Senator Hollis French
Attn: Cindy Smith

FROM: Dan Wayne
Legislative Counsel

I am writing to discuss the changes you requested in the enclosed amendment.

The goal of the first change, adding the language "program similar to the" on page 1, lines 11 - 12 of the amendment, is unclear to me. The Legislative Council establishes a program under AS 24.20.060(8), and under current law the Select Committee on Legislative Ethics is required to approve that program and a program under 29 U.S.C. 2801 - 2945. The Select Committee may also approve other internship programs. Questions about whether a particular service rendered by an intern in a program meets the requirements of the gift exception in AS 24.60.080(h) are up to the Select Committee, and, unless AS 24.60 is amended to exclude interns in that program, it's the responsibility of the Select Committee to oversee the interns' compliance with the Act. Addition of the language you've suggested could cause the affected provision to omit services by interns in the program under AS 24.20.060(8) from the gift exception in AS 24.60.080(h), although services by interns in similar programs would be included. Also note that adding "chair" at page 1, line 9, does not negate the full committee's duty (on page 1, lines 8 - 9) to approve all educational programs.

The second change, removing "educational trainee" and adding "intern" (page 10, lines 25, 26, and 30; page 13, lines 7 and 8), does not completely remove "educational trainee" from the Legislative Ethics Act as you intend. AS 24.60.080(h) refers to "a trainee who is participating in an educational program" and "training under 29 U.S.C. 2801 - 2945 (Workforce Investment Act of 1998)." I considered substituting "intern" and "internship" for "trainee" and "training," respectively, when drafting your proposed amendment 27-LS0452\T.2, but the federal Workforce Investment Act does not use "intern" and "internship" to describe people and programs it covers -- it uses "trainee" and "training." I have omitted "trainee" from sec. 10 as you requested. However, unless the federal law changes, or the AS 24.60.080(h) exemption for training under the federal Workforce Investment Act is dropped from the Legislative Ethics Act, I advise keeping the terms "training" and "trainee" (or "educational trainee") in your amendment.

Also, please note that on page 2, line 1 of the enclosed amendment, I've added AS 24.60.155 to the list of Legislative Ethics Act sections that are applicable to volunteers and interns.

If I may be of further assistance, please advise.

MEMORANDUM

January 21, 2012

TO: Dan Wayne, Leg. Legal

FROM: Cindy Smith 465-6641

RE: amendments to SB89 27-LS0452\T

Please draft 2 amendments to SB89, version "T" as follows:

1. An amendment replacing references to "trainee" and "educational trainee" in 24.60.080 (h) and in sections 9 and 13 (and if found elsewhere in the bill, in those places as well!) with the word "intern" in order to be consistent with the language in AS 24.20.060(8).

2. An amendment replacing he language on page 13, lines 2-4 with the original language in 24.60.130(n), per our discussion on Thursday.

Thanks! If you have any questions give me a call – we would like to put this bill back up on Friday, so I'd like to get the amendments by Thursday in order to have time to run them by the bill's sponsor and Ms. Anderson, so we're all on the same page. You are also free to talk with either Rynnieva or Joyce as needed, of course!

Subject: SB 89 Suggestion

amend #1

Rynieva:

I was working with another legislative office today and realized in AS 24.60.080(h) the term "trainee" is used when the intent is actually referring to legislative interns. New language in SB 89 in Section 9, AS 24.60.112, the term "educational trainees" was added and Section 13, AS 24.60.155, the term "educational trainee" was added -- both are actually referring to "interns."

I think the term should be changed to "intern" to be consistent with the language in AS 24.20.060(8) which addresses the U of A intern program. I

The term "educational trainee" does not really relate to what the term "intern" means when it comes to working in a legislative office.

Is it possible to add this item to SB 89 as an amendment.

Thanks for your consideration.

Joyce

ACTION NARRATIVE

1:31:21 PM
CHAIR HOLLIS FRENCH called the Senate Judiciary Standing Committee meeting to order at 1:31 p.m. Present at the call to order were Senators Paskvan, Coghill, Wielechowski, and French.

^#sb89

SB 89-LEGISLATIVE ETHICS ACT

1:31:54 PM
CHAIR HOLLIS FRENCH announced the consideration of SB 89. [CSSB 89(STA), 27-LS0452\T was before the committee.]

SENATOR JOHN COGHILL, Sponsor of SB 89, stated that this ethics bill is a work in progress that wound up in his hands. His chief of staff, Ms. Moss, would provide a sectional analysis after which he would offer an amendment. He noted that the current version T removed some of the more contentious issues.

1:33:22 PM
RYNNIEVA MOSS, Chief of Staff to Senator Coghill, sponsor of SB 89, said the only changes in Section 1 appear on page 2. For consistency with AS 24.60.080, the phrase "lawful gratuity" was changed to "gift" and reference to the compassionate gift statute, AS 24.60.075, was inserted.

Section 2 attempts to draw a bright line for legislators and staff in dealing with constituents. It says that unless the legislator is an attorney, the legislative office will sever any assistance it gave to the constituent once a matter goes before an administrative hearing officer. It also allows for inadvertent ex parte contact.

CHAIR FRENCH asked if he were to write a letter on behalf of a constituent asking for a fair hearing on a permanent fund dividend denial, if the letter would go to an administrative hearing officer on the first level or to the department.

MS. MOSS replied the first level is called an informal denial and at that stage he could communicate with the department. Once there's a formal denial and a request for an administrative hearing, the legislator's office would need to back off.

CHAIR FRENCH asked for an example of the point at which it is no longer acceptable for a legislator to act in regard to child placement actions under the Office of Children's Services (OCS).

MS. MOSS replied OCS has worked with legislative offices all during the process even though it's actually a court case. They also have a legislative liaison that legislative offices can contact directly. An example where contact would be limited beyond a certain point would be workers compensation. Once the issue reaches the point of having administrative hearings, the legislative office would have to back away. With regard to child support, once the matter reaches the point of requesting an administrative hearing, the legislative office can no longer be involved.

1:36:43 PM

SENATOR COGHILL explained that the ethics laws were written before there were administrative law judges so this was an attempt to clarify the point at which a legislative office must step away from a constituent issue they'd been working on. He noted that at one point the Ethics Committee suggested a 10-hour limit, but he believes this is a better way. It's okay for a legislative office to help a constituent up to the point of the administrative decision, but it's wrong to put pressure on the decision-maker.

CHAIR FRENCH asked if legislators could safely send complaints to a legislative liaison office about the way their constituents were being treated.

MS. MOSS replied she didn't know the answer, but she didn't believe there was a protection under the law. She added that the biggest problem is when a constituent doesn't say where they are in the process.

1:38:56 PM

CHAIR FRENCH asked if the ten-hour provision was an ethics opinion or in statute at one time.

SENATOR COGHILL replied it was an ethics opinion.

CHAIR FRENCH asked if this would supersede that opinion.

SENATOR COGHILL answered yes.

SENATOR WIELECHOWSKI referred to the workers' compensation example and said he reads the bill to say that a legislator could call a department director to ask about the status of a particular case.

MS. MOSS agreed that would be accurate.

SENATOR WIELECHOWSKI asked for confirmation that the legislator couldn't contact the chief of adjudications.

MS. MOSS replied they could contact the worker that is handling the workers' compensation case, but not the hearing officer or the attorneys for the insurance company or constituent.

SENATOR COGHILL added that the idea was to keep legislators from becoming free legal advisors unless the legislator was practicing law.

1:40:26 PM
MS. MOSS clarified that a non-attorney can handle a workers' compensation case, but once the matter gets to an administrative hearing it's between the constituent, their attorney, and the division under challenge.

SENATOR WIELECHOWSKI asked where it says the legislator couldn't contact the attorney who represents the injured worker.

MS. MOSS replied it doesn't say that specifically, but once the dispute goes to a hearing officer the legislative office isn't supposed to contact those parties. Contacting a constituent's attorney would be considered an ex parte contact.

needs to change

SENATOR WIELECHOWSKI asked where it says that in the bill.

MS. MOSS replied "ex parte" is contacting a party in a case without going through the court.

SENATOR WIELECHOWSKI said his understanding is different.

CHAIR FRENCH said he believes that "ex parte" is between a party and the judge without the other party being present.

SENATOR WIELECHOWSKI agreed.

SENATOR PASKVAN agreed, and said the purpose of that definition of "ex parte" is to encourage contact between the parties directly, but while they're trying to work things out neither party can singularly contact the judge without the other being present.

MS. MOSS added that the bill also requires legislators to disclose any contact that is considered inappropriate.

1:42:51 PM
CHAIR FRENCH summarized that in this case "ex parte" would be between a legislator and a hearing officer, not a legislator and an attorney representing the constituent.

MS. MOSS said when a constituent contacts Senator Coghill's office for help she always asks if they have an attorney.

SENATOR WIELECHOWSKI said he didn't believe that under current law or if this were to pass that it would be illegal or unethical for a legislator to contact a constituent's attorney to express concern about the timeliness of a hearing.

MS. MOSS said she appreciates having that on the record.

SENATOR COGHILL recalled that the administrative law judge who spoke to his office about two years ago agreed with that point.

CHAIR FRENCH noted that Joyce Anderson was online to answer questions about ethics laws.

1:45:36 PM
MS. MOSS said Section 3 releases the Ethics Committee from having to compile disclosure form statements, but they would still have to maintain a record of the forms that are available to the public.

Section 4 adds "or public member of the committee" to AS 24.60.060(a), which is the statute that prohibits disclosure of confidential information.

Sections 5 and 7 have been reworded to make it clear that legislators, their employees, or a public member of the committee may not accept from a lobbyist a ticket to a charitable event that is valued at more than $249.99.

SENATOR COGHILL added that it also allows accepting a charitable gift beyond that amount from somebody other than a lobbyist, but it must be reported and a sanctioned event.

MS. MOSS said Section 7 changes the reporting requirements from 30 days to 60 days for charitable gifts and gifts of travel for purposes of gaining legislative information.

1:47:22 PM
SENATOR PASKVAN asked if this changes what a lobbyist may offer to a legislator.

SENATOR COGHILL answered no. It changes charitable events that are specifically mentioned in statute. The rewording attempts to allow a charitable gift donation from people who are not lobbyists.

1:48:44 PM
CHAIR FRENCH observed that it was a little confusing to talk about tickets to a charitable event in conjunction with gifts, and asked if this was separate from the general gift prohibition.

MS. MOSS responded it addresses circumstances like receiving a ticket to a sanctioned charitable event and winning the door prize.

SENATOR COGHILL added that a question came up about winning a cruise at the "Thanksgiving in March" event. In another instance a legislator was given a gift from a non-lobbyist to sit at a head table, which was valued at more than $400. An ethics complaint was lodged but there was not an ethical problem. But beyond a sanctioned event there might be a problem, he said.

MS. MOSS explained that Section 8 allows certain persons to request a waiver from disclosing clients or making any disclosures that would violate state or federal laws or constitutions. The State Affairs Committee added the language "or a rule adopted formally by a trade or profession, that state or federal law requires the person to follow." So certain occupations don't have to disclose their sources of income from clients.

CHAIR FRENCH asked if it's an ethics disclosure, an Alaska Public Offices Commission (APOC) disclosure, or both.

MS. MOSS replied it's an ethics disclosure.

SENATOR COGHILL added that under HIPPA there are some restrictions on confidentiality, and there was some concern about reporting if a legislative office was working on a healthcare issue for a constituent.

MS. MOSS said Sections 9 and 13 were added in the State Affairs Committee, and state that if someone is a volunteer or educational trainee for 30 days they would be expected to take an ethics class.

Sections 10 and 11 make reference to the new statute in Section 12.

Section 12 is a new section of law that deals with alternate members. It adds an alternate for a public member and allows them to participate in the full proceeding once they've been selected.

SENATOR COGHILL said it became apparent that it would be easier to make a quorum for the public members if there was an alternate. A decision was made that once the alternate was engaged in a particular ethical question they should remain until the conclusion. That would be true for the public and legislative members.

1:53:42 PM
MS. MOSS said Section 14 changes the definition of "legislative employee." It clarifies that hourly employees are not included and are not required to take ethics training.

1:54:28 PM
SENATOR COGHILL observed that the bill was a benign housekeeping matter without his amendment, which addresses how to reasonably and properly allow legislators to participate in partisan political activities while on state travel. Generally speaking, most of the meetings that legislators hold outside of Juneau are held in Anchorage or Fairbanks. Legislators from those urban areas may attend partisan events after conducting state business, but those from out of town cannot. He said he was trying to find a reasonable solution without allowing legislators to use state money to campaign. That's the one-way

valve. "We want them to do one thing nobly, and we don't want them to use it improperly."

1:56:37 PM
SENATOR COGHILL moved Amendment 1, labeled 27-LS0452\T.1.

AMENDMENT 1

OFFERED IN THE SENATE BY SENATOR COGHILL
TO: CSSB 89(STA)

Page 1, line 7, following "**instances;**":
Insert "**allowing legislators and legislative employees, in certain circumstances, to participate in partisan political activity while on state travel;**"

Page 5, following line 26:
Insert new bill sections to read:
"*** Sec. 3.** AS 24.60.030 is amended by adding a new subsection to read:

(j) Notwithstanding the limitations under (a)(2), (a)(4), and (c) of this section and subject to other state or federal laws, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, if

(1) the participation is incidental to the purpose of the travel;

(2) the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity; and

(3) the legislator or legislative employee does not participate in the activity

(A) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(B) on a state or municipal election day;

(C) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(D) by fund raising for a political party or campaign.

*** Sec. 4.** AS 24.60.031 is amended by adding a new subsection to read:

(d) Notwithstanding the limitations under (a) and (b) of this section and subject to other state or federal laws, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, if

(1) the participation is incidental to the purpose of the travel;

(2) the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity; and

(3) the legislator or legislative employee does not participate in the activity

(A) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(B) on a state or municipal election day;

(C) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(D) by fund raising for a political party or campaign."

Renumber the following bill sections accordingly.

Page 13, following line 24:

Insert a new bill section to read:

"*** Sec. 17.** AS 24.60.990(a) is amended by adding a new paragraph to read:

(17) "state travel" means travel with transportation or overnight lodging that is provided or paid for with state resources."

Renumber the following bill section accordingly.

CHAIR FRENCH objected and opened discussion on the amendment.

SENATOR COGHILL said he would understand if the Chair decided to set the bill aside for more in depth consideration next session. He explained that the amendment addresses AS 24.60.030, which talks about ethical management, and AS 24.60.031, which talks about the management of fundraising. He read the amendment into the record and the following legal definition of "incidental:" "Subordinate to something of greater importance; having a minor role." He was trying to say that there are reasons to prohibit the activity, but there should be an accommodation for participation in partisan political activity that is clearly incidental. Whereas fund raising for any political party or campaign is absolutely prohibited. This sets the bar and clarifies that the activity has to be very small in comparison to the activity for which the legislator is using state travel.

SENATOR COGHILL said if he goes to Anchorage on state travel and is called by a radio program and gives his opinion, he could be charged with participating in partisan activity when he's really just expressing his beliefs. The question needs to be answered and the forgoing are the criteria he set.

2:03:25 PM
CHAIR FRENCH said he appreciates the thought that went into the amendment and shares some of the concerns. Leveling a complaint that a legislator has violated the ethics rules is a powerful complaint. It will be discussed further over the summer and next year. Some of the questions that arise relate to the size differences in the legislative districts and the sort of things a legislator should be able to do when he/she is paid to travel inside his/her own district. Some things could conceivable be an ethics violation under the current rules that he's not sure should be. Is it a violation if you're traveling to Anchorage on state business and you update your Facebook page relating to your campaign when you're in your hotel room at night? Could you call into a Fairbanks radio show from Anchorage promoting your campaign while on state travel? He reiterated that he'd spend time on the question between now and next year.

2:05:54 PM
SENATOR WIELECHOWSKI said he agrees. If you're traveling to Anchorage and you get a call from a radio station and talk about partisan activities, does it matter if you're in Anchorage or Fairbanks? The problem has been how to define where the line is. The State Affairs Committee couldn't figure it out, but with further dialog there may be a solution.

SENATOR COGHILL said he assumes that some legislators and some people that watch legislators will be bad actors, but others are genuinely concerned about ethical behavior. It's a balance and he's trying to figure out the clearest rule possible. Trying to define motives is not the answer, but defining action items helps establish bright lines so that legislators know what is expected of them as partisan people. It also helps those who genuinely want to keep legislators ethically accountable for the use of state resources.

He said his district includes the Richardson Highway, the Glenn Highway, the Denali Highway, and the coast from Valdez to Whittier so he can be anywhere in those communities and be totally forbidden from going to a Republican event even though he had traveled 800 miles to visit three other communities in the district. It's painful to be unable to participate.

Under the current statutes, there is an exact prohibition on partisan activity anytime a legislator is on the state dime. This leaves legislators vulnerable to people who have bad intentions. The Ethics Committee has discussed this extensively over the years and legislators have repeatedly asked for relief. He asked the committee to carefully consider the amendment; it's his best effort to define what is and is not ethical.

SENATOR COGHILL asked the Chair how he wanted to proceed with the amendment and the bill itself.

2:11:19 PM
SENATOR PASKVAN commented that he looks forward to further healthy debate on the matter and that this committee was best suited for this substantive discussion. It's a complex subject that requires careful consideration from both sides. Legislators should in all instances act ethically, but he doesn't want to give unfair advantage to someone who can use private wealth to scam the system, knowing that the person they're attacking can't fight back because they were traveling at state expense.

SENATOR COGHILL said he's passionate that this is not about fairness; it's about what is ethical. Right now you can't be a partisan politician while on the state dime. That's not reasonable and doesn't address the ethical question.

CHAIR FRENCH stated that he'd leave matters as they are; both the bill and the amendment are in front of the committee and he was maintaining his objection.

2:14:10 PM
SENATOR COGHILL said his office was prepared to work with the committee and was open to suggestions.

CHAIR FRENCH announced he would hold SB 89 in committee.

^#sb98

SB 98-BIOMETRIC INFORMATION FOR ID

2:14:40 PM
CHAIR FRENCH announced the consideration of SB 98 and asked for a motion to adopt the proposed committee substitute (CS).

SENATOR WIELECHOWSKI moved to adopt CS for SB 98, labeled 27-LS0661\T, as the working document.

CHAIR FRENCH objected for discussion purposes.

SENATOR WIELECHOWSKI asked his staff to describe the changes.

2:15:35 PM
MICHAEL CAUFIELD, Staff to Senator Wielechowski, sponsor of SB 98, described the following changes:

Page 2, lines 17-19, contains new language that clarifies that occupational exams are also educational exams, and that the exam administrator may determine what constitutes an acceptable alternative ID other than biometrics. He noted that some questions may still arise about this section.

Page 3, line 18, the phrase "agents of the state," was removed to ensure that the state is exempt from liability, but not the organization that contracts with the state.

Page 3, lines 29-30, creates an exemption for voice data collected for quality assurance purposes, and the exemption for "facial images in a biometric system" was removed.

Page 3, lines 1-2, "facial images" was changed to "facial mapping" in the redefinition of "biometric data" on page 4, lines 1-2.

Page 4, lines 25-26, "facial mapping" was defined as "the use of digital technology to measure the features of an individual's face." This was done to ensure that pictures cannot be defined as biometric information.

SELECT COMMITTEE ON LEGISLATIVE ETHICS

Campaign Year Activities– *CLARIFICATION*

LEGISLATIVE PAID TRIP AND CAMPAIGNING

The Ethics Committee determined on June 16, that there is an absolute restriction on the use of state resources for purposes related to campaigning (which includes fund raising) and partisan political activity. The office has received many inquiries asking for clarification of this policy.

When a legislator or legislative employee is on a state paid trip (either some expenses or all are reimbursed), campaign activities are prohibited pursuant to AS 24.60.030(a)(2) and (a)(5).

Reimbursement for a legislative trip is considered a use of state resources. What constitutes the use of a "state resource" in this context? The question you need to ask yourself on a state paid trip:

Is this an activity that could be performed only because you are on the state paid trip?

Examples of activities that can be performed only on the state paid trip and are therefore prohibited:

- Campaign door knocking
- Dropping off campaign fliers at businesses and residences
- Attending a campaign fundraiser
- Campaign appearance at a function

*****Keep in mind the above activities apply to all campaigns.*****

Examples of activities that would be permitted on a state paid trip. These are not activities that are only made possible by the use of state resources.

- Returning a call, fax or email from a campaign worker
- Responding to a call from the media
- Working on the details of a future campaign fund raiser to be held in another town

Exception to the above analogy: Responding to a constituent who comes up to you while on the state paid trip asking campaign questions. The best course of action to take is to provide campaign contact information to the constituent.

***

If a complaint were filed alleging the use of state resources for campaign or partisan political reasons, the Ethics Committee would look at the specific facts of the situation and take into consideration whether or not state resources were being used to facilitate the activity or if the activity was something that could still have occurred absent the use of state resources. ■

LEGISLATIVE INVOLVEMENT IN SUPPORTING OR OPPOSING BALLOT PROPOSITIONS

In Advisory Opinion 97-02, the committee determined that action to support or oppose an initiative (which becomes a ballot proposition) is related to duties of the legislature.

- **Legislators are frequently called on to comment on public issues and to take stands on those issues.**
- **Legislators need to hear from their constituents and others concerning public issues.**

In carrying out this dialogue, a legislator may use state resources, including state paid staff time, state facilities and equipment, and reimbursement for travel expenses.

Some examples of activities include:

⇒ **Preparing communications concerning the legislator's position.**
- Letters
- Mailings
- Brochures or handouts
- Any other written or electronic communication

⇒ **Attending public functions or direct staff to attend on their behalf.**
- Personal appearances in the media, at events and gatherings, including state fairs. (Note: If renting a booth at a state fair, campaign activities cannot be conducted at the same time.)

⇒ **Gathering and presenting information to the public concerning the proposition.**

⇒ **Directing staff to research issues raised by the ballot proposition.**
- The results of the research may be made available to others, including individuals supporting or opposing the proposition.

Keep in mind, that in carrying out this dialogue, a legislator or legislative employee may not allow state resources to be used by groups organized in support of or in opposition to a ballot proposition. The use of state resources in this manner would confer a "private benefit" to the group and allow state resources to be used for "campaigning" both of which are prohibited under AS 24.60.030(a)(2) and AS 24.60.030(a)(5). ■

LEGISLATIVE NEWSLETTERS
DURING A CAMPAIGN PERIOD

Cutoff Date for distributing a legislative newsletter

Many offices have called asking what is the cutoff date for distributing legislative newsletters prior to an election. (Also applies to constituent meetings.)

The Legislative Ethics Act does not stipulate a date. However, the **closer to Election Day that a newsletter is mailed or e-mailed, the greater the appearance it has of a political "campaign mailing."**

We recommend no later than one month prior to an election, but it is a personal decision each legislator must make. There are always exceptions to this general recommendation. The bottom line rests on the content of the newsletter, the timeliness of the information, timing of distributing the newsletter, and to whom it is being sent.

Primary Election – one month prior is July 24

General Election – one month prior is October 1

Here are some examples:

- May Be Appropriate:
  Major sewer issue in a legislator's district. It may be timely to send information to the residents affected by the issue during the 30 day period.

- Probably Not Appropriate:
  Sending a general information legislative newsletter during the 30 day period that could be sent after the election.

The nine member Ethics Committee would make the determination if a complaint was filed alleging the use of state resources were used for campaign or partisan political purposes. ■

Content of Legislative Newsletter

Campaign related information is prohibited in legislative newsletters. An entire newsletter is considered campaign related even if there is only one campaign statement and the other sections contain legislative information.

Examples of campaign related statements:

"I have filed for a new term as your state Senator/Representative."

(Announcing that you are running for a legislative office is considered campaigning.)

"I hope to be in the legislature next year and will propose the following xxxx";

(OR)

" I will likely file legislation next session on that subject and work with the administration on the issue."

(These statements inform constituents that if they vote for you in the 2010 election this is the action you will take. The statements are ones that would appear on campaign material as part of your campaign platform.)

Including other legislator's names in your newsletter, indicating they are candidates for a particular office and their position on issues.

(Even though there is not a direct endorsement of these candidates, the mere mention that they are candidates and their position on a particular issue is typical of language on campaign literature and has the appearance of campaigning.)

The Ethics Office is available to review newsletters for content appropriate language. ■

DOOR KNOCKING
DURING A CAMPAIGN PERIOD

LEGISLATIVE DOOR KNOCKING

Legislators are not prohibited from "door knocking" in their legislative district for a legislative purpose during a campaign period.

However, door knocking is a traditional way of meeting residents of a legislative district during a campaign. Since the Legislative Ethics Act does not stipulate a cutoff date for legislative door knocking, it is important to note that the closer to Election Day this activity is performed, the greater the appearance it has of "campaigning." We recommend no later than one month prior to an election, but it is a personal decision each legislator must make.

Many legislators hand out their end-of-session legislative newsletter while door knocking. Remember, campaign activities cannot be performed at the same time; i.e., announcing that you are running for another term or handing out campaign literature for example. ■

CAMPAIGN DOOR KNOCKING

Legislators are prohibited from using state resources for campaign door knocking activities at any time.

In Advisory Opinion 07-07, the committee determined that legislators may ***not***—while campaign door knocking—do the following:

- Hand out your legislative business card.
- Verbally give legislative contact information to a constituent.
- Handwrite legislative contact information on campaign materials left with the constituent, either in person or left on the constituent's door.

If, while campaign door knocking, a constituent has a concern about legislative services, you may:

- ❖ provide a legislative business card.
- ❖ verbally give the constituent legislative contact information.

Listing legislative contact information on campaign materials would lead to a violation of **AS 24.60.030(a)(5) or (b).** ■

MORATORIUM ON ETHICS COMPLAINTS
DURING A CAMPAIGN PERIOD

Complaints received concerning the conduct of a candidate for state office during a campaign period shall be returned to the complainant unless the subject of the complaint permits the committee to proceed. **AS 24.60.170(o) & (p)**

Campaign period:

Begins 45 days before a Primary Election and ends at the close of General Election Day or the day the candidate withdraws or the day the results of the primary election are certified, whichever is earlier. **AS 24.60.170(q)**

Campaign period runs from Saturday, July 10 through Tuesday, November 2.

NEW! Legislative Ethics Annual Calendar

Are you having trouble keeping track of all the due dates for Ethics reporting? Wish there was a calendar that showed what was due and when? Well, your wish has come true! The Ethics Committee has posted on their website a calendar of due dates that you are required to track and it's now available! Let us know what you think. MEMORANDUM

Date: March 31, 2011

To: Senator Hollis French, Chairman, Senate Judiciary Committee

From: Senator John Coghill

Re: Scheduling Request for SB 89

I Request SB 89 "An Act relating to legislative ethics and the Select Committee on Legislative Ethics" be scheduled for hearing at your earliest convenience.

Attached is the backup information on the bill.

Thank you for your consideration.

ALASKA STATE LEGISLATURE

SENATOR JOHN COGHILL

State Capitol, Room 504, Juneau, AK 99801-1182 (907) 465-3719
301 Santa Claus Lane, Ste. 3B, North Pole, AK 99705 (907) 488-5725

MEMORANDUM

SB 89 Legislative Ethics Bill Summary of Version T

Sec. 1. **Replaces** "lawful gratuity" with **"gift"** to make section of law consistent with the usage of "gift".

Sec. 2. **Bright line** for legislators or staff being actively involved in constituent problems with the State. Once the issue is assigned to an administrative hearing the involvement of the legislative office ceases. Exceptions are included for lawyers and provision for inadvertent exparte contact.

Sec. 3. **Eliminates requirement** of committee to **compile lists of financial disclosure** statements. They must only maintain public records and forward them to chief clerk and senate secretary.

Sec. 4. **Adds public members** to statute **prohibiting disclosure of confidential information.**

Sec. 5. Clarifies that a **ticket to a charity event from a lobbyist**, or gifts received because of the ticket from a lobbyist **cannot exceed $250**.

Sec. 6. **Further describes "a contribution to a charity event"** by clarifying it could be a ticket to a charity event or a gift in connection with a charity event.

Sec. 7. **Extend the reporting period** for gifts of travel for the purpose of obtaining information on legislative matters and disclosure of gifts from charitable events **from 30 days to 60 days.**

Sec. 8. **Allows for exceptions from disclosure** under the legislative ethics law **if** it would be in **violation of the state or federal constitution or state or federal law. The State Affairs Committee added language that includes exceptions for disclosures for a rule, adopted formally by a trade or profession, that state or federal law requires the person to follow.** A written request with justification must be submitted to the committee.

Sec. 9. Requires anyone who is a **volunteer or educational trainee for more than 30 days to take the ethics training. The 30 day guideline was added in State Affairs.**

Sec. 10. Adds cite for new section on Alternate Members to statute describing the committee, its structure and its duties.

Sec. 11. Adds cite for new section on Alternate Members to statute describing the committee, its structure and its duties.

Sec. 12. This is a **new section describing the process for appointing alternates.** The section adds a **new provision that provides for the Chief Justice to appoint an alternate public member.**

Sec. 13. **Adds legislative volunteers and educational trainees** who are in that capacity for **more than 30 days** to the statute requiring the Legislative ethics course. **The 30 day guideline was added in State Affairs.**

Sec. 14. **Redefines** legislative employee.

Sec. 15. **Repeals** old statute describing the process for appointing alternates.

SENATOR JOHN COGHILL

Senate Bill 89 Legislative Ethics Amendments

This bill is a product of discussions by the Select Committee of Legislative Ethics over the past couple of years.

The bill draws a bright line for legislators and legislative staff to follow for assisting constituents with problems they encounter with state agencies. Once an issue has been appealed to an administrative hearing officer, the legislator or legislative staffer may no longer make contacts with the agency, unless that person is a licensed professional to represent a person in such a proceeding and is being compensated for that representation. There are also provisions for inadvertent ex parte contact.

It also extends the reporting deadline for reporting gifts of travel and from charitable events from 30 to 60 days and expands legislative ethics training to legislative volunteers or educational trainees who are on the job for more than 30 days.

The bill adds public members of the ethics committee to the statute prohibiting members from knowingly making unauthorized disclosure of confidential information. This bill clarifies that disclosures prohibited by state and federal confidentiality laws are not required by the Select Committee on Legislative Ethics

The committee recommended a statute that would allow an alternate member of the ethics committee who participates in the beginning of a proceeding to participate in the entire proceeding. The Chief Justice of the Alaska Supreme Court would also be required to appoint one alternate for the public members.

SB 89 clarifies that a gift of a ticket from a lobbyist to a charity event sanctioned by Legislative Council cannot exceed $250.00. It also further describes a contribution to a charity event as a ticket to a charity event or a gift in connection with the charity event.

The Ethics Committee has been grappling with the issue of partisan activities while on state travel since 1993. This bill was a first attempt at setting standards by which a legislator or a legislative staffed can participate in a partisan activity or a campaign fundraiser when traveling on legislative business. The State Affairs Committee deleted the language that set a standard but agreed further discussion needs to take place in Senate Judiciary on the issue.

CS FOR SENATE BILL NO. 89(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR COGHILL

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; requiring the Select Committee on Legislative Ethics to maintain a public record of certain ethics disclosures made by legislators and legislative employees; prohibiting a public member of the Select Committee on Legislative Ethics from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to

refrain from disclosure under the Legislative Ethics Act; relating to the applicability of certain provisions of the Legislative Ethics Act to certain legislative employees, volunteers, and interns; establishing a seat for an alternate public member on the Select Committee on Legislative Ethics; clarifying the requirements related to participation by alternate public members and alternate legislative members in the proceedings of the committee; amending the definition of 'legislative employee' in the Legislative Ethics Act; and repealing a procedure for appointment of alternate legislative members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under

this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

* **Sec. 2.** AS 24.60.030(i) is amended to read:

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;**

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

* **Sec. 3.** AS 24.60.050(c) is amended to read:

(c) A legislator or legislative employee who participates in a program or receives a loan that is not exempt from disclosure under (a) of this section shall file with the committee by the date required under AS 24.60.105 a disclosure stating the amounts of the loans outstanding or benefits received during the preceding calendar

year from nonqualifying programs. If the committee requests additional information necessary to determine the propriety of participating in the program or receiving the loan, it shall be promptly provided. The committee shall **maintain the disclosure as a public record and promptly forward the information contained in the disclosure** [PROMPTLY COMPILE A LIST OF THE STATEMENTS INDICATING THE LOANS AND PROGRAMS AND AMOUNTS AND SEND IT] to the presiding officer of each house who shall have it published in the supplemental journals on or before the next regularly scheduled publication of ethics disclosures. If a legislator or legislative employee asks the committee to keep any part of the disclosure confidential and a quorum of the committee determines by vote of a majority of committee members that making the entire disclosure public would cause an unjustifiable invasion of personal privacy, the committee may elect to publish only the fact that a person has participated in the program and the amount of benefit that the unnamed person received. The committee shall maintain the disclosure of the name of the person as confidential and may only use the disclosure in a proceeding under AS 24.60.170. If the disclosure becomes part of the record of a proceeding under AS 24.60.170, the disclosure may be made public as provided in that section.

* **Sec. 4.** AS 24.60.060(a) is amended to read:

(a) A legislator, [OR] legislative employee**, or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

* **Sec. 5.** AS 24.60.080(a) is amended to read:

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250 or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a

lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event, [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event, **and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

* **Sec. 6.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this

subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a

legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

*** Sec. 7.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and occupation of the donor, a general description of the matter of legislative concern with respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the

Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

*** Sec. 8.** AS 24.60.105 is amended by adding a new subsection to read:

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate state or federal law, including the United States Constitution and the Constitution of the State of Alaska, or a rule, adopted formally by a trade or profession, that state or federal law requires the person to follow. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

*** Sec. 9.** AS 24.60.112 is amended to read:

Sec. 24.60.112. Applicability to volunteers and educational trainees. A **person who works more than 30 days as a** legislative volunteer or educational trainee shall be considered to be a legislative employee for purposes of compliance with AS 24.60.030 - 24.60.039, 24.60.060, 24.60.080, 24.60.085, **24.60.155,** 24.60.158 - 24.60.170, 24.60.176, and 24.60.178. If a person believes that a legislative volunteer or educational trainee has violated the provisions of one of those sections, the person may file a complaint under AS 24.60.170. The provisions of AS 24.60.170

apply to the proceeding.

* **Sec. 10.** AS 24.60.130(h) is amended to read:

(h) A member is disqualified from participating as a member in any proceeding before the committee involving a complaint against the member or an employee whose work is supervised by the member or an advisory opinion requested by the member. If a regular legislative member of the committee is disqualified under this subsection from participating in a proceeding involving a complaint, the member's alternate shall be designated under **AS 24.60.131** [(n) OF THIS SECTION].

* **Sec. 11.** AS 24.60.130(o) is amended to read:

(o) Notwithstanding (h) [AND (n)] of this section **and AS 24.60.131**, if a complaint before the committee alleges a violation of this chapter by a group of legislators that includes a legislative member of the committee and that member's alternate, the member and alternate member are disqualified from serving on the committee with regard to the complaint. If the two disqualified members of the committee are members of the majority organizational caucus, the presiding officer of the house in which the two disqualified members serve shall appoint from that house an alternate to serve with regard to the complaint. If one of the two disqualified legislative members of the committee is not a member of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate to serve with regard to the complaint. If a complaint alleges a violation of this chapter that includes all legislative members of the majority organizational caucus of one house, the presiding officer of that house shall appoint from the other house an alternate to serve with regard to the complaint. If the complaint alleges a violation of this chapter that includes all legislative members of a minority organizational caucus of one house, the leader of that minority organizational caucus shall appoint from the other house an alternate to serve with regard to the complaint.

* **Sec. 12.** AS 24.60 is amended by adding a new section to read:

Sec. 24.60.131. Alternate members. (a) When appointing members of the legislature to serve on the committee under AS 24.60.130(b), the speaker of the house of representatives or the president of the senate, as appropriate, shall appoint an

alternate member for each regular member. The alternate member shall have the same qualifications for appointment to the committee as the regular member for whom the alternate stands as alternate. The alternate member's appointment is subject to confirmation as required for appointment of the regular member.

(b) When selecting public members to serve on the committee under AS 24.60.130(b), the Chief Justice of the Alaska Supreme Court shall select one alternate public member. The alternate public member's selection is subject to ratification as required for selection of the regular public members.

(c) Subject to (d) of this section, if a regular member of the committee or a subcommittee is unable to participate in a proceeding other than a proceeding under AS 24.60.170, the chair of the committee or subcommittee that holds the proceeding shall designate the regular member's alternate to participate in place of the regular member at the proceeding, and the alternate shall participate for the duration of that proceeding unless the alternate is unable to participate.

(d) If a regular member of the committee or a subcommittee or an alternate member appointed under (a) or (b) of this section participates at the commencement of a proceeding under AS 24.60.170, the member shall participate for the duration of the proceeding unless the member is disqualified under AS 24.60.130(h) or is unable to continue participating. If the participating member is disqualified under AS 24.60.130(h) or becomes unable to participate, the chair of the committee or subcommittee that holds the proceeding shall designate the member's alternate to participate in place of the member for the duration of the proceeding unless the alternate is disqualified or is unable to participate.

(e) If both a regular legislative member and that member's alternate appointed under (a) of this section are not available to participate at the commencement of a proceeding under AS 24.60.170 because they are disqualified under AS 24.60.130(h), the presiding officer of the house in which the two members serve shall appoint from that house an alternate and designate that alternate to participate in the proceeding; however, if the two members who are not available to participate are not members of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate and

designate that alternate to participate in the proceeding.

(f) A designation under (c) - (e) of this section is a confidential proceeding under AS 24.60.170(*l*) unless the member who is replaced as a result ~~of~~ the designation waives confidentiality.

*** Sec. 13.** AS 24.60.155 is amended to read:

Sec. 24.60.155. Legislative ethics course. A person **who serves for more than 30 days as a legislative volunteer or educational trainee or** who is a legislator, legislative employee, or public member of the committee shall complete a legislative ethics course administered by the committee under AS 24.60.150(a)(4) within 10 days of the first day of the first regular session of each legislature. However, a person **who begins a period of service of more than 30 days as a volunteer or trainee or** who first takes office or begins employment after the 10th day of the first regular session of a legislature shall complete the course required by this section within 30 days after the person's first day of service and, thereafter, as required by this section. The committee may grant a person additional time to complete the course required by this section.

*** Sec. 14.** AS 24.60.990(a)(11) is amended to read:

(11) "legislative employee" means a person, other than a legislator, who is compensated by the legislative branch in return for regular or substantial personal services, regardless of the person's pay level or technical status as a full-time or part-time employee, independent contractor, or consultant; it includes public members and staff of the committee; it does not include individuals who **are hourly employees who** perform functions that are incidental to legislative functions, [INCLUDING SECURITY, MESSENGER, MAINTENANCE, AND PRINT SHOP EMPLOYEES,] and other employees designated by the committee;

*** Sec. 15.** AS 24.60.130(n) is repealed.

CS FOR SENATE BILL NO. 89(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered: 4/1/11
Referred: Judiciary

Sponsor(s): SENATOR COGHILL

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; requiring the Select Committee on Legislative Ethics to maintain a public record of certain ethics disclosures made by legislators and legislative employees; prohibiting a public member of the Select Committee on Legislative Ethics from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to

refrain from disclosure under the Legislative Ethics Act; relating to the applicability of certain provisions of the Legislative Ethics Act to certain legislative employees, volunteers, and interns; establishing a seat for an alternate public member on the Select Committee on Legislative Ethics; clarifying the requirements related to participation by alternate public members and alternate legislative members in the proceedings of the committee; amending the definition of 'legislative employee' in the Legislative Ethics Act; and repealing a procedure for appointment of alternate legislative members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under

this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

* **Sec. 2.** AS 24.60.030(i) is amended to read:

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;**

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

Deleted Secs. 2 & 3 dealing with State travel

* **Sec. 3.** AS 24.60.050(c) is amended to read:

(c) A legislator or legislative employee who participates in a program or receives a loan that is not exempt from disclosure under (a) of this section shall file with the committee by the date required under AS 24.60.105 a disclosure stating the amounts of the loans outstanding or benefits received during the preceding calendar

year from nonqualifying programs. If the committee requests additional information necessary to determine the propriety of participating in the program or receiving the loan, it shall be promptly provided. The committee shall **maintain the disclosure as a public record and promptly forward the information contained in the disclosure** [PROMPTLY COMPILE A LIST OF THE STATEMENTS INDICATING THE LOANS AND PROGRAMS AND AMOUNTS AND SEND IT] to the presiding officer of each house who shall have it published in the supplemental journals on or before the next regularly scheduled publication of ethics disclosures. If a legislator or legislative employee asks the committee to keep any part of the disclosure confidential and a quorum of the committee determines by vote of a majority of committee members that making the entire disclosure public would cause an unjustifiable invasion of personal privacy, the committee may elect to publish only the fact that a person has participated in the program and the amount of benefit that the unnamed person received. The committee shall maintain the disclosure of the name of the person as confidential and may only use the disclosure in a proceeding under AS 24.60.170. If the disclosure becomes part of the record of a proceeding under AS 24.60.170, the disclosure may be made public as provided in that section.

*** Sec. 4.** AS 24.60.060(a) is amended to read:

(a) A legislator**,** [OR] legislative employee**, or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

*** Sec. 5.** AS 24.60.080(a) is amended to read:

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250 or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a

lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event, [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event, **and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

*** Sec. 6.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this

subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a

legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

*** Sec. 7.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and occupation of the donor, a general description of the matter of legislative concern with respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the

Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

*** Sec. 8.** AS 24.60.105 is amended by adding a new subsection to read:

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate state or federal law, including the United States Constitution and the Constitution of the State of Alaska, or a rule, adopted formally by a trade or profession, that state or federal law requires the person to follow. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

Added in State Affairs

*** Sec. 9.** AS 24.60.112 is amended to read:

Sec. 24.60.112. Applicability to volunteers and educational trainees. A **person who works more than 30 days as a** legislative volunteer or educational trainee shall be considered to be a legislative employee for purposes of compliance with AS 24.60.030 - 24.60.039, 24.60.060, 24.60.080, 24.60.085, **24.60.155,** 24.60.158 - 24.60.170, 24.60.176, and 24.60.178. If a person believes that a legislative volunteer or educational trainee has violated the provisions of one of those sections, the person may file a complaint under AS 24.60.170. The provisions of AS 24.60.170

apply to the proceeding.

* **Sec. 10.** AS 24.60.130(h) is amended to read:

(h) A member is disqualified from participating as a member in any proceeding before the committee involving a complaint against the member or an employee whose work is supervised by the member or an advisory opinion requested by the member. If a regular legislative member of the committee is disqualified under this subsection from participating in a proceeding involving a complaint, the member's alternate shall be designated under **AS 24.60.131** [(n) OF THIS SECTION].

* **Sec. 11.** AS 24.60.130(o) is amended to read:

(o) Notwithstanding (h) [AND (n)] of this section **and AS 24.60.131**, if a complaint before the committee alleges a violation of this chapter by a group of legislators that includes a legislative member of the committee and that member's alternate, the member and alternate member are disqualified from serving on the committee with regard to the complaint. If the two disqualified members of the committee are members of the majority organizational caucus, the presiding officer of the house in which the two disqualified members serve shall appoint from that house an alternate to serve with regard to the complaint. If one of the two disqualified legislative members of the committee is not a member of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate to serve with regard to the complaint. If a complaint alleges a violation of this chapter that includes all legislative members of the majority organizational caucus of one house, the presiding officer of that house shall appoint from the other house an alternate to serve with regard to the complaint. If the complaint alleges a violation of this chapter that includes all legislative members of a minority organizational caucus of one house, the leader of that minority organizational caucus shall appoint from the other house an alternate to serve with regard to the complaint.

* **Sec. 12.** AS 24.60 is amended by adding a new section to read:

Sec. 24.60.131. Alternate members. (a) When appointing members of the legislature to serve on the committee under AS 24.60.130(b), the speaker of the house of representatives or the president of the senate, as appropriate, shall appoint an

alternate member for each regular member. The alternate member shall have the same qualifications for appointment to the committee as the regular member for whom the alternate stands as alternate. The alternate member's appointment is subject to confirmation as required for appointment of the regular member.

(b) When selecting public members to serve on the committee under AS 24.60.130(b), the Chief Justice of the Alaska Supreme Court shall select one alternate public member. The alternate public member's selection is subject to ratification as required for selection of the regular public members.

(c) Subject to (d) of this section, if a regular member of the committee or a subcommittee is unable to participate in a proceeding other than a proceeding under AS 24.60.170, the chair of the committee or subcommittee that holds the proceeding shall designate the regular member's alternate to participate in place of the regular member at the proceeding, and the alternate shall participate for the duration of that proceeding unless the alternate is unable to participate.

(d) If a regular member of the committee or a subcommittee or an alternate member appointed under (a) or (b) of this section participates at the commencement of a proceeding under AS 24.60.170, the member shall participate for the duration of the proceeding unless the member is disqualified under AS 24.60.130(h) or is unable to continue participating. If the participating member is disqualified under AS 24.60.130(h) or becomes unable to participate, the chair of the committee or subcommittee that holds the proceeding shall designate the member's alternate to participate in place of the member for the duration of the proceeding unless the alternate is disqualified or is unable to participate.

(e) If both a regular legislative member and that member's alternate appointed under (a) of this section are not available to participate at the commencement of a proceeding under AS 24.60.170 because they are disqualified under AS 24.60.130(h), [or unable to participate] the presiding officer of the house in which the two members serve shall appoint from that house an alternate and designate that alternate to participate in the proceeding; however, if the two members who are not available to participate are not members of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate and

designate that alternate to participate in the proceeding.

(f) A designation under (c) - (e) of this section is a confidential proceeding under AS 24.60.170(*l*) unless the member who is replaced as a result of the designation waives confidentiality.

*** Sec. 13.** AS 24.60.155 is amended to read:

Sec. 24.60.155. Legislative ethics course. A person **who serves for more than 30 days as a legislative volunteer or educational trainee or** who is a legislator, legislative employee, or public member of the committee shall complete a legislative ethics course administered by the committee under AS 24.60.150(a)(4) within 10 days of the first day of the first regular session of each legislature. However, a person **who begins a period of service of more than 30 days as a volunteer or trainee or** who first takes office or begins employment after the 10th day of the first regular session of a legislature shall complete the course required by this section within 30 days after the person's first day of service and, thereafter, as required by this section. The committee may grant a person additional time to complete the course required by this section.

*** Sec. 14.** AS 24.60.990(a)(11) is amended to read:

(11) "legislative employee" means a person, other than a legislator, who is compensated by the legislative branch in return for regular or substantial personal services, regardless of the person's pay level or technical status as a full-time or part-time employee, independent contractor, or consultant; it includes public members and staff of the committee; it does not include individuals who **are hourly employees who** perform functions that are incidental to legislative functions, [INCLUDING SECURITY, MESSENGER, MAINTENANCE, AND PRINT SHOP EMPLOYEES,] and other employees designated by the committee;

*** Sec. 15.** AS 24.60.130(n) is repealed.

CS FOR SENATE BILL NO. 89( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR COGHILL

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees to use legislative mailing lists for campaign purposes and nonlegislative purposes; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; allowing legislators and legislative employees, in certain circumstances, to participate in partisan political activity while on state travel; requiring the Select Committee on Legislative Ethics to maintain a public record of certain ethics disclosures made by legislators and legislative employees; prohibiting a public member of the Select Committee on Legislative Ethics

from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to refrain from disclosure under the Legislative Ethics Act; eliminating an exemption for certain legislative employees, volunteers, and interns from the requirement under the Legislative Ethics Act that legislative employees attend a legislative ethics course; establishing a seat for an alternate public member on the Select Committee on Legislative Ethics; clarifying the requirements related to participation by alternate public members and alternate legislative members in the proceedings of the committee; amending the definition of 'legislative employee' in the Legislative Ethics Act; and repealing a procedure for appointment of alternate legislative members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Prohibited conduct and conflict of interest.

*** Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

adds compassionate gifts to exceptions 24.60.075

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and

either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list for campaign purposes, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable

allows use of legislative mailing list for partisan activity per Opinion 84-

organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office;

allows use of legislative mailing list for campaign purposes

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

*** Sec. 2.** AS 24.60.030(i) is amended to read: Prohibited conduct and conflict of interest

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;** representation

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative

employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

Prohibited conduct and conflict of interest.

*** Sec. 3.** AS 24.60.030 is amended by adding a new subsection to read:

(j) Notwithstanding the limitations under (a)(2) - (4) and (c) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity during the state travel, if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding a meal break;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

adds exception to prohibition for conduct for attending partisan activities while on state travel

*** Sec. 4.** AS 24.60.031 is amended by adding a new subsection to read: Restrictions on fundraising

(d) Notwithstanding the limitations under (a) and (b) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, during the state travel if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding a meal break;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

sets a standard for attending partisan functions while on state travel.

*** Sec. 5.** AS 24.60.050(c) is amended to read:

(c) A legislator or legislative employee who participates in a program or receives a loan that is not exempt from disclosure under (a) of this section shall file with the committee by the date required under AS 24.60.105 a disclosure stating the amounts of the loans outstanding or benefits received during the preceding calendar year from nonqualifying programs. If the committee requests additional information necessary to determine the propriety of participating in the program or receiving the loan, it shall be promptly provided. The committee shall **maintain the disclosure as a public record and promptly forward the information contained in the disclosure** [PROMPTLY COMPILE A LIST OF THE STATEMENTS INDICATING THE LOANS AND PROGRAMS AND AMOUNTS AND SEND IT] to the presiding officer of each house who shall have it published in the supplemental journals on or before the next regularly scheduled publication of ethics disclosures. If a legislator or legislative employee asks the committee to keep any part of the disclosure confidential and a quorum of the committee determines by vote of a majority of committee members that making the entire disclosure public would cause an unjustifiable invasion of personal privacy, the committee may elect to publish only the fact that a person has participated in the program and the amount of benefit that the unnamed person received. The committee shall maintain the disclosure of the name of the person as confidential and may only use the disclosure in a proceeding under AS 24.60.170. If the disclosure becomes part of the record of a proceeding under AS 24.60.170, the disclosure may be made public as provided in that section.

- provides for disclosure but no register

*** Sec. 6.** AS 24.60.060(a) is amended to read: Confidential Information

(a) A legislator, [OR] legislative employee, **or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

- adds public members to prohibition of disclosing confidential information

*** Sec. 7.** AS 24.60.080(a) is amended to read: GIFTS

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250

or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event, [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event, **and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

clarifies that an allowable gift from a lobbyist is a charity event ticket or gift from a charity event must be less than $250.

*** Sec. 8.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

clarification of tickets & gifts from charity event

*** Sec. 9.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and occupation of the donor, a general description of the matter of legislative concern with

gifts from charity event more than $250 from non-lobbyist must be reported

reporting of gift of travel & charity events increased to 60 days

respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

*** Sec. 10.** AS 24.60.105 is amended by adding a new subsection to read: Deadline for Filing disclosure

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate the United States Constitution, the Constitution of the State of Alaska, or other state or federal law. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

allows for exceptions from disclosure

*** Sec. 11.** AS 24.60.112 is amended to read:

Sec. 24.60.112. Applicability to volunteers and educational trainees. A legislative volunteer or educational trainee shall be considered to be a legislative employee for purposes of compliance with AS 24.60.030 - 24.60.039, 24.60.060, 24.60.080, 24.60.085, **24.60.155,** 24.60.158 - 24.60.170, 24.60.176, and 24.60.178. If

requires volunteers to take ethics classes

a person believes that a legislative volunteer or educational trainee has violated the provisions of one of those sections, the person may file a complaint under AS 24.60.170. The provisions of AS 24.60.170 apply to the proceeding.

*** Sec. 12.** AS 24.60.130(h) is amended to read:

(h) A member is disqualified from participating as a member in any proceeding before the committee involving a complaint against the member or an employee whose work is supervised by the member or an advisory opinion requested by the member. If a regular legislative member of the committee is disqualified under this subsection from participating in a proceeding involving a complaint, the member's alternate shall be designated under **AS 24.60.131** [(n) OF THIS SECTION].

adds alternate members to disqualify provisions

*** Sec. 13.** AS 24.60.130(o) is amended to read:

(o) Notwithstanding (h) [AND (n)] of this section **and AS 24.60.131**, if a complaint before the committee alleges a violation of this chapter by a group of legislators that includes a legislative member of the committee and that member's alternate, the member and alternate member are disqualified from serving on the committee with regard to the complaint. If the two disqualified members of the committee are members of the majority organizational caucus, the presiding officer of the house in which the two disqualified members serve shall appoint from that house an alternate to serve with regard to the complaint. If one of the two disqualified legislative members of the committee is not a member of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate to serve with regard to the complaint. If a complaint alleges a violation of this chapter that includes all legislative members of the majority organizational caucus of one house, the presiding officer of that house shall appoint from the other house an alternate to serve with regard to the complaint. If the complaint alleges a violation of this chapter that includes all legislative members of a minority organizational caucus of one house, the leader of that minority organizational caucus shall appoint from the other house an alternate to serve with regard to the complaint.

alternate to alternate

*** Sec. 14.** AS 24.60 is amended by adding a new section to read:

Sec. 24.60.131. Alternate members. (a) When appointing members of the

legislature to serve on the committee under AS 24.60.130(b), the speaker of the house of representatives or the president of the senate, as appropriate, shall appoint an alternate member for each regular member. The alternate member shall have the same qualifications for appointment to the committee as the regular member for whom the alternate stands as alternate. The alternate member's appointment is subject to confirmation as required for appointment of the regular member.

(b) When selecting public members to serve on the committee under AS 24.60.130(b), the Chief Justice of the Alaska Supreme Court shall select one alternate public member. The alternate public member's selection is subject to ratification as required for selection of the regular public members.

(c) Subject to (d) of this section, if a regular member of the committee or a subcommittee is unable to participate in a proceeding other than a proceeding under AS 24.60.170, the chair of the committee or subcommittee that holds the proceeding shall designate the regular member's alternate to participate in place of the regular member at the proceeding, and the alternate shall participate for the duration of that proceeding unless the alternate is unable to participate.

(d) If a regular member of the committee or a subcommittee or an alternate appointed under (a) or (b) of this section participates at the commencement of a proceeding under AS 24.60.170, the member shall participate for the duration of the proceeding unless the member is disqualified under AS 24.60.130(h) or is unable to continue participating. If the participating member is disqualified under AS 24.60.130(h) or becomes unable to participate, the chair of the committee or subcommittee that holds the proceeding shall designate the member's alternate to participate in place of the member for the duration of the proceeding unless the alternate is disqualified or is unable to participate.

(e) If both a regular legislative member and that member's alternate appointed under (a) of this section are not available to participate in a proceeding under AS 24.60.170 because they are disqualified under AS 24.60.130(h) or unable to participate, the presiding officer of the house in which the two members serve shall appoint from that house an alternate and designate that alternate to participate in the proceeding; however, if the two members who are not available to participate are not

members of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate and designate that alternate to participate in the proceeding.

(f) A designation under (c) - (e) of this section is a confidential proceeding under AS 24.60.170(*l*) unless the member who is replaced as a result of the designation waives confidentiality.

*** Sec. 15.** AS 24.60.155 is amended to read:

Sec. 24.60.155. Legislative ethics course. A person who is a legislator, legislative employee, **legislative volunteer, educational trainee,** or public member of the committee shall complete a legislative ethics course administered by the committee under AS 24.60.150(a)(4) within 10 days of the first day of the first regular session of each legislature. However, a person who first takes office, [OR] begins employment, **or begins service as a volunteer or trainee** after the 10th day of the first regular session of a legislature shall complete the course required by this section within 30 days after the person's first day of service and, thereafter, as required by this section. The committee may grant a person additional time to complete the course required by this section.

ethics course

*** Sec. 16.** AS 24.60.990(a)(11) is amended to read:

(11) "legislative employee" means a person, other than a legislator, who is compensated by the legislative branch in return for regular or substantial personal services, regardless of the person's pay level or technical status as a full-time or part-time employee, independent contractor, or consultant; it includes public members and staff of the committee; it does not include individuals who **are hourly employees who** perform functions that are incidental to legislative functions, [INCLUDING SECURITY, MESSENGER, MAINTENANCE, AND PRINT SHOP EMPLOYEES,] and other employees designated by the committee;

legislative employee definition

*** Sec. 17.** AS 24.60.990(a) is amended by adding a new paragraph to read:

(17) "state travel" means travel with transportation or overnight lodging that is provided or paid for with state resources.

Defined state travel

*** Sec. 18.** AS 24.60.130(n) is repealed.

Section 14 replaces Sec 18 dealing with Alternate Members

SENATOR BILL WIELECHOWSKI

Senate Bill 98

"An Act Relating to the use of biometric information"

Sponsor Statement

In 2004, the Alaska Legislature unanimously passed legislation outlawing the collection, analysis, or storage of a law-abiding citizen's genetic information without their express written consent. This legislation was drafted in response to rapidly evolving technology that holds great promise for fields such as medicine and law enforcement. However, this technology also holds the potential for misuse by those who would use a person's genetic data to obtain information about them that Alaskans would normally have a right to keep private.

Senate Bill 98 would update Alaska statutes to protect not only Alaskans' DNA, but all similar forms of biometric information. The term "biometric information" refers to any information about an individual based on their unique behavioral or physiological characteristics. The most commonly known forms of biometric information are a person's fingerprints and their DNA, but also includes such information as iris and retinal patterns, hand geometry, voice patterns, and facial characteristics.

Many potential uses of biometric information are still at the rudimentary stages of development. However, new technologies will soon be available that will be able to make use of this information with chilling consequences for individual privacy and civil liberties.

Examples of the potential misuse of biometric information include the collection of an individual's data by potential employers or insurers to weed out applicants that may have a genetic predisposition towards certain illnesses and the use of video surveillance enhanced by facial recognition technology to track citizens' movements without their knowledge.

Alaskans should bear in mind that one of the proposed requirements of the Federal REAL ID Act was that every Alaskan ID card contain a radio frequency identification (RFID) chip, which would allow a citizen's movements to be tracked without their knowledge.

Thankfully, the State of Alaska joined other states in refusing to submit to the REAL ID Act. The legislature should take a similar strong stand to protect Alaskans' biometric information and their constitutional right to privacy.

CS FOR SENATE BILL NO. 98(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, Coghill, Ellis, Menard, McGuire, Giessel, Egan, Paskvan, Thomas

A BILL

FOR AN ACT ENTITLED

"An Act relating to biometric information."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 18 is amended by adding a new chapter to read:

Chapter 14. Biometric Information.

Sec. 18.14.010. Biometric information consent. (a) A person may not retain or analyze, or disclose or distribute to another person, biometric information on an individual without first obtaining the informed and written consent of the individual.

(b) An individual may, at any time, revoke or amend the individual's consent provided under (a) of this section.

Sec. 18.14.020. Alternate identification. A person may not require an individual to provide biometric data to the person for the purpose of identifying the individual if the individual provides the person with a valid current

(1) United States passport; or

(2) identification card issued by a state in the United States or by a branch of the armed forces of the United States.

Sec. 18.14.030. Uniform consent form. The Department of Health and Social Services may by regulation adopt a uniform consent form to assist persons to meet the requirements for the consent required by AS 18.14.010. A person who retains or analyzes, or discloses or distributes to another person, biometric information, based on consent that is provided in a uniform consent form that has not been revoked, is exempt from civil liability under AS 18.14.060 and from criminal liability for the retention, analysis, disclosure, or distribution of the biometric information.

Sec. 18.14.040. General authorization. A general authorization for the release of medical records or medical information may not be construed to constitute the informed and written consent required by AS 18.14.010.

Sec. 18.14.050. Private right of action. An individual may bring a civil action against another person who violates AS 18.14.010 or 18.14.020. Except as provided by AS 18.14.030, a person who violates AS 18.14.010 is liable to the individual for actual damages and a penalty of $5,000, except that, if the violation resulted in profit or monetary gain to the person, the penalty is $100,000.

Sec. 18.14.060. Exemptions. This chapter does not apply to the collection, retention, analysis, disclosure, or distribution of

(1) biometric information for a law enforcement purpose, including the identification of perpetrators, the investigation of crimes, the identification of missing or unidentified persons, or the identification of human remains;

(2) biometric information when authorized by state or federal law;

(3) facial images by the Department of Administration for drivers' licenses issued under AS 28.15, for state identification cards issued under AS 18.65.310, for administering AS 28.15, or for administering AS 18.65.310; or

(4) facial images that are not used in a biometric system.

Sec. 18.14.090. Definitions. In this chapter,

(1) "biometric data" means fingerprints, handprints, voices, facial images, iris images, retinal images, vein scans, hand geometry, or finger geometry;

(2) "biometric information" means biometric data that is used in a biometric system for fingerprint recognition, hand geometry recognition, finger geometry recognition, voice recognition, facial recognition, iris scans, retinal scans, or

vein recognition;

(3) "biometric system" means an automated system capable of

(A) capturing biometric data from an individual's biometric information;

(B) extracting and processing the biometric data captured under (A) of this paragraph;

(C) storing the biometric data extracted under (B) of this paragraph;

(D) comparing the biometric data extracted under (B) of this paragraph with biometric data stored for the individual for use in future recognition of the individual; and

(E) determining how well the extracted and stored biometric data match when compared under (D) of this paragraph, and indicating whether an identification or verification of identity has been achieved;

(4) "facial recognition" means the use of an image of the visible physical structure of an individual's face for recognition purposes;

(5) "finger geometry recognition" means the use of the shape and dimensions of one or more fingers for recognition purposes;

(6) "fingerprint recognition" means the use of the physical structure of an individual's fingerprint for recognition purposes;

(7) "governmental entity" means a state agency, a municipality, and an agency of a municipality; in this paragraph, "state agency" means an agency of the executive, judicial, or legislative branch of state government;

(8) "hand geometry recognition" means the use of the physical structure of an individual's hand for recognition purposes;

(9) "iris scan" means the use of an image of the physical structure of an individual's iris for recognition purposes;

(10) "person" has the meaning given in AS 01.10.060, and includes a governmental entity;

(11) "retinal scan" means the use of the pattern of blood vessels in an individual's eye for recognition purposes;

(12) "vein recognition" means the use of the veins in an individual's skin for recognition purposes.

MEMORANDUM March 14, 2011

SUBJECT: Sectional summary of SB 98 relating to biometric information (Work Order No. 27-LS0661\A)

TO: Senator Bill Wielechowski
Attn: Michelle Sydeman

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents

Section 1. Adds a new chapter, AS 18.14, relating to biometric information.

Sec. 18.14.010 prohibits retaining, analyzing, disclosing, or distributing an individual's biometric information without obtaining the individual's consent. Allows the individual to revoke or amend the consent.

Sec. 18.14.020 prohibits a person from requiring an individual to provide biometric data for identification if the individual provides certain other identification.

Sec. 18.14.030 authorizes the Department of Health and Social Services to adopt a uniform consent form for sec. 18.14.010. If a person uses an unrevoked uniform consent form for an individual's consent, exempts the person from civil liability under sec. 18.14.060 and criminal liability for retention, analysis, disclosure, or distribution of the individual's biometric information.

Sec. 18.14.040 states that a general authorization for the release of medical information does not constitute the consent required by sec. 18.14.010.

Sec. 18.14.050 provides an individual with a private right of action for violations of secs. 18.14.010 or 18.14.020. Establishes that the violator of sec. 18.14.010 is liable to the individual for actual damages and a penalty.

Sec. 18.14.060 lists the exemptions from the chapter.

Sec. 18.14.090 defines terms for the chapter.

If I may be of further assistance, please advise.

SENATOR BILL WIELECHOWSKI

Explanation of Changes From Original to CS, Version "B"

- **Page 1, Line 13**: The "and" has been changed to an "or," allowing a person to only present one form of identification.
- **Page 2, Line 18 and 21:** The term "biometric information" has been added to clarify.
- **Page 2, Lines 22-25:** Exemptions were clarified for the issuance of drivers' licenses, ID cards, and pictures not entered into a biometric system.
- **Page 2, Line 28:** Vein scans, hand geometry, and finger geometry were added as definitions of biometric data.
- **Page 2, Line 30:** Finger geometry recognition was included as a definition of biometric information. Its corresponding definition was added on **Page 3, Lines 17 and 18**.
- **Page 3, Line 1:** The word "palm" was removed from "palm vein recognition" in the definition of biometric information.

Biometrics Fact Sheet

- There is a growing trend for companies and organizations to use biometric data as a means of identifying individuals. By giving personal biometric information, like fingerprints, iris scans, or facial images, a person gives away highly personal, traceable information.

- Passports, identification cards, and social security cards can be used to travel abroad, identify oneself in court, and a plethora of other activities. These should be suitable checks of identification.

- Organizations that collect biometric data routinely sell that data to third parties, without our consent.

- There is no doubt biometric data can be extremely helpful in fields such as medicine and security, but we should never be forced to give up such personal identification. This bill does not ban biometrics, but bans their use without our consent.

ELECTRONIC FRONTIER FOUNDATION

Biometrics: Who's Watching You?

September 2003

Introduction

Among the many reactions to the September 11 tragedy has been a renewed attention to biometrics. The federal government has led the way with its new concern about border control. Other proposals include the use of biometrics with ID cards and in airports, e.g. video surveillance enhanced by facial-recognition technology.

The purpose of this document is to sketch out EFF's concerns about biometrics. In today's public arena, biometric technologies are being marketed as a "silver bullet" for terrorism; however, very little independent, objective scientific testing of biometrics has been done. Deploying biometric systems without sufficient attention to their dangers makes them likely to be used in a way dangerous to civil liberties. This document is very much a work in progress and we welcome comments.

What Are Biometrics?

Biometrics refers to the automatic identification or identity verification of living persons using their enduring physical or behavioral characteristics. Many body parts, personal characteristics and imaging methods have been suggested and used for biometric systems: fingers, hands, feet, faces, eyes, ears, teeth, veins, voices, signatures, typing styles, gaits and odors.

Our Major Concerns

- **Biometric technology is inherently individuating and interfaces easily to database technology, making privacy violations easier and more damaging.** If we are to deploy such systems, privacy must be designed into them from the beginning, as it is hard to retrofit complex systems for privacy.
- **Biometric systems are useless without a well-considered threat model.** Before deploying any such system on the national stage, we must have a realistic threat model, specifying the categories of people such systems are supposed to target, and the threat they pose in light of their abilities, resources, motivations and goals. Any such system will also need to map out clearly in advance how the system is to work, in both in its successes and in its failures.
- **Biometrics are no substitute for quality data about potential risks**. No matter how accurately a person is identified, identification alone reveals nothing about whether a person is a terrorist. Such information is completely external to any biometric ID system.
- **Biometric identification is only as good as the initial ID.** The quality of the initial "enrollment" or "registration" is crucial. Biometric systems are only as good as the initial identification, which in any foreseeable system will be based on exactly the document-based methods of identification upon which biometrics are supposed to be an improvement. A terrorist with a fake passport would be issued a US visa with his own biometric attached to the name on the phony passport. Unless the terrorist A) has already entered his biometrics into the database, and B) has garnered enough suspicion at the border to merit a full database search, biometrics won't stop him at the border.
- **Biometric identification is often overkill for the task at hand.** It is not necessary to identify a person (and to create a record of their presence at a certain place and time) if all you really want to know is whether they're entitled to do something or be somewhere. When in a bar, customers use IDs to prove they're old enough to drink, not to prove who they are, or to create a record of their presence.
- **Some biometric technologies are discriminatory.**A nontrivial percentage of the population cannot present suitable features to participate in certain biometric systems. Many people have fingers that simply do not "print well." Even if people with "bad prints" represent 1% of the population, this would mean massive inconvenience and suspicion for that minority. And scale matters. The INS, for example, handles about 1 billion distinct entries and exits every year. Even a seemingly low error rate of 0.1% means 1 million errors, each of which translates to INS resources lost following a false lead.
- **Biometric systems' accuracy is impossible to assess before deployment** Accuracy and error rates published by biometric technology vendors are not trustworthy, as biometric error rates are intrinsically manipulable. Biometric systems fail in two ways: false match (incorrectly matching a subject with someone else's reference sample) and false non-match (failing to match a subject with her own reference sample). There's a trade-off between these two types of error, and biometric systems may be "tuned" to favor one error type over another. When subjected to real-world testing in the proposed operating environment, biometric systems frequently fall short of the performance promised by vendors.
- **The cost of failure is high.** If you lose a credit card, you can cancel it and get a new one. If you lose a biometric, you've lost it for life. Any biometric system must be built to the highest levels of data security, including transmission that prevents interception, storage that prevents theft, and system-wide architecture to prevent both intrusion and compromise by corrupt or deceitful agents within the organization.

Despite these concerns, political pressure for increasing use of biometrics appears to be informed and driven more by marketing from the biometrics industry than by scientists. Much federal attention is devoted to deploying biometrics for border security. This is an easy sell,

because immigrants and foreigners are, politically speaking, easy targets. But once a system is created, new uses are usually found for it, and those uses will not likely stop at the border.

With biometric ID systems, as with national ID systems, we must be wary of getting the worst of both worlds: a system that enables greater social surveillance of the population in general, but does not provide increased protection against terrorists.

Some Current Biometric Initiatives

Sec. 403(c) of the **USA-PATRIOT Act** specifically requires the federal government to "develop and certify a technology standard that can be used to verify the identity of persons" applying for or seeking entry into the United States on a U.S. visa "for the purposes of conducting background checks, confirming identity, and ensuring that a person has not received a visa under a different name."

The recently enacted **Enhanced Border Security and Visa Entry Reform Act of 2002**, Sec. 303(b)(1), requires that only "machine-readable, tamper-resistant visas and other travel and entry documents that use biometric identifiers" shall be issued to aliens by October 26, 2004. The Immigration and Naturalization Service (INS) and the State Department currently are evaluating biometrics for use in U.S. border control pursuant to EBSVERA.

Even prior to September 11, however, large-scale civilian biometric identification systems were being pushed. Both the **Personal Responsibility and Work Opportunity Act of 1995** (PRWOA), a welfare reform law, and the **Immigration Control and Financial Responsibility Act of 1996** (ICFRA), an immigration reform law, called for the use of "technology" for identification purposes.

The PRWOA requires the states to implement an electronic benefits transfer program "using the most recent technology available . . . which may include personal identification numbers, photographic identification . . . and other measures to protect against fraud and abuse." This law covers, for example, the Food Stamps program.

The ICFRA requires the President to "develop and recommend . . . a plan for the establishment of a data system or alternative system . . . to verify eligibility for employment in the United States, and immigration status in the United States for purposes of eligibility for benefits under public assistance programs . . . or government benefits." This system "must be capable of reliably determining with respect to an individual whether . . . the individual is claiming the identity of another person."

The **Illegal Immigration Reform and Immigrant Responsibility Act of 1996** (IIRAIRA) requires the INS to include on alien border crossing cards "a biometric identifier (such as the fingerprint or handprint of the alien) that is machine readable." The State Department collects fingerprints and photographs of aliens for these cards.

The **Truck and Bus Safety and Regulatory Reform Act of 1988** (TBSRRA) requires "minimum uniform standards for the biometric identification of commercial drivers."

EFF's concerns about biometrics

Why be concerned about biometrics? Proponents argue that: A) biometrics themselves aren't dangerous because all the real dangers are associated with the database behind the biometric information, which is little different from problems of person-identifying information (PII) databases generally; B) biometrics actually promote privacy, e.g., by enabling more reliable identification and thus frustrating identity fraud.

But biometric systems have many components. Only by analyzing a system as a whole can one understand its costs and benefits. Moreover, we must understand the unspoken commitments any such system imposes.

Surveillance

The chronic, longitudinal capture of biometric data is useful for surveillance purposes. Our Surveillance Monitor page highlights some of these issues. Biometric systems entail repeat surveillance, requiring an initial capture and then later captures.

Another major issue relates to the "voluntariness" of capture. Some biometrics, like faces, voices, and fingerprints, are easily "grabbed." Other biometrics, at least under present technology, must be consciously "given." It is difficult, for instance, to capture a scan of a person's retina or to gather a hand geometry image without the subject's cooperation. Easily grabbed biometrics are a problem because people can't control when they're being put into the system or when they're being tracked. But even hard-to-grab biometrics involve a trust issue in the biometric capture device and the overall system architecture.

Databases

To be effective, a biometric system must compare captured biometric data to a biometric database. Our National ID System page highlights issues surrounding database abuse, which has both static and dynamic dimensions.

The static issues surrounding databases are mainly about safeguarding large and valuable collections of personally identifying information. If these databases are part of an important security system, then they (and the channels used to share PII) are natural targets for attack, theft, compromise, and malicious or fraudulent use.

The dynamic issues surrounding databases mainly concern the need to maintain reliable, up-to-date information. Databases that seek to maintain accurate residence information must be updated whenever one moves. Databases that are used to establish eligibility for benefits must be updated so as to exclude persons no longer eligible. The broader the function of the system, the more and broader the updating that is required, increasing the role of general social surveillance in the system.

It may seem that one of the issues that plagues token-based ID systems (like ID cards) -- the security or integrity of the token itself -- does not apply for biometric systems, because "you are your ID." But the question of the reliability of the token is really a question about trust. In an ID card system, the question is whether the system can trust the card. In biometric systems, the question is whether the individual can trust the system. If someone else captures your signature, fingerprint, or voice, for instance, what prevents it from being used by others? Any use of biometrics with a scanner run by someone else involves trusting someone's claim about what the scanner does and how the captured information will be used.

Vendors and scanner operators may say that they protect privacy in some way, perhaps by hashing the biometric data or designing the database to enforce a privacy policy. But the end user typically has no way to verify whether such technical protections are effective or implemented properly. End-users should be able to verify any such claims, and to leave the system completely if they are not satisfied. Exiting the system, of course, should at least include the expungement of the end-user's biometric data and records.

Linking

An oft-noted risk of biometric systems is the use of biometrics as a linking identifier. This risk, of course, depends to some extent on standardization. Consider, for instance, the use of the Social Security number as a linker across disparate databases. While the private sector would not have been able to develop anything like the SSN on its own, once the government created this identifier, it became a standard way of identifying individuals. Standardization therefore creates new privacy risks because information gathered for one purpose can be used for completely unrelated, unconsented-to purposes.

Currently, Automated Fingerprint ID Systems (AFIS) are heavily used by the government in connection with law enforcement, but there is at present little standardization within the AFIS industry. If law enforcement and private industry were to unify their fingerprint databases under one common standard, such as under a national ID system, this would potentially put one's entire life history in interoperating databases that are only a fingerprint away.

Tracking

By far the most significant negative aspect of biometric ID systems is their potential to locate and track people physically. While many surveillance systems seek to locate and track, biometric systems present the greatest danger precisely because they promise extremely high accuracy. Whether a specific biometric system actually poses a risk of such tracking depends on how it is designed.

Why should we care about perfect tracking? EFF believes that perfect tracking is inimical to a free society. A society in which everyone's actions are tracked is not, in principle, free. It may be a livable society, but would not be our society.

EFF believes that perfect surveillance, even without any deliberate abuse, would have an extraordinary chilling effect on artistic and scientific inventiveness and on political expression. This concern underlies constitutional protection for anonymity, both as an aspect of First Amendment freedoms of speech and association, and as an aspect of Fourth Amendment privacy.

Implemented improperly, biometric systems could:

- increase the visibility of individual behavior. This makes it easier for measures to be taken against individuals by agents of the government, by corporations, and by our peers.
- result in politically damaging and personally embarrassing disclosures, blackmail and extortion. This hurts democracy, because it reduces the willingness of competent people to participate in public life.
- increase the 'circumstantial evidence' available for criminal prosecution. This might dramatically affect the existing balance of plausible -sounding evidence available to prosecutors, and hence increase the incidence of wrongful conviction. Many criminal cases are decided by plea bargaining, a process that is sensitive to the perceived quality of evidence. Even ambiguous or spurious evidence generated by complex technical systems may be difficult for overburdened public defenders to challenge.
- enable the matching of people's behavior against pre-determined patterns. This could be used by the government to generate suspicion, or by the private sector to classify individuals into micro-markets, the better to manipulate consumer behavior.
- aid in repressing readily locatable and trackable individuals. While the public's concern is usually focused on the exercise of state power, these technologies may also greatly empower corporations. If proper privacy safeguards are not constructed into such systems, they would prove useful in dealing with such troublesome opponents as competitors, regulators, union organizers, whistleblowers, and lobbyists, as well as employees, consumer activists, customers and suppliers.

The Attributes of Biometric Systems

How Do Biometrics Compare to Other Types of ID?

Currently other than personally recognizing someone, or having a trusted third party personally swear to their identity, the only other technique for identifying a person is through the use of a "token." These tokens, which are in essence representations of the oath of a trusted third party, come in two basic forms:

- **Knowledge tokens**, such as passwords, secret PINs (Personal Identification Numbers), or knowledge of personal data (knowing one's mother's maiden name, e.g.), or
- **Physical tokens** such as ID cards, passports, chip cards, or plain old keys.

Token IDs offer certain advantages over biometric identification. Security against "false acceptance" of impostors can be raised by increasing the complexity of the token used for identification. Also, in the event of loss or compromise, the token, be it a password, PIN, key, or ID card, can be revoked, changed or reissued, a biometric measurement cannot.

The advantage of biometrics is that unlike tokens, biometrics cannot be lost, loaned, or forgotten. Token-based systems must verify that the presenter is the authorized user, not an unauthorized person who has come to possess the token.

Used carefully, biometrics may be combined with token-based systems to mitigate the vulnerability of ID tokens to unauthorized use.

Functions of Biometric Systems

One useful way of thinking about biometrics is that they are used for one of two purposes: A) To prove that you are who you say you are (positive ID), or B) To prove that you are not who you say you are not (negative ID).

In a positive ID situation, the subject asserts that she is Jane Doe and submits a "live" sample (a fingerprint, for example) to the system. The system then checks its database of previously enrolled or registered samples to see if the live sample matches the reference sample. A positive ID system is designed to prevent more than one person from using a single identity.

In a negative ID situation, John Roe claims *not* to be someone already known to the system. Here, the system checks its database to see that Roe is not on the watchlist of suspected criminals and terrorists, whose biometrics are already in the system. A negative ID system is designed to prevent one person from using more than one identity.

When biometrics are employed to effect negative identification, one need not be enrolled. The only persons who must be "in" the database are those whom the operator is trying to keep out or catch.

Biometrics alone cannot establish "true identity." A biometric system cannot prevent someone from furnishing fake credentials when they first enter the system. They can only prevent them from using another identity once enrolled.

Common Aspects of All Biometric Systems:

All biometric technology systems have certain aspects in common. All are dependent upon an accurate reference or "registration" sample. If a biometric system is to identify a person, it first must have this sample, positively linked to the subject, to compare against. Modern biometric identification systems, based on digital technology, analyze personal physical attributes at the time of registration and distill them into a series of numbers. Once this reference sample is in the system, future attempts to identify a person are based on a comparison of a "live" sample and the reference sample or samples.

A perfect system would recognize a person 100% of the time, and reject an impostor 100% of the time. However, biometric samples are gathered from people in environmental conditions that are uncontrollable, over equipment that may slowly be wearing out, and using technologies and methods that vary in their level of precision. Consequently, the accuracy of biometric systems is assessed in light of these confounding variables via its tendency to experience either a "false match" (also called a "false accept") or a "false non-match" ("false reject"). The point at which these two rates intersect is called the equal error rate or crossover point.

Biometric systems may be "tuned" to diverge from the equal error rate to provide a match threshhold that satisfies the designer's requirements. If a system compares a large number of persons against a small number of samples, and the consequence of a false match is low, (for example, at a border crossing or airport that is looking for a short list of criminals) a system biased towards a higher "false accept" or "false match" rate may be desirable. The advantage to biasing a system in this manner is that it is likely to err on the side of safety, and less likely to let a criminal slip through undetected. The disadvantage is that the system will falsely associate innocent people with criminals. If other safeguards are in place and the system operators understand the system's bias towards false match, the result can be a relatively trivial loss of convenience due to increased scrutiny (extra inspection of luggage, questioning, etc.) Biasing such a system towards a high "false non-match" or "false reject" rate will result in fewer passengers slowed down at the gate, but at the cost of possibly losing the sought-after criminals.

When assessing the utility or the cost of a biometric system, it's important to bear the common features of all such systems in mind. How is the reference sample to be gathered and catalogued? How it the live sample going to be gathered? Can a live sample be captured without the subject's knowledge and cooperation? What are the implications of all four possible outcomes (true match, true non-match, false match, false non-match)? What is the value of a successful system, and what is the cost, to all parties, should it fail?

Further, we should not assess failure simply from the perspective of the core biometric technology itself. Even an ideal system can be defeated easily if it is incorporated into an insecure or poorly-designed overall system architecture. Any biometric system, especially one that involves a component of telecommunication, must be very carefully designed to prevent the loss or interception of user biometrics. Any deployed system must incorporate safeguards to prevent the interception of biometric data while it is being communicated. If a user's biometric is intercepted, criminals may be able to replicate either the sample itself or the string of binary data produced by a successfully-matched sample. Armed with such intercepted biometric data, a criminal would be able to effect a potentially very damaging identity theft.

Types of Biometrics

A proper assessment is built not only on a general understanding of biometrics, but also on an understanding of specific technologies. An understanding of both biometrics in general and specific biometric technologies is a necessary condition for a solid understanding of the larger social implications of biometrics.

Signature

The biometric most familiar to us is the signature. Our ability to judge by sight if one signature matches another has made this a time-proven and legally-binding biometric. However, by sight alone, most of us cannot recognize the pressure of the pen on the paper or the speed and rhythms of its traverse of the page. Computers can do all these things, and quantify, analyze and compare each of these properties to make signature recognition a viable biometric technology. Being based on things that are not visible (pen pressure and velocity, for example), signature-based biometric technology, offers a distinct advantage over regular signature verification -- in addition to mimicking the letter forms, any potential forger has to fabricate a signature at the same speed, and with the same pen weight, as his victim.

Signature biometrics pose a couple of unique problems. The first is the comfort with which people are already willing to use their signature as a form of identification. While this high level of consumer acceptance is viewed as a strength by vendors of such systems, this bears with it a strong downside. Without proper notification, a person may sign an electronic signature pad and unwittingly also be surrendering a reference or live biometric sample. Since the custom of leaving a signature as one's "official mark" is based on the presumption of irreproducibility (i.e., that a forger would be hard-pressed to imitate a signature just by looking at it), people are willing to provide a signature without giving its potential for reproduction a second thought. However, electronic data is easy to copy and transmit. And so, a forger posing as a delivery man might fraudulently secure a signature biometric by presenting a victim with a "gift" box, requesting a signature to confirm delivery, and making off with the victim's biometric data.

The second unique property of signature biometrics is that unlike all other biometrics, which either establish an identity (identification) or confirm an identity (authentication), a signature can convey *intent* (authorization). In other words, a traditional signature on paper is taken both to authenticate the signator, and to convey the signator's legal authority. An electronic system that solicits a user's non-signature biometric must provide a separate step to convey the user's legal authorization for any binding transaction. A signature-based biometric system could mimic our current legally customary acceptance of a signature to simultaneously convey both identity and authority.

Keystroke Dynamics

The rhythms with which one types at a keyboard are sufficiently distinctive to form the basis of the biometric technology known as keystroke dynamics. While distinct, keystroke dynamics are not sufficiently unique to provide identification, but can be used to confirm a user's identity.

Keystroke dynamics, unlike other biometric technologies, is 100% software-based, requiring no sensor more sophisticated than a home computer. Because of this, deployment is occurring in fairly low-stakes, computer-centric applications, such as content filtering (Net Nanny owns BioPassword, the leading keystroke dynamics vendor) and digital rights management, in which passwords to download music are bolstered with by keystroke dynamic verification, to prevent password-sharing. As a general rule, any method involving home or office computers is inherently insecure, as these devices leave a lot more room for experimentation than devices like ATMs or entry systems, and the information they use tends to travel over unsecured communication lines.

Hand Geometry

Perhaps the most ubiquitous electronic biometric systems are hand geometry based. Hand-geometry-based systems require the subject to place his or her hand (usually the right hand) on a plate where it is photographically captured and measured. Made of 27 bones and a complex web of interconnected joints, muscles, and tendons, the human hand presents a sufficiently peculiar conformation of anatomical features to enable authentication, but is not considered sufficiently unique to provide full identification. Further, the geometry of the hand is variable over time, as hand shape may be altered due to injury, disease, aging, or dramatic weight swings. A simple hand-geometry system will measure length and thickness of digits, width of the palm at various points, and the radius of the palm. This results in a relatively simple identification that can be expressed in a very simple, compact string of data. Efforts have been made to improve the accuracy of hand geometry, including three-dimensional sampling (i.e., a second camera measuring the thickness of the hand from the side), and a patented

system (owned by the British concern, Neusciences) that measures the pattern of the veins of the hand. Neusciences claims that their system provides a high degree of accuracy and that the hand vein feature is unique and relatively invariable, changing little over a person's lifespan.

In deployment, traditional hand geometry systems have found acceptance in applications requiring verification of an identity, rather than a full proof or establishment of an identity. Airports, prisons, and factories have successfully employed hand-geometry-based systems to restrict access to runways, to prevent walk-out escapes during visits, and to ensure that time cards are being punched only by the worker, and not by that worker's pal on his or her behalf. In all these instances, the subject is attempting to prove or disprove his or her membership in a relatively small group of people (authorized runway personnel, prisoners/visiting family, factory workers). When stakes are high, these systems are not relied on exclusively to confirm identity; rather, they are used to provide an additional layer of security above and beyond that provided by existing security systems.

Since they must accommodate the largest of hands, any hand geometry or hand vein system must be somewhat bulky, and requires the user to perform an obtrusive task (placing his or her hand on the platen for sampling). Because of this obtrusiveness, hand-based biometrics represent less of a privacy threat than some other systems: subjects cannot have their biometric features sampled without their knowledge, and the sampling method is unambiguous in its intent.

Fingerprint

Fingerprinting is a highly familiar and well-established biometric science. The traditional use of fingerprinting, of course, has been as a forensic criminological technique, used to identify perpetrators by the fingerprints they leave behind them at crime scenes. Scientists compare a latent sample left at a crime scene against a known sample taken from a suspect. This comparison uses the unique features of any given fingerprint, including its overall shape, and the pattern of ridges, valleys, and their bifurcations and terminations, to establish the identity of the perpetrator.

In the context of modern biometrics, these features, called fingerprint minutiae, can be captured, analyzed, and compared electronically, with correlations drawn between a live sample and a reference sample, as with other biometric technologies. Fingerprints offer tremendous invariability, changing only in size with age, are highly resistant to modification or injury, and very difficult to "forge" in any useful way. Although the development of some sort of surreptitious sensor is not inconceivable, the reality is that sensors remain obtrusive, requiring a willful finger pressure to gather a useful sample. Unlike other systems, based on cameras and high-tech sensors, fingerprint sampling units are compact, rugged, and inexpensive, with commercially available systems from multiple vendors offering very good accuracy. Next-generation scanners can analyze below the surface of the skin, and can add pore pattern recognition in addition to the more obvious minutia of the fingerprint.

Facial Recognition

Facial recognition sprung into the national spotlight during the 2001 Super Bowl, when Tampa police scanned the faces of game fans without their knowledge for the purpose of spotting terrorists in the crowd. While this proved a public relations nightmare in January 2001, the use of this technology in New Orleans at the post-9/11 Super Bowl of 2002 generated little controversy. Facial recognition remains one of the more controversial biometric technologies because of its very *un*obtrusiveness. With good cameras and good lighting, a facial recognition system can sample faces from tremendous distances without the subject's knowledge or consent.

Most facial recognition technology works by one of two methods: facial geometry or eigenface comparison. Facial geometry analysis works by taking a known reference point (for example, the distance from eye to eye), and measuring the various features of the face in their distance and angles from this reference point. Eigenface comparison uses a palette of about 150 facial abstractions, and compares the captured face with these archetypal abstract faces. In laboratory settings, facial recognition results are excellent, but critics have questioned the effectiveness of the technology in real-world circumstances. Nevertheless, the accuracy of facial recognition has been good enough for casinos to have put the the technology to use since the late 1990s as a means to spot banned players. Facial recognition technology proponents claim good performance even against disguises, weight changes, aging, or changes in hairstyle or facial hair.

Eye biometrics: Iris/Retina

The human eye offers two features with excellent properties for identification. Both the iris (the colored part visible at the front of the eye) and the veins of the retina (the thin film of nerve endings inside the eyeball that capture light and send it back to your brain) provide patterns that can uniquely identify an individual. Retinal scanning is the older technology, and requires the subject to look into a reticle and focus on a visible target while the scan is completed. It's definitely one of the more intrusive biometric technologies, with some subjects reporting discomfort at the scanning method. Iris recognition has an advantage in ease of use, in that it merely requires the subject to look at a camera from a distance of three to ten inches. The iris scanner illuminates the iris with invisible infra-red light, which shows details on darker -colored eyes that are not visible to the naked eye. The pattern of lines and colors on the eye are, as with other biometrics, analyzed, digitized, and compared against a reference sample for verification.

Iridian Technologies, who hold the patents on iris recognition, claim that the iris is the most accurate and invariable of biometrics, and that their system is the most accurate form of biometric technology. Iridian's system also has the benefit of extremely swift comparisons. The compay claims that it can match an iris against a database of 100,000 reference samples in 2-3 seconds, whereas a fingerprint search against a comparable database might take 15 minutes.

Voice Verification

None of us finds it remarkable when a friend recognizes our voice on the telephone. However, what we find easy to do is still a very hard problem for computers, especially when their job is to identify someone positively. The prospect of accurate voice verification offers one great advantage, which is that it would allow a remote identification using the phone system, an infrastructure that's already been built and thus has zero client-side cost: no special reader needs to be installed in your home. Even without the phone system, the sampling apparatus, a microphone, remains far cheaper than competing, largely optically-based biometric technologies.

But voice recognition technology is still not good enough to be used as a front-line biometric technology. Simply put, voice verification systems have to account for a lot more variables than do other systems, starting with the inevitable compression of a voice captured by cheap microphones (especially those found on phone handsets), discriminating a voice from background noise and other sonic artifacts, and the human voice's tremendous variability, due to colds, aging, and simple tiredness. Also, just as a voice can be surreptitiously recorded over the telephone or face-to-face, a person's voice can be captured surreptitiously by a third party (either by tapping or bugging) and replayed, or a person's voice might be biometrically sampled remotely without consent during a fake door-to-door or telephone sales call. Because of these difficulties, commercial deployments of voice verification have been limited to "backup" status, systems in which there are other token-based methods of identification, with voice verification providing an added layer of protection.

Characterizing Different Biometrics

Different biometric features have characteristics that make them more or less useful for particular applications. Dr. James Wayman, director of the National Biometric Test Center at San Jose State University, categorizes biometric features in terms of five qualities:

- **Robustness**: repeatable, not subject to large changes.
- **Distinctiveness**: there are wide differences in the pattern among the population.
- **Accessibility**: easily presented to an imaging sensor.
- **Acceptability**: perceived as non-intrusive by the user.
- **Availability**: a user may present a number of independent measurable features.

Dr. Wayman explains these qualities by comparing fingerprinting to hand geometry.

> *"Fingerprints are extremely distinctive, but not very robust, sitting at the very end of the major appendages you use to explore the world. Damaging your fingerprints requires less than a minute of exposure to household cleaning chemicals. Many people have chronically dry skin and cannot present clear prints. Hands are very robust, but not very distinctive. To change your hand geometry, you'd have to hit your hand very hard with a hammer. However, many people (somewhat less than 1 in 100) have hands much like yours, so hand geometry is not very distinctive. Hands are easily presented without much training required, but most people initially misjudge the location of their fingerprints, assuming them to be on the tips of the fingers. Both methods require some "real-time" feedback to the user regarding proper presentation. Both fingerprints and the hand are accessible, being easily presented. In the 1990 Orkand study*, only 8% of customers at Department of Motor Vehicle offices who had just used a biometric device agreed that electronic fingerprinting "invades your privacy." Summarizing the results of a lengthy survey, the study rated the public acceptance of electronic fingerprinting at 96%. To our knowledge, there is no comparable polling of users regarding hand geometry, but we hypothesize that the figures would not be too different. With regard to availability, our studies have shown that a person can present at least 6 nearly-independent fingerprints, but only one hand geometry (your left hand may be a near mirror image of your right)."*
>
> **Orkand Corporation, "Personal Identifier Project: Final Report", April 1990, State of California Department of Motor Vehicles report DMV88-89, reprinted by the U.S. National Biometric Test Center.*

Characterizing Biometric Applications

Dr. Wayman suggests characterizing biometric applications in terms of seven variables:

- **Cooperative vs. Non-Cooperative** This refers to the behavior of the "threat" or would-be deceptive user. Is the "threat" trying to cooperate with the system? If the threat is trying to enter a restricted area, she either cooperates with the positive ID system to try to fool it into thinking she's allowed in, or deceptively tries not to cooperate with a negative ID system so as not to trigger the alarm. One implication of this variable is the scope of database search. In cooperative applications, users may first identify themselves with a card or PIN, so that the system need only match against the claimed identity's template. In non-cooperative applications, users can't be trusted to identify themselves correctly, so the entire database may need to be searched.
- **Overt vs. Covert** Is the user aware that the biometric sampling and identification is occurring?
- **Habituated vs. Non-Habituated** Is the intended user expected to be experienced in the use of the system?
- **Attended vs. Non-Attended** Will the intended user be supervised when using the system?
- **Standard vs. Non-Standard Environment** How controlled are the environmental conditions for operation?
- **Public vs. Private** Will users be customers (public) or employees (private)?
- **Open vs. Closed** Will the application be required to exchange biometric data with other systems or not?

Dr. Wayman explains that the positive biometric identification (hand geometry) of users of the Immigration and Naturalization Service's Passenger Accelerated Service System (INSPASS) for rapidly admitting frequent travelers into the United States:

> *"can be classified as a cooperative, overt, non-attended, non-habituated, standard environment, public, closed application. The system is cooperative because those wishing to defeat the system will attempt to be identified as someone already holding a pass. It will be overt because all will be aware that they are required to give a biometric measure as a condition of enrollment into this system. It will be non-attended and in a standard environment because collection of the biometric will occur near the passport inspection counter inside the airports, but not under the direct observation of an INS employee. It will be non-habituated because most international travelers use the system less than once per month. The system is public because enrollment is open to any frequent traveler into the United States. It is closed because INSPASS does not exchange biometric information with any other system." (emphases added)*

Characterizing Biometric ID Systems

Dr. Wayman suggests that biometric ID systems should be viewed in terms of a generic biometric system made up of five basic components or subsystems, depending on the application: data collection, transmission, signal processing (which comprises feature extraction, quality control, pattern matching), storage, and decision.

- **Data collection** Biometric systems involve at least two discrete data collection steps. First, any biometric system must contain a biometric characteristic deemed "true" or canonical from the system's viewpoint. The term "enrollment" or "registration" refers to the first entry of biometric data into the database. Second, the system must compare a later-submitted "sample" (often called a "live sample") to the sample in the database. (Scale is crucial to the enrollment step, sometimes for quite mundane reasons. In the context of biometric visa issuance by the State Department, for instance, the government has been looking at whether or not U.S. consulates around the world have room to handle the additional equipment and physical traffic needed for data collection.)
- **Transmission** Many biometric systems collect data at one location but store and/or process it at another. Such systems require data transmission.
- **Signal processing** Once a biometric is acquired, it must be prepared for comparison. There are three basic tasks here: feature extraction, quality control, and pattern matching. A fourth task in large-scale systems is pattern classification.
  - *Feature extraction* involves finding the true biometric pattern amid noise and signal degradation, preserving the critical information, and discarding redundant or unnecessary data. Dr. Wayman gives the example of a text-independent speaker-recognition system. A properly implemented system isolates "features that depend only on the speaker and not on the words being spoken." At the same time, the system focuses on features that do not change "even if the speaker has a cold or is not speaking directly into the microphone."
  - *Quality control* involves checking to see if the signal is of good quality. Ideally, it should be possible to make a quick determination so that another measure can be taken if the signal is inadequate.
  - *Pattern matching* involves comparing the live sample to the reference sample in the database. If the user claims to be Jane Doe, the pattern-matching process may only need to compare the sample to Jane Doe's stored template. In other situations, the sample must be compared to multiple templates. The pattern-matching process generates a quantitative "distance" measure of the comparison -- how close are they? Even for the same person, the distance is rarely if ever zero.
  - *Pattern classification* is a technique aimed at reducing the computational overhead of pattern matching. In large-scale systems, it can be computationally taxing to match each sample against all stored templates in the database. If biometric patterns can be categorized, then it may be possible to perform the match against only the stored templates in that category. This is sometimes referred to as "binning." A different technique with the same goal is "filtering," which involves partitioning the database based on information not contained in the biometric itself. If you know the person is a man, you don't need to check against women's biometrics. Both of these techniques introduce additional error possibilities; if binning or filtering is erroneous, then the true template is not used and a false non-match results.
- **Decision** This subsystem implements the biometric ID system's actual policy with regard to matching. In general, lowering the number of false non-matches raises the number of false matches, and vice versa. The signal processing subsystem yields a quantitative "distance" measure, but "how close or far is enough?" is a matter of policy. In a high-security application where the cost of a false acceptance could be high, system policy might prefer very few false acceptances and many more false rejections. In a commercial setting where the cost of a false acceptance could be small and treated as a cost of doing business, system policy might favor false acceptances in order not to falsely reject and thereby inconvenience large numbers of legitimate customers. The inevitable existence of these errors means that any biometric ID system must also have well-designed policies for exception handling.
- **Storage** Biometric reference samples must be stored somewhere for matching purposes. For systems only performing "one-to-one" matching, the database may be distributed on cards carried by each enrolled user. The user simply presents his or her biometric and the system checks to see if it matches the template stored on the card. Depending upon system policy, no central database need exist, although in this application a centralized database can be used to detect counterfeit cards or to reissue lost cards without re-collecting the biometric pattern.

  In other cases, centralized storage is necessary because the system must match the live sample to multiple templates. As the number of templates grows, speed becomes an increasingly significant issue. One technique is to partition the database (i.e., binning or filtering) so that any sample need only be matched to the templates in one partition. This increases system speed and decreases false

matches at the expense of increasing the false non-match rate owing to partitioning errors. System error rates thus change with increasing database size and ID systems do not linearly scale.

Full biometric patterns cannot be reconstructed from the stored reference samples if these are stored as templates, which reduce data richness dramatically. Templates themselves are often created using the system vendor's proprietary feature extraction algorithms. Whether stored templates themselves can be used to "spoof" the system internally is entirely dependent on the security of the system architecture.

Biometric ID systems may store not only the templates but also raw data. One reason to do so would be to allow changes to the system or to change system vendors without having to re-collect data from all enrolled users. Full raw data storage is a riskier practice in that new templates may be extracted from the data or the raw data itself may be used against the system.

The State of Scientific Testing of Biometric ID Systems

According to Dr. Wayman,

> *"Testing of biometric devices requires repeat visits with multiple human subjects. Further, the generally low error rates mean that many human subjects are required for statistical confidence. Consequently, biometric testing is extremely expensive, generally affordable only by government agencies. Few biometric technologies have undergone rigorous, developer/vendor-independent testing to establish robustness, distinctiveness, accessibility, acceptability and availability in 'real-world' (non-laboratory) applications."*

An in-depth discussion of the statistical methodology in testing biometric ID systems is beyond the scope of this discussion. We recommend Dr. Wayman's website to interested persons. Note, however, that it is very difficult to generalize from test results. At this time, scientists have no way of accurately estimating how large a test is needed to adequately characterize any biometric device in any application, even with advance knowledge of theoretical error rates.

What Is Privacy in the Context of Biometrics?

The issue of privacy is central to biometrics. Critics complain that the use of biometrics poses a substantial risk to privacy rights. Proponents claim that biometrics protect privacy. Evaluating these arguments requires, in the first instance, an understanding of what privacy means. In this chapter we explore the definition of privacy in general.

Working Definition of Privacy

We all might have strong subjective ideas about what privacy is. Yet, the word "privacy" is hard to define, in part because the meaning depends greatly on the situation, culture, environment, and moment. In the immediate aftermath of September 11, for example, many Americans welcomed more intrusive governmental measures to increase public safety, even though that meant their privacy could suffer. As one New Yorker put it, "I want Big Brother on my shoulder, looking out for me." Pre-September 11, a frequent question asked at "Introduction to Biometrics" seminars was, "What about the privacy concerns?" Post-September 11, the more frequently asked question became, "What about the security aspects?"

Privacy scholar Ruth Gavison sees privacy as consisting of three parts: secrecy, anonymity, and solitude. She offers what is perhaps the extreme privacy model: "Privacy is a limitation of others' access to an individual.... In perfect privacy no one has any information about X, no one pays any attention to X, and no one has physical access to X" (Gavison 1980, 428).

Robert Ellis Smith, the editor of *Privacy Journal*, defines privacy as "the desire by each of us for physical space where we can be free of interruption, intrusion, embarrassment, or accountability and the attempt to control the time and manner of disclosures of personal information about ourselves" (Smith 2000, 6/ Smith 2002, 1–8). This definition hints at three types of privacy recognized by U.S. courts: physical, decisional, and information privacy.

Based on her survey of the extensive privacy literature, however, Professor Lillian R. Bevier concluded that "privacy is a chameleon-like word, used denotatively to designate a range of wildly disparate interests—from confidentiality of personal information to reproductive autonomy—and connotatively to generate goodwill on behalf of whatever interest is being asserted in its name" (Bevier 1995, 458).

Most important from the standpoint of biometrics, privacy includes an aspect of autonomy—as various scholars have expressed it: our control over information about ourselves, control over who can sense us, or control over the intimacies of personal identity. This control over information about us, or what is termed "information privacy" (or "informational privacy"), lies at the heart of the privacy concerns raised by this new technological reality. Individuals have an interest in determining how, when, why, and to whom information about themselves, in the form of a biometric identifier, would be disclosed.

What Privacy Concerns Does the Use of Biometrics Implicate?

With this working definition of privacy in mind, we next discuss the privacy concerns implicated by the use of biometrics. These concerns relate to identification and invasiveness.

The Individual Gives Up a Biometric Identifier

To determine the specific privacy concerns implicated by biometrics, we must first focus on what exactly is disclosed when biometric data is collected. Regardless of whether an individual voluntarily provides a biometric identifier or is forced to surrender it as part of state action or government-required scheme, he is giving up information about himself. When biometrics, like fingerprinting, iris recognition, or retinal scanning is used, he discloses robust and distinctive information about his identity. When other biometrics, such as hand or finger geometry, are used, at a minimum, he discloses accurate information about who he is. Depending on the biometric, he is giving information about himself that could be used to identify him over large-scale databases.

Invasive Aspects of the Information

Beyond this fundamental disclosure, invasive implications might also be related to privacy concerns that stem from the biometric identification information disclosed. These invasive implications for privacy are essentially three-fold:

- The invasive effects of a secondary market, defined as disclosure of the biometric identification information to third parties
- Any invasive information that might be additionally obtained as part of the biometric identifier
- The invasiveness that might be associated with actual physical harm caused by the technology

Invasive Secondary Market Effects Once a biometric identifier is captured or collected from an individual in the primary market, and even if it is captured only once, the biometric identifier could easily be replicated, copied, and otherwise shared among countless public and private sector databases. This sharing in a secondary market could conceivably take place without the individual's knowledge or consent. Indeed, biometric identifiers could be bought and sold in a secondary market much the way names and addresses on mailing lists are currently bought and sold by data merchants.

An example illustrates the secondary market effect: I give my face and fingerprints to my local sports club so I can access the club and keep better track of my workouts. I do this by presenting my face to a camera whenever I enter and by touching my finger to the computer display on the treadmill and other equipment. I get a detailed monthly fitness report. The sports club conveniently enrolled both of my index fingers so I don't even have to remember which pointer

finger to use. After a while, I start receiving marketing information telling me to show up at the local grocery store, retail outlet, and so on, because I am already preregistered and biometrically enrolled in their systems. That's because, along with my facial photograph, the sports club kept my raw data, or file images, in addition to the fingerprint templates, and sold the information to others.

Later, while shopping in the mall, sales associates insist on selling me athletic gear, protein supplements, and diet aids because their facial recognition system identified me as a failed jock from the sports club. Later, the police are confronted with the grisly homicide of the sports club manager in his office, where the only evidence is a single latent print left on the murder weapon. After no matches are made against the FBI's criminal master file, the new sports club management readily agrees to turn over the file images of fingerprints of all its members, including mine, so the latent print can be searched against them.

Particularly with respect to the private sphere, where the conduct of private actors has traditionally been given a large degree of freedom of action from government interference, few current legal limits exist in the United States on the use of biometric information held by private actors. This observation is not meant to suggest that the federal or state governments would not be able to regulate the use of biometric information held by private actors; rather, it emphasizes what the present regulatory baseline is with respect to the regulation of biometric information: Until regulatory action has been taken by government, the use of biometrics is left to the market. The legal situation is very different in the European Union, where a comprehensive privacy protection framework exists.

Invasive Information Is Obtained In addition to the identification information associated with the biometric, invasive information threatening privacy could conceivably include three other types of concerns. First, biometric identifiers could be used extensively for law enforcement purposes, as raised in the sports club example. Fingerprints have long been used by law enforcement, and electronic finger images—or what are in effect the next generation of fingerprints—are presently being used by various law enforcement agencies as part of their databases, such as the FBI's Integrated Automated Fingerprint Identification System (IAFIS).

Second, it is possible (and this point needs to be stressed: *only* possible) that some biometrics might capture more than just mere identification information. Information about a person's health and medical history might also be incidentally obtained. Recent scientific research, while the subject of controversy, suggests that fingerprints might disclose such information about a person. For example, Dr. Howard Chen, in his work on dermatoglyphics, or the study of the patterns of the ridges of the skin on parts of the hands and feet, notes that "certain chromosomal disorders are known to be associated with characteristic dermatoglyphic abnormalities," specifically citing Down syndrome, Turner syndrome, and Klinefelter syndrome as chromosomal disorders that cause unusual fingerprint patterns in a person. Certain nonchromosomal disorders, such as chronic, intestinal pseudo-obstruction (CIP) (described in the next paragraph),

leukemia, breast cancer, and Rubella syndrome, have also been implicated by certain unusual fingerprint patterns.

Dr. Marvin M. Schuster, the recently retired director of the division of digestive diseases at Johns Hopkins Bayview Medical Center, has discovered a "mysterious relationship" between an uncommon fingerprint pattern, known as a digital arch, and a medical disorder called CIP that affects 50,000 people nationwide. Based on the results of a seven-year study, Dr. Schuster found that 54 percent of CIP patients have this rare digital arch fingerprint pattern. In comparison, arch fingerprints appear in only seven percent of the general population. Schuster's discovery suggests a genetic basis to the disease. Schuster explained that in the case of CIP, "the more digital arches there are in the fingerprint, the stronger the correlation [to the condition]. The majority of CIP patients possess at least one digital arch. This discovery offers an important clue in diagnosing CIP, and it suggests that the disorder is congenital. It could potentially save people with CIP from multiple needless operations" (Hancock and Hendricks 1996).

While still extremely controversial within the scientific communities, several researchers report a link between fingerprints and homosexuality. For example, psychologists at the University of Western Ontario report that homosexual males are more likely than their heterosexual counterparts to show asymmetry in their fingerprints. "What we found is a statistically significant difference between groups of heterosexual and homosexual men," researcher Doreen Kimura said (Associated Press 1994). While this research is far from conclusive, the availability of such information with its possible links to medical and related information again raises concern about privacy and can create misperceptions.

From examining the retina or iris, an expert can determine that a patient may be suffering from common afflictions such as diabetes, arteriosclerosis, and hypertension; furthermore, a medical professional can also detect unique diseases of the iris and the retina. Moreover, the onset of certain diseases (such as diabetes) and conditions (such as pregnancy) may cause the retinal pattern to change; are the changes enough to cause a previously enrolled user to be rejected by a system because the user's biometric is no longer recognized by the system? Although both the iris and retina contain medical information, it is by no means obvious that the biometric data taken of the iris or retina implicates privacy concerns related to the disclosure of medical information. A necessary area of further technical inquiry is whether the computerized code taken of the iris or retina actually contains any medical information or if the information captured is sufficient to be used for any type of diagnostic purpose.

Much research remains to be done; however, a biometric identifier with any possible links to medical information will raise lingering questions about the privacy aspects of the information disclosed. More important, the mere perception that such sensitive information may be disclosed could dissuade people from using potentially beneficial biometric systems.

Actual Physical Harm; Physical Invasiveness Part of the "urban legend" surrounding biometrics holds that retinal scanning "shoots a laser beam into the eye." This is not the case, but urban legends die hard. Anecdotally, certain aviators, who are extremely proud of their 20/20 vision, supposedly had a hard time accepting retinal scanning devices in an experimental program because at least some of them feared the devices would adversely affect their perfect vision. Other users feared that diseases, such as conjunctivitis, may result from having to come into close proximity with a binocular-like device that strangers had touched. Some users of biometrics have complained that hand geometry systems dry their hands. Such fears, even when unfounded, can negatively affect the system because dissatisfied users will go out of their way not to cooperate with the system; some may even actively engage in acts of sabotage to prevent its use.

Documented cases of biometrics causing actual harm to a person are difficult, if not impossible, to find, but many of the technologies are fairly new. And to date, no enterprising plaintiff's attorney has brought a class-action lawsuit for personal injury on this biometrics-induced harm basis. The bottom line is that any liability resulting from any proven actual physical harm caused by biometric systems would be addressed by the individual state's tort liability regimes. On a related note, eventually, the judiciary will also have the opportunity to decide the admissibility of biometric identification as scientific evidence using the prevailing standards articulated by the Supreme Court in *Daubert v. Merrell Dow Pharmaceuticals* in 1993.

Biometrics as Privacy's Foe: Criticisms of Biometrics

This section discusses the "foe" side of the coin: the criticisms of biometrics leading to loss of anonymity and autonomy and the "Big Brother" scenario, including the danger of function creep and degradation of the individual's reasonable expectation of privacy.

The Loss of Anonymity; the Loss of Autonomy

A basic criticism of biometrics is that we, as individuals, risk losing our anonymity and autonomy whenever biometric systems are deployed. Part of controlling information about ourselves includes our ability to keep other parties from knowing things about us, like who we are. While we all know that a determined party—whether the government or a private party—can learn our identity (and much more about us), the use of biometrics makes it clear that our identity is now fully established within seconds. As Roger Clarke explains, "The need to identify oneself may be intrinsically distasteful to some people.... They may regard it as demeaning, or implicit recognition that the organization with whom they are dealing exercises power over them" (Clarke 1994).

Robert Ellis Smith agrees, noting that, "In most cases, biometric technology is impersonal" (Smith 1996). At the same time, as the technology improves, its use may become more ubiquitous, and individuals may find that they are required to provide a biometric identifier in unexpected, unwelcome, or unforeseen circumstances. Moreover, you cannot simply "make up" a biometric as you can a name, an address, or a phone number. In this sense, perhaps, the loss of anonymity leads to an inevitable loss of individual autonomy.

Biometrics should not really be blamed for the fact that there is less individual anonymity in society today than in decades or centuries past, however. Rather, far larger economic, political, and technological forces have been at work. America's transformation from an agrarian to industrial to post-industrial service (or "information age") economy, combined with the massive growth of government since the New Deal of the 1930s, have put a greater premium on the need for information about individuals and organizations. At the same time, technical advances have made it much easier and more convenient to collect, compile, and keep extensive information on individuals. This information-centric trend takes place because in the Information Age information has great value as a commodity. The computer, the enabler of "info-centrism," has helped make information a valuable commodity because it can process large amounts of personal information from large numbers of people in little time and at low cost.

While a biometric identifier is an accurate identifier, it is not the first nor the only identifier used to match or locate information about a person. Names and numerical identifiers such as social security numbers, account numbers, and military service numbers have long been used to access files with personal information. Moreover, the impressive search capabilities of computer systems with their abilities to search, for example, the full text of stored documents, make identifiers far less important for locating information about an individual.

We also should not lose sight of the fact that there is usually a good reason why individual recognition in the form of identification or verification is needed. Balancing the equities involved and depending on the case, the benefits—to the individual as well as to society—of establishing a person's identity generally outweigh the costs of losing anonymity. For example, given the massive problem of missing and abused children, many citizens would eagerly support the idea of day care providers using biometrics to make certain that our children get released at the end of the day to a parent or guardian whose identity has been verified. However, reasonable people can disagree as to the cost-benefit analysis.

Similarly, to consider a "pocketbook" example, the world's financial community has long been concerned about growing problems of ATM fraud and unauthorized account access, estimated to cost $500 million a year, check fraud at least $2 billion, and credit card fraud about $1.5 billion per year. The financial services industry believes that a significant percentage of these losses could be eliminated by the use of biometrics, by ensuring that only the authorized account

Woodward, John D.; Orlans, Nicholas; Higgins, Peter T.. Biometrics.

May not be reproduced in any form without permission from the publisher, except fair uses permitted under U.S. or applicable copyright law.

holder could access the account. MasterCard, for example, has been evaluating various biometrics since 1995 and believes fingerprint technology is the best technology to reduce credit card fraud. According to Joel Lisker, the company's senior vice president of security and risk management, "We estimate that a fingerprint system, fully implemented, could save the financial services industry billions of dollars" (Haapaniemi 1998).

Critics give too much credit to biometrics' alleged ability to erode anonymity without giving enough attention to the market's ability to protect privacy in response. It is not obvious that more anonymity will be lost when biometrics are used. Public and private sector organizations already have the ability to gather substantial amounts of information about individuals by tracking, for example, credit card use, consumer spending, and demographic factors.

A parallel to the financial services industry might be helpful. Despite the existence of many comprehensive payment systems such as credit cards, which combine extreme ease of service with extensive record-keeping, many Americans still prefer to use cash for transactions—a form of payment that leaves virtually no record. An individual who wants anonymity might have to go to greater lengths to get it in the biometric world, but the ability of the marketplace to accommodate a person's desire for anonymity should not be so readily dismissed. Moreover, as explained next, the ability of biometrics to serve as privacy enhancing technologies should not be discounted.

The Biometric-Based "Big Brother" Scenario

Aside from the alliterative qualities the phrase possesses, critics of biometrics seem to inevitably link the technology to "Big Brother." Biometrics, in combination with impressive advancements in computer and related technologies, would, its critics argue, enable the State to monitor the actions and behavior of its citizenry. In this vein, concern has been expressed that biometric identifiers will be used routinely against citizens by law enforcement agencies. As Marc Rotenberg of the Electronic Privacy Information Center has succinctly explained, "Take someone's fingerprint and you have the ability to determine if you have a match for forensic purposes" (American Banker 1996).

This "Big Brother" concern, however, goes beyond normal police work. Every time an individual used her biometric identifier to conduct a transaction, a record would be made in a database that the government, using computer technology, could then match and use against the citizen—even in ways that are not authorized or meet with our disapproval. To borrow the reasoning of a 1973 report on national identity card proposals, the biometric identifier, in ways far more effective than a numerical identifier, "could serve as the skeleton for a national dossier system to maintain information on every citizen from cradle to grave" (U.S. Department of Health, Education and Welfare 1973).

Roger Clarke has perhaps offered the best worst-case *1984*-like scenario:

Woodward, John D.; Orlans, Nicholas; Higgins, Peter T.. Biometrics.

> Any high-integrity identifier [such as biometrics] represents a threat to civil liberties, because it represents the basis for a ubiquitous identification scheme, and such a scheme provides enormous power over the populace. All human behavior would become transparent to the State, and the scope for nonconformism and dissent would be muted to the point envisaged by the antiutopian novelists (Clarke 1994).

At least one example exists from U.S. history of supposedly confidential records being used in ways never likely intended. In November 1941, almost two weeks before the Japanese attack on Pearl Harbor, President Franklin D. Roosevelt ordered a comprehensive list made to include the names and addresses of all foreign-born and American-born Japanese living in the United States. To compile the list, staffers used 1930 and 1940 census data. Working without the benefit of computers, staffers compiled the list in one week. Following the attack, President Roosevelt issued Executive Order 9066, authorizing military personnel to detain and relocate persons of Japanese ancestry. By the spring of 1942, the U.S. government forced persons of Japanese descent, including U.S. citizens, to relocate from their homes on the West Coast and report to relocation centers. An estimated 120,000 people, many of whom were U.S. citizens, were held without judicial review. John Miller and Stephen Moore, two libertarian scholars, contend, "The history of government programs indicates that privacy rights are violated routinely whenever expediency dictates" (Miller and Moore 1995).

Function Creep

The biometric-based "Big Brother" scenario would not happen instantly. Rather, when first deployed, biometrics would be used for limited, clearly specified, sensible purposes—to combat fraud, to improve airport security, to protect our children, and so on. But consider what Justice Louis Brandeis (of "right to privacy" fame) warned in his famous *Olmstead v. United States* dissent of 1927:

> Experience should teach us to be most on our guard to protect liberty when the Government's purposes are beneficent. Men born to freedom are naturally alert to repel invasion of their liberty by evil-minded rulers. The greatest dangers to liberty lurk in insidious encroachment by men of zeal, well meaning but without understanding.

What would inevitably happen over time, according to civil libertarians, is a phenomenon known as "function creep" or "mission creep": identification systems incorporating biometrics would gradually spread to additional purposes not announced or not even intended when the identification systems were originally implemented.

The classic example of function creep is the use of the Social Security Number (SSN) in the United States. Originated in 1936, the SSN's sole purpose was to

Woodward, John D.; Orlans, Nicholas; Higgins, Peter T.. Biometrics.

facilitate record-keeping for determining the amount of Social Security taxes to credit to each contributor's account. In fact, the original Social Security cards containing the SSN bore the legend, "Not for Identification." By 1961, the Internal Revenue Service (IRS) began using the SSN for tax identification purposes. By 2002, countless transactions from credit to employment to insurance to many states' drivers licenses require a Social Security Number and countless private organizations ask for it even when it is not needed specifically for the transaction at hand. From "Not for Identification," the SSN has become virtual mandatory identification.

Moreover, given the consequences of function creep, the size, power, and scope of government will expand as all citizens get their biometric identifiers thrown into massive government databases by the "men [and women] of zeal, well-meaning but without understanding" about whom Justice Brandeis warned. In effect, an old Russian proverb aptly identifies the danger of biometrics for freedom-loving Americans: "If you are a mushroom, into the basket you must go."

Reduction of the Individual's Reasonable Expectation of Privacy

Just as function creep implies that biometrics will gradually (and innocently) grow to be used by zealous, well-meaning bureaucrats in numerous, creative ways in multiple forums, function creep will also enable the government to use the new technology of biometrics to reduce further over time the citizenry's reasonable expectations of privacy.

Analogies can be drawn from previous cases in which the government has used cutting-edge technology to intrude in an area in which the private actor had manifested a subjective expectation of privacy. For example, the Environmental Protection Agency (EPA), in an effort to investigate industrial pollution, used "the finest precision aerial camera available" mounted in an airplane flying in lawful airspace to take photographs of Dow Chemical Company's 2,000-acre Midland, Michigan, facilities. Fearful that industrial competitors might try to steal its trade secrets, Dow took elaborate precautions at its facility. Despite the precautions the company took to ensure its privacy, the Supreme Court, in a 5–4 vote handed down in 1985, found that Dow had no reasonable, legitimate, and objective expectation of privacy in the area the EPA had photographed. The dissent noted that, by basing its decision on the method of surveillance used by the government, as opposed to the company's reasonable expectation of privacy, the Court ensured that "privacy rights would be seriously at risk as technological advances become generally disseminated and available to society" (*Dow Chemical Co. v. United States*, 476 U.S. 227 (1986)).

Some contend that biometrics is precisely the kind of technological advance the *Dow* dissenters warned about. Citizens no longer would have a reasonable expectation of privacy any time they use a biometric identifier because the gov-

May not be reproduced in any form without permission from the publisher, except fair uses permitted under U.S. or applicable copyright law.

ernment's use of biometrics and computer matching would be merely utilizing commercially available technologies.

Cultural, Religious, and Philosophical Objections

Other criticisms of the use of biometrics originate on cultural, religious, and philosophical grounds. These objections might not be shared by large numbers of people, but to the extent those who advocate them have sincerely held beliefs, they merit discussion.

Cultural: Stigma and Dignity

Simon Davies of Privacy International notes that it is no accident that biometric systems are being tried out most aggressively with welfare recipients. The British scholar contends that they are in no position to resist the State-mandated intrusion. Interestingly, in the 1995 GAO Report on the use of biometrics to deter fraud in the nationwide Electronics Benefit Transfer (EBT) program, the U.S. Department of the Treasury expressed concern over how finger imaging would impact on the dignity of the recipients and called for more testing and study.

While stigma and dignity arguments tied to the less fortunate elements of society have a strong emotional appeal, the available empirical data from Connecticut suggests that the majority of entitlement recipients actually support the use of biometrics. Some have criticized such surveys as flawed because the recipients could be reluctant to provide their true opinions because of retaliation fears.

Religious Objections

Several religious groups criticize biometrics on the ground that individuals are forced to sacrifice a part of themselves to a godless monolith in the form of the State. For example, certain Christians interpret biometrics to be a "mark of the beast," an objection based on language in the New Testament's "Revelation":

> [The Beast] causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: And that no man might buy or sell, save that he had the mark, or the name of the beast, or the number of his name.... And his number is six hundred, threescore, and six (Revelation, 13:16–18).

Certain Christians consider biometrics to be the brand discussed in Revelation and biometric readers as the only means of viewing these brands. For example, stressing that "the Bible says the time is going to come when you cannot buy or sell except when a mark is placed on your head or forehead," fundamentalist Christian Pat Robertson has expressed doubts about biometrics and has noted how the technology is proceeding according to scripture. And at least one religious group has complained that the hand geometry devices used by California were making "the mark of the beast" on enrollees' bands.

FTC Fines ChoicePoint $15 Million for Security Breach

Los Angeles Times (LATWP News Service) (CA) - Thursday, January 26, 2006

Author: *Joseph Menn*

The Federal Trade Commission hit data broker ChoicePoint Inc. with the largest civil penalty in the agency's history Thursday for allowing sensitive information on 163,000 consumers to get into the hands of Los Angeles con artists last year.

The commission levied a $10 million penalty, on top of $5 million in restitution, making a total worth more than 10 percent of the company's profit last year. The agency declared that the company gave false assurances to the public about its security precautions while being so careless that it sold information to a purported business customer whose own ChoicePoint file identified a link to possible fraud.

Other con artists posing as customers applied for multiple accounts from the same publicly available fax machine, submitted revoked business licenses and in at least one case omitted the applicant's surname, according to the commission.

While some of the FTC's allegations were previously reported, many of the details were new, including complaints that the company failed to inquire after would-be customers applied with suspended articles of incorporation, mismatching addresses on supporting documents, and contact numbers belonging to residential or cellular phones.

Revealed because of a California disclosure law, the ChoicePoint breach launched a national debate about data security that has prompted new laws in more than a dozen states and 18 pieces of proposed federal legislation.

Most are aimed at making it harder for identity thieves to get Social Security numbers and other information that can be used to open credit accounts and make fraudulent purchases in the names of innocent consumers.

In announcing Thursday's settlement, FTC Chairwoman Deborah Platt Majoras said the commission wanted to serve notice to other businesses that consumer information must be protected.

Data security "must be a priority for financial and corporate America," she said. Signaling that the agency would continue to lead in the enforcement of identity theft, she said consumers should know that "we will make sure that your information is safeguarded and you don't have to worry that it will fall into the wrong hands and harm you."

The action generally won praise from consumer groups. Thursday's penalty "is a lot of money," even for a big company like ChoicePoint, said Chris Hoofnagle, West Coast director of the nonprofit Electronic Privacy Information Center. "It shows that the FTC is getting serious about security."

ChoicePoint still faces several private lawsuits over the data breach. The Securities and Exchange Commission also is investigating whether Chairman Derek Smith and another top executive improperly sold company shares before the breach became public.

The company was informed of the problem months earlier by investigators with the Los Angeles County Sheriff's Department. They arrested a Nigerian national, Olatunji Oluwatosin, who pleaded guilty last month to committing $2.5 million in fraud and is facing at least seven years in jail.

Beginning in January 2002, Oluwatosin used fake businesses with mail drops in Beverly Hills, Hollywood and elsewhere to set up ChoicePoint accounts and access personal information on more than 1,500 people, according to the district attorney's office. Search warrants served on ChoicePoint turned up a much wider fraud

problem.

The FTC cited ChoicePoint for violating the Fair Credit Reporting Act, which requires buyers of credit reports to have a proper purpose, and for violating basic fair-practices laws. It said ChoicePoint unfairly failed to protect consumer information and was deceptive when it made such statements as "Every ChoicePoint customer must successfully complete a rigorous credentialing process."

In legal papers filed with the settlement, the FTC said ChoicePoint improperly released nearly 10,000 credit reports and that about 800 cases of identity theft resulted. The $5 million in restitution will be distributed to those people and future victims of the data breach.

ChoicePoint didn't admit to the FTC assertions or to any wrongdoing in the settlement. It did agree to revamp its procedures in several ways, including instituting mandatory visits to many customers. It also must submit to security audits every two years through 2026.

By itself, the financial payout will do modest harm to ChoicePoint. Even after a charge for the penalty, the Alpharetta, Ga., company reported fourth-quarter earnings of $28 million Thursday on revenue of $258 million.

ChoicePoint shares dropped $3.35, or 7 percent, to $42.95 after the settlement was announced.

SENATOR BILL WIELECHOWSKI

SB 98—Biometric Information: What Are Other States Doing?

What are other states doing regarding the collection of biometric data?

In 2008, our office requested a research report asking which states have legislation preventing the collection of a person's biometric data, such as a fingerprints or DNA, for purposes other than law enforcement.

We received a comprehensive list of states that have laws prohibiting genetic discrimination in employment, prohibiting employers from requesting or requiring genetic information, prohibiting employers from performing genetic testing, and similar situations. In all, the researcher identified through the NCSL employment laws in 36 jurisdictions.

When it comes to non-genetic biometric information, the researcher identified 33 states which have some form of legislation, which includes a wide range of topic from prohibiting the use of lie detectors by anyone except peace officers in California, to requiring the Commissioner of Health and Social Services to examine the use of biometric identifiers for recipients of public assistance.

Among some of the more notable laws are Indiana, which prohibits the collection of personal information, including voice prints, by state agencies to that which is relevant and necessary to accomplish a statutory purpose; and New Hampshire which prohibits the collection of "biometric data" in connection with motor vehicle licensing.

Other states, such as Oregon, require those who apply for a driver's license to submit to the collection of biometric data.

Essentially, all states which have laws regarding DNA tend to protect that information at least for employment purposes, but the states vary greatly when it comes to other biometric information.

What About the Federal Government?

You will also find on Page 2 of the document in your packet titled, "Biometrics: Who's Watching You?" there is a description of some of the federal initiatives involving the biometrics. The most recent of these is the USA Patriot Act, which requires the use of biometric technology to identify foreign visitors, and the Enhanced Border and Visa Entry Reform Act of 2002, which is specific to border crossings.

LEGISLATIVE RESEARCH REPORT

NOVEMBER 20, 2008

REPORT NUMBER 09.031

STATE LAWS REGARDING BIOMETRIC PRIVACY

PREPARED FOR SENATOR BILL WIELECHOWSKI

BY ROGER WITHINGTON, LEGISLATIVE ANALYST

You asked for information regarding privacy. Specifically, you wished to know what states, if any, have laws that prohibit the collection of a person's biometric data, such as a fingerprint or deoxyribonucleic acid (DNA), for purposes other than law enforcement.

As you may know, the term "biometrics" is used for the various ways humans can be identified through unique aspects of their bodies. Fingerprints are probably the most commonly known biometric identifier. Other biometric identifiers include hand prints, vein dimensions, iris designs, blood vessels on retinas, body odor, walking characteristics, voice patterns, facial features, and genetic profile.[1]

The National Conference of State Legislatures (NCSL) collects information on actions state legislatures have taken to safeguard a persons' genetic information.[2] One common theme in state law is to protect employees and job seekers from genetic screening and discrimination. In Table 1, we provide NCSL's summary of state employment laws that pertain to a person's genetic information. As you can see from Table 1, genetic nondiscrimination in employment laws is now in place in 35 jurisdictions. In addition, laws in 19 states prohibit an employer from requesting genetic information or a genetic test from an employee; laws in 26 states prohibit an employer from requiring genetic information or a genetic test from an employee; laws in 16 states prohibit an employer from performing a genetic test on an employee; laws in 11 states prohibit an employer from obtaining an employee's genetic information or genetic test result; and laws in 14 states specify penalties for genetic discrimination in employment. As examples, we include as Attachment A genetic nondiscrimination employment laws from Arkansas, Iowa, New Hampshire, Oklahoma, and Wisconsin.

Source:	National Conference of State Legislatures, *http://www.ncsl.org/programs/health/genetics/ndiscrim.htm*.

The state laws described above do not generally extend privacy protections to non-genetic based biometric identifiers such as fingerprints. We were unable to locate a comprehensive list of state laws that prohibit the collection of a person's non-genetic biometric data. In conjunction with NCSL, we searched the statutes of each state for laws that pertain, to some degree, to an individual's non-genetic biometric data and identified 33.

Most of the laws identified by our search are quite dissimilar; they range from preventing schools from collecting the biometric information of students without the written consent of the student's parent or guardian, to establishing inmate telephone systems within state prisons that can identify inmates through biometric identifiers. None of these laws, however, appear to pertain to your

issue of expressly prohibiting employers from collecting non-genetic biometric information from their employees or prospective employees.[3] We include each of these 33 laws as Attachment B; a brief summary of each of these laws is as follows.

Arizona Revised Statutes § 15-109: Prevents schools from collecting biometric information from a pupil unless the pupil's parent or guardian gives written permission.

California Codes, Civil Code § 52.7: Except as provided in law, a person shall not require, coerce, or compel any other individual to undergo the subcutaneous implanting of an identification device.

California Codes, Financial Code § 13082: Adding tactually discernible numerical keypad, such as fingerprint biometrics, to point-of-sale devices to aid visually impaired individuals.

California Codes, Penal Code § 637.3: With the exception of peace officers carrying out his or her official duties, no person or entity shall use any system which examines or records in any manner voice prints, or other voice stress patterns of another person to determine the truth or falsity of statements made by such other person without his or her express written consent given in advance of the examination.

California Codes, Penal Code § 4017.1: Except as provided in law, any person confined in a county jail, industrial farm, road camp, or city jail who is required or permitted by an order of the board of supervisors or city council to perform work, and any person while performing community service in lieu of a fine or custody or who is assigned to work furlough, may not be employed to perform any function that provides access to personal information of private individuals, including the following: addresses; telephone numbers; health insurance, taxpayer, school, or employee identification numbers; mothers' maiden names; demand deposit account, debit card, credit card, savings account, or checking account numbers, PINs, or passwords; social security numbers; places of employment; dates of birth; state or government-issued driver's license or identification numbers; alien registration numbers; government passport numbers; unique biometric data, such as fingerprints, facial scan identifiers, voice prints, retina or iris images, or other similar identifiers; unique electronic identification numbers; address or routing codes; and telecommunication identifying information or access devices.

Connecticut General Statutes § 17b-30: Requires the Commissioner of Social Services and the Commissioner of Motor Vehicles to examine available biometric identifier systems to be used by the state's temporary family assistance program and any other program determined by the Commissioner of Social Services.

---

[3] The list does not include laws that states have adopted in relation to the National Crime Prevention and Privacy Compact or laws that refer to biometrics information in specific identity theft laws. The National Crime Prevention and Privacy Compact Act is a federal law that establishes a method by which states can exchange criminal records for noncriminal justice purposes without charging each other for the information. The URL for the Federal Bureau of investigation's National Crime Prevention and Privacy Compact Act website is *http://www.fbi.gov/hq/cjisd/web%20page/cc.htm.*

Florida Annotated Statutes § 311.125: Establishes the Uniform Port Access Credential Card, which is required of those individuals who work at Florida's seaports. This card must include at a minimum a digital full-face photograph, a digital fingerprint, a multilayered security process, a two-dimensional barcode with technology specifications that will allow the unique biometric identifiers to reside in the barcode, a unique identifying code or number, scanning capability to compare required identifiers with information on file in the central database.

Illinois Compiled Statutes 105 ILCS 5/10-20.40 and 105 ILCS 5/34-18.34: Establishes minimum policies for school districts that collect biometric information from students.

Illinois Compiled Statutes 740 ILCS 14/1 (2008), Biometric Information Privacy Act: Relates to the retention, destruction, and privacy of an individual's biometric information. Prohibits unauthorized disclosure and exempts such information from the Freedom of Information Act. Establishes that no provision be construed to conflict with the Criminal Identification Act; the Private Detective, Alarm, Security, Fingerprint Vendor, and Locksmith Act, or another similar act.

Indiana Statutes § 4-1-6-2: Limits the collection, maintenance, and use of personal information, including voice prints, by state agencies, to that which is relevant and necessary to accomplish a statutory purpose.

Indiana Statutes § 26-2-8-116: Allows electronic signature authentication and identification to be used for certain individuals, under certain circumstances.

Louisiana Revised Statutes 37:1182: Grants the Louisiana Board of Pharmacy the authority to require applicants for any pharmacological license, registration, certificate, permit, or any other designation, to provide the information necessary to verify an applicant's identity including birth certificates, passport documents, legal status documents, and any other biometric information deemed appropriate by the board.

Nebraska Revised Statutes § 87-802: Requires that individuals be notified in the event of a security breach that compromises their personal information. Personal information is defined as a name in combination with another identifying data element, including a fingerprint, voice print, or retina or iris image, or other unique physical representation.

Nevada Revised Statutes § 639.2353: Allows a prescription to be transmitted electronically without the health care practitioner's signature if it contains a facsimile signature, security code or other unique identifier; or a voice recognition system, biometric identification technique or other approved security system is used to identify the practitioner.

New Hampshire Revised Statutes 91-A:10: Prevents the state from releasing data sets that contain biometric identifiers.

New Hampshire Revised Statutes 260: 10-b: Prohibits the collection and retention of any biometric data in connection with motor vehicle registration, operation, and driver licensing. "Biometric data" includes voice data used for comparing live speech with a previously-created speech model of a person's voice.

New Jersey Statutes § 39:2A-29: Permits the New Jersey Motor Vehicle Commission to make technological improvements including the modernization of software and hardware, the addition of surveillance cameras, alarms, and access systems, and the use of biometrics.

North Carolina General Statutes § 130A-480: Prohibits the collection of biometric identifiers, including voice prints, within statute that directs the State Health Director to develop a "syndromic" surveillance program for hospital emergency departments in order to detect and investigate public health threats resulting from a terrorist incident or epidemic.

Ohio Revised Code 3701.75: Establishes standards for using electronic signatures in health care records. One standard requires that some electronic signature systems use either a two-level access control mechanism that assigns a unique identifier to each system user or a biometric access control device.

Oregon Revised Statutes § 807.024: Requires a person who applies for issuance, renewal or replacement of a driver license, driver permit or identification card to submit to collection of biometric data by the Department of Transportation for the purpose of establishing his or her identity.

Pennsylvania Statutes § 1802: Appointees, employees and prospective employees engaged in the service of the Commissions or the Board of Gaming shall submit to fingerprinting and photographing by the Pennsylvania State Police or by a local law enforcement agency.

South Carolina Code § 30-2-10: Requires that all state agencies, boards, commissions, institutions, departments, and other state entities develop privacy policies and procedures to ensure that the collection of personal information (including biometric identifiers) pertaining to the citizens of South Carolina is limited to such personal information required by any such entity to fulfill a legitimate public purpose.

Texas Statutes, Business and Commerce Code § 35.50: Provides that biometric identifiers may not be captured for commercial purposes except with prior notification and consent. Additionally provides that once captured, the biometric information may not be sold, leased, or otherwise disclosed unless the individual consents to the disclosure; the disclosure completes a financial transaction that the individual requests or authorizes; the disclosure is required or permitted by a federal or state statute; or the disclosure is made by or to a law enforcement agency for a law enforcement purpose.

Texas Statutes, Business and Commerce Code § 503.001: Defines a "biometric identifier" as a retina or iris scan, fingerprint, voiceprint, or record of hand or face geometry. This law establishes that a person may not capture a biometric identifier of an individual for commercial purposes unless the person informs the individual before capturing the biometric identifier, and receives the individual's consent to capture the biometric identifier.

Texas Statutes, Government Code § 495.025: The State requests proposals from private vendors for a contract to provide pay telephone service to eligible inmates confined in facilities operated by the department. The telephone system must have the capacity to use a biometric identifier of the inmate making the call.

Texas Statutes, Government Code § 531.1063: The Texas Health and Human Services Commission and the Texas Department of Human Services shall develop and implement a Medicaid Fraud Pilot Program. The program must include participant smart cards and biometric readers that reside at the point of contact with Medicaid providers, recipients, participating pharmacies, hospitals, and appropriate third-party participants; and a secure finger-imaging system that is compliant with the Health Insurance Portability and Accountability Act (HIPAA).

Texas Statutes, Government Code § 560.001: Provides that a government body in possession of a biometric identifier may not sell, lease, or otherwise disclose the information unless the individual consents to the disclosure; the disclosure completes a financial transaction that the individual requests or authorizes; the disclosure is required or permitted by a federal or state statute; or the disclosure is made by or to a law enforcement agency for a law enforcement purpose.

Texas Statutes, Transportation Code § 521.032: Establishes the Enhanced Driver's License or Personal Identification Certificate which requires the applicant to submit a biometric identifier as designated by the Department of Transportation.

Vermont Statutes 23 V.S.A. § 634: Prevents the Department of Motor Vehicles from implementing any procedures or processes for identifying applicants for licenses, learner permits, or non-driver identification cards that involve the use of biometric identifiers.

Virginia Code § 2.2-3801 through § 2.2-3809: Includes voice prints in the definition of personal information. Requires that state agencies collect, maintain, use, and disseminate only that personal information permitted or required by law. This law prohibits agencies from disseminating information to another system without specifying requirements for security and usage including access limitations, and receiving reasonable assurances that those requirements and limitations will be observed.

Revised Code of Washington § 46.20.037: This law requires implementation of a voluntary biometric matching system for driver's licenses and identification cards within two years of the full implementation of the Real ID Act. This law states that the biometric matching system is to be used only to verify the identity of an applicant for a renewal or duplicate driver's license or identification card by matching a biometric identifier submitted by the applicant against the biometric identifier submitted when the license was last issued.

West Virginia Code § 17B-2-12a: Vision screening conducted as part of driver's licensure shall not be used to collect any type of personal biometric identifying information.

Included in your request was a document entitled "The Alaskan Biometric Collection Act." As you may know, within this document the author notes that the University of Alaska, Fairbanks requires individuals taking the Certified Public Accountant (CPA) examination to submit to fingerprinting before and possibly during the examination. This fingerprint condition is, however, required by the American Institute of Certified Public Accountants (AICPA), the national, professional organization for all Certified Public Accountants which sets the auditing standards and the ethical standards for all CPAs; the National Association of State Boards of Accountancy (NASBA), which

serves as a forum for the boards of accountancy throughout the United States; and Prometric, which provides testing services for those seeking to take the CPA exam.[4] According to Ken Bishop, Senior Vice President for NASBA, no state prevents Prometric—or any of its subcontractors (the UAF is one of these subcontractors)—from obtaining fingerprint data from those taking the CPA exam.[5]

I hope you find this information to be useful. Please do not hesitate to contact us if you have questions or need additional information.

[4] The URL for the American Institute of Certified Public Accountants is *http://www.aicpa.org/*. The URL for the National Association of State Boards of Accountancy is *http://www.nasba.org*. The URL for Prometric is *http://www.prometric.com/*.

[5] Ken Bishop, Senior Vice President for NASBA, can be contacted at 615-312-3755. In addition, Mr. Bishop notes that Prometric doesn't capture or retain a copy of an individual's fingerprint. Prometric captures an algorithm, or a mathematical representation, based on a person's fingerprint.

Citizens for Privacy in Alaska

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport."

We are very concerned with the rapid erosion of our privacy rights, <u>and we urge you to support legislation</u> to strengthen our biometric privacy laws this session. If someone can present a valid US Passport OR a driver's license (State issued ID) as identification, they should be exempt from any biometrics (fingerprints)-as-ID mandate *(note that criminal background checks will not be affected by this legislation. This legislation is specifically focused on biometrics-as-ID mandates).*

	STATUS: AGREED WITH THE GOAL?	FIRST & LAST NAME	ORGANIZATION	TITLE	CITY & STATE	PERSONAL STATEMENT

Re: Senate Bill 98
ACLU Statement of Support

Chair Wielechowski, Vice-Chair Paskvan:

Thank you for the opportunity to submit a written statement of support for SB 98.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout the State of Alaska who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions.

From a constitutional rights and privacy perspective, **the ACLU of Alaska endorses protections for individuals' personal biometric information, and applauds the proactive introduction of this Bill to avoid violations of privacy before they occur**.

Need for Biometrics Legislation

Recent advances in genomics, bioinformatics and data mining are encouraging a worldwide proliferation of "gene banks" – large collections of

biological samples that usually include genetic information derived from those samples, as well as linked medical, family history or lifestyle information. The use of these biological repositories for genetics research could lead to advances in public health, such as the identification of genetic factors in diseases, or the development of diagnostic tests. ***On the other hand, they also create an avenue for privacy infringements, stigmatization and discrimination, and improper commercial exchange of personal data.***

The ACLU supports legislation to prevent privacy infringement and genetic discrimination. SB 98 can advance these goals.

Protections Against Coerced Consent

Given the ability to condition the provision of necessary services on the disclosure of personal information, we are also pleased to note that SB 98 is intended to protect against coerced "consent."

Given the sensitivity of biometric information, and the plethora of medical information obtainable from it, we endorse legislation that would protect Alaskans from improperly being compelled to waive their rights to protect their personal, private information.

Thank you again for the opportunity to share our support of this bill.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

cc: Senator Albert Kookesh
Senator Kevin Meyer
Senator Catherine Giessel

CS FOR SENATE BILL NO. 98(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, Coghill, Ellis, Menard, McGuire, Giessel, Egan, Paskvan, Thomas, Dyson, Wagoner

A BILL

FOR AN ACT ENTITLED

"An Act relating to biometric information."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18 is amended by adding a new chapter to read:

Chapter 14. Biometric Information.

Sec. 18.14.010. Biometric information collection. (a) A person may not collect the biometric information of another individual unless the person first

(1) notifies the individual in a clear manner that the biometric information is being collected, the specific purpose for which the biometric information will be used, and how long the biometric information will be kept; and

(2) receives, in a written, electronic, or other form by which the consent can be documented, the individual's full consent to the collection of the biometric information, the specific purpose for which the biometric information will be used, and how long the biometric information will be kept.

(b) Unless the individual's biometric information was needed for a specific authorized law enforcement, security, or fraud prevention purpose, an individual may,

at any time, revoke or amend the individual's consent provided under (a) of this section.

Sec. 18.14.020. Disclosure of biometric information. (a) A collector and a collector's contractor may not disclose, transfer, or distribute the biometric information of another individual, except to a contractor or to a person to authenticate the identity of the individual providing the biometric information.

(b) A disclosure, transfer, or distribution under (a) of this section may only be made for the original purpose for which the information was collected.

Sec. 18.14.030. Sale of biometric information. A person may not sell biometric information, except that a contractor may sell the contractor's business to another person and transfer the biometric information to the buyer.

Sec. 18.14.040. Alternate identification. If a person who administers an occupational examination requires an individual taking the examination to provide biometric information to the person for the purpose of identifying the individual taking the examination, the person may not require that the individual provide the biometric information if the individual provides the person with alternate identification acceptable to the person administering the occupational examination. In this section, "occupational examination" includes an examination required for admission to an institution of higher learning.

Sec. 18.14.050. Disposal. (a) When a collector no longer needs an individual's biometric information for the collector's original purpose, or if an individual requests in writing that the individual's biometric information be removed from all databases or other storage systems and be permanently destroyed, the collector and the collector's contractor, if any, shall, within 120 days and unless prohibited by other law, a regulation, or a court order, remove the individual's biometric information from all databases and storage systems and destroy the biometric information.

(b) Within 30 days after determining that the collector no longer needs an individual's biometric information for the collector's original purpose or that the individual has requested the removal and destruction, the collector shall notify the collector's contractor, if any, that the collector is to remove the individual's biometric information from all databases and storage systems and destroy the biometric

information.

Sec. 18.14.060. Use of biometric information. A collector may not use biometric information for marketing purposes or for general surveillance purposes, but a collector may use the biometric information for a specific authorized security or fraud prevention purpose in addition to the specific purpose for which the biometric information was collected.

Sec. 18.14.070. Storage of biometric information. A collector and a contractor shall store an individual's biometric information in a secure manner, which may include encryption or another appropriate method, to ensure that the identity of the individual who provided the biometric information is protected.

Sec. 18.14.080. Right of action. (a) Except as provided in (b) of this section, an individual may bring a civil action against a person who knowingly violates this chapter. A person who violates this chapter is liable to the individual for actual damages and a penalty of $5,000, except that, if the violation resulted in profit or monetary gain to the person, the penalty is $100,000. In this subsection, "knowingly" has the meaning given in AS 11.81.900.

(b) An action for damages, a penalty, or both may not be brought against the state, the agencies of the state, or the officers or employees of the state or the agencies of the state for violations of this chapter or for other claims arising under this chapter.

Sec. 18.14.085. Exemptions. (a) This chapter does not apply to the collection, retention, analysis, disclosure, or distribution of

(1) biometric information for a law enforcement purpose, including the identification of perpetrators, the investigation of crimes, the identification of missing or unidentified persons, or the identification of human remains;

(2) biometric information when authorized by state or federal law; or

(3) facial images by the Department of Administration for drivers' licenses issued under AS 28.15, for state identification cards issued under AS 18.65.310, for administering AS 28.15, or for administering AS 18.65.310.

(b) This chapter does not apply to the retention of voices recorded for quality assurance purposes.

Sec. 18.14.090. Definitions. In this chapter,

(1) "biometric data" means fingerprints, handprints, voices, facial mapping, iris images, retinal images, vein scans, hand geometry, or finger geometry;

(2) "biometric information" means biometric data that is used in a biometric system for fingerprint recognition, hand geometry recognition, finger geometry recognition, voice recognition, facial recognition, iris scans, retinal scans, or vein recognition;

(3) "biometric system" means an automated system capable of

(A) capturing biometric data from an individual's biometric information;

(B) extracting and processing the biometric data captured under (A) of this paragraph;

(C) storing the biometric data extracted under (B) of this paragraph;

(D) comparing the biometric data extracted under (B) of this paragraph with biometric data stored for the individual for use in future recognition of the individual; and

(E) determining how well the extracted and stored biometric data match when compared under (D) of this paragraph, and indicating whether an identification or verification of identity has been achieved;

(4) "collector" means a person who collects the biometric information of another individual;

(5) "contractor" means a person who contracts with a collector to store the biometric information collected by the collector, and includes a person to whom the contractor sells the contractor's business and transfers the biometric information;

(6) "facial mapping" means the use of digital technology to measure the features of an individual's face;

(7) "facial recognition" means the use of facial mapping for recognition purposes;

(8) "finger geometry recognition" means the use of the shape and dimensions of one or more fingers for recognition purposes;

(9) "fingerprint recognition" means the use of the physical structure of

an individual's fingerprint for recognition purposes;

(10) "governmental entity" means a state agency, a municipality, and an agency of a municipality; in this paragraph, "state agency" means an agency of the executive, judicial, or legislative branch of state government;

(11) "hand geometry recognition" means the use of the physical structure of an individual's hand for recognition purposes;

(12) "iris scan" means the use of an image of the physical structure of an individual's iris for recognition purposes;

(13) "person" has the meaning given in AS 01.10.060, and includes a governmental entity;

(14) "retinal scan" means the use of the pattern of blood vessels in an individual's eye for recognition purposes;

(15) "vein recognition" means the use of the veins in an individual's skin for recognition purposes.

SENATOR BILL WIELECHOWSKI

Explanation of Changes From CS, Version "B", to CS for SB 98, Version "T"

- **Sec 18.14.010**: This section now has strengthened language to further clarify consent needs to be provided for biometric information to be collected, the consent needs to be documented, and unless required for law enforcement or security purposes, the consent may be revoked at any time.
- **Sec 18.14.020:** This section now restricts the disclosure of biometric information to third parties, except to a person the collector has contracted with to the store the information. Additionally, the information may only be used for the original purpose of the collection. It no longer mandates a collector to accept an alternate ID.
- **Sec 18.14.030:** This section now says the sale of biometric information is prohibited, unless the storage entity is acquired by another storage entity. A uniform consent form to be drafted by the DHSS is no longer in the bill.
- **Sec 18.14.040:** This section now specifically says occupational examinations must allow acceptable other forms of ID to be used in lieu of biometric identification.
- **Sec 18.14.050:** This section sets time limits on how long biometric information can be stored. Biometric information will be deleted upon request of the individual or when the original reason for the collection is no longer necessary. The section allows 30 days for the collecting entity to notify the storage entity, and 120 days for the storage entity to delete the data.

- **Sec 18.14.060:** This section states that biometric information cannot be used for marketing or general surveillance purposes, but it may be used for fraud prevention.
- **Sec 18.14.070:** This section states that biometric information shall be stored in a secure manner.
- **Sec 18.14.080:** This section provides a private right of action for individuals to bring against private entities who violate this chapter. The state and its agents are exempt, but not immune to injunctions.
- **Sec 18.14.085:** This section provides exemptions for the use of biometric information without consent:
    - When used for law enforcement purposes
    - When authorized by state or federal law
    - For facial images used by the Department of Admin for drivers licenses and ID cards
    - For voice retention for quality assurance purposes
- **Sec 18.14.090:** Definitions remain unchanged

Changes in CS for SB 98 Version "E" to Version "T"

- **In Sec 18.14.040, Page 2, Lines 17-19**, a clarification has been made to ensure that exams for entrance to institutions of higher learning have been included as occupational exams.
- **In Sec 18.14.040, Page 2, Lines 17,** a clarification has been made to ensure an administer of an exam may determine what an acceptable alternate ID is.
- **In Sec 18.14.080, Page 3, Line 18,** the term "agents of the state," or what could possibly be construed as a contractor with the state, has been removed as organizations exempted from a private right of action.
- **In Sec 18.14.085, Page 3, Lines 29-30,** an exemption has been made for voice data collected for quality assurance purposes.
    - Additionally, the exemption for "facial images in a biometric system" has been removed as "facial images" have been changed to "facial mapping" under the definition of "biometric data".
- **In Sec 18.14.090, Page 3, Lines 1-2,** "facial images" have been replaced by "facial mapping" in the definitions of biometric data.
    - **Page 3, Lines 25-26,** "facial mapping" has been defined as "the use of digital technology to measure the features of an individual's face."

A BILL

FOR AN ACT ENTITLED

"An Act relating to biometric information."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18 is amended by adding a new chapter to read:

Chapter 14. Biometric Information.

Sec. 18.14.010. Biometric information collection. (a) A person may not collect the biometric information of another individual unless the person first

(1) notifies the individual in a clear manner that the biometric information is being collected, the specific purpose for which the biometric information will be used, and how long the biometric information will be kept; and

(2) receives, in a written, electronic, or other form by which the consent can be documented, the individual's full consent to the collection of the biometric information, the specific purpose for which the biometric information will be used, and how long the biometric information will be kept.

(b) Unless the individual's biometric information was needed for a specific authorized law enforcement, security, or fraud prevention purpose, an individual may,

at any time, revoke or amend the individual's consent provided under (a) of this section.

Sec. 18.14.020. Disclosure of biometric information. (a) A collector and a collector's contractor may not disclose, transfer, or distribute the biometric information of another individual, except to a contractor or to a person to authenticate the identity of the individual providing the biometric information.

(b) A disclosure, transfer, or distribution under (a) of this section may only be made for the original purpose for which the information was collected.

Sec. 18.14.030. Sale of biometric information. A person may not sell biometric information, except that a contractor may sell the contractor's business to another person and transfer the biometric information to the buyer.

Sec. 18.14.040. Alternate identification. If a person who administers an occupational examination requires an individual taking the examination to provide biometric information to the person for the purpose of identifying the individual taking the examination, the person may not require that the individual provide the biometric information if the individual provides the person with alternate identification acceptable to the person administering the occupational examination. In this section, "occupational examination" includes an examination required for admission to an institution of higher learning.

Sec. 18.14.050. Disposal. (a) When a collector no longer needs an individual's biometric information for the collector's original purpose, or if an individual requests in writing that the individual's biometric information be removed from all databases or other storage systems and be permanently destroyed, the collector and the collector's contractor, if any, shall, within 120 days and unless prohibited by other law, a regulation, or a court order, remove the individual's biometric information from all databases and storage systems and destroy the biometric information.

(b) Within 30 days after determining that the collector no longer needs an individual's biometric information for the collector's original purpose or that the individual has requested the removal and destruction, the collector shall notify the collector's contractor, if any, that the collector is to remove the individual's biometric information from all databases and storage systems and destroy the biometric

information.

Sec. 18.14.060. Use of biometric information. A collector may not use biometric information for marketing purposes or for general surveillance purposes, but a collector may use the biometric information for a specific authorized security or fraud prevention purpose in addition to the specific purpose for which the biometric information was collected.

Sec. 18.14.070. Storage of biometric information. A collector and a contractor shall store an individual's biometric information in a secure manner, which may include encryption or another appropriate method, to ensure that the identity of the individual who provided the biometric information is protected.

Sec. 18.14.080. Right of action. (a) Except as provided in (b) of this section, an individual may bring a civil action against a person who knowingly violates this chapter. A person who violates this chapter is liable to the individual for actual damages and a penalty of $5,000, except that, if the violation resulted in profit or monetary gain to the person, the penalty is $100,000. In this subsection, "knowingly" has the meaning given in AS 11.81.900.

(b) An action for damages, a penalty, or both may not be brought against the state, the agencies of the state, or the officers or employees of the state or the agencies of the state for violations of this chapter or for other claims arising under this chapter.

Sec. 18.14.085. Exemptions. (a) This chapter does not apply to the collection, retention, analysis, disclosure, or distribution of

(1) biometric information for a law enforcement purpose, including the identification of perpetrators, the investigation of crimes, the identification of missing or unidentified persons, or the identification of human remains;

(2) biometric information when authorized by state or federal law; or

(3) facial images by the Department of Administration for drivers' licenses issued under AS 28.15, for state identification cards issued under AS 18.65.310, for administering AS 28.15, or for administering AS 18.65.310.

(b) This chapter does not apply to the retention of voices recorded for quality assurance purposes.

Sec. 18.14.090. Definitions. In this chapter,

(1) "biometric data" means fingerprints, handprints, voices, facial mapping, iris images, retinal images, vein scans, hand geometry, or finger geometry;

(2) "biometric information" means biometric data that is used in a biometric system for fingerprint recognition, hand geometry recognition, finger geometry recognition, voice recognition, facial recognition, iris scans, retinal scans, or vein recognition;

(3) "biometric system" means an automated system capable of

(A) capturing biometric data from an individual's biometric information;

(B) extracting and processing the biometric data captured under (A) of this paragraph;

(C) storing the biometric data extracted under (B) of this paragraph;

(D) comparing the biometric data extracted under (B) of this paragraph with biometric data stored for the individual for use in future recognition of the individual; and

(E) determining how well the extracted and stored biometric data match when compared under (D) of this paragraph, and indicating whether an identification or verification of identity has been achieved;

(4) "collector" means a person who collects the biometric information of another individual;

(5) "contractor" means a person who contracts with a collector to store the biometric information collected by the collector, and includes a person to whom the contractor sells the contractor's business and transfers the biometric information;

(6) "facial mapping" means the use of digital technology to measure the features of an individual's face;

(7) "facial recognition" means the use of facial mapping for recognition purposes;

(8) "finger geometry recognition" means the use of the shape and dimensions of one or more fingers for recognition purposes;

(9) "fingerprint recognition" means the use of the physical structure of

an individual's fingerprint for recognition purposes;

(10) "governmental entity" means a state agency, a municipality, and an agency of a municipality; in this paragraph, "state agency" means an agency of the executive, judicial, or legislative branch of state government;

(11) "hand geometry recognition" means the use of the physical structure of an individual's hand for recognition purposes;

(12) "iris scan" means the use of an image of the physical structure of an individual's iris for recognition purposes;

(13) "person" has the meaning given in AS 01.10.060, and includes a governmental entity;

(14) "retinal scan" means the use of the pattern of blood vessels in an individual's eye for recognition purposes;

(15) "vein recognition" means the use of the veins in an individual's skin for recognition purposes.

A BILL

FOR AN ACT ENTITLED

"An Act relating to biometric information."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18 is amended by adding a new chapter to read:

Chapter 14. Biometric Information.

Sec. 18.14.010. Biometric information collection. (a) A person may not collect the biometric information of another individual unless the person first

(1) notifies the individual in a clear manner that the biometric information is being collected, the specific purpose for which the biometric information will be used, and how long the biometric information will be kept; and

(2) receives, in a written, electronic, or other form by which the consent can be documented, the individual's full consent to the collection of the biometric information, the specific purpose for which the biometric information will be used, and how long the biometric information will be kept.

(b) Unless the individual's biometric information was needed for a specific authorized law enforcement, security, or fraud prevention purpose, an individual may,

at any time, revoke or amend the individual's consent provided under (a) of this section.

Sec. 18.14.020. Disclosure of biometric information. (a) A collector and a collector's contractor may not disclose, transfer, or distribute the biometric information of another individual, except to a contractor or to a person to authenticate the identity of the individual providing the biometric information.

(b) A disclosure, transfer, or distribution under (a) of this section may only be made for the original purpose for which the information was collected.

Sec. 18.14.030. Sale of biometric information. A person may not sell biometric information, except that a contractor may sell the contractor's business to another person and transfer the biometric information to the buyer.

Sec. 18.14.040. Alternate identification. If a person who administers an occupational examination requires an individual taking the examination to provide biometric information to the person for the purpose of identifying the individual taking the examination, the person may not require that the individual provide the biometric information if the individual provides the person with alternate identification.

Sec. 18.14.050. Disposal. (a) When a collector no longer needs an individual's biometric information for the collector's original purpose, or if an individual requests in writing that the individual's biometric information be removed from all databases or other storage systems and be permanently destroyed, the collector and the collector's contractor, if any, shall, within 120 days and unless prohibited by other law, a regulation, or a court order, remove the individual's biometric information from all databases and storage systems and destroy the biometric information.

(b) Within 30 days after determining that the collector no longer needs an individual's biometric information for the collector's original purpose or that the individual has requested the removal and destruction, the collector shall notify the collector's contractor, if any, that the collector is to remove the individual's biometric information from all databases and storage systems and destroy the biometric information.

Sec. 18.14.060. Use of biometric information. A collector may not use biometric information for marketing purposes or for general surveillance purposes, but

a collector may use the biometric information for a specific authorized security or fraud prevention purpose in addition to the specific purpose for which the biometric information was collected.

Sec. 18.14.070. Storage of biometric information. A collector and a contractor shall store an individual's biometric information in a secure manner, which may include encryption or another appropriate method, to ensure that the identity of the individual who provided the biometric information is protected.

Sec. 18.14.080. Right of action. (a) Except as provided in (b) of this section, an individual may bring a civil action against a person who knowingly violates this chapter. A person who violates this chapter is liable to the individual for actual damages and a penalty of $5,000, except that, if the violation resulted in profit or monetary gain to the person, the penalty is $100,000. In this subsection, "knowingly" has the meaning given in AS 11.81.900.

(b) An action for damages, a penalty, or both may not be brought against the state, the agencies of the state, or the officers, employees, or agents of the state or the agencies of the state for violations of this chapter or for other claims arising under this chapter.

Sec. 18.14.085. Exemptions. This chapter does not apply to the collection, retention, analysis, disclosure, or distribution of

(1) biometric information for a law enforcement purpose, including the identification of perpetrators, the investigation of crimes, the identification of missing or unidentified persons, or the identification of human remains;

(2) biometric information when authorized by state or federal law;

(3) facial images by the Department of Administration for drivers' licenses issued under AS 28.15, for state identification cards issued under AS 18.65.310, for administering AS 28.15, or for administering AS 18.65.310; or

(4) facial images that are not used in a biometric system.

Sec. 18.14.090. Definitions. In this chapter,

(1) "biometric data" means fingerprints, handprints, voices, facial images, iris images, retinal images, vein scans, hand geometry, or finger geometry;

(2) "biometric information" means biometric data that is used in a

biometric system for fingerprint recognition, hand geometry recognition, finger geometry recognition, voice recognition, facial recognition, iris scans, retinal scans, or vein recognition;

(3) "biometric system" means an automated system capable of

(A) capturing biometric data from an individual's biometric information;

(B) extracting and processing the biometric data captured under (A) of this paragraph;

(C) storing the biometric data extracted under (B) of this paragraph;

(D) comparing the biometric data extracted under (B) of this paragraph with biometric data stored for the individual for use in future recognition of the individual; and

(E) determining how well the extracted and stored biometric data match when compared under (D) of this paragraph, and indicating whether an identification or verification of identity has been achieved;

(4) "collector" means a person who collects the biometric information of another individual;

(5) "contractor" means a person who contracts with a collector to store the biometric information collected by the collector, and includes a person to whom the contractor sells the contractor's business and transfers the biometric information;

(6) "facial recognition" means the use of an image of the visible physical structure of an individual's face for recognition purposes;

(7) "finger geometry recognition" means the use of the shape and dimensions of one or more fingers for recognition purposes;

(8) "fingerprint recognition" means the use of the physical structure of an individual's fingerprint for recognition purposes;

(9) "governmental entity" means a state agency, a municipality, and an agency of a municipality; in this paragraph, "state agency" means an agency of the executive, judicial, or legislative branch of state government;

(10) "hand geometry recognition" means the use of the physical

structure of an individual's hand for recognition purposes;

(11) "iris scan" means the use of an image of the physical structure of an individual's iris for recognition purposes;

(12) "person" has the meaning given in AS 01.10.060, and includes a governmental entity;

(13) "retinal scan" means the use of the pattern of blood vessels in an individual's eye for recognition purposes;

(14) "vein recognition" means the use of the veins in an individual's skin for recognition purposes.

SENATOR BILL WIELECHOWSKI

Explanation of Changes From CS, Version "B", to Work Draft, Version "D"

- **Sec 18.14.010**: This section now requires a person collecting biometric information to specify a specific purpose when acquiring documented consent to collect the information.
- **Sec 18.14.020:** This section now restricts the disclosure of biometric information to third parties, except to a person the collector has contracted with to the store the information. Additionally, the information may only be used for the original purpose of the collection.
- **Sec 18.14.030:** The sale of biometric information is prohibited, unless the storage entity is acquired by another storage entity.
- **Sec 18.14.040:** This section sets time limits on how long biometric information can be stored. Biometric information will be deleted upon request of the individual or when the original reason for the collection is no longer necessary. The section allows 30 days for the collecting entity to notify the storage entity, and 120 days for the storage entity to delete the data.
- **Sec 18.14.050:** Biometric information cannot be used for marketing or general surveillance purposes, but it may be used for fraud prevention.
- **Sec 18.14.060:** Biometric information shall be stored in a secure manner.
- **Sec 18.14.070:** The word "knowingly" has been added to page 3, line 4, to ensure the party at fault is the one responsible.
- **Sec 18.14.080:** Exemptions remain unchanged

- **Sec 18.14.090:** Definitions remain unchanged

Key Omissions

- **Alternate identification** in lieu of biometric identifier statute removed in **Sec 18.14.020**
- **Uniform Consent Form** removed, allowing separate organizations to draft different consent forms in **Sec 18.14.030**

Cindy Smith

From: Tim Pearson [tim.pearson@gci.net]
Sent: Monday, March 28, 2011 11:18 AM
To: Sen. Hollis French
Cc: Kristen Peterson; Cindy Smith; Lila Hobbs; Andy Moderow
Subject: SB 98 "An Act relating to biometric information" -- please pass out of Sen. Judiciary Committee today -- a request from a resident of Senate District M

Senator French,

As a resident of Senate District M, I ask that you pass SB 98 -- "an act relating to biometric information" out of Senate Judiciary today.
I realize that the Judiciary committee meets today at 1:30 pm.

Alaskans deeply value their privacy and this bill has broad bipartisan support.

SB 98 does not affect law enforcement and the only opponents are the data mining companies who profit from collecting the personal information of Alaskans.

Collecting biometric data is also a poor security practice. Once collected (even if by an employer for security purposes), and stolen, biometric data can not be replaced -- a person cannot get a new set of fingerprints. They will have live for the rest of their lives with the issues of a compromised identity -- always questioned, always in fear of how it might be misused.

Security experts recommend other techniques, like multifactor authentication, to establish database, computer, and building security.
(Multifactor authentication is an electronic token carried by a user that repeatedly generates a time-based number that must be appended to a password when a person logs in.)

Please pass SB 98 today so that it can come to a floor vote.

Thank you for your efforts to protect Alaskan's privacy as quickly as possible.

All the best,

Tim

Re: CS Senate Bill 98 (STA)
ACLU Statement of Support

Chair French, Vice-Chair Wielechowski:

Thank you for the opportunity to submit a written statement of support for the Senate State Affairs Committee Substitute for Senate Bill 98.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout the State of Alaska who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions.

From a constitutional rights and privacy perspective, **the ACLU of Alaska endorses protections for individuals' personal biometric information, and applauds the proactive introduction of this Bill to avoid violations of privacy before they occur**.

Need for Biometrics Legislation

Recent advances in genomics, bioinformatics and data mining are encouraging a worldwide proliferation of "gene banks" – large collections of biological samples that usually include genetic information derived from those samples, as well as linked medical, family history or lifestyle information. The use of these biological repositories for genetics research

could lead to advances in public health, such as the identification of genetic factors in diseases, or the development of diagnostic tests. ***On the other hand, they also create an avenue for privacy infringements, stigmatization and discrimination, and improper commercial exchange of personal data.***

The ACLU supports legislation to prevent privacy infringement and genetic discrimination. CS for SB 98 (STA) can advance these goals.

Protections Against Coerced Consent

Given the ability to condition the provision of necessary services on the disclosure of personal information, we are also pleased to note that the Committee Substitute for SB 98 is intended to protect against coerced "consent."

For the above reasons, the ACLU is pleased to support SB 98, and thanks Senator Wielechowski for sponsoring this legislation to protect privacy rights.

Please feel free to contact the undersigned should you require any additional information. We are happy to reply to any questions which Members of the Committee may have. Thank you again for the opportunity to share our support of this bill.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

Hi,

I am away from my desk a lot in this last week of the session so I thought I'd see if you can let me know by email what your questions/concerns with SB98 are –

Cindy Smith
Office of Senator Hollis French
(907) 465-3892
www.senate.org

April 4st, 2011

Dear Senator:

My name is Herbert Eckmann, a voter from Anchorage and very concerned citizen of this great State.

I URGE YOU to stand up for ALL Alaskans privacy. Pass a strong Biometric Privacy law this session that includes an opt-out for ALL ALASKANS who show a driver's license or passport as ID. I agree with Citizens for Privacy in Alaska; we need a privacy law that:

"makes illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,

Herbert Eckmann
A concerned Alaskan Voter
Kmal2@gci.net

April 2st, 2011

Dear Senator:

My name is Eileen Becker, Chairman of the Alaska Republican Party Region 7, and my personal view is that you should STRONGLY support biometric privacy legislation that protects ALL Alaskans from being fingerprinted for ID purposes.

I support Citizens for Privacy in Alaska in their goal below:

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,

Eileen Becker
Chairman, Alaska Republican Party, Region 7
Homer, AK
district35republican@webtv.net

April 3st, 2011

Dear Senator:

My name is Joe Dirksen, a voter, a long-time Alaskan, a member of the Alaska National Guard and, like most Alaskans, I am a strong supporter of privacy rights. My personal view is that **you should strongly support the new biometric privacy bill**... if it says that no fingerprinting of innocent Alaskans for ID should be required, as noted below:

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Will you stand up for our privacy rights?

Sincerely,

Joe Dirksen
Anchorage voter
South Anchorage, 99507
jldirksen@acsalaska.net

April 3st, 2011

Dear Senator:

Please support REAL biometric privacy legislation that would make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport.

Thank you,

Elizabeth Merrill
A Concerned Alaskan VOTER
Elizabeth_merrill@hotmail.com

(I have updated my comments on this bill)

April 4st, 2011

Dear Senator:

My name is Eileen Becker, from Homer. I support SB 98 (THE BIOMETRIC PRIVACY BILL) because too many of our rights to privacy are being sold to the highest bidder.

It is time to say NO and protect ourselves and our families. PROTECT ALL ALASKANS.

Thank you,

Eileen Becker
Owner of Peninsula Communications, Inc, privately owned radio stations here in Alaska
Mother of 5 children and 8 grandchildren

April 2st, 2011

Dear Senator:

I'm an Anchorage voter and resident named Cindy Baldwin, and I am writing to you to urge you to stand up for ALASKAN'S privacy.

As for my personal view, **I support** the new biometric privacy bill and I STRONGLY support Citizens for Privacy in Alaska's position that no fingerprinting of innocent Alaskans for ID should be required. Please don't water this one down; we all need this protection.

Sincerely,

Cindy

April 2st, 2011

Dear Senator:

As a dedicated member of Alaska's Republican Party, I would like to ask you to support the Wielechowski/Coghill "biometric privacy bill" (and its House companion bill) so long as it protects ALL Alaskan's from being forced into being fingerprinted for ID purposes.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,

Jerad McClure
Member, Alaska Republican Party
jaredlainak@gmail.com

April 2st, 2011

Dear Senator:

We vote...the data-miner's lobbyists don't. Please stand up for ALASKANS and our privacy, and **support** the new biometric privacy bill... if it says that no fingerprinting of innocent Alaskans for ID should be required.

My name is Laura Dirksen, a school teacher and resident of south Anchorage. Having taught for nearly 20 years at an Anchorage Christian school – I AGREE that our privacy laws need to be updated to *prevent* fingerprint collection "as ID."

I urge your support for protecting the biometric privacy of Alaskans. Passports and driver's licenses are sufficient identification.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,

Laura Dirksen

04/ 01/2011

Dear Senator:

My name is Dr. Frank Jeffries, Assistant Professor of Business and Public Policy at UAA.

I recently learned of a grass-roots group of Alaskan voters called the "Citizens for Privacy in Alaska" and of their courageous support for a MUCH NEEDED privacy bill. Although this is my personal view, I urge you to support it.

I strongly support a biometric privacy bill that:

"makes illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,
Dr. Frank Jeffries
Assistant Professor of Business and Public Policy
University of Alaska, Anchorage
taikodad@gci.net

04/ 01/2011

Dear Senator:

As Director of the Maserculiq Village Corporation in Marshall, Alaska – I can tell you that I am a very strong supporter of privacy. I hope you will show us that you are as well, but supporting the Biometric Privacy Bill when it comes before you.

I support real protection that:

"makes illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,
George Owletuck
Director, Maserculiq Village Corporation
Marshall, Alaska
George.owletuck@gmail.com

PS This is my personal position

March 31, 2011

Dear Senator:

My name is Eunice Trask – a long time resident (and voter) from Anchorage. I'm a member of Citizens for Privacy in Alaska, and I've heard you are standing up for Alaskans privacy against Outside dataminer-lobbyists. GOOD FOR YOU! I SUPPORT THE BIOMETRIC PRIVACY BILL and I hope you will too.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport."

Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates

We Alaskans should lead the country in standing up for privacy and in a return to dignity of the individual. Please stand up for our privacy – innocent people shouldn't be compelled to give fingerprints as ID! Isn't the right to privacy guaranteed in our State Constitution?

Sincerely,

Eunice Trask

Registered Voter...and I will
Anchorage

Dear Senator:

My name is JP Godfrey, a Management Consultant in private practice in Anchorage.

I have to say, what Citizens for Privacy in Alaska is doing is astonishing – and I strongly support them and **I strongly support this privacy bill!** Don't let the lobbyists water it down, we need REAL protection.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport."

Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates

March 31, 2011

Dear Senator:

My name is Anna von Reitz, a technology analyst, author and President of the Gas for Alaskan's Association – and I support what Citizens for Privacy in Alaska is doing.

Please stand with them on this, this issue cuts across all party lines.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport."
Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates

Sincerely,
Anna von Reitz
President, Gas for Alaskan
Big Lake, AK
avannavon@gmail.com

March 31, 2011

Dear Senator:

I'm writing to ask to you support the STRONGEST version of SB 98 **which would prevent anyone from ever collecting** or disseminating biometric data. As an Alaskan I value my privacy greatly as well as that of my clients.

The gradual degradation of our privacy over the last few years is deeply troubling to me – it is now impossible to know who has our data and what they are doing with it. But, at least one has protections using credit cards and the like – you may get dinged but you are covered. And if your email gets targeted by the advertisers, drug purveyors and sexual enhancement folks (and yes, my mother gets those too) you have recourse.

On the other hand, if our biometric information gets loose into cyberspace all hell can break loose if your prints, or mine, get used by an unscrupulous person, much less a terrorist.

Now is the time to draw the line, hard and fast. This is no time to become spineless and give into lobbyists who have many assurances of safety, but no guarantees and no accountability when this data gets loose – and you all know that it will.

Please a support meaningful, strong SB 98. The "Alternative ID" section must stay.

Thanks. Ken.

Kenneth G. Robertson

www.robertsonlaw.net

April 1st, 2011

Dear Senator:

My name is Tim Pearson, an Anchorage business professional and Co-Chairman of the Citizens for Privacy in Alaska. I urge your support for protecting the biometric privacy of Alaskans.

Please remember that unlike credit cards, stolen or lost fingerprints and biometric information cannot be replaced. Innocent Alaskans *deserve the option* of not being forced to provide their fingerprints. Passports and driver's licenses are sufficient identification.

Alaskan businesses do not want to take on the **legal liability** of losing the irreplaceable data of their employees or customers. There is no way to make people whole again.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

PLEASE stand up for our privacy -- and pass a strong Biometric Privacy law this session that includes the "Alternative ID" provision (ie. allows an opt-out for people who show a driver's license or passport as ID).

Sincerely,

Tim Pearson

President, Pearson Consulting
Graduate of Harvard University
Fmr Vice President of Human Resources, GCI

04/ 01/2011

Dear Senator:

My name is James MacKenzie, Director of the Food Bank of Alaska. I learned that you were planning to stand up for our privacy rights through a friend today, and I STRONGLY urge your support of the new Biometric Privacy Rights bill – so long as it contains REAL protection as noted below.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,

James MacKenzie
Director, Food Bank of Alaska
Anchorage, AK
mackenzie.jamesa@gmail.com

PS note that this is my personal position on this subject

Dear Senator:

I am a past President of Alaska Chapter of the Institute of Management Accountants (IMA) and have been employed in mostly accounting and/or financial positions over my work life.

From the financial side, the people who typically steal large amounts of money from businesses or non-profits are well thought of or even "Pillars of the Community" --- before the disgracing headline hits. Collecting biometric data will do nothing to reduce the amount of criminal activity within financial circles.

A passport or a driver's license is adequate identification for test taking purposes. AS A MEMBER OF THE ANCORAGE BUSINESS COMMUNITY – I URGE YOU TO SUPPORT THE NEW BIOMETRIC PRIVACY BILL.

I am also a member of Citizens for Privacy in Alaska, and we are all watching this bill closely. **"Our goal** is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport."

Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates

Thank you for your consideration.

Sincerely
Tim A. Wiepking
Anchorage, 99508
529-0766

March 31, 2011

Dear Alaska Legislators:

My name is Taylor Ridgeway. I am a strong supporter of Citizens for Privacy in Alaska, and I URGE you to stand up for Alaska's privacy rights against the data-miner's lobby! All of these oppressive encroachments are whittling away at the average Americans ability to engage in free commerce. These practices are unconstitutional...this has got to stop!

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates

Karen Demichelis, Principal
Demichelis & Associates
karen.demichelis@gmail.com
tel: 907-360-2661

Dear Senator:

March 30, 2011

As the owner and President of a small business, I **have no need for fingerprint "biometric" security systems and I never will.**

The ABSOLUTE LAST thing I would want would be to be **legally liable** for a data breach involving my employee's fingerprints! *Their privacy would be compromised for the rest of their lives* because fingerprints are like passwords that you can never change. I would be responsible for that…I can only imagine the lawsuits! **Alaskan businesses are NOT interested the risky proposition of fingerprint security systems.**

I strongly support the bi-partisan bill to protect our private biometric data (SB 98), and URGE you to pass it into law *this session* with the "Alternative ID" section intact.

We Alaskans have entrusted YOU to stand up for our privacy rights against Federal intrusion and corporate special interests…and we are all watching this bill closely.

Global data-miner ChoicePoint/LexisNexis/Reed Elsevier, has NO legitimate voice in this process, please don't even grant them a meeting. They have flown a team of east coast lobbyists to Juneau to "influence" you -- and will attempt to scare you with a bunch of nonsense because **they profit by exploiting Alaskan's loss of privacy.**

If they weren't making money off collecting and trafficking our private information, why would they be here?

Who will you stand with?

Regards,
Jason Giaimo
Anchorage Real Estate Investor, Accountant, Small business owner

March 30, 2011

Dear Senator:

As a small business owner, I write this email to you with great concern over the future of freedom in this country. Alaska has always been at the heart of cherishing individual freedom. Right now there are very wealthy forces from outside this country that are plotting to take away "our" freedom of privacy.

If you have an ounce of respect for our forefathers who died to provide us with some small degree of human dignity, I implore you to join in the battle to defend these rights. To put it bluntly, tells these foreign data-mining companies (Lexis Nexis/Reed Elsevier) to go to hell!

I am not sure if you feel it like I do, but there is revolution in the air throughout the world. You need to make a choice and decide if you are going to sell out your family's freedoms and privacy to the corporate interests, or take a stand and let freedom ring. I hope you will make the right choice.

Sincerely,

Andrew

Andrew Wilkins

Small business owner

March 29th 2011

Dear Senator Hollis French:

We are a group of Alaskan voters who strongly support the need for stronger privacy legislation.

Specifically, we are *Citizens for Privacy in Alaska, and we urge you to support and pass the new Alaskan Biometric Privacy Legislation SB-98 this session*.

All Alaskans cherish their privacy - it's even guaranteed by our State Constitution. As with opposing REAL ID, we Alaskans look to YOU, our representatives to stand up for our privacy rights against the Federal Government and corporate intrusion.

This privacy bill is supported by nearly everyone - from Libertarians to liberal Democrats, from conservative Republicans to the ACLU; from school teachers to military families, to CEOs, IT experts and oil company managers. Not surprisingly, only the lobbyists for the global data-mining firms seem to object (ChoicePoint/LexisNexis) because *this bill threatens their ability to profit from the exploitation of Alaskan's loss of privacy*.

SB-98 says essentially that biometrics (fingerprints etc) should not be required as identification when a valid driver's license or US passport is presented (this bill would not affect fingerprints taken for background checks and it would not affect law enforcement in any way).

As you may know, NY Senator Chuck Schumer and SC Senator Lindsey Graham have proposed as "the cornerstone" of their immigration Reform a Federal Government plan to **FINGERPRINT ALL AMERICANS** under a new biometric National (work) ID Card program. A city in Arizona is right now considering mandating all customers of the local pharmacy be fingerprinted in order to pick up their prescriptions...those who object will be *denied their medicine*. With this rapidly deteriorating national privacy climate, Alaskans urgently need strong biometric privacy legislation now.

As you know, there are *very few issues* on which Alaskans from across the political spectrum agree. *The urgent need to protect our privacy* from constant and increasing Federal Government and corporate intrusion is one of them. Please do all you can to support the Biometric Privacy bill and pass it into law this session.

Signed,

Citizens for Privacy in Alaska

PROMETRIC

April 4, 2011

The Honorable Hollis French
Chairman
Senate Judiciary Committee
Alaska State Senate

Re: Alaska SB 0098A

Dear Chairman French:

I am writing to present information regarding the use of biometrics as a test security measure. Attached to this letter is a fact sheet which provides relevant data regarding biometrics as implemented by Prometric on behalf of its testing clients.

Prometric is the largest provider of integrated testing services in the world. Prometric's test administration services include the development of test content, the administration of tests via test center based services, internet based testing services, and paper based testing services and test result and data management services. Prometric administers over 9 million tests per year.

As the leading global provider of test services, Prometric, in concert with its clients, is responsible for the security and integrity of testing services. This includes protecting the content of the examinations which we administer and to make certain that testing and evaluation of candidates is valid and fair.

Why Biometrics

There are numerous methods by which individuals can threaten the integrity of the testing process. One such method involves the impersonation of a test taker or candidate by another individual. There are at least three reasons why such impersonation or proxy testing occurs. The first is the simple substitution of one person for a real candidate for the purpose of providing that candidate an advantage. This is usually distinguished by two individuals conspiring without necessarily a profit motive as in a friend or relative substitutes to obtain a higher score.

The second reason for proxy testing is a variant of the first, however, in this case the motivation is a professional test taker who takes tests for any individual willing to pay the price.

The third reason for proxy testing is by a professional test taker for the purpose of stealing test content. The content is then used to provide gray market study materials or to provide real content for the purpose of memorization.

In each case the public is harmed because candidates without valid criteria are permitted to practice a profession, exercise a certification, enter an institution of higher education, or display a credential that they are not entitled to and did not earn.

Examples

Prometric tracks many security statistics across a wide variety of misconduct. For a nine month period in 2010 ending in September, Prometric undertook 329 proxy testing investigations.

There have been significant and high profile proxy testing cases over the last several years involving Prometric and its clients in which proxy testing was an issue. In each case cited below, the incidents are documented, however, Prometric's internal privacy protection policies prohibit identifying the individuals or the programs.

a. The first example, which was one of the factors involved in Prometric looking at implementing a biometric solution world wide, involved a massive proxy testing scheme involving 600 candidates in 10 US states. The client is a large testing organization which provides its own examinations and which acts as an aggregator providing testing for other organizations. The examinations were major large volume exams for admission to US educational institutions. In the summer of 2004 Prometric assisted this client along with law enforcement in investigating the matter. We discovered during the course of the investigation that the following activities were occurring:

- Chinese examinees were paying $3000.00 each to the conspirators for professional test takers to take one of the three academic tests involved.
- The professional test takers were armed with high quality forged identification documentation including passports so that the documentation presented would pass any test center scrutiny of the credentials.
- Analysis of credit card data and digital photos after the fact demonstrated that the 600 tests were in fact taken by a small number of professional test takers and that candidate fees were paid using a small pool of credit cards.
- The ring had been operating for at least 3 years, was discovered through a tip to the client, and required more than 600 schools and individuals to be notified the scores were obtained fraudulently.

b. In 2007 and 2008, Prometric assisted a large medical client in investigating a ring of individuals who were using false candidate profiles to capture exam content. In this case the individuals obtained seemingly legitimate credentials from a school which credentials were used by the client to create test eligibility files. This ring of professional test takers then took examinations in at least two US states and 3 foreign countries in order to capture content on behalf of a test preparation company. Our belief is that this was a small group of professional test takers, registering under a number of different identities, and having appropriate forged ID documents. Prometric and the client identified at least 8 different individuals that may have been part of the ring through credit card usage. Our strong belief is that had the client been using biometrics, an earlier flag would have been thrown that showed a suspicious pattern of test taking resulting in prevention of the ring from accessing future tests and attempting to capture content.

c. In 2009, through a tip from a Prometric employee, Prometric discovered a professional test taker who was taking entry level work safety examinations on behalf of an immigrant community in the UK. In this case, Prometric operates a number of mobile test vehicles, essentially complete

www.prometric.com

test centers in the back of tractor trailers in the UK. The client was not using biometrics although the technology was available for use. In at least 10 cases, the professional test taker arrived in place of the real candidate, using a different mobile location each time and with false identification documents that passed inspection by the test center administrators. Prometric caught the professional test taker because the individual attempted to employ a Prometric employee in the scam to avoid having to travel to numerous locations. Had the professional test taker simply continued to travel to multiple locations and use false identification, we might not have caught the individual as quickly. Had biometrics been used with this client, we would have caught the individual on the second attempt.

d. In October 2010, Prometric performed a surprise audit at a test center in India and discovered that individuals were present at the site and sitting US academic entry examinations on behalf of other individuals. While an investigation is still ongoing, we were by virtue of examination of the records able to determine that proxy testing was occurring. This involved a number of candidates present at the site although an exact count is not available until completion of the investigation.

e. In 2008 Prometric caught two sisters impersonating each other for the purpose of taking a higher education entrance examination for a health profession. The sisters were similar enough in appearance that average scrutiny of real US state drivers licenses did not reveal the false identity. In this case one sister traveled across the border from New York to Canada in an attempt to impersonate the other and obtain higher scores on her behalf. We were able to identify the impersonation because biometrics was in operation for this program in both New York and Canada.

f. In 2010, based on a tip through a security hotline, Prometric was made aware that a candidate for an association certification exam claimed that another individual associated with the test center, had taken the exam on her behalf. Prometric and the client began an investigation and based on a review of exam performance determined that the point gain from first attempt to second attempt indicated that someone did take the exam as a proxy for the candidate. The test center was located in Ontario Canada and we terminated the center's contract with Prometric over the issue and the client will discipline the candidate.

Use of Government Identification

In most if not all of these cases, Prometric has determined that government quality false identification documents were used by the proxy testers. In the first example this occurred at least 600 times. This is a large problem in the testing industry. A casual review of the internet, without any attempt to do more than a brief search, reveals at least 15 websites offering false ID documents. Most of these sites offer US and Canadian identity documents. The use of a website to acquire fake ID is not uncommon and computer technology enables sophisticated IDs difficult to detect for the average person. The criminal test takers in the case of the Chinese students likely had access to professional criminals capable of producing identification documents that are not discernible from real ID documents by anyone other than a professional. While Prometric and clients are working on technology that will enable better detection of false identity documents, biometrics is an equally effective and safe means of combating test fraud.

What is clear for each of the examples set out above is that biometrics would have stopped each of these incidents within 2 or 3 tests at the most. The trend we believe is toward greater use of biometrics as a fraud deterrent.

Websites offering false identification documents: (Note: the safety of any of these sites has not been verified. Prometric suggests that only an IT professional verify the site.)

Use of Biometrics by Prometric

Prometric's biometric program is characterized by integrity, security, and adherence to privacy principles. The attached fact sheet contains additional information regarding our program, but I highlight here our adherence to strict privacy obligations.

1. Biometrics is used only to ensure the integrity of testing programs. Prometric does not and will not sell biometric information and we adhere to the highest standards of data privacy. Prometric uses the services of LexisNexis for processing the biometric data. Our contract with LexisNexis requires that the data be used solely for the detection of fraud and protecting the integrity of testing programs. LexisNexis is prohibited from any use of the biometric and demographic data except as permitted by Prometric in writing.

2. The biometric data and demographic data is securely stored and protected with stringent security measures. The data is segregated from all other LexisNexis data and LexisNexis programs. Prometric and LexisNexis meet or exceed current industry best practices for computer system and data center protections. Prometric regularly audits LexisNexis compliance and clients have also audited them.

3. Prometric collects only the information necessary to implement a test integrity program. All data is deleted within a reasonable time after the reason for collection is fulfilled. Prometric does not retain biometric data beyond such period of time as is necessary to fulfill the underlying program integrity needs.

4. Prometric adheres to the US Department of Commerce Safe Harbor regime for meeting strict European Union data protection requirements. Prometric and its clients routinely manage consent rules and varied data privacy requirements.

I trust that this information is of assistance in your consideration of a bill regulating biometric practices. Should you have additional questions, feel free to contact me per the below contact information.

Sincerely,

Anthony R. Scicchitano

Identity Management – Biometric Check-in Fact Sheet

Advantages to Testing Sponsors and Test Takers:

- ID management and biometrics verify test taker information at the time of check-in, during breaks, and when returning to test at a later date. These procedures attempt to deter proxy testing, cheating and collaboration by test takers and testing proctors.
    - Example: In 2008 two sisters testing for a medical exam, attempted to test for one another. The first sister took the exam at a testing center in the United States and passed. Several months later the same sister crossed the country border into Canada and presented the ID of her sister attempting to test for the same exam under her sister's name. Although she had presented a new ID, her fingerprints matched that of her real ID. This was enough evidence to use for investigative purposes and identify this as a true proxy testing incident.
- Biometrics:
    - Electronically and accurately captures test taker information from government-issued photo ID documents, and recognizes if a test taker has enrolled and tested with Prometric previously
    - Protects the value of the credentialing program; credentials facilitate public trust, help support the economy, and enable individuals to contribute to society
    - Protects intellectual property
    - Deters proxy testing
    - Provides an enhanced method of identity verification to validate ID and fingerprint data has not been previously presented under a different name
    - Increases test takers perception of security and increases deterrence of cheating
    - Improves overall testing experience, specifically for return test takers
    - Keeps the test taker's data secure
    - Stringent security barriers build respect for credentials among peers and in marketplace

Prometric's Implementation Methods:

- Biometric check-in is combined with several other standard security procedures in Prometric Test Centers worldwide including, digital video recording (DVR) monitoring, and protocol that prevents test taker's to bring items into the testing room during the examination.
- Biometric Consent Tool – a consent form is presented to the test taker during the scheduling and registration process asking the test taker to agree to the use of biometrics during check-in.
    - Dependent upon the location of the testing center and the laws within that country, the test taker will be presented with the appropriate consent form. There is a form for each of the following possible scenarios: fingerprinting is prohibited, the country has no laws against the use of fingerprints, consent is required, or consent is implied.
    - This feature acts as a means of preparing the test taker, prior to arriving at the test center, for what to expect during the biometric check-in process. This is expected to further minimize anything unexpected on the part of the test taker.
- Prometric works with each testing sponsor/organization to include information regarding biometric check-in within the sponsors test taker materials, including the sponsor's website and candidate bulletins.

URGENT FAX; April 7, 2011

WE DEMAND REAL BIOMETRIC PRIVACY PROTECTION FOR ALL ALASKANS

Dear Senator:

My name is Horst Poepperl, CEO of Borealis Broadband Inc. I've already sent several emails in support of SB-98, but as I understand it, the current version has been watered down significantly with exemptions.

First of all, I do want to say that I appreciate and am grateful for those senators and representatives who have already taken a public stand for personal privacy, like our founding fathers intended. Especially those of you who have taken the time to respond to my emails personally. You have my heartfelt gratitude and support. The rest of this email might be informational for you but otherwise redundant.

For the rest of you:

How utterly disappointing and what a dangerous game to play with our personal information.

I would like to go on record AGAIN as OPPOSING the watering down of this privacy legislation and SUPPORTING strong privacy protections. If it continues as is, then you are making a very serious mistake regarding the privacy of your fellow Alaskans. It is much more prudent to pass strong privacy legislation and, if necessary, loosen it up on a case-by-case basis later. Doing the reverse and tightening up the legislation later is completely useless - your fellow Alaskans will already have their biometrics floating around cyberspace waiting to be sold to whomever...or lost to hackers.

In February of 2010 it was revealed that Israel had stolen biometric information from the passports of visitors to the country. Innocent and unsuspecting citizens of many countries were affected when the Mossad used their biometric information to fake passports and commit an assassination. http://www.timesonline.co.uk/tol/news/world/middle_east/article7029553.ece

Go ahead and take some time to read the article and see how that affected those people. Some of these people had to literally hide in their houses for a while and could no longer travel to entire parts of the world until the deception had been made public. Even today, they have to look over their shoulders for the rest of their lives in case some extremist didn't get the memo.

Yes, it's an extreme example, but the point is, IT'S ALREADY HAPPENED. More than once. It's hard to think of an even more egregious use of stolen personal data, but I'm sure someone will figure out how to top that one at some point in the future.

Maybe next time, they'll just buy the information like everyone else and crank out fake passports to their hearts' content. Maybe they'll buy it from Choicepoint. Maybe that technique will become all the rage for other countries, hackers or criminals. Maybe some Alaskans' biometric data will be used because you didn't take the privacy issue seriously.

In my personal opinion, and saying this with all due respect, you DO NOT need to entertain Choicepoint or any data mining company. To me, the very idea that you would seriously entertain the wants of a foreign (or domestic) company of data snitches is just putrageous. What the hell for? Why give even one iota of leeway to a company that makes its money ratting out your personal information to the highest bidder? A new market for them, at our expense?

As far as other companies are concerned, you need to ask yourself; "what did they do before fingerprint readers were introduced commercially?" Suddenly we should believe that fingerprints are critical for their security procedures? Really? Fingerprint readers aren't even in widespread use yet as the consumer version of that technology has not yet fully matured. I think they just want to keep the door open and that's not nearly a good enough reason to sacrifice more of my privacy.

As a career professional in the IT industry for the past 27 years, it just boggles my mind that we would even consider releasing more privacy information in light of all the historical abuse already. To me, with what I've seen, experienced and know about this issue, it is just mind-numbingly dumb to even contemplate releasing additional information into this cesspool that the data-miners and other companies have created. Much less something as personal and unchangeable as fingerprints.

In the words of one of my buddies from my military days, "That can't get nuttin' but ugly." He said that every time he was looking at a problem that had no upside. Allowing the release of fingerprint biometrics has no upside. Period. Even for the National Security argument; no nation has ever been made more secure by ratting out its citizens.

Or maybe you need a reminder of how often data is stolen or lost:

http://www.privacyrights.org/data-breach/new That link will take you to a site that lists data breaches in chronological order. Be prepared for a long list.

I've already been notified that various pieces of my personal data were lost or stolen four times in the space of just six years. Once even by the Veteran's Administration, who, incidentally, probably has my fingerprints. Where is my compensation for creating all that work, stress and hassle for me for something that didn't have to be? I saw plenty of finger pointing but no one taking responsibility.

That's my skin in this game. I'm not at all interested in having you expose me to even more abuse and I will strongly resent it if you do. If a person wants to willingly give up their biometrics, then fine, let them. But never, ever, create or allow the conditions that FORCE us to.

I urge you to strengthen the privacy legislation as tight as you possibly can AND PROTECT ALL ALASKANS WITH IT. Making it airtight with the commitment to review on a case-by-case basis in the future would be acceptable for now. You will never go wrong with protecting our privacy and passing strong privacy legislation is the lowest risk path to take, not to mention the right thing to do by any measuring stick, no matter how much the lobbyists try to muddy the water for you. But you will most definitely screw up badly if you allow the release of our biometrics and force Alaskans to give up their fingerprints with weak legislation. You won't be able to correct that mistake later - once the data is out, it's out.

Best regards,

Horst Poepperl
CEO

April 7st, 2011

Dear Senator:

My name is Ted McMillan, a resident of Anchorage. I fully support NOT fingerprinting innocent Alaskans-for-ID, as described in the "Our goal" statement below.

Privacy rights are a basic freedom of every law abiding citizen. There's just some things you shouldn't do… involuntarily tracking law abiding citizens is one of them.

Having a company lobby to protect its revenue stream is almost immoral.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,
Ted McMillan

PREMERA | BLUE CROSS BLUE SHIELD OF ALASKA

Senator Hollis French
Alaska State Legislature
State Capitol Room 417
Juneau, AK 99801-1182

Jack C. McRae
Senior Vice President

RE: CSSB 98 Biometric information

Dear Senator French:

I am writing on behalf of Premera Blue Cross Blue Shield of Alaska to express concern about CSSB98(STA), " an Act relating to biometric information."

Under proposed new Section 1, new Sec. 18.14.090 Definitions, "biometric data" includes "voices" and "biometric system" means "an automated system capable of capturing biometric data from an individual's biometric information...storing the biometric data extracted... and comparing the biometric data extracted...with biometric data stored for the individual for use in future recognition of the individual..."

Proposed new section Sec 18.14.060 Exemptions sets forth exemptions to the collection, retention, analysis, disclosure or distribution of biometric information, but there is no exemption for quality control purposes.

Premera, as well as many other organizations, records telephone calls in our Customer Service department strictly for quality assurance purposes in order to provide quality and valued service to our customers.

We do not believe that regulating the recording of voices for this purpose is intended by this legislation and suggest that a related exemption be included in the legislation for clarity. Therefore, we request that the following language be added to CSSB98 (STA) to Section 1. Chapter 14 Biometric Information, under Sec. 18.14.060 Exemptions on page 2 after line 25: "(5) voices when used for quality assurance purposes."

Thank you for your consideration of this request. Please let me know if you have questions or would like to discuss this matter further.

Sincerely,

Jack C. McRae

Honorable Hollis S. French II
Chair, Senate Judiciary Committee
State Capitol, Room 205
Juneau, AK 99801-1182

RE: SB 98

Dear Senator French:

On behalf of BIO-key International, I write to respectfully oppose SB 98, which would require prior written consent for the use of biometric technology in identity applications, and force any person, government agency, or business wishing to use a biometric as part of their business process to accept a photo ID as an valid alternative to doing so. In short, a photo ID check does not provide the same anti-fraud benefits as a biometric does, and is not an equivalent substitute. It does not address the problems of "identity theft with cooperation" and "one person having multiple identities" (aliases), which are central to so many identity theft and fraud scenarios, and can only be detected and prevented using biometrics.

BIO-key International develops and delivers advanced identification solutions to commercial and government enterprises who otherwise struggle with managing identity. Our finger identification technology accurately identifies and authenticates users, patients and customers in some of the world's largest identification deployments to improve security, guarantee identity, and help prevent identity theft. In fact, in part as a response to the FBI's misidentification problems such as those cited by Senator Wielechowski, our technology has been added to the FBI's recently deployed Next Generation Identification System, significantly improving the accuracy of that system.

It is noteworthy that the driver of the bus involved in the gruesome accident in New York City, killing 15 passengers, had his license suspended under several aliases, but was never detected, because the names didn't match. He was employed because his current photo ID driving record was clean. See http://www.nbcnewyork.com/news/local/Crash-Driver-Used-Alias-118194134.html. Without biometrics, how can a business needing to know who it is dealing with stop a person from either shedding their existing ID to assume a new one, or, as is the case in the exam fraud that the IACPA seeks to prevent, sharing it with a paid proxy to go take the exam for them?

Additionally, many commercial applications of biometrics are for safety, not just security - to automate the process of positive ID, without requiring an individual to carry an identification card. Hospitals, Blood Centers, and other beneficial entities rely on BIO-key to make a positive identification of their patients and donors in order to properly associate that person with their medical history, or to prevent prescription or medical ID fraud. In many of these cases, a misidentification can have deadly

consequences, as with the case of a blood transfusion to the wrong patient, or misidentification of surgery patient. A photo ID check only validates the name of a person, and does not ensure that it is the same individual, even if the name matches.

A search of the Houston (TX) County Hospital records found that they had 2500 or more "Maria Garcia's" in their records, and found that there had been three in the hospital at the same time! Biometrics are introduced to automate the positive ID of an individual, not just confirm that they have a particular name.

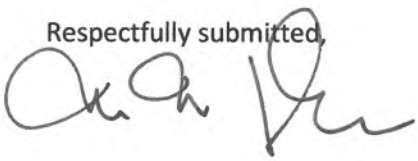
SB 98 assumes that the goal of a biometric system is simply to ensure that someone is matching the name that they say they are, and correctly envisions that a photo ID check is sufficient to achieve that goal. However, because there are so many people with the same name, and because people move over time, this is not a sufficient means to assure a consistent identity of a single individual over time. Even the government, with its immense access to information on individuals, uses biometrics in public assistance programs to prevent double dipping on benefits, and in law enforcement, because they recognize the failures of photo ID checks to determine if someone is a first time applicant for assistance or has a past criminal record that they might want to hide. Businesses struggle with the same issues, with much less access to data, as part of trying to prevent fraud and identity theft. Don't private entities have the right to know who they are trusting or doing business with, and to know that the Alaska laws support their using proven tools to assure the identity of those people?

Protecting individual privacy is important, but in the case of biometrics, the majority of people actually prefer the convenience and ID-Theft resistance of biometrics. Twice a year, Unisys Corporation commissions a recurring, statistical measure of consumer concern about four areas of security: national, financial, Internet and personal safety. The Unisys Security Index tracks trends in consumer perception of pressing security issues. Their objective findings inform the conversation about personal security and the use of biometrics.

The most recent Security Index was issued in October 2010 and can be downloaded in its entirety from http://www.unisyssecurityindex.com/. The study found that Americans are seriously concerned about identity theft and bankcard fraud. A 2009 study focused on biometrics for personal identification. It found that 73% of Americans are willing to use fingerprint identification to verify their identity with banks, government agencies and other organizations to prevent fraudulent misuse of their personal information.

I ask that full consideration be given to the many beneficial uses of biometric technology, and not focus on a small area of potential abuse in order to cut off this valuable and cost-saving means to prevent fraud and assure identity. Please vote no on SB 98.

Respectfully submitted,



Michael W. DePasquale

Allaire Corporate Center • 3349 Highway 138 • Building D • Suite B • Wall, NJ 07719
Telephone (732) 359-1100 Facsimile (732) 359-1101

March 29th 2011

Dear Senator Hollis French:

We are a group of Alaskan voters who strongly support the need for stronger privacy legislation.

Specifically, we are *Citizens for Privacy in Alaska, and we urge you to support and pass the new Alaskan Biometric Privacy Legislation SB-98 this session.*

All Alaskans cherish their privacy - it's even guaranteed by our State Constitution. As with opposing REAL ID, we Alaskans look to YOU, our representatives to stand up for our privacy rights against the Federal Government and corporate intrusion.

This privacy bill is supported by nearly everyone - from Libertarians to liberal Democrats, from conservative Republicans to the ACLU; from school teachers to military families, to CEOs, IT experts and oil company managers. Not surprisingly, only the lobbyists for the global data-mining firms seem to object (ChoicePoint/LexisNexis) because *this bill threatens their ability to profit from the exploitation of Alaskan's loss of privacy*.

SB-98 says essentially that biometrics (fingerprints etc) should not be required as identification when a valid driver's license or US passport is presented (this bill would not affect fingerprints taken for background checks and it would not affect law enforcement in any way).

As you may know, NY Senator Chuck Schumer and SC Senator Lindsey Graham have proposed as "the cornerstone" of their Immigration Reform a Federal Government plan to **FINGERPRINT ALL AMERICANS** under a new biometric National (work) ID Card program. A city in Arizona is right now considering mandating all customers of the local pharmacy be fingerprinted in order to pick up their prescriptions...those who object will be *denied their medicine*. With this rapidly deteriorating national privacy climate, Alaskans urgently need strong biometric privacy legislation now.

As you know, there are *very few issues* on which Alaskans from across the political spectrum agree. *The urgent need to protect our privacy* from constant and increasing Federal Government and corporate intrusion is one of them. Please do all you can to support the Biometric Privacy bill and pass it into law this session.

Signed,

Citizens for Privacy in Alaska

Co-chair: Tim Pearson – business owner

Co-chair: Jason Giaimo, business owner

Gretchen Guess: Alaskan voter, former Senator

Horst Poepperl: CEO and IT data privacy expert, Borealis Broadband Corporation

Mark Lerner: President, Stop REAL ID National Coalition

Jason Dowell: Libertarian Party Alaska, member

Cindy Miller: Former CFO of Unocal Alaska

Joe Dirksen: Resident, Alaska, Alaskan Voter, military family

Eunice Trask: Alaskan voter

Laura Dirksen: 20 year teacher at an Anchorage Christian School. Alaskan Voter

Barbara Brown: Alaskan Voter

Dan Boland: State of Alaska, Audit Division, Alaskan Voter

Arzu Smith: CPA candidate

Tom Gill: UAA, formerly with BP, Alaskan Voter

Tim Wiepking: Institute of Management Accountants, former President, Alaskan Voter

George Ascott: Alaska resident, Alaskan Voter

Ralph Taylor: Taylor Consultants, President

Allan Johnston: Wedbush Morgan Securities, Alaskan Voter

Angela Gill: Alaskan Voter, medical professional

Andrew Blackman, CPA: Partner with Shapiro Lobel LLP

Karen Demichelis: President, Accountant, Demichelis & Associates, Alaskan Voter

Tyler Arnold: TylerSystems Inc. CEO, Alaskan Voter

Joel Smith: Former President of the Institute of Management Accountants, SF chapter

Tim Pearson: Pearson Consulting, Alaskan Voter

Jason Giaimo: Net Gain Business Consultants of Alaska, Alaskan Voter

Jack-Taylor Ridgeway: Privacy Rights supporter, advocate

Patrick Lorenz: Management, Analyst, British Petroleum, Alaskan Voter

Dianne Kelly: CPA, State of New Jersey

Chuck Kaucic: Alaskan voter, Wasilla

Chris Brownwell: Resident, Alaska, noted author, Alaskan Voter, military family

Hetal Giaimo: Alaskan Voter

Dawn Brownwell: Alaska Voter, military family

Kelly Mazzei: Alaskan Voter

Andrew Wilkins: IT expert at a large national bank.

Bruce Sollenberger: Alaskan Voters

Wendi Sollenberger: Alaskan Voters

Jeffrey Mittman: Executive Director, ACLU - Alaska

...this is only a partial list of voters and supporters who are watching this bill

ALASKA SENATE and ALASKA HOUSE SUPPORT INCLUDES:

Bill sponsor: Senator Bill Wielechowski

Co-sponsor: Senator Coghill

Co-sponsor : Senator Kevin Meyer

Co-sponsor: Senator Johnny Ellis

Will be a bill sponsor or co-sponsor: **Representative Berta Gardner**

Co-sponsor: Representative Allan Dick

Co-sponsor: Representative Wes Keller

Does not oppose: Whitney Brewster Alaska State Director, Division of Motor Vehicles

Does not oppose: Alaska Department of Health and Social Services

Reviewed SB190 (previous version of SB-98): previous Alaska Attorney General

Supported SB190 (previous version of SB-98) in committee: Senator Kookesh

Supported SB190 (previous version of SB-98) in committee: Senator Egan

Supported SB190 (previous version of SB-98) in committee: Senator French

Supported SB190 (previous version of SB-98) in committee: Senator McGuire

Supported SB190 (previous version of SB-98) in committee: Senator Paskvan

Co-sponsoring SB-98: Senator Cathy Giessel

Co-sponsoring SB-98: Senator Linda Menard

Will co-sponsor: Representative Tammie Wilson

Will co-sponsor: Representative Chris Tuck

Will co-sponsor: Representative Sharon Cissna

Will co-sponsor "very probably" Representative Mark Neuman

FAX

April 13, 2011

Dear Senator French:

My name is Tyler Arnold, Founder and CEO of **TylerSystems, Inc**. a rapidly growing global technology firm based in Anchorage. I urge your support for protecting the biometric privacy of Alaskans. I am also a member of Citizens for Privacy in Alaska, and we are watching this bill closely.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport."

Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates

PLEASE stand up for our privacy -- and support this bill.

Tyler Arnold
CEO, TylerSystems, Inc.
227-9541
tyler@tylersystems.com

April 13, 2011

Dear Senator French:

I am writing in support of protecting biometric data. I am a past President of Alaska Chapter of the Institute of Management Accountants (IMA) and have been employed in mostly accounting and/or financial positions over my work life.

From the financial side, the people who typically steal large amounts of money from businesses or non-profits are well thought of or even "Pillars of the Community" --- before the disgracing headline hits.

Collecting biometric data will do nothing to reduce the amount of criminal activity within financial circles.

A passport or a driver's license is adequate identification for test taking purposes. SUPPORT THE NEW BIOMETRIC PRIVACY BILL

Thank you for your consideration.

Sincerely
Tim A. Wiepking
Anchorage, 99508
529-0766

04/ 13/2011

Dear Senator French:

My name is Dr. Frank Jeffries, an Assistant Professor of Business and Public Policy at a major educational institution in Alaska. This is my personal view.

I recently learned of a grass-roots group of Alaskan voters called the "Citizens for Privacy in Alaska" and of their courageous support for a MUCH NEEDED privacy bill. Although this is my personal view, I urge you to support it.

I strongly support a biometric privacy bill that:

"makes illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,
Dr. Frank Jeffries
Assistant Professor of Business and Public Policy
Anchorage
taikodad@gci.net

April 13st, 2011

Senator French:

My name is Kathryn Eckmann, a voter and very concerned citizen of this great State.

Stand up for ALL Alaskans privacy! Pass a strong Biometric Privacy law this session that protects ALL Alaskans...not just a select few. I agree with Citizens for Privacy in Alaska; we need a privacy law that:

"makes illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,

Kathryn

Kathryn Eckmann
A concerned Alaskan Voter

FAX

Dear Senator French:

My name is Kelly Mazzei, from Anchorage. I strongly support the Biometric Privacy Bill, and I hope that you will also. Alaskans are at risk and we need this to pass this session!

I support and agree with Citizens for Privacy in Alaska that we need to:

"make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

Sincerely,

Kelly Mazzei
Anchorage Voter
kamazzei@gmail.com

April 13st, 2011

Dear Senator French:

My name is Eileen Becker, from Homer. I support SB 98 (THE BIOMETRIC PRIVACY BILL) because too many of our rights to privacy are being sold to the highest bidder.

It is time to say NO and protect ourselves and our families. PROTECT ALL ALASKANS.

Thank you,

Eileen Becker
Owner of Peninsula Communications, Inc, privately owned radio stations here in Alaska
Mother of 5 children and 8 grandchildren
Alaska resident since 1973
DISTRICT35REPUBLICAN@WEBTV.NET
ALASKAN VOTER, REPUBLICAN PARTY

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

April 13st, 2011

Dear Senator French:

My name is Tim Pearson, an Anchorage business professional and Co-Chairman of the Citizens for Privacy in Alaska. I urge your support for protecting the biometric privacy of Alaskans, PLEASE PASS SOMETHING THIS SESSION!

Please remember that unlike credit cards, stolen or lost fingerprints and biometric information cannot be replaced. Innocent Alaskans *deserve the option* of not being forced to provide their fingerprints. Passports and driver's licenses are sufficient identification.

Alaskan businesses do not want to take on the **legal liability** of losing the irreplaceable data of their employees or customers. There is no way to make people whole again.

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport." Note that criminal background checks or law enforcement will not be affected by this legislation. This is specifically focused on biometrics-as-ID mandates.

PLEASE stand up for our privacy -- and pass a strong Biometric Privacy law this session that includes the "Alternative ID" provision (ie. allows an opt-out for people who show a driver's license or passport as ID).

Sincerely,

Tim Pearson

URGENT FAX; April 13, 2011

PASS BIOMETRIC PRIVACY PROTECTION FOR ALL ALASKANS THIS SESSION!

Dear Senator French:

My name is Horst Poepperl, CEO of Borealis Broadband Inc. I've already sent several emails in support of SB-98, but as I understand it, the current version has been watered down significantly with exemptions.

First of all, I do want to say that I appreciate and am grateful for those senators and representatives who have already taken a public stand for personal privacy, like our founding fathers intended. Especially those of you who have taken the time to respond to my emails personally. You have my heartfelt gratitude and support. The rest of this email might be informational for you but otherwise redundant.

For the rest of you:

How utterly disappointing and what a dangerous game to play with our personal information.

I would like to go on record AGAIN as OPPOSING the watering down of this privacy legislation and SUPPORTING strong privacy protections. If it continues as is, then you are making a very serious mistake regarding the privacy of your fellow Alaskans. It is much more prudent to pass strong privacy legislation and, if necessary, loosen it up on a case-by-case basis later. Doing the reverse and tightening up the legislation later is completely useless - your fellow Alaskans will already have their biometrics floating around cyberspace waiting to be sold to whomever...or lost to hackers.

In February of 2010 it was revealed that Israel had stolen biometric information from the passports of visitors to the country. Innocent and unsuspecting citizens of many countries were affected when the Mossad used their biometric information to fake passports and commit an assassination. http://www.timesonline.co.uk/tol/news/world/middle_east/article7029553.ece

Go ahead and take some time to read the article and see how that affected those people. Some of these people had to literally hide in their houses for a while and could no longer travel to entire parts of the world until the deception had been made public. Even today, they have to look over their shoulders for the rest of their lives in case some extremist didn't get the memo.

Yes, it's an extreme example, but the point is, IT'S ALREADY HAPPENED. More than once. It's hard to think of an even more egregious use of stolen personal data, but I'm sure someone will figure out how to top that one at some point in the future.

Maybe next time, they'll just buy the information like everyone else and crank out fake passports to their hearts' content. Maybe they'll buy it from Choicepoint. Maybe that technique will become all the rage for other countries, hackers or criminals. Maybe some Alaskans' biometric data will be used because you didn't take the privacy issue seriously.

In my personal opinion, and saying this with all due respect, you DO NOT need to entertain Choicepoint or any data mining company. To me, the very idea that you would seriously entertain the wants of a foreign (or domestic) company of data snitches is just putrageous. What the hell for? Why give even one iota of leeway to a company that makes its money ratting out your personal information to the highest bidder? A new market for them, at our expense?

As far as other companies are concerned, you need to ask yourself; "what did they do before fingerprint readers were introduced commercially?" Suddenly we should believe that fingerprints are critical for their security procedures? Really? Fingerprint readers aren't even in widespread use yet as the consumer version of that technology has not yet fully matured. I think they just want to keep the door open and that's not nearly a good enough reason to sacrifice more of my privacy.

As a career professional in the IT industry for the past 27 years, it just boggles my mind that we would even consider releasing more privacy information in light of all the historical abuse already. To me, with what I've seen, experienced and know about this issue, it is just mind-numbingly dumb to even contemplate releasing additional information into this cesspool that the data-miners and other companies have created. Much less something as personal and unchangeable as fingerprints.

In the words of one of my buddies from my military days, "That can't get nuttin' but ugly." He said that every time he was looking at a problem that had no upside. Allowing the release of fingerprint biometrics has no upside. Period. Even for the National Security argument; no nation has ever been made more secure by ratting out its citizens.

Or maybe you need a reminder of how often data is stolen or lost:

http://www.privacyrights.org/data-breach/new That link will take you to a site that lists data breaches in chronological order. Be prepared for a long list.

I've already been notified that various pieces of my personal data were lost or stolen four times in the space of just six years. Once even by the Veteran's Administration, who, incidentally, probably has my fingerprints. Where is my compensation for creating all that work, stress and hassle for me for something that didn't have to be? I saw plenty of finger pointing but no one taking responsibility.

That's my skin in this game. I'm not at all interested in having you expose me to even more abuse and I will strongly resent it if you do. If a person wants to willingly give up their biometrics, then fine, let them. But never, ever, create or allow the conditions that FORCE us to.

I urge you to strengthen the privacy legislation as tight as you possibly can AND PROTECT ALL ALASKANS WITH IT. Making it airtight with the commitment to review on a case-by-case basis in the future would be acceptable for now. You will never go wrong with protecting our privacy and passing strong privacy legislation is the lowest risk path to take, not to mention the right thing to do by any measuring stick, no matter how much the lobbyists try to muddy the water for you. But you will most definitely screw up badly if you allow the release of our biometrics and force Alaskans to give up their fingerprints with weak legislation. You won't be able to correct that mistake later - once the data is out, it's out.

Best regards,

Horst Poepperl
CEO
Borealis Broadband, Inc.
Professional Quality Internet Service

Dear Senator French:

April 13, 2011

As the owner and President of a small business, **I have no need for fingerprint "biometric" security systems and I never will.**

The ABSOLUTE LAST thing I would want would be to be **legally liable** for a data breach involving my employee's fingerprints! *Their privacy would be compromised for the rest of their lives* because fingerprints are like passwords that you can never change. I would be responsible for that…I can only imagine the lawsuits! **Alaskan businesses are NOT interested the risky proposition of fingerprint security systems.**

I strongly support the bi-partisan bill to protect our private biometric data (SB 98), and URGE you to pass it into law *this session* with the "Alternative ID" section intact.

We Alaskans have entrusted YOU to stand up for our privacy rights against Federal intrusion and corporate special interests…and we are all watching this bill closely.

Global data-miner ChoicePoint/LexisNexis/Reed Elsevier, has NO legitimate voice in this process, please don't even grant them a meeting. They have flown a team of east coast lobbyists to Juneau to "influence" you -- and will attempt to scare you with a bunch of nonsense because **they profit by exploiting Alaskan's loss of privacy.**

If they weren't making money off collecting and trafficking our private information, why would they be here?

Who will you stand with?

Regards,
Jason Giaimo
Anchorage Real Estate Investor, Accountant, Small business owner
(907) 602-9250
Giaimo1@aol.com

April 13, 2011

URGENT FAX:

SUBJECT: PLEASE DON'T PUT ALASKANS AT RISK FOR ANOTHER YEAR-
PASS THE PRIVACY BILL (SB-98) THIS SESSION

Dear Senator French:

Last week, data-miner Epsilon may have exposed your family's personal data to criminal hackers during a massive data-breach, as reported in the Wall Street Journal. About a dozen of my Alaskan friends also received notices that their secure data was accessed by criminals. Epsilon stores private data for customers of firms like Citibank, JP Morgan, Disney etc.

What if you or your children had been forced to give this data-miner fingerprints-for-ID? Might it be possible for a criminal hacker to place your children's fingerprints at a crime scene? (that's easy to do). Would you be able to prove their innocence?

If this sounds theoretical, look up Mr. Brandon Mayfield. He's an attorney from Oregon who was jailed because his fingerprints were *thought* to be on a bomb that blew up a train in Madrid in 2004 (there are hundreds of other examples). Will the Federal Government (or a foreign data-mining corporation) abide by an Alaskan law that says they can't sell the info once collected? Would we ever know if they breached this law?

In March, RSA Security, one of the world's most secure networks was hacked, with criminals gaining access to its corporate network and stealing information about its SecurID two-factor authentication products.

If you ask data-security experts (and I encourage you to do so), to a person they will tell you that **the only way to be 100% sure information will not be lost, stolen or accessed...is not to collect it in the first place**.

Please take a bold stand for real biometric privacy. **Alaskan's are demanding it.**
Ban fingerprints-as-ID mandates for all law-abiding Alaskans.

Jason Giaimo
Founder, Co-Chairman
Citizens for Privacy in Alaska

April 13, 2011

Dear Senator French:

I'm writing to ask to you support the STRONGEST version of SB 98 **which would prevent anyone from ever collecting** or disseminating biometric data. As an Alaskan I value my privacy greatly as well as that of my clients.

The gradual degradation of our privacy over the last few years is deeply troubling to me – it is now impossible to know who has our data and what they are doing with it. But, at least one has protections using credit cards and the like – you may get dinged but you are covered. And if your email gets targeted by the advertisers, drug purveyors and sexual enhancement folks (and yes, my mother gets those too) you have recourse.

On the other hand, if our biometric information gets loose into cyberspace all hell can break loose if your prints, or mine, get used by an unscrupulous person, much less a terrorist.

Now is the time to draw the line, hard and fast. This is no time to become spineless and give into lobbyists who have many assurances of safety, but no guarantees and no accountability when this data gets loose – and you all know that it will.

Please a support meaningful, strong SB 98. The "Alternative ID" section must stay.

Thanks. Ken.

Senate Bill 101: Entity Transactions Act

Senate Bill 101 conforms to the Uniform Law Commissioners' Model Entity Transaction Act (META). If implemented in the State of Alaska, this legislation will help facilitate transactions between more than one form of entity, improve the existing business climate in Alaska, and help reduce unnecessary administrative and legal burdens currently imposed on Alaska companies.

During the past twenty years many new types of business entities – including limited liability companies, limited liability partnerships, and limited liability limited partnerships – have been recognized under state law. As a result of the proliferation of new entity forms, many businesses now utilize various types of entities in their organizational structures. The relaxation of federal tax rules governing entity classification has led to an increase in the volume of restructuring and acquisition transactions by and among the various types of entity forms.

Because of the lack of clear statutory authority allowing transactions between more than one form of entity, these transactions have often required the use of multiple indirect steps, as opposed to a single transaction.

Senate Bill 101 will offer new statutory authority to permit cross-entity transactions in order to remain responsive to the needs of Alaskan companies and should be enacted in order to allow Alaska businesses the opportunity to engage in cross-entity transactions.

Adopting SB 101 will be an important step towards bringing Alaska more into the mainstream of statutory business law.

I urge your support of this legislation.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 101

Analysis

The financial impact to the Division for implementing the Alaska Entity Transaction Act (Act) is nominal.

Two states have adopted the Model Entity Transaction Act, Kansas and Idaho. Kansas was not able to provide statistics regarding how many entities have Merged, Converted, Domesticated, or Interest Exchanged in accordance with the Act. Idaho adopted the Act in July of 2007 and has had 196 entities take advantage of the Act.

The filings generated by the Act with be easily absorbed into the staff's normal document processing duties and no additional staff would be required. The Division receives a combined average of 200 regular mergers and conversions annually so a few more will have no impact.

Regulations for fees will need to be established. This should not be costly or time consuming since the fee language used throughout current regulations is adequate to establish fees for the Act.

Re: Update of Alaska Business Statutes

BACKGROUND

During the past twenty years many new types of business entities – including limited liability companies, limited liability partnerships, and limited liability limited partnerships – have been recognized under state law. As a result of the proliferation of new entity forms, many businesses now utilize various types of entities in their organizational structures. The relaxation of federal tax rules governing entity classification has led to an increase in the volume of restructuring and acquisition transactions by and among the various types of entity forms. These transactions have often required the use of multiple indirect steps, as opposed to a single transaction, because of the lack of clear statutory authority allowing transactions between more than one form of entity.

Many states have addressed this need by providing new legislation to facilitate transactions between more than one form of entity. Some states have added provisions in their individual entity laws to authorize entities organized under each law to convert to other forms of entities or to allow mergers between entity forms. For example, Delaware has adopted separate provisions in both its General Corporation Law and its Limited Liability Company Act that, functioning together, allow a merger between a corporation and a limited liability company. See DEL. CODE ANN. tit. 8, §§ 263.264 (2008) (corporations), DEL. CODE ANN. tit. 6, §§ 18-209 (2008) (limited liability companies). Other states have taken a more comprehensive approach and have chosen to enact new statutes that address cross-entity mergers and conversions in one act and central location. These statutes, known as "junction box" statutes, contain provisions allowing all types of corporate and unincorporated entities to engage in mergers, conversions,

and, in some cases, interest exchanges and domestication transactions. See ALA. CODE §§I 10-15-1 to -7 (2007); COLO. REV. STAT. ANN. §§ 7-90-101 to -604 (West 2008).

ALASKA LAW

As noted above, many states have adopted new or amended existing provisions to facilitate transactions between different entity forms. While states have taken varying approaches to inter-entity transactions, virtually all states have addressed certain types of transactions. In fact, Alaska is the ***only*** state that does not authorize a limited liability company to merge with another form of entity.

Currently Alaska law authorizes only the following mergers, consolidations and conversions:

- two or more domestic corporations may merge, Alaska Stat. § 10.06.530;
- one or more foreign corporations and one or more domestic corporations may be merged or consolidated, or participate in an exchange, Alaska Stat. § 10.06.562;
- a limited liability company may merge or consolidate with or into a limited liability company or a foreign limited liability company, Alaska Stat. § 10.50.500;
- any other entity may convert to a limited liability company, Alaska Stat. § 10.50.570;
- any other entity may convert to a limited partnership, Alaska Stat. § 32.11.095; and
- a partnership may be merged with one or more partnerships or limited partnerships. Alaska Stat. § 32.06.905.

As a result of the limited provisions governing inter-entity transactions, Alaska businesses are required to complete restructuring transactions in two or three indirect steps rather than directly in a single transaction. For example, an Alaska limited liability company cannot merge directly into an Alaska corporation. Nevertheless, a similar result can be obtained by (i) forming a foreign limited liability company; (ii) merging the Alaska limited liability company with and into the foreign limited liability company; (iii) converting the surviving entity of the merger, the foreign limited liability company, into a foreign corporation pursuant to the provisions of that state's business laws; and (iv) merging the foreign corporation with and into an Alaska corporation. Likewise, an Alaska limited liability company could be converted into an Alaska corporation through the use of foreign entities to facilitate the conversion.

While it may be theoretically possible to attain many of the same results accomplished by a comprehensive inter-entity merger or conversion statute without having such a statute

available, it is certainly much more efficient and economical to accomplish inter-entity transactions in a single step. As noted by the National Conference of Commissioners on Uniform State Laws ("NCCUSL") in connection with the adoption of the Model Entity Transactions Act (discussed infra):

> The problem with mergers, conversions, interest exchanges and changing the location of entities is that an entity involved may have to be dissolved to accomplish the desired end. This means technically winding down the business, satisfying creditors and interest holders in the wind down, and potentially incurring adverse tax consequences. This is a burden when the objective is not to dissolve the business but to continue it in another form or another location. The hazards of the process are many and very costly. A statute that allows these events to occur without dissolving at least one of the entities involved will increase efficiency and lower costs . . . Cross-entity transactions should be available.

Model Entity Transactions Act Summary, (2007), at http://www.nccusl.org/Update/ActSearchResults.aspx. Adopting new legislation in Alaska to facilitate transactions between more than one form of entity would improve the existing business climate in Alaska and help reduce unnecessary administrative and legal burdens currently imposed on Alaska companies.

MODEL & STATE LAW PROVISIONS

Both NCCUSL and the American Bar Association ("ABA") have undertaken efforts in recent years to facilitate transactions between entities. NCCUSL included provisions permitting entities to engage in mergers with other entity forms and authorizing the conversion of one form of entity to another in the Uniform Limited Liability Company Act (1996 and 2006), Uniform Limited Cooperative Association Act (2007), Uniform Partnership Act (1997) and Uniform Limited Partnership Act (2001). Similarly, the ABA amended the Model Business Corporation Act in 1999 to authorize mergers between corporations and other forms of entities, and again in 2002 to authorize the conversion of entities into and out of the corporate form. Unlike a junction box statute, which applies to transactions between multiple entities, each of these statutes only apply if an entity of the type formed under the statute is a party to the transaction.

Given the inherent limitations in the acts previously adopted, NCUSSL and the ABA set out to draft a comprehensive junction box statute that would allow differing forms of entities to merge with each other or convert to other entity forms. The Model Entity Transactions Act ("META"), the most recent version of which is attached to this memorandum as Appendix A, originally was adopted by NCCUSL and the ABA in 2004 and provides a comprehensive statutory framework that addresses all varieties of cross-entity transactions. Under META, all types of corporate and unincorporated organizations may engage in mergers, conversions, interest exchanges (essentially a triangular merger accomplished without the use of a transitory

third party), and domestications (a transaction in which an existing entity moves is jurisdiction of organization to another state while still retaining whatever form it had before the domestication).

Implementation of META or a similar junction box statute would require conforming amendments and repeals to Alaska's existing business statutes. Appendix 2 of META provides a guide for analyzing existing statutes to determine which statutes should be amended or repealed and whether additional provisions should be added. As noted in Appendix 2, two goals should be paramount in deciding how to approach revisions to existing state laws: "(1) avoiding any potential inconsistency between META's provisions and similar provisions in the state's entity statutes; and (2) making the interplay between META and the state's various entity laws relatively easy to navigate." Model Entity Transactions Act, Appendix 2, (2007), at http://www.nccusl.org/Update/ActSearchResults.aspx. The appendix sets forth four separate approaches to achieving this cohesion. The simplest method would likely be to be limit existing Alaska entity laws to "same-type transactions". This approach would likely require the least amount of alterations to existing Alaska entity laws, as few amendments should be necessary for entity laws that do not have any cross-type merger provisions. Id. At 91.

Some states have found it useful to expand the coverage of their junction box statutes beyond inter-form mergers and conversions to include administrative matters such as entity names, registered agent, effects of dissolution, filings with the filing officer and treatment of foreign entities. These statutes seek to coordinate the non-substantive rules applicable to differing organizational forms, where appropriate, into a comprehensive junction box statute in order to eliminate inadvertent differences that may be set forth in existing entity laws. For instance, "where one statute speaks of a sixty-day grace period for filing a corrective report while another speaks of a two-month period, most would agree that it makes sense to coordinate the provisions..." Robert R. Keatinge, Plumbing and Other Transitional Issues. 58 Bus. Law 1051, 1058 (2003).

Although Alaska's need to act is greatest in the area of inter-entity mergers and conversions, it may be prudent to undertake efforts to coordinate the administrative rules governing Alaska business organizations in connection with any proposed legislation. Attached as Appendix B is a copy of Colorado's Corporations and Associations Act, COLO. REV. STAT. ANN. §§ 7-90-101 to -604. The Corporations and Associations Act is an example of a comprehensive junction box statute that addresses both inter-entity mergers and conversions and administrative matters such as filings, annual reports, entity names and registered agents. As with the adoption of META, implementation of a more comprehensive junction box statute would require a thorough analysis of the overall existing statutory framework in Alaska and could require significant amendments to existing state law.

RECOMMENDATIONS & CONCLUSION

Alaska is in need of new statutory authority to permit cross-entity transactions in order to remain responsive to the needs of Alaskan companies. While Alaska could adopt a patchwork of legislative amendments to its existing entity laws, adoption of a comprehensive junction box statute would help to avoid inconsistencies and conflicts between existing statutes. META is a general statute that is designed to fit with any state's existing entity laws and should be enacted

in an appropriate form in Alaska in order to allow Alaska businesses the opportunity to engage in cross-entity transactions. Adopting META, or enacting similar provisions adopted by other states, would be an important step towards bringing Alaska more into the mainstream of statutory business law.

Entity Transactions Act Summary

The Uniform Law Commissioners have provided unincorporated organization law to the states since the first Uniform Partnership Act in 1914. The current portfolio of uniform acts on unincorporated organizations includes the Uniform Partnership Act (1997), the Uniform Limited Partnership Act (2001), the Uniform Limited Liability Company Act (1996) and the Uniform Unincorporated Nonprofit Organization Act (1996). Corporate law has been the focus of the American Bar Association for at least 50 years. It is responsible for the Model Business Corporation Act and the Model Not-for-Profit Corporation Act. It also prepared a Prototype Limited Liability Company Act. Partnerships, limited partnerships, limited liability partnerships, limited liability limited partnerships, limited liability companies and corporations are the basic entities under American law (business trusts and cooperatives are also growing in importance) that provide the means to aggregate capital, and limit liability where applicable, along with the structure to organize an enterprise, whether it is for profit or nonprofit.

All of this uniform and model act work has made American law particularly efficient for entrepreneurs. Anyone who establishes and develops a business has choices available for the entity that may be chosen to do business. As a business grows, these options also allow for some changes in form and location of the entity chosen. For example, a small enterprise that chooses to be a partnership initially has the opportunity to reorganize as a corporation when the business is big enough to want the advantage of the corporate form. Not-for-profit activities also have a greater array of organizational forms, now including the limited liability company and the limited partnership along with the not-for-profit corporation. American law is particularly flexible and responsive to the needs of both the for-profit and the not-for-profit sectors. American business organization law is the envy of the rest of the world for this reason.

However, more can be done. There is no comprehensive statutory framework for changing entity form, whether for merger of entities, conversion of one entity to another, exchanging interests to merge businesses without merging the entities (called an interest exchange), or for changing the location of the entity (called a domestication). The newest uniform acts on limited liability companies and limited partnerships have limited provisions. The Model Business Corporation Act has been modified to do some of these kinds of transactions. The comprehensive effort had not been done until the Model Entity Transactions Act (META), promulgated by the Uniform Law Commissioners and the American Bar Association in 2004.

The Uniform Law Commissioners and the American Bar Association have a long relationship going back to the founding of the Commissioners. Every drafting committee the Commissioners authorize to work on an act has advisors from the American Bar Association. However, in this instance the need to draw together corporate law with the law of unincorporated organizations, meant a more formal joint relationship was necessary. META is a product of this joint relationship.

The problem with mergers, conversions, interest exchanges and changing the location of entities is that an entity involved may have to be dissolved to accomplish the desired end. This means technically winding down the business, satisfying creditors and interest holders in the winding down, and potentially incurring adverse tax consequences. This is a burden when the objective is not to dissolve the business but to continue it in another form or another location. The hazards of the process are many and very costly. A statute that allows these events to occur without dissolving at least one of the entities involved will increase efficiency and lower costs. A general statute, not limited in scope to less than all of the kinds of entities commonly involved in these transactions, is highly desirable. Cross-entity transactions should be available. That statute should also be one that can be fit with the existing entity law in a state so that it is not necessary to repeal all the existing entity law to accomplish the objective. META is the general statute that is designed to fit in with a state's existing entity law to accomplish the objective.

META governs the course of four kinds of transactions: merger of one entity with another, conversion of an entity to another kind of entity, an interest exchange between two entities so that one of them is controlled by the other without actually merging the two entities and the domestication of an entity originally organized in one state in another state. A merger occurs when one entity acquires another entity and the result is a single entity composed of both the original entities. A conversion occurs when one kind of entity converts to another kind, i.e., a limited liability company converts into a business corporation. An interest exchange occurs when interest holders transfer their interests in one entity to another for interests in the second entity. For example, the holders of all interests in a limited partnership transfer their interests to a corporation in return for shares of stock in the corporation. A domestication occurs when an entity formed under the laws of one state becomes an entity formed in another state, extinguishing its entity status in the first state. The articles of META essentially provide the procedures to accomplish each of these transactions.

META authorizes each of these kinds of transactions. It authorizes different entities to merge, i.e., a corporation may merge with a limited partnership. It authorizes a partnership to convert to a limited liability company. An interest swap may occur between a limited partnership and a limited liability company. A corporation may change its place of organization from one state to another. These are examples of the kinds of transactions authorized. They can occur between an entity in one state and a foreign entity formed originally in another state, providing that the law of the foreign state permits such a transaction.

In each kind of transaction, there must be a plan that is approved by the interest holders in the entities. The plan generally describes the transaction and its effect in detail. Approval of the plan proceeds according to the organic statute and rules that govern the pre-existing entities, or if none, by unanimous consent of all interest holders. If, for example, a partnership agreement governing a limited partnership provides for consent of partners to one of the kinds of transactions subject to META, the agreement would be the organic rules that would determine the approval of the plan. Otherwise all the partners would have to consent.

Once a plan is approved, a statement relevant to the transaction must be filed in the office in a state in which entity statements or charters are normally filed. The filing puts the transaction and the identity of the entity that survives in public records. That entity becomes the entity with the capacity to do business and it has the applicable liability shield from that time onward.

The objective in these procedures is to make sure that no interest is extinguished in the process of any of the transactions under META, whether a merger, conversion, interest exchange or domestication. This is true for an interest holder such as a shareholder in a corporation or holder of a partnership interest. It is also true for creditor interests that pre-existed the given transaction. The point of the procedures is to end with an entity that continues the business of those entities it succeeds without extinguishing obligations incurred by these entities in a seamless, nondisruptive transfer.

There are a few exclusions from META. If mergers in a state are already governed by the merger provisions in a state's enactment of a uniform or model act, META will not apply or displace those provisions. The same is true for interest exchanges when a state has the Model Business Corporation Act. Not all entities will necessarily be governed by META. There are special corporations, for example, that should not be included, depending upon their status in a state. META allows for them to be specifically excluded.

META is a model act, not a uniform act, although several of the acts affected are uniform acts. Although there is some uniformity in entity law, i.e., partnership law, it is not true across the full spectrum of entity law. This means that using META from state to state is likely to mean much adaptation of META provisions. The effect of utilizing META may have the impact of introducing more uniformity of law relating to entities from state to state, but use of its language in a uniform way cannot be expected.

Business organization law and the law relating to not-for-profit organizations has been much refurbished, updated and improved in the 30 years preceding 2004, the year of META. Development has been dynamic and good for economic function in the entire United States. META adds another element to this dynamic progression of law relating to these entities. It is good for business and not-for-profit ventures alike. It should be studied, adapted and enacted in every state as soon as practicable.

ABOUT ULC

The **Uniform Law Commission** (ULC), also known as National Conference of Commissioners on Uniform State Laws (NCCUSL), now in its 116th year, provides states with non-partisan, well-conceived and well-drafted legislation that brings clarity and stability to critical areas of state statutory law.

ULC members must be lawyers, qualified to practice law. They are practicing lawyers, judges, legislators and legislative staff and law professors, who have been appointed by state governments as well as the District of Columbia, Puerto Rico and the U.S. Virgin Islands to research, draft and promote enactment of uniform state laws in areas of state law where uniformity is desirable and practical.

- ULC strengthens the federal system by providing rules and procedures that are consistent from state to state but that also reflect the diverse experience of the states.
- ULC statutes are representative of state experience, because the organization is made up of representatives from each state, appointed by state government.
- ULC keeps state law up-to-date by addressing important and timely legal issues.
- ULC's efforts reduce the need for individuals and businesses to deal with different laws as they move and do business in different states.
- ULC's work facilitates economic development and provides a legal platform for foreign entities to deal with U.S. citizens and businesses.
- Uniform Law Commissioners donate thousands of hours of their time and legal and drafting expertise every year as a public service, and receive no salary or compensation for their work.
- ULC's deliberative and uniquely open drafting process draws on the expertise of commissioners, but also utilizes input from legal experts, and advisors and observers representing the views of other legal organizations or interests that will be subject to the proposed laws.
- ULC is a state-supported organization that represents true value for the states, providing services that most states could not otherwise afford or duplicate.

Foreword

The Council of State Governments (CSG) is pleased to bring to you the **2011 *Suggested State Legislation*** volume, a valued series of compilations of draft legislation from state statutes on topics of current interest and importance to the states. The draft legislation found in this book represents many hours of work by The Council's Committee on Suggested State Legislation, CSG Policy Task Forces, and CSG staff.

The entries in this book were selected from hundreds of submissions. Most are based on existing state statutes. Neither The Council nor the Committee seeks to influence the enactment of state legislation. Throughout the years, however, both have found that the experiences of one state may prove beneficial to others. It is in this spirit that these proposals are presented.

Introduction

"A single state's experience in a new field frequently leads to the adoption of similar action in other states, *if the problem is general, the approach is well conceived, and other states can be made aware of the action."*

That statement is a simple one, but it remains as true today as it did when it first appeared in the introduction to the 28th volume of ***Suggested State Legislation.*** For more than 60 years, The Council of State Governments' Suggested State Legislation (SSL) program has informed state policy-makers about a broad range of legislative issues, and its national Committee on Suggested State Legislation has been an archetype of interstate dialogue, one successfully imitated in a variety of ways.

The Committee on Suggested State Legislation originated as a group of state and federal officials who first met in August of 1940 to review state laws relating to U.S. security. The result was ***A Legislative Program for Defense.*** That group reconvened following the nation's entry into World War II in order to develop a volume of ***Suggested State War Legislation***. That publication was succeeded by ***Suggested State Legislation,*** an annual volume of draft legislation about topics of major governmental interest. In keeping with CSG's current mission, the SSL Committee now focuses more on issues arising from major trends impacting the states, such as an aging population. Today, SSL Committee members represent all regions of the country. They are generally legislators and legislative staff, and include the CSG policy task force chairs.

Traditionally, SSL volumes were the culmination of a yearlong process in which legislation was received and reviewed by members of the SSL Committee in a series of meetings. Traditionally, the volumes were produced at the end of the SSL Cycle. More recently, the SSL volumes were released concurrently online at CSG's STARS database. However, even under this system, in some cases, the items that the committee voted to include in a volume had to be held for as long as 11 months before they could be distributed to the states.

Beginning with the 2003 SSL Cycle, the SSL Committee produces SSL volumes electronically in segments, one segment after every committee meeting. Each segment will be published on-line approximately two months after a meeting. The electronic parts will be combined into a book that CSG will continue to publish at the end of the SSL Cycle, at least for the immediate future.

The SSL Committee considers legislation submitted by state officials and staff, CSG Associates and CSG staff. It will consider legislation from other sources, but only when that legislation is submitted through a state official. Other sources include public interest groups and members of the corporate community who are not CSG Associates.

Throughout the SSL solicitation, review and selection processes, members of the Committee employ a specific set of criteria to determine which items will appear in the volume:

- Is the issue a significant one currently facing state governments?
- Does the issue have national or regional significance?
- Are fresh and innovative approaches available to address the issue?
- Is the issue of sufficient complexity that a bill drafter would benefit from having a comprehensive draft available?
- Does the bill or Act represent a practical approach to the problem?
- Does the bill or Act represent a comprehensive approach to the problem or is it tied to a narrow approach that may have limited relevance for many states?
- Is the structure of the bill or Act logically consistent?
- Are the language of and style of the bill or Act clear and unambiguous?

All items selected for publication in SSL are presented in a general format as shown in

the following ***Suggested State Legislation*** Style Manual and Sample Act. However, beginning with the 1997 volume, items presented in ***Suggested State Legislation*** volumes more closely reflect the style and form as they were submitted to the program. Entries from the National Conference of Commissioners on Uniform State Laws are rarely changed from their submitted format.

Revisions in the headings and numbering and other modifications may be necessary in order to conform to local practices, and decisions must be made regarding optional sections and provisions. Thus, readers should note that ***Suggested State Legislation*** drafts typically do not duplicate actual state legislation.

A "Statement," in lieu of a draft Act, might appear in a volume when the SSL Committee has reviewed and approved a piece of legislation, but its length and/or complexity preclude its publication in whole or in the standard SSL format. "Notes" also may be used when the Committee is particularly interested in highlighting and summarizing a variety of legislative actions undertaken by the states in a particular area.

State officials and staff, CSG Associates, and CSG staff are encouraged to submit at any time legislation which is likely to be of interest and relevance to other states. In order to facilitate the selection and review process, it is particularly helpful for respondents to provide information on the current status of the legislation, an enumeration of other states with similar provisions, and any summaries or analyses of the legislation that may have been undertaken.

Legislation and accompanying materials should be submitted to the Suggested State Legislation Program, The Council of State Governments, 2760 Research Park Drive, P.O. Box 11910, Lexington, Kentucky 40578-1910, (859) 244-8000, fax (859) 244-8001, or ssl@csg.org.

Readers should keep in mind that neither The Council of State Governments nor the SSL Committee are in the position of advocating the enactment of items that are presented in SSL Volumes. Instead, the entries are offered as an aid to state officials interested in drafting legislation in a specific area, and can be looked upon as a guide to areas of broad current interest in the states.

Interested readers can find out more about the SSL program by visiting the SSL pages at CSG's Internet Web site at www.csg.org.

SSL Criteria

- Does the issue have national or regional significance?
- Are fresh and innovative approaches available to address the issue?
- Is the issue of sufficient complexity that a bill drafter would benefit from having a comprehensive draft available?
- Does the bill or Act represent a practical approach to the problem?
- Does the bill or Act represent a comprehensive approach to the problem or is it tied to a narrow approach that may have limited relevance for many states?
- Is the structure of the bill or Act logically consistent?
- Is the language and style of the bill or Act clear and unambiguous?

The word "Act" as used herein refers to both proposed and enacted legislation. Attempts are made to ensure that items presented to committee members are the most recent versions. However, interested parties should contact the originating state for the ultimate disposition in the state of any docket entry in question, including substitute bills and amendments. Furthermore, the Committee on Suggested State Legislation does not guarantee that entries presented on its dockets or in a ***Suggested State Legislation*** volume represent the exact versions of those items as enacted into law, if applicable.

Model Entity Transactions Act

According to the Uniform Law Commissioners (ULC), anyone who establishes and develops a business in America has choices available for the entity that may be chosen to do business. As a business grows, these options also allow for some changes in form and location of the entity chosen. For example, a small enterprise that chooses to be a partnership initially has the opportunity to reorganize as a corporation when the business is big enough to want the advantage of the corporate form. Not-for-profit activities also have a greater array of organizational forms, now including the limited liability company and the limited partnership along with the not-for-profit corporation. American law is particularly flexible and responsive to the needs of both the for-profit and the not-for-profit sectors.

However, until recently, there was no comprehensive statutory framework for changing entity form, whether for merger of entities, conversion of one entity to another, exchanging interests to merge businesses without merging the entities (called an interest exchange), or for changing the location of the entity (called a domestication). The problem with mergers, conversions, interest exchanges and changing the location of entities is that an entity involved may have to be dissolved to accomplish the desired end. This means technically winding down the business, satisfying creditors and interest holders in the winding down, and potentially incurring adverse tax consequences. This is a burden when the objective is not to dissolve the business but to continue it in another form or another location. The hazards of the process are many and very costly. A statute that allows these events to occur without dissolving at least one of the entities involved will increase efficiency and lower costs. A general statute, not limited in scope to less than all of the kinds of entities commonly involved in these transactions, is highly desirable. Cross-entity transactions should be available. That statute should also be one that can be fit with the existing entity law in a state so that it is not necessary to repeal all the existing entity law to accomplish the objective. The ULC/American Bar Association Model Entity Transaction Act (META) is a general statute that is designed to fit with a state's existing entity law to accomplish the objective.

META governs four kinds of transactions: *merger* of one entity with another, *conversion* of an entity to another kind of entity, an *interest exchange* between two entities so that one of them is controlled by the other without actually merging the two entities and the *domestication* of an entity originally organized in one state in another state. A merger occurs when one entity acquires another entity and the result is a single entity composed of both the original entities. A conversion occurs when one kind of entity converts to another kind, i.e., a limited liability company converts into a business corporation. An interest exchange occurs when interest holders transfer their interests in one entity to another for interests in the second entity. For example, the holders of all interests in a limited partnership transfer their interests to a corporation in return for shares of stock in the corporation. A domestication occurs when an entity formed under the laws of one state becomes an entity formed in another state, extinguishing its entity status in the first state. The articles of META essentially provide the procedures to accomplish each of these transactions.

META authorizes each of these kinds of transactions. It authorizes different entities to merge, i.e., a corporation may merge with a limited partnership. It authorizes a partnership to convert to a limited liability company. An interest swap may occur between a limited partnership and a limited liability company. A corporation may change its place of organization from one state to another. These are examples of the kinds of transactions authorized. They can occur between an entity in one state and a foreign entity formed originally in another state, providing that the law of the foreign state permits such a transaction.

In each kind of transaction, there must be a plan that is approved by the interest holders in the entities. The plan generally describes the transaction and its effect in detail. Approval of the plan proceeds according to the organic statute and rules that govern the pre-existing entities, or if none, by unanimous consent of all interest holders. If, for example, a partnership agreement governing a limited partnership provides for consent of partners to one of the kinds of transactions subject to META, the agreement would be the organic rules that would determine the approval of the plan. Otherwise all the partners would have to consent.

Once a plan is approved, a statement relevant to the transaction must be filed in the office in a state in which entity statements or charters are normally filed. The filing puts the transaction and the identity of the entity that survives in public records. That entity becomes the entity with the capacity to do business and it has the applicable liability shield from that time onward.

The objective in these procedures is to make sure that no interest is extinguished in the process of any of the transactions under META, whether a merger, conversion, interest exchange or domestication. This is true for an interest holder such as a shareholder in a corporation or holder of a partnership interest. It is also true for creditor interests that pre-existed the given transaction. The point of the procedures is to end with an entity that continues the business of those entities it succeeds without extinguishing obligations incurred by these entities in a seamless, nondisruptive transfer.

META is a model Act, not a uniform Act. This means states generally will have to adapt some META provisions to their own statutes. To do this, states must first identify all of the existing statutory provisions that allow for same-type (all of the entities involved are the same, e.g., a merger between two corporations) and cross-type (more than one type of entity is involved in the transaction, e.g., a merger between a corporation and a partnership), mergers, interest exchanges, conversions, and domestications for any kind of entity. An entity is defined in Section 102 to include all types of partnerships (general partnerships, limited liability partnerships, limited partnerships, and limited liability limited partnerships), limited liability companies, all types of corporations (including non-profit corporations, close corporations in those states that have separate statutes for close corporations, and professional corporations), business trusts, cooperatives, and unincorporated nonprofit associations (at least in states that have the Uniform Unincorporated Nonprofit Associations Act or have statutes that allow an unincorporated nonprofit organization to hold property in its own name). Many states have statutes governing other types of business organizations. Texas, for example, has special statutory provisions for real estate investment trusts (in most other states, REITs would be considered a type of business trust). These special types of entities should also be included in the review process.

The next step is to analyze the overall existing statutory framework for same-type and cross-type transactions. This analysis will reveal that there are gaps in coverage for many of the types of transactions covered by the act, either directly or by default, even in those states that have adopted Chapter 9 and 11 of the Model Business Corporation Act and the uniform unincorporated organization acts.

Every state will have provisions for mergers of corporations into other corporations but not all states authorize interest exchanges between corporations (the corporate statutes generally refer to these as share exchanges) and only a few states specifically authorize corporations to enter into merger or interest exchange transactions with other types of organizations. Moreover, very few existing corporate statutes have provisions for conversions of corporations into other types of entities or authorize corporations to domesticate in another state.

The same-type and cross-type landscape with respect to unincorporated entities is even less complete. The Uniform Partnership Act (1997) (RUPA), which has been adopted in approximately 2/3 of the states (and in the District of Columbia, Puerto Rico and the Virgin

Islands) only authorizes mergers and conversions of general partnerships and limited partnerships. It does not allow conversions into any other type of entity or mergers with any other type of entity; nor does it authorize interest exchange or domestication transactions. Several states that have adopted RUPA have provisions allowing same-type and cross-type conversions and mergers of general partnerships with not only limited partnerships but also with corporations and limited liability companies; and a few RUPA states have expanded the list to include any business entity (it is unclear in many of these states, however, whether these statutes apply to non-profit entities). With the exception of Ohio, which authorizes mergers and consolidations of general partnerships with other partnerships and "other domestic or foreign entities," there are apparently no same-type or cross-type provisions in the general partnership statutes of the approximately one-third of the states that still have the 1914 Uniform Partnership Act.

The statutory framework for limited partnership same-type and cross-type transactions is also quite varied. Most states have the Uniform Limited Partnership Act (1976 with 1985 Amendments). That act has no provisions dealing with merger, interest exchange, conversion, or domestication transactions. According to Volume 6A of Uniform Laws Annotated (Supp. 2004), 19 states have adopted provisions authorizing limited partnerships to merge with or convert into some other types of entities. Arizona, for example, only authorizes limited partnerships to convert into general partnerships, but also authorizes limited partnerships to merge with any other type of business entity. Some states allow conversions of limited partnerships into limited liability companies and a few states expand the conversion list to include corporations; most also allow mergers of limited partnerships into other limited partnerships and some other types of entities. Several states appear to exclude non-profit organizations, business trusts, and cooperatives from their cross-form list.

As of October 2007, the Uniform Limited Partnership Act (2001) had been adopted in 16 states. It authorizes a conversion of a limited partnership into any other type of organization, conversion of any other organization into a limited partnership, a merger of a limited partnership with any other type of organization and a domestication (which is a type of conversion under ULPA (2001)). It does not, however, have any specific provisions for interest exchanges.

Most limited liability company statutes have provisions authorizing mergers and conversions, although the scope of coverage is quite varied. The Uniform Limited Liability Company Act (1997) (ULLCA), which has been adopted in eight states and the Virgin Islands, authorizes the conversion of a limited liability company into a general or limited partnership (but not into a corporation or any other type of entity) and a merger of a limited liability company with other limited liability companies or any "other domestic or foreign entities." ULLCA does not, however, have any provisions authorizing limited liability companies to enter into interest exchange or domestication transactions. In the other 42 states there are substantial differences from the ULLCA scheme with respect to same-type and cross-type transactions. The recently-adopted revised Uniform Limited Liability Company Act (2006) authorizes cross-type mergers, conversions, and domestications, but does not provide for interest exchanges; and the Uniform Limited Cooperative Association Act (2007) authorizes cross-type mergers and conversions.

There are no same-type or cross-type provisions in the Uniform Unincorporated Nonprofit Associations Act. Moreover, there are very few same-type or cross-type provisions in statutes governing all the other types of entities that exist under state law. There are some exceptions, however, such as the Delaware Statutory Trust Act which allows mergers and conversions of business trusts into other entities, and the Minnesota cooperative statute which allows farm cooperatives to convert into limited liability companies.

Once the analysis of the existing same-type and cross-type statutes has been made, decisions need to be made as to which ones should be amended or repealed and whether to add

additional provisions to these statutes. Under META, if the statute governing an entity has same-type provisions, those provisions govern the transaction in question. META provides default rules, however, if the other applicable entity statute has no same-type provisions for the transaction in question. META also applies to cross-type transactions (but defaults to applicable state entity law for approval requirements and the like).

In deciding how to amend, repeal or add to the existing entity statutes, states should avoid any potential inconsistency between META's provisions and similar provisions in the state's entity statutes and make the interplay between META and the state's various entity laws relatively easy to navigate. There are several ways to achieve these goals. First, states can limit existing laws to same-type transactions. One method, which it is anticipated will be the method chosen by most states, is as follows:

With respect to the state's corporation statutes:

(i) Repeal any cross-type provisions from the state's corporation merger statutes. The amendments necessary for this purpose in a state that has adopted the Model Business Corporation Act and the Model Nonprofit Corporation Act are found in Sections A2-1 and A2-2, respectively, In states whose corporate codes do not have any cross-type merger provisions no amendments to the state's corporate merger provisions will be necessary. Most state also may not have interest exchange provisions in their corporate codes. If that is the case, same-type provisions for interest exchanges do not need to be added to the corporate codes because under META the requirements for approval of a merger and other rights that a shareholder would have in a merger, for example, dissenters' rights, apply. See Sections 203(a) (mergers) and 303(a) (interest exchange).

(ii) Repeal any conversion provisions in the state's corporation statutes. Article 3 of META will, therefore, govern all conversions.

(iii) Retain any existing domestication provisions in the state's organic laws. As is pointed out in the Legislative Note to META Section 501, these entity specific domestication provisions will be listed in Section 501(e) with the result being that Article 5 of META will apply to those types of entities whose organic laws do not already have domestication provisions.

With respect to the state's other entity statutes:

(i) Amend all the merger, interest exchange, and conversion provisions in the state's other entity statutes by stripping out all of the cross-type provisions in the merger provisions, and by repealing any interest exchange or conversion provisions. Any existing domestication provisions would be retained and an appropriate reference to those provisions would be included in Section 501(e). The appropriate amendments for states that have adopted the Uniform Partnership Act (1997), the Uniform Limited Partnership Act (2001), the Uniform Limited Liability Company Act (1996) or the ABA Prototype Limited Liability Company Act are found in Sections A2-3, A2-4, A2-5, and A2-6, respectively.

(ii) The existing requirements for approval of mergers, interest exchanges, conversions, domestications, and amendment of the organic rules in the state's existing organic laws for unincorporated entities need to be carefully reviewed. If they require unanimity (or they are silent on what vote is required), then the suggested amendments in this appendix will make all the voting requirements for both same-type and cross-type transactions involving unincorporated entities consistent. The situation is more complicated, however, if there is not complete consistency among those organic laws; for example, as is sometimes the case, if the state's partnership statutes require unanimity but its LLC statute requires only a majority vote for some or all transactions. If there is not complete consistency, decisions will need to be made whether to retain the differences or to make all of the voting requirements either unanimous or majority. Other issues that will need to be resolved are what the appropriate vote should be for transactions other than mergers (i.e., interest exchanges, conversions, and domestications) where

there are no existing voting provisions other than for mergers; what is the appropriate voting requirement for a transaction under META where an unincorporated entity organic law does not have any same-type or cross-type provisions for that type of transaction; and how the voting requirements under META relate to the vote required to amend an unincorporated entity's organic rules. Once this analysis is completed, it will be possible to construct the appropriate amendments to the state's existing unincorporated entity organic laws.

Another method of integrating META with a state's organic laws is to delete from the existing organic laws any provisions that deal with cross-type transactions and add same-type merger and interest exchange, and domestication provisions to every organic law that does not currently have these provisions. Thus all same-type entity transactions would be governed by the state's organic laws and all cross-type transactions would be governed by META. This approach will require a large number of changes to existing organic laws in most states because same-type merger and interest exchange, and domestication provisions would have to be added to many of the state's organic laws, including its unincorporated nonprofit, cooperative, and business trust statutes. Article 5 of META would also not be enacted because the organic laws for each type of entity would have domestication provisions.

States can also repeal all the existing same-type and cross-type transaction provisions in all of the organic laws and add to META all the corporate merger approval and related statutory provisions such as appraisal rights, as well as substantially modifying Sections 203, 303, 403, and 503 so that there will be one set of approval provisions for a corporation engaging in a META transaction and a second set of approval provisions for unincorporated entities engaging in a META transaction. Making all of these modifications will be a monumental task.

Finally, integrating META with a state's existing organic laws could be achieved by repealing any provisions for cross-type transactions from the corporation laws (see Sections A2-1 and A2-2 for the appropriate amendments in a state that has enacted the Model Business Corporation Act and the Model Nonprofit Corporation Act) and, in addition by repealing all of the provisions for same-type and cross-type transactions in all of the state's unincorporated entity organic laws. This approach, which is a variant of avoids the problem of incorporating the corporation law voting requirements and related provisions such as appraisal rights. It will work best, however, in a state where all of the existing unincorporated entity organic laws require unanimity for approval of a merger or similar transaction (and where unanimity is also required to amend each type of entity's organic rules), since that is the ultimate default rule in META. This approach will be quite cumbersome if the state's unincorporated entity organic laws require less than unanimous consent for some types of entities, because the less than unanimous approval requirements would have to be incorporated into META.

The ULC suggests states place a reference to META in the state's entity statutes specifying the transactions that are governed by META. As an alternative to the statutory references proposed in this appendix, legislative notes could be used in those states that follow that practice. A note would be placed in the corporate statutes at the end of the merger and share exchange provisions stating that META is the primary statute that applies to reorganization transactions involving a corporation and another form of entity. For other entities whose organic laws have merger provisions, the legislative notes would appear at the end of those provisions stating META is the primary statute for any cross-type merger involving that type of entity and also is the primary statute governing both same-type and cross-type interest exchange and domestication transactions where that type of entity is a party. Finally, if there are no merger provisions for a particular type of entity, a legislative note should be placed at the end of the governing statute stating that META is the statute that governs merger, interest exchange, conversion and domestication transactions where that type of entity is involved.

Interested readers can see how one state adopted META by viewing amendments Kansas

made to its law when it adopted META as SB 132 in 2009. However, the text in this *SSL* volume is the model ULC language, includes legislative notes about the act, and excludes line numbers. Readers can access official commentary about the act and detailed suggestions about how to implement the Act vis-à-vis existing business entity laws at this Web address: http://www.law.upenn.edu/bll/archives/ulc/ueta/2007_final.htm or at www.nccusl.org.

Submitted as:
Kansas
SB 132
Status: Enacted into law in 2009.

Comment:

Notes about ULC Acts:

For information on the specific drafting rules used by the ULC, the ULC *Procedural and Drafting Manual* is available online at www.nccusl.org.

In general, the use of bracketed language in ULC acts indicates that a choice must be made between alternate bracketed language, or that specific language must be inserted into the empty brackets. For example: "An athlete agent who violates Section 14 is guilty of a [misdemeanor] [felony] and, upon conviction, is punishable by [ ].

A word, number, or phrase, or even an entire section, may be placed in brackets to indicate that the bracketed language is suggested but may be changed to conform to state usage or requirements, or to indicate that the entire section is optional. For example: "An applicant for registration shall submit an application for registration to the [Secretary of State] in a form prescribed by the [Secretary of State]. [An application filed under this section is a public record.] The application must be in the name of an individual, and, except as otherwise provided in subsection (b), signed or otherwise authenticated by the applicant under penalty of perjury."

The sponsor may need to be consulted when dealing with bracketed language.

Questions about META?

Deliveries to: 129 6th St., Rm. 329

MEMORANDUM March 24, 2011

SUBJECT: Sectional summary of SB 101 relating to the Alaska Entity Transactions Act (Work Order No. 27-LS0437\A)

TO: Senator Joe Paskvan
Attn: Jeff Stepp

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. In this sectional summary, "new chapter" or "chapter" means the Alaska Entity Transactions Act to be numbered AS 10.55, and "department" means the Department of Commerce, Community, and Economic Development. Please be aware that many terms in the new chapter are defined at the end of the new chapter.

Section 1. Conforming change (AS 10.26.670 repealed).

Section 2. Adds two sections to the article on organic change in AS 10.06, the for-profit corporations chapter. Sec. 10.06.595 allows, with exceptions, corporations to enter into mergers, interest exchanges, conversions, or domestications under the new chapter (the Alaska Entity Transactions Act). States that specific provisions do not apply to certain transactions covered by the new chapter. Sec. 10.06.600 defines terms for the article to conform to the application of the new chapter.

Section 3. Conforming and editorial change (AS 10.15.450 repealed).

Section 4. Adds AS 10.20.285 as a new section in the nonprofit corporations chapter to state that a corporation may, under the new chapter, enter into mergers, interest exchanges, conversions, and domestications that are not covered by certain sections of the nonprofit corporations chapter.

Section 5. Adds AS 10.30.058 as a new section in the chapter on cemetery organizations to state that cemetery associations and nonprofit cemetery corporations may enter into mergers, interest exchanges, conversions, and domestications under the new chapter.

Section 6. Adds a new section to the chapter on religious corporations (AS 10.40) to state that a corporation formed under AS 10.40 may enter into mergers, interest exchanges, conversions, and domestications under the new chapter.

Section 7. Amends AS 10.45.240, a section of the professional corporations chapter, to state that the provision in the state's for-profit corporations code relating to entering into mergers, interest exchanges, conversions, and domestications under the new chapter applies to professional corporations.

Section 8. Adds a new section to the limited liability company chapter to state that a limited liability company may, under the new chapter, enter into mergers, interest exchanges, conversions, and domestications that are not covered by certain sections of the limited liability company chapter.

Section 9. Conforming change (AS 10.50.570 has been repealed).

Section 10. Adds definitions to AS 10.50, the chapter on limited liability companies, conforming to the application of the new chapter.

Section 11. Adds the new chapter containing the Alaska Entity Transactions Act.

Sec. 10.55.103. Indicates how the new chapter relates to other laws, including principles of law and equity.

Sec. 10.55.104. Requires entities to satisfy certain governmental notice or approval requirements for mergers when involved in an interest exchange, conversion, or domestication. Addresses the diversion of property held for charitable purposes.

Sec. 10.55.105. Includes a filing under the chapter in an entity's public record.

Sec. 10.55.106. Provides that achieving a result under the new chapter does not prevent achieving the same result under another law.

Sec. 10.55.107. Allows a transaction plan (under certain conditions) to refer to facts that can be found outside the plan, even if the facts are not within the control of a party to the transaction.

Sec. 10.55.108. States that approval of a transaction by the unanimous vote or consent of an entity's interest holders satisfies the chapter's transaction approval requirements, unless, for a domestic entity, the organic law or organic rules state otherwise.

Sec. 10.55.109. Addresses when dissenters' rights are available to an interest holder. As a default provision, states that the interest holder may use the procedures under AS 10.06.576.

Sec. 10.55.110. Lists the entities that may not take part in a transaction under the chapter. Includes, among others, financial institutions and insurers.

Sec. 10.55.120. Requires that the name that a domestic entity takes under this chapter comply with certain requirements.

Sec. 10.55.201. Provides the general authorization for mergers. Lists certain excluded transactions.

Sec. 10.55.202. States that a domestic entity may become a party to a merger by approving a plan of merger. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.203. States that a plan of merger is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.204. Describes how a plan merger for a domestic merging entity may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of merger has become effective or been filed.

Sec. 10.55.205. Requires a statement of merger to be signed and filed with the department. Identifies what the statement of merger must contain and allows it to contain any other provision not prohibited by law. Requires, if a domestic entity is the surviving entity, that the surviving entity's public organic document satisfy this state's requirements, with certain exceptions. Allows a signed plan of merger with the required contents to be filed with the department instead of a statement of merger and to have the same effect as a statement of merger. States when the statement of merger becomes effective.

Sec. 10.55.206. Lists the effects of a merger on the entities involved. States, with exceptions, that a merger does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability when a merger becomes effective. For foreign entities that are the surviving entities, allows for service of process on the entity regarding liabilities and provides for appointment of the department as the entity's agent for the service of process. When a merger becomes effective, cancels the foreign qualification of a foreign merging entity that is not the surviving entity.

Sec. 10.55.301. Provides the general authorization for a domestic or foreign entity to acquire the interests of other entities or for its interests to be acquired by other entities. Conditions the foreign entity's authorization on the authorization of the foreign entity's jurisdiction or organization. Provides a special interest exchange rule for certain protected agreements that have domestic entity merger provisions but no interest exchange provisions. Excludes certain share exchanges under AS 10.06 (the for-profit corporations code).

Sec. 10.55.302. States that a domestic entity may be an acquired entity in an interest exchange by approving an interest exchange plan. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.303. States that a plan of interest exchange is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.304. Describes how an interest exchange plan for a domestic acquired entity may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of interest exchange has become effective or been filed.

Sec. 10.55.305. Requires a statement of interest exchange to be signed and filed with the department. Identifies what the statement of interest exchange must contain and allows it to contain any other provision not prohibited by law. Allows, for a domestic acquired entity, a signed plan of interest exchange with the required contents to be filed with the department instead of a statement of interest exchange and to have the same effect as a statement of interest exchange. States when the statement of interest exchange becomes effective.

Sec. 10.55.306. Lists the effects of an interest exchange on the entities involved. States, with exceptions, that an interest exchange does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability.

Sec. 10.55.401. Provides the general authorization for conversion of domestic and foreign entities. Conditions the conversion authorization of foreign entities to the law of the foreign jurisdiction. Provides a special rule for certain protected agreements that have domestic entity merger provisions but no conversion provisions.

Sec. 10.55.402. States that a domestic entity may convert to a different type of entity by approving a plan of conversion. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.403. States that a plan of conversion is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.404. Describes how a plan of conversion may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of conversion has become effective or been filed. Indicates what the statement of abandonment must contain when done after a statement of conversion is filed but the filing is not yet effective.

Sec. 10.55.405. Requires a statement of conversion to be signed and filed with the department. Identifies what the statement of conversion must contain and allows it to contain any other provision not prohibited by law. Requires, if the converted entity is a domestic entity, the entity's public organic document to satisfy this state's requirements, with certain exceptions. Allows, for a domestic converting entity, a signed plan of conversion with the required contents to be filed with the department instead of a statement of conversion and to have the same effect as a statement of conversion. States when a statement of conversion becomes effective.

Sec. 10.55.406. Lists the effects of a conversion on the entities involved. States, with exceptions, that a conversion does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability. Provides that a foreign entity that is the converted entity may be served with process in this state regarding liabilities and appoints the commissioner as the agent to receive the process. Provides that the foreign qualification of a converting entity that is a qualified foreign entity is cancelled when the conversion becomes effective. Provides that a conversion does not require an entity to wind up its affairs and does not constitute or cause a dissolution of the entity.

Sec. 10.55.501. Provides the general authorization for a domestic entity to become a foreign entity of the same type, if the law of the foreign jurisdiction authorizes the domestication. Provides the general authorization for a foreign entity to become a domestic entity of the same type in this state, if the law of the foreign jurisdiction authorizes the domestication. Provides a special rule for certain protected agreements that have merger provisions relating to domestic entities but no domestication provisions.

Sec. 10.55.502. States that a domestic entity may become a foreign entity in a domestication by approving a plan of domestication. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.503. States that a plan of domestication is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.504. Describes how a plan of domestication of a domestic entity may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of conversion has become effective or been filed. Indicates what the statement of abandonment must contain after the statement of conversion has been filed.

Sec. 10.55.505. Requires a statement of domestication to be signed and filed with the department. Identifies what the statement of domestication must contain and allows it to contain any other provision not prohibited by law. Requires, if the domesticated entity is a domestic entity, the entity's public organic document to satisfy this state's requirements, with certain exceptions. Allows, for a domestic domesticating entity, a signed plan of domestication with the required contents to be filed with the department instead of a statement of domestication and to have the same effect as a statement of domestication. States when a statement of domestication becomes effective.

Sec. 10.55.506. Lists the effects of a domestication for the entities involved. States, with exceptions, that a domestication does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability. Provides that a foreign entity that is the domesticated entity may be served with process in this state regarding liabilities and appoints the commissioner as the agent to receive process. Provides that the foreign qualification of a domesticating entity that is a qualified foreign entity is cancelled upon

domestication. Provides that a domestication does not require an entity to wind up its affairs and does not constitute or cause a dissolution.

Sec. 10.55.601. States the requirements for a document to meet in order to be entitled to be filed by the department under this chapter. Requires payment, or arrangement for payment, of the filing fee and any other required tax, license fee, or penalty.

Sec. 10.55.602. Allows the department to establish and furnish non-mandatory forms for the documents filed under this chapter.

Sec. 10.55.603. Directs the department to collect fees for being served with process, for copying documents, for certifying documents, and for filing documents under this chapter. Directs the department to establish the amount of the fees by regulation.

Sec. 10.55.604. Establishes when a document accepted for filing becomes effective.

Sec. 10.55.605. Allows an entity to correct a filed document under certain circumstances. Indicates how to make the correction. States when the correction is effective.

Sec. 10.55.606. Directs the department to file eligible documents. Indicates how the department is to file a document. Addresses the situation when the department refuses to file a document. Describes the department filing duty as ministerial and as not affecting the validity of the document or the correctness of the information in the document, and as not creating a presumption of validity, invalidity, or information correctness or incorrectness.

Sec. 10.55.607. Allows an appeal if the department refuses to file a document. Allows the court's decision to be appealed as in other civil proceedings.

Sec. 10.55.608. Provides that a department certificate (delivered with a copy of the filed document) conclusively establishes that the original is on file.

Sec. 10.55.609. Establishes a criminal penalty for signing a document knowing it is false for delivery to the department.

Sec. 10.55.610. Allows the department to submit interrogatories (formal questions) to an entity that is a party to a transaction to determine if the entity has complied with the chapter. Indicates when the answers are due and establishes certain criteria for the answers, including who is to answer the questions. Allows a court petition to be filed about the due date, modification, or setting aside of the questions.

Sec. 10.55.615. Establishes that the questions requested by the department and the answers are confidential. Establishes when the department may disclose information from them.

Sec. 10.55.620. Establishes a criminal penalty for failing to answer interrogatories from the department. Allows the department to delay or base its filing of a document on receiving proper answers and on the information in the answers.

Sec. 10.55.625. Gives the department the necessary power to implement the chapter.

Sec. 10.55.701. Requires that, when applying and construing this chapter, consideration must be given to promoting consistency among enacting states.

Sec. 10.55.702. Indicates how the chapter relates to the Electronic Signatures in Global and National Commerce Act.

Sec. 10.55.901. Defines terms for the new chapter.

Sec. 10.55.902. Gives the new chapter a short title: Alaska Entity Transactions Act.

Section 12. Amends a section in the partnership chapter to create an exception for the new chapter relating to the consent required to become a partner.

Section 13. Amends a section in the partnership chapter to create an exception for the new chapter that relates to a partner's transferable interest. States that a partner's interest is personal property, whether or not transferable.

Section 14. Conforming change (AS 32.06.902, 32.06.903, and 32.06.904 are repealed).

Section 15. Conforming change (AS 32.06.902, 32.06.903, and 32.06.904 are repealed).

Section 16. Amends the partnership chapter to remove the ability of a partnership to merge with a limited partnership under that chapter.

Section 17. Amends the partnership chapter to conform merger plans to the change in bill section 16.

Section 18. Amends the partnership chapter to conform the merger approval requirements to the change in bill section 16.

Section 19. Amends the partnership chapter to provide that a merger between a partnership and another form of entity is covered by the new chapter.

Section 20. Amends the partnership chapter to conform the provisions about the effect of a merger to the change in bill section 16.

Section 21. Amends the partnership chapter to conform the statement of merger to the change in bill section 16.

Section 22. Conforming change (AS 32.06.902, 32.06.903, and 32.06.904 are repealed). Deletes reference to AS 32.06.908. States that partnerships or limited partnerships may

enter into mergers, interest exchanges, conversions, and domestications under the new chapter or in any other manner provided by law.

Section 23. Adds a definition of "domestic limited liability partnership."

Section 24. Adds definitions to the partnership chapter.

Section 25. Adds a provision allowing for amending a limited partnership certificate by filing a plan of merger, interest exchange, conversion, or domestication under the new chapter.

Section 26. Amends the limited partnership chapter to state that a partner's interest is personal property, whether or not the interest is transferable.

Section 27. Amends the limited partnership chapter to require that a limited partnership keep at its office a copy of any statement of merger, interest exchange, conversion, or domestication filed under the new chapter.

Section 28. Amends the limited partnership chapter to remove conversions from the application of the partnership chapter (AS 32.06) and to make the application of AS 32.06 to cases not covered by the limited partnership chapter subject to the new chapter.

Section 29. Amends the limited partnership chapter to change the definition of "limited partnership" to exclude certain entities and to limit the term to entities under the chapter.

Section 30. Repeals certain statutes.

Section 31. Describes how certain changes in the bill make indirect court rule amendments.

Section 32. Allows the department to get started on regulations for the Act.

Section 33. Provides a saving clause for actions and proceedings that are begun, or rights that have accrued, before the bill's effective date.

Section 34. Makes bill section 32 go into effect immediately.

Section 35. Gives the bill, except as provided in sec. 34, an effective date of July 1, 2013.

If I may be of further assistance, please advise.

Sen.Joe.Paskvan@legis.state.ak.us

Dear Senator Paskvan:

I am writing in support of Senate Bill 304. Senate Bill 304 will create a statutory framework to facilitate corporate transactions between different types of legal entities. Under current law, transactions which involve a merger, sale or transfer of certain assets where a limited liability company in a party to the transaction require additional steps, cost and complexity. The current problems with transactions between limited liability companies and certain other limited liability entities are not based on sound policy; they are simply a result of the accumulation of unresolved issues. Adoption by Alaska of the Model Entity Transaction Act will remove unnecessary steps to such transactions.

As Doyon has grown, its corporate structure has grown more complex. The passage of Senate Bill 304 will help to take some of the unnecessary complexity out of transactions, and will avoid the need to incorporate in other jurisdictions where the laws are better defined for complex transactions.

Respectfully submitted,

Norman L. Phillips, Jr.

SB 104 – MOBILE HOMES AS REAL PROPERTY

Sponsor Statement

Senate Bill 104 establishes procedures to convert manufactured homes to real property, through a defined process within the Division of Motor Vehicles. This change will give the owners of manufactured homes better access to traditional mortgage financing, which often features lower interest rates.

Currently, when a manufactured home is affixed to a permanent foundation on land owned by an individual, the vaguely defined title surrender procedure used by the Division of Motor Vehicles lacks a record notice. Without a record notice, homeowners are often left with unmarketable titles, and lenders hold unperfected security interests in the property, placing all parties in a real estate transaction – the buyer, the lender, and the seller - at risk.

Conversion will help increase home values for consumers, give security to lenders and provide fixed procedures for the DMV to follow. Nothing requires the conversion of a manufactured home in the legislation, leaving that choice to consumers.

Many Alaskans live in manufactured homes. This legislation treats residents that permanently affix a manufactured home to land they own the same as if their home was built on the property. I urge you to support this fair legislation.

CS FOR SENATE BILL NO. 104(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR FRENCH

A BILL

FOR AN ACT ENTITLED

"An Act relating to manufactured homes, including manufactured homes permanently affixed to land, to the conversion of manufactured homes to real property, to the severance of manufactured homes from real property, to the titling, conveyance, and encumbrance of manufactured homes, and to manufacturers' certificates of origin for vehicles; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

FINDINGS AND PURPOSE. (a) The legislature finds the legal status of manufactured homes affixed or to be affixed to real property in the state needs to be clarified.

(b) The purpose of this Act is to establish a clear statutory procedure for

(1) converting to real property manufactured homes that are affixed to real property; and

(2) severing manufactured homes from real property.

* **Sec. 2.** AS 06.05.207 is amended by adding a new subsection to read:

(c) In this section, "real property" includes a manufactured home that has become real property under AS 34.85.010. In this subsection, "manufactured home" has the meaning given in AS 45.29.102.

* **Sec. 3.** AS 06.15.250 is amended by adding a new subsection to read:

(b) In this section, "real property" includes a manufactured home that has become real property under AS 34.85.010. In this subsection, "manufactured home" has the meaning given in AS 45.29.102.

* **Sec. 4.** AS 06.45.060(5)(A) is amended to read:

(A) loans to members shall be made in conformity with regulations adopted by the commissioner, except that

(i) a residential real estate loan that is made to finance the acquisition of a one- to four-family dwelling for the principal residence of a credit union member that is secured by a first lien on the dwelling may have a maturity not exceeding 30 years;

(ii) a loan to finance the purchase of a **manufactured** [MOBILE] home that is secured by a first lien on the **manufactured** [MOBILE] home, to be used as the residence of a credit union member, or for the repair, alteration, or improvement of a residential dwelling that is the residence of a credit union member must have a maturity not to exceed 20 years unless the loan is insured or guaranteed under (iii) of this subparagraph;

(iii) a loan secured by the insurance or guarantee of the federal government, of a state government, or an agency of either may be made for the maturity and under the terms and conditions specified in the law under which the insurance or guarantee is provided;

(iv) a loan or aggregate of loans to a director or member of the supervisory or credit committee of the credit union making the loan that exceeds $20,000 plus pledged shares shall be approved by the board of directors;

(v) loans to other members for which directors or members of the supervisory or credit committee act as guarantor or endorser shall be approved by the board of directors when the loans standing alone or when added to an outstanding loan or loans of the guarantor or endorser exceed $20,000;

(vi) the rate of interest may not exceed the greater of 15 percent a year or the rate specified in AS 45.45.010(b);

(vii) the taking, receiving, reserving, or charging of a rate of interest greater than is allowed by this paragraph, when knowingly done, is considered a forfeiture of the entire interest that the note, bill, or other evidence of debt carries with it, or that has been agreed to be paid on the note, bill, or other evidence of debt; if a greater rate of interest has been paid, the person by whom it has been paid or the person's legal representatives may recover back from the credit union taking or receiving it the entire amount of interest paid, but the action must be commenced within two years from the time the usurious collection was made;

(viii) a borrower may repay a loan before maturity in whole or in part on any business day without penalty;

(ix) loans shall be paid or amortized under regulations adopted by the commissioner that consider the needs or conditions of the borrowers, the amounts and duration of the loans, the interests of the members and the credit union, and other factors established in regulations adopted by the commissioner;

(x) the total dollar amount of real estate loans and **manufactured** [MOBILE] home loans outstanding may not exceed 25 percent of the assets of the credit union without the written approval of the commissioner;

(xi) a credit union with assets of less than $3,000,000 may make real estate loans with maturities in excess of 15 years only with the approval of the commissioner;

* **Sec. 5.** AS 06.45.060 is amended by adding a new subsection to read:

(b) In this section, "manufactured home" has the meaning given in AS 45.29.102.

* **Sec. 6.** AS 06.60.990(33) is amended to read:

(33) "residential mortgage loan" means a loan that is primarily for personal, family, or household use and that is secured by a mortgage, deed of trust, or other equivalent consensual security interest on a dwelling or residential real estate located in the state; in this paragraph,

(A) "manufactured home" has the meaning given in AS 45.29.102;

(B) "residential real estate" means real property on which a dwelling is constructed or intended to be constructed**, including a manufactured home that has become real property under AS 34.85.010**;

* **Sec. 7.** AS 09.45 is amended by adding a new section to read:

Article 13. General Provisions.

Sec. 09.45.990. Definitions. In this chapter,

(1) "manufactured home" has the meaning given in AS 45.29.102;

(2) "real property" includes a manufactured home that has become real property under AS 34.85.010.

* **Sec. 8.** AS 28.05.061(a) is amended to read:

(a) The Department of Administration shall file, maintain, and appropriately index records of

(1) vehicle registrations under AS 28.10.071(a) - (c);

(2) stolen, converted, recovered, and unclaimed vehicles under AS 28.10.071(d);

(3) titles and documents creating and evidencing liens or encumbrances under AS 28.10.381;

(4) abandoned vehicles under AS 28.11.030(c); [AND]

(5) driver's license and driving records under AS 28.15.151**;**

(6) applications under AS 28.10.262 for cancellation of a manufacturer's certificate of origin for a manufactured home;

(7) applications under AS 28.10.263 for cancellation of a certificate of title to a manufactured home;

(8) applications under AS 28.10.264 for confirmation of the nonapplication of AS 28.10 to a manufactured home;

(9) applications under AS 28.10.265 for a certificate of title to a severed manufactured home;

(10) manufacturer's certificates of origin accepted for cancellation by the department under AS 28.10.262 for a manufactured home; and

(11) certificates of title accepted for cancellation by the department under AS 28.10.263 for a manufactured home.

*** Sec. 9.** AS 28.05.061 is amended by adding new subsections to read:

(e) For cancelled manufacturer's certificates of origin, cancelled certificates of title, or applications for confirmation filed under (a)(8), (10), or (11) of this section, the department's record must state

(1) the name of each owner of the manufactured home;

(2) the date the manufacturer's certificate of origin or the certificate of title was accepted for cancellation if the certificate was cancelled under (a)(10) or (11) of this section; and

(3) the recording information for the affixation affidavit required by AS 28.10.266.

(f) For applications for certificates of title under (a)(9) of this section, the department's record must state the name of each owner of the manufactured home and the recording information for the severance affidavit recorded under AS 40.17.125.

(g) In this section, "recording information" means the district where the affidavit was recorded, and the date and serial numbers of the affidavit's recording in the recording district.

*** Sec. 10.** AS 28.10.201(b) is amended to read:

(b) The owner of a vehicle described in AS 28.10.011 as being exempt from registration and the owner of a snowmobile or off-highway vehicle may not apply for, nor may the department issue, a certificate of title for the vehicle. However, the department

(1) may issue a certificate of title to the owner of a vehicle exempt from registration under AS 28.10.011(3), (6), (7), or (10) only upon application by that owner; and

(2) **except as provided in (e) of this section,** shall issue a certificate of title to the owner of a **manufactured** [MOBILE] home upon application, display of evidence of ownership satisfactory to the department, and payment of a fee of $100 by the owner; a certificate of title issued under this paragraph must comply with AS 28.10.231.

* **Sec. 11.** AS 28.10.201 is amended by adding a new subsection to read:

(e) The department may not issue a certificate of title to a manufactured home if an application for the manufactured home has been filed under AS 28.10.262 - 28.10.264.

* **Sec. 12.** AS 28.10.211(c) is amended to read:

(c) When an application for title refers to a new vehicle, the application must be accompanied by a "manufacturer's **certificate** [STATEMENT] of origin" and other information reasonably required by the department.

* **Sec. 13.** AS 28.10.211 is amended by adding a new subsection to read:

(f) The holder of a manufacturer's certificate of origin for a manufactured home may deliver the certificate to any person to facilitate conveying or encumbering the manufactured home, and a person who receives the manufacturer's certificate of origin holds it in trust for the person delivering it.

* **Sec. 14.** AS 28.10.221 is amended by adding a new subsection to read:

(d) Except as provided in AS 28.10.263, the department may not suspend or revoke a certificate of title to a manufactured home based on the fact that the manufactured home is affixed in any manner to real property.

* **Sec. 15.** AS 28.10.261 is amended by adding a new subsection to read:

(c) Notwithstanding another provision of law to the contrary, a certificate of title to a manufactured home issued by the department is prima facie evidence of the facts appearing on it, even if the manufactured home is affixed in any manner to real property.

* **Sec. 16.** AS 28.10 is amended by adding new sections to article 2 to read:

Sec. 28.10.262. Cancellation of manufacturer's certificate of origin for manufactured home. (a) If a manufactured home is permanently affixed to real property under AS 34.85.150, or if the owner intends to permanently affix the manufactured home to real property under AS 34.85.150, the owner may submit to the department an application requesting that the department cancel the manufacturer's certificate of origin for a manufactured home and update the department's records under AS 28.05.061.

(b) The application under (a) of this section must comply with AS 28.10.266.

(c) Subject to AS 28.05.041, if the department is satisfied that the application filed under (a) of this section complies with (b) of this section, the department shall cancel the manufacturer's certificate of origin for the manufactured home, update the department's records under AS 28.05.061, and issue a written acknowledgment that the department has cancelled the certificate of origin under this section. The department shall deliver the written acknowledgment to the owner of the manufactured home and to a person identified under AS 28.10.266(12).

(d) When the department has cancelled the manufacturer's certificate of origin under (c) of this section, the manufactured home is not subject to this chapter.

Sec. 28.10.263. Cancellation of certificate of title to manufactured home. (a) If a manufactured home is permanently affixed to real property under AS 34.85.150, or if the owner intends to permanently affix the manufactured home to real property under AS 34.85.150, the owner may submit to the department an application requesting that the department cancel the certificate of title to a manufactured home and update the department's records under AS 28.05.061.

(b) The application under (a) of this section must comply with AS 28.10.266.

(c) Subject to AS 28.05.041, if the department is satisfied that the application filed under (a) of this section complies with (b) of this section and that there are no outstanding liens or encumbrances filed against the manufactured home under AS 28.10.381, the department shall cancel the certificate of title to the manufactured home, update the department's records under AS 28.05.061, and issue a written acknowledgment that the department has cancelled the certificate of title under this section. The department shall deliver the written acknowledgment to the owner of the

manufactured home and to a person identified under AS 28.10.266(12).

(d) When the department has cancelled a certificate of title under (c) of this section, the manufactured home is not subject to this chapter.

Sec. 28.10.264. Confirmation of nonapplication of chapter. (a) The owner of a manufactured home may submit an application to the department requesting that the department indicate on the department's records that the manufactured home is not subject to this chapter if

(1) the manufactured home is permanently affixed to real property under AS 34.85.150, or the owner intends to permanently affix the manufactured home to real property under AS 34.85.150; and

(2) the manufactured home

(A) is not covered by a manufacturer's certificate of origin or a certificate of title;

(B) is covered by a manufacturer's certificate of origin, but the owner of the manufactured home, after diligent search and inquiry, is unable to produce the certificate of origin; or

(C) is covered by a certificate of title, but the owner of the manufactured home, after diligent search and inquiry, is unable to produce the certificate of title.

(b) The application under (a) of this section must comply with AS 28.10.266 and be accompanied by a bond or cash deposit described in (c) of this section.

(c) The bond that accompanies the application under (b) of this section must be in the form prescribed by the department and executed by the applicant. The amount of the bond or cash deposit that accompanies the application under (b) of this section must be equal to one and one-half times the value of the manufactured home as determined by the department and must be conditioned to indemnify former owners, secured parties, and subsequent purchasers of the manufactured home and their successors against loss resulting from a defect in or undisclosed security interest on the title of the applicant. An injured party may bring a court action against the bond or cash deposit for a breach of the conditions of the bond or cash deposit, but the liability of the bond surety or the department may not exceed the amount of the bond or cash

deposit. The department shall return the bond or cash deposit at the end of three years after the submission under (b) of this section, except that service on the department of notice that an action is pending against the bond or cash deposit extends that period until 45 days after a final decision in the action on the bond or cash deposit.

(d) If the department is satisfied that the application filed under (a) of this section complies with (b) of this section, the department shall, subject to AS 28.05.041, indicate under AS 28.05.061 on the department's records that the manufactured home is not subject to this chapter and shall provide to the owner a written confirmation that the owner of the manufactured home has submitted an application that complies with (b) of this section and that the manufactured home is not subject to this chapter. The department shall deliver the written confirmation to the owner of the manufactured home and to a person identified under AS 28.10.266(12).

(e) When the department has provided a written confirmation under (d) of this section, the manufactured home is not subject to this chapter.

Sec. 28.10.265. Certificate of title to severed manufactured home. (a) The owner of a manufactured home may submit an application to the department requesting that the department issue a certificate of title to a manufactured home and update the department's records under AS 28.05.061 if

(1) the manufactured home was permanently affixed to real property under AS 34.85.150;

(2) an affixation affidavit was recorded for the manufactured home under AS 40.17.125; and

(3) after the occurrence of (1) and (2) of this subsection, the manufactured home was severed from the real property to which it was affixed.

(b) The application under (a) of this section must comply with AS 28.10.266.

(c) Subject to AS 28.05.041, if the department is satisfied that the application filed under (a) of this section complies with (b) of this section, the department shall issue a certificate of title to the manufactured home under AS 28.10.231 - 28.10.241, update the department's records under AS 28.05.061, and issue to the owner and to a person identified under AS 28.10.266(12) a written acknowledgment that the department has issued a certificate of title under this section.

(d) When the department has issued a certificate of title under (c) of this section, the manufactured home is subject to this chapter.

Sec. 28.10.266. Application provisions. An application under AS 28.10.262 - 28.10.265 must provide

(1) the name, residence, and mailing address of the owner of the manufactured home;

(2) a description of the manufactured home, including the name of the manufacturer, the make, the model name, the model year, the manufacturer's serial number for the manufactured home, and other information required by the department about the manufactured home;

(3) whether the manufactured home is new or used;

(4) for an application under AS 28.10.262 - 28.10.264, the date of purchase by the owner of the manufactured home and the name and address of the person from whom the home was acquired;

(5) for an application under AS 28.10.262 - 28.10.264, the name and address of any person who holds a lien or an encumbrance against the manufactured home and the order of apparent priority;

(6) a statement signed by the owner, stating

(A) any facts or information known to the owner that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on it; or

(B) that the owner does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home;

(7) subject to AS 28.10.268, for an application under AS 28.10.262 - 28.10.264, a certified copy of an affixation affidavit that complies with AS 34.85.060 and that has been recorded under AS 40.17.125 for the manufactured home;

(8) for an application under AS 28.10.265, a certified copy of a severance affidavit that complies with AS 34.85.120 and that has been recorded under AS 40.17.125 for the manufactured home;

(9) for an application under AS 28.10.262, the original manufacturer's

certificate of origin;

(10) for an application under AS 28.10.263, the original certificate of title;

(11) for an application under AS 28.10.264 or 28.10.265, a declaration that complies with AS 28.10.267;

(12) if desired by the applicant, the name and mailing address of one person, in addition to the owner, to receive a written acknowledgment from the department under AS 28.10.262, 28.10.263, or 28.10.265 or a written confirmation under AS 28.10.264; and

(13) other information and documents the department reasonably requires

(A) to identify the owner of the manufactured home;

(B) to determine the existence or nonexistence of liens or encumbrances on the manufactured home;

(C) for an application under AS 28.10.262 - 28.10.264, to enable the department to determine whether the owner satisfied the applicable requirements of AS 34.85.010; and

(D) for an application under AS 28.10.265, to enable the department to determine whether the owner of the manufactured home is entitled to a certificate of title.

Sec. 28.10.267. Declaration. (a) The declaration required by AS 28.10.266(11) must be made under oath or affirmation by an attorney authorized under AS 08.08 to practice law in the state or an agent of a title insurance company entitled under AS 21.66 to transact a title insurance business in this state.

(b) The declaration must state that the manufactured home is free and clear of all liens and encumbrances and

(1) any facts or information known to the attorney or agent that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; or

(2) that the attorney or agent does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the

existence or nonexistence of a lien or encumbrance on the manufactured home.

Sec. 28.10.268. Time of satisfaction. If a person delivers an application under AS 28.10.262 - 28.10.264 for a manufactured home to the department within 30 days after an affixation affidavit for the manufactured home is recorded under AS 40.17.125, and if the application is accepted by the department, the requirements of AS 28.10.262 - 28.10.264 are considered to be satisfied on the date the affixation affidavit is recorded, and, if the manufactured home is conveyed or encumbered on and after that date, the manufactured home shall be conveyed and encumbered as real property.

Sec. 28.10.269. Definitions. In AS 28.10.201 - 28.10.269, unless the context indicates otherwise,

(1) "affixation affidavit" means an affixation affidavit under AS 34.85.060;

(2) "severance affidavit" means a severance affidavit under AS 34.85.120.

*** Sec. 17.** AS 28.10.371 is amended by adding new subsections to read:

(b) Notwithstanding (a) of this section, a lien on a manufactured home for the purchase of the manufactured home is valid against judicial lien creditors and execution creditors on and after the date the lien attaches under AS 45.29 against the manufactured home.

(c) Notwithstanding (a) of this section, the holder of a lien on a manufactured home may deliver a lien release document to a person to facilitate conveying or encumbering the manufactured home. A person receiving the lien release document holds the document in trust for the lienholder.

*** Sec. 18.** AS 28.10.381 is amended by adding a new subsection to read:

(c) Except as otherwise provided in AS 28.10.262, 28.10.263, and AS 34.85, after a certificate of title to a manufactured home has been issued and while the manufactured home is subject to a lien or encumbrance under (a) of this section,

(1) the department may not cancel the manufacturer's certificate of origin for the manufactured home under AS 28.10.262, or cancel the certificate of title to the manufactured home under AS 28.10.263; and

(2) the validity and priority of the lien or encumbrance continues.

* **Sec. 19.** AS 28.10.391 is amended by adding a new subsection to read:

(e) Notwithstanding another provision of this section, the creation or termination of a lien or encumbrance with respect to a manufactured home that has been converted to real property under AS 34.85.010 is governed by the laws that apply to real property.

* **Sec. 20.** AS 28.10.661(2) is amended to read:

(2) "vehicle" includes mobile homes for the purposes of provisions relating to certificates of title**; in this paragraph, "mobile home" means a manufactured home**.

* **Sec. 21.** AS 28.10.661 is amended by adding a new paragraph to read:

(3) "manufactured home" has the meaning given in AS 45.29.102.

* **Sec. 22.** AS 29.45.070 is amended to read:

Sec. 29.45.070. Mobile homes. Mobile homes, trailers, house trailers, trailer coaches, and similar property used or intended to be used for residential, office, or commercial purposes and **permanently affixed** [ATTACHED] to **real property under AS 34.85.150** [THE LAND OR CONNECTED TO WATER, GAS, ELECTRIC, OR SEWAGE FACILITIES] are classified as real property for tax purposes unless expressly classified as personal property by ordinance. This section does not apply to house trailers and mobile homes that are unoccupied and held for sale by persons engaged in the business of selling mobile homes. **In this section, "mobile home" has the meaning given to "manufactured home" in AS 45.29.102.**

* **Sec. 23.** AS 34.03.360 is amended by adding a new paragraph to read:

(23) "mobile home" has the meaning given to "manufactured home" in AS 45.29.102.

* **Sec. 24.** AS 34.70.200(3) is amended to read:

(3) "residential real property" means real property whose primary purpose is to provide a single-family dwelling, or two single-family dwellings in one building**, including a manufactured home that has become real property under AS 34.85.010; in this paragraph, "manufactured home" has the meaning given in AS 45.29.102**;

* **Sec. 25.** AS 34.80.090(6) is amended to read:

(6) "residential real property" means real property on which there are one to four attached or detached dwelling units, or any number of apartments if the apartments are in a horizontal property regime formed under AS 34.07 or any number of units if the units are in a common interest community created under AS 34.08; **"residential real property" includes a manufactured home that has become real property under AS 34.85.010; in this paragraph, "manufactured home" has the meaning given in AS 45.29.102;**

* **Sec. 26.** AS 34 is amended by adding a new chapter to read:

Chapter 85. Manufactured Home Property Act.

Sec. 34.85.010. Real property characterization. A manufactured home becomes real property if

(1) the home is permanently affixed to land under AS 34.85.150;

(2) an affixation affidavit has been recorded under AS 40.17.125;

(3) the ownership interests in the manufactured home and in the real property to which the manufactured home is permanently affixed are identical, except as provided by AS 34.85.040; and

(4) the manufactured home is

(A) covered by a manufacturer's certificate of origin that the owner of the manufactured home is able to produce, and the department has cancelled the manufacturer's certificate of origin under AS 28.10.262;

(B) covered by a certificate of title that the owner of the manufactured home is able to produce, and the department has cancelled the certificate of title under AS 28.10.263; or

(C) not covered by a manufacturer's certificate of origin or a certificate of title, or if the manufactured home is covered by a manufacturer's certificate of origin or a certificate of title but the owner of the manufactured home, after diligent search and inquiry, was unable to produce the manufacturer's certificate of origin or certificate of title, and the department has provided a written confirmation under AS 28.10.264.

Sec. 34.85.020. Effect of real property characterization. (a) When a

manufactured home becomes real property under AS 34.85.010, a mortgage, deed of trust, lien, or security interest that can attach to land, buildings erected on land, or fixtures affixed to land or buildings attaches to the manufactured home in the same manner as if the manufactured home were built from ordinary building materials on the land where the manufactured home is located.

(b) If the title to a manufactured home is transferred after the manufactured home becomes real property under AS 34.85.010, title to the manufactured home, together with the land to which the converted manufactured home is affixed, shall be transferred by deed or other form of conveyance that is effective to transfer an interest in real property.

(c) When a manufactured home becomes real property under AS 34.85.010, the manufactured home is governed by the laws applicable to real property in effect on the date the manufactured home satisfies AS 34.85.010.

Sec. 34.85.040. Ownership interest exception. If the owner of a manufactured home is not the owner of the real property on which the manufactured home is located, the requirement under AS 34.85.010(3) that the ownership interests be identical is satisfied if the owner possesses the real property under

(1) a lease in a recordable form that has a term that continues for at least 20 years after the date of execution of the affixation affidavit; and

(2) the lessor of the real property consents.

Sec. 34.85.060. Affixation affidavit requirements. An affixation affidavit must provide

(1) the name of the manufacturer, the make, the model name, the model year, the dimensions, and the manufacturer's serial number of the manufactured home;

(2) whether the manufactured home is new or used;

(3) a statement that the person executing the affidavit is

(A) the owner of the real property described in the affixation affidavit; or

(B) not the owner of the real property described in the affixation affidavit, and the person

(i) is in possession of the real property under a lease in recordable form that has a term that continues for at least 20 years after the date of execution of the affidavit; and

(ii) the lessor of the real property consents;

(4) if (3)(B)(ii) of this section applies, the consent of the lessor of the real property endorsed on or attached to the affidavit and acknowledged or proved in the manner required for the conveyance to be recorded;

(5) the street address and the legal description of the real property to which the manufactured home is or shall be permanently affixed;

(6) if the manufactured home is not covered by a certificate of title, a statement by the owner to that effect;

(7) an owner's statement under AS 34.85.070;

(8) a statement whether or not the manufactured home is subject to a lien or encumbrance;

(9) if the manufactured home is subject to a lien or encumbrance, a statement giving the name and address of each person who holds a lien or encumbrance on the manufactured home, including each holder of a lien or encumbrance shown on a certificate of title issued by the department, the original principal amount secured by each lien and encumbrance, and a statement that

(A) the lien or encumbrance shall be released; or

(B) each lien or encumbrance on the manufactured home has been released and proof of the release;

(10) if the manufactured home is not covered by a manufacturer's certificate of origin or a certificate of title, a statement by the owner of the manufactured home that the manufactured home is not covered by a manufacturer's certificate of origin or a certificate of title and that the owner of the manufactured home will apply to the department under AS 28.10.264;

(11) a statement that the manufactured home is or will be permanently affixed to the real property; and

(12) the name and address of a person designated for filing the certified copy of the affixation affidavit with the department.

Sec. 34.85.070. Owner's statement for affixation affidavit. (a) An owner's statement for an affixation affidavit must comply with (b) or (c) of this section.

(b) If a manufactured home is covered by a manufacturer's certificate of origin, the owner of the manufactured home shall

(1) state that the manufactured home is covered by a manufacturer's certificate of origin, provide the date the manufacturer's certificate of origin was issued, provide the manufacturer's serial number, state that the original manufacturer's certificate of origin for the manufactured home is annexed to the affixation affidavit and is endorsed to the owner of the manufactured home, and state that the owner of the manufactured home will surrender the manufacturer's certificate of origin for cancellation under AS 28.10.262; or

(2) state that the owner of the manufactured home, after diligent search and inquiry, has been unable to produce the original manufacturer's certificate of origin for the manufactured home and shall apply to the department under AS 28.10.264.

(c) If a manufactured home is covered by a certificate of title, the owner of the manufactured home shall

(1) state that the manufactured home is covered by a certificate of title, provide the date the title was issued and the title number, and state that the owner shall surrender the title for cancellation under AS 28.10.263; or

(2) state that the owner, after diligent search and inquiry, has been unable to produce the certificate of title to the manufactured home and shall apply to the department under AS 28.10.264.

Sec. 34.85.080. Effect on liens and encumbrances. Permanently affixing a manufactured home to real property or recording an affixation affidavit under AS 40.17.125 does not impair the rights of a holder of, or the character of, a lien or encumbrance on a manufactured home under AS 28.10.381 unless an application to cancel the title is filed with the department under AS 28.10.263 and the lien or encumbrance is released under AS 28.10.401.

Sec. 34.85.090. Filing affixation affidavit with department. When a person designated in an affixation affidavit to file the affixation affidavit with the department

receives a certified copy of the recorded affixation affidavit, the person shall deliver the certified copy of the affixation affidavit to the department for filing under AS 28.10.262 - 28.10.264.

Sec. 34.85.100. Use of affidavit. (a) Except as provided in AS 34.85.010, 34.85.020, 34.85.090, and AS 40.17.125, an affixation affidavit is not necessary or effective to convey or encumber a manufactured home or to change the character of a manufactured home to real property.

(b) A conveyance of land on which a manufactured home is located must recite that the conveyance does not affect the title to the manufactured home and that the transfer or encumbrance of the manufactured home can only be made under AS 28.10 if

(1) an affixation affidavit has not been recorded for the manufactured home; or

(2) a severance affidavit has been recorded for the manufactured home.

(c) An agreement that waives the requirements of (a) or (b) of this subsection is void.

Sec. 34.85.110. Severance of manufactured home. If an affixation affidavit has been recorded for a converted manufactured home and if the converted manufactured home is severed from the real property to which it was affixed, each person having an interest in the real property shall record a severance affidavit in the recording district where the affixation affidavit was recorded.

Sec. 34.85.120. Severance affidavit. The severance affidavit must contain or be accompanied by

(1) the name, residence, and mailing address of the owner of the manufactured home;

(2) a description of the manufactured home, including the name of the manufacturer, the make, the model name, the model year, the dimensions, and the manufacturer's serial number of the manufactured home;

(3) whether the manufactured home it is new or used;

(4) the serial numbers and date when the affixation affidavit was recorded;

(5) a statement

(A) of any facts or information known to the person signing the affidavit that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; or

(B) that the person signing the affidavit does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home;

(6) a declaration made under oath or affirmation by an attorney authorized under AS 08.08 to practice law in the state or an agent of a title insurance company entitled under AS 21.66 to transact a title insurance business in this state that the manufactured home is free and clear of all liens and encumbrances, and

(A) stating any facts or information known to the attorney or agent that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; or

(B) that the attorney or agent does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; and

(7) the name and address of the person designated to file the certified copy of the severance affidavit with the department under AS 28.10.265.

Sec. 34.85.130. Filing of severance affidavit. On receipt of a certified copy of the severance affidavit by the person designated in the affidavit for filing with the department, the person shall file the certified copy with the department under AS 28.10.262 - 28.10.264.

Sec. 34.85.140. Affidavit form and acknowledgment. (a) An affixation affidavit and a severance affidavit must be acknowledged in the same manner as a conveyance of real property and must be in a form that may be recorded under AS 40.17.

(b) The department shall establish by regulation the forms for an affixation affidavit and a severance affidavit.

Sec. 34.85.150. Permanently affixed. A manufactured home is permanently affixed when it is

(1) anchored to real property by attachment to a permanent foundation;

(2) constructed in accordance with applicable state and local building codes and manufacturer's specifications as provided in the Model Manufactured Home Installation Standards of the federal Department of Housing and Urban Development (24 C.F.R. 3285); and

(3) connected to a residential utility, including water, gas, electricity, sewer, or septic service.

Sec. 34.85.190. Definitions. In this chapter, unless the context requires otherwise,

(1) "affixation affidavit" means an affixation affidavit under AS 34.85.060;

(2) "department" means the Department of Administration;

(3) "manufactured home" has the meaning given in AS 45.29.102;

(4) "permanently affixed" means when a manufactured home is permanently affixed under AS 34.85.150;

(5) "severance affidavit" means a severance affidavit under AS 34.85.120.

Sec. 34.85.195. Short title. This chapter may be cited as the Manufactured Home Property Act.

* **Sec. 27.** AS 40.17 is amended by adding a new section to read:

Sec. 40.17.125. Recording affidavits related to manufactured homes. (a) A recorder shall record an affixation affidavit and a severance affidavit if the affidavit meets the requirements for recording under AS 40.17.030 and is offered for recording in the recording district where the real property to which the manufactured home affixed is located.

(b) A recording officer shall place on the recorded affidavit

(1) the indexing information for the recorded affidavit; and

(2) an indication that the recorded affidavit was recorded.

(c) In this section,

(1) "affidavit" means an affixation affidavit or a severance affidavit;

(2) "affixation affidavit" has the meaning given in AS 34.85.190;

(3) "manufactured home" has the meaning given in AS 45.29.102;

(4) "recorded affidavit" means an affidavit recorded under this section;

(5) "severance affidavit" has the meaning given in AS 34.85.190.

*** Sec. 28.** AS 45.10.220(2) is amended to read:

(2) "goods" means personal chattels purchased primarily for personal, family, or household use and not for commercial or business use, but does not include money or, except as provided in the next phrase, chose in action; "goods" includes [BUT IS NOT LIMITED TO] merchandise certificates or coupons issued by a retail seller to be used in their face amount instead of cash in exchange for goods or services sold by the seller and goods**, including a manufactured home,** that, at the time of sale or subsequently, are to be so affixed to real property as to become a part of it, whether or not severable from it; **in this paragraph, "manufactured home" has the meaning given in AS 45.29.102;**

*** Sec. 29.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Administration shall adopt regulations necessary to implement this Act. The regulations must take effect under AS 44.62 (Administrative Procedure Act) on January 1, 2013.

*** Sec. 30.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SAVING CLAUSE. This Act may not be interpreted to impair a right or claim existing under law before January 1, 2013, of a person claiming an interest in a manufactured home. In this section, "manufactured home" has the meaning given in AS 45.29.102.

*** Sec. 31.** Section 29 of this Act takes effect immediately under AS 01.10.070(c).

*** Sec. 32.** Except as provided in sec. 31 of this Act, this Act takes effect January 1, 2013.

MEMORANDUM

Date: April 14, 2011

To: Senate Judiciary Committee Members

From: Senator Hollis French

RE: Changes in CS for Senate Bill 104 (version \D)

Section 27 of the bill, starting on page 20 of the legislation, was modified in this draft, responding to feedback received from the Department of Natural Resources recorder's office. The changes to Sec. 27 are as follows:

Sec. 40.17.125(a) was modified so that the recorder's office won't have to determine whether an affixation or severance affidavit meets requirements under sec. 34.85 in this legislation. Under AS 40.17.035, the recorder's office cannot be tasked with determining whether the contents of a document are legally sufficient to achieve the purposes of the document; instead, as clarified under regulation, the person submitting documents for recording must ensure that the prerequisites for recording as established by regulation and statute are met.

Sec. 40.17.125(b) received two minor changes in the CS. The first modifies the action taken by the recorder on the recording affidavit, changing 'write' to 'place' on page 20 line 30 of the legislation. This change reflects that the recording office no longer writes on recorded affidavits - instead, they affix bar codes that contain relevant information. In addition, the original draft required an affidavit to be recorded in land records; in the CS, Sec. 40.17.125(b) changes 'in land records' to 'the public record,' to match where the recorder files land records today.

Sec. 40.17.125(c) in the original draft (version \I) was removed in the CS. This language required the recorder's office to automatically send a certified copy of

the recorded affidavit to a person designated on an affidavit. This doesn't match current recording office procedures, which require an individual to request and pay for certified copies of affidavits.

In regards to this last change, conforming amendments were made to Sec. 34.85.060(12) and Sec. 34.85.120(7) in Section 26 of the CS to remove references to the automatic mailing of a certified affidavit. In addition, sec 28.10.266(7) and sec. 28.10.266(8) of the CS, found in section 16 on page 10 of the legislation, were modified to ensure that an affidavit complies with affixation requirements under sec. 34.85 of the legislation.

In section 16 of the legislation, the original draft required DMV to notify a primary lienholder of completed conversion procedures, in instances when the conversion involved cancelling a manufacturer's certificate of origin or title. Yet under sec. 28.10.267 of the legislation, a conversion cannot take place until a manufactured home is free and clear of all liens and encumbrances. Because a primary lienholder would never exist through a conversion procedure, the lienholder notification provisions were replaced in the CS with language that allows the applicant to indicate one person, in addition to the owner, that receives written acknowledgement of completed conversions under sec. 28.10.262-265. This change is reflected in sec. 28.10.262(c), 28.10.263(c), 28.10.264(d), 28.10.265(c) and 28.10.266(12) of CS version \D.

If you have any questions about these changes, please contact Andy Moderow in my office at 907-465-4923.

CS FOR SENATE BILL NO. 104( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR FRENCH

A BILL

FOR AN ACT ENTITLED

"An Act relating to manufactured homes, including manufactured homes permanently affixed to land, to the conversion of manufactured homes to real property, to the severance of manufactured homes from real property, to the titling, conveyance, and encumbrance of manufactured homes, and to manufacturers' certificates of origin for vehicles; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

FINDINGS AND PURPOSE. (a) The legislature finds the legal status of manufactured homes affixed or to be affixed to real property in the state needs to be clarified.

(b) The purpose of this Act is to establish a clear statutory procedure for

(1) converting to real property manufactured homes that are affixed to real property; and

(2) severing manufactured homes from real property.

*** Sec. 2.** AS 06.05.207 is amended by adding a new subsection to read:

(c) In this section, "real property" includes a manufactured home that has become real property under AS 34.85.010. In this subsection, "manufactured home" has the meaning given in AS 45.29.102.

*** Sec. 3.** AS 06.15.250 is amended by adding a new subsection to read:

(b) In this section, "real property" includes a manufactured home that has become real property under AS 34.85.010. In this subsection, "manufactured home" has the meaning given in AS 45.29.102.

*** Sec. 4.** AS 06.45.060(5)(A) is amended to read:

(A) loans to members shall be made in conformity with regulations adopted by the commissioner, except that

(i) a residential real estate loan that is made to finance the acquisition of a one- to four-family dwelling for the principal residence of a credit union member that is secured by a first lien on the dwelling may have a maturity not exceeding 30 years;

(ii) a loan to finance the purchase of a **manufactured** [MOBILE] home that is secured by a first lien on the **manufactured** [MOBILE] home, to be used as the residence of a credit union member, or for the repair, alteration, or improvement of a residential dwelling that is the residence of a credit union member must have a maturity not to exceed 20 years unless the loan is insured or guaranteed under (iii) of this subparagraph;

(iii) a loan secured by the insurance or guarantee of the federal government, of a state government, or an agency of either may be made for the maturity and under the terms and conditions specified in the law under which the insurance or guarantee is provided;

(iv) a loan or aggregate of loans to a director or member of the supervisory or credit committee of the credit union making the loan that exceeds $20,000 plus pledged shares shall be approved by the board of directors;

(v) loans to other members for which directors or members of the supervisory or credit committee act as guarantor or endorser shall be approved by the board of directors when the loans standing alone or when added to an outstanding loan or loans of the guarantor or endorser exceed $20,000;

(vi) the rate of interest may not exceed the greater of 15 percent a year or the rate specified in AS 45.45.010(b);

(vii) the taking, receiving, reserving, or charging of a rate of interest greater than is allowed by this paragraph, when knowingly done, is considered a forfeiture of the entire interest that the note, bill, or other evidence of debt carries with it, or that has been agreed to be paid on the note, bill, or other evidence of debt; if a greater rate of interest has been paid, the person by whom it has been paid or the person's legal representatives may recover back from the credit union taking or receiving it the entire amount of interest paid, but the action must be commenced within two years from the time the usurious collection was made;

(viii) a borrower may repay a loan before maturity in whole or in part on any business day without penalty;

(ix) loans shall be paid or amortized under regulations adopted by the commissioner that consider the needs or conditions of the borrowers, the amounts and duration of the loans, the interests of the members and the credit union, and other factors established in regulations adopted by the commissioner;

(x) the total dollar amount of real estate loans and **manufactured** [MOBILE] home loans outstanding may not exceed 25 percent of the assets of the credit union without the written approval of the commissioner;

(xi) a credit union with assets of less than $3,000,000 may make real estate loans with maturities in excess of 15 years only with the approval of the commissioner;

* **Sec. 5.** AS 06.45.060 is amended by adding a new subsection to read:

(b) In this section, "manufactured home" has the meaning given in AS 45.29.102.

* **Sec. 6.** AS 06.60.990(33) is amended to read:

(33) "residential mortgage loan" means a loan that is primarily for personal, family, or household use and that is secured by a mortgage, deed of trust, or other equivalent consensual security interest on a dwelling or residential real estate located in the state; in this paragraph,

(A) "manufactured home" has the meaning given in AS 45.29.102;

(B) "residential real estate" means real property on which a dwelling is constructed or intended to be constructed**, including a manufactured home that has become real property under AS 34.85.010**;

* **Sec. 7.** AS 09.45 is amended by adding a new section to read:

Article 13. General Provisions.

Sec. 09.45.990. Definitions. In this chapter,

(1) "manufactured home" has the meaning given in AS 45.29.102;

(2) "real property" includes a manufactured home that has become real property under AS 34.85.010.

* **Sec. 8.** AS 28.05.061(a) is amended to read:

(a) The Department of Administration shall file, maintain, and appropriately index records of

(1) vehicle registrations under AS 28.10.071(a) - (c);

(2) stolen, converted, recovered, and unclaimed vehicles under AS 28.10.071(d);

(3) titles and documents creating and evidencing liens or encumbrances under AS 28.10.381;

(4) abandoned vehicles under AS 28.11.030(c); [AND]

(5) driver's license and driving records under AS 28.15.151**;**

(6) applications under AS 28.10.262 for cancellation of a manufacturer's certificate of origin for a manufactured home;

(7) applications under AS 28.10.263 for cancellation of a certificate of title to a manufactured home;

(8) applications under AS 28.10.264 for confirmation of the nonapplication of AS 28.10 to a manufactured home;

(9) applications under AS 28.10.265 for a certificate of title to a severed manufactured home;

(10) manufacturer's certificates of origin accepted for cancellation by the department under AS 28.10.262 for a manufactured home; and

(11) certificates of title accepted for cancellation by the department under AS 28.10.263 for a manufactured home.

*** Sec. 9.** AS 28.05.061 is amended by adding new subsections to read:

(e) For cancelled manufacturer's certificates of origin, cancelled certificates of title, or applications for confirmation filed under (a)(8), (10), or (11) of this section, the department's record must state

(1) the name of each owner of the manufactured home;

(2) the date the manufacturer's certificate of origin or the certificate of title was accepted for cancellation if the certificate was cancelled under (a)(10) or (11) of this section; and

(3) the recording information for the affixation affidavit required by AS 28.10.266.

(f) For applications for certificates of title under (a)(9) of this section, the department's record must state the name of each owner of the manufactured home and the recording information for the severance affidavit recorded under AS 40.17.125.

(g) In this section, "recording information" means the district where the affidavit was recorded, and the date and serial numbers of the affidavit's recording in the recording district.

*** Sec. 10.** AS 28.10.201(b) is amended to read:

(b) The owner of a vehicle described in AS 28.10.011 as being exempt from registration and the owner of a snowmobile or off-highway vehicle may not apply for, nor may the department issue, a certificate of title for the vehicle. However, the department

(1) may issue a certificate of title to the owner of a vehicle exempt from registration under AS 28.10.011(3), (6), (7), or (10) only upon application by that owner; and

(2) **except as provided in (e) of this section,** shall issue a certificate of title to the owner of a **manufactured** [MOBILE] home upon application, display of evidence of ownership satisfactory to the department, and payment of a fee of $100 by the owner; a certificate of title issued under this paragraph must comply with AS 28.10.231.

* **Sec. 11.** AS 28.10.201 is amended by adding a new subsection to read:

(e) The department may not issue a certificate of title to a manufactured home if an application for the manufactured home has been filed under AS 28.10.262 - 28.10.264.

* **Sec. 12.** AS 28.10.211(c) is amended to read:

(c) When an application for title refers to a new vehicle, the application must be accompanied by a "manufacturer's **certificate** [STATEMENT] of origin" and other information reasonably required by the department.

* **Sec. 13.** AS 28.10.211 is amended by adding a new subsection to read:

(f) The holder of a manufacturer's certificate of origin for a manufactured home may deliver the certificate to any person to facilitate conveying or encumbering the manufactured home, and a person who receives the manufacturer's certificate of origin holds it in trust for the person delivering it.

* **Sec. 14.** AS 28.10.221 is amended by adding a new subsection to read:

(d) Except as provided in AS 28.10.263, the department may not suspend or revoke a certificate of title to a manufactured home based on the fact that the manufactured home is affixed in any manner to real property.

* **Sec. 15.** AS 28.10.261 is amended by adding a new subsection to read:

(c) Notwithstanding another provision of law to the contrary, a certificate of title to a manufactured home issued by the department is prima facie evidence of the facts appearing on it, even if the manufactured home is affixed in any manner to real property.

* **Sec. 16.** AS 28.10 is amended by adding new sections to article 2 to read:

Sec. 28.10.262. Cancellation of manufacturer's certificate of origin for manufactured home. (a) If a manufactured home is permanently affixed to real property under AS 34.85.150, or if the owner intends to permanently affix the manufactured home to real property under AS 34.85.150, the owner may submit to the department an application requesting that the department cancel the manufacturer's certificate of origin for a manufactured home and update the department's records under AS 28.05.061.

(b) The application under (a) of this section must comply with AS 28.10.266.

(c) Subject to AS 28.05.041, if the department is satisfied that the application filed under (a) of this section complies with (b) of this section, the department shall cancel the manufacturer's certificate of origin for the manufactured home, update the department's records under AS 28.05.061, and issue a written acknowledgment that the department has cancelled the certificate of origin under this section. The department shall deliver the written acknowledgment to the owner of the manufactured home and to a person identified under AS 28.10.266(12).

(d) When the department has cancelled the manufacturer's certificate of origin under (c) of this section, the manufactured home is not subject to this chapter.

Sec. 28.10.263. Cancellation of certificate of title to manufactured home. (a) If a manufactured home is permanently affixed to real property under AS 34.85.150, or if the owner intends to permanently affix the manufactured home to real property under AS 34.85.150, the owner may submit to the department an application requesting that the department cancel the certificate of title to a manufactured home and update the department's records under AS 28.05.061.

(b) The application under (a) of this section must comply with AS 28.10.266.

(c) Subject to AS 28.05.041, if the department is satisfied that the application filed under (a) of this section complies with (b) of this section and that there are no outstanding liens or encumbrances filed against the manufactured home under AS 28.10.381, the department shall cancel the certificate of title to the manufactured home, update the department's records under AS 28.05.061, and issue a written acknowledgment that the department has cancelled the certificate of title under this section. The department shall deliver the written acknowledgment to the owner of the

manufactured home and to a person identified under AS 28.10.266(12).

(d) When the department has cancelled a certificate of title under (c) of this section, the manufactured home is not subject to this chapter.

Sec. 28.10.264. Confirmation of nonapplication of chapter. (a) The owner of a manufactured home may submit an application to the department requesting that the department indicate on the department's records that the manufactured home is not subject to this chapter if

(1) the manufactured home is permanently affixed to real property under AS 34.85.150, or the owner intends to permanently affix the manufactured home to real property under AS 34.85.150; and

(2) the manufactured home

(A) is not covered by a manufacturer's certificate of origin or a certificate of title;

(B) is covered by a manufacturer's certificate of origin, but the owner of the manufactured home, after diligent search and inquiry, is unable to produce the certificate of origin; or

(C) is covered by a certificate of title, but the owner of the manufactured home, after diligent search and inquiry, is unable to produce the certificate of title.

(b) The application under (a) of this section must comply with AS 28.10.266 and be accompanied by a bond or cash deposit described in (c) of this section.

(c) The bond that accompanies the application under (b) of this section must be in the form prescribed by the department and executed by the applicant. The amount of the bond or cash deposit that accompanies the application under (b) of this section must be equal to one and one-half times the value of the manufactured home as determined by the department and must be conditioned to indemnify former owners, secured parties, and subsequent purchasers of the manufactured home and their successors against loss resulting from a defect in or undisclosed security interest on the title of the applicant. An injured party may bring a court action against the bond or cash deposit for a breach of the conditions of the bond or cash deposit, but the liability of the bond surety or the department may not exceed the amount of the bond or cash

deposit. The department shall return the bond or cash deposit at the end of three years after the submission under (b) of this section, except that service on the department of notice that an action is pending against the bond or cash deposit extends that period until 45 days after a final decision in the action on the bond or cash deposit.

(d) If the department is satisfied that the application filed under (a) of this section complies with (b) of this section, the department shall, subject to AS 28.05.041, indicate under AS 28.05.061 on the department's records that the manufactured home is not subject to this chapter and shall provide to the owner a written confirmation that the owner of the manufactured home has submitted an application that complies with (b) of this section and that the manufactured home is not subject to this chapter. The department shall deliver the written confirmation to the owner of the manufactured home and to a person identified under AS 28.10.266(12).

(e) When the department has provided a written confirmation under (d) of this section, the manufactured home is not subject to this chapter.

Sec. 28.10.265. Certificate of title to severed manufactured home. (a) The owner of a manufactured home may submit an application to the department requesting that the department issue a certificate of title to a manufactured home and update the department's records under AS 28.05.061 if

(1) the manufactured home was permanently affixed to real property under AS 34.85.150;

(2) an affixation affidavit was recorded for the manufactured home under AS 40.17.125; and

(3) after the occurrence of (1) and (2) of this subsection, the manufactured home was severed from the real property to which it was affixed.

(b) The application under (a) of this section must comply with AS 28.10.266.

(c) Subject to AS 28.05.041, if the department is satisfied that the application filed under (a) of this section complies with (b) of this section, the department shall issue a certificate of title to the manufactured home under AS 28.10.231 - 28.10.241, update the department's records under AS 28.05.061, and issue to the owner and to a person identified under AS 28.10.266(12) a written acknowledgment that the department has issued a certificate of title under this section.

(d) When the department has issued a certificate of title under (c) of this section, the manufactured home is subject to this chapter.

Sec. 28.10.266. Application provisions. An application under AS 28.10.262 - 28.10.265 must provide

(1) the name, residence, and mailing address of the owner of the manufactured home;

(2) a description of the manufactured home, including the name of the manufacturer, the make, the model name, the model year, the manufacturer's serial number for the manufactured home, and other information required by the department about the manufactured home;

(3) whether the manufactured home is new or used;

(4) for an application under AS 28.10.262 - 28.10.264, the date of purchase by the owner of the manufactured home and the name and address of the person from whom the home was acquired;

(5) for an application under AS 28.10.262 - 28.10.264, the name and address of any person who holds a lien or an encumbrance against the manufactured home and the order of apparent priority;

(6) a statement signed by the owner, stating

(A) any facts or information known to the owner that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on it; or

(B) that the owner does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home;

(7) subject to AS 28.10.268, for an application under AS 28.10.262 - 28.10.264, a certified copy of an affixation affidavit that complies with AS 34.85.060 and that has been recorded under AS 40.17.125 for the manufactured home;

(8) for an application under AS 28.10.265, a certified copy of a severance affidavit that complies with AS 34.85.120 and that has been recorded under AS 40.17.125 for the manufactured home;

(9) for an application under AS 28.10.262, the original manufacturer's

certificate of origin;

(10) for an application under AS 28.10.263, the original certificate of title;

(11) for an application under AS 28.10.264 or 28.10.265, a declaration that complies with AS 28.10.267;

(12) if desired by the applicant, the name and mailing address of one person, in addition to the owner, to receive a written acknowledgment from the department under AS 28.10.262, 28.10.263, or 28.10.265 or a written confirmation under AS 28.10.264; and

(13) other information and documents the department reasonably requires

(A) to identify the owner of the manufactured home;

(B) to determine the existence or nonexistence of liens or encumbrances on the manufactured home;

(C) for an application under AS 28.10.262 - 28.10.264, to enable the department to determine whether the owner satisfied the applicable requirements of AS 34.85.010; and

(D) for an application under AS 28.10.265, to enable the department to determine whether the owner of the manufactured home is entitled to a certificate of title.

Sec. 28.10.267. Declaration. (a) The declaration required by AS 28.10.266(11) must be made under oath or affirmation by an attorney authorized under AS 08.08 to practice law in the state or an agent of a title insurance company entitled under AS 21.66 to transact a title insurance business in this state.

(b) The declaration must state that the manufactured home is free and clear of all liens and encumbrances and

(1) any facts or information known to the attorney or agent that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; or

(2) that the attorney or agent does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the

existence or nonexistence of a lien or encumbrance on the manufactured home.

Sec. 28.10.268. Time of satisfaction. If a person delivers an application under AS 28.10.262 - 28.10.264 for a manufactured home to the department within 30 days after an affixation affidavit for the manufactured home is recorded under AS 40.17.125, and if the application is accepted by the department, the requirements of AS 28.10.262 - 28.10.264 are considered to be satisfied on the date the affixation affidavit is recorded, and, if the manufactured home is conveyed or encumbered on and after that date, the manufactured home shall be conveyed and encumbered as real property.

Sec. 28.10.269. Definitions. In AS 28.10.201 - 28.10.269, unless the context indicates otherwise,

(1) "affixation affidavit" means an affixation affidavit under AS 34.85.060;

(2) "severance affidavit" means a severance affidavit under AS 34.85.120.

*** Sec. 17.** AS 28.10.371 is amended by adding new subsections to read:

(b) Notwithstanding (a) of this section, a lien on a manufactured home for the purchase of the manufactured home is valid against judicial lien creditors and execution creditors on and after the date the lien attaches under AS 45.29 against the manufactured home.

(c) Notwithstanding (a) of this section, the holder of a lien on a manufactured home may deliver a lien release document to a person to facilitate conveying or encumbering the manufactured home. A person receiving the lien release document holds the document in trust for the lienholder.

*** Sec. 18.** AS 28.10.381 is amended by adding a new subsection to read:

(c) Except as otherwise provided in AS 28.10.262, 28.10.263, and AS 34.85, after a certificate of title to a manufactured home has been issued and while the manufactured home is subject to a lien or encumbrance under (a) of this section,

(1) the department may not cancel the manufacturer's certificate of origin for the manufactured home under AS 28.10.262, or cancel the certificate of title to the manufactured home under AS 28.10.263; and

(2) the validity and priority of the lien or encumbrance continues.

* **Sec. 19.** AS 28.10.391 is amended by adding a new subsection to read:

(e) Notwithstanding another provision of this section, the creation or termination of a lien or encumbrance with respect to a manufactured home that has been converted to real property under AS 34.85.010 is governed by the laws that apply to real property.

* **Sec. 20.** AS 28.10.661(2) is amended to read:

(2) "vehicle" includes mobile homes for the purposes of provisions relating to certificates of title**; in this paragraph, "mobile home" means a manufactured home**.

* **Sec. 21.** AS 28.10.661 is amended by adding a new paragraph to read:

(3) "manufactured home" has the meaning given in AS 45.29.102.

* **Sec. 22.** AS 29.45.070 is amended to read:

Sec. 29.45.070. Mobile homes. Mobile homes, trailers, house trailers, trailer coaches, and similar property used or intended to be used for residential, office, or commercial purposes and **permanently affixed** [ATTACHED] to **real property under AS 34.85.150** [THE LAND OR CONNECTED TO WATER, GAS, ELECTRIC, OR SEWAGE FACILITIES] are classified as real property for tax purposes unless expressly classified as personal property by ordinance. This section does not apply to house trailers and mobile homes that are unoccupied and held for sale by persons engaged in the business of selling mobile homes. **In this section, "mobile home" has the meaning given to "manufactured home" in AS 45.29.102.**

* **Sec. 23.** AS 34.03.360 is amended by adding a new paragraph to read:

(23) "mobile home" has the meaning given to "manufactured home" in AS 45.29.102.

* **Sec. 24.** AS 34.70.200(3) is amended to read:

(3) "residential real property" means real property whose primary purpose is to provide a single-family dwelling, or two single-family dwellings in one building**, including a manufactured home that has become real property under AS 34.85.010; in this paragraph, "manufactured home" has the meaning given in AS 45.29.102**;

* **Sec. 25.** AS 34.80.090(6) is amended to read:

(6) "residential real property" means real property on which there are one to four attached or detached dwelling units, or any number of apartments if the apartments are in a horizontal property regime formed under AS 34.07 or any number of units if the units are in a common interest community created under AS 34.08; **"residential real property" includes a manufactured home that has become real property under AS 34.85.010; in this paragraph, "manufactured home" has the meaning given in AS 45.29.102;**

* **Sec. 26.** AS 34 is amended by adding a new chapter to read:

Chapter 85. Manufactured Home Property Act.

Sec. 34.85.010. Real property characterization. A manufactured home becomes real property if

(1) the home is permanently affixed to land under AS 34.85.150;

(2) an affixation affidavit has been recorded under AS 40.17.125;

(3) the ownership interests in the manufactured home and in the real property to which the manufactured home is permanently affixed are identical, except as provided by AS 34.85.040; and

(4) the manufactured home is

(A) covered by a manufacturer's certificate of origin that the owner of the manufactured home is able to produce, and the department has cancelled the manufacturer's certificate of origin under AS 28.10.262;

(B) covered by a certificate of title that the owner of the manufactured home is able to produce, and the department has cancelled the certificate of title under AS 28.10.263; or

(C) not covered by a manufacturer's certificate of origin or a certificate of title, or if the manufactured home is covered by a manufacturer's certificate of origin or a certificate of title but the owner of the manufactured home, after diligent search and inquiry, was unable to produce the manufacturer's certificate of origin or certificate of title, and the department has provided a written confirmation under AS 28.10.264.

Sec. 34.85.020. Effect of real property characterization. (a) When a

manufactured home becomes real property under AS 34.85.010, a mortgage, deed of trust, lien, or security interest that can attach to land, buildings erected on land, or fixtures affixed to land or buildings attaches to the manufactured home in the same manner as if the manufactured home were built from ordinary building materials on the land where the manufactured home is located.

(b) If the title to a manufactured home is transferred after the manufactured home becomes real property under AS 34.85.010, title to the manufactured home, together with the land to which the converted manufactured home is affixed, shall be transferred by deed or other form of conveyance that is effective to transfer an interest in real property.

(c) When a manufactured home becomes real property under AS 34.85.010, the manufactured home is governed by the laws applicable to real property in effect on the date the manufactured home satisfies AS 34.85.010.

Sec. 34.85.040. Ownership interest exception. If the owner of a manufactured home is not the owner of the real property on which the manufactured home is located, the requirement under AS 34.85.010(3) that the ownership interests be identical is satisfied if the owner possesses the real property under

(1) a lease in a recordable form that has a term that continues for at least 20 years after the date of execution of the affixation affidavit; and

(2) the lessor of the real property consents.

Sec. 34.85.060. Affixation affidavit requirements. An affixation affidavit must provide

(1) the name of the manufacturer, the make, the model name, the model year, the dimensions, and the manufacturer's serial number of the manufactured home;

(2) whether the manufactured home is new or used;

(3) a statement that the person executing the affidavit is

(A) the owner of the real property described in the affixation affidavit; or

(B) not the owner of the real property described in the affixation affidavit, and the person

(i) is in possession of the real property under a lease in recordable form that has a term that continues for at least 20 years after the date of execution of the affidavit; and

(ii) the lessor of the real property consents;

(4) if (3)(B)(ii) of this section applies, the consent of the lessor of the real property endorsed on or attached to the affidavit and acknowledged or proved in the manner required for the conveyance to be recorded;

(5) the street address and the legal description of the real property to which the manufactured home is or shall be permanently affixed;

(6) if the manufactured home is not covered by a certificate of title, a statement by the owner to that effect;

(7) an owner's statement under AS 34.85.070;

(8) a statement whether or not the manufactured home is subject to a lien or encumbrance;

(9) if the manufactured home is subject to a lien or encumbrance, a statement giving the name and address of each person who holds a lien or encumbrance on the manufactured home, including each holder of a lien or encumbrance shown on a certificate of title issued by the department, the original principal amount secured by each lien and encumbrance, and a statement that

(A) the lien or encumbrance shall be released; or

(B) each lien or encumbrance on the manufactured home has been released and proof of the release;

(10) if the manufactured home is not covered by a manufacturer's certificate of origin or a certificate of title, a statement by the owner of the manufactured home that the manufactured home is not covered by a manufacturer's certificate of origin or a certificate of title and that the owner of the manufactured home will apply to the department under AS 28.10.264;

(11) a statement that the manufactured home is or will be permanently affixed to the real property; and

(12) the name and address of a person designated for filing the certified copy of the affixation affidavit with the department.

Sec. 34.85.070. Owner's statement for affixation affidavit. (a) An owner's statement for an affixation affidavit must comply with (b) or (c) of this section.

(b) If a manufactured home is covered by a manufacturer's certificate of origin, the owner of the manufactured home shall

(1) state that the manufactured home is covered by a manufacturer's certificate of origin, provide the date the manufacturer's certificate of origin was issued, provide the manufacturer's serial number, state that the original manufacturer's certificate of origin for the manufactured home is annexed to the affixation affidavit and is endorsed to the owner of the manufactured home, and state that the owner of the manufactured home will surrender the manufacturer's certificate of origin for cancellation under AS 28.10.262; or

(2) state that the owner of the manufactured home, after diligent search and inquiry, has been unable to produce the original manufacturer's certificate of origin for the manufactured home and shall apply to the department under AS 28.10.264.

(c) If a manufactured home is covered by a certificate of title, the owner of the manufactured home shall

(1) state that the manufactured home is covered by a certificate of title, provide the date the title was issued and the title number, and state that the owner shall surrender the title for cancellation under AS 28.10.263; or

(2) state that the owner, after diligent search and inquiry, has been unable to produce the certificate of title to the manufactured home and shall apply to the department under AS 28.10.264.

Sec. 34.85.080. Effect on liens and encumbrances. Permanently affixing a manufactured home to real property or recording an affixation affidavit under AS 40.17.125 does not impair the rights of a holder of, or the character of, a lien or encumbrance on a manufactured home under AS 28.10.381 unless an application to cancel the title is filed with the department under AS 28.10.263 and the lien or encumbrance is released under AS 28.10.401.

Sec. 34.85.090. Filing affixation affidavit with department. When a person designated in an affixation affidavit to file the affixation affidavit with the department

receives a certified copy of the recorded affixation affidavit, the person shall deliver the certified copy of the affixation affidavit to the department for filing under AS 28.10.262 - 28.10.264.

Sec. 34.85.100. Use of affidavit. (a) Except as provided in AS 34.85.010, 34.85.020, 34.85.090, and AS 40.17.125, an affixation affidavit is not necessary or effective to convey or encumber a manufactured home or to change the character of a manufactured home to real property.

(b) A conveyance of land on which a manufactured home is located must recite that the conveyance does not affect the title to the manufactured home and that the transfer or encumbrance of the manufactured home can only be made under AS 28.10 if

(1) an affixation affidavit has not been recorded for the manufactured home; or

(2) a severance affidavit has been recorded for the manufactured home.

(c) An agreement that waives the requirements of (a) or (b) of this subsection is void.

Sec. 34.85.110. Severance of manufactured home. If an affixation affidavit has been recorded for a converted manufactured home and if the converted manufactured home is severed from the real property to which it was affixed, each person having an interest in the real property shall record a severance affidavit in the recording district where the affixation affidavit was recorded.

Sec. 34.85.120. Severance affidavit. The severance affidavit must contain or be accompanied by

(1) the name, residence, and mailing address of the owner of the manufactured home;

(2) a description of the manufactured home, including the name of the manufacturer, the make, the model name, the model year, the dimensions, and the manufacturer's serial number of the manufactured home;

(3) whether the manufactured home it is new or used;

(4) the serial numbers and date when the affixation affidavit was recorded;

(5) a statement

(A) of any facts or information known to the person signing the affidavit that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; or

(B) that the person signing the affidavit does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home;

(6) a declaration made under oath or affirmation by an attorney authorized under AS 08.08 to practice law in the state or an agent of a title insurance company entitled under AS 21.66 to transact a title insurance business in this state that the manufactured home is free and clear of all liens and encumbrances, and

(A) stating any facts or information known to the attorney or agent that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; or

(B) that the attorney or agent does not know any facts or information that could reasonably affect the validity of the title to the manufactured home or the existence or nonexistence of a lien or encumbrance on the manufactured home; and

(7) the name and address of the person designated to file the certified copy of the severance affidavit with the department under AS 28.10.265.

Sec. 34.85.130. Filing of severance affidavit. On receipt of a certified copy of the severance affidavit by the person designated in the affidavit for filing with the department, the person shall file the certified copy with the department under AS 28.10.262 - 28.10.264.

Sec. 34.85.140. Affidavit form and acknowledgment. (a) An affixation affidavit and a severance affidavit must be acknowledged in the same manner as a conveyance of real property and must be in a form that may be recorded under AS 40.17.

(b) The department shall establish by regulation the forms for an affixation affidavit and a severance affidavit.

Sec. 34.85.150. Permanently affixed. A manufactured home is permanently affixed when it is

(1) anchored to real property by attachment to a permanent foundation;

(2) constructed in accordance with applicable state and local building codes and manufacturer's specifications as provided in the Model Manufactured Home Installation Standards of the federal Department of Housing and Urban Development (24 C.F.R. 3285); and

(3) connected to a residential utility, including water, gas, electricity, sewer, or septic service.

Sec. 34.85.190. Definitions. In this chapter, unless the context requires otherwise,

(1) "affixation affidavit" means an affixation affidavit under AS 34.85.060;

(2) "department" means the Department of Administration;

(3) "manufactured home" has the meaning given in AS 45.29.102;

(4) "permanently affixed" means when a manufactured home is permanently affixed under AS 34.85.150;

(5) "severance affidavit" means a severance affidavit under AS 34.85.120.

Sec. 34.85.195. Short title. This chapter may be cited as the Manufactured Home Property Act.

* **Sec. 27.** AS 40.17 is amended by adding a new section to read:

Sec. 40.17.125. Recording affidavits related to manufactured homes. (a) A recorder shall record an affixation affidavit and a severance affidavit if the affidavit meets the requirements for recording under AS 40.17.030 and is offered for recording in the recording district where the real property to which the manufactured home affixed is located.

(b) A recording officer shall place on the recorded affidavit

(1) the indexing information for the recorded affidavit; and

(2) an indication that the recorded affidavit was recorded.

(c) In this section,

(1) "affidavit" means an affixation affidavit or a severance affidavit;

(2) "affixation affidavit" has the meaning given in AS 34.85.190;

(3) "manufactured home" has the meaning given in AS 45.29.102;

(4) "recorded affidavit" means an affidavit recorded under this section;

(5) "severance affidavit" has the meaning given in AS 34.85.190.

*** Sec. 28.** AS 45.10.220(2) is amended to read:

(2) "goods" means personal chattels purchased primarily for personal, family, or household use and not for commercial or business use, but does not include money or, except as provided in the next phrase, chose in action; "goods" includes [BUT IS NOT LIMITED TO] merchandise certificates or coupons issued by a retail seller to be used in their face amount instead of cash in exchange for goods or services sold by the seller and goods**, including a manufactured home,** that, at the time of sale or subsequently, are to be so affixed to real property as to become a part of it, whether or not severable from it; **in this paragraph, "manufactured home" has the meaning given in AS 45.29.102;**

*** Sec. 29.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Administration shall adopt regulations necessary to implement this Act. The regulations must take effect under AS 44.62 (Administrative Procedure Act) on January 1, 2012.

*** Sec. 30.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SAVING CLAUSE. This Act may not be interpreted to impair a right or claim existing under law before January 1, 2012, of a person claiming an interest in a manufactured home. In this section, "manufactured home" has the meaning given in AS 45.29.102.

*** Sec. 31.** Section 29 of this Act takes effect immediately under AS 01.10.070(c).

*** Sec. 32.** Except as provided in sec. 31 of this Act, this Act takes effect January 1, 2012.

MEMORANDUM March 28, 2011

SUBJECT: Sectional summary for SB 104 relating to manufactured homes (Work Order No. 27-LS0467\I)

TO: Senator Hollis French
Attn: Andy Moderow

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. States the findings and purpose for the bill.

Section 2. Adds a new subsection to AS 06.05.207 of the banking code. Defines "real property" to include a manufactured home that has become real property under new sec. 34.85.010.

Section 3. Adds a new subsection to AS 06.15.250 of the mutual savings bank chapter. Defines "real property" to include a manufactured home that has become real property under new sec. 34.85.010.

Section 4. Amends AS 06.45.060(5)(A) of the credit union chapter to change "mobile home" to "manufactured home."

Section 5. Adds a new subsection to AS 06.45.060 of the credit union chapter to provide a definition of "manufactured home."

Section 6. Amends the definition of "mortgage loan" in AS 06.60.990(19) of the mortgage lending regulation chapter to include a manufactured home that has become real property under new sec. 34.85.010.

Section 7. Adds a new definition section to AS 09.45, the chapter relating to real property actions, to define "real property" to include a manufactured home that has become real property under new sec. 34.85.010 and to define "manufactured home."

Section 8. Amends AS 28.05.061(a), which relates to vehicle records, to list manufactured home documents as records that the Department of Administration is to file, maintain, and index.

Section 9. Adds new subsections to AS 28.05.061, which relates to vehicle records, to indicate what the department record must state for certain documents relating to manufactured homes. Defines "recording information" for AS 28.05.061.

Section 10. Amends AS 28.10.201(b) to reference a new subsection added by bill sec. 11 and to change "mobile home" to "manufactured home."

Section 11. Adds a new subsection to AS 28.10.201. Prohibits the department from issuing a certificate of title to a manufactured home if an application has been filed under secs. 28.10.262 - 28.10.264.

Section 12. Amends AS 28.10.211(c) to substitute "manufacturer's certificate of origin" for "manufacturer's statement of origin."

Section 13. Adds a new subsection to AS 28.10.211, relating to applications for vehicle titles. Allows the holder of a manufacturer's certificate of origin for a manufactured home to deliver the certificate to a person to facilitate the home's conveyance or encumbrance. The recipient holds it in trust.

Section 14. Adds a new subsection to AS 28.10.221, which relates to the refusal, suspension, or revocation of a vehicle title. Prohibits the department, with an exception for new sec. 28.10.263, from suspending or revoking a certificate of title to a manufactured home because the home is affixed to real property.

Section 15. Adds a new subsection to AS 28.10.261, which relates to evidence. Makes a manufactured home's certificate of title issued by the department prima facie evidence of what it says, even if the home is affixed to real property.

Section 16. Adds new sections to AS 28.10.

Sec. 28.10.262. Directs the department to cancel a manufacturer's certificate of origin to a manufactured home if an application is filed and certain other conditions are met. States that when a person satisfies this section, the manufactured home is not subject to AS 28.10.

Sec. 28.10.263. Directs the department to cancel a certificate of title to a manufactured home if an application is filed and certain other conditions are met. States that when a person satisfies this section, the manufactured home is not subject to AS 28.10.

Sec. 28.10.264. Directs the department, if an application is filed and certain other conditions are met, to confirm that the owner of a manufactured home has submitted an application that complies with (b) of this section and that the manufactured home is not subject to AS 28.10.

Sec. 28.10.265. Directs the department to issue a certificate of title for a manufactured home if an application is filed and certain other conditions are met. States that when a person satisfies this section, the manufactured home is subject to AS 28.10.

Sec. 28.10.266. Lists what an application under secs. 28.10.262 - 28.10.265 must provide.

Sec. 28.10.267. Establishes the requirements for the declaration required by sec. 28.10.266(11) for an application under sec. 28.10.264 or 28.10.265.

Sec. 28.10.268. Indicates the time when the requirements of secs. 28.10.262 - 28.10.264 are considered to be satisfied if an application under one of those sections is delivered to the department within 30 days after an affixation affidavit is recorded.

Sec. 28.10.269. Defines terms for AS 28.10.201 - 28.10.269.

Section 17. Adds new subsections to AS 28.10.371, which relates to liens and encumbrances on vehicles, to address certain situations involving liens on manufactured homes.

Section 18. Adds a new subsection to AS 28.10.381, which relates to liens and encumbrances on vehicles, to generally prohibit cancelling certificates while a lien or encumbrance is outstanding, and to state that the validity and priority of the liens and encumbrances continue.

Section 19. Adds a new subsection to AS 28.10.391, which relates to liens and encumbrances on vehicles, to indicate that the liens and encumbrances of converted manufactured homes are governed by real property law.

Section 20. Amends AS 28.10.661(2) to define "mobile home" as a "manufactured home" for the chapter.

Section 21. Adds a new paragraph to AS 28.10.661 to define "manufactured home" for the chapter.

Section 22. Amends AS 29.45.070, which relates to municipal taxation, to reflect the conversion to real property allowed by the new chapter in AS 34.85.

Section 23. Amends AS 34.03.360 of the state's uniform residential landlord and tenant act to add a definition of "mobile home."

Section 24. Amends AS 34.70.200(3) of the chapter dealing with disclosures in residential real property transfers to include as residential real property manufactured homes that have become real property under AS 34.85.010.

Section 25. Amends AS 34.80.090(6) of the chapter that deals with escrow transactions for residential real property to include converted manufactured homes as residential real property.

Section 26. Adds a new chapter relating to converting manufactured homes to real property.

Sec. 34.85.010. Lists the criteria for a manufactured home to become real property.

Sec. 34.85.020. Describes the effects of converting a manufactured home to real property.

Sec. 34.85.040. Describes how the ownership interest requirement of sec. 34.85.010 can be satisfied when the manufactured home owner does not own the real property where the home is located.

Sec. 34.85.060. Establishes what an affixation affidavit must provide.

Sec. 34.85.070. Describes what an owner's statement required for an affixation affidavit must state.

Sec. 34.85.080. Indicates that permanently affixing a manufactured home to real property or recording an affixation affidavit does not affect liens and encumbrances on the manufactured home unless certain conditions are met.

Sec. 34.85.090. Directs the recipient of a certified copy of an affidavit to deliver the copy to the department under secs. 28.10.262 - 28.10.264.

Sec. 34.85.100. States that, except as provided by certain statutes, an affixation affidavit is not necessary or effective to convey or encumber a manufactured home or to change the character of a manufactured home to real property. Indicates what a conveyance of land on which a manufactured home is located must recite. Voids an agreement that waives this section.

Sec. 34.85.110. Directs each person having an interest in the real property from which a converted manufactured home is severed to record a severance affidavit.

Sec. 34.85.120. Establishes what a severance affidavit must contain or be accompanied by.

Sec. 34.85.130. Directs the recipient of a certified copy of a severance affidavit to deliver the copy to the department under secs. 28.10.262 - 28.10.264.

Sec. 34.85.140. Requires an affixation affidavit and a severance affidavit to be acknowledged like real property conveyances and be in a recordable form. Directs the department to establish the forms for the affidavits.

Sec. 34.85.150. Establishes when a manufactured home is considered to be permanently affixed to real property.

Sec. 34.85.190. Defines terms for the new chapter.

Sec. 34.85.195. Gives the chapter a short title.

Section 27. Adds a new section to the state's chapter on the recording of real property documents. Directs the recorder to record an affixation affidavit and a severance affidavit if they meet specified requirements. Indicates what the recording officer must write on the recorded affidavit. Directs the recording officer to send a certified copy to the person designated in the affidavit.

Section 28. Amends the definition of "goods" in the Alaska Retail Installment Sales Act to include manufactured homes.

Section 29. Directs the Department of Administration to adopt regulations for this Act.

Section 30. Preserves rights and claims existing before January 1, 2012.

Section 31. Sets an immediate effective date for bill sec. 29, which authorizes the adoption of implementing regulations.

Section 32. Sets the effective date for all of the bill except bill sec. 29, which authorizes the adoption of implementing regulations.

If I may be of further assistance, please advise.

RE: SB-104 Manufactured Housing Conversion Procedure Process

Dear Senator French:

Wells Fargo is writing to support SB-104, the Manufactured Housing Conversion Procedure Process bill.

SB-104 will amend state law in Alaska to provide a formal method of eliminating the certificate of title to a manufactured home, converting the home to real property when the home is or will be permanently affixed to real property, and obtaining a new certificate of title when a home previously affixed to real property is severed.

Alaska's current statutes do not meet the eligibility requirements to sell a mortgage loan for a manufactured home to Fannie Mae or Freddie Mac, including the process to legally classify the home as real property and placing the lender in first lien position.

Wells Fargo has had to turn away business to potential borrowers because Alaska does not have a clear method of converting a factory built home to real property, especially older manufactured homes that come back on the market for resale.

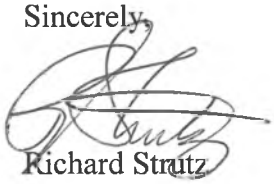
SB-104 would bring state definitions of manufactured homes into accordance with HUD definitions to create a system for title transfer and property conversion. Additionally, it would create a means for titling manufactured homes that have been affixed to property, but the title cannot be found.

We feel the bill will: (1) Help manufactured homeowners who have their manufactured home already affixed to real property be better able to gain access to credit and be able to more easily sell their homes; (2) Help manufactured homeowners in the state increase the value of their homes by allowing them to convert their manufactured homes to real property, including manufactured homes not covered by certificates of title or for which the certificates of title cannot be found; (3) Help lenders gain perfected security interests in manufactured homes; and (4) Help the Alaska Division of Motor Vehicles by putting

in place a formalized procedure for canceling a title when a manufactured home is put on a permanent foundation.

Thank you for the opportunity to provide comment on SB-104.

Sincerely,



Richard Strutz
Regional President

RE: SB-104 Manufactured Housing Conversion Procedure Process

Dear Senator French:

The Alaska Bankers Association consists of the following eight member banks: Alaska Pacific Bank, Denali State Bank, First Bank Ketchikan, First National Bank Alaska, KeyBank, Mt. McKinley Bank, Northrim Bank, and Wells Fargo Bank.

The Alaska Bankers Association supports SB-104, the Manufactured Housing Conversion Procedure Process bill.

SB-104 will amend state law in Alaska to provide a formal method of eliminating the certificate of title to a manufactured home, converting the home to real property when the home is or will be permanently affixed to real property, and obtaining a new certificate of title when a home previously affixed to real property is severed.

Alaska, unlike the vast majority of states, has no formal statutory procedure for converting a manufactured home to real property. Under current Alaska law including Alaska's Uniform Commercial Code, a security interest in a manufactured home permanently affixed to land can be perfected only by noting the secured party's interest on the home's certificate of title and recording a deed of trust with a fixtures clause and an appropriate description of the home. The need for legislation arises from the fact that the Alaska Division of Motor Vehicles ("DMV") will not issue a title for a manufactured home that is affixed to a permanent foundation, notwithstanding the requirements of the Uniform Commercial Code, and has created and administers a vaguely defined procedure with no record notice. The result for many Alaska manufactured homeowners is an unmarketable title to their home and for many lenders an unperfected security interest in their collateral.

In addition, Alaska's current statute does not meet the eligibility requirements to sell a mortgage for a manufactured home to Fannie Mae or Freddie Mac, including the process to legally classify the home as real property and placing the lender in first lien position. Alaska also does not have a clear method to convert a factory built home to real property, especially older manufactured homes that come back on the market for resale.

Alaska Bankers Association
P.O. Box 241489 • Anchorage, Alaska 99524-1489 • Ph. 907-261-3525 • Fax 907-562-1758

AK SB-104 will bring state definitions of manufactured housing into accordance with HUD definitions to create a system for title transfer and property conversion. Additionally, the bill will create a means for titling manufactured homes that have been affixed to property, but the title can't be found.

This bill is good for manufactured home owners and good for lenders that finance manufactured homes.

Thank you for the opportunity to provide comment on SB-104.

Sincerely,

ALASKA BANKERS ASSOCIATION

Joe Beedle

First American Title Insurance Company supports Alaska Senate Bill 104.

First American Title has been operating, in multiple locations within the great state of Alaska for more than 30 years and feels that we are an integral part of the economic community. Passage of SB 104 is truly in the best interest of the citizens of Alaska.

In addition, as a representative of the Alaska Land Title Association's Legislative Committee, I feel confident that they will acknowledge their support following a membership poll, later today. The Alaska Land Title Association is made up of more than 25 statewide member companies, within Alaska.

If anyone from your office or committee wishes to discuss this issue, please feel free to contact myself, at your earliest convenience.

Respectfully Submitted,

Terry E. Bryan

Re: Senate Bill 104

Dear Senator French,

As Past President of the Alaska Land Title Association and current Chairman of the Legislative and Regulatory Committee I have polled the members of my committee and with unanimous consent I offer that committees support of Senate Bill 104. ALTA's bylaws require 30 days notice before the board can hold a meeting and pass a resolution of support but I can assure you that that vote would be unanimous as well. That board represents 25 member companies throughout the state of Alaska.

We believe that Senate Bill 104 will protect the interest of Alaska's homeowners as well as the interest of the real estate finance industry and the land title industry.

If you or anyone in your office has any questions regarding my industry's take on this proposed legislation please do not hesitate to call me at my office.

Sincerely,

Roger L. Floerchinger
Legislative and Regulatory Affairs Committee
Alaska Land Title Association
(907) 456-3474

Senator Hollis French

Capitol Room 417

MEMORANDUM

Date: April 4, 2011

To: Senator Hollis French
Chair, Senate Judiciary Committee

From: Andy Moderow, Staff to Senator French

RE: Potential Witnesses for SB 104

The following individuals have expressed interest in the Senate Bill 104 hearing scheduled for April 6, 2011 in front of the Senate Judiciary Committee:

Ethan Hormann - Branch Manager, Wells Fargo Home Mortgage - Anchorage, AK

George Ginsberg - Wells Fargo Outside Counsel, McGlinchey Stafford, PLLC

Jeff Harris, Loan Administration Manager, Wells Fargo Home Mortgage

Patrick Green, Regional Director, State Government Relations, Wells Fargo & Company

Senator Hollis French

Capitol Room 417

MANUFACTURED HOUSING RESOURCE GUIDE

Titling Homes as Real Property

BACKGROUND

For 17 million Americans, the pathway to the American Dream of homeownership is through manufactured housing. Today's manufactured housing is a high-quality and affordable entry into asset and wealth building for many families. Assets are the foundation for promoting long-term economic opportunity for most Americans. They provide security during unexpected financial troubles. They foster long-term planning and the drive to set and reach dreams, such as going to college and starting a business. For the last few generations of Americans, homeownership has been the bedrock of household financial assets. Even during times of economic insecurity in the housing market, homeownership remains the primary source of wealth for many Americans and continues to be the American Dream.

One hurdle that keeps many owners of manufactured homes from enjoying the same benefits as owners of site-built homes is classification as personal property. Whether a home is classified as real or personal property significantly affects the home's asset-building potential, mostly due to financing and tax implications. In lending as well as state and local public policy, manufactured homes are often treated as if they are cars, even though they look as good, are built as well and last as long as traditionally built homes. They're often issued titles as motor vehicles, rather than real estate. They are commonly assessed with "blue book" values and are often taxed as personal property. This makes manufactured homes more expensive to finance and lowers resale values, reducing homeowners' opportunities to enjoy property appreciation and build equity.

About This Legislative Guide

This guide provides advocates and practitioners with the information they need to assess the benefits of converting manufactured homes from personal to real property and to develop strong policies that allow for the easy and voluntary conversion of homes to real property. It is intended to provide a detailed overview of the laws and regulations involved at the state and federal levels. This guide:

- Outlines the importance of real property designation in seven key areas;
- Analyzes current state statutes; and
- Provides recommendations for strong policies that allow for the classification of manufactured homes as real property.

MANUFACTURED HOMES ARE HOMES: THE IMPORTANCE OF REAL PROPERTY DESIGNATION

Black's Law Dictionary defines real property as "[l]and, and generally whatever is erected or growing upon or fixed to land." On the other hand, it defines personal property as "[i]n broad and general sense, everything that is the subject of ownership, not coming under the denomination of real estate."

Manufactured homes are traditionally titled as personal property, largely due to the modern manufactured home's mid-20th century roots in the travel trailer industry. Advances in building technology and increased government regulation have resulted in a quality home construction comparable to site-built homes. Legally, however, manufactured homes are still bound by many of the same norms as their travel trailer ancestors, including use of certificates of title, similar to an automobile.

Although some manufactured homes are designated real estate and despite their many similarities to site-built homes, most manufactured homes are still considered personal property, absent an affirmative action by the homeowner to change its designation. All too often, however, homeowners are not permitted to classify their homes as real property, even if they take affirmative action in an attempt to do so.

January 2009

Each category has advantages and disadvantages (see chart on "The Importance of Designation as Real Property"), but homeowners generally benefit from classification as real property, particularly when financing the home. The real property designation generally provides more favorable status in terms of taxation and consumer protection. Although more than three-quarters of states have some statutory method for converting a manufactured home from personal property to real property, these existing conversion statutes are often inadequate. Following is a discussion of the implications of property designation status.

The Importance of Designation as Real Property: A Summary of Advantages and Disadvantages for Homeowners

Advantages of Real Property Classification	Disadvantages of Real Property Classification
Increased availability of favorable financing	Possible greater tax burden
More favorable titling options	Possible loss of some consumer protections
Equitable taxation	Limitations on bankruptcy cram down
Possibility of homestead exemptions	
Better consumer protections	
Stronger protections for heirs	
More vibrant resale market	
Equitable safeguards upon default	

Designation as real property affects owners of manufactured housing in seven key areas. These seven key areas affected touch each phase of the homeownership process from appraisals to financing, to taxation, to resale, and include:

1. Appraisals and Sales
2. Financing
3. Taxes and Tax Exemptions
4. Federal and State Consumer Protections
5. Protections for Spouses and Joint Ownership
6. Rights upon Default
7. Bankruptcy

1. Appraisals and Sales

Home appraisers and real estate agents must typically be licensed by the state. In some states, there are restrictions placed on these professions regarding real property, and sometimes appraisers are not permitted to appraise personal property. Even where there are regulations in place allowing real estate appraisers to appraise manufactured housing considered personal property, the confusing status of such housing is discouraging, even for seasoned appraisal professionals. Difficulties in obtaining an accurate appraisal also severely limit financing options for prospective purchasers and homeowners seeking refinancing, as most traditional mortgage lenders require an appraisal. Similarly, in some states real estate agents and brokers are prohibited from listing properties not classified as real property. This can be a tremendous disadvantage to owners of homes considered personal property, because it is difficult to sell a home without the assistance of an agent. These limitations not only hurt individual homeowners, but also harm the broader resale market for manufactured homes.

Imprecise conversion statutes make it harder for appraisers to appraise manufactured homes. It is evident that both homeowners and the industry would benefit from clear, easily monitored regulations that allow appraisers to more accurately determine the legal status and value of a home (Georgia and Alabama are two examples of states where appraisal boards have made efforts recently to clear up confusion that may arise after converting a manufactured home from personal to real property). Policies that allow clear and easy determination of a home's status as real property would make appraisals more accurate, lenders more comfortable with the knowledge that the home's status is settled, and homes easier to sell, as buyers would be assured of a home's status.

2. Financing

Most site-built homes are financed by a real estate mortgage, while manufactured homes classified as personal property are financed by chattel lending. Chattel is the legal term for personal property, as opposed to "real" property, which generally includes land and the structures attached to the land. Chattel loans, which include loans for televisions and automobiles, differ in many respects from mortgages. The key disadvantages to chattel financing of homes compared to conventional mortgage financing include shorter loan terms (typically 20 years instead of 30), higher interest rates (at least two to five percentage points higher) and a smaller pool of lenders from which to choose.

Permitting conversion of a manufactured home to real property can improve financing options, but it does not automatically permit the owner or purchaser to obtain conventional financing terms. However, designation of a manufactured home as personal property is almost certain to preclude favorable, conventional financing terms.

3. Taxes and Tax Exemptions

Although each state tax code is unique, states typically differentiate between real and personal property in several situations. Manufactured homes are almost universally considered personal property at the time of purchase, even if they are later converted to real property (unless the home is a used unit and was converted to real property by a previous owner.) As such, the buyer pays sales tax at purchase. In contrast, buyers of site-built homes usually pay excise or transfer taxes, which are calculated at a lower rate that factors in both the home purchase transaction and a sales tax on building materials. Because of this different tax structure, in states without a sales tax reduction or exemption for buyers of manufactured homes homebuyers are typically taxed at a far higher rate when buying a manufactured home The inequity is exacerbated when a home is sold as personal property and then converted to real property. In this case, the home is often taxed at a higher rate (i.e. as personal property) upon sale, but after conversion the homeowner's annual property tax bill is higher than it would have been, because real property is taxed at a higher annual rate than personal property tax rate.

This classification also affects the broader community by determining which government entity receives the tax payment. Real property taxes are typically paid to a local municipality, while in many jurisdictions taxes on personal property and sales tax revenue go to the state. There are significant revenue consequences for government entities when the classification of homes is changed; the fact that changing the classification of manufactured homes creates winners and losers in regard to tax revenue can make reform difficult.

Exempt or protected property, which may not be subject to taxation or may be unavailable to creditors seeking to enforce judgments, is also affected. A home's classification as real or personal property may also affect the owner's ability to claim the property as exempt. One such issue that many states have addressed is the homestead exemption. In many states, the homestead exemption applies to a manufactured home regardless of property classification. Thus, even if a manufactured home is treated as personal property for most purposes, it may qualify for the homestead exemption because of the liberal construction of homestead exemption laws in many states. However, in some states the applicability of the homestead exemption to manufactured homes has not been clearly established.

4. Federal and State Consumer Protections

Some federal and state consumer protection statutes apply only to real property, while others apply only to personal property. Although such distinctions can be explained by the separate evolution of laws dealing with goods and services and laws regulating real property transactions, the distinctions can lead to results that are inconsistent and at times inequitable. Such inconsistencies are especially apparent when looking at a manufactured home transaction, because the same home may be considered goods or real property. The distinction can have important consequences for the homeowner. While the home remains the same, the protections that apply depend upon the home's classification as real or personal property. A discussion of existing federal and state laws and their consequences for owners of manufactured homes follows.

- ***Federal Truth in Lending Act.*** The federal Truth in Lending Act (TILA) requires certain disclosures in any consumer credit transaction. It only applies to loans over $25,000 if the creditor takes a security interest in the borrower's principal dwelling. This is true for both real and personal property, and it covers manufactured homes. Thus, TILA covers credit secured by a manufactured home that is the consumer's principal dwelling regardless of whether the home is considered real or personal property.

- ***Federal Real Estate Settlement and Procedures Act.*** The federal Real Estate Settlement Procedures Act (RESPA) requires disclosures about closing costs (both before and at the time of settlement), and notices about escrow accounts, changes in loan servicing, and the right to obtain account information through a written request. It also prohibits kickbacks

and unearned fees for settlement services, charges for preparation of certain documents, and steering of borrowers to a particular title insurance company. Furthermore, it regulates the handling of escrow accounts. RESPA applies to all loans secured by a first or subordinate lien on one-to-four family residential real property. The loan must also be made by a federally insured lender or be federally related in a manner specified by the law. The U.S. Department of Housing and Urban Development (HUD) regulations interpreting RESPA limit the Act's coverage to certain mortgage loans and to real property.

The regulations do provide RESPA protection to certain owners of manufactured homes, as they include coverage for loans secured by real property upon which there is a manufactured home. However, the regulations do not explicitly state that any manufactured home classified as real property is covered by RESPA, an omission that calls for clarification. Loans on homes classified as personal property on leased land are clearly not covered by RESPA.

- ***The Federal Credit Practices Rule and the Federal Reserve Board's Regulation AA, Unfair or Deceptive Acts or Practices.*** The Federal Trade Commission (FTC) has authority to create rules that define and prevent unfair or deceptive acts or practices. One such rule is the Credit Practices Rule. It limits late charges and informs cosigners of their liability, while also prohibiting consumer credit contracts from containing confessions of judgment, wage assignments, and waivers of exemption. Although the rule explicitly excludes credit involving the purchase of real property, it is silent on other types of real estate loans (e.g. refinancing or lines of credit. Accordingly, although the rule clearly applies to credit involving the purchase of a home considered personal property, there is some ambiguity as to its application when a home is real property.

  The Credit Practices Rule does not apply to creditors outside of the FTC's authority, including banks, savings and loans, and credit unions. The regulators of these three types of entities have their own versions of the rule, however. The Federal Reserve Board (FRB) adopted a version of the Credit Practices Rule, and its guidelines defer how the dwelling is treated to state law, but if it is considered real property then the transaction would be exempt from this rule. The Office of Thrift Supervision (OTS) enacted an analogous rule that excludes real property and looks to state law to make that determination. The National Credit Union Administration (NCUA) enacted a similar rule applicable to credit unions and provides no exemption for real property loans.

- ***The Federal Fair Housing Act.*** The federal Fair Housing Act prohibits discrimination in the sale, rental or financing of homes. Analysis of the scope of the Act is difficult because different sections use different language to describe which transactions are covered. In most instances the Act applies to dwellings, which would certainly include manufactured homes, however one section ambiguously applies to dwellings and also to refinance loans secured by real estate. Although no cases appear on point, arguably the Act applies to the sale of all homes, but to refinancing of a manufactured home only if it is considered real property.

- ***The Federal Magnuson-Moss Warranty Act.*** The Magnuson-Moss Act regulates, simplifies and standardizes written warranties, implied warranties and service contracts. It applies only to personal property – not real property – and it covers the sale of both new and used goods. The Act has almost universal application to the sale of new manufactured homes, because even in states where a home may be converted to real property, it is generally classified as personal property at the time of sale.

- ***State Warranty Laws.*** Article 2 of the Uniform Commercial Code (UCC) sets forth warranty law for goods and has been enacted into law in every state but Louisiana. The UCC addresses both express and implied warranties and also sets forth consumer remedies for breach of warranty. Article 2 of the UCC defines goods as "all things (including specially manufactured goods) which are movable at the time of identification to the contract for sale." Although Article 9 of the UCC makes more specific reference to the definition of goods to be inclusive of manufactured homes, the Article 2 definition appears to be broad enough to cover new manufactured homes, because they are movable when manufactured, even if they are or will be permanently placed upon land or titled as real property. If a home is attached to land and sold as part of the land, however, it is less likely to fall within the scope of Article 2 of the UCC. In such instances common law warranties may apply, or courts may look to the UCC by analogy. Regardless, it is the permanent attachment to the land rather than the home's designation as real or personal property that will determine applicability.

- ***State Laws Prohibiting Unfair and Deceptive Acts and Practices.*** All 50 states have at least one enacted statute applicable to most consumer transactions designed to prevent deception and abuse, though not all apply to real property transactions. In some states real property is excluded because courts have ruled that real estate is not "goods or services," terminology used in many of the statutes. In other states, however, such language includes real property. Some statutes explicitly cover real property or all property. In other states, courts have found legislative intent to cover real property where the statute is silent about coverage of real estate. Even in states where the statute does not apply to the sale of real estate, services and personal property related to such transactions may be covered.

5. Protections for Spouses and Joint Ownership

At common law, "dower interest" protects a wife by not allowing her to be "disinherited" by her husband; a "curtsey interest" provides a similar protection for a husband. Both interests typically apply only to real property. Some states retain the dower and curtsey interest, but most states provide a similar protection for spouses and children through a concept known as an "elective share." States that use elective shares may still have protections for real property not available for personal property, such as a requirement that any conveyance of the homestead be authorized by both spouses, which may or may not include manufactured homes not considered real property. This has tremendous impact on families living in manufactured homes. If the home is titled in only one spouse's name, that spouse could transfer the home without obtaining any consent from the other spouse. Were the home real property, lenders involved in the closing would require that both spouses consent to the transfer.

Furthermore, there are different ways by which two or more people can jointly hold title to property. The co-owners may have an undivided interest in the property that each owner may transfer or bequeath, or the ownership may include a right of survivorship, which provides that upon the death of one owner, the other takes full title to the property, subject to the liabilities of the decedent. At common law, married couples may hold real property as "tenants by the entireties." Some states now allow both real and personal property to be held by the entireties, while other states have enacted special statutes extending the right to hold property as tenants by the entireties to manufactured homes. A tenancy by the entireties provides some advantages not available to other forms of co-ownership. Neither spouse can individually transfer or encumber the real property in a way that will affect the other spouse's right of survivorship in the whole property. Unlike other types of co-ownership, a creditor cannot attach or execute upon entireties property to collect a debt owed by only one of the property owners; entireties property can only be attached for joint debts. This is a significant disadvantage for owners of manufactured homes classified as personal property and not allowed to be held by the entireties.

6. Rights upon Default

The distinction between real property and personal property is especially important in the event of default. When a homeowner fails to make payments, the rights and responsibilities of the homeowner and lender depend upon the home's classification. If a home is personal property, the rights of the creditor and homeowner are governed by the UCC. Article 9 of the UCC applies to any contractual transaction that uses personal property as security. If a manufactured home is personal property and not affixed to real property, then it is governed only by Article 9 or other state laws dealing with repossession – not by state foreclosure law.

Such a home is generally subject to self-help repossession: a taking of the home by the lender without any oversight. Such repossession does not allow the homeowner to assert any claims or defenses that might stop the repossession and is also likely to involve the taking of the homeowner's household goods and belongings. The primary restriction that the UCC places on self-help repossession is that the creditor is liable to the consumer if he or she breaches the peace during the repossession.

If a home is real property, then in most states the creditor must use the foreclosure process when a homeowner defaults. In some states, foreclosure is a relatively balanced process, with judicial supervision, reasonable advance notice to the homeowner, and an opportunity for the homeowner to present defenses prior to foreclosure. Several states, however, allow nonjudicial foreclosure. In these states, a home (whether site-built or manufactured) can be sold by the creditor without any involvement of a judge and with minimal notice (as little as 14 or 15 days, respectively, in Virginia and Georgia, for example). While in the vast majority of states the foreclosure process provides more protections, in isolated cases when the homeowner lives in nonjudicial foreclosure states, classifying the homes as personal property may in fact provide more protections.

It is important to note that when a home is placed on real property the home may become a "fixture." UCC Article 9 defines fixtures as goods that have become so related to particular real property that an interest in them arises under real property law. When a home is a fixture, the lender may choose a UCC remedy or state foreclosure law, unless there is a law that specifies a procedure for converting a manufactured home to real property, which may specify the default remedy.

7. Bankruptcy

Bankruptcy Code Section 1322 enables bankruptcy courts to modify the rights of holders of most secured claims and may modify the payment amount, defer payments, or eliminate a creditor's lien. The modification may allow a consumer filing bankruptcy to keep a possession that secures a loan while reducing the monthly payment. This right to modify has limitations, including the limitation that applies to debts secured by real property that is the debtor's principal residence. This limitation means that owners of manufactured homes classified as real property will generally not be allowed to modify a first mortgage on their home. Although a homeowner whose home is not real property was previously eligible for such a modification, recent changes to bankruptcy law make it unclear whether the homeowner can modify a personal property loan on their primary residence.

For now, real property designation may be a disadvantage to some homeowners if courts continue to use the distinction between real and personal property to determine whether a loan is eligible for modification. Homeowners whose manufactured homes are classified as real property may not be able to modify debts secured by the home, whereas they would be eligible for a cram down if the home were personal property. However, several recently introduced bills propose permitting bankruptcy courts to modify the terms of real property loans on a borrower's principal residence, which would make the home's classification less important.

ANALYSIS OF STATE STATUTES THAT ALLOW CONVERSION FROM PERSONAL TO REAL PROPERTY

Approximately three-quarters of the states have statutes that set forth a procedure to convert a manufactured home from personal to real property and document that conversion. Generally, the procedure involves surrendering the certificate of title or manufacturer's certificate of origin and then filing an affidavit in the local county land records. Typically, the manufactured home must be permanently affixed to the land, a concept often specifically defined. Many states also require that the homeowner own the land in addition to the home. Other states allow a home to be converted to real property if it is permanently affixed to land that the owner is renting, typically requiring that the lease be for a minimum specified period of time.

Many state statutes that allow homes on rented land to be converted to real property were created to allow financing of manufactured homes under the Freddie Mac Leasehold Estate Mortgage Program. Fannie Mae manages a similar program that is being piloted in New Hampshire. Statutes that allow homes on rented land to be treated as real property have particular significance in resident-owned communities, and communities owned by nonprofits or community land trusts because in such situations, each homeowner rents a lot from the cooperative, nonprofit or land trust. Some statutes allow homes under these conditions to be treated as real estate.

Title purging after conversion to real estate is critical in order to avoid opportunities of fraud and provide lenders with the security of clear ownership by the homeowner. A state that does not have a title purging statute may still grant requests to cancel a manufactured home's certificate of title. For example, if a home has a certificate of title, a state motor vehicle department may grant a request to cancel the title upon a showing that the home is not capable of being operated on a public highway. Some states have administrative rules allowing cancellation of the title. Even without a title purging statute, a state motor vehicle department may agree to cancel a title if the owner shows that a home no longer meets the jurisdiction's definition of motor vehicle because it has been attached to the land. However, as discussed in a later section, the effect of title purging, by statute or otherwise, may not always be clear. A few states, such as New York, specifically forbid title purging.

Strengths of Existing State Conversion Laws

Cancellation of Certificate of Title. Conversion statutes in states that use a certificate of title for manufactured homes generally also prescribe procedures to make sure that the certificate of title is cancelled when the home is converted to real property. This is key, because the coexistence of two title documents – the certificate of title and the deed – enables an unscrupulous owner to sell the manufactured home twice, assigning the certificate of title to one buyer and conveying a deed to the other.

Protection of Secured Lenders. Most conversion statutes ensure the protection of secured parties. Before a state allows for the conversion of a manufactured home from personal to real property, they typically require the secured party to either release its security interest or accept a mortgage in substitution for the UCC security.

Opportunities to Strengthen Existing State Conversion Laws

Increase Clarity. The ultimate effect of using a state's conversion statute is not always clear. Some state statutes indicate that once a home is converted to real property, foreclosure law applies. Others achieve the same result by stating that the home, upon conversion, is subject to all laws that apply to real estate. Some conversion statutes say nothing about the implications of the conversion or state only some effect on the manner in which the home is taxed. Other statutes merely provide that upon completion of the requirements the title may be surrendered, without stating if all real estate laws apply to the home thereafter.

Adding to the confusion, a state's statute may be located among the state's manufactured home statutes or may be part of the state's motor vehicle, finance or tax laws. Although some courts have held that when a statute treats a manufactured home as real property for one purpose, such as taxation, it should be treated as real property for other purposes as well, such as bankruptcy. The lack of clarity in the statute can leave homeowners vulnerable.

In addition, some statutes lack clarity as to whether the statutory conversion procedure supplants common law methods of conversion. Such common law methods of conversion, rules created by precedent of previous court cases rather than statutes created by a legislature, typically involve actions of the homeowner that are sufficient to show that the home has become a part of the land on which it is sited.

Lenders wanting to sell their loans on the secondary mortgage market may insist that a home be converted to real property. Fannie Mae, for example, requires a manufactured home be legally classified as real property, and financing must be secured by a mortgage or deed of trust recorded in the jurisdiction's land records. In states where there is less clarity around conversion, a lender may be reluctant to extend conventional style financing. Therefore, clarity is critical in regulations for converting a manufactured home from personal to real property.

Ensure Reasonable Land Ownership and Lease Requirements. Many states permit a manufactured home to convert to real property only if the home and the land that home is placed upon are both owned by the same person. Although policymakers and practitioners may be unfamiliar with the idea of a home being real property even though it sits upon land owned by another, there are several common examples. Many commercial buildings are not owned by the same entity which owns the land, yet the buildings are generally classified as real property. Similarly, community land trust homes sit on land leased, not owned, by the homeowner, and often homes in such situations are classified as real property.

More recent statutes for the conversion of manufactured homes permit the home itself to become real property, even when placed on leased land. Unfortunately, many of these statutes place severe restrictions on such conversions. Typically, they require long-term leasehold interest by the homeowners, often between 20 and 35 years. While long-term leases do provide some protection to homeowners and secured lenders, this protection is not comprehensive. Even with a long-term lease, the homeowner may still be vulnerable to rent increases or other changes that might ultimately force the home off the land. Lease requirements also put landowners, with the power to permit or deny a long-term lease, in control of a homeowner's ability to classify the home as real property. Requiring such a lease to convert the home to real property places many owners of manufactured homes on leased land at a disadvantage without actually conferring the safeguards that the measure may seek to put in place.

A Special Note on State Automatic Conversion Laws

Many issues must be considered before creating a new conversion statute or modernizing existing statutes. A list of recommendations is available at the end of this legislative guide. However, advocates are cautioned to pay special attention to the issue of automatic conversion versus procedures for conversion – each has advantages and disadvantages. Most states that have enacted conversion statutes require that the homeowner take affirmative steps to convert the home to real property. Although conversion to real property may take place without any sort of bureaucratic procedure in states that continue to permit common law conversions, the number of such states is decreasing as more states make the statutory conversion process the sole means of conversion. Even states that continue to allow common law conversions generally require clear intentional acts on the part of the homeowner to convert the home to real property.

There is an alternative to such conversion requirements. A scant few states provide for automatic conversion to real property by virtue of physical actions of the homeowner, such as connection to utility service, rather than requiring procedural actions. Such approaches get rid of bureaucratic hurdles to real property designation, clearly benefiting homeowners who want their homes to be treated as real property.

There are, however, some potential disadvantages to an automatic conversion process. Automatic conversions may create confusion as to the status of the home. If conversion depends upon certain facts, such as whether the home sits upon a permanent foundation or is connected to utilities, it may be unclear to prospective buyers, lenders and even the homeowner whether the home is real or personal property. Making the determination may require verification of factual criteria that can give rise to disputes. A well-documented formal conversion process may avoid many of these issues. Alternatively, a conversion that occurs automatically upon the sale to the consumer would ease the burden of verifying that the home was, in fact, converted to real property.

An automatic conversion also removes the conversion option from the homeowner's control. Although homeowners will generally benefit from a real property designation, there may be situations in which the homeowner would benefit from maintaining a personal property designation. For example, in some states treatment as real property may entail a significant tax increase for the homeowner.

Even more disadvantageous to many homeowners is an unusual provision found in several conversion statutes that permits homes on leased land to become real property only if the home is financed through Fannie Mae, Freddie Mac, the Federal Housing Administration and other similar programs. Most of these statutes were enacted in response to Freddie Mac's program to make mortgage loans on manufactured homes atop leased land, which required that the home be real property. Such conversions statutes were designed to increase the likelihood of conventional financing for owners of manufactured homes, but it is not clear why the benefits of a real property designation should be denied to homeowners on leased land who already own their homes or are financing the home in some other way. Therefore, state conversion statues must be reasonable and not overly burdensome with regard to land ownership and lease requirements.

Call for Reasonable Permanent Foundation Requirements. A majority of states with a statutory method for converting manufactured homes to real property require that the home be placed upon a permanent foundation before conversion. This requirement may mirror the standard foundation required for installation of all manufactured homes in that state, while in other states this requirement is more stringent than standard installation requirements.

States differ as to foundation requirements. Some may permit footings and piers; others may require a more extensive and expensive foundation, such as a masonry wall for the entire perimeter of the home. In addition to cost, a requirement for a permanent foundation presents other difficulties. Few homeowners on leased land would invest in such a foundation without feeling secure in their right to remain on the land. In addition, many manufactured home community owners, and in some cases local government regulations, prohibit such extensive foundations in land-lease communities. Therefore, states should not impose requirements regarding a home's foundation beyond those required to site any manufactured home.

Remove Permission of Landowner Requirements. Of the states that do permit homes sited on leased land to become real property, some, unfortunately, require that the homeowner obtain the permission of the landowner (expressed as a clause in the lease) in order to reclassify the home. Requiring such permission is an unnecessary burden on the homeowner as a conversion of the home to real property need not affect landowner rights. The permission of the landowner may be seen as necessary to protect secured lenders, because lenders may fear that landowners will treat the home as a fixture and convey it with the land. However, such fraudulent activity can be prevented by clear cross-referencing between the land deed and the home deed. Therefore, state conversion laws should not require permission from the landowner, nor should they affect the landowner's interests.

Create User Friendly Conversion Statutes. In states with conversion statutes, courts commonly find that a home continues to be personal property until the statutory procedures are followed. Thus, even if a home is permanently affixed to the land, it may be considered personal property unless the owner surrendered the title and filed the proper papers to convert it to real property.

If the conversion is completed as part of a financing arrangement, it is likely that the conversion process will be properly followed, as the lender wishes to ensure that its security interest in the home is properly recorded and perfected. When a homeowner attempts conversion on his or her own, however, successful completion of the required procedures is less certain. Requirements may be relatively complex for a lay person, and homeowners may not be able to afford the services of an attorney to assist in the conversion process. Therefore, state conversion statues should be straight-forward and not require professional expertise.

RECOMMENDATIONS FOR STRONG LAWS TO PROMOTE MANUFACTURED HOMES AS REAL PROPERTY

- Conversion should be available regardless of who owns the land upon which the home is placed.
- Conversion should make the home real property for all purposes.
- Conversion should protect secured parties' interest in the home.
- Conversion should not require homes on rented land to have a specific lease term.
- Conversion should not impose requirements regarding the home's foundation beyond those required to site any manufactured home.
- Conversion should not affect the landowner's interests, if the home is on rented land, nor should it require the permission of the landowner.
- Conversion procedures should create a clear chain of ownership to facilitate title searches.
- Conversion procedures should be user-friendly and permit homeowners to convert their homes without hiring a professional for assistance.
- The Real Estate Settlement and Procedures Act should apply to all loan transactions secured by a manufactured home,

regardless of the home's classification as real or personal property.

- Conversion should provide a bright line rule for when a home is real property, to ensure predictable and consistent results.
- Conversion procedures should include the cancellation of certificates of title, in order to reduce the possibility of fraud.
- Protections against unfair and deceptive practices (state UDAP statutes) should apply to manufactured home sales and state homestead exemption laws should apply to manufactured homes, regardless of whether the home is real or personal property.
- Laws regarding appraisers and real estate agents should eliminate restrictions that impede their involvement in manufactured home sales, regardless of whether the home is real or personal property.
- Automatic treatment of homes as real property should be considered in states where manufactured and site-built homes are taxed at substantially the same rate.

ABOUT I'M HOME

I'M HOME, or Innovations in Manufactured Homes, is an initiative of CFED, a national nonprofit organization dedicated to expanding economic opportunities for all Americans. The I'M HOME network includes nonprofit and for-profit, national and local partners who together work toward ensuring that all homeowners, regardless of whether their home is manufactured or site-built, enjoy the same rights and privileges of homeownership, including asset building opportunities. For more information about I'M HOME, please visit www.cfed.org/go/imhome.

ABOUT THE NATIONAL CONSUMER LAW CENTER

The National Consumer Law Center (NCLC) is the nation's consumer law expert, helping consumers, their advocates and public policymakers use powerful and complex consumer laws on behalf of low-income and vulnerable Americans seeking economic justice. NCLC is the leading consumer legal advocate promoting legal protections for owners of manufactured homes. For more information about NCLC please visit www.consumerlaw.org.

Appendix A

EXISTING STATE CONVERSION STATUES

In the following summaries of state statutes that specify a procedure for the conversion of a manufactured home to real property, the terminology of the statutes as to manufactured or mobile homes is retained.

Alabama

A mobile home title may be cancelled if the home is affixed to real property owned by the homeowner – ownership of both the home and the land must be identical. The owner must submit an application to the state department of revenue, including a release of any liens noted on the title. If the mobile home is later detached from the land, the owner must reapply for a new certificate of title.[1] This statute is part of the state title law and does not state whether the home is treated as real property for foreclosure or other purposes after the title is cancelled.

Arizona

A mobile home permanently affixed, i.e., installed on real property owned by the homeowner,[2] and for which an affidavit of affixture is recorded, shall be assessed as real property for tax purposes.[3] A mobile located in a mobile home park will, along with the leasehold interest, be treated as real property if the homeowner files an affidavit of affixture with the county recorder and: (1) the home was installed on the real property with all wheels and axles removed in compliance with local and state installation standards; (2) the owner of the home entered into a lease of at least twenty years for the lot and the lease specifically permits the recording of an affidavit of affixture; and (3) a memorandum of lease, signed by both landlord and tenant, is recorded that lists specified information.[4] Regardless of whether the home is located in a park, the affidavit of affixture must identify the holder of any security interest in the home that is not terminated by the consent of the secured party, and any such interest survives recordation of the affidavit.[5] When an affidavit of affixture is recorded, the owner must surrender the certificate of title.[6] A lien on a mobile home for which an affidavit of affixture is recorded may be perfected either in the manner provided by law for real property or in the manner provided for fixtures.[7]

Arkansas

If a mobile or manufactured home is affixed to real estate, the title may be surrendered to the state department of finance and administration for cancellation. After cancellation, a security interest, lien, or encumbrance may be obtained in the same manner as for real property.[8]

California

If a manufactured or mobile home is affixed to a permanent foundation in compliance with state standards,[9] default and sale are governed by California's mortgage foreclosure laws.[10] The homeowner must own the land or have a minimum 35-year lease.[11] Any lienholders must consent to the attachment of the home to the land.[12] The owner must surrender the certificate of title, and a statement that the home was affixed to real property is to be recorded in the county land records.[13] Once these procedures are completed, the home is deemed a fixture and an improvement to the real property.[14] Default and sale are also governed by the state mortgage foreclosure laws if the creditor has a security interest in the land in addition to the home.[15]

Colorado

The owner of a manufactured home, once it is permanently affixed to the ground so that it can no longer be drawn over the public highways, may surrender the certificate of title and apply for purging of the title. The owner must also obtain the consent of the holders of any unreleased security interests in the home. The home then becomes real property, and subject to all laws that would apply to real estate.[16] Although the statute does not

explicitly state that the homeowner must also own the land upon which the home is placed, it appears that after conversion the home is taxed as part of the land upon which it sits, and so conversion would only be practical when the homeowner also owns the land. Although the statute does not address retitling, the Colorado Division of Motor Vehicles, Department of Revenue, currently permits a bonding procedure to allow homeowners to reestablish title.[17]

Connecticut

Title conveyances to manufactured homes are recorded on the land records with the town clerk's office of municipality.[18] While the document conveying title to homes on leased land must recite information about the land or park where the home is located,[19] it appears to allow conveyance of homes located upon land owned by the homeowner by deed, and such home would become part of the real property.[20]

Florida

The owner of a mobile home permanently affixed to land also owned by the homeowner, or in which the homeowner has a recorded leasehold interest of at least 30 years, may retire title to the home.[21] Before title is retired the following documents must be recorded in the official records of the clerk of court in the county where the home is located: (1) the original title to the home, including a statement by any recorded lienholder that the security interest has been released or will be upon retirement of title; (2) legal description of the real property, and if the homeowner's interest in the property is a leasehold, a copy of the lease; and (3) a sworn statement of the owner that he or she owns the home and the real property or leasehold interest. After the title is retired, the home is only conveyed by deed or real estate contract along with the property to which it is affixed.[22] A new title may be obtained if the home is to be removed from the land.[23]

Another Florida statute provides that if the mobile home is classified as personal property by a seller or lender at the time a security interest in the home was granted, it shall continue to be so classified for all purposes relating to the loan and security agreement.[24]

Georgia

A manufactured or mobile home is personal property unless: (1) the home is or is to be permanently affixed to real property and one or more persons with an ownership interest in the home also has an ownership interest in the real property; and (2) the owner and all holders of security interests sign and file a certificate of permanent location with the clerk of the local superior court and the state revenue commissioner. Once such a certificate is properly filed, the home is a part of the real property for all legal purposes, including foreclosure.[25]

Idaho

A manufactured home may constitute real property if the home is permanently affixed to a foundation and the running gear is removed. The home must be sited on land owned (or being purchased) by the homeowner or, if the home is being financed in accordance with a federal housing agency's guidelines, is leased by the homeowner. The homeowner must record with the county recorder a statement of intent to declare the home as real property, and must turn over the certificate of title. Upon exercise of this option, lending institutions may treat the home as real property.[26] Physical removal of the home from the land is then prohibited unless the owner applies to have a new certificate of title issued.[27]

Indiana

If a manufactured home is attached to real estate by a permanent foundation, the owner may submit the certificate of title and an affidavit to the bureau of motor vehicles.[28] The county recorder is then to record the affidavit in the county real estate records,[29] and the home is thereafter deemed to be an improvement to the real estate.[30]

Iowa

Iowa has separate provisions depending on whether or not the home is in a manufactured home community. If the home is located in a manufactured home community and installed on a permanent foundation, the owner may surrender the certificate of title to the county treasurer for the purpose of assuring eligibility for federal mortgage lending programs. The title cannot be surrendered if there are unreleased security interests. A foreclosure action on a manufactured home whose title has been surrendered must be conducted as a real estate foreclosure. The owner may reapply for a certificate of title at a later date.[31] If the home is not in a manufactured home community, it must be placed on a permanent foundation. If a security interest is noted on the title, the homeowner must tender a mortgage on the real estate to the creditor, or the secured party must consent to the conversion, in which case the secured party retains a security interest in the home that is separate from any interest in the land. This statute is a tax law that does not state whether foreclosure law applies after the home is converted to real property.[32]

Kansas

Whenever a manufactured or mobile home is permanently affixed to real property by placement upon a permanent foundation that cannot be removed intact from the land, the owner may apply to have the certificate of title eliminated. The application must include an affidavit signed by the owner and all parties having a security interest in the home. If the application is approved, it is filed in the county registry of deeds. Once the certificate of title is eliminated, ownership of the home is an incident of ownership of the land under governing real property law, and the home is subject to a lien only as part of the real property.[33]

Kentucky

When a manufactured home is or is to be permanently affixed to real estate, the owner may file an affidavit of conversion with, and surrender the certificate of title to, the county clerk, who is then to record the affidavit. The home is then deemed an improvement of the real estate.[34]

Louisiana

A manufactured home is considered immovable when a document describing the home and the land is recorded in the local parish records. The document must include a declaration by the owner of the home and any holder of a security interest in the home that the home is to remain permanently attached to the land. Once this document is recorded, the home is subject to all laws concerning immovable property.[35] However, the rights of the holder of a validly recorded chattel mortgage or a security interest perfected under Article 9 of the UCC are unaffected.[36] The owner may reverse the process so that the home is once again treated as movable property by filing another statement of intent and applying for a new certificate of title.[37]

Michigan

The owner of a mobile home affixed to real property in which the owner also has an ownership interest, may apply for cancellation of the certificate of title. To be considered affixed to the real property, the wheels, towing hitches and running gear must be removed and the home must be attached to a foundation or other support system. The application must include the written consent of each holder of a security interest to termination of the security interest and cancellation of the title. Once the title is cancelled, the mobile home is considered part of the realty and a lienholder may perfect a new security interest or lien on the mobile home only in the manner prescribed by the real estate laws.[38] The owner may reapply for a certificate of title at a later date.[39]

In 2003, the Sixth Circuit had held that security interests in manufactured homes in Michigan could be perfected only by recording them on the title, not by recording a traditional mortgage.[40] The legislature responded by amending its titling laws to recognize both methods.[41] It amended the statute again two years later to make this rule retroactive.[42]

Minnesota

When a manufactured home is affixed to real property, and financed by a mortgage on the real property, the owner of the home must surrender the certificate of title to the registrar of motor vehicles for cancellation. The department is then to issue a notice of surrender, which may be recorded in the county recorder's office or the registrar of titles. The statute provides that the manufactured home is then deemed to be an improvement to real property. The department may not cancel the certificate of title, however, if an unsatisfied security interest is noted on it.[43]

Mississippi

An owner of a manufactured or mobile home ,who also owns the land on which the home is located, has the option of declaring whether the home is to be classified as personal or real property. To be classified as real property, the wheels and axles must be removed and the home must be anchored and blocked in accord with rules adopted by the commissioner of insurance.[44] A certificate that the home has been classified as real property is then recorded in the county land records,[45] and the home's certificate of title may be sent to the state tax commission for cancellation.[46] The home is then treated as real property for purposes of *ad valorem* taxation, and a security interest in the home and land may be obtained through the use of a mortgage or deed of trust.[47]

Missouri

The owner of a manufactured home may convert it to real property by attaching it to a permanent foundation on real property that the owner of the home also owns, and removing or modifying the transportation apparatus so that it is impractical to reconvert it to be readily movable.[48] Unlike the other statutes summarized in this subsection, this statute does not provide for surrender of the title or recordation of a document in the county land records.

Montana

A manufactured home is considered an improvement to real property if the running gear is removed, the home is attached to a permanent foundation on land that is owned or being purchased by the owner of the home (or that is placed on the land with the permission of the landowner), and a statement of intent declaring the manufactured home as an improvement to real property is recorded with the county. The statement of intent must include, inter alia, a description of any security interests in the home and approval from all lienholders to eliminate the certificate of title. After these steps are completed, the manufactured home may not be removed from the land unless the owner files a statement of reversal of this declaration. A manufactured home that has been declared an improvement to real property must be treated by lending institutions in the same manner as any other improvement to real property.[49]

Nebraska

The title for a mobile or manufactured home may be canceled if it is affixed to real property in which the owner of the home has any ownership interest. The statute defines ownership interest as fee simple interest, or an interest as a lessee that continues for at least twenty years after the required affidavit. The title is surrendered for cancellation to the county clerk or designated official where the title is issued or to the Department of Motor Vehicles if title is issued by the department. Along with the title to be surrendered an affidavit of affixture on a form provided by the department must be submitted. The form requires among other things, the names and addresses of all owners of the home, a description of the home, the legal description of the real property, a statement that the home is affixed, and the written consent of each lien holder to release its lien and cancel the title. After the title is canceled and the affidavit recorded, the home is treated as part of the real property.[50] The statute also provides a method for returning the home to the status of personal property.[51]

Nevada

A mobile or manufactured home is eligible to become real property if it becomes permanently affixed to land. The owner of the home must either own the land or, if the home is being financed in accordance with the guidelines

of a federal housing program, lease it. The owner must record an affidavit of conversion in the county recorder's office, deliver a copy of the affidavit and all documents relating to the home to the manufactured housing division of the state department of business and industry, and pay the current year's personal property tax.[52] (But homes that are sited on lots outside mobile home parks in accordance with local zoning laws are automatically recorded as real property without the need for an affidavit.[53]) Once the home is converted to real property, it is deemed to be a fixture and an improvement to the real property.[54]

New Hampshire

A manufactured home placed on a site not owned by the homeowner but connected to utilities shall be deemed real estate for the purposes of transfer and shall be subject to attachment, liens, foreclosure and execution in the same manner as real estate.[55] However, security interests in manufactured housing may also be created and perfected under the U.C.C. as adopted by New Hampshire.[56] The statute does not address homes placed on land owned by the homeowner. Owners of manufactured homes in this situation must rely upon common law to determine if the home becomes real property. New Hampshire also has a statute which allows any lending institution to treat a manufactured home the same as realty for the purposes of securing loans to finance the home. When a lending institution exercises this option, no certificate of title is required, and all of the provisions of real estate law, including conveyances, deeds, and foreclosure, apply to the home. The home must be placed on a foundation or slab and hooked up to all conventional and necessary utility systems and must be intended to be used as a permanent dwelling unit.[57]

New Jersey

New Jersey requires that all manufactured homes not taxed as real property must have certificates of ownership (titles) issued by the Director of the Division of Motor Vehicles.[58] A manufactured home is taxed as real property when it is affixed to the land by a permanent foundation, or if by a nonpermanent foundation but connected to utility systems so as to render it habitable on a permanent basis.[59] However, a manufactured home installed in a park is not taxed as real property.[60] When a mobile or manufactured home is relocated from a park to land which the owner of the home also has an interest in or title to, the owner must file a notice with the Director of the Division of Motor Vehicles at least 10 days before the move. If the director accepts the notice as complete, the certificate of ownership is canceled on the date of relocation.[61]

North Carolina

A manufactured home qualifies as real property if it is a residential structure; the moving hitch, wheels, and axle have been removed; and the owner either owns the land on which it is located or has a lease of at least twenty years that expressly provides for disposition of the mobile home upon termination of the lease.[62] The owner of such a home may have the certificate of title cancelled by submitting it, along with an affidavit, to the division of motor vehicles.[63] If the certificate of title shows a security interest that has not been released, the division may not cancel the title without the written consent of all secured parties. The affidavit is then to be filed in the county registry of deeds. An owner who wishes to separate the home from the land after the title has been cancelled can apply for a new certificate of title. Once the certificate of title is cancelled and the affidavit is recorded, the manufactured home becomes an improvement to real property and any lien on the home shall be perfected and given priority in the manner provided for real property liens.[64]

Ohio

To be taxed as real property, a manufactured or mobile home must be affixed to a permanent foundation and be located on land that the owner of the home also owns.[65] The owner of a home, which will be taxed as real property, must surrender the certificate of title to the county auditor.[66] The owner must either satisfy any liens on the home, or, with the lienholder's consent, give the lienholder a mortgage on the home and land. Once surrendered, the title is to be deactivated, but it can be reactivated upon application by the homeowner. These statutes do not state what effect the deactivation of the title has outside the context of taxation, but a bankruptcy case holds that if a home was converted to real property through this procedure for taxation purposes it is also real property for purposes of bankruptcy law.[67]

Oregon

The owner of a manufactured structure, or the dealer selling it, may apply to the county assessor to have the structure recorded in the county deed records. The owner must either own the land on which the structure is located, or hold a recorded lease of twenty years or more that specifically permits the structure to be recorded in the county deed records. The owner must turn over any ownership document for cancellation. The deed records must list any unreleased security interest in the manufactured structure. Once recorded in the deed records, the manufactured structure is subject to the same provisions of law applicable to any other building, housing, or structure on the land, and may be sold separately from the land or leasehold estate only if the owner applies to have it removed from the deed records.[68]

Pennsylvania

Upon application, the department of transportation may cancel a certificate of title for a mobile home that is affixed to real property.[69] The home must be permanently mounted on a foundation.[70] The owner must complete a form and return it, along with the title, to the department of transportation.[71] If a lien appears on the certificate of title, the title will not be cancelled until the home owner submits satisfactory evidence that the lien has been recorded against the land.[72] After cancellation, the ownership interest in the mobile home, together with all liens and encumbrances on it, is transferred to and encumbers the real property.[73]

South Carolina

The owner of a manufactured home may affix the home to real property by installing it in accordance with the state installation standards, removing the wheels, axles, and towing hitch, and filing an affidavit for retirement of title.[74] The homeowner must either own the land on which it is located or have a leasehold estate of thirty-five years or more in the land. The local register of deeds or clerk of court must then record the affidavit as if it were a deed to real property. Upon completion of this process, the home is to be treated as real property for all purposes except condemnation.[75] The title certificate may be cancelled by presenting it to the division, along with a clocked and stamped copy of the affidavit.[76] Any party listed on the title certificate as having a security interest in the home must either lease the lien or consent to the cancellation of the title.[77] Once a manufactured home has been converted to real property in this manner, a manufactured home severance affidavit must be filed before it can be severed from the land.

South Dakota

If a mobile or manufactured home is fixed to real property, and the owner of the home also owns the land, the owner may request that the title to the home be surrendered.[78] If the owner wants to remove the home from the real property at a later time, the owner may apply to have a title reissued.[79] These statutes are part of the state motor vehicle titling laws and do not state the effect of surrendering the title.

Tennessee

If a manufactured home is affixed to real property, and the ownership of the home is identical to the ownership of the land, the owner may surrender the title to the state department of safety. The owner must submit an affidavit of affixation that, *inter alia*, certifies that all permits required by applicable governmental authorities have been obtained, the foundation system complies with the law and with the manufacturer's specifications, and the wheels and axles have been removed. All lienholders must have released their liens on the home. If the affidavit complies with all the statutory requirements, the county register of deeds is to record it. The home is then subject to taxation as an improvement to the land, but the statute does not specify the effect on foreclosure.[80]

Texas

A manufactured home can be treated as real property, if it is attached to land that the homeowner also owns, or which the homeowner is leasing under a long-term lease as defined by the state department of housing and community affairs.[81] To be attached to land it must be installed in compliance with state rules and connected to

a utility.[82] The owner must file an application for a statement of ownership and location with the department. In addition, each lienholder must either release the lien or give written consent to the conversion of the home to real property.[83] Within sixty days after the department issues a statement of ownership, the owner must file a certified copy in the real property records of the county in which the home is located and notify the department and the tax assessor-collector that the certified copy has been filed.[84] The home is then considered real property for all purposes.[85]

Another Texas statute provides that, if a consumer buys real property and a manufactured home at the same time, and certain other conditions are met, the creditor may elect to treat the home as if it were residential real property for all purposes in connection with the credit transaction.[86] If the creditor so elects, and discloses this election conspicuously to the consumer, then the transaction is considered to be a residential real property transaction for all purposes.[87]

Utah

A manufactured or mobile home is considered an improvement to real property if the homeowner also owns the land to which it is permanently affixed, or leases the land and is financing the home in accordance with federal housing agency guidelines. The owner must surrender the title and complete an affidavit that, *inter alia*, identifies any security interests in the home. The affidavit and the receipt for the surrender of the title are then recorded by the county recorder. The homeowner may acquire a new title upon removing the mobile home from the land. Since this statute is part of the state mortgage lending and servicing act, it is likely that it will govern whether foreclosure is the appropriate way for the lender to proceed in the event of default.[88]

Vermont

If a mobile home is financed while the home is permanently sited in a manner intended for continuous residential occupancy by the homeowner on land also owned by the homeowner, it shall be financed as a residence.[89] Otherwise a mobile home may be financed under 9 V.S.A. § 41a(b)(4) or 9 V.S.A. Pt. 3, Ch. 59, both of which regulate chattel loans.

Virginia

The owner of a manufactured home or house trailer that exceeds the size permitted for highway travel must apply for a title within thirty days after purchase. Once the wheels and other equipment that made the home mobile are removed and the home has been attached to realty, then the owner may return the title to the department of motor vehicles for cancellation. The home may then be transferred only as real estate. Any security interest perfected on the title continues despite the cancellation of the title.[90] A bankruptcy court has held that the determination of whether a mobile home is real or personal property must be made on a case-by-case basis and an owner's failure to comply with the statute, while it might be indicative of the owner's intent that home remain personal property, is not conclusive.[91]

Washington

The owner of a manufactured home that is affixed to land (i.e., installed in accordance with state installation standards[92]) may apply to have the title eliminated. The owner of the home must also own the land on which it is sited, have a lease of thirty-five years or more for the land, or be purchasing the land under a real estate contract.[93] The owner must submit the title and an application, which must identify any security interests, to the department of licensing for approval.[94] After approval, the title is to be cancelled and the approved application is to be recorded in the county real property records.[95] The statute provides that the manufactured home is then to be treated as real property as if it were a site-built structure,[96] except for purposes of taxation.[97] If the title has not been eliminated, the home is not real property.[98] The statute provides a procedure to obtain a new title if the home is to be removed from the land.[99]

West Virginia

The commissioner of motor vehicles may cancel a certificate of title for a mobile or manufactured home that is affixed to real property owned by the homeowner.[100] The homeowner must submit an application and the certificate of title. The cancellation certificate is then to be recorded in the county deed records. Upon recordation, the statute provides that the home is to be treated for all purposes as an appurtenance to the real estate to which it is affixed.[101]

Wisconsin

The owner of a manufactured home must obtain a certificate of title,[102] unless the homeowner is not a resident of Wisconsin[103] or the homeowner intends to make the home a fixture to land in which the homeowner has an ownership or leasehold interest.[104] The leasehold interest must be subject to Wisconsin's real property statutes which exclude leases for a term limited to one year or less.[105]

Wyoming

If a mobile home is installed on a permanent foundation and is taxable as real property,[106] and all liens have been paid, the certificate of title is to be surrendered to and cancelled by the county clerk.[107]

Senate Bill 110 – Strengthening Human Trafficking and Sex Offense Statutes

"An Act relating to human trafficking; and relating to sentencing and conditions of probation in criminal cases involving sex offenses"

Senate Bill 110 is a bill designed to strengthen existing human trafficking laws in Alaska and give judges more discretion in setting the conditions of probation in criminal cases involving sex offenses.

Sexual exploitation is a serious problem in the state of Alaska. Traffickers prey on vulnerable Alaskans, a large number of whom are underage females. Statistics show Native Alaskans also are disproportionately targeted.

Current state law, however, only recognizes the crime of "trafficking" when victims are transported across state lines. SB 110 would close that loophole, allowing law enforcement to prosecute traffickers who prey on victims within state borders.

SB 110 would also allow judicial discretion in imposing conditions of probation on criminal cases involving sex offenses. Judges could include, as part of probation, the requirement that certain defendants refrain from residing within 500 feet of school grounds.

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB110 \A

Analysis

SB 110 adds a new, more serious level of human trafficking. It would adopt an unclassified felony if a person induces. compels, or entices a person under 18 years old to move from one place to another and engage in sexual conduct, adult entertainment, or prohibited acts.

The bill also amends current law prohibiting human trafficking by making it a class A felony to compel, entice, or induce another person to move from one place to another in the state to engage in sexual conduct, adult entertainment, or forced labor.

This bill would have an indeterminate fiscal impact to the Department of Law.

SENATOR BILL WIELECHOWSKI

Fact Sheet: Human Trafficking In Alaska

What Is Trafficking?

International and federal laws reflect the idea that human trafficking involves **recruiting, harboring or transporting** a person in order to **exploit them in some way**, usually through forced labor or the commercial sex trade.

Trafficking **does not necessarily involve smuggling**. Victims **do not have to be foreign born**.

Fixing Alaska State Law

The loophole: Federal law reflects this. Current Alaska law, however, stipulates that trafficking only occurs when a perpetrator compels or induces another person **to cross state lines** before exploiting them.

SB 110 would amend the state human trafficking statute **to include preying upon people *within* the state of Alaska**.

The Grim Reality: Trafficking In Alaska

Sex traffickers prey upon minors and adults, urban dwellers and rural and people of all races. It is **extremely difficult to quantify the number** of prostitution or trafficking activity in the state. Victims do not trust law enforcement. Most estimates come from prostitution arrests in a given area.

What we do know:

Traffickers are targeting Native girls.

- "A disproportionate number of women working in the Anchorage sex trade are Alaska Native and pimps and sex traffickers are pursuing Native girls..." [ADN, 12/02/10]
- "Native girls are targeted in part because they're considered 'versatile,' meaning they can be advertised on the Internet as Hawaiian or Asian. 'It's all comes down to money,' (FBI Special Agent Jolene Goeden) said, with the pimps hauling in thousands of dollars a week." [News Miner, 10/16/10]
- A man recently charged with sex trafficking in Anchorage was caught on tape talking to an associate about going to the Alaska Federation of Natives convention to "catch a Native" for his prostitution stable. The men "got at least some of their "stable" of prostitutes from Alaska Native villages, prowling the AFN convention and streets surrounding the Covenant House shelter." [ADN, 12/02/10]

Trafficking doesn't mean using force.

- Many vulnerable young girls are lured into service with enticements like a place to stay, a hot meal, having their hair done.
- "They're lured into the lifestyle with such things as gifts, shopping trips and alcohol and drugs, the agents said. At some point, their boyfriend, or pimp, wants payback." [News Miner, 10/16/10]
- "Sex traffickers use a combination of mind games and beatings, promises and drugs to control girls, authorities said." [ADN, 12/02/10]

Traffickers hunt victims in places vulnerable girls can be found: bus stations, shelters and in their villages.

- "The Native women and girls are being hunted at places where teens gather: malls, Anchorage's central bus stop downtown, the McLaughlin Youth Center, Covenant House." [News Miner, 10/16/10]
- "Alaska Native girls are commonly lured from their hometowns by friends or relatives who are already working as prostitutes. They invite the girl to come hang out and go shopping rent-free." [ADN, 12/02/10]

A majority of sexual trafficking victims have a history of sexual abuse.

- "We've been told, 'I'd rather be getting paid for it than giving it away for free," (APD's Sgt. Kathy) Lacey said." [News Miner, 10/16/10]

A majority of sexual trafficking victims are runaways.

- "Many are runaways. Under-age kids can't rent cars or rent hotel rooms, after all, and they have to get money somehow." [ADN, 12/02/10]

National Statistics

- "The majority of American victims of commercial sexual **exploitation tend to be runaway or thrown away youth** who live on the streets who become victims of prostitution." [US Department Of Justice]

- **450,000:** Number of children in the United States who run away from home each year. [National Runaway Switchboard]

- **1 out of 3:** Number of teens on U.S. streets who will be lured into prostitution **within 48 hours** of leaving home. [National Runaway Switchboard]

- **It happens everywhere.** "Pimp-controlled commercial sexual exploitation of children is linked to **escort and massage services, private dancing, drinking and photographic clubs, major sporting and recreational events, major cultural events, conventions, and tourist destinations**." [US Department Of Justice]

- **12-14:** The average age a girl enters prostitution in the United States. [US Department Of Justice]

- **11-14:** The average age a boy enters prostitution in the United States. [US Department Of Justice]

More Alaska Native girls ensnared in sex trafficking
by Alex DeMarban / The Tundra Drums
10.16.10 - 08:37 am
http://www.newsminer.com/printer_friendly/9919153

ANCHORAGE, Alaska - Sex-crimes investigators say they're seeing more rural Alaska Native girls and women who leave their families and village for Anchorage, only to be lured into prostitution by pimps and the promise of security.

The sex-traffickers see young Native runaways as especially easy prey, said investigators. They're adrift in the big city, separated from a support network, and seeking money and attention.

Kathy Lacey, an investigator with the Anchorage Police Department, and Jolene Goeden, a Federal Bureau of Investigation agent, shared the information with scores of delegates at the Association of Village Council Presidents annual convention on Oct. 6.

They didn't give specific numbers but said they've seen a rising trend in roughly the past year or so.

The two came to Bethel to begin the process of educating rural residents about what's happening, so parents can warn children. They want potential victims to be wary.

"When someone pulls up in a really nice Cadillac Escalade and they're promising them the world, we hope they're going to think twice before getting into that car," Goeden said.

The information prompted an immediate discussion from delegates, who called it "frightening." Some elders spoke in Yup'ik and talked of lost values. They urged parents and grandparents to monitor their kids.

The Native women and girls are being hunted at places where teens gather: malls, Anchorage's central bus stop downtown, the McLaughlin Youth Center, Covenant House. They're lured into the lifestyle with such things as gifts, shopping trips and alcohol and drugs, the agents said.

At some point, their boyfriend, or pimp, wants payback.

The "sex-trafficking world is incredibly, incredibly violent. Once that grooming process is over it turns into, 'You owe me. I need you to do this for me one time. And then it happens over and over again,'" Goeden said.

Native girls are targeted in part because they're considered "versatile," meaning they can be advertised on the Internet as Hawaiian or Asian.

"It's all comes down to money," she said, with the pimps hauling in thousands of dollars a week.

It's hard to rescue some girls, especially from villages. They may not see themselves as victims,

particularly those who have experienced sexual or domestic violence.

"We've been told, 'I'd rather be getting paid for it than giving it away for free," Lacey said.

Others may be afraid to seek help, out of fear for their lives.

"They don't feel like they have a choice in leaving this life," Lacey said.

The sex ring grows as girls recruit friends from the villages, promising them a free place to stay, shopping trips and free meals at their 'boyfriend's' house, the investigators said.

National statistics hold true in Anchorage: One in three street girls are drawn into prostitution in 48 hours, Lacey said.

Economic difficulties in villages seem to be one factor in the increasing trend.

"We don't want to scare you and give you the impression that every young girl or every woman that comes to Anchorage, that this happens to them, but it is happening and it is happening to a number of young Alaska Native girls," said Goeden.

The investigators see girls 18 or younger as victims, Lacey said. They arrest them, but only to separate them from their pimp and get them social services, such as counseling and housing.

They don't follow through with prosecuting them, Lacey said.

After the presentation, Andrew George of Nightmute stood before the crowd and spoke forcefully in Yup'ik.

Parents and family need to teach their children and protect them. Native children are in dire need, he said, according to a convention interpreter.

Ray Watson, chair of AVCP, a tribal consortium providing social services in the Bethel region, said delegates must go home and warn villagers about what's happening.

Myron Naneng, president of the group, said rural schools need to invite the Anchorage investigators into their classrooms.

'I can't get my sister back:' Investigators warn of sex traffickers targeting Natives

Posted: December 2, 2010 - 7:21 pm

By KYLE HOPKINS
khopkins@adn.com

http://community.adn.com/adn/node/154636#ixzz1HTj2d5uW

A disproportionate number of women working in the Anchorage sex trade are Alaska Native and pimps and sex traffickers are pursuing Native girls at events like AFN, police warned tribes and villagers today.

"There have been traffickers and pimps who specifically target Native girls because they feel that they're versatile and they can post them (online) as Hawaiian, as Native, as Asian, as you name it," said Jolene Goeden, a special agent for the FBI in Anchorage.

Far from home and surrounded by strangers, girls from remote villages are particularly vulnerable to sex-trade recruiters said Goeden and Sgt. Kathy Lacey, supervisor for the Anchorage police vice unit. The investigators delivered a kind of "Prostitution 101" to people from villages across the state at an annual Bureau of Indian Affairs conference, telling community leaders and health workers to be on the lookout for pimps preying on Alaska Native women and girls.

The pair gave a **a similar, shorter talk in October in Bethel**. For some, the stories were personal.

"We don't think that this is happening in our in small villages. It happens. It happened to my baby sister," said a woman from a rural hub city, who said her sister was 14 years old when she disappeared while visiting the Alaska Federation of Natives convention in Anchorage about four years ago.

Her family tracked the girl down at a downtown shelter for homeless teens, her body surging with drugs, said the woman, who I'm not identifying because it would also identify her sister.

"That really ruined her life," the woman said sharply. "I can't get my sister back the way she …"

Her voiced trailed off before a shell-shocked crowd of about 200 at the Egan Civic and Convention Center.

Sex traffickers use a combination of mind games and beatings, promises and drugs to control girls, authorities said.

Alaska Native girls are commonly lured from their hometowns by friends or relatives who are already working as prostitutes. They invite the girl to come hang out and go shopping rent-free. Others are recruited while visiting the city.

About one-third of the women arrested this year for prostitution in Anchorage are Alaska Native, according to Lacey's figures. It's unclear how many under-age Native girls are the victims of pimps or sex traffickers.

Four Anchorage residents **charged last year with running a sex-trafficking ring** got at least some of their "stable" of prostitutes from Alaska Native villages, prowling the AFN convention and streets surrounding the Covenant House shelter.

(**Read an account of phone calls** overheard on a jail phone, including one of the men talking about trying to "catch a Native" during AFN.)

It was an Alaska Native girl who moved to Anchorage to stay with family at the age of 12 who helped point investigators toward another prostitution kingpin: **Don Webster, also known as Jerry Starr**, Goeden said.

Webster, who was sentenced to 30 years in prison in 2008, had tried to recruit the girl, Goeden said.

The FBI agent got to know the teen during visits to a youth jail. The pair talked about how the girl ended up selling her body at age 14 in Anchorage.

"Her response to me was, 'I could be back home in the village where I could be having sex with my grandpa for free, or I could be here getting paid for me,'" Goeden said.

"I didn't know what to say. I had no idea how to respond to this little girl."

Regardless of where they're from, many prostitutes are former sexual abuse victims, Lacey told the crowd. Many are addicted to drugs, Lacey said.

"It used to be every prostitute we patted down had a crack pipe on them. Not any more, the drug of choice is heroin," she said after today's meeting.

Many are runaways. Under-age kids can't rent cars or rent hotel rooms, after all, and they have to get money somehow.

"(That) especially holds true when you get young girls from the villages that come in here and they come in to visit an auntie or whoever they're going to visit and they decide that they're gong to run away," Lacey said. Very quickly they're propositioned by someone trying to lead them on a path toward prostitution, she said.

Authorities in Alaska prefer to prosecute pimps under federal sex trafficking laws. Under those rules, anyone who uses force, coercion or fraud to sell commercial sex acts can be prosecuted for trafficking. The law also applies to anyone who pimps girls under the age of 18.

In comparison, the state law only allows for prosecution of trafficking if the victim is transferred across state lines, Lacey said. She is working with Goeden and the Children's Justice Act task force to strengthen state laws and mirror federal penalties.

People always ask why the girls don't leave pimps or sex traffickers on their own, the investigators told the crowd.

Some feel so bad about themselves they don't believe they deserve anything better, they said. Others don't know who to ask for help or are afraid of violent reprisals.

Some, particularly those from small communities, don't want their friends or family to know what's happening to them.

"These girls typically, almost always, do not see themselves as a victim," Goeden said

Have tips or questions for the investigators? You can reach Goeden at Jolene.goeden@ic.fbi.gov or by calling 276-4441 and Lacey at 786-8500 or klacey@ci.anchorage.ak.us.

Sex Trafficking In Alaska

SA Jolene Goeden
Sgt Kathy Lacey

The beginning….

Salvation Army obtained a grant – working group formed (foreign born victims)
APD obtained a grant – foreign born and domestic victims
Webster case
Innocence Lost Task Force – formed December 2008

Agenda

What is sex trafficking?
Stages of exploitation through sex trafficking
The victim
Sex Trafficking of Alaska Natives
Medical/social issues of victims
Why don't the girls just leave?
Warning signs?
What is needed?

What is human trafficking?

Recruitment, Harboring, Transportation, Provision or Obtaining of a Person

- For Labor or Services
- Through the use of FORCE, FRAUD, or COERCION

Trafficking may NOT involve smuggling. Victims do not have to be foreign born.

Definitions

FORCE: beatings, sexual assault, confinement
FRAUD: false/deceptive employment, false marriage, false promises, lies
COERCION: threat to family, threat of criminal process/deportation, drugs
- Threat can be direct or implied

Two Types Of Trafficking

Labor Trafficking
- domestic servitude
- industry
- migrant work

Sex Trafficking

SEX TRAFFICKING

The recruitment, harboring, transportation, provision, or obtaining of a person for the purpose of a commercial sex act.

Induced by force, fraud, or coercion OR Under the age of 18 (significant difference between Federal Statute and State Statute)

What is a commercial sex act?

Prostitution: The giving or receiving of sex or a sex act in exchange for compensation

Compensation can be anything of value – it does not have to be money

$$$$$$

Addictions

Survival Sex

In Call/Out Call

All internet based

Postings on a variety of websites including - CraigsList, CityVibe, NaughtyNightLife, Backpage
Graphic ads
Slang and language specific to "pimp and ho" culture

Profile of a Sex Trafficking Victim

Majority have been victims of some type of abuse.
Majority have been runaways
Have unique status of being BOTH victim/offender

- Law enforcement (typically) treats them as offenders
- Social agencies treat them as victims

Profile continued…

Have been recruited into life by pimp or madam

Have been "broken" by pimp and "turned out"

Refer to pimp as "boyfriend" or "daddy"

"Easy in, hard out"

Typically very loyal

Chemical dependency issues

Sex Trafficking and Children

- One in seven children will be a runaway before the age of 18.
- One in three teens on the street will be lured into prostitution within 48 hours of leaving home.
- -NCMEC

Runaway and Sexual Exploitation

30% of shelter youth and 70% of street youth are victims of commercial sexual exploitation. They may engage or be coerced into prostitution for "survival sex" to meet daily needs for food, shelter, drugs.
75% of child victims engaged in prostitution are under the control of a pimp.

(American Journal of Public Health – Commercial Sexual Exploitation of Children in the U.S.)

Age of Entry

12-14 is the average age of entry into prostitution for girls in the U.S., boys enter at younger ages. (Estes & Weiner, 2005)
The average age of entry into prostitution for girls is between age 13 to 14. (NCMEC)

Alaska Native Children

Typical ages seen by LE – 15 to 17 yo

Alaska Native girls viewed by traffickers as "versatile" and vulnerable

Recruited by other AK Native girls

Very hard to quantify and come up with numbers

Alaska Native Women

Disproportionate number of Alaska Native women involved in prostitution by population

Vice numbers for arrests

Often starts as survival sex

Research & Trends

The Minnesota Indian Women's Resource Center

"Shattered Hearts – The Commerical Sexual Exploitation of American Indian Women and Girls in Minnesota"

www.miwrc.org

Anchorage Example

Alaska Native girl. Moved to Anchorage at age 12.
Started running away from home soon after got to Anchorage. Using alcohol heavily by age 13. In & out of MYC.
Recruited by first pimp at age 14. Traded and sold among pimps for next two years.
Assault charge – MYC until 18.
Returned to street. Pregnant.

STAGES

These stages apply to children and adults.

Recruitment

Grooming

Breaking In

RECRUITMENT

Schools
Malls
Bus Accommodation Center
McLaughlin
Covenant House
Home (generational)
Strip clubs/bars
Streets
Friends/family

Rural Recruitment

Usually through family/friends

Promises or lures of better life

Distance from family and other support structures

Grooming

"F with the mind and the body will follow."
Love and Attention
Isolate from family
Shower with gifts
Nails, hair, nice clothes
Photograph – make girl feel beautiful (model)
Alcohol and drugs

"He made me feel special. He found me when I was broken. He built me up. Broke me back down. And built me back up again to where I thought he was my everything."

Breaking In

Physical assaults
Sexual assaults
Sex with pimps male friends
DV type cycle – rollercoaster
Remove identity
"You owe me" or "Just this one time"

OBSTACLES IN IDENTIFICATION

Victims do not see themselves as victims
They DO NOT self report
General mistrust of law enforcement
Focused mistrust of law enforcement
Threats – fear of retaliation/violence
Believe no worse off then previous situation
Not familiar with area/location and the "system"
Don't know where to turn for help
Fear of being labeled a prostitute
Shame and guilt – blame self

Trauma Bond

Survival response

Dysfunctional attachment developed during risk

Results in trouble identifying – do not see themselves as a victim

Requires intensive therapy

Why don't they just leave?

Believe they aren't any worse off than previous situation.
Fear of being physically harmed
Fear of having another victim endure physical harm.
Threat to family
Shame
Inability to navigate the "system"

Don Webster a.k.a Jerry Starr

DON WEBSTER

AKA Jerry Starr
Several girls in "stable" at any given time
Recruited juveniles from other girls, the streets, adults at strip clubs
Promised better life
Crack – got girls addicted or increased addiction - Issues

Jerry Starr continued…

Took property and identification/isolated
Created a dependence – food, shelter, drugs
Created new "family"
Physical force/violence
The Box
Culture of fear. (Roller coaster)
Ages 13 to 30 y.o.

Life with Jerry….

"Life without the possibility of parole."

"He was our doctor. He would clean me up after a beating. He'd put me in the shower, tell me he loved me and tell me that I made him do it. Give me crack for my injuries and send me back out."

Victim's Journal Entry – Perception of Addiction

"Tastes like addiction. Smells like addiction. This is addiction feeding the addiction. You haven't eaten in days and your gums are bleeding. Swearing to God the pipes all you're needing. It's robbing or stealing or turning a trick. You do whatever it takes to suck on the devils dick. The more you feed it the harder it is to tame. Taking in the beast. Playing it like a game. Lying to yourself saying the same old shit. I don't need it. I just don't want to quit. The hunger of addiction calls. There's nothing romantic about it. Going through withdrawals you're craving a sample. Well here's a taste. Picking and scratching the scabs on your face. Your life support system is a syringe. Killing a piece of your soul every time you binge. Pray."

Victim read this at trial and it helped to establish her state of mind during the trafficking.

Jerry Starr continued…

Indicted Federally. Trial was in January 2008.
3 ½ week trial. 12 victims testified.
Convicted on 28 counts of sex trafficking and drug trafficking related charges.
Sentenced to 30 years, register as a SO, lifetime restraining order, $3.6 million restitution

How are the victims today??? Critical services needed for their recovery.

Medical Issues Associated with Prostitution

Traumatic Brain Injury – beatings, head injuries, black eyes with no recollection of being hit in eye.
Choking
STD's
Pregnancies – chemical use and without medical attention. Multiple miscarriages.
Broken bones (often untreated) – ribs common

Mental Health Issues Associated with Prostitution

PTSD
Bipolar Disorder
Anxiety Disorders
Depression
Eating disorders
Borderline
Chemical Dependence

Warning Signs

Signs of current physical abuse
Sexually transmitted diseases
Runaway status or history of running away
Expensive gifts – clothing, jewelry, etc.
Presence of an older boyfriend
Drug addiction
Withdrawal or lack of interest in previous activities

What is needed?

Education/prevention
More emergency and supportive housing
Medical and mental health services – providers need to have knowledge of sex trafficking
Help navigating the system – medical, mental health, legal, public assist, etc.
They need someone to believe in them and believe they are worth saving.

Dedication

The full report and this executive summary are dedicated to Bill 'Big Wolf' Blake, who devoted his life to ensuring that Native children would have an environment where they could thrive in safety. Bill, a member of the Red Lake Nation and a Sergeant with the Minneapolis Police Department, was a passionate supporter of this project and an active participant in a meeting with American Indian elders, community leaders, and service providers to discuss this report and next steps just days before his unexpected death. Though we grieve his passing, we are immensely grateful for the time that we had him, and for his tireless work to prevent violence against our children. Thank you, Bill, and we wish you a good journey.

Acknowledgements

The development of the Shattered Hearts report and this summary would not have been possible without the support of the W.K. Kellogg Foundation, in particular the support of Terri Wright, for which we are profoundly grateful. Special thanks to The Women's Foundation of Minnesota for their support for this project, and to the advocates that attended two regional round-table discussions. Their stories, descriptions, and explanations gave us a framework for the report, and informed our review of the available data and literature on the subject.

We deeply appreciate the support we received from Phil Norrgard, Human Services Director for the Fond du Lac Band of Ojibwe, and Noya Woodrich, Executive Director of the Division of Indian Work, who provided space, lunch, and beverages for the two regional round tables with advocates. Thanks, too, to Whitney Lawrence, who transcribed twelve hours of discussion from those round tables word-for-word so we would be able to report exactly what the advocates said on particular topics.

We are grateful to Wilder Research for providing data from non-reservation American Indian women and girls collected during its 2006 study of homeless in Minnesota, and to the Minnesota Department of Health and the Minnesota Department of Education for providing us with data output tables from the 2007 Minnesota Student Survey.

We especially want to thank the American Indian elders, community leaders, and program staff who reviewed the draft of this report and provided us with feedback and guidance for communicating this very difficult and troubling information. Migwetch, pilamaya yelo, and nya:weh to:

Background

The topic of this report is the commercial sexual exploitation of American Indian women and girls in Minnesota, including but not limited to sex trafficking. In 2006, the Legislature passed Minnesota Statute Section 299A.79 requiring the Commissioner of Public Safety to develop a plan to address current human trafficking and prevent future human trafficking in Minnesota. In 2008, Minneapolis was identified as one of thirteen U.S. cities having a high concentration of criminal activity involving the commercial sexual exploitation of juveniles.[1] The same year, The Advocates for Human Rights released its sex trafficking needs assessment, commissioned by the Minnesota Human Trafficking Task Force pursuant to a mandate from the Commissioner of Public Safety. Citing advocates' and law enforcement personnel's estimate that at least 345 American Indian women and girls had been sexually trafficked in Minnesota since 2005, the report noted the significant lack of information about American Indian victims and the relative absence of services to not only help them find safety, but to also heal from the trauma of life in prostitution.[2]

Police reports from Duluth showed that Native girls were being lured off reservations, taken onto ships in port, beaten, and gang-raped. Tribal advocates in South Dakota and Minnesota had also begun raising red flags, reporting that Native girls were being trafficked into prostitution, pornography, and strip shows over state lines and internationally to Mexico. In Canada, where the history and current circumstances of Native (Aboriginal) people closely parallel those of American Indians in the U.S., research studies were consistently finding Aboriginal women and girls to be hugely over-represented in the sex trade. An international report on the commercial sexual exploitation of children described Canadian Aboriginal and American Indian youth as being at greater risk than any other youth in Canada and the U.S. for sexual exploitation and trafficking.[3]

Closer to home, increasing numbers of Native women and girls entering MIWRC programs were disclosing that they had been trafficked into prostitution. MIWRC contacted other Native-specific agencies in the Twin Cities to ask what their caseworkers were seeing in terms of sexual exploitation of Native women and girls. Several reported a surprising number of younger Native women coming in for domestic violence and sexual assault services, later acknowledging that their assailant had trafficked them for prostitution.

Despite Minnesota's significant efforts to identify and meet the needs of sex trafficking victims, to our knowledge there has never been any report describing the commercial sexual exploitation of indigenous girls and women in Minnesota or even nationally. To address that gap in knowledge, MIWRC approached the W.K. Kellogg Foundation about support to develop a report which would aggregate what was known to date about the commercial sexual exploitation of American Indian women and girls in Minnesota, and to develop a set of recommendations for addressing the needs of Native victims. The W.K. Kellogg Foundation agreed to support the project, which began in November 2008 and resulted in the comprehensive report that is the basis for this summary. The full report can be accessed and downloaded from MIWRC's website at http://www.miwrc.org

In 2007, a long time resident of the Supportive Housing Program at the Minnesota Indian Women's Resource Center (MIWRC) came into a staff member's office, saying she was looking for a job but no one would give her a break. The resident was having trouble completing her GED due to dyslexia, and had very little useful work experience. She told the staff member that the only way she knew how to make money was to prostitute herself, and she did not want to go back to that.

Her story, which she was disclosing for the first time, was alarming. She had been pimped out by her mother at the age of 12 to support the mother's crack habit. By the time she was 14 she had begun to pimp out other young girls to feed her own drug addiction. At the point in time when she walked into the staff member's office, she had done hard time in prison, given birth to six children, and lost custody of them all. The MIWRC staff member realized that under current Minnesota law, this resident was a victim of a federal crime, the prostitution of a juvenile under the Trafficking Victims Protection Act (TVPA).

Rather than being recognized or protected as a trafficking victim, she was criminalized. Today, even though she has been repeatedly beaten and sexually assaulted by pimps and johns, she is ineligible for most federally-funded services and supports for victims of physical and sexual violence because of her prostitution arrests. And all she wants to know is, who will ever give her a chance?

Sources of information used this report include:

Two regional round table discussions (Minneapolis and Duluth) with a total of 30 advocates from programs that provide outreach and crisis services to American Indian women and girls (housing and other basic needs, domestic violence and sexual assault, chemical dependency)

- Data collected during intake interviews with 95 clients entering MIWRC programs, over a 6-month period
- 2007 Minnesota Student Survey data tables provided by the Minnesota Department of Health and the Minnesota Department of Education
- Secondary analysis of non-reservation American Indian data from the 2006 Wilder Research study of homelessness in Minnesota
- Publications and reports developed by or for governmental agencies, advocacy groups, and foundations in the U.S. and Canada
- Articles from human services, social services, law enforcement, and social science journals in the U.S. and Canada
- Interviews and meetings with law enforcement and corrections personnel

Limitations of the report

The time frame for this project was quite short, which limited the sources of information that could be accessed. We did not use a systematic approach in identifying all sources of relevant data or apply a rigorous framework to evaluating the cited sources. The data collected by MIWRC involved a small sample in limited geographic areas. Therefore, what we report here should be considered an exploratory, preliminary study.

Definitions and Terms

We recognize that men and boys are also victims of sexual exploitation, and our focus on women and girls is not intended to deny the experiences of male victims. Our intent is to examine the impacts that are gender-specific to females, so these definitions all refer to women and girls.

American Indian, Aboriginal, Native

We use the terms American Indian or Native when referring to indigenous people in the U.S., and Aboriginal or Native when referring to indigenous people in Canada.

Adolescents, girls, young adults, and youth

The terms "girls" and "adolescents" are used to describe females ages 12 to 18. The term "youth" includes young women and young men ages 12 to 24.

Commercial sexual exploitation

Commercial sexual exploitation is defined as the exploitation of a woman's or girl's sexuality for financial or other non-monetary gains, in manner that involves significant benefits to the exploiter and violates the exploited person's human right to dignity, equality, autonomy, and physical and mental well-being.[4]

Sex trade

The sex trade is the "business" of commercial sexual exploitation—transactions in which sexually-oriented activity is exchanged for food, shelter, drugs, transportation, approval, money, or safety. Similar to the slave trade, the vast majority of women and girls in the sex trade are exploited in exchange for survival needs and/or the benefit of a more powerful person.[6] The sex trade includes:

- Street prostitution
- Escort agencies
- Massage parlors
- Brothels, "trick pads" and "sex party houses"
- Bars and clubs that sell "lap dances" and "private dances"
- Businesses that organize and sell "private parties" with strippers and nude dancers
- Strip clubs
- Pornography and live "sex shows"
- Phone and Internet sex

Prostitution

Prostitution is defined as the act of engaging in sexual intercourse or performing other sexual acts in exchange for money or other considerations, including food, shelter, transportation and other basic needs. We use the terms "in prostitution" or "involved in prostitution," and "prostituted" rather than "prostitute" because we find it unreasonable to assign a label to an exploited person that does not acknowledge the fact that she is being exploited. We choose not to use the term "sex worker" because it implies that prostitution is a career choice rather than a form of sexual violence.

We do not refer to battered women as 'battering workers'. And just as we would not turn a woman into the harm done to her (we don't refer to a woman who has been battered as a 'batteree) we should not call a woman who has been prostituted a "prostitute." – Melissa Farley [5]

Sex trafficking

International, federal, and Minnesota laws all reflect the idea that trafficking involves the recruiting, harboring, receipt or transportation of persons in order to exploit them. The federal trafficking law requires that three elements be present for a crime to be considered trafficking (process, means, and end). In Minnesota, the victim is not required to establish "means" to prove that she did not consent. Rather, courts determine responsibility based on the conduct of the trafficker.[7]

* Adapted from the Freedom Network Institute on Human Trafficking.

The Trafficking Victims Protection Act of 2000 (federal law) defines sex trafficking as:

The recruitment, harboring, transportation, provision, or obtaining of a person for the purpose of a commercial sex act in which the commercial sex act is induced by force, fraud, or coercion, or in which the person induced to perform such act is under 18 years of age. [8]

Minnesota law characterizes sex trafficking as a type of promotion of prostitution. In their 2008 sex trafficking needs assessment report to the State of Minnesota, The Advocates for Human Rights described the differences in sex trafficking definitions in Minnesota state law and federal law:

"... federal law requires that traffickers use the means of 'force, fraud or coercion' to recruit or maintain an adult in sex trafficking while Minnesota does not. Minnesota law recognizes that a person can never consent to being sexually exploited and considers individuals who have been prostituted by others as trafficking victims. Federal law requires an assessment of the level of 'consent' of the prostituted person in determining whether the crime of trafficking has occurred." [9]

In the research literature described later in this summary, the average age of sex trade entry for women and girls in prostitution is age 12-14, which suggests that the majority of adult prostituted women were initially victims of juvenile sex trafficking under both federal and Minnesota law. We consider sex trafficking and pimping to be overlapping issues, since women's experiences in prostitution and sex trafficking are quite similar in regard to violence, control, exploitation, and the level of victimization.[10] Therefore, in this summary and the report that is its basis, we use the State of Minnesota's definition for sex trafficking, with the understanding that women and girls involved in "survival sex" experience deliberate exploitation of their vulnerability, with a clear sexual benefit to the exploiter:

... receiving, recruiting, enticing, harboring, providing, or obtaining by any means an individual to aid in the prostitution of an individual. [11]

Some states do not allow juveniles to be considered the victims of statutory sex crimes after the age of 15.[12] In Minnesota, the age of consent is 16, though criminal charges may not result in a conviction if the perpetrator is only a few years older than the victim. For instance, if the victim is 13, 14, or 15, coercion must be proven to convict the perpetrator of first-degree criminal sexual conduct if he is less than 48 months older than the victim.[13] The Office of Juvenile Justice and Delinquency Prevention described the dilemma confronting police officers at the point of contact with juveniles involved in prostitution:

On the one hand, they are offenders involved in illegal and delinquent behavior. On the other, they are children who are being victimized by unscrupulous adults.[14]

The Advocates for Human Rights report that on May 21, 2009, the Minnesota Legislature unanimously passed and the governor signed a bill amending Minnesota's sex trafficking law, which will enable law enforcement and prosecutors to better hold the perpetrators accountable. Specifically, the amendments

Provide law enforcement and prosecutors with the ability to arrest and charge sex traffickers with higher penalties where an offender repeatedly traffics individuals into prostitution, where bodily harm is inflicted, where an individual is held more than 180 days, or where more than one victim is involved;

- Increase the fines for those who sell human beings for sex;
- Criminalize the actions of those individuals who receive profit from sex trafficking;
- Categorize sex trafficking with other "crimes of violence" to ensure that those who sell others for sex are prohibited from possessing firearms; and
- Add sex trafficking victims to those victims of "violent crime" who are protected from employer retaliation if they participate in criminal proceedings against their traffickers.[15]

Victim of commercial sexual exploitation

The definition for "victim" is perhaps the most contested and least resolved issue related to sex trafficking and other forms of commercial sexual exploitation. If the federal definition for sex trafficking is used, a victim must prove she did not consent. This requirement has led to controversy over whether a woman or child can ever give informed consent to be purchased and used for another person's benefit or gratification without regard for her own safety or well-being. Minnesota law defines a sex trafficking victim as anyone subjected to the practices defined as sex trafficking.[16] Though the conduct of the trafficker is supposed to be the basis used by Minnesota courts to determine whether a person has been trafficked for sexual purposes, to date no one has ever been prosecuted for sex trafficking under the Minnesota law, so there is no "test case" for establishing victimization.

With the understanding that women and girls involved in "survival sex" experience deliberate sexual exploitation of their vulnerability with a clear benefit to the exploiter, the definition we use in this report for a victim of commercial sexual exploitation (which includes trafficking victims) is:

Any woman or girl who has been sexually exploited for the benefit of her exploiter, whether the exploiter receives some financial benefit or gains other things of value, including goods, power, or status. If the victim is under 18, she is automatically considered a sex trafficking victim.

Survival sex

We use the term "survival sex" to describe the exchange of sex for money and other considerations such as food, shelter, transportation, or safety by women and girls who often do not think of themselves as involved in prostitution and view this exchange as "what I have to do to survive."

Runaway and thrown-away

A runaway is defined as a girl who leaves home or a place of legal residence without the permission of parent(s) or legal guardian(s) for at least 24 hours. If a girl has been told to leave or was locked out of her home and told not to return, if she is a runaway who was not actively sought by her parent after leaving, or if her parent(s) or guardian(s) failed to provide food or basic needs and she left home to meet those needs, we consider her to be thrown-away.

Pimp or trafficker

We use both terms to describe a person who 1) promotes and/or profits from the sale and/or abuse of another person's body or sexuality for sexual purposes, or 2) who promotes and/or profits from the production and/or sale of sexual images made of that person.

John

Because it is the most recognized term for a purchaser for sexual services, we use the term john to describe an adult male who provides some type of compensation to engage in a sexual encounter with a woman or girl. It is important to remember that if the girl is under the age of 18, this person is a sex offender.

The Context

Understanding the context of Native women's experience in the history of this nation is critical for understanding Native women's and girls' unique vulnerability to commercial sexual exploitation. Four fundamental beliefs have been found to be essential for a coherent and resilient sense of self, which protects a person against sexual exploitation and/or helps a victim of such exploitation to heal:

- The world is a good and rewarding place
- The world is predictable, meaningful, and fair
- I am a worthy person
- People are trustworthy.[21]

The traumatic experiences of American Indian people during the colonial era and their constant exposure to new losses and new trauma each generation have had a devastating effect on Native people, families, and communities, and on their ability to sustain those four beliefs.

In the process of developing trade and military relationships with American Indian villages, early British colonists viewed the sexual and marital norms of Native communities through their own ethnocentric lens. As a result, they interpreted Native women's sexual and reproductive freedom to be proof of their promiscuity and depravity, and Native men's respectful acceptance of those freedoms as proof that they were too weak to assert their rightful authority over their women or their land. These attitudes justified colonists' assaults on Native women and Native land.

Following the establishment of the United States, the U.S. Supreme Court and Congress redefined the status of American Indian people, declaring that they were wards of the U.S. government and citizens of "dependent nations," stripping them of their rights to their land, to self-governance, and to negotiating as independent nations. As the new nation expanded westward, the U.S. government adopted formal extermination policies to clear Native-occupied land for settlement.[22] Native women were primary targets of these policies due to their reproductive ability to assure the continuance of their people.[23]

A series of additional U.S. government policies further eliminated American Indians' ability to be self-sufficient, to transmit their language and culture to new generations, and to retain sovereignty over economic and political decisions that affected them. These included:

- The relocation of Indian people to remote rural reservations by the U.S. Army, where they were forced to depend on the U.S. government for all of their basic needs.
- The 1887 Dawes Allotment Act that split reservations into 160-acre parcels, each allotted to an individual head of a family. This legislation allowed the U.S. government to sell all unallotted land. In 1891 alone, the government sold over 17 million acres of Indian land.[27]

[Indian women are] of that tender Composition, as if they were design'd rather for the Bed than Bondage…[the] multiplicity of Gallants [was] never a Stain to a Female's Reputation …[the] more Whorish, the more Honorable. [John Lawson, Surveyor for the Carolina Colony][17]

[The men] are courteous and polite to the women, gentle, tender, and fondling even to an appearance of effeminacy. [King's Botanist John Bartram, describing Indians in the colonial Southeast][18]

I heard one man say that he had cut out a [Native] woman's private parts and had them for exhibition on a stick…I also heard of numerous instances in which men had cut out the private parts of females and stretched them over the saddle-bows and wore them over their hats while riding in the ranks. [U.S. Army Lieutenant James Connor describing Colonel Chivington's attack on Black Kettle's Cheyenne camp at Sand Creek, November 28, 1864][19]

The camp had been fired and the dead bodies of some twenty-two women and children were lying scattered over the ground; those who had been wounded in the first instance, had their brains beaten out with stones. Two of the best-looking of the squaws were lying in such a position, and from the appearance of the genital organs and of their wounds, there can be no doubt that they were first ravished and then shot dead. Nearly all the dead were mutilated. [U.S. Calvary Lieutenant Royal E. Whitman, commanding officer at Camp Grant, describing Tucson citizens' massacre of peaceful Indians at the camp, September 1871][20]

[In the mission schools] these children were being indoctrinated into the rituals and beliefs of the Catholic Church. It was not out of the question for the abusers to warn the children that if they spoke about what happened to them that they would be committing a mortal sin and they would burn in hell…the children were required to go to confession at least once per week. Can you imagine their fear when they looked through the confessional screen and saw the face of the priest that had been abusing them? What were they to think? Don't you know that they were already suffering from the guilt pushed upon them by their abusers? When they saw the priest behind the confessional screen they knew that they had no one and nowhere they could turn for help. They buried what happened to them deep inside. [Tim Giago][24]

The haunting memories of forced relocation and broken promises on the part of the federal government have affected the overall well being of the American Indian community. This has resulted in high rates of severe mental and physical health disparities. [National Council of Urban Indian Health][25]

The sterilization of Indian women affected their families and friends: many marriages ended in divorce, and numerous friendships became estranged or dissolved completely. The women had to deal with higher rates of marital problems, alcoholism, drug abuse, psychological difficulties, shame, and guilt. Sterilization abuse affected the entire Indian community. [Lawrence, 2000][26]

- The removal of Native children from their homes, often forcibly, to attend government-funded residential boarding schools where they were severely punished for speaking their Native language, pressured to adopt the "superior" values and behaviors of the dominant Christian society, and subjected to physical and sexual abuse by school teachers and administrators.[28]
- The Indian Relocation Program initiated in 1952, which promised financial support and good jobs to reservation Indians if they moved to major cities. By 1980, 75,000 had relocated, and when the promised assistance did not materialize, the result was high rates of severe mental and physical health disparities, unemployment, poverty, and alcohol abuse.[29]
- Public Law 280, which authorized some states to unilaterally assume jurisdiction over criminal and civil matters on reservations. In Minnesota, only two tribes retained federal jurisdiction for criminal matters.[30]
- A 1953 Congressional resolution to end federal relations with tribes as quickly as possible, resulting in the termination of 109 tribes by the early 1960s.[31]
- Partnerships with mainstream organizations to systematically remove Native children from their homes for adoption into white families, including the Indian Adoption Project and the Adoption Resource Exchange of North America (ARENA). By 1969, 25-35% of all Native children had been separated from their families, and between 1941 and 1978, 68% of all Native children had been removed from their homes and placed in orphanages or white foster homes, or adopted into white families.[32]
- The sterilization of American Indian women and girls as young as 15 in an effort to control Native populations. By 1975, an estimated 25,000 American Indian women and girls had been given hysterectomies by Indian Health Services physicians without their consent, and sometimes without their knowledge during appendectomies and other surgeries.[33]

The traumatic experiences of American Indian people during the colonial era and their constant exposure to new losses and government-sponsored new trauma each generation significantly reduced the ability of Native people, families, and communities to develop and sustain the four beliefs found to be essential for a coherent and resilient sense of self. The absence of time and safety to grieve losses and heal from trauma resulted in generational trauma, the passing of trauma responses to the next generation.[34] Research has found that when a dominant society refuses to recognize a people's grief and losses as legitimate, the result of this disenfranchised grief is sadness, anger, and shame, feeling helpless and powerless, struggles with feelings of inferiority, and difficulty with self-identity.[35] Together, generational trauma and disenfranchised grief have had a profound impact on Native communities' ability to protect their women and girls or respond in positive ways to those that are victims of sexual exploitation.

Today, Native women continue to have the highest rates of physical and sexual victimization in the nation. Over one-third of Native women will be raped during their lifetimes, compared to less than one in five women in the general population.[36] Native women in the U.S. are more than 2.5 times more likely to be raped or sexually assaulted than women in the general population.[37] Native women are also more frequently injured during a sexual assault. Half of the Native women who reported having been raped in the National Crime Victim Survey also reported sustaining physical injuries during the rape, compared to 30 percent of U.S. women in the general population.[38]

Lifetime rates of women's physical and sexual victimization, by race

Year	Authors	n	Sample	Type of victimization	AI/AN	White	Black	Hisp
1999	Walters & Simon[39]	68	New York City	Nonpartner sexual violence	27%			
1999	Walters & Simon[40]	68	New York City	Interpersonal violence	25%			
2000	Tjaden & Thoennes[41]	86	National	Intimate partner rape	16%	8%	7%	8%
1998	Tjaden & Thoennes[42]	86	National	Rape	34%	18%	19%	15%
2004	Malcoe, Duran & Montgomery[43]	312	Oklahoma	Severe physical intimate partner violence	39%			
2004	Malcoe & Duran[44]	422	Oklahoma	Intimate partner sexual violence	49%			
2003	Bohn, 2003[45]	30	Minnesota	Intimate partner physical or sexual violence	87%			

*Note: Comparisons with other racial/ethnic groups are given when multiple groups were included in the study. Otherwise, the entire sample for the study was American Indian.

Though not specific to American Indian women or girls, research with prostituted women and girls in the U.S. has found even higher rates of physical and sexual violence:

- At least 84% had been victims of aggravated assault
- 49% had been kidnapped
- 53% had been victims of sexual torture, including being burned, gagged, hung, and being bound while body parts were mutilated by pinching, clamping, and stapling.[46]

Canadian studies of prostituted girls and women, many of whom were Native, reported that most had experienced extreme violent victimization:

- 75% had sustained severe physical injuries from pimps and johns that included stabbings, beatings, broken bones (jaws, ribs, collar bones, fingers), and spinal injuries.[47]
- Half had suffered concussions and fractured skulls when pimps and/or johns assaulted them with baseball bats and crowbars, or slammed their heads against walls or car dashboards.[48]
- 68% were recently raped and 72% had been kidnapped.[49]
- 90% had been physically assaulted in prostitution, 82% of whom described johns as their assailants.[50]
- 83-88% describe verbal assaults as an intrinsic and extremely damaging part of prostitution. Johns called them names during sex intended to humiliate, eroticize, or justify the john's treatment of the women, often using racial slurs.
- In addition to violence at the hands of johns, the vast majority reported extreme physical and sexual violence by pimps, boyfriends, and husbands.[51,54,55,56,57]
- The 1985 death rate for prostituted women was 40 times higher than that of the general population. Over 500 Native women have been reported missing over the past 30 years.[58,59]

For Native women, "colonial trauma response" resulting from violent victimization adds another layer of psychological impact to generational trauma and disenfranchised grief. Research has found that whenever a Native woman experiences racism, abuse, and/or injustice, it connects her to a collective, historical sense of injustice and trauma. Just as people with post-traumatic stress disorder are "triggered" to relive traumatic events they have experienced, Native women are "triggered" to connect their own traumatic experiences to those experienced by their female ancestors, in a very immediate and emotional way.[60] In particular, sexual assault, prostitution, and sex trafficking are experienced as a continuation of the colonization process, in which

All you have to do is drive down First Street and ask somebody. It is so frickin' visible. I can't even believe it...Where we're located right on the corner of First Ave East and First Street down here. [Second speaker] In Duluth. [First speaker] It's prime area for street prostitution and there's [three strip bars] there. So now, right around the corner from North Shore is another strip place, and so there's a lot that happens right there. The liquor store is right there too. So, especially in the summer...it's not invisible by any means, way, shape or form. If you even sit on a corner for a day you'll know who they are. Because people are coming, they're just getting into cars...I've overheard people negotiating prices, so it's really visible [Advocates]

I work in the housing program portion of a women's shelter. I see the [Native] women and we accept the women escaping from prostitution. I did my data collection for a report and I couldn't believe how many people that we had...it was pretty close to 30 women, escaped from prostitution in a few short months. [Advocate]

The [Native] women are inside the bars and prostitution is happening in the bars, which makes it harder for the police to catch because it's not an outside thing. I see more of that coming down here...it's not just the pimps, it's the establishments that are making money off that girl being in the bar, bringing those patrons in because they know she's there on Wednesdays. And the young girls that want to drink, they get a fake ID. That's the prime way to get them in and recruit them. [Advocate]

Native women's sacred selves are exploited for the gratification of a person who claims the right to do so while ignoring or invalidating the impact on the woman herself.

Prevalence

Involvement in Prostitution

Advocates attending the two regional round tables reported that Native women's and girls' involvement in the sex trade is widespread. Advocates in the Duluth area reported that Native women and girls are highly visible in street prostitution and strip bars, especially when ships are in port and during times of the year when tourism is highest, such as hunting season and summer months. In Minneapolis, advocates reported that the most visible involvement of Native women in prostitution occurs in bars, especially strip bars. Their comments also suggest a large number of prostituted Native women seeking to enter women's shelters to escape prostitution.

The data collected from 95 Native women and girls entering MIWRC programs also suggest that the trafficking of Native girls and women into prostitution is a significant problem in Minnesota. Overall, 40 percent of new clients (37 Native women and girls over a 6-month period) reported involvement in some type of commercial sexual exploitation and 27 percent reported experiences consistent with the definition of a sex trafficking victim under current Minnesota law.

Very few research reports or publications have addressed the number of Native women and girls involved in prostitution in Minnesota. Prostitution arrests are often used to estimate the amount of prostitution-related activity in a given area. In a study based on analysis of Hennepin County Corrections data, researchers reported 70 women on probation for prostitution-related offenses in Hennepin County, 24 percent of which were American Indian.[61]

Over the six months that MIWRC screened incoming clients for sex trafficking, whenever one reported trading sex for shelter, food, drugs, money, or something else of value, MIWRC staff asked whether she had ever been arrested for a prostitution-related offense. Overall, 46 percent of those reporting survival sex or prostitution also reported at least one prostitution arrest, and 16 percent had three or more arrests. Of the 25 Native women and girls who met the state definition of a trafficking victim at the time they entered prostitution, 72 percent had been arrested for prostitution one or more times.

Data provided to MIWRC by Hennepin County Corrections show a total of 313 arrests for prostitution-related offenses in 2008. Twelve (4%) were American Indian women arrested for prostitution or loitering with intent to commit prostitution, almost twice their representation (2.2%) in the county's adult female population. Minneapolis Police Department data show a significant decline in the number of Native women arrested for prostitution-related offenses from 2004 to 2008, but a Minneapolis police officer reported that this reflects the low priority given to addressing prostitution when there has been no public outcry, rather than an actual decline in Native women's involvement in prostitution.[62]

We were unable to access any recent data showing the number of Native girls apprehended for prostitution-related offenses. A Minneapolis police officer and a Hennepin County Corrections staff member reported that by County policy, juveniles are no longer arrested for prostitution, but may instead be arrested for a status offense such as truancy or runaway.[63,64,65] However, we were also unable to access any city, county, or state law enforcement data showing the number of truant or runaway American Indian juvenile females.

In 2007, the Minnesota Office of Justice Programs conducted an online human trafficking survey with service providers, nurses, and law enforcement statewide. Twelve respondents reported working with a total of 345 American Indian female victims of sex trafficking over the previous three years.[66] In response to OJP's 2008 human trafficking survey, twelve service providers reported working with a total of 79 American Indian sex trafficking victims in the three-year period prior to the interview.[67] The significant difference in the 2007 and 2008 numbers, which overlap by two years, suggests that one or more of the 2007 providers did not participate in the 2008 survey. These numbers were also estimates, since most respondents did not use a systematic method to track the number of Native victims.[68,69]

In the absence of data to establish prevalence, estimates by advocacy groups working with women and girls in prostitution are often considered the most reliable. At Breaking Free, a non-profit organization serving women and girls in prostitution, Executive Director Vednita Carter has estimated that between 8,000 to 12,000 Minnesota women and children of all races are involved in prostitution on any given night, statewide.[70,71] PRIDE (from Prostitution to Independence, Dignity and Equality), a program of the Family and Children Service of Minneapolis, estimates that there are at least 1,000 juveniles currently in prostitution in Minnesota.[72] Neither of these advocacy organizations provided estimates for different racial groups.

In contrast to the absence of published reports on Native women's and girls' involvement in the sex trade in the U.S., there have been a fair number of Canadian studies on Aboriginal women's and girls' involvement in prostitution and other forms of commercial sexual exploitation. In all of the studies identified for inclusion in this report, the number of prostituted Native women and girls identified through the research was hugely disproportionate to their representation in the population. A national study involving 22 communities across Canada found that Aboriginal children represented up to 90 percent of children in the sex trade in some communities.[77] More recently, Canadian youth crime expert Michael Chettleburgh estimated that 90 percent of all urban Canadian teenagers in prostitution are Aboriginal.[78] In five surveys of street-involved youth across British Columbia between 2000 and 2006, the McCreary

Minneapolis arrests for prostitution-related offenses, American Indian females 2004 - 2008*

	2004	2005	2006	2007	2008

Native representation in Canadian studies of women and girls in prostitution

Year	Region	% found to be Native	Native % of population
2002	Vancouver BC [73]	52%	1.7-7.0%
2001	Victoria BC [74]	15%	2.0%
2001	Canada [75]	14-60%	2 to 3%
2001	Vancouver BC [76]	63%	1.7-7.0%

A lot of the [youth] drop-in centers now have computers...In St. Paul, they actually cleaned out their computers not too long ago, and they found quite a few of their youth that were uploading pictures off their phones onto the computers to post them onto Craigslist. [Advocate]

My Space too. That's what I see with a lot of young girls, and starting to get victimized by men getting them to show their body or their body parts. [Second speaker] Sexting. That sex texting stuff too, sending nude photos to people through their phones. [Advocate]

Centre Society, a non-profit community-based youth health research and youth engagement organization, found:

- The proportion of female Aboriginal street youth increased from 38% in the 2000 survey to 56% in the 2006 survey.
- Across all five surveys, 34-57% of the street youth reporting involvement in prostitution were Aboriginal.
- Of the street youth that were Native females, the various surveys found that 24-56% had been prostituted.[79]

Involvement in the Internet Sex Trade

Several of the advocates attending the regional round tables described younger Native girls' use of technology and experiences with being caught up in the internet-based sex trade. The advocates identified Craigslist as a site commonly used to prostitute Native girls and women, and noted pimps' use of the internet to recruit Native teen girls from the Twin Cities for the stripping and prostitution circuit in the northern part of the state during hunting and tourist seasons. A Minneapolis police officer with extensive experience working with prostitution crime confirmed that in the Twin Cities, Craigslist is a primary venue for the commercial sexual exploitation of Native women and underage girls.[80] Canadian research has also found Native women and girls involved in online pornography. In Vancouver, British Columbia, almost two-thirds (64%) of the prostituted women interviewed for a study (over half of whom were Aboriginal) reported having had pornography made of them.[81]

In 1999, the Hofstede Committee Report on juvenile prostitution in Minnesota called attention to the ease with which johns could use the Internet to download naked images of underage girls, converse with their pimps, make appointments, and still retain anonymity. The Committee noted that law enforcement was challenged in two ways: determining the girls' ages, and distinguishing between legal escorts and prostituting women.[82] A recent study of prostituted women and girls in Chicago found that almost ten percent were in contact with johns through the Internet, specifically Craigslist. In addition to the online sex trade options described 10 years earlier by the Hofstede Committee, johns were also able to access live, interactive strip shows and sex shows via web-cam, still relatively invisible to law enforcement.[83]

Patterns in Entering the Sex Trade

Age of Entry

Ten years ago, the Hofstede Report on juvenile sex trafficking reported that 14 was the average age at which girls entered prostitution in Minnesota.[84] In the past few years, Vednita Carter, Executive Director of Breaking Free, has described the average age of

entry into prostitution as 13, but she recently announced that her organization is seeing a larger number of younger girls.[85] At the round tables hosted by MIWRC in Duluth and Minneapolis, advocates reported that the Native women and girls they work with have entered prostitution and other types of commercial sexual exploitation at various ages related to specific life circumstances. Most agreed that Native girls in prostitution enter the sex trade around the age of 13, but some noted that women in their late 20s and early 30s enter the sex trade to support their children when their 5-year eligibility for public assistance has ended and they are unable to find jobs.

Of the 37 Native women and girls reporting commercial sexual exploitation during intake at the Minnesota Indian Women's Resource Center, almost half (42%) were 15 or younger when they first entered the sex trade, and over 20 percent were 12 or younger. One 14-year-old had been trafficked into pornography at the age of 11, reporting that she had been photographed or filmed for pornography 10 times in the previous six months. Almost one-fourth (24%) of the incoming clients reporting involvement in prostitution had entered at age 27 or older, which supports the advocates' emphasis on Native mothers' vulnerability when their public assistance eligibility has ended.

In Seattle, an area similar to Minneapolis in its population of low-income American Indians, findings from studies of women and girls in prostitution found similar early ages of entry.

- In one study with women and girls in street prostitution, escort services, strip clubs, phone sex, and massage parlors, 100% had entered the sex trade between the ages of 12 and 14.[86]
- A study published in June 2008 found that girls entered prostitution around the age of 12 or 13.[87]

No research was identified that estimated the age of entry for prostituted American Indian girls or women in the U.S. However, several Canadian studies reported the average age of Aboriginal girls entering the sex trade as 14, noting that some start as early as the age of nine.[88,89,90,91,92] The most recent Canadian research we identified suggests that Aboriginal girls are entering prostitution at younger ages than in years past. Citizen groups conducting safety patrols in Winnipeg have reported children as young as eight years old being approached on the street or in back lanes by men in vehicles, presumably for the purpose of sexual exploitation.[93] A 2002 study by the Urban Native Youth Association in Vancouver also found commercial sexual exploitation of children as young as nine, with 11-13 being the average age of entering prostitution.[94]

Modes of Entry

Stripping, Exotic Dancing, and Escort

The advocates attending the two regional round tables described bars and strip clubs as prime recruiting grounds for pimps, asserting that bar and club owners are often complicit. In both Duluth and Minneapolis, advocates mentioned a "circuit" moving Native girls recruited as "dancers" to various strip clubs throughout

Age when MIWRC clients entered prostitution/ pornography (n=33)*

Age at entry	Number	Percent
8-12	7	21%
13-15	7	21%
16-17	7	21%
18-23	5	15%
27-38	6	18%
39-55	1	6%

*Age was not documented for four clients that reported involvement in prostitution

Everybody I've come across has been young [at the time they entered prostitution] Like, 12, 13, 14 sometimes 15. I met one woman who was maybe 19, she was really the exception. There's definitely that 12-15 range. They seem like babies! [Second speaker] I think the other age group are those [ages] 20 to 30 with young kids and their 5-year MFIP has run out. [Advocates]

Several of [our prostituted clients] have talked about when they started, and the youngest so far was 12. [Advocate]

They're letting underage girls into stripping. They [pimps] helping them get their fake IDs and stuff. There are 16, 15-year-olds stripping in town here. [Advocate]

Some pimp, male or female, has put this all together and provided everything, and just told her 'All you have to do is dance.' When you talk about entering prostitution, dancing doesn't seem as harsh to the individual as actually street-walking. You don't look at it as if you're doing anything wrong, because you go to clubs and nowadays the dancers in clubs are more seductive than some of the stuff the girls do on the stage. [Advocate]

You can walk into any strip club and you know, the people who work there are recruiters, so it seems so much less dangerous. I don't think other people think of it as sexual exploitation.... [Second speaker] There's a couple of pimps up at [a local club] right now who've got a couple of girls...I know a few people who started off cocktail waitressing at a strip club and then it becomes normalized and then they're stripping. I had a friend who was cocktail waitressing and then she got a $4,000 tip from a football player, and then after that she was stripping. [Advocates]

[One of the girls in my family] she asked her father 'What do you think about stripping?' because her friends are doing it and it's just becoming more and more common. [Advocate]

One woman [dancing in a rural Midwest strip club] had her pimp along...and she had to meet the quota. So she had to do whatever it takes to get that money. The men shoved bullets up her, beer bottles, shoved dollar bills up her. [Heidi Somerset, a survivor of prostitution and stripping, when giving a talk in Moorhead, Minnesota][93]

the state and sometimes to other states. A study involving interviews with dancers in rural Midwest strip clubs found that in addition to working as strippers, many reported being required to accept degrading treatment by customers, provide the club manager with sex during the "job interview," and allow the manager to prostitute them to customers.[96]

At the round tables, advocates in Minneapolis and Duluth reported that once Native girls begin dancing in strip clubs, they are quickly taken over by a pimp who moves them from place to place, prostituting them out of the bars and clubs in the circuit. Findings from the 2007 and 2008 surveys of advocates and law enforcement personnel conducted by the Minnesota Office of Justice Programs support the round table advocates' reports. In both OJP surveys, respondents reported that traffickers were moving Native female victims from reservations to the Twin City metro and other cities, from one city to another, and from Minnesota to another state.[97,98]

Regardless of what part of the sex trade girls enter, research has found that they are frequently involved in more than one type of commercial sexual exploitation, and pimps are usually involved in recruiting or "managing" them. A study in Chicago found that 28 percent of prostituted girls started as escorts when first recruited, and at the time of the interview 41 percent were working for an escort service. Almost 93 percent of those that entered the sex trade via an escort service had a pimp at recruitment. In addition to involvement in prostitution via escort businesses, 43 percent were also trading sex at private parties and 68 percent were also trading sex at a hotel.[99]

Canadian research has found similar patterns. Aboriginal girls are often recruited as dancers in their early teens and then moved across Canadian provinces for "dance shows," where they quickly enter prostitution. Eventually losing ties with their communities, they become even more vulnerable as they age, and are often moved by pimps into more dangerous areas of the sex trade.[100] Similar to the U.S. studies, most are involved in multiple areas of the sex trade. A study in Victoria, BC found Aboriginal and other women in prostitution involved in one or more other types of commercial sexual exploitation, including street prostitution, strip bars, and escort agencies. Though they represented only two percent of the region's population, 15 percent of the women and girls in escort services were Aboriginal.[101]

Recruitment by Pimps and Gangs

At the round tables, advocates reported that a significant number of the prostituted Native girls and women they see were recruited into the sex trade by pimps (male and female), gang members (male and female), or Native girls or women managed by pimps. Advocates in both Duluth and Minneapolis described the ways that pimps and their recruiters target the most vulnerable American Indian girls and women:

- Recruiting young Native girls at parties in houses that are deliberately set up for recruitment purposes—on reservations, in Duluth, and in the Twin Cities
- Inviting young Native girls on reservations or in Duluth to go on a road trip or to a party, taking them further and further from home until they have lost all contact with people that might help them escape
- Posing as "boyfriends" interested in a long-term commitment, then convincing the girls to begin stripping or prostituting to "help out"

- Promising girls "quick money" and a glamorous career as a dancer, then using force or persuasion to convince them to begin prostituting
- Approaching girls ages 12-14 on the street in poor neighborhoods to offer money for nude photos, work as "exotic dancers," or other sex-related activities
- Coercing Native women and girls under their control to enter shelters and drop-in centers for homeless youth, to recruit Native women and girls in desperate need of shelter and safety

Similar to what advocates reported at the round tables, a study with adolescent girls in corrections placement for prostitution in the Midwest found that they had been approached by pimps and recruiters in many locations: while walking, hanging out with friends on the street or at corner stores, at friends' homes, and even outside the juvenile justice center while waiting to meet with a probation officer.[103]

A 2005 study of prostituted adolescent girls in Atlanta identified a two-stage strategy used by pimps to prepare a girl for prostitution, much like the process described by the advocates attending the round tables. Initially, the pimp makes the girl feel attractive and valued, develops a sexual relationship with her, spends money on her, introduces her to drugs, and constantly assures her that she is "special." By the end of this first phase, the girl has formed a deep attachment to her "protector." In the second phase, the pimp moves her around to eliminate her relationships with family and others, then breaks her will and self-esteem through physical and verbal abuse. At this point, the girl has no option to refuse when the pimp pressures her to begin prostituting. The study found that women played multiple roles in this process: pimps, recruiters, groomers, watchers (who make sure girls get to and from their assigned locations), and wife-in-laws (other women trafficked by the same pimp living together and managed by either the pimp or the woman closest to him).[104]

Similar to the advocates' descriptions at the round tables and studies in the U.S., Canadian research has found that pimps coerce Native women and girls under their control to approach friends and peers with tales of a better, more glamorous lifestyle in the sex trade. Also similar to the accounts of the Minnesota advocates, Canadian studies have found that pimps recruit Aboriginal girls by inviting them to parties at "trick pads," providing them with drugs, and then trafficking them for prostitution.[112,113] A 2004 Canadian report indicated that drug dealers and gang members have taken over most pimp-controlled prostitution, some using the same grooming process that is seen in finesse pimping, and in 2005, Canadian school administrators reported that pimps and their recruiters have begun targeting adolescent Native girls on school grounds.[114,115]

Advocates attending the round tables in Duluth and Minneapolis reported that in most cases, a Native girl or woman controlled by a pimp described that person

Finesse pimping:

Grooming a vulnerable girl for prostitution to the point that her emotional dependency on the pimp and her drug habit make it impossible for her to refuse a pimp's request that she enter the sex trade. Typical steps in the "grooming" process are:

- Encouraging the girl to move in with the pimp/trafficker (male or female)
- Taking care of her basic needs
- Purchasing small gifts
- Providing free drugs
- Generally treating her with great kindness
- Once she feels obligated to repay the pimp, presenting her with "opportunities" for a lucrative "modeling" career working for an escort service
- When she agrees, moving her quickly into prostitution as a source of income for the pimp.[102]

They're just these really beautiful girls and those men will sit there and stroke that. Like, 'You're so beautiful,' and then just start to turn them into objects. Talking about their body like 'Oh, this is so nice about your body, or your body is so much better,' and the pimp starts to separate them from the other girls...It is so intentional. [Advocate]

The older guys will look for the younger girls at parties...And then what happens is they'll start, like, dating or seeing the pimp...so they engage that way and then [the pimp will] take 'em, like 'Let's go down to the cities for a trip,' and then they'll be brought down to the cities. And then it'll be 'Let's go down to Morton,' and they'll get further and further away until they end up in Illinois or Iowa and then they're stuck. [Advocate]

They [pimps] are working them right out of the shelter...there are women that will pose [as battered women] to get in the shelter and bring women out...And that homeless youth drop-in center, that is a target place and it has been a target place ever since it's been open, and it continues. And advocates are always trying to figure out, you know, you want kids coming in for services, how you keep them safe. [Advocate]

With runaways, it's a place to sleep. [Second speaker] Yeah, so they're already doing survival sex kind of stuff. But it's like, 'Don't worry, you won't need to go out on the street anymore. You won't need to do this. You can just stay here.' And then pretty soon it's like, 'You know, you have to start contributing, I'm not going to financially cover you. So, here, I can get you set up doing this. You're so hot, you're so good looking, you should go strip.' [Advocate]

Guerilla pimping:

- Using threat, physical violence, and intimidation against a girl or woman to coerce her into prostitution and to prevent her from trying to escape
- Using threat of harm to someone a girl cares about (usually her mother or siblings) to coerce her into prostitution and to prevent any efforts to escape[105]

A couple of girls had talked her into it. Kind of bribed her...like the description of 'Look at this, look at what I have, you should come up here it could be yours too.' And then...when she got up here, she realized she didn't want to do this and she thought she could walk away, but she couldn't. Those girls actually beat the crap out of her, so she ended up in the hospital. Somebody, not her, called the cops, but she was a mess and they beat the hell out of her. And the guy [pimp] had never had anything to do with it. [Second speaker] He didn't have to...They're handling it. [Advocates]

as her boyfriend. The advocates described the types of pimps and recruiters they have most frequently encountered in their work with prostituted Native girls and women:

- African-American men from Chicago (usually affiliated with Gangster Disciples) who appear in Duluth at various times of the year to take over and organize prostitution in the area
- Latino and American Indian members of Latino gangs in Minneapolis, often girls' boyfriends
- Native Mob members who move back and forth between Duluth and Minneapolis
- Native girls and women in a "ring" managed by a gang-affiliated pimp
- Native girls and women who are gang members themselves and are trying to raise their status in the gang by forcing other girls and women into prostitution as a source of revenue for the gang
- Landlords targeting Native women with children, forcing them or their children into prostitution by threatening the family with rent increases and/or eviction

The data collected from incoming MIWRC clients over a 6-month period also reflect guerilla recruitment (recruitment by force) by prostitution rings and gang members. Whenever incoming MIWRC clients met the state definition of a trafficking victim, MIWRC staff asked them to describe any factors that might put them at risk of re-involvement in commercial sexual exploitation. Eighty percent of the younger women and adolescent girls reported that they were at risk of further commercial sexual exploitation due to fear of violence against themselves or others; one specifically said she had been trafficked into prostitution by a gang.

Findings from the 2007 Minnesota Student Survey strongly suggest that American Indian girls in Minnesota are more affected by gangs than girls in the general population. Girls identifying as "Indian only" in the Minnesota Student Survey also reported concern about gang activity at their schools: 32 percent of 6th grade and 26 percent of 9th grade Native girls reported that illegal gang activity was a problem at their school, compared to 16 percent of girls in the general population. Minnesota Student Survey participant responses also showed that 28 to 33 percent of Native girls in the 6th grade had been threatened at school in the previous 12 months, compared to 20 percent of girls in the general population. It cannot be determined how frequently these threats are part of guerilla recruitment, but they clearly indicate Native girls' lack of safety at school.

Gang research in the U.S. and Canada supports the advocates' stories of Native girls trafficked into prostitution by gangs. In 2001, an international study of the commercial sexual exploitation of minors in the U.S., Canada, and Mexico found significant gang involvement. The research team reported that girls affiliated with Native gangs were expected to provide male gang members with sex on demand.'[108] A Minnesota study of gang members conducted from 1995 to 1998 involved interviews with 100 current and former gang members, 14 of whom were Native members of Latin Kings, Vice Lords, Gangster Disciples, and Native Mob. Most of the Native girls participating in the study reported that they provided male gang members with sex on demand and/or were trafficked for drugs and money. Several Native male gang members interviewed for the study reported their gangs' use of guerilla pimping methods.[109]

Recent U.S. studies suggest that Native gangs are growing rapidly, and expanding into drug trafficking activities. In 2006, *Minnesota Public Radio* reported that authorities estimated there were hundreds of young Native men on White Earth, Red Lake, and Leech Lake reservations that consider themselves part of a gang.[110] In January 2009, the National Gang Intelligence Center announced that several American Indian gangs, particularly Native Mob, have expanded beyond Indian Country, on and off reservations. Native Mob was described as one of the largest and most violent Native American gangs operating in the United States, with most of its activity centered in Minnesota, Michigan, Wisconsin, North Dakota, and South Dakota. The report noted that Native Mob and other urban and suburban gangs in Minnesota are expanding their drug distribution activities, sometimes working in conjunction with Mexican drug trafficking and criminal organizations.[111]

In 2007, the Native Women's Association of Canada (NWAC) reported that Native girls were currently being "banged-in" by four different Native gangs, required to have sex with multiple members of the gang in order to become a member.[116] A study in Winnipeg also found significant involvement of Native women and girls with gangs. Most "gang girls" were between the ages of 14 and 24, though the fastest-growing segment was under the age of 16. Female Native gang members frequently used guerilla pimping methods to recruit girls for prostitution to increase their own status in the gang, much like the stories told by the advocates at round tables.[117]

As this report was being completed, a flurry of news articles described rapid expansion of Native gangs in Canada. Speakers at a May 2009 conference hosted by the National Aboriginal Gang Commission described Native gangsters' growing involvement in drug trafficking and prostitution, branching out to own strip clubs and produce pornography. De Lano Gilkey, a gang expert from the U.S., warned conference attendees that addressing younger Native youth's admiration of the gangster lifestyle is of critical importance, saying "These wanna-bes are the gonna-bes."[118]

Recruitment by family and friends

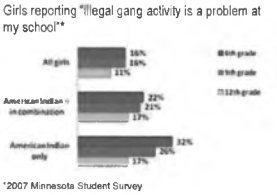
The advocates at the round tables described a recent trend. Native girls in their early teens recruiting their friends for stripping and/or prostitution by promoting the idea that the sex trade is a glamorous way to make "quick money." The intake data collected by MIWRC over a 6-month period also showed that in over half the cases of Native women and girls reporting that they had been involved in prostitution, a friend was the primary recruiter, sometimes managed by a pimp.

One of the most disturbing findings of the round table discussions was the frequency of reports that Native adults were involved in trafficking their young female relatives. One of the Duluth advo-

The latest one that I had contact with, she's twelve years old. She's a gang member now...She fought it, trying to stay away from [the gang]. She kept coming to me for about a month...Because of her friends, her family, the sort of lifestyle, where she lived, it was all around her. And her friends kept saying, 'Oh, come on, come on. Jom. You've got to be part of us'...And then she came one Sunday, and she pulled out her rag [gang bandana], and said, 'I'm a member. I was initiated over the weekend.' She was 'jumped in,' beat up, and she had to do something. I'm afraid she's going to have to do a lot more. [Canadian advocate working with Aboriginal girls, cited in Nimmo, 2001][106]

When you get a girlfriend, she gotta be gang raped. She's gotta go around and get boned by all of us guys. All of us Kings...We meet girls and stuff at pow-wows and they hang around with us and then they get the idea that we wanna go out with them, but we really don't. And then they just bring it up. 'Is it all right if we roll with you? Make us a Queen or something?' Then we're like, 'Yeah, we'll make you a Queen.' Then we'll take them back to our house...Everybody on the rez has got their cellular phones or their pagers. Then we'll each get a page and we'll go call somebody and say, 'Hey, there's gonna be an initiation'...You take them in your bedroom or on the couch. In the back or down in the basement. Wherever. Then whenever they're done, they'll come out. Then whoever is next, they'll take. She stays in the bedroom. She can't come out and then whoever got done with her will come back out and say 'Hey, whoever's next, go ahead.' [Native male Latin King gang member, Minnesota study, quoted in Harrington and Cavett, 2000][107]

Girls reporting "Illegal gang activity is a problem at my school"*



*2007 Minnesota Student Survey

It's a family affair when they're younger and then at some point there's a shift where they can start getting some of their own money in their own hands. So they're looking at it look like, 'If my mom moves me around my mom gets my money. If I work with someone who gives me a cut, I get my money.' [Advocate]

We just talked to a young girl that walked into my office that was 14 years old, that was recruited when she was 12 by another 14 year old girl. Which is not as intimidating when your girlfriend comes over and says, 'Hey, come see what I'm doing to make some money.' [Advocate]

I see [viewing the sex trade as glamorous] as a new trend for the ones that I am working with. [Second speaker] They're all into that glamorized type of talk amongst one another. [First speaker] And I see more of the stuff that comes through Duluth as being more glamorized. And the girls recruiting other girls because then they won't have to do so much work and that's what they're expected to do. Then, the girls fight amongst each other over this guy! [Advocates]

cates reported that of the three Native pimps she had encountered in her work with prostituted Native women and girls, two were mothers trafficking their children. In both Duluth and Minneapolis, advocates indicated that being trafficked by a family member generally led to a girl seeking out a pimp so she could have access to her own money.

The information collected from incoming MIWRC clients supports the advocates' accounts. MIWRC staff report that new clients are frequently reluctant to admit family involvement in prostitution at intake, but many disclose this information after getting to know and trust program staff. Despite this reluctance, five (18%) of the 28 new clients that disclosed involvement in prostitution and also identified their recruiter said that adult family members had prostituted them when they were children or young adolescents.

Though we were unable to identify any research that focused specifically on Native girls, some U.S. studies have found family involvement in prostituting their children while others have not. In a large study of commercially sexually exploited youth in the U.S., Canada, and Mexico, researchers found that molestation by family members was a common type of child sexual exploitation, but there was no mention of trafficking by family members.[116] In contrast, research in Atlanta and Chicago identified significant involvement of families and friends in the sex trafficking of underage girls. One Atlanta study found that while pimps' use of female recruiters was becoming increasingly common, these recruiters were frequently a girl's peers or family members, male and female. In some cases, they were siblings only slightly older than the girls being recruited.[120] A Chicago study found that 19 percent of the prostituted women and girls in the sample had been recruited by a friend, and 10 percent had been recruited by a family member, most often a sister or a cousin.[121] Recent research in Ohio also found that underage girls were usually recruited for prostitution by a friend or a friend of a friend who worked for a pimp, often someone they knew from their neighborhoods.[122] Some researchers have reported that youth in conflict with their families frequently have friends and siblings already in prostitution, and that many of these youth become involved in prostitution as a way to assert their autonomy and make money at the same time.[123,124]

Canadian research with prostituted Native women and youth has reported findings very similar to the advocates' stories at round tables and the data collected from incoming MIWRC clients. One Canadian study of 150 commercially sexually exploited Aboriginal youth found that they often had friends who had told them about the "easy money" and the potential to have some control over their lives by entering the sex trade. Other Canadian studies have found family-based sex trafficking to be quite common in some Aboriginal communities.[125] In one study with 45 Native women in prostitution, almost one-fourth were from families involved in prostitution: five had sisters in prostitution, four had mothers in prostitution (one of whom also had a prostituting grandmother), two had fathers that were pimps, and one had a father that pimped both his wife and his daughter.[126]

Factors that Facilitate Entry

Generational Trauma

At both round tables, advocates kept returning to the impact of historical trauma and the cultural loss resulting from it as they talked about the unique vulnerability of American Indian girls to commercial sexual exploitation and the absence of safety in Native girls' lives. Though a significant body of research in the U.S. links generational trauma to substance abuse, child abuse, and violence in American Indian communities, we were not able to identify any that describes the role of historical trauma in the commercial sexual exploitation of American Indian women and girls.

Several Canadian studies with prostituted Aboriginal women and girls in Canada have also found historical trauma and generational trauma to play important roles in Native girls' entry into the sex trade. In her findings from research with sexually trafficked Aboriginal girls, Anupriya Sethi described the legacy of colonization and residential schools as a root cause of their vulnerability to recruitment for prostitution.[127] In a study of prostituted Aboriginal youth in 22 Canadian communities, the Native researchers that conducted the research reported that every youth participant in their focus groups spoke of the physical, sexual, and/or emotional abuse they had experienced in their home lives. The researchers found that the parents, relatives, other caregivers, and neighbors in these youth's lives all suffered from the legacy of cultural fragmentation, unable to break the cycle of pain and despair and turning to alcohol, drugs, and violence to deal with feelings of hopelessness.[128]

The advocates attending the MIWRC round tables emphasized that though each of the facilitating factors described below is an influence that increases the likelihood of a Native girl entering the sex trade, every one of them is a result of historical/generational trauma and cultural loss.

Who recruited MIWRC clients into prostitution (those that named their recruiter) (n=28)*

Recruiter	Number	Percent
Friend/friends	14	50%
Family member (mother, aunt, step-uncle, uncle)	5	18%
Boyfriend	5	18%
Pimp/gang/landlord	3	11%
Neighborhood/self	3	11%

* Nine clients that reported involvement in prostitution did not identify the person that recruited them, and several clients were recruited by two people acting together, so percentages add to more than 100%.

A lot of the women who are being prostituted, it's just the bottom line that was there. The majority of the time it means that we need to recognize where this came from in our communities. I mean, American Indian people say over and over again 'This is not how we treat our children. This is not where we are as far as respecting youth.' And I think traditionally that was true, but something dramatic like genocide happened. It was like a nuclear bomb, so the war site is exactly the best example of what happened to our communities. [Advocate]

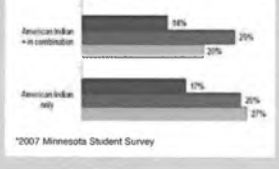
Runaway, Thrown Away, and/or Homeless

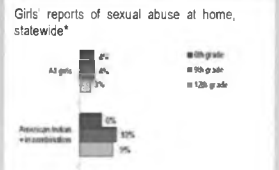
The vast majority of advocates attending the round tables described homelessness as the major factor in Native girls and women's entry into the sex trade, whether it be a result of running away from home to seek glamour in the big city, leaving home to escape violence and abuse, or losing housing because of poverty. Native girls' responses to the 2007 statewide Minnesota Student Survey support the advocates' accounts of Native girls' risk related to running away and homelessness: 25 percent of 9th-grade Native girls reported having run away at least once in the previous 12 months, compared to 11 percent of girls in the general population.

Some advocates talked about their own and other Native women's experiences in prostitution, reflecting that trading sex can seem like a reasonable choice when there was no other way to support and sustain yourself or your children. At both round tables, the advocates also identified the need for safe shelter as the strongest force keeping Native girls and women in prostitution when they want to leave it.

Kids running away. Running away from home... I work with the girls on reservations, there is nothing going on, they don't know what to do... [They say] 'I'm outta here. I have family in Duluth, I have a sister in Duluth or someone in Duluth.' It seems like Duluth is the place to be. Easier to get to, it's friendly... That's a lot of the wording: 'I gotta get out of here, there's absolutely nothing. I got nothing, I got to live wherever I can live.' [Advocate]

There's the survival aspect. And that's what they're doing, the ones that I see out on the reservation. They would never identify themselves as prostituting or using sex to get what they want. But that's what they're doing. [Advocate]





Studies with prostituted women and girls in the U.S. have consistently found that 50 to 75 percent ran away from home as adolescents.[129,130] In the Hennepin County study with women on probation for prostitution described earlier, 61 percent of the participants reported that they had run away when they were minors, most frequently because of "family problems."[131] Children of the Night, a national organization that works to rescue children from prostitution, says that of the one and one-half million children that run away each year in the U.S., it is safe to estimate that about one-third will have some type of involvement with prostitution and/or pornography.[132]

Research has consistently found that when youth run away from home with no place to go, it is usually because of parental neglect, physical or sexual abuse, family substance abuse, and/or family violence.[133,134,135,136] In one study, 43 percent of runaway adolescents said they had left home because of physical abuse, and 24 percent reported leaving because of sexual abuse.[137] A 1999 study with runaways in medium-sized Midwest cities found that:

- 81% had been pushed or grabbed in anger by an adult in their home
- 64% had been threatened with a gun or knife
- 59% felt neglected
- 28% were abandoned by their parents for at least 24 hours
- 21% had been forced by a caregiver to engage in a sexual activity.[138]

The National Center for Missing and Exploited Children reported that up to 77 percent of prostituted teens ran away from home at least once before turning to prostitution to meet survival needs.[139]

Runaway and thrown-away youth have very few legitimate ways to pay for their basic needs. Getting a job is very difficult without an address, phone number, high school diploma, work experience, or references, and even if they succeed, they usually do not have the identification needed to open a checking account or cash a check. Some fear being sent back home if they use their real name or home address.[140,141]

Research with Aboriginal youth in Canada has also identified running away from home and homelessness as major risk factors for entering prostitution. One study that analyzed 400 youths' social services case files in two large Canadian cities found that while 44 percent of the Aboriginal youth that ran away at least once had begun prostituting, only 13 percent of Aboriginal youth that never ran away entered the sex trade.[145]

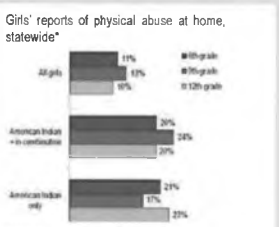
Homelessness, whether it occurs as a result of running away, being thrown away, or because of family poverty, has also been identified as a primary risk factor for the commercial sexual exploitation of youth in the U.S.[147] One study found that being homeless for more than 30 days is the single most determining factor in young children and teens entering prostitution, and youth advocacy groups report that homeless youth can expect to be approached by a pimp, john, or drug dealer within 36 hours when they are first on the street.[148,149,150]

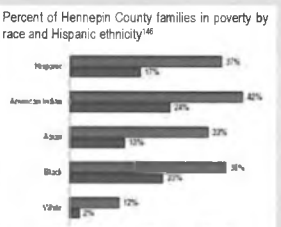
In the 2006 Wilder Research statewide study of homelessness, non-reservation American Indians represented 28 percent of the unaccompanied youth ages 17 or younger in outstate Minnesota and 12 percent in the Twin Cities area, though they represent only two percent of Minnesota's total youth population.[142] Over the years that the Wilder Research has conducted this study (every three years since 1994), there has been a 100 percent increase in the proportion of American Indians in the category "unaccompanied homeless youth," from 10 percent in 1994 to 20 percent in 2006.[144] Sixty percent of the participating Native girls ages 17 and younger reported having left home to be on their own by the age of 13.[143]

In research with commercially sexually exploited youth in Canada, interviewers found very high rates of homelessness prior to entering prostitution, and also while in prostitution. In Winnipeg, where a significant proportion of prostituted youth are Aboriginal, researchers found that 86 percent of prostituted youth had been homeless for 40 days or more.[151] The McCreary Centre Society reported similar findings from five surveys of British Columbia street-involved youth that it conducted between 2000 and 2006. An average of 61 percent of youth across all five surveys reported a great need for safe housing.[152] Other McCreary Centre Society findings that were consistent across several surveys include:

- 34-57% of prostituted youth on the street were Aboriginal
- 34-44% of younger prostituted youth were living or had recently lived in precarious housing situations (on the street, couch-surfing, and staying in shelters, transition houses, hotels, squats, abandoned buildings, tents, and cars).
- 50% of older prostituted youth had lived in precarious housing during the past year
- 95% of older prostituted youth had lived in precarious housing at some point in time.[153]

Studies in the U.S. and Canada have found that 84 to 90 percent of adult women in prostitution are currently homeless or have been homeless in the past.[154,155] In Vancouver, one study in which over half of the participants were Aboriginal women





Poverty-related reasons homeless Native girls and women left stable housing*

	Age group		
	<18 (n=20)	18-21 (n=31)	22 + (n=26)
Could not afford rent/house payments	29%	39%	42%
Eviction, foreclosure, or lease was not renewed	29%	33%	39%
Family lost its housing (asked of youth & young adults only)	33%	27%	NA

*Based on analysis of the non-reservation American Indian female subset of the 2006 Homelessness in Minnesota data, provided by Wilder Research.

The landlord piece is not uncommon, not uncommon at all. Landlords put the women in a situation where they actually end up owing rent or they know they're getting rates half off of rent, or some landlords even up the rent. It was in the woman's range at first and now she fell on hard times, she lost a job, she still owes rent and the landlord will go ahead and proposition them in that manner, swap or trade. And if not for the mother, then for the daughters. And the fact that the mom says we need a place to live. 'You know, you just gotta go in there, he's not going to do anything to you, just go, you don't wanna be out on the streets.' And the kid feels, you know, 'I owe this to our family', the loyalty piece, so you do it. And once it's done, once that's all it takes. [Advocate]

I was talking to some of the young girls there [at a school] about incest, and they really don't think that incest is as bad as a pedophile having sex with a two-year-old. So they thought, 'Well, it's a family member, it's at home and it's safe.' They really didn't correlate that it's the same thing. It is as bad, as damaging, and they don't get it. [Advocate]

I know women I've worked with that have been sexually assaulted by family members and it was ongoing, and that's why they left. And then they found out they could get paid for it, so think 'What's the difference?' [Advocate]

Some of the parents aren't even caring if the kids are in school or anything else. So, basically, she's running her own life at 12 and 14. [Advocate]

found that 86 percent of prostituted women had been or were currently homeless, and all of the women that were interviewed cited safe housing as a current, urgent need.[156]

At the round tables hosted by MIWRC, advocates reported that American Indian women with children living in poverty are at especially high risk of being trafficked into prostitution, especially by landlords who threaten them with rent increases or refuse to provide the documentation they need to receive government subsidies. The information collected from incoming MIWRC clients supports the advocates' reports, with one-fourth disclosing that they had traded sex for shelter.

Nationally, communities of color are significantly over-represented in poverty statistics. From 2001-2004, the poverty rate for American Indians, calculated as a 3-year average, was 25.3 percent, higher than any other group in the nation.[157] By the end of 2008, the non-Hispanic White poverty rate had dropped to 8.6 percent, while the American Indian rate had risen to 27.1 percent, the Hispanic and Asian rates had risen to a lesser degree (1.5% and 0.7%, respectively), and the Black rate had dropped slightly (down 0.2%).[158]

County-level 2008 Census figures are not available, but even prior to the current economic downturn, the 2000 U.S. Census found that 47 percent of Native families in Hennepin County were headed by a single mother, and over 40 percent of those households, home to one-third of all Native children in the county, lived in poverty.[159] In the 2007 Wilder Research homelessness survey, two-thirds of the non-reservation homeless Native women and 20 percent of the homeless Native girls under the age of 17 were mothers; close to one-third reported leaving their most recent regular housing for reasons related to poverty.[160]

Repeated Exposure to Abuse, Exploitation, and Violence

At the round tables hosted by MIWRC, the advocates in both Duluth and Minneapolis reported that Native girls and women with extensive histories of abuse, exploitation, and violence are extremely vulnerable to being recruited into the sex trade. Advocates described four types of experiences that they saw most frequently in Native girls trafficked into prostitution:

- Physical and sexual abuse in childhood
- Severe parental neglect as a child or teen
- Physical and sexual violence in early dating relationships
- Constant exposure to sexual exploitation and violence in their neighborhoods

Advocates at both round tables reported that most if not all of the prostituted Native women and girls they encountered had been sexually abused as children, and often, these victims had run away from home and entered the sex trade because of that abuse. The advocates also emphasized the negative impact of childhood sexual abuse on Native girls' ability to recognize or prevent their own exploitation by others.

Other studies in the U.S. support the advocates' accounts, finding that 60 to 73 percent of youth in prostitution and 55 to 90 percent of prostituted adult women were sexually abused in their homes as children.[161,162,163,164,165] Physical abuse at home has also been identified as a major risk factor for youth entry into the sex trade in Canada, the U.S., and Mexico.[166] Studies with runaway adolescents have found that the more abuse the adolescent has experienced at home, the more time she will spend on her own, the more likely she will have friends who sell sex, and the more likely she will be to abuse drugs and alcohol.[167,168,169] Canadian research has found similarly high rates of physical and sexual abuse among prostituted Aboriginal youth and women:

- 80% of prostituted youth were physically, sexually, emotionally, and verbally abused by parents, family friends, neighbors, and peers in their home communities, which caused them to run away with no safe place to go.[170]
- Almost three-fourths of women in street prostitution, 52% of whom were Aboriginal, reported physical abuse in childhood; 82% reported sexual abuse as a child.[171]
- 41% of youth on probation for prostitution in two large Canadian cities reported parental neglect, compared to five percent of non-Aboriginal youth.[172]

Findings from the 2007 Minnesota Student Survey suggest that Native girls in Minnesota experience much higher levels of childhood abuse than their peers in the general population. Overall, American Indian 9th-grade girls' rates of reported physical abuse at home were close to double the rate of their peers in the general population. In all age groups (6th, 9th, and 12th grades), Native girls' rates for reporting sexual abuse at home were double those of girls in the general population.

American Indians have the highest rates of reported child maltreatment in the nation and the state, and the highest rates of foster placement in both as well. These are some findings from government reports:

- Nationally, American Indian children have the highest rates of victimization in the nation—21.7 children per 1,000, compared to the white rate of 10.7 children per 1,000.[173]
- Of the children for whom maltreatment reports were made, American Indians and Alaska Natives were 20 times more likely than white children to be determined to be maltreated.[174]
- In both 2007 and 2008, statewide rates of American Indian child maltreatment reports were more than six times Native children's representation in the population.[175,176]
- American Indians also had the highest 2007 and 2008 statewide rates of recurring maltreatment at twelve-month follow-up.[177,178]
- Though 62% of the 2008 American Indian child maltreatment reports in Minnesota were for neglect, Native rates of reported physical abuse, sexual abuse, and medical neglect were also higher than those of any other group.[179]
- As of April 2009, American Indian children accounted for 10% of child maltreatment victims statewide, more than six times their representation in the child population.[180]
- In 2007, American Indians represented 12 percent of all children in foster care but only one percent of the state's child population.[181]

In Hennepin County, which has the largest concentration of American Indian children in the state, Native children represented 8% of the confirmed child maltreatment cases, more than 6 times their representation in the county's child population.[182] An even higher proportion (9%) of the children in Hennepin County foster care were American Indian, more than four times their representation in the county's child population.[183]

Child maltreatment by race, statewide 2008[184]

	American Indian	Black	Asian	White	Two or more races	Hispanic*
Total maltreatment reports per 1,000 in the MN child population	78.5	51.0	8.5	11.9	42.0	29.7
Neglect (non-medical)	62.4	37.2	5.5	7.6	32.4	19.4
Physical abuse	17.4	13.9	2.8	3.7	10.5	7.6
Sexual abuse	6.7	3.9	0.7	1.3	3.5	2.5
Medical neglect	1.4	0.9	0.2	0.1	0.6	0.3
Percent recurring within 6 months	5.8%	8.1%	3.9%	3.7%	6.6%	3.6%
Percent recurring within 12 months	14.5%	13.1%	3.9%	5.8%	11.7%	5.7%

*Children in the Hispanic category can be any race(s).

American Indian youth also have the highest rates of out-of-home placement in Minnesota. In 2008, Native children represented 12 percent of all children in foster care but only one percent of the state's child population. In Hennepin County, the most racially and ethnically diverse county in Minnesota, nine percent of children in foster care in 2007 were American Indian, more than four times their representation in the total child population.[185,186]

Though the number of Native children separated from their families is itself alarming, foster placement is also a risk factor for entering the sex trade. In their book *Being Heard: The Experiences of Young Women in Prostitution*, Gorkoff and Runner reported that 63 percent of prostituted girls and young women in their study had been involved with the child protection system as children. Over three-fourths had been in foster and group homes, often for many years.[187]

Homeless Native females' experiences with abuse, neglect, and violence

	Age group			
Percent of homeless non-reservation Native females that reported...	11-17	18-20	21	22+
Physical mistreatment as a child	45%	41%	40%	54%
Sexual mistreatment as a child	30%	41%	20%	51%
Parental neglect (no food, shelter, or medical care; extended absence)	32%	33%	60%	41%
Homelessness is due to feeling unsafe from violence in the house	28%	31%	Not asked	
Homelessness is due to physical or sexual abuse in the home	17%	31%	Not asked	
Percent of homeless non-reservation females that reported...	**11-17**	**18-21**	**22 and older**	
Being in a physically abusive relationship during the past 12 months	20%	48%	25%	
Staying in an abusive situation because she had no other housing options	5%	48%	50%	
Physically/sexually attacked or beaten while without a regular place to stay	10%	16%	31%

*2007 Minnesota Student Survey

The 2006 Wilder Research study of homelessness also found high rates of childhood abuse and out-of-home placement among non-reservation homeless American Indian girls and women. Over one-fourth of the Native girls ages 12-17 (28%) and 24 percent of Native females 18-20 reported having left foster care or a group home without a permanent place to go. Overall, almost 30 percent had lived in a group home at some point in time.[188]

Several of the advocates at the MIWRC round tables reported that Native girls' constant exposure to violence and sexual exploitation in their peer groups and neighborhoods causes them to view these threats to their safety as "no big deal." Advocates in both Duluth and in Minneapolis reported a growing number of Native girls and young adult women who consider "free-lancing," prostitution without a pimp, to be a glamorous and exciting way to empower themselves and make quick money at the same time.

Native girls' responses to the 2007 Minnesota Student Survey reflect significant violence in their lives. In 6th, 9th, and 12th grades, Native girls' rates of physical and sexual abuse were double those

We have young ladies that come in that have difficulties defining what they've been through... We had a young lady who was being held in Mexico for three years, and she didn't think that she was traumatized. [Advocate]

Sexual exploitation for the young women and the girls we work with is such a secondary issue. It's like, 'Help me find shelter, help me find food, help me find clinics.' And then if you work with them long enough, it's 'Oh yeah, I was sexually exploited.' [Advocate]

A majority of them have been exposed to sexual abuse. And so, it's kind of like, they're making the decision now, they're in control of their bodies and they're going to do what they need to do to get what it is that they want. [Advocate]

The idea of liberation, 'My body, my choice. I can do it myself.' 'All woman-run. You're seeing more women that know how to do these things and are very skilled at how to prevent more harm from coming to themselves. And so they're handing together, creating all female call services. [Advocate]

Two years ago I was working with three sisters who had been prostituted by their mother since they were two, and the girls were about 15, 16, 17. They were just shifting and turning on their mother and taking their profits...it was kind of a struggle, mom still wanted money for her drug addiction, and they were starting to want to take their money. [Advocate]

I think they come into prostitution with addictions. I think they start, you know, they're experimenting around with drugs and then they find a ready source, because pimps latch onto that as a method to get them into it. [Advocate]

I also know a girl here, she got turned out with drugs, and she had to feed her addiction. So, she was really young and they gave her whatever, and then she had to keep that up. And it doesn't matter what your family status is, period. Because this girl I knew, her family status is pretty good. [Advocate]

MIWRC clients that know someone in the sex trade (n=95)

of their peers in the general population, they were more likely than girls in the general population to report a family member physically assaulting another family member at home, and also more likely to report that they themselves had used physical violence against another person in the previous 12 months.

Canadian research has found similar patterns. In a study in five areas of British Columbia, prostituted Aboriginal youth told interviewers that a cycle of violence has been normalized in their communities, and that it is impossible for many caught in that cycle to break the pattern.[189] In other Canadian studies, Aboriginal street youth described violence as part of their daily life.[190] In the U.S., national research with over 1,200 runaway and thrown-away youth in shelters and living on the street found that about one-half of those staying in shelters and two-thirds of those living on the street carried a weapon, and one-fourth of the street youth said they had committed a violent act using a weapon.[191]

Similar to the trend reported by the advocates, Canadian research has found that Native youth sexually exploited by family members at an early age often view the sex trade as a way to have some control over their lives.[192,193] One study found that sexually exploited youth often saw no harm in being paid for sex, since it was taken for free when they were still at home.[194] A second study reported that for many Aboriginal youth, the sex trade presents an illusion of escape and independence.[195]

An international study in the U.S., Canada, and Mexico found that exposure to an existing prostitution zone and social groups that condone or tolerate child-adult sexual relationships are both key contributing factors in youth entering prostitution.[196] Canadian studies with prostituted Native women and youth reported similar findings. Many grew up in environments where prostitution was common, and some reported that their own sex trade involvement was a result of learned behavior and day-to-day survival in their families for generations.[197] One Canadian researcher commented that an invitation from a man cruising by in his car to watch an indecent act in exchange for cash can seem quite reasonable to an Aboriginal adolescent living in a poor neighborhood where street prostitution is concentrated and there are no legitimate jobs.[198]

Information collected from Native women and girls entering MIWRC programs supports the advocates' reports that young Native girls are often exposed to the idea that prostitution is a "career option." Almost half (46%) of the 95 women and girls screened for commercial sexual exploitation said they have a personal friend in prostitution, and over one-fourth (26%) said they have a family member in prostitution. Over one-fourth (28%) of the 95 women and girls entering MIWRC programs said they know someone who makes others sell or trade sex, almost half of these clients described the trafficker as their boyfriend.

Addiction

Advocates attending the two MIWRC round tables described parental addiction as an important contributor to Native girls entering prostitution, but noted that pimps and gang members often provide Native girls and women with free drugs to get them addicted and then prostitute them. Advocates at both round tables agreed that personal addictions often keep Native women and girls in the sex trade long past the point when they want to leave it.

In the Wilder Research study of homelessness in Minnesota, over half (56%) of the non-reservation Native girls age 21 and younger described their parents' drug and alcohol use as the partial or main reason they were currently homeless.[199] A national study of runaway and thrown-away youth found that 31 percent of youth staying in shelters and 45 percent of those living on the street reported problematic substance use by a family member (most often a step-parent) during the 30 days prior to their leaving home. These youth reported that adult family members' substance abuse made them more likely to get into arguments with the youth, to neglect or ignore them, or to hit them.[200] The Michigan Network of Runaway, Homeless, and Youth Services described similar findings, reporting that 41 percent of the youth they had served reported leaving home because of an adult's substance abuse.[201]

Research has found that substance abuse is both a predictor for and a consequence of entering prostitution. In the U.S., national research with 200 prostituted juveniles and adults found that 55 percent were addicted to drugs prior to entering the sex trade. 30 percent had become addicted following entry, and 15 percent became addicted at the same time they entered.[202] Studies with prostituted Aboriginal women in Vancouver have also found that while drug use often facilitated entry into prostitution, participants' use had escalated as a result of being in prostitution, and 60 percent were currently in prostitution to maintain a drug addiction.[203,204] A Montreal study with 165 fe-

One of the clients I work with, she comes and goes, she knows she's been diagnosed with FAE and her children have been diagnosed as well. So her mother drank and she drank while she was pregnant with her kids. So, she's working to keep herself in a home and she's exchanging sex for her home and so she has no problem with her kids doing the same thing, her daughters. [Second speaker] I think the other thing with FASD what we know about that brain damage is you have a 15 year old girl's body but you have an 8 year old girl's mental capacity, because your brain is not formed correctly because you're brain damaged. [Advocates]

I have trouble making decisions, if they're bad or they're right, and that's what has been hardest throughout my life. I realize that it's right or wrong after I've done it, and then that's what makes it really bad...because you can get in a lot of trouble and I've gotten into lots of trouble...it's hard to say no to things...I used to do anything and everything, just, you know, for the hell of it, or just to have fun...but there's be so much trouble...you think of having fun, you think you're going to have fun, and what's wrong with that and then you realize fun turns into trouble and trouble turns into danger. [FASD-affected woman interviewed in a British Columbia study][205]

male street youth, none of whom were in prostitution at baseline, found at follow-up that substance abuse was a significant predictor for girls entering prostitution.[765]

In the Hennepin County study of women on probation for prostitution described earlier, 64 percent of American Indian women that provided drug use information at the time of arrest admitted currently using drugs and/or alcohol. One in five used both drugs and alcohol at the time of arrest, and half had received prior treatment for chemical dependency.[205]

Even without pimp involvement, American Indian women are at particularly high risk for substance abuse. A study in seven tribal communities found that parental alcoholism, sexual abuse, combined physical and sexual abuse, emotional abuse, and emotional neglect as a child each contributed to double the risk of alcohol dependence. Native women who had experienced four or more categories of these adverse experiences in childhood had seven times the risk of alcohol dependence.[207]

Alcohol poses a different type of prostitution recruitment risk for Native girls whose mothers used it while pregnant. The Centers for Disease Control (CDC) currently use the term Fetal Alcohol Spectrum Disorders to describe three alcohol-related disorders: fetal alcohol syndrome (FAS), fetal alcohol effects (FAE), and alcohol-related neurodevelopmental disorder (ARND). FAE encompasses behavioral and cognitive problems in children who were prenatally exposed to alcohol, but who do not have all of the typical diagnostic features of FAS. Children with ARND might have functional or mental problems linked to prenatal alcohol exposure, including behavioral or cognitive abnormalities or a combination of the two.[209] Advocates at both MIWRC round tables reported working with FASD-affected Native girls and women in prostitution. The advocates described FASD as a critical risk factor because it results in impaired judgment and impulsiveness, which puts them at very high risk of commercial sexual exploitation. Advocates also identified FASD as a factor affecting some Native parents that prostitute their children, and noted the prevalence of FASD among Native youth living in foster care.

The CDC has reported that the fetal alcohol syndrome rate for American Indians is 30 times the rate for whites.[210] The incidence of FASD in Canadian Native communities is similarly high.[211,212] Some studies have found that youth affected by FAS or FAE are particularly vulnerable to sexual exploitation by pimps offering them free drugs at house parties. Once they are addicted and have significant drug debt, they are threatened and told they must work off their debt through prostitution. They are also extremely vulnerable to guerrilla recruitment strategies.[111,214]

Girls reporting problematic substance abuse, statewide*

*2007 Minnesota Student Survey

Research with FASD-affected youth and adults has identified a number of impacts that significantly increase their vulnerability to commercial sexual exploitation:

- Teenagers and adults with FAS or FAE seem to 'plateau' academically and in daily functioning but their problems grow more serious as attention deficits, poor judgment, and impulsivity create obstacles to employment and stable living.[215]
- Adolescents and adults with FAS/FAE have been described as 'innocent,' 'immature,' and have been found to be easily victimized.[216]
- FASD-affected adults often suffer from substantial mental illness as well, including major depression, psychotic disorders, and anxiety disorders.[217]
- 62 percent of people with FASD have had a disrupted school experience between the ages of 12 and 20.[218]
- 90 percent have had mental health problems diagnosed.[219]
- 40 percent of FASD-affected youth ages 6-11, 48 percent of those ages 12-20, and 52 percent of those over age 21 have exhibited inappropriate sexual behavior, and the same proportion of the three age groups have been sexually victimized.[220]
- 79% of FASD-affected girls ages 12 and up have exhibited sexually inappropriate behavior.[221]

Failure to Finish High School

Research has found that a minors that have been expelled from school or are no longer interested in finishing school are at a high risk of becoming involved in prostitution.[224] The Hennepin County study of 70 women on probation for prostitution reported similar findings. Only one of the 17 American Indian women in the study sample had completed high school.[225]

Not completing high school is a major barrier to Native girls finding legal employment. Less than half of Minnesota's American Indian students (41.4%) graduated on time in the 2006-2007 school year, with 19 percent dropping out that year.[226] In the 2007 Minnesota Student Survey, American Indian girls were less likely than girls in the general population to report that they like school (74.9% gave positive responses), and the most likely to report truancy in the past 30 days (44.5% reported being truant).[226] Native youth detachment from school is also a problem in Canada. In Canada's 2001 Census, 62 percent of Aboriginal people living on reserves and 48 percent of those living off-reserve had less than a high school education.[227] Canadian studies have also found that Native girls affiliated with gangs were typically two to three years behind their age cohort if they were still in school, but few finished 10th grade.[228] One Canadian study found that while street-involved girls were more frequently in

school than street-involved boys, those that were in prostitution were much less likely to be attending school than girls not in the sex trade.[229]

Mental and Emotional Vulnerability

Advocates at both MIWRC round tables described mental health issues as a significant factor in Native girls' and women's vulnerability to recruitment into the sex trade. Several advocates emphasized the mental health impacts of generational trauma on Native families, and by extension, the effect on Native girls' emotional vulnerability.

Among Native women, research has found that depression and post-traumatic stress disorder are frequently linked to a history of child abuse, adult re-victimization (especially forced sex), and lifetime abuse.[210,211,232] Exposure to racial discrimination has also been found to play a role Native girls' mental health, often resulting in withdrawn behavior, anxiety, depression, and physical complaints related to stress.[233]

> *We're talking mental health, we're talking about borderline personality disorders, post-traumatic stress, anxiety. Bipolar. And I think in the beginning, it's dissociation. [Second speaker] Right, because that's the only way to deal with it, is you dissociate, it's like an out of body experience. They go somewhere else or they become someone else to be able to detach what they just had to go through. [Advocates]*

> *That void. Culture and identity, all those things that lead to that searching and that hopeless feeling of there's no place for me, all that conflict between two worlds and just being vulnerable to being taken somewhere down a path that might lead somewhere. [Advocate]*

In the 2007 Minnesota Student Survey, Native girls were more likely than girls in the general population to report that they had thought about suicide and that they had attempted suicide in the past 12 months. SAVE (Suicide Awareness Voices of Education) reports that the suicide rate for American Indian youth ages 10 to 15 in Minnesota is two to three times the rate of other groups in the state.[234] In Canada, the 2003 completed suicide rate for Aboriginal female youth ages 15 to 24 was almost 9 times that of female youth in the general population.[235] A recent study reported that 29 percent of American Indian teens in their sample believed they had only a 50-50 chance of living to age 35, compared to 10 percent of white teens. Those that predicted a high likelihood of early death were also much more likely to engage in subsequent risky behavior.[236]

Self-injury (cutting/scraping, slashing, or burning) also appears to be a common behavior among American Indian girls in Minnesota. In the 2007 Minnesota Student Survey, 6th and 9th grade American Indian girls reported having deliberately hurt themselves during the past year at twice the rates of girls in the general population. Studies with homeless youth in the U.S. have reported similar findings. In a study of 428 street youth in Washington State, 14 percent of whom were American Indian, self-injurious acts were found to be extremely common. Over two-thirds (69%) of the youth reported that they had engaged in self-injury, which was related to a history of sexual abuse, physical abuse and/or neglect, and in the researchers' words, "deviant survival strategies."[237]

In Canada, research with prostituted Aboriginal adolescents found that almost one-third had engaged in self-harm (self-cutting or slashing).[238] A Canadian study of incarcerated Canadian women who regularly engaged in self-harm found that 64 percent were Aboriginal.[239] These are some of the reasons the research participants gave when asked what motivated them to cut or slash themselves:

- A cry for attention or nurturing
- Self-punishment or self-blame
- Coping with isolation or loneliness
- Distracting themselves from or cleansing themselves of emotional pain
- A way to feel again, or to re-connect with reality
- Expression of painful life experiences
- Feeling in control, having power over self

Barriers to Exiting the Sex Trade

Limited Access to Emergency and Supportive Housing

Studies of women and girls in prostitution cite a lack of safe shelter as a primary barrier to assisting those who want to leave the sex trade.[240,241] In both Minneapolis and Duluth, advocates reported that government funding agencies and other grantmakers impose inflexible eligibility requirements and policies that effectively lock prostituted Native women and girls out of emergency shelter and transitional housing facilities. These policies and rules frequently sabotage advocates' efforts to help Native girls and women exit the sex trade. For instance, several advocates described federal regulations that exclude anyone with a felony conviction from eligibility for public housing programs.

Several advocates reported that local transitional housing programs and some domestic violence shelters refuse access to Native women and girls who disclose involvement in prostitution, even if they are attempting to escape a pimp's violence. Minnesota state law also allows landlords and managers of subsidized housing to refuse to rent to a person with a history of prostitution.[242]

Advocate story:

I worked with someone for three years who was stripping. She was sexually abused as a child, got married at eighteen to someone who was abusive to her and when they got divorced, she did all the things she was supposed to. Got her child got out.

There's a strip club down the road that she made a little money at and she was good looking and was able to do that, and pretty soon that's the only work experience she has, that's her whole entire life...She's traveling the circuit, she can't make any money, she's getting stuck places, sleeping in her car, staying at guys' houses who are holding guns to her head. She doesn't use, completely sober. And I spent three years with appointments over the phone...she just could never be safe. There was no place to go.

I said if she could get up here we would get her into a shelter up here. And they kicked her out almost immediately and told her to go to the homeless shelter. She was used to being up all night, and that was an issue at the shelter. That was her job hours...she was up until six in the morning and then slept all day, and that was what she got in trouble for and got kicked out for.

So what ended up happening was we found a place for her where she could go for a period of time in a whole different city and we got four tires donated for her car and filled it full of gas and off she went. And that was the best we could do. And she was here and she knew us, we could provide counseling and we could provide stuff. It was just so, I don't know, a very sad situation.

Investigative resources are spread so thin that federal agents are forced to focus only on the highest-priority felonies while letting the investigation of some serious crime languish for years. Long delays in investigations without arrest leave child sexual assault victims vulnerable or suspects free to commit other crimes, including, in two cases the Post found, homicide. With overwhelmed federal agents unable to complete thousands of investigations or supplement those done by poorly trained tribal police, many low-priority felonies never make it to federal prosecutors in the first place...Federal investigators usually take the lead when the victim is 9 or younger, authorities say; tribal investigators take the lead with older victims. But federal prosecutors often decline those cases precisely because the victim has been interviewed too many times or by investigators who aren't specially trained to handle child sexual assault [Source: Lawless lands: Promises, justice broken. Series in the Denver Post. November 11, 2007].

We dealt with a case where the girl was screaming for help and even did a self-report and they wouldn't open the case until the mother abandoned the kids. One of the things is, it's very dependent upon the youth's age. If they are 16, 17, they all just become disposable, forgotten. And if you don't get all of the information from the youth, if you don't have enough substantiated evidence about who, what, when, where, why, they can't open cases, they have nothing to work with. And the girls are not gonna talk. [Second speaker] Exactly. Even though we're mandated reporters and we're supposed to tell those things, if we don't have enough information, they can't open the case. You have to have enough information to warrant the opening of the case, or to even get them to investigate. [Advocate]

We ask our women, 'What do you need?' but our services aren't set up to help them, and I feel like it's an injustice to them, to pry into their life and say 'What the hell is going on, and how can I help you?' We don't even know, and our services aren't set up for that, so what can we do as organizations to make sure that we're all on the same page, that we treat the survivor the same no matter way? [Advocate]

Absence of Other Options for Self-sufficiency

As noted earlier in this report, most American Indian women and girls in the sex trade have not completed high school, so they rarely have marketable job skills or a formal employment history. Though 90 to 95 percent want to escape prostitution, most do not feel they have any other realistic options for consistently earning enough money to survive.[243,244]

Distrust of Law Enforcement

Advocates at both round tables described Native women's and girls' distrust of police, fear that they will be arrested if they ask police for help, and fear that their trafficker would suffer no real consequences even if they did file a complaint, provide evidence, and agree to testify. Some Minneapolis advocates reported interactions with city police in which they or their clients felt they were not treated well. Advocates working with prostituted Native girls in Duluth expressed frustration that the FBI chose not to prosecute a recent case involving four trafficked underage girls even though the girls were willing to testify and Duluth police had gathered extensive evidence. Echoing the Duluth advocates' accounts, Kathy Black Bear at Rosebud Tribal Services in South Dakota reported that last year, an underage Rosebud girl living in Sioux Falls was trafficked to Mexico and kept there from January to March 2008. Ms. Black Bear reported that the FBI declined to investigate the case, so the tribe hired a private investigator to travel to Mexico, who successfully found the girl and brought her home.[245]

Conversations with Minneapolis police officers suggest that limited staff time and budget constraints are often the reason that more pimps are not investigated.[246,247] One reported that cost tends to limit law enforcement efforts to the investigation of large prostitution rings that traffic minors, especially those that also traffic drugs, because prosecution is more likely to result in a conviction.[248] Minneapolis Police Department 3rd Precinct Inspector Lucy Gerold noted that most purchasers of sexual services apprehended by the police have been allowed to plea bargain their sentences down to restorative justice.[249] In September 2008, Susan Segal, the Minneapolis City Attorney, reported that the her office was currently reviewing its plea bargain standards in "john cases," and that prevention and treatment for prostituted minor girls is the current focus of the department's work and the direction taken in the prostitution review calendar with the court.[250]

Similar to the Duluth advocates' accounts, the *Denver Post* reported that from 1997 to 2006, federal prosecutors rejected almost two-thirds of reservation cases brought to them by FBI and Bureau of Indian Affairs investigators.[251] It was outside the scope of this report to get extensive input from law enforcement personnel on this barrier, but a larger discussion of their perspectives should be included in future reports on this topic.

Child Protection Policies

Some of advocates working with adolescent girls reported encountering challenges when child protection policies and priorities prevented opening a case for an adolescent girl who was being prostituted or at extremely high risk of being prostituted. The scope and time frame for this report limited our ability to access the perspectives of county child protection workers, but these should also be included in further discussions of this issue.

Limited Resources for Support and Healing

Lack of services designed for Native women and girls in prostitution

Advocates repeatedly emphasized the fact that very few of the programs and services available to prostituted Native women and girls are designed to meet their needs, especially if they have not yet reached the point where they have made a firm commitment to leaving prostitution forever. Advocates also reported that program funders' requirements can restrict prostituted Native women's and girls' access to the types of support they need.

The research literature suggests a significant lack of federal funding or state funding for assisting domestically trafficked adult women. Though the Trafficking Victims Protection Act provides for a grant program that local and state authorities can use to provide services to mostly U.S. citizen victims, those funds were never requested by the Department of Justice, and subsequently no programs were ever funded.[252] Violence Against Women Act (VAWA) monies can be used for services to women in prostitution, but cannot be used for services to domestic victims of sex trafficking.[253,254] Victims of domestic violence and physical or sexual assault are eligible for reparations through Victims of Crime Act (VOCA) funding, but not if they were "committing a crime or any misconduct that is connected with the incident"—which automatically excludes prostituted women beaten or sexually assaulted by a pimp or a john."[255]

Inadequate Support from the Mental Health System

Earlier in this report, we described the overall emotional and mental vulnerability of Native girls and women. Experiencing prostitution adds significant mental health consequences to pre-existing emotional problems. The advocates described many prostituted Native women and girls as living in a constant state of fear that is based on very real threat, with no access to appropriate mental health services. They reported that most mental health professionals have no experience providing services to prostituted women, who live in an environment where rape and injury are routine occurrences and there is no protection against either.

Advocates also described misdiagnosis and over-diagnosis as significant problems for Native women and girls in prostitution or attempting to exit prostitution. Some questioned whether the criteria for certain mental health disorders were even appropriate for prostituted American Indian women and girls.

Though recognizing a need for psychiatric and psychological services for Native women who are severely traumatized, several of the advocates at the Minneapolis round table reported significant discomfort with having to se-

What are you going to do to get her out? Because recognizing them, identifying them, that's great—but once she's ready to get out, are you going to have a place for her? This is not an overnight fix. This is not just 'Get her housing and her whole life is going to be better.' We're talking about incest, mental health issues, trauma that is life-long [Second speaker] In housing funding streams, the programming has become more and more [difficult]. The reporting and the documentation and the things that they're supposed to track, that advocates can't keep up with just 'Let's get you into housing.' Housing is really complicated, it takes a lot of time and energy to get all that stuff in place.' [Advocates]

[The programs I work with] are battered women's programming, and the attitude is 'It doesn't happen here' because there's no money for it [working with prostituted women], for them to have that kind of programming. When I used to run the shelter here, we never touched on that, that wasn't something we ever, ever talked about. [Advocate]

That diagnosis of bipolar, I think it's archaic. We're talking about trauma, multiple generations of trauma...That diagnosis doesn't accurately describe our experiences. And so the mental health field is kind of off the hook in addressing the social problems that go with that. And it's like, 'Here, we've done our share, this is what she has, give her the pills and refer her onto someone else.' [Advocate]

A counselor or a therapist can recognize some of the symptoms of PTSD as bipolar, or as schizophrenic. And unless you are well versed, or, I don't want to discredit any therapist, but I think doing more research and more involvement of what happens with mental health is needed, and I don't think a lot of therapists do that. Then you're stuck into a category. Because research is showing that PTSD has a lot of symptoms and if you're saying 'Oh, well she has disassociated, therefore she's schizophrenic.' [Advocate]

When the victim cannot fight or flee, she may try to form a protective relationship with her captor. She hopes that if she can prove her love and loyalty to the pimp, she can 'love' him into being good. This can become such a desperate attachment that she actually believes she loves him, and passes up chances to escape. Stockholm Syndrome is often the real reason for what others see as the 'choice' to stay in the sex industry. [Joe Parker, co-founder of a foundation that provides services to prostituted women and men][261]

Right now mental health is what is being funded the most, so a lot of times our women cannot receive resources until we get her the diagnosis. People are handing out the diagnosis, and that can be because they know housing comes first, and the most open model to people in prostitution is 'We'll take you where you're at and we'll move you forward rather than making you do those steps. You can't even get them into a lot of housing programs that focus on where you are now, until you get a diagnosis. We have one woman we're working with, she got a diagnosis from like five doctors. [Advocate]

Finally, it got to the point where she wanted to leave, but this was absolutely not abuse to her. She was in control of her body, and those guys were idiots that wanted to give her any money for it. And, the fact of the matter was that she was never safe. [Advocate]

Their mentality is 'This guy is taking care of me. He has provided for me. My family has let me down and this man cares about me. So, no matter what you guys are trying to tell me, I'm not trying to hear that because when you're gone at 5 o'clock, he's still gonna be here. So everything you're telling me is a lie because he takes me home, he takes care of me, and me turning tricks is okay because I need to help out somehow. I can't work. I don't have a job and I can't find a job, so I'm doing what I can to help out' [Advocate]

cure a mental health diagnosis as a condition to obtain rapid client access to emergency or supportive housing. Some were also concerned that the mental health field could potentially becoming the favored approach for addressing prostitution.

Research has found that prostituted women and girls often dissociate to survive psychologically, allowing their minds to distance themselves from experiences that are too much for them to process at the time.[256][257] Some survivors of abuse describe this as "leaving your body."[258] However research has found that frequent dissociation can lead to a lack of connection in a person's thoughts, memory and sense of identity, which would significantly hamper a prostituted woman's or girl's ability to take steps to remove herself from a painful or dangerous situation.[259]

In a recent study with prostituting women in Vancouver, over half of whom were Aboriginal, 89 percent had at least one PTSD symptom, 81 percent reported at least three numbing and avoidance PTSD symptoms, and 85 percent reported at least two physiological hyper-arousal symptoms.[260] These included:

- Having a difficult time falling or staying asleep
- Feeling more irritable or having outbursts of anger
- Having difficulty concentrating
- Feeling constantly "on guard" or like danger is lurking around every corner
- Being "jumpy" or easily startled

Dependency, Denial, and Distrust of Advocates

Joe Parker, co-founder of a foundation that provides services to prostituted women and men, asserts that prostituted people's loyalty to a pimp must be viewed as a manifestation of Stockholm Syndrome, which has been described as a psychological condition common to hostage situations, in which the hostage becomes emotionally bonded to her captor.[261][262] Advocates at both round tables described the tendency of prostituted Native women and girls to insist that they are in prostitution by choice, and to minimize or deny any harm they have experienced. The advocates emphasized the extensive period of time it takes to build enough trust with prostituted Native women and girls that they are even willing to consider that they are being exploited, and the longer period of time it takes until they become willing to leave the sex trade. Some advocates cautioned that prostituted Native women and girls have been manipulated and exploited most of their lives. They asserted that prostituted Native women and girls need to be offered ongoing options without any pressure, because any program that requires them to immediately adopt a new belief system and/or way of thinking and behaving could trigger even higher levels of mistrust.

Fear, Shame, and the "Don't Talk" Rule

During the round table discussions, several advocates commented that Native communities are often aware that certain families in the community are sexually exploiting and trafficking their girls into prostitution, but ignore the signs

that this is occurring because they are reluctant to "interfere." Long-time advocates described this as "the don't talk rule," and reflected that at one time, this same silence existed around domestic violence in Native communities.

Research with Native child victims of physical and sexual abuse, physical and sexual assault, and commercial exploitation supports the advocates' reports at round tables. In one study, American Indian Native survivors of childhood sexual abuse told researchers that when girls in their communities are sexually assaulted by a family member (or even a member of another Native family in the same community), reporting the assault often results in significant social repercussions, so most victims are too afraid to report.[264] In recent interviews with sexual violence survivors, activists, and support workers in three regions of Indian Country (Standing Rock Sioux Reservation in North and South Dakota, the State of Oklahoma, and the State of Alaska), Amnesty International found that a number of the Native women would only agree to be interviewed if their anonymity was guaranteed. These women described the barriers to reporting sexual assault as fear of breaches in confidentiality, fear of retaliation, and a lack of confidence that reports will be taken seriously or result in perpetrators being brought to justice.[265]

In the Canadian study with 150 commercially sexually exploited Aboriginal youth in 22 communities described earlier, prostituted youth reported that prior to running away from home, they had no one they could talk to about the physical and sexual violence they had experienced at the hands of family members and other adults in the community. Similar to the advocates' accounts, these youth reported that people are often reluctant to "interfere." The youth felt that either they would not be believed, or that telling someone would simply trigger new violence.[266]

Absence of a Common, Evidence-based Approach

In addition to those listed above, advocates described two additional barriers they have encountered in trying to determine what services and approaches would result in the best outcomes for prostituted Native women and girls. Both are related to a lack of a uniform, evidence-based approach to working with prostituted Native girls and women.

The first is the absence of appropriate training for anyone working with prostituted Native women and girls, and trainers having cultural knowledge and extensive experience in working with this population. Because addressing this issue is relatively new to Native communities, advocates felt that no common language or body of knowledge has yet been established. Though they reported that participating in the round tables and sharing information and perspectives had significantly increased their own knowledge and awareness, they felt that training is extremely important for new advocates who have never been exposed to hearing stories of severe sexual and psychological violence. The advocates emphasized the importance of appropriate training to ensure that new advocates practice self-care and learn to balance compassion with good boundaries, as a way to prevent advocate burn-out and support good client outcomes.

Another barrier noted by the advocates related to the lack of an evidence-based approach to assisting Native women and girls in prostitution is a lack of systematic data collection that could help estimate the number involved in the various forms of commercial sexual exploitation, the number that meet the state's legal definition for traf-

We've got families that have been in prostitution for generations and you get one that starts talking, she's out of the family. You know, even sisters who were sexually abused by their father also, they're mad at her, you know, 'You better not move back to our rez.' [Second speaker] And then that causes a lot of drinking and drugs because they're ousted. [Advocates]

One of the things we need to work on is that denial. We first have to recognize that this is happening...In our community, what is slowly killing us is that denial, that there is sexual abuse, there is incest happening, and as a result we're setting our future off to be utilized by someone else sexually. [Advocate]

You do not call the police. I don't care what is going on, you call the police and your house will get stoned. Even neighbors who were not involved in what was happening. You just do not do it. That is a big piece that these women and girls are getting, when they're little. [Advocate]

ficking, their current paths of entry, the prevalence of violence they are experiencing, and their needs while in prostitution and when trying to exit. Most of the advocates voiced a high level of interest in a collaborative data collection effort if MIWRC or a group of collaborators would provide a questionnaire and technical assistance, and enter and analyze those data. There was strong agreement that these data are essential for effective planning and services.

Conclusions

On July 22, 2009, MIWRC held a listening session with 33 Native community leaders and elders to discuss the draft of this report and to gather input on recommended action steps. Their comments are included in the following discussion.

The Social Ecology of Native Girl's Vulnerability to Sex Trade Recruitment

Social ecology is the study of people in their environment and the influence of that environment on human development and behavior.[267] This theoretical model allows for examination of layered social and economic influences on Native children's ability to develop the four beliefs described at the beginning of this summary as essential for a coherent and resilient sense of self:

- The world is predictable, meaningful, and fair
- I am a worthy person
- People are trustworthy.[268]

Overall, the information we gathered for this report demonstrates that the sex trafficking of Native women and girls is neither a new problem nor a rare occurrence. It is, however, a very complex problem in its origins, activities, and solutions. In reviewing our findings, we recognized that a social ecology framework is a useful approach for summarizing the influences that contribute to Native girls' and women's involvement in the sex trade. Using a social ecology lens, we identified four major layers of influences that in combination make American Indian women and girls extremely vulnerable to sex trafficking:

- The impact of the majority society
- Neighborhood and community environments
- The influence of family and friends
- The cumulative impact on the individual

The social ecology of Native girls' vulnerability

Influence of the Majority Society

Government actions

The first and most pervasive layer of influence is that of the majority society. The historical review provided as context describes a series of U.S. government actions that contributed to the poverty and social problems that plague American Indian communities today. These include:

- The removal of Native people from their traditional land base to remote rural reservations, which forced them to become dependent on the U.S. government for food and other basic needs
- The large-scale removal of Native children from their families and communities to boarding schools and adoptive homes, which prevented intergenerational transmission of language and cultural norms for community and family roles and responsibilities
- The widespread physical and sexual abuse of Native children in boarding schools, which significantly impacted their ability to parent their own children in healthy ways
- Prohibitions against practicing traditional spirituality and participating in ceremonies, which impeded grieving of losses and healing from trauma
- Urban relocation initiatives that failed to provide the promised resources, leaving Native families in dire poverty and isolated from the community support that had been present on the reservation
- Government-sponsored assaults on Native women's bodies, including rape in military action and involuntary sterilization by Indian Health Service physicians

I remember going to some kind of historical presentation where they were talking about the Voyageurs, and how they would keep an Indian woman in a trundle bed under their bed for 'their purposes.' And I was so appalled that anybody in the Historical Society would still be dramatizing that, like this was some great and wonderful historical event. And I was really hurt because I'm an Indian woman, and I went there with a group of school kids...if I'm appalled and offended, think of what it's doing to these poor little minds. They're being taught that, 'Oh, Indian women, All they're good for is sex.' [Native community leader discussing report findings]

I'm currently the chief baby-sitter for my granddaughters, who are both 13, the critical age, and one of them is wearing the Britney Spears look. And, I'm like, 'Don't you want to put something over that?' And, you know, monitoring their Internet activity...it's the clothing and the cosmetics and the ads that all say women are less valued than men...it is a sort of hammering, constant message. [Native community elder and leader discussing report findings]

Racism and the targeting of Native women for sexual violence

In the historical review, advocates' round table discussions, Canadian studies of prostituted Native women and youth, and the listening session with community leaders and elders, racism was consistently identified as a key factor in sexual violence against Native women and girls and in extreme physical and sexual violence against prostituted Native women and youth. The research cited in this report also shows Native women and girls to be more frequent sexual assault victims than any other group of women in the country, and more likely to sustain injuries in those assaults.

Media glamorization of sexual exploitation and sex as a marketing tool

Advocates participating in the two round tables reported Native girls' perception of the sex trade, particularly dancing in strip clubs, as a glamorous career option in which they could make a lot of money very quickly. A number of community leaders and elders at the listening session to discuss the report findings described the massive influence of the media (especially the sexualized nature of music videos) and the constant use of sex as a marketing tool as significant majority-society influences encouraging Native girls and boys to view sexual exploitation as glamorous and profitable.

Socioeconomic inequality and the emphasis on money as proof of success

The advocates' stories, the Canadian literature on the relationship between poverty, homelessness, and Aboriginal women and youth entering the sex trade, and the over-representation of Native women and girls in the Wilder Research study of homelessness in Minnesota all show socioeconomic inequality to be a major factor facilitating Native women's and girls' entry into the sex trade. As we reported earlier, American Indian poverty is the highest in the nation, increasing over the past three years while Black, Hispanic, and White poverty rates declined.[269]

The advocates' discussions at the two round tables and the Canadian literature on studies of prostituted Aboriginal youth all described young Native girls' belief that the money they could earn in the sex trade would empower them, allowing them the freedom to run their own lives and make their own choices. Advocates also repeatedly described pimps' emphasis on money as a way to solve problems and realize dreams as a major incentive for Native girls to begin dancing in strip clubs and then move into prostitution.

Government priorities based on group size and influence

American Indians are a small demographic group in Minnesota, representing only 1.6 percent of the state's population.[270] Research has shown that whenever decisions must be made about the allocation of government resources, small low-income groups have limited influence over those decisions in comparison to more affluent, higher-status groups.[271]

Underfunded "safety net" systems

Our discussions with local police and advocates' stories about trying to find help from law enforcement and child protection units of local government highlight inadequate funding of these agencies as a significant barrier to identifying and protecting Native girls who have been trafficked into prostitution, and to active pursuit of pimps that traffic Native girls and women. In combination, the prevalence of homelessness among Native women and girls, Native girls' high rates of running away, and the severe shortage of housing options for Native women and girls trying to avoid or escape the sex trade reflect a woefully inadequate system for meeting the emergency shelter needs of low-income, sexually exploited Native girls and women. Not only does the absence of an effective safety net make Native girls more vulnerable to sexual exploitation, it also makes it extremely difficult for trafficked girls to successfully exit the sex trade.

Unequal gendered consequences for roles in prostitution

The attribution of responsibility for women's involvement in the sex trade is deeply rooted in the notion that prostitution is a business transaction between equals and prostituted women have chosen the sex trade as a form of employment. Popular use of the term "the oldest profession" perpetuates this idea, despite a body of research indicating that most prostituted women and girls want out of the sex trade but have no other way to shelter or support themselves.

There is significant gender bias in social and legal sanctions for women and girls engaged in selling sex, compared to those experienced by the men who buy it. Catharine MacKinnon has described a gap between the promise of civil rights and the real lives of prostituted women. She notes the ways that the prostitution law fails to protect the civil rights of women involved in prostitution while favoring the civil rights of pimps and johns, citing court decisions to make these points:

- The law does not protect prostituted women's freedom from arbitrary arrest, because it makes women into criminals for being victimized as women, and enforcement of prostitution law has traditionally involved police officers impersonating johns in order to arrest prostituting women.
- The law does not protect a prostituted woman's rights to property, since she cannot declare any parts of herself off-limits, while pimps and johns retain the right to use her body as they choose.
- The law does not protect prostituted women's right to liberty, since liberty is the ability to set limits on one's condition or to leave it.[272]

Our conversations with law enforcement personnel and advocates' stories at the round tables show that purchasers of sexual services typically receive light sentences and are frequently permitted to do community service or restorative justice rather than jail time. This unequal treatment disproportionately softens penalties for men's purchase of sexual services while it criminalizes and stigmatizes women engaged in the same transaction.

Federal definitions of "deserving" victims

The advocates' stories of Native adult women who had been trafficked into prostitution as children illustrated the impact of federal guidelines for "deserving" victims. As adults trying to exit the sex trade, many had been refused access to emergency shelters, victim services, and federally-funded housing due to their prostitution convictions. Donna Hughes, professor and Carlson Endowed Chair at the University of Rhode Island, has pointed out the overlap in definitions of sex trafficking and pimping, emphasizing that women's experiences in prostitution and sex trafficking are quite similar in regard to violence, control, exploitation, and level of victimization. Hughes notes that in multiple studies of women in prostitution, the average reported age of entry suggests that 70 percent were, by definition, victims of sex trafficking at the time they entered the sex trade.[273] Child victims of sex trafficking do not cease to be victims simply because they turned 18. Their victimization in childhood continues to impact their lives as adults.

I have a 10-year-old now, and...when we set up camp [at a powwow] he wants to be gone and run around, and all the boys are running around...and then when they go to the vendor booths, the first place they always go is the one where they have all the hats and the pimp gear and all the bling and all that. He always wants to buy that stuff. He always wants that hat with the bunny sign on it. [Native community leader discussing the report findings.]

It wasn't too long ago, I was at a venue of Native people and I was within ear's length of a group of young girls. One of the young girls said that her baby needed diapers and so she did a booty call so she could get money to get diapers for her kid...so that was prostitution in the definition of the word. But she didn't see that. That was the normalcy of it, you know, 'I need this for my child and I'm going to use what I have.' 'If you have money, you can go to the store...If you don't have money, you have to use what you have at your disposal...And that was shared with a bunch of young girls, and none of them were appalled by it. There was more of a 'Yeah, I understand that,' than 'Oh, my god, how could you do something like that?' [Native community leader discussing report findings.]

We all knew which houses were doing what in our community. And historically, because of who they were or who they were related to, or they're on the board, they were able to get away with it. Right? Everybody looked the other way on it. [Advocate]

Some of us in this room have addressed this on several occasions, but it was always hard to get the community to jump on board. I mean, it was—you know, you always had the choir. You always had the people that worked in the field that were interested in helping the victims that were in front of them at their desk, but there was not any cry from the community to deal with it on a community basis, at a community level, and so there are those pockets of safety for people that are committing these heinous crimes on a regular basis. [Community elder and leader discussing the report findings]

Influence of neighborhood and community environments

Gang activity and community normalization of violence

The discussions of advocates at the two round tables and the research literature from Canada and the U.S. all noted the considerable influence of gangs in Native communities, gangs' use of violence to coerce Native girls into prostitution, and Native girls' efforts to be as safe as they can in an unsafe environment through sexual relationships with gang members. Native girls' responses to the 2007 Minnesota Student Survey indicated significant levels of gang presence at their schools, and similar to the Canadian research we cited, showed violence to be a common feature of Native girls' school and neighborhood life in Minnesota.

A visible and active sex trade

Advocates repeatedly described young Native girls being approached on the street and offered money for sex, and in Canadian studies, Aboriginal youth reported the same experience. In the data collected by MIWRC, a significant number of Native women and girls reported knowing someone in prostitution, and many reported knowing a trafficker. The discussions at the advocates' round tables and the Canadian literature on Aboriginal youth in prostitution described frequent exposure of Native youth to a visible and active neighborhood sex trade as a key influence in normalizing survival sex and prostitution.

Social isolation and the "don't talk" rule

Research in poor neighborhoods has found that high levels of neighborhood violence and crime contribute to social isolation, where safety concerns limit the degree to which people become involved with or interact with their neighbors. The long-term success of children in these neighborhoods has been found to be strongly related to community members' willingness to support parents' efforts to keep their children safe.[274] Minneapolis and Duluth both have large urban concentrations of American Indians in low-income, high-crime neighborhoods where short-term residence in rental housing is the norm. The advocates' accounts and participants in Canadian research on prostituted youth both emphasized community norms for minding one's own business and the potentially dangerous consequences of calling the police.

The advocates' reports and the literature on abuse at boarding schools describe current Native community members' reluctance to get involved and the pervasiveness of "don't talk" rule. Both view these unhelpful social norms as responses of Native children that experienced or witnessed abuse at boarding schools. Teachers and administrators perpetrating sexual and physical abuse forced these children to accept responsibility for their own abuse. The children learned to be ashamed of their own sexuality, and also learned that telling anyone about the abuse they or others had experienced only led to increased violence and additional shame. Passed down to consecutive generations, the end result of these efforts to avoid harm to self or others is a lack of safety for sexually exploited children and an absence of accountability for perpetrators in Native communities.

A crime-based underground economy

Though community participation in an underground economy was not included in our description of factors contributing to Native girls' and women's vulnerability to entering the sex trade, some advocates did comment on Native girls' reliance on "boosters" selling stolen clothing, shoes, and accessories at very low prices. The community leaders and elders at the listening session pointed out that Native girls' and women's routine use of "boosters" increases their risk of involvement in other types of illegal activity, and viewing the sex trade as an acceptable way to get the things they want.

Limited jobs, few options for education and career planning

In the neighborhoods where American Indians are concentrated in Minneapolis and Duluth, unemployment rates are high and opportunities for legal, living-wage employment are extremely limited, as are options for a quality education. Research has found that inner-city schools consistently receive lower ratings for quality of education and student achievement than suburban schools, reflecting the broader patterns of inequality elsewhere in American society.[275] Students in these schools have been described as a "captured market," because their socioeconomic status makes them completely dependent upon the public school system.[276] The high American Indian school dropout rates suggest that unrewarding school experiences contribute to a belief that educational attainment and career planning are neither useful nor realistic life goals.

Influence of families and friends

Poverty

The advocates' discussions at the round tables, the research literature from Canadian studies of prostituted Aboriginal women and youth, and the comments from community leaders and elders all emphasized the importance of family poverty in two types of vulnerability among Native women and girls:

- Vulnerability to homelessness
- Vulnerability to landlord pimps that threaten rent increases and/or eviction.

Physical and sexual victimization

Canadian studies' findings that childhood physical and sexual abuse are common among prostituted Native women and girls and runaway Native youth, Minnesota Student Survey findings on Native girls' reports of physical and sexual abuse at home and having run away from home, and state and local data on American Indian child maltreatment show that many Native girls are at very high risk of being trafficked into the sex trade because of prior victimization. The Wilder Research study of homelessness also found that Native women and girls frequently reported physical or sexual violence at home as the reason for their current homelessness. Other studies' findings of high rates of partner violence among low-income Native women suggest that many Native women and girls are forced to leave home to avoid violent victimization, resulting in homelessness that further increases their vulnerability to sex trafficking.

Prostitution and survival sex

At both round tables, advocates described Native girls whose families were involved in generational prostitution and girls' friends already involved in stripping and/or prostitution. The Canadian studies of Aboriginal youth involvement in prostitution reported similar findings. The data collected from clients entering MIWRC programs confirmed that many have friends in prostitution, and also showed that clients reporting involvement in prostitution were most often recruited by a friend.

Substance abuse

At round tables, advocates reported Native mothers trafficking their daughters into prostitution to feed an addiction, and the Canadian studies of prostituted youth that we cited also identified parental substance abuse as a facilitating factor for Native youth running away from home and entering the sex trade. In the 2007 Minnesota Student Survey, the propor-

We need to also remember that this sub rosa economy is working all the time. The sale of illegal goods, all of that happens in our community, and the inability of young women to understand what they're doing in exchanging a sexual favor for money to buy diapers is part of that. [Community elder and leader discussing report findings]

What I'm saying is it is so commonplace because boosters are so prevalent. I mean, in other advocacy and other outreach, I was in people's homes and we were talking about healthy housing and education and their booster shows up and is trying to sell me clothes that they just got from the plus size clothing store, and he had an entire trunk of all this beautiful stuff. [Advocate]

tion of American Indian girls reporting problematic drug and alcohol use by a family member was much higher than that of girls in the general population, and the responses of homeless American Indian women and girls in the Wilder Research study of homelessness indicate that family substance abuse often forces Native women and girls to leave home without any other place to stay. The advocates and studies with prostituted Aboriginal youth in Canada both identified Fetal Alcohol Syndrome Disorder (FASD) as an indirect affect of mothers' substance abuse on Native girls' vulnerability to sexual exploitation.

Parents affected by generational trauma, FASD, and/or mental illness

At the advocates' round tables and in findings from Canadian studies with prostituted Native women and youth, unresolved generational trauma was identified as a root cause of the community violence, domestic violence, child abuse, and substance abuse that pervades Native communities in the U.S. and Canada. Advocates also reported knowing FASD-affected Native mothers trafficking their children, and the research we cited confirms that a FASD-affected, mentally ill or cognitively-impaired parent can increase their children's vulnerability to sexual exploitation.

The cumulative effect on Native girls

Lack of workforce preparation, sex trade viewed as a glamorous career option

Native girls' responses to the 2007 Minnesota Student Survey show high levels of disengagement from school and truancy, and data on American Indian school dropout shows that many leave school without the education level necessary to succeed at most living-wage jobs. The absence of employment opportunities in their neighborhoods and the lack of social networks for securing first jobs leave many Native girls with no employment history or job skills. The glamorization of sexual exploitation in the popular media, a highly visible sex trade, and girls' awareness that sex can be a resource for meeting basic needs combine to normalize the sex trade, encouraging Native girls to view it as a reasonable way to obtain money.

Absence of safety and emotional vulnerability

Native girls' reports of physical and sexual violence at home, gang presence and threat of violence in their schools, and physical and sexual violence by dates in the 2007 Minnesota Student Survey shows an alarming lack of safety in their lives. Advocates' stories at the round tables and Canadian research with runaway and prostituted Native youth also described the tremendous emotional vulnerability of Native girls in this type of home and community environment, especially to pimps and recruiters that promise to take care of and protect them. The reluctance of community members to intervene and community antagonism to anyone who calls the police makes Native girls even more vulnerable to guerrilla recruitment into prostitution. The very limited options for emergency shelter and crisis services leave the vast majority without alternatives that could offer protection or support.

Native girls' own trauma responses

Native girls' responses to the 2007 Minnesota Student Survey show that many use alcohol before the age of 12, show signs of alcohol dependency before leaving high school, and participate in violence against others. Research showing the prevalence of sexual assault and the link between sexual assault trauma and substance abuse among American Indian women confirms that these traumas make a significant number of Native girls and women vulnerable to prostitution recruitment by a pimp promising them safety. Advocates' reports of prostituted Native women's reluctance to trust and their dependency on pimps indicate that these trauma responses frequently expose them to new violence and new trauma.

Last Words

At the July 22, 2009 listening session to discuss the report findings, all of the Native community leaders and elders in attendance confirmed the seriousness of the problem and inspired us with their commitment to working together on a community response to end the commercial sexual exploitation of Native women and children.

Based on the information presented in this report, we conclude that commercial sexual exploitation of Native girls and women is neither harmless nor victimless. The widespread notion that prostitution is a voluntary career choice made by a fully informed adult has no basis in reality for the vast majority of prostituted Native women and girls. We find it unreasonable and cruel to assume that any Native person in prostitution has made an informed choice to endure extreme violence and subjugation at the hands of pimps and purchasers of sexual services, or to voluntarily decided to accept this maltreatment as an acceptable occupational hazard.

We found that most prostituted Native women and girls are trafficked into the sex trade as children but were never identified or protected as trafficking victims. Unable to find the support to leave prostitution, at the point that these victims reach the age of 18, they are immediately considered criminals and are often refused access to shelters and other services for trafficking, sexual assault, domestic violence, and stalking victims.

While stripping and pornography are often framed as relatively harmless aspects of the sex trade, we have identified these as gateways to prostitution for a significant number of Native women and girls. While some enter the sex trade to pursue the illusion of a glamorous and lucrative career, continued involvement in prostitution is almost always due to an absence of other options.

Because our focus for this report was the commercial sexual exploitation of Native women and girls, we did not address the prostitution of Native boys or Two-Spirit (gay, lesbian, and bisexual) youth. However, a number of Canadian studies reported that though girls made up 75-80 percent of Aboriginal youth in the sex trade, the remaining 20-25 percent were boys, Two-Spirit, and transsexual individuals.[277,278,279,280] In a 2008 Canadian study of street youth, 23 percent of Aboriginal boys and 54 percent of Aboriginal girls described themselves as not entirely heterosexual, bisexual, or gay/lesbian. These youth were much more likely than heterosexual-identifying youth to report having been kicked out of their homes or having run away, which makes them even more vulnerable to commercial sexual exploitation.[281]

Next Steps

The community leaders and elders that attended the listening session agreed on three main points regarding next steps toward addressing the commercial sexual exploitation of Native people:

- Any approach to addressing the problem must prioritize the healing and empowerment of Native communities, and ensure that they are not re-victimized as a result of the information brought forth in this report.

Feedback from Native community leaders

I'm really happy that this report came out. I'm really happy that finally we can sit in a group like this and talk about it, because we can't hide it any more. We can't tell our girls it's okay, because it's not okay...I really want to continue to be a part of this dialogue because I think it's long overdue.

The report shines a light on this—it's a stake in the ground. It says 'Look at this.' This is something that needs attention, and we're not going to solve this now or in the next little while, but if we don't start, we'll never solve it.

One of our spiritual leaders said to us some years ago, those of us who are older, who have been victimized by racism in this country and also those of us who are women who have victimized in whatever ways simply because we are women—what he said to us was, 'That pain is yours. That is your pain, and you need to deal with it, but don't pass it on to your children. They will experience their own difficulties and they will have to deal with that, but do not talk to them about what you have dealt with. I think [that] until we do deal with our own pain, it's impossible not to pass it on.

- To ensure community engagement and an emphasis on healing and empowerment, the next stage of strategic planning must be led by a committed and knowledgeable group of Native people.
- This is not solely a women's issue—it is a community issue that also involves Native boys and Two-Spirit youth and adults.

Recommendations for Action

The recommendations we provide here came from:

- Advocates attending the two regional round tables
- American Indian community leaders and elders that attended the listening session
- Prostituted Aboriginal women and youth and Aboriginal community members participating in Canadian studies of commercial sexual exploitation
- Patterns of risk identified in data and literature gathered for this report

Increase Awareness of the Problem

Provide education to a cross section of leadership on:

- The impact of poverty and other risk factors on Native youth's disproportionate involvement in the sex trade
- The extreme violence and trauma experienced by Native women and youth in prostitution
- Traffickers' recruitment strategies and the significance of strip clubs, pornography, online and phone sex, and escort services as gateways to prostitution for Native youth

Reframe the conversation and change the language

- Increase awareness that prostitution is not a life style choice, is not a victimless crime, and that the vast majority of prostituted people were trafficked into the sex trade as children--clearly identify prostitution as a form of sexual violence
- Highlight the proven relationship between men's belief that sex is a commodity that they have the right to purchase and the likelihood that they will commit violence against a woman
- Eliminate terms that place the onus of responsibility on the exploited person; rather than "prostitute," promote use of "person in prostitution" or "prostituted person"

Hold Sexual Exploiters Accountable

- Prosecute all cases of juvenile sex trafficking to the fullest extent of the law
- Reduce demand by increasing penalties for the purchase of sexual services (particularly sex with minors), and prohibit plea bargain agreements that allow purchasers to reduce their penalties through community service and/or restorative justice
- Support efforts by American Indian communities to hold families involved in multi-generational trafficking of their children accountable
- Identify, arrest, and prosecute anyone attempting to recruit vulnerable Native adults and youth for prostitution at homeless shelters, battered women's shelters, and other places providing emergency services
- Address gangs' use of violence to force Native youth into prostitution

Begin Outreach

- Recruit Native survivors of prostitution for employment as outreach workers and community educators
- Use harm reduction strategies, including providing condoms/promoting consistent condom use and partnering street nurses with outreach workers to provide Hepatitis B vaccinations
- Distribute information about domestic sex trafficking, sexual assault programs and related programs and services through community agencies, hospital emergency rooms, health clinics, and food shelves so that sexually exploited Native women and youth are more aware of places they can find help
- Establish protocols to identify and interrupt recruitment at outreach and drop-in programs, and ensure that programs are safe

Improve access to emergency shelter and transitional housing

All of the information we gathered on the types of housing prostituted Native women and girls need to successfully exit the sex trade emphasized three key points that should inform any plan to improve emergency shelter and housing options:

- The sex trade reinforces dependency on a pimp, so victims of commercial sexual exploitation often take a very long time to make the final decision to complete separate themselves
- These victims have known nothing but exploitation most of their lives, so are very reluctant to trust any program or organization that applies limits or makes demands
- The most useful and effective services have the fewest requirements, and focus on "meeting victims where they are"

For these reasons, these are the aspects of emergency shelter and transitional housing needed to provide effective support to prostituted Native women and youth to avoid or leave the sex trade:

- 24-hour, 7 days a week "safe houses" statewide, where sexually exploited Native women and youth can access emergency shelter, showers, clothing, food, referrals for health care, and other basic needs
- Transitional and supportive housing facilities with culturally competent staff statewide, specifically designed for prostituted Native women and youth
- Shelters, transitional housing and outreach services should link prostituted and at-risk Native girls and women to an array of holistic services to meet basic needs, receive health care, and work toward access to permanent safe housing
- Funding for transitional housing that is long-term and covers operating expenses—length of stay must be adequate to ensure that prostituted Native girls and women have enough time to build the skills and stability they need to secure gainful employment

To provide the greatest access, existing emergency and transitional housing facilities should:

- To the extent possible, revise public housing policies blocking access to anyone with a felony conviction, to allow access for victims of sex trafficking whose convictions were due to having been trafficked
- Work with child protection systems in the best interest of the families
- Give prostituted people attempting to exit the sex trade the same priority as people with a mental health diagnosis, rather than requiring them to get a mental health diagnosis for priority access

Increase Options for Self-sufficiency to Reduce Vulnerability

Poverty is one of the major factors in vulnerability to commercial sexual exploitation. The following are recommendations for services and programs that can help Native women and youth stay in school and/or gain the skills and resources they need to become self-sufficient

- Provide opportunities to finish high school that include mentoring, flexible hours, and access to high quality childcare so that those with children can participate
- Tailor employment services, academic, and career counseling to match prostituted Native women's and youth skills and interests, and accommodate learning styles
- Build relationships with employers willing to provide internship and apprenticeship programs where prostituted Native women and youth can develop skills and build confidence in their abilities

Promote Healing

- Hold community forums and workshops in American Indian communities to raise awareness of sex trafficking, the vulnerability of Native women, youth, and Two-Spirit people, and available resources for trafficking victims and their families
- Build community support for believing Native people that report sexual abuse and sexual exploitation, valuing and protecting them rather than stereotyping and isolating them
- Engage Native communities in recognizing and addressing the role of silence and denial in generational abuse and sexual exploitation, and in working as a community to hold all traffickers of Native people accountable
- Engage Native communities in holding producers and sellers of media and products that sexualize Native women and children accountable
- Encourage culturally based agencies to incorporate programming to meet the unique needs of sexually exploited women and youth, and provide opportunities for collaboration and networking to streamline services
- Create healing centers where victims and families can re-engage in traditional healing and build stronger cultural identities
- Provide culturally based healing that holistically addresses chemical dependency, mental illness and sexual trauma

Improve Systems and Increase Collaboration Between Systems

Engage child protection, law enforcement, schools, and Native community-based housing and social service agencies in collaborative efforts.

- Standardize intake procedures that can accurately identify victims of sex trafficking and provide them with immediate access to appropriate resources
- Develop training protocols in partnership with other stakeholders to raise awareness and install effective response mechanisms
- Support coordinated efforts by local law enforcement, Tribal law enforcement, the FBI, and the Coast Guard and other agencies to identify, investigate, and prosecute sex traffickers
- Investigate possible sex trafficking when youth report sexual abuse in the home, and ensure that a trained child protection worker works closely with police and Native programs to meet the unique needs of prostituted Native children
- Target gangs in schools, housing complexes, and neighborhoods by developing zero tolerance strategies to prevent and interrupt criminal activities with youth
- Develop coordinated responses to truant and runaway Native youth that divert them from the juvenile justice system to Native programs that serve sexually exploited Native youth

When the court case has begun against a Native sex trafficking victim's trafficker:

- Provide victims with a specific advocate who has the skills and knowledge to deal with her/him respectfully and for the length of time necessary
- Provide Pro Bono legal services to the victim and a safe space where she/he and the attorney can meet
- Do not require victims to be in the same room as the accused trafficker
- Develop alternatives to corrections placement in foster care and group homes for prostituted Native youth so they are not isolated from their culture and community
- Improve protections for victims who have outstanding warrants for their arrest, if those arrests are related to being trafficked, and consider that probation violations may be related to being trafficked

Provide Extensive Training to all Professionals that Come into Contact with Prostituted Native Women and Youth

In addition to basic training on the dynamics and impacts of the sex trade, various professionals should receive more in-depth training. These are some of the main topics we suggest:

For police officers, prosecutors, courts, and guardians ad litem:

- The importance of screening runaway and truant Native youth for involvement in the sex trade, and making social services arrangements on site rather than releasing them back to the community
- Establishing guidelines for recognizing when a prostituted Native person may be affected by FASD and or PTSD
- Networking with referral agencies for culturally-appropriate intervention and support services

For medical and emergency room personnel:

- The importance of treating prostituted victims of sexual or physical assault as assault victims, even when their injuries were perpetrated by a purchaser of sexual services or a pimp
- Information about trafficking laws, how to contact law enforcement, and how to keep a trafficking victim safe until the police arrive

For teachers and school administrators, 5th through 12th grade:

- Sex trade culture and terminology, common recruitment strategies, trafficker profiles, and indicators that a student is being trafficked
- Information about trafficking laws, how to contact law enforcement, and how to keep a trafficking victim safe until the police arrive
- Referral agencies for culturally-appropriate intervention and support services.

For workers in child protection, child welfare, and family social services:

- Sex trade culture and terminology, and the importance of early intervention
- Culturally-specific screening tools for sex trafficking and other forms of commercial sexual exploitation
- Follow-up strategies for protecting and monitoring sexually exploited Native adolescents and teens to provide a safety net for those that continue living with their families, including providing information on suitable referral services

For mental health professionals:

- The guilt and shame experienced by prostituted and trafficked Native adults and youth, and the need to respond immediately and skillfully
- The importance of a nonjudgmental approach that does not include a timeline for progress.
- The importance of a careful diagnosis that takes potential FASD and PTSD into account as possible aggravating factors
- Prostituted Native women's frequent experiences with unnecessary or inappropriate medications

Project Limitations and Future Research

Methodologically, our decision to convene round table discussions with advocates working with American Indian women and girls in crisis situations and use the information gathered there as a framework turned out to be a very useful approach. Our assumption that these advocates were likely to come into contact with trafficked and prostituted Native women and girls was correct. In the absence of any prior source of systematically collected data on Native women and girls in prostitution or other areas of the sex trade in either Minnesota or the U.S., triangulating advocates' experiences and observations with findings from published research, local data, and MIWRC client screening data allowed us to develop a basic understanding of a little-understood and complex problem within relatively short period of time.

Though it was useful as a starting point, the data collected by MIWRC via client screening and the two advocates' round table discussions represented a very small number of participants in very limited geographic areas. MIWRC is currently revising and expanding its screening tool and process to improve our ability to identify trafficking victims and provide them with appropriate services and supports. We expect to implement the new tool and process in October 2009.

There is an urgent need for a regional study involving a systematic and coordinated data collection process, to develop findings that can be generalized to the larger population. At both round tables and at the listening session with Native community leaders and elders in Minneapolis, Native participants emphasized the great need for more in-depth information to build upon what was found in producing this report, but they also voiced a serious concern that research could not take priority over adequate funding for direct services to prostituted Native people. With that qualifier in place, regarding future research, we recommend that:

- Funding for coordinated and appropriate support services to victims of commercial sexual exploitation is the community's highest priority—additional research will require a separate funding pool
- Any future research should involve identification, experiences, and needs of all American Indian victims, regardless of gender or sexual orientation
- Data collection should involve multiple agencies and programs providing culturally-specific crisis services to Native people for emergency shelter and housing, domestic violence, sexual assault, substance abuse, crisis intervention, and the needs of at-risk youth
- Because this exploratory study found indications of trafficking between cities in Minnesota, Wisconsin, North Dakota, and South Dakota, we recommend a regional study that includes two large urban Indian communities in each of the four states: Minneapolis, Duluth, Grand Forks, Fargo, Sioux Falls, Rapid City, Milwaukee, and Green Bay

222. According to the Minnesota Department of Education, the NGA rate is a four-year, on-time graduation rate agreed to by all 50 states. In addition to grads and drops, it considers continuing and unknown students; these two additional groups add approximately 16,000 students statewide into the measure. For the Class of 2007, the cohort of students was determined by counting first time ninth graders in 2004 plus transfers into the group minus transfers out over the next four years. The NGA rate only considers students who graduate in four years. http://education.state.mn.us/mde/Data

SENATOR BILL WIELECHOWSKI

March 23, 2011

Senator Hollis French
Senate Judiciary Committee
State Capitol
Juneau, Alaska 99801

Dear Senator French:

I am writing to request that you schedule a hearing on Senate Bill 110, "An Act relating to human trafficking; and relating to sentencing and conditions of probation in criminal cases involving sex offenses" at your earliest convenience.

This legislation will strengthen current state human trafficking laws. Sexual exploitation is a serious problem in the state. Traffickers prey on vulnerable Alaskans, a large number of whom are underage females. Native Alaskans are also disproportionately targeted. Current state law only recognizes the crime of "trafficking" when victims are transported across state lines. SB 110 would close that loophole, allowing law enforcement to prosecute traffickers who prey on victims within state borders.

SB 110 would also allow judicial discretion in imposing conditions of probation to include requiring defendants to refrain from residing within 500 feet of school grounds in specific cases.

Thank you for your consideration of this request. Any questions you or your staff may have should be directed to me or my staff Christy Harvey at 465-6259.

Sincerely,

Senator Bill Wielechowski

MEMORANDUM

March 19, 2012

SUBJECT: Prostitution Offenses in CSSB 218 (JUD)
(Work Order No. 27-GS2627\M)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee
Attn: Cindy Smith

FROM: Doug Gardner
Director

There are two issues I want to call to your attention regarding the draft of CSSB 218(JUD).

1. Section 18. Section 18 of the bill expands AS 11.66.140, which provides that corroboration of certain testimony is not required, to the offense of promoting prostitution in the fourth degree under AS 11.66.135. It is unclear how eliminating the need for corroboration "of the person whose prostitution is alleged to have been compelled or promoted" in the context of AS 11.66.135 would actually work. AS 11.66.135(a) provides that a person commits the crime of promoting prostitution in the fourth degree if:

> (a) A person commits the crime of promoting prostitution in the fourth degree if the person engages in conduct that institutes, aids, or facilitates prostitution under circumstances not proscribed under AS 11.66.130(a)(4)[1].

In a prosecution under AS 11.66.135, the evidence and witnesses would likely be those with personal knowledge, or investigating officers and records, relating to facilitating a prostitution enterprise. Since AS 11.66.135 does not relate to a person whose prostitution has been compelled or promoted, it is hard to envision how AS 11.66.140 would apply to testimony regarding a prostitution enterprise. Does the committee want to extend the application of AS 11.66.140 to AS 11.66.135, where it does not appear it would be necessary or applicable?

---

[1] AS 11.66.130(a)(4) provides: (4) engages in conduct that institutes, aids, or facilitates a prostitution enterprise.

2. Section 19. Section 19 of this bill expands the prostitution offenses that would allow the prosecution to file for forfeiture of property used to institute, aid, or facilitate the offenses. Does the committee want to allow forfeiture of property in a misdemeanor prostitution case brought under AS 11.66.100? I note that CSSB 218(JUD), version M, eliminates section 5 of the prior SB 218, version A, where prostitution was increased to a C felony under certain circumstances. Should this section stay in the bill in light of the fact that the felony prostitution provision in SB 218, version A, is not present in the bill?

MEMORANDUM March 15, 2012

SUBJECT: SB 110 and SB 218, Human Trafficking and Sex Trafficking (CSSB 110(JUD); Work Order No. 27-LS0646\E)

TO: Senator Hollis French
Chair of the Senate Judiciary Committee
Attn: Cindy Smith

FROM: Doug Gardner
Director

There are three issues that I wanted to call to your attention regarding SB 110 and SB 218.

1. As we briefly discussed on the telephone, while I was incorporating most of SB 218 into SB 110, as you requested, I noticed several instances where sex trafficking was treated differently than human trafficking, and so I took the step we discussed of treating both offenses, in the first degrees, similarly throughout the bill. Here are the places, by statute citation, where I added human trafficking to include it with sex trafficking so that both offenses are treated similarly:

- AS 04.06.110, Peace Officer Powers;
- AS 04.11.370(a)(7), Revocation of License for Licensed Premises;
- AS 12.55.035(b)(1), Fines;
- AS 15.80.010(9), Crimes of Moral Turpitude (all human trafficking convictions regardless of degree);
- AS 28.15.046(c)(10), Restriction on DMV Issuing Licenses;
- AS 47.12.110(d)(1)(B)(viii), Juvenile Delinquency Hearings Open to Public; and
- AS 47.12.315(a)(1)(H), Public Release of Certain Information.

Please review these changes to make sure that they conform to the intent of the committee.

In addition, should the new C felony prostitution offense in AS 11.66.100(c) be added to the definition of sex offense in AS 12.63.100(6)? I note that SB 110 added the new offense of human trafficking in the first degree to the definition of sex offense in AS 12.63.100(6).

2. With regard to online enticement in the first degree in section 19 of the bill, the way the bill is currently drafted, online enticement that is B felony conduct and online enticement that is A felony conduct would both be serious felonies. It would appear that the intention of the committee is for the A felony offense of online enticement provided for in AS 11.41.452(e) to be a serious felony, but not online enticement that is a B felony (online enticement is an A felony when the offender is a registered sex offender). Given that in other situations, such as sexual assault in the second degree, which is a B felony, the legislature has not included a class B felony as a serious felony, I would assume that citation to AS 11.41.452(e) should be included to clarify this situation.

3. The final matter I wanted to call to your attention is the issue of not providing a defense of mistake of age for the crime of prostitution for the defendant, in cases where the victim is under 18 years of age, and the defendant is 18 years of age or older and at least 3 years older[1] than the victim.[2] I note that in the offense of promoting prostitution, provided for in AS 11.66.110, the legislature eliminated the mistake of age defense set forth in AS 11.41.445. Eliminating the defense of mistake of age in the offense of promoting prostitution in the first degree was found constitutional by the Alaska Court of Appeals in *Bell v. State of Alaska*, 668 P.2d 829 (Alaska App. 1983), where the court distinguished the offense of promoting prostitution in the first degree from the holding by the court in *State v. Guest*, 583 P.2d 836 (Alaska 1978), that offenses involving "statutory

---

[1] I also note that the sexual abuse of a minor statutes all contain a four year age separation between the offender and the other person, with the exception of sexual abuse of a minor in the fourth degree, which contains a three year age separation. Was it a conscious choice to use a three year age difference, or should it have been four years as provided in AS 11.41.434(SAM I) - AS 11.41.438(SAM III)?

[2] In a similar situation a defense of mistake of age is provided for the crimes of sexual abuse of a minor under AS 11.41.434 - 11.41.440. *State v. Guest*, 583 P.2d 836 (Alaska 1978), regarding the necessity of this defense in the statutory rape context. AS 11.41.445 provides:

> (a) In a prosecution under AS 11.41.434 - 11.41.440 it is an affirmative defense that, at the time of the alleged offense, the victim was the legal spouse of the defendant unless the offense was committed without the consent of the victim.
>
> (b) In a prosecution under AS 11.41.410 - 11.41.440, whenever a provision of law defining an offense depends upon a victim's being under a certain age, it is an affirmative defense that, at the time of the alleged offense, the defendant
>
> (1) reasonably believed the victim to be that age or older; and
>
> (2) undertook reasonable measures to verify that the victim was that age or older.

rape" or sexual abuse of a minor must allow the defendant to present the defense of mistake of age in order to pass constitutional muster. I am including much of the court's discussion from *Bell* relevant to this issue for your convenience:

> We also note that AS 11.66.110(b) is in accord with the common law view that there should be no exculpation for mistake where, if the facts had been as the actor believed them to be, his conduct would still be illegal or immoral. As Bell recognizes on appeal, his conduct would still have been illegal even if D.W. had been sixteen or over. AS 11.66.130(a)(2). Moreover, although it might be arguable that the offense of prostitution should be considered a *malum prohibitum* crime, we think it manifest that *promoting* prostitution is an offense "which reasoning members of society regard as condemnable," and thus, is *malum in se*. *Hentzner v. State*, 613 P.2d at 826. Accordingly, there can be little doubt that Hentzner's basic requirement of an awareness or consciousness of wrongdoing is satisfied, despite the fact that AS 11.66.110(b) precludes mistake of age as a defense to the offense of promoting prostitution in the first degree.
>
> In continuing to press his claim that AS 11.66.110(b) imposes an unconstitutional standard, Bell relies upon *State v. Guest*, 583 P.2d 836 (Alaska 1978), in which the supreme court upheld a trial court's decision to instruct the jury on a defense of reasonable mistake of age in a statutory rape case. Following the reasoning of *Speidel* and *Alex,* the court stated that an intent requirement must be read into former AS 11.15.120 to save it from unconstitutionality. To refuse a defense of mistake of age in a statutory rape case, according to the *Guest* court, would be to impose significant criminal liability without any criminal mental element. *Id.* at 839.
>
> Bell relies most heavily upon the following language in *Guest:*
>
> > **It has been urged in other jurisdictions that where an offender is aware he is committing an act of fornication he therefore has sufficient criminal intent to justify a conviction for statutory rape because what was done would have been unlawful under the facts as he thought them to be. We reject this view. While it is true that under such circumstances a mistake of fact does not serve as a complete defense, we believe that it should serve to reduce the offense to that which the offender would have been guilty of had he not been mistaken. Thus, if an accused had a reasonable belief that the person with whom he had sexual intercourse was sixteen years of age or older, he may not be convicted of statutory rape. If, however, he did not have a reasonable belief that the victim was eighteen years of**

> **age or older, he may still be criminally liable for contribution to the delinquency of a minor.** [Emphasis added.]

Id. (citations and footnotes omitted). The court cited in support of its position section 2.04(2) of the Model Penal Code (Proposed Official Draft 1962), which provides:

> Although ignorance or mistake would otherwise afford a defense to the offense charged, the defense is not available if the defendant would be guilty of another offense had the situation been as he supposed. In such case, however, the ignorance or mistake of the defendant shall reduce the grade and degree of the offense of which he may be convicted to those of the offense of which he would be guilty had the situation been as he supposed.

We believe the problem addressed in *Guest* is distinguishable from the issue at hand. As we have stated, Bell did not lack criminal intent; he intended to promote prostitution. See *Hentzner v. State*, 613 P.2d at 826; *Wheeler v. State*, 659 P.2d at 1251. The court in Guest was careful to point out that fornication was not itself a crime, so that it could not have been considered as a lesser-included offense of statutory rape. Also, although the court went on to observe that Guest *might* still have been guilty of contributing to the delinquency of a minor under former AS 11.40.130 if he did not have a reasonable belief that his partner was under eighteen, it is clear that Bell was *necessarily* guilty of promoting prostitution in the third degree if the facts were as he supposed them to be.

This distinction is supported by analysis of other authorities. The revised criminal code contains no provision paralleling the second sentence of MPC § 2.04(2), quoted by the *Guest* court. Instead, AS 11.81.600(b)(2) provides:

> (b) A person is not guilty of an offense unless he acts with a culpable mental state with respect to each element of the offense, except that no culpable mental state must be proved
>
> (2) *if an intent to dispense with the culpable mental state requirement for that element clearly appears.*

(Emphasis added.) AS 11.66.110(b), by proscribing any defense to AS 11.66.110(a)(2) based upon mistake of age, clearly demonstrates a legislative intent to dispense with knowledge of age.

More importantly, despite the language of MPC § 204(2), the Model Penal Code takes essentially the same approach as the Revised Code to in its treatment of criminal intent for the offense of promoting prostitution. MPC § 251.2(2) (1980) makes the conduct proscribed by AS 11.66.130(a)(2) -- promoting prostitution in the third degree -- a misdemeanor, while § 251.2(3)(c) provides that the same conduct shall be a felony if "the actor promotes prostitution of a child under 16, *whether or not he is aware of the child's age.*" Similarly, New York Penal Law § 230.30 (1978), from which AS 11.66.110 appears to be derived, provides that it shall be a felony to "knowingly" advance or profit from the prostitution of a person less than sixteen years old, while New York Penal Law § 15.20(3) (1967) provides that

> Notwithstanding the use of the term "knowingly" in any provision of this chapter defining an offense in which the age of a child is an element thereof, knowledge by the defendant of the age of such child is not an element of any such offense and it is not, unless expressly so provided, a defense to a prosecution therefor that the defendant did not know the age of the child or believed such age to be the same as or greater than that specified in the statute.

We find it highly persuasive that these statutory schemes are, when applied to the precise conduct engaged in by Bell, in consonance with the approach taken in the Revised Code.

Under the Revised Alaska Criminal Code, it is Bell's intentional procurement of a person under the age of sixteen years for prostitution that renders him liable for first-degree promoting, regardless of his actual awareness of that person's age. **The act of procuring another for purposes of prostitution is *malum in se*, without regard to the age of the person procured, and thus, as we have indicated, in a prosecution for procuring a person under the age of sixteen years, the intent to procure satisfies the minimal constitutional requirement of criminal intent. *Hentzner v. State*, 613 P.2d at 826. We hold that AS 11.66.110(b), which expressly dispenses with mistake of age as a defense to promoting prostitution in the first degree, does not violate due process of law.** We therefore conclude that the trial court did not err in rejecting Bell's challenge to the instruction on mistake of age. [Emphasis added.]

Bell, *supra*, at 833 - 835. The caution that should be observed in removing the defense of mistake of age for moving the offense of prostitution from a B misdemeanor to a

C felony where the defendant is 18 years of age or older and at least three years older than the victim is as follows:

- In *Bell*, as quoted and emphasized above, the court relied on the fact that the defendant was being prosecuted for a *malum in se* offense, where the underlying offense of promoting prostitution was completed whether the offender was aware of the other person's age or not. Under these circumstances, the *Bell* court found that eliminating a mistake of age defense passed constitutional muster. The concern is that the decision in *Bell* may not apply to prostitution as provided in AS 11.66.100, given the *malum prohibitum* status of prostitution. Put differently, since the court in *Bell* placed significant emphasis on the *malum in se* nature of the offense of promoting prostitution, in contrast to the *malum prohibitum* offense of prostitution, a court may be less willing to approve of a statute imposing significant increased criminal liability -- from a B misdemeanor to a C felony -- where the offender is unable to present a mistake of age defense.

- A reviewing court might consider the amendment in AS 11.66.100 so similar to the offenses of sexual abuse of a minor, in other words adding a SAM component to prostitution that from the standpoint of substantive due process, if a SAM defendant may present a mistake of age defense, then a defendant charged with prostitution with an age component should be allowed to as well.

- I would observe that a proponent of the amendments to AS 11.66.100 in section 10 of the bill might argue that, like the facts in *Bell*, a defendant charged with prostitution as a C felony would necessarily be guilty of what is likely the lesser included offense of prostitution as a B misdemeanor without regard to the age of the other person, and therefore, as the court reasoned in *Bell*, the defendant was necessarily guilty of the lesser offense if the facts were as the defendant supposed them to be. However, the ruling in *Bell* was shaped in large part by the idea that even the lesser included offense of promoting prostitution in the third degree, which was a misdemeanor in 1980, was still a *malum in se* offense, where the offense of prostitution is not. A court would likely give significant weight to the different offenses involved, and might distinguish the facts of *Bell*, and conclude that, like the situation in *Guest*, a defendant guilty of a lesser included offense, but one that is *malum prohibitum*, should be allowed to present a defense of mistake of age.

Hi Cindy,

Just wanted to follow up with you that I will be working on the sex trafficking bill the remaining part of this week and next to get ready for a hearing when you are ready for us. Sen. W is interested in a Friday hearing next week if you are still working on a schedule. If you have a full schedule then we will go with the next available opening for a hearing in JUD. Thanks much!

Dear Senator Wielechowski:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing Senate Bill 110, an act relating to human trafficking; and relating to sentencing and conditions of probation in criminal cases involving sex offenses.

The APOA State Board of Directors recently reviewed this proposed legislation and decided to unanimously support this bill.

We thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515, if there is anything our organization can do to assist in the passage of this bill.

Sincerely,

John Lucking, Jr.

Re: Senate Bill, 110 Human Trafficking/Sex Offenses

I write on behalf of the Violent Crimes Compensation Board in support of Senate Bill 110.

The proposed legislation strengthens existing state legislation by extending the definition of trafficking to include the movement or enticement of young women within the state of Alaska, not just across state lines.

As Board members, we have seen the terrible results of human trafficking on the lives of young women and their families. Very often these victims are young vulnerable native women who have left their villages and come to Anchorage, only to find themselves homeless and alone. These women are specifically targeted by these predators, given enticements in the form of clothing, housing and jewellery, and are then abused, beaten, sexually assaulted, deliberately addicted to controlled substances and alcohol and then prostituted out to make money for their abusers.

Over the course of the last few years, the Board has seen 23 claims stemming from federal human trafficking investigations, and has paid out over $150,000 in compensation or assistance to trafficking victims. This compensation has been in the form of payment for mental health counseling, and for drug and alcohol treatment programs, as well as for medical expenses, and assistance in relocation to a safer environment. None of these 23 claims were for victims trafficked *to* Alaska. All were already Alaskan residents.

This proposed legislation closes the gap, and the Board strongly supports its passage

Respectfully submitted

Gerad Godfrey
Chair, Violent Crimes Compensation Board

Re: Bill No.: SB 110

Dear Chairman French:

The purpose of this letter is to follow up on the February 17, 2012 Senate Judiciary Committee hearing at which the Human Trafficking/Sex Offenses, SB 110, was discussed and tabled, and to offer recommendations based on both the hearing and my recent discussion with Katherine Tepas of the Governor's office following Governor Parnell's transmittal of HB 359 and its companion bill, SB 218.

I was able to listen to the testimony provided at the hearing on SB 110 by way of conference call, but unfortunately, was disconnected before I was able to provide testimony of my own. Based on the testimony, it seems that there is some concern over whether the bill is necessary given the state's code sections prohibiting the promotion of prostitution.

While the promotion of prostitution provisions do require fewer elements, human trafficking encompasses more than just sex trafficking. As such, amendments to the human trafficking statute would bring Alaska's laws more in line with the federal definition of human trafficking, and would provide greater protection against labor trafficking.

Under U.S. federal law, "severe forms of trafficking in persons" includes both sex trafficking and labor trafficking, which are defined as follows:

- Sex trafficking is the recruitment, harboring, transportation, provision, or obtaining of a person for the purposes of a commercial sex act, in which the commercial sex act is induced by force, fraud, or coercion, OR in which the person induced to perform such an act has not attained 18 years of age, (22 USC § 7102; 8 CFR § 214.11(a)).

- Labor trafficking is the recruitment, harboring, transportation, provision, or obtaining of a person for labor or services, through the use of force, fraud, or coercion for the purposes of subjection to involuntary servitude, peonage, debt bondage, or slavery, (22 USC § 7102).

Acknowledging that Alaska's promotion of prostitution laws are beneficial in that they contain no requirement that the victim be induced to move in or about the state; but that amendments to the state's human trafficking laws are necessary in order to protect native Alaskans from labor trafficking, I have attached proposed language amending SB 110 which I hope will provide the best of both worlds.

As you can see, the proposed amendments preserve most of the language of the existing human trafficking statute, but redefine the existing provisions as 'sex trafficking' while adding a new provision entitled 'labor trafficking.' The labor trafficking provision does not require that the victim be induced to coming to the state of Alaska or even being moved within the state, thereby giving native Alaskans the same protection against labor trafficking as the promotion of prostitution statutes provide against sex trafficking. Mirroring the sex trafficking provisions, the labor trafficking offenses are catagorized as first, second, or third degree offenses.

In light of the Governor's recent transmission of HB359/SB218, I took the liberty of reaching out to his office to discuss ways to strengthen the pending anti-human trafficking legislation, including SB110. Per my conversation with Ms. Tepas, I will likewise be providing the Governor with a copy of the proposed amendments attached here, in the hopes that he will support amending the language of SB110 to providing increased protection against labor trafficking to native Alaskans, regardless of whether the element of transportation was involved.

I would welcome the opportunity to discuss any thoughts or concerns you have regarding SB 110 or the proposed amendments attached hereto. Please do not hestitate to contact me at (202) 745-1001, ext. 132, if I can be of further assistance in this regard.

Sincerely,

James Dold,

Proposed Amendments

KEY: Deletions appear in [brackets] and additions are underlined.

Sect. __. AS 11.41.360 is amended to read:

Sec. 11.41.360. **Labor Trafficking [HUMAN TRAFFICKING} in the first degree.** (a) A person commits the crime of labor trafficking [human trafficking] in the first degree if the person compels or induces another person [to come to this state] to engage in [sexual conduct, adult entertainment or] labor [in the state] or provide services through the use of [by] force, threat of force against any person, coercion or by deception.
(b) In this section,

(1) "deception" has the meaning given in AS 11.46.180 ["adult entertainment" means the conduct described in AS 23.10.350(f)(1) - (3); "sexual conduct" has the meaning given in AS 11.66.150.]
(c) Labor trafficking [Human trafficking] in the first degree is a class A felony.

Sec.___. AS 11.41.365 is amended to read:

Sec. 11.41.365. **Labor trafficking [HUMAN TRAFFICKING] in the second degree.** (a) A person commits the crime of labor trafficking [human trafficking] in the second degree if the person obtains a benefit from the commission of labor trafficking [human trafficking] under AS 11.41.360, with reckless disregard that the benefit is a result of the trafficking.
(b) Labor trafficking [Human trafficking] in the second degree is a class B felony.

Sec. 3. AS 11.31.120(h)(2) is amended to read:

E that is labor trafficking [human trafficking] in the first degree under AS 11.41.360

Sec. 13. AS 11.66.145 is amended to read:

Sec. 11.66.145. Forfeiture. Property used to institute aid, or facilitate, or received or derived from, a violation of **AS.11.66.100-11.66.135** [AS 11.66.110-11.66.135] and **AS.11.41.360- 11.41.365** shall be forfeited.

Sec. 21. AS 15.80.010(9) is amended to read:

(9) "felony involving moral turpitude" includes those crimes that are immoral or wrong in themselves such as murder, manslaughter, assault, sexual assault, sexual abuse of a minor, unlawful exploitation of a minor, robbery, extortion, coercion, kidnapping,

incest, arson, burglary, theft, forgery, criminal possession of a forgery device, offering a false instrument for recording, scheme to defraud, falsifying business records, commercial bribe receiving, commercial bribery, bribery, receiving a bribe, perjury, perjury by inconsistent statements, endangering the welfare of a minor, escape, promoting contraband, interference with official proceedings, receiving a bribe by a witness or a juror, jury tampering, misconduct by a juror, tampering with physical evidence, hindering prosecution, terroristic threatening, riot, criminal possession of explosives, unlawful furnishing of explosives, **sex trafficking** [PROMOTING PROSTITUTION], **labor trafficking**, criminal mischief, misconduct involving a controlled substance or an imitation controlled substance, permitting an escape, promoting gambling, possession of gambling records, distribution of child pornography, and possession of child pornography;

Re: CS for SB 110 (M version)
ACLU Review of Legal Issues

Dear Chair French and Vice-Chair Wielechowski:

Thank you for the opportunity to submit written testimony with respect to CS for Senate Bill 110 (M version).

As you know, the American Civil Liberties Union of Alaska represents thousands of members and activists throughout the state who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions. In that regard, we would like to advise the Committee of some concerns with respect to the proposed version of the bill.

The CS for SB 110 (M version) is an Improvement on the Original

The original version of SB 110 contained several concerning provisions which were vague and would have inadvertently criminalized much innocent teenage sexual conduct, by prohibiting "entic[ing]" or "induc[ing]" sexual conduct with someone under the age of 18 by any kind of deception. This original version would, for instance, make a 17-year-old boy guilty of an unclassified felony for having sex with a 16-year-old girl after telling her falsely that he wasn't romantically involved with anyone else. The M version imposes a requirement that any "human trafficking" would only occur if the victim were under the age of 18 and if the offender were at least four years older.

The CS Retains Some Arbitrary Consequences, and
Imposes an Outsized Penalty for Some Potentially Innocent Conduct

Generally, the Legislature has determined the age of consent to be 16. However, the M version of the bill would make consensual sexual activity between a 22-year-old and a 17-year-old an unclassified felony – the same grade as rape – as long as the 22-year-old "deceived" the 17-year-old in some way, and as long as the 17-year-old traveled 100 miles to reach the site where they have sex, which would include, say, driving from Seward to Anchorage. It appears, conversely, that the 22-year-old could drive from Anchorage to Seward to have sex with the 17-year-old and go unpunished.

The term "by deception" has been very broadly construed by the Alaska courts. Virtually any misrepresentation qualifies as deception. *State v. McDonald*, 872 P.2d 627, 653 (Alaska App. 1994) (holding evidence that kidnapping defendant lured adult woman into van using "deception" with false promise of information regarding ongoing child custody dispute). Within the ordinary realm of consensual romantic and sexual relations, people lie about all sorts of facts: whether one is married or not, whether one is in a committed relationship or not, how much money one makes, etc. While deception in the context of romantic and sexual relationships is not laudatory, not all such misrepresentations should not be the subject of criminal penalties.

In addition to the broad meaning of the term "by deception," the terms "entice" and "induce" are also so broad that the bill could criminalize more than the exploitative activity the drafters intended. While the trafficking of young people from rural Alaska to urban areas is serious, the current version – as a result of problems with the underlying statute – still sweeps too broadly beyond the targeted behavior.

Thank you again for letting us share our concerns. Please feel free to contact the undersigned should you have any questions or seek additional information.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

To: Cindy Smith
Subject: RE: SB110

The only other thing I would suggest is to take sexual conduct out of the human trafficking statute and deal with that issue in the sex trafficking statute.

From: Steiner, Quinlan G (DOA)

To: 'Cindy Smith'
Subject: SB110

This would narrow it, but still be broader than promoting prostitution, and eliminate the possibility of a prosecution for deception in the in-state dating context.

(a) A person commits the crime of human trafficking in the second degree if

(1) the person compels or induces another person to come to this state to engage in sexual conduct, adult entertainment, or labor in the state by force or threat of force against any person, or by deception; or

(2) the person compels or induces another person in this state to engage in sexual conduct with a third person, adult entertainment, or labor by force or threat of force against any person, or by deception.

CS FOR SENATE BILL NO. 110(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to human trafficking and sex trafficking, to punishment and fines for those offenses, and to peace officer powers to enforce human trafficking and sex trafficking laws in licensed premises; including human trafficking in the first degree and sex trafficking in the first degree in the definition of 'serious felony offense' for the offense of conspiracy and including sex trafficking and online enticement of a minor in the definition of 'most serious felony' for sentencing; relating to prostitution and promoting prostitution; relating to sex offenses; including human trafficking and sex trafficking in the list of offenses that make hearings for certain delinquent minors public and require disclosure of the names of certain delinquent minors; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 04.06.110 is amended to read:

Sec. 04.06.110. Peace officer powers. The director and the persons employed for the administration and enforcement of this title may, with the concurrence of the commissioner of public safety, exercise the powers of peace officers when those powers are specifically granted by the board. Powers granted by the board under this section may be exercised only when necessary for the enforcement of the criminally punishable provisions of this title, regulations of the board, and other criminally punishable laws and regulations, including investigation of violations of laws against prostitution and **sex trafficking** [PROMOTING PROSTITUTION] described in **AS 11.66.100 - 11.66.135, human trafficking described in AS 11.41.355 - 11.41.365,** [AS 11.66.100 - 11.66.130] and laws against gambling, promoting gambling, and related offenses described in AS 11.66.200 - 11.66.280.

*** Sec. 2.** AS 04.11.370(a) is amended to read:

(a) A license or permit shall be suspended or revoked if the board finds

(1) misrepresentation of a material fact on an application made under this title or a regulation adopted under this title;

(2) continuation of the manufacture, sale, or service of alcoholic beverages by the licensee or permittee would be contrary to the best interests of the public;

(3) failure on the part of the licensee to correct a defect that constitutes a violation of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or other laws after receipt of notice issued by the board or its agent;

(4) conviction of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010;

(5) conviction of an agent or employee of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates a law, regulation, or ordinance;

(6) failure of the licensee to comply with the public health, fire, or

safety laws and regulations in the state;

(7) use of the licensed premises as a resort for illegal possessors or users of narcotics, prostitutes, **human traffickers,** or **sex traffickers** [PROMOTERS OF PROSTITUTION]; in addition to any other legally competent evidence, the character of the premises may be proved by the general reputation of the premises in the community as a resort for illegal possessors or users of narcotics, prostitutes, **human traffickers,** or **sex traffickers** [PROMOTERS OF PROSTITUTION];

(8) occurrence of illegal gambling within the limits of the licensed premises;

(9) the licensee permitted a public offense involving moral turpitude to occur on the licensed premises;

(10) violation by a licensee of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010; or

(11) violation by an agent or employee of a licensee of a provision of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates the law, condition or restriction, regulation, or ordinance.

* **Sec. 3.** AS 11.31.120(h)(2) is amended to read:

(2) "serious felony offense" means an offense

(A) against the person under AS 11.41, punishable as an unclassified or class A felony;

(B) involving controlled substances under AS 11.71, punishable as an unclassified, class A, or class B felony;

(C) that is criminal mischief in the first degree under AS 11.46.475; [OR]

(D) that is terroristic threatening in the first degree under AS 11.56.807**;**

(E) that is human trafficking in the first degree under AS 11.41.355; or

(F) that is sex trafficking in the first degree under AS 11.66.110.

* **Sec. 4.** AS 11.41 is amended by adding a new section to read:

Sec. 11.41.355. Human trafficking in the first degree. (a) A person commits the crime of human trafficking in the first degree if

(1) the person violates AS 11.41.360 by compelling or inducing another person to engage in

(A) sexual conduct;

(B) adult entertainment; or

(C) an act described in AS 11.41.455(a)(1) - (7); and

(2) the other person compelled or induced is under 18 years of age.

(b) Human trafficking in the first degree is an unclassified felony.

* **Sec. 5.** AS 11.41.360(a) is amended to read:

(a) A person commits the crime of human trafficking in the **second** [FIRST] degree if the person compels or induces another person to [COME TO THIS STATE TO] engage in sexual conduct, adult entertainment, or labor in the state by force or threat of force against any person, or by deception.

* **Sec. 6.** AS 11.41.360(c) is amended to read:

(c) Human trafficking in the **second** [FIRST] degree is a class A felony.

* **Sec. 7.** AS 11.41.365 is amended to read:

Sec. 11.41.365. Human trafficking in the third [SECOND] degree. (a) A person commits the crime of human trafficking in the **third** [SECOND] degree if the person obtains a benefit from the commission of human trafficking under **AS 11.41.355 or 11.41.360** [AS 11.41.360,] with reckless disregard that the benefit is a result of the trafficking.

(b) Human trafficking in the **third** [SECOND] degree is a class B felony.

* **Sec. 8.** AS 11.41.370 is amended by adding new paragraphs to read:

(4) "adult entertainment" means the conduct described in AS 23.10.350(f)(1) - (3);

(5) "sexual conduct" has the meaning given in AS 11.66.150.

* **Sec. 9.** AS 11.66.100(b) is amended to read:

(b) **Except as provided in (c) of this section, prostitution** [PROSTITUTION] is a class B misdemeanor.

* **Sec. 10.** AS 11.66.100 is amended by adding new subsections to read:

(c) Prostitution is a class C felony if

(1) the defendant violates (a) of this section as a patron of a prostitute;

(2) the prostitute is under 18 years of age; and

(3) the defendant is over 18 years of age and at least three years older than the prostitute.

(d) In a prosecution under (c) of this section, it is an affirmative defense that, at the time of the alleged offense, the defendant

(1) reasonably believed the prostitute to be 18 years of age or older; and

(2) undertook reasonable measures to verify that the prostitute was 18 years of age or older.

* **Sec. 11.** AS 11.66.110(a) is amended to read:

(a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the first degree if the person

(1) induces or causes a person to engage in prostitution through the use of force;

(2) as other than a patron of a prostitute, induces or causes a person under 18 years of age to engage in prostitution; or

(3) induces or causes a person in that person's legal custody to engage in prostitution.

* **Sec. 12.** AS 11.66.110(c) is amended to read:

(c) Except as provided in (d) of this section, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree is a class A felony.

* **Sec. 13.** AS 11.66.120 is amended to read:

Sec. 11.66.120. Sex trafficking [PROMOTING PROSTITUTION] in the second degree. (a) A person commits the crime of **sex trafficking** [PROMOTING

PROSTITUTION] in the second degree if the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a prostitution enterprise other than a place of prostitution;

(2) procures or solicits a patron for a prostitute; or

(3) offers, sells, advertises, promotes, or facilitates travel that includes commercial sexual conduct as enticement for the travel; in this paragraph, "commercial sexual conduct" means sexual conduct for which anything of value is given or received by any person.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the second degree is a class B felony.

*** Sec. 14.** AS 11.66.130 is amended to read:

Sec. 11.66.130. Sex trafficking [PROMOTING PROSTITUTION] in the third degree. (a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the third degree if, with intent to promote prostitution, the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a place of prostitution;

(2) as other than a patron of a prostitute, induces or causes a person 18 years of age or older to engage in prostitution;

(3) as other than a prostitute receiving compensation for personally rendered prostitution services, receives or agrees to receive money or other property **under** [PURSUANT TO] an agreement or understanding that the money or other property is derived from prostitution; or

(4) engages in conduct that institutes, aids, or facilitates a prostitution enterprise.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the third degree is a class C felony.

*** Sec. 15.** AS 11.66.135 is amended to read:

Sec. 11.66.135. Sex trafficking [PROMOTING PROSTITUTION] in the fourth degree. (a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the fourth degree if the person engages in conduct that institutes,

aids, or facilitates prostitution under circumstances not proscribed under AS 11.66.130(a)(4).

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the fourth degree is a class A misdemeanor.

* **Sec. 16.** AS 11.66.140 is amended to read:

Sec. 11.66.140. Corroboration of certain testimony not required. In a prosecution under **AS 11.66.110 - 11.66.135** [AS 11.66.110 - 11.66.130], it is not necessary that the testimony of the person whose prostitution is alleged to have been compelled or promoted be corroborated by the testimony of any other witness or by documentary or other types of evidence.

* **Sec. 17.** AS 11.81.250(a) is amended to read:

(a) For purposes of sentencing under AS 12.55, all offenses defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree,** and kidnapping, are classified on the basis of their seriousness, according to the type of injury characteristically caused or risked by commission of the offense and the culpability of the offender. Except for murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree,** and kidnapping, the offenses in this title are classified into the following categories:

(1) class A felonies, which characteristically involve conduct resulting in serious physical injury or a substantial risk of serious physical injury to a person;

(2) class B felonies, which characteristically involve conduct resulting in less severe violence against a person than class A felonies, aggravated offenses

against property interests, or aggravated offenses against public administration or order;

(3) class C felonies, which characteristically involve conduct serious enough to deserve felony classification but not serious enough to be classified as A or B felonies;

(4) class A misdemeanors, which characteristically involve less severe violence against a person, less serious offenses against property interests, less serious offenses against public administration or order, or less serious offenses against public health and decency than felonies;

(5) class B misdemeanors, which characteristically involve a minor risk of physical injury to a person, minor offenses against property interests, minor offenses against public administration or order, or minor offenses against public health and decency;

(6) violations, which characteristically involve conduct inappropriate to an orderly society but which do not denote criminality in their commission.

* **Sec. 18.** AS 11.81.250(b) is amended to read:

(b) The classification of each felony defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, **human trafficking in the first degree,** misconduct involving a controlled substance in the first degree, **sex trafficking in the first degree under AS 11.66.110(a)(2),** and kidnapping, is designated in the section defining it. A felony under **the** [ALASKA] law **of this state** defined outside this title for which no penalty is specifically provided is a class C felony.

* **Sec. 19.** AS 12.55.035(b) is amended to read:

(b) Upon conviction of an offense, a defendant who is not an organization may be sentenced to pay, unless otherwise specified in the provision of law defining the offense, a fine of **not** [NO] more than

(1) $500,000 for murder in the first or second degree, attempted murder in the first degree, murder of an unborn child, sexual assault in the first degree,

sexual abuse of a minor in the first degree, kidnapping, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree** or misconduct involving a controlled substance in the first degree;

(2) $250,000 for a class A felony;

(3) $100,000 for a class B felony;

(4) $50,000 for a class C felony;

(5) $10,000 for a class A misdemeanor;

(6) $2,000 for a class B misdemeanor;

(7) $500 for a violation.

* **Sec. 20.** AS 12.55.085(f) is amended to read:

(f) The court may not suspend the imposition of sentence of a person who

(1) is convicted of a violation of AS 11.41.100 - 11.41.220, 11.41.260 - 11.41.320, **11.41.355 - 11.41.365** [11.41.360 - 11.41.370], 11.41.410 - 11.41.530, AS 11.46.400, or AS 11.61.125 - 11.61.128;

(2) uses a firearm in the commission of the offense for which the person is convicted; or

(3) is convicted of a violation of AS 11.41.230 - 11.41.250 or a felony and the person has one or more prior convictions for a misdemeanor violation of AS 11.41 or for a felony or for a violation of a law in this or another jurisdiction having similar elements to an offense defined as a misdemeanor in AS 11.41 or as a felony in this state; for the purposes of this paragraph, a person shall be considered to have a prior conviction even if that conviction has been set aside under (e) of this section or under the equivalent provision of the laws of another jurisdiction.

* **Sec. 21.** AS 12.55.125 is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, **sex trafficking** [OR PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to

adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) **human trafficking in the second degree under AS 11.41.360 involving sexual conduct or adult entertainment,** unlawful exploitation of a minor under AS 11.41.455(c)(2), online enticement of a minor under AS 11.41.452(e), or attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, **sex trafficking** [OR PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, online enticement of a minor under AS 11.41.452(d), unlawful exploitation of a minor under AS 11.41.455(c)(1), [OR] distribution of child pornography under AS 11.61.125(e)(2)**, or attempt, conspiracy, or solicitation to commit human trafficking in the second degree under AS 11.41.360 involving sexual conduct or adult entertainment,** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, distribution of child pornography under AS 11.61.125(e)(1), or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years.

* **Sec. 22.** AS 12.55.185(10) is amended to read:

(10) "most serious felony" means

(A) arson in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **online enticement of a minor under AS 11.41.452(e),** or any unclassified or class A felony prescribed under AS 11.41; or

(B) an attempt, or conspiracy to commit, or criminal solicitation under AS 11.31.110 of, an unclassified felony prescribed under AS 11.41;

* **Sec. 23.** AS 12.55.185(16) is amended to read:

(16) "sexual felony" means sexual assault in the first degree, sexual abuse of a minor in the first degree, **human trafficking in the first degree, sex**

trafficking in the first degree under AS 11.66.110(a)(2), sexual assault in the second degree, sexual abuse of a minor in the second degree, **online enticement of a minor,** unlawful exploitation of a minor, distribution of child pornography, **human trafficking in the second degree involving sexual conduct or adult entertainment,** sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, and felony attempt, conspiracy, or solicitation to commit those crimes;

*** Sec. 24.** AS 12.63.100(6) is amended to read:

(6) "sex offense" means

(A) a crime under AS 11.41.100(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit a sexual offense, or a similar offense under the laws of the other jurisdiction; in this subparagraph, "sexual offense" has the meaning given in AS 11.41.100(a)(3);

(B) a crime under AS 11.41.110(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit one of the following crimes, or a similar law of another jurisdiction:

(i) sexual assault in the first degree;

(ii) sexual assault in the second degree;

(iii) sexual abuse of a minor in the first degree; or

(iv) sexual abuse of a minor in the second degree; or

(C) a crime, or an attempt, solicitation, or conspiracy to commit a crime, under the following statutes or a similar law of another jurisdiction:

(i) AS 11.41.410 - 11.41.438;

(ii) AS 11.41.440(a)(2);

(iii) AS 11.41.450 - 11.41.458;

(iv) AS 11.41.460 if the indecent exposure is before a person under 16 years of age and the offender has a previous conviction for that offense;

(v) AS 11.61.125 - 11.61.128;

(vi) AS 11.66.110 or 11.66.130(a)(2) if the person who

was induced or caused to engage in prostitution was 16 or 17 years of age at the time of the offense;

(vii) former AS 11.15.120, former 11.15.134, or assault with the intent to commit rape under former AS 11.15.160, former AS 11.40.110, or former 11.40.200; [OR]

(viii) AS 11.61.118(a)(2) if the offender has a previous conviction for that offense;

(ix) human trafficking in the first degree under AS 11.41.355;

(x) sex trafficking in the first degree under AS 11.66.110(a)(2);

*** Sec. 25.** AS 15.80.010(9) is amended to read:

(9) "felony involving moral turpitude" includes those crimes that are immoral or wrong in themselves such as murder, manslaughter, assault, sexual assault, sexual abuse of a minor, unlawful exploitation of a minor, robbery, extortion, coercion, kidnapping, incest, arson, burglary, theft, forgery, criminal possession of a forgery device, offering a false instrument for recording, scheme to defraud, falsifying business records, commercial bribe receiving, commercial bribery, bribery, receiving a bribe, perjury, perjury by inconsistent statements, endangering the welfare of a minor, escape, promoting contraband, interference with official proceedings, receiving a bribe by a witness or a juror, jury tampering, misconduct by a juror, tampering with physical evidence, hindering prosecution, terroristic threatening, riot, criminal possession of explosives, unlawful furnishing of explosives, **sex trafficking, human trafficking** [PROMOTING PROSTITUTION], criminal mischief, misconduct involving a controlled substance or an imitation controlled substance, permitting an escape, promoting gambling, possession of gambling records, distribution of child pornography, and possession of child pornography;

*** Sec. 26.** AS 28.15.046(c) is amended to read:

(c) The department may not issue a license under this section to an applicant who has been convicted of any of the following offenses within 20 years of the time of application:

(1) sexual abuse of a minor in any degree under AS 11.41.434 - 11.41.440;

(2) sexual assault in any degree under AS 11.41.410 - 11.41.425;

(3) incest under AS 11.41.450;

(4) unlawful exploitation of a minor under AS 11.41.455;

(5) contributing to the delinquency of a minor under AS 11.51.130;

(6) a felony involving possession of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(7) a felony or misdemeanor involving distribution of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(8) **sex trafficking** [PROMOTING PROSTITUTION] in the first or second degree under AS 11.66.110 or 11.66.120;

(9) indecent exposure in the first or second degree under AS 11.41.458 or 11.41.460**;**

(10) human trafficking in the first degree under AS 11.41.355 and human trafficking in the second degree involving sexual conduct or adult entertainment.

* **Sec. 27.** AS 47.12.110(d) is amended to read:

(d) Notwithstanding (a) of this section, a court hearing on a petition seeking the adjudication of a minor as a delinquent shall be open to the public, except as prohibited or limited by order of the court, if

(1) the department files with the court a motion asking the court to open the hearing to the public, and the petition seeking adjudication of the minor as a delinquent is based on

(A) the minor's alleged commission of an offense, and the minor has knowingly failed to comply with all the terms and conditions required of the minor by the department or imposed on the minor in a court order entered under AS 47.12.040(a)(2) or 47.12.120;

(B) the minor's alleged commission of

(i) a crime against a person that is punishable as a felony;

(ii) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(iii) arson under AS 11.46.400 - 11.46.410;

(iv) burglary under AS 11.46.300;

(v) distribution of child pornography under AS 11.61.125;

(vi) **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110; [OR]

(vii) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; or

(viii) human trafficking in the first degree under AS 11.41.355; or

(C) the minor's alleged commission of a felony and the minor was 16 years of age or older at the time of commission of the offense when the minor has previously been convicted or adjudicated a delinquent minor based on the minor's commission of an offense that is a felony; or

(2) the minor agrees to a public hearing on the petition seeking adjudication of the minor as a delinquent.

*** Sec. 28.** AS 47.12.315(a) is amended to read:

(a) Notwithstanding AS 47.12.310, when an agency takes action under AS 47.12.040(a)(1) to adjust a matter, or when, under AS 47.12.040(a)(2), the court directs the agency to adjust the matter, the agency

(1) shall, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense, if the minor was, under AS 47.12.020, previously alleged to be a delinquent

minor on the basis of the minor's commission of at least one offense and, on the basis of that allegation, a state agency has, under AS 47.12.040(a), been asked to make a preliminary inquiry to determine if any action on that matter is appropriate, and, if the minor is alleged to be a delinquent minor on the basis of the minor's commission of another offense, exercise of agency jurisdiction is based on the minor's alleged commission of that other offense, and that other offense is one of the following:

(A) a crime against a person that is punishable as a felony;

(B) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(C) arson under AS 11.46.400 - 11.46.410;

(D) burglary under AS 11.46.300;

(E) distribution of child pornography under AS 11.61.125;

(F) **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110; [OR]

(G) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; **or**

(H) human trafficking in the first degree under AS 11.41.355; and

(2) may, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense if the minor has knowingly failed to comply with all terms and conditions required of the minor by the agency to adjust the matter under AS 47.12.060(b).

* **Sec. 29.** AS 11.41.360(b)(1) and 11.41.360(b)(3) are repealed.

* **Sec. 30.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 1, 2, 11 - 15, 18, and 25 - 28 of this Act apply to

offenses committed before, on, or after the effective date of the Act.

(b) Sections 3 - 10, 16, 17, 19 - 24, and 29 of this Act apply to offenses committed on or after the effective date of this Act.

* **Sec. 31.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the catch line of AS 11.66.110 from "Promoting prostitution in the first degree" to "Sex trafficking in the first degree."

* **Sec. 32.** This Act takes effect July 1, 2012.

CS FOR SENATE BILL NO. 110(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to human trafficking and sex trafficking, to punishment and fines for those offenses, and to peace officer powers to enforce human trafficking and sex trafficking laws in licensed premises; including human trafficking in the first degree and sex trafficking in the first degree in the definition of 'serious felony offense' for the offense of conspiracy and including sex trafficking and online enticement of a minor in the definition of 'most serious felony' for sentencing; relating to prostitution and promoting prostitution; relating to sex offenses; including human trafficking and sex trafficking in the list of offenses that make hearings for certain delinquent minors public and require disclosure of the names of certain delinquent minors; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 04.06.110 is amended to read:

Sec. 04.06.110. Peace officer powers. The director and the persons employed for the administration and enforcement of this title may, with the concurrence of the commissioner of public safety, exercise the powers of peace officers when those powers are specifically granted by the board. Powers granted by the board under this section may be exercised only when necessary for the enforcement of the criminally punishable provisions of this title, regulations of the board, and other criminally punishable laws and regulations, including investigation of violations of laws against prostitution and **sex trafficking** [PROMOTING PROSTITUTION] described in **AS 11.66.100 - 11.66.135, human trafficking described in AS 11.41.355 - 11.41.365,** [AS 11.66.100 - 11.66.130] and laws against gambling, promoting gambling, and related offenses described in AS 11.66.200 - 11.66.280.

*** Sec. 2.** AS 04.11.370(a) is amended to read:

(a) A license or permit shall be suspended or revoked if the board finds

(1) misrepresentation of a material fact on an application made under this title or a regulation adopted under this title;

(2) continuation of the manufacture, sale, or service of alcoholic beverages by the licensee or permittee would be contrary to the best interests of the public;

(3) failure on the part of the licensee to correct a defect that constitutes a violation of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or other laws after receipt of notice issued by the board or its agent;

(4) conviction of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010;

(5) conviction of an agent or employee of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates a law, regulation, or ordinance;

(6) failure of the licensee to comply with the public health, fire, or

safety laws and regulations in the state;

(7) use of the licensed premises as a resort for illegal possessors or users of narcotics, prostitutes, **human traffickers,** or **sex traffickers** [PROMOTERS OF PROSTITUTION]; in addition to any other legally competent evidence, the character of the premises may be proved by the general reputation of the premises in the community as a resort for illegal possessors or users of narcotics, prostitutes, **human traffickers,** or **sex traffickers** [PROMOTERS OF PROSTITUTION];

(8) occurrence of illegal gambling within the limits of the licensed premises;

(9) the licensee permitted a public offense involving moral turpitude to occur on the licensed premises;

(10) violation by a licensee of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010; or

(11) violation by an agent or employee of a licensee of a provision of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates the law, condition or restriction, regulation, or ordinance.

*** Sec. 3.** AS 11.31.120(h)(2) is amended to read:

(2) "serious felony offense" means an offense

(A) against the person under AS 11.41, punishable as an unclassified or class A felony;

(B) involving controlled substances under AS 11.71, punishable as an unclassified, class A, or class B felony;

(C) that is criminal mischief in the first degree under AS 11.46.475; [OR]

(D) that is terroristic threatening in the first degree under AS 11.56.807**;**

(E) that is human trafficking in the first degree under AS 11.41.355; or

(F) that is sex trafficking in the first degree under AS 11.66.110.

* **Sec. 4.** AS 11.41 is amended by adding a new section to read:

Sec. 11.41.355. Human trafficking in the first degree. (a) A person commits the crime of human trafficking in the first degree if

(1) the person violates AS 11.41.360 by compelling or inducing another person to engage in

(A) sexual conduct;

(B) adult entertainment; or

(C) an act described in AS 11.41.455(a)(1) - (7); and

(2) the other person compelled or induced is under 18 years of age.

(b) Human trafficking in the first degree is an unclassified felony.

* **Sec. 5.** AS 11.41.360(a) is amended to read:

(a) A person commits the crime of human trafficking in the **second** [FIRST] degree if the person compels or induces another person to [COME TO THIS STATE TO] engage in sexual conduct, adult entertainment, or labor in the state by force or threat of force against any person, or by deception.

* **Sec. 6.** AS 11.41.360(c) is amended to read:

(c) Human trafficking in the **second** [FIRST] degree is a class A felony.

* **Sec. 7.** AS 11.41.365 is amended to read:

Sec. 11.41.365. Human trafficking in the third [SECOND] degree. (a) A person commits the crime of human trafficking in the **third** [SECOND] degree if the person obtains a benefit from the commission of human trafficking under **AS 11.41.355 or 11.41.360** [AS 11.41.360,] with reckless disregard that the benefit is a result of the trafficking.

(b) Human trafficking in the **third** [SECOND] degree is a class B felony.

* **Sec. 8.** AS 11.41.370 is amended by adding new paragraphs to read:

(4) "adult entertainment" means the conduct described in AS 23.10.350(f)(1) - (3);

(5) "sexual conduct" has the meaning given in AS 11.66.150.

* **Sec. 9.** AS 11.66.100(b) is amended to read:

(b) **Except as provided in (c) of this section, prostitution** [PROSTITUTION] is a class B misdemeanor.

* **Sec. 10.** AS 11.66.100 is amended by adding new subsections to read:

(c) Prostitution is a class C felony if

(1) the defendant violates (a) of this section as a patron of a prostitute;

(2) the prostitute is under 18 years of age; and

(3) the defendant is over 18 years of age and at least three years older than the prostitute.

(d) In a prosecution under (c) of this section, it is an affirmative defense that, at the time of the alleged offense, the defendant

(1) reasonably believed the prostitute to be 18 years of age or older; and

(2) undertook reasonable measures to verify that the prostitute was 18 years of age or older.

* **Sec. 11.** AS 11.66.110(a) is amended to read:

(a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the first degree if the person

(1) induces or causes a person to engage in prostitution through the use of force;

(2) as other than a patron of a prostitute, induces or causes a person under 18 years of age to engage in prostitution; or

(3) induces or causes a person in that person's legal custody to engage in prostitution.

* **Sec. 12.** AS 11.66.110(c) is amended to read:

(c) Except as provided in (d) of this section, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree is a class A felony.

* **Sec. 13.** AS 11.66.120 is amended to read:

Sec. 11.66.120. Sex trafficking [PROMOTING PROSTITUTION] in the second degree. (a) A person commits the crime of **sex trafficking** [PROMOTING

PROSTITUTION] in the second degree if the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a prostitution enterprise other than a place of prostitution;

(2) procures or solicits a patron for a prostitute; or

(3) offers, sells, advertises, promotes, or facilitates travel that includes commercial sexual conduct as enticement for the travel; in this paragraph, "commercial sexual conduct" means sexual conduct for which anything of value is given or received by any person.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the second degree is a class B felony.

* **Sec. 14.** AS 11.66.130 is amended to read:

Sec. 11.66.130. Sex trafficking [PROMOTING PROSTITUTION] in the third degree.

(a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the third degree if, with intent to promote prostitution, the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a place of prostitution;

(2) as other than a patron of a prostitute, induces or causes a person 18 years of age or older to engage in prostitution;

(3) as other than a prostitute receiving compensation for personally rendered prostitution services, receives or agrees to receive money or other property **under** [PURSUANT TO] an agreement or understanding that the money or other property is derived from prostitution; or

(4) engages in conduct that institutes, aids, or facilitates a prostitution enterprise.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the third degree is a class C felony.

* **Sec. 15.** AS 11.66.135 is amended to read:

Sec. 11.66.135. Sex trafficking [PROMOTING PROSTITUTION] in the fourth degree. (a) A person commits the crime of **sex trafficking** [PROMOTING

PROSTITUTION] in the fourth degree if the person engages in conduct that institutes, aids, or facilitates prostitution under circumstances not proscribed under AS 11.66.130(a)(4).

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the fourth degree is a class A misdemeanor.

* **Sec. 16.** AS 11.66.140 is amended to read:

Sec. 11.66.140. Corroboration of certain testimony not required. In a prosecution under **AS 11.66.110 - 11.66.135** [AS 11.66.110 - 11.66.130], it is not necessary that the testimony of the person whose prostitution is alleged to have been compelled or promoted be corroborated by the testimony of any other witness or by documentary or other types of evidence.

* **Sec. 17.** AS 11.81.250(a) is amended to read:

(a) For purposes of sentencing under AS 12.55, all offenses defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355,** and kidnapping, are classified on the basis of their seriousness, according to the type of injury characteristically caused or risked by commission of the offense and the culpability of the offender. Except for murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355,** and kidnapping, the offenses in this title are classified into the following categories:

(1) class A felonies, which characteristically involve conduct resulting in serious physical injury or a substantial risk of serious physical injury to a person;

(2) class B felonies, which characteristically involve conduct resulting in less severe violence against a person than class A felonies, aggravated offenses against property interests, or aggravated offenses against public administration or order;

(3) class C felonies, which characteristically involve conduct serious enough to deserve felony classification but not serious enough to be classified as A or B felonies;

(4) class A misdemeanors, which characteristically involve less severe violence against a person, less serious offenses against property interests, less serious offenses against public administration or order, or less serious offenses against public health and decency than felonies;

(5) class B misdemeanors, which characteristically involve a minor risk of physical injury to a person, minor offenses against property interests, minor offenses against public administration or order, or minor offenses against public health and decency;

(6) violations, which characteristically involve conduct inappropriate to an orderly society but which do not denote criminality in their commission.

*** Sec. 18.** AS 11.81.250(b) is amended to read:

(b) The classification of each felony defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking in the first degree under AS 11.66.110(a)(2),** and kidnapping, is designated in the section defining it. A felony under **the** [ALASKA] law **of this state** defined outside this title for which no penalty is specifically provided is a class C felony.

*** Sec. 19.** AS 12.55.035(b) is amended to read:

(b) Upon conviction of an offense, a defendant who is not an organization may be sentenced to pay, unless otherwise specified in the provision of law defining the offense, a fine of **not** [NO] more than

(1) $500,000 for murder in the first or second degree, attempted murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, kidnapping, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355** or misconduct involving a controlled substance in the first degree;

(2) $250,000 for a class A felony;

(3) $100,000 for a class B felony;

(4) $50,000 for a class C felony;

(5) $10,000 for a class A misdemeanor;

(6) $2,000 for a class B misdemeanor;

(7) $500 for a violation.

* **Sec. 20.** AS 12.55.085(f) is amended to read:

(f) The court may not suspend the imposition of sentence of a person who

(1) is convicted of a violation of AS 11.41.100 - 11.41.220, 11.41.260 - 11.41.320, **11.41.355 - 11.41.365** [11.41.360 - 11.41.370], 11.41.410 - 11.41.530, AS 11.46.400, or AS 11.61.125 - 11.61.128;

(2) uses a firearm in the commission of the offense for which the person is convicted; or

(3) is convicted of a violation of AS 11.41.230 - 11.41.250 or a felony and the person has one or more prior convictions for a misdemeanor violation of AS 11.41 or for a felony or for a violation of a law in this or another jurisdiction having similar elements to an offense defined as a misdemeanor in AS 11.41 or as a felony in this state; for the purposes of this paragraph, a person shall be considered to have a prior conviction even if that conviction has been set aside under (e) of this section or under the equivalent provision of the laws of another jurisdiction.

* **Sec. 21.** AS 12.55.125 is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, **sex trafficking** [OR PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree under**

AS 11.41.355 may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) **human trafficking in the second degree under AS 11.41.360 involving sexual conduct or adult entertainment,** unlawful exploitation of a minor under AS 11.41.455(c)(2), online enticement of a minor under AS 11.41.452(e), or attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, **sex trafficking** [OR PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree under AS 11.41.355** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, online enticement of a minor under AS 11.41.452(d), unlawful exploitation of a minor under AS 11.41.455(c)(1), [OR] distribution of child pornography under AS 11.61.125(e)(2)**, or attempt, conspiracy, or solicitation to commit human trafficking in the second degree under AS 11.41.360 involving sexual conduct or adult entertainment,** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the

defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, distribution of child pornography under AS 11.61.125(e)(1), or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years.

*** Sec. 22.** AS 12.55.185(10) is amended to read:

(10) "most serious felony" means

(A) arson in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **online enticement of a minor under AS 11.41.452(e),** or any unclassified or class A felony prescribed under AS 11.41; or

(B) an attempt, or conspiracy to commit, or criminal solicitation under AS 11.31.110 of, an unclassified felony prescribed under AS 11.41;

*** Sec. 23.** AS 12.55.185(16) is amended to read:

(16) "sexual felony" means sexual assault in the first degree, sexual abuse of a minor in the first degree, **human trafficking in the first degree, sex trafficking in the first degree under AS 11.66.110(a)(2),** sexual assault in the second degree, sexual abuse of a minor in the second degree, **online enticement of a minor,** unlawful exploitation of a minor, distribution of child pornography, **human trafficking in the second degree involving sexual conduct or adult entertainment,** sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, and felony attempt, conspiracy, or solicitation to commit those crimes;

*** Sec. 24.** AS 12.63.100(6) is amended to read:

(6) "sex offense" means

(A) a crime under AS 11.41.100(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit a sexual offense, or a similar offense under the laws of the other jurisdiction; in this subparagraph, "sexual offense" has the meaning given in AS 11.41.100(a)(3);

(B) a crime under AS 11.41.110(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit one of the following crimes, or a similar law of another jurisdiction:

(i) sexual assault in the first degree;

(ii) sexual assault in the second degree;

(iii) sexual abuse of a minor in the first degree; or

(iv) sexual abuse of a minor in the second degree; or

(C) a crime, or an attempt, solicitation, or conspiracy to commit a crime, under the following statutes or a similar law of another jurisdiction:

(i) AS 11.41.410 - 11.41.438;

(ii) AS 11.41.440(a)(2);

(iii) AS 11.41.450 - 11.41.458;

(iv) AS 11.41.460 if the indecent exposure is before a person under 16 years of age and the offender has a previous conviction

for that offense;

(v) AS 11.61.125 - 11.61.128;

(vi) AS 11.66.110 or 11.66.130(a)(2) if the person who was induced or caused to engage in prostitution was 16 or 17 years of age at the time of the offense;

(vii) former AS 11.15.120, former 11.15.134, or assault with the intent to commit rape under former AS 11.15.160, former AS 11.40.110, or former 11.40.200; [OR]

(viii) AS 11.61.118(a)(2) if the offender has a previous conviction for that offense;

(ix) human trafficking in the first degree under AS 11.41.355;

(x) sex trafficking in the first degree under AS 11.66.110(a)(2);

*** Sec. 25.** AS 15.80.010(9) is amended to read:

(9) "felony involving moral turpitude" includes those crimes that are immoral or wrong in themselves such as murder, manslaughter, assault, sexual assault, sexual abuse of a minor, unlawful exploitation of a minor, robbery, extortion, coercion, kidnapping, incest, arson, burglary, theft, forgery, criminal possession of a forgery device, offering a false instrument for recording, scheme to defraud, falsifying business records, commercial bribe receiving, commercial bribery, bribery, receiving a bribe, perjury, perjury by inconsistent statements, endangering the welfare of a minor, escape, promoting contraband, interference with official proceedings, receiving a bribe by a witness or a juror, jury tampering, misconduct by a juror, tampering with physical evidence, hindering prosecution, terroristic threatening, riot, criminal possession of explosives, unlawful furnishing of explosives, **sex trafficking, human trafficking** [PROMOTING PROSTITUTION], criminal mischief, misconduct involving a controlled substance or an imitation controlled substance, permitting an escape, promoting gambling, possession of gambling records, distribution of child pornography, and possession of child pornography;

*** Sec. 26.** AS 28.15.046(c) is amended to read:

(c) The department may not issue a license under this section to an applicant who has been convicted of any of the following offenses within 20 years of the time of application:

(1) sexual abuse of a minor in any degree under AS 11.41.434 - 11.41.440;

(2) sexual assault in any degree under AS 11.41.410 - 11.41.425;

(3) incest under AS 11.41.450;

(4) unlawful exploitation of a minor under AS 11.41.455;

(5) contributing to the delinquency of a minor under AS 11.51.130;

(6) a felony involving possession of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(7) a felony or misdemeanor involving distribution of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(8) **sex trafficking** [PROMOTING PROSTITUTION] in the first or second degree under AS 11.66.110 or 11.66.120;

(9) indecent exposure in the first or second degree under AS 11.41.458 or 11.41.460**;**

(10) human trafficking in the first degree under AS 11.41.355 and human trafficking in the second degree involving sexual conduct or adult entertainment.

*** Sec. 27.** AS 47.12.110(d) is amended to read:

(d) Notwithstanding (a) of this section, a court hearing on a petition seeking the adjudication of a minor as a delinquent shall be open to the public, except as prohibited or limited by order of the court, if

(1) the department files with the court a motion asking the court to open the hearing to the public, and the petition seeking adjudication of the minor as a delinquent is based on

(A) the minor's alleged commission of an offense, and the minor has knowingly failed to comply with all the terms and conditions required of the minor by the department or imposed on the minor in a court order entered under AS 47.12.040(a)(2) or 47.12.120;

(B) the minor's alleged commission of

(i) a crime against a person that is punishable as a felony;

(ii) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(iii) arson under AS 11.46.400 - 11.46.410;

(iv) burglary under AS 11.46.300;

(v) distribution of child pornography under AS 11.61.125;

(vi) **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110; [OR]

(vii) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; or

(viii) human trafficking in the first degree under AS 11.41.355; or

(C) the minor's alleged commission of a felony and the minor was 16 years of age or older at the time of commission of the offense when the minor has previously been convicted or adjudicated a delinquent minor based on the minor's commission of an offense that is a felony; or

(2) the minor agrees to a public hearing on the petition seeking adjudication of the minor as a delinquent.

*** Sec. 28.** AS 47.12.315(a) is amended to read:

(a) Notwithstanding AS 47.12.310, when an agency takes action under AS 47.12.040(a)(1) to adjust a matter, or when, under AS 47.12.040(a)(2), the court directs the agency to adjust the matter, the agency

(1) shall, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the

agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense, if the minor was, under AS 47.12.020, previously alleged to be a delinquent minor on the basis of the minor's commission of at least one offense and, on the basis of that allegation, a state agency has, under AS 47.12.040(a), been asked to make a preliminary inquiry to determine if any action on that matter is appropriate, and, if the minor is alleged to be a delinquent minor on the basis of the minor's commission of another offense, exercise of agency jurisdiction is based on the minor's alleged commission of that other offense, and that other offense is one of the following:

(A) a crime against a person that is punishable as a felony;

(B) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(C) arson under AS 11.46.400 - 11.46.410;

(D) burglary under AS 11.46.300;

(E) distribution of child pornography under AS 11.61.125;

(F) **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110; [OR]

(G) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; **or**

(H) human trafficking in the first degree under AS 11.41.355; and

(2) may, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense if the minor has knowingly failed to comply with all terms and conditions required of the minor by the agency to adjust the matter under AS 47.12.060(b).

* **Sec. 29.** AS 11.41.360(b)(1) and 11.41.360(b)(3) are repealed.

* **Sec. 30.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 1, 2, 11 - 15, 18, and 25 - 28 of this Act apply to offenses committed before, on, or after the effective date of the Act.

(b) Sections 3 - 10, 16, 17, 19 - 24, and 29 of this Act apply to offenses committed on or after the effective date of this Act.

* **Sec. 31.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the catch line of AS 11.66.110 from "Promoting prostitution in the first degree" to "Sex trafficking in the first degree."

* **Sec. 32.** This Act takes effect July 1, 2012.

MEMORANDUM

March 20, 2012

TO: Leg Legal

FROM: Cindy Smith

RE: CS for SB 110 LS0646\E

We need a new CS with the following changes to CSSB 100 \E.

1. Add language of Sections 12 and 15 from SB 218 (GS2627\A).

2. We need a provision in 12.55.185 (16) for sex trafficking and human trafficking and on line enticement of a minor (A felony level).

3. Please move the definition (an Act described in AS 11.41.455(a)1-7) from line 10 to line 30, so that it is included as part of the sexual conduct definition.

4. Add Human Trafficking in the 2nd degree at page 14 line 9.

5. Add language in amendment 27G-2-C, attached.

27G-2-C

AMENDMENT

OFFERED IN THE HOUSE JUDICIARY COMMITTEE

BY _____

TO: HB 359

Page 4, line 29 through page 5, line 3:

Delete all material and insert:

"(c) Prostitution is a class C felony if

(1) the defendant is a patron of a prostitute;

(2) the prostitute is under 18 years of age;

(3) the defendant is over 18 years of age and at least three years older than the prostitute.

(d) In a prosecution for a felony under this section that provides that the prostitute be under 18 years of age, it is an affirmative defense that, at the time of the alleged offense, the defendant

(1) reasonably believed the prostitute to be 18 years of age or older; and

(2) undertook reasonable measures to verify that the prostitute was that age or older."

SENATE BILL 218
SEX TRAFFICKING AND HUMAN TRAFFICKING
SECTIONAL ANALYSIS

The increased scrutiny of crimes related to promoting prostitution of children in Alaska has prompted the proposed change in terminology from promoting prostitution to sex trafficking. There are good reasons for this change. First, a child who is put into prostitution by an adult should be considered and described as a victim, not a prostitute. The change in terminology will encourage this change. Second, a majority of law enforcement officers now refer to the crime of promoting prostitution of children as sex trafficking. Changing Alaska law will facilitate better communication and understanding.

Sections 1, 2, 7 -- 11, 14, 17 – 19, and 21 -- 24 change the statutes prohibiting promoting prostitution to prohibiting sex trafficking. The elements of the offenses remain the same. These sections also make conforming amendments to other laws that currently refer to the crime of promoting prostitution so that they cross-reference sex trafficking.

Section 3 adds the crimes of human trafficking in the first degree and sex trafficking in the first degree to the felonies described as "serious felony offenses" in the state's conspiracy law, AS 11.21.120. This change would enable the state to investigate and potentially prosecute offenders who work with other people to plan and engage in human trafficking or sex trafficking.

Section 4 amends the crime of distribution of indecent materials to minors, AS 11.61.128. This proposed amendment is in response to the recent decision by a federal district court judge holding the current version of the statute to be unconstitutional in violation of the first amendment, because it applies to conduct that is constitutionally protected. In response to the decision that the current law is overbroad, the bill would require that the state prove the defendant intentionally distributed, or possessed with intent to distribute, harmful material to another person that the offender knows is under 16 years of age or believes is under 16 years of age.

Sections 5 and 6 raise the penalty for being a patron of a prostitute, if the prostitute is a minor under 18 years of age, from a class B misdemeanor to a class C felony. It also specifies the legislative intent that the age of the prostitute is a circumstance that does not require proof of a culpable mental state.

Section 12: Under current law, no corroboration is required of the testimony of an alleged victim in a prosecution for promoting prostitution (sex trafficking) in the first, second, and third

degrees. The bill adds the crime of promoting prostitution (sex trafficking) in the fourth degree to those crimes that do not require corroboration of the testimony of an alleged victim.

Section 13: Under current law property used to facilitate or derived from a crime of promoting prostitution (sex trafficking) is subject to forfeiture. The bill adds the crime of prostitution to these crimes. Under the bill property used to facilitate or derived from the crime of prostitution would be subject to forfeiture.

Section 15 corrects an error in AS 11.81.250(b). Under current law the crime of promoting prostitution (sex trafficking) in the first degree under AS 11.66.110(a)(2) – where the person promoted is a child – is an unclassified felony. The bill adds this offense to the other offenses described as unclassified felonies in Alaska law.

Section 16 allows the testimony of a witness in a hearing addressing the competency of a defendant for being tried for a crime by way of contemporaneous two-way video conference. It allows this testimony if the witness would be required to travel more that 50 miles to attend the hearing in person or if the witness lives in a place where people customarily travel by air to the court site.

Section 19, in addition to conforming the definition of most serious felony to the changes in the sex trafficking provisions, also corrects an omission in the definition of most serious felony by including online enticement of a minor in the definition.

Section 20 adds a new provision to sex offender registration law that requires a person present in Alaska, who is convicted of an offense out of state that requires registration in that jurisdiction, to register in Alaska. This requirement would apply even if Alaska does not have a criminal provision similar to the crime in the other state that requires registration there. A person would be required to register for 15 years if convicted of one offense, and for life if convicted for two or more offenses.

Section 25 adopts Rule 38.3, Alaska Rules of Criminal Procedure, addressing the use of testimony by contemporaneous two-way video conference. It would allow this testimony if the parties agree to its use. If the parties do not agree, it would allow contemporaneous two-way video conference testimony if the court finds that its use is necessary to further an important public policy, the witness is unavailable, and the testimony is given under oath and is subject to cross-examination.

Section 26 addresses the applicability of the changes described above.

Section 27 is an instruction to the revisor of statutes regarding the heading of AS 11.66.110.

Section 28 provides for an effective date of July 1, 2012.

(Revised 8/17/2011 OMB)

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 218

Analysis

The bill changes the description of the crime of promoting prostitution under AS 11.66.110 – 11.66.135 from promoting prostitution in the first, second, third, and fourth degrees to sex trafficking in the first, second, third, and fourth degrees.

It adds the crimes of human trafficking in the first degree and sex trafficking in the first degree to the definition of "serious felony offense" under the conspiracy law.

The bill amends the crime of distribution of indecent materials to minors under AS 11.61.128 in response to the judicial decision that the current law is unconstitutional due to over breadth by requiring the prosecution to prove that the offender intentionally distributed, or possessed with the intent to distribute, harmful material to another person that the offender knows is under 16 years of age or believes is under 16 years of age.

It adopts a procedure for contemporaneous two-way videoconference in criminal trials where the court finds that it is necessary to further an important public policy, that the witness is unavailable, and the testimony is given under oath and subject to cross-examination. The bill would also allow contemporaneous two-way videoconference testimony in hearings addressing the competency of a defendant to be tried for criminal charges if the witness resides 50 or more miles away from the place of the hearing or the customary travel to the site of the hearing is by air.

The bill would require a person present in Alaska to register as a sex offender if the person is required to register as a sex offender in another jurisdiction.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 218

Analysis

This proposed legislation would require a person who is required to register as a sex offender or child kidnapper in another jurisdiction to register in Alaska even if there is no substantive law in Alaska that is similar to the offense the person was convicted of.

For the department's Records & Identification bureau to continue to accomplish a core service of providing public access to current information regarding sex offenders in Alaska, the determination that a person must register as a sex offender or child kidnapper in Alaska because of their requirement to register in another jurisdiction must be made timely and must be based on information that has been validated.

Considerable research and analysis of the criminal history background of persons with sex offense convictions outside of Alaska would be required to determine whether the offense of conviction is a registerable offense under the current laws of that jurisdiction and whether or not the person is subject to that jurisdiction's registration requirements. Coordination with the jurisdiction's sex offender central registry office would need to occur to obtain source documents and other relevant information on the person.

Additionally, it is anticipated that the department would need to continually monitor the status of registration laws and legal cases affecting sex offender registration in all jurisdictions to ensure a person required to register in Alaska under proposed AS 12.63.100(6)(D) continued to be subject to the registration requirements of the jurisdiction that their offense was committed in.

The department anticipates that these additional efforts will require one new full-time Criminal Justice Planner position. This position would be responsible to review and evaluate offender records with out-of-state sex offense convictions to determine the requirement to register under proposed AS 12.63.100(6)(D), to coordinate with other jurisdictions' sex offender central registry offices, and to monitor sex offender registration laws in other jurisdictions and any changes for possible impact to currently registered offenders.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 218

Analysis

This bill changes the name of the crime of "promoting prostitution" to "sex trafficking" in numerous sections in Alaska Statutes; makes changes to Alaska Statute to address recent court decisions regarding the distribution of indecent material to minors; adds AS 11.61.100 (Prostitution) to AS 11.66.145 (Forfeiture) relating to the forfeiture of property used in prostitution offenses; would define human trafficking and sex trafficking in the first degrees as serious felony offenses for purposes of the state conspiracy law; and requires a person who is required to register as a sex offender or child kidnapper in another jurisdiction to register in Alaska.

This bill will have no fiscal impact on the Division of Alaska State Troopers.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 218

Analysis

This bill changes the language used to describe conduct "promoting prostitution" to the phrase "sex trafficking," prohibits the intentional distribution of indecent material to persons known or believed to be less than 16 years of age, and prohibits possession with the intention to distribute indecent material to persons known or believed to be less than 16 years of age. This bill elevates the charge of prostitution from a B misdemeanor to an A misdemeanor if the subject person is under the age of 18. This bill includes "online enticement of a minor in the definition of "most serious felony." The bill also creates the crimes of: conspiracy to commit human trafficking, a class B felony which carries a sentence of up to 10 years imprisonment, and conspiracy to commit sex trafficking, a class A felony which carries a sentence of up to 20 years imprisonment. This bill amends the definition of "sex offense" for the purpose of sex offender registration requirements by including any conviction in another state that would require registration as a sex offender in that state.

Additionally, this bill amends Rule 38 of the Alaska Rules of Criminal Procedure by adding a new section that allows for testimony using two-way video conferencing. The bill also specifies that video conference testimony is allowed for witnesses whose testimony is used to determine competency of the defendant under this section, where the witness would be required to travel more than 50 miles to court, or where air travel to court is customary.

This bill will result in increases in felony cases and more complex sentencing for certain felonies. The Public Defender Agency does not have a reliable method for determining how many more persons may be charged for failing to register as a sex offender under the new definition or whether those charged would qualify for representation by the Public Defender. The Agency, therefore, submits an indeterminate fiscal note.

(Revised 8/17/2011 OMB)

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 218

Analysis

This bill adds human trafficking in the first degree and sex trafficking in the first degree to the conspiracy statues (AS 11.31.120). A person convicted of this new crime would be subject to punishment for a Class B felony. The average sentence for a Class B felony is five years. The average daily cost of care in a DOC facility is $134.90. Therefore, one individual convicted of conspiring to commit sex trafficking in the first degree could cost the Department of Corrections $246,192.50 based on a five year *average* sentence.

In the past five years, DOC has seen an average of 2.4 convictions for promoting prostitution (sex trafficking). However, DOC does not have any historical data on conspiracy to commit sex or human trafficking, as this would be a new crime if this legislation were to pass. Therefore, DOC is currently unable to quanitfy the fiscal impacts of the passage of this legislation.

The Department will closely monitor the potential future fiscal impacts should this legislation pass.

SENATE BILL NO. 218

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

Introduced: 2/22/12
Referred: Judiciary, Finance

A BILL

FOR AN ACT ENTITLED

"An Act relating to conspiracy to commit human trafficking in the first degree or sex trafficking in the first degree; relating to the crime of furnishing indecent material to minors, the crime of online enticement of a minor, the crime of prostitution, and the crime of sex trafficking; relating to forfeiture of property used in prostitution offenses; relating to sex offender registration; relating to testimony by video conference; adding Rule 38.3, Alaska Rules of Criminal Procedure; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 04.06.110 is amended to read:

Sec. 04.06.110. Peace officer powers. The director and the persons employed for the administration and enforcement of this title may, with the concurrence of the commissioner of public safety, exercise the powers of peace officers when those powers are specifically granted by the board. Powers granted by the board under this section may be exercised only when necessary for the enforcement of the criminally

punishable provisions of this title, regulations of the board, and other criminally punishable laws and regulations, including investigation of violations of laws against prostitution and **sex trafficking** [PROMOTING PROSTITUTION] described in **AS 11.66.100 - 11.66.135** [AS 11.66.100 - 11.66.130] and laws against gambling, promoting gambling, and related offenses described in AS 11.66.200 - 11.66.280.

* **Sec. 2.** AS 04.11.370(a) is amended to read:

(a) A license or permit shall be suspended or revoked if the board finds

(1) misrepresentation of a material fact on an application made under this title or a regulation adopted under this title;

(2) continuation of the manufacture, sale, or service of alcoholic beverages by the licensee or permittee would be contrary to the best interests of the public;

(3) failure on the part of the licensee to correct a defect that constitutes a violation of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or other laws after receipt of notice issued by the board or its agent;

(4) conviction of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010;

(5) conviction of an agent or employee of a licensee of a violation of this title, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates a law, regulation, or ordinance;

(6) failure of the licensee to comply with the public health, fire, or safety laws and regulations in the state;

(7) use of the licensed premises as a resort for illegal possessors or users of narcotics, prostitutes, or **sex traffickers** [PROMOTERS OF PROSTITUTION]; in addition to any other legally competent evidence, the character of the premises may be proved by the general reputation of the premises in the community as a resort for illegal possessors or users of narcotics, prostitutes, or **sex**

traffickers [PROMOTERS OF PROSTITUTION];

(8) occurrence of illegal gambling within the limits of the licensed premises;

(9) the licensee permitted a public offense involving moral turpitude to occur on the licensed premises;

(10) violation by a licensee of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010; or

(11) violation by an agent or employee of a licensee of a provision of this title, a condition or restriction imposed by the board, a regulation adopted under this title, or an ordinance adopted under AS 04.21.010, if the licensee is found by the board to have either knowingly allowed the violation or to have recklessly or with criminal negligence failed to act in accordance with the duty prescribed under AS 04.21.030 with the result that the agent or employee violates the law, condition or restriction, regulation, or ordinance.

*** Sec. 3.** AS 11.31.120(h)(2) is amended to read:

(2) "serious felony offense" means an offense

(A) against the person under AS 11.41, punishable as an unclassified or class A felony;

(B) involving controlled substances under AS 11.71, punishable as an unclassified, class A, or class B felony;

(C) that is criminal mischief in the first degree under AS 11.46.475; [OR]

(D) that is terroristic threatening in the first degree under AS 11.56.807**;**

(E) that is human trafficking in the first degree under AS 11.41.360; or

(F) that is sex trafficking in the first degree under AS 11.66.110.

*** Sec. 4.** AS 11.61.128(a) is amended to read:

(a) A person commits the crime of distribution of indecent material to minors

if

(1) the person, being 18 years of age or older, **intentionally** [KNOWINGLY] distributes **or possesses with intent to distribute any material described in (2) and (3) of this subsection** to **either**

(A) a child that the person knows is under 16 years of age; or

(B) another person that the person believes is a child under 16 years of age;

(2) the material is [ANOTHER PERSON ANY] material that **the person knows** depicts the following actual or simulated conduct:

(A) sexual penetration;

(B) the lewd touching of a person's genitals, anus, or female breast;

(C) masturbation;

(D) bestiality;

(E) the lewd exhibition of a person's genitals, anus, or female breast; or

(F) sexual masochism or sadism; **and**

(3) [(2)] the material is harmful to minors [; AND

(3) EITHER

(A) THE OTHER PERSON IS A CHILD UNDER 16 YEARS OF AGE; OR

(B) THE PERSON BELIEVES THAT THE OTHER PERSON IS A CHILD UNDER 16 YEARS OF AGE].

*** Sec. 5.** AS 11.66.100(b) is amended to read:

(b) **Except as provided in (c) of this section, prostitution** [PROSTITUTION] is a class B misdemeanor.

*** Sec. 6.** AS 11.66.100 is amended by adding a new subsection to read:

(c) Prostitution is a class C felony if

(1) the person described in (a)(1) of this section is under 18 years of age; the age of the person is a circumstance that does not require proof of a culpable

mental state; and

(2) the person described in (a)(2) of this section is 18 years of age or older and at least three years older than the person described in (a)(1) of this section.

*** Sec. 7.** AS 11.66.110(a) is amended to read:

(a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the first degree if the person

(1) induces or causes a person to engage in prostitution through the use of force;

(2) as other than a patron of a prostitute, induces or causes a person under 18 years of age to engage in prostitution; or

(3) induces or causes a person in that person's legal custody to engage in prostitution.

*** Sec. 8.** AS 11.66.110(c) is amended to read:

(c) Except as provided in (d) of this section, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree is a class A felony.

*** Sec. 9.** AS 11.66.120 is amended to read:

Sec. 11.66.120. Sex trafficking [PROMOTING PROSTITUTION] in the second degree. (a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the second degree if the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a prostitution enterprise other than a place of prostitution;

(2) procures or solicits a patron for a prostitute; or

(3) offers, sells, advertises, promotes or facilitates travel that includes commercial sexual conduct as enticement for the travel; in this paragraph, "commercial sexual conduct" means sexual conduct for which anything of value is given or received by any person.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the second degree is a class B felony.

*** Sec. 10.** AS 11.66.130 is amended to read:

Sec. 11.66.130. Sex trafficking [PROMOTING PROSTITUTION] in the third degree. (a) A person commits the crime of **sex trafficking** [PROMOTING

PROSTITUTION] in the third degree if, with intent to promote prostitution, the person

(1) manages, supervises, controls, or owns, either alone or in association with others, a place of prostitution;

(2) as other than a patron of a prostitute, induces or causes a person 18 years of age or older to engage in prostitution;

(3) as other than a prostitute receiving compensation for personally rendered prostitution services, receives or agrees to receive money or other property pursuant to an agreement or understanding that the money or other property is derived from prostitution; or

(4) engages in conduct that institutes, aids, or facilitates a prostitution enterprise.

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the third degree is a class C felony.

* **Sec. 11.** AS 11.66.135 is amended to read:

Sec. 11.66.135. Sex trafficking [PROMOTING PROSTITUTION] in the fourth degree. (a) A person commits the crime of **sex trafficking** [PROMOTING PROSTITUTION] in the fourth degree if the person engages in conduct that institutes, aids, or facilitates prostitution under circumstances not proscribed under AS 11.66.130(a)(4).

(b) **Sex trafficking** [PROMOTING PROSTITUTION] in the fourth degree is a class A misdemeanor.

* **Sec. 12.** AS 11.66.140 is amended to read:

Sec. 11.66.140. Corroboration of certain testimony not required. In a prosecution under **AS 11.66.110 - 11.66.135** [AS 11.66.110 - 11.66.130], it is not necessary that the testimony of the person whose prostitution is alleged to have been compelled or promoted be corroborated by the testimony of any other witness or by documentary or other types of evidence.

* **Sec. 13.** AS 11.66.145 is amended to read:

Sec. 11.66.145. Forfeiture. Property used to institute, aid, or facilitate, or received or derived from, a violation of **AS 11.66.100 - 11.66.135** [AS 11.66.110 -

11.66.135] shall be forfeited.

* **Sec. 14.** AS 11.81.250(a) is amended to read:

(a) For purposes of sentencing under AS 12.55, all offenses defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), and kidnapping, are classified on the basis of their seriousness, according to the type of injury characteristically caused or risked by commission of the offense and the culpability of the offender. Except for murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), and kidnapping, the offenses in this title are classified into the following categories:

(1) class A felonies, which characteristically involve conduct resulting in serious physical injury or a substantial risk of serious physical injury to a person;

(2) class B felonies, which characteristically involve conduct resulting in less severe violence against a person than class A felonies, aggravated offenses against property interests, or aggravated offenses against public administration or order;

(3) class C felonies, which characteristically involve conduct serious enough to deserve felony classification but not serious enough to be classified as A or B felonies;

(4) class A misdemeanors, which characteristically involve less severe violence against a person, less serious offenses against property interests, less serious offenses against public administration or order, or less serious offenses against public health and decency than felonies;

(5) class B misdemeanors, which characteristically involve a minor risk of physical injury to a person, minor offenses against property interests, minor offenses against public administration or order, or minor offenses against public health and decency;

(6) violations, which characteristically involve conduct inappropriate to an orderly society but which do not denote criminality in their commission.

* **Sec. 15.** AS 11.81.250(b) is amended to read:

(b) The classification of each felony defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, **sex trafficking in the first degree under AS 11.66.110(a)(2),** and kidnapping, is designated in the section defining it. A felony under **the** [ALASKA] law **of this state** defined outside this title for which no penalty is specifically provided is a class C felony.

* **Sec. 16.** AS 12.47.100 is amended by adding a new subsection to read:

(h) In a hearing to determine competency under this section, the court may allow the testimony of a witness, including the psychiatrist or psychologist who examined the defendant, to testify concerning the competency of the defendant by contemporaneous two-way video conference if the witness would be required to travel more than 50 miles to the court or lives in a place from which people customarily travel by air to the court. In this subsection, "contemporaneous two-way video conference"

(1) means a conference among people at different places by means of transmitted audio and video signals;

(2) includes all communication technologies that allow two or more places to interact by two-way video and audio transmissions simultaneously.

* **Sec. 17.** AS 12.55.035(b) is amended to read:

(b) Upon conviction of an offense, a defendant who is not an organization may be sentenced to pay, unless otherwise specified in the provision of law defining the

offense, a fine of no more than

(1) $500,000 for murder in the first or second degree, attempted murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, kidnapping, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), or misconduct involving a controlled substance in the first degree;

(2) $250,000 for a class A felony;

(3) $100,000 for a class B felony;

(4) $50,000 for a class C felony;

(5) $10,000 for a class A misdemeanor;

(6) $2,000 for a class B misdemeanor;

(7) $500 for a violation.

* **Sec. 18.** AS 12.55.125(i) is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, or **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) unlawful exploitation of a minor under AS 11.41.455(c)(2), online enticement of a minor under AS 11.41.452(e), or attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, or **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, online enticement of a minor under AS 11.41.452(d), unlawful exploitation of a minor under AS 11.41.455(c)(1), or distribution of child pornography under AS 11.61.125(e)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, distribution of child pornography under AS 11.61.125(e)(1), or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant

has two prior convictions for sexual felonies, 99 years.

*** Sec. 19.** AS 12.55.185(10) is amended to read:

(10) "most serious felony" means

(A) arson in the first degree, **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110(a)(2), **online enticement of a minor,** or any unclassified or class A felony prescribed under AS 11.41; or

(B) an attempt, or conspiracy to commit, or criminal solicitation under AS 11.31.110 of, an unclassified felony prescribed under AS 11.41;

*** Sec. 20.** AS 12.63.100(6) is amended to read:

(6) "sex offense" means

(A) a crime under AS 11.41.100(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit a sexual offense, or a similar offense under the laws of the other jurisdiction; in this subparagraph, "sexual offense" has the meaning given in AS 11.41.100(a)(3);

(B) a crime under AS 11.41.110(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit one of the following crimes, or a similar law of another jurisdiction:

(i) sexual assault in the first degree;

(ii) sexual assault in the second degree;

(iii) sexual abuse of a minor in the first degree; or

(iv) sexual abuse of a minor in the second degree; [OR]

(C) a crime, or an attempt, solicitation, or conspiracy to commit a crime, under the following statutes or a similar law of another jurisdiction:

(i) AS 11.41.410 - 11.41.438;

(ii) AS 11.41.440(a)(2);

(iii) AS 11.41.450 - 11.41.458;

(iv) AS 11.41.460 if the indecent exposure is before a person under 16 years of age and the offender has a previous conviction

for that offense;

(v) AS 11.61.125 - 11.61.128;

(vi) AS 11.66.110 or 11.66.130(a)(2) if the person who was induced or caused to engage in prostitution was 16 or 17 years of age at the time of the offense;

(vii) former AS 11.15.120, former 11.15.134, or assault with the intent to commit rape under former AS 11.15.160, former AS 11.40.110, or former 11.40.200; [OR]

(viii) AS 11.61.118(a)(2) if the offender has a previous conviction for that offense; **or**

(D) a crime in another jurisdiction that requires the person to register as a sex offender or child kidnapper in that jurisdiction;

*** Sec. 21.** AS 15.80.010(9) is amended to read:

(9) "felony involving moral turpitude" includes those crimes that are immoral or wrong in themselves such as murder, manslaughter, assault, sexual assault, sexual abuse of a minor, unlawful exploitation of a minor, robbery, extortion, coercion, kidnapping, incest, arson, burglary, theft, forgery, criminal possession of a forgery device, offering a false instrument for recording, scheme to defraud, falsifying business records, commercial bribe receiving, commercial bribery, bribery, receiving a bribe, perjury, perjury by inconsistent statements, endangering the welfare of a minor, escape, promoting contraband, interference with official proceedings, receiving a bribe by a witness or a juror, jury tampering, misconduct by a juror, tampering with physical evidence, hindering prosecution, terroristic threatening, riot, criminal possession of explosives, unlawful furnishing of explosives, **sex trafficking** [PROMOTING PROSTITUTION], criminal mischief, misconduct involving a controlled substance or an imitation controlled substance, permitting an escape, promoting gambling, possession of gambling records, distribution of child pornography, and possession of child pornography;

*** Sec. 22.** AS 28.15.046(c) is amended to read:

(c) The department may not issue a license under this section to an applicant who has been convicted of any of the following offenses within 20 years of the time of

application:

(1) sexual abuse of a minor in any degree under AS 11.41.434 - 11.41.440;

(2) sexual assault in any degree under AS 11.41.410 - 11.41.425;

(3) incest under AS 11.41.450;

(4) unlawful exploitation of a minor under AS 11.41.455;

(5) contributing to the delinquency of a minor under AS 11.51.130;

(6) a felony involving possession of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(7) a felony or misdemeanor involving distribution of a controlled or imitation controlled substance under AS 11.71 or AS 11.73;

(8) **sex trafficking** [PROMOTING PROSTITUTION] in the first or second degree under AS 11.66.110 or 11.66.120;

(9) indecent exposure in the first or second degree under AS 11.41.458 or 11.41.460.

* **Sec. 23.** AS 47.12.110(d) is amended to read:

(d) Notwithstanding (a) of this section, a court hearing on a petition seeking the adjudication of a minor as a delinquent shall be open to the public, except as prohibited or limited by order of the court, if

(1) the department files with the court a motion asking the court to open the hearing to the public, and the petition seeking adjudication of the minor as a delinquent is based on

(A) the minor's alleged commission of an offense, and the minor has knowingly failed to comply with all the terms and conditions required of the minor by the department or imposed on the minor in a court order entered under AS 47.12.040(a)(2) or 47.12.120;

(B) the minor's alleged commission of

(i) a crime against a person that is punishable as a felony;

(ii) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the

crime;

(iii) arson under AS 11.46.400 - 11.46.410;

(iv) burglary under AS 11.46.300;

(v) distribution of child pornography under AS 11.61.125;

(vi) **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110; or

(vii) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or AS 11.71.050; or

(C) the minor's alleged commission of a felony and the minor was 16 years of age or older at the time of commission of the offense when the minor has previously been convicted or adjudicated a delinquent minor based on the minor's commission of an offense that is a felony; or

(2) the minor agrees to a public hearing on the petition seeking adjudication of the minor as a delinquent.

*** Sec. 24.** AS 47.12.315(a) is amended to read:

(a) Notwithstanding AS 47.12.310, when an agency takes action under AS 47.12.040(a)(1) to adjust a matter, or when under AS 47.12.040(a)(2) the court directs the agency to adjust the matter, the agency

(1) shall, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense, if the minor was, under AS 47.12.020, previously alleged to be a delinquent minor on the basis of the minor's commission of at least one offense and, on the basis of that allegation, a state agency has, under AS 47.12.040(a), been asked to make a preliminary inquiry to determine if any action on that matter is appropriate, and, if the minor is alleged to be a delinquent minor on the basis of the minor's commission of

another offense, exercise of agency jurisdiction is based on the minor's alleged commission of that other offense, and that other offense is one of the following:

(A) a crime against a person that is punishable as a felony;

(B) a crime in which the minor employed a deadly weapon, as that term is defined in AS 11.81.900(b), in committing the crime;

(C) arson under AS 11.46.400 - 11.46.410;

(D) burglary under AS 11.46.300;

(E) distribution of child pornography under AS 11.61.125;

(F) **sex trafficking** [PROMOTING PROSTITUTION] in the first degree under AS 11.66.110; or

(G) misconduct involving a controlled substance under AS 11.71 involving the delivery of a controlled substance or the possession of a controlled substance with intent to deliver, other than an offense under AS 11.71.040 or 11.71.050; and

(2) may, for a minor who is at least 13 years of age at the time of commission of the offense, disclose to the public the name of the minor, the name or names of the parent, parents, or guardian of the minor, the action required by the agency to be taken by the minor under AS 47.12.060 to adjust the matter, and information about the offense exclusive of information that identifies the victim of the offense if the minor has knowingly failed to comply with all terms and conditions required of the minor by the agency to adjust the matter under AS 47.12.060(b).

*** Sec. 25.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DIRECT COURT RULE AMENDMENT. The Alaska Rules of Criminal Procedure are amended by adding a new section to read:

Rule 38.3. Video Conference Testimony.

(a) **In General.** In every trial the testimony of witnesses shall be taken in open court, unless otherwise provided by statute or rule.

(b) **Testimony by Video Conference.** The parties may agree to take testimony from a witness by contemporaneous two-way video conference presented in open court. Absent the parties' agreement, the court may authorize the

contemporaneous two-way video conference testimony of a witness if

(1) the requesting party establishes that testimony by two-way video conference is necessary to further an important public policy;

(2) the requesting party establishes that the witness is unavailable; and

(3) the testimony is given under oath and subject to cross-examination.

(c) **Procedures for Taking Video Conference Testimony.** If the trial court authorizes video conference testimony under (b) of this rule, it shall determine the procedures for taking the contemporaneous two-way video conference testimony. The parties, the court, the trier of fact, and the public must be able to see and hear the witness; and the witness must see and hear the courtroom proceedings, including the defendant, as if the witness were sitting in the courtroom's witness stand. The persons who are present with the witness must be identified. The parties may move to exclude any person other than the video conference technician from the witness's presence; the court, in its discretion, may exclude a person other than the video conference technician from the presence of the witness.

(d) **Definitions.**

(1) Contemporaneous Two-Way Video Conference. Contemporaneous two-way video conference means a conference among people at different places by means of transmitted audio and video signals. It includes all communication technologies that allow two or more places to interact by two-way video and audio transmissions simultaneously.

(2) Unavailable. In this rule, a witness is unavailable if

(A) by clear and convincing evidence the court finds under Rule 804(a)(4) or (5), Alaska Rules of Evidence, or Rule 15(e)(4), Alaska Rules of Criminal Procedure, that the witness is unavailable;

(B) by clear and convincing evidence the court finds that under the circumstances the witness is unavailable; or

(C) the parties agree that the witness is unavailable.

*** Sec 26.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. (a) Sections 1, 2, 7 - 11, 14, 17 - 19, 21 - 24, and 27 of this Act

apply to offenses committed before, on, or after the effective date of the Act.

(b) Sections 3 - 6, 12, 13, 16, 20, and 25 of this Act apply to offenses committed on or after the effective date of this Act.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the heading of AS 11.66.110 from "Promoting prostitution in the first degree" to "Sex trafficking in the first degree".

*** Sec. 28.** This Act takes effect July 1, 2012.

CS FOR SENATE BILL NO. 110( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to human trafficking; and relating to sentencing in criminal cases involving sex offenses."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 11.41 is amended by adding a new section to read:

Sec. 11.41.355. Human trafficking in the first degree. (a) A person commits the crime of human trafficking in the first degree if being 18 years of age or older the person compels, entices, or induces another person under 18 years of age to come to this state or move 100 miles or more within this state to engage in sexual conduct, adult entertainment, or an act described in AS 11.41.455(a)(1) - (7) in the state by

(1) force or threat of force against any person; or

(2) deception.

(b) It is an affirmative defense to a prosecution under (a)(2) of this section that, at the time of the offense, the person compelled, enticed, or induced was 16 years of age or older, and the defendant and the person compelled, enticed, or induced were in a consensual dating or sexual relationship.

(c) Human trafficking in the first degree is an unclassified felony.

* **Sec. 2.** AS 11.41.360(a) is amended to read:

(a) A person commits the crime of human trafficking in the **second** [FIRST] degree if **being 18 years of age or older** the person compels**, entices,** or induces another person **18 years of age or older** to come to this state **or move 100 miles or more within this state** to engage in sexual conduct **or** [,] adult entertainment [, OR LABOR] in the state by

(1) force or threat of force against any person**;** [,] or

(2) [BY] deception.

* **Sec. 3.** AS 11.41.360(c) is amended to read:

(c) Human trafficking in the **second** [FIRST] degree is a class A felony.

* **Sec. 4.** AS 11.41.360 is amended by adding a new subsection to read:

(d) It is an affirmative defense to a prosecution under (a)(2) of this section that, at the time of the offense, the person compelled**, enticed,** or induced was 16 years of age or older, and the defendant and the person compelled or induced were in a consensual dating or sexual relationship.

* **Sec. 5.** AS 11.41.365 is amended to read:

Sec. 11.41.365. Human trafficking in the third [SECOND] degree. (a) A person commits the crime of human trafficking in the **third** [SECOND] degree if the person

(1) being 18 years of age or older compels, entices, or induces another person to come to this state or move 100 miles or more within this state to engage in labor in this state by force or threat of force against any person, or by deception; or

(2) obtains a benefit from the commission of human trafficking under **AS 11.41.355, 11.41.360, or (1) of this subsection** [AS 11.41.360,] with reckless disregard that the benefit is a result of the trafficking.

(b) Human trafficking in the **third** [SECOND] degree is a class B felony.

* **Sec. 6.** AS 11.41.370 is amended by adding new paragraphs to read:

(4) "adult entertainment" means the conduct described in AS 23.10.350(f)(1) - (3);

(5) "deception" has the meaning given in AS 11.46.180;

(6) "sexual conduct" has the meaning given in AS 11.66.150.

*** Sec. 7.** AS 11.81.250(a) is amended to read:

(a) For purposes of sentencing under AS 12.55, all offenses defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, promoting prostitution in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355,** and kidnapping, are classified on the basis of their seriousness, according to the type of injury characteristically caused or risked by commission of the offense and the culpability of the offender. Except for murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, promoting prostitution in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355,** and kidnapping, the offenses in this title are classified into the following categories:

(1) class A felonies, which characteristically involve conduct resulting in serious physical injury or a substantial risk of serious physical injury to a person;

(2) class B felonies, which characteristically involve conduct resulting in less severe violence against a person than class A felonies, aggravated offenses against property interests, or aggravated offenses against public administration or order;

(3) class C felonies, which characteristically involve conduct serious enough to deserve felony classification but not serious enough to be classified as A or B felonies;

(4) class A misdemeanors, which characteristically involve less severe violence against a person, less serious offenses against property interests, less serious offenses against public administration or order, or less serious offenses against public

health and decency than felonies;

(5) class B misdemeanors, which characteristically involve a minor risk of physical injury to a person, minor offenses against property interests, minor offenses against public administration or order, or minor offenses against public health and decency;

(6) violations, which characteristically involve conduct inappropriate to an orderly society but which do not denote criminality in their commission.

*** Sec. 8.** AS 12.55.085(f) is amended to read:

(f) The court may not suspend the imposition of sentence of a person who

(1) is convicted of a violation of AS 11.41.100 - 11.41.220, 11.41.260 - 11.41.320, **11.41.355 - 11.41.365** [11.41.360 - 11.41.370], 11.41.410 - 11.41.530, AS 11.46.400, or AS 11.61.125 - 11.61.128;

(2) uses a firearm in the commission of the offense for which the person is convicted; or

(3) is convicted of a violation of AS 11.41.230 - 11.41.250 or a felony and the person has one or more prior convictions for a misdemeanor violation of AS 11.41 or for a felony or for a violation of a law in this or another jurisdiction having similar elements to an offense defined as a misdemeanor in AS 11.41 or as a felony in this state; for the purposes of this paragraph, a person shall be considered to have a prior conviction even if that conviction has been set aside under (e) of this section or under the equivalent provision of the laws of another jurisdiction.

*** Sec. 9.** AS 12.55.125(i) is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, [OR] promoting prostitution in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree under AS 11.41.355** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim

was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) unlawful exploitation of a minor under AS 11.41.455(c)(2), online enticement of a minor under AS 11.41.452(e), or attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, [OR] promoting prostitution in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree under AS 11.41.355** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical

injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, online enticement of a minor under AS 11.41.452(d), unlawful exploitation of a minor under AS 11.41.455(c)(1), or distribution of child pornography under AS 11.61.125(e)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, distribution of child pornography under AS 11.61.125(e)(1), or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term

of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years.

*** Sec. 10.** AS 12.63.100(6) is amended to read:

(6) "sex offense" means

(A) a crime under AS 11.41.100(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit a sexual offense, or a similar offense under the laws of the other jurisdiction; in this subparagraph, "sexual offense" has the meaning given in AS 11.41.100(a)(3);

(B) a crime under AS 11.41.110(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit one of the following crimes, or a similar law of another jurisdiction:

(i) sexual assault in the first degree;

(ii) sexual assault in the second degree;

(iii) sexual abuse of a minor in the first degree; or

(iv) sexual abuse of a minor in the second degree; or

(C) a crime, or an attempt, solicitation, or conspiracy to commit a crime, under the following statutes or a similar law of another jurisdiction:

(i) AS 11.41.410 - 11.41.438;

(ii) AS 11.41.440(a)(2);

(iii) AS 11.41.450 - 11.41.458;

(iv) AS 11.41.460 if the indecent exposure is before a person under 16 years of age and the offender has a previous conviction for that offense;

(v) AS 11.61.125 - 11.61.128;

(vi) AS 11.66.110 or 11.66.130(a)(2) if the person who was induced or caused to engage in prostitution was 16 or 17 years of age at the time of the offense;

(vii) former AS 11.15.120, former 11.15.134, or assault with the intent to commit rape under former AS 11.15.160, former AS 11.40.110, or former 11.40.200; or

(viii) AS 11.61.118(a)(2) if the offender has a previous conviction for that offense; **or**

(ix) AS 11.41.355;

*** Sec. 11.** AS 11.41.360(b) is repealed.

CS FOR SENATE BILL NO. 110( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to human trafficking; and relating to sentencing in criminal cases involving sex offenses."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.41 is amended by adding a new section to read:

Sec. 11.41.355. Human trafficking in the first degree. (a) A person commits the crime of human trafficking in the first degree if the person violates AS 11.41.360 by compelling, enticing, or inducing another person to engage in sexual conduct, adult entertainment, or an act described in AS 11.41.455(a)(1) - (7), and the other person compelled or induced is under 18 years of age.

(b) Human trafficking in the first degree is an unclassified felony.

*** Sec. 2.** AS 11.41.360(a) is amended to read:

(a) A person commits the crime of human trafficking in the **second** [FIRST] degree if **being 18 years of age or older** the person compels**, entices,** or induces another person **under 18 years of age and at least four years younger than the**

offender to come to this state **or move from one place to another over a distance greater than 100 miles inside the state** to engage in sexual conduct, adult entertainment, or labor in the state by force or threat of force against any person, or by deception.

*** Sec. 3.** AS 11.41.360(c) is amended to read:

(c) Human trafficking in the **second** [FIRST] degree is a class A felony.

*** Sec. 4.** AS 11.41.365 is amended to read:

Sec. 11.41.365. Human trafficking in the third [SECOND] degree. (a) A person commits the crime of human trafficking in the **third** [SECOND] degree if the person obtains a benefit from the commission of human trafficking under **AS 11.41.355 or 11.41.360** [AS 11.41.360,] with reckless disregard that the benefit is a result of the trafficking.

(b) Human trafficking in the **third** [SECOND] degree is a class B felony.

*** Sec. 5.** AS 11.41.370 is amended by adding new paragraphs to read:

(4) "adult entertainment" means the conduct described in AS 23.10.350(f)(1) - (3);

(5) "sexual conduct" has the meaning given in AS 11.66.150.

*** Sec. 6.** AS 11.81.250(a) is amended to read:

(a) For purposes of sentencing under AS 12.55, all offenses defined in this title, except murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled substance in the first degree, promoting prostitution in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355,** and kidnapping, are classified on the basis of their seriousness, according to the type of injury characteristically caused or risked by commission of the offense and the culpability of the offender. Except for murder in the first and second degree, attempted murder in the first degree, solicitation to commit murder in the first degree, conspiracy to commit murder in the first degree, murder of an unborn child, sexual assault in the first degree, sexual abuse of a minor in the first degree, misconduct involving a controlled

substance in the first degree, promoting prostitution in the first degree under AS 11.66.110(a)(2), **human trafficking in the first degree under AS 11.41.355.** and kidnapping, the offenses in this title are classified into the following categories:

(1) class A felonies, which characteristically involve conduct resulting in serious physical injury or a substantial risk of serious physical injury to a person;

(2) class B felonies, which characteristically involve conduct resulting in less severe violence against a person than class A felonies, aggravated offenses against property interests, or aggravated offenses against public administration or order;

(3) class C felonies, which characteristically involve conduct serious enough to deserve felony classification but not serious enough to be classified as A or B felonies;

(4) class A misdemeanors, which characteristically involve less severe violence against a person, less serious offenses against property interests, less serious offenses against public administration or order, or less serious offenses against public health and decency than felonies;

(5) class B misdemeanors, which characteristically involve a minor risk of physical injury to a person, minor offenses against property interests, minor offenses against public administration or order, or minor offenses against public health and decency;

(6) violations, which characteristically involve conduct inappropriate to an orderly society but which do not denote criminality in their commission.

*** Sec. 7.** AS 12.55.085(f) is amended to read:

(f) The court may not suspend the imposition of sentence of a person who

(1) is convicted of a violation of AS 11.41.100 - 11.41.220, 11.41.260 - 11.41.320, **11.41.355 - 11.41.365** [11.41.360 - 11.41.370], 11.41.410 - 11.41.530, AS 11.46.400, or AS 11.61.125 - 11.61.128;

(2) uses a firearm in the commission of the offense for which the person is convicted; or

(3) is convicted of a violation of AS 11.41.230 - 11.41.250 or a felony and the person has one or more prior convictions for a misdemeanor violation of

AS 11.41 or for a felony or for a violation of a law in this or another jurisdiction having similar elements to an offense defined as a misdemeanor in AS 11.41 or as a felony in this state; for the purposes of this paragraph, a person shall be considered to have a prior conviction even if that conviction has been set aside under (e) of this section or under the equivalent provision of the laws of another jurisdiction.

*** Sec. 8.** AS 12.55.125(i) is amended to read:

(i) A defendant convicted of

(1) sexual assault in the first degree, sexual abuse of a minor in the first degree, [OR] promoting prostitution in the first degree under AS 11.66.110(a)(2), **or human trafficking in the first degree under AS 11.41.355** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) less than 13 years of age, 25 to 35 years;

(ii) 13 years of age or older, 20 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 30 to 40 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 35 to 45 years;

(E) if the offense is a third felony conviction and the defendant is not subject to sentencing under (F) of this paragraph or (*l*) of this section, 40 to 60 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(2) unlawful exploitation of a minor under AS 11.41.455(c)(2), online enticement of a minor under AS 11.41.452(e), or attempt, conspiracy, or solicitation to commit sexual assault in the first degree, sexual abuse of a minor in the first degree, [OR] promoting prostitution in the first degree under AS 11.66.110(a)(2)**, or human trafficking in the first degree under AS 11.41.355** may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, the offense does not involve circumstances described in (B) of this paragraph, and the victim was

(i) under 13 years of age, 20 to 30 years;

(ii) 13 years of age or older, 15 to 30 years;

(B) if the offense is a first felony conviction and the defendant possessed a firearm, used a dangerous instrument, or caused serious physical injury during the commission of the offense, 25 to 35 years;

(C) if the offense is a second felony conviction and does not involve circumstances described in (D) of this paragraph, 25 to 35 years;

(D) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 30 to 40 years;

(E) if the offense is a third felony conviction, the offense does not involve circumstances described in (F) of this paragraph, and the defendant is not subject to sentencing under (*l*) of this section, 35 to 50 years;

(F) if the offense is a third felony conviction, the defendant is not subject to sentencing under (*l*) of this section, and the defendant has two prior convictions for sexual felonies, 99 years;

(3) sexual assault in the second degree, sexual abuse of a minor in the second degree, online enticement of a minor under AS 11.41.452(d), unlawful exploitation of a minor under AS 11.41.455(c)(1), or distribution of child pornography under AS 11.61.125(e)(2) may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following

presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, five to 15 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, 10 to 25 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 15 to 30 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 20 to 35 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years;

(4) sexual assault in the third degree, incest, indecent exposure in the first degree, possession of child pornography, distribution of child pornography under AS 11.61.125(e)(1), or attempt, conspiracy, or solicitation to commit sexual assault in the second degree, sexual abuse of a minor in the second degree, unlawful exploitation of a minor, or distribution of child pornography, may be sentenced to a definite term of imprisonment of not more than 99 years and shall be sentenced to a definite term within the following presumptive ranges, subject to adjustment as provided in AS 12.55.155 - 12.55.175:

(A) if the offense is a first felony conviction, two to 12 years;

(B) if the offense is a second felony conviction and does not involve circumstances described in (C) of this paragraph, eight to 15 years;

(C) if the offense is a second felony conviction and the defendant has a prior conviction for a sexual felony, 12 to 20 years;

(D) if the offense is a third felony conviction and does not involve circumstances described in (E) of this paragraph, 15 to 25 years;

(E) if the offense is a third felony conviction and the defendant has two prior convictions for sexual felonies, 99 years.

* **Sec. 9.** AS 12.63.100(6) is amended to read:

(6) "sex offense" means

(A) a crime under AS 11.41.100(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit a

sexual offense, or a similar offense under the laws of the other jurisdiction; in this subparagraph, "sexual offense" has the meaning given in AS 11.41.100(a)(3);

(B) a crime under AS 11.41.110(a)(3), or a similar law of another jurisdiction, in which the person committed or attempted to commit one of the following crimes, or a similar law of another jurisdiction:

(i) sexual assault in the first degree;

(ii) sexual assault in the second degree;

(iii) sexual abuse of a minor in the first degree; or

(iv) sexual abuse of a minor in the second degree; or

(C) a crime, or an attempt, solicitation, or conspiracy to commit a crime, under the following statutes or a similar law of another jurisdiction:

(i) AS 11.41.410 - 11.41.438;

(ii) AS 11.41.440(a)(2);

(iii) AS 11.41.450 - 11.41.458;

(iv) AS 11.41.460 if the indecent exposure is before a person under 16 years of age and the offender has a previous conviction for that offense;

(v) AS 11.61.125 - 11.61.128;

(vi) AS 11.66.110 or 11.66.130(a)(2) if the person who was induced or caused to engage in prostitution was 16 or 17 years of age at the time of the offense;

(vii) former AS 11.15.120, former 11.15.134, or assault with the intent to commit rape under former AS 11.15.160, former AS 11.40.110, or former 11.40.200; or

(viii) AS 11.61.118(a)(2) if the offender has a previous conviction for that offense; **or**

(ix) AS 11.41.355:

*** Sec. 10.** AS 11.41.360(b)(1) and 11.41.360(b)(3) are repealed.

Alaska State Senate
State Capitol
Juneau AK 99801-1182

Dear Senator Wieiechowski:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing Senate Bill 110, an act relating to human trafficking; and relating to sentencing and conditions of probation in criminal cases involving sex offenses.

The APOA State Board of Directors recently reviewed this proposed legislation and decided to unanimously support this bill.

We thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515, if there is anything our organization can do to assist in the passage of this bill.

Sincerely,

John Lucking, Jr.

The Honorable Senator Wielechowski
State Capitol, Room 101
Juneau, Alaska 99801

Re: Senate Bill, 110 Human Trafficking/Sex Offenses

I write on behalf of the Violent Crimes Compensation Board in support of Senate Bill 110.

The proposed legislation strengthens existing state legislation by extending the definition of trafficking to include the movement or enticement of young women within the state of Alaska, not just across state lines.

As Board members, we have seen the terrible results of human trafficking on the lives of young women and their families. Very often these victims are young vulnerable native women who have left their villages and come to Anchorage, only to find themselves homeless and alone. These women are specifically targeted by these predators, given enticements in the form of clothing, housing and jewellery, and are then abused, beaten, sexually assaulted, deliberately addicted to controlled substances and alcohol and then prostituted out to make money for their abusers.

Over the course of the last few years, the Board has seen 23 claims stemming from federal human trafficking investigations, and has paid out over $150,000 in compensation or assistance to trafficking victims. This compensation has been in the form of payment for mental health counseling, and for drug and alcohol treatment programs, as well as for medical expenses, and assistance in relocation to a safer environment. None of these 23 claims were for victims trafficked *to* Alaska. All were already Alaskan residents.

This proposed legislation closes the gap, and the Board strongly supports its passage

Respectfully submitted

Gerad Godfrey
Chair, Violent Crimes Compensation Board

2012 LEGISLATIVE SESSION

BILL NO. SB110

Analysis

This bill expands the range of conduct that may be prosecuted as human trafficking to include enticing someone to move within the state of Alaska to engage in sexual conduct or adult entertainment by force, threat or deception. It would also make human trafficking an unclassified felony if the victim is a minor.

The agency cannot reliably predict the number of additional cases that may be prosecuted as a result of this bill. Accordingly, the Public Defender Agency has submitted an indeterminate fiscal note.

BILL NO. SB110

Analysis

This bill amends AS 11.41 by adding a new section, AS 11.41.355 human trafficking in the first degree; amends AS 11.41.360 to human trafficking in the second degree; amends AS 11.41.365 to human trafficking in the third degree; amends AS 12.63.100(6) to include the crime of human trafficking in the first degree to the definition of "sex offense"; and amends statutes regarding the sentencing and conditions of probation in criminal cases involving sex offenses.

It is not anticipated that this bill will increase the number of investigations conducted by the department. There is no fiscal impact to the AST as a result of this legislation.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 110

Analysis

SB 110 amends existing human trafficking laws and levels of crimes for human trafficking. If passed, this bill would make human trafficking in the first degree an unclassified felony; human trafficking in the second degree a class A felony; and human trafficking in the third degree a class B felony.

This bill also includes provisions that could restrict sex offenders from living within 500 feet of a school.

The Department of Corrections is unable to determine the fiscal impacts of the passage of this legislation, as we cannot estimate the total number of actual violations that will occur. The Department of Corrections will closely monitor potential future fiscal impacts of this legislation.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB110
2012 LEGISLATIVE SESSION

Analysis

This bill expands the range of conduct that may be prosecuted as human trafficking to include enticing someone to move within the state of Alaska to engage in sexual conduct or adult entertainment by force, threat, or deception. It would also make human trafficking an unclassifed felony if the victim is a minor.

The agency cannot reliably predict the number of additional cases that may be prosecuted as a result of this bill. Accordingly, the Office of Public Advocacy has submitted an indeterminate fiscal note.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 110
2012 LEGISLATIVE SESSION

Analysis

SB 110 adds a new, more serious level of human trafficking. It would adopt an unclassified felony if a person induces, compels, or entices a person under 18 years old to move from one place to another and engage in sexual conduct, adult entertainment, or prohibited acts.

The bill also amends current law prohibiting human trafficking by making it a class A felony to compel, entice, or induce another person to move from one place to another in the state to engage in sexual conduct, adult entertainment, or forced labor.

This bill would have an indeterminate fiscal impact to the Department of Law.

CHAIR FRENCH noted that the administration is pretty consistent about supporting its own bills.

MS. RUTHERDALE said that DOL does not take a position on bills. She said that every suggestion she made, and every change that OCS made, was incorporated into the bill.

SENATOR PASKVAN said that he is taking this to mean that the language in the bill is the best that can be achieved.

MS. RUTHERDALE replied that is correct. She said that as a practicing lawyer she does not want a bill that will cause any harm and she does not believe that this bill will do so.

2:28:13 PM
CHAIR FRENCH noted there is support from many different associations, such as the Alaska Association of Homes for Children, the Advisory Board on Alcoholism and Drug Abuse, the National Association of Social Workers, the Alaska Behavioral Health Association, Alaska Children's Services, and Denali Family Services.

CHAIR FRENCH announced that he would hold SB 82 in committee in order to see a document with the amendment included.

SB 110-HUMAN TRAFFICKING/SEX OFFENSES

2:29:11 PM
CHAIR FRENCH announced the consideration of SB 110.

2:29:19 PM
SENATOR WIELECHOWSKI said the committee has heard that there are human traffickers targeting young Native girls, and it is a serious problem. He noted that putting someone on a plane from a village to Anchorage for the purpose of sex trafficking should be made illegal. There is a trafficking law, but it only applies to transporting someone from out of state, not instate. He noted that the bill does a few things: Section 1 changes human trafficking in the first degree by adding a provision for persons under age 18 and increasing the penalty for that; this section also adds the word "enticing."

Section 2 also adds a provision about "entices", and it adds that to "move from one place to another in the state" constitutes the crime of human trafficking.

He noted that there are concerns on the broad nature of the language. He feels that encouraging someone to move from one part of the state to another is just as serious as encouraging them to move from Seattle to Alaska.

Another major provision is in Section 8, which says a judge should have authority to remove sex offenders who live near schools, but is not a blanket application to all convicted sex offenders.

2:34:21 PM
LAUREN RICE, Director of Public Affairs, Covenant House Alaska (CHA), testified in support of SB 110. CHA offers shelter for unaccompanied youth--emergency shelter, food, healthcare, access to permanent housing. It is located in Anchorage, but about 44 percent of the children come from outside of Anchorage and almost 45 percent are Alaska Native.

Covenant House Alaska began taking an active role in combating human trafficking about five years ago. Both the Anchorage Police Department (APD) and the FBI have given them long term trafficking prevention strategies. CHA has witnessed a visible decrease around its area, but this is still very prevalent in the state. CHA has helped kids coming from other countries, out of state, and in state. Youth in need of protection against active human trafficking are identified on a monthly basis.

She noted the roots of trafficking are found in childhood trauma; the vast majority of youth being trafficked are victims of sexual or physical violence in their younger years. The issue requires a holistic approach to really protect Alaska's children. One young woman told CHA staff she could stay at home and be raped by her grandfather, or she could be paid for the same act. Covenant House Alaska is committed to giving youth choices beyond human trafficking.

2:39:07 PM
CHAIR FRENCH asked what the scope of the problem is within the state.

MS. RICE replied CHA used to collect data on an informal basis and have become more sophisticated about it. They wanted to make sure that they had services to help, depending on the answers to these questions. She said they know that about 50 percent of the girls in their facility have been sexually abused, and 35 percent of their kids (both male and female) have engaged in "survival sex" or informal prostitution in order to get the

commodities that they need. Of those, probably half have been tied to active trafficking situations. But that number is truly a guess; it used to be significantly more visible and has become less so because APD has targeted individuals who were hanging around outside the shelter and targeting kids. However, they know that kids are still being trafficked on the Internet, and there is proof of that.

2:41:51 PM
REGINA CHENAULT, representing herself, testified in support of SB 110. She is a trauma surgeon who has treated patients who have experienced violent sexual crimes. She serves on the state violent crimes board, and last year Sexual Assault Against Minors were the highest growing category of crimes. They don't know if that is due to increased reporting or increased occurrence of assaults. She also serves on the State Trauma Committee, where they are tallying injuries.

She said she is a mother of three and fears this could happen to her children, because it crosses all groups and all lines. She noted that 85 percent of Alaska Natives serving a prison sentence for sexual assault of minors were sexually assaulted themselves as minors; this is a cycle the state needs to end. Traffickers are even targeting children who hang out at malls. She said that the definition of trafficking should be strong, and should include trafficking within the state. She noted the Webster Case; there are victims who now have children, drug dependency, and lifelong STDs.

She recently learned that a group of Koreans are targeting children in the villages. There's a scheme set up where a customer cannot get to the point of having sex with a child until they first hire an adult prostitute and have sex with him or her. In this way, they ensure it's not a sting operation. This ring seems to be the fastest growing group that is targeting children in Alaska.

2:48:20 PM
ANNE CARPENETI, Criminal Division, Department of Law said that this is a serious problem in the state. She said she had a long conversation with Sergeant Lacey from APD and learned that the problem is enforcement. For her, trafficking is moving individuals from one place to another. But the new trend is what used to be called "pimping" or "promoting prostitution."

CHAIR FRENCH asked where promoting prostitution comes in, and what is missing from that statute.

MS. CARPENETI replied nothing; promoting prostitution in the first degree is an unclassified felony if the person is under age 18. It is much easier to prove promoting prostitution than trafficking. Under this bill DOL has to prove force, deception, and movement for trafficking. This does not attack the problem of promoting prostitution. It can be called trafficking, but it is really promoting prostitution of young women. Some young women actually come to urban areas on their own with no support, and they become easy victims. Right now, she said, no prosecutor would bring charges under this bill when he or she could bring charges under promoting prostitution.

2:51:29 PM
SENATOR COGHILL said one of the problems that he sees is that some people are surviving off of sexual behavior. He asked if this would still be under the prostitution issue or would the trafficking bill take care of this.

MS. CARPENETI replied if you induce or cause someone to engage in commercial sex, it would be considered prostitution. The problem is getting the victims to let them know who the perpetrators are. She said the range of penalty for a first felony conviction for promoting prostitution of a child under age 18 is 20-30 years, depending on the age of the victim. If the victim is under 13, the penalty would be 25-35 years; if the victim is between 13 and 18, the penalty would be 20-30 years. Current law takes this very seriously.

SENATOR WIELECHOWSKI said he has a slightly different take on it. Section 2 deals with human trafficking. It deals with prostitution, but also adult entertainment--forcing someone to work through force, or threat of force. When speaking about prostitution you are only speaking talking about AS 11.41.360.

MS. CARPENETI replied there is a crime in Title 23 dealing with forced labor. She said DOL has suggestions. For example, the forced labor of young children in Title 23 for commercial sex is a class C felony. She agreed that prostitution does not deal with labor. The problem in the state is not the trafficking, it's the prostitution. People aren't found and moved from one place to another; they are found in one place and victimized.

CHAIR FRENCH asked if she could go back over the last five years and let the committee know how many trafficking prosecutions there have been and how many prostitution prosecutions.

SENATOR COGHILL clarified how many charges, versus convictions.

MS. CARPENETI said that there are some concerns about the second degree language, which DOL found to be overbroad. "Entices" is a very broad word.

SENATOR WIELECHOWSKI said he and his staff have been working with Ms. Carpeneti.

2:56:41 PM
QUINLAN STEINER, Director, Alaska Public Defender Agency, said he has the same concerns that Ms. Carpeneti expressed. Definition of these words becomes quite broad. Enticing does not imply changing someone's mind or forcing an individual to do something other than simply offering an enticement. "Move from one place to another" might run into some constitutional problems. The combination of the three concepts causes him some concern on how this might be charged.

2:58:52 PM
DOUG GARDINER, Director, Legislative Legal Services, introduced himself and said he was available to answer questions.

CHAIR FRENCH said that Senator Wielechowski says that the word enticed comes from statutes in other states.

MR. GARDNER replied this term comes from the on-line statute in existing Alaska Statutes. He said he does not have a specific definition for entice, and is not aware of any case law in the state that defines this. He noted that Senator Coghill made a good point; what would happen if you moved an underage person within the state for sexual purposes, but DOL was unable to prove there was some type of agreement for prostitution. In that case, DOL might actually be better off with the proposal for promoting human trafficking.

3:01:34 PM
Chair French announced he would hold SB 110 in committee.
There being no further business to come before the committee, Chair French adjourned the meeting at 3:01 p.m.

CS FOR SENATE BILL NO. 128( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR MCGUIRE

A BILL

FOR AN ACT ENTITLED

"An Act relating to brewery licenses and brewery special events permits."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 04.11.080 is amended by adding a new paragraph to read:

(22) brewery special events permit.

*** Sec. 2.** AS 04.11.130(e) is amended to read:

(e) **Except as provided in (f) of this section and unless** [UNLESS] prohibited by AS 04.16.030, a holder of a brewery license may sell not more than 36 ounces a day of the brewery's product to a person for consumption on the premises if

(1) the brewery does not allow live entertainment, televisions, pool tables, dart games, dancing, electronic or other games, game tables, or other recreational or gaming opportunities on the premises where the consumption occurs;

(2) the brewery does not provide seats at the counter or bar where the product is served; and

(3) the room where the consumption occurs is not open before 9:00 a.m. and serving of the product ends not later than **10:00** [8:00] p.m.

*** Sec. 3.** AS 04.11.130 is amended by adding a new subsection to read:

(f) A brewery licensed under this section is eligible for a brewery special events permit that authorizes the holder to sell or dispense beer manufactured on the brewery premises for consumption on the premises for a specific occasion and for a limited period of time. The board may issue a brewery special events permit if an application for the permit is received in the main office of the board at least 10 days before the date of the event for which the permit is requested. The application must be signed by the holder of the brewery license or the holder's authorized agent, must include the written approval of the law enforcement agency having jurisdiction over the brewery premises, and must be submitted with a fee of $50. The board may not issue to a holder of a brewery license more than five brewery special events permits in a calendar year. AS 04.11.130(e)(1) and (2) do not apply to a brewery special events permit issued under this subsection.

*** Sec. 4.** AS 04.21.025(a) is amended to read:

(a) As a condition of issuance or renewal of a license and selling alcoholic beverages under a license, the board shall require a licensee who sells or serves alcoholic beverages and a licensee's agents and employees who sell or serve alcoholic beverages or check the identification of a patron to complete an alcohol server education course approved by the board, if the license is for a

(1) beverage dispensary;

(2) restaurant or eating place;

(3) club;

(4) package store;

(5) recreational site;

(6) pub;

(7) conditional contractor**;**

(8) a brewery conducting activities under AS 04.11.130(e) and (f).

*** Sec. 5.** AS 04.21.065(a) is amended to read:

(a) A holder of one of the following types of licenses or permits shall post on the licensed or designated premises three separate warning signs as described in (b) of this section:

(1) beverage dispensary license;

(2) restaurant or eating place license;

(3) club license;

(4) brewery license **or brewery special events permit**; this paragraph applies only to a brewery that permits a person to sample portions of the brewery's product;

(5) package store license;

(6) common carrier dispensary license;

(7) recreational site license;

(8) pub license;

(9) winery license; this paragraph applies only to a winery that permits a person to sample portions of the winery's product;

(10) caterer's permit;

(11) special events permit;

(12) conditional contractor's permit;

(13) another license or permit issued by the board authorizing consumption of alcoholic beverages.

Senate Bill 128 | Denali Brewing| Craft Beer made in Alaska

Respectfully addressed Board Chair and Senate Committee Members,

We write to express our support for Senate Bill 128. Denali Brewing is located in Talkeetna, Alaska and has been making honest beers using only the finest ingredients since July of 2009. Our sleepy little town transitions from December solitude to July bustle. As a small business operator in Alaska for 16 years our ability to manager business is what will enable us to operate successfully. Our tasting room is closed by 6 pm for seven months of the year but in the remaining months it is critical to our operation to be able to serve small quantities of our product to interested folk. By providing a quality experience to our guest we bring attention to what a great state Alaska is to visit. Without exception there is not a single evening during our summer season that we do not turn guest away. Many of these folks are local hard working Alaskans that take advantage of the longer days to work past 8pm and would prefer to support their local brewery. Some of these folk have driven two hours from Anchorage to enjoy their favorite beer only to be told no. The nuances of the difference between a brew pub and a brewery escape many of these folks leaving them frustrated at us. Equally important are the visitors to our state that are here to experience genuine Alaskan hospitality. People from all over the world come to Talkeetna to experience the mountains, rivers, and creative flavor that can only be found here. Sadly, after a day of fishing or exploring our back yard we are forced to hastily usher these folks out of our establishment. This is no way to gain support for a local industry that has a long tradition of bringing visitors to our state and employing many. Manufacturing in Alaska is not easy; S.B. 128 will give small business owners further freedom to manage their business responsibly. Thank you for the opportunity to be heard.

Sassan Mossanen, General Manager

Denali Brewing Company

P.O. Box 1021, Talkeetna Ak. 99676

Work (907) 733-2535

Brewing quality craft ales

kenaibrewstop@alaska.net
www.kassiksbrewstop.com

Dear Board Members:

Kassik's Kenai Brew Stop dba Kassik's Brewery is a small, family-owned brewery located in Nikiski, Alaska. We have been in business for over five years and have been gratified with the continuing growth in consumer acceptance of our product. As we continue to grow we find that while our small size and limited budget can work to our advantage by making us focus on providing quality products in an efficient manner, we are also limited in our ability to expand by those same factors.

In bringing our product to the attention of potential consumers, as a small Alaska brewery we can't hope to compete with the national print and television advertising campaigns of the large national brands. Instead, we rely primarily on providing a quality product and letting our customers tell their friend and neighbors. We make personal visits to the local bars and restaurants to place our product and work with our distributor. We also support our community by donating beer to many non-profit events.

We believe that another effective marketing tool for local breweries would be to allow them to showcase their Alaska Made product by bringing potential consumers to the brewery on special occasions such as on the brewery's anniversary, or the announcement of a new product line. At the present time we are constrained in our ability to host such a special event by AS 04.11.130(e) which limits the allowable individual consumption and activities on the premises of a brewery to such an extent that a large special event on the brewery premises would be impractical.

The purpose of this letter is to request the support of the board for legislation that would allow a brewery to obtain a "special events permit" modeled after the non-profit special events permit currently provided under AS 04.11.240. We believe that such a permitting system would satisfy the public interest in controlling the sale of alcoholic beverages to individuals by a brewery, while at the same time providing Alaska businesses with a marketing tool allowing them to better compete with the national brands in informing consumers about their product. For that reason we request the board to consider recommending to the legislature an amendment to AS 04.11 that would create a Brewery Special Events Permit. We have taken the liberty of drafting suggested language for such an amendment and it is attached for your consideration.

We appreciate the support and assistance the staff of the ABC Board has provided our business. We hope that you view the foregoing request in the spirit in which it is intended: to provide a way for the small Alaska breweries to inform consumers about their products. Thank you for your attention to this request.

Very truly yours,

Debara Kassik

March 29, 2012

Dear State of Alaska Senators,

King Street Brewing Company is a new small brewery located in Anchorage, Alaska founded by Shane Kingry and Dana Walukiewicz. We opened to the public in the fall of 2011, and have had great reception by local establishments and the general public. This community support has allowed us to grow and hire our first employee. To ultimately succeed, we must continue this growth, but as a small business our marketing dollars pale in comparison to the established national and international marketing organizations, with unlimited product promotion budgets, that we're competing against.

To compete in this environment, we have focused our efforts on a grass-roots marketing strategy that emphasizes our high quality, locally produced product. These marketing efforts, which include Facebook and generating email lists, are centered at our brewery and adjoining tap room. From there we introduce our product directly to consumers and educate the public on where they can enjoy our beers around Anchorage.

We would like to expand these promotional efforts to also include special events at the brewery such as an anniversary party or showcase a new product offering. At the present time we are constrained by AS 04.11.130(e) which limits the allowable individual consumption and activities on the premises of a brewery to such an extent that a special event on the brewery premises would be impractical.

The purpose of this letter is to request your support for the passage of Senate Bill 128, which would allow a brewery to obtain a special events permit modeled after the non-profit special events permit currently provided under AS 04.11.240. We believe that such a permit would satisfy the public interest in controlling the sale of alcoholic beverages to individuals by a brewery, while at the same time providing Alaskan businesses with marketing tools to better compete with the national brands in informing consumers about their product. For that reason, we request the Members of the Alaska State Senate to consider the passage of Senate Bill 128.

Thank you for your attention to this bill.

Sincerely,

Dana Walukiewicz

Member / Co-Owner

"An Act relating to child support awards; and repealing Rule 90.3, Alaska Rules of Civil Procedure."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 25 is amended by adding a new chapter to read:

Chapter 28. Child Support Awards.

Sec. 25.28.010. Guidelines; primary physical custody. (a) A tribunal shall calculate a child support award in a case in which one parent is awarded primary physical custody as an amount equal to the adjusted annual income of the noncustodial parent multiplied by a percentage specified in (b) of this section.

(b) To calculate the child support award, the tribunal shall multiply the noncustodial parent's adjusted annual income by the following percentages:

(1) 20 percent for one child;

(2) 27 percent for two children;

(3) 33 percent for three children; and

(4) an additional three percent for each additional child.

(c) The tribunal may allow the obligor parent to reduce child support payments by up to 75 percent for a period in which the obligor parent has extended visitation of more than 27 consecutive days. The order must specify the amount of the reduction that is allowable if the extended visitation is exercised.

(d) The tribunal may calculate child support based on a determination of the potential income of a parent who voluntarily and unreasonably is unemployed or underemployed. A determination of potential income may not be made for a parent who is physically or mentally incapacitated, or who is caring for a child under two years of age to whom the parents owe a joint legal responsibility. Potential income shall be based on the parent's work history, qualifications, and job opportunities. The tribunal also may impute potential income for nonincome producing or low income producing assets.

(e) In this section, "adjusted annual income" means the parent's total income from all sources less

(1) mandatory deductions, including

(A) federal, state, and local income tax;

(B) social security tax or the equivalent contribution to an alternate plan established by a public employer, and self-employment tax;

(C) Medicare tax;

(D) mandatory union dues;

(E) mandatory contributions to a retirement or pension plan;

(2) voluntary contributions to a retirement or pension plan or account in which the earnings are tax-free or tax-deferred, except that the total amount of these voluntary contributions plus any mandatory contributions under (1)(E) of this subsection may not exceed 7.5 percent of the parent's gross wages and self-employment income;

(3) child support and alimony payments arising from previous relationships that are required by another tribunal and actually paid;

(4) child support for children from prior relationships living with the parent, calculated by using the formula under this chapter; and

(5) work-related child care expenses for the child who is the subject of the child support order.

Sec. 25.28.020. Guidelines; shared, divided, and hybrid custody awards. (a) The tribunal shall calculate shared, divided, and hybrid physical custody awards as provided in this section.

(b) The tribunal shall calculate a child support award in a case in which the parents are awarded shared physical custody by

(1) calculating the annual amount each parent would pay to the other parent under AS 25.28.010 assuming the other parent had primary custody; in this calculation, the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d) apply;

(2) multiplying the amount determined under (1) of this subsection for each parent by the percentage of time the other parent has physical custody of the child; however, if the tribunal finds that the percentage of time each parent will have physical custody does not accurately reflect the ratio of funds each parent will directly spend on supporting the child, the tribunal shall vary this percentage to reflect its findings;

(3) determining which parent has the greater amount under (2) of this subsection; the parent with the greater amount under (2) of this subsection is the obligor parent, and the annual award is equal to the difference between the two amounts under (2) of this subsection multiplied by 1.5; however, if this amount is greater than the amount of support calculated under AS 25.28.010 assuming the obligor parent has primary custody, the annual support is the amount calculated under AS 25.28.010.

(c) The child support award for shared custody under (b) of this section must be paid in 12 equal monthly installments, except that if

(1) shared custody is based on the obligor parent's having physical custody for periods of 30 consecutive days or more, the total annual award may be paid in equal installments over those months in which the obligor parent does not have physical custody; or

(2) the obligor parent's income is seasonal, the tribunal may order

unequal monthly support payments as provided in AS 25.28.030(g) and (h).

(d) The child support order must state that failure to exercise sufficient physical custody to qualify for shared physical custody under (b) or (c) of this section is grounds for modification of the child support order. Denial of visitation by the custodial parent is not cause to increase a child support award.

(e) The tribunal shall

(1) calculate a child support award in a case in which the parents are awarded divided custody by determining the amount each parent would pay to the other parent for support of a child for whom that parent has primary physical custody under AS 25.28.010, taking into account the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d), and offsetting those amounts; and

(2) consider whether the amount determined under (1) of this subsection should be varied under AS 25.28.030(b).

(f) The tribunal shall

(1) calculate a child support award in a case in which the parents are awarded hybrid custody by

(A) applying AS 25.28.010, taking into account the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d), to determine support for a child in the primary physical custody of each parent;

(B) applying (b) of this section to determine support for a child in the shared physical custody of the parents;

(C) adjusting pro rata the percentages provided in AS 25.28.010(b) based on the number of children to which each type of custody applies; and

(D) combining the amounts to determine the net obligation; and

(2) consider whether the amount determined under (1) of this subsection should be varied under AS 25.28.030(b).

Sec. 25.28.030. Exceptions to support awards. (a) Notwithstanding the requirements in AS 25.28.010 and 25.28.020, the tribunal may vary the award for the reasons stated in this section.

(b) The tribunal may vary the child support award as calculated under the other provisions of this chapter for good cause on proof by clear and convincing evidence that manifest injustice would result if the support award were not varied. The tribunal shall specify in writing the reason for the variation, the amount of support that would have been required but for the variation, and the estimated value of any property conveyed instead of support calculated under the other provisions of this chapter. Good cause may include a finding that unusual circumstances exist that require variation of the award in order to award an amount of support that is just and proper for the parties to contribute toward the nurture and education of their children. The tribunal shall consider the custodial parent's income in this determination.

(c) The calculation for primary physical custody under AS 25.28.010 does not apply to the extent that the parent has an adjusted annual income of more than $105,000. The tribunal may make an additional award only if it is just and proper, taking into account the needs of the child, the standard of living of the child, and the extent to which that standard should reflect the supporting parent's ability to pay.

(d) Except as provided in AS 25.28.010(c) and 25.28.020, the minimum child support amount that may be ordered is $50 a month or $600 a year.

(e) In addition to ordering a parent to pay child support as calculated under this chapter, the tribunal may, in appropriate circumstances and when the parents are minors as described in (f) of this section, order one or more grandparents of a child to pay child support to an appropriate person in an amount determined by the tribunal to serve the best interests of the child; however, the amount may not exceed the lesser of

(1) a proportionate share of the amount required to provide care in a supervised setting to the grandchild, as determined by the tribunal; or

(2) the amount that would have been awarded if the child's parents had the incomes of the child's grandparents and AS 25.28.010 and 25.28.020 were applied.

(f) An order under (e) of this section may be issued only with respect to a child whose parents are both minors, and the order terminates when either parent becomes 18 years of age. The tribunal shall specify in writing the reasons it considers it to be appropriate to order a grandparent to pay child support under this subsection and the factors considered in setting the amount of the child support award. In this

subsection, "grandparent" means the natural or adoptive parent of the minor parent.

(g) If the noncustodial parent's income is seasonal, the tribunal may order that the annual support amount be paid in unequal monthly payments, with higher payments during the months the parent expects to receive higher income and lower payments in other months; the tribunal may not make an unequal payment order unless

(1) the tribunal finds that the burden of budgeting for periods of unequal income should be placed on the obligee rather than the obligor; and

(2) the obligee agrees.

(h) An order of the tribunal for unequal payments under (g) of this section must specify the annual support amount, the average monthly support amount, and the amount due for each month. The order must provide that variations from the average monthly amount begin with monthly payments in excess of the average monthly amount so that a deficit situation cannot occur. Until the excess payments begin, the tribunal shall order payment of the average monthly amount.

Sec. 25.28.040. Health care expenses. (a) The tribunal shall include in the order coverage of the child's health care needs and require health insurance for the child if insurance is available to either parent or both parents at a reasonable cost. The tribunal shall consider whether the child is eligible for services through the Indian Health Service, any other entity, or other insurance coverage before ordering either parent or both parents to provide health care coverage through insurance, cash medical support, or other means. The tribunal shall find that health insurance is available only if the dependent child has reasonable geographic access to the covered services or the insurance includes the coverage of transportation needed for the services.

(b) The tribunal shall allocate equally the cost of insurance between the parents unless the tribunal orders otherwise for good cause. An obligor's child support obligation shall be decreased by the amount of the obligee's portion of health insurance payments ordered by the tribunal and actually paid by the obligor. The tribunal shall increase a child support award by the obligor's portion of health insurance if the obligee is ordered to, and actually does, obtain and pay for insurance.

(c) The cost of insurance is the cost attributable to the child for whom support is paid. If the cost to the employee of covering the employee alone is the same as the

cost to the employee of covering the employee and dependents, then there is no additional cost to the employee for adding the child and no portion of the cost of coverage may be allocated to the child. If dependent coverage can be added for a single cost, rather than for each dependent, and the dependent coverage covers dependents in addition to the child subject to the order, the cost of the dependent coverage shall be allocated equally among the dependents covered. If there is reason to believe that there is an incremental cost to the employee for insuring dependents but evidence of that incremental cost is unavailable, the cost of insurance is determined by dividing the total cost of coverage by the number of family members covered and multiplying that amount by the number of children subject to the order.

(d) The tribunal shall allocate equally between the parties the cost of reasonable health care expenses not covered by insurance unless the tribunal orders otherwise for good cause. A party shall reimburse the other party for the party's share of the uncovered health care expenses within 30 days after receipt of the bill for the health care, payment verification, and, if applicable, a health insurance statement indicating what portion of the cost is uncovered. The tribunal shall allocate the reasonable, uncovered health care expenses exceeding $5,000 in a calendar year based on the parties' relative financial circumstances when the expenses occur.

(e) For the purpose of establishing a monthly support obligation for health care expenses, a court shall find that the cost of cash medical support or private health insurance is reasonable under this section if the cost to the responsible parent does not exceed five percent of the responsible parent's gross income. In calculating the percentage for purposes of health insurance coverage, the cost is the cost of adding the dependent child to the existing insurance coverage or the difference between self-only and family coverage.

(f) In this section,

(1) "cash medical support" means an amount ordered to be paid toward the cost of health insurance provided by a public entity or by another parent through employment or otherwise, or for other health care expenses not covered by insurance;

(2) "health care expenses" includes medical, dental, vision, and mental health counseling expenses.

Sec. 25.28.050. Child support affidavit and documentation. (a) Subject to the confidentiality requirements of Rule 90.1(f), Alaska Rules of Civil Procedure, each parent in a proceeding of a tribunal at which child support is involved shall file a statement under oath, accompanied by documentation verifying the statement, that states the parent's adjusted annual income and the components of adjusted annual income as described in AS 25.28.010(e). This statement and documentation must be filed with a party's initial pleading in superior court, including the dissolution petition, divorce complaint or answer, motion to modify, and any response to a motion to modify. The documents must be redacted to delete social security numbers and to provide only partial financial account information as provided in Rule 90.1(f), Alaska Rules of Civil Procedure. The statement must state whether the parent has access to health insurance for the children and, if so, the additional cost to the parent of the children's health insurance.

(b) While there is an ongoing monthly support obligation, each party shall provide to the other party, within 30 days after a written request, documents such as tax returns and pay stubs showing the party's income for the prior calendar year. The party making the request shall provide documentation of the party's annual income for the same period at the time the request is made. A request under this section may not be made more than once a year. This section does not preclude discovery under the Alaska Rules of Civil Procedure.

(c) Unless the information has already been provided to the tribunal under Rule 90.1(f), Alaska Rules of Civil Procedure, a statement under (a) of this section must be accompanied by a confidential information sheet as described in Rule 90.1, Alaska Rules of Civil Procedure. Once a complete confidential information sheet has been submitted to the tribunal listing names, dates of birth, and social security numbers as required, the parties shall omit or redact social security numbers from documents subsequently filed in the action unless otherwise ordered by the tribunal.

(d) The tribunal may withhold or assess costs or attorney fees for a violation of this section as the circumstances and discouragement of like conduct in the future may require. Costs and attorney fees may be imposed on offending attorneys or parties.

Sec. 25.28.060. Travel expenses. After determining an award of child support under this chapter, the court shall allocate between the parties reasonable travel expenses that are necessary to exercise visitation as may be just and proper for the parties to contribute.

Sec. 25.28.070. Modification; defense against arrearages. (a) A tribunal may modify a final child support award on a showing of a material change of circumstances as provided by state law. A material change of circumstances shall be presumed if support as calculated under this chapter is more than 15 percent greater or less than the outstanding support order. An award may be modified to require cash medical support regardless of whether insurance is available to either parent if neither parent has purchased health insurance. In this subsection, support includes health insurance payments or monthly cash medical support made under AS 25.28.040.

(b) A tribunal may not modify a child support arrearage retroactively, except as authorized by AS 25.27.166(d). A modification that is effective on or after the date that a motion for modification, or a notice of petition for modification by the child support services agency, is served on the opposing party is not considered a retroactive modification.

(c) The tribunal may find that a parent and a parent's assignee are precluded from collecting arrearages for support of a child that accumulated during a time period exceeding nine months for which the parent agreed or acquiesced to the obligor exercising primary custody of the child. A finding that preclusion is a defense must be based on clear and convincing evidence.

Sec. 25.28.080. Third-party custody. (a) When the state, or another third party entitled to child support, has custody of all children of a parent, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent multiplied by the percentage specified in AS 25.28.010(b). If the third party has custody of some but not all children, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent, multiplied by the percentage specified in AS 25.28.010(b) for the total number of the parent's children, multiplied by the number of the parent's children in third-party custody, divided by the total number of the parent's children. In this subsection, the number of

the parent's children includes only children of the parent who live with the parent, are substantially supported by the parent, or are in custody of the third party entitled to support.

(b) If, in addition to a support obligation to a third party, one or both parents retain primary or shared physical custody of at least one of their children, the support obligation between the parents is calculated under the other provisions of this chapter, without consideration of the third-party custodian or any children in the custody of the third-party custodian, except that the percentage in AS 25.28.010(b) must be adjusted pro rata for the number of children in the primary custody of a parent, or shared custody of the parents, compared to the total number of children. After that calculation is completed, any support owed may be offset with support owed to a third-party custodian under (a) of this section in order to minimize transactions.

Sec. 25.28.090. Support order forms. All court orders for payment or modification of child support shall be entered on a form developed by the administrative director of the court. A party may lodge a duplicate of the tribunal form produced by a laser printer or similar device. A device may also print, in a contrasting typestyle equivalent to that produced by a typewriter, text that otherwise would have been entered by a typewriter or word processor. A party or attorney who lodges a duplicate certifies by lodging the duplicate that it is identical to the current version of the court form.

Sec. 25.28.100. Dependent tax deduction. The court may allocate the dependent tax deduction for each child between the parties as is just and proper and in the child's best interests. The allocation must be consistent with AS 25.24.152 and federal law.

Sec. 25.28.300. Definitions. In this chapter,

(1) "child support" and "child support obligation" have the meaning given "duty of support" in AS 25.27.900;

(2) "divided custody" means that one parent has primary physical custody of one or more children of the relationship and the other parent has primary custody of one or more other children of the relationship, and the parents do not share physical custody of any of their children;

(3) "hybrid custody" means that at least one parent has primary physical custody of one or more children of the relationship, and the parents have shared physical custody of at least one child of the relationship;

(4) "primary physical custody" or "primary custody" means that a child resides with the other parent for a period, specified in the custody order, of less than 30 percent of the year;

(5) "shared physical custody" or "shared custody" means that a child resides with one parent for a period, specified in writing in the custody order, of at least 30 percent but not more than 70 percent of the year, regardless of the status of legal custody;

(6) "tribunal" means the superior court or the child support services agency created in AS 25.27.010.

* **Sec. 2.** AS 47.10.120(a) is amended to read:

(a) When a child in need of aid is committed under this chapter, the court or the child support services agency created in AS 25.27.010 shall, after giving the parent a reasonable opportunity to be heard, require that the parent pay to the department in a manner that the court or the child support services agency directs a sum to cover in full or in part the maintenance and care of the child. The support obligation shall be calculated under **AS 25.28** [RULE 90.3(i) OF THE ALASKA RULES OF CIVIL PROCEDURE].

* **Sec. 3.** AS 47.12.230(a) is amended to read:

(a) When a delinquent minor is committed under this chapter, the court or the child support services agency created in AS 25.27.010 shall, after giving the parent a reasonable opportunity to be heard, require that the parent pay to the department in a manner that the court or the child support services agency directs a sum to cover in full or in part the maintenance and care of the minor. The support obligation shall be calculated under **AS 25.28** [RULE 90.3(i) OF THE ALASKA RULES OF CIVIL PROCEDURE].

* **Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REPEAL OF COURT RULE. Rule 90.3, Alaska Rules of Civil Procedure, is repealed.

* **Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

NONAPPLICABILITY OF TWO-THIRDS VOTE REQUIREMENT. Because the rule repealed in sec. 4 of this Act is a substantive rule rather than a rule of practice or procedure, the repeal of the rule takes effect even if sec. 4 of this Act does not receive the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

CS FOR SENATE BILL NO. 134(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR KOOKESH

A BILL

FOR AN ACT ENTITLED

"An Act relating to child support awards; and repealing Rule 90.3, Alaska Rules of Civil Procedure."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 25 is amended by adding a new chapter to read:

Chapter 28. Child Support Awards.

Sec. 25.28.010. Guidelines; primary physical custody. (a) A tribunal shall calculate a child support award in a case in which one parent is awarded primary physical custody as an amount equal to the adjusted annual income of the noncustodial parent multiplied by a percentage specified in (b) of this section.

(b) To calculate the child support award, the tribunal shall multiply the noncustodial parent's adjusted annual income by the following percentages:

(1) 20 percent for one child;

(2) 27 percent for two children;

(3) 33 percent for three children; and

New Text Underlined *[DELETED TEXT BRACKETED]*

(4) an additional three percent for each additional child.

(c) The tribunal may allow the obligor parent to reduce child support payments by up to 75 percent for a period in which the obligor parent has extended visitation of more than 27 consecutive days. The order must specify the amount of the reduction that is allowable if the extended visitation is exercised.

(d) The tribunal may calculate child support based on a determination of the potential income of a parent who voluntarily and unreasonably is unemployed or underemployed. A determination of potential income may not be made for a parent who is physically or mentally incapacitated, or who is caring for a child under two years of age to whom the parents owe a joint legal responsibility. Potential income shall be based on the parent's work history, qualifications, and job opportunities. The tribunal also may impute potential income for nonincome producing or low income producing assets.

(e) In this section, "adjusted annual income" means the parent's total income from all sources less

(1) mandatory deductions, including

(A) federal, state, and local income tax;

(B) social security tax or the equivalent contribution to an alternate plan established by a public employer, and self-employment tax;

(C) Medicare tax;

(D) mandatory union dues;

(E) mandatory contributions to a retirement or pension plan;

(2) voluntary contributions to a retirement or pension plan or account in which the earnings are tax-free or tax-deferred, except that the total amount of these voluntary contributions plus any mandatory contributions under (1)(E) of this subsection may not exceed 7.5 percent of the parent's gross wages and self-employment income;

(3) child support and alimony payments arising from previous relationships that are required by another tribunal and actually paid;

(4) child support for children from prior relationships living with the parent, calculated by using the formula under this chapter; and

(5) work-related child care expenses for the child who is the subject of the child support order.

Sec. 25.28.020. Guidelines; shared, divided, and hybrid custody awards. (a) The tribunal shall calculate shared, divided, and hybrid physical custody awards as provided in this section.

(b) The tribunal shall calculate a child support award in a case in which the parents are awarded shared physical custody by

(1) calculating the annual amount each parent would pay to the other parent under AS 25.28.010 assuming the other parent had primary custody; in this calculation, the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d) apply;

(2) multiplying the amount determined under (1) of this subsection for each parent by the percentage of time the other parent has physical custody of the child; however, if the tribunal finds that the percentage of time each parent will have physical custody does not accurately reflect the ratio of funds each parent will directly spend on supporting the child, the tribunal shall vary this percentage to reflect its findings;

(3) determining which parent has the greater amount under (2) of this subsection; the parent with the greater amount under (2) of this subsection is the obligor parent, and the annual award is equal to the difference between the two amounts under (2) of this subsection multiplied by 1.5; however, if this amount is greater than the amount of support calculated under AS 25.28.010 assuming the obligor parent has primary custody, the annual support is the amount calculated under AS 25.28.010.

(c) The child support award for shared custody under (b) of this section must be paid in 12 equal monthly installments, except that if

(1) shared custody is based on the obligor parent's having physical custody for periods of 30 consecutive days or more, the total annual award may be paid in equal installments over those months in which the obligor parent does not have physical custody; or

(2) the obligor parent's income is seasonal, the tribunal may order

unequal monthly support payments as provided in AS 25.28.030(g) and (h).

(d) The child support order must state that failure to exercise sufficient physical custody to qualify for shared physical custody under (b) or (c) of this section is grounds for modification of the child support order. Denial of visitation by the custodial parent is not cause to increase a child support award.

(e) The tribunal shall

(1) calculate a child support award in a case in which the parents are awarded divided custody by determining the amount each parent would pay to the other parent for support of a child for whom that parent has primary physical custody under AS 25.28.010, taking into account the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d), and offsetting those amounts; and

(2) consider whether the amount determined under (1) of this subsection should be varied under AS 25.28.030(b).

(f) The tribunal shall

(1) calculate a child support award in a case in which the parents are awarded hybrid custody by

(A) applying AS 25.28.010, taking into account the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d), to determine support for a child in the primary physical custody of each parent;

(B) applying (b) of this section to determine support for a child in the shared physical custody of the parents;

(C) adjusting pro rata the percentages provided in AS 25.28.010(b) based on the number of children to which each type of custody applies; and

(D) combining the amounts to determine the net obligation; and

(2) consider whether the amount determined under (1) of this subsection should be varied under AS 25.28.030(b).

Sec. 25.28.030. Exceptions to support awards. (a) Notwithstanding the requirements in AS 25.28.010 and 25.28.020, the tribunal may vary the award for the reasons stated in this section.

(b) The tribunal may vary the child support award as calculated under the other provisions of this chapter for good cause on proof by clear and convincing evidence that manifest injustice would result if the support award were not varied. The tribunal shall specify in writing the reason for the variation, the amount of support that would have been required but for the variation, and the estimated value of any property conveyed instead of support calculated under the other provisions of this chapter. Good cause may include a finding that unusual circumstances exist that require variation of the award in order to award an amount of support that is just and proper for the parties to contribute toward the nurture and education of their children. The tribunal shall consider the custodial parent's income in this determination.

(c) The calculation for primary physical custody under AS 25.28.010 does not apply to the extent that the parent has an adjusted annual income of more than $105,000. The tribunal may make an additional award only if it is just and proper, taking into account the needs of the child, the standard of living of the child, and the extent to which that standard should reflect the supporting parent's ability to pay.

(d) Except as provided in AS 25.28.010(c) and 25.28.020, the minimum child support amount that may be ordered is $50 a month or $600 a year.

(e) In addition to ordering a parent to pay child support as calculated under this chapter, the tribunal may, in appropriate circumstances and when the parents are minors as described in (f) of this section, order one or more grandparents of a child to pay child support to an appropriate person in an amount determined by the tribunal to serve the best interests of the child; however, the amount may not exceed the lesser of

(1) a proportionate share of the amount required to provide care in a supervised setting to the grandchild, as determined by the tribunal; or

(2) the amount that would have been awarded if the child's parents had the incomes of the child's grandparents and AS 25.28.010 and 25.28.020 were applied.

(f) An order under (e) of this section may be issued only with respect to a child whose parents are both minors, and the order terminates when either parent becomes 18 years of age. The tribunal shall specify in writing the reasons it considers it to be appropriate to order a grandparent to pay child support under this subsection and the factors considered in setting the amount of the child support award. In this

subsection, "grandparent" means the natural or adoptive parent of the minor parent.

(g) If the noncustodial parent's income is seasonal, the tribunal may order that the annual support amount be paid in unequal monthly payments, with higher payments during the months the parent expects to receive higher income and lower payments in other months; the tribunal may not make an unequal payment order unless

(1) the tribunal finds that the burden of budgeting for periods of unequal income should be placed on the obligee rather than the obligor; and

(2) the obligee agrees.

(h) An order of the tribunal for unequal payments under (g) of this section must specify the annual support amount, the average monthly support amount, and the amount due for each month. The order must provide that variations from the average monthly amount begin with monthly payments in excess of the average monthly amount so that a deficit situation cannot occur. Until the excess payments begin, the tribunal shall order payment of the average monthly amount.

Sec. 25.28.040. Health care expenses. (a) The tribunal shall include in the order coverage of the child's health care needs and require health insurance for the child if insurance is available to either parent or both parents at a reasonable cost. The tribunal shall consider whether the child is eligible for services through the Indian Health Service, any other entity, or other insurance coverage before ordering either parent or both parents to provide health care coverage through insurance, cash medical support, or other means. A court shall find that health insurance is available only if the dependent child has reasonable geographic access to the covered services or the insurance includes the coverage of transportation needed for the services.

(b) The tribunal shall allocate equally the cost of insurance between the parents unless the tribunal orders otherwise for good cause. An obligor's child support obligation shall be decreased by the amount of the obligee's portion of health insurance payments ordered by the tribunal and actually paid by the obligor. The tribunal shall increase a child support award by the obligor's portion of health insurance if the obligee is ordered to, and actually does, obtain and pay for insurance.

(c) The cost of insurance is the cost attributable to the child for whom support is paid. If the cost to the employee of covering the employee alone is the same as the

cost to the employee of covering the employee and dependents, then there is no additional cost to the employee for adding the child and no portion of the cost of coverage may be allocated to the child. If dependent coverage can be added for a single cost, rather than for each dependent, and the dependent coverage covers dependents in addition to the child subject to the order, the cost of the dependent coverage shall be allocated equally among the dependents covered. If there is reason to believe that there is an incremental cost to the employee for insuring dependents but evidence of that incremental cost is unavailable, the cost of insurance is determined by dividing the total cost of coverage by the number of family members covered and multiplying that amount by the number of children subject to the order.

(d) The tribunal shall allocate equally between the parties the cost of reasonable health care expenses not covered by insurance unless the tribunal orders otherwise for good cause. A party shall reimburse the other party for the party's share of the uncovered health care expenses within 30 days after receipt of the bill for the health care, payment verification, and, if applicable, a health insurance statement indicating what portion of the cost is uncovered. The tribunal shall allocate the reasonable, uncovered health care expenses exceeding $5,000 in a calendar year based on the parties' relative financial circumstances when the expenses occur.

(e) For the purpose of establishing a monthly support obligation for health care expenses, a court shall find that the cost of cash medical support or private health insurance is reasonable under this section if the cost to the responsible parent does not exceed five percent of the responsible parent's gross income. In calculating the percentage for purposes of health insurance coverage, the cost is the cost of adding the dependent child to the existing insurance coverage or the difference between self-only and family coverage.

(f) In this section,

(1) "cash medical support" means an amount ordered to be paid toward the cost of health insurance provided by a public entity or by another parent through employment or otherwise, or for other health care expenses not covered by insurance;

(2) "health care expenses" includes medical, dental, vision, and mental health counseling expenses.

Sec. 25.28.050. Child support affidavit and documentation. (a) Subject to the confidentiality requirements of Rule 90.1(f), Alaska Rules of Civil Procedure, each parent in a proceeding of a tribunal at which child support is involved shall file a statement under oath, accompanied by documentation verifying the statement, that states the parent's adjusted annual income and the components of adjusted annual income as described in AS 25.28.010(e). This statement and documentation must be filed with a party's initial pleading in superior court, including the dissolution petition, divorce complaint or answer, motion to modify, and any response to a motion to modify. The documents must be redacted to delete social security numbers and to provide only partial financial account information as provided in Rule 90.1(f), Alaska Rules of Civil Procedure. The statement must state whether the parent has access to health insurance for the children and, if so, the additional cost to the parent of the children's health insurance.

(b) While there is an ongoing monthly support obligation, each party shall provide to the other party, within 30 days after a written request, documents such as tax returns and pay stubs showing the party's income for the prior calendar year. The party making the request shall provide documentation of the party's annual income for the same period at the time the request is made. A request under this section may not be made more than once a year. This section does not preclude discovery under the Alaska Rules of Civil Procedure.

(c) Unless the information has already been provided to the tribunal under Rule 90.1(f), Alaska Rules of Civil Procedure, a statement under (a) of this section must be accompanied by a confidential information sheet as described in Rule 90.1, Alaska Rules of Civil Procedure. Once a complete confidential information sheet has been submitted to the tribunal listing names, dates of birth, and social security numbers as required, the parties shall omit or redact social security numbers from documents subsequently filed in the action unless otherwise ordered by the tribunal.

(d) The tribunal may withhold or assess costs or attorney fees for a violation of this section as the circumstances and discouragement of like conduct in the future may require. Costs and attorney fees may be imposed on offending attorneys or parties.

Sec. 25.28.060. Travel expenses. After determining an award of child support under this chapter, the court shall allocate between the parties reasonable travel expenses that are necessary to exercise visitation as may be just and proper for the parties to contribute.

Sec. 25.28.070. Modification; defense against arrearages. (a) A tribunal may modify a final child support award on a showing of a material change of circumstances as provided by state law. A material change of circumstances shall be presumed if support as calculated under this chapter is more than 15 percent greater or less than the outstanding support order. An award may be modified to require cash medical support regardless of whether insurance is available to either parent if neither parent has purchased health insurance. In this subsection, support includes health insurance payments or cash medical support made under AS 25.28.040.

(b) A tribunal may not modify a child support arrearage retroactively, except as authorized by AS 25.27.166(d). A modification that is effective on or after the date that a motion for modification, or a notice of petition for modification by the child support services agency, is served on the opposing party is not considered a retroactive modification.

(c) The tribunal may find that a parent and a parent's assignee are precluded from collecting arrearages for support of a child that accumulated during a time period exceeding nine months for which the parent agreed or acquiesced to the obligor exercising primary custody of the child. A finding that preclusion is a defense must be based on clear and convincing evidence.

Sec. 25.28.080. Third-party custody. (a) When the state, or another third party entitled to child support, has custody of all children of a parent, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent multiplied by the percentage specified in AS 25.28.010(b). If the third party has custody of some but not all children, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent, multiplied by the percentage specified in AS 25.28.010(b) for the total number of the parent's children, multiplied by the number of the parent's children in third-party custody, divided by the total number of the parent's children. In this subsection, the number of

the parent's children includes only children of the parent who live with the parent, are substantially supported by the parent, or are in custody of the third party entitled to support.

(b) If, in addition to a support obligation to a third party, one or both parents retain primary or shared physical custody of at least one of their children, the support obligation between the parents is calculated under the other provisions of this chapter, without consideration of the third-party custodian or any children in the custody of the third-party custodian, except that the percentage in AS 25.28.010(b) must be adjusted pro rata for the number of children in the primary custody of a parent, or shared custody of the parents, compared to the total number of children. After that calculation is completed, any support owed may be offset with support owed to a third-party custodian under (a) of this section in order to minimize transactions.

Sec. 25.28.090. Support order forms. All court orders for payment or modification of child support shall be entered on a form developed by the administrative director of the court. A party may lodge a duplicate of the tribunal form produced by a laser printer or similar device. A device may also print, in a contrasting typestyle equivalent to that produced by a typewriter, text that otherwise would have been entered by a typewriter or word processor. A party or attorney who lodges a duplicate certifies by lodging the duplicate that it is identical to the current version of the court form.

Sec. 25.28.100. Dependent tax deduction. The court may allocate the dependent tax deduction for each child between the parties as is just and proper and in the child's best interests. The allocation must be consistent with AS 25.24.152 and federal law.

Sec. 25.28.300. Definitions. In this chapter,

(1) "child support" and "child support obligation" have the meaning given "duty of support" in AS 25.27.900;

(2) "divided custody" means that one parent has primary physical custody of one or more children of the relationship and the other parent has primary custody of one or more other children of the relationship, and the parents do not share physical custody of any of their children;

(3) "hybrid custody" means that at least one parent has primary physical custody of one or more children of the relationship, and the parents have shared physical custody of at least one child of the relationship;

(4) "primary physical custody" or "primary custody" means that a child resides with the other parent for a period, specified in the custody order, of less than 30 percent of the year;

(5) "shared physical custody" or "shared custody" means that a child resides with one parent for a period, specified in writing in the custody order, of at least 30 percent but not more than 70 percent of the year, regardless of the status of legal custody;

(6) "tribunal" means the superior court or the child support services agency created in AS 25.27.010.

* **Sec. 2.** AS 47.10.120(a) is amended to read:

(a) When a child in need of aid is committed under this chapter, the court or the child support services agency created in AS 25.27.010 shall, after giving the parent a reasonable opportunity to be heard, require that the parent pay to the department in a manner that the court or the child support services agency directs a sum to cover in full or in part the maintenance and care of the child. The support obligation shall be calculated under **AS 25.28** [RULE 90.3(i) OF THE ALASKA RULES OF CIVIL PROCEDURE].

* **Sec. 3.** AS 47.12.230(a) is amended to read:

(a) When a delinquent minor is committed under this chapter, the court or the child support services agency created in AS 25.27.010 shall, after giving the parent a reasonable opportunity to be heard, require that the parent pay to the department in a manner that the court or the child support services agency directs a sum to cover in full or in part the maintenance and care of the minor. The support obligation shall be calculated under **AS 25.28** [RULE 90.3(i) OF THE ALASKA RULES OF CIVIL PROCEDURE].

* **Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REPEAL OF COURT RULE. Rule 90.3, Alaska Rules of Civil Procedure, is repealed.

*** Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

NONAPPLICABILITY OF TWO-THIRDS VOTE REQUIREMENT. Because the rule repealed in sec. 4 of this Act is a substantive rule rather than a rule of practice or procedure, the repeal of the rule takes effect even if sec. 4 of this Act does not receive the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

Senator Hollis French, Chair
Senate Judiciary
State Capitol Building, Rm 417
Juneau, AK 99801

Dear Senate French,

I respectfully request a hearing for Senate Bill 134 "**An act relating to child support awards; repealing Rule 90.3, Alaska Rules of Civil Procedure; and providing for an effective date.**" The bill will put the child support rule into statute and change the calculation formula from the current percentage approach which only takes in account the non-custodial parents income to an income shares model that considers the net income of both parents. In 1987, the Alaska Supreme Court enacted Civil Rule 90.3. The court frankly admitted this was a substantive law and recognized that courts are not supposed to pass substantive laws as it is the legislator's responsibility. In the 25 years since then, the legislature has not replaced the Civil Rule 90.3 with an actual law. This bill proposes to correct this long standing deficiency.

CS SB 134 was moved out of Senate HESS Committee today to the Senate Judiciary Committee. Enclosed is CS SB 134, sponsor statement, fiscal notes, legislative research report and letter.

Thank you for your consideration, if you have any questions please don't hesitate in contacting me or my staff Dorothy Shockley at 465-3018.

Respectfully,

Albert M. Kookesh

Senator Albert Kookesh

Sponsor Statement

SB 134

SB 134 puts the Child Support Civil Rule 90.3 guidelines into statute. In 1987, the Alaska Supreme Court enacted Civil Rule 90.3. The Supreme Court admitted this was a substantive law that the Legislature could replace at any time. In the 25 years since then, the Legislature has not replaced civil rule 90.3 with an actual law. This bill proposes to correct that long-standing deficiency.

One of the major problems with having the child support guidelines set by a court rule is the people affected by current guidelines have not had the opportunity to speak to the individuals with the power to make changes. Instead every four years they are encouraged to write letters or testify before a review committee made up of lawyers and judges who then submit their recommendations to the Supreme Court Justices who make the final decisions. With the rule in statute, individuals will have the opportunity to speak to lawmakers who have the power to make changes. Proposals to amend can be made in the future through the legislative process.

The bill proposes enactment of the current rule into statute with the exception of how the child support obligation is calculated. Currently the non-custodial parent's support obligation is based solely on his or her income, without regard to what the other parent makes. With this bill it will be changed to an income shares model which calculates support as the share of each parent's income estimated allocation to the child, if the original household were intact.

According to 2005 statistics (Legislative Research Report, November 2010)

- Twenty four (24) states establish their child support guidelines statutorily through their legislature while 16 states use court rule only, and 11 states use a combination of rule, commission and or agency.
- Thirty five (35) states consider the income of both parents in determining child support payments.

SB 134 changes the word court to tribunal in some cases back to court and adds number (6) to definition in Sec. 25.28.300 (page 18) to read "tribunal" means the superior court or the child support services agency created in AS 25.27.010. It also includes changes made by SB 96 addressing medical support.

The Child Support Services Division has no objections to the bill. I would appreciate your prompt and favorable action on this bill.

MEMORANDUM April 20, 2011

SUBJECT: Child support obligation when children of obligor are living separately (Work Order No. 27-LS0671\A)

TO: Senator Albert Kookesh
Attn: Dorothy Shockely

FROM: Jean M. Mischel
Legislative Counsel

You have asked whether the above-referenced draft bill takes into account all children of an obligor, whether or not all are subject to a support order. The income share approach does account for a child or children of an obligor who may be living with the obligor and not subject to a separate order of support by inferring a portion of income for that child or children.

The calculation of child support is made by multiplying the presumptive support obligation by the noncustodial parent's proportionate income share of combined monthly net income with the other parent of the child under sec. 25.28.010(a). Monthly net income, as defined under sec. 25.28.010(g) at page 10 of the bill draft, excludes the following in relation to other children:

> (3) child support and alimony payments arising from previous relationships that are required by another tribunal and actually paid; [and]
> (4) child support for children from prior relationships living with the parent, calculated by using the formula under this chapter; . . . .

Therefore, a child not subject to an order and living with a noncustodial parent of another child, is treated as if the child were the subject of a support order under the bill draft in terms of calculating net income from which a share for the noncustodial parent's support obligation is derived. However, children from a subsequent relationship are not considered in the calculation of the parent's net income. In "unusual circumstances" a court may vary an award if the award would result in "manifest injustice" under sec. 25.28.030 at pages 12 and 13 of the bill draft.

If I may be of further assistance, please advise.

LEGISLATIVE RESEARCH REPORT

NOVEMBER 22, 2010

REPORT NUMBER 11.076

CHILD SUPPORT GUIDELINES IN OTHER STATES

PREPARED FOR SENATOR ALBERT KOOKESH

BY TIM SPENGLER, LEGISLATIVE ANALYST

You were interested in child support guidelines in other states. Specifically, you wanted to know if other states codify their child support guidelines in statute. Additionally, you wanted to know how many states consider the income of *both* parents when deciding child support payment amounts. Briefly, about half of the states have established guidelines in statute, and most (35) states take into consideration both parents' incomes when deciding child support award amounts.[1]

Background on Federal Guidance and Mandates

Historically, the rationale and methodology behind calculating child support payments developed differently across the country's legal jurisdictions.[2] As a result, divorcing couples and their children were subject to child support award processes that were often amorphous and inconsistent, which often times led to inadequate financial support from the obligor parent (the payer of the support). In the 1930s, recognizing that federal entitlement programs for the impoverished were being burdened by the victims of insufficient support awards, the federal government began providing guidance to the states. Federal involvement through legislation increased over subsequent years, culminating in the Child Support Enforcement Amendments of 1984 (P.L. 98-378), the Family Support Act of 1988 (P.L. 100-485), and subsequent amendments to those laws, which collectively provide the child support mandates under which modern state child support guidelines have been developed.

States comply with federal mandates through the adoption of child support guidelines in statue, regulation, court rule, or some combination of the three. The federal mandates seek to address the problems of earlier child support regimes by accomplishing the following four main goals:

---

[1] Much of the background information in this report was taken from a previous report from our agency.

[2] Information in this section is summarized from Laura W. Morgan, "Child Support Guidelines," National Legal Research Group, 1999; accessed through the FindLaw online library at *http://library.findlaw.com/1999/Jan/1/241469.html#consistent*. Ms. Morgan served as the Chair of the Child Support Committee of the Family Law Section of the American Bar Association from 1997 to 2003. She maintains the website "Support Guidelines.com" (*http://www.supportguidelines.com/*), which provides extensive information on child support matters.

(1) increase the adequacy of child support awards;

(2) increase the consistency and predictability of child support awards;

(3) increase compliance through perceived fairness of child support awards; and

(4) increase the ease of administration of child support cases.

Pursuant to federal regulations, at a minimum, state guidelines must accomplish the following:

- Consider all earnings and income of the absent parent;
- Be based on specific descriptive and numeric criteria and result in the computation of the support obligation;
- Provide for the health care needs of the children, through health insurance coverage or other means; and
- Provide that in any judicial or administrative proceeding for the award of child support, there shall be a rebuttable presumption that the amount of the award, which would result from the application of the state's guideline, is the correct amount of child support to be awarded.[3]

Under federal law, the child support awards resulting from state guidelines enjoy a "rebuttable presumption" of correctness. That is, in order to deviate from the guideline amounts, the party challenging the award must establish that the application of the guideline is somehow unreasonable or unjust to their particular circumstances. Courts also must extensively record and justify deviation from the guidelines.

States with Child Support Guidelines in Statue

According to the National Conference of State Legislatures, the following 24 states establish their child support guidelines statutorily through their legislatures: California, Colorado, Florida, Georgia, Illinois, Kentucky, Louisiana, Maine, Maryland, Minnesota, Mississippi, Nevada, New Hampshire, New Mexico, New York, Ohio, Oklahoma, South Dakota, Texas, Utah, Virginia, Washington, West Virginia, and Wyoming.[4] Some of these states also concurrently establish guidelines in regulation (often through a child support commission).

The remaining 26 states (including Alaska) establish their child support guidelines by court rule or agency regulation. These states are Alabama, Alaska, Arizona, Arkansas, Connecticut, Delaware, Hawaii, Idaho, Indiana, Iowa, Kansas, Massachusetts, Michigan, Missouri, Montana, Nebraska, New Jersey, North Carolina, North Dakota, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, and Wisconsin. In Alaska, child support guidelines are provided in the Alaska Court Rules, Rules of Civil Procedure 90.3. We provide, as Attachment A, a table from the National Conference of State Legislatures that details which branch of government establishes child support guidelines in each state. The table includes relevant statutory and court rule citations from all states.

[3] 45 C.F.R § 302.56 and 45 C.F.R. § 302.56(f-g).

[4] We corresponded with Rochelle Finzel, children and families program manager, National Conference of State Legislators, at (303) 364-7700. The information NCSL provided on this matter was compiled in 2005, so some changes may have occurred since then.

Thirty-five (35) States Consider the Income of Both Parents in Determining Child Support Payments

In order to meet both federal requirements and the goal of providing adequate support, states have largely implemented two basic child support calculation models, respectively known as the *income shares* and the *percentage of income*. These models are used for calculating the amount of a child support award to be paid by the obligor parent.

The *income shares* model is used in 35 states and is based on the income of both parents. Alaska, along with 11 other states, employs the *percentage of income* model, which (usually) bases the award only on the non-custodial parent's income.[5] Three states (Delaware, Hawaii, and Montana) use the *Melson Formula* to calculate child support awards. This formula is generally thought to be more complex than the other models.[6]

The ***income shares*** model is based on the concept that a child should receive the same proportion of parental income that he or she would have received if the parents lived together. In an intact household, the income of both parents is generally pooled and spent for the benefit of all household members, including any children. Thus, the *income shares* model **calculates support as the share of each parent's income** estimated to have been allocated to the child if the original household were intact.

Using the *income shares* model, computation of child support is basically a four-step process:

(1) The income of the parents (gross or net) is determined and added together.[7]

(2) A "basic child support obligation" is computed based on the combined income of the parents, using a table or grid in the guidelines. The amounts in the table are derived from economic data on household expenditures on children.

(3) A "presumptive child support obligation" is then computed by adding expenditures for work-related child care expenses and extraordinary medical expenses to the basic child support obligation. Other add-ons and deductions may also be calculated.

(4) The presumptive child support obligation is prorated between each parent based on his or her proportionate share of total income. The obligor's share is payable as child support, while the obligee's share is retained and presumed to be spent directly on the child.

Distinguishing features of the income shares model include the following:

- It embodies the underlying economic assumption that as income increases, the proportion of income spent on child support decreases.
- It illustrates that both parents are sharing in the support of the child, thereby potentially increasing the perception of fairness to both parents.
- Compared to the *percentage of income* model, the *income shares* model can more easily take into consideration adjustments for shared and split custody, health care

[5] The states that the employ the *percentage of income* model are Alaska, Arkansas, Georgia, Illinois, Massachusetts, Minnesota, Mississippi, Nevada, North Dakota, Tennessee, Texas, and Wisconsin.

[6] The Melson Formula was developed by a Delaware Family Court judge; additional information on the formula can be found online at *http://courts.delaware.gov/Help/Support/SupportChapter8.pdf.*

[7] Whether the calculation is based on gross or net income varies among states.

needs, child care expenses, other children (previous or subsequent) needing support, and children's ages by the manipulation of income, add-ons and deductions and then allocating these costs between the parents. Because these factors can be built into the *income shares* formula, there is less reason for deviation from the guidelines' presumptive award. Limiting deviation meets the ideal of perceived fairness, as well as the federal requirement that the number of cases in which deviation is granted be limited. Limited deviation also meets the goals of consistency and predictability.

The ***percentage of income*** model (used in Alaska and 11 other states), stipulates that in *primary custody* arrangements—those in which the custodial parent has physical custody for over 70 percent of the year—**support amounts are based solely on the income of the non-custodial spouse** (obligor) and the number of children involved. In Alaska, and a number of other states, in *shared custody* situations—those in which each parent has custody for at least 30 percent of the year—the calculation includes the income of both parents, with the *percentage of income* model applied separately to each, then adjusted for the time each has physical custody. The parent with the higher calculation in this scenario becomes the obligor.

Proponents of the *percentage of income* model argue that both parents are assumed to contribute to the child's upbringing in the same proportion as the obligor. The custodial parent is making the contribution in the manner he or she would have made had the parties not divorced. Thus, there is no need to adopt a more complex formula. Many have argued, however, that it is inherently unfair for the custodial parent's income not to affect the presumptive amount. Typically, under this model, only a large disparity between the custodial parent's income and the non-custodial parent's income will be viewed as a justifiable factor upon which to base a deviation. Some states, including Alaska, address this concern in part by considering the income of both parents in shared custody situations. Those incomes are multiplied by the percentage of time each parent has physical custody, and, as we noted earlier, the role of obligor is assigned to the parent with the larger calculated amount.

Opponents of the *percentage of income* model also argue that it generally does not directly adjust for child care, extraordinary medical expenses, or whether other children are being supported in the obligor's household. Most states using this model have attempted to address a number of the above concerns by explicitly identifying these issues as factors for courts to consider as exceptions or deviations, or as expenses to be shared equally or reimbursed by one of the parties.

Despite their differences, child support guideline models have certain aspects in common. First, most of the guidelines incorporate a "self-support" reserve for the obligor.[8] Second, all the guidelines have a provision relating to imputed income.[9] Third, by federal regulation, all the guidelines take into consideration the health care expenses for the children, by insurance or other means. Lastly, most guidelines have incorporated into the presumptive child support formula special additions for child care expenses, special formulas for shared custody, split custody, and extraordinary visitation, and special deductions for the support of previous and subsequent children.

We hope you find this information to be useful. Please let us know if you have questions or need additional information.

---

[8] A self-support reserve means that the obligor is allowed to retain a certain amount of income below which level, support is minimal. For example, under the Washington state *income shares* model, the formula is not applied for obligors with net earnings of less than $500 per month.

[9] Imputed income is benefits that accrue even though no money is received. For example, an employee receives imputed income when an employer offers free health insurance and life insurance coverage or the use of a company car.

Ms. Beth Adams
Alaska court System
820 W. 4th Avenue
Anchorage, AK 99501

Dear Ms. Adams,

I am writing to make comments on the current Alaska child support guidelines (Civil Rules 90.3) I have worked for Senator Albert Kookesh for the past three years as his Legislative Aide. In the scope of my job I take calls from constituents, usually when our office is contacted people are out of options in resolving their situation(s).

First of all I would like to say I do appreciate what this department does. On the other hand we have taken many calls from frustrated obligors in the Child Support Services Division (CSSD). I have read the complex civil rule so I am somewhat aware of how it is suppose to work, unfortunately that is not the case with the people we hear from.

We have heard of peoples saving accounts zeroed out!

75% of wages deducted!

Drivers Licenses taken so the person can not drive to work!

No consideration given to present family; when 2/3 of wages deducted!

No communication, no explanation for changes and or reviews, and no call backs.

Under AS 25.24.160 (a)(1) **it requires that child support be set in an amount which is just and proper.** When someone can't go to work because he/she doesn't have a drivers license and his/her savings is wiped out and he/she can't support him or her self, little alone the family he/she has right now, that is not just and proper. Most people find they are helpless with no place to go.

I would like to suggest;

- No more than 33% percent of wages be taken, period. People are finding they cannot live on anything less, especially in rural Alaska, where the cost of living is 3 times higher than urban Alaska.
- Only two thirds of savings and other income be garnished.
- Consideration is given to ALL of the children in calculating the support payments. The 'subsequent' children have the same rights and needs as those under court order.

- The automated system is scary, the employer should have some control, like deducting only one third of ones pay.
- **Involve the parent(s) in any changes and reviews. If you involve the parent(s) in decisions, that's gives them ownership and a since of control and therefore are more cooperative**.
- A handbook in layman's terms.

Your consideration to making this Department more user friendly would benefit everyone, especially the children you are serving.

Thank you for your time.

Sincerely,

Dorothy J. Shockley
Legislative Aide to Senator Albert Kookesh

Senator French
Members of Senate Judiciary

Dear Chair French:

While we appreciate Senator Kookesh's desire to provide citizens a more accessible forum to promote revision to the child support process by moving the process from a court rule into statute, we are not convinced that such would be the case and are also concerned with the other significant change encompassed in SB134, Child Support Awards.

As of 2005, about half of the states establish child support guidelines statutorily and about half through court rule or agency regulation. The four-year review mentioned in the sponsor statement is a federal regulation to which states must comply no matter where the guidelines are placed. While amending court rules can be a laborious process, they can be revised through court procedures or through the legislative process at anytime; not just every four years. And while it may be easier to amend a statute through the legislative process, we are not convinced that it should be easy to change child support guidelines. Stability of the procedures in what can be volatile determinations should be the preference.

Currently Alaska uses a percentage of income model for determining support amounts and SB 134 proposes changing that process to an income shares model. It seems that the income shares model focuses on the standards of living of the custodial and non-custodial households after divorce. It doesn't consider whether or not children should be supported at the same level after the divorce as before; which violates a basic tenet of child support that being the child should remain at the same standard of living before and after the divorce. While more states employ the income shares model (37), no state has shown that use of the model results in appropriate child support awards.("Introduction to the Income-Share Child Support Guidelines", Roger F. Gay). In fact, at every level of income where income between the parties is not equal, the Income Shares model produces child support awards that are lower than any other state's currently existing child support guideline. (The "Cost Shares" Model of Child Support Guidelines", Laura W. Morgan, Family Law Consulting)

We respectfully suggest this issue deserves more research time to ensure that the best interests of children including their standard of living can be protected.

Subject: SB 134

Good morning. My name is Gayle Brown and I practice family law in Anchorage. I was present for the family law meeting yesterday wherein Senator Kookesh and Ms. Shockley were available by phone to tell us about the new bill regarding Civil Rule 90.3 being made into a statute and completely modified. When asked why a rule that has been in place for 25 years must be completely overhauled the answer we were given was because it is fair. That was the only reason given, nothing else. I am not opposed to making the child support rule into a statute, what I am opposed to is fixing something that is not broken. It does not make any sense to me and it did not matter how much Senator Kookesh or Ms.
Shockley raised their voices at my colleagues and I, what they were saying did not make sense.

Before the child support system is overhauled please conduct more research and come up with a better reason than it is "fair." As someone who has practiced family law for approximately 18 years I think this will do more harm than good for the obligors, obligees and children.

Thank you.

Honorable Senator French and other
Member of the Senate Judiciary Committee
Juneau, Alaska

Re: SB 134

Dear Committee Members,

I have previously responded to Senator French's request to hear from members of the bar who belong to the Family Law Section regarding SB 134. Today I attended by phone a Family Law Section meeting on the bill and listed both to Senator Kookesh and his legislative aid, Dorothy Shockley, discuss the bill.

I urge the Legislature not to pass this bill this legislative session. It provides for fundamental changes in how child support will be calculated and will have far reaching effects in this state. Years of court made decisions on how to calculate child support will become useless, and the result will be a long lasting surge of litigation as a result of its passage.

I am mostly retired and do a lot of volunteer work with victims of domestic violence, many of whom are low income. I do not see them benefiting from this bill. Ms Shockley told the Section meeting that the bill was a result of mostly non custodial men complaining that they were paying too much child support because their ex wives' income was not being considered. Yet my examination of the spreadsheet calculations led me to conclude that noncustodial parents with lower incomes will be paying more and not less as a result of this Bill. Senator Kookesh disagreed with my conclusion. One of us is wrong.

I suggest that if the Committee decides that this bill has merit, that it table it for this session and hold hearings between now and the next legislative session on the impact that this bill would have on child support calculations. Give those of us who practice in this area the time to go through a large number of existing cases and see what changes would result in the child support payments. Then the legislature can consider real examples and not hypothetical's as to the impact of this legislation.

Senator Kookesh told us today that he strongly believes that how child support is calculated should be as the result of a statute and not a court made rule. I strongly believe that changes in how child support is calculated should be carefully made with assurances that the changes will be for the betterment of the citizens of this State, and that's more important than which governmental body writes the rule.

Sincerely,

John Hoag

Subject: SB134 changing Child Support Calculations

Senator French,
In regards to SB134 changing the Child Support Calculations I disagree with it.

As I understand the motivation behind the Bill it is to be more Fair.
Fair to Whom? Child support is never a place of consensus. So In truth the only ones being happy with this is the Higher paid Non Custodial Parents - Maybe.

I do not see the fairness to the children. Statistically to raise a child is far more expensive then child support is paid in Majority of CS cases.

Is being Fair the only Issue? Or is there issues for Child Support vs Temporary Assistance?
Does this decrease Child Support Cases or allow better organization?

If there is a need for fairness maybe look at caping the Interest Charged especially for those with Higher Child Support amounts
I do know some Non Custodial Parents Low Income or Not when they get behind. They can never catch up.

Thanks for your time
Atticu Beau

Subject: Comment HB 344

Dear Senator French,
I attended a family law CLE teleconference this afternoon (Alaska Bar) concerning HB 344. There were many concerns expressed by attorneys in the audience, but the one thing that caught my eye was when I reviewed the actual calculations.

The main "pitch" for this bill was that the shared income model took both parents income into consideration, so it was more fair.

Fortunately, the presenters also attached some calculations to compare the new proposed amount vs. the amount a parent would pay if rule 90.3 was used.

Interestingly enough, the pattern outlined in the examples showed under the new legislation, the lower income parent pays more (than 90.3 would require) while the higher the income, the less the payor would pay than he/she would pay under Rule 90.3.

The end result:

The low income payors pay more and higher income payors pay less under the proposed legislation.

Is that fair?

I would respectfully request that this bill **not** be passed through committee.

Thanks for requesting input,

Subject: Information from a family law section member

Ms. Smith and Ms. Shockley,
We received the research below from a section member and they requested we pass this information along to your offices.

Here is the Home Page for Child Services Policies and the types of things it does. The commentary link and a few of the other links are good reads: http://www.childservicepolicies.com/child-support-models

This additional article has an excellent, and brief, explanation of the 4 main American methods/formulas for calculating child support, and their history and theory.
http://www.courts.mi.gov/scao/services/focb/formula/psi-ch3.pdf The bottom line is that there may be lots more research to do before just jumping ship to a new formula. However, the question of legislative versus court rule creation and amendment to any formula remains.

And here's another link to a typical list of current national child support issues/projects sponsored by a large American university
http://www.irp.wisc.edu/research/childsup/cspolicy/cspolicy05-07.htm

The last comment for the moment is that the ten or so articles I've just read (links picked up from Family Law Quarterly and places like that) seem to conclude unanimously that the income shares model (to which the current proposed bill would switch Alaska) by comparison to other formulas does have low income parents paying MORE than they pay under our current approach; that the Melson or hybrid formula mentioned has middle income parents paying MORE compared to the simple income shares approach; and that the income of obligor formula (which Alaska currently uses) has high income parents paying MORE than they are likely to be assessed under the income shares approach to which the bill proposes us to change. So basically, it could be said that the bill benefits higher income obligors and hurts low income obligors.... probably the opposite of what is intended or what the public would like to see?

Thank you for your assistance in sharing the information provided and coordinating with those interested in testifying today.
-Whitney

You need to put a limitations section for the collection of back child support. Also, you need a provision wherein the parties change custody but fail to go back to court to change child support-very important. You only cover from sole to shared.

Ok, sounds good. What time?
I've been invited to participate (via teleconference) in a discussion on SB 134 with a law firm tomorrow at noon.

Senator Coghill asked about non-monetary payments, and a lawyer called and suggested having a statute of limitations.....
I talked to Senator Kookesh, at this late date he just want to get it into statute and work on amendments next year.

I talked to leg finance in regards to the WA table, he talked to dept. of labor and they agree it doesn't need adjusting.....and will explain the particulars in an email.

MEMORANDUM March 12, 2012

SUBJECT: Two-thirds vote requirement (CSSB 134 (HSS)
(Work Order No. 27-LS0671\I))

TO: Senator Hollis French
Attn: Cindy Smith

FROM: Jean M. Mischel
Legislative Counsel

You have asked for an opinion on whether the above-referenced bill draft requires a two thirds vote of the legislature. The answer is no. CSSB 134(HSS) both codifies portions of Rule 90.3, Alaska Rules of Civil procedure, and repeals, in sec. 4 of the bill, the rule in its entirety.

Art. IV sec. 15 of the Constitution of the Sate of Alaska confers rule-making power on the Alaska Supreme Court as follows:

> The supreme court shall make and promulgate rules governing the administration of all courts. It shall make and promulgate rules governing practice and procedure in civil and criminal cases in all courts. These rules may be changed by the legislature by two-thirds vote of the members elected to each house.

In adopting the rule, the Alaska Supreme Court expressly stated that Rule 90.3 was not adopted under the Court's rule-making powers and is not subject to the two-thirds vote requirement in a note published with the rule which provides:

> This rule is adopted under the supreme court's interpretive authority pursuant to Article IV, Section 1 of the Alaska Constitution. Thus, it may be superseded by legislation even if the legislation does not meet the procedural requirements for changing rules promulgated under Article IV, Section 15.

If I may be of further assistance, please advise.

October 5, 2005

Ms. Beth Adams
Alaska court System
820 W. 4th Avenue
Anchorage, AK 99501

Dear Ms. Adams,

I am writing to make comments on the current Alaska child support guidelines (Civil Rules 90.3) I have worked for Senator Albert Kookesh for the past three years as his Legislative Aide. In the scope of my job I take calls from constituents, usually when our office is contacted people are out of options in resolving their situation(s).

First of all I would like to say I do appreciate what this department does. On the other hand we have taken many calls from frustrated obligors in the Child Support Services Division (CSSD). I have read the complex civil rule so I am somewhat aware of how it is suppose to work, unfortunately that is not the case with the people we hear from.

We have heard of peoples saving accounts zeroed out!

75% of wages deducted!

Drivers Licenses taken so the person can not drive to work!

No consideration given to present family; when 2/3 of wages deducted!

No communication, no explanation for changes and or reviews, and no call backs.

Under AS 25.24.160 (a)(1) **it requires that child support be set in an amount which is just and proper.** When someone can't go to work because he/she doesn't have a drivers license and his/her savings is wiped out and he/she can't support him or her self, little alone the family he/she has right now, that is not just and proper. Most people find they are helpless with no place to go.

I would like to suggest;

- No more than 33% percent of wages be taken, period. People are finding they cannot live on anything less, especially in rural Alaska, where the cost of living is 3 times higher than urban Alaska.
- Only two thirds of savings and other income be garnished.
- Consideration is given to ALL of the children in calculating the support payments. The 'subsequent' children have the same rights and needs as those under court order.

256
1/2

- The automated system is scary, the employer should have some control, like deducting only one third of ones pay.
- **Involve the parent(s) in any changes and reviews. If you involve the parent(s) in decisions, that's gives them ownership and a since of control and therefore are more cooperative**.
- A handbook in layman's terms.

Your consideration to making this Department more user friendly would benefit everyone, especially the children you are serving.

Thank you for your time.

Sincerely,

Dorothy J. Shockley
Legislative Aide to Senator Albert Kookesh

CHILD SUPPORT GUIDELINES (CIVIL RULE 90.3) REVIEW COMMITTEE
ISSUE LIST 2007

General Comments

Rule has proved extremely effective; many problems have been fixed. *Mendel (18)*

Rule fair and just; many revisions since last review are beneficial to children. But the way the rule is applied and enforced is problematic. *Hodson (169); St. Clair (213)*

System is fair in the way allocates child support. *Stockard (146)*

Substantive rule does not belong in Rules of Civil Procedure. *Wasche (4)*

Create non-partisan board to review all child support laws and rules. *Miller (223)*; *R. Rude (230)*

Changes that affect a large portion of society should not be decided by a committee. *Walker (126A)*

Review Required by Federal Law (42 U.S.C. Sec. 667; 45 CFR 302.56)

1. Considering economic data on the cost of raising children and case data, gathered through sampling or other methods, does the application of Civil Rule 90.3 result in appropriate child support awards?

2. Based on the same considerations, are deviations from Civil Rule 90.3 appropriately limited?

Support Generally

3. Institute the Income Shares Model. *McIntosh (5); Goforth (28); Corcoran (33); V. Rude (42); Hasty (52); A Travelin Man (53); Ipsen (59) Scott (83); Bishop (90); Demšar-King (92); Mahurin (93); Berger (96); Steik (99); Yerkes (100); Schwartz (102); Knapp (104); Ethridge (115); Laughlin (117); Johnson (122); Van Eck (123); Anderson (127); Johnson (129); Jarvis (131); Barnard (137); Lemons (142); Ferguson (143); Gilbert (145, 145#2); Matlock (151); Cagle (176); Hatfield (172); Thompson (184); Weldon (187); Allen (192); Thompson (207); Pitts (214); R. Rude (230); Webster (238); Teesateskie (246)*

4. Do not consider income of custodial parent. *Kuffner (107); Stockard (146); Krzynowek (209)*

5. Take into account non-custodial parent's child-related living expenses. *Larche (14); Ahmasuk (85); Avis (86); Townsend (126); Christian (128); Mack (135); Hatfield (172); Thompson (184); Weldon (187); Mr. Anonymous (226)*

6. Reduce percentages on which support is based. *Ahmasuk (85); Bishop (90); Laughlin (117).* Use sliding scale. *Gilbert (145, 145#2); Heilman (153); Thompson (184); A Travelin Man (53).* Studies show that percentage required for child support decreases as income increases. *Cagle (176)*

7. Increase percentage of support
   a. with age. *Bayless (171); Kakaruk (109)*
   b. with increased cost of living. *Wright (170)*

8. Make percentages equal for multiple children. *Villaran (237)*

9. Base support on actual costs of raising children. *Brosdahl (23); Thompson (81); Berger (96); Steik (99); Ahmasuk (85 #2); Bayless (171); Hatfield (172); Wasche (4)*

10. Base support on cost of living where children reside. *Avis (86); Bracken (125)*

11. Base support on economic analysis of Alaskan intact family. *Scott (83)*

12. Update economic analyses. *Cagle (176)*

13. Base support on actual time with parents. *Defedericis (72); CristyandJason (#121)*

14. Base support on expenses of split family, not intact family. *Weldon (187)*

15. Institute cap on amount of support paid. *St. Clair (213)*

16. Don't award support, other than college fund investments, if custodial parent capable of supporting household. *Hyde (118)*

17. Allow obligor to pay portion of support directly into college savings plan. *Avis (86)*

18. Make custodial parent account for how support spent. *Moses (6); Thompson (81); Avis (86); Thompson (184); Weldon (187); Thompson (207); Mr. Anonymous (226); Aldeman (229); Whaley (234); Webster (238)*

19. Major wage earner should have the majority of expenses for child care. *McIntosh (5)*

20. Non-custodial parent should receive notice when custodial parent incurs large expenses, such as orthodontia. *Larche (14)*

21. Eliminate support payments if non-custodial parent not allowed visitation, or child refuses to visit. *Bassetti (29); Corcoran (33); Tinker (112)*

22. Don't allow support when custody switches from custodial parent to non-paying parent with large amount of arrearages. *Dennis (20)*

23. Unfair that ex-partner's payment of his ex-wife's child support takes precedence because they were married, even though that child was born later. *KS (62)*

24. Don't allow custodial mother to collect support from multiple fathers. *Upton (61)*

25. State in rule that support payments are mandatory even if case on appeal. *Clark (205)*

26. Limit the amount of time that can pass before initial request for support. *La Vigne (173)*

27. Leaving determination of child support to complete discretion of judges based on "needs of child" leads to inconsistent orders. *Rose (183)*

Income

28. Rule should specify treatment of:
    a. Children's insurance benefits, both as income and credit;
    b. State/federal adoption subsidies, both as income and credit - Also see *Barnard (137)*;
    c. Income/deduction for accelerated versus non-accelerated depreciation for businesses or the self employed;
    d. Value of on-base housing for military.
    Morse (3)

29. Base support on actual current income. *Christian (128); Zaragoza (163); Weldon (187); Hatter (67)*

30. Base support on average of income over 2 or 3 years. *Baran (194)*

31. Base support on tax returns, not "state average" for profession. *Olcott (82)*

32. Base support on 60-hour work week to capture cash income from off-the-books employment. *Boutin (79)*

33. Base support on gross income. *Hancock (255)*

34. Base support on parents' standard of living. Allow party to petition court for judgment of "equal living standard." *Miller (210)*

35. Base support on "household" income (include income of new spouse of custodial parent.) *Little (45); Matta (60); Anderson (127); Christian (128); Davis (138); Ferguson (143); Ahmasuk (85 #2); Weldon (187); Eisenhower (202)*

36. Count value of underlying assets that produce capital gains, usually stocks, and impute that value to income; delete Section A.16. of Commentary. *Kirk, p. 2, #7 (77); 8/27/07 committee minutes.*

37. Include all gifts and inheritances as income. *Butterfield, pp. 7-8, #9-10 (225)*

38. Clarify Commentary, Sec. III.A. #21, to specify that income from interest in an estate (direct or through a trust), including one-time inheritances, counts as income. *Butterfield, p. 8, #10 (225)*

39. Include comp. time as income where obligor can choose to convert overtime to comp. time. *Larche (14)*

40. Include free rent as income, like housing provided by an employer. *Sharrock (139)*

41. Include welfare, Denali Kid Care, food bank, church donations, and farm income as income. *Howe (21)*

42. Exclude income from overtime or second job. *Dodson (47); Gilbert (145, 145#2); Mr. Anonymous (226)*

43. Exclude income from veterans benefits, disability, and Social Security. *Howe (21)*

44. Exclude income from COLA, military housing allowance (BAH), and military "basic allowance for subsistence" (BAS). *Henry (158); Jansen (39); Hatfield (172); Moore (113)*

45. Define "ordinary and necessary" in a way that does not require an experienced attorney to figure out. Other states have specific definition. *Young (51)*

46. Incorporate Rule 26 into Rule 90.3. *DuFresne (217)*

47. Make all income decisions final and binding on the parties. *DuFresne (217)*

Deductions

48. Allow deduction of monthly expenses such as rent, gas, and food. *Weldon (185)*

49. Allow deduction of out-of-pocket costs associated with work. *Klein (251)*

50. Include salespeople, who sometimes have substantial non-reimbursed business expenses, in discussion of deductions (Commentary, Section III.B.). *Kirk, p.3, #8 (77); 8/27/07 committee minutes.*

51. Allow deduction of child care expenses when obligor paying half. *Tyrone (64)*

52. Increase the allowable percentage that can be deducted for retirement contributions. *Klein (251)*

53. Don't penalize voluntary contributions of 7.5% of gross wages by subtracting mandatory contributions to retirement plan that are paid in lieu of social security tax, such as State of Alaska employees. *Finn (193)*

54. Allow deduction for unusually high costs of visitation (Bush travel). *Ahmasuk (85 #2)*

Reduced Payments for Extended Visitation

55. Clarify that visitation is defined as a percentage of days during the year. *Howe (21)*

56. Eliminate this provision. If the obligor has household suitable for children, a 75% reduction for less than 1 month's increased time is not in direct relationship to increased costs. *Hodson (169)*

57. Make visitation credit automatic. Parent receiving the credit should get it even if custodial parent cuts short the visitation period. *Butterfield. p. 2, # 1 (225) Also see Issue #110 for suggested change to forms.*

Potential Income

58. Potential income should be imputed and used to reduce/offset child support paid by non-custodial parent. *Larche (14)*

59. Fathers should not be penalized if they choose to quit their jobs. *Ahmasuk (85 #2)*

60. Amend exception to determination of potential income for parent taking care of child from under 2 years of age to kindergarten age. *Hodson (169)*

61. Amend paragraph (a)(4) as follows:
"When a parent is voluntarily underemployed, the court may impute income from the income of a new spouse. Half of the passive income of a new spouse will be presumed to be income available to an underemployed parent, if the income is reported as joint income on tax returns. A court may examine lifestyle and expenditures of an underemployed parent when imputing income if there is an obvious inconsistency between that individual's claimed income and the parent's lifestyle and expenditures." *Domke (179)*

62. Mandate that unemployed obligor demonstrate good faith effort to find employment commensurate with skills and education, unless physically or mentally incapable. *Messer (218)*

Shared, Divided, and Hybrid Physical Custody

63. Implement a comparative income approach for all situations. Consider allowing use of existing shared formula as the basic formula, adjusted appropriately for hybrid and divided. Use actual number of overnights proportional to both parents' incomes. *Alteneder/Marz, p. (181)*

64. Eliminate use of percentage of income approach in 60/40 shared custody situation. *Townsend (126)*

65. Penalize the parent who makes the greater amount of money when custody is 50/50. *Davis (40)*

66. Make child support zero in 50/50 custody, with each parent paying half the medical costs. *Bassetti (29);* - also split daycare and activities. *Johnson (56)*

67. Apply a cap on shared support after it is calculated. Limitation in (b)(1)(A) that applies income cap before calculating shared support amount could result in the lower earner paying support to the higher earner. *Mendel (18)*

68. Use sliding scale instead of current 90.3(b)(1)(C). *Pradell (49)*

69. Use adjustment from 0.5 to 1.5 instead of current 90.3(b)(1)(C). The 1.5 multiplier can create gross inequities against the payor. Default multiplier should be 1.0. Some judges already use 1.0 as default; rule should be consistent. *Leslie (199)*

70. Explain where the1.5% comes from (Commentary, Section V.B.) *Townsend (126)*

71. In shared custody both parties should be referred to as custodial parents. *Ward* (7); *Townsend (126); Alteneder/Marz, p. 1, #1 (181)* Use the terms payor and recipient or similar accurate terms. *Leslie (199)*

72. Remove incentives for fathers to fight for shared custody to reduce or eliminate child support. *Hodson (169)*

73. Calculate divided custody in the same way as for hybrid custody, by figuring the 90.3(a) percentage for the total number of children, then dividing that percentage by the number of children. *Butterfield, p. 4, #4 (225)*

74. 30% custody equals 109.5, not 110, overnights per year. (Commentary, Section V.) *Kirk, p. 3, #9 (77); 8/27/07 committee minutes.*

Income Cap

75. Apply cap at the end of the calculation rather than the beginning. *Kirk, p. 1, #3 (77); 8/27/07 committee minutes.*

76. Raise income cap. *Gilbert (145, 145#2); Hodson (169)*

77. Lower income cap. *Thompson (184 #2)*

78. Eliminate income cap entirely. *DuFresne (217)*

79. Change income cap to between $50,000 and $100,000. *Gilbert (145, 145#2)*

Minimum support amount

80. Increase minimum support amount. *Kirk, p. 2, #5 (77); 8/27/07 committee minutes; Wade (3); Chapman (36); Martin (80)*

81. Return to across-the-board $50 minimum for individuals below poverty guidelines. *Alteneder/Marz (181)*

82. Add new section 90.3(c)(6) as follows:

    "In the event a custodial parent's net income, after including child support calculated pursuant to this rule, exceeds the non-custodial parent's net income by 20% or more, the child support calculated pursuant to this rule shall be adjusted downward such that the custodial parent's net income exceeds the non-custodial parent's net income by no more than 20%." *Wasche* (4)

Subsequent Children

83. Divide support equally between all children of the common parent. *Jansen (39); Atkinson (211)*

84. Consider need to support subsequent spouses and children. *Ward (7); Andrews (34); Brownlee (24); Goforth (28); Jansen (39); Ipsen (59); Mahurin (93); Steik (99); Ethridge*

(115); Van Eck (123); Eilertsen (136); Ferguson (143); Matlock (151); Cagle (176); Hatfield (172); Duncan (182); Booth (200); Pitts (214); Houser (253)

85. First or primary family should have priority when determining support. *DuFresne (217)*

Health Care Coverage

86. Create exception for mandatory health care coverage if children are Alaska Native. *Ahmasuk (85 #2)*

87. Require parents to share costs of supplements, specialty foods prescribed by an M.D. for child with anemia, food allergies, or autoimmune disorder. *Nelson (159)*

88. Divide health insurance premiums equally among covered parties. Deduct allocation for each child when calculating support. *Hatfield (172)*

89. Ex is allowed to automatically deduct my 50% portion of the cost of insurance from his child support payment, while I have no means to collect his 50% of medical bills. *Nelson (159)*

90. Insurance companies won't communicate with parent who does not have the insurance, and parent with insurance won't reimburse other parent for paying co-pay or bill. *Butterfield, p. 5, #7 (225)*

Failure to File Documentation

91. Language proposed by Judge Bolger:

    90.3(e)(2) "If a party fails to file the required income statement or any required documentation, then the court may impose any sanctions which may apply. The court may also calculate the parties' income based on other available evidence. The court may rely on government reports on occupational wages or earnings if supported by evidence of the parties' age, health, residence or work history." *Bolger (76); 8/27/07 committee minutes.*

92. Provide that retroactive modification can go back to the date of a request under (e)(2), either by eliminating (e)(2) altogether, or by adding a sanction to (e)(2) if a party fails to respond. *Kirk, p. 2, #6 (77); 8/27/07 committee minutes.*

93. Make it an annual requirement to produce income information and include penalties for failure to do so. *DuFresne (217)*

Definition of Shared Physical Custody

94. Lower definition of shared physical custody to 25% or less. *Kirk, p. 2, #4 (77); 8/27/07 committee minutes.*

Travel Expenses

95. Provide more guidance to judges, such as list of factors to consider. *Butterfield, pp. 6-7, #8 (225)*

96. Require custodial parent to notify non-custodial parent of pending move so that transportation issues and costs, and visitation schedules, can be discussed while both parties are living in the same community within Alaska. *Roque (26)*

97. Require parents to share costs of reasonable travel expenses required to exercise visitation. Stipulate that if non-custodial parent relocates, absent employment or other obligation, the custodial parent may get waiver. *Hatfield (172)*

Modification

98. When obligor learns of older child for whom support is owed, allow retroactive modification for younger child or adjustment for older child. *Kirk, p.1, #2 (77); 8/27/07 committee minutes.*

99. Amend 90.3(h)(2) to clarify whether modification can be made effective retroactively to date CSSD gave notice of request to opposing party if CSSD determined that no modification was merited and requesting party later files motion to modify in court. *Kirk, p. 1, #1 (77), 8/27/07 committee minutes.*

100. Allow custodial parent who does not have shared physical custody an annual review of award without having to submit their own financial information. *Hodson (169)*

101. Absent unusual circumstance, limit petition to modify support to once every two years. Require both parents to submit income and expense information. *Hatfield (172)* Limit modifications to every 3 years. *Brownlee (24)*

102. Give consideration to highly educated person with good potential income who is laid off and unable to find work. *Finn (193)*

103. Don't allow modification based on increases in non-custodial parent's income. Studies show that percentage required for child support actually decreases as income increases. *Cagle (176)*

104. Amend 90.3(h)(1) as follows:

"A final child support award may be modified upon a showing of a material change of circumstances as provided by state law. A material change of circumstances will be presumed if ~~support~~ income as calculated under this rule is more than 15 percent greater ~~or less than the outstanding support order~~. For purposes of this paragraph, ~~support~~income[1] includes health insurance payments made pursuant to (d)(1) of this rule." *Teseniar (216)*

105. Ban retroactive payments if father was unaware of child's existence. *Mack (135); Kriska (188)*

---

[1] Changing "support" to "income" in this sentence was not part of the proposed change, but may make sense from the standpoint of internal consistency.

Dependent Tax Deduction

106. Grant dependent tax deduction to obligor. *Ahmasuk (85); Duncan (182); Booth (200); Mr. Anonymous (226)*

Forms

107. Eliminate Support Order Form. Parties, attorneys, and judges should be able to create their own form. Existing form makes order more complicated than necessary. Having form available only in PDF format is troublesome. *Wasche* (4)

108. Change DR-300 and DR-301, p. 2, to clarify that an amount of child support for each child must be specified. *Butterfield, p. 5, #6 (225)*

109. Add to court forms, under "Notice to Party Ordered to Pay Support (Obligor)" that obligor should write "child support" on the memo line of their check or money order, and keep copies of all records showing payment of child support. *Butterfield, p. 3, #2 (225)*

110. Change forms DR-300 and 301 so that judge has to check a box to undo the credit. Include line to allow judge to change percentage of credit. *Butterfield, p. 3, para. 5, #1, (225) Also see Issue # 57*

111. Clarify form to require, in shared custody, specific percentages of time each parent will have custody. *Butterfield, p. 4, #3 (225)*

112. Correct error in DR-308, lines 4.d. and 5.d. *Butterfield, p. 4, #5 (225)*

113. Require all court forms relating to child support to be written using plain language. *Alteneder/Marz, p. 4, #3 (181)*

Website

114. Partner with CSSD to develop a more sophisticated on-line calculator. *Alteneder/Marz, p. 5, #4 (181)*

Additional Public Comment "Issues" for 2007 Issue List:

New Letter:

84. Reference to letter from Dorothy Shockley should be added to category #84. *Shockley (256)*

113.1 (New category to be added for new issue) A handbook should be written in layman's terms. *Shockley (256)*

New Categories:

PFD

115. Make application for PFD mandatory or automatic for those who owe child support. *Robertson--Hebert (41); Hurst (48); Smith (55); Miss B (65); Polly (108); KS (62); Appreciative Client (206)*

Courts/Judges

116. Training of masters, judges, and attorneys (various issues - see letter). *Butterfield (225); Hodson (169)*

117. Overall, the court system has done a good job of interpreting and rationally applying the rule. *Butterfield (225)*

118. Require all court forms, instructions, and informational materials relating to child support to be written in plain language. Partner with CSSD to develop a more sophisticated on-line calculator. *Alteneder/Marz (181)*

119. CSSD should be the sole authority for income determination and be the first avenue of recourse in disputed support calculations. *DuFresne (217)*

120. Various proceedings take too long. *Willson (25); Jeno (46);Young (51); Hope (196); Kuffner (107); Hodson (169)*

121. Courts biased in favor of fathers. *Hodson (169)*

Statutory Changes

122. Amend statutes re: "friendly parent" provision in the best interests of the child standard. Friendly parenting provisions are being used to switch custody unjustly. The 2004 revision to eliminate "friendly parent" statute from being used against DV victims did not go far enough. Law gives implied preference for shared custody and should be revamped to remove any preference for joint legal or physical custody. *Hodson (169)*

123. Allow obligor to pay reasonable rate for Denali Kid's Care and drop crummy, expensive private coverage. Win/win for state, parents, and children. *Mr. Anonymous (226)*

124. State should pay cost of raising child and collect later. *Kertulla (147); Defedericis (72)*

CSSD

125. *Johnson (56); Appreciative Client (206); Ward (7); Howe (21); Willson (25); McKinney (27); Jensen (39); V. Rude (42); Bertelson (44); Elmes (8); Valmont (12); Davis (13); Garrett (17); Dennis (20; Doyle (22); Garrett (17); Mack (31); Stewart (35); Chapman (36); Hale (38); Robertson-Hebert (41); V. Rude (42); Bertelson (44); CristyandJason (121); Bertelson (44); Little (45); Jeno (46); Larche (14); Taylor (54); Chiklak (91); Nordby (95); Ahmasuk (85 #2); Bishop (116); Townsend (126); Walker (126A); Andrews (111); Davis (138); Stockard (146); Wolf (149); Atkinson (211); Neece (168); Wright (170); Rice (175); Huffman (190); Benoit-Ruch (191); Baran (194); Hope (196); Leslie (199); Boynton (203); Blackbird (208); Gillis-Boyd (212); D.B. (215); Teseniar (216); DuFresne (217); Miller (223); Mr. Anonymous (226); LEM (229); Rude (230); Anderson (232); Benitz (233); Whaley (234); Armstrong (250); Armstrong (254); Shockley (256).*

CHILD SUPPORT GUIDELINES (CIVIL RULE 90.3) REVIEW COMMITTEE
ISSUE LIST 2008 – AFTER COMMITTEE DRAFT CIRCULATED FOR COMMENT

Note: These are the issues that were used in the initial Issues List, which recorded comments received before the committee circulated a draft for public comment. Only those issues with a commenter's name and number in bold received comments in this circulation.

General Comments

I agree with the proposed changes to Rule 90.3. ***Partyka (P45)***

All proposed changes look reasonable, and certainly will assist the court in some child support cases. ***Judge White (P51)***

Outcome of process should be a more fair rule; right now it is inconsistent, and leads to people feeling that outcomes are arbitrary and unfair. ***Yerkes (P64)***

No help for the children. ***Jennings (P29)***

Your so called annual changes and recommendations should be written in clear and plain English; average parent only has a high school diploma. ***Banner (P50)***

I don't fully understand the proposed changes. ***Hyde (P4)***

I have no idea what this is. ***Rourke (P3)***

All the guidelines and rules don't amount to much if they are not enforced. ***Elmes (P43)***

What a waste of time, and what a crock of beans; the best thing that could happen to the Child Support System is to scrap it; this letter is falling on deaf ears and a waste of time on my part. ***De Federicis (P48)***

System is biased towards fathers. ***Walker Sr. (P18); Bassetti (P10); Tuttle (P80); De Federicis (P48)***

Rule 90.3, under (a)(1)(A) and (B), is unfair to anyone getting older. You are making it so a person has to pay support on their retirement. ***No Name Given (P69)***

The statement that the primary purpose of 90.3 is to ensure that orders are adequate to meet children's needs, and subject to the ability of parents to pay is very untrue. You force dads to pay regardless of ability, if they don't you criminalize them. ***No Name Given (P67)***

Purpose of child support awards are subject to the ability of "parents" to pay, all cases I know of only person whose income is considered is the paying party; I have never heard or seen anyone who had their taxes deducted as written in your commentary. As a matter of fact they have to pay the taxes even on the monies taken by child support. Taxation without representation!; Are income statements available for perusal by both parties? ***Rude (P54)***

Review Required by Federal Law (42 U.S.C. Sec. 667; 45 CFR 302.56)

1. Considering economic data on the cost of raising children and case data, gathered through sampling or other methods, does the application of Civil Rule 90.3 result in appropriate child support awards?

On page 2 of the Report, on Economic Cost of Raising Children, It is a leap of logic to say "economic data supports the conclusion that Alaska's guidelines for awarding child support continue to be appropriate and adequate," because there is no discussion of how the data brings you to this conclusion, it assumes existing standard is appropriate. Same argument with these statements: 1) awards are comparable with other states 2) committee concludes that application of 90.3 results in appropriate child support awards. Your conclusions are highly subjective. Father's rights groups and others disagree, so you should prove that awards are appropriate, and not just expect us to take your word for it. ***Thompson (P56)***

2. Based on the same considerations, are deviations from Civil Rule 90.3 appropriately limited?

Support Generally

3. Institute the Income Shares Model. ***Hughes (P63); Yerkes (P64); Hughes (P84); Gleeson (P76); Greer (P57)***

4. Do not consider income of custodial parent.

5. Take into account non-custodial parent's child-related living expenses.

6. Reduce percentages on which support is based.

7. Increase percentage of support
   a. with age.
   b. with increased cost of living.

8. Make percentages equal for multiple children.

9. Base support on actual costs of raising children.

10. Base support on cost of living where children reside. ***Hughes (P63); Hughes (P84); Tuttle (P80); Saunders (P71)***

11. Base support on economic analysis of Alaska intact family.

12. Update economic analyses.

13. Base support on actual time with parents. ***Imel (P40); No Name Given (P31); No Name Given (P19); Kalmakoff (P38)***

14. Base support on expenses of split family, not intact family. ***Sundsten (P81)***

15. Institute cap on amount of support paid.

16. Don't award support, other than college fund investments, if custodial parent capable of supporting household.

17. Allow obligor to pay portion of support directly into college savings plan.

18. Make custodial parent account for how support spent. ***Sanders (P66); Tuttle (P80)***

19. Major wage earner should have the majority of expenses for child care.

20. Non-custodial parent should receive notice when custodial parent incurs large expenses, such as orthodontia.

21. Eliminate support payments if non-custodial parent not allowed visitation, or child refuses to visit. ***White (P5); Hughes (P63); Yerkes (P64); Bassetti (P10); Hughes (P84)***

22. Don't allow support when custody switches from custodial parent to non-paying parent with large amount of arrearages.

23. Unfair that ex-partner's payment of his ex-wife's child support takes precedence because they were married, even though that child was born later.

24. Don't allow custodial mother to collect support from multiple fathers.

25. State in rule that support payments are mandatory even if case on appeal.

26. Limit the amount of time that can pass before initial request for support.

27. Leaving determination of child support to complete discretion of judges based on "needs of child" leads to inconsistent orders.

<u>Income</u>

28. Rule should specify treatment of:
    a. Children's insurance benefits, both as income and credit;
    b. State/federal adoption subsidies, both as income and credit
    c. Income/deduction for accelerated versus non-accelerated depreciation for businesses or the self employed;
    d. Value of on-base housing for military.

29. Base support on actual current income.

30. Base support on average of income over 2 or 3 years.

31. Base support on tax returns, not "state average" for profession.

32. Base support on 60-hour work week to capture cash income from off-the-books employment.

33. Base support on gross income.

34. Base support on parents' standard of living. Allow party to petition court for judgment of "equal living standard."

35. Base support on "household" income (include income of new spouse of custodial parent.) ***Conklin (P27)***

36. Count value of underlying assets that produce capital gains, usually stocks, and impute that value to income; delete Section A.16. of Commentary.

37. Include all gifts and inheritances as income.

38. Clarify Commentary, Sec. III.A. #21, to specify that income from interest in an estate (direct or through a trust), including one-time inheritances, counts as income.

39. Include comp. time as income where obligor can choose to convert overtime to comp. time.

40. Include free rent as income, like housing provided by an employer.

41. Include welfare, Denali Kid Care, food bank, church donations, and farm income as income.

42. Exclude income from overtime or second job.

43. Exclude income from veterans benefits, disability, and Social Security. ***Miller (P70)***

43.1 Law should not protect men from having to pay child support if they have filed for social security disability.

43.2 "Means based veteran's benefits in Committee. II A is vague and inaccurate. ***Barron (P16); Coleman (P73)***

44. Exclude income from COLA, military housing allowance (BAH), and military "basic allowance for subsistence" (BAS). ***Perkinson (P61); Hughes (P63); Tuttle (P80)***

45. Define "ordinary and necessary" in a way that does not require an experienced attorney to figure out. Other states have specific definition.

46. Incorporate Rule 26 into Rule 90.3.

47. Make all income decisions final and binding on the parties.

Deductions

48. Allow deduction of monthly expenses such as rent, gas, and food.

49. Allow deduction of out-of-pocket costs associated with work. It is unfair not to adjust income for living expenses and travel that is required by employer, even when person is still paying cost of primary residence. ***Thompson (P56)***

50. Include salespeople, who sometimes have substantial non-reimbursed business expenses, in discussion of deductions (Commentary, Section III.B.).

51. Allow deduction of child care expenses when obligor paying half.

52. Increase the allowable percentage that can be deducted for retirement contributions.

53. Don't penalize voluntary contributions of 7.5% of gross wages by subtracting mandatory contributions to retirement plan that are paid in lieu of social security tax, such as State of Alaska employees.

54. Allow deduction for unusually high costs of visitation (Bush travel).

54.1. Would like the committee to consider clarifying how much of a deduction a parent receives when she has children from a prior relationship. ***Partyka (P45)***

Reduced Payments for Extended Visitation

55. Clarify that visitation is defined as a percentage of days during the year.

56. Eliminate this provision. If the obligor has household suitable for children, a 75% reduction for less than 1 month's increased time is not in direct relationship to increased costs.

57. Make visitation credit automatic. Parent receiving the credit should get it even if custodial parent cuts short the visitation period

Potential Income

58. Potential income should be imputed and used to reduce/offset child support paid by non-custodial parent.

59. Fathers should not be penalized if they choose to quit their jobs. People are penalized for taking college classes to increase potential income; they are still charged as though working. ***Rude (P54)***

60. Amend exception to determination of potential income for parent taking care of child from under 2 years of age to kindergarten age.

61. Amend paragraph (a)(4) as follows:
"When a parent is voluntarily underemployed, the court may impute income from the income of a new spouse. Half of the passive income of a new spouse will be presumed to be income available to an underemployed parent, if the income is reported as joint income on tax returns. A court may examine lifestyle and expenditures of an underemployed parent when imputing income if there is an obvious inconsistency between that individual's claimed income and the parent's lifestyle and expenditures."

62. Mandate that unemployed obligor demonstrate good faith effort to find employment commensurate with skills and education, unless physically or mentally incapable. ***Finch (P2); No Name Given (P1); Butler (P6); No Name Given (P67); Jessup (P9); Hope (P30)***

Shared, Divided, and Hybrid Physical Custody

63. Implement a comparative income approach for all situations. Consider allowing use of existing shared formula as the basic formula, adjusted appropriately for hybrid and divided. Use actual number of overnights proportional to both parents' incomes.

64. Eliminate use of percentage of income approach in 60/40 shared custody situation.

65. Penalize the parent who makes the greater amount of money when custody is 50/50.

66. Make child support zero in 50/50 custody, with each parent paying half the medical costs.

67. Apply a cap on shared support after it is calculated. Limitation in (b)(1)(A) that applies income cap before calculating shared support amount could result in the lower earner paying support to the higher earner.

68. Use sliding scale instead of current 90.3(b)(1)(C).

69. Use adjustment from 0.5 to 1.5 instead of current 90.3(b)(1)(C). The 1.5 multiplier can create gross inequities against the payor. Default multiplier should be 1.0. Some judges already use 1.0 as default; rule should be consistent.

70. Explain where the 1.5% comes from (Commentary, Section V.B.)

71. In shared custody both parties should be referred to as custodial parents.

72. Remove incentives for fathers to fight for shared custody to reduce or eliminate child support.

73. Calculate divided custody in the same way as for hybrid custody, by figuring the 90.3(a) percentage for the total number of children, then dividing that percentage by the number of children.

74. 30% custody equals 109.5, not 110, overnights per year. ***Alteneder (P74); Master Rasley (P65)***

Income Cap

75. Apply cap at the end of the calculation rather than the beginning.

76. Raise income cap. Your recommendations make sense in that it takes more to live so you adjusted for inflation. ***Scheff (P23)***

77. Lower income cap.

78. Eliminate income cap entirely.

79. Change income cap to between $50,000 and $100,000.

Minimum support amount

80. Increase minimum support amount. ***Fyfe (P52); Wade (P22); Shields (P41); Jessup (P9); Butler (P6)***

81. Return to across-the-board $50 minimum for individuals below poverty guidelines.

82. Add new section 90.3(c)(6) as follows:

    "In the event a custodial parent's net income, after including child support calculated pursuant to this rule, exceeds the non-custodial parent's net income by 20% or more, the child support calculated pursuant to this rule shall be adjusted downward such that the custodial parent's net income exceeds the non-custodial parent's net income by no more than 20%."

Subsequent Children

83. Divide support equally between all children of the common parent.

84. Consider need to support subsequent spouses and children.

85. First or primary family should have priority when determining support.

Health Care Coverage

86. Create exception for mandatory health care coverage if children are Alaska Native.

87. Require parents to share costs of supplements, specialty foods prescribed by an M.D. for child with anemia, food allergies, or autoimmune disorder. ***Nelson (P7)***

88. Divide health insurance premiums equally among covered parties. Deduct allocation for each child when calculating support.

89. Ex is allowed to automatically deduct my 50% portion of the cost of insurance from his child support payment, while I have no means to collect his 50% of medical bills.

90. Insurance companies won't communicate with parent who does not have the insurance, and parent with insurance won't reimburse other parent for paying co-pay or bill.

90.1. Noncustodial parent should not get credit on his support when all he can provide is medical insurance, if I can provide medical and dental insurance at no additional cost for the plan. ***Fulks (P77)***

90.2. Trying to get reimbursed by noncustodial parent for medical needs not covered by insurance is not reasonable in domestic violence situations. ***Fulks (P77)***

Failure to File Documentation

91. Sanctions for not providing requested financial information:

90.3(e)(2) "If a party fails to file the required income statement or any required documentation, then the court may impose any sanctions which may apply. The court may also calculate the parties' income based on other available evidence. The court may rely on government reports on occupational wages or earnings if supported by evidence of the parties' age, health, residence or work history." Bolger (76); 8/27/07 committee minutes. **NOT recommended in this form by the committee.**

No Name Given (P69); Judge Steinkruger (P37); Thompson (P56)

91.1. After proposed new language in Comm. VIII, add case citation for McDonald v. Trihub, 173 P.3d 416 (Alaska 2007) which explains referencing to DOL statistics. ***Butterfield (P55)***

92. Provide that retroactive modification can go back to the date of a request under (e)(2), either by eliminating (e)(2) altogether, or by adding a sanction to (e)(2) if a party fails to respond.

93. Make it an annual requirement to produce income information and include penalties for failure to do so. ***Bassetti (P10)***

Definition of Shared Physical Custody

94. Lower definition of shared physical custody to 25% or less. ***Tuttle (P80); Moses (P36)***

Travel Expenses

95. Provide more guidance to judges, such as list of factors to consider.

96. Require custodial parent to notify non-custodial parent of pending move so that transportation issues and costs, and visitation schedules, can be discussed while both parties are living in the same community within Alaska.

97. Require parents to share costs of reasonable travel expenses required to exercise visitation. Stipulate that if non-custodial parent relocates, absent employment or other obligation, the custodial parent may get waiver.

Modification

98. When obligor learns of older child for whom support is owed, allow retroactive modification for younger child or adjustment for older child.

99. Amend 90.3(h)(2) to clarify whether modification can be made effective retroactively to date CSSD gave notice of request to opposing party if CSSD determined that no modification was merited and requesting party later files motion to modify in court.

100. Allow custodial parent who does not have shared physical custody an annual review of award without having to submit their own financial information.

101. Absent unusual circumstance, limit petition to modify support to once every two years. Require both parents to submit income and expense information.

102. Give consideration to highly educated person with good potential income who is laid off and unable to find work.

103. Don't allow modification based on increases in non-custodial parent's income. Studies show that percentage required for child support actually decreases as income increases.

104. Amend 90.3(h)(1) as follows:

"A final child support award may be modified upon a showing of a material change of circumstances as provided by state law. A material change of circumstances will be presumed if income as calculated under this rule is more than 15 percent greater, For purposes of this paragraph, income includes health insurance payments made pursuant to (d)(1) of this rule."

Deleted: support

Deleted: or less than the outstanding support order

Deleted: support

105. Ban retroactive payments if father was unaware of child's existence.

105.1. Would like to see a timeline when can then file for modification under shared custody; need this clarified for the child/children's continued support; do not think judge should prescribe time line of abandonment. Would like to see language to recognize parent with physical custody to be allowed a court order to be processed immediately. ***Hope (P30)***

Dependent Tax Deduction

106. Grant dependent tax deduction to obligor. ***Seppilu (P24); Hughes (P63); Hughes (P84)***

Forms

107. Eliminate Support Order Form. Parties, attorneys, and judges should be able to create their own form. Existing form makes order more complicated than necessary. Having form available only in PDF format is troublesome.

108. Change DR-300 and DR-301, p. 2, to clarify that an amount of child support for each child must be specified.

109. Add to court forms, under "Notice to Party Ordered to Pay Support (Obligor)" that obligor should write "child support" on the memo line of their check or money order, and keep copies of all records showing payment of child support.

110. Change forms DR-300 and 301 so that judge has to check a box to undo the credit. Include line to allow judge to change percentage of credit.

111. Clarify form to require, in shared custody, specific percentages of time each parent will have custody.

112. Correct error in DR-308, lines 4.d. and 5.d.

113. Require all court forms relating to child support to be written using plain language. ***Fyfe (P53)***

Website

114. Partner with CSSD to develop a more sophisticated on-line calculator.

PFD

115. Make application for PFD mandatory or automatic for those who owe child support.

Courts/Judges

116. Training of masters, judges, and attorneys

117. Overall, the court system has done a good job of interpreting and rationally applying the rule.

118. Require all court forms, instructions, and informational materials relating to child support to be written in plain language. Partner with CSSD to develop a more sophisticated on-line calculator.

119. CSSD should be the sole authority for income determination and be the first avenue of recourse in disputed support calculations.

120. Various proceedings take too long.

121. Courts biased in favor of fathers.

Statutory Changes

122. Amend statutes re: "friendly parent" provision in the best interests of the child standard. Friendly parenting provisions are being used to switch custody unjustly. The 2004 revision to eliminate "friendly parent" statute from being used against DV victims did not go far enough. Law gives implied preference for shared custody and should be revamped to remove any preference for joint legal or physical custody.

123. Allow obligor to pay reasonable rate for Denali Kid's Care and drop crummy, expensive private coverage. Win/win for state, parents, and children.

124. State should pay cost of raising child and collect later.

CSSD

125. *CSSD.* ***Shockley(P86); Swafford (P28); Manery (P44); Walker (P26); Butler (P6); Locher (P47); Tuttle (P80); Cruz (P17); Thompsen (P83); Cato (P34); Hope (P30) ; Scardina (P79); Close (P85); Goodrich (P33); Close (P49); Cato (P34); Tuttle (P80); Mielke (P60); Smith (P20); Elmes (P43); Cato (P34); Lowry (P35); Neece (P78); Imel (P40); Armstrong (P21) ; No last Name (P32); Greer (P57); Epipeke (P82); Swenson (P42); Kalmakoff (P38); No Name Given (P68); Brown (P75); Scheff (P23); Mullin (P39); Walker Sr. (P25)***

OTHER

126. State should pay support if they take custody of children.

127. Other. ***Walker Sr. (P58); Walker Sr. (P59); Walker Sr. (P62); Walker Sr. (P15); Walker Sr. (P14); Walker Sr. (P13); Walker Sr. (P12); Walker Sr. (P11); Walker Sr. (P8); Walker Sr. (P46); Walker Sr. (P72)***

PUBLIC HEARING - Child Support Guidelines Review Committee
April 23, 2008

Summary of Testimony:

Welcome by Judge Joannides. She informed participants that they are limited to three minutes of testimony, but that if there was time afterward we could come back to those show had additional comments. She asked that participants address comments to the proposed rule changes, not to individual situations or cases or interactions with CSSD. This committee is not in a position to change CSSD procedures, but just to recommend changes to the rule.

1. **Sara Sundsten (Kodiak)**: She is involved with the guidelines even though she has no kids. Her husband got a letter from CSSD saying he owes back support for a child that resulted from a one-night stand. Why does the system put so much burden on fathers? The law is very general, yet each situation is different. The Commentary that defines income (III.A) and references what would be available if the family had been intact is not applicable when the father and child were not ever a part of an intact family.

2. **Jerome W. Epipeke (Gambell)**: Like the previous testifier, he was overwhelmed by a letter from CSSD saying he owes a great amount of back child support. Believes the mother should have come forward earlier rather than waiting many years until it became a large dollar amount. He cannot pay because he's deeply in debt and lives in an area with high unemployment. He is disappointed with the system.

3. **Linda Thompsen (Anchorage)**: She wants a required review of a child support order whenever a party seeks a review. Her ex-husband was $50,000 in arrears and he never paid. She sought review from CSSD, but did not get her situation reviewed. The children lost their home because her ex did not pay. Suggests there ought to be some enforcement against those who do not pay. Moreover, her ex was working under the table as a trucker, and yet failed to pay child support as ordered by CSSD.

A separate issue is that her son got into trouble when the ex had custody, and ended up in state custody. So, she's paying child support for that boy, yet he is not living with the ex. Why does the her support money go to the ex when the child is in state custody and really they are both non-custodial parents?

4. **David C. Hughes (Fairbanks)**: he is in the military here, was divorced in AK, and the ex and children now live in Florida. Feels penalized because he earns a COLA for Alaska and that is considered income, so a portion goes to the ex. Commentary III. A.28: suggests deleting COLA from income when it is not needed by the children, and suggests that 28 should include BAH (base allowance for housing), BAS (base allowance for subsistence) and specialty pay, but include COLA only if the custodial parent and children remain in AK with servicemember.

He also believes there is a problem with determining the federal tax rate for a parent who is a servicemember. The CSSD calculator uses a formula with zero rate for single, but court uses pay stub. These can differ if someone has more deductions listed on their W-4 so that more tax is withheld in every paycheck. CSSD should calculate the

actual tax, but should put in an actual number for child exemptions, so it's easier to align their calculations with what the court uses.

He asked about the review every four years, and the committee explained the federal requirements.

He expressed a preference for using the income shares methodology.

He believes that Alaska uses a higher percentaqe rate (27%) than other states (which are 25%), generally. [He was incorrect in his assumption about Alaska's rates.]

He believes the rule should provide a penalty for a custodial parent who moves away and refuses to send the child back for court-ordered visitation. Should be $500 fee for each offense of not sending the children, and the offender should pay airfare and legal fees if needed.

5. **Tina Close (Arkansas):** She lived here and three fathers of her children are in debt to her for tens of thousands of dollars. Obligor works under the table for a trucking company, and she cannot collect the amount owed to her children. She suggests that the rule could include a provision saying that after a certain amount of child support debt, the obligor is sanctioned for non-payment, perhaps with jail after he or she is a set dollar amount in arrears.

6. **Dorothy Shockley (Fairbanks)**: She is a legislative aide in Senator Kookesh's office. She receives numerous calls from constituents having problems working with CSSD and how they calculate income and how zealous CSSD is about taking money from people's bank account. She suggests they perhaps need more staff to do their job more fairly. She explained that after the court decides a child support amount, people can have drastic change in circumstances, and there should be a faster way to get the support amount revised.

Ken Kirk suggested that the legislature may wish to pass child support guidelines, since these are substantive.

Testimony ended at 5:50 p.m.

Notes by Nancy Meade

Newspaper Notices of Public Hearing – to be published approx. April 21, 22, and 23

1. Anchorage Daily News - Notice for Community Datebook:

Public Hearing to take testimony on proposed changes to Alaska's child support guidelines. Proposals are posted at http://www.state.ak.us/courts/comment.htm. Testify at the Legislative Information Office, 716 W. Fourth Ave., Suite 200, at 5:00 p.m. on Wednesday, April 23. (264-0573; Rule90.3@courts.state.ak.us)

2. Juneau Empire

Public Hearing to take testimony on proposed changes to Alaska's child support guidelines. Proposals are posted at http://www.state.ak.us/courts/comment.htm. Testify at the Legislative Information Office, State Capitol, Terry Miller Building, Suite 111, at 5:00 p.m. on Wednesday, April 23. (264-0573; Rule90.3@courts.state.ak.us)

3. Kodiak Mirror

Public Hearing to take testimony on proposed changes to Alaska's child support guidelines. Proposals are posted at http://www.state.ak.us/courts/comment.htm. Testify at the Legislative Information Office, Kodiak Plaza Building, 112 Mill Bay Road, at 5:00 p.m. on Wednesday, April 23. (264-0573; Rule90.3@courts.state.ak.us)

4. Fairbanks Daily News-Miner

Public Hearing to take testimony on proposed changes to Alaska's child support guidelines. Proposals are posted at http://www.state.ak.us/courts/comment.htm. Testify at the Legislative Information Office, 1292 Sadler Way, Suite 308, at 5:00 p.m. on Wednesday, April 23. (264-0573; Rule90.3@courts.state.ak.us)

2010-2011 Civil Rule 90.3 Review
Summary of Comments *

No.	*Page No.*	*Surname*	*Issue Category*	*Notes*
1	1	Hope	Education (custody)	Judge erred in ordering 50/50 shared custody; ignored parties' history while supported pre-divorce. Decision imposed significant personal and financial burden on mother.
2	4	Leonard	Form	Short form order similar to 1040A
3	6	Hope		(Addendum to No. 1) See #1 above
4	9	Smyth	Support generally	*CS s/ be based on BI* Child was "kidnapped" by mother at birth; OCS action resulted in father being reunited with him. CSSD efforts to collect back support in these circumstances in not in best interest of child since it places unreasonable burden on both parents
5	11	Wasche	Shared income approach	1) CSG are substantive law and don't belong in a court rule and 2) state should adopt shared income model
6	13	Esmonde	Support generally	CS amounts are too high and CSSD has too much authority
7	14	Lockuk	Collection	Start taking CS from first paycheck. Too many parents quit/switch jobs to avoid paying
8	15	Hanson	Enforcement	Obligors should be required to file for PFD
9	16	Burnett	Support generally; health ins	CS amounts are disproportionately high for non-custodial parents
10	17	Nelson	Support generally; penalties	CS amounts are too high and shouldn't have gone to child's mother when the children were living with another family member. Interest and penalties on arrearages make the debt overwhelming. System is unfair to non-custodial parents (men).
11	21	Terrell	Collection	7 kids, 3 dads, receives $32/month in support. Fathers have combined $150K+ in arrearages.
12	22	Davis	Shared income; subsequent children; modification	Custodial parent's income and obligor's subsequent children should be considered in the calculation. Support should be based on applicable rate in custodial parents' home state.
13	23	Vergara	FORWARD?	No comment. Looking for information on an existing case.
14	25	Perry	Accountability	Custodial parents should be required to account for how CS is spent.
15	26	McNair	Inaccurate calculation; health insurance	Judge erroneously calculated CS based on fraudulent information provided by the other party. Judge failed to account for a child from another relationship and costs of insurance.
16	28	Friday	Income	Can the court order support to be paid from military retirement if the parent does not have any other income?
17	29	Peasant	Support generally; penalties	CS too burdensome for non-custodial parents; jail should not be a sanction for non-payment

No.	Page No.	Surname	Issue Category	Notes
18	30	Kowchee	FORWARD?	Not a comment. Appears to be trying to modify or appeal a support order.
19	31	Passi	Support generally; enforcement	Why is she ordered to pay support to children's grandmother during an extended summer visit when the father is behind in his support payments to her?
20	32	Schroeder	Enforcement	CSSD is failing to enforce a wage garnishment order. Non-custodial parent is employed by a family-owned business.
21	33	Ishnook	Education (custody)	Wants visitation; custodial parent is not allowing it to happen without a court order.
22	34	Eaton	Enforcement	The system provides too many protections for non-paying obligors at the expense of children
23	35	Twitchell	Support generally	1) CSSD takes more money from him than it pays to custodial parent (about $16/mo); 2) payments are late and 3) unfair that self-employed individuals can underreport income and pay less support.
24	37	Stout	Interstate collection	CSSD failed to provide timely information about modification and enforcement actions filed in another state.
25	38	Tichenor	Collections; penalties	System needs to be more aggressive in pursuing payments. Jail for anyone 90 days in arrears unless there's "a medical or life emergency."
26	40	Twitchell		(Second input) See #23 above
27	42	Bennis	Shared income approach; subsequent children	Custodial parent who opted not to take payments through CSSD because the amount ordered was too high. Suggests: 1) get rid of 20% of income rule; 2) use shared calculation and consider living expenses of obligor and 3) consider subsequent obligor's subsequent children in calculations
28	43	Lepping	Penalties	Why no interest or penalties imposed on late payments?
29	44	Valentine	Subsequent children	All children "biologically related" to the noncustodial parent should be considered in determine payments
30	45	Valentine	Education; automatic recalc	(Second input) Reduced income should trigger a recalculation and decrease in CS.
31	46	Stoll	Shared income approach	20% rule is too burdensome. "Melson Formula" (shared calculation) should be adopted.
32	49	Saling	Support generally	$50 minimum is too low.
33	50	Creedon	Support minimum; penalties	Minimum CS should at least meet the cost of child care so the custodial parent can earn a living. Don't suspend DL for failure to make payments. Loss of license results in loss of job, which results in loss of payments
34	51	Stice	Subsequent children	20% base amount is too high; subsequent children should be considered in calculations; 2nd family suffers as a result of too generous payments to husband's ex.
35	52	Madison	Enforcement	State should have more aggressively pursued CS. She had to wait 26 years before getting payments.
36	53	Carle	Enforcement	Older child receives support but younger child does not (?) [my copy is very hard to read]

No.	Page No.	Surname	Issue Category	Notes
37	54	Dayton	Forward? Education; enforcement	Attempting to file an appeal because $50 ordered is too little and CSSD is not making adequate efforts to collect $10K arrears.
38	60	Jordan	Forward?	Info request, no comment
39	61	Etheridge	Enforcement	CSSD is not aggressive enough in pursuing a parent who doesn't make payments. License revocation is not an adequate remedy.
40	62	Synder	Shared income approach	Custodial parent's income should be considered in calculations
41	63	Swan	Education, enforcement	Still paying 9 years after he relinquished parental rights and child was adopted by a relative.
42	66	Sibson	Support generally, education, enforcement	CS shouldn't be required to be paid if non-custodial parent is denied visitation; parent who can't provide safe, stable home should not be awarded custody.
43	69	delCarpio	Support generally	Voluntary retirement contributions should not be excluded from income in calculations
44	70	Mike	Support generally; subsequent children; shared income approach	Pays too much and still has a large arrearage; can't get CS modified; impoverished while ex and kids are living well.
45	74	Brown	Enforcement	Not receiving payments from the non-custodial parent, enforcement efforts not adequate.
46	75	Steel	Support generally, enforcement	Paying too much. Still being billed for a child after 2010 TPR.
47	76	Doe	Downward modification; support generally	1) CS should be recalculated when obligor's income drops; 2) regional cost of living should be considered.
48	78	Tyone	Enforcement	Check DNA before ordering support
49	79	Gonzalez	Enforcement	No receiving support from a parent who owns property and has had well paid jobs.
50	80	Grote	Education	Arrears owed on child claimed by another man; obligor relinquished parental rights, needs help to get rid of case
51	82	Megyesi	Support generally; shared income approach	1) CS should be dictated by cost of living in state where custodial parent lives; 2) custodial parent's income should be considered in calculation; 3) custodial parent's willingness to promote contact should be a factor; 4) the non-custodial parent's ability to pay support "without suffering hardship"
52	84	Anonymous	Enforcement	Agency should make better efforts to make all obligors pay.
53	86	Hunter	Support generally, enforcement, education	Unable to work due to disabilities and can't afford a coat or shoes. Only potential income is PFD but the state takes all of it to cover CS obligation.
54	87	Petruska		Missing

No.	Page No.	Surname	Issue Category	Notes
55	88	Sommerville	Education; enforcement; shared income approach	Payments she made directly to father should be counted as support; custodial parent's income should be considered in the calculation. Non-custodial parent's basic needs should be considered
56	90	Miller	Support generally, enforcement	Agency should modify when income drops as it does when income increases, not require obligor to go to court. Time in jail should result in reduction as well as when parent is receiving disability or workers comp payments. 40% payments too high for obligor on SSDI
57	92	Lightner	Shared income approach	Consider custodial parent's higher income in calculations.
58	93	Suggs	Enforcement	Sending her a check for $5.60 is a waste of time, ink, and postage
59	94	Lyons		System should better address situations where a non-custodial parent is voluntarily un/under-employed. Court should have considered his PFD and native dividends in setting support. More aggressive enforcement and consequences for late payment. Also unhappy that the child's PFD and dividends can't be used for her support.
60	98(.1)	Upton		CSSD holding $4500 in funds that were "pre-paid." Won't refund any amount or increase payments to the child.
61	100	Knowlton		Nothing paid in almost 10 years; arrears over $13K but no action by CSSD.
62	N/A	(Duplicate)		
63	103	Fleming		Reference to comment submitted earlier.
64	104	Mendel		Modify income cap to impose it after the calculation is made to limit the amount of support. Current system is unfair to parent with lower income.
65	105	Dubin		Request for modification of current support order. Forwarded to appropriate office?
66	106	O'Hara		Using last year's figures for income and child care expenses results in unfair calculation. Hard to get an adjustment when actual care expenses are lower than claimed by the custodial parent.
67	108	Daves		Allow credit at 25% visitation not 28% (110 days). Allow CSSD to modify with proof that non-custodial parents has child for more overnights than stated in the custody order.
68	109	Arts		Non-custodial parent payments for back support are too low based on current employment and assets. Gender basis in decision.
69	110	Marjason		Support calculation should consider lower cost of living in state where custodial parent resides. Custodial parent's household income should be a factor in setting amount. Ex-wife in intentionally unemployed because she is supported by current husband.

No.	Page No.	Surname	Issue Category	Notes
70	111	Burger		Support ordered is too high for his current income.
71	114	Hayden		Ex owes $273K but CSSD is making no effort to enforce support order. Claimed they couldn't find him; she tried Google and located him in minutes.
73	118	Barclay	Support generally; forms	VA disability payments cannot be included in income. Example in our instructions that includes these payments should be removed.
74	121	Tipton	Enforcement	CSSD is failing to enforce support orders for wife's ex-husband.
75	122	Khamphanh	FORWARD	Agrees to pay $50 month, although it is a hardship
76	123	Landrum	FORWARD; Education	Support amount needs to be modified because he's in jail and order includes children that aren't his.
77	127	Laroux	Support generally, Education	Consider household income of re-married former spouse; should receive credit when custodial parent moves out of state with children making shared custody impossible.
78	128	Laughlin	Support generally	Non-custodial parent's monetary gifts of $20K/year for 10 years should be considered income in calculating support
79	130	Morgan	Support generally, Education	Alaska calculation doesn't take into account his other children; he now lives in another state so feels support should be calculated at that level, not Alaska. CSSD staff is unhelpful and modification takes too long.
80	132	Stallings	Enforcement	CSSD is failing to enforce arrears against a self-employed non-custodial parent.
81	134	Burgener	FORWARD; support generally; medical, enforcement	Asking CSSD to recognize hardship and reduce her support and medical support obligation. Appears to be asking an AG to participate in a hearing. Submitted docs that appear to be evidence for her hearing. Claims no knowledge of arrears until property lien notice.
82	149	Locher	Enforcement	Why not pay a lump sum pay off arrears when obligor receives a Native dividend.
83	156	Brockman	Education, Support generally; subsequent children	Support bill is 75% of monthly income of a single parent with 4 other children. She's homeless and has to use the Food Bank to feed her family.
84	157	Withrow	Support after 18	Custodial parent should be required to request support after 18 within a short time after the child's birthday. Delay in request can result in a large arrearage for the obligor.
85	158	Franco		(see also p. 162)
86	159	Miller	Enforcement	Taking away the obligor's drivers license is not an effective enforcement tool since it makes it impossible for him/her to work.
87	160	Goulette	Enforcement	Reduce level for felony non-payment from $5K to $2500. More active and aggressive enforcement is needed. Visitation should be conditional on making regular payments. 100% wage garnishment when arrears reach $5K, seize all property at $10K

No.	Page No.	Surname	Issue Category	Notes
88	162	Franco	Enforcement; education	Enforcement when receiving welfare; support level too low if custodial parent has 100% custody;
89	163	Tuchscherer	forms	3d party custodian; indicate "credit" on form
90	164	Banner	General; enforcement	Driver's license should not be taken; obligee should account for funds; Enforcement more aggressive when receiving welfare
91	171	Stevens	n/a	Unintelligible
92	172	Saechao	Enforcement	Enforcement from self-employed obligor
93	174	Rose	Subsequent children	Calc excludes cost to care for subsequent children; imposes hardship on blended family
94	175	Hunter	(Follow-up?) Downward mods	No downward mods (military deployments temporary; CS goes up but not down)
95	177	Taylor	Shared income approach	Custodian parent's income should be considered in the income calc
96	178	Stubblefield	Support generally; enforcement	No notifying ER's/no income w/holding if payments current; limit CSSD power to sweep accounts; custodial parent lack of contribution to kids (if unwilling to work, no consequences)
97	180	Stephenson	Support generally; retroactive awards; welfare	Not wanting to share personal info; retroactive awards of support when parent unaware of paternity and another dad on the birth cert; making dad presumptive obligor because of mom on welfare; SOL for putting parent's name on birth cert;
98	183	Gum	Support generally	Dead beat dad voluntarily unemployed (tho disabled)
99	184	Mongeau		She lost 2 ½ years of support payments when her attorney failed to notify her that a support order was issued in father's favor in his action to modify custody. Father should have been ordered to pay the back support.
100	189	Shiedt	Enforcement	Father is self-employed and not paying adequate support
101	190	Walker		Appears to be complaining that the SS administration has not been forwarding full payments to custodial parent. ?
102	192	Collins	Support generally	Complaint that $30/month is too high for an incarcerated father. Is appealing because of hardship.
103	193	Arabie	Education	Cannot lien on native stock; taking too much; custodial parent had no custody past 10 years;
104	196	Baldwin	Enforcement (arbitrary)	30-year saga of mis-management obligation.
105	200	Smith (R)	Support generally	Attach my PFD while I'm in jail and give it to my daughter.
106	201	Washington	Forward? Subsequent children; de jure v. de facto?	Wants DNA test and won't pay until it happens; drivers license issue; subsequent child suffering b/c of obligation re 1st child. Bio mom doesn't see 1st child but dad has obligation (welfare?)
107	203	Walker	Unintelligible	(Second input)
108	205	Marczesky-Lakin	Education from judge; mod	Modification; doesn't understand ruling

No.	Page No.	Surname	Issue Category	Notes
109	206	Smith (J)	Education, extended visitation credit	50/50 custody; M vol unemployed so F pays $1100 which supports C1 and M; has child for 3 of 4 weeks when M takes vacation and still has to pay
110	207	Mack	Enforcement	Failure to collect on debt dating back to 1983
111	208	Perry	Support generally	Support too high or make obligee account for funds
112	209	Carter	Support generally	Require obligee account for funds
113	210	Holmes	Support generally; shared income approach	Eliminate 110 overnight threshold and base the calc on straight % of time; don't forget custodial expenses; shared income approach (modified)
114	212	Nolton	Education	Same obligation during periods of unemployment
115	213	Rude	Support generally	Case arrears upon reactivation; IRS refund attached.
116	223	Kish	Educational	Support payment too high
117	224	LaVigne		
118	225	Hockin	Subsequent children; support generally	Income should be based on guaranteed salary (not bonuses, etc.); subsequent children worth zero; obligee should provide accounting; no custody to unemployed parent; lower percentages
119	227	Brandner	Support generally	Disgruntled with obligee and system
120	232	Shaffer	Rule changes	Provide better definition of start date for support in rule; allow parties up to 2X/year to ask for updated income info; specify that support includes only payments made directly to obligee or CSSD and does not include payments made to third parties for children's expenses.
121	234	Franco	Enforcement; support generally	No help with enforcement except when she was collecting public benefits; support amounts too low
122	235	Sergie	Forward?	Questions about specific case
123	236	Sikorski	Forward?	Question about his case; support amount too high for obligor paid at minimum wage for part time job.
124	239	Maillelle	Forward?	Questions about his case.
125	240	Lopez	Support generally; forward?	$50/month too much for incarcerated obligor.
126	243	Anonymous	Support generally; shared income approach; subsequent children	20% too high, especially in Bush communities; custodial parents income should be considered in calculation along with obligor's subsequent children.
127	244	Ellison	Support generally; military pay	Children's PFDs should be required to be saved; military deployment, TDY and COLA amounts should not be included in support calculations
	246	Johnson		No comment attached.
129	248	Riggs	Support generally	CSSD requires him to provide insurance for adopted children covered by stipend from state where adopted; support amount and retroactive application has been very burdensome; custodial parent's voluntary unemployment should be considered in calculation along with amounts he is paying for mortgage on home occupied by custodial parent.

No.	Page No.	Surname	Issue Category	Notes
130	249	Young	Support generally	Seasonal employee feels enforcement should recognize his varying income.
131	251	Steumke	Shared income approach; treatment of military pay	Ex-wife's voluntary underemployment and lengthy student status should be considered in calculation; why is his BHA counted as income but not her GI bill payments? Obligee should be required to provide accounting.
132	255	Jackson	Enforcement	CSSD didn't contact him for three years after ex-wife applied for support; other payments to support household should be considered support; support debt included periods when parties were reconciled and he was living in the home; CSSD still sending statements showing $0 balance more than 5 years after last payment.
133	257	Bigelow	Education; support generally	How does he get support modified now that ex-wife in employed and earning more than he does?
134	258	Fimbres	Support generally	Interest shouldn't be charged on arrears; couldn't challenge support order because he didn't have $ for filing fee state should establish fund to pay filing fees for those who can't afford them.
135	260	Fimbres		Duplicate.
136	262	Butterfield	Rule; enforcement	Rule should be modified to give credit for costs of prior children in shared custody arrangement in calculating support for a child with another parent; CSSD should allow downward modification when provided with proof of unemployment due to medical disability; CSSD has an institutional bias against fathers.
137	268	Jacobs	Education; enforcement	CSSD continues to garnish and then refund payments to parent who no longer has a support obligation.
138	269	Hart	Enforcement	CSSD continues to calculate support including BAS that he does not receive; agency refuses to correct error since difference is less than 15%
139	270	Uttke	Education; enforcement	Doesn't understand why she owes so much support or why state keeps taking her PFD and fails to pursue collection from children's fathers.
140	272	Moe	Enforcement; court	Mother angry about failure to enforcement support obligation and state's failure to pursue criminal charges for son's abuse by father.
141	286	Morrow	Support generally	Incarcerated; makes $27/month can't get a reduction from $50 minimum
142	287	Sapp	Support generally	Incarcerated; makes $27/month can't get a reduction from $50 minimum
143	288	Sundsten	Support generally	Support should be "a rate of cost for a child" rather than a percentage of non-custodial parents income; employee travel expenses should not be included in income calculation; arrears from birth of child creates an insurmountable debt for obligor.
144	291	Fimbres	Support generally, enforcement	Interest should not be charged on CS arrears; denied "due process" because he couldn't afford filing fee for appeal.
145	293	Howard		Can't read

No.	Page No.	Surname	Issue Category	Notes
146	297	Pitt	Support generally, subsequent children	Assessing 20% per child is too much for father with children by two mothers; calc should consider household income of the custodial parent; custodial parent's voluntary underemployment should be considered.
147	301	Baldwin		Link access and support; require accounting by custodial parent.
148	302	Fyffe	Subsequent children	Consider subsequent children in calculation
149	303	Littleton	Enforcement	As obligor: CSSD erred in requiring her to provide medical coverage when child covered by custodial parent's plan, in failing to account for her travel expenses, and not reducing support during extended summer visitation. As obligee: support hasn't increased in 14 years; higher costs of supporting a teen justify increase in payment from non custodial parent.
150	305	Stalzer	Enforcement; shared income, support generally	Enforce requests for documents from custodial parent; include subsequent children in calcs; adopt income share model; work travel expenses should be considered.
151	307	Crombie	Support generally, shared income	Tax deduction should go to parent with income; consider custodial parent's income in calculation
152	308	Boyce	Enforcement	CSSD wouldn't modify downward when he went back to school and income dropped.
153	309	Brandon	Enforcement, support generally	Modification when income drops is too difficult; got a well-paid job overseas but lost it because he can't get a passport while in arrears.
154	310	Mueller	Support generally	Military OHA and BAS should be excluded from income; child support obligations should not be enforced in a country that does not recognize visitation and custody rights.
155	314	Brown	Support generally, education	CSSD/courts refused to recognize transfer of house to custodial parent in lieu of child support. She got the house and a support order.
156	316	Lustig	Education	Question only
157	317	Smith	Forward? Education	Paying support but paternity has not been established and he is not allowed visitation
158	319	"Kobuk"	Support generally, enforcement	Why can support be reduced when unemployed and in treatment required by OCS?
159	320	Pendergrass	Enforcement, support generally	Arrears should start to accrue when a case is filed or reopened, not retroactive to an earlier event/date; support paid to the state when custodial parent is receiving public benefits should be assessed to both parents; make custodial parents account for how they spend support.
160	321	Edwards	Enforcement	Why no withholding with first paycheck? Self-employed obligor who owes $80K

No.	Page No.	Surname	Issue Category	Notes
161	322	Benavides	Shared income; subsequent children; accountability	Include entire household income of custodial parent too. Blended family issues. Account for expenditures (debit cards).
162	324	Diamond	Support generally	(Huh?)
162.5	325	Chisholm	Enforcement	Taking DL prevents parent from working; impact on credit; no mod reduction despite requests by obligee and why paperwork required to mod anyway?
163	328	Mays	Education	Asks that AK BAH and other entitlements not be counted as income after moved to new duty stn (lack of understanding of mod process).
164	329	Brooks	Potential income	Need to define potential income as based on parent's work history, qualifications, and job opportunities. Here, obligor unwilling to be underemployed ("able-bodied, certified geologist")
165	332	Lee	SSI income and enforcement	SSI paid to children and obligee should offset support obligation of disabled obligor. CSSD does not count CIB or CIC as CS. Better data sharing between SSA and CSSD.
166	335	Mueller	n/a	n/a
167	336	Keller	Disability income	Support payments replaced by SSI or SSDI
168	337	Young	Enforcement	Goes up when income is up; does not go down when income is down.
169	338	Anonymous	Shared income; Accounting	Burden unfairly heavy on noncusdial parent. Should make obligee do accounting
170	340	Moore	Support generally	Eliminate no-fault divorce law; award no support if 50/50 custody arrangement. Keep alimony out of 90.3
171	341	Werner	Enforcement; correct calc?	Custodian moves frequently, no info sharing across state lines.
172	344	Marz	Support generally	Eliminated "primary" and "shared" labels (devisive); use actual percentage of time (not percent of overnights) child is with each parent.
173	345	Mead	Education	Taking too much; I'm disabled. No understanding of mod process

Review Required by Federal Law (42 U.S.C. Sec. 667; 45 CFR 302.56)

1. Considering economic data on the cost of raising children and case data, gathered through sampling or other methods, does the application of Civil Rule 90.3 result in appropriate child support awards?

2. Based on the same considerations, are deviations from Civil Rule 90.3 appropriately limited?

Rule 90.3 Generally
Child Support Generally
Custody Generally
90.3(a) - Guidelines - Primary Physical Custody
90.3(a)(1) - Adjusted Annual Income
Income Generally
90.3(a)(2) - Percentage of Income Approach
90.3(a)(3) - Reduced Payments for Extended Visitation
90.3(a)(4) - Potential Income
90.3(b) - Shared, Divided, and Hybrid Physical Custody
90.3(b) - Shared, Divided, and Hybrid Physical Custody
90.3(b)(2) - Divided Custody
90.3(b)(3) - Hybrid Custody
Thinks form DR-308, lines 4.d. and 5.d. are in error. Item 4 on the form is the calculation of support owed to mom for children in her primary custody. *See letter p. 4 and example p. 10 - Butterfield (225)*
90.3(c) - Exceptions
90.3(d) - Health Care Coverage
90.3(e) - Child Support Affidavit and Documentation
90.3(f)(1) - Definition of Shared Physical Custody
90.3(g) - Travel Expenses
90.3(h) - Modification
90.3(i) - Third Party Custody
90.3(j) - Support Order Form
90.3(k) - Dependent Tax Deduction

Calculations were completed based only on the information provided:

> *I was asked for an example of how the income shared model calculates a child support award. Let's say the mother makes $1,000 per month and has their one child for 10 months per year. The father makes $1,500 and has their child for 2 months per year.*

There are two important factors missing: the age of the child and whether or not this income includes the annual Permanent Fund Dividend. These calculations assume the income provided is NET income and PFD was not added.

This is a standard primary custody calculation as Dad's two months of physical custody do not meet the threshold of 25% custody. (2/12 = 17%)

Total Income:

Mom	$1,000 per month	(1000/2500 = 40%)
Dad	$1,500 per month	(1500/2500 = 60%)
	$2,500 per month in combined monthly income	

Based on the economic table for a child age 0-11, the base monthly support is $526.00. Since Mom has primary physical custody, Dad's obligation is the presumptive support obligation multiplied by his proportionate income share:

$526.00 x 60% = $315.60 per month

For a child over the age of 12, the base monthly support is $650.00. This results in a support obligation owed by Dad as follows:

$650.00 x 60% = $390.00 per month

For comparison purposes, a calculation was also completed using the Civil Rule 90.3 guidelines.

Dad's NET monthly income	$1,500.00
Percentage of income for 1 child	.20
Dad's child support obligation	$ 300.00 per month

Rule 90.3. Child Support Awards.

(a) **Guidelines--Primary Physical Custody.** A child support award in a case in which one parent is awarded primary physical custody as defined by paragraph (f) will be calculated as an amount equal to the adjusted annual income of the non-custodial parent multiplied by a percentage specified in subparagraph (a)(2).

(1) Adjusted annual income as used in this rule means the parent's total income from all sources minus:

(A) mandatory deductions such as:

(i) federal, state, and local income tax,

(ii) Social Security tax or the equivalent contribution to an alternate plan established by a public employer, and self-employment tax,

(iii) Medicare tax,

(iv) mandatory union dues,

(v) mandatory contributions to a retirement or pension plan;

(B) voluntary contributions to a retirement or pension plan or account in which the earnings are tax-free or tax-deferred, except that the total amount of these voluntary contributions plus any mandatory contributions under item (a)(1)(A)(v) above may not exceed 7.5% of the parent's gross wages and self-employment income;

(C) child support and alimony payments arising from prior relationships which are required by other court or administrative proceedings and actually paid;

(D) child support for children from prior relationships living with the parent, calculated by using the formula provided by this rule; and

(E) work-related child care expenses for the children who are the subject of the child support order.

(2) The percentage by which the non-custodial parent's adjusted income must be multiplied in order to calculate the child support award is:

(A) 20% (.20) for one child;

(B) 27% (.27) for two children;

(C) 33% (.33) for three children; and

(D) an extra 3% (.03) for each additional child.

(3) The court may allow the obligor parent to reduce child support payments by up to 75% for any period in which the obligor parent has extended visitation of over 27 consecutive days. The order must specify the amount of the reduction which is allowable if the extended visitation is exercised.

(4) *Potential Income.* The court may calculate child support based on a determination of the potential income of a parent who voluntarily and unreasonably is unemployed or underemployed. A determination of potential income may not be made for a parent who is physically or mentally incapacitated, or who is caring for a child under two years of age to whom the parents owe a joint legal responsibility. Potential income will be based upon the parent's work history, qualifications, and job opportunities. The court also may impute potential income for non-income or low income producing assets.

(b) **Shared, Divided, and Hybrid Physical Custody.**

(1) *Shared Physical Custody.* A child support award in a case in which the parents are awarded shared physical custody as defined by paragraph (f) will be calculated by:

(A) Calculating the annual amount each parent would pay to the other parent under paragraph (a) assuming the other parent had primary custody. In this calculation the income limit in subparagraph (c)(2) and the minimum support amount in subparagraph (c)(3) apply.

(B) Multiplying this amount for each parent by the percentage of time the other parent will have physical custody of the children. However, if the court finds that the percentage of time each parent will have physical custody will not accurately reflect the ratio of funds each parent will directly spend on supporting the children, the court shall vary this percentage to reflect its findings.

(C) The parent with the larger figure calculated in the preceding subparagraph is the obligor parent and the annual award is equal to the difference between the two figures multiplied by 1.5. However, if this figure is higher than the amount of support which would be calculated under paragraph (a) assuming primary custody, the annual support is the amount calculated under paragraph (a).

(D) The child support award is to be paid in 12 equal monthly installments except as follows:

(i) if shared custody is based on the obligor parent having physical custody for periods of 30 consecutive days or more, the total annual award may be paid in equal installments over those months in which the obligor parent does not have physical custody; or

(ii) if the obligor parent's income is seasonal, the court may order unequal monthly support payments as provided in subparagraph (c)(5).

(E) The child support order must state that failure to exercise sufficient physical custody to qualify for shared physical custody under this rule is grounds for modification of the child support order. Denial of visitation by the custodial parent is not cause to increase child support.

(2) *Divided Physical Custody.* A child support award in a case in which the parents have divided custody is calculated, first, by determining what each parent would owe the other for children in that parent's primary physical custody under paragraph (a), taking into account the income limit in subparagraph (c)(2) and the minimum support amount in subparagraph (c)(3), and offsetting those amounts. Second, because divided custody is an "unusual circumstance," the court must consider whether this support amount should be varied under subparagraph (c)(1).

(3) *Hybrid Physical Custody.* A child support award in a case in which the parents have hybrid custody is calculated by applying paragraph (a), taking into account the income limit in subparagraph (c)(2) and the minimum support amount in subparagraph (c)(3), to determine support for children in the primary physical custody of each parent and applying subparagraph (b)(1) to determine support for children in the shared physical custody of the parents. In these calculations, the subparagraph (a)(2) percentages must be adjusted pro rata based on the number of children in each type of custody. These results are then combined to determine the net obligation. Finally, because hybrid custody is an "unusual circumstance," the court must consider whether this support amount should be varied under subparagraph (c)(1).

(c) **Exceptions.**

(1) The court may vary the child support award as calculated under the other provisions of this rule for good cause upon proof by clear and convincing evidence that manifest injustice would result if the support award were not varied. The court must specify in writing the reason for the variation, the amount of support which would have been required but for the variation, and the estimated value of any property conveyed instead of support calculated under the other provisions of this rule. Good cause may include a finding that unusual circumstances exist which require variation of the award in order to award an amount of support which is just and proper for the parties to contribute toward the nurture and education of their children. The court shall consider the custodial parent's income in this determination.

(2) Paragraph (a) does not apply to the extent that the parent has an adjusted annual income of over $105,000. In such a case, the court may make an additional award only if it is just and proper, taking into account the needs of the children, the standard of living of the children and the extent to which that standard should reflect the supporting parent's ability to pay.

(3) The minimum child support amount that may be ordered is $50 per month ($600 per year) except as provided in subparagraph (a)(3) and paragraph (b).

(4) In addition to ordering a parent to pay child support as calculated under this rule, the court may, in appropriate circumstances, order one or more grandparents of a child to pay child support to an appropriate person in an amount determined by the court to serve the best interests of the child. However, the amount may not exceed the smaller of (A) a proportionate share of the amount required to provide care in a supervised setting to the grandchild, as determined by the court, or (B) the amount that would have been awarded if the child's parents had the incomes of the child's grandparents and paragraphs (a) and (b) were applied. An order under this paragraph may be issued only with respect to a child whose parents are both minors, and the order terminates when either parent becomes 18 years of age. The court must specify in writing the reasons why it considers it to be appropriate to order a grandparent to pay child support under this paragraph and the factors considered in setting the amount of the child support award. In this paragraph, "grandparent" means the natural or adoptive parent of the minor parent.

(5) If the non-custodial parent's income is seasonal, the court may order that the annual support amount be paid in unequal monthly payments, with higher payments during the months the parent expects to receive higher income and lower payments in other months. The court should not make such an order unless (a) it finds that the burden of budgeting for periods of unequal income should be placed on the obligee rather than the obligor and (b) the obligee agrees. The court's order must specify the annual support amount, the average monthly support amount, and the amount due month by month. The order must provide that variations from the average monthly amount begin with monthly payments in excess of the average monthly amount such that a deficit situation cannot occur. Until the excess payments begin, the average monthly amount must be ordered.

(d) **Health Care Coverage.**

(1) *Health Insurance.* The court shall address coverage of the children's health care needs and require health insurance for the children if insurance is available to either parent at a reasonable cost. The court shall consider whether the children are eligible for services through the Indian Health Service (or any other entity) or other insurance coverage before ordering the obligor to provide health care coverage through insurance or other means. The court shall allocate equally the cost of this insurance between the parties unless the court orders otherwise for good cause. An obligor's child support obligation will be decreased by the amount of the obligee's portion of health insurance payments ordered by the court and actually paid by the obligor. A child support award will be increased by the obligor's portion of health insurance if the obligee is ordered to, and actually does obtain and pay for insurance. The cost of insurance is the cost attributable to the children for whom support is paid. If the cost to the employee of covering the employee alone is the same as the cost to the employee of covering the employee and dependents, then there is no additional cost to the employee for adding

the children and no portion of the cost of coverage may be allocated to the children. If dependent coverage can be added for a single cost, rather than per dependent, and the dependent coverage covers dependents in addition to the children subject to the order, the cost of the dependent coverage will be allocated equally among the dependents covered. If there is reason to believe that there is an incremental cost to the employee for insuring dependents but evidence of that incremental cost is unavailable, the cost of insurance is determined by dividing the total cost of coverage by the number of family members covered and multiplying that amount by the number of children subject to the order.

(2) *Uncovered Health Care Expenses.* The court shall allocate equally between the parties the cost of reasonable health care expenses not covered by insurance unless the court orders otherwise for good cause. A party shall reimburse the other party for his or her share of the uncovered expenses within 30 days of receipt of the bill for the health care, payment verification, and, if applicable, a health insurance statement indicating what portion of the cost is uncovered. Reasonable, uncovered expenses exceeding $5,000 in a calendar year will be allocated based on the parties' relative financial circumstances when the expenses occur.

(e) **Child Support Affidavit and Documentation.**

(1) Subject to the confidentiality requirements of Civil Rule 90.1(f), each parent in a court proceeding at which child support is involved must file a statement under oath which states the parent's adjusted annual income and the components of this income as provided in subparagraph (a)(1). This statement must be filed with a party's initial pleading (such as the dissolution petition, divorce complaint or answer, etc.), motion to modify, and any response to a motion to modify. The statement must be accompanied by documentation verifying the income. The documents must be redacted to delete social security numbers and to provide only partial financial account information as provided in Civil Rule 90.1(f). The statement must state whether the parent has access to health insurance for the children and, if so, the additional cost to the parent of the children's health insurance. For any infraction of these rules, the court may withhold or assess costs or attorney's fees as the circumstances of the case and discouragement of like conduct in the future may require; and such costs and attorney's fees may be imposed upon offending attorneys or parties.

(2) While there is an ongoing monthly support obligation, either party must provide to the other party, within 30 days of a written request, documents such as tax returns and pay stubs showing the party's income for the prior calendar year. The party making the request must provide documentation of his or her annual income for the same period at the time the request is made. A request under this section may not be made more than once per year. This section does not preclude discovery under other civil rules.

(3) Unless the information has already been provided to the court under Civil Rule 90.1(f), a statement under subsection (e)(1) of this rule must be accompanied by a confidential information sheet as described in Civil Rule 90.1(f). Once a complete

confidential information sheet has been submitted to the court listing names, dates of birth, and social security numbers as required, the parties shall omit or redact social security numbers from documents subsequently filed in the action unless otherwise ordered by the court. This paragraph applies to documents filed with the court on or after October 15, 2006.

(f) **Definitions.**

(1) *Shared Physical Custody.* A parent has shared physical custody (or shared custody) of children for purposes of this rule if the children reside with that parent for a period specified in writing in the custody order of at least 30, but no more than 70, percent of the year, regardless of the status of legal custody.

(2) *Primary Physical Custody.* A parent has primary physical custody (or primary custody) of children for purposes of this rule if the children reside with the other parent for a period specified in the custody order of less than 30 percent of the year.

(3) *Divided Custody.* Parents have divided custody under this rule if one parent has primary physical custody of one or more children of the relationship and the other parent has primary custody of one or more other children of the relationship, and the parents do not share physical custody of any of their children.

(4) *Hybrid Custody.* Parents have hybrid custody under this rule if at least one parent has primary physical custody of one or more children of the relationship, and the parents have shared physical custody of at least one child of the relationship.

(5) *Health Care Expenses.* Health care expenses include medical, dental, vision, and mental health counseling expenses.

(g) **Travel Expenses.** After determining an award of child support under this rule, the court shall allocate reasonable travel expenses which are necessary to exercise visitation between the parties as may be just and proper for them to contribute.

(h) **Modification.**

(1) *Material Change of Circumstances.* A final child support award may be modified upon a showing of a material change of circumstances as provided by state law. A material change of circumstances will be presumed if support as calculated under this rule is more than 15 percent greater or less than the outstanding support order. For purposes of this paragraph, support includes health insurance payments made pursuant to (d)(1) of this rule.

(2) *No Retroactive Modification.* Child support arrearage may not be modified retroactively, except as allowed by AS 25.27.166(d). A modification which is effective on or after the date that a motion for modification, or a notice of petition for modification by

the Child Support Services Division, is served on the opposing party is not considered a retroactive modification.

(3) *Preclusion.* The court may find that a parent and a parent's assignee are precluded from collecting arrearages for support of a child that accumulated during a time period exceeding nine months for which the parent agreed or acquiesced to the obligor exercising primary custody of the child. A finding that preclusion is a defense must be based on clear and convincing evidence.

(i) **Third Party Custody.**

(1) When the state, or another third party entitled to child support, has custody of all children of a parent, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent multiplied by the percentage specified in subparagraph (a)(2). If the third party has custody of some but not all children, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent, multiplied by the percentage specified in subparagraph (a)(2) for the total number of the parent's children, multiplied by the number of the parent's children in third party custody, divided by the total number of the parent's children. For purposes of this paragraph, the number of the parent's children only includes children of the parent who live with the parent, are substantially supported by the parent or who are in custody of the third party entitled to support.

(2) If, in addition to a support obligation to a third party, one or both parents retain primary or shared physical custody of at least one of their children, the support obligation between the parents is calculated pursuant to the other paragraphs of this rule, without consideration of the third party custodian or any children in the custody of the third party custodian, except that the percentage in 90.3(a)(2) must be adjusted pro rata for the number of children in the primary custody of a parent, or shared custody of the parents, compared to the total number of children. After that calculation is completed, any support owed may be offset with support owed to a third party custodian under the preceding subparagraph in order to minimize transactions.

(j) **Support Order Forms.** All orders for payment or modification of child support shall be entered on a form developed by the administrative director. A party may lodge a duplicate of the court form produced by a laser printer or similar device. A device may also print, in a contrasting typestyle equivalent to that produced by a typewriter, text that otherwise would have been entered by a typewriter or word processor. A party or attorney who lodges a duplicate certifies by lodging the duplicate that it is identical to the current version of the court form.

(k) **Dependent Tax Deduction.** The court may allocate the dependent tax deduction for each child between the parties as is just and proper and in the child's best interests. The allocation must be consistent with AS 25.24.152 and federal law.

(Added by SCO 833 effective August 1, 1987; amended by SCO 935 effective January 15, 1989; by SCO 1008 effective January 15, 1990; by SCO 1192 effective July 15, 1995; by SCO 1246 effective July 15, 1996; by SCO 1269 effective July 15, 1997; by SCO 1295 effective January 15, 1998; by SCO 1362 effective October 15, 1999; by SCO 1399, effective October 15, 2000; by SCO 1417 effective April 15, 2001; by SCO 1526 effective April 15, 2005; by SCO 1595 effective October 15, 2006; by SCO 1686 effective April 15, 2009; and by SCO 1716 effective nunc pro tunc to July 1, 2009)

Note: This rule is adopted under the supreme court's interpretive authority pursuant to Article IV, Section 1 of the Alaska Constitution. Thus, it may be superseded by legislation even if the legislation does not meet the procedural requirements for changing rules promulgated under Article IV, Section 15.

Note to Civil Rule 90.3(c)(1)(B): The Federal Poverty Guidelines are usually revised each February. The new poverty income guideline for one person in Alaska in 1999 is $10,320 (Federal Register, Vol. 64, No. 52, 13428-13430, March 18, 1999). The Alaska Supreme Court has indicated that the poverty guideline that should be used is the guideline for the state in which the obligor resides. **See Carstens v. Carstens,** 867 P.2d 805, 810 (Alaska 1994).

Note to Civil Rule 90.3(h)(1): Section 44 of ch. 87 SLA 1997 amended AS 25.24.170(b) to allow support to be modified without a showing of a material change in circumstances *as necessary to comply with federal law*. Federal law eliminates the need for a showing only in cases being enforced by CSSD that are being reviewed under CSSD's period- ic review and modification program. According to § 152 of ch. 87 SLA 1997, the amendment to AS 25.24.170(b) has the effect of amending Civil Rule 90.3 by changing the standard for certain modifications of a support order.

Note to Civil Rule 90.3(h)(2): AS 25.27.166(d), enacted by § 14 of ch. 57 SLA 1995, has the effect of amending Civil Rule 90.3(h)(2) by allowing retroactive modification of child support arrearage under circumstances involving disestablishment of paternity, to the extent such modification is not prohibited by federal law.

Note to SCO 1269: Civil Rule 90.3(c)(3) was added by § 44 ch. 107 SLA 1996. Section 22 of ch. 107 SLA 1996 enacts 25.27.195(b), which allows CSSD to vacate an administrative support order that was based on a default amount rather than the obligor's actual ability to pay. If an order is vacated on this basis, AS 25.27.195(d) allows the agency to modify the obligor's arrearages under the original order. According to § 50 ch. 107 SLA 1996, AS 25.27.195(d) has the effect of amending Rule 90.3(h)(2), which prohibits retroactive modification of child support arrearages.

Note: Section 41 of ch. 87 SLA 1997 amends AS 25.20.050 relating to paternity actions. According to § 150 of the Act, § 41 has the effect of amending Civil Rule 90.3 by requiring the court in a paternity action to issue a temporary child support order upon a showing by clear and convincing evidence of paternity.

Note: Chapter 106 SLA 00 amends various laws relating to medical support orders. According to section 24 of the act, the act amends Civil Rule 90.3 "by specifying that a medical support order may be issued even when a support order for periodic monetary payments is not issued and by setting the requirements for medical support orders."

Note: Chapter 108 SLA 04 (HB 514) enacted several amendments to the child support statutes, including a provision that permits periodic modifications of a child support order without a showing of materially changed circumstances. According to Section 17 of the Act, statutory modifications to AS 25.27.190(e) have the effect of amending Civil Rule 90.3 by changing the grounds for modifying a support order.

Note: Chapter 45 SLA 2009 (SB 96), effective July 1, 2009, enacted changes relating to child support, including changes concerning orders for medical support of a child. According to section 13 of the Act, AS 25.27.060(c) as amended by section 4 of the Act, has the effect of changing Civil Rule 90.3 by changing standards for issuance of medical and other support orders by the court.

CS FOR SENATE BILL NO. 46( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR KOOKESH

A BILL

FOR AN ACT ENTITLED

"An Act relating to child support awards; and repealing Rule 90.3, Alaska Rules of Civil Procedure."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 25 is amended by adding a new chapter to read:

Chapter 28. Child Support Awards.

Sec. 25.28.010. Guidelines; primary physical custody. (a) A tribunal shall calculate a child support award in a case in which one parent is awarded primary physical custody as an amount equal to the adjusted annual income of the noncustodial parent multiplied by a percentage specified in (b) of this section.

(b) To calculate the child support award, the tribunal shall multiply the noncustodial parent's adjusted annual income by the following percentages:

(1) 20 percent for one child;

(2) 27 percent for two children;

(3) 33 percent for three children; and

(4) an additional three percent for each additional child.

(c) The tribunal may allow the obligor parent to reduce child support payments by up to 75 percent for a period in which the obligor parent has extended visitation of more than 27 consecutive days. The order must specify the amount of the reduction that is allowable if the extended visitation is exercised.

(d) The tribunal may calculate child support based on a determination of the potential income of a parent who voluntarily and unreasonably is unemployed or underemployed. A determination of potential income may not be made for a parent who is physically or mentally incapacitated, or who is caring for a child under two years of age to whom the parents owe a joint legal responsibility. Potential income shall be based on the parent's work history, qualifications, and job opportunities. The tribunal also may impute potential income for nonincome producing or low income producing assets.

(e) In this section, "adjusted annual income" means the parent's total income from all sources less

(1) mandatory deductions, including

(A) federal, state, and local income tax;

(B) social security tax or the equivalent contribution to an alternate plan established by a public employer, and self-employment tax;

(C) Medicare tax;

(D) mandatory union dues;

(E) mandatory contributions to a retirement or pension plan;

(2) voluntary contributions to a retirement or pension plan or account in which the earnings are tax-free or tax-deferred, except that the total amount of these voluntary contributions plus any mandatory contributions under (1)(E) of this subsection may not exceed 7.5 percent of the parent's gross wages and self-employment income;

(3) child support and alimony payments arising from previous relationships that are required by another tribunal and actually paid;

(4) child support for children from prior relationships living with the parent, calculated by using the formula under this chapter; and

(5) work-related child care expenses for the child who is the subject of the child support order.

Sec. 25.28.020. Guidelines; shared, divided, and hybrid custody awards. (a) The tribunal shall calculate shared, divided, and hybrid physical custody awards as provided in this section.

(b) The tribunal shall calculate a child support award in a case in which the parents are awarded shared physical custody by

(1) calculating the annual amount each parent would pay to the other parent under AS 25.28.010 assuming the other parent had primary custody; in this calculation, the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d) apply;

(2) multiplying the amount determined under (1) of this subsection for each parent by the percentage of time the other parent has physical custody of the child; however, if the tribunal finds that the percentage of time each parent will have physical custody does not accurately reflect the ratio of funds each parent will directly spend on supporting the child, the tribunal shall vary this percentage to reflect its findings;

(3) determining which parent has the greater amount under (2) of this subsection; the parent with the greater amount under (2) of this subsection is the obligor parent, and the annual award is equal to the difference between the two amounts under (2) of this subsection multiplied by 1.5; however, if this amount is greater than the amount of support calculated under AS 25.28.010 assuming the obligor parent has primary custody, the annual support is the amount calculated under AS 25.28.010.

(c) The child support award for shared custody under (b) of this section must be paid in 12 equal monthly installments, except that if

(1) shared custody is based on the obligor parent's having physical custody for periods of 30 consecutive days or more, the total annual award may be paid in equal installments over those months in which the obligor parent does not have physical custody; or

(2) the obligor parent's income is seasonal, the tribunal may order

unequal monthly support payments as provided in AS 25.28.030(g) and (h).

(d) The child support order must state that failure to exercise sufficient physical custody to qualify for shared physical custody under (b) or (c) of this section is grounds for modification of the child support order. Denial of visitation by the custodial parent is not cause to increase a child support award.

(e) The tribunal shall

(1) calculate a child support award in a case in which the parents are awarded divided custody by determining the amount each parent would pay to the other parent for support of a child for whom that parent has primary physical custody under AS 25.28.010, taking into account the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d), and offsetting those amounts; and

(2) consider whether the amount determined under (1) of this subsection should be varied under AS 25.28.030(b).

(f) The tribunal shall

(1) calculate a child support award in a case in which the parents are awarded hybrid custody by

(A) applying AS 25.28.010, taking into account the income limit in AS 25.28.030(c) and the minimum support amount in AS 25.28.030(d), to determine support for a child in the primary physical custody of each parent;

(B) applying (b) of this section to determine support for a child in the shared physical custody of the parents;

(C) adjusting pro rata the percentages provided in AS 25.28.010(b) based on the number of children to which each type of custody applies; and

(D) combining the amounts to determine the net obligation; and

(2) consider whether the amount determined under (1) of this subsection should be varied under AS 25.28.030(b).

Sec. 25.28.030. Exceptions to support awards. (a) Notwithstanding the requirements in AS 25.28.010 and 25.28.020, the tribunal may vary the award for the reasons stated in this section.

(b) The tribunal may vary the child support award as calculated under the other provisions of this chapter for good cause on proof by clear and convincing evidence that manifest injustice would result if the support award were not varied. The tribunal shall specify in writing the reason for the variation, the amount of support that would have been required but for the variation, and the estimated value of any property conveyed instead of support calculated under the other provisions of this chapter. Good cause may include a finding that unusual circumstances exist that require variation of the award in order to award an amount of support that is just and proper for the parties to contribute toward the nurture and education of their children. The tribunal shall consider the custodial parent's income in this determination.

(c) The calculation for primary physical custody under AS 25.28.010 does not apply to the extent that the parent has an adjusted annual income of more than $105,000. The tribunal may make an additional award only if it is just and proper, taking into account the needs of the child, the standard of living of the child, and the extent to which that standard should reflect the supporting parent's ability to pay.

(d) Except as provided in AS 25.28.010(c) and 25.28.020, the minimum child support amount that may be ordered is $50 a month or $600 a year.

(e) In addition to ordering a parent to pay child support as calculated under this chapter, the tribunal may, in appropriate circumstances and when the parents are minors as described in (f) of this section, order one or more grandparents of a child to pay child support to an appropriate person in an amount determined by the tribunal to serve the best interests of the child; however, the amount may not exceed the lesser of

(1) a proportionate share of the amount required to provide care in a supervised setting to the grandchild, as determined by the tribunal; or

(2) the amount that would have been awarded if the child's parents had the incomes of the child's grandparents and AS 25.28.010 and 25.28.020 were applied.

(f) An order under (e) of this section may be issued only with respect to a child whose parents are both minors, and the order terminates when either parent becomes 18 years of age. The tribunal shall specify in writing the reasons it considers it to be appropriate to order a grandparent to pay child support under this subsection and the factors considered in setting the amount of the child support award. In this

subsection, "grandparent" means the natural or adoptive parent of the minor parent.

(g) If the noncustodial parent's income is seasonal, the tribunal may order that the annual support amount be paid in unequal monthly payments, with higher payments during the months the parent expects to receive higher income and lower payments in other months; the tribunal may not make an unequal payment order unless

(1) the tribunal finds that the burden of budgeting for periods of unequal income should be placed on the obligee rather than the obligor; and

(2) the obligee agrees.

(h) An order of the tribunal for unequal payments under (g) of this section must specify the annual support amount, the average monthly support amount, and the amount due for each month. The order must provide that variations from the average monthly amount begin with monthly payments in excess of the average monthly amount so that a deficit situation cannot occur. Until the excess payments begin, the tribunal shall order payment of the average monthly amount.

Sec. 25.28.040. Health care expenses. (a) The tribunal shall include in the order coverage of the child's health care needs and require health insurance for the child if insurance is available to either parent or both parents at a reasonable cost. The tribunal shall consider whether the child is eligible for services through the Indian Health Service, any other entity, or other insurance coverage before ordering either parent or both parents to provide health care coverage through insurance, cash medical support, or other means. A court shall find that health insurance is available only if the dependent child has reasonable geographic access to the covered services or the insurance includes the coverage of transportation needed for the services.

(b) The tribunal shall allocate equally the cost of insurance between the parents unless the tribunal orders otherwise for good cause. An obligor's child support obligation shall be decreased by the amount of the obligee's portion of health insurance payments ordered by the tribunal and actually paid by the obligor. The tribunal shall increase a child support award by the obligor's portion of health insurance if the obligee is ordered to, and actually does, obtain and pay for insurance.

(c) The cost of insurance is the cost attributable to the child for whom support is paid. If the cost to the employee of covering the employee alone is the same as the

cost to the employee of covering the employee and dependents, then there is no additional cost to the employee for adding the child and no portion of the cost of coverage may be allocated to the child. If dependent coverage can be added for a single cost, rather than for each dependent, and the dependent coverage covers dependents in addition to the child subject to the order, the cost of the dependent coverage shall be allocated equally among the dependents covered. If there is reason to believe that there is an incremental cost to the employee for insuring dependents but evidence of that incremental cost is unavailable, the cost of insurance is determined by dividing the total cost of coverage by the number of family members covered and multiplying that amount by the number of children subject to the order.

(d) The tribunal shall allocate equally between the parties the cost of reasonable health care expenses not covered by insurance unless the tribunal orders otherwise for good cause. A party shall reimburse the other party for the party's share of the uncovered health care expenses within 30 days after receipt of the bill for the health care, payment verification, and, if applicable, a health insurance statement indicating what portion of the cost is uncovered. The tribunal shall allocate the reasonable, uncovered health care expenses exceeding $5,000 in a calendar year based on the parties' relative financial circumstances when the expenses occur.

(e) For the purpose of establishing a monthly support obligation for health care expenses, a court shall find that the cost of cash medical support or private health insurance is reasonable under this section if the cost to the responsible parent does not exceed five percent of the responsible parent's gross income. In calculating the percentage for purposes of health insurance coverage, the cost is the cost of adding the dependent child to the existing insurance coverage or the difference between self-only and family coverage.

(f) In this section,

(1) "cash medical support" means an amount ordered to be paid toward the cost of health insurance provided by a public entity or by another parent through employment or otherwise, or for other health care expenses not covered by insurance;

(2) "health care expenses" includes medical, dental, vision, and mental health counseling expenses.

Sec. 25.28.050. Child support affidavit and documentation. (a) Subject to the confidentiality requirements of Rule 90.1(f), Alaska Rules of Civil Procedure, each parent in a proceeding of a tribunal at which child support is involved shall file a statement under oath, accompanied by documentation verifying the statement, that states the parent's adjusted annual income and the components of adjusted annual income as described in AS 25.28.010(e). This statement and documentation must be filed with a party's initial pleading in superior court, including the dissolution petition, divorce complaint or answer, motion to modify, and any response to a motion to modify. The documents must be redacted to delete social security numbers and to provide only partial financial account information as provided in Rule 90.1(f), Alaska Rules of Civil Procedure. The statement must state whether the parent has access to health insurance for the children and, if so, the additional cost to the parent of the children's health insurance.

(b) While there is an ongoing monthly support obligation, each party shall provide to the other party, within 30 days after a written request, documents such as tax returns and pay stubs showing the party's income for the prior calendar year. The party making the request shall provide documentation of the party's annual income for the same period at the time the request is made. A request under this section may not be made more than once a year. This section does not preclude discovery under the Alaska Rules of Civil Procedure.

(c) Unless the information has already been provided to the tribunal under Rule 90.1(f), Alaska Rules of Civil Procedure, a statement under (a) of this section must be accompanied by a confidential information sheet as described in Rule 90.1, Alaska Rules of Civil Procedure. Once a complete confidential information sheet has been submitted to the tribunal listing names, dates of birth, and social security numbers as required, the parties shall omit or redact social security numbers from documents subsequently filed in the action unless otherwise ordered by the tribunal.

(d) The tribunal may withhold or assess costs or attorney fees for a violation of this section as the circumstances and discouragement of like conduct in the future may require. Costs and attorney fees may be imposed on offending attorneys or parties.

Sec. 25.28.060. Travel expenses. After determining an award of child support under this chapter, the court shall allocate between the parties reasonable travel expenses that are necessary to exercise visitation as may be just and proper for the parties to contribute.

Sec. 25.28.070. Modification; defense against arrearages. (a) A tribunal may modify a final child support award on a showing of a material change of circumstances as provided by state law. A material change of circumstances shall be presumed if support as calculated under this chapter is more than 15 percent greater or less than the outstanding support order. An award may be modified to require cash medical support regardless of whether insurance is available to either parent if neither parent has purchased health insurance. In this subsection, support includes health insurance payments or cash medical support made under AS 25.28.040.

(b) A tribunal may not modify a child support arrearage retroactively, except as authorized by AS 25.27.166(d). A modification that is effective on or after the date that a motion for modification, or a notice of petition for modification by the child support services agency, is served on the opposing party is not considered a retroactive modification.

(c) The tribunal may find that a parent and a parent's assignee are precluded from collecting arrearages for support of a child that accumulated during a time period exceeding nine months for which the parent agreed or acquiesced to the obligor exercising primary custody of the child. A finding that preclusion is a defense must be based on clear and convincing evidence.

Sec. 25.28.080. Third-party custody. (a) When the state, or another third party entitled to child support, has custody of all children of a parent, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent multiplied by the percentage specified in AS 25.28.010(b). If the third party has custody of some but not all children, the parent's support obligation to the third party is an amount equal to the adjusted annual income of the parent, multiplied by the percentage specified in AS 25.28.010(b) for the total number of the parent's children, multiplied by the number of the parent's children in third-party custody, divided by the total number of the parent's children. In this subsection, the number of

the parent's children includes only children of the parent who live with the parent, are substantially supported by the parent, or are in custody of the third party entitled to support.

(b) If, in addition to a support obligation to a third party, one or both parents retain primary or shared physical custody of at least one of their children, the support obligation between the parents is calculated under the other provisions of this chapter, without consideration of the third-party custodian or any children in the custody of the third-party custodian, except that the percentage in AS 25.28.010(b) must be adjusted pro rata for the number of children in the primary custody of a parent, or shared custody of the parents, compared to the total number of children. After that calculation is completed, any support owed may be offset with support owed to a third-party custodian under (a) of this section in order to minimize transactions.

Sec. 25.28.090. Support order forms. All court orders for payment or modification of child support shall be entered on a form developed by the administrative director of the court. A party may lodge a duplicate of the tribunal form produced by a laser printer or similar device. A device may also print, in a contrasting typestyle equivalent to that produced by a typewriter, text that otherwise would have been entered by a typewriter or word processor. A party or attorney who lodges a duplicate certifies by lodging the duplicate that it is identical to the current version of the court form.

Sec. 25.28.100. Dependent tax deduction. The court may allocate the dependent tax deduction for each child between the parties as is just and proper and in the child's best interests. The allocation must be consistent with AS 25.24.152 and federal law.

Sec. 25.28.300. Definitions. In this chapter,

(1) "child support" and "child support obligation" have the meaning given "duty of support" in AS 25.27.900;

(2) "divided custody" means that one parent has primary physical custody of one or more children of the relationship and the other parent has primary custody of one or more other children of the relationship, and the parents do not share physical custody of any of their children;

(3) "hybrid custody" means that at least one parent has primary physical custody of one or more children of the relationship, and the parents have shared physical custody of at least one child of the relationship;

(4) "primary physical custody" or "primary custody" means that a child resides with the other parent for a period, specified in the custody order, of less than 30 percent of the year;

(5) "shared physical custody" or "shared custody" means that a child resides with one parent for a period, specified in writing in the custody order, of at least 30 percent but not more than 70 percent of the year, regardless of the status of legal custody;

(6) "tribunal" means the superior court or the child support services agency created in AS 25.27.010.

*** Sec. 2.** AS 47.10.120(a) is amended to read:

(a) When a child in need of aid is committed under this chapter, the court or the child support services agency created in AS 25.27.010 shall, after giving the parent a reasonable opportunity to be heard, require that the parent pay to the department in a manner that the court or the child support services agency directs a sum to cover in full or in part the maintenance and care of the child. The support obligation shall be calculated under **AS 25.28** [RULE 90.3(i) OF THE ALASKA RULES OF CIVIL PROCEDURE].

*** Sec. 3.** AS 47.12.230(a) is amended to read:

(a) When a delinquent minor is committed under this chapter, the court or the child support services agency created in AS 25.27.010 shall, after giving the parent a reasonable opportunity to be heard, require that the parent pay to the department in a manner that the court or the child support services agency directs a sum to cover in full or in part the maintenance and care of the minor. The support obligation shall be calculated under **AS 25.28** [RULE 90.3(i) OF THE ALASKA RULES OF CIVIL PROCEDURE].

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REPEAL OF COURT RULE. Rule 90.3, Alaska Rules of Civil Procedure, is repealed.

*** Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

NONAPPLICABILITY OF TWO-THIRDS VOTE REQUIREMENT. Because the rule repealed in sec. 4 of this Act is a substantive rule rather than a rule of practice or procedure, the repeal of the rule takes effect even if sec. 4 of this Act does not receive the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 134

Analysis

SB 134 will establish Alaska child support guidelines in statute and repeal the court Civil Rule 90.3 child support guidelines. The bill changes child support calculation formulas from the current percentage approach that only takes into account the non-custodial parent's income to an income shares model that considers the income of both parents. Additionally, the bill increases the minimum support amount required of the non-custodial parent and decreases the percentage of time required for a finding of shared custody.

AS 25.24.170(b) and AS 25.27.190(e) consider the adoption, enactment or significant modification to the guidelines a material change of circumstance for the purpose of a modification of the order. This would allow custodial and non-custodial parents to request a modification of their existing order(s). Federal law, 45 CFR 303.8(e), requires the Child Support Services Division (CSSD) to complete modification requests within 180 days from receipt of the request. CSSD could lose significant federal funds if it cannot meet this requirement. CSSD estimates it is enforcing approximately 20,000 child support orders that would be eligible for modification. CSSD conservatively anticipates 10,000 modification requests will be submitted in the first six months, with about ½ of the requests on court orders. The Attorney General's Office, Collections & Support Unit, represents CSSD in court when the agency requests modification of a court-issued child support order. The Collections & Support Section currently processes about 700 modification requests a year with 3.5 attorneys. The anticipated increase in modification requests from 700 to 5,000 in one year will require non-permanent positions of 12.5 attorneys, 2 paralegals, and 5 support positions to meet the anticipated initial demand.

Analysis

SB 134 will establish Alaska child support guidelines in statute and repeal the court Civil Rule 90.3 child support guidelines. The bill changes child support calculation formulas from the current percentage approach that only takes into account the non-custodial parent's income to an income shares model that considers the income of both parents. Additionally, the bill increases the minimum support amount required of the non-custodial parent and decreases the percentage of time required for a finding of shared custody.

AS 25.24.170(b) and AS 25.27.190(e) consider the adaption, enactment or significant modification to the guidelines a material change of circumstance for the purpose of a modification of the order. This would allow the custodial or non-custodial parents to request a modification of their existing order(s). 45 CFR 303.8(e) requires a modification to be completed 180 days from receipt of the request. Failure to meet this requirement could result in the loss of federal funds. There are approximately 20,000 child support orders that would be eligible for modification. The division conservatively anticipates 10,000 modification requests will be submitted in the first six months. The modification section currently completes an estimated 3,000 modifications/year with a staff of 14. The anticipated increase in modification requests and the increased time required to perform the calculations will require 24 non-permanent staff. The five permanent staff will be needed because of the additional work required to determine the awards under the income shares approach.

Every four years as required by 45 CFR 302.56(e) the state must review the guidelines and revise if appropriate. Currently this is done by the Supreme Court. If the guidelinse are placed in statute then another process would be required to satisfy this requirement.

The funding requested for FY 2013 will allow the Division to hire and train the required staff prior to effective date. This ensures that the Division can begin processing modification as soon as the changes become effective.

In the Court of Appeals of the State of Alaska

Floyd Demientieff,	)	
	)	Court of Appeals No. **A-10874**
Appellant,	)	
v.	)	**Order**
	)	
State of Alaska,	)	
	)	
Appellee.	)	Date of Order: **11/4/11**
	)	

Trial Court Case # **4BE-07-00056CI**

Before: Coats, Chief Judge, and Mannheimer and Bolger, Judges.

The State seeks full-court reconsideration of a single-judge order that granted a non-routine extension of time to the Public Defender Agency to file their opening brief in this case. The challenged extension gives the Public Defender Agency a total of 406 days to file the brief — the original 30 days, plus extensions totaling 376 days.

The State asserts (correctly) that there are currently dozens of pending cases where this Court has granted the Public Defender Agency more than 300 days to file their opening brief. This Court notes that we have granted similarly lengthy extensions to the Office of Public Advocacy and to attorneys working under contract with the Office of Public Advocacy.

The State contends that, because this Court is granting such lengthy extensions, this Court has essentially abrogated the briefing time limits established in Appellate Rule 503.5, and has abandoned its duty to insure that appeals are decided in a timely fashion — thus violating the rights of crime victims and potentially prejudicing

MR → KMR
→ copy for me

the State's ability to re-assemble its case in the event that a defendant's appeal is successful and a re-trial is required.

The Clerk of the Appellate Courts, Marilyn May, recently circulated a report that contains a summary of briefing statistics drawn from all Court of Appeals cases that were closed during Fiscal Year 2011 — that is, all cases closed between July 1, 2010 and June 30, 2011.

This Court has examined the underlying data, and we have generated our own supplemental report that separately analyzes (1) the cases handled by the Public Defender Agency, (2) the cases handled by the Office of Public Advocacy, and (3) the cases handled by attorneys working under contract with OPA. This report provides the average length of extension granted in these three categories of cases, and it also tracks how many briefs were filed during Fiscal Year 2011 by each attorney working for, or under contract with, the two agencies.

These statistics bear out the State's assertions regarding the length of time it is taking to complete the briefing in criminal appeals. However, the statistics also show that the Public Defender Agency and the Office of Public Advocacy (if its contract attorneys are included) are each filing approximately a brief per week.

We agree with the State that the current level of appellate delay is not acceptable, but we do not think that it would be helpful to suddenly stop granting extensions of time to the defense bar, or to suddenly impose a new limit on the amount of extended time that will be granted in any particular case.

Accordingly:

1. The single-judge decision granting the extension of time in Demientieff's case is **AFFIRMED**, but

2. We hereby direct the Clerk of the Appellate Courts to promptly arrange a meeting between this Court and supervisory personnel of the Public Defender Agency,

the Office of Public Advocacy, and the Office of Special Prosecutions and Appeals to discuss strategies for reducing the amount of time it is taking to brief criminal appeals. We further direct the Clerk to promptly distribute a copy of this Court's supplemental statistical report to each of these three agencies.

Entered at the direction of the Court.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB135
2012 LEGISLATIVE SESSION

Analysis

This bill amends AS 12.61.010(a) by requiring that the victim of a crime be notified of any request for a continuance or pending motions that may substantially delay the prosecution, and inform the court of the victim's position on these motions. This bill amends Rule 45 (d)(2) of the Alaska Rules of Criminal Procedure by adding language that requires the court to grant continuances only after consideration of the crime victim as provided in a new subsection (h) that this bill would also add to Rule 45. The new subsection (h) requires the court to consider the victim's position on motions to continue.

Courts currently consider the impact of delay on a victim's rights under the state constitution. The Office of Public Advocacy believes that the victim's concerns are already considered by parties in trial cases as a result of constitutional requirements concerning crime victims. The compulsory language in the amendment to Rule 45 may have the collateral effect of causing additional hearings and delay if the victim cannot be located. This will be impacted by how the courts interpret "substantial delay."

Although this bill may increase hearings and delay, the Office of Public Advocacy (OPA) cannot reliably predict whether this will occur or what the fiscal impact will be. Therefore, the Agency submits an indeterminate fiscal note.

RE: CS for SB 135 0966\A

Please draft a committee substitute for SB 135 Continuances in Criminal Trials, making the following changes:

On page 4 at line 11, after the word motion, add language to this effect:

"in this section a substantial delay means, for a misdemeanor, any delay of one month or longer, for a felony, any delay of two months or longer, and for an appeal, any delay of six months or longer."

On page 4, at lines 20, omit the word "only"

On page 4 at line 21 insert the words "if known" after the word "victim" (so that it reads ..interests if the crime victim, if known, ..."

On page 4 at line 31, insert the words "if known" after the word "motion"

Any this

(5) inform the victim of a pending motion that may delay the prosecution for a substantial period and inform the court of the victim's position on the motion; in this paragraph, "substantial period" means, for a misdemeanor, any delay of one month or longer, and for a felony, any delay of two months or longer.

CS FOR SENATE BILL NO. 135(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS FRENCH, Dyson

A BILL

FOR AN ACT ENTITLED

"An Act relating to the rights of crime victims; relating to the duties of prosecuting attorneys; and amending Rule 45, Alaska Rules of Criminal Procedure."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 12.61.010(a) is amended to read:

(a) Victims of crimes have the following rights:

(1) the right to be present during any proceeding in

(A) the prosecution and sentencing of a defendant if the defendant has the right to be present, including being present during testimony even if the victim is likely to be called as a witness;

(B) the adjudication of a minor as provided under AS 47.12.110;

(2) the right to be notified by the appropriate law enforcement agency or the prosecuting attorney of **any request for a continuance that may substantially delay the prosecution and of** the date of trial, sentencing, including a proceeding

New Text Underlined [DELETED TEXT BRACKETED]

before a three-judge panel under AS 12.55.175, an appeal, and any hearing in which the defendant's release from custody is considered;

(3) the right to be notified that a sentencing hearing or a court proceeding to which the victim has been subpoenaed will not occur as scheduled;

(4) the right to receive protection from harm and threats of harm arising out of cooperation with law enforcement and prosecution efforts and to be provided with information as to the protection available;

(5) the right to be notified of the procedure to be followed to apply for and receive any compensation under AS 18.67;

(6) at the request of the prosecution or a law enforcement agency, the right to cooperate with the criminal justice process without loss of pay and other employee benefits except as authorized by AS 12.61.017 and without interference in any form by the employer of the victim of crime;

(7) the right to obtain access to immediate medical assistance and not to be detained for an unreasonable length of time by a law enforcement agency before having medical assistance administered; however, an employee of the law enforcement agency may, if necessary, accompany the person to a medical facility to question the person about the criminal incident if the questioning does not hinder the administration of medical assistance;

(8) the right to make a written or oral statement for use in preparation of the presentence report of a felony defendant;

(9) the right to appear personally at the defendant's sentencing hearing to present a written statement and to give sworn testimony or an unsworn oral presentation;

(10) the right to be informed by the prosecuting attorney, at any time after the defendant's conviction, about the complete record of the defendant's convictions;

(11) the right to notice under AS 12.47.095 concerning the status of the defendant found not guilty by reason of insanity;

(12) the right to notice under AS 33.16.087 of a hearing concerning special medical parole of the defendant;

(13) the right to notice under AS 33.16.120 of a hearing to consider or review discretionary parole of the defendant;

(14) the right to notice under AS 33.30.013 of the release or escape of the defendant; and

(15) the right to be notified orally and in writing of and receive information about the office of victims' rights from the law enforcement officer initially investigating the crime and from the prosecuting attorney assigned to the offense; at a minimum, the information provided must include the address, telephone number, and Internet address of the office of victims' rights; this paragraph

(A) applies only to victims of felonies and to victims of class A misdemeanors if the class A misdemeanor is a crime involving domestic violence or a crime against a person under AS 11.41; if the victim is an unemancipated minor, the law enforcement officer and the prosecuting attorney shall also provide the notice required by this paragraph to the parent or guardian of the minor;

(B) is satisfied if, at the time of initial contact with the crime victim, the investigating officer and prosecuting attorney each give each crime victim a brochure or other written material prepared by the office of victims' rights and provided to law enforcement agencies for that purpose.

*** Sec. 2.** AS 12.61.015(a) is amended to read:

(a) If a victim of a felony or a crime involving domestic violence requests, the prosecuting attorney shall make a reasonable effort to

(1) confer with the person against whom the offense has been perpetrated about that person's testimony before the defendant's trial;

(2) in a manner reasonably calculated to give prompt actual notice, notify the victim

(A) of the defendant's conviction and the crimes of which the defendant was convicted;

(B) of the victim's right in a case that is a felony to make a written or oral statement for use in preparation of the defendant's presentence report, and of the victim's right to appear personally at the defendant's

sentencing hearing to present a written statement and to give sworn testimony or an unsworn oral presentation;

(C) of the address and telephone number of the office that will prepare the presentence report; and

(D) of the time and place of the sentencing proceeding;

(3) notify the victim in writing of the final disposition of the case within 30 days after final disposition of the case;

(4) confer with the victim of a crime involving domestic violence concerning a proposed plea agreement before entering into an agreement**;**

(5) inform the victim of a pending motion that may substantially delay the prosecution and inform the court of the victim's position on the motion; in this paragraph a "substantial delay" is

(A) for a misdemeanor, a delay of one month or longer;

(B) for a felony, a delay of two months or longer; and

(C) for an appeal, a delay of six months or longer.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DIRECT COURT RULE AMENDMENT. Rule 45(d)(2), Alaska Rules of Criminal Procedure, is amended to read:

(2) The period of delay resulting from an adjournment or continuance granted at the timely request or with the consent of the defendant and the defendant's counsel. The court shall grant such a continuance only if it is satisfied that the postponement is in the interest of justice, taking into account the public interest in the prompt disposition of criminal offenses**, and after consideration of the interests of the crime victim, if known, as provided in (h) of this rule**. A defendant without counsel shall not be deemed to have consented to a continuance unless the defendant has been advised by the court of the right to a speedy trial under this rule and of the effect of consent.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DIRECT COURT RULE AMENDMENT. Rule 45, Alaska Rules of Criminal

Procedure, is amended by adding a new subsection to read:

(h) **Victim's Interest in Ruling on Motion to Continue.** Before ruling on a motion for a continuance in a case involving a victim, as defined in AS 12.55.185, the court shall consider the victim's position, if known, on the motion to continue and the effect of a continuance on the victim.

SPONSOR STATEMENT

SB 135 – Continuances in Criminal Cases

Article I, section 24 of our constitution is entitled "Rights of Crime Victims." The amendment passed by an overwhelming majority when it was placed before Alaskan voters in 1994. Included in its eight specific provisions is the promise that crime victims will have "the right to timely disposition of the case following the arrest of the accused."

In the eighteen years since the amendment passed, the promise of a timely disposition of the case has often not been kept. Moreover, the breaches of that promise frequently occur in the most serious of cases. Delays in the trial of a case, known as continuances, can go on for years.

SB 135 requires prosecutors and judges to consider a victim's right to a timely disposition of their case when deciding whether to allow continuances. This legislation will also ensure that victims are notified of any requests or motions that could substantially delay speedy prosecution of their case.

Repeated delays prevent victims from reaching emotional, physical, and financial closure from the trauma that they suffered as a result of the crime perpetrated against them. Delays in prosecution can also affect the availability of witnesses, a victim's ability to recall important details, and it can create other impediments to a successful trial.

Currently, Alaska is one of 27 states with constitutional provisions to protect a victim's rights; however, there is no statute in place to implement it. With this important piece of legislation, Alaska will join 15 other states that have enacted a statutory provision recognizing this crucial right.

SB 135 will guarantee a victim's right to a timely resolution in the court system. I urge your support of this legislation.

MEMORANDUM December 14, 2011

SUBJECT: Sectional Analaysis of 27-LS0966\A

TO: Senator Hollis French
Attn: Lila Hobbs

FROM: Doug Gardner
Director

You requested a sectional analysis of the above referenced bill. Preliminarily, please note that a sectional analysis should not be considered an authoritative interpretation of a bill -- the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it relates to a particular set of circumstances, please advise.

Overview of the Bill

As an overview, the bill has the primary purpose of amending statute and court rule to provide a right to victims of crime defined by AS 12.55.185, to notice from the prosecuting attorney of any request for a continuance that will substantially delay trial. The bill also provides that the prosecuting attorney must inform the court of the victim's position on the motion. The bill requires that prior to ruling on the motion, the court must consider the victim's position on a motion to continue that may substantially delay the prosecution. The bill provides that the court must consider the effect such a continuance will have on the victim. With that overview, a brief sectional analysis follows.

Section one of the bill amends AS 12.61.010(a)(2), by adding a provision to the enumerated rights of crime victims providng that a victim has a right to be notified by the appropriate law enforcement agency, or the prosecuting attorney, of any request for a continuance that may substantially delay the prosecution

Section two of the bill amends AS 12.61.015(a), the duties of a prosecuting attorney, to include the duty to inform the victim, as defined in AS 12.55.185, of a pending motion that may substantially delay the prosecution, and inform the court of the victim's position on the motion.

Section three of the bill amends Criminal Rule 45(d)(2), which is the criminal rule that provides the court with the authority to grant a continuance in a criminal case. This section adds a provision that requires that a court, when considering a motion to grant a continuance, may do so only after considering the victim's interest in a ruling by the court

on the motion to continue. This section references the new section of Criminal Rule 45 added in section four of the bill.

Section four of the bill amends Criminal Rule 45, by adding a new section (h), entitled "Victim's Interest on Ruling on Motion to Continue." Section (h) provides that before ruling on a motion to continue in a case involving a victim of crime as defined in AS 12.55.185, that the court must consider the victim's position on the motion to continue, and the effect that a continuance will have on the victim.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 135

Analysis

SB 135 provides that a victim has the right to be notified of a request for a continuance that may substantially delay the prosecution of a case, including the trial, sentencing, appeal, and any hearing addressing the defendant's release from custody. It requires the prosecution to inform the victim of any pending motion that may substantially delay the prosecution and to inform the court of the victim's position on the motion. The term "substantially" is not defined.

It could be argued that the prosecution and the courts are already considering the victim's position before granting a motion to continue a case and that the additional requirements in the bill are unnecessary. To the extent that the position of victims are not already being considered by the court, this bill could add to the cost of a prosecution.

For example **Section 1** requires notice of a request for a continuance and applies to both felonies and misdemeanors. In 2011 the state prosecuted 7,561 felonies and 22, 721 misdemeanors. Additional notification could require significant staff time.

Therefore the fiscal impact cannot be accurately determined.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB135

Analysis

This legislation requires prosecutors and judges to consider a victim's right to a timely disposition of their case when deciding whether to allow continuances. This legislation also ensures the victims are notified of any requests or motions that could substantially delay prosecution of their case. Passage of this legislation poses no fiscal impact on DOC.

STATE OF ALASKA
OFFICE OF VICTIMS' RIGHTS

January 17, 2012

The Honorable Hollis French, Senator
State of Alaska Senate
Chair, Judiciary Committee
Alaska State Legislature
State Capital
Juneau, Alaska 99801

Re: Senate Bill 135, Continuances in Criminal Trials; Victims

Dear Senator French:

I write in support of Senate Bill 135, Continuances in Criminal Trials; Victims.

The proposed legislation strengthens notification standards for informing crime victims of any request for a continuance that may substantially delay the prosecution, the date of trial, sentencing, an appeal, and any hearing which the defendant's release from custody is considered.

The amendments to Alaska Criminal Rule 45 strengthen a crime victim's right to address the court, and for the court to consider the crime victim's perspective, before issuing an order based on a motion for continuance.

Both components to the proposed legislation fortify a crime victim's statutory rights and Alaska Constitutional rights to be "treated with dignity, respect, and fairness" and "to timely disposition of the case..." (Alaska Constitution, Article 1, Section 24). The proposed legislation also stands to amplify the crime victim's voice before the court and other criminal justice agencies regarding delay in the criminal justice process.

I believe strongly that the administration of justice is improved when a crime victim's voice is heard and considered within the Alaska criminal justice system.

1007 WEST 3RD AVENUE, SUITE 205 • ANCHORAGE, ALASKA 99501-1936
TELEPHONE: 1-907-272-2620 • FACSIMILE: 1-907-272-2640

In sum, the proposed legislation wisely aligns with the Alaska Constitutional rights of a crime victim - especially with regard to the timely disposition of a criminal case.

I stand ready to testify in support of this legislation.

Respectfully submitted,

D. Victor Kester
Executive Director

Dear Lawmakers,

I am writing to encourage your support for Senator Hollis French's SB 135 dealing with a victim's constitutional right to "timely disposition of their case."

As many of you may recall, my daughter, Bonnie Craig, was murdered in September 1994. Her killer, Kenneth Dion was finally sentenced October 31st, 2011. For 17 years our family, friends and the community waited for justice. Our constitutional right to "timely disposition of our case" was violated again and again. I vowed, when thrown into this horror story, that I would make sure the things that went wrong in our case would be changed for others.

Protecting a victim's right to "timely disposition" is the most important change that needs to come out of this incredible tragedy. It was the most egregious violation that our family had to endure, and that violation was at the hands of the State of Alaska, not the criminal. I need your help to ensure all future victims will have their constitutional rights protected in Alaska. Let's balance the scales of justice and honor the victim's right to "timely disposition."

Do not be mistaken. It is not okay to think "At least the criminal is behind bars and can't hurt anyone else." The pain inflicted on the victims is inexcusable and the prosecution of the case against the defendant weakens daily. Delays are a tactical advantage for defense attorneys to accommodate defense attorneys, rarely the defendant.

Kenneth Dion was identified November 2006. From the time he was identified our family was basically placed under a "gag order." Nothing could be said to the press, our friends, or the community. Our incredible grief - the wounds being ripped wide open, bringing us back to the day we were notified of Bonnie's death - were to be muzzled, and kept deep within us. We weren't allowed to share the news, our private trauma, our personal hell, for four months. As a family, we tried to continue our life as if nothing was happening, pretending this incredible burden and stress didn't exist. It was tearing us apart, eating at the very core of our existence, like a cancer. It destroyed relationships and financially ruined me. It affected our health and my parenting abilities. It could, and can, destroy a whole family.

Finally, May 1st, 2007 the news was released. Although we talked with the press and could finally share the information with friends, the gag was, once again, placed on our family members to avoid all contact with media. The threat of a "change of

venue" is not something a victim's family can take lightly. Until a jury is selected, avoiding any media coverage is critical. Our jury was selected more than 4 years later. During that time it became abundantly clear that the defense attorney and the defendant hold all the power and they call all the shots. Victims can only sit back and wait without complaining.

I know that you will never be able to even imagine the pain and suffering a parent, a sister and brothers goes through while awaiting a trial. Our pain and stress and fear was multiplied ten-fold with the memories of Joshua Wade being acquitted. We knew things could go wrong, evidence could get lost, a technicality could cause a mistrial, investigators and witnesses could die or be lost. We know memories fade. We know each day something could come up that could make it impossible to prosecute the man who brutally raped and murdered Bonnie. Our life is in a limbo, teetering on insanity. It is beyond comprehension. Yet, we try to continue our life with a new kind of normalcy.

Our first trial date was set for September, 2008. Please keep in mind that the killer was identified November, 2006. I wept when Judge Patrick MMcKay set the date. It was like having your guts ripped out of your body. He justified it by saying it would give both the prosecution and the defense plenty of time to prepare and that there would be absolutely no reason for any continuance. He vowed that he wanted to make sure both sides would be prepared, so we were going to have pretrial conferences to avoid any surprises or complications from arising. And we did. By the time we got to trial we had 45 pre-trial conferences, status and motion hearings. The judges, both Judge McKay and Judge Jack Smith were trying to make sure the defense was getting all they needed and getting ready for trial. They both failed. If the defense asks for anything, the judge, in fear of an appeal, will always grant the defense more time, even if it meant losing Pat Gullufson, our prosecutor of 3 years who had to retire for medical reasons. (July 15, 2010 a new prosecutor, Paul Miovas, took the case over. He successfully handled the case in less than 10 months.)

More than once, Lee De Grazia, the first public defender, misled the Judge. We all knew it and yet he never called her on it. One month before the trial was to start she claimed she fired her "DNA Expert" and would need more time. We all sat there amazed and wondering if she was lying. Had she even hired one yet? She doesn't need to answer to anyone. There was no accountability She made a mockery of the whole system. When the case was finally handed over to Office of Public Advocacy defense attorney Andrew Lambert (03/23/09) he told Judge McKay that De Grazia had done virtually nothing on the case and the judge

responded, "I was afraid of that." 18 months had been wasted on a totally incompetent defense attorney.
Make no mistake, the delays are not about affording the defendant a fair trial, nor protecting the defendant's rights. They are for the benefit of, more times than not, the defense attorney's schedule and needs. The litigation of a case is dictated by the personal life of the defense attorney. Timely disposition is about case management and having efficient and effective counsel. It is about prioritizing cases that have been lingering on for the benefit of the defense attorney's schedules. You can't imagine how disheartening it is to hear your case is going to be delayed, yet again, for 4-5 months because the defense attorney wants to go on their second, one month vacation of the year and he needs about a week to do a divorce case for a buddy of his and he is going to visit some schools for his daughter. Why can't co-counsel take over?

If a builder is building a home he can't tell the client he is going away for a month on vacation and will need 3-4 more months. In just about any profession a project must be completed before those involved can decide to take time off.
If you were diagnosed with cancer and the doctor goes for vacation for a month you have the opportunity to use another doctor. Victims have no choice, but to sit and wait. Prosecutors can't request that we use another defense attorney or that co-counsel handle the scheduled hearing, nor can the judge tell a defense attorney they will need to hold off on their vacation.

Below, I have listed each trial date that was set. I can never describe the sickening feeling a family feels when you are told, once again, that the trial date will be changed. You feel like you are going to vomit. Again, it's like your guts are being ripped out of you. In many cases I was on the verge of tears, knowing we would be given no consideration. And, it is always incredulous reasoning, something that you think may require an extra week or two, delays the trial by 4 months or more.

Preparing for each pretrial hearing is mentally exhausting. You have difficulty functioning and sleeping in fear of what the defense is going to do each time. The tension and anxiety are overwhelming. Getting to court is difficult. We had 45 pretrial hearings. Please consider what that does to families. As a victim, you can't plan life too far in advance; you can't start to rebuild your life.

Refusal to deal with "timely disposition" is a refusal to address the inefficiencies in our justice system. and allowing the "justice system" to re-victimize the victims. Please, support Senator French's SB 135 to honor victim's constitutional right to

"timely disposition of their case." Show the victims the respect they deserve and stop the re-victimization of the victims.

Sincerely yours,

Karen Foster

Juneau, Alaska 99801

RE: Senate Bill 135, Continuances in Criminal Trials; Victims

Dear Senator French:

On behalf of the Board of Directors of Victims for Justice, I am writing to support Senate Bill 135.

Time and time again, we see continuances provided to defendants in criminal cases for reasons that seem insufficient and sometimes disingenuous, with absolutely no consideration given to the challenges this presents to victims in the case.

We have supported victims of violent crimes, and the surviving family members of homicide victims, in cases where so many continuances have been granted that they caused the trial to be delayed more than a decade. This length of delay can work to the benefit of the defendant, when witnesses die or leave the state, memories fade, prosecutors change over and over and it becomes difficult or impossible to win a conviction. And these delays work to the serious disadvantage of victims who only want to see justice done, and to society in general.

We have known victims to travel hundreds or thousands of miles, and incur great expense and inconvenience so that they may exercise their right to attend a trial or hearing, only to have the trial or hearing continued with absolutely no consideration given as to how this impacts the victim.

We recognize that courts want to extend the benefit of the doubt to defendants, who, after all, are the ones whose liberty is at stake. However, we feel the courts often fail to take into consideration the rights afforded by our state Constitution to victims in these situations. Senate Bill 135 puts the victim in the picture, and supports the judge who considers the victim when deciding whether to grant a continuance.

This bill is a very modest change to existing statutes and court rules. It simply describes a means to implement the requirements of our state Constitution and statutes with regard to victims. However, in a very important way, this bill brings balance to our justice system.

The Board of Directors of Victims for Justice strongly support SB 135.

Regards,

Susan Sullivan

January 25, 2012

Honorable Senator Hollis French
State Capitol, Room 417
Juneau, Alaska 99801

Re: Senate Bill 135, Right to a Timely Disposition

Dear Senator French:

Thank you so much for introducing this very important bill. The Alaska Network on Domestic Violence and Sexual Assault strongly supports Senate Bill 135. It is our understanding that this bill will provide a victim of crime, including domestic violence and sexual assault crime victims, a notice from law enforcement or prosecution when there will be a request for a continuance that would substantially delay a prosecution. All too often in Alaska victims have been disappointed in the process, procedure and outcome of their case. This bill will provide for consideration of the victim's wishes, the impact that continual delays will have on a victim of crime, and provide the victim with information of what to expect or what not to expect, in the nearer future.

Our eighteen member victim service agencies throughout the state witness daily the impact these delays have on the people they serve. Time and time again, our advocates appear in court with victims of both domestic violence and sexual assault, only to have their courage and hopes dashed by yet another delay. It has become a 'tactic' which, when employed, disheartens the victim, decreases their sense of safety and decreases their faith in the criminal justice system and the State of Alaska. Hopefully, this bill will strike a balance between the Constitutional right to a speedy trial for both defendants and victims.

Sincerely,

Peggy Brown
Executive Director

Standing Together Against Rape

Crisis Intervention | Advocacy | Education | Prevention

January 20, 2012

Senator Hollis French, Chair
State Capitol, Room 417
Juneau, Alaska 99801

Re: Senate Bill 135, Continuances in Criminal Cases

Dear Senator French:

Standing Together Against Rape (STAR) strongly supports any bill that affords a victim of crime the opportunity to have their voice and concerns heard by the justice system. Senate Bill 135 appears to strengthen "the right to a timely disposition of the case following the arrest of the accused" as stated in the Alaska Constitution.

Crime victims, in particular, victims of sexual assault feel a tremendous amount of anxiety when contemplating facing the person who assaulted them in court. The anxiety builds, creating sleepless nights and increased reliance on coping skills. The day arrives, and the trail is continued. This pattern can be repeated over and over and over again. If the offender is incarcerated the victim is afraid they will be released. If the offender is not incarcerated the victim feels they must continue watching over their shoulder at the market, the department store, the movies, etc. The ability of the victim to move about freely may be inhibited.

While I believe it is not the intent of prosecution to re-victimize crime victims, repeated continuances often do. At the same time STAR recognizes the need for the prosecution to put forth a strong case, to increase the possibility of conviction, to hear defense requests and to lessen the likelihood of appeal. Hopefully this bill will allow for a balance to be struck between the two.

Respectfully submitted,

Standing Together Against Rape

Protecting Alaskans From Unethical Telephone Billing Practices
SPONSOR STATEMENT

Senate Bill 138 would prohibit the practice of third-party telephone bill cramming in the state of Alaska. Cramming is the practice of third-party businesses charging customers on their telephone bills without properly obtaining prior authorization. The charges are included in monthly telephone bills, and the payments are relayed from the telecommunications provider to the third-party company.

Unlike normal businesses where a customer agrees to pay for services and is billed directly from the company, cramming charges consumers through an unlikely mechanism for unauthorized services. Customers do not expect to pay for groceries at the airport or gasoline at a restaurant, and customers expect the same treatment for monthly telephone bills. SB 138 would make sure consumers get what they expect, telephone bills that only contain charges related to telecommunication services. Cramming is a multi-billion dollar industry in the United States and occurs in Alaska on a smaller scale. This bill would stop third party telephone bill cramming in Alaska in its infancy and keep more money in consumer's pockets to spend on legitimate goods and services.

In the absence of congressional action, Vermont enacted popular legislation in 2011 to ban cramming. The State of Alaska has regulatory authority over landlines and wireless service providers in rural Alaska that are carriers of last resort, so this bill would target cramming as it relates to those services.

I ask that you support SB 138 to protect Alaska consumers from this deceptive and unethical practice.

MEMORANDUM

DATE: 23 February 2012

TO: Senator Egan

FROM: Senator Wielechowski PW

SUBJ: Changes in CS to SB 138

Below you will find a description of the changes made to SB 138. These changes are a combination of advice from the Attorney General's office and suggestions from Billing Services Group (BSG).

- In section 1, the definition for "telecommunications carrier" has been limited to a single definition. Previously, this definition captured "those who were eligible for universal service fund." This change was made because previous language captured wireless carriers, which is not the intent of SB 138.
- In section 1, subsection d was moved from section 3 and placed in this section. This was done because the RCA's jurisdiction is defined by statutes 42.05. Previously, the RCA was given regulatory authority by placing section 1, subsection d in section 3. Sections 2-4, though, are written into consumer protection statutes, beginning with 45.50.
- In section 3, subsection c, the language of the exceptions was cleaned up on advice from the attorney at the RCA. The previous language was redundant.
- In section 3, subsection c, part 4, (A) – suggestions by BSG to clarify how express authorization is obtained and verified.
- Section 3, subsection d, defines "billing agent" and "express authorization"
- Section 3, subsection d, part 3 makes the definition of "telecommunications carrier" inclusive of landline telephone bills only. Previously, the definitions captured wireless carriers.

CS FOR SENATE BILL NO. 138(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, DAVIS, AND EGAN, Ellis, Thomas

A BILL

FOR AN ACT ENTITLED

"An Act relating to the inclusion of the charges of a vendor of goods or services on the bills of certain telecommunications carriers; and adding an unlawful act to the Alaska Unfair Trade Practices and Consumer Protection Act."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 42.05 is amended by adding a new section to article 8 to read:

Sec. 42.05.715. Telecommunications carrier bills; disclosures and contested charges. (a) A telecommunications carrier shall clearly identify in separate sections of a customer's bill

(1) charges by each person or billing agent that generates a charge on the bill; and

(2) the information provided to the telecommunications carrier under (b) of this section.

(b) A person or billing agent may not charge customers of a telecommunications carrier on the carrier's bill for a product or service unless the

person or billing agent provides to the telecommunications carrier the following information:

(1) the amount charged for each product or service, separately identifying taxes or surcharges;

(2) a clear and concise description of the product or service that is the basis of the charge;

(3) the name of the entity providing the product or service or otherwise generating the charge; and

(4) a toll-free telephone number or other no-cost means of contacting the entity generating the charge to resolve a dispute regarding the charge.

(c) A telecommunications carrier may not discontinue services to a customer based on the customer's failure to pay a charge of another person or billing agent appearing on the telecommunications carrier's bill, when the customer has contested the charge using the contact information provided under (b) of this section and orally or electronically informed the telecommunications carrier of the reason for nonpayment.

(d) A telecommunications carrier may recover from a person or billing agent reasonable costs incurred in implementing billing changes or otherwise complying with this section.

(e) The commission may adopt regulations to carry out the provisions of this section.

(f) In this section,

(1) "billing agent" has the meaning given in AS 45.50.476;

(2) "telecommunications carrier" means a telecommunications utility required to be certificated by or registered with the Regulatory Commission of Alaska.

* **Sec. 2.** AS 45.50.471(b) is amended by adding a new paragraph to read:

(58) violating AS 45.50.476 (charges billed by telecommunications carriers).

* **Sec. 3.** AS 45.50 is amended by adding a new section to read:

Sec. 45.50.476. Charges billed by telecommunications carriers. (a) Except as provided in (c) of this section, a person or billing agent may not bill charges for

goods or services on a customer's telephone bill from a telecommunications carrier.

(b) A person or billing agent may not induce a telecommunications carrier, directly or through an intermediary, to bill a customer for goods or services of a vendor unless the billing is permitted under (c) of this section.

(c) This section does not apply to an itemized billing in compliance with AS 42.05.715 for

(1) the sale of goods or services governed by an effective tariff of

(A) a public utility operating under a certificate of public convenience and necessity issued by the Regulatory Commission of Alaska; or

(B) a carrier operating under a certificate, license, or authorization issued by the Federal Communications Commission;

(2) direct-dial or dial-around services initiated from the customer's telephone;

(3) operator-assisted telephone calls, collect calls, or telephone services provided to facilitate communications to or from inmates in a correctional center; or

(4) goods or services for which the person or billing agent has provided the telecommunications carrier with

(A) the following:

(i) an electronic letter with the consumer's express authorization of the charge;

(ii) proof that a written confirmation of the charge was provided to the consumer; and

(iii) the consumer's birthdate or the last four digits of the consumer's social security number; or

(B) independent third-party verification of the customer's express authorization.

(d) Telecommunications carriers have no duty to verify independently the accuracy of information received from a person or billing agent under this section.

(e) In this section,

(1) "billing agent" means a person or entity that aggregates consumer

billings or serves as a clearinghouse for aggregate billings and submits charges for goods or services to the billing telecommunications carrier on behalf of itself or a vendor;

(2) "express authorization" means

(A) a customer agreement to be billed for the charges in a signed, written document in paper, electronic, or digital form; or

(B) oral agreement to be billed for the charges after the customer's identity has been verified by an independent third-party verification company using unique identifying information;

(3) "telecommunications carrier" means a telecommunications utility required to be certificated by or registered with the Regulatory Commission of Alaska.

*** Sec. 4.** AS 45.50.481(a) is amended to read:

(a) Nothing in AS 45.50.471 - 45.50.561 applies to

(1) an act or transaction regulated under laws administered by the state, by a regulatory board or commission except as provided by AS 45.50.471(b)(27), [AND] (30), **and (58),** or officer acting under statutory authority of the state or of the United States, unless the law regulating the act or transaction does not prohibit the practices declared unlawful in AS 45.50.471;

(2) an act done by the publisher, owner, agent, or employee of a newspaper, periodical, or radio or television station in the publication or dissemination of an advertisement, when the owner, agent, or employee did not have knowledge of the false, misleading, or deceptive character of the advertisement or did not have a direct financial interest in the sale or distribution of the advertised product or service;

(3) an act or transaction regulated under AS 21.36 or AS 06.05 or a regulation adopted under the authority of those chapters.

CS FOR SENATE BILL NO. 138( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, DAVIS, AND EGAN, Ellis, Thomas

A BILL

FOR AN ACT ENTITLED

"An Act relating to the inclusion of the charges of a vendor of goods or services on the bills of certain telecommunications carriers; and adding an unlawful act to the Alaska Unfair Trade Practices and Consumer Protection Act."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 42.05 is amended by adding a new section to article 8 to read:

Sec. 42.05.715. Telecommunications carrier bills; disclosures and contested charges. (a) A telecommunications carrier shall clearly identify in separate sections of a customer's bill

(1) charges by each person or billing agent that generates a charge on the bill; and

(2) the information provided to the telecommunications carrier under (b) of this section.

(b) A person or billing agent may not charge customers of a telecommunications carrier on the carrier's bill for a product or service unless the

person or billing agent provides to the telecommunications carrier the following information:

(1) the amount charged for each product or service, separately identifying taxes or surcharges;

(2) a clear and concise description of the product or service that is the basis of the charge;

(3) the name of the entity providing the product or service or otherwise generating the charge; and

(4) a toll-free telephone number or other no-cost means of contacting the entity generating the charge to resolve a dispute regarding the charge.

(c) A telecommunications carrier may not discontinue services to a customer based on the customer's failure to pay a charge of another person or billing agent appearing on the telecommunications carrier's bill, when the customer has contested the charge using the contact information provided under (b) of this section and orally or electronically informed the telecommunications carrier of the reason for nonpayment.

(d) A telecommunications carrier may recover from a person or billing agent reasonable costs incurred in implementing billing changes or otherwise complying with this section.

(e) The commission may adopt regulations to carry out the provisions of this section.

(f) In this section,

(1) "billing agent" has the meaning given in AS 45.50.476;

(2) "telecommunications carrier" means a telecommunications utility required to be certificated by or registered with the Regulatory Commission of Alaska.

*** Sec. 2.** AS 45.50.471(b) is amended by adding a new paragraph to read:

(58) violating AS 45.50.476 (charges billed by telecommunications carriers).

*** Sec. 3.** AS 45.50 is amended by adding a new section to read:

Sec. 45.50.476. Charges billed by telecommunications carriers. (a) Except as provided in (c) of this section, a person or billing agent may not bill charges for

goods or services on a customer's telephone bill from a telecommunications carrier.

(b) A person or billing agent may not induce a telecommunications carrier, directly or through an intermediary, to bill a customer for goods or services of a vendor unless the billing is permitted under (c) of this section.

(c) This section does not apply to an itemized billing in compliance with AS 42.05.715 for

(1) the sale of goods or services governed by an effective tariff of

(A) a public utility operating under a certificate of public convenience and necessity issued by the Regulatory Commission of Alaska; or

(B) a carrier operating under a certificate, license, or authorization issued by the Federal Communications Commission;

(2) direct-dial or dial-around services initiated from the customer's telephone;

(3) operator-assisted telephone calls, collect calls, or telephone services provided to facilitate communications to or from inmates in a correctional center; or

(4) goods or services for which the person or billing agent has provided the telecommunications carrier with

(A) the following:

(i) an electronic letter with the consumer's express authorization of the charge;

(ii) proof that a written confirmation of the charge was provided to the consumer; and

(iii) the consumer's birthdate or the last four digits of the consumer's social security number; or

(B) independent third-party verification of the customer's express authorization.

(d) Telecommunications carriers have no duty to verify independently the accuracy of information received from a person or billing agent under this section.

(e) In this section,

(1) "billing agent" means a person or entity that aggregates consumer

billings or serves as a clearinghouse for aggregate billings and submits charges for goods or services to the billing telecommunications carrier on behalf of itself or a vendor;

(2) "express authorization" means

(A) a customer agreement to be billed for the charges in a signed, written document in paper, electronic, or digital form; or

(B) oral agreement to be billed for the charges after the customer's identity has been verified by an independent third-party verification company using unique identifying information;

(3) "telecommunications carrier" means a telecommunications utility required to be certificated by or registered with the Regulatory Commission of Alaska.

*** Sec. 4.** AS 45.50.481(a) is amended to read:

(a) Nothing in AS 45.50.471 - 45.50.561 applies to

(1) an act or transaction regulated under laws administered by the state, by a regulatory board or commission except as provided by AS 45.50.471(b)(27), [AND] (30), **and (58),** or officer acting under statutory authority of the state or of the United States, unless the law regulating the act or transaction does not prohibit the practices declared unlawful in AS 45.50.471;

(2) an act done by the publisher, owner, agent, or employee of a newspaper, periodical, or radio or television station in the publication or dissemination of an advertisement, when the owner, agent, or employee did not have knowledge of the false, misleading, or deceptive character of the advertisement or did not have a direct financial interest in the sale or distribution of the advertised product or service;

(3) an act or transaction regulated under AS 21.36 or AS 06.05 or a regulation adopted under the authority of those chapters.

MEMORANDUM January 11, 2012

SUBJECT: Sectional Summary of SB 138 (Work Order No. 27-LS1002\D)

TO: Senator Bill Wielechowski
Attn: Sam Gottstein

FROM: Lisa Moritz Kirsch
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill -- the bill itself is the best statement of its contents.

Section 1. Creates a new section to AS 42.05.715 of the Alaska Public Utilities Regulatory Act that

- requires telecommunications carriers to disclose detailed information on bills;
- precludes a telecommunications carrier from billing for a third person, corporation, or billing agent, unless the telecommunications carrier bill includes certain details of the third party's billing and a toll free-contact for the third party to resolve a disputed charge;
- forbids a telecommunications carrier from discontinuing service to a customer who uses the contact information on the bill to contest a charge and refuses to pay a charge from a third person, corporation, or billing agent; and
- defines the term "telecommunications carrier."

Section 2. Adds a new unlawful act or practice to the list in AS 45.50.471(b) for violation of new section AS 45.50.476.

Section 3. Creates a new section, AS 45.50.476, that precludes a telecommunications carrier from billing for another vendor of goods or services unless the services fall within a narrow list of exceptions, gives the Regulatory Commission of Alaska authority to adopt regulations to implement this section, and defines "telecommunications carrier" as it is defined in section 1 of this bill for AS 42.05.715 of the Alaska Public Utilities Regulatory Act.

Section 4. Adds the new unlawful act or practice from section 2 to the exceptions to the exclusive jurisdiction of the state, a regulatory board, or a commission.

STATE OF VERMONT
OFFICE OF THE ATTORNEY GENERAL
109 STATE STREET
MONTPELIER, VT
05609-1001

TESTIMONY OF ELLIOT BURG BEFORE THE U.S. SENATE COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION (JULY 13, 2011)

My name is Elliot Burg. I am a Senior Assistant Attorney General in the Vermont Attorney General's Office, where I have worked on issues of consumer protection since 1987 I very much appreciate the opportunity to testify today on the subject of cramming, on behalf of Vermont Attorney General William H Sorrell

Since the spring of 2010, I have overseen a multi-pronged investigation into "cramming" in Vermont—that is, the practice of charging consumers and businesses on their local telephone bills for third-party services[1] without their authorization or knowledge Based on the results of that investigation, which is still ongoing, some important observations can be made about the *nature and scope* of the problem of cramming. In addition, out of the investigation has come a state legislative proposal, enacted into law earlier this year, which represents a potential *solution* to the problem

The investigation

In the spring of 2010, the Vermont Attorney General's Office sent a Civil Investigative Subpoena under the state's Consumer Fraud Act, 9 V.S A § 2460, to the first of what would ultimately be four billing aggregators—the companies that arrange for the placement of charges on local telephone bills to pay for third-party services[2] Based on complaints filed by consumers with the state, there was reason to believe that the sellers of those services (called "merchants" here) had violated the Act by charging consumers[3] without their authorization. There was also reason to believe that neither the vendors nor the aggregators were complying with a Vermont statute enacted in the year 2000 that sought to address the problem of cramming by requiring notice to consumers[4] of billing in the form of a letter containing specified information about the charges, any right to cancel, and contact information for the Attorney General's Office

---

[1] What are sold in this way are almost always services, rather than goods.

[2] Information and documents produced in response to such a subpoena are deemed confidential under 9 V.S.A. § 2460. As a result, this testimony details only facts obtained from other sources or otherwise made public, such as through formal settlements.

[3] Under the Vermont Consumer Fraud Act, the term "consumer" in most situations includes businesses.

[4] The notice requirement, enacted in the year 2000 and now substantially amended (as discussed below), was set out in 9 V.S A. § 2466. That section required merchants to send the notice, but held both merchants and aggregators liable if that did not occur.

The aggregators were asked by subpoena to identify merchants for whom they had arranged for charges to appear on local telephone bills in Vermont. The Attorney General's Office then subpoenaed the merchants with the highest total of dollars billed, for detailed information on their Vermont "customers," their methods of doing business, and their marketing materials, including web pages and telephonic scripts. Surveys were mailed to a number of the customers, asking, among other things, whether they were aware that they had been charged for the particular service, whether they had received notice of the charges other than on their local telephone bill, and whether they had consented to the charges.

The merchants consisted mostly of companies we had never heard of—such as More Local Reach, MyiProducts, YPD—that offered email, third-party voice mail, computer technical support, online directory listings, website hosting, and other services.

Conclusions drawn about the nature and scope of cramming

Three main conclusions were arrived at as a result of our investigation:

1. The level of consumer awareness about third-party charges on local telephone bills is very low. Of the 562 responses to 1700 surveys mailed in connection with the first of the aggregators to be investigated, only 8 (1.4%) recalled having received any separate written notice of their charges (although the merchants claimed to have provided notice, either online or through the mail), and only an estimated 27.4% noticed the charge within the first three months of its appearance on their telephone bill.[5]

2. *The incidence of cramming is very high.* Of the 562 respondents, fully 503 (89.5%) stated that they had not agreed to be charged for the third-party services that appeared on their telephone bill. Indeed, a number of these consumers indicated that they had no reason to order the services for which they were charged; the respondents gave such explanations as, "[I] have an answering machine [and so] would never use this service," "I had voicemail from the phone company [and] did not need [another service]," and "[I] can't imagine agreeing to voicemail since we have always had a personal voice recorder."

3. Deceptive telemarketing scripts have been used. Of the merchants who telemarketed their potential customers—usually businesses—a number used scripts that misstated the purpose of the call. Typical of those scripts was one employed by eBridge, Inc., which offered an online directory to local businesses using a script that began, "The reason I'm calling today is to make sure your information is listed correctly." In fact, the reason for the call was to sign up the business for a $49.95-per month service.

[5] A total of 234 (41.6%) responding consumers indicated on the survey that they noticed a third-party charge on their local telephone bill. It was then possible to identify the billing records of 205 of these consumers; and of that number, 135 (65.9%) were charged for fewer than four months. The resulting percentage of consumers who noticed the charge, but only within the first three months, was 41.6% x 65.9%, or 27 4%.

Merchant settlements

The investigation also led to a series of settlements, all in the form of Assurances of Discontinuance, with eight merchants. It is anticipated that there will be another 20 or more such settlements before the initiative is over. In all, the eight companies charged more than 7,000 consumers and 1,300 businesses in Vermont a total of over $639,000.

The settlements were with the following companies:

- Douglas-Lambert Laboratories LLC, doing business as Orbit Telecom, of Henderson, Nevada, which charged more than 1,200 Vermonters over $119,000 for a voicemail service between 2004 and 2006.

- Durham Technology, LLC, d/b/a MyiProducts IMail, of Indianapolis, Indiana, which charged more than 1,300 Vermonters over $78,000 for a voicemail service between 2005 and 2010.

- eBridge, Inc., also known as Lawstar, Inc., doing business as B2B-ISP, eLink-ISP, InMySip, MSMB-ISP, and Zip Wide Web, Inc., also known as ZWW-ISP, based in Encino, California, which charged 485 Vermont businesses over $93,000 for an online business directory service between 2004 and 2010.

- Liveonthenet.com, based in Huntsville, Alabama, which charged 852 Vermonters over $56,000 for personal computer technical support between 2005 and 2008.

- More Local Reach, Inc., of Boca Raton, Florida, which charged 214 Vermont businesses over $58,000 for online directory services between 2007 and 2010.

- Residential Email LLC, based in Henderson, Nevada, which charged more than 1,170 Vermonters over $65,000 for an email service between 2005 and 2006.

- The Internet Business Association, Inc., based in Carson City, Nevada, which charged 435 businesses over $86,000 for an internet and website address service between 2007 and 2010.

- YPD Corporation of Smyrna, Georgia, which charged 201 Vermont businesses over $84,000 for online directory services between 2007 and 2010.[6]

Given that there are many more such companies, consumer losses in Vermont over the past six years have likely totaled in the millions of dollars—a significant issue for a state with a population of only 620,000, and an indicator that the problem nationwide is very substantial.

[6] An example of these settlements accompanies this testimony as Attachment 1.

The solution: prohibition, not disclosure

Vermont's through-the-mail notice requirement enacted in 2000 to address the problem of cramming has not worked. For a decade, consumers have not received, seen or understood notifications that merchants claim to have provided; most of them have not readily noticed the merchants' charges on their telephone bills; and very few of them recall ever having agreed to be billed. In short, despite the notice requirement, consumers have continued to be crammed, a fact that is not surprising in light of the low level of public awareness that non-telephone charges can appear on one's telephone bill (any more than that third-party charges can be passed through to a person's electric bill, fuel bill, or monthly mortgage account statement).

In January 2011, the Attorney General's Office presented legislation *prohibiting* most third-party charges on local telephone bills for introduction in the Vermont Legislature. With the support of the local telephone companies, this anti-cramming measure passed both the Vermont House and Senate by voice vote, and on May 27, 2011, it was signed into law by Governor Peter Shumlin and became effective immediately.

The new law,[7] which amends the earlier notice requirement, 9 V.S.A. § 2466, contains a general prohibition on third-party charges to local telephone bills, with the following limited exceptions:

- Billing for goods or services marketed or sold by a company subject to the jurisdiction of the Vermont Public Service Board;
- Billing for direct dial or dial-around services initiated from the consumer's telephone; and
- Operator-assisted telephone calls, collect calls, and telephone services that facilitate communication to or from correctional center inmates.

Vermont's statutory approach takes account of actual consumer expectations—*i.e.*, that consumers do *not* anticipate that they will be charged on their local telephone bills for third-party services. It is straightforward to enforce. It does not interfere with other methods of receiving payment for services provided, such as credit cards, debit cards, personal checks, and electronic funds transfers. And it is viewed as a solution to the problem of cramming in our state—one that other jurisdictions may wish to adopt in the future.

[7] The text of the law is set out in Attachment 2 to this testimony.

Attachment 1

STATE OF VERMONT
SUPERIOR COURT
WASHINGTON UNIT

In Re eBridge, Inc., a/k/a Lawstar, Inc., d/b/a B2B-ISP, eLink-ISP, InMyZip, MSMB2B-ISP, and Zip Wide Web, Inc., a/k/a ZWW-ISP	))))	**Civil Division** **Docket No.** 276-5-11 Wncv

ASSURANCE OF DISCONTINUANCE

WHEREAS eBridge, Inc., a/k/a Lawstar, Inc., d/b/a B2B-ISP, eLink-ISP, InMyZip, MSMB2B-ISP, and Zip Wide Web, Inc., a/k/a ZWW-ISP, (hereinafter referred to as "eBridge"), is a California corporation with offices 16133 Ventura Blvd., Suite 855, Encino, CA 91436;

WHEREAS eBridge is a third-party provider of an online business directory to businesses, the charges for which were placed on local telephone bills with the assistance of a San Antonio-based company called Enhanced Services Billing, Inc. (ESBI);

WHEREAS eBridge solicited Vermont businesses over the telephone to purchase its service;

WHEREAS eBridge's charges to businesses averaged $49.95 per month;

WHEREAS during the period 2004 to 2010, eBridge charged a total of $93,007 to 485 businesses for its services that appeared on local telephone bills in Vermont's area code 802, with $16,983 refunded;

WHEREAS sellers of goods or services that are to be charged on a consumer's (including a business') local telephone bill are required under 9 V.S.A. § 2466 to mail a notice to the party to be charged, containing information specified in the statute, including the consumer assistance address and telephone number specified by the Attorney General, which

Office of the
ATTORNEY
GENERAL
Montpelier,
Vermont 05609

notice must be a separate document sent for the sole purpose of providing that information and may not contain any inducement to purchase goods or services;

WHEREAS eBridge mailed notices to Vermont businesses that were charged for its services on their local telephone bills;

WHEREAS the Attorney General alleges that eBridge violated the Vermont Consumer Fraud Act, 9 V.S.A. § 2466, by not complying with that provision's notice requirements in that eBridge's notices (i) failed to include the consumer assistance address and telephone number specified by the Attorney General; and (ii) did not constitute separate documents sent for the sole purpose of providing the information required by the statute;

WHEREAS the script used by eBridge's telemarketers stated at the outset, "The reason I'm calling today is to make sure your information is listed correctly.";

WHEREAS the Attorney General alleges that the primary purpose of eBridge's calls was, instead, to solicit the purchase of its service, which was explained later in the company's telemarketing script;

WHEREAS the Attorney General therefore alleges that eBridge's script misrepresented the purpose of the company's sales calls, in violation of the Consumer Fraud Act prohibition on deceptive trade practices, 9 V.S.A. § 2453(a);

AND WHEREAS the Attorney General is willing to accept this Assurance of Discontinuance pursuant to 9 V.S.A. § 2459;

THEREFORE, the parties agree as follows:

1. *Injunctive relief.* eBridge shall comply strictly with all provisions of Vermont law, including but not limited to provisions of the Vermont Consumer Fraud Act, 9 V.S.A. chapter 63, relating to the placement of charges on local telephone bills and the prohibition on deceptive trade practices.

Office of the
ATTORNEY
GENERAL
Montpelier,
Vermont 05609

2. *Consumer relief.*

a. For each business from which eBridge has received money through a charge on a local telephone bill with a number in area code 802, eBridge shall, within ten (10) business days of signing this Assurance of Discontinuance, arrange for an electronic credit record to the business' local telephone company in the amount of all such monies that have not been previously refunded. eBridge shall use due diligence to ensure that accurate credits are provided to each business to whom a credit is due.

b. If a credit record sent under the preceding paragraph is not accepted or is returned by the local telephone company, eBridge shall, within ten (10) days of learning of the non-acceptance or the return, send to the business, by first-class mail, postage prepaid, a check in the amount of the credit due to the business' last known address, accompanied by a letter in substantially the form attached as Exhibit 1.

c. No later than 60 (sixty) days after signing this Assurance of Discontinuance, eBridge shall provide to the Vermont Attorney General's Office the names and addresses of the businesses whose telephone numbers were credited, and to which letters and payments were sent, under this Assurance of Discontinuance, along with the date and amount of each credit or payment.

d. No later than ninety (90) days after signing this Assurance of Discontinuance, eBridge shall pay the total dollar amount of all checks returned as undeliverable to the Vermont Attorney General's Office to be treated as unclaimed funds, along with a list in Excel format of the businesses to whom the monies due were not paid and their last known addresses.

Office of the
ATTORNEY
GENERAL
Montpelier,
Vermont 05609

3. *Civil penalties, fees and costs.* Within twenty (20) days of signing this Assurance of Discontinuance, eBridge shall pay to the State of Vermont, in care of the Vermont Attorney General's Office, the sum of ten thousand dollars ($10,000.00) in civil penalties and costs.

4. *Binding effect.* This Assurance of Discontinuance shall be binding on eBridge, its successors and assigns.

5. *Release.* The State of Vermont hereby releases and discharges any and all claims that it may have against eBridge or its affiliates based on conduct or activities arising under or in connection with the Vermont Consumer Fraud Act prior to the date of this Assurance of Discontinuance.

Attachment 2

Vermont "Anti-Cramming" Statute (2011)

9 V.S.A. § 2466 is amended to read:

§ 2466. GOODS AND SERVICES APPEARING ON TELEPHONE BILL

(a) Except as provided in subsection (f) of this section, a seller shall not bill a consumer for goods or services that will appear as a charge on the person's bill for telephone service provided by any local exchange carrier.

(b) No person shall arrange on behalf of a seller of goods or services, directly or through an intermediary, with a local exchange carrier, to bill a consumer for goods or services other than as permitted by this section. This prohibition applies, but is not limited, to persons who aggregate consumer billings for a seller and to persons who serve as a clearinghouse for aggregated billings.

(c) Failure to comply with this section is an unfair and deceptive act and practice in commerce under this chapter.

(d) The attorney general may make rules and regulations to carry out the purposes of this section.

(e) Nothing in this section limits the liability of any person under existing statutory or common law.

(f)(1) This section shall apply to billing aggregators described in 30 V.S.A. § 231a, but shall not apply to:

(A) billing for goods or services marketed or sold by persons subject to the jurisdiction of the Vermont public service board under 30 V.S.A. § 203;

(B) billing for direct dial or dial around services initiated from the consumer's telephone; or

(C) operator-assisted telephone calls, collect calls, or telephone services provided to facilitate communication to or from correctional center inmates.

COMMITTEE ON COMMERCE,
SCIENCE, AND TRANSPORTATION

OFFICE OF OVERSIGHT AND INVESTIGATIONS
MAJORITY STAFF

UNAUTHORIZED CHARGES ON TELEPHONE BILLS

STAFF REPORT FOR CHAIRMAN ROCKEFELLER
JULY 12, 2011

EXECUTIVE SUMMARY

In May 2010, Chairman Rockefeller launched an investigation into third-party billing on landline telephone bills. He opened the investigation because consumers had complained for years that they were finding mysterious charges on their telephone bills for services they had not purchased. To understand the scope and the severity of this problem, commonly referred to as "cramming," the Senate Commerce Committee staff has conducted a wide-ranging investigation over the past year.

The evidence obtained through this investigation suggests that third-party billing is causing extensive financial harm to all types of landline telephone customers, from residences and small businesses, to government agencies and large companies. Over the past decade, telephone customers appear to have been scammed out of billions of dollars through third-party billing on landline telephones. Unauthorized third-party charges are a nationwide problem.

THIRD-PARTY BILLING AND THE RISE OF CRAMMING

Cramming is not a new problem. It began appearing in the 1990s, when telephone companies opened their billing platforms to an array of third-party vendors offering a variety of services. For the first time, telephone numbers became a payment method equivalent to credit card numbers. Consumers and businesses could purchase products or services with their telephone numbers and the charges for the services would later appear on their telephone bills.

While the telephone companies' decision to open their billing platforms had the potential to benefit consumers and businesses, cramming quickly emerged as an unintended consequence. The rise of cramming was so significant in the late 1990s that federal authorities, consumer advocates, and telephone companies all agreed that changes to the telephone companies' third-party billing systems were needed.

At the time, both the Federal Communications Commission (FCC) and the telecommunications industry advocated for a voluntary approach, rather than rulemaking or congressional action. The United States Telephone Association told Congress that the industry "needed flexibility to deal with cramming on a case specific basis" and that "mandatory guidelines or a one-size-fits-all approach would erode that ability." Although mandatory requirements for telephone companies were discussed, the problem was addressed almost exclusively through voluntary guidelines. The only mandatory requirements placed on telephone companies at the federal level have been the FCC's "Truth-in-Billing" regulations, which require disclosure of third-party charges on telephone bills.

Over a decade later, thousands of consumers still regularly complain to the Federal Trade Commission (FTC) and the FCC about cramming, while state and federal authorities continue to bring law enforcement actions against individuals and companies for cramming. These cases have shown that consumers continue to be scammed out of millions of dollars through cramming.

THE SENATE COMMERCE COMMITTEE'S INVESTIGATION

To understand the scope of the cramming problem, the Committee requested information related to third-party billing and cramming from telephone companies; state and federal regulatory agencies; companies that offer third-party billing as a method of payment; consumers, businesses, and government agencies that have been affected by cramming; and companies that specialize in auditing telephone bills.

The evidence obtained and analyzed by Committee staff suggests that third-party billing on landline telephones has largely failed to become a reliable method of payment that consumers and businesses use to conduct legitimate commerce. Rather, it created cramming, a problem of massive proportions likely affecting millions of telephone users and costing them billions of dollars in unauthorized third-party charges over the past decade. With the exception of legitimate third-party vendors that offer services like satellite television and long distance, third-party billing appears to be primarily used by con artists and unscrupulous companies to scam telephone customers.

The key findings of the Committee staff's investigation are the following:

Third-party billing is a billion dollar industry. Telephone companies place approximately 300 million third-party charges on their customers' bills each year, which amount to more than $2 billion worth of third-party charges on telephone bills every year. Over the past five years, telephone companies have placed more than $10 billion worth of third-party charges on their customers' landline telephone bills.

A substantial percentage of third-party charges are unauthorized. While Committee staff cannot determine precisely how many third-party charges are unauthorized, the evidence obtained through the investigation suggests it is a large percentage.

- Telephone customers with third-party charges on their telephone bills overwhelmingly reported that the charges were unauthorized. Committee staff has spoken with more than 500 individuals and business owners whose telephone bills included third-party charges. Not one person said the charges were authorized. Law enforcement agencies have reported similar findings when conducting surveys for their own cramming investigations.

- Committee staff is aware of hundreds of third-party vendors whose actions suggest they are engaged in cramming. For example, a company specializing in auditing telephone bills reported that over 800 different third-party vendors had placed unauthorized third-party charges on its clients' landline telephone bills.

- Committee staff has found hundreds of egregious examples of cramming. Third-party vendors have enrolled deceased persons in their so-called "services" and charged family members' telephone bills for it. They have charged telephone lines dedicated to fire alarms, security systems, bank vaults, elevators, and 911 systems. Senior citizens' telephones have been enrolled in webhosting services, even though they have never used

the Internet. A children's hospital was charged for a "celebrity tracker" e-mail service that provided "daily celebrity news feeds, photos, and videos." A national bank's telephone lines were charged for "credit protection plans." Third-party vendors even crammed unauthorized charges for voicemail services onto AT&T's own telephone lines.

Telephone companies profit from cramming. Over the past decade, telephone companies have generated over $1 billion dollars in revenue by placing third-party charges on their customers' telephone bills. Since 2006, AT&T, Qwest, and Verizon have earned more than $650 million through third-party billing. Verizon explained that it "receives a flat fee between $1 and $2 per charge for placing third-party charges" on its customers' bills. Because telephone companies generate revenue by placing third-party charges on their customers' bills, telephone companies profit from cramming. Documents reviewed by the Committee staff show that some telephone company employees feel financial pressure to approve third-party vendors even though the companies appear to be crammers.

Cramming affects every segment of the landline telephone customer base. Unauthorized third-party charges harm residences, small businesses, nonprofits, corporations, government agencies, and educational institutions. The Committee has accumulated thousands of examples of cramming on nonresidential telephone bills.

Examples of cramming on small business telephone lines. A small business that owns Popeyes and Krispy Kreme franchises reported that third-party vendors placed more than $4,000 worth of charges on its telephone bills for electronic facsimile and other services it did not authorize or use. A small business owner in Nevada reported that seventeen different third-party vendors charged him over $4,000 for online business listings, voicemail, identity theft protection, and streaming video services he did not authorize or use. A bicycle store owner in Illinois reported approximately $1,500 of unauthorized charges for "virtual fax and voicemail" services she did not authorize or use.

Examples of cramming on corporate telephone lines. Large organizations are particularly susceptible to cramming because they often have thousands of telephone lines in hundreds of locations. Crammers appear to target them specifically. A national food chain reported over $100,000 worth of unauthorized third-party charges on a yearly basis. Other companies provided similar figures. A national retail chain reported $550,000 in unauthorized third-party charges on its telephone bills over the past decade. The retail chain estimates it has spent $400,000 in resources battling unauthorized third-party charges.

Examples of cramming on government telephone lines. Local, state, and federal agencies also reported cramming on their landline telephone bills. The United States Postal Service would have paid almost $550,000 in unauthorized third-party charges if it had not hired an auditor to examine its bills. The United States Naval Station in San Diego, California, reported its telephone bills included $11,000 worth of unauthorized third-party charges in one quarter in 2009. Since November 2009, Los Angeles County has received $306,000 in billing credits for unauthorized third-party charges on its AT&T

landline telephone bills. Los Angeles, Chicago, New York, and other large city governments also battled cramming charges.

Many third-party vendors are illegitimate and created solely to exploit third-party billing. Committee staff has found third-party vendors operating out of post office boxes, fake offices, and residences, with "presidents" that know nothing about their "companies." One woman admitted that she became involved because "a friend said do you want to become president of a company." Another "president" admitted that he did nothing more than sign his name to papers that were submitted to telephone companies.

Many telephone customers experiencing cramming did not receive help from their telephone companies. Although telephone companies said they instructed their representatives to assist customers with cramming problems, consumers and businesses frequently reported that the telephone companies were not helpful. Company representatives frequently stated incorrectly that telephone companies were "legally obligated to place the charges on their bills," and that, "there was nothing they could do to help them." Only after these consumers contacted the Better Business Bureau or their state attorneys general did their telephone companies provide assistance for many of them. Business and government offices had similar experiences. For example, an AT&T Senior Account Manager for the City of Tyler, Texas, stated, "Neither myself or my team can do anything to resolve these for you and this isn't the first time we've been asked." He added, "My former account Dallas County would have 20-30 per month…I wish, I really wish there was some way we could help but there is not."

The telephone companies are aware that cramming is a major problem on their third-party billing systems. While telephone companies regularly tell their regulators and the media that their cramming complaint rates are low, internal documents reviewed by Committee staff show that the companies understand cramming is a major customer service problem. The companies have received hundreds of thousands of complaints using words like "fraud," "scam," "theft," "hoodwinked," "shocked," "disgusted," "upset," "stealing," "bad business," "taking advantage," "disappointed," and "unethical" to describe their experiences with third-party billing. Furthermore, telephone companies deal with only a small fraction of the actual number of their dissatisfied, angry customers, because most customers either never realize they are being charged or they complain directly to third-party vendors. Over an eight month period in 2010, for example, more than 200,000 people directly called a set of related third-party vendors to cancel their services because they "did not understand," "did not remember," or "did not authorize" the charges. Over the same period, those third-party vendors only received 2,746 cramming complaints forwarded from telephone companies.

III. OVERVIEW OF THIRD-PARTY BILLING ON LANDLINE TELEPHONES

There are two types of third-party billing on landline telephones: (1) third-party billing where a vendor, such as a satellite television network or a large long distance provider, contracts directly with a telephone company to place charges on its customers' bills; and (2) third-party billing where the telephone company contracts with a "billing aggregator," or "clearinghouse," which maintains business relationships with hundreds of other smaller third-party vendors.

The Committee's investigation has focused on the latter arrangement because most third-party charges come through aggregators, and because consumer cramming complaints reviewed by Committee staff overwhelmingly relate to third-party charges placed through aggregators. As will be discussed in the section on "Illegitimate Third-Party Vendors," many third-party vendors that bill through aggregators appear to be created solely to exploit the weaknesses of the landline telephone third-party billing system.

A. The Third-Party Billing Ecosystem

When the Committee opened the investigation, Committee staff's understanding was that three types of companies play a role in third-party billing: third-party vendors, billing aggregators, and telephone companies.

Third-Party Vendors: Hundreds of different third-party vendors charge their customers for services through telephone bills. These companies claim to offer an array of services, including long distance, voicemail, online backup, online photo storage, roadside assistance, and electronic facsimile. To gain access to the telephone companies' third-party billing systems, they enter into contracts with billing aggregators. They also register directly with telephone companies and receive a carrier identification code ("sub-CIC") number.

Billing Aggregators: The FTC has explained that billing aggregators open "the gate to the telephone billing and collection system" and "act as intermediaries between the [third-party] vendors and the local phone companies" by "contracting with the local phone companies…to have the local telephone companies collect…charges from consumers."[30] Once the charges are collected by the phone companies, the billing aggregators, after taking their fee, pass the revenues back to their client vendors. A handful of aggregators manage third-party vendors' access to landline telephone bills. Aggregator names that appear commonly on phone bills are: ESBI, ILD Teleservices, OAN, Payment One, the Billing Resource, Transaction Clearing, and USBI.

Telephone Companies: Telephone companies control access to their customers' telephone bills and distribute the revenue generated from third-party charges. To place charges on telephone bills, a third-party vendor must first acquire a sub-CIC number and approval from a telephone company. Once a third-party vendor's charges appear on

[30] Federal Trade Commission, *Telephone "Crammers" Settle FTC Charges: Billing Aggregators Debited Phone Bills for Charges Consumers Didn't Authorize* (Aug. 6, 2001).

telephone customers' bills, the telephone companies, after collecting their fees, pass the revenue back to the billing aggregators, which then distribute the revenue to the third-party vendors. Committee staff has found that many telephone companies – from large national carriers like AT&T and Verizon to small independent carriers – place third-party charges on their customers' bills.[31]

FIGURE I—THIRD PARTY BILLING AS COMMONLY UNDERSTOOD

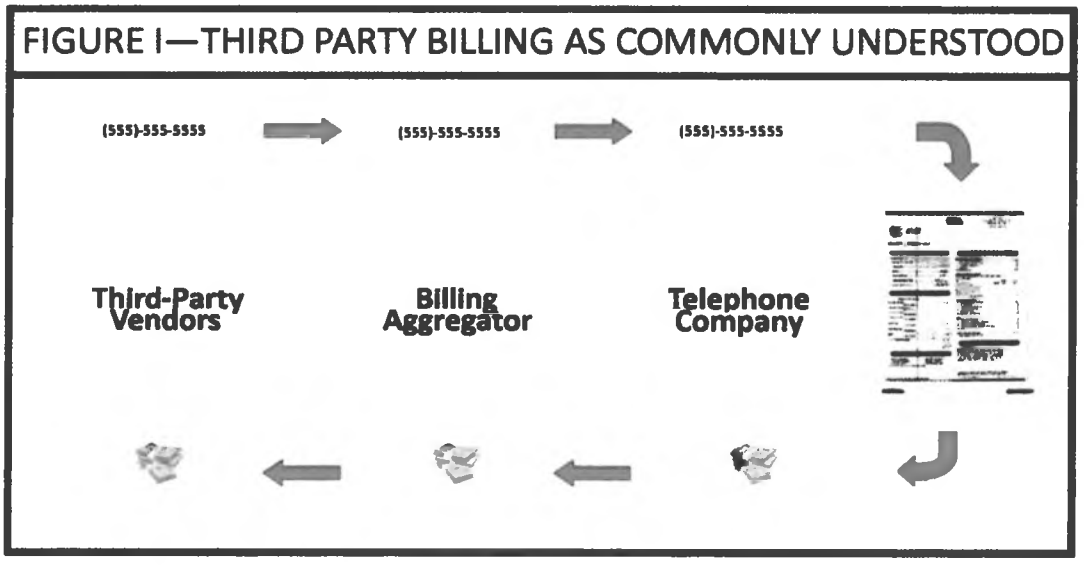

Figure I illustrates the third-party charge process as it is usually described by the involved parties. The third-party vendor allegedly sells a consumer a service and obtains the consumer's "authorization" to bill his or her telephone number. The vendor passes the number to a billing aggregator, which in turn passes the number on to the telephone company that provides the consumer's landline telephone service. The vendor's charge then begins appearing on the customer's telephone bill. Once a customer pays his or her bill, the telephone company collects the portion of the payment that covers the third-party charges and, after taking its fees for placing the third-party charges, distributes the revenue to the billing aggregator, which then distributes to the corresponding third-party vendor.

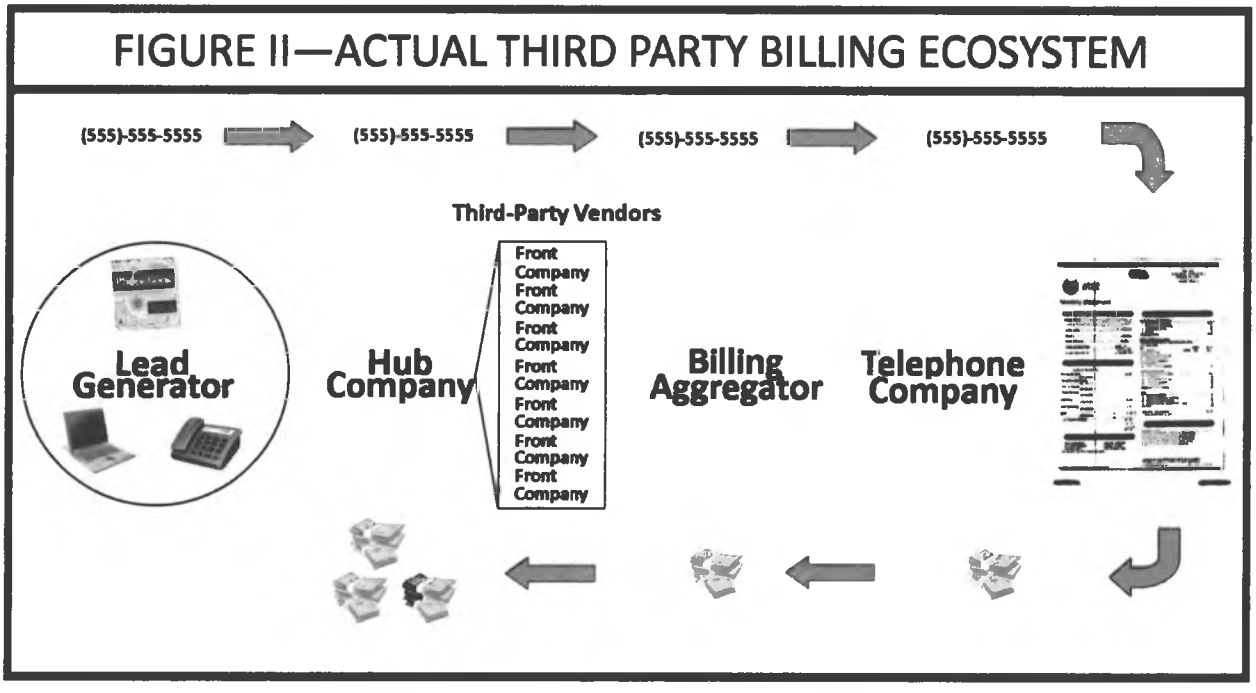
As Committee staff conducted the investigation, it became apparent that the actual third-party billing ecosystem is more complicated. Many third-party vendors are actually "front companies" for "hub companies" that handle every aspect of the vendors' business. In other

[31] A number of smaller telephone companies do not allow third-party charges on their customers' bills. For example, the Shenandoah Telephone Company (Shentel) recently wrote Chairman Rockefeller that it eliminated third-party billing in 2007 after receiving cramming complaints from its customers. Letter from David E. Ferguson, Vice President – Customer Services, Shenandoah Telephone Company, to Senator John D. Rockefeller IV (July 5, 2011). The Western Telecommunications Alliance told Committee staff that some of its members terminated third-party billing "out of respect for their customers' dissatisfaction with being" crammed and due to "spending an inordinate amount of time and resources trying to get those charges removed from their customers' bills." E-mail message from Western Telecommunications Alliance to Commerce Committee Staff (July 11, 2011).

words, many third-party vendors do not actually provide the services they claim to provide in their applications to the telephone companies. Committee staff found dozens of examples of third-party vendors that were in fact controlled by hub companies.



The apparent purpose of hub companies is to game the third-party billing system. If a large number of consumers complain to telephone companies or law enforcement authorities about a particular third-party vendor, the hub company can simply shift additional enrollments to other third-party vendors it controls. When one larger company operates through multiple smaller third-party vendors, it is more difficult for telephone companies and other authorities to determine how much cramming is occurring and who is responsible for it. Part V of this report provides detailed information about hub companies Committee staff examined during this investigation.

Complicating matters further, Committee staff found evidence that hub companies outsource marketing and enrollment to companies called "lead generators." Lead generators are paid to obtain customers' "authorizations" to bill their telephone numbers. They pass the allegedly authorized telephone numbers onto the hub companies, which then pass the numbers to the billing aggregators under the names of different front companies. This arrangement invites abuse because lead generators are apparently paid based upon how many consumers they enroll, rather than for providing services or maintaining relationships with customers. Their practices will be discussed further in the next section of this report.

B. The Cost and Scope of Third-Party Billing

To understand the scope of third-party billing, the Committee requested financial information about third-party billing from eight providers of landline telephone service – AT&T, Verizon, Qwest, CenturyLink, Windstream, FairPoint, Frontier, and Cincinnati Bell. Based upon

third-party billing. In a complaint to the Better Business Bureau (BBB), an AT&T customer shared the following sentiment, which is also expressed in thousands of other complaints:

> I am concerned for many like myself who really have to decide whether they are going to pay their bills or eat for the month. When I have tried [to contact] these fly by night companies who are bil[k]ing me with AT&T's blessing, I get the runaround or disconnected. This is very frustrating and it needs to stop. I never agreed to have AT&T allow third party billers to charge me for services I never ordered and do not want.[35]

A. How Cramming Occurs

For cramming to occur, three separate actions are required: (1) a third-party vendor obtains the telephone number of a consumer who has allegedly purchased a service, (2) the third-party vendor submits that telephone number to a telephone company through a billing aggregator, and (3) the telephone company places the allegedly "authorized" charge for the third-party vendor on the consumer's telephone bill. Because telephone companies do not have their own processes to determine if a consumer has "authorized" a charge, once a company engaged in cramming has obtained a consumer's telephone number, it is a simple process to have the charge placed on the consumer's telephone bill. As a result, at its most basic level, cramming is about obtaining telephone numbers.

Crammers obtain telephone numbers in one of two ways. They either obtain a consumer's telephone number without ever interacting with the consumer; or they dupe a consumer, through abusive marketing, into providing his or her telephone number and "authorization." When they are asked to provide proof that a consumer has "authorized" a charge, crammers routinely provide information that is inaccurate or insufficient to show that a consumer knowingly purchased the service.

1. No Consumer Involvement

In the 1990s, the GAO observed that "[s]ome vendors apparently have simply lifted names and numbers from telephone directories to charge businesses for nonexistent services."[36] Through its investigation, Committee staff has obtained evidence showing that, over a decade later, third-party vendors continue to engage in similar practices. A third-party vendor needs nothing more than information that is publicly available, or that can be purchased from "lead generators," to enroll consumers in its so-called services. Unlike credit cards, which consumers know to protect, telephone numbers are widely available. Once crammers have obtained this information, it is a simple process to submit those numbers to telephone companies.

[36] General Accounting Office, *Overview of the Cramming Problem* (GAO/T-RCED-00-28) (Oct. 25, 1999).

Telephone customers frequently submit complaints to telephone companies, consumer advocates, and regulatory offices with proof that they did not provide their telephone numbers to the third-party vendors that placed charges on their bills. The following examples are representative of thousands of complaints reviewed by Committee staff.

Deceased Relatives Many telephone customers complained that third-party vendors provided the names of deceased relatives when asked who authorized the charges on their telephone bills. A telephone customer stated, "they informed me my deceased son, he died nine years ago, had signed me up for this service,"[37] while another stated, "they told me it [the service] was ordered by Jean W.—he has been deceased for 36 years."[38] Another frustrated customer stated, "They informed me that my husband…had ordered the service and I would have to know his security information. When I explained that my husband died 13 years ago, they told me that I must have ordered it in his name."[39]

Incorrect Personal Information Telephone customers repeatedly complained that the information that third-party vendors provided as proof of authorization was incorrect. A Verizon customer complained that "it was done in our daughter's name but with her actual name reversed, wrong e-mail address, wrong birth date, but with our correct home phone number and home address. Neither we nor she ever signed up for this service."[40]

A Connecticut resident complained that a third-party vendor called Billviaphone.com had his address wrong and had informed him that "Michael…had signed up online."[41] He explained that, "[t]here's no Michael here, just Mark & Nancy."[42] In another complaint, a manager from the Oklahoma Corporation Commission contacted AT&T on behalf of an Oklahoma resident. She was "concerned" about the proof of enrollment that had been provided because it was not the information for the person who had been charged.[43]

Unpublished Numbers Numerous businesses and government agencies told Committee staff they have incurred crammed charges on telephone lines that are dedicated to alarm systems, elevators, modems, and other lines that are not assigned to any employees. They stated that they do not believe their employees could have enrolled those telephone lines in any services because the telephone numbers for the lines are unpublished and unknown to employees. For example, a large, multistate bank sent Committee staff a spreadsheet showing the following examples of cramming since May 2010:

---

[37] Consumer complaint to Arkansas Attorney General (Dec. 14, 2009) (AT&T Doc. CST029520).

[38] Consumer complaint to Kansas Attorney General (Nov. 1, 2009) (AT&T Doc. CST030067).

[39] Consumer complaint to Oregon PUC (July 2, 2008) (Qwest Doc. QSC0015024).

[40] Consumer complaint to Verizon (Aug. 20, 2009) (Verizon Doc. VZ_003_002040).

[41] Consumer e-mail to Better Business Bureau of Connecticut (Aug. 21, 2009) (AT&T Doc. CST009842).

[42] *Id.*

[43] E-mail from Oklahoma Corporation Commission to AT&T employees (Feb. 9, 2010) (AT&T Doc. CST0219835).

- alarm lines incurred charges for directory listings, "eBusiness Marketing Materials," "online business," electronic facsimile, long distance plans, and Internet radio;
- an ATM line incurred charges for "Internet services;"
- remote call forwarding lines incurred charges for "Instant 411," online coupons, directory listings, photo storage, electronic facsimile, monthly ringtones, IT support, Internet TV, and music downloads;
- a modem line incurred charges for voicemail;
- a data line incurred charges for music downloads;
- emergency call lines incurred charges for electronic facsimile and online diet services;
- equipment monitoring lines incurred charges for voicemail;
- a VoIP test line incurred charges for music downloads; and
- a facsimile line incurred charges for online entertainment news.

Another bank told Committee staff that it believes that much of the $20,000 worth of cramming it incurred in the first several months of 2011 occurred on unpublished telephone numbers for modems, alarms, facsimile machines, and other telephone lines that are not assigned to individual employees. An office property company reported that it has incurred charges on telephone lines for elevators and alarms. The U.S. Naval Computer and Telecommunication Station in San Diego stated that the crammed charges it has incurred on central office trunk lines must be "100% fraud" because Naval personnel do not know the telephone numbers associated with those lines, the numbers are unpublished, and the numbers do not appear on caller identification records because they are not connection points for telephone calls.[44]

Fake Internet Enrollments Telephone customers have repeatedly complained that they were told they enrolled for third-party vendors' services via websites, even though they did not have a computer or access to the Internet. An AT&T Arkansas customer explained, "I was told it was 'triggered' online. I have no computer…and have never been on-line."[45]

This type of complaint frequently came from senior citizens or their caregivers. A Qwest customer complaining on behalf of her father was told "that it was an online order of some sort," but she explained that "her father who lives in an assisted living facility…does not own, or [know] how to use a computer."[46]

In a particularly egregious example, a man complained on behalf of his 82 year-old mother-in-law about a third-party vendor called Talent & More LLC,[47] which charged her telephone number for a "web-hosting personal profile" allegedly marketed to "casting agents"

[47] Letter to the Office of the Connecticut Attorney General (July 22, 2009) (AT&T Doc. CST 2622056).

1. Time and Money

The unauthorized charges that are crammed onto telephone customer's bills are typically between $10 and $50. These charges, although relatively minor if they occur only once, can quickly amount to significant losses for telephone customers. To maximize revenue, crammers charge consumers on a recurring monthly basis for their "services," so that the charges will continue as long as consumers fail to discover them.

Residences and small businesses affected by cramming have generally experienced losses in the hundreds and thousands of dollars.[59] Larger organizations, like government agencies and corporations, sometimes experience unauthorized third-party charges worth tens of thousands of dollars a year.[60] Because large organizations often have thousands of telephone lines in hundreds of locations, they are particularly susceptible to cramming.

For example, the United States Postal Service would have incurred over $500,000 worth of unauthorized charges if it had not hired a company to audit its telephone bills, while a large food chain told Committee staff that it incurs approximately $100,000 worth of unauthorized charges on a yearly basis.[61] Even AT&T experiences cramming on its telephone lines. Committee staff confirmed that third-party vendors associated with one hub company crammed at least 80 of AT&T's own telephone lines with charges for services such as voice mail, sometimes for periods as long as 18 months.[62]

Battling unauthorized third-party charges also costs telephone customers significant amounts of time, effort, and money. Telephone customers shared the following experiences in complaints, which are similar to those of thousands of other customers:

- A Qwest customer stated, "this is the 5th time that I have had charges added to my bill…[e]very time I have spent at least a half hour of my time getting these services removed…I'm sick of this."[63]

- An AT&T customer expressed his frustration after he tried unsuccessfully to have third-party charges removed from his bill. He stated, "[t]his is the 2nd or 3rd time within about 4 years that something like this has happened to us with AT&T . . . where they arbitrarily

[59] See Appendix A, "Cramming Case Studies," for summaries of telephone customers' experiences with third-party billing and cramming.

telephone companies. She receives a monthly check worth a few hundred dollars for serving as "president" of the company.[106]

3. Low Rates of Usage

Committee staff obtained evidence from multiple third-party vendors showing that few, if any, of their "customers" were using the services for which the companies were charging them. These findings are consistent with those of other law enforcement inquiries into cramming. Low usage rates are strong evidence that consumers did not knowingly purchase the services and were not aware they were being charged for them.

"Voicemail" Services MySnS's third-party vendors each charged telephone customers for "voicemail" services that were accessible only by dialing specific 1-800 telephone numbers. The Committee obtained MySnS's telephone bill for December 2010, which showed that approximately 925 unique numbers dialed the 1-800 telephone numbers dedicated to "voicemail" services during the month.[107] At the time, at least 97,000 telephone customers were being charged for these services.[108] At best, less than 1% of the telephone customers charged for "voicemail" services used it in December 2010.

"Online Photo Storage" Services daData provided usage data for Coast to Coast Photo, Photo Cubbie, Residential Photo, and USA Photo House, which provided "online photo storage" and "100 prints per month" for $14.95 per month. Of the 64,250 telephone customers that these third-party vendors enrolled in 2009 and 2010,[109] less than 2% loaded a digital picture to the websites.[110]

"Casual Online Gaming" Services With assistance from MORE International's counsel, a counsel for the Committee enrolled in the "casual online gaming services" offered by EZPhoneBill, a third-party vendor associated with MORE, to determine whether enrolled telephone customers were using the company's services. Committee staff had noticed that few, if any, "customers" appeared to be using its online gaming website, games.ezphonebill.com. Before Committee counsel accessed the website, the front page listed "No scores logged yet!" for its "All Time Top Scores," even though it had enrolled more than 20,000 telephone customers in the service and generated almost $1 million dollars by charging those customers $14.95 per month.[111]

[111] Letter from Linda Goldstein, Counsel to MORE International, to Erik Jones, Counsel to Senate Commerce Committee (Feb. 3, 2011).

5. Committee Staff Calls to the Third-Party Vendors' "Customers"

The Committee obtained the contact information for thousands of the telephone customers who had been charged by third-party vendors that were related to daData, MySnS, and MORE International. At random, Committee staff called consumers who had allegedly purchased services from the following third-party vendors: BLVD Network, Total Protection Plus, MyInfoGuard, Coast to Coast Voice, Nationwide Assist Fax, TriVoice International, Agora Solution, MyBillingServices, Xoom Telecommunications, and EZPhoneBill.

Committee staff called approximately 1700 randomly selected "customers," and spoke to over 500 of them about their experiences. Not a single individual or business owner reported that they had authorized the third-party vendors' charges on their telephone bills. Telephone customers either reported that they had already found the unauthorized charges and had them removed, or they were surprised to learn that their telephone bills included third-party charges.

Staff calls to "customers" of Total Protection Plus, for example, resulted in clear evidence of cramming. This daData-controlled vendor allegedly "offers customers electronic fax capabilities with online data back-up voice messaging with ID theft protection, and stand-alone voicemail access."[116] daData informed the Committee that the Total Protection Plus "service" was marketed to individuals. The company provided the Committee the names, telephone numbers, and other information about customers who had allegedly purchased the service.

Although these documents identified the telephone numbers that were enrolled in Total Protection Plus as "Home Phone" numbers, Committee staff called dozens of the numbers and discovered that they belonged to government agencies and businesses. For example, some of the numbers belonged to a Taco Bell, a Wal-Mart, a Publix grocery store, the Broward County Sheriff's Office, an emergency room, a Capital One bank, the Jacksonville Aviation Authority, a juvenile detention center, Prince George's County Community Center, and the West Virginia Department of Highways. Documents daData produced to the Committee show numerous instances in which business and government offices complained that their telephone numbers had been enrolled in Total Protection Plus.

6. Enrollments and Financials

The third-party vendors related to daData, MySnS, and MORE International have enrolled millions of telephone customers in their "services" and have generated millions of dollars through recurring monthly charges. Over the past two years, daData-related third-party vendors enrolled over 800,000 telephone customers and generated more than $50 million in revenue.[117] As of April 2011, approximately 350,000 telephone customers were being charged by daData-related vendors on a monthly basis.[118] Between 2007 and 2010, MySnS-related vendors enrolled 1,201,460 telephone customers and generated $13 million in revenue.[119]

Hi Cindy,

I am emailing you to request a hearing for SB 138 – a bill that prohibits unauthorized third-party charges to landline telephone bills. Attached you will find the following:

- SB 138 Version R
- SB 138 Sponsor Statement
- SB 138 Sectional Analysis
- SB 138 back up – testimony from VT Attorney General on cramming
- SB 138 back up – US Senate Committee Report on cramming
- SB 138 back up – Samples of home/enterprise telephone bills
- SB 138 Fact sheet
- SB 138 Letters of support
- SB 138 memo re: changes to Version R

SB 138 has two committee recommendations: Senate Labor and Commerce and Judiciary. It was moved out of Labor and Commerce yesterday.

Thank you for taking the time to review and consider SB 138. Please don't hesitate to contact me if you have any questions or concerns.

S.B. 138 Protecting Alaskans From Unethical Billing Practices

Fact Sheet

- According to an investigation by the U.S. Senate Committee on Commerce, Science and Transportation, telephone companies have placed more than $10 billion worth of third-party charges on their customers' landline telephone bills over the past five years.

- Unauthorized third-party charges have been found on bills for residences, small businesses, nonprofits, corporations, government agencies, and educational institutions.

- The unauthorized charges "crammed" on telephone customer's bills are typically between $10 and $50. These charges, although relatively minor can quickly amount to significant losses for telephone customers.

- The intent of SB138 is to ensure that authorization for third-party charges and services is clearly obtained prior those charges being included on telephone bills.

- Obvious examples of cramming have been found on bills for deceased persons, the elderly, lines for fire alarms, elevators, and bank safes.

- Committee report shows evidence of third-party vendors operating out of fake offices with presidents who have no knowledge of their "companies."

- California, Illinois, Indiana, Kansas, Maryland, Minnesota, New Jersey, New York, Vermont, and Virginia have all passed laws banning cramming.

In Support of SB 138:
Protect Consumers from Tricks, Traps, and Hidden Fees

Unbeknownst to most consumers, it's not just the telephone company that can charge money through a telephone bill. What's more, most charges made by third-parties on telephone bills are scams—unauthorized charges tacked on and hidden in the small print in a practice often referred to as "cramming".

Across the nation, the practice nets about $2 billion each year in largely unauthorized or fraudulent fees, often through fly-by-night operations created solely to exploit the system, operating out of P.O. Boxes or non-existent offices.

Unfortunately, the systems set-up by telephone companies have failed to solve the problem. In fact, telephone companies profit from cramming by charging fees to the third-parties, generating substantial revenue.

Here in Alaska, we have an opportunity to nip this problem in the bud. SB 138 would help end the practice of "cramming" unauthorized third party fees onto telephone bills for landlines, and for those wireless companies over which the Regulatory Commission of Alaska has authority.

Tricks, traps, and hidden fees harm consumers and do nothing to support Alaska's economy. On behalf of our members, we strongly urge your support.

Sincerely,

Matt Wallace
Executive Director

Craig F. Graziano
Office of Consumer Advocate, Iowa Department of Justice
Prepared Testimony
Judiciary Committee, Alaska Senate
March 26, 2012

Thank you, Mr. Chairman and Members of the Committee. My name is Craig Graziano. I am an attorney with the Office of Consumer Advocate in the Iowa Department of Justice. I also chair the Consumer Protection Committee for the National Association of State Utility Consumer Advocates. I am very pleased to address you today regarding the experience in Iowa with respect to the cramming of unauthorized charges onto consumer phone bills.

In Iowa, we have had a statute and regulation on the books since 1999. They prohibit unauthorized changes in telecommunications service, including both third-party and first-party "cramming."[1] The statute authorizes the Iowa Utilities Board to assess civil monetary penalties up to $10,000 per violation.

The statute excludes wireless billings. As a result, our experience is largely confined to wireline billings. That is not to say the problem is confined to wireline billings. On the contrary, there is evidence nationally of its spread to wireless billings.[2]

Our office has had a steady enforcement effort in place for a decade, and I always go back to a statement our consultant made in our rule-making proceeding many years ago. She said: "The key point is to put in place a set of rules that will halt a fraudulent, unfair and deceptive practice. We can call them slamming and cramming and whatever we want, but we're dealing with classic consumer fraud, trying to get people to pay for something they haven't in fact bought."

Over the years, we have filed hundreds of petitions against scores of companies. Most of the cases have settled upon terms including a modest civil monetary penalty, typically $1,500 today. We think the penalties take the profit out of the offending practices. They also have a beneficial sentinel effect that extends beyond the individual company and throughout the industry. Since our effort began, the volume of complaints has declined markedly. Some types of complaints appear to have dried up entirely. Previously frustrated consumers have often expressed appreciation for our efforts.

Our experience shows that the problem is complicated. We've regularly seen complaints regarding recurring charges for such things as long distance, online yellow page, voicemail and

(July 13, 2011), pp. 9-10 (Florida Attorney General reached settlements with the four major wireless providers regarding unauthorized charges on wireless bills); *Verizon Wireless Data Usage Charges* (Consent Decree), 25 F.C.C.R. 15105 (FCC. 2010) (FCC reached consent decree with Verizon Wireless requiring refunds of data usage charges exceeding $50 million, $25 million voluntary payment to U.S. Treasury and compliance plan designed to eliminate cramming). There were news reports last month of thousands of complaints about charges for "mobile purchases" stemming from allegedly unsolicited and unwanted text messages from a company known as Love Genie Tips. "Look out for third-party charges on cellphone bill," *Palm Beach Post* (Feb. 24, 2012).

web hosting services. We've also seen complaints about charges for services that have little or nothing to do with telecommunications, such as a diet plan. In earlier years, we saw many complaints regarding allegedly bogus charges for individual long distance, collect, directory assistance and other types of calls. We have often seen complaints involving allegedly defective third-party verification recordings and allegedly bogus Internet sign-ups.

I've selected a few illustrative complaints. They only scratch the surface.

In one case,[3] a collect call was supposedly accepted on a fax line at a school at 4:00 a.m. on Sunday.

In a second case,[4] a series of calls from a sex hotline was supposedly received at the home of a 65-year old grandmother who lived alone. The company provided a voice recording supposedly showing that the call had been accepted by a male who identified himself as "Marcus Welby."

In a third case,[5] the consumer advised that a voice recording had been "doctored" to make it appear an authorization had been given when in fact an authorization had not been given. The consumer wrote:

> The tape is fraudulent. Kevin will swear that the recorded conversation never took place. The giveaway is that Kevin is project manager and head of the drafting department. He has never been or ever uses the term "administrative assistant" when referring to himself . . . . The tape [also] refers to "internet dial-up services." Why would we order "dial-up," when we have had high speed DSL for years?

In a recent federal court case in California, another company acknowledged that many of the voice recordings had been "spliced" or "otherwise falsified," apparently by telemarketers, most of whom were located overseas. Among other techniques, the telemarketers would digitally record the consumer's voice when the verifier was not on line, and then play the consumer's recorded voice in response to the verifier's questions when the consumer was not on line, in such a way that the call would classify as a valid sale. According to the evidence, there were tens of thousands of fraudulently manufactured sales, and by one study, 44 per cent of the recordings that had supposedly passed the TPV company's screens should have failed.[6]

In a fourth Iowa case,[7] the company had supposedly obtained a birth date as validation of an alleged Internet order. The consumer denied having placed the order. He advised that he graduated from high school the year before the supposed birth date. He also advised that the e-

[7]C-2009-0286.

mail address supposedly supplied by him as a part of the order was similarly incorrect. According to the company, the order nevertheless *passed* its validation test, because the IP address from which the order came was within 100 miles of the consumer's street address.

The Federal Communications Commission later issued an order proposing a forfeiture of $3,000,000 against this same company for alleged cramming violations of the same character.[8] What all of this tells us is that the company – and both the FCC's experience and our Iowa experience confirm there are other companies doing the same thing – instituted a supposed validation system that does not validate. Contrast a PIN number system in which, if I put in a wrong PIN number, the system bounces back "invalid PIN number," and the transaction is rejected rather than approved.

Our experience suggests that many consumers never notice the unauthorized charges and hence that complaints are the tip of an iceberg. In 2005, for example, we had eleven complaints against two companies, each disputing a charge between $5.00 and $8.00 for a single collect call. An investigation by the Federal Trade Commission later revealed a "massive" fraudulent billing scheme that collected more than $30 million in bogus collect call charges from millions of consumers.[9]

Before closing, I'd like to share two additional observations. First, it has long been my view that the states are the best forum in which to seek to stop the problem. They are close to the complainants. They often have the resources both to assist the victims and to institute enforcement proceedings. There is also a history on the role of the states. In the 1990s, state public utility commissions and state attorneys general, in actions affecting nearly 400,000 consumers, ordered carriers to pay at least $13.4 million in restitution and at least $4.1 million in penalties for cramming and slamming violations. That's according to the U.S. Government Accountability Office.[10] For reasons such as these, I think efforts such as yours are precisely what is needed most.

Lastly, it is important to be wary when you write exceptions into your statute, so as not to exclude the very things you are trying to reach. Twelve years ago, the Iowa Utilities Board wrote a rule excluding "acceptance of collect calls" from the Iowa definition of cramming. For many years, both the Board and our office thought this language excluded billings for collect calls from the definition of cramming in cases in which the calls were accepted and the charges thus authorized, but, and this is the important point, that billings for collects calls that were not accepted and for which the charges were not authorized fell within the definition of cramming and were therefore prohibited. I think that view accords with most views on the topic, including those of the Federal Trade Commission in the case of the massive $30 million collect call fraudulent billing scheme that I mentioned a moment ago. Last year, however, the Iowa Supreme Court held that the rule as written has the effect of removing collect call charges

altogether from the Iowa definition of cramming, whether or not the calls were accepted and the charges thus authorized.[11] Again, you want to be careful when you write exceptions so as not to end up excluding the very things you are trying to reach.

In summary, I think the goal should be to eradicate unauthorized charges on phone bills. I'd like to thank you again for inviting my testimony. I'd be happy to attempt to answer any questions.

The Honorable Hollis French, Chair
Senate Judiciary Committee
Alaska State Capitol, Room 417
Juneau, AK 99801-1182

RE: SB 138 (Wielechowski, Davis, Egan)—Support

Dear Chair French:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the Senate Judiciary Committee to support SB 138, authored by your Committee Vice-Chair Senator Bill Wielechowski and Senators Bettye Davis and Dennis Egan and co-sponsored by Senators Johnny Ellis and Joe Thomas.

Essentially, SB 138 would prohibit "cramming." Cramming is the practice of submitting or including unauthorized charges on a consumer's telephone bill. Examples of cramming include charges that are added without a clear description of the service provided (such as "monthly fee" and "service charge") and charges for services that the customer did not request or authorize (such as voice mail, caller ID, pay-per-call services, and club memberships)

SB 138 will help curb this deceptive marketing practice.

AARP recommends an "AYE" vote on SB 138.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

RE: CSSB 138

Dear Senator French,

Alaska Communications discourages further action on CSSB 138. However, if further action is taken by the Senate Judiciary Committee, Alaska Communications recommends a few amendments, which are attached to this letter.

If enacted, CSSB 138 would place new burdens on telecommunications providers that provide third party billing services. Alaska Communications opposes this legislation because there is no evidence of a problem in this area that needs fixing. We are not aware of any consumer rebellion tied to third party billing, we do not have a large in-box filled with complaints, and we are not aware of this being an issue for other telecommunications providers in Alaska. For these reasons, we see no need for legislation such as CSSB 138.

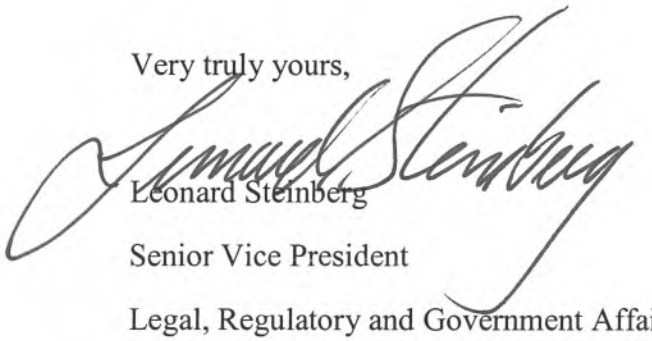
Alaska Communications does bill customers for third parties at the same time it bills for its own services. Customers do short pay bills and when they inform us of the reason we allocate the funds submitted appropriately. Too often, however, customers fail to explain why they bill is short paid or how to allocate the funds they submit. In the absence of any information from the customer, Alaska Communications applies a rational allocation of the funds between itself and the third parties. This can lead to nonpayment of telephone bills through no fault of the telephone provider.

Alaska Communications takes its responsibility to provide quality services very seriously. Customers too, however, need to be responsible and explain why they have short paid a bill and

how to allocate any funds submitted. Therefore, although Alaska Communications sees no need for this legislation at all, we submit the attached proposed amendment providing for customer responsibility for your consideration.

Please let me know if you would like additional information.

Very truly yours,



Leonard Steinberg

Senior Vice President

Legal, Regulatory and Government Affairs

CS for SB138 – Suggested Amendments

"An Act relating to the inclusion of the charges of a vendor of goods or services on the bills of certain telecommunications carriers; and adding an unlawful act to the Alaska Unfair Trade Practices and Consumer Protection Act."

***Section 1.**
Section 42.05.715 (b) add new subsection (5):

(5) Telecommunications carriers may recover the reasonable costs of implementing bill changes and other related costs associated with this section from the person or billing agent covered by this section.

Section 42.05.715(c) add new subsection (1):

(1) To invoke the non-discontinuance of service protection described in this subsection, a customer must inform the telecommunications carrier in writing that a billing dispute exists. A customer who makes a partial payment to the telecommunications carrier by subtracting a disputed amount must inform the telecommunications carrier in writing of that fact and instruct the telecommunications carrier on how to apply the payment. A customer's failure to prescribe payment application allows the telecommunications provider to apply payments in accordance with its standard practices. In this circumstance, payment delinquencies could prompt the discontinuation of telecommunications services.

***Section 3.**
Section 45.50.476(c)(4) add new subsection (C)

(C) Telecommunications carriers have no obligation to independently verify the accuracy of the information provided by the vendor of goods and services under this subsection.

SB140 Cathinone Bath Salts
Changes from Version B to Version I.

New Sections 1 and 2 were added to the bill to amend the penalties for the cathinone substances listed in the original bill.

In Section 1, sales, distribution, manufacture, and possession of 500 milligrams or more of the substances remain classified as Misconduct involving a Controlled Substance (MICS) in the 4th degree, a Class C felony.

In Section 2, possession of **under** 500 milligrams are classified as MICS in the 5th degree, an A misdemeanor.

In Section 3, a technical amendment was made by legislative legal drafters to transfer methicathinone from the list of Schedule 1 substances into Schedule 2, so that all the cathinone-related substances are listed in the same schedule.

Section 4 repeals the methicathinone listing in Schedule 1.

CS FOR SENATE BILL NO. 140(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS MEYER, GIESSEL, AND OLSON, Egan, McGuire, Wagoner, Huggins

A BILL

FOR AN ACT ENTITLED

"An Act classifying certain substances as schedule IIA controlled substances and providing penalties relating to those substances; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 11.71.040(a) is amended to read:

(a) Except as authorized in AS 17.30, a person commits the crime of misconduct involving a controlled substance in the fourth degree if the person

(1) manufactures or delivers any amount of a schedule IVA or VA controlled substance or possesses any amount of a schedule IVA or VA controlled substance with intent to manufacture or deliver;

(2) manufactures or delivers, or possesses with the intent to manufacture or deliver, one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a schedule VIA controlled substance;

(3) possesses

(A) any amount of a

(i) schedule IA **controlled substance;** or

(ii) IIA controlled substance **except a controlled substance listed in AS 11.71.150(e)(11) - (15);**

(B) 25 or more tablets, ampules, or syrettes containing a schedule IIIA or IVA controlled substance;

(C) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(i) three grams or more containing a schedule IIIA or IVA controlled substance except a controlled substance in a form listed in (ii) of this subparagraph;

(ii) 12 grams or more containing a schedule IIIA controlled substance listed in AS 11.71.160(f)(7) - (16) that has been sprayed on or otherwise applied to tobacco, an herb, or another organic material; **or**

(iii) 500 milligrams or more of a schedule IIA controlled substance listed in AS 11.71.150(e)(11) - (15);

(D) 50 or more tablets, ampules, or syrettes containing a schedule VA controlled substance;

(E) one or more preparations, compounds, mixtures, or substances of an aggregate weight of six grams or more containing a schedule VA controlled substance;

(F) one or more preparations, compounds, mixtures, or substances of an aggregate weight of four ounces or more containing a schedule VIA controlled substance; or

(G) 25 or more plants of the genus cannabis;

(4) possesses a schedule IIIA, IVA, VA, or VIA controlled substance

(A) with reckless disregard that the possession occurs

(i) on or within 500 feet of school grounds; or

(ii) at or within 500 feet of a recreation or youth center; or

(B) on a school bus;

(5) knowingly keeps or maintains any store, shop, warehouse, dwelling, building, vehicle, boat, aircraft, or other structure or place that is used for keeping or distributing controlled substances in violation of a felony offense under this chapter or AS 17.30;

(6) makes, delivers, or possesses a punch, die, plate, stone, or other thing that prints, imprints, or reproduces a trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of these upon a drug, drug container, or labeling so as to render the drug a counterfeit substance;

(7) knowingly uses in the course of the manufacture or distribution of a controlled substance a registration number that is fictitious, revoked, suspended, or issued to another person;

(8) knowingly furnishes false or fraudulent information in or omits material information from any application, report, record, or other document required to be kept or filed under AS 17.30;

(9) obtains possession of a controlled substance by misrepresentation, fraud, forgery, deception, or subterfuge; or

(10) affixes a false or forged label to a package or other container containing any controlled substance.

*** Sec. 2.** AS 11.71.050(a) is amended to read:

(a) Except as authorized in AS 17.30, a person commits the crime of misconduct involving a controlled substance in the fifth degree if the person

(1) manufactures or delivers, or possesses with the intent to manufacture or deliver, one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than one ounce containing a schedule VIA controlled substance;

(2) possesses

(A) less than 25 tablets, ampules, or syrettes containing a schedule IIIA or IVA controlled substance;

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than

(i) three grams containing a schedule IIIA or IVA controlled substance except a controlled substance in a form listed in (ii) of this subparagraph;

(ii) 12 grams but more than six grams containing a schedule IIIA controlled substance listed in AS 11.71.160(f)(7) - (16) that has been sprayed on or otherwise applied to tobacco, an herb, or another organic material; **or**

(iii) 500 milligrams containing a schedule IIA controlled substance listed in AS 11.71.150(e)(11) - (15);

(C) less than 50 tablets, ampules, or syrettes containing a schedule VA controlled substance;

(D) one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than six grams containing a schedule VA controlled substance; or

(E) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a schedule VIA controlled substance; or

(3) fails to make, keep, or furnish any record, notification, order form, statement, invoice, or information required under AS 17.30.

* **Sec. 3.** AS 11.71.150(e) is amended to read:

(e) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the nervous system:

(1) amphetamine, its salts, optical isomers, and salts of its optical isomers;

(2) methamphetamine, its salts, isomers, and salts of its isomers;

(3) methylphenidate;

(4) phenmetrazine and its salts;

(5) fenethylline;

(6) N-ethylamphetamine;

(7) 3,4-methylenedioxy-N-ethylamphetamine, also known as N-ethyl-

alpha-methyl-3,4(methylenedioxy)phenethylamine, N-ethyl MDA, MDE, and MDEA;

(8) N-hydroxy-3,4-methylenedioxyamphetamine, also known as N-hydroxy-alpha-methyl-3,4-(methylenedioxy)phenethylamine, and N-hydroxy MDA;

(9) 4-methylaminorex, also known as 2-amino-4-methyl-5-phenyl-2-oxazoline;

(10) N,N-dimethylamphetamine, also known as N,N,alpha-trimethylybenzencethaneamine or N,N,alpha-trimethylphenethyline, its salts, optical isomers, and salts of optical isomers**;**

(11) cathinone;

(12) 2-methylamino-1-phenylpropan-1-one, also known as methcathinone and cat, its salts, optical isomers, and salts of isomers;

CS FOR SENATE BILL NO. 140(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS MEYER, GIESSEL, AND OLSON, Egan

A BILL

FOR AN ACT ENTITLED

"An Act classifying certain substances as schedule IIA controlled substances and providing penalties relating to those substances; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.71.040(a) is amended to read:

(a) Except as authorized in AS 17.30, a person commits the crime of misconduct involving a controlled substance in the fourth degree if the person

(1) manufactures or delivers any amount of a schedule IVA or VA controlled substance or possesses any amount of a schedule IVA or VA controlled substance with intent to manufacture or deliver;

(2) manufactures or delivers, or possesses with the intent to manufacture or deliver, one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a schedule VIA controlled substance;

(3) possesses

(A) any amount of a

(i) schedule IA **controlled substance;** or

(ii) IIA controlled substance **except a controlled substance listed in AS 11.71.150(e)(11) - (15);**

(B) 25 or more tablets, ampules, or syrettes containing a schedule IIIA or IVA controlled substance;

(C) one or more preparations, compounds, mixtures, or substances of an aggregate weight of

(i) three grams or more containing a schedule IIIA or IVA controlled substance except a controlled substance in a form listed in (ii) of this subparagraph;

(ii) 12 grams or more containing a schedule IIIA controlled substance listed in AS 11.71.160(f)(7) - (16) that has been sprayed on or otherwise applied to tobacco, an herb, or another organic material; **or**

(iii) 500 milligrams or more of a schedule IIA controlled substance listed in AS 11.71.150(e)(11) - (15);

(D) 50 or more tablets, ampules, or syrettes containing a schedule VA controlled substance;

(E) one or more preparations, compounds, mixtures, or substances of an aggregate weight of six grams or more containing a schedule VA controlled substance;

(F) one or more preparations, compounds, mixtures, or substances of an aggregate weight of four ounces or more containing a schedule VIA controlled substance; or

(G) 25 or more plants of the genus cannabis;

(4) possesses a schedule IIIA, IVA, VA, or VIA controlled substance

(A) with reckless disregard that the possession occurs

(i) on or within 500 feet of school grounds; or

(ii) at or within 500 feet of a recreation or youth center; or

(B) on a school bus;

(5) knowingly keeps or maintains any store, shop, warehouse, dwelling, building, vehicle, boat, aircraft, or other structure or place that is used for keeping or distributing controlled substances in violation of a felony offense under this chapter or AS 17.30;

(6) makes, delivers, or possesses a punch, die, plate, stone, or other thing that prints, imprints, or reproduces a trademark, trade name, or other identifying mark, imprint, or device of another or any likeness of any of these upon a drug, drug container, or labeling so as to render the drug a counterfeit substance;

(7) knowingly uses in the course of the manufacture or distribution of a controlled substance a registration number that is fictitious, revoked, suspended, or issued to another person;

(8) knowingly furnishes false or fraudulent information in or omits material information from any application, report, record, or other document required to be kept or filed under AS 17.30;

(9) obtains possession of a controlled substance by misrepresentation, fraud, forgery, deception, or subterfuge; or

(10) affixes a false or forged label to a package or other container containing any controlled substance.

* **Sec. 2.** AS 11.71.050(a) is amended to read:

(a) Except as authorized in AS 17.30, a person commits the crime of misconduct involving a controlled substance in the fifth degree if the person

(1) manufactures or delivers, or possesses with the intent to manufacture or deliver, one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than one ounce containing a schedule VIA controlled substance;

(2) possesses

(A) less than 25 tablets, ampules, or syrettes containing a schedule IIIA or IVA controlled substance;

(B) one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than

(i) three grams containing a schedule IIIA or IVA controlled substance except a controlled substance in a form listed in (ii) of this subparagraph;

(ii) 12 grams but more than six grams containing a schedule IIIA controlled substance listed in AS 11.71.160(f)(7) - (16) that has been sprayed on or otherwise applied to tobacco, an herb, or another organic material; **or**

(iii) 500 milligrams containing a schedule IIA controlled substance listed in AS 11.71.150(e)(11) - (15);

(C) less than 50 tablets, ampules, or syrettes containing a schedule VA controlled substance;

(D) one or more preparations, compounds, mixtures, or substances of an aggregate weight of less than six grams containing a schedule VA controlled substance; or

(E) one or more preparations, compounds, mixtures, or substances of an aggregate weight of one ounce or more containing a schedule VIA controlled substance; or

(3) fails to make, keep, or furnish any record, notification, order form, statement, invoice, or information required under AS 17.30.

*** Sec. 3.** AS 11.71.150(e) is amended to read:

(e) Schedule IIA includes, unless specifically excepted or unless listed in another schedule, any material, compound, mixture, or preparation which contains any quantity of the following substances having a stimulant effect on the nervous system:

(1) amphetamine, its salts, optical isomers, and salts of its optical isomers;

(2) methamphetamine, its salts, isomers, and salts of its isomers;

(3) methylphenidate;

(4) phenmetrazine and its salts;

(5) fenethylline;

(6) N-ethylamphetamine;

(7) 3,4-methylenedioxy-N-ethylamphetamine, also known as N-ethyl-

alpha-methyl-3,4(methylenedioxy)phenethylamine, N-ethyl MDA, MDE, and MDEA;

(8) N-hydroxy-3,4-methylenedioxyamphetamine, also known as N-hydroxy-alpha-methyl-3,4-(methylenedioxy)phenethylamine, and N-hydroxy MDA;

(9) 4-methylaminorex, also known as 2-amino-4-methyl-5-phenyl-2-oxazoline;

(10) N,N-dimethylamphetamine, also known as N,N,alpha-trimethylybenzencethaneamine or N,N,alpha-trimethylphenethyline, its salts, optical isomers, and salts of optical isomers**;**

(11) cathinone;

(12) 2-methylamino-1-phenylpropan-1-one, also known as methcathinone and cat, its salts, optical isomers, and salts of isomers;

(13) 4-methylmethcathinone, also known as mephedrone, its salts, isomers, and salts of isomers;

(14) 3,4-methylenedioxypyrovalerone, also known as MDPV, its salts, isomers, and salts of isomers;

(15) substituted cathinones, including any compound, except bupropion or a compound listed in another schedule, structurally derived from 2-amino-1-phenyl-1-propanone by modification in any of the following ways:

(A) by substitution in the phenyl ring to any extent with alkyl, alkoxy, alkylenedioxy, haloalkyl, hydroxyl, or halide substituents, whether or not further substituted in the phenyl ring by one or more other univalent substituents;

(B) by substitution at the 3-position with an alkyl substituent;

(C) by substitution at the nitrogen atom with alkyl or dialkyl groups or by inclusion of the nitrogen atom in a cyclic structure.

*** Sec. 4.** AS 11.71.140(b)(5) is repealed.

*** Sec. 5.** This Act takes effect immediately under AS 01.10.070(c).

MEMORANDUM

TO: Legislative Legal

FROM: Cindy Smith

RE: SB 140 Cathinone Bath Salts 27- LS1032\B

Please prepare a CS that makes the following changes:

1. Establish a separate A misdemeanor penalty for possession of 500 milligrams or less.
2. Incorporate the attached language from the Crime Lab into the new lists for cathinone.

Call me at 465-6641 if you have any questions.

SPONSOR STATEMENT FOR SB 140

"An Act classifying certain synthetic cathinones as schedule IIA controlled substances; and providing for an effective date."

SB 140 would classify certain synthetic cathinones, commonly known as synthetic cocaine and marketed as 'bath salts,' as a schedule IIA controlled substance.

Marketed as bath salts or plant food with names like 'Meow-Meow,' Vanilla Sky,' 'Ivory Snow,' and 'Bliss,' synthetic cathinones are inexpensive, accessible, and undetectable in most drug tests. Many users of this drug use them in combination with or as a legal alternative to cocaine, ecstasy or methamphetamines.

Drug effects include impaired perception, reduced motor control, disorientation, extreme paranoia and violent episodes. Synthetic cathinones are abused mainly by snorting and oral ingestion. The U.S. Drug Enforcement Administration, the U.S. Military, and the Municipality of Anchorage have all taken action to control or prohibit use of this drug.

According to the National Council of State Legislatures, as of October 24, 2011 there are 33 states that have adopted laws or have departmental rules banning chemical compounds associated with 'bath salts.' Seven states have legislation pending.

Should SB 140 pass, it would be unlawful throughout the State of Alaska to sell, use, purchase, possess, manufacture, transport or deliver synthetic cathinones, the chemical compounds which are being marketed as 'bath salts' and synthetic cocaine.

January 24, 2012

Senator Kevin Meyer
Alaska State Capitol, Room 103
Juneau, Alaska 99801

Re: Letter of Support for SB 140

Dear Senator Meyer,

The Advisory Board on Alcoholism and Drug Abuse appreciates your recognition of the need to regulate cathinone and similar substances marketed as "bath salts." These substances pose a serious risk to the health and welfare of Alaskans and should be Schedule IIA controlled substances.

Cathinone, methcathinone, and methylenedioxypyrovalerone (MPDV) produce amphetamine-like effects. Commonly marketed as "bath salts," these drugs can be inhaled, ingested, injected, or smoked. The expected effect is a sort of euphoria, but these chemicals also have dangerous effects. "Bath salts" substances have been reported to cause extreme anxiety and paranoia, delusional thinking, visual and auditory hallucinations leading to violent outbursts, self-mutilation, and suicidal thoughts and actions.

Nationwide, there were 6,072 calls to poison centers about designer drugs labeled as "bath salts" in 2011.[1] In 2010, that number was 303 calls.[2] This reflects the rapid increase in use of these synthetic drugs in the United States. In response, the U.S. Drug Enforcement Administration invoked its emergency scheduling powers in September 2011 to make possession and sale of mephedrone, MDPV, and methylone (common "bath salts" substances") illegal. This emergency regulation will expire in September 2012. State and city governments across the country are taking similar action through emergency powers, ordinances, and legislation in an effort to protect health and safety.[3]

The Advisory Board on Alcoholism and Drug Abuse supports SB 140 and we appreciate your work on behalf of Alaskans.

Sincerely,

Robert Coghill, Jr. Chairman
Advisory Board on Alcoholism and Drug Abuse

---

[1] American Association of Poison Control Centers report on "closed human exposures calls to poison centers about exposures to bath salts as of December 31, 2011," updated January 5, 2012. Available online at http://www.aapcc.org/dnn/Portals/0/Bath%20Salts%20Data%20for%20Website%201.5.2012.pdf.

[2] *Id.*

[3] Nevada's Board of Pharmacy just restricted "bath salts" substances through its emergency powers in January, 2012. Maine, Louisiana, Kentucky, Ohio, Delaware, and nearly three-quarters of U.S. states have acted to prohibit sale and/or possession of these substances. The Municipality of Anchorage passed an ordinance in October 2011 to prohibit manufacture, sale, and possession of these substances.

MUNICIPALITY OF ANCHORAGE

Office of the Mayor

Phone: 907-343-7100
FAX: 907-343-7180

Mayor Dan Sullivan

January 25, 2012

The Honorable Kevin Meyer
Alaska State Legislature
State Capitol
Juneau, AK 99801

Re: Senate Bill 140

Dear Senator Meyer,

Thank you for introducing Senate Bill 140, *"An Act classifying certain substances as schedule IIA controlled substances; and providing for an effective date."*

The Municipality of Anchorage fully supports the passage of SB 140. The use of cathinone and its derivatives (commonly referred to as "bath salts") has quickly become a significant health and public safety issue.

Due to the huge range in potency between the various compounds and products, municipal first responders have encountered users of these drugs having severe reactions, including from bizarre and dangerous behavior to unconsciousness. Users who operate machinery, especially motor vehicles, have had significant accidents and present a danger to others that is on par with operating under the influence of alcohol.

In response, the Municipality has enacted its own local code, but does not have the jurisdiction to deal with the influx of the drug on a state-wide basis or impose the kinds of meaningful criminal sentences that are needed to stem the manufacture, distribution, and sale of these drugs.

Thank you again for introducing this important legislation.

Sincerely,

Dan Sullivan
Mayor

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB140
2012 LEGISLATIVE SESSION

Analysis

This proposed legislation would add certain synthetic substances to the Schedule IIA list of statutorily controlled substances and provide for an effective date.

The Scientific Crime Detection Laboratory (crime lab) provides analysis of suspected controlled substances, issues reports, and provides expert testimony for the State of Alaska. The crime lab currently receives an average of ten submittals each month from law enforcement referencing "suspected bath salts." If these substances become controlled, the Chemistry Section of the lab can expect some change in requests for laboratory service, but is unable to determine how significant that change will be; whether it will remain roughly ten submittals per month or if it will increase.

These substances are unlike most that have been previously criminalized in that they are not "street drugs" but legally contrived and sold online via the internet and locally over-the-counter through tobacco shops. Because actual fiscal impact is unknown and difficult to determine, the crime lab is not requesting any additional funds or positions at this time but also does not wish to leave a matter the crime laboratory cannot fully assess without the reality of possible, though not probable, future fiscal impact.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 140
2012 LEGISLATIVE SESSION

Analysis

This legislation classifies certain substances as Schedule IIA controlled substances.

Currently, possession of a schedule IIA is a Class C felony with a possible sentence of 0-2 years. Manufacturing or delivering a schedule IIA controlled substance is a Class B felony with a possible sentence of 0-4 years. The current average daily cost to house an inmate is $134.90. Therefore, housing an offender could cost the department anywhere from $0.0 (no time served) to $196,954.00 (for a 4-year sentence).

DOC analyzed the impacts of similar laws passed in recent years (Example, HB 7 - Synthetic Marijuana), we have found zero convictions and therefore zero offenders being housed in DOC facilities.

The department is currently unable to quantify the fiscal impacts of this bill, as we cannot predict the number of offenses that will occur. Should this legislation pass, the department will closely monitor the potential future fiscal impacts.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 140

Analysis

SB 140 adds new substances to Schedule IIA of Alaska's controlled substances. These substances are currently not controlled. They are sometimes referred to as synthetic cocaine or bath salts. It is difficult to predict the number of cases that would be filed after these substances are included in Alaska's schedules of controlled substances but the number should not be great.

Schedule IIA currently includes, among other substances, amphetamines and methamphetamines, which are fairly dangerous substances.

The fiscal impact is zero.

Mr. Dym,
Ryan from Rep. Stoltze's office had a change to HB 253 regarding page 2, line 11.

Current version:

(12) methcathinone, its salts, optical isomers, and salts of optical isomers;

Changes:
(12) 2-methylamino-1-phenylpropan-1-one, also known as methcathinone and cat, its salts, optical isomers, and salts of optical isomers;

I assume that this is a change you agree with. If so, we will change the Senate version as well. If it is NOT a change you agree with, please let me know immediately.

Thank you,
Christine

Subject: Re: SB 140 -Friday

Hi Lorna,

I don't think I can make it to the hearing on SB 140, I am sending you my written testimony--if you can forward it to them I would appreciate it. Becky

Dear Senate Judiciary Committee Members:
Senator Hollis French
Senator Bill Wielechowski
Senator Joe Paskvan
Senator Lesil McGuire
Senator John Coghill

I would like to share some thoughts concerning SB 140.
I am a concerned community member of Kodiak. I have been a foster parent of teenage boys and currently my husband works with teens that are struggling to find their way in society- hence they are making very poor choices that affect them personally, their family and their community. We have seen first hand the affects of drugs/ synthetics and alcohol- its negative affects on youth, families and communities.

1. I would like to know if SB 140 is going to provide means for state agencies to test for synthetics, bath salts and the like? We have found that agencies do not want to or can not afford to test for these drugs. Once youth know they are not going to be tested they will use the drugs all the more, and whats the point of spending the money to make something illegal if we are not going to take the steps to follow thru. If its going to be illegal agencies like Juvenile Probation Officers, State Troopers, hospitals, etc should be required to test for them and Agencies Directors should not be allowed to deny the test due to funding.

2. There needs to be some type of law that allows Police, State Troopers, City and Borough governments to deal with Adult Entertainment shops. This is a serious problem in Kodiak. We have a shop that sells synthetics to minors. Along with this SB 140 needs to be written in such a way that it

covers promotion, advertisement, packaging, and ingredients. Currently, when packaging is changed or ingredients are altered laws become null and void and the drug is back on the market. We don't have time for new laws to be developed each time a new synthetic drug is discovered, we dont have time to wait for new testing laws to be approved. Can SB 140 be written is such a way that it covers future changes to Bath Salts or any other synthetic that is developed?

3. I would like to see funding and grant monies be put in place for communities to provide training for parents, schools, assemblies, organizations, youth programs for at risk teens and pre teens, afterschool clubs etc. These funds may already be in place but there seems to be a serious lack of current information available to community members. I see first hand how parents don't know what resources are available to them or where to go to find out the information they need to help succeed in the healthy fight for their child/teens life.

Thank you for all your doing, your hard work is appreciated.

Sincerely,
Rebecca Luther

CS FOR SENATE BILL NO. 151(JUD)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE JUDICIARY COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS MEYER, Hoffman, Dyson, Menard, Paskvan, Egan, Davis, Ellis, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to mitigation at sentencing in a criminal case for a defendant found by the court to have been affected by a fetal alcohol spectrum disorder."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 12.55.155(d) is amended to read:

(d) The following factors shall be considered by the sentencing court if proven in accordance with this section, and may allow imposition of a sentence below the presumptive range set out in AS 12.55.125:

(1) the offense was principally accomplished by another person, and the defendant manifested extreme caution or sincere concern for the safety or well-being of the victim;

(2) the defendant, although an accomplice, played only a minor role in the commission of the offense;

(3) the defendant committed the offense under some degree of duress, coercion, threat, or compulsion insufficient to constitute a complete defense, but that

significantly affected the defendant's conduct;

(4) the conduct of a youthful defendant was substantially influenced by another person more mature than the defendant;

(5) the conduct of an aged defendant was substantially a product of physical or mental infirmities resulting from the defendant's age;

(6) in a conviction for assault under AS 11.41.200 - 11.41.220, the defendant acted with serious provocation from the victim;

(7) except in the case of a crime defined by AS 11.41.410 - 11.41.470, the victim provoked the crime to a significant degree;

(8) before the defendant knew that the criminal conduct had been discovered, the defendant fully compensated or made a good faith effort to fully compensate the victim of the defendant's criminal conduct for any damage or injury sustained;

(9) the conduct constituting the offense was among the least serious conduct included in the definition of the offense;

(10) the defendant was motivated to commit the offense solely by an overwhelming compulsion to provide for emergency necessities for the defendant's immediate family;

(11) after commission of the offense for which the defendant is being sentenced, the defendant assisted authorities to detect, apprehend, or prosecute other persons who committed an offense;

(12) the facts surrounding the commission of the offense and any previous offenses by the defendant establish that the harm caused by the defendant's conduct is consistently minor and inconsistent with the imposition of a substantial period of imprisonment;

(13) the defendant is convicted of an offense specified in AS 11.71 and the offense involved small quantities of a controlled substance;

(14) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the distribution of a controlled substance, other than a schedule IA controlled substance, to a personal acquaintance who is 19 years of age or older for no profit;

(15) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the possession of a small amount of a controlled substance for personal use in the defendant's home;

(16) in a conviction for assault or attempted assault or for homicide or attempted homicide, the defendant acted in response to domestic violence perpetrated by the victim against the defendant and the domestic violence consisted of aggravated or repeated instances of assaultive behavior;

(17) except in the case of an offense defined by AS 11.41 or AS 11.46.400, the defendant has been convicted of a class B or C felony, and, at the time of sentencing, has successfully completed a court-ordered treatment program as defined in AS 28.35.028 that was begun after the offense was committed;

(18) except in the case of an offense defined under AS 11.41 or AS 11.46.400 or a defendant who has previously been convicted of a felony, the defendant committed the offense while suffering from a mental disease or defect as defined in AS 12.47.130 that was insufficient to constitute a complete defense but that significantly affected the defendant's conduct;

(19) the defendant is convicted of an offense under AS 11.71, and the defendant sought medical assistance for another person who was experiencing a drug overdose contemporaneously with the commission of the offense;

(20) except in the case of an offense defined under AS 11.41 or AS 11.46.400, the defendant committed the offense while suffering from a condition diagnosed as a fetal alcohol spectrum disorder, the fetal alcohol spectrum disorder substantially impaired the defendant's judgment, behavior, capacity to recognize reality, or ability to cope with the ordinary demands of life, and the fetal alcohol spectrum disorder, though insufficient to constitute a complete defense, significantly affected the defendant's conduct; in this paragraph, "fetal alcohol spectrum disorder" means a condition of impaired brain function in the range of permanent birth defects caused by maternal consumption of alcohol during pregnancy.

MEMORANDUM

March 19, 2012

TO: Leg Legal

FROM: Cindy Smith, Sen. French

RE: Committee CS for SB 151 LS1132\O

Please prepare a Judiciary CS for SB 151, starting with the \O version, incorporating the following changes:

1. On page 2, at lines 13-14 delete language in bold ("and except as provided by (20) of this subsection,")

2. Also on page 2, at line 21, after the number (20) add the words "except in the case of an offense defined under AS 11.41, or AS 11.46.400"

3. Also on page 2, at line 29, delete all language after the word "pregnancy".

I need this CS for a meeting on Wednesday, March 21.

(15) the defendant is convicted of an offense specified in AS 11.71 and the offense involved the possession of a small amount of a controlled substance for personal use in the defendant's home;

(16) in a conviction for assault or attempted assault or for homicide or attempted homicide, the defendant acted in response to domestic violence perpetrated by the victim against the defendant and the domestic violence consisted of aggravated or repeated instances of assaultive behavior;

(17) except in the case of an offense defined by AS 11.41 or AS 11.46.400, the defendant has been convicted of a class B or C felony, and, at the time of sentencing, has successfully completed a court-ordered treatment program as defined in AS 28.35.028 that was begun after the offense was committed;

(18) except in the case of an offense defined under AS 11.41 or AS 11.46.400 or a defendant who has previously been convicted of a felony, **and, ~~except as provided by (20) of this subsection,~~** the defendant committed the offense while suffering from a mental disease or defect as defined in AS 12.47.130 that was insufficient to constitute a complete defense but that significantly affected the defendant's conduct;

(19) the defendant is convicted of an offense under AS 11.71, and the defendant sought medical assistance for another person who was experiencing a drug overdose contemporaneously with the commission of the offense;

except AS 11.41 or 11.46.400 -

(20) the defendant committed the offense while suffering from a condition diagnosed as a fetal alcohol spectrum disorder, the fetal alcohol spectrum disorder substantially impaired the defendant's judgment, behavior, capacity to recognize reality, or ability to cope with the ordinary demands of life, and the fetal alcohol spectrum disorder, though insufficient to constitute a complete defense, significantly affected the defendant's conduct; in this paragraph, "fetal alcohol spectrum disorder" means a condition of impaired brain function in the range of permanent birth defects caused by maternal consumption of alcohol during pregnancy, ~~as determined by a~~ neuropsychological examination.

Law

DRAFT
SB 151

* **Section 1.** AS 12.55.155(d)(18) is amended to read:

(18) except in the case **of a** [OF AN OFFENSE DEFINED UNDER AS 11.41 OR AS 11.46.400 OR A] defendant who has previously been convicted of a felony, the defendant committed the offense while suffering from a mental disease or defect as defined in AS 12.47.130 that was insufficient to constitute a complete defense but that significantly affected the defendant's conduct;

* **Sec. 2.** AS 12.55.155(d) is amended by adding a new paragraph to read:

(20) except in the case of a defendant who has previously been convicted of a felony, the defendant committed the offense

(A) while suffering from a condition diagnosed as a fetal alcohol spectrum disorder;

(B) the fetal alcohol spectrum disorder substantially impairs the defendant's judgment, behavior, capacity to recognize reality, or ability to cope with the ordinary demands of life; and

(C) the fetal alcohol spectrum disorder, though insufficient to constitute a complete defense, significantly affected the defendant's conduct.

* **Sec. 3.** AS 12.55.185 is amended by adding a new paragraph to read:

(20) "fetal alcohol spectrum disorder" means a disorder in the range of permanent birth defects caused by maternal consumption of alcohol during pregnancy, as determined by a neuropsychological examination.

Subject: SB 151

Hello, Cindy!
I understand that Teri Tibbett is talking with ycu about SB 151 and that my name came up.

If we need to talk over the weekend, any time Saturday night or Sunday (except 10:30-noon and 2:00-3:00) would be great. Monday morning would be even better: between 8:30 and 10:15, 11:15-noon, 3:30-4:00 would all work subject to more hearings that might appear like magic on my calendar!

My cell is 907.878.2001. Office phone is 907.852.4800, when recorded message starts, dial 259 and you will skip the message and go right to my phone.

I understand that one of the issues is whether to retain the exception to the mitigating factor for people that have a prior felony. This is actually a big deal in the context of the "Smart Justice" purposes of the bill. FASD-affected persons can easily run up felony convictions for silly property crimes presenting little risk to public safety. I have a great example I can talk with you about from Wainwright. The way presumptive sentencing works, the minimum presumptive sentence jumps substantially if there are one or more prior felonies. If the exception for persons with prior felonies remains in, the potential savings to the state and the humanity of reducing jail time and increasing community supervision will be greatly reduced.

Have a good weekend! It's -30 with -45 windchill today. It's also the "solstice" at Barrow. We are having 12 hours of daylight today.

Mike Jeffery

SB 151 - Inclusion of FASD as a Mitigating Factor

The Need for SB 151

Individuals diagnosed with a fetal alcohol spectrum disorder (FASD) are disproportionately represented within Alaska's criminal justice system. The intent underlying Alaska's sentencing structure – that people will modify their behaviors based on the criminal justice system's response to their crimes – is not met when applied to individuals with FASD. These disabilities manifest as deficits in executive function, resulting in impaired adaptive behavior, memory difficulties, an inability to plan, and a failure to recognize the consequences of actions. In the interest of justice, it is important to take these deficits into account during sentencing. Neither the offender nor society benefits from holding individuals with FASD to community standards that they cannot possibly attain given their impairments.

SB 151 fulfills a recommendation adopted by the Alaska Criminal Justice Assessment Commission: "The legislature should create a statutory mitigating factor for use at criminal sentencing, recognizing when the wrongful conduct was substantially affected by an organic brain disorder." [1]

A draft resolution being proposed by the Commission on Youth At Risk of the American Bar Association for consideration at this year's annual ABA meeting states: "... the American Bar Association urges lawyers and judges, as well as bar associations and law school clinical programs, to support training that includes law school law enforcement, and legal/judicial education curricula on enhanced awareness of the child and adult disability of Fetal Alcohol Spectrum Disorders (FASD) and its impact on individuals in the child welfare, juvenile justice, and adult criminal justice systems, and that they work with medical, mental health, and FASD disability experts to promote: ... (d) applying FASD as a mitigating factor in the mitigation of juvenile justice and criminal sentencing ... and consideration of alternatives to incarceration that reduce recidivism."

Overview of the changes proposed in SB 151

SB 151 proposes to allow FASD as a mitigating factor for sentencing in certain cases where there is *clear and convincing* evidence that a "defendant committed an offense while suffering from a condition diagnosed as a fetal alcohol spectrum disorder, the fetal alcohol spectrum disorder substantially impaired the defendant's judgment, behavior, capacity to recognize reality, or ability to cope with the ordinary demands of life, and the fetal alcohol spectrum disorder, though insufficient to constitute a complete defense, significantly affected the defendant's conduct."

SB 151 would, for the purposes of the subsection on mitigating factors, define fetal alcohol spectrum disorder as any "a condition of impaired brain function in the range of permanent birth defects caused

[1] Alaska Criminal Justice Assessment Commission (2000). *Final Report.* Retrieved October 12, 2010 from www.hss.ajc.state.ak.us/reports/CJAC Final 2004.pdf, at p.71.

3.19.12

by maternal consumption of alcohol during pregnancy *as determined by a physician or interdisciplinary team using current FASD diagnostic guidelines*."

The Alaska FASD Partnership and members of the Partnership's legal issues workgroup support removing limiting language from the current statute that creates an "exception" to the application of "mental disease or defect" as a mitigating factor for "offenses against a person" or if the defendant was previously convicted of a felony.

The workgroup suggests that this limiting language, which only applies to the mitigating factor related to individuals with a "mental disease or defect" could be discriminatory. None of the other 19 mitigating factors currently in statute have this limiting language.

David Fleurant, Executive Director of the Disability Law Center of Alaska, who participates in the FASD legal issues workgroup, suggests that the current statute appears to discriminate against individuals with disabilities in the application of mitigating factors "for no rational purpose. No other state which employs 'mental disease or defect' as a mitigating factor limits its application in such a manner."

In light of how FASD adversely impacts an individual's executive function, a significant percentage of the convictions against individuals with FASD involve offenses against the person and/or are committed by felons who are cycling through the criminal justice system. With the limiting language, the state is far less likely to "catch" a person with FASD who is cycling through the corrections system. Therefore, the Partnership and the legal issues workgroup of the Partnership support removing this limiting language from the statute so as to achieve the intended goal of SB 151.

The legislation *DOES NOT*:

1) *require* a judge to use the mitigating factor;
2) *automatically* adjust a presumptive sentence; the defendant would have to prove by *clear and convincing evidence* 1) that he or she has a fetal alcohol spectrum disorder and 2) that the condition "significantly affected the defendant's conduct" before the judicial officer can consider the possibility of adjusting the presumptive sentence; or
3) The goal is not a "get out of jail free" card, but an attempt to be "smarter" within the justice system to better direct people who have impaired brain function to services both within and after release from the criminal justice system.

What are mitigating factors?

The Legislature has decided in the presumptive sentencing law that judges should give jail time within certain ranges in all felonies (with the exception of "class C felonies" where the minimum presumptive term is 0 years). The amount of the presumptive term depends on the severity of the crime and whether or not a defendant has prior felonies. There are 34 statutory aggravating factors that could result in a sentence above the presumptive range, if proved by clear and convincing evidence. A judge must sentence a person to at least the minimum presumptive term unless a "mitigating factor" is shown by clear and convincing evidence. There are 19 statutory mitigating factors. With the current mental disease or defect mitigating factor, the defendant must *also* show by clear and convincing evidence that the condition "significantly affected the defendant's conduct." The proposed fetal alcohol spectrum disorder mitigating factor also requires proof by clear and convincing evidence that the condition "significantly affected the defendant's conduct" before a judge could consider it. If the required showing has been made for any mitigating factor, it is legally possible for the judge to sentence below the minimum term (but if the minimum term is more than 4 years, the lower limit is half the minimum presumptive term).

There are special rules when there is a factor in a case that does not fit within the statutory list but which is so important in a case that it would be manifestly unjust to sentence a person without considering the factor. If the sentencing judge finds that such a "non statutory mitigating factor" exists, then the judge must refer the case to a three judge sentencing panel. If at least two judges on the panel agree, the panel can sentence with the same lower limits applicable to a statutory mitigating factor. If the panel does not agree, the case is referred back to the original judge to impose at least the minimum presumptive term. The "three judge panel" method is very cumbersome, time consuming and expensive. SB 151 is a "statutory mitigating factor" and would not require any referral to a three judge sentencing panel.

What are Fetal Alcohol Spectrum Disorders?

FASD is not a medical diagnosis, but an umbrella term for the range of diagnoses associated with damage caused by maternal alcohol consumption during pregnancy. These medical diagnoses can include Fetal Alcohol Syndrome (FAS), Partial Fetal Alcohol Syndrome (PFAS), Alcohol-Related Birth Defects (ARBD), and Alcohol-Related Neurodevelopmental Disorder (ARND). Note that the term, Fetal Alcohol Effects (FAE), is no longer commonly used, having been replaced by the PFAS, ARBD and ARND diagnoses.

Each diagnosis has its own symptoms and attributes, but common among all the diagnoses is permanent, life-long brain damage – often affecting decision-making, judgment and impulse control. FASD is a brain-based disorder, similar to autism, traumatic and acquired brain injury, and other cognitive impairments.

FASDs appear in individuals differently. Some alcohol-exposed individuals may exhibit impulsivity, hyperactivity and risky behaviors. Some have difficulties with memory, while others have very good memories. Some have low IQs, while others have normal IQs.

Experts report that the different presentations are influenced by many variables, including when the mother drank, how much she drank, the genetic makeup (or genotype) of the baby, and the genotype of the mother.

Primary behavior characteristics of people with impaired brain function include: impulsiveness, memory difficulties, anger and frustration, difficulty pairing actions to consequences. Secondary behaviors that develop in reaction to or as a result of the primary disability, include substance abuse and mental health problems, anger and aggression, homelessness, involvement with the criminal justice system, and more.

Neurologist Dr. Susan Hunter-Joerns, a member of the Juneau FASD Diagnostic Team, wrote that structural brain damage "often significantly impair[s] cognitive behavior, common sense, the ability to understand right from wrong, cause-and-effect, consider consequences, ability to recognize social norm ... even though defendants may verbally seem able to talk about the issues. Making long term goals, planning appropriate actions, delaying gratification, and understanding the legal system, are often significant problems."

Who in Alaska is qualified to give a diagnosis of FAS/FASD?

Though some physicians may be qualified to diagnose all the disorders on the FASD spectrum, the preferred method of diagnosis, according to Susan Astley, Professor of Epidemiology and Pediatrics at the University of Washington and director of the Washington State FASD Diagnostic and Prevention Network, is by an interdisciplinary diagnostic team using current, rigorous FASD diagnostic guidelines. This preferred method is also advocated for nationally by the Centers for Disease Control and Prevention.

Each diagnosis on the spectrum requires evaluation and testing related to the Central Nervous System (CNS) to detect damage that cannot be measured alone by physical attributes. Interdisciplinary diagnostic teams using the 4-Digit Diagnostic Code include evaluations by a medical professional, psychologist, occupational therapist, and speech-language pathologist. These evaluations can detect the nuances of the disability.

How many diagnostic teams and/or physicians are available to give FASD diagnoses in Alaska?

Currently, through the Division of Behavioral Health FASD Diagnostic Team Provider Agreement, Alaska has eight active FASD diagnostic teams – in Bethel, Fairbanks, Mat-Su, Kenai, Juneau, Sitka, and two in Anchorage (Southcentral Foundation and ASSETS). Alaska also has a trained diagnostic team at Alaska Psychiatric Institute (API) for children who enter the service system through that door. In the past there were teams in Dillingham and Kodiak — both locations that are interested in reviving their teams at some point, but do not have the resources to do it at this time. Alaska also has had team in Nome, Copper Center, and Ketchikan. The majority of FASD diagnoses in Alaska are determined by the diagnostic teams overseen by DHSS.

How many people are diagnosed with FAS/FASD in Alaska annually?

In 2011, Alaska's FASD diagnostic teams diagnosed 179 individuals. The average per year number is around 153 per year, according to the Alaska Department of Health & Social Services.

What is Alaska's diagnostic standard based on?

In 1999, the DHSS Office of FAS, in conjunction with the statewide FASD Steering Committee, agreed to use the 4-Digit Diagnostic Code as the standard diagnostic system for Alaska's developing Diagnostic Team Network. The 4-Digit Diagnostic Code was developed at the University of Washington's FASD Diagnostic and Prevention Network by Drs. Susan Astley and Sterling Clarren. The 4-Digit Diagnostic Code measures: 1) facial features, 2) growth deficiency, 3) central nervous system damage/dysfunction, and 4) prenatal alcohol exposure. The client's diagnosis is derived after a thorough evaluation by an interdisciplinary team of professionals, which generally includes a physician (or nurse practitioner), psychologist, occupational therapist, speech-language pathologist, social worker, and family advocate. For more information on the FASD 4-Digit Code, visit: http://depts.washington.edu/fasdpn/htmls/4-digit-code.htm.

The 4-Digit Diagnostic Code is considered the "gold standard" for FASD diagnosis and provides a reliable, evidence-based diagnostic process that gives detailed information about the individual client and how best to help that person work with their disability to reach their full potential. All team members are required to complete the University of Washington FASD 4-Digit Diagnostic Code Training Course.

The economic benefits of SB 151

The cost of incarceration in Alaska's prison is about $136 per day. Over the course of five to ten years in an Alaskan prison, an inmate is expected to cost the state close to $250,000-$500,000 (not including medical, mental health or other specialized treatment while incarcerated).

According to the 2009 ISER Study, *The Cost of Crime: Could the State Reduce Future Crime and Save Money by Expanding Education and Treatment Programs?*, the cost of providing services is less than the cost of incarceration. With appropriate supports, clients with FASD, T/ABI and other brain-based disabilities can live successfully in the community as contributing citizens, *and* provide jobs for Alaskan case workers, clinicians, assisted living providers, mental health and substance abuse

counselors, psychologists and psychiatrists. Not only does SB 151 further the cause of justice for a vulnerable population, it represents a better investment of our state's resources.

Additionally, the state's movement toward "Smart Justice" will promote less crime, reduced public costs, and greater rehabilitative effect on offenders. The research behind "Smart Justice" suggests that spending money on rehabilitating offenders is more cost effective than paying the high costs associated incarceration and recidivism, including public safety, courts, prisons, alcoholism and drug abuse programs.

FASD in other jurisdictions

Judges nationwide are experiencing repeat offenders diagnosed with these disorders who, as a direct result of their disabilities, are effectively unable to understand the charges against them, or comply with the conditions of their sentence. There is a growing body of research affirming that FASDs are brain disorders effectively impairing "judgment, behavior, capacity to recognize reality, or ability to cope with the ordinary demands of life."

Kate Burkhart, attorney and executive director of the Alaska Advisory Board on Alcoholism and Drug abuse, wrote that the language in SB 151 "is commensurate with the federal sentencing guidelines and other western state laws that provide for such a mitigating factor. While none of the western states surveyed expressly include FASD in their definitions of mental defect, Utah includes a broad definition that would include FASD. The other states and federal guidelines would permit but do not mandate consideration of FASDs in sentencing unless they impair comprehension or ability to form intent."

Burkhart noted that Utah defines "mental illness" as "a mental disease or defect that substantially impairs a person's mental, emotional, or behavioral functioning. A mental defect may be a congenital condition, the result of an injury, or residual effect of a physical or mental disease that includes, but is not limited to, mental retardation" which is further defined to mean "significant sub-average general intellectual functioning, existing concurrently with deficits in adaptive behavior."

Idaho permits consideration of mental condition creating an "inability to appreciate the wrongfulness" of conduct or to conform to legal requirements at sentencing."

Washington permits the courts to consider "the defendant's capacity to appreciate the wrongfulness of his or her conduct, or to conform his or her conduct to the requirements of the law, was significantly impaired."

Nationally, advocates within the American Bar Association are proposing a resolution urging lawyers, judges, bar associations and law school clinical programs to promote "applying FASD as a factor in the mitigation of juvenile and criminal sentencing ... and consideration of alternatives to incarceration that reduce recidivism." The resolution also asks, "that state and federal laws and policies reflect the serious effects of prenatal alcohol exposure by a) including persons diagnosed with FASD, or suffering from the affects of prenatal alcohol exposure, within the statutory definition of developmental disabilities ... and b) enhancing identification and diagnosis of ... persons with FASD." Their intent is that this resolution would be approved by the ABA House of Delegates at the annual meeting in Chicago in August 2012.

Internationally, Alaska is among the forerunners in awareness, diagnosis, and prevention of fetal alcohol spectrum disorders, both nationally and internationally. However, Canada and parts of Australia are leading the world in establishing laws and practices that address FASD as a brain-based disability with specific interventions and solutions.

The Canadian Bar Association passed a resolution in 2010 acknowledging that FASDs involve a range of neurological and behavioral challenges that can include "impaired mental functioning, poor executive

functioning, memory problems, impaired judgment, inability to control impulse behavior, inability to understand the consequences of their actions, and inability to internally modify behavior control."

The resolution also acknowledged that "the criminal justice system is based on normative assumptions that a person acts in a voluntary manner, makes informed choices with respect to the decision to commit crimes, and learns from their own behavior and the behavior of others" and " these normative assumptions and sentencing principals such as specific and general deterrence, are not valid for those with FASDs.

Following are other highlights addressed in the CBA's resolution:

- sentencing options available to courts are often ineffective in changing the behavior of those with FASD and those with FASD are frequently repeat offenders
- some courts have ruled that absolutely no rehabilitative or deterrent purpose is served by incarceration of those with FASD;
- laws, programs or activities could ameliorate the disadvantages experienced by those with FASD whose behavior is judged on a standard that they are incapable of meeting because of their disability;
- the Canadian bar is resolved to urge the federal government to amend criminal sentencing laws to accommodate the disability of those with FASD.

In Heather Douglas' article, *The sentencing response to defendants with fetal alcohol spectrum disorder* (2010) published by Thomas Reuters in Australia, the author notes that "as a result of deficits in executive function resulting in memory difficulties, inability to plan and failure to recognize the consequences of actions, many of those with FASD are likely to fail to pay fines and to breach probation orders ... Suspended sentences will not be useful in a context where cause and effect is not understood. In prison, highly suggestible FASD sufferers are likely to be victimized. While FASD clients cannot be cured of all their symptoms, techniques and approaches have been identified that can be employed by professionals to help the person reach his or her potential."

Conclusion

Ira Chasnoff, M.D., an international expert on FASD, wrote in an article "Is Fetal Alcohol Spectrum Disorders a Mitigating Factor in Criminal Litigation and Sentencing?" in *Psychology Today* (2011), "We are in an ethical conundrum. Children, youth and young adults with FASD are more likely than not to end up before the court on criminal or civil charges, but the legal system has not come close to resolving how their cases should be treated. Most individuals with FASD have normal IQs, and most can relate a story as to how they ended up before the judge. Most can even state they understand the charges against them. But the truth is that neurocognitive damage that inhibits executive functioning, decision-making, and emotional and behavioral regulation has tremendous bearing on the capacity of these individuals to understand the ramifications of their actions. These people look normal, they speak normally, but they often have only a superficial understanding of the charges against them."

As noted by Canadian Judge Barry Stuart in R. v. Sam (1993), FASD takes away someone's "... ability to act within the norms expected by society." It is "manifestly unfair to make an individual pay for their disability with their freedom. Society is failed because a sentence calculated for a 'normal' offender cannot serve the same ends when imposed on an offender with FASD," he said. "Not only can traditionally calculated sentences be hopelessly ineffective when applied to FASD offenders, but the punishment itself, calibrated for a non-disabled individual, can have a substantially more severe effect on someone with the impairments associated with FASD," Judge Stuart concluded.

SB 151 - Inclusion of FASD as a Mitigating Factor

The Need for SB 151

Individuals diagnosed with a fetal alcohol spectrum disorder (FASD) are disproportionately represented within Alaska's criminal justice system. The intent underlying Alaska's sentencing structure – that people will modify their behaviors based on the criminal justice system's response to their crimes – is not met when applied to individuals with FASD. These disabilities manifest as deficits in executive function, resulting in impaired adaptive behavior, memory difficulties, an inability to plan, and a failure to recognize the consequences of actions. In the interest of justice, it is important to take these deficits into account during sentencing. Neither the offender nor society benefits from holding individuals with FASD to community standards that they cannot possibly attain given their impairments.

SB 151 fulfills a recommendation adopted by the Alaska Criminal Justice Assessment Commission: "The legislature should create a statutory mitigating factor for use at criminal sentencing, recognizing when the wrongful conduct was substantially affected by an organic brain disorder." [1]

A draft resolution **being proposed by the Commission on Youth At Risk of the American Bar Association for consideration at this year's annual ABA meeting,** states: "... the American Bar Association urges lawyers and judges, as well as bar associations and law school clinical programs, to support training that includes law school law enforcement, and legal/judicial education curricula on enhanced awareness of the child and adult disability of Fetal Alcohol Spectrum Disorders (FASD) and its impact on individuals in the child welfare, juvenile justice, and adult criminal justice systems, and that they work with medical, mental health, and FASD disability experts to promote: ... (d) applying FASD as a mitigating factor in the mitigation of juvenile justice and criminal sentencing ... and consideration of alternatives to incarceration that reduce recidivism."

Overview of the changes proposed in SB 151

SB 151 proposes to allow FASD as a mitigating factor for sentencing in certain cases where there is *clear and convincing* evidence that a "**defendant committed an offense while suffering from a condition diagnosed as a fetal alcohol spectrum disorder, the fetal alcohol spectrum disorder substantially impaired the defendant's judgment, behavior, capacity to recognize reality, or ability to cope with the ordinary demands of life, and the fetal alcohol spectrum disorder, though insufficient to constitute a complete defense, significantly affected the defendant's conduct**."

SB 151 would, for the purposes of the subsection on mitigating factors, define fetal alcohol spectrum disorder as any "**a condition of impaired brain function in the range of permanent birth defects caused**

[1] Alaska Criminal Justice Assessment Commission (2000). *Final Report.* Retrieved October 12, 2010 from www.hss.ajc.state.ak.us/reports/CJAC Final 2004.pdf, at p.71.

3.16.12

by maternal consumption of alcohol during pregnancy *as determined by a physician or interdisciplinary team using current FASD diagnostic guidelines*."

The Alaska FASD Partnership and members of the Partnership's legal issues workgroup support removing limiting language from the current statute that creates an "exception" to the application of "mental disease or defect" as a mitigating factor for "offenses against a person" or if the defendant was previously convicted of a felony.

The workgroup suggests that this limiting language, which only applies to the mitigating factor related to individuals with a "mental disease or defect" could be discriminatory. None of the other 19 mitigating factors currently in statute have this limiting language.

David Fleurant, Executive Director of the Disability Law Center of Alaska, who participates in the FASD legal issues workgroup, suggests that the current statute appears to discriminate against individuals with disabilities in the application of mitigating factors "for no rational purpose. No other state which employs 'mental disease or defect' as a mitigating factor limits its application in such a manner."

In light of how FASD adversely impacts an individual's executive function, a significant percentage of the convictions against individuals with FASD involve offenses against the person and/or are committed by felons who are cycling through the criminal justice system. With the limiting language, the state is far less likely to "catch" a person with FASD who is cycling through the corrections system. Therefore, the Partnership and the legal issues workgroup of the Partnership support removing this limiting language from the statute so as to achieve the intended goal of SB 151.

The legislation *DOES NOT*:

1) *require* a judge to use the mitigating factor;
2) *automatically* adjust a presumptive sentence; the defendant would have to prove by *clear and convincing evidence* 1) that he or she has a fetal alcohol spectrum disorder and 2) that the condition "significantly affected the defendant's conduct" before the judicial officer can consider the possibility of adjusting the presumptive sentence; or
3) The goal is not a "get out of jail free" card, but an attempt to be "smarter" within the justice system to better direct people who have impaired brain function to services both within and after release from the criminal justice system.

What are mitigating factors?

The Legislature has decided in the presumptive sentencing law that judges should give jail time within certain ranges in all felonies (with the exception of "class C felonies" where the minimum presumptive term is 0 years). The amount of the presumptive term depends on the severity of the crime and whether or not a defendant has prior felonies. There are 34 statutory aggravating factors that could result in a sentence above the presumptive range, if proved by clear and convincing evidence. A judge must sentence a person to at least the minimum presumptive term unless a "mitigating factor" is shown by clear and convincing evidence. There are 19 statutory mitigating factors. With the current mental disease or defect mitigating factor, the defendant must *also* show by clear and convincing evidence that the condition "significantly affected the defendant's conduct." The proposed fetal alcohol spectrum disorder mitigating factor also requires proof by clear and convincing evidence that the condition "significantly affected the defendant's conduct" before a judge could consider it. If the required showing has been made for any mitigating factor, it is legally possible for the judge to sentence below the minimum term (but if the minimum term is more than 4 years, the lower limit is half the minimum presumptive term).

There are special rules when there is a factor in a case that does not fit within the statutory list but which is so important in a case that it would be manifestly unjust to sentence a person without considering the factor. If the sentencing judge finds that such a "non statutory mitigating factor" exists, then the judge must refer the case to a three judge sentencing panel. If at least two judges on the panel agree, the panel can sentence with the same lower limits applicable to a statutory mitigating factor. If the panel does not agree, the case is referred back to the original judge to impose at least the minimum presumptive term. The "three judge panel" method is very cumbersome, time consuming and expensive. CSSB 151 is a "statutory mitigating factor" and would not require any referral to a three judge sentencing panel.

What are Fetal Alcohol Spectrum Disorders?

FASD is not a medical diagnosis, but an umbrella term for the range of diagnoses associated with damage caused by maternal alcohol consumption during pregnancy. These medical diagnoses can include Fetal Alcohol Syndrome (FAS), Partial Fetal Alcohol Syndrome (PFAS), Alcohol-Related Birth Defects (ARBD), and Alcohol-Related Neurodevelopmental Disorder (ARND). Note that the term, Fetal Alcohol Effects (FAE), is no longer commonly used, having been replaced by the PFAS, ARBD and ARND diagnoses.

Each diagnosis has its own symptoms and attributes, but common among all the diagnoses is permanent, life-long brain damage – often affecting decision-making, judgment and impulse control. FASD is a brain-based disorder, similar to autism, traumatic and acquired brain injury, and other cognitive impairments.

FASDs appear in individuals differently. Some alcohol-exposed individuals may exhibit impulsivity, hyperactivity and risky behaviors. Some have difficulties with memory, while others have very good memories. Some have low IQs, while others have normal IQs.

Experts report that the different presentations are influenced by many variables, including when the mother drank, how much she drank, the genetic makeup (or genotype) of the baby, and the genotype of the mother.

Primary behavior characteristics of people with impaired brain function include: impulsiveness, memory difficulties, anger and frustration, difficulty pairing actions to consequences. Secondary behaviors that develop in reaction to or as a result of the primary disability, include substance abuse and mental health problems, anger and aggression, homelessness, involvement with the criminal justice system, and more.

Neurologist Dr. Susan Hunter-Joerns, a member of the Juneau FASD Diagnostic Team, wrote that structural brain damage "often significantly impair[s] cognitive behavior, common sense, the ability to understand right from wrong, cause-and-effect, consider consequences, ability to recognize social norm ... even though defendants may verbally seem able to talk about the issues. Making long term goals, planning appropriate actions, delaying gratification, and understanding the legal system, are often significant problems."

Who in Alaska is qualified to give a diagnosis of FAS/FASD?

Though some physicians may be qualified to diagnose all the disorders on the FASD spectrum, the preferred method of diagnosis, according to Susan Astley, Professor of Epidemiology and Pediatrics at the University of Washington and director of the Washington State FASD Diagnostic and Prevention Network, is by an interdisciplinary diagnostic team using current, rigorous FASD diagnostic guidelines.

Each diagnosis on the spectrum requires evaluation and testing related to the Central Nervous System (CNS) to detect damage that cannot be measured alone by physical attributes. Interdisciplinary

diagnostic teams using the 4-Digit Diagnostic Code include evaluations by a medical professional, psychologist, occupational therapist, and speech-language pathologist. These evaluations can detect the nuances of the disability, that may include adaptive functioning, individual strengths and challenges for the individual, and other information for developing an appropriate individual service plan.

How many diagnostic teams and/or physicians are available to give FASD diagnoses in Alaska?

Currently, through the Division of Behavioral Health FASD Diagnostic Team Provider Agreement, Alaska has eight active FASD diagnostic teams – in Bethel, Fairbanks, Mat-Su, Kenai, Juneau, Sitka, and two in Anchorage (Southcentral Foundation and ASSETS). Alaska also has a trained diagnostic team at Alaska Psychiatric Institute (API) for children who enter the service system through that door. In the past there were teams in Dillingham and Kodiak — both locations that are interested in reviving their teams at some point, but do not have the resources to do it at this time. Alaska also has had team in Nome, Copper Center, and Ketchikan.

The majority of FASD diagnoses in Alaska are determined by the diagnostic teams overseen by DHSS.

How many people are diagnosed with FAS/FASD in Alaska annually?

In 2011, Alaska's FASD diagnostic teams diagnosed 179 individuals. The average per year number is around 153 per year, according to the Alaska Department of Health & Social Services.

What is Alaska's diagnostic standard based on?

In 1999, the DHSS Office of FAS, in conjunction with the statewide FASD Steering Committee, agreed to use the 4-Digit Diagnostic Code as the standard diagnostic system for Alaska's developing Diagnostic Team Network. The 4-Digit Diagnostic Code was developed at the University of Washington's FASD Diagnostic and Prevention Network by Drs. Sterling Clarren and Susan Astley. The 4-Digit Diagnostic Code measures: 1) facial features, 2) growth deficiency, 3) central nervous system damage/dysfunction, and 4) prenatal alcohol exposure. The client's diagnosis is derived after a thorough evaluation by an interdisciplinary team of professionals, which generally includes a physician (or nurse practitioner), psychologist, occupational therapist, speech-language pathologist, social worker, and family advocate. For more information on the FASD 4-Digit Code, visit: http://depts.washington.edu/fasdpn/htmls/4-digit-code.htm.

The 4-Digit Diagnostic Code is considered the "gold standard" for FASD diagnosis and provides a reliable, evidence-based diagnostic process that gives detailed information about the individual client and how best to help that person work with their disability to reach their full potential. All team members are required to receive very specific training from the University of Washington on the 4-digit code process.

The economic benefits of CSSB 151

The cost of incarceration in Alaska's prison is about $136 per day. Over the course of five to ten years in an Alaskan prison, an inmate is expected to cost the state close to $250,000-$500,000 (not including medical, mental health or other specialized treatment while incarcerated).

According to the 2009 ISER Study, *The Cost of Crime: Could the State Reduce Future Crime and Save Money by Expanding Education and Treatment Programs?*, the cost of providing services is less than the cost of incarceration. With appropriate supports, clients with FASD and other brain-based disabilities can live successfully in the community as contributing citizens, ***and*** provide jobs for Alaskan case workers, clinicians, assisted living providers, mental health and substance abuse

counselors, psychologists and psychiatrists. Not only does CSSB 151 further the cause of justice for a vulnerable population, it represents a better investment of our state's resources.

Additionally, the state's movement toward "Smart Justice" will promote less crime, reduced public costs, and greater rehabilitative effect on offenders. The research behind "Smart Justice" suggests that spending money on rehabilitating offenders is more cost effective than paying the high costs associated incarceration and recidivism, including public safety, courts, prisons, alcoholism and drug abuse programs.

FASD in other jurisdictions

It is the intent of the sponsor to include FASD language because judges nationwide are experiencing a flood of repeat offenders diagnosed with these disorders who, as a direct result of their disabilities, are effectively unable to understand the charges against them, or comply with the conditions of their sentence. There is a growing body of research affirming that FASD and are brain disorders effectively impairing "judgment, behavior, capacity to recognize reality, or ability to cope with the ordinary demands of life."

Kate Burkhart, attorney and executive director of the Alaska Advisory Board on Alcoholism and Drug abuse, wrote that the language in SB 151 "is commensurate with the federal sentencing guidelines and other western state laws that provide for such a mitigating factor. While none of the western states surveyed expressly include FASD in their definitions of mental defect, Utah includes a broad definition that would include FASD. The other states and federal guidelines would permit but do not mandate consideration of FASDs in sentencing unless they impair comprehension or ability to form intent."

Burkhart noted that Utah defines "mental illness" as "a mental disease or defect that substantially impairs a person's mental, emotional, or behavioral functioning. A mental defect may be a congenital condition, the result of an injury, or residual effect of a physical or mental disease that includes, but is not limited to, mental retardation" which is further defined to mean "significant sub-average general intellectual functioning, existing concurrently with deficits in adaptive behavior."

Idaho permits consideration of mental condition creating an "inability to appreciate the wrongfulness" of conduct or to conform to legal requirements at sentencing."

Washington permits the courts to consider "the defendant's capacity to appreciate the wrongfulness of his or her conduct, or to conform his or her conduct to the requirements of the law, was significantly impaired."

Nationally, advocates within the American Bar Association are proposing a resolution urging lawyers, judges, bar associations and law school clinical programs to promote "applying FASD as a factor in the mitigation of juvenile and criminal sentencing ... and consideration of alternatives to incarceration that reduce recidivism." The resolution also asks, "that state and federal laws and policies reflect the serious effects of prenatal alcohol exposure by a) including persons diagnosed with FASD, or suffering from the affects of prenatal alcohol exposure, within the statutory definition of developmental disabilities ... and b) enhancing identification and diagnosis of ... persons with FASD." Their intent is that this resolution would be approved by the ABA House of Delegates at the annual meeting in Chicago in August 2012.

Internationally, Alaska is among the forerunners in awareness, diagnosis, and prevention of fetal alcohol spectrum disorders, both nationally and internationally. However, Canada and parts of Australia are leading the world in establishing laws and practices that address FASD as a brain-based disability with specific interventions and solutions.

The Canadian Bar Association passed a resolution in 2010 acknowledging that FASDs involve a range of neurological and behavioral challenges that, can include "impaired mental functioning, poor executive

functioning, memory problems, impaired judgment, inability to control impulse behavior, inability to understand the consequences of their actions, and inability to internally modify behavior control."

The resolution also acknowledged that "the criminal justice system is based on normative assumptions that a person acts in a voluntary manner, makes informed choices with respect to the decision to commit crimes, and learns from their own behavior and the behavior of others" and " these normative assumptions and sentencing principals such as specific and general deterrence, are not valid for those with FASDs.

Following are other highlights addressed in the CBA's resolution:

- sentencing options available to courts are often ineffective in changing the behavior of those with FASD and those with FASD are frequently repeat offenders
- some courts have ruled that absolutely no rehabilitative or deterrent purpose is served by incarceration of those with FASD;
- laws, programs or activities could ameliorate the disadvantages experienced by those with FASD whose behavior is judged on a standard that they are incapable of meeting because of their disability;
- the Canadian bar is resolved to urge the federal government to amend criminal sentencing laws to accommodate the disability of those with FASD.

In Heather Douglas' article, *The sentencing response to defendants with fetal alcohol spectrum disorder* (2010) published by Thomas Reuters in Australia, the author notes that "as a result of deficits in executive function resulting in memory difficulties, inability to plan and failure to recognize the consequences of actions, many of those with FASD are likely to fail to pay fines and to breach probation orders ... Suspended sentences will not be useful in a context where cause and effect is not understood. In prison, highly suggestible FASD sufferers are likely to be victimized. While FASD clients cannot be cured of all their symptoms, techniques and approaches have been identified that can be employed by professionals to help the person reach his or her potential."

Conclusion

Ira Chasnoff, M.D., an international expert on FASD, wrote in an article "Is Fetal Alcohol Spectrum Disorders a Mitigating Factor in Criminal Litigation and Sentencing?" in *Psychology Today* (2011), "We are in an ethical conundrum. Children, youth and young adults with FASD are more likely than not to end up before the court on criminal or civil charges, but the legal system has not come close to resolving how their cases should be treated. Most individuals with FASD have normal IQs, and most can relate a story as to how they ended up before the judge. Most can even state they understand the charges against them. But the truth is that neurocognitive damage that inhibits executive functioning, decision-making, and emotional and behavioral regulation has tremendous bearing on the capacity of these individuals to understand the ramifications of their actions. These people look normal, they speak normally, but they often have only a superficial understanding of the charges against them."

As noted by Canadian Judge Barry Stuart in R. v. Sam (1993), FASD takes away someone's "... ability to act within the norms expected by society." It is "manifestly unfair to make an individual pay for their disability with their freedom. Society is failed because a sentence calculated for a 'normal' offender cannot serve the same ends when imposed on an offender with FASD," he said. "Not only can traditionally calculated sentences be hopelessly ineffective when applied to FASD offenders, but the punishment itself, calibrated for a non-disabled individual, can have a substantially more severe effect on someone with the impairments associated with FASD," Judge Stuart concluded.

TO: Senator Hollis French
Senate Judiciary Committee

FROM: Senator Kevin Meyer

DATE: March 6, 2012

RE: CSSB 151 Request for Hearing

I respectfully request the Senate Judiciary Committee schedule a hearing for CSSB 151, "An Act relating to inclusion of fetal alcohol spectrum disorders, traumatic and acquired brain injury, and intellectual disability in the definition of 'mental disease or defect'; and relating to mitigation at sentencing in a criminal case for a defendant suffering from a mental disease or defect."

The following documents are attached and will be sent electronically:

- Current version of the bill
- Sponsor Statement
- Support Documentation
- Letters of Support
- Staff member assigned to the bill: Christine R. Marasigan, 465-6876

This bill would include FASD as a mitigating factor in sentencing. It allows judges some flexibility when sentencing those who are affected by FASD.

Please contact Christine if you have any questions regarding this legislation.

SPONSOR STATEMENT FOR SB 151

"An Act relating to inclusion of fetal alcohol spectrum disorders, traumatic and acquired brain injury and intellectual disability in the definition of 'mental disease or defect'; and relating to mitigation at sentencing in a criminal case for a defendant affected by a mental disease or defect."

SB 151 would include Fetal Alcohol Spectrum Disorders (FASD) and Traumatic and Acquired Brain Injury (A/TBI) as *impaired brain function* under the state's existing definition of *mental disease or defect.* If SB 151 passed, FASD and A/TBI could apply as a mitigating factor in sentencing. This would allow some flexibility in sentencing for those who are affected by FASD or A/TBI when there is clear and convincing evidence that the defendant has an *impaired brain function* as defined under *mental disease or defect.*

SB 151 does not require a judge to use the mitigating factor and it DOES NOT automatically adjust a presumptive sentence. The defense would have to prove that the defendant's disability *significantly affected the defendant's conduct* and *substantially impaired judgment, behavior, and capacity to recognize reality* in order to apply the mitigating factor.

Evidence shows that directing people with mental illness and other brain disorders to supported services, both inside and outside of Corrections, significantly reduces the high financial and social costs associated with re-incarceration and recidivism. Felons and repeat offenders with an FASD and/or A/TBI are more likely to stop committing crimes when they are given the same supports that benefit people with mental illness and other disabilities, which can include Therapeutic Court, housing and employment assistance, case management, counseling and rehabilitation.

March 2, 2012

Senator Kevin Meyer
State Capitol Room 103
Juneau AK, 99801

Re: Support for SB 151

Dear Senator Meyer:

The Disability Law Center of Alaska supports the objective of SB 151, which is to allow the courts to take into consideration during sentencing whether the defendant was diagnosed with a fetal alcohol spectrum disorder, a traumatic brain injury or an acquired brain injury. If these conditions cannot be considered as mitigating factors, then as one jurist observed, these individuals are paying for their disability with their freedom.

Thank you for your efforts in correcting this manifest injustice.

Sincerely,

DISABILITY LAW CENTER OF ALASKA

David C. Fleurant
Executive Director

MEMBER OF THE NATIONAL DISABILITY RIGHTS NETWORK

Alaska FASD Partnership

March 2, 2012

Senator Kevin Meyer
Alaska State Legislature
Juneau, Alaska 99801

Dear Senator Meyer,

It is with great pleasure that the Alaska FASD Partnership supports the proposed committee substitute for SB 151 to include FASD, Traumatic and Acquired Brain Injury, and Intellectual Disability as "impaired brain function" in the definition of "mental disease or defect."

The Partnership also supports the bill's intent to include FASD and traumatic and acquired brain injury as mitigating factors related to sentencing.

Individuals diagnosed with a fetal alcohol spectrum disorder (FASD) or a traumatic or acquired brain injury (T/ABI) are disproportionately represented within Alaska's criminal justice system. However, the intent underlying Alaska's sentencing structure – that people will modify their behaviors based on the criminal justice system's response to their crimes – is not met when applied to individuals with FASD or T/ABI. These disabilities manifest as deficits in executive function resulting in impaired adaptive behavior, memory difficulties, an inability to plan, and a failure to recognize the consequences of actions. In the interest of justice, it is important to take these deficits into account during sentencing. Neither the offender nor society benefits from holding individuals with FASD or T/ABI to community standards that they cannot possibly attain given their impairments.

The cost of incarceration in Alaska's prison is about $136 per day. Over the course of five to ten years in an Alaskan prison, an inmate is expected to cost the state close to $250,000-$500,000 (not including medical, mental health or other specialized treatment while incarcerated).

According to the 2009 ISER Study, *The Cost of Crime: Could the State Reduce Future Crime and Save Money by Expanding Education and Treatment Programs?*" the cost of providing services is less than the cost of incarceration. With appropriate supports, clients with FASD, T/ABI and other brain-based disabilities can live successfully in the community as contributing citizens, ***and*** provide jobs for Alaskan case workers, clinicians, assisted living providers, mental health and substance abuse

counselors, psychologists and psychiatrists. Not only does CSSB 151 further the cause of justice for a vulnerable population, it represents a better investment of our state's resources.

Additionally, the state's movement toward "Smart Justice" will promote less crime, reduced public costs, and greater rehabilitative effect on offenders. The research behind "Smart Justice" suggests that spending money on rehabilitating offenders is more cost effective than paying the high costs associated incarceration and recidivism, including public safety, courts, prisons, alcoholism and drug abuse programs.

Thank you for the time and effort you have put into supporting this important effort.

Sincerely,

Monica Charles Leinberger

Re: Letter of Support for CSSB 151 – Mitigation at Sentencing for a Defendant Affected by FASD

Dear Senator Meyer,

The Alaska Mental Health Board and Advisory Board on Alcoholism and Drug Abuse support the committee substitute for SB 151 (CSSB 151). This bill recognizes the special needs presented by Alaskans experiencing fetal alcohol spectrum disorders (FASD) in the justice system.

It is an objective of Alaska's comprehensive mental health program that people with mental and cognitive disabilities are treated with dignity in all aspects of life. Our judges, prosecutors, defenders, and court staff work to ensure that everyone who appears in court is treated fairly and with respect. However, Alaskans experiencing FASD often present with special needs and situations that impede the course of justice. Low cognitive functioning, inability to understand and stay within accepted social norms, limited short term memory, impulsivity, and impaired judgment can all result in a person experiencing FASD not being able to explain his or her actions, understand why they resulted in a criminal charge, or understand the criminal justice process. Usually, these impairments do not rise to the level of legal incompetence – but they often make it hard for judges and juries to make decisions that serve our notions of fairness and justice.

Based on research in other jurisdictions, an estimated 60% of inmates experience an FASD, brain injury, or similar organic cognitive impairment. The cost of incarceration is very high and usually does not result in restoration or rehabilitation. In fact, according to a 2009 ISER Study,[1] the cost of prison far exceeds the cost of services. CSSD 151 allows judges – **at their discretion** – to modify presumptive sentences to take into account the defendant's disabilities and to provide the sort of sentence needed to prevent recidivism and ensure a just outcome for victims, defendants, and our communities.

We thank you for your work on behalf of all Alaskans.

Sincerely,

J. Kate Burkhart
Executive Director

The TRUST

The Alaska Mental Health Trust Authority

March 2, 2012

Senator Kevin Meyer
State Capitol Building
Juneau, Alaska 99801

Dear Senator Meyer,

The Alaska Mental Health Trust Authority is pleased to support SB 151, adding fetal alcohol spectrum disorders and traumatic and acquired brain injury as mitigating factors under "mental disease or defect" in state statute. The Trust also supports the bill's intention to use the word "intellectual disability" to describe Alaskans with developmental disabilities, rather than the archaic term "mental retardation."

This legislation is an important step in the state's recognition that people with disabilities are better served with supports and services, rather than incarceration without supports.

SB 151 fulfills a recommendation adopted by the Alaska Criminal Justice Assessment Commission that "the legislature should create a statutory mitigating factor for use at criminal sentencing, recognizing when the wrongful conduct was substantially affected by an organic brain disorder." [1]
