- Second, because DB plans do not age, unlike the individuals in them, they are able to take advantage of the enhanced investment returns that come from a balanced portfolio over long periods of time. For instance, ongoing DB plans generally include individuals with a range of ages. As older workers retire, younger workers enter the plan. As a result, the average age of the group in a mature DB plan does not change much. This means DB plans can ride out bear markets and take advantage of the buying opportunities that they present without having to worry about converting all of their money into cash for benefits in the near future. By contrast, individuals in DC plans must gradually shift to a more conservative asset allocation as they age, in order to protect against financial market shocks later in life. This process can sacrifice investment returns because people may have to sell assets when they are worth too little due to market fluctuations coinciding with retirement timing. Moreover, they are not able to take advantage of higher expected returns associated with a balanced portfolio.
- Third, DB plans achieve greater investment returns as compared with DC plans based on individual accounts. Superior returns can be attributed partly to lower fees that stem from economies of scale. Also, because of professional management of assets, DB plans achieve superior investment performance as compared to the average individual investor.

METHODOLOGY

We compare the relative costs of DB and DC plans by constructing a model that first calculates the cost of achieving a target retirement benefit in a typical DB plan. We express this cost as a level percent of payroll over a career. We then calculate the cost of providing the same retirement benefit under a DC plan. Additional details on our methodology can be found in the Technical Appendix to this report.

Our model is based on a group of 1,000 newly-hired employees. For the purposes of simplicity, we give all individuals a common set of features. All newly hired employees are female teachers aged 30 on the starting date of their employment. They work for three years and then take a two-year break from their careers to have and raise children. They return to work at age 35 and continue working until age 62. Thus, the length of the career is 30 years. By their final year of work, their salary has reached $50,000, having grown by about 4% percent each year.

Next, we define a target retirement benefit that, combined with Social Security benefits, will allow our 1,000 teachers to achieve generally accepted standards of retirement income adequacy. The plan provides a benefit in retirement equal to $26,684 per year or $2,224 per month. A cost of living adjustment is provided to ensure the benefit maintains its purchasing power during retirement. Thus, each teacher will receive a benefit equal to 53% of her final year's salary that adjusts with inflation, which we estimate at 2.8% per year. With this benefit and Social Security benefits, each teacher can expect to receive roughly 83% of her pre-retirement income – a level of retirement income that can be considered adequate, but not extravagant.

We define certain parameters for life expectancy and investment returns. Then, on the basis of all these inputs, we calculate the contribution that will be required to fund our target retirement benefit through the DB plan over the course of a career. We do the same for the DC plan.

WHAT IS AN "ADEQUATE" RETIREMENT BENEFIT?

Experts generally believe that in order for a retiree to maintain the same standard of living enjoyed during working years, income from all sources (Social Security, DB pensions, DC savings plans, etc.) should replace roughly 70 to 90 percent of pre-retirement income. Because some expenses (commuting costs, payroll taxes, etc.) disappear after retirement, it may be possible to maintain one's pre-retirement standard of living, even with a replacement ratio (that is, the ratio of retirement income to pre-retirement income) of less than 100%.

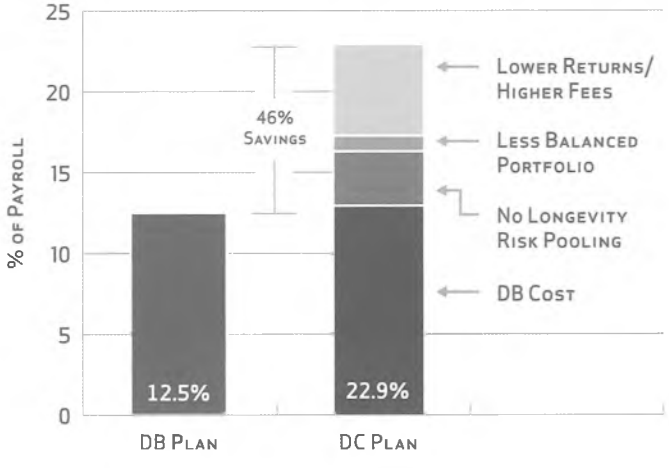
For example, Aon Consulting and Georgia State University estimate that a single retiree with a pre-retirement income of $50,000 would need to achieve a replacement ratio of 80% in order to maintain pre-retirement living standards.[11] Other analysts have recommended that workers seek to achieve an even higher replacement ratio. Human resources consulting firm Hewitt Associates predicts that employees will actually need *more* money in retirement than during their working years, and suggests a target replacement ratio of 125% to cover retiree healthcare and other expenses.[12] In our discussion, we target a replacement rate of 83% of pre-retirement income for both the DB and the DC plan.

DB PLANS ARE MORE COST EFFECTIVE BECAUSE OF LONGEVITY RISK POOLING, PORTFOLIO DIVERSIFICATION, AND SUPERIOR RETURNS

We find that the cost to fund the target retirement benefit under the DB plan comes to 12.5% of payroll each year. By comparison, we find that the cost to provide the same target retirement benefit under the DC plan is 22.9% of payroll each year. In other words, the DB plan can provide the same benefit at a cost that is 46% lower than the DC plan, as shown in Figure 1.

The DB cost advantage stems from differences in how benefits are paid out in each type of plan, how investment allocations shift in DC plans as individuals age, and how actual investment returns in DC plans compare with those in DB plans.

FIGURE 1:
Cost of DB and DC Plan as % of Payroll

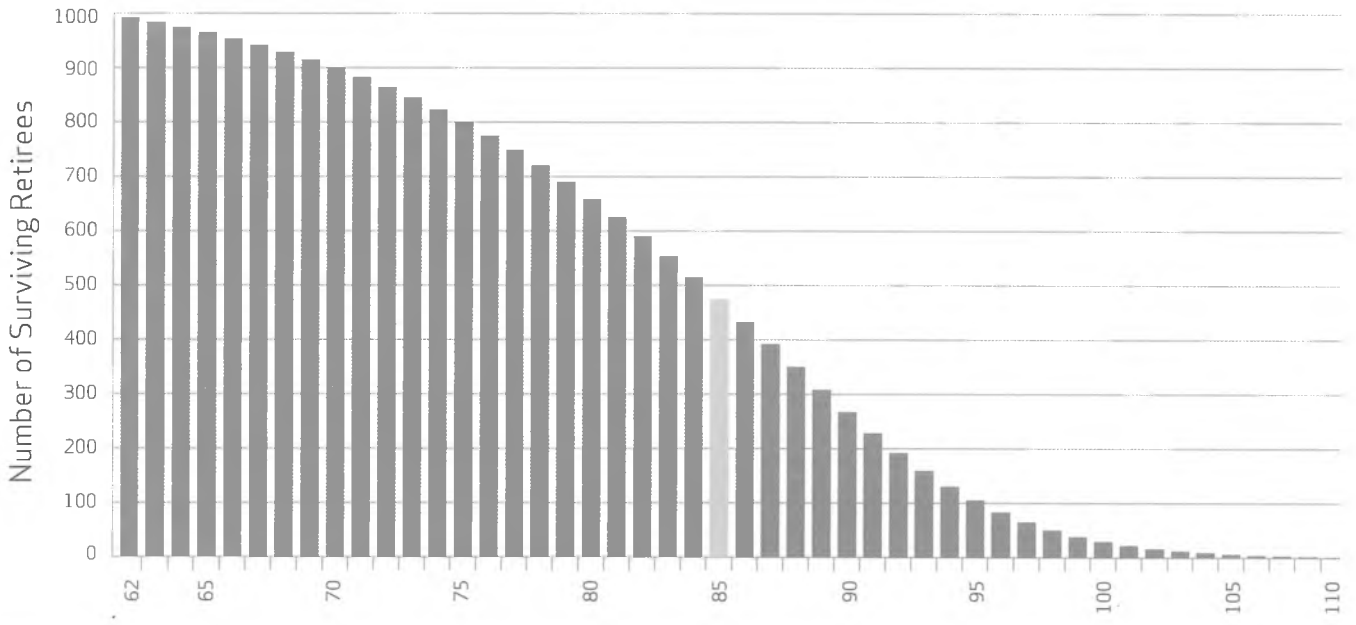


Longevity Risk Pooling

Longevity risk describes the uncertainty an individual faces with respect to their exact lifespan. While actuaries can tell us that, on average, our pool of female teachers who retire at age 62 will live to be 85, they can also predict that some will live only a short time, and some will live to be over 100. Figure 2 illustrates the longevity patterns among our 1,000 teachers. With each passing year, fewer retirees are still living. Age 85 corresponds to the year when roughly half of retirees are still alive.

In a DB plan, the normal form of benefit is a lifetime annuity, that is, a series of monthly payments that lasts until death. A DB plan with a large number of participants can plan for the fact that some individuals will live longer lives and others will live shorter lives. Thus, a DB plan needs only to ensure that it has enough assets set aside to pay for the *average* life expectancy of all individuals in the plan, or in this case, to age 85. Based on our target benefit level, the DB plan needs to have accumulated approximately $355,000 for each participant in the plan by the time they turn 62. This amount will ensure that every individual in the plan will receive a regular, inflation-adjusted monthly pension payment that lasts as long as they do. The contribution required to fund this benefit, smoothed over a career, comes to 12.5% of payroll.

Figure 2: **Longevity of 1,000 Retired Female Teachers**



WHAT ABOUT MONEY FOR A SURVIVING SPOUSE?

Our analysis did not explicitly analyze the effect of providing income to a retiree's surviving spouse. But the method of providing for spouse benefits would be similar under either the DB or DC approach. Under a DB plan, a retiree has the option of electing a reduced monthly benefit in exchange for a portion of the benefit continuing on to her surviving spouse if there is one. Virtually all pension plans offer at least a "50% Joint and Survivor" option and a "100% Joint and Survivor" option. For example, in our model, the retired teacher could have three payment options:

- $2,224 per month for as long as she lives, with no surviving spouse benefit, or
- $2,046 per month for as long as she lives, with half ($1,043) continuing to her surviving husband for as long as he lives, or
- $1,882 per month for as long as either the retiree or her husband lives

These three options are roughly "actuarially equivalent," meaning that for a large group following the actuarially assumed mortality and investment return patterns, the plan costs are neutral with respect to the option chosen.

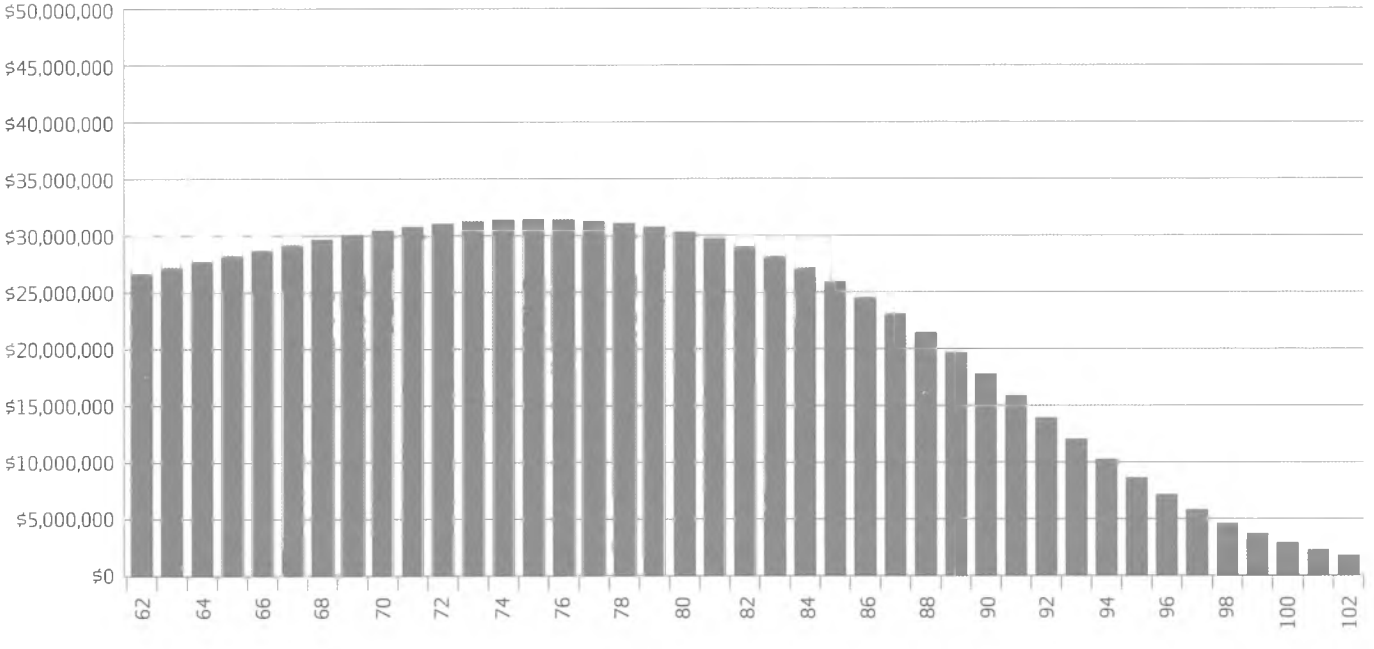
Under a DC plan, if this retiree wanted to provide her husband with retirement income should he outlive her, she would reduce the amount of her monthly withdrawals to enable him to be more likely to have residual assets available for him upon her death. If the retired couple were to make calculations as to how much to reduce their benefit, they would make calculations identical to those made by the plan to determine the actuarially equivalent benefit.

In other words, the desire of providing survivor income can be met through either a DB or DC plan.

We could have modeled our analysis based on a married retiree seeking survivor income protection, but adding this complexity would not have made a material difference in our analysis. This is because while it is difficult for a retiree to predict how long she will live, it is also difficult for a couple to predict how long they each will live.

Total annual payments out of the DB plan will have a hump-shaped pattern as seen in Figure 3. The amount of benefits paid out will increase for a number of years, because the effect of inflation adjustments is greater than the effect of individuals gradually dying off. At age 77, the impact of retiree deaths overtakes the effect of the cost of living adjustments and payments decline with each passing year. In the DB plan, every retiree recieves a steady inflation-adjusted monthly income that lasts until her death.

Figure 3: **Total Payments under the Defined Benefit Plan**

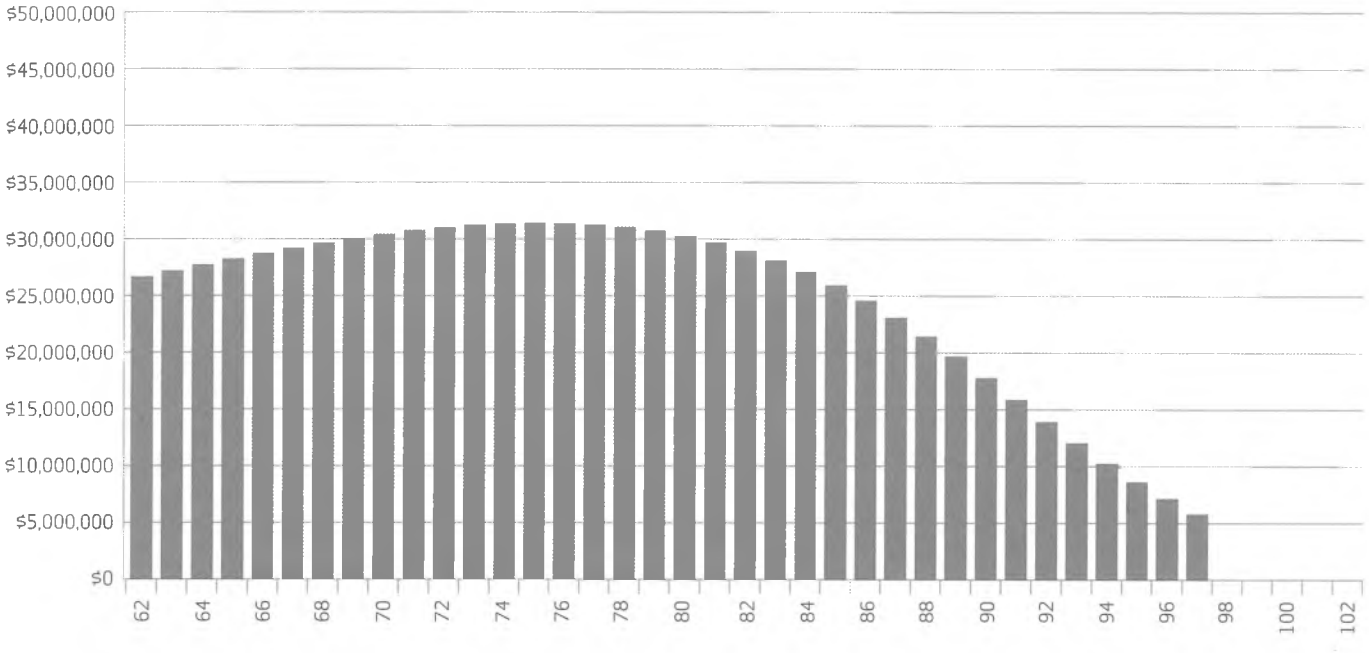


Next, we contrast this situation with that in a DC plan. Because DC plans rarely offer annuity options, individuals must self-insure longevity risks. This can be an expensive proposition. Because an individual in a DC plan does not know exactly how long she will live, she will probably not be satisfied with socking away an amount sufficient to last for the *average* life span, for if she lives past age 85, she will have depleted her retirement savings. For this reason, an individual will probably want to be sure that she has enough money saved to last for the *maximum* life span (or something close to it).

We define the "maximum life expectancy" for purposes of this analysis as 97 years old. It corresponds to the age beyond which only 10% of individuals survive, and therefore it is not a "true" measure of maximum life expectancy.[13] In fact, our mortality table indicates that one lucky individual out of the 1,000 will celebrate her 110th birthday. This simplifying assumption is intended to be more realistic (that most individuals will be satisfied with a 90% chance of not outliving their money, rather than a 100% chance), but it will also tend to understate the cost of the DC plan. Figure 4 illustrates the payout pattern under the DC plan, where individuals withdraw funds on an equivalent basis to the DB plan until age 97 – that is, in a series of regular, inflation adjusted payments. After age 97, there are no more withdrawals, even though 100 (10% of our initial pool of 1,000) teachers are still living. The money has simply run out.

Thus, our simplifying assumption of using a 90th percentile life expectancy of 97, rather than the true maximum life expectancy, will reduce the cost of providing the target benefit under the DC plan, but will also mean that individuals with exceptionally long lives will experience a reduced standard of living, compared to what they would experience under a DB plan. Thus, in our example, the DC plan ends up actually delivering less in total retirement benefits than the DB plan.

Figure 4: **Total Benefit Payments under the DC Plan Based on Life Expectancy of 97**



Of course, those 10% of individuals who do survive beyond age 97 would want to avoid the possibility of having their retirement income reduced to zero. It is likely that individuals will respond to a long life by gradually reducing their withdrawals from the plan to avoid running out of money. Thus, we assume that once an individual reaches age 90, she begins to reduce the size of annual withdrawals from the plan. This changes the withdrawal pattern to avoid the steep drop off in payments at age 97, as shown in Figure 5. However, it should be noted that those with very long lives will see their standard of living reduced significantly.

It is important to acknowledge that if a retiree dies before exhausting all of her retirement savings, the money in the account does not simply evaporate. Rather, it will pass to her estate. Benefits that were intended to be pension benefits become death benefits paid to heirs instead. This is the "over-saving" dilemma that is inherent in DC plans. As Figure 6 illustrates, the aggregate amount of money transferred to estates is substantial – totaling 24% of all assets accumulated in the plan.

While some individual heirs will benefit from these inter-generational transfers of wealth, they are not economically efficient from a taxpayer or employer perspective. Because heirs did not provide services that the employer/taxpayer benefited from, providing additional benefits to heirs is economically inefficient. Moreover, these additional "death benefits" are not tied in any direct way to an individual employee's productivity during her working years, rather their value is a function of living a shorter life.

DB plans avoid this problem entirely. By pooling longevity risks, DB plans can not only ensure that all participants in the plan will have enough money to last a lifetime, they can accomplish this goal with less money than would be required in a DC plan. Because DB plans need to fund only the *average* life expectancy of the group, rather than the *maximum* life expectancy for all individuals in the plan, less money needs to be accumulated in the pension fund. Remember that the DB plan needed to accumulate about $355,000 for each participant in the plan by the time they turn 62 in order to fund the target level of benefit. Due to the "over-saving" dilemma, DC plans must accumulate at least $455,000 per participant, or $100,000 more, in order to minimize the likelihood of running out of funds. In order to accumulate those additional amounts, contributions to the plan would climb to 16.0% of pay, from 12.5% under the DB plan.

Figure 5: **Total Benefit Payments under the DC Plan Based on Adjusted Life Expectancy**

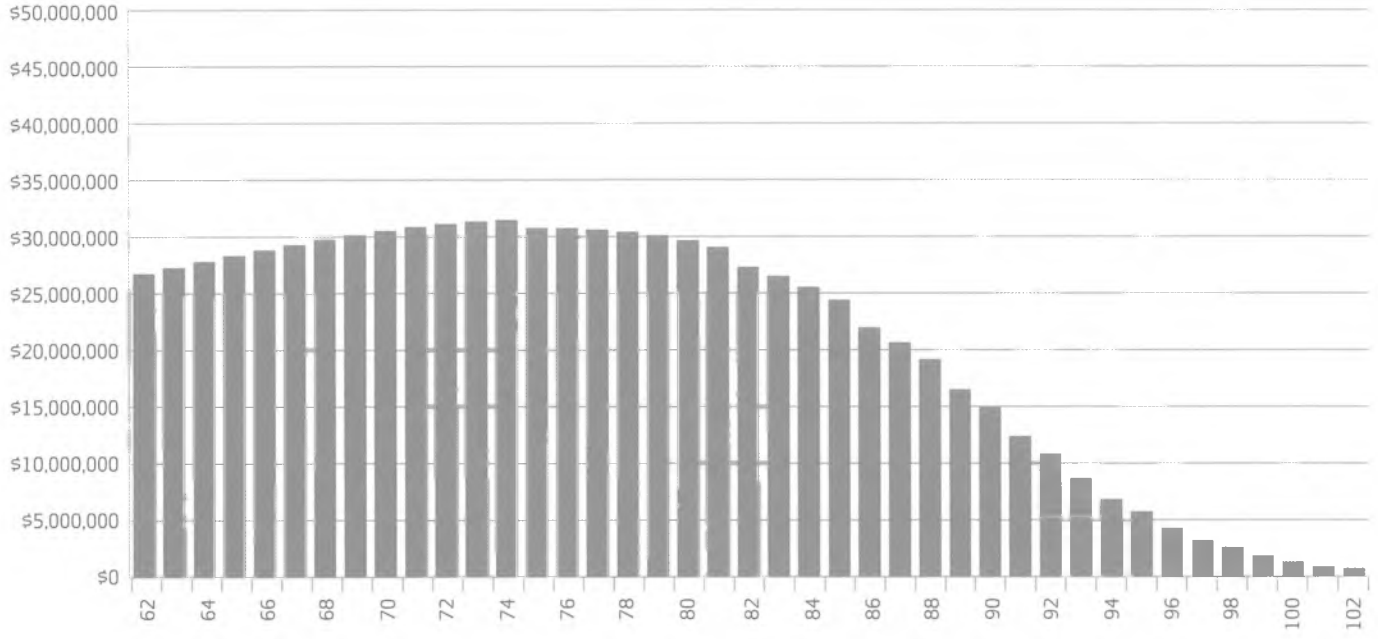


Figure 6: **Total Benefit + Estate Payments under the DC Plan**

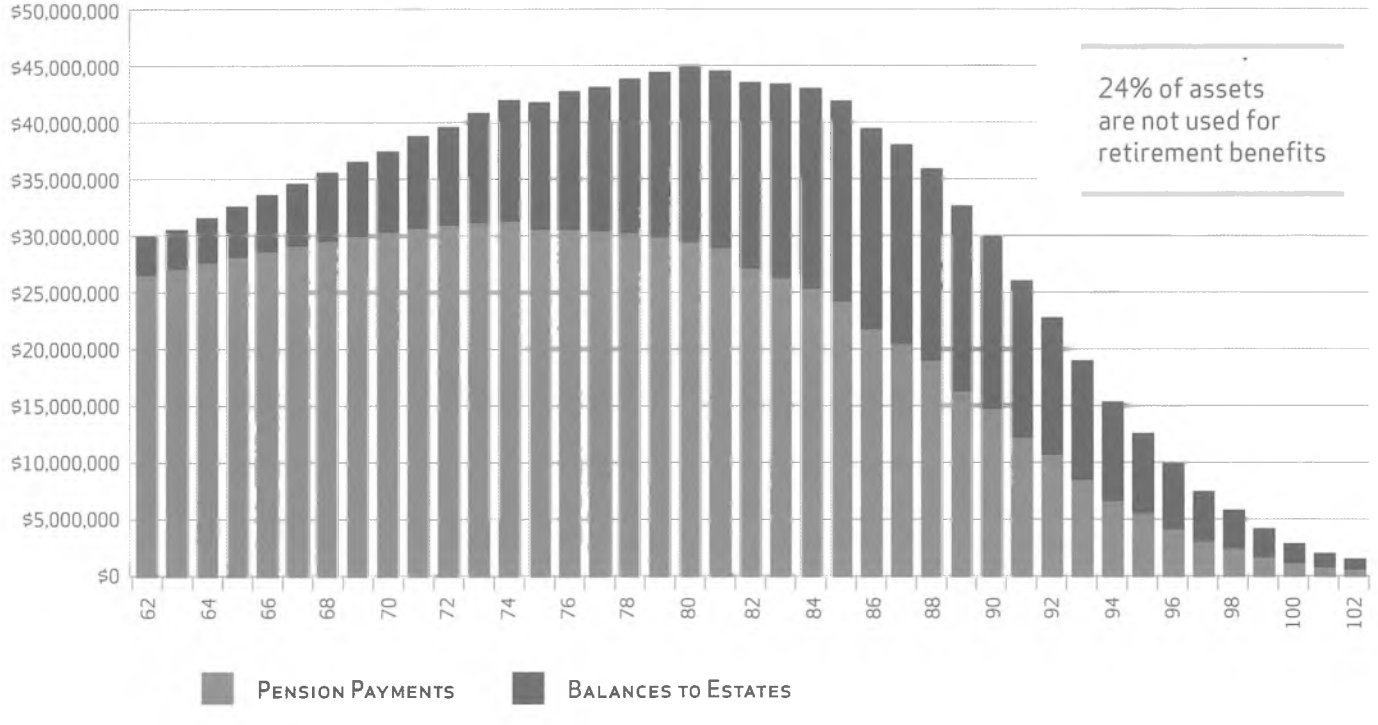


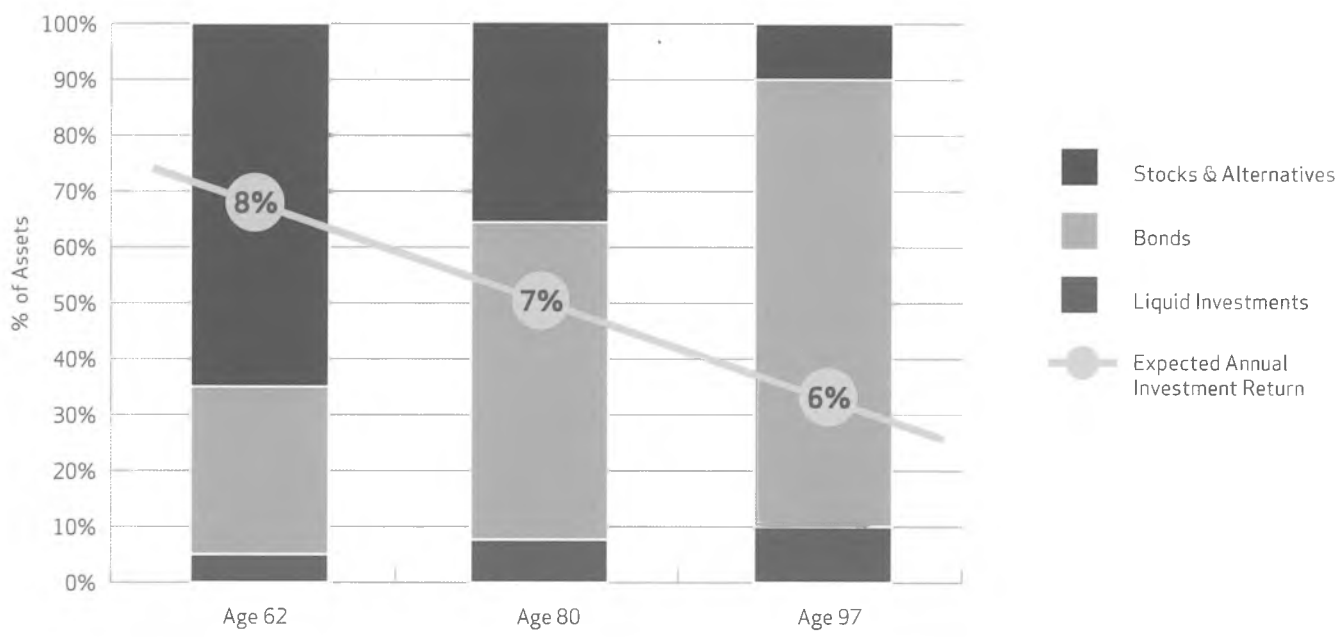
Maintenance of Portfolio Diversification

A retirement system that achieves higher investment returns can deliver a given level of benefit at a lower cost. All else equal, the greater the level of investment earnings, the lower contributions to the plan will need to be.[14] Prior research substantiates DB plans' significant advantage in investment returns, as compared with DC plans.

Part of the reason why DB plans tend to achieve higher investment returns as compared with DC plans is that they are long-lived. That is, unlike individuals, who have a finite career and a finite lifespan, a DB pension fund endures across generations; thus a DB plan, unlike the individuals in it, can maintain a well-diversified portfolio over time. In DC plans, individuals' sensitivity to the risk of financial market shocks increases as they age. The consequences of a sharp stock market downturn on retirement assets when one is in their 20s are minor, compared to when one is on the eve of retirement. For this reason, individuals are advised to gradually shift away from higher risk/higher return assets as they approach retirement. While this shift offers insurance against the downside risk of a bear market, it also sacrifices expected return since more money will be held in cash or similar assets that offer low rates of return in exchange for more security. A reduction in expected investment returns will require greater contributions to be made to the plan in order to achieve the same target benefit.

In our model, the well-diversified DB plan is expected to achieve investment returns of 8% per year, net of fees. In the DC plan, individuals gradually shift out of higher risk/higher return assets in favor of lower-risk/lower return assets. This results in a sacrifice of expected annual return of 2% by age 97, as shown in Figure 7.

Figure 7: **As Portfolio Allocation Shifts, Expected Return in DC Plan Falls**



We find that the shift in portfolio allocation has a modest, but nonetheless, significant effect on cost. Specifically, we find that the per-retiree amount that must be accumulated in the DC plan by retirement age now climbs to about $485,000. By comparison, the DB plan requires about $355,000. The contributions required to fund the target benefit level now climb to 17.0% of payroll (compared to 12.5% of payroll under the DB plan).

Another important reason why DB plans achieve higher investment returns than DC plans is that assets are pooled and professionally managed.

Superior Returns

Another important reason why DB plans achieve higher investment returns than DC plans is that assets are pooled and professionally managed. Expenses paid out of plan assets to cover the costs of administration and asset management reduce the amount of money available to provide benefits. As a result, a plan that can reduce these costs will require fewer contributions. By pooling assets, large DB plans are able to drive down asset management and other fees. For example, researchers at Boston College find that asset management fees average just 25 basis points for public sector DB plans.[15] By comparison, asset management fees for private sector 401(k) plans range from 60 to 170 basis points.[16] Thus, private DC plans suffer from a 35 to 145 basis point cost disadvantage, as compared with public DB plans.[17] On their face, these differentials may appear small, but over a long period of time, they compound to have a significant impact. To illustrate, over 40 years, a 100 basis point difference in fees compounds to a 24% reduction in the value of assets available to pay for retirement benefits.[18]

Administrative costs are largely driven by scale. Thus, a similarly-sized DB plan and DC plan can have opportunities to negotiate minimized administrative expenses. A DC plan involves costs that do not exist in a DB plan, such as the costs of individual recordkeeping, individual transactions, and investment education to help employees make good decisions. However, DB plans, unlike DC plans, bear the administrative costs of making regular monthly payments after retirement.

But fees are only part of the story – differences in the way retirement assets are managed in DB and DC plans play a substantial role. As previously discussed, investment decisions in DB plans are made by professional investment managers, whose activities are overseen by trustees and other fiduciaries. Research has found that DB plans have broadly diversified portfolios and managers who follow a long-term investment strategy.[19] We also know that individuals in DC plans, despite their best efforts, often fall short when it comes to making good investment decisions. Thus, it should not be surprising that researchers find a large and persistent gap when comparing investment returns in DB and DC plans. Munnell and Sunden put the difference in annual return at 80 basis points.[20] A 2007 report from the global benchmarking firm, CEM, Inc., concluded that between 1998 and 2005, DB plans showed annual returns 180 basis points higher than DC plans, largely due to differences in asset mix.[21] And Watson Wyatt found that, between 1995 and 2006, DB plans outperformed DC plans by 109 basis points, on average. Among large plans, the DB advantage was even greater – at 121 basis points. [22]

In our model, we use conservative estimates of the differences in DB and DC plan costs and expected returns. We model a 100 basis point (1%) net disadvantage for the DC plan annual investment returns as compared with DB plan returns. While this is slightly higher than the estimate of Munnell and Sunden,[23] it is lower than the more recent estimates of Flynn and Lum,[24] and Watson Wyatt.[25] This 100 basis point differential persists into the retirement years and magnifies the effects of the shift in asset allocation discussed previously. However, our model separates these effects to avoid double-counting. We do not isolate the impact of expenses and fees from the impact of superior investment management skill.

We find that a 1% per year disadvantage in DC plan investment returns compounds over time to create a significant cost disadvantage. In particular, we find that the amount which must be set aside for each individual at retirement age now climbs to about $550,000 (compared to the roughly $355,000 required in the DB plan). The level of contributions to the plan climbs again, this time to 22.9% of payroll (compared to 12.5% under the DB plan).

"BUT I THOUGHT DC PLANS WERE CHEAPER?" UNTANGLING BENEFIT GENEROSITY AND ECONOMIC EFFICIENCY

GM Will Freeze Salaried Pensions, Shift to 401(k)s
"...move will save the struggling automaker $420 million in 2007."
USA Today - April 10, 2007

IBM Adds Its Name to the List of Firms Freezing Pensions
"...cut worldwide retirement-related expenses by $450 million to $500 million this year."
The Washington Post - January 6, 2006

Verizon to Halt Pension Outlay for Managers
"...company hopes to save about $3 billion over the next decade".
The New York Times - December 6, 2005

Headlines like these have, understandably but unfortunately, led to a good deal of confusion about the relative costs and economic efficiencies of DB plans versus DC plans. While many employers have cited the financial burden of DB plans as their main reason for shifting from a DB to a DC plan, it is important to separate the question of benefit generosity from the question of the economic efficiency of a retirement plan.[26]

A review of the economic literature helps in this regard. Researchers have found that when employers move out of DB and into DC plans, they almost always cut the average employee benefit in the process. [27] Ghilarducci and Sun find, for instance, that between 1981 and 1998 the average employer pension contribution declined from $2,140 to $1,404 per employee, while the share of pension contributions attributed to DC plans increased from 23% to 68% in that time period.[28] Also, a UK study found that the average contribution per employee is 15-18% under a DB system, but only 9% under a DC system.[29] Thus, when employers simultaneously reduce their contributions along with the move from DB to DC, they will undoubtedly save money. Yet this does not mean that DC plans are inherently cheaper than DB plans; it simply means that employers are reducing employee benefits, while also changing the benefit design. Shifting costs from one party (the employer who reduces contributions) to another (employees who receive less in retirement) does not reduce costs overall. As the *The Economist* succinctly put it, "Whatever the arguments about the merits of the new wave of [DC] schemes, if you put less money in, you will get less money out."[30]

Whether an employer chooses a DB plan, a DC plan, or both, it has to decide how generous the benefits should be. But, as our analysis demonstrates, the economic efficiencies built into DB plans mean that such systems can provide the same benefit at a much lower cost, as compared with a DC plan.

SUMMARY OF RESULTS: DB PLANS REDUCE COSTS BY ALMOST HALF

Taken together, the economies that stem from investment pooling and longevity risk pooling can result in significant cost savings to employees and employers (or in the case of the public sector, taxpayers). In our model, required contributions are 46% lower in the DB plan as compared with the DC plan.

Our analysis clearly demonstrates that DB plans are far more cost-effective than DC plans. We find that to achieve roughly the same target retirement benefit that will replace 53% of final salary, the DB plan will require contributions equal to 12.5% of payroll, whereas the DC plan will require contributions to be almost twice as high – 22.9% of payroll.

We find that due to the effects of longevity risk pooling, maintenance of portfolio diversification, and greater investment returns over the lifecycle, a DB plan can provide the same level of retirement benefits at almost half the cost of a DC plan.

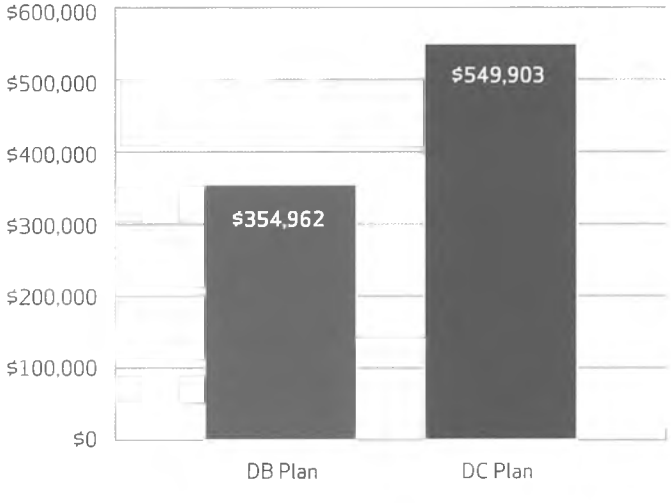
Figure 8: **Tallying DB Plan Cost Savings**

1. Longevity risk pooling saves	15%
2. Maintenance of portfolio diversification saves	5%
3. Superior investment returns save	26%
All-in costs savings in DB plan	**46%**

The longevity risk pooling that occurs in the DB plan accounts for 15% of the incremental cost savings. DB plans' ability to maintain a more diversified portfolio drives another 5% cost savings, and their superior investments returns across the lifecycle generate an additional 26% reduction cost.

Our results also indicate that DB plans can do more with less. That is, they can ensure that all individuals in the plan (even those with very long lives) are able to enjoy an adequate retirement benefit that lasts a lifetime, at the same time that they require less money to be contributed to a retirement plan and fewer assets to accumulate in the plan. We calculated the amount of money that would be required to be set aside for each retiree in each type of plan, to provide a modest retirement benefit of about $2,200 per month. As shown in Figure 9, at retirement age, the DB plan requires only about $355,000 to be set aside for each individual, whereas the DC plan requires almost $550,000. The difference – nearly $195,000 for each and every employee – illustrates that the efficiencies embedded in DB plans can yield large dollar savings for employers, employees and taxpayers.[31]

Figure 9:
Per Employee Amount Required at Age 62 DB Plan vs. DC Plan



CONCLUSION

Our findings indicate that DB plans provide a better bang for the buck when it comes to providing retirement income. We find that a DB plan can provide the same level of retirement income at almost half the cost of a DC plan. Hence, DB plans should remain a centerpiece of retirement income policy and practice, especially in light of current fiscal and economic constraints.

We find that the biggest drivers of the cost advantages in DB plans are longevity pooling and enhanced investment returns that derive from reduced expenses and professional management of assets. The sacrifice of investment returns that results from life-cycle driven shifts in portfolio allocation in DC plans had a smaller, but still significant, effect. The sources of cost savings in DB plans reflect, at a very basic level, the differences in how DB and DC plans operate. Group-based DB plans provide lifetime benefits and feature pooled, cost-efficient, professionally managed assets: these features drive significant cost savings that benefit employers, employees, and taxpayers.

When considering our results, it is important to keep in mind that in our effort to construct an "apples to apples" comparison, we made a number of simplifying assumptions that actually reflected more favorably on DC plans. For instance, we did not model any asset leakage from the DC plan before retirement, through loans or early withdrawals nor any terminations of employment under either plan. We also assumed that individuals followed a sensible "goldilocks-like" withdrawal pattern in retirement – not too fast, not too slow, but just right. We used conservative estimates of the difference in actual investment returns between DB and DC plans. And, we used a 90th percentile life expectancy to project required accumulations in the DC plan, rather than "full" life expectancies. Thus, if anything, our analysis likely underestimates the cost of providing benefits in a DC plan and thereby understates the cost advantages of DB plans.

Due to the built-in economic efficiencies of DB plans, employers and policy makers should continue to carefully evaluate claims that "DC plans will save money." As discussed, benefit generosity is a separate question from the economic efficiency of a retirement plan. While either type of plan can offer more or less generous benefits, DB plans have a clear cost advantage for any given level of retirement benefit. Considering the magnitude of the DB cost advantage, the consequences of a decision to switch to a DC plan could be dramatic for employees, employers, and taxpayers.

While either type of plan can offer more or less generous benefits, DB plans have a clear cost advantage for any given level of retirement benefit. Considering the magnitude of the DB cost advantage, the consequences of a decision to switch to a DC plan could be dramatic for employees, employers, and taxpayers.

Finally, policymakers should consider proposals that can strengthen existing DB plans and promote the adoption of new ones. When viewed against the backdrop of workers' increasing insecurities about their retirement prospects and the economic and fiscal challenges facing employers and taxpayers, now more than ever, policy makers ought to focus their attention and energy on this important goal. The very features that make DB plans attractive to employees drive cost savings for employers and taxpayers. In this way, DB plans represent a rare "win-win" approach to achieving economic security in retirement that should be recognized and replicated.

TECHNICAL APPENDIX: CALCULATING THE COST SAVINGS EMBEDDED IN DB PLANS

We calculate the cost, expressed as a level percent of payroll over a career, of achieving a target benefit in a typical DB plan and compare that with the cost of providing the same target benefit in a typical DC plan.

We begin by constructing a cohort of 1,000 newly-hired employees. For the purposes of simplicity, we give this cohort a common set of features. All newly hired employees are age 30 on the starting date of their employment and they are all female teachers. They work for three years and then take a two-year break from their careers to have and raise children. They return to work at age 35 and continue working until age 62. Thus, the length of the career is 30 years. By their final year of work, their salary has reached $50,000, having grown by 4.05% percent each year.

Modeling DB Plan Benefits and Costs

The DB plan provides a benefit in retirement equal to 1.85% of final average salary for each year worked. This represents the median benefit among DB plans covering public employees who are also covered by Social Security.[32] Final average salary is calculated on the basis of the final three years of one's career, which in this case is $48,079. Thus, the initial benefit in the DB plan is $26,684 per year or $2,224 per month.

The DB plan provides a cost of living adjustment that ensures the benefit maintains its purchasing power during retirement. Inflation is projected at 2.8% per year. Thus, each individual in our cohort will receive a benefit equal to 53% of her final year's salary that adjusts with inflation. This DB plan (in combination with Social Security) would allow an employee to meet generally accepted standards of retirement income adequacy, or roughly 83% of pre-retirement income.

DB plans typically offer married participants the ability to receive joint-and-survivor annuity benefits, whereby when the retiree dies, her spouse can continue to receive a monthly benefit that will last the spouse's lifetime. But the retiree pays the cost of this survivor's benefit. That is, the monthly benefit that would be payable on a single-life basis will be reduced by an actuarially determined factor to account for the fact that payments may continue if the retiree dies before her spouse. Therefore, for simplicity, we model all benefit payouts on a single-life basis (and do the same for the DC plan), using the RP-2000 Healthy Female Annuitants mortality table.

In order to model the contributions that are required to fund these benefits, we start by establishing expected investment returns. The DB plan is expected to achieve nominal investment returns of 8.01% per year, net of fees. We calculate a weighted average return, based on assumptions about asset allocation and returns for each asset class.

The DB plan follows a typical asset allocation of 2% in cash/liquid assets, 15% in treasuries/agency debt, 13% in corporate bonds, and 70% in equities and alternative assets. Our expected investment returns for each asset class are based on the projections prepared by the Office of the Actuary of the Social Security Administration to support analysis of the impact of private accounts by the President's Commission to Strengthen Social Security. The Commission's report described these assumptions as "conservative," noting that these assumptions are "much lower than that used in many academic and policy studies."[33] We expect cash/liquid investments to earn a nominal 2.8% per year, treasuries and agency debt to earn 5.8%, corporate bonds to earn 6.3%, and stocks and alternatives to earn 9.3%. Asset management fees of 0.25% are deducted from these returns, reflecting the average for DB plans in the public sector.[34]

Figure 10	% of Assets	Expected Annual Investment Return
Cash/Liquid Investments	2%	2.8%
Treasuries and Agency Debt	15%	5.8%
Corporate Bonds	13%	6.3%
Stocks and Alternatives	70%	9.3%
Less Asset Management Fees		-0.25%
Overall Portfolio		**8.0%**

On the basis of these inputs, we calculate the contribution that will be required to fund this benefit through the DB plan over the course of a career, and express this as a level percent of payroll. We find that the cost to fund the target retirement benefit, smoothed over a career, comes to 12.5% of payroll. Contributions could be made entirely by the employer, or, in the public sector, they may be split between the employer and employee.

Modeling DC Plan Benefits and Costs

Modeling the cost of the target retirement benefit in the DC plan requires some adjustments based on what we know about how DC plans differ from DB plans.

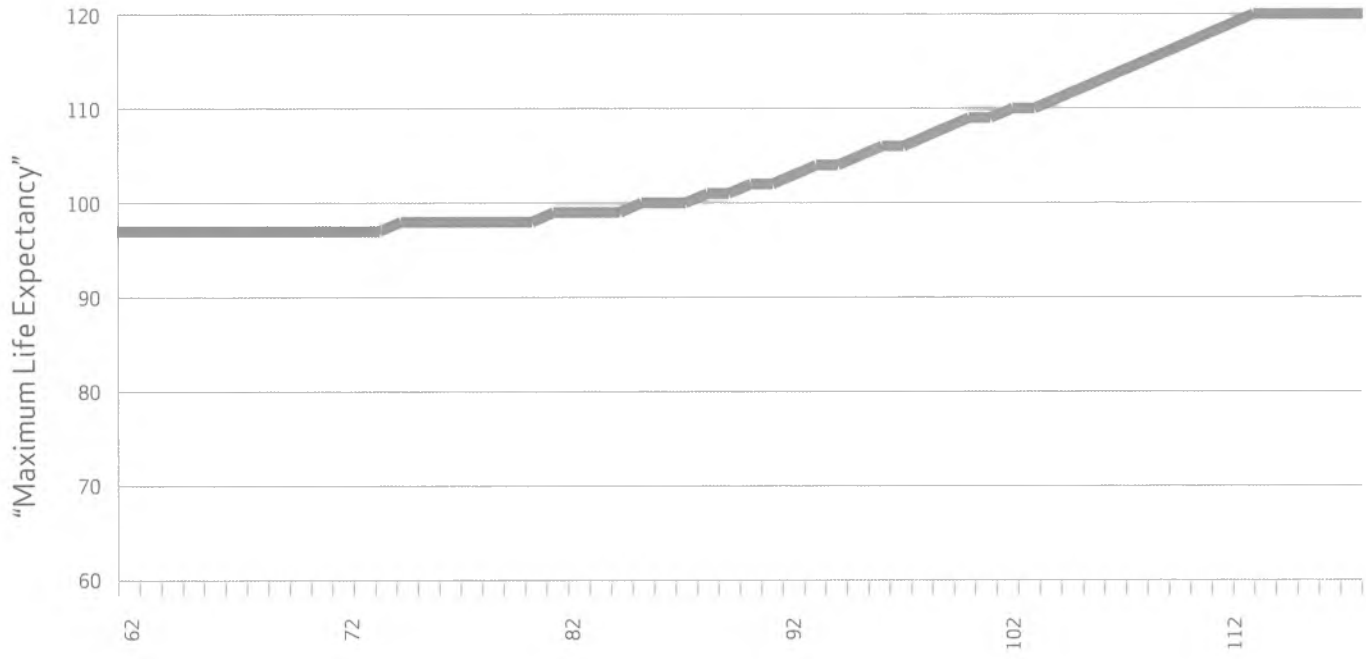
First, because employees are not provided with an annuity benefit at retirement under the DC plan, we determine the size of the lump sum amount that an individual would need to accumulate by their retirement date in order to fund a retirement benefit equivalent to that provided by the DB plan (including inflation adjustments) for a period of 35 years, or to age 97. This represents our estimate of the "maximum life expectancy." It corresponds to the age beyond which only 10% of individuals survive, and therefore is not a "true" measure of maximum life expectancy. In fact, our mortality table indicates that one individual out of 1,000 will survive to 110. This simplifying assumption is intended to be more realistic (that most individuals will be satisfied with a 90% chance of not outliving their money, rather than a 100% chance). Using a 90th percentile life expectancy of 97, rather than the true maximum life expectancy will reduce the cost of providing the target benefit under the DC plan, but will also mean that individuals with exceptionally long lives will experience a reduced standard of living, compared to what they would experience under a DB plan.

Of course, those 10% of individuals who do survive beyond age 97 would see their standard of living drop quite dramatically once their DC accounts were depleted. In reality, individuals would be likely to respond to a long life by gradually reducing their withdrawals from the plan to avoid the possibility of having their retirement income reduced to zero. For this reason, we assume that once an individual reaches age 90, she reduces annual withdrawals from the plan. We assume that the individual monitors her "maximum life expectancy" each year, and whenever it increases by a year, she adjusts her withdrawals accordingly. Figure 11 illustrates this process.

To model the impact of the shift to a more conservative portfolio allocation, starting at age 62, we have individuals begin to shift their portfolio allocation to gradually reduce the share held in equities and increase the holdings of cash and liquid investments, treasuries and agency debt, and corporate bonds. At age 62, the portfolio holds 65% of assets in equities; by age 72 it holds 49%; by age 82, it holds 33%; by age 92, it holds 16%; and so on. This drives the expected return on the baseline portfolio down from 8% per year to 6% per year in nominal terms.

The investment/withdrawal strategy we model is not the result of an optimization rule, rather it follows ad hoc rules. The investment strategy is modeled as a "glide path," along which the retiree gradually reduces her exposure to equities. Withdrawals are designed to mimic DB plan payouts, at least in the early years of retirement, declining in later years. Work by William Sharpe and colleagues suggests that an optimal approach would integrate investment and withdrawal

Figure 11: **"Maximum Life Expectancy" increases as one gets older**



strategies. Specifically, they find that a constant withdrawal rate must be paired with a riskless investment strategy in order to be optimal for an individual.[35] However, a post-retirement asset allocation entirely concentrated in risk-free assets would dramatically drive up the cost of the DC plan. Thus our model's ad hoc investment and withdrawal strategies would tend to understate the cost advantage of DB plans.

We use conservative estimates of the differences in DB and DC plan costs and expected returns. We assume that a large, sophisticated employer will seek to use whatever economies of scale are available to negotiate fees down on both types of plans. To capture the effect of lower DC plan returns over a lifetime, due to fee differentials and superior investment decisions, we model a 100 basis point disadvantage in net return as compared with DB plan returns. While this is slightly higher than the estimates of Munnell and Sunden,[36] it is lower than the more recent estimates of Flynn and Lum[37] and Watson Wyatt.[38] Thus, we assume individuals achieve a 7% nominal rate of return during their working years. This 100 basis point differential persists into the retirement years. So the return disadvantage compounds on top of the shift in portfolio allocation. (We calculate the impact of each effect separately to avoid double counting.) As a result, the expected return on the portfolio gradually declines from 7% per year to 5% in nominal terms.

On the basis of these inputs, we calculate the contribution that will be required to fund this benefit through the DC plan over the course of a career, and express this as a level percent of payroll. We find that the cost to fund the target retirement benefit, smoothed over a career, comes to 22.9% of payroll in the DC plan.

Future extensions of our model might incorporate additional differences between DB and DC plans. For example, one could analyze the impact of "leakage" of assets from DC plans through loans or early withdrawals, two features which are rare in DB plans. Pre-retirement death and disability benefits, which are a common feature of DB plans, but not DC plans, could be considered as well. Finally, the model could be extended to capture cyclical and idiosyncratic variances in investment returns. That is, one could analyze the effects of ups and downs in financial markets and the impact that these have on investment returns and costs in both DB and DC plans over a career. Also, the fact that in DC plans some individuals will have "better luck" with investing than others means that individuals' retirement prospects will exhibit a wider dispersion than what is predicted by our model.

ENDNOTES

1 The most common type of DC plan in the private sector is the 401(k) plan. Public sector employees often save for retirement in 403(b) plans or through 457 plans. These nomenclatures reflect the sections of the Federal tax code that spells out the rules governing these plans.

2 Both types of plans also share some common features. For instance, they both are employment-based plans that make preparing for retirement easier than if employees had to tackle the job completely on their own. Both DB and DC plans benefit from tax incentives designed to encourage retirement preparedness. And both types of plans are governed by laws designed to protect employees and their benefits.

3 The benefit factor could also be a function of a worker's earnings over their entire career (a so-called "career average plan.") Or, the factor could be a flat dollar amount: for example, the plan will pay a monthly benefit equal to $50 per year of service, so that a 30 year employee would have a benefit of $1,500 per month. "Flat dollar" plans are primarily seen among blue-collar workers in the private sector.

14 Another factor is particularly important in the discussion of investment – the degree to which contributions and investment earnings remain in the plan until retirement. This is generally not an issue in DB plans, but is a concern in most DC plans, where employees can borrow from their retirement account or take money out before retirement age (with the attendant tax penalties). This problem of "leakage" from DC plans has been well-documented and is receiving more attention by researchers and policy-makers. (See Weller, C., and J. Wenger. 2008. "Robbing Tomorrow to Pay for Today: Economically Squeezed Families are Turning to their 401(k)s to Make Ends Meet." CAP Economic Policy Report. Washington, DC: Center for American Progress.)

15 One basis point is equal to 0.01%. Thus 25 basis points is equal to one-quarter of one percent, or 0.25%.

16 Munnell, A.H. & M. Soto. 2007. "State and Local Pension Plans are Different from Private Plans." Center for Retirement Research State and Local Pensions, No. 1. Boston College.

17 This large fee gap may be attributable to several factors. One is plan size. Since most public pension plans tend to be very large compared to many private sector DC plans, their lower fees may be attributable to scale economies. Another factor may be differences in asset mix, which analysts find to be a key driver of asset management fees. However, here the direction of the effect is not entirely predictable. Although DB plans invest in less expensive index funds more often than DC plans, they also are

more likely to invest in assets that involve higher expenses (but also higher returns), such as real estate, private equity, or hedge funds. (Flynn, C. 2008. Author's correspondence.)

30 *The Economist*, op. cit.

31 There is an additional consideration for taxpayers we do not explore. Qualified retirement plans involve a significant amount of foregone revenue to federal and state treasuries, because taxes on contributions and investment earnings are deferred. To illustrate, the exclusion of DB and DC plan contributions and income from Federal tax involved a loss of $108.6 billion in revenue in 2007. By comparison, the mortgage interest tax deduction cost $73.7 billion. (See Joint Committee on Taxation. 2007. *Estimates of Federal Tax Expenditures for Fiscal Years 2007-2011*. Washington, DC: US GPO. September 24.) Since our analysis demonstrates that DC plans require more assets to be accumulated to deliver the same amount of retirement benefits, it is likely that the implicit tax subsidy to deliver $1 in retirement benefits through a DC plan exceeds that provided to deliver $1 in benefits through a DB plan. Valuing this impact is beyond the scope of this report, however, and analysis this issue must be left for future research.

PTA PENSION TRUSTEE ADVISORS

Alaska Senate State Affairs Hearing on SB 121

William B. Fornia

September 15, 2011

William B. Fornia Credentials

- Highest Actuarial Credentials
  - Fellow of the Society of Actuaries (1986)
  - Enrolled Actuary under ERISA (1984)
  - Member of the American Academy of Actuaries (1983)
  - Active in national actuarial organizations
- Author and Frequent Speaker
  - "A Better Bang for the Buck" (with National Institute on Retirement Security), 2008
  - "New Developments in DB/DC Plans", National Council on Teacher Retirement, Anchorage, 2002
  - Frequent Testimony to Legislatures and City Councils
  - Regular Expert Witness

Sample Work History

- Corporate Actuary for Boeing 1980-1984
- Alaska related experience
  - ARMB first ongoing review actuary 2005-2006
  - Audited Alaska PERS/TRS actuarial valuations 2009
  - Former leader of Buck Consulting's Denver Retirement Practice
- Consulting services for 22 statewide retirement systems in Alaska, Colorado, Missouri, North Dakota, Oklahoma, Puerto Rico, Utah, Texas, Wyoming and others.
  - Served as system actuary for most of these (including CO, MO, ND, OK, PR, UT, WY, Houston)
- Expert Testimony and Consulting for Pension Systems, Governments, and Labor Groups
- Other clients have included the US Department of State, Cities of Baltimore, Oakland and Philadelphia, IBM, US WEST and Ford Motor Company

Agenda

- Advantages of Defined Benefit Plans
- Financial Analysis of Reversion to Defined Benefit Plan
- Considerations with SB 121 Fiscal Note
- Discussion

Findings

- SB 141 did not solve unfunded liability
- DB plans are more economical for Alaska
- DCR costs are comparable to latest tier DB costs
- Can structure reversion to DB at very little or no additional cost

Why are Defined Benefit Plans more Appropriate for Public Servants than Defined Contribution Plans?

- By their nature, Defined Benefit (DB) plans provide workers what they need for retirement
- DB plans deliver benefits more efficiently than Defined Contribution (DC) plans, thereby saving money
- Particularly necessary because vast majority of Alaska public servants not covered by Social Security

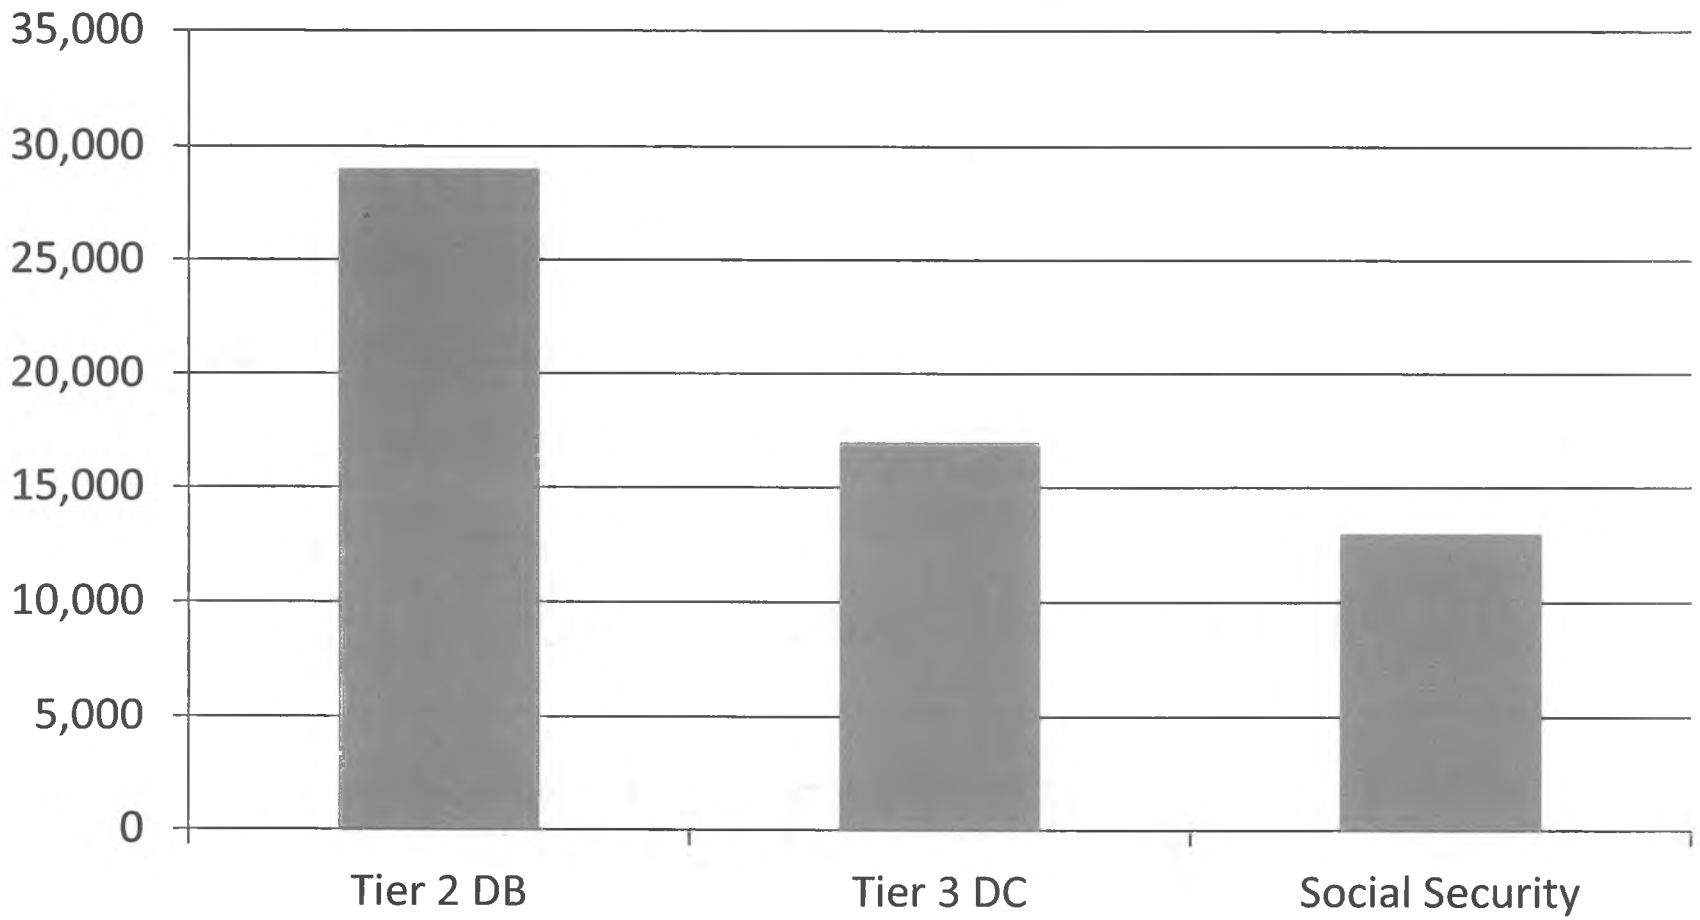
Why DB? – Secure Retirement Benefit

- Because DB plans "define" the "benefit" received by retirees, they can ensure appropriate benefit levels
- Individuals do not need to be concerned with investment volatility under DB plans
- Individuals do not need to be concerned with outliving their savings under DB plans
- A reduction in expected investment returns will require greater contributions to be made to the plan in order to achieve the same target benefit.

Benefits Available from DCR Program are Substantially Lower than from Latest DB Tier

	Teachers	Police & Fire	Other PERS
Hire Age	34	31	37
Retirement Age	59	56	60
Years of Service	25	25	23
DB Benefit as Percent of Final Average Compensation (defined under the terms of the plan)	58%	63%	55%
DCR Benefit as Percent of Final Average Compensation (calculated based on assumptions above)	34%	30%	30%
Reduction of Benefit % due to DCR program	24%	33%	25%

Illustration of Hypothetical Teacher Benefits - $50,000 Final Average Salary



PTA

Why DB? – Economic Impact

- Pensions account for more than $1 billion in Alaskan economy
- Retirement System provides health care benefits
- DB can provide inflation protection
- Provide benefits consistent with objective of worker retention and job stability
- State is "Payer of Last Resort" – DB Plan Eliminates this Risk

DB Plans Provide a "Better Bang for the Buck"

- The DB approach saves money compared to the DC approach. Three reasons …

1. DB pension plans pool "longevity risks"

2. DB pension plans can maintain a better diversified portfolio because, unlike individuals, they do not age

3. DB pension plans achieve better investment returns because of professional asset management and lower fees

Why DB? – More Economically Efficient

- ***Longevity Risk Pooling***
  - DB plans better manage longevity risk, or the chance of running out of money in retirement
  - DB plans avoid the "over-saving" dilemma and do more with less
- ***Maintenance of Portfolio Diversification***
  - DB plans are able to take advantage of the enhanced investment returns that come from a balanced portfolio throughout an individual's lifetime
- ***Superior Returns***
  - DB plans, which are professionally managed, achieve greater investment returns versus those of individual accounts

1st Strength of DB Plans
Longevity Risk Pooling

- Because they cover large numbers of retirees, DB plans can pay out over the *average* life expectancy, not *maximum* life expectancy

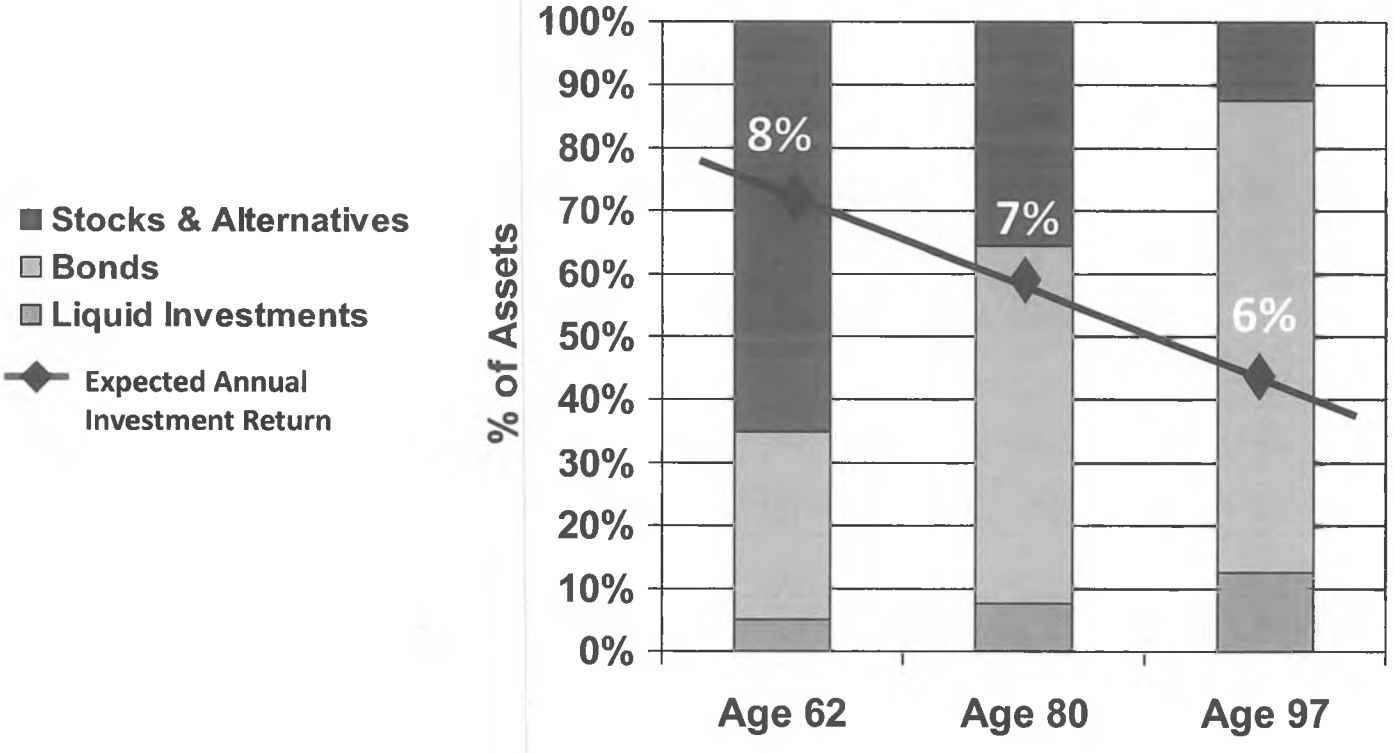
- An individual under a DC plan will want to avoid the risk of running out of money if they live a long life

- Because individuals must plan for a maximum life expectancy, much more money must be accumulated in a DC plan, compared to a DB plan

2nd Strength of DB Pension Plans
More Effective Portfolio Diversification

- DB plans can maintain a well diversified portfolio over time – unlike individuals, DB plans do not age
- To protect against market shocks, individuals in DC plans are advised to shift toward more conservative investments as they age, sacrificing some expected return
- Lower returns mean more money must be contributed to deliver the same level of benefits

As Individuals Shift DC Portfolio Allocation, Expected Return Reduced



3rd Strength of DB Pension Plans Pooled, Professionally-Managed Assets

- Assets in DB plans are professionally managed. Despite their best efforts, individuals tend to underperform when it comes to investing in DC plans
- Pooled investments in DB plans can lower expenses
  - Large group pricing negotiation
  - Avoid expenses of individual recordkeeping, investment education, investment transactions
- Studies generally have shown that DB plan returns outperform DC plans by at least 1% annually
  - Towers Watson 1995-2008 large plans 1.27% outperformance
  - CEM Benchmarking 1998-2005 found 1.80% difference
  - Recent Alaska experience shows even larger DC shortfall
  - Even a mere 1% differential generates tremendous efficiencies – more than 20%

What about Unfunded Liabilities?

- Unfunded Liability has grown by more than $5 billion since passage of SB 141
  - "Unfunded Liability" is attributable to prior benefits, not future benefits
  - SB 141 was not designed to solve Unfunded Liability
- Reversion to DB not anticipated to increase unfunded liabilities
  - To the extent that actuarial assumptions' conservatism is borne out, would actually decrease unfunded liabilities
- DB systems are advance funded, not left to future generations

Findings

- SB 141 did not solve unfunded liability
- DB plans are more economical for Alaska
- DCR costs are comparable to latest tier DB costs
- Can structure reversion to DB at very little or no additional cost

Challenge is to Design DB Plan at Costs Comparable to DC Plan

- The actuary for the Alaska Department of Administration Division of Retirement Benefits regularly reports on the financial condition of the Alaska Public Employees' Retirement System (PERS) and Alaska Teachers' Retirement System (TRS).
- These analyses are conducted primarily through an "actuarial valuation", which calculates the plans costs and liabilities.
- The actuary has calculated the Normal Cost under both the prior tier DB plans as well as under the DCR program.
  - "Normal Costs" are the cost of ongoing future benefits, not including cost to pay off "Unfunded Liability"
  - "Unfunded Liability" is attributable to prior benefits, not future benefits

Major implications of the proposal

- Pension benefits will revert to the prior defined benefit plan tiers
- Retiree health benefits will be stronger than those under DCR, but not as strong as those provided under the latest tier DB plans.

Contributions for Various Members

- Peace Officers and Firefighters in PERS would contribute 7.50% of pay
  - Same as PERS Tier 3
- Other PERS members would contribute 6.75%;
  - Same as PERS Tier 3
- TRS members would contribute 8.65%
  - Same as TRS Tier 2

Retiree Medical Coverage

- Those individuals would be eligible to receive retiree major medical coverage without having to pay premiums, under the following conditions:
  - For teachers, new retirees are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 8 years of service.
  - For peace officers and firefighters, new retirees are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
  - For other PERS members, new retirees are eligible with 30 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.

Cost Comparison Estimates - Teachers

Teachers Retirement System	DB Plan Tier 2	DCR Plan Tier 3	Proposed Tier 4
Total Retirement Normal Cost (including refunds)	11.39%	NA	11.39%
Member Contributions	(8.65%)	(8.00%)	(8.65%)
Net Employer Retirement Normal Cost	2.74%	NA	2.74%
DC Employer Contribution Rate	NA	7.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	0.05%	NA
Medical Normal Cost Rate	5.33%	0.64%	4.52%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	8.07%	10.69%	7.26%
DCR Payroll during FY 2011	$59,750,000	$59,750,000	$59,750,000
Total Employer Cost on FY 2011 Basis	$4,800,000	$6,400,000	$4,300,000

Cost Comparisons – PERS Police Officers and Firefighters

Public Employees Retirement System – Peace Officers & Firefighters	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost (including refunds)	12.30%	NA	12.30%
Member Contributions	(7.50%)	(8.00%)	(7.50%)
Net Employer Retirement Normal Cost	4.80%	NA	4.80%
DC Employer Contribution Rate	NA	5.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	1.04%	NA
Medical Normal Cost Rate	5.90%	0.43%	5.35%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	10.70%	9.47%	10.15%
DCR Payroll during FY 2011	$21,192,000	$21,192,000	$21,192,000
Total Employer Cost on FY 2011 Basis	$2,300,000	$2,000,000	$2,200,000

Cost Comparisons – Other PERS Members

Other Public Employees Retirement System Members	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost (including refunds)	9.58%	NA	9.58%
Member Contributions	(6.75%)	(8.00%)	(6.75%)
Net Employer Retirement Normal Cost	2.83%	NA	2.83%
DC Employer Contribution Rate	NA	5.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	0.16%	NA
Medical Normal Cost Rate	7.00%	0.56%	3.60%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	9.83%	8.72%	6.43%
DCR Payroll during FY 2011	$200,739,000	$200,739,000	$200,739,000
Total Employer Cost on FY 2011 Basis	$19,700,000	$17,500,000	$12,900,000

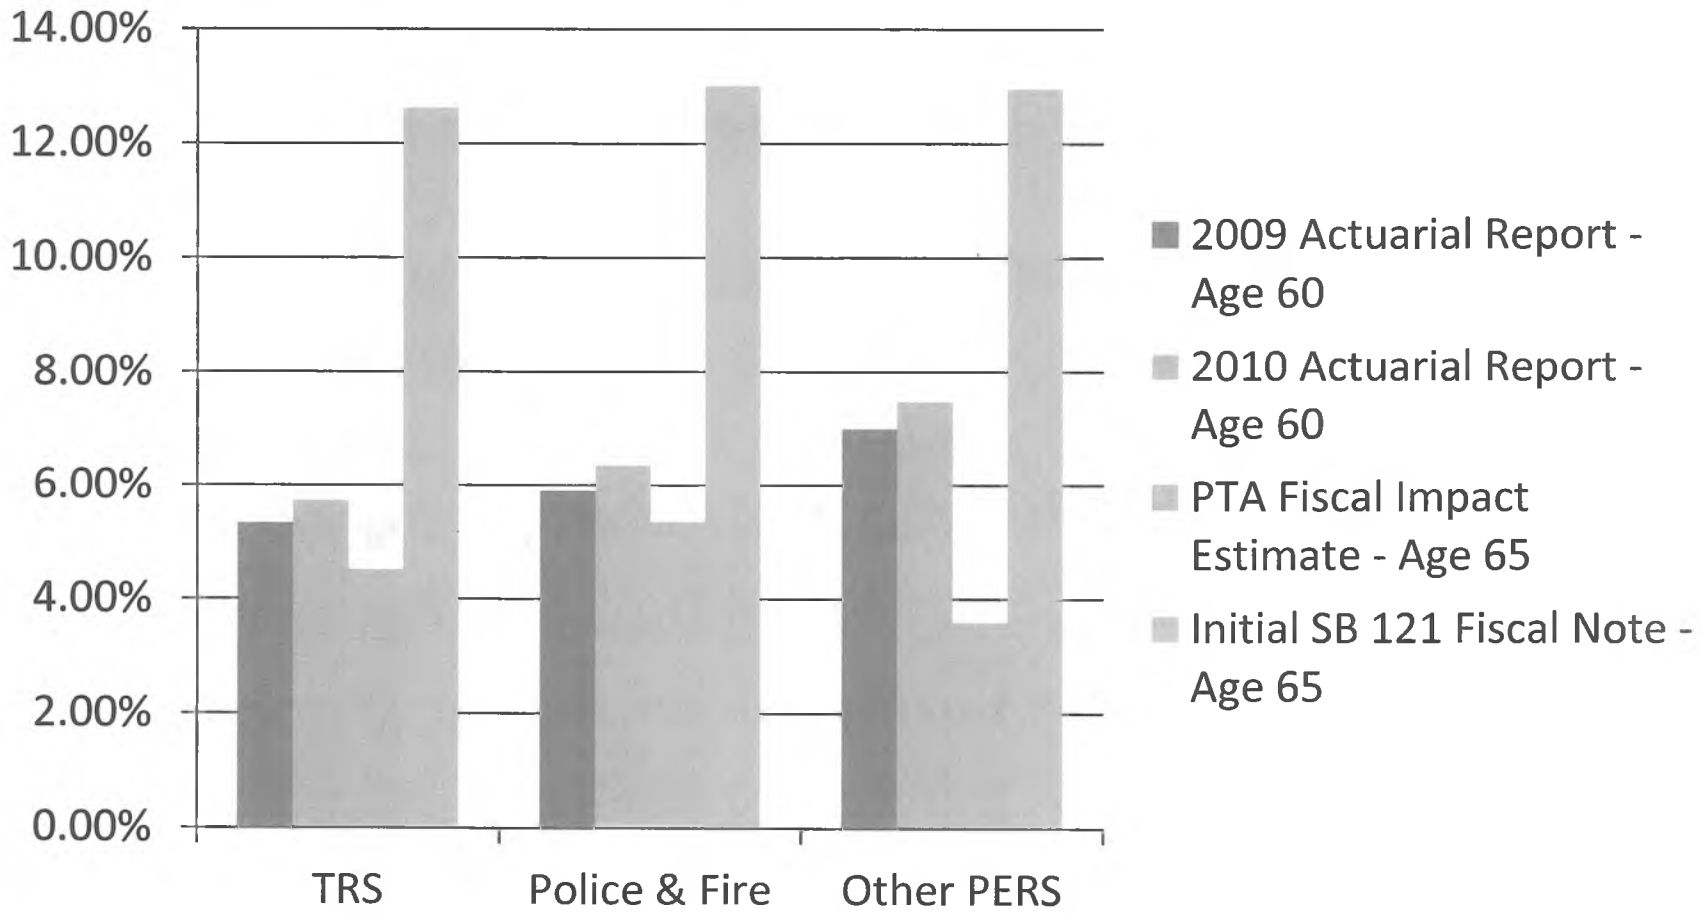
Results from Cost Comparison

- Stronger pension benefits through the return of the Defined Benefit plan for members hired since 2006.
- It would provide improved health care plan benefits, but no future HRA contributions.
- In total, employer costs would fall by about $6 to $9 million.

Initial Fiscal Note

- Fiscal Note Reported Sharply Higher Costs
- Costs Range From 5% to 8% of pay
- Fiscal Note Supporting Documents Indicated a Retiree Healthcare "Normal Cost Rate" of 12% to 15% of pay
  - Yet 2010 reported costs for higher benefits was less than 7.5%
  - We're asking for lower healthcare benefits (than prior DB), not higher healthcare benefits
- Fiscal Note was Withdrawn
- Expect Revised Fiscal Note to Report Much Less Cost

Comparison of Healthcare Normal Costs



Conclusions

- SB 141 did not solve unfunded liability
- DB plans are more economical for Alaska
- DCR costs are comparable to latest tier DB costs
- Can structure reversion to DB at very little or no additional cost

PTA PENSION TRUSTEE ADVISORS

Alaska Legislature Discussion of SB 121

William B. Fornia

February 29 - March 1, 2012

Update Since September, 2011

- I presented to Senate State Affairs September, 2011 on SB 121
- Bill has been modified since then to achieve cost neutrality
- This presentation is updated and made available for background information only
- For more brief summary of SB 121, please see next three pages
- For complete background, including September 2011 Senate State Affairs hearing materials as updated, review remaining pages

SB 121 – Background

- Two general types of retirement programs
  - Defined Benefit (DB): Annual pension or health care benefit are fixed in statute, contributions based on actuarial calculations
  - Defined Contribution (DC): Periodic contribution to account is statutory, benefits depend on what account accumulations will provide
- SB 141 closed defined benefit retirement and health benefits to those hired after July 1, 2006
  - Workers hired since then have DC accounts only
  - Did not solve unfunded liability problem

Key Features of SB 121

- Gives employees a choice between DC and DB
  - DC tends to be preferred by shorter service & younger workers
  - DB still very popular, particularly for full career workers
- SB 121 structures DB to be cost neutral
  - Costs will not be more than current tier DC program
  - Worker contributions same as current DC tier
  - SB 121 also shifts much of the risk from the employers to the workers
  - Healthcare benefit will be reduced if employer normal costs increase

Other motives for SB 121

- Current DC structure facilitates short service workers leaving Alaska public service for DB plan after a few years of service
- Alaska public servants not covered by Social Security
  - Alaska may be largest employer in America with workers not covered by any safety net DB plan
- Retirement in Alaska is good for the State economy

Update Since September, 2011

- Following pages are an update of full September 2011 Senate State Affairs hearing materials

William B. Fornia Credentials

- Highest Actuarial Credentials
  - Fellow of the Society of Actuaries (1986)
  - Enrolled Actuary under ERISA (1984)
  - Member of the American Academy of Actuaries (1983)
  - Active in national actuarial organizations
- Author and Frequent Speaker

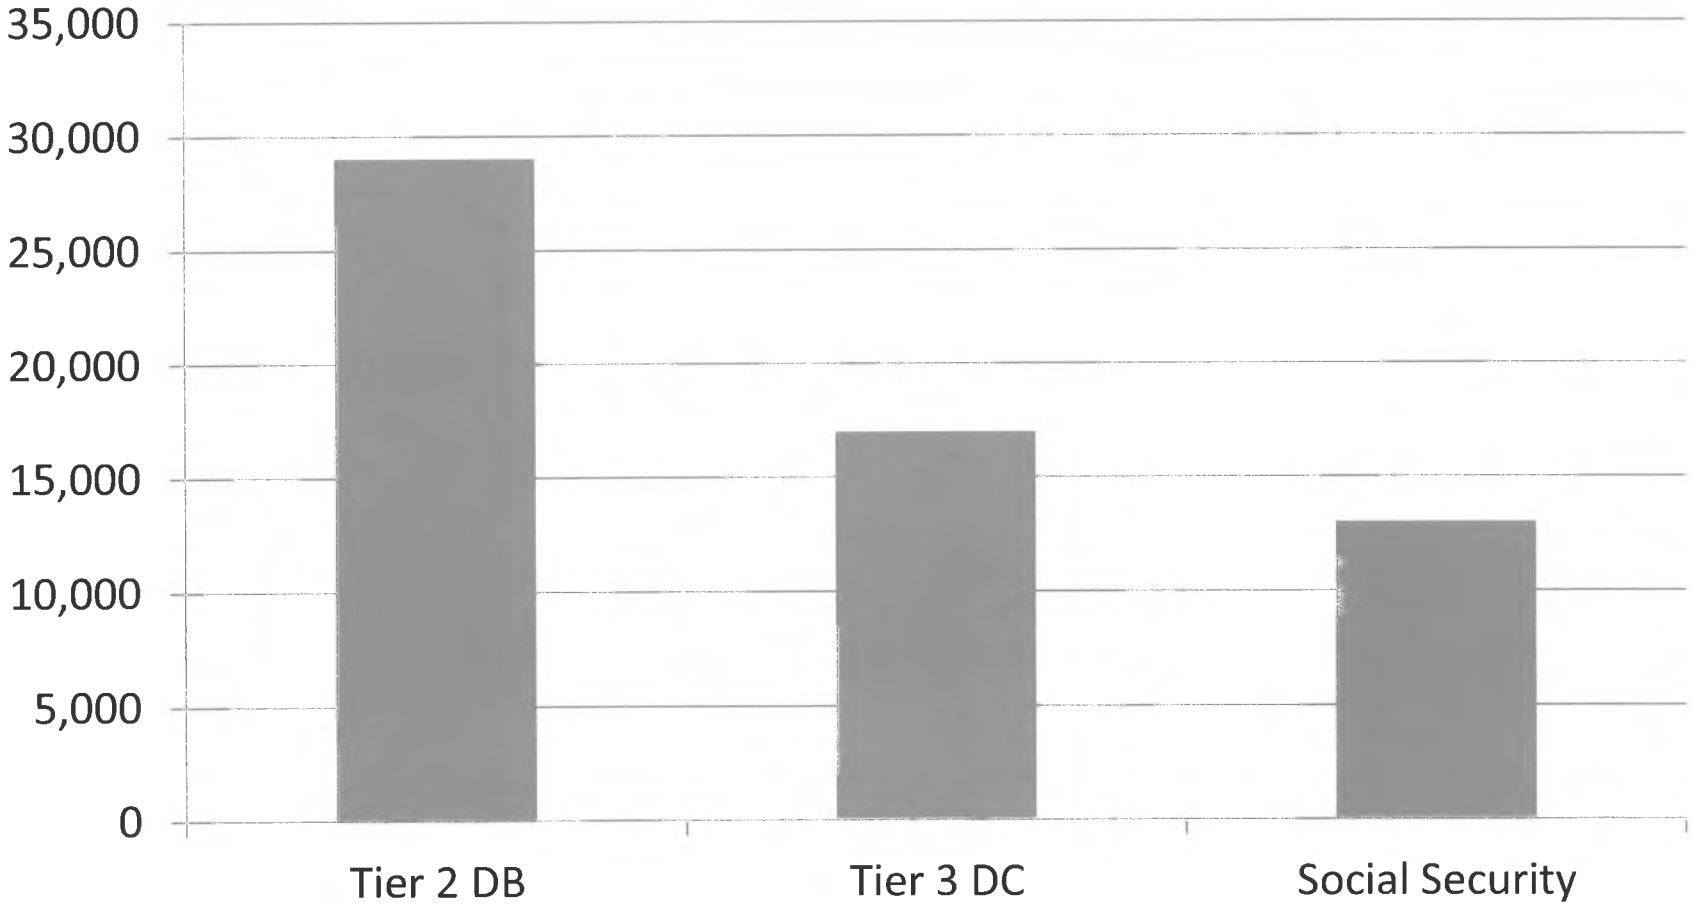
DCR Benefit as Percent of Final Average Compensation (calculated based on assumptions above)	34%	30%	30%
Reduction of Benefit % due to DCR program	24%	33%	25%

Illustration of Hypothetical Teacher Benefits - $50,000 Final Average Salary



Why DB? – Economic Impact

- Pensions account for more than $1 billion in Alaskan economy
- Retirement System provides health care benefits
- DB can provide inflation protection
- Provide benefits consistent with objective of worker retention and job stability
- State is "Payer of Last Resort" – DB Plan Eliminates this Risk

DB Plans Provide a "Better Bang for the Buck"

- The DB approach saves money compared to the DC approach. Three reasons …

1. DB pension plans pool "longevity risks"

2. DB pension plans can maintain a better diversified portfolio because, unlike individuals, they do not age

3. DB pension plans achieve better investment returns because of professional asset management and lower fees

Why DB? – More Economically Efficient

- ***Longevity Risk Pooling***
  - DB plans better manage longevity risk, or the chance of running out of money in retirement
  - DB plans avoid the "over-saving" dilemma and do more with less
- ***Maintenance of Portfolio Diversification***
  - DB plans are able to take advantage of the enhanced investment returns that come from a balanced portfolio throughout an individual's lifetime
- ***Superior Returns***
  - DB plans, which are professionally managed, achieve greater investment returns versus those of individual accounts

1st Strength of DB Plans
Longevity Risk Pooling

- Because they cover large numbers of retirees, DB plans can pay out over the *average* life expectancy, not *maximum* life expectancy

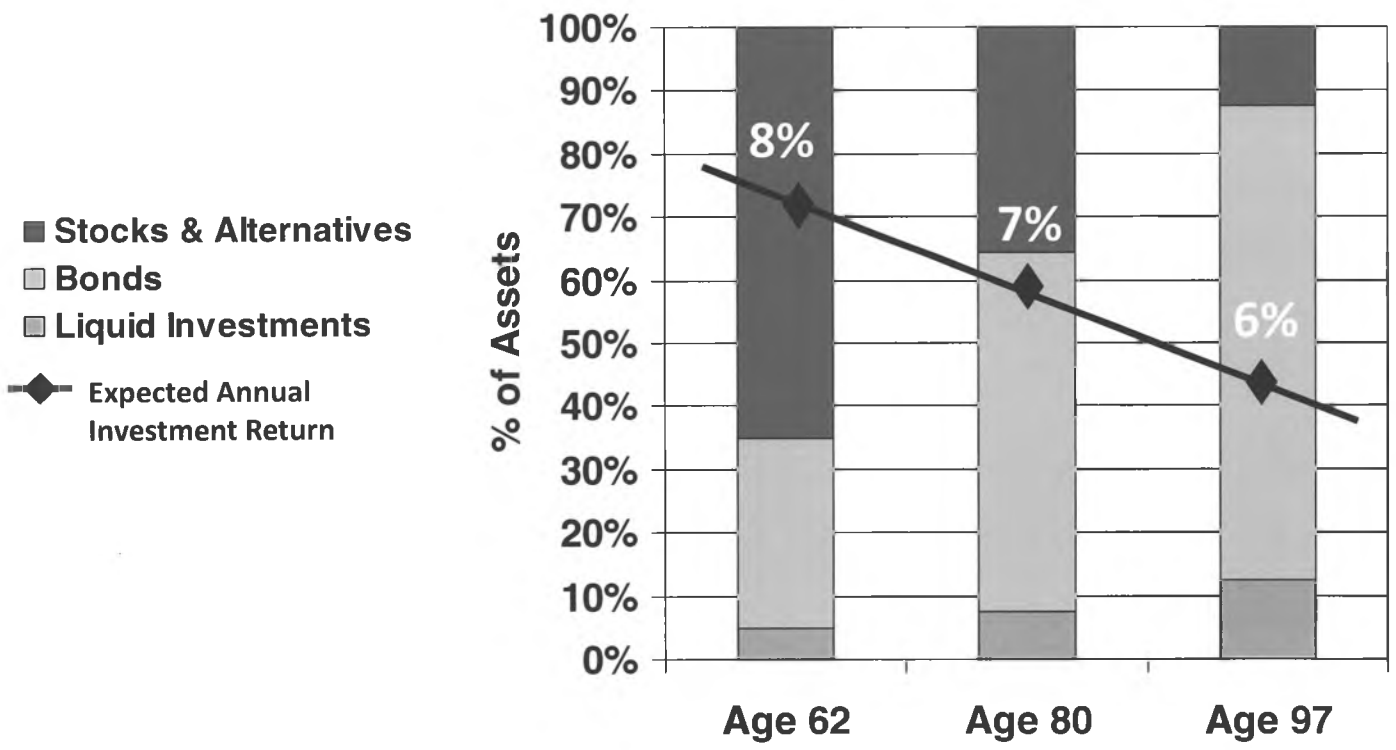
- An individual under a DC plan will want to avoid the risk of running out of money if they live a long life

- Because individuals must plan for a maximum life expectancy, much more money must be accumulated in a DC plan, compared to a DB plan

2nd Strength of DB Pension Plans
More Effective Portfolio Diversification

- DB plans can maintain a well diversified portfolio over time – unlike individuals, DB plans do not age
- To protect against market shocks, individuals in DC plans are advised to shift toward more conservative investments as they age, sacrificing some expected return
- Lower returns mean more money must be contributed to deliver the same level of benefits

As Individuals Shift DC Portfolio Allocation, Expected Return Reduced



3rd Strength of DB Pension Plans Pooled, Professionally-Managed Assets

- Assets in DB plans are professionally managed. Despite their best efforts, individuals tend to underperform when it comes to investing in DC plans
- Pooled investments in DB plans can lower expenses
  - Large group pricing negotiation
  - Avoid expenses of individual recordkeeping, investment education, investment transactions
- Studies generally have shown that DB plan returns outperform DC plans by at least 1% annually
  - Towers Watson 1995-2008 large plans 1.27% outperformance
  - CEM Benchmarking 1998-2005 found 1.80% difference
  - Recent Alaska experience shows even larger DC shortfall
  - Even a mere 1% differential generates tremendous efficiencies – more than 20%

What about Unfunded Liabilities?

- Unfunded Liability has grown by more than $5 billion since passage of SB 141
  - "Unfunded Liability" is attributable to prior benefits, not future benefits
  - SB 141 was not designed to solve Unfunded Liability
- Reversion to DB not anticipated to increase unfunded liabilities
  - To the extent that actuarial assumptions' conservatism is borne out, would actually decrease unfunded liabilities
- DB systems are advance funded, not left to future generations

Findings

- SB 141 did not solve unfunded liability
- DB plans are more economical for Alaska
- DCR costs are comparable to latest tier DB costs
- Can structure reversion to DB at very little or no additional cost

Challenge is to Design DB Plan at Costs Comparable to DC Plan

- The actuary for the Alaska Department of Administration Division of Retirement Benefits regularly reports on the financial condition of the Alaska Public Employees' Retirement System (PERS) and Alaska Teachers' Retirement System (TRS).
- These analyses are conducted primarily through an "actuarial valuation", which calculates the plans costs and liabilities.
- The actuary has calculated the Normal Cost under both the prior tier DB plans as well as under the DCR program.
  - "Normal Costs" are the cost of ongoing future benefits, not including cost to pay off "Unfunded Liability"
  - "Unfunded Liability" is attributable to prior benefits, not future benefits
- SB 121 has been modified to address some cost concerns

Major implications of the proposal

- Pension benefits will revert to the prior defined benefit plan tiers
- Retiree health benefits will be stronger than those under DCR, but not as strong as those provided under the latest tier DB plans.

Contributions for Various Members

- Peace Officers and Firefighters in PERS would contribute 8.00% of pay
  - Same as PERS Tier 4
  - PERS Tier 3 is 7.50%
- Other PERS members would also contribute 8.00%;
  - Same as PERS Tier 3
  - PERS Tier 3 is 6.75%
- TRS members would also contribute 8.00%
  - Same as TRS Tier 3
  - TRS Tier 2 is 8.65%

Retiree Medical Coverage

- Retirees eligible to receive retiree major medical coverage with subsidized premiums, under the following conditions:
  - Retired teachers are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 8 years of service.
  - Retired peace officers and firefighters are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
  - Other PERS retirees are eligible with 30 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
- Retiree share of premiums range from 10% to 30% based on service at retirement
  - This range may increase or decrease in future based on experience

Cost Comparison Estimates - Teachers

Teachers Retirement System	DB Plan Tier 2	DCR Plan Tier 3	Proposed Tier 4
Total Retirement Normal Cost (including refunds)	11.39%	NA	10.84%
Member Contributions	(8.65%)	(8.00%)	(8.00%)
Net Employer Retirement Normal Cost	2.74%	NA	2.84%
DC Employer Contribution Rate	NA	7.00%	NA
Medical Normal Cost Rate	5.33%	0.49%*	6.39%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	8.07%	10.49%	9.23%
DCR Payroll during FY 2011	$59,750,000	$59,750,000	$59,750,000
Total Employer Cost on FY 2011 Basis	$4,800,000	$6,300,000	$5,500,000

* Includes DCR Occupational Death and Disability

Cost Comparisons – PERS Police Officers and Firefighters

Public Employees Retirement System – Peace Officers & Firefighters	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost (including refunds)	12.30%	NA	12.08%
Member Contributions	(7.50%)	(8.00%)	(7.00%)
Net Employer Retirement Normal Cost	4.80%	NA	4.08%
DC Employer Contribution Rate	NA	5.22%*	NA
Medical Normal Cost Rate	5.90%	0.48%	6.00%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	10.70%	8.70%	10.08%
DCR Payroll during FY 2011	$21,192,000	$21,192,000	$21,192,000
Total Employer Cost on FY 2011 Basis	$2,300,000	$1,800,000	$2,100,000

* Includes DCR Occupational Death and Disability

Cost Comparisons – Other PERS Members

Other Public Employees Retirement System Members	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost (including refunds)	9.58%	NA	9.45%
Member Contributions	(6.75%)	(8.00%)	(8.00%)
Net Employer Retirement Normal Cost	2.83%	NA	1.45%
DC Employer Contribution Rate	NA	5.22%*	NA
Medical Normal Cost Rate	7.00%	0.48%	5.06%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	9.83%	8.70%	6.51%
DCR Payroll during FY 2011	$200,739,000	$200,739,000	$200,739,000
Total Employer Cost on FY 2011 Basis	$19,700,000	$17,500,000	$13,100,000

* Includes DCR Occupational Death and Disability

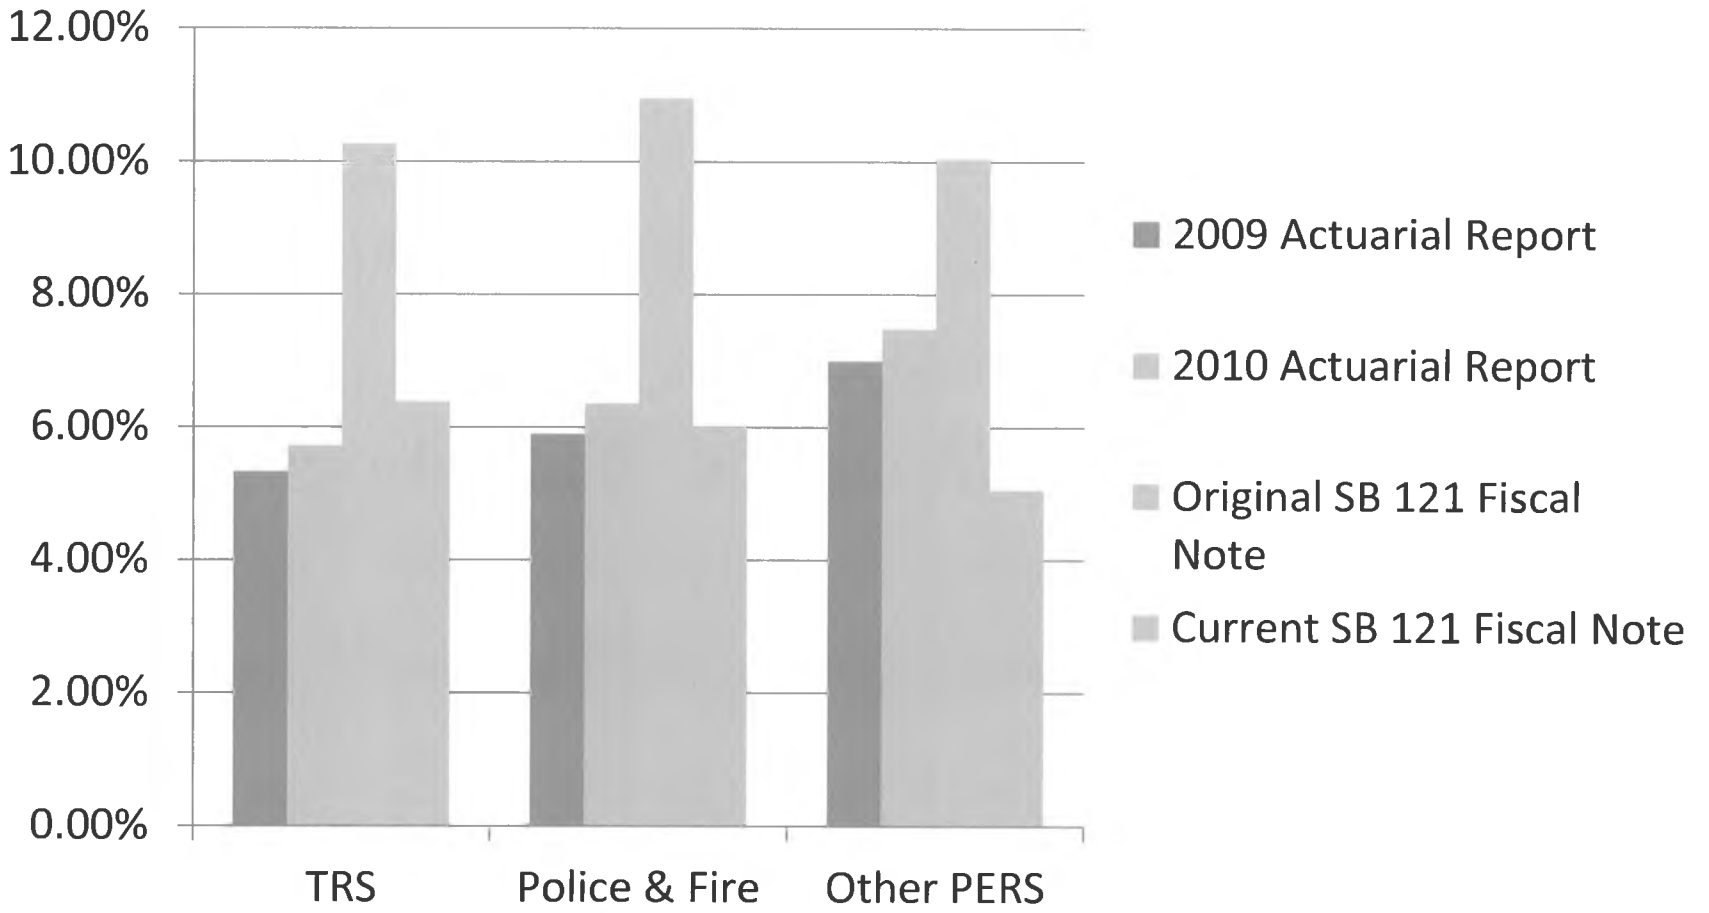
Results from Cost Comparison

- Stronger pension benefits through the return of the Defined Benefit plan for members hired since 2006.
- It would provide improved health care plan benefits, but no future HRA contributions.
- In total, employer costs would fall by about $5 million.

Summary of Revisions to SB121

- Initial SB 121 essentially was return to prior tier
  - But with choice
  - Members could use DCR accounts to get prior DB service
  - Pension costs were neutral
  - But health costs were not neutral due to anticipated increase in health care costs
- Revisions include
  - DB prior service can be purchased only, if DCR accounts not adequate, service limited
  - Reduced healthcare benefits
    - premium share rather than full premium paid
    - only for full career retirees or post-Medicare
    - if normal costs increase, sharing would be reduced

Comparison of Healthcare Normal Costs



Conclusions

- SB 141 did not solve unfunded liability
- DB plans are more economical for Alaska
- DCR costs are comparable to latest tier DB costs
- Can structure reversion to DB at very little or no additional cost

Senator Lesil McGuire

SB 129 "Child Care Centers in State Office Buildings"

Alaska is experiencing a severe lack of affordable child care. Our parents are unable to enter the workforce and our employers are unable to recruit and retain workers. Child care providers are overworked and underpaid, unable to lower their rates and continue providing service. Organizations across the state, from social service organizations to economic development organizations, are joining together to work on this very important issue. It is time we joined that effort. We must reaffirm our commitment to children and families.

Senate Bill 129 would allow child care centers to be located in office buildings owned or leased by the State of Alaska. Agencies interested in on-site child care facilities would work with the Department of Administration to determine need and feasibility. This bill provides important benefits to the State as an employer, employees and their children, and child care providers.

As an employer, the State will greatly benefit from the passage of this bill. Two decades of research shows that addressing the tension between work and life can improve recruitment and retention, reduce absenteeism and tardiness, and increase job satisfaction and loyalty. With recruitment and retention of employees being major concerns in today's economy, this bill will help to attract more prospective employees to the State. On-site child care will not only provide an important benefit to employees, resulting in fewer turnovers, it will also provide a higher quality of care for our children.

The time has come to provide the State, employees, and children with the resources necessary to succeed. I greatly appreciate your support of Senate Bill 129.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB129
2012 LEGISLATIVE SESSION

Analysis

The Department of Administration, Division of General Services believes the fiscal impact of this legislation cannot be accurately determined at this time. Some projected cost estimates follow:

Cost for adding child care to a new building housing 250 employees:
250 people X 175sf = 43,750sf = min. building size requiring child care
250 people = approx. 25 children
25 children would require approx. 2,000sf (80sf for each child)
2,000 sf child care construction cost is approx. $410,000 ($205/sf)
43,750sf building would cost approx. $16,625,000
Additional day care costs = 2.5%

Costs for adding a day care to the three most recently acquired state office buildings:
Atwood
253,294sf/175sf = 1447 people = 145 children
145 X 80sf = 11,600sf
11,600sf X $205 = $2,378,000

Palmer SOB
64,630sf/175sf = 369 people = 37 children
37 X 80sf = 2,960sf
2,960 X $205 = $606,800

Court Plaza Building
26,737sf/175sf – 149 people* = 15 children
15 X 80sf = 1,200sf
1,200 X $205 = $246,000
*would not trigger a child care center per the bill

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB129

Analysis

Risk Management (RM) would not be financially impacted by this proposed legislation.

Under proposed Section 1, (2), it states Sec 39.90.240 Selection of Providers. The child care provider would be selected by the department using procedures in AS 36.30 (State Procurement Code). It is assumed that any contract provider will be required to provide adequate insurance for the risks associated with operating a child care facility.

thread connecting early care & education to alaska

February 6, 2012

Senator Lesil McGuire
State Capital Room 125
Juneau, AK 99801

Dear Senator McGuire,

On behalf of thread, Alaska's Child Care Resource and Referral Network, I am pleased to offer our support for Senate Bill 129, which relates to approval and administration of child care services for the benefit of state employees.

thread promotes accessible, affordable and quality child care and early learning for Alaska's children. For many Alaska families, child care services and early learning programs help them stay employed. Recent studies have shown the early childhood workforce, which numbers close to 7,300 employees, helps keep over 32,000 Alaska residents employed. The reality of Alaska's workforce today is that over 60 percent of households with children have all of the adults in their home working.

However, finding quality and affordable child care in Alaska is often challenging. By offering this legislation, which would ensure new state offices reserve space for child care services, the Alaska State Legislature is taking a significant step in providing increased access to child care for many working families.

Thank you for the opportunity to offer our support.

Best Regards,

Stephanie Berglund

APPENDIX I: PROVIDER COSTS 19

- Juneau Child Care Centers—Average Revenues and Expenses 19
- Group Home Child Care—Average Revenues and Expenses 20
- Juneau Family Child Care Homes -Average Revenue & Expense 21

Introduction

The Juneau Economic Development Council (JEDC) recognizes the importance of child care to our community, especially to Juneau's working families. The purpose of this document is to assess the need for child care in Juneau; inventory the assets available to meet local child care needs; compile additional statistics related to Juneau child care including costs; and develop a problem analysis. Because child care is such a large issue, the scope of this initial document is limited and does not include after-school care, summer care, or part-time preschool programs.

- There are currently 2,200 Juneau children of child care age (0-5), including 1,540 with either both parents in the workforce or—for children in one-parent households—with their only available parent in the workforce.
- Juneau currently has 42 licensed and approved child care facilities with the capacity to serve 498 Juneau children five and under.
- Capacity is most limited for Juneau's youngest children. Of the 498 total full time child care slots in Juneau, 104 slots serve Juneau's 600 toddlers, and 44 serve Juneau's 400 infants.
- The waiting lists for many of these programs—including Juneau's largest centers, Gold Creek Child Care and Montessori—are up to two years, and in some cases even longer.
- The parents of more than 1,000 Juneau children appear to have found alternatives to State regulated child care programs. While unlicensed providers caring for more than four unrelated children are operating illegally, there appears to be minimal enforcement, few incentives to become licensed, and many unlicensed child care facilities in Juneau. In addition to care by unlicensed providers, children are cared for by grandparents; brought to work with parents; or are cared for in homes with four or less children, which is legal.
- Juneau children under six, their parents, and their providers account for 13.5 percent of the Juneau population.
- The average annual cost of child care in Juneau is $8,748 per child, and can be as high as $11,600.[1]
- Based on an estimated 2007 median family income, average child care costs accounts for 13 percent of a Juneau family's adjusted gross income, per child.
- Juneau's unemployment rate is 4.4 percent - with some employers noting that the local child care shortage prevents hiring staff.

[1] Average annual child care costs based on mid-2008 AEYC numbers for 365 children.

Needs Analysis

According to the US Census, there were 2,265 children under the age of six in Juneau in 2000. Of those children, 1,577—or 70 percent—lived in a household in which their parents were in the workforce, and so were presumably in need of child care. The Juneau Economic Development Council estimates that in 2008, there were 1,540 Juneau children in need of child care.[2]

Juneau Children Under Six by Parent in the Labor Force Status, 2000

Juneau Household Type	Number of Children Under 6, 2000	2008 Estimates	% of Juneau Children Under 6
Juneau children under six likely needing child care, as parents work	**1,577**	**1,540**	**70%**
In two parent household, both parents in the workforce	1,031		46%
In single parent household, parent in the workforce	546		24%
Juneau children under six with parent/s not in workforce	**688**	**660**	**30%**
In two parent household, one parent in the workforce	557		25%
In two parent household, neither parent in the workforce	50		2%
In single parent household, parent not in workforce	81		4%
Total Juneau children under six	**2,265**	**2,200**	**100%**

Source: 2000 US Census. Note: Due to rounding, numbers may not add up to 100%.

A higher percentage of Juneau children under the age of six are in need of child care than in the wider Alaska or US geographies. In Alaska and nationally, approximately 60 percent of all children under 6 are in households where all available parents work, and are presumably in need of child care, compared to 70 percent in Juneau (see following table).

[2] Estimates are based on Alaska Department of Labor data.

Children Under Six With Available Parents in the Workforce
Juneau, Alaska, US, 2007

Area	Children Under 6 Likely Needing Child Care - All Parents Work	Children Likely in Need of Child Care as a % of All Children Under Six
Juneau	**1,540**	**70%**
Alaska	**36,000**	**61%**
US	**14.5 million**	**62%**

Source: U.S. Census Bureau, American Community Survey, 2007, Tables B01001 and B11003; and JEDC 2007 estimates based on 2000 U.S. Census Bureau; AEYC, 2008 figures; and 2007 ADOL data.

Impacted Juneau Population

Juneau child care matters directly impact 13.5 percent of the local population, or 4,100 residents. Impacted residents include individuals under the age of six, parents or guardians of a child under six, or individuals employed in a licensed or approved child care facility.

Juneau Residents Impacted by Child Care, 2008

Group	Population	Percent of Total Juneau Population
Juneau Children Under 6	**2,200**	**7.3%**
Juneau Parents (or Guardians) with Children Under 6	**1,800**[3]	**5.9%**
Juneau Child Care Workers[4]	**100**	**0.3%**
Total	**4,100**	**13.5%**

Source: JEDC 2007 estimates, based on 2000 U.S. Census Bureau; AEYC, 2008 figures; and ADOL data.

Capacity

As of December 2008, Juneau had 42 licensed or approved Juneau child care facilities with the capacity to serve 498 full time children, including 148 children under the age of 30 months[5]. Therefore, regulated (licensed or approved) Juneau child care services have the capacity to serve one in nine Juneau infants, one in six Juneau toddlers, and one in three Juneau preschoolers.

[3] Includes 1,490 parents and 310 non-parent guardians.
[4] Includes only workers at full-time child care facilities. Figure does not include Headstart childcare workers, public school preschool workers, or child care licensing workers.
[5] Part time slots were combined to equal full time equivalents.

Juneau Full Time Child Care Capacity by Age, 2008
Licensed or Approved

Age Group	Population in Age Group	Total Full Time Child Care Slots	Ratio of Capacity to Population
Infants (under 12 months)	400	44	1:9
Toddlers (12-29 months)	600	104	1:6
Preschoolers (2 1/2 to 5)	1,200	350	1:3
Total	**2,200**	**498**	**1:4**

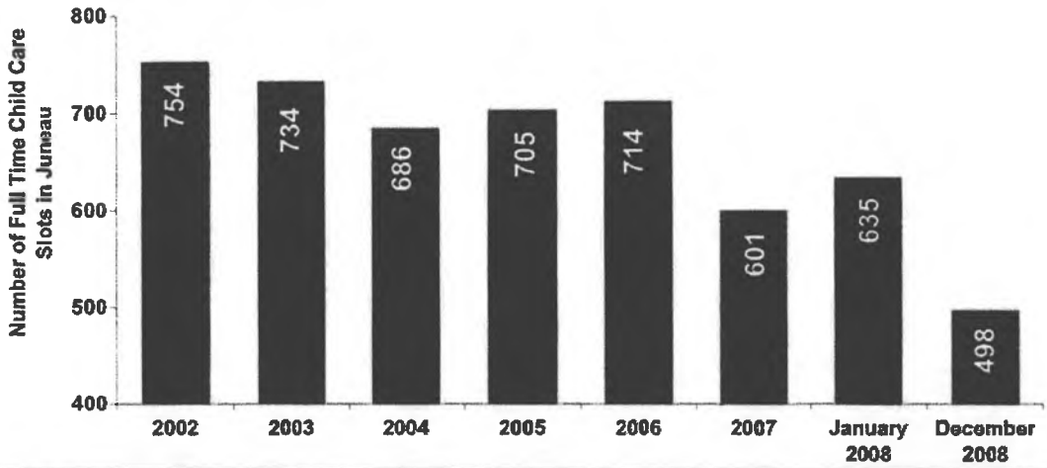
Source: Capacity Data: Association for the Education of Young Children – Southeast Alaska. Population Data: JEDC estimates based on Alaska Department of Labor population data.

Change in Capacity, 2002-2008

The current level of 498 child care spots (for children five and under) in Juneau represents a capacity decrease of 34 percent—or 256 slots—from 2002, and includes a 22 percent reduction in Juneau child care capacity during 2008 (see following table). Recent decreases in Juneau child care capacity follow state and regional trends. According to the Association for the Education of Young Children in Southeast Alaska (AEYC), statewide child care capacity has decreased in Alaska during 2008. Child Care Connection Program Manager, Stephanie Berglund cites several reasons for this trend. She says that the rising costs of commodities like fuel and food cause child care rates to increase beyond what parents can afford to pay. If one parent's income is equal to or less than the cost of child care, that parent will often choose to stay home, and providers cannot afford to operate at a loss.[6]

[6] Personal communication, Joy Lyon, AEYC.

Number of Full Time Child Care Slots in Juneau 2002 to 2008[7]



Year	Population of child care age Juneau children (0 to 5)*	Number of full time child care slots	Ratio of children to slots
2002	2,300	754	1:3.1
2003	2,360	734	1:3.2
2004	2,270	686	1:3.3
2005	2,280	705	1:3.2
2006	2,100	714	1:2.9
2007	2,200	601	1:3.7
2008	2,200	498	1:4.2

Plans for Increased Capacity

There are plans to increase the capacity of child care in Juneau:

- Two new small family child care operations are in the process of being approved (however two other small operations are also in the process of closing).
- A new child care center, recently approved by the legislature, is likely to open in October of 2009 with 9 slots reserved for legislators and their staffers, and 33 slots available to Juneau State and City workers. As of January 2009, all of the center's spots were reserved, and families are already on the waiting list for 2010 openings.
- Juneau Montessori is considering expanding its program to include 36 more students in the next year, pending funding.[8]

[7] Chart depicts licensed or approved child care slots only.
[8] Montessori has a five year plan to add 75 new child care slots in total if funding becomes available.

However, even with the possibility of 70 new child care slots opening, there will still be nearly 1,000 Juneau children in need of child care without access to licensed or approved child care facilities.

Comparing Capacity to Other Areas

Juneau's child care capacity is comparatively lower than child care capacity on the state or national scale. In Juneau, there is less than one child care spot for every four children under the age of six, compared to one to 3.5 in Alaska and one to 2.1 nation-wide (see table below).

Child Care in Juneau, Alaska, US, 2008

Area	Total Child Care Spaces	Total Children of Child Care Age	Ratio of Capacity to Population of Children Under 6
Juneau	**498**	**2,200**	**1:4.2**
Alaska	**17,189**	**60,400**	**1:3.5**
US	**10.8 million**	**22.8 million**	**1:2.1**

Source: Capacity Data: NACCRRA. Population Data: JEDC estimates based on Alaska Department of Labor population data.

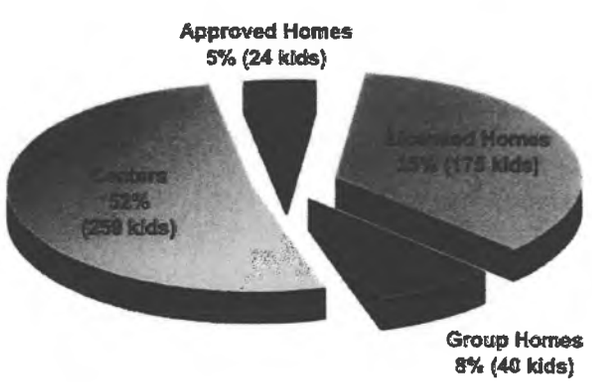
Juneau's reduced child care capacity rate is compounded by the fact that a higher percentage of Juneau children live in homes where available parents work (70 percent) than on the state or national levels (approximately 60 percent).[3] Considering the high need for child care in Juneau, along with the relatively low capacity rates of licensed and approved child care, non-regulated child care is likely playing a large role in Juneau.

Child Care Provider Types

Juneau currently has 42 approved or licensed providers with 498 child care spots.

Licensed Child Care Providers & Facilities—Licensed child care providers/facilities are those facilities that possess a current license, issued by the Department of Health & Social Services to operate a child care facility in the State of Alaska.

Total Regulated Juneau Child Care Spots by Type, December 2008



Source: AEYC. Note: Percentages are based on total child care slots. There are 498 total child care slots in Juneau.

[3] See previous table: Children Under Six With All Available Parents in the Workforce.

Juneau currently has the following:

- 25 Licensed Child Care Homes serving 175 children;
- 4 Licensed Child Care Group Homes serving 40 children, and
- 7 Licensed Child Care Centers, serving 259 children.

Approved Child Care Providers—Approved child care providers are those providers who are otherwise exempt from licensure and who are approved to provide child care services to children whose families receive child care assistance. Juneau has the following:

- 6 approved homes serving 24 children.[10]

Capacity Limits by Provider Type

The number of children who can be cared for by one adult is limited to 4 to 10 children, depending on the type of child facility, with the limits decreasing to 2 to 6 children for children under 30 months.

Capacity Limits by Provider Type

Age	Infants and Toddlers (Below 30 Months)	Total Infants, Toddlers and Preschoolers
Approved Home	**2**	**4 total – if all unrelated** **5 total – including own**
Licensed Family Home	**3 - if one is walking**	**8 total – including own**
Licensed Group Home	**5 – if two are walking**	**12 total – if 2 adults**
Licensed Center	**5 infants per adult** **6 toddlers per adult**	**Maximum depends on staffing** **(10 preschoolers per adult)**

Source: AEYC

The Under 30 Months Situation

The number of adults required to care for children under-30-months can be up to twice the number of adults required to care for preschoolers. Since most Juneau providers are one adult operations, the maximum number of under-30-month aged children is often quickly reached. So while a new Licensed Family Home might open with eight new child care spots, only two of these spots can go to non-ambulatory (non-walking) children. While these ratios are critical to insure the safety and quality care of young children, they also limit the ability for providers to significantly increase infant and toddler child care slots. One local provider shared her experience. "I was new to Juneau and everyone talked about the extreme shortage of childcare here. I was encouraged to open my own facility and I thought this would be a great way to stay home with my young son. I love toddlers and thought it would be the perfect fit. But the huge need is really for those in the under 30-month category. Since my son was not walking that meant I could only take one infant."

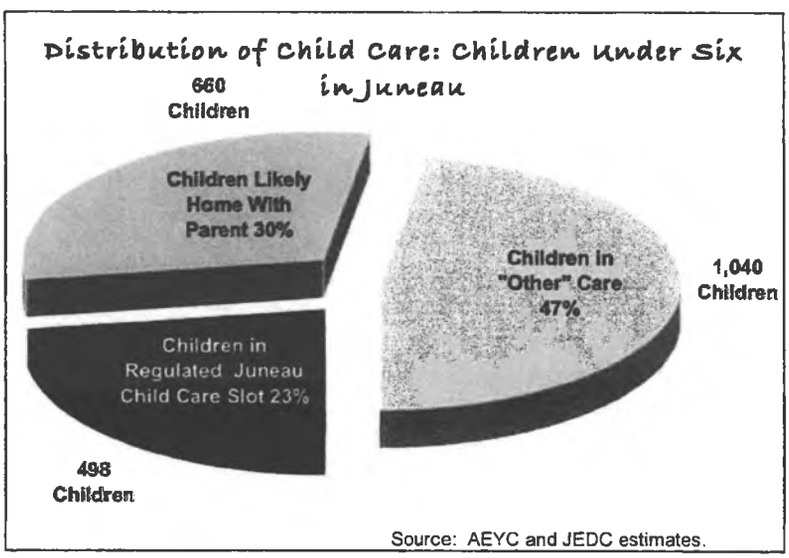
[10] http://hss.state.ak.us/dpa/programs/ccare/eligible-providers.htm

Non-Regulated Child Care Providers

According to the Alaska Department of Health & Social Services (H&SS), any provider in Juneau without a Child Care License from H&SS who is caring for more than four unrelated children is considered an illegally operating provider. The state instituted the child care licensing program in response to past cases of abuse, sexual abuse, and fire hazards in Alaska's child care facilities.[11]

Alternatives to regulated child care also include care by grandparents or other family; splitting work shifts between two employed parents; bringing a child to work; trading care time with friends; or relying on non-licensed, non-approved child care facilities in the community. There are no available statistics on unregulated care providers in Juneau.

There are approximately 2,200 children in Juneau under the age of six, and 498 total child care slots in approved or licensed child care facilities community-wide. Since 70 percent of Juneau children under the age of six live in households where all available parents work, the parents of approximately 1,040 children in Juneau have found a child care alternative to regulated care.



Some available statistics confirm the high usage of non-regulated child care in the Juneau area. Of the sixty-eight current business licenses issued for child care in the city of Juneau, only 24 of them are licensed homes or centers through H&SS. A Twin Lakes child care survey, conducted by AEYC in 2008, asked 200 employees in the Twin Lakes area what type of child care parents of young children were using. Just as many parents reported using non-licensed paid child care providers as reported using licensed or approved care. Joy Lyon, Executive Director of the Association for the Education Young Children in Juneau, expressed concern regarding these findings: "The indications are that a high number of children are in unregulated care with unknown health and safety conditions. Unregulated programs have no background checks of

[11] Case example: R.E. et al v. State of Alaska (7/29/94), 878 P 2d 1341.

adults in the home and may not have CPR, first aid, or child development training. There are no assurances that guns and poisons are locked and secure".[12]

Why Providers are Unlicensed

Many Juneau child care providers choose to remain unlicensed, or have even transitioned from licensed to unlicensed status. To gain more insight into why this is the case, we interviewed several providers, both licensed and unlicensed, about the topic.

Juneau's child care providers note excessive paperwork requirements, administrative time commitments, and a lack of consistency regarding the inspection requirements as licensing frustrations. Providers also point to the licensing agents themselves, who often have no background in early learning or child care, and say that in some cases they feel the agents are working against them rather than with them. One provider called the inspection process "extremely patronizing." Providers also complain that the state licensure system narrowly focuses on safety and does not recognize or reward early learning curriculum. Moreover, while operating a non-regulated child care with more than four children is illegal, there is little to no enforcement of this the law in this area.[13] Unlicensed providers told us that their licensed colleagues advised them not to undergo the process.

While licensed facilities do gain access to food reimbursements (up to $121 per child per month) and child care grants ($32.25 per child per month if the facility has children on State assistance) the rewards for complying are minimal. Additional interview notes follow:

- "Something designated as completely safe when one licensing agent visits is said to be a safety hazard by another."
- "I looked into licensing, but there was so much paperwork. It was so difficult to fill it out, and nobody would help me fill it out."
- According to one provider interviewed, she is thinking of dropping her license and three others she knows have already dropped their license to reduce the paperwork and compliance burden.
- Another provider reports she has been in business for twenty-one years and licensed only five of those years. She also is thinking of dropping her license.

[12] Personal communication, November 10, 2008.

[13] Health and Social Services officials will follow up on any reported cases of non-legal child care; however, they do not actively seek out non-compliant providers and are rarely informed of any. If a complaint was issued, non-compliant group or family home operators would be given 30 days to become approved or licensed without penalty. Non-legal centers, on the other hand, would be closed down immediately.

Costs

The Cost of Child Care for Parents

The average rate for childcare in Juneau in 2008 was $729 per child per month, although child care rate ranged from $400 to nearly $1,000 per child per month. Average monthly rates for toddlers were slightly higher ($809), and average rates for preschoolers were slightly lower ($691). Juneau family homes generally have rates at least $100 less per month than centers or group homes.

Average Juneau Child Care Rates by Category, 2008

Infants	Toddlers	Preschoolers	Overall Average
$756	$809	$691	$729

Source: Mid-2008 AEYC figures: Includes 40 infants, 97 toddlers, and 228 preschoolers.
Note: Infants are defined as those under 12 months. Toddlers are 12 to 30 months. Preschoolers are 2.5 to 5 or 6, depending on the age of kindergarten entry.

Range of Child Care Rates: Juneau, Southeast and Alaska, 2007

Area	Infants	Toddlers	Preschoolers
Juneau	$575-$967	$525-$967	$400-$908
Southeast (non-Juneau)	$575-$941	$415-$1,000	$495-$842
Statewide	$510-$1,188	$415-$1,000	$230-$1,100

Source: Alaska Department of Health and Social Services, Division of Public Assistance.

The Debate Regarding Child Care Market Rates

The last Juneau child care rate survey was conducted in July of 2007. The survey was conducted, in large part, to help determine the new reimbursable rate structure; however, some Juneau providers have stated that they are setting their rates artificially low by matching or remaining near the State reimbursable rates to allow lower income clients to continue to afford child care services. Providers say state reimbursable rates would more accurately reflect actual operating costs if the survey questions reflected how much businesses actually cost to run, instead of how much owners charge. The Alaska Department of Health and Social Services plans to conduct a second survey, with refined methods, early next year. New rates based on that survey would go into effect in mid-2009.

Juneau Household Costs

Child care is expensive and constitutes a significant percentage of low-income and middle-income family budgets in Juneau. In 2000, the median family income for Juneau families with children under the age of 18 was $64,084. While median incomes today are likely somewhat higher, even based on a $72,000 median family income, average child care costs for one child would account for 13 percent of a family's adjusted gross (post-tax) income.[14]

Median Juneau Family Income by Family Type, 2000

Family Type	Median Family Income
All Families with own children under age 18	**$64,084**
Married-couple families with own children under age 18	$77,664
Single-mother families with own children under age 18	$29,634
Single-father families with own children under age 18	$38,750

Source: Population Reference Bureau, analysis of data from U.S. Census Bureau, 2000 Census Summary File 3 (Tables P15, PCT39 & PCT40)

Median Juneau Family Income by Family Type, 2007

Family Type	Median Family Income
Estimated 2007 Median Juneau Family With Children Income	**$72,000**
Federal Taxes Based on Above*	**$4,370**
Adjusted Gross Income	**$67,630**

*Turbo Tax, 2007 tax year. Tax scenario includes child care tax credit.

Juneau Household Costs

Juneau Annual Household Costs	Annual Costs	Percent of Post Tax Income
Housing		
Average Annual Mortgage in Juneau*	$23,748	35%
Average Annual Rent in Juneau*	$14,400	21%
Average Child Care in Juneau (1 child)	**$8,748**	**13%**
Average Food Costs in Juneau (family of 4)**	**$6,500**	**10%**
Average Heating and Electricity Costs in Juneau*	**$4,560**	**7%**
Average Annual Contribution for Family Health Care Coverage$^{\Phi}$	**$3,500**	**5%**

*CBJ, 2006; **University of Alaska Fairbanks Cooperative Extension Service; $^{\Phi}$Kaiser Family Foundation, 2008. US average.

[14] In a household with two children in child care, child care costs would account for 26 percent of a family's adjusted gross income.

Early Education as Economic Investment

Return on Investment

There have been many economic studies regarding the potentially large returns to early childhood education for lower income children.[15] Decades of scientific research show that child care and preschool programs later result in lower drug use, lower crime, fewer families receiving welfare, and higher graduation rates.[16] Studies show conclusively that high quality early childhood education provides a significant return on investment for communities. Financial returns can be as much as $17 to every dollar spent on infant, toddler and preschool care.

The Impact of Working Mothers

Child care availability and affordability plays a key role in the economic development of communities. The increased availability of affordable, high quality, and reliable child care in Juneau would enhance the work readiness of the local population, particularly Juneau female potential workers, and as a result, enhance the city's economic growth.

Additional Resources

A 2006 report by the McDowell Group entitled, "The Economic Impact of Early Education and Child Care Services in Alaska," does not break out Juneau economic impacts specifically, yet provides excellent state-wide statistics and research on economic impact issue.

The Cost of Child Care for Providers

The Juneau Economic Development Council conducted executive interviews with 11 licensed Juneau child care facilities in December of 2008 to ask about the costs of providing child care in Juneau. Interviews were conducted with directors of three child care centers, three group homes, and five child care homes. The quality of care in the facilities varies greatly. Some are educational and take children on frequent outing such as weekly ice skating, while others focus on play and care at the facility. Expense per child among providers interviewed varies from $1,000 (excluding owners salary) to over $9,000 per child per year (for facilities that included salaries as part of expense). The results of that study are attached as an appendix to this report.

---

[15] A key difference in lower and higher income homes appears to be the number of hours an adult reads to a child. A typical child from a middle class family is read to over 600 hours by kindergarten age, while children from low income families receive an average of 25 hours per child.

[16] Alaska educators have called dropping out the result of an accumulative failure, which can start before kids even enter public school and some said they know which kids are not going to graduate high school on the first day of kindergarten. "Some children show up knowing how to read, while others come not even knowing what the colors are." ADN

Generally, child care providers in Juneau earn significantly less than those in other professions. According to the Alaska Department of Labor, child care workers in Southeast Alaska earn an average of $10.74 per hour, which translates into an annualized salary of $22,340, or 45 percent below Juneau's average annual salary of $40,380.[17] In many cases, child care workers are not required to have specific schooling or experience, while other child care workers are highly educated professionals in the field of early education. Child care earners on the higher of the wage scale (the 90th percentile level)[18] still only earn $13.72 per hour, or $28,500 annually.[19] Elementary school teachers in Southeast Alaska, by comparison, earn an average annual salary of $56,300.

[17] http://www.labor.state.ak.us/research/wage/matrixt.htm
[18] At the 90th percentile, 90 percent of all wage earners in that occupation make that wage or less, and conversely, 10 percent make more than that wage.

Juneau Child Care Problem Analysis

The "problem" with child-care in Juneau may seem fairly obvious at first glance. As we engage stakeholders involved in the world of child care (like with many other problems), it becomes apparent that the "problem" looks very different to different people. Recognizing that a common understanding or definition of the problem is critical to constructively addressing it, JEDC provides a problem analysis, using our own understanding of the relevant issues as well as receiving input from a diverse set of Juneau child care stakeholders.

With input from others, JEDC's analysis of the problem with child-care has produced a central problem statement that describes the core issue we need to address. We then proceeded to identify the various causes of this problem and were able to group these causes into different categories. When we consider causes, it is important to discern the relative importance of the causes, whether they are increasing/decreasing in intensity, and to what degree these causes can be effectively acted upon (and by whom). Finally, we looked at the consequences of the problem, similarly grouping them by themes. It is important to try to understand both the qualitative and quantitative nature of these effects, including who are the most affected and whether these effects tend to grow or diminish over time. Once we have conducted a problem analysis, we are better able to address causes and mitigate effects—and, hopefully, reduce or eliminate the problem.

As people in our community continue to address this important issue, we provide a basic problem analysis to assist in these discussions.

Problem Statement

Lack of legal[20] child care available to meet the needs of working parents in Juneau

Causes

Related to Human Resources

Cause A. Child care is an unattractive industry for providers and workers

No health or retirement benefits available

While there are always exceptions, child care work does not usually provide benefits. Providers may be covered by the health benefits of their spouses, but forgo building up a retirement investment in themselves.

Low child care salaries are not commensurate with the responsibilities and work involved

According to the Alaska Department of Labor, child care workers in Southeast Alaska earn an average of $10.74 per hour.[21] This translates into an annualized salary of $22,340—45 percent below Juneau's average annual salary of $40,380—meaning there are plenty of other more highly paid positions that child care workers could choose. Highly qualified child care workers have even more options. Elementary school teachers in Southeast Alaska, for example, earn an average annual salary of $56,300.[22]

Long hours required

Child care workers, especially owners of home child care businesses, typically work 50 hour weeks or more.

No breaks, sick leave, or vacation time

Child care providers working by themselves have no opportunity to take breaks during the day. Providers usually have no sick leave, and may feel pressured to come to work sick, rather than canceling child care on their clients. Child care workers also have limited opportunities to take vacations as parents pressure providers to provide as much coverage as possible.

Cause B. General lack of appreciation for child care workers by public, parents or government

Child care workers generally have a low status in society. Parents are often not well educated regarding the low pay and high work associated with child care, and can be demanding and lacking in appreciation. While K-12 education is well funded, early childhood education in Juneau has not attracted the support of government and government funding.

Cause C. Child care facilities find it difficult to attract and retain qualified staff

Child care facilities are unable to offer attractive compensation packages to workers, which makes attracting and retaining qualified staff difficult. Facilities that cannot adequately staff their facilities must reduce the number of child care slots available.

---

[20] "Legal" child care means that a child care facility is State licensed or approved or has no more than four children.
[21] http://www.labor.state.ak.us/research/wage/matrixcd.htm#21-1021
[22] http://www.labor.state.ak.us/research/wage/matrixt.htm

Related to Bureaucracy

Cause D: State Licensing requirements are burdensome.

Time/effort requirements

Child care licensing is critical to insure that children are being cared for in safe environments; however, some of the regulations surrounding child care licensing appear to be limiting the number of providers willing to take part in the state sanctioned child care system. Many providers feel that compliance with the regulations are needlessly time consuming and onerous, especially as licensing requirements come on top of already demanding time intensive child care jobs.

Oversight

Some providers note a perceived lack of support from child care licensing specialists themselves. Licensing specialists are not required to have home-visiting, customer service, or other special training to regulate early education facilities and sometimes lack sensitivity to the unique dilemmas providers face.[23]

Cause E: There are few incentives to become licensed

Lack of enforcement

According to state law, child care operations with more than four children (not related to the provider) must be licensed, or are providing illegal care. However, because these operations are rarely reported to the State, this law is rarely enforced. Aside from legal compliance there are few other incentives for a provider to become licensed.

Low state subsidy

State support for Alaska's early education and child care system is currently extremely limited. While licensed providers do have access to State child care reimbursement funds, currently only a small percentage of parents qualify for that limited assistance. Providers also may be eligible for a $32 per month per child grant; however, these paybacks are simply not enough incentive to become or remain licensed.

Cause F: CBJ Allowable Use Permit discourages group homes

In order to change status from a family home (up to 8 children) to a group home (9 to 12 children) providers must apply for an allowable use permit from CBJ. The current process governing this has been criticized as expensive and time consuming for providers, especially when coupled with State regulatory requirements. The CBJ also has a couple other minor fees it levies on child care providers in Juneau.

Related to the "Business" Aspects of Providing Child-Care

Cause G: Child care businesses have short life spans

Lack of sustainability surrounding child care operations exacerbates capacity shortages. Providers often enter into the child care service profession on a short term basis for two reasons:

[23] Health and Social Services staff note that applicants with early childhood education backgrounds are considered more desirable.

Mom providers age out of system

Providers are often mothers of young children themselves, begin child care operations when they have a child of toddler age, and end when their child begins kindergarten.

Child care businesses harder, less profitable to run than expected

Other providers enter into the child care industry, only to find that the overall efforts are larger than expected, the paybacks fewer, and close after a brief operational period (usually a year).

Cause H: Business expertise amongst many entrepreneurs in child-care care industry is inadequate.

Providers often lack business expertise resulting in child care businesses that are not successful financially, and are therefore not sustainable.

Cause I: Current enterprises engaged in child-care are operating typically with low or no profit.

Child care is not a highly profitable industry. Even providers with well organized enterprises are not likely to earn a salary commensurate with the time and energy invested in their child care businesses. Low profit potential makes it hard to attract and retain child care businesses in this community.

RELATED TO THE ECONOMY

Cause J: Juneau has a low rate of unemployment

The local unemployment rate (4.4% in 2007) is low, and many organizations (such as Juneau's box stores) are competing for the same entry level employees. Since child care is a low paying industry, the low unemployment rate makes it that much hard to attract qualified child care workers.

Cause K: Juneau has a high cost of living

Juneau is generally considered to have a high cost of living. According to the Alaska Department of Labor, the number of wage earners needed to buy an average house is 2.1 per house.

Higher participation in workforce of parents

The higher costs of living appear to have driven more parents of young children to participate in the workforce: 70% of Juneau's children under six have working parents (compared to 60% Alaska and nationally). Because of the greater participation in the workforce, the demand for child care is higher in Juneau.

Cost of running child care businesses high

Juneau's high costs translate into high operating costs of local child care facilities.

Parents cannot afford to pay more

Normally, high market demand and low supply of a commodity would lead to increased pricing. However, child care operations, while struggling financially themselves, have not priced their operations at a higher level because their customers include those least able to afford increased expenses. Currently the average cost of child care (for one child) in Juneau is 13 percent of the adjusted gross average income for a Juneau family with children. Providers don't feel they can charge enough to make operating a child care worthwhile.

Consequences (or Effects)

CONSEQUENCE A: JUNEAU IS A LESS ATTRACTIVE PLACE TO RAISE FAMILIES

Lack of child care makes Juneau an unattractive place for young families. The current child care situation is a source of tremendous stress for families with children of child care age, or those planning families. Wait lists of two years or longer mean child care availability drives workforce decisions for families rather than supporting workforce decisions. Families have left town over this issue, and other families have chosen not to move to Juneau after learning of the lack of child care.

CONSEQUENCE B: CHILDREN ARE POTENTIALLY IN UNSAFE OR SUB-STANDARD CARE

Unlicensed facilities in high demand

There is concern that so many children in care outside of the regulatory care framework provides an unacceptable risk that children are being cared for in either unsafe environments or by workers who are a hazard to the children. Child care is licensed in Alaska in part because past abuses of children made it necessary and because the state recognizes that those who care for children must meet minimum health and safety standards, have a basic understanding of child development, and have a commitment to professional development. Children in unlicensed care are outside the system and cannot be protected by the State.

Parents accept substandard care because they feel they have no alternatives

Parents are unlikely to report illegal child care operations because they may have no other care options.

CONSEQUENCE C: THERE IS LACK OF QUALITY CARE OPTIONS

Lack of Early Learning Programs

Early learning happens in all care environments whether they are at home, in family child care, or through a pre-school program. High quality child care offers children engaging opportunities to learn through play, establish positive social skills with peers and adults, become familiar with life outside of the home, and may include an academic curriculum. A lack of child care availability also means a lack of high quality programs. Parents in Juneau have minimal options to place their children in facilities that provide high quality engaging learning opportunities. Too few high quality early learning opportunities mean that some children are entering kindergarten at a disadvantage, and already behind.

Not catering to needs of child

Even within the regulated (state licensed or approved) child care system, care facilities may not serve the best interests of particular children very well, but parents do not have the flexibly of finding best placement scenarios for their children. There are also numerous cases of children shuttled around—up to three times per day every day—to attend different child care facilities due to availability.

CONSEQUENCE D: JUNEAU'S BUSINESS COMMUNITY FACES INCREASED OBSTACLES TO SUCCESS

Juneau's low unemployment rate means that employers are looking to hire from a small pool of available labor. Increased child care would increase the Juneau labor pool, and increased child care options—such as off hour child care options—would increase the ability of Juneau parents to better meet the labor needs of Juneau's business community. There are currently 1,800 parents of children under the age of six in Juneau. Less than a quarter of that group (24 percent) is currently served by licensed child care.

Appendix I: Provider Costs

Juneau Child Care Centers—Average Revenues and Expenses

Revenues	
Parent Paid Tuition	$231,200
Child Care Assistance Income	56,100
Child Care Food Program	6,800
Child Care Grant	12,900
Other Income	14,300
Total Revenues	**$321,300**
Expenses	
Wages and Benefits	$230,000
Rent or Mortgage	14,000
Utilities	7,000
Maintenance	400
Other Fixed Operating Expenses	40,000
Food and Consumables	24,000
Total Expenses	**$315,400**
Earnings	**$5,900**

Expenses per Child - $8,500
Size of facility – 2,900 square feet
Average # of children – 37
Average # of Staff - 8

Revenue per Child - $8,700
Daily Hours of Operation – 10.2
Hours per Child per Day - 9
Annual Days of Operation - 242

Child Care Centers are defined by the State as child care facilities for thirteen or more children. The business model of a for-profit is quite different than that of a non-profit, so averages only tell part of the story. These averages are based on three centers interviewed in Juneau, which ranged in attendance from 27 to 54 children. Tuition ranges from $645 per month to $967 per month.

Non-profit centers reported annual losses (despite best efforts to contain costs). One center pays reduced rent but has a high cost of employee benefits, including health insurance. The centers had a high amount of bad debt from parents who were not able to keep current with their child care expenses. To make ends meet, one center invests a significant amount of time in fund raising. Funding has not been available for needed renovations and improvements at the facility. A for-profit child care center interviewed is located in the owners' residence so a portion of household expenses can be written off for tax purposes. That business provides a profit to the owners (included in above earnings, but averaged with losses from non-profits).

Annual payroll costs vary from $15,167 to $31,412 per person. Employees include teachers with degrees and certificates who are paid much lower wages than they could earn at the school district. All centers report a difficultly finding quality staff. Centers have lost staff over the years to the school district since they can't afford competitive pay or benefits. Centers have staff costs as high as 87% of their budget and say that finding good quality and experienced staff is challenging. According to one director "The lion's share of our budget goes into staff and it is hard to get people as talented and devoted as we want to care for our children with what we can afford to pay them." Nikki Morris, referral counselor for AEYC, states "There has been a trend in child care centers to lower capacity since they are having a difficult time staffing." She learned recently that one center in Juneau dropped over forty spots for children due to their staffing shortage. Only one of the centers receives reimbursement from the food program but all receive the state Child Care Grant.

Group Home Child Care—Average Revenues and Expenses

Revenues	
Parent Paid Tuition	$53,400
Child Care Assistance Income	11,300
Child Care Food Program	4,700
Child Care Grant	2,300
Total Revenues	**$71,700**
Expenses	
Wages and Benefits	$10,300
Rent	7,200
Utilities	5,100
Other Fixed Operating Expense	9,400
Food and Consumables	10,400
Total Expenses	**$42,400**
Earnings (includes owners salary)	**$29,300**

Expenses per Child $4,400[24] | **Revenue per Child - $7,400**
Size of facility –1250 square feet | **Daily Hours of Operation – 9.8**
Average # of children – 9.7 | **Hours per Child per Day - 9.2**
Average # of Staff - .6 | **Annual Days of Operation - 247**

Group homes are usually in occupied residences and accommodate nine to twelve children and are usually operated by the business owner and one staff member. A group home can have up to ten children with only one adult if the adult has training and experience.

Owner's profits were between $23,000 and $38,000 per year, which for a 60 hour week equates to between $9.20 and $15.20 per hour given the number of days they are open. Their staff was paid approximately $7.50 per hour. One group home had no staff, one had part time staff and one had full time staff. A business owner noted, "This industry attracts young, single people who don't have any benefits. They also get sick a lot due to their contact with numbers of children."

One of the group homes paid rent for their facility, but the other two operated out of their homes and were able to deduct home expenses for tax purposes. All of the programs received the state Child Care Grant and reimbursement from the food program.

The amount spent on children's supplies for art and activities varied from $850 per year to $4,800 per year. Revenue per child varied from $5,500 to $9,000 per year. The provider with the highest rates was getting ready to raise her rates again and has a waiting list for her program. She also spends the most per child on supplies and activities.

According to Joy Lyon, Director of AEYC-SEA, the group home is an ideal situation. There is a good ratio of one adult per six children, the owner can write off a significant amount of their home expenses, they get the highest rate of reimbursement from Child Care Assistance, and it's still in a home setting, which can be more comfortable for young children. One down side is the challenge of getting a conditional use permit that is needed from the city to operate the group home.

[24] Owner's salary is EXCLUDED from this figure.

Juneau Family Child Care Homes -Average Revenue & Expense

Revenues	
Parent Paid Tuition	$33,200
Child Care Assistance Income	13,500
Child Care Food Program	2,700
Child Care Grant	900
Total Revenues	**$50,300**
Expenses	
Wages and Benefits	$0
Rent	7,000
Utilities	900
Other Fixed Operating Expense	5,600
Food and Consumables	8,400
Total Expenses	**$21,900**
Earnings (includes owners salary)	**$28,400**

Expenses per Child - $3,650[25]	**Revenue per Child - $8,400**
Size of facility –1160 square feet	**Daily Hours of Operation – 10**
Average # of children – 6	**Hours per Child per Day - 9**
Average # of Staff - 0	**Annual Days of Operation - 238**

Child care homes are defined as facilities, usually in occupied residences, for no more than eight children. The homes that were interviewed have between 3.5 full-time children and eight children and charge between $544 and $900 per month. Income for these single person operated homes ranges from $28,000 to $40,000 annually or $11.66 to $16.00 per hour. Owners keep their costs down by operating out of their homes and can take tax deductions for the home, but have long and often stressful days.

According to Nikki Morris at AEYC, mothers often start child care homes because they can't find care for their own children or they want to stay home with their young child while still adding to the family income. Of the 31 child care homes she does referrals for, she is aware of 16 of them who have young children of their own that they are also caring for.

Ms. Morris has found that the average rate of turnover among family child care homes is around 50% per year. She says it's because the new providers find out it's not what they thought it would be like; it doesn't fit in well with their family, it is long hours, low pay for the level of responsibility, parents don't always pay their provider in full, and it's hard for these providers to do collections.

Of the sixty-eight business licenses in Juneau for child day care, thirty-two were first issued in 2008. Ten of the businesses are at least five years old and only seven of those are ten years or older. What is not known is how many businesses are operating illegally, without either of the required licenses.

The recordkeeping of the child care homes seemed the least professional and current. Numerous providers were contacted before finding five who had the time and had enough information to provide for the interview. All providers complained about the burdensome paperwork required by licensing, questions were often repetitive, and that there was turn-over among licensing agents, causing delays and confusion.

From examining the data obtained, it appears that by raising prices and improving business skills, the lower paid business owners could increase their compensation. Business training could assist these child care providers in making the best financial choices for their child care home.

[25] Owner's salary is EXCLUDED from this figure.

This article looks at the determinants of job turnover among mothers of infants, using intentions to change jobs or exit the labor force assessed at 1 year postpartum among a sample of 246 employed mothers. Hypotheses were that exit intentions should be more influenced by household factors determining labor supply and other personal characteristics indicating job attachment. Additionally, whereas both types of turnover intentions should decrease as workplace supports for mothers increase, child care satisfaction should affect exit intentions more than intentions to change jobs. Results showed support for the notion that labor force exits are more strongly influenced by child care problems and measures of job attachment than are job changes, though models correcting for selectivity reveal that the child care problems are not directly influencing exit intentions. Supervisor and co-worker support impede intentions to both exit the labor force and change jobs. However, other dimensions of workplace support affected intentions to exit and intentions to change jobs differently.

Workplace Support, Child Care, and Turnover Intentions among Employed Mothers of Infants

JENNIFER L. GLASS
SARAH BETH ESTES
University of Iowa

Studies of women's job mobility and the gender gap in wages frequently allude to the importance of childbearing interruptions in explaining women's inferior position in the labor force. Labor force intermittency is thought to reduce women's wages by reducing their job experience, opportunities for training and placement within firm internal labor markets, and possibly depreciating their human capital. Although recent studies show a significant drop in the extent to which women leave the labor force to bear children (DeSai & Waite, 1991; Waite, Haggstrom, & Kanouse, 1985), child care responsibilities continue to exert a significant influence on women's labor force continuity. Investigations of women's job mobility frequently focus on the period immediately following birth; in contrast, the present study will focus on the future work intentions of

© 1996 Sage Publications, Inc.

those women who maintained labor force participation during the 1st year postpartum. The reason for this shift in emphasis is twofold: (a) Most job quits by women of childbearing age do not occur in conjunction with a birth but do occur more often among women with young children (Felmlee, 1984; Glass, 1988), and (b) studies of child care and women's labor force participation show that child care problems and job-family conflicts often force women to leave employment for varying periods of time until scheduling or child care problems can be resolved (Love, Galinsky, & Hughes, 1987; Presser & Baldwin, 1980).

Earlier research using the data presented here analyzed the determinants of labor force withdrawals and job changes following childbirth (Glass & Riley, 1994) and found that over 80% of respondents returned to some form of employment during their 1st year postpartum. However, 11% of these workers reported that they were likely to quit the labor force in the coming year, whereas another 25% intended to change jobs in the near future. Clearly, these figures indicate that a substantial amount of job turnover and labor force intermittency may occur even for individuals who maintained labor force participation across a childbearing event. Therefore, this article will focus on the determinants of future work intentions among employed mothers of infants.

BACKGROUND

The most important demographic shift in the labor force over the past century has been the increasing labor force participation of mothers. In recent decades, the most dramatic shift has been the increasing labor force participation of mothers of young children, infants in particular (U.S. Bureau of the Census, 1992), and the failure of childbearing to begin a period of labor force withdrawal for the majority of employed women (DeSai & Waite, 1991; O'Connell, 1990). Yet this notable increase in women's labor force attachment masks the still considerable difficulties faced by employed mothers of young children in the management of job and family responsibilities (Hewlett, 1987; Hochschild, 1989) and the extent to which this increase in labor supply has been involuntary. For example, attitudinal surveys show that most American mothers prefer that their children be cared for by a parent rather than substitute provider (Mason & Kuhlthau, 1989) and that substantial numbers of mothers of infants are employed because they are single, divorced, or partnered to men whose earnings are low (O'Connell, 1990).

In the data used here, 28% of the sample of pregnant employees preferred to withdraw from the labor force postpartum but actually continued employment. Another 31% wanted to work only part-time, but planned full-time employment postpartum. Thus the general increase in mothers' labor force participation has been accompanied by increasing pressure on mothers to provide financially for their families despite their professed desires to also care for their own children. Coupled with shortages of high quality affordable child care (Hofferth & Phillips, 1987; Presser, 1989) and work environments that are not especially hospitable for mothers of infants (Glass & Camarigg, 1992), it should not be surprising that substantial numbers of employed mothers of very young children express intentions to change jobs or quit the labor force entirely if they can.

Theoretically, these facts lead to the conclusion that patterns of intermittency and job mobility in mothers' employment may not disappear as mothers' labor force attachment grows but may change dramatically in character. In previous decades, work interruptions were structured by normative constraints against the employment of mothers of infants (including employer discrimination) and the lack of child care services for very young children. This normative pattern was bolstered by relatively high wages for men, lower wages for women, and lower rates of divorce and out-of-wedlock childbearing. In contrast, mothers today may face greater financial constraints and marital instability, which would make labor force withdrawals contingent on the availability of unearned income or other family support. Thus withdrawals would be less predictable in their timing and duration and less likely to occur in conjunction with childbirth per se. Moreover, withdrawals of long duration should diminish significantly and job changes (perhaps with a period of brief unemployment in between) should increase. Both withdrawals and job changes should be increasingly structured by the absence of workplace supports and dissatisfaction with child care arrangements. Finally, job moves should be more dependent on mothers' wage rates and less dependent on family composition or partner's income (trends that have been demonstrated empirically in Mroz, 1987; Klerman & Leibowitz, 1994).

Similarly, the normative climate of support for full-time mothering in the early years of life has disintegrated into a number of competing maternal ideologies that each claim substantial numbers of adherents (Glass, 1992). Some women remain traditional in their desire to stay home full-time to devote themselves to child care, whereas others support shared parenting and full-time employment for mothers. Somewhere in the

middle lies a substantial portion of women torn between these two polarities, who prefer some type of employment but are suspicious of nonmaternal child care in the first few years of life (Greenstein, 1986).

In the present study, we will draw on the preceding analysis to focus specifically on workplace support and child care satisfaction as factors that should differentiate movers and stayers among employed mothers, controlling for family composition and partner's income. We separate intentions to quit the labor force from intentions to change jobs, hypothesizing that intentions to quit the labor force should be more closely related to family characteristics and income opportunities for the mother and father, as well as mothers' traditionalism and preference for homemaking. However, we believe that both intentions to change jobs and to leave the labor force should be affected by workplace policies and child care arrangements. Specifically, benefits or personnel policies that reduce job-family conflict should decrease quit intentions, as should social support from supervisors and co-workers. Satisfying, affordable child care arrangements should also decrease quit intentions, although we suspect these might have stronger effects on intentions to leave the labor force than intentions to change jobs. Because most child care arrangements are independent of any particular job, difficulties with child care may not be resolved by taking a different job (unless, of course, the work schedule of the current job is causing the child care difficulty). However, leaving the labor force is sure to eliminate problems with substitute care.

DATA AND METHODS

The data analyzed here come from a longitudinal sample of 324 women employed at least 20 hrs a week during the first trimester of pregnancy. Respondents were recruited from prenatal hospital records in northern Indiana in 1991 and 1992. Area hospitals served an approximate 60-mile radius, including southwest lower Michigan and north central Indiana, and provided an exhaustive sampling frame because they were the only sources of maternity care in the county and drew significant numbers of women from surrounding rural counties. Any bias in the sample is likely to stem from the disproportionate omission of poor, marginally employed, or transient respondents. The survey had an effective response rate of 70% of those in the initial sampling frame, 81% of those successfully contacted for an interview. At the time of the initial interview, respondents were either in their last trimester of pregnancy or, occasionally, their 1st month postpartum.

Descriptive statistics indicate that the mean age of the sample was 28, 51% were experiencing a first birth, 10% listed a non-White ethnicity, and 91% were married or living with their partner. Regular hours at work averaged 38.6 per week for the sample, and respondents reported mean annual earnings of $18,451. These statistics are quite close to national large sample estimates for women employed the year prior to the birth of a child (Garrett, Lubeck, & Wenk, 1991).

The prenatal interview contained extensive information on the respondent's primary job or last job held, the respondent's family situation, and demographic variables, as well as future work preferences and intentions. Respondents were then recontacted at 6 and 12 months postpartum to ascertain their current job status and child care arrangements. The 6- and 12-month follow-ups captured 94% and 93% of the original sample, respectively. Data on child care and working conditions for the job held at 12 months postpartum were used for this study. After deleting 11 cases with missing data, 246 cases of mothers employed at 12 months postpartum were available for analysis.

MEASUREMENT OF VARIABLES

Quit Intention

Future work intentions measured at 1 year postpartum were assessed by the following questions: How likely is it you will make a genuine effort to find a new job with another employer in the next year? and How likely is it that you will leave your present job to become a full-time homemaker in the next year? Response categories for both questions were 1 (*not at all likely*), 2 (*somewhat likely*) and 3 (*very likely*), but for purposes of analysis they were combined into 0 (*not likely*) and 1 (*somewhat or very likely*). The categories of 2 and 3 were combined for two reasons. The *n*s for the separate categories were too small to accommodate separate analyses (for exit intentions, the *n*s were 5 and 21, whereas for change intentions the *n*s were 35 and 33). Additionally, it makes more substantive sense to include the category of somewhat likely with those likely to quit than to group them with respondents indicating no intention of quitting their current job. Responses to both questions were then combined into one 3-category variable representing the respondent's future work intention—same job, new job, or homemaker. In six cases, respondents indicated that they were likely to both change jobs and quit the labor force entirely. These six cases were allocated according to their strongest preference; if both destination

statuses were equally likely, they were randomly assigned to one status or the other. The resulting distribution for the dependent variable given in Table 1 shows that there were 65 women indicating an intention to change jobs, 26 women indicating an intention to quit the labor force, and 155 women who intended to stay in the same job.

The independent variables represent the three key areas of (a) family status and personal background, (b) child care arrangements, and (c) workplace support, subdivided into macrolevel organizational characteristics and microlevel working conditions and interpersonal support.

Family Status and Personal Background Variables

Respondent's age, marital status (married or living with partner), partner's income, respondent's hourly wage, number of children, and presence of other preschool-aged children were all included as family or sociodemographic controls.[1] In addition, a measure of traditional family ideology (agreement that it is best for all concerned if the man earns the money and the wife stays home to care for the home and children) was included here as a way of tapping belief systems about the appropriateness of mothers' employment. Prenatal work preference (to be a homemaker or change jobs postpartum, as opposed to staying at one's current job) was also used here to augment the measurement of mother's job commitment. A years of education measure was added to control levels of individual human capital.

Child Care Variables

The three basic dimensions of child care that are thought to affect turnover are amount, cost, and quality. Although we asked respondents to provide the total number of hours their new child spent in nonfamilial care, that variable was highly correlated with mother's hours of employment, so it was dropped from the analysis. We did, however, test a dummy variable measuring whether their infant spent more than 40 hrs a week in nonmaternal care in several models. Cost was measured in dollars per week (for all children requiring care), and quality was ascertained by asking respondents to rank their satisfaction with their present child care arrangement on a scale from 1 to 4. Additionally, a variable measuring the number of different types of child care respondents utilized (father care, relative care in home or out, formal care in home or out, and other) was created, under the assumption that multiple forms of care are both more difficult to coordinate and more susceptible to breakdown. Finally,

dummy variables representing each mother's primary form of child care were constructed (father care, relative care, formal care, and other).

Workplace Support Variables

These variables were subdivided into those organizational and occupational variables that might affect the extent to which workers' family needs would be supported by the employing organization and job level variables measuring on-site working conditions and social support from supervisors and coworkers. On the organizational side, measures of work-

place size (number of employees), unionization (whether respondents's job was represented by a labor union), percentage of females in the respondent's job category, and percentage of mothers in the respondent's job category were the four variables used to indicate whether employers had any motivation or capacity to attend to the job and family conflicts of employees. We also included occupational and industry categorical variables to test for any gross effects of occupational sector or industry location.

The most direct measures of workplace support came from questions about the respondent's specific job or work site. The following four working conditions were measured with single-item dichotomous questions to assess support for employed mothers: whether the respondent was able to work regular hours at home, whether the respondent could work part-time, whether she had ever received a promotion with her current employer, and whether a future promotion was likely. In addition, social support from supervisors and coworkers was measured with a scale (alpha reliability of .67) combining five items—three dealing with the extent to which supervisors were rated as supportive or mentioned as positive aspects of the respondent's job, and two dealing with the extent to which co-workers were rated as supportive or mentioned as positive aspects of the job. Additionally, unusual work scheduling was measured with a dummy variable indicating the presence of any of the following: an evening or night shift, a rotating shift, or mandatory overtime. A job flexibility variable registered positive responses to any one or more of the following items:

- I decide when I take breaks on my job.
- It would be very hard for me to change the days I wanted to work (reverse coded).
- It would be very hard for me to change the hours I wanted to work (reverse coded).
- It would be very hard for me to take time off during my work day to take care of personal or family matters (reverse coded).

Finally, we also created a summary child care assistance measure coded 1 if the respondent received any form of child care assistance from her employing organization (child care referral and information, child care vouchers or money, or on-site care—all measured as dichotomous variables). To augment that measure, we also included a variable indicating whether the respondent could use sick leave to care for sick family

members. Descriptive statistics for the variables ultimately used in the analyses are listed in Table 1.

Analysis of Data

Multinomial logistic regressions were run to simultaneously model the two important contrasts constituting the dependent variable of future work intention: (a) the log odds of intending to quit the labor force rather than stay with one's current employment and (b) the log odds of moving to a new job rather than staying with one's current employment. First, family status, personal background, and child care variables were entered into the equation as a block. Then, the sets of organizational characteristics and workplace support were added sequentially. Because of the limited sample size and the large number of potential independent variables, the models shown in each block uniformly include only those variables showing statistical significance in any model specification or necessary as sociodemographic controls. The final model for each contrast in column 4 was constructed by entering the variables within each block in stepwise fashion, keeping only those variables showing statistical significance at any point in the stepwise selection process. To check on the robustness of this cross-sectional analysis, the four models were reestimated using a correction for selectivity bias in the sample of employed mothers of infants.

RESULTS

Results for all models are presented in Table 2. Model 1 displays the coefficients for the family background and child care variables only. Model 2 adds the first block of organizational variables, and Model 3 adds the block of working conditions and interpersonal support. Model 4 is the composite model derived from the previous three steps.

Turning first to Model 1, results show that intentions to change jobs were negligibly affected by background and family status variables and were unaffected by child care cost and satisfaction. Age and marital status both served to significantly inhibit change intentions. Presumably, the propensity to change jobs declines as age increases. Thus it follows that change intentions would also decline. Having a partner may impede change intentions because the increased financial responsibility that at-

tends the birth of a child is better met with two incomes than with one. Because married women have their spouse's income to augment their own, they may have less of a financial impetus to pursue a new job than do unpartnered women.

Prenatal intentions to change jobs were also significantly associated with intentions to change jobs at 12 months postpartum. Perhaps some respondents felt constrained to stay in their prenatal job to obtain medical or leave benefits for childbearing, or perhaps a common response bias affects both prenatal and postpartum quit intentions. However, most of the women with prenatal quit intentions had already quit their prenatal job and were reporting on a new job at 12 months postpartum, indicating their personal propensity to change jobs frequently to search for more satisfactory employment. Finally, father care as the primary child care mode serves to impede job changing. Job changing in this context might disrupt a carefully orchestrated work schedule that makes father care possible.

In contrast, intentions to leave the labor force were associated with partner's income and gender traditionalism (both of which increased the odds of quitting) as well as child care satisfaction and child care cost (which decreased the odds of quitting). Although the inverse relationship between child care cost and odds of quitting the labor force may appear to be counterintuitive, a closer look suggests that individuals who pay more for child care are those in well-paying jobs exhibiting greater job attachment and thus are less likely to quit the labor force. All told, these results provide some support for our original hypothesis that intentions to leave the labor force should be more strongly affected by child care satisfaction, gender traditionalism, and respondent/partner wages than intentions to change jobs. However, respondent's wage did not predict the odds of leaving the labor force, all else equal, nor did the other measures of attachment (prenatal intention to leave the labor force).

Other model specifications that were explored included a dummy variable measuring child care equal to or in excess of 40 hrs a week, a count of the types of child care used, and a series of dummy variables representing father care, relative care, formal care, and other types of care. These variables were not only unrelated to change or quit intentions but their inclusion did not affect the other coefficients in Models 1-4. Thus they were dropped from the analysis. Father care was retained because of its substantive importance (see Maume & Mullin, 1993, for evidence that father care encourages mother's job quitting) and because preliminary analyses showed that its effects on intentions were most different from the other categories of care, although not reaching statistical significance.

Model 2 displays the results for the second specification adding organizational variables thought to increase workplace support. Unionization, firm size, occupation and industry sector, and percentage of females in the respondent's job showed no effects for either form of job leaving and were dropped from further consideration. However, percentage of mothers in the respondent's job category decreased job changing but not intentions to leave the labor force. Because percentage of females did not affect intentions to change jobs, we suspect that the percentage of mothers does not reflect the power of employees in the workplace to mold policy but instead serves as a proxy for social support at the workplace or for unmeasured variables that indicate the compatibility of that job with motherhood.

Turning to Model 3, results show that some, but not all, supportive working conditions negatively affected quit intentions. The measures of social support from supervisors and co-workers consistently decreased both intentions to change jobs and withdraw from the labor force. The other determinants of exit and change intentions diverged from here. The ability to work at home decreased exit intentions, and the availability of sick leave for family members decreased change intentions. None of the other workplace supports (child care assistance, ability to work part-time, likelihood of promotion, absence of unusual work hours) affected respondents' work intentions and all were eliminated from consideration. The inclusion of workplace support variables served also to eliminate the effect of child care cost on change intentions. This suggests that supportive working conditions are associated with higher expenditures on child care, again due to the generally positive association between wages and working conditions.

Finally, Model 4 includes all the variables showing effects in stages 1-3. This comprehensive model shows the robustness of most previously specified effects. In this model, the demographic factors of age and marital status, the child care variable of father care, the occupational characteristic variable of percentage of mothers in the job, and the support variables of workplace social support and sick leave for family illness all served to decrease change intentions, whereas prenatal change intentions increased the log odds of change intentions. The ability to work at home emerged as an inhibitor of change intentions in the full model, as well.

Robust effects were also demonstrated in the models of labor force exit intentions. The presence of additional young children, though not significant in Model 1, was significant in the final three models and exerted an inhibiting effect on intentions to exit the labor force. That women with

more young children were less likely to plan to leave the labor force is consistent with findings of recent research showing that increasing numbers of young children represent added financial responsibility for mothers (Rosenfeld & Spenner, 1992). Additionally, partner's income and gender traditionalism remained positively associated with exit intentions. Finally, child care satisfaction, ability to work at home, and workplace social support all served to decrease exit intentions in this final model.

Working conditions were hypothesized to have similar effects on change and quit intentions. To test the equivalence of these effects, we performed a *t*-test for the difference in coefficients across the change and quit coefficients for social support and the ability to work at home.[2] In line with our hypotheses, these tests revealed that the effects of social support and the ability to work at home on change and quit intentions do not differ in magnitude.

From this, we glean that our original hypotheses concerning the importance of child care for labor force exits, and social support variables for both exiting and changing jobs, are supported. Our expectation that respondents' wages would predict change/exit behavior remains unsubstantiated.

However, these results are biased in that the sample is restricted to women remaining in the labor force following childbirth. The data used here offer a correction to this selectivity bias from the subsample of women who did not return to the labor force following the birth of their child. Using Heckman's correction procedure, we created a lambda variable that measured the respondent's probability of being in the labor force at 12 months postparturm, based on prenatal job and family characteristics. The sample selection equation shows that women in better quality jobs with higher levels of human capital were more likely to continue employment following childbirth. Turnover intention models correcting for sample selection bias are thus adjusting the effects of job and family variables to reflect the behavior of women in lower quality jobs. These models controlling for postpartum labor force status reveal a slightly different story.

Results in Table 4 show that in the selection model for change intentions, the age, marital status, proportion of mothers in job, and available sick-leave effects remained the same, the relationship between prenatal change preferences and preferences at 1 year postpartum weakened, and the effect of workplace social support increased slightly. However, the negative effect of father care on intentions to change jobs disappeared in all but one of the models correcting for selectivity bias.

Turning to the labor force exit model, the selection correction brought forth one hypothesized relationship and obscured another. Workplace social support remained negatively associated with exit intentions. Partner's income also remained a significant positive influence. However, along the lines of our hypothesis, respondent's hourly wage did show a significant ($p = .057$) negative influence on exit intentions in the final model (column 4). Although the demographic factor of partner's income still played an important role in encouraging intentions to leave, mothers' wages emerged as an important factor in exit intentions once the bias toward high wage earners was corrected.[3] Finally, the insignificant result for child care satisfaction shown in Models 3 and 4 suggests that it may be endogenous with respect to workplace social support. Although the coefficient for child care satisfaction was significant in the first two models, with the addition of support variables in Model 3, the effect of child care satisfaction on labor force exit was attenuated to insignificance. It remained insignificant in the final model. Perhaps child care arrangements for these women are satisfactory in part because they could either alter work to avoid child care problems or could choose the child care they desired because supervisors and co-workers supported whatever schedule changes the mother needed to arrange that care. In this scenario, child care satisfaction remains an important factor with regard to turnover, but child

care satisfaction itself, like turnover, is affected by workplace social support.

DISCUSSION

This analysis began with the goal of testing several hypotheses about the determinants of mothers' labor force plans at 1 year postpartum. First, we hypothesized that indicators of labor force attachment, such as family status (partner's income, mother's wage, and number and age[s] of children) and traditional gender ideology, should show a stronger relationship to intentions to exit the labor force than intentions to change jobs. Although marital status significantly decreased the odds of change intentions (but not exits), results showed that gender traditionalism, respondent's hourly wage and partner's income showed significant relationships to exit intentions but not job changes. Thus the hypothesis that household and family determinants of labor supply should affect intentions to exit the labor force more than intentions to change jobs is supported.

Our second hypothesis concerned our belief that workplace support should significantly decrease the odds of both types of job turnover, as substantial numbers of women report difficulties managing job and family responsibilities. Workplace support was operationalized at both the macro- and microlevels of operation; the former is indicated by organizational characteristics that raise the visibility of mothers' concerns and the latter by the presence of family responsive personnel policies and social support from supervisors and co-workers. Results here show that only one organizational variable consistently showed a relationship to turnover intentions—the percentage of mothers in the job category had a negative effect on job changing but no effect on labor force exits.

Our measures of family responsive policies and workplace social support fared somewhat better. Social support from supervisors and co-workers and the ability to work at home each decreased the odds of leaving the labor force, and workplace social support and sick leave for family members showed significant negative effects on job change intentions. Although workplace social support is an important determinant of both job change and exit intentions, we can only speculate as to why the other type of support that affected job change and exit intentions differed. If labor force exits are conceptualized as a pathway to meet a mother's desire to be at home, it follows that the ability to work at home might inhibit exit intentions. In this way, women who would like to be at home can accomplish this goal while working. Alternatively, the availability of

sick leave for family members' illness may not be enough home time for those women who may prefer to be at home but may be a valued benefit for those more attached to the labor force. The ability to be at home with sick family members meets a crucial need for mothers who have few options for caring for sick children other than doing it themselves.

It should also be noted here that a variety of job accommodations to family needs showed no effects on quit intentions, including the ability to work part-time and to avoid overtime or irregular work schedules. Variables measuring past promotions and the potential for future promotion at the current job also failed to affect quit intentions among this sample of mothers.

Finally, we hypothesized that child care cost and satisfaction should affect both types of quit intentions—but intentions to exit the labor force more strongly than intentions to change jobs. However, child care cost did not affect turnover intentions of either type, and child care satisfaction significantly decreased only intentions to exit the labor force and this only before controlling for selection bias in postpartum labor force status. The fact that cost did not influence quit intentions in this sample runs counter to prior research on mothers' actual labor force behavior (Maume, 1991) and may reflect the presence of child care satisfaction in this analysis but not earlier research. Child care satisfaction may incorporate satisfaction with the cost of care, as well. Finally, we suspect the attenuated effect of child care satisfaction in the selection models is, in part, a function of satisfaction's endogeneity with regard to working conditions and workplace social support. Though our hypothesis that child care satisfaction should be a stronger determinant of labor force exits than job changes appears to be only weakly supported once sample selection is controlled, viewing child care satisfaction as endogenous to workplace social support directs attention to the way in which job conditions influence mothers' ability to locate and maintain satisfactory child care arrangements.

Although this study showed that certain forms of workplace support did decrease quit intentions and thus increased job stability among employed mothers of infants, drawbacks in this design merit caution in generalizing these results to the population of mothers at large. The dependent variables measure only future work intentions, not actual labor force behavior. These self-reports are reasonably accurate predictors of future behavior based on evidence from our longitudinal records, but some slippage does occur. Nevertheless, these results bolster the contention that job mobility rates among mothers are more job or context dependent than previously suspected, although life cycle stage and family status effects still exist.

NOTES

1. A measure of hours worked per week was included in early model specifications, but the pattern of effects did not change with hours worked per week held constant nor was the work hours variable itself significant. This variable was therefore excluded from further analysis.

2. This *t*-test uses the following formula:

$$t = \beta_1 - \beta_2 \sqrt{\sigma_1 + \sigma_2 - 2\sigma_{12}}$$

3. This makes good sense because labor force exits should be more sensitive to wages at the low end of the scale than at the high end. An alternative specification using logged wages was tried but did not produce different results in either the corrected or uncorrected turnover models.

To lead, facilitate, and support the efforts of those working in the Early Care and Education profession throughout Alaska.

February 6, 2012

Senator Lesil McGuire
State Capital Room 125
Juneau, AK 99801

Dear Senator McGuire,

On behalf of Alaska Association for the Education of Young Children, I am pleased to offer our support for Senate Bill 129. Passage of this bill would increase State of Alaska employee access to child care services, and positively impact the recruitment and retention of state employees.

Many other large employers have analyzed the return on investment realized by supporting on-site child care, including Providence Hospital, Credit Union One, and BP in Anchorage, SEARHC in Sitka, Peace Health Hospital in Ketchikan, and the General Services Administration in Juneau. Alaska Legislative Affairs currently oversees the contract for the state employer sponsored child care next to the Capitol, which has been successful in offering priority enrollment for Legislative staff and state employees.

The number of families with two working parents is at an all-time high, and according to an economic impact study of early care and learning by McDowell Group, one in ten Alaska workers depends on child care to maintain their employment. Access to high-quality, reliable child care near the workplace is an important benefit proven to enhance employees attendance and productivity. According to recent studies, 90 percent of parents using full-service child care centers say that access to a center close to their workplace improves their productivity at work.

This bill would also increase the capacity and quality of child care in Alaska for working families. Currently there are spaces in licensed programs for less than half of the young children with no stay-at-home parent. Alaska is rated in the bottom ten states for quality of child care by the National Association of Child Care Resource and Referral Agencies. Employer sponsored child care programs are able to achieve higher quality. High quality child care has a positive correlation with school readiness and reduced stress in families.

Thank you for your ongoing work to support school readiness, strong families, and a healthy economy in Alaska.

CS FOR SENATE BILL NO. 130( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR OLSON

A BILL

FOR AN ACT ENTITLED

"Bill Dunner Act"

"An Act establishing the Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration, and revitalization of Alaska Native languages."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS. The legislature finds that the preservation of Alaska Native languages is a critical component in the sustenance of cultural identity. The legislature further finds that Alaska Native languages are the foundation of cultures and are vital in maintaining traditional knowledge and understanding.

*** Sec. 2.** AS 44.33 is amended by adding a new section to read:

Article 7A. Alaska Native Language Preservation and Advisory Council.

Sec. 44.33.530. Alaska Native Language Preservation and Advisory Council. (a) The Alaska Native Language Preservation and Advisory Council is

New Text Underlined [DELETED TEXT BRACKETED]

established in the department for the purpose of recommending the establishment or reorganization of programs to support the preservation, restoration, and revitalization of Alaska Native languages.

(b) The council established under this section shall

(1) advise both the governor and legislature on programs, policies, and projects to provide for the cost-effective preservation, restoration, and revitalization of Alaska Native languages in the state;

(2) meet at least twice a year to carry out the purposes of the council; members may participate in meetings telephonically; and

(3) prepare reports of its findings and recommendations for the governor's and the legislature's consideration on or before January 1 of each even-numbered year.

(c) The governor shall appoint to the council established in this section five voting members who are professional language experts and who represent diverse regions of the state. In addition, one member of the senate appointed by the president of the senate and one member of the house of representatives appointed by the speaker of the house of representatives shall serve on the council as nonvoting members. In appointing the nonvoting members of the council, the president of the senate and the speaker of the house of representatives shall appoint a member of the bush caucus, if a bush caucus exists. In this subsection, "bush caucus" means a group of legislators that represents rural areas of the state.

(d) The members appointed by the governor shall serve at the pleasure of the governor.

(e) Members of the council shall serve without compensation but are entitled to per diem and travel expenses as provided under AS 39.20.180.

* **Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REPORT; APPOINTMENTS. (a) Notwithstanding AS 44.33.530(b)(3), the first report under AS 44.33.530(b)(3), added by sec. 2 of this Act, is due on or before July 1, 2014.

(b) The governor shall make the appointments required by AS 44.33.530(c), added by sec. 2 of this Act, on or before December 1, 2012.

ALASKA STATE LEGISLATURE

SENATOR DONALD C. OLSON

ALASKA
STATE CAPITOL
ROOM 508
JUNEAU, ALASKA 99801-1182

(907) 465-3707
FAX (907) 465-4821

Changes in CS (version X) to SB 130

- Section 1.
  - Added "are the foundation of cultures" to the legislative finding.
- Section 2.
  - Changed the name of the proposed council to Alaska Native Language Preservation and Advisory Council.
  - Establishment of the council in the DCCED instead of the Governor's Office.
  - The Council advises the Governor and the Legislature.
  - Council meets at least twice a year and prepares a report to the legislature by January 1 of each even numbered year.
  - The two non-voting legislative members of the council will come from the Bush Caucus.
- Section 3.
  - Governor must appoint by December 1, 2012
  - First report is due by July 1, 2014.

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY SENATOR OLSON

Introduced:
Referred:

A BILL

FOR AN ACT ENTITLED

"An Act establishing in the Office of the Governor an advisory council for the preservation, restoration, and revitalization of Alaska Native languages."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS. The legislature finds that the preservation of Alaska Native languages is a critical component in the sustenance of cultural identity. The legislature further finds that Alaska Native languages are vital in maintaining traditional knowledge and understanding.

* **Sec. 2.** AS 44.19 is amended by adding new sections to read:

Article 6. Alaska Native Language Preservation Council.

Sec. 44.19.860. Alaska Native Language Preservation Council. The Alaska Native Language Preservation Council is established in the Office of the Governor for the purpose of recommending the establishment or reorganization of programs to

support the preservation, restoration, and revitalization of Alaska Native languages. The council shall advise the governor on programs, policies, and projects to provide for the cost-effective preservation, restoration, and revitalization of Alaska Native languages in the state. The council shall meet as often as is necessary to carry out the purposes of the council and shall prepare periodic advisory reports for the governor and make recommendations for the governor's and the legislature's consideration.

Sec. 44.19.865. Membership; terms. (a) The governor shall appoint to the council established in AS 44.19.860 five voting members who have expertise in Alaska Native languages and who represent diverse areas of the state. In addition, one member of the senate appointed by the president of the senate and one member of the house of representatives appointed by the speaker of the house of representatives shall serve on the council as nonvoting members.

(b) The members appointed by the governor shall serve at the pleasure of the governor for three-year terms. The governor may reappoint a member for not more than three consecutive terms.

(c) Members of the council shall serve without compensation but are entitled to per diem and travel expenses as provided under AS 39.20.180.

Sponsor Statement: Senate Bill 130
Alaska Native Language & Advisory Council

"An Act establishing in the Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration, and revitalization of Alaska Native languages."

Alaska Native Languages (ANL's) are threatened by extinction. The intent of SB 130 is to preserve and maintain ANL's. Indigenous languages are the most critical components in terms of preservation of cultural ideas and traditions and serve as the backbone of all cultural elements.

SB 130 will establish the Alaska Native Language and Advisory Council to assess the state of ANL's and re-evaluate the programs within the state and make recommendation to the Governor and Legislature to establish new programs or re-organize the current programs.

According to the Alaska Native Language Center's *Population and Speaker Statistics* published in 2007, only 22 percent Alaska Natives statewide can speak their native language. More specifically, only 29 percent of the Eskimo Aleut population, less than 2 percent of the Tsimshian and Haida, and less than 5 percent of the Athabascan and Tlingit communities combined are fluent speakers. The Eyak language recently lost its last native fluent speaker.

It is vital that the State of Alaska creates this needed establishment and I urge your support in the passage of this bill.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB130

Analysis

Fiscal Note assumes:

2 Full time staff:
Research Analyst Rg. 18
Admin. Assist. Rg. 15

7 council members with geographic representation: 2 Anchorage, 1 Juneau, 1 Fairbanks, 1 Bethel, 1 Kotzebue, 1 Barrow

4 face-to-face meetings annually. Additional meetings as necessary via teleconference.

1 Anchorage meeting (Fall)
Transportation: $3347
Lodging: $600
M&IE: $560

1 Juneau meeting (Winter, during session)
Tranportation: $5812
Lodging: $1320
M&IE: $1028

1 Fairbanks meeting (Spring)
Transportation: $4804
Lodging: $960
M&IE: $764

1 Bethel meeting (Summer)
Transportation: $6110
Lodging: $1400
M&IE: $852

All meetings assume full council and both staff members in attendance.

Contractual includes core services charges, communications, advertising, printing, office space lease, and postage.

Initial equipment costs reflect set-up of office work stations, computers, phones, fax, copier, etc.

NORTHWEST ARCTIC BOROUGH

December 30, 2011

Senator Donald Olson
Alaska State Capitol Room 508
Juneau, Alaska 99801

Dear Senator Olson:

Quyanaq for introducing SB 130 to establish an Alaska Native Language and Advisory Council within the State of Alaska. The Northwest Arctic Borough supports this bill and encourages the legislature to work together to pass the bill as way to begin preserving and advancing our proud cultural heritage as Alaskans.

As background, all Alaska Native languages are considered endangered or severely endangered by linguists, and the tragic loss of Eyak in 2008 underscores the universal vulnerability of Alaska Native languages. The continued erosion or disappearance of Alaskan cultural identities has social implications for our state's civil society – including depression, self-destructive behaviors and community shame.

Within the Borough/NANA Region, the Iñupiaq language has been in serious decline. In 2005 the Aqqaluk Trust with the Native Village of Kotzebue designed and administered a regional language survey of 4,112 households throughout the Northwest Arctic region's 11 communities. This survey was the most comprehensive survey of Iñupiatun speaking and understanding ability in the Northwest Arctic. Data from the 2005 regional survey were prepared by the McDowell Group, and according to the data:

- Only 18% (739) indicated understanding the Iñupiaq language well, while just 3% (113) indicated understanding the language well but hardly speaking.
- Just over 14% can speak the Iñupiaq language fluently.

Our Borough Comprehensive Plan (1993) recognizes the issues that maintaining traditional values and activities are important to the social, cultural and economic well-being of residents and whole communities. The plan recommends supporting these values including Iñupiaq language activities through education programs, land management and other Borough programs.

The Borough assembly through resolution 10-61 (see attached) recognized that our Alaska Native languages are inherently valuable and constitute vital sources of identity for all Alaskans, and reinforces positive cultural, geographic, and humanistic ties

NORTHWEST ARCTIC BOROUGH
P.O. Box 1110
Kotzebue, Alaska 99752
(907) 442.2500 or (800) 478.1110
Fax: (907) 442.3740 or 2930

that make us globally unique. The valuable importance of our Iñupiaq language can increase cultural heritage, support sustainable communities, and encourage collaboration among generations (Elders to youth) in various projects and programs throughout the region and state.

The Borough supports SB 130 as a method to build statewide advocacy, research and corpus on behalf of Alaska Native language revitalization efforts, and support greater cooperation between stakeholders that is urgently needed to initiate or maintain language revitalization initiatives in all Alaskan communities.

If you have any questions, please contact myself or Ukallaysaaq Tom Okleasik, Planning Director / Northwest Arctic Borough / PO Box 1110 / Kotzebue, AK 99752 / Phone 907-442-2500 / Fax 907-442-2930.

Sincerely,

Siikauraq Whiting, Borough Mayor

Chugachmiut

January 18, 2012

Senator Donald Olson
Alaska State Capitol Room 508
Juneau, Alaska 99801

Dear Senator Olson:

Chugachmiut appreciates your introduction of SB 130 for the purpose of establishing an Alaska Native Language and Advisory Council within the State of Alaska. We fully support the bill and encourage the legislature to adopt it this year.

As I reflect on the Suqpiaq language spoken in our area, and how close it came to extinction, I am comforted that federal language grants have given us an opportunity to preserve it and teach a new generation of speakers. Yet we are losing our teachers at a very rapid rate. One of our few Elder speakers passed away recently and we feel the loss deeply. We relied extensively on him to help guide our language restoration efforts.

Our tribes are clear and focused on preservation of Suqpiaq and teaching our youth. Nanwalek has struggled for years to support an immersion school. We are now finding some acceptance for language instruction in our public schools. Chugachmiut has collaborated with the 2 school districts with schools in our villages over the past 2 years and we hope to see more in the future.

An Alaska Native Language and Advisory Council as proposed in your bill would be extremely beneficial to our language preservation effort. Please let us know what we can do to support it.

Respectfully,

Patrick M. Anderson
Executive Director

1840 Bragaw Street, Suite 110 / Anchorage, AK 99508-3463 / (907) 562-4155 / Fax (907) 563-2891

TAMAMTA PIGPET
"All of Ours"

NORTHWEST ARCTIC BOROUGH
RESOLUTION 10-61

A RESOLUTION OF THE NORTHWEST ARCTIC BOROUGH ASSEMBLY IN SUPPORT OF ESTABLISHMENT OF AN ALASKA NATIVE LANGUAGES COMMISSION

Whereas, Alaska Native languages are inherently valuable and constitute vital sources of identity for Alaska Native peoples, reinforcing the cultural, geographic, and ethnic ties that make us unique; and

Whereas, Maintaining and nurturing our cultural identities in meaningful ways is paramount to the future survival of Alaska Native peoples as distinct societies within Alaska and the United States; and

Whereas, All Alaska Native languages are endangered or severely endangered and the tragic loss of Eyak in 2008 underscores the vulnerability of Alaska Native languages; and

Whereas, The continued erosion or disappearance of cultural identities has social implications for Alaska Native peoples; and

Whereas, Language revitalization is a social justice issue involving processes of psychological and spiritual healing, as well as processes of language re-acquisition, reclamation, and transmission; and

Whereas, Sustained statewide advocacy, research and corpus on behalf of Alaska Native language revitalization efforts, financial resources, and greater cooperation between Alaska Native language stakeholders is urgently needed to initiate or maintain language revitalization initiatives in Alaskan communities.

NOW THEREFORE BE IT RESOLVED; that the Northwest Arctic Borough Assembly supports the State of Alaska to work with the Alaska Federation of Natives (AFN) to establish an Alaska Native Languages Commission in order to: advocate on behalf of Alaska Native languages, facilitate and promote greater cooperation between Alaska Native language stakeholders, conduct and share research and corpus concerning Alaska Native and other indigenous languages, and to research the availability of and potentially provide financial resources for Alaska Native language revitalization efforts.

BE IT FURTHER RESOLVED; the Northwest Arctic Borough Assembly supports the State of Alaska to fund the Alaska Native Languages Commission with authority to make grants to tribal, charter and public schools to support Indigenous language education with an initial appropriation of $5 million over 2 years, and annually fund the program with a combined revenue from a 0.5 percent increase in

tobacco sales taxes, 0.025 percent increase in the fish taxes, 0.15 percent increase in the mining tax, and 0.010 increase in the oil tax.

PASSED AND ADOPTED THIS 23rd DAY OF NOVEMBER , 2010.

Walter G. Sampson, Assembly President

PASSED AND APPROVED THIS 23rd DAY OF NOVEMBER, 2010.

LEGISLATIVE RESEARCH REPORT

MARCH 24, 2011

REPORT NUMBER 11.219

ALASKA LEGISLATION REGARDING THE PRESERVATION OF ALASKA NATIVE LANGUAGES

PREPARED FOR SENATOR DONALD OLSON

BY TIM SPENGLER, LEGISLATIVE ANALYST

You asked if legislation has been introduced in Alaska seeking to establish a board or advisory council to oversee programs designed to preserve Alaska Native languages. Briefly, we were unable to identify any such current or past legislative efforts in Alaska.[1] We did find, however, two examples of related legislation that may interest you, which we discuss below.

In 1972 the Alaska Legislature enacted CH 175 SLA 1972, which established the Alaska Native Language Center (ANLC) based at the University of Alaska Fairbanks (UAF).[2] The mission of the ANLC is to serve as a center for research and documentation of the Native languages of Alaska. The Center publishes its research in story collections, dictionaries, and research papers. It also houses a large archival collection of items written in or about Alaska Native languages. Staff members provide materials for bilingual teachers and others who work with Native languages and provide consulting and training to teachers, school districts, and state agencies.

Professor Lawrence Kaplan, director of the ANLC, was unaware of any legislative attempts to form a board or council to oversee programs designed to preserve Alaska Native languages.[3] He also polled his co-workers at the Center who were also unaware of such efforts. Additionally, we spoke with the founder and first director of the ANLC, Professor Michael Krauss.[4] Professor Krauss, a Harvard-trained linguist who taught at UAF from 1960-2000, informs us that no such legislative efforts have been put forward to his

---

[1] In an attempt to identify proposed legislation we reviewed the Bill Action Status and Inquiry Systems (for legislative activity from 1993 to the present), the Alaska Final Status of Bills and Resolutions books (for information from 1977-1992), and the Legislative Reporting Service reports (for information from 1960-1976). Additionally, we completed a Newsbank search and spoke to Alaska Native language experts. Despite our efforts, it is possible that relevant proposals of legislation have eluded us.

[2] More information on the Alaska Native Language Center is available at *http://www.uaf.edu/anlc*.

[3] Professor Kaplan can be reached at (907) 474-6582.

[4] Professor Krauss can be reached at (907) 479-6340.

knowledge.[5] He asserted that if such measures had been considered, he would almost certainly have been aware of them.

Additionally, Senate Bill 103, which addressed Native languages in schools, was passed into law in 2000 (CH 29 SLA 2000, codified as AS 14.30.420).[6] This measure mandates that school districts in which a majority of students are Alaska Natives shall establish a local Native language curriculum advisory board. If an advisory board recommends the establishment of a Native language curriculum, the school board in that district may initiate and conduct such a curriculum.

We hope you find this information to be useful. Please let us know if you have questions or need additional information.

[5] The idea of a board or advisory council to oversee programs to preserve Alaska Native languages intrigued the professor. He related that he would be very happy to consult with anyone considering such a measure.

[6] The version of Senate Bill 103 that passed the legislature was House CS for Senate Bill 103 (HES).

STATE OF ALASKA
OFFICE OF THE LIEUTENANT GOVERNOR
ANCHORAGE

MEMORANDUM

TO: Lieutenant Governor Mead Treadwell

FROM: **Esther Woo**

Cc:

DATE: August 15, 2011

RE: **Cursory Survey of Language Preservation and Revitalization Efforts in Alaska**

At your request, and as a background for the State Committee on Research, the Alaska Historical Commission, and the U.S. Arctic Research Commission, this memo is a report on our office's efforts to identify examples of language revitalization and preservation activities taking place in Alaska.

Executive Summary

Half of the world's languages are not being taught to children, meaning that 3,500 of the 7,000 languages are set to disappear within a generation. Specifically in the United States, only 201 of the 400 indigenous languages were being spoken in the year 2006; it is predicted that only 20 will be spoken in year 2050. In the state of Alaska, where there are 20 indigenous languages, one is already extinct, meaning there are no remaining native speakers. The remaining 19 are considered endangered.

In this light, this memo will provide a cursory view on why this issue deserves attention as well as action as well as examples of different efforts targeting education and documentation. It will also provide an overview of government related efforts assisting these activities. Finally, there will be several recommendations regarding actions the commissions may take to further support existing efforts.

The Importance of Preservation

Losing a language not only deprives the world of the language itself, but also the richness of culture, history, and knowledge carried within the language. As Wade Davis1 says, "Language is a flash of the human spirit. It's a vehicle through which the soul of each particular culture comes into a material world. Every language is an old-grown forest of the mind, a watershed of thoughts, an ecosystem of possibilities."

Language loss is an indicator of cultural loss because according to Linda Belarde,2 Curriculum Specialist in the Sealaska Heritage Institute, "Language carries a people's way of looking at the world." For example, the terms for "nephew" and "niece" in Tlingit are "kaalk'w," her brother's child, and "keik," his sister's child. This means that his sister's child is in the same clan while her brother's child is in the opposite moiety, indicating that it is the clan of the kin, and not his or her gender (as it is in English), that is taken in account. These Tlingit kinship terms thus serve to reflect the matriarchal structure of Tlingit society.

Native languages also carry scientific knowledge. For instance, some native terms complement knowledge on walrus anatomy and snowflakes. Furthermore, the extinction of a language will also bury history and cultural tradition, because many of these indigenous languages have been passed down orally for centuries. Despite existing writing systems for all Alaskan indigenous languages today, significant loss of such knowledge would be inevitable in the face of language loss. Thus, in the words of Davis, "We're living through a time when half of humanity's intellectual, social, and spiritual legacy is being lost."

Revitalization through Education

It is thus clear that subsequent generations will to some degree face irreparable gaps in culture and knowledge. However, there have been efforts across the state of Alaska, with the support of government related agencies as well as state and federal legislation, to reverse the trend of such loss. At the heart of these efforts is the education of the young, a vital approach in passing down language to the next generation.

One successful model of language education is the Ayaprun Elitnaurvik Yup'ik Immersion School in the Lower Kuskokwim School District. The immersion school is a K-6 charter school located in Bethel, with around 175 students each year. Efforts to implement an immersion program began in the 1980s when concerned parents petitioned for a stronger and more extensive Yup'ik program. Today, the school's mission statement is to provide a high quality education to meet the state standards and strengthen Yup'ik language and culture, while promoting an

1 Wade Davis is an anthropologist, ethnobotanist, author, and photographer who has been researching and exploring worldwide indigenous cultures. Davis is an advocate for the protection of the "ethnosphere," a term he coined that describes the sphere of all of humanity's cultures and beliefs. His books *Light at the Edge of the World: A Journey Through the Realm of Vanishing Cultures* (2001) and *The Wayfinders: Why Ancient Wisdom Matters in the Modern World* (2009) focus on such issues. Davis is an Explore-in-Residence at the National Geographic Society.

2Linda Belarde, Curriculum Specialist at the Sealaska Heritage Center: (907)586-9187

The Alaska Native Language Program offers major and minor degrees in Central Yup'ik and Inupiaq Eskimo. The classes are taught by members of the Alaska Native Language Center staff, who are working to further develop the bachelor's degree program by implementing more Yup'ik literature. The UAF also runs a teacher training program as a partnership with the Kuskokwim campus of UAF in Bethel. In 2010, the program graduated its first cohort of Alaska native teachers with a specialization in second language acquisition and teacher education: there were 15 graduates with master's degrees and 3 graduates with doctorate's degrees. This teacher training program is closely linked to the UAF's partnerships with school districts; according to Patrick Marlow,6 Associate Professor at the University, most of the training programs' graduates are now working as teachers or administrators in districts such as the Lower Kuskokwim school district, where teachers continue to go through training to learn good teaching methods as well as language learning instructional methods. Furthermore, several teachers in Bethel are partnering with the university to develop curriculum. The UAF is thus a vital source of human resources for language education programs.

Another challenge to revitalization is the loss of a natural language environment caused by rapidly decreasing speaker populations. The Sealaska Heritage Institute, which was founded for the Tlingit, Haida, and Tsimshian people of Southeast Alaska and in 1997 adopted language preservation as its foremost priority, strives to create language environments to support effective learning by designing units for language curriculum, providing educational tools, and hosting workshops for teachers. One example of the institute's educational resources is the recently introduced set of flash cards and audio CDs to complement Tlingit alphabet learning. Public school teachers throughout the region as well as community programs such as afterschool or summer school programs make use of the resources provided by the institute. The Sealaksa Heritage Institute also has partnerships with the Juneau School District and the Hoonah School District.

The Sealaska Heritage Institute's biennial Celebration further encourages this language environment, as all of the songs in the Celebration dances are in native languages. Depending on the year, the Celebration includes lectures and lessons in the language. In conjunction with providing these resources and opportunity for educators and the community, the institute has programs such as the Latseen Hoops Camps, an annual summer camp with an all-Tlingit coaching staff that exposes Tlingit to students by integrating native language instruction with basketball.7

The Goldbelt Heritage Foundation, formed in 2007, is also dedicated to offering tools and materials for people wishing to learn the language. For example, Fred White, Tlingit Language Sepcialist and also the youngest fluent speaker of Tlingit, has made audio recordings for teachers throughout the region. In addition, the foundation is developing a Tlingit verb database that

---

6 Patrick Marlow, Associate Professor at UAF: (907)474-7446

7 For more information on SHI efforts contact Linda Belarde mentioned in footnote two.

includes conjugations, a project originally started by Richard and Nora Marks Dauenhauer in the 1990s and now headed by Keri Edwards.8

Furthermore, the Bilingual Multicultural Education Equity Conference (BMEEC) is an annual conference supported by the Alaska Department of Education and the Alaska Association for Bilingual Education. Agendas for the conference include workshops and discussions on the topic of multicultural education. The keynote speakers in 2011 (Misty Adoniou and Mary Macken-Horarik) presented foundations for an approach to teaching literacy.

Preservation through Documentation

Besides efforts centered on education, there are numerous groups across the state working to document native languages. Three examples of such efforts are from the Alaska Native Language Center of UAF, Sealaska Heritage Institute, and the Alutiiq Museum.

The archive in the University is the largest repository of Native American languages and related languages in the world: it houses more than 10,000 items of written documents that include copies or originals of all material in or about all of Alaska's native languages, which in many cases are held nowhere else. In addition to these collections, there are collections of related languages such as the Eskimo languages of Russia and the Athabascan languages of Canada. The archive also houses a recording collection of about 7,000 recordings, although Gary Holton,9 Professor of Linguistics at the University, calls this "the tip of the iceburg." To extend this audio collection, the language center has formed partnerships with regional organizations, such as the Alutiiq Museum and the Ahtna Heritage Foundation. The foundation does the outreach in the community to locate tapes to preserve and digitize, while the language center archive provides infrastructure backup. In addition to the archive, the language center staff document native languages and provide resources. For instance, Lawrence Kaplan, Professor of Linguistics at the University and Director of the Alaska Native Language Center, is working on dictionaries of the Inupiaq language as well as texts and grammatical explanations for the language. Holton has led a project developing a new edition of the Indigenous Peoples and Languages of Alaska Map originally produced by Michael Krauss in 1974.

The Sealaska Heritage Institute has also published books and videos relating to cultures, languages, and history, including language dictionaries, phrase books, and Tlingit narratives. The institute also strives to document the history, culture, heritage, art, and language of the Tlingit, Haida, and Tsimshian people of the Northwest Coast by housing a collection of books, historical photographs, audiovisual recordings, manuscript materials, and ethnographic objects.

The Alutiiq Museum has the Qik'rtarmiut Alutiit (Alutiiq People of the Island) language program that focuses on documenting and revitalizing the Alutiiq Language of the Kodiak Archipelago. The Alutiiq Living Words Project, funded by the National Science Foundation's Documenting Endangered Languages Program, involves semi-fluent speakers and elders who worked together

---

8 For more information on the Goldbelt Heritage Foundation contact Fred White or Keri Edwards: (907)790-1424

9 Gary Holton, Professor of Linguists at UAF: (907)474-6585

to document Alutiiq speech, vocabulary, and cultural traditions in audio and video form, which were indexed and archived. Selected recordings are made available online through the Alutiiq Language Web Portal. The project also involves the New Words Council, which consists of elders and semi-fluent associate members who develop native words for contemporary terms such as "computer," "elevator," and "linguist." Besides these documentation efforts, the Alutiiq Museum's Alutiiq Word of the Week program, now in its fourteenth year, produces weekly cultural lessons for weekly broadcast on the radio, the Kodiak Daily Mirror, and email broadcast. The Alutiiq Museum hosts the Alutiiq Language Club, which meets weekly to talk in the language or have elders tell stories in the language.10

Supporting Organizations

In addition to language education programs, efforts to provide human resources and education resources, and documentation works, there are also supporting organizations which are not necessarily directly involved in language revitalization and preservation, but are vital to the state-wide effort as a whole. Such supporting groups include the Alaska Native Heritage Center and the Alaska Humanities Forum.

The Alaska Native Heritage Center, which focuses on expanding the public's knowledge of Alaska Native cultures, has been directly and indirectly involved in Dena'ina language preservation and revitalization. The ANHC is currently closing out a National Science Foundation grant for a project involving a partnership with a tribe to research rites of passage through studying and transcribing traditional stories. Though the ANHC currently does not offer language classes as it did in the past, the heritage center provides language lesson podcasts for online use as well as internship programs and afterschool programs designed to expose students to language environments through native dance and song. Annette Evans Smith,11 Interim President and CEO of the Alaska Native Heritage Center, envisions partnering with some of the regions that have immersion programs to create a language nest, such as a camp for young children that would fuse childcare and language immersion: "Immersion is the best way to learn a language," says Evans Smith.

The Alaska Humanities Forum acts as a convener and supporter of other groups, mainly through awarding grants as part of the National Endowment for the Humanities. Recipients of these grants include the Alaska Native Knowledge Network, which is working to preserve and promote native language and philosophy, as well as a program for preserving Eyak. A native language preservation program that has worked with representatives from villages in the Kotzebue area and been headed by Tom Okleasik also received funding. The AHF has supported the Rosetta Stone Endangered Language Program, which in partnership with the NANA Regional Corportaion designed two Inupiaq language CDs. has designed a program for learning Inupiaq. Greg Kimura,12 CEO and President of the Alaska Humanities Forum, commented that there are

---

10 For more information on the language program in the Alutiiq Museum contact April Counceller, Language Manager at the Alutiiq Museum and Archaeological Repository: (907)486-7004

12 Greg Kimura, CEO and President of the Alaska Humanities Forum: (907)272-5308.

not enough resources to cover the needs of various groups. However, he expressed that the Forum "wants to be around to be supportive and helpful of the different groups around the state who are part of preservation and revitalization efforts."

Government-related Support

Assisting these many layers of efforts are federal agencies; the National Science Foundation, the Administration for Native Americans,13 the U.S. Department of Education, and the National Endowment for the Humanities have provided funding for many of these efforts. The U.S. Department of Education in particular, in the words of Patrick Marlow, "has been absolutely fantastic in terms of its commitment to teacher training." The U.S. Department of Education's Office of English Language Acquisition provides funding for professional development for K-12 teachers, and the Office of Alaska Native Education provides grants for Alaskan efforts that focus on developing strong language programs for K-12. According to Marlow, both of these offices have been vital to establishing and maintaining teacher education programs in the University. Despite this, April Counceller of the Alutiiq Museum and Marlow both expressed concern for the growing difficulty in not only receiving grants but also maintaining funding for established programs.

In addition, both the federal and state governments have introduced legislations that may assist revitalization efforts. The Esther Martinez Native American Languages Preservation Act of 2006 was passed by Congress and signed by President Bush as an amendment to the Native American Programs Act of 1974. The amendment strengthened the act by providing for the revitalization of Native American languages through immersion programs. In Alaska, Senator Donald Olson has introduced Senate Bill 130, which recognizes native language preservation as "vital in maintaining traditional knowledge and understanding" and calls for the establishment of the Alaska Native Language Preservation Council in the Office of the Governor "for the purpose of recommending the establishment or reorganization of programs to support the preservation, restoration, and revitalization of Alaska Native languages."14

Furthermore, an Executive Order on Native American Language Preservation15 was drafted in 2010 between senior White House Staff and representatives from Native American communities across the United States. If approved by the President of the United States, this Executive Order would strengthen the Native American Languages Act of 1974 and the Esther Martinez Native American Languages Preservation Act of 2006 mentioned above by creating an Interagency Working Group on Native American Language Revitalization, mobilizing the coordination of federal resources for language revitalization, and appointing a Presidential Board of Advisers on Native American Languages. According to Gary Holton, "It would be recognition that this is something we believe in, that we make a commitment… If you go back to people who have had

decades of language suppression, that means something." As of July 2011, the National Congress of the American Indian as well as other language rights and American Indian rights groups are pressuring President Obama to sign this order.

Recommendations for the Commissions

There are several ways in which the commissions you participate in as Lt. Governor may assist the statewide revitalization and preservation effort. First, the Alaska State Historical commission can support efforts to officially recognize the natives by establishing native place names. In Hawaii for example, Hawaiian can be seen in signs in the airports and on the streets. According to Holton, this has the effect of increasing appreciation for native languages among both natives and non-natives. Representatives from the Alaska State Historical Commission attending the Council of Geographic Names Authority in October should identify other ways to establish more Alaska Native place names.

Second, there is a lack of coordination of all revitalization and preservation efforts on a state level. Although the Alaska Native Language Center advises new groups starting revitalization projects and provides information about existing efforts, there may be a need for a higher level of coordination. One problem with the lack of such coordination is that it is difficult to get a broad picture of efforts across the state, which causes another problem: according to Holton, "What we see across the state are grass root projects that are reinventing the wheel," which results in wasted time, resources, and effort. In addition, a higher level of coordination may allow native language revitalization efforts a higher level of recognition. The Alaska State Historical Commission may consider either asking Governor Parnell to establish a state-level coordination of language revitalization and preservation efforts, or offer to take on that responsibility under existing mandates of the Commission.

Third, students attending immersion or bilingual schools may need alternative testing to required standardized tests in English. In cases where students are in academic settings involving two languages, this requirement may drive parents, afraid that their children will perform badly on the test, to pull back on the language programs in place. School districts such as the Lower Kuskokwim district has requested a waiver and offered alternative tests in Yup'ik, but the state, in turn, has not requested such a waiver although it has the option to do so.16 According to Marlow, research has indicated that these students may at first lag behind in terms of academic achievement, but later tend to catch up to, if not surpass, monolingual students. Therefore it is recommended that the Alaska State Historical Commission work with the Department of Education to assist efforts to provide alternative assessments within immersion or bilingual programs in order for such programs to maintain and strengthen support of multicultural education among parents and community members.

Fourth, as emphasized by Linda Belarde of the Sealaska Institute, in many regions there is no natural language learning environment, rendering language learners to become dependent on structured classroom settings, which according to Belarde, "makes it very different from learning

---

16 For more information on the waiver contact Patrick Marlow mentioned above in footnote six

our languages naturally as our first languages." Furthermore, it is important to for native languages to appeal to young people: as Kaplan comments, "One of the worst things that could happen is for people to see these as languages of old people." To prevent this, Kaplan is working on a grant proposal for a project that would document and encourage text messaging in native languages. Thus, it is recommended that in order to assist efforts in creating a more effective language environment such as those of the Sealaska Heritage Institute and the Alutiiq Museum, the commission support efforts to increase native language use through the media, such as in music, television shows, movies, and radio.

Lastly, the commission should work with the State Committee on Research and the U.S. Arctic Research Commission to support further research on successful language revitalization models and current needs in language education, as educating the next generations may be the most effective way to ensure the survival of Alaska's indigenous languages. There have been successful language revitalization efforts in New Zealand and Hawaii that may be referred to as models for future efforts in Alaska. In New Zealand, where in the 1980s fewer than 20% of the Maori were considered native speakers, the Kohanga reo movement was founded in 1982. Primary schools and secondary schools were established, where students were primarily taught in the Maori language. Furthermore, Hawaii adopted this model through the Punana Leo (translated as "language nest"), which are essentially Hawaiian immersion. Later, K-12 Hawaiian immersion programs as well as higher level education programs were developed. These models have already inspired Alaskans, such as trustees of the Sealaksa Heritage Institute, who after visiting Hawaii and learning about its language restoration programs, decided to adopt language revitalization as the foremost priority of the institute.

In this light, one possible area of research may be regarding human resource deficiencies, an issue that the Alaska Native Language Center has been addressing. A possible way to support such efforts may be to strengthen cooperation between Greenland and Alaska through native language teacher exchanges: some natives in Greenland and some natives in Alaska share common languages such as Inupiaq with differences in dialect. Because the problem in many villages is that native speakers are too elderly to teach younger children, an exchange where teachers from Greenland could work in villages and language programs would not only bolster current language education efforts, but also establish a connection between the Greenlandic and Alaskan language revitalization efforts.17

Success through Community Involvement

Ultimately, it is most important to emphasize that the primary efforts must come from the community: "We're the support staff; they call us up and we do our best to help by producing materials and documenting the languages, but as far as the real spark to get people learning and revitalizing the language, I'd say that has to come from within the community. You can't make somebody do that," says Kaplan. Greg Kimura likewise stressed, "One thing is absolutely clear: that we are not going to be able to accomplish the preservation, let alone the propagation of some

17 The idea of the Greenland-Alaska teacher exchange idea was communicated between the office of Lt. Governor Treadwell and between Lt. Governor Treadwell and

of these threatened languages unless that whole effort is led by the communities; they're the ones who have to be the primary morale force for this, and also the voice for language preservation."

Last native Eyak speaker dead at 89

By DEBRA McKINNEY
dmckinney@adn.com
Published: January 22nd, 2008 02:51 PM
Last Modified: January 22nd, 2008 12:47 PM

Chief Marie Smith Jones, 89, the last full-blooded Eyak and last native speaker of the Eyak language, died of natural causes on Monday at her home in Anchorage, according to her family.

Services will begin at 1 p.m. Friday at St. Innocent Russian Orthodox Cathedral, 401 Turpin St. Viewing will begin at 11 a.m.

Educators work to preserve endangered Alaska languages

By MIKE DUNHAM
mdunham@adn.com

(07/11/11 10:00:21)

If Alaska's Native languages vanish in the next generation, it won't be because people didn't try hard to keep them alive, says Gary Holton.

"There are significant efforts with Yup'ik immersion schools and teacher training programs," said Holton, associate professor of linguistics in the Alaska Native Language Center and director of the Alaska Native Languages Archive at the University of Alaska Fairbanks. He pointed to an ongoing documentation effort, dictionaries and teaching of the endangered Deg Xinag and Han Athabascan dialects. Even Eyak, technically extinct, is benefiting from a language revival program that recently held workshops in Anchorage and Cordova, he said.

But he admits that the situation is critical for many of the state's indigenous languages.

The last person who called Eyak her first language, Marie Smith, died in 2008. Maybe one or two speakers of Holikachuk are still alive around Grayling, Holton said. A few more speak Deg Xinag, the neighboring Athabascan dialect. The number of Han speakers in Eagle is "perhaps less than 10; the situation on the Canadian side of the border is even worse. Maybe two speakers."

Holton played a key role in crafting the latest edition of the Alaska Languages Map. The map, which shows the historic distribution of 20 different Native Alaska languages, was first produced in 1974 by the director of the language center, Michael Krauss. It has been updated since then.

This most recent edition, available online at www.uaf.edu/anla/map, features several changes, Holton said. The names of some languages have been changed, either to reflect advances in linguistics or to rectify old names that may have been in some way offensive: Tanaina has become Dena'ina; Aleut is now Unangax; Ingalik is now Deg Xinag.

"Another big change is the inclusion of Native names for villages and geographic features given along with the English names," he said. Barrow is also Utqiagvik, and Kodiak Island is Qikertaq.

The map name for Juneau, Dzanti K'ihe-eni, may be a "bit contrived," Holton said, "since Juneau was not a traditional village." The same might be said for Anchorage, given as Dgheyaytnu.

Yup'ik scholar Cecilia Martz of Bethel noted another change. In previous editions, the percentage of young people speaking the language was indicated by different color dots. In 1974, the Central Yup'ik area was covered in black circles, indicating most children spoke Yup'ik, or circles divided half-and-half black and white, which meant that Yup'ik and English speakers were roughly even.

Referring to her hometown of Chevak, Martz said, "If they did it today, they'd have to make it all white. None of the kids speak the language. It's the same way with all that villages that were all dark; they should be all white or half white now."

Holton said that change in the map was "a deliberate choice based on feedback from community groups. There are less than half a dozen villages on the lower Kuskokwim with child speakers, so the map would have been almost entirely open circles -- not very informative or encouraging."

In "Vanishing Languages of the Pacific Rim" (Oxford Press, 2007), Krauss suggests the erosion of Native languages could be due to television, which is mostly English and ubiquitous in villages nowadays, and "the likely lethal effect of the 'No Child Left Behind' (federal school mandate), requiring proof of proficiency in English but not Native language."

But he also says that Yup'ik and Inupiaq are being retained at rates much higher than the Aleut and Indian languages. Yup'ik is particularly strong, he writes, accounting for "fully 93 percent of those who speak an Alaskan Native language."

The map has always followed traditional tribal boundaries, Holton said. So Eyak remains an enclave, though there are no speakers.

"If we were mapping languages as spoken today, he'd have to put a huge number of Yup'ik speakers in Anchorage," which is in traditional Dena'ina territory.

Some scholars believe that Yup'ik is the Native American language with the best chance of surviving the 21st century. It is commonly heard in Bethel. Martz cited radio news and call-in programs in the language, the presence of interpreters at the hospital, and education.

"There are two efforts that have had really good results," she said. "The school immersion program for kindergarten through sixth grade and the Yup'ik degree program at the college (UAF's Kuskokwim campus)."

When she speaks Yup'ik to children who have been through the immersion program, they respond to her in Yup'ik, she said. "But most of the time, they speak English. And with each other, they speak English."

In addition to education and documentation, many of Alaska's Native languages have benefited from being part of a widely distributed linguistic group. Maps in "Vanishing Languages" show dozens of distinct languages dotting America's west coast from Puget Sound to San Diego, each with one or no speakers remaining.

In contrast, the "Eskimoan" group reaches from Asia to the Atlantic Ocean, with tens of thousands of speakers in Alaska, Canada and Greenland. Athabascan groups stretch as far south as Mexico. It reminds Holton of the continuum of Romance languages, which spans southern Europe from Romania to Portugal.

Nonetheless, "Simply based on the number of speakers and their ages," Holton said, it may be impossible for the most endangered Alaskan languages to keep from "going the way of Eyak."

"Nowhere can I say things look great," he said. "It's a sad scenario but there are glimmers of hope. I choose to focus on the positive."

Alaska Native Language Center

Alaska Native Languages

Population and Speaker Statistics

The following table gives estimates of the population of speakers of Alaska Native languages in reference to the relevant community population. Numbers such as these should be interpreted with caution. As Krauss notes:

> Arriving at statistics of number of speakers of indigenous languages out of total relevant population is complicated by two types of major factors. The first type is of course in the determination of who is a speaker, and the second is in counting who is a member of the indigenous community. (2007:409)

More relevant to those wishing to understand the status of Alaska Native languages are the current and recent efforts at language documentation and revitalization.

Language Family	Language Name	Population	Speakers
Eskimo-Aleut	Aleut	2,300	150
	(*Russia)	200	5
	Sugpiaq (Alutiiq)	3,500	200

ALASKA FEDERATION
OF NATIVES

January 23, 2012

The Honorable Don Olson
Alaska State Capitol, Room 508
Alaska State Senate
Juneau, Alaska 99801

Dear Senator Olson:

As you know, the Alaska Federation of Natives (AFN) is the largest statewide Native organization in Alaska representing more than 125,000 Alaska Natives residing in Alaska, and more than 120,000 Alaska Natives scattered throughout the other 49 states. AFN was organized in 1966 to facilitate bringing the various regional and village associations together in order to advocate with one voice for a fair settlement of our aboriginal land claims, which became the Alaska Native Claims Settlement Act of 1971 (ANCSA).

Today, AFN is governed by a 37-member board of directors representing villages (both federally recognized tribes and ANCSA village corporations), 11 regional tribal consortiums, and the 13 regional ANCSA corporations. AFN's annual convention is the largest annual gathering of Native people within the United States. AFN's mission is, in part, to enhance and promote the cultural, economic and political voice of the Alaska Native community.

AFN supports the enactment of Senate Bill 130, entitled "An Act establishing in the Office of the Governor an advisory council for the preservation, restoration, and revitalization of Alaska Native languages" and we join you in urging support for passage of this bill.

This bill establishes, in the Office of the Governor, an Alaska Native Language Preservation Council (Council) tasked with evaluating Alaska Native Language programs and making recommendations to establish new programs or reorganize current programs. We agree that indigenous languages are the most critical components in preservation of Alaska Native Cultures as they are the foundation of all cultural groups, including the Alaska Natives. Their preservations will preserve cultural ideas and traditions and serve as the backbone of all cultural elements. We also recognize the urgency of establishing such a Council as many Alaska Native Languages are threatened by extinction.

Attached is AFN Resolution 12-01, "Support of a State of Alaska Act To Establish The Alaska Native Language Preservation Council And Relating To The Preservation, Restoration and Revitalization of Alaska Native Languages." This resolution urges support of Senate Bill 130 and requests immediate action begin, by way of demonstration projects, to restore Alaska Native Languages. We believe inclusion of five language restoration demonstration projects will

strengthen the bill as it moves the issue beyond analysis and to a point where positive progress can be made.

I am also attaching a copy of a document entitled "Sealaska Heritage Institute Alaska Native Language Programs January 2012." The first sentence of this document states: "Alaska Natives are comprised of seven linguistic groups including the Inupiat, Yup'ik, Aleut, Athabascan, Tlingit, Haida and Tsimshian. Each has or had its own indigenous language." This document describes the efforts of the Alaska Native Community from Barrow to Metlakatla on preserving the indigenous languages that exist in these regions. Their efforts will lead to the preservation of the foundations of the cultures that exist across the State of Alaska.

On behalf of the Alaska Federation of Natives, we urge passage of Senate Bill 130 with additional language adding five language restoration demonstration projects for the Inupiat, Yup'ik, Aleut, Athabascan and Tlingit language groups.

Thank you for your continued preservation of the Alaska Native cultures during your times as a member of the Alaska State Senate.

Thank you for your consideration. If you have questions regarding this letter, please call me at AFN at 907-274-3611.

Sincerely,

Julie E. Kitka

Julie Kitka
President

Attachment: AFN Resolution 12-01, "Support of a State of Alaska Act To Establish The Alaska Native Language Preservation Council And Relating To The Preservation, Restoration and Revitalization of Alaska Native Languages"

The Honorable Bob Herron
The Honorable Neal Foster
The Honorable Sean Parnell

ALASKA FEDERATION OF NATIVES

AFN LEGISLATIVE/LITIGATION COMMITTEE

2012 RESOLUTION

RESOLUTION 12-01

TITLE: SUPPORT OF A STATE OF ALASKA ACT TO ESTABLISH THE ALASKA NATIVE LANGUAGE PRESERVATION AND ADVISORY COUNCIL AND RELATING TO THE PRESERVATION, RESTORATION AND REVITALIZATION OF ALASKA NATIVE LANGUAGES

WHEREAS: Alaska Native Languages have been spoken for thousands of years; and

WHEREAS: Alaska Native Languages represent a significant resource of the State of Alaska and have contributed to its vitality and diversity; and

WHEREAS: Alaska Native Languages are threatened by extinction; and

WHEREAS: the foundation of Alaska Native cultures and ancient traditional knowledge are embedded in Alaska Native languages; and

WHEREAS: knowledge of Alaska Natives languages promotes positive self-identity of Alaska Natives; and

WHEREAS: studies have demonstrated that the academic performance of Alaska Native students improve when Alaska Native students are taught their Native language and culture; and

WHEREAS: Alaska Native corporations, organizations, and tribes and educational entities throughout the State of Alaska are attempting to restore and teach Alaska Native Languages; and

WHEREAS: the Legislature of the State of Alaska is proposing through the proposed Senate Bill 130 to establish an Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration, and revitalization of Alaska Native languages.

NOW THEREFORE BE IT RESOLVED the Alaska Federation of Natives conveys its support of Senate Bill No. 130 and urges the Alaska State Legislature and the Governor of Alaska to enact and sign into law the referenced Act.

1577 C STREET, SUITE 300 • ANCHORAGE, ALASKA 99501 • TEL 907.274.3611 • FAX 907.276.7989 • WWW.NATIVEFEDERATION.ORG

BE IT FURTHER RESOLVED that Alaska Native Federal of Natives further urges the Alaska State Legislature and Governor of Alaska to support the allocation of funds to support Alaska Native Language restoration programs and appropriate funds for five demonstration language restoration projects for the Inupiat, Yup'ik, Aleut, Athasbascan and Tlingit language groups.

PASSED THIS 23RD DAY

OF JANUARY 23, 2012

Julie E. Kitka

Julie E. Kitka
President

23 January 2012

Honorable Donny Olson, Senator
Alaska State Legislature
Alaska State Capitol, Rm. 508
Juneau, Alaska 99801

Dear Senator Olson:

It brings me gratification to see the introduction of Senate Bill 130 - Alaska Native Language & Advisory Council, "An Act establishing the Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration and revitalization of Alaska Native Languages."

I have been working in the field of language preservation and perpetuation for nearly 40 years and have seen first hand the extreme decline of the Iñupiaq language. A handful of our people have devoted their lives to teaching it in the hopes of reversing this loss. Much remains to be done.

I write in support of the bill and urge passage. Having an Advisory Council whose responsibility would be to advocate for Native languages across the state will go a long ways towards creating an atmosphere where we can realize a shift in language priorities in Alaska. It is high time the state recognize the importance of perpetuating the languages of its indigenous peoples.

Quyanaq.

Respectfully yours,

Jana Harcharek, Director
Iñupiaq Education

ALASKA
NATIVE
HERITAGE
CENTER

January 20, 2012

Senate State Affairs Committee
Alaska State Legislature
State Capital
Juneau, Alaska 99801

Honorable Alaska State Legislators:

On behalf of the Alaska Native Heritage Center, and the many cultural and language bearers we serve and represent, I ardently express my support for Senate Bill 130 and House Bill 254 in the second session of the Twenty-Seventh Legislature, both entitled "An Act establishing the Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration, and revitalization of Alaska Native languages."

The Alaska Native Heritage Center (ANHC) is a 501(c) 3, non-profit organization whose mission is to serve as a gathering place for sharing, perpetuating and preserving Alaska's unique indigenous cultures, languages, traditions and values through celebration and education. Our 15-member Board of Directors is currently governed by members of the 13 Alaska Native Claims Settlement Act (ANSCA) Regions including Cook Inlet Region Inc., Chugach Alaska Corporation, Bristol Bay Native Corporation, NANA Regional Corporation, Arctic Slope Regional Corporation, Bering Straits Native Corporation, Koniag, Inc., Sealaska Corporation, and Ahtna, Inc.

As Alaska Native people, our indigenous languages fulfill a vital role in perpetuating cultural traditions and values. It is our sincere belief that it is critical to take proactive measures now to strengthen our languages while language speakers in each of the Alaska Native culture groups still exist, and the interest and aspiration to revitalize our languages for future generations is strong. At our core, we recognize that indigenous language learning promotes increased self-esteem and confidence for Alaska Natives, particularly youth, and a strong cultural identity and knowledge of self translates into a stronger person overall. In a recent early childhood development study (McIvor 2005), University of Victoria, B.C. researchers and speech pathologists working with Canadian First Nations have documented strong linkages between indigenous children who have a strong traditional cultural and linguistic background and academic and overall well-being.

Our vision is to promote intergenerational learning from within the indigenous Alaskan community. ANHC has sought to advocate for active language learning by hosting learning sessions for several Alaska Native languages, including Unangax (Aleut), Sugstun (Alutiiq), Iñupiaq, Tlingit, and Yup'ik, while the most thorough instructional efforts have been for Dena'ina Athabascan. Further efforts are underway as ANHC seeks Administration for Native

8800 HERITAGE CENTER DRIVE ANCHORAGE, ALASKA 99504-6100 • PHONE 907 330-8000 • FAX 907 330-8030

ALASKA
NATIVE
HERITAGE
CENTER

Americans (ANA) grant funds, through the United States Department of Health and Social Services. The project will assess and identify local and statewide resources and partnerships that could be made available to Alaska Natives living in Anchorage, for teaching languages within the Eskimo-Aleut speaking, Athabascan speaking, and Tlingit/Haida/Tsimshian/Eyak speaking nations.

Progressively, ANHC is working to develop programs on site at the Center to provide indigenous language learning opportunities in a full immersion environment. Such opportunities are urgently needed at a time when all 19 indigenous languages still spoken in Alaska are endangered or critically endangered. The passing in 2008 of Chief Marie Smith Jones, the last fluent speaker of Eyak, underscores the vulnerability of Alaska Native languages.

SB 130 / HB 254 will help provide the much-needed political infrastructure, as well as resources both human and financial, to build and follow policies within and outside the state government, to promote sustainable Alaska Native language efforts. Meaningful investment by the State of Alaska in the cultural strengthening of Alaska Native languages will not only contribute to a stronger Alaska Native society, but a stronger Alaska as a whole, and therefore warrants the highest legislative priority.

I am available to discuss this matter, and provide verbal or written testimony to further provide evidence for these facts, in my vehement support for SB 130 / HB 254.

Sincerely,

Annette Evans Smith, President & CEO
Alaska Native Heritage Center

A NATIVE CORPORATION
SEALASKA

January 20, 2012

Senator Donald Olson
State Capitol Building
Room 508
Juneau, AK 99801

RE: Support of SB 130, Alaska Native Language Preservation and Advisory Council

Dear Senator Olson:

In the majestic forests of Southeast Alaska, along the coastlines of *Haa Aani* (Our Land), our people have gathered in the clan houses and told our stories for thousands of years, passing down the wisdom of Elders and the richness of our culture for generations. This oral history stood unbroken for centuries, but now the languages of the Alaska Native people face extinction. It is imperative that these languages be preserved and with them, the foundation of Alaska Native cultures and ancient traditional knowledge.

Sealaska Corporation offers its overwhelming support of SB 130, An Act establishing the Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration, and revitalization of Alaska Native languages. Sealaska urges the Alaska State Legislature and Governor of Alaska to also champion an allocation of funds to programs that restore Alaska Native Languages.

We can all be part of a solution to address the many challenges facing Alaska Natives. Native youth have been shown to improve academic performance when taught in their Native tongue; healthy self-esteem has been linked to a strong sense of identity; and thriving communities are built on the foundation of strong family relationships and lines of communication.

Please share this letter of support to any extent that it might encourage others to vote for the passage of SB 130, and secure funding for programs to restore the words of our ancestors.

Sincerely,

Albert M. Kookesh

Senator Donald C. Olson
Alaska State Capitol Rm 508
Alaska State Legislature
Juneau, AK 99801

The Huna Heritage Foundation wholeheartedly supports Senate Bill 130 which would establish the Alaska Native Language and Advisory Council to assess the State of Alaska Native Languages and re-evaluate the programs within the state and make recommendations to the Governor and Legislature to establish new programs or reorganize the current programs.

SB 130 would help to preserve and maintain Alaska Native Languages which are critical to the preservation and cultural ideas and traditions of all Alaska Natives.

We believe that SB130 would support indigenous languages and help stem the tide of language extinction within the great state of Alaska.

Sincerely,

Marlene Johnson

Re: Support of SB 130, Alaska Native Language Preservation and Advisory Council

Dear Senator Olson:

The Eyak Corporation greatly appreciates your introduction of SB 130 to establish an Alaska Native Language Preservation and Advisory Council. We strongly support the bill and encourage the Alaska State Legislature to adopt it this year.

In January 2008, after the passing of the last fluent speaker in the Eyak language, Chief Marie Smith Jones, the language was thought to be extinct. However, a number of shareholders of The Eyak Corporation, including descendants of Ms. Smith Jones, are of Eyak descent and have begun learning the language of their ancestors. In 2011, immersion clinics were held to teach the Eyak language in Cordova and Anchorage. Those clinics proved, beyond the slightest doubt, that Eyaks are fighting valiantly to keep their language alive.

Please let us know how we can support your efforts in furtherance of SB 130. We look forward to our Eyak shareholders and descendants expressing their appreciation to you, in Eyak.

Sincerely,

The Eyak Corporation

Senator Donald C. Olson
State Capitol, Room 508
Juneau, AK 99801

Dear Senator Olson,

I congratulate you on your continued effort to preserve and restore the many indigenous languages in our great state, and stand behind your push to create the Alaska Native Language and Advisory Council.

As an Iñupiat Eskimo who grew up in Barrow, and later spent time in Noorvik, Unalakleet and Bethel, I've seen first-hand how Alaska Native languages can link a community to its culture and traditions, as well as help to bridge the gap between generations. The passage of Senate Bill 130 would help to ensure that these languages in Alaska would not only thrive, but also serve as a guide for future Alaskans.

I look forward to the passage of this important piece of legislation, and will monitor its progress throughout this legislative session.

Sincerely,
ARCTIC SLOPE REGIONAL CORPORATION

Tara Sweeney

***The mission** of ANEA is to enhance, promote, and advocate for all Alaska Native cultures, values, languages, and traditions in the educational entities throughout Alaska.*

January 25, 2012

Senator Donny Olson
State Capitol Bldg. Rm. 508
Juneau, AK. 99801

Dear Senator Olson,

The Alaska Native Educators Association (ANEA) Board is in favor of the SB 130. The ANEA Board was formed to provide a means to discuss issues facing Alaska Native students and is comprised of lifelong educators, representing most regions in Alaska. At the present time the Aleutian and Southeast region board seats are open and will be filled at our annual conference. Having no funding as an organization, we have had to piggyback with other conferences, specifically the Bilingual Multicultural Education Equity Conference (BMEEC). It is without a doubt that the longest standing issue in Alaska Native education is our Alaska Native languages.

Although the ANEA Board is a volunteer board, we are very active and dedicated to our youth as well as perpetuating our Alaska Native languages. Most of us have dedicated our lives to revitalizing our Alaska Native languages, doing what is needed to uphold our language and culture. As past and present certified teachers, we have taught Alaska Native language and culture, fitting it into mainstream classes within the educational system where ever we could. Some of us have created curricula in each of our perspective regions, which includes the Alaska Native culture and language. In the 1990's some of the ANEA Board members worked with Dr. Ray Barnhardt in developing the Alaska Native Cultural Standards with the Alaska Rural Systemic Initiative (AKRSI) grant, until the grant lapsed. Most currently, we have worked with Phyllis Carlson, Director of Alaska Rural Education, on the development of a rubric, based on the Alaska Native Cultural Standards. The rubric measures how well classroom teachers are integrating the Cultural Standards into their classrooms. In spite of not having her own state budget for her department, Phyllis has managed to obtain funding from SERRC for us to work together several times throughout 2011, starting from December of 2010. The rubric is near completion but we feel we still need to meet face to face once more to finalize it and to work on a survey that will go with it on a statewide basis. We have partnered with the Future Educators of Alaska (FEA) and often hold a workshop in their conferences or they sponsor us in a workshop for the youth section during BMEEC. Another organization we have partnered with is the Alaska Native Teacher Preparation Program (ANTPP), a grant that was obtained by UAF. Lastly but not least, several ANEA Board members have participated in the Quality Teachers meetings headed by DEED.

ANEA firmly believes that it is vital to retain and develop Alaska Native languages. Current research supports the premise that personal persistence and identity which includes Alaska Native language development reduces suicide, as it is a concrete contribution to self-continuity. Studies show that whenever there are students taking Alaska Native language immersion classes, they thrive in all areas of study. We have seen it in our students, some of which are being chosen to participate in the state science fairs or math competitions; taking student leadership roles as high school students; and to becoming leaders in our communities.

ANEA Board supports Senate Bill 130.

Quyanaqpak, quyaana, kunish 'gish, anabase' for taking our written testimony.

23 January 2012

Honorable Donny Olson, Senator
Alaska State Legislature
Alaska State Capitol, Rm. 508
Juneau, Alaska 99801

Dear Senator Olson:

It brings me gratification to see the introduction of Senate Bill 130 - Alaska Native Language & Advisory Council, "An Act establishing the Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration and revitalization of Alaska Native Languages."

I have been working in the field of language preservation and perpetuation for nearly 40 years and have seen first hand the extreme decline of the Iñupiaq language. A handful of our people have devoted their lives to teaching it in the hopes of reversing this loss. Much remains to be done.

I write in support of the bill and urge passage. Having an Advisory Council whose responsibility would be to advocate for Native languages across the state will go a long ways towards creating an atmosphere where we can realize a shift in language priorities in Alaska. It is high time the state recognize the importance of perpetuating the languages of its indigenous peoples.

Quyanaq.

Respectfully yours,

Jana Harcharek, Director
Iñupiaq Education

North Slope Borough

January 25, 2012

Honorable Senator Donald C. Olson
Alaska State Legislature
Alaska State Capitol, Rm. 508
Juneau, AK 99801

Subj: Senate Bill 130 – Alaska Native Language & Advisory Council

Honorable Senator Olson,

It is with pleasure and hope that I write this letter of support for Senate Bill 130 Alaska Native Language & Advisory Council: "*An Act establishing in the Office of the Governor an advisory council for the preservation, restoration, and revitalization of Alaska Native Languages.*"

The issue of preserving, restoring, and revitalizing Alaska Native Languages (ANLs) is of significant importance to my administration and to the people of the North Slope. This was true when the North Slope Borough (NSB) was incorporated in 1972 and has an even greater urgency today since we know far too few of our population is able to speak our language.

Senate Bill 130 seeks to establish a state-level task force within the Office of the Governor to assess our ANLs and to make recommendations to the Governor and Legislature. At the regional level, over 30 years ago, the NSB established through ordinance the Inupiat Heritage, Language and Culture (IHLC) Commission. Within our local government, this group is tasked with duties similar to those of this proposed commission as it relates to our Inupiaq language. Most recently this local commission focused on the issue of language preservation through the active participation in the development, creation, and now distribution of the North Slope Inupiaq version of Rosetta Stone language software. The Rosetta Stone project is an example of just one of many efforts of the NSB and IHLC Commission to preserve, restore and revitalize our Inupiaq language. While we are certain it is an important step in the right direction, we know there is much work ahead in the future for the North Slope and the state.

It is because of this that we give our highest possible recommendation of support of this Bill and urge the State Legislature to do the same. If we expect to succeed in the significant and challenging cause for our Alaska Native languages we must have a strong and unified effort at every level, local to state. Thank you for your consideration of our comments and recommendation of support.

Sincerely,

Charlotte E. Brower
NSB Mayor

CITY OF BARROW

"Farthest North Incorporated City"

RESOLUTION 04 - 2012

A RESOLUTION OF THE BARROW CITY COUNCIL ENCOURAGING THE ALASKA STATE LEGISLATURE TO EXPEDIENTLY PASS SENATE BILL 130 – AN ACT ESTABLISHING AN ALASKA NATIVE LANGUAGE & ADVISORY COUNCIL

WHEREAS, Senator Donald C. Olson has introduced Senate Bill 130 in the State of Alaska Senate, an act establishing the Alaska Native Language Preservation Council and relating to the preservation, restoration and revitalization of all Alaska Native languages; and

WHEREAS, the varied Alaska Native Languages and the rich culture and traditions associated with them established the foundation on which the State of Alaska was built; and

WHEREAS, all Alaska Native Languages are threatened by extinction, including our own Inupiaq language; and

WHEREAS, for the past thirty years, the City of Barrow Mayor, Bob Harcharek, has been actively involved in researching and documenting trends and patterns of migration, the economies, language developments and educational opportunities of the residents of the North Slope Borough; and

WHEREAS, the *North Slope Borough 2011 Economic Profile and Census Report* documents the serious decline in Inupiaq competency among North Slope Borough residents; and

WHEREAS, the City of Barrow is committed to assisting any and all entities whose focus is the preservation and revitalization of the Alaska Native languages and cultures; and

WHEREAS, working and interacting with researchers and colleagues throughout the State, such as UAA Professor Emeritus Carl E. Shepro, the critical status of Alaska's Native languages has become an imperative which needs to be addressed as expediently and comprehensively as possible; and

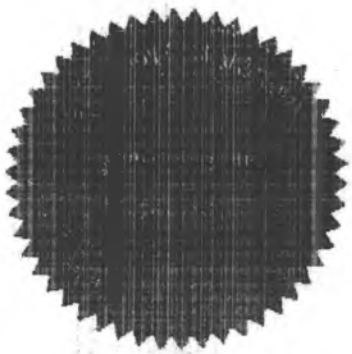
WHEREAS, the indigenous languages of our state are critical and priceless components of the heritage of our State of Alaska, which need to be nurtured to insure their preservation; and

WHEREAS, the intent of Senate Bill 130 is to preserve and maintain our Alaska Native languages which are the most critical components of cultural preservation, continuity and revitalization; and

NOW THEREFORE BE IT RESOLVED, that Barrow City Council formally endorses and encourages the Alaska State Legislature to expediently pass Senate Bill 130 into law.

PASSED AND APPROVED BY THE BARROW CITY COUNCIL ON THIS 26th DAY OF JANUARY 2012 UNANIMOUSLY.

ATTEST:



Bob Harcharek, Mayor

Tracy Benson, City Clerk

Chairman Wielechowski. Honorable Senators Paskvan, Kookesh, Meyer, Giessel. Good morning. I am here today because of the hard work of my students, who collectively represent the rising movement to revitalize Alaska Native languages. They are the reason I continue to feel inspired to work for my people, my ancestors, my neighbors, and my descendants.

We have an epidemic on our hands. I am sure that many a bill that has passed before you has been touted as the most important of all time, so I will not attempt to label this one as such. But I will tell you this, and say it without doubt: as our languages die, our Alaska Native people will continue down a tragic path of cultural annihilation and self-destruction that is a direct result of absolute loss.

Indeed, Alaska Native people have the highest rates of suicide, especially among our youth. Alaska Natives are the most likely among us all to be victims of violent and sexual crimes. We are walking farther and farther into the darkness, and the path laid out before us is one constructed in times of cultural and ethnic genocide.

The policies and philosophies of the United States Federal Government and that of the State and Territory of Alaska sought to kill off Alaska Native languages. We are seeing that success now. But we do not have to accept it.

The actions every one us takes—as citizens of this state and nation—will determine what happens with our languages. Every Alaska Native language is endangered. The largest percentage of its speakers are elderly and Alaska Natives have the lowest life expectancy of any ethnic group in the state. We are living on borrowed time. We cannot afford to waste another moment.

I hope that you support this bill. More so, I hope that your support does not stop there. We need more analysis, but more than that we need our languages to be a proud part of the cultural landscape that is Alaska. We must do away with the savagery that thought it part of some sort of progress to destroy languages and culture. We must move decidedly in the opposite direction of that, knowing full well the social and psychological consequences of our shared history of oppression and loss.

We will look at each other fifty years from now when our languages have defied all odds and predictions and have recovered. Our children need to speak and be heard. They need our ancestors, now more than ever, but cannot talk to them in this foreign language of English. Cannot hear them without the help and decisions of us all.

I have a Bachelor's and Master's Degree in English, and know it well enough to understand the destructive nature of linguistic and cultural genocide. We were taught to hate ourselves, to feel ashamed of ourselves, in the language that replaced our own. It is time to move with great urgency and do all we can to keep these ancient, wonderful, complex, and ingenious languages alive and well.

Gunalchéesh áwé yee tuli.aaní kát. Haa dachx̱ánx̱'i yan yís áwé haa yei jinéiyi. Kux̱dé woogút, haa yoo x̱'atángi. Yak'éi áyá yá k̲usti. Yak'éi áyá yá yaagyee.

Tomorrow morning:
SB 130 is being heard on Tuesday, January 31st in State Affairs at 9am in the Butrovich Room . We anticipate the bill will come up around ***9:45am***. Our office has been allotted ***only 20 minutes*** and **we do have is a complete list of testifiers.** However, we encourage you to attend in person, or call in to listen to show support. Hopefully it will move out to the last committee of referral—Finance. If you have any questions, call me in Senator Donny Olson's Office. If you would like to send a letter of support on the bill, send to Loren_Peterson@legis.state.ak.us .

Sponsor Statement: Senate Bill 130
Alaska Native Language & Advisory Council

"An Act establishing in the Alaska Native Language Preservation and Advisory Council and relating to the preservation, restoration, and revitalization of Alaska Native languages."

Alaska Native Languages (ANL's) are threatened by extinction. The intent of SB 130 is to preserve and maintain ANL's. Indigenous languages are the most critical components in terms of preservation of cultural ideas and traditions and serve as the backbone of all cultural elements.

SB 130 will establish the Alaska Native Language and Advisory Council to assess the state of ANL's and re-evaluate the programs within the state and make recommendation to the Governor and Legislature to establish new programs or re-organize the current programs.

According to the Alaska Native Language Center's *Population and Speaker Statistics* published in 2007, only 22 percent Alaska Natives statewide can speak their native language. More specifically, only 29 percent of the Eskimo Aleut

Whanga Qaakaghlleq, Kingiikaankuk Aghhayankuk panigat, Sivungaghmi, Qiwaaghmi.

My name is Vera K. Metcalf, daughter of Theodore and May Kingeekuk from Savoonga, from the Qiwaaghmii clan. I am the Director of the Eskimo Walrus Commission (EWC) at Kawerak in Nome, an organization of 19 indigenous walrus-hunting communities in Alaska, and a former Commission member on the US Arctic Research Commission (USARC) representing the indigenous residents of the Arctic.

Alaska Native culture is a significant, crucial aspect of what makes Alaska vibrant and unique. It mustn't be taken for granted by us (whether we are a proud Alaska Native or a proud Alaskan, or both) without doing what we can to ensure that the health of what is the core of a culture, its language, is taken care of.

While a USARC Commissioner, we included Indigenous Languages, Cultures, and Identities as a major research recommendation in our 2009-2010 Goals and Objective Report. It explains, "Language helps us define the cultural diversity of our planet and serves as the strongest pillar to our diverse cultural heritage. Language is a fundamental indication of who we are, that is, of our identity. Although critical, language is one of the most vulnerable elements of our cultural being." Consequently, the Commission recommended that federal agencies continue to develop and fund a research plan to help prevent extinction of the diverse languages spoken by Arctic peoples. It specifically cited important entities to be: National Science Foundation, National Endowment for the Humanities (NEH), Smithsonian Institution, BIA, Department of Health and Human Services (HHS), Department of Education (ED), USDA, the **State of Alaska**, and Alaska Native organizations.

During my work as a bilingual teacher aide, my work in repatriation, and now my work in natural, cultural resource management with EWC, I have learned that these three features (language, culture, and identity) of Arctic indigenous life are inseparable: To preserve an indigenous language, its cultural basis must be cherished and maintained, and for a community's cultural life to survive, its spiritual beliefs must reinforce the traditional way of life. It must be valued and used most naturally as the language of weather and environment, traditional and customary hunting practices, food preservation and preparation, clothing, boat building, storytelling, singing/dancing/drumming, or wherever a community's traditional knowledge is valued and shared.

"Community" is where language, culture, and identity are maintained and kept vital. Of course there are multiple layers of community; clan, village, common language, Inuit

Circumpolar Council, marine mammal organizations like AEWC, tribal organizations, Alaska Federation of Natives (AFN), WEIO, wherever indigenous knowledge and values are promoted and passed on to the next generation. Identities are supported through multiple relationships and group associations.

The question we need to continue asking is what are we doing that nurtures the health of a community's language; what policies, regulations, and decisions do we make that allows an Alaska Native language to prosper. The alternative is realizing and discovering what we're doing to undermine its long-term health. This is why we need the Alaska Native Language Preservation and Advisory Council.

Alaska Native Language Revitalization

Prepared for the

Alaska State Legislature

SB 130 Alaska Native Language and Advisory Council

By

Rosita Kaahaní Worl, Ph.D.

Sealaska Heritage Institute

Juneau, Alaska 99801

January 31, 2012

In honor of my ancestors and in respect to this committee, I am privileged to tell you who I am:

Lingít x'eináx Yéideiklats'ok ka Kaahaní ax saayí.

Shangukeidí ka Cháak' naa xat sitee.

Kawdliyaayi Hit áyá xát.

Lukaax.adi yádi áyá xát.

My Tlingit names are Yéideilats'ok and Kaahaní

I am of the Thunderbird Clan and the Eagle Moiety.

I am from the House Lowered from the Sun of Klukwan.

I am a Child of the Sockeye Clan.

My Tlingit names embody my social identity and cultural values. They establish a bond between me and my ancestors, and they create a responsibility to our future generations. My social identity reflects our world view and our relationship to our land and environment.

My English name is Rosita Worl, and I serve as President of the Sealaska Heritage Institute (SHI), whose mission is to perpetuate and enhance the cultures of the Tlingit, Haida, and Tsimshians. SHI has been engaged in language restoration efforts for the last twelve years.

I am here today to testify in support of Senate Bill 130, "An Act establishing the Alaska Native Language Preservation and Advisory Council and relating to the

Preservation, Restoration, and Revitalization of Alaska Native languages." I would also like to commend you in this noble effort to support the rich linguistic and cultural diversity of this State.

I will not dwell on the historical reasons and circumstances as to why Native languages are on the verge of extinction. Rather, I will focus on the positive results that the adoption of this bill and language revitalization can bring to Alaska Natives and to the State of Alaska.

First, it is important to briefly outline the status of Alaska Native languages today. Unless remedial action is initiated, most all of Alaska Native languages will join their already extinct linguistic relative, the Eyak, within a few short decades. According to a UNESCO report on endangered languages, Inupiaq in the North Slope and Kotzebue and the Gwich'in Athabaskan languages are "severely endangered," meaning that the languages are spoken by grandparents and older generations. While the parent generations may understand Inupiaq and Gwich'in Athabaskan, they do not generally speak these languages to children or among themselves. Aleut and the Southeast Alaska Native languages are "critically endangered" meaning that the youngest speakers are grandparents and older, and they speak the language partially and infrequently. Yup'ik, which is the healthiest indigenous language in Alaska, is classified as "vulnerable." This means that most children speak the

language; but it may be restricted to certain domains such as in the home. I note with deep regret that Eyak is extinct.

In the 1990s, Alaska Natives began to advocate in earnest for the revitalization of indigenous languages. Sealaska was successful in advancing an amendment to the Native American Languages Esther Martinez Act of 1992 that provided for language revitalization programs in Alaska based on the status of our language restoration efforts at that time. I am enclosing a report prepared by the Sealaska Heritage Institute that provides an overview of the language programs administered by Alaska Native organizations today. We apologize that it may be an incomplete record, but it should provide for you the range and the limitations of the programs that are operating in the state. To my knowledge, state funding is not available for language restoration programs. The unfortunate reality is that the federal funding level has been woefully inadequate with something like $4 million in competitive grants available annually for all tribes throughout the United States. The gains we made in federal funding through aggressive advocacy on our part have been offset by the shrinking federal appropriations in the last few years, and we are yet struggling to ensure that funding for the Alaska Native Education Equity Act continues. Thus, the state's effort to support the preservation, restoration, and revitalization of Alaska Native languages becomes even more critically imperative.

It is also important to briefly review the work of the Alaska Native Language Center in the event it might be suggested that the Council might duplicate its work. The ANLC was established by state legislation in 1972, and it has focused on the documentation of Alaska Native languages. While the study of Native languages is important, documentation, which has been the primary focus on the ANLC, does not by itself, lead to restoration of a language. Documentation does not include the development of curriculum or the training of teachers to provide instruction on Native languages. Native language curricula and Native language teachers are critical in language revitalization. Rather than documentation, the heart of the Council's work will be to "advise the governor and the legislature on programs, policies, and projects for cost effective preservation, restoration, and revitalization of Alaska Native languages in the state." This work together with the necessary funding can ensure that one of our most significant resources in the state survives.

Native organizations have the capacity to implement language revitalization programs as reflected by the report I am submitting to you. Native Peoples have been staunch advocates of language revitalization efforts, and I would stress that it is essential that Native organizations be eligible recipients of state funds. Michael Krauss, the foremost linguist in the state, recognized the importance of Native American organizations and tribes as applicants for funding in his testimony supporting the Native American Languages Act of

1992. He stated "you cannot from outside inculcate into people the will to revive or maintain their languages" (Hinton 2001).

I would further recommend that the legislature and administration adopt interim measures to immediately support revitalization language projects for the most critically endangered languages. However, I also want to assure you that I am of the firm opinion that the legislation to establish the Alaska Native Language Preservation and Advisory Council must be adopted if we are to ensure the survival of Native languages. The Council must formulate policies that support the revitalization of Native languages and identify barriers that threaten the survival of Native language.

Significantly, one of the most immediate effects of the legislation is that it would serve to reverse the perception that the State of Alaska is adverse to linguistic diversity. It would further send a powerful message that Alaska sees indigenous languages as a part of its heritage to be protected. Unfortunately, the adoption of the English-Only legislation in 1998[1] was interpreted by many, and certainly by the Alaska Native population, as an effort to suppress Native languages. Although this may not have been the intent, I would hope that one

[1] The legislation restricted the state from conducting business in any language other than English with limited exceptions. In 2002, a superior court ruled that the law violates free speech rights, striking the law down. In 2007, the state Supreme Court issued a 4-1 split decision, ruling that the first section of the law (requiring English to be the only language used for government functions) is unconstitutional, and the second part (requiring English for all government documents and records) is constitutional as long as duplicates can be made in other languages.

of the first recommendations that the Council advances is a proposal to the legislature and the governor that Alaska join Hawaii in declaring that the state is officially multi-lingual.

The adoption of this legislation could also send a powerful message that indigenous languages are not evil or inferior to English. Children growing up with the perception that their language and culture are inferior more often develop low self-esteem, and studies have revealed that low self-esteem is a major factor in failure at school.

Conversely, a positive self-identity is a prerequisite to academic achievement. However, the emotional benefit of a positive self-identity must be accompanied by real changes in the classroom that provide for the teaching of Native language and culture. This will require considerable work and funding.

Sealaska Heritage Institute has consistently conducted evaluations of our programs in which Native language and culture are taught in schools. The curricula we have developed and the professional development workshops we have offered to teachers are oriented towards the instruction of Native language and culture. Equally important, our objectives have been to improve the academic status of our students by advancing critical thinking, knowledge and science. Our evaluations reveal that students do better academically when they are taught Native language and culture. We are preparing a longitudinal

study of students who have participated in the demonstration project we initiated in the Juneau schools, and we will be pleased to share the report with the committee when it is complete. We are confident that the study will demonstrate the academic achievement which results from the incorporation of Native language and cultural studies into the classroom. However, we have grave concerns that the school district will not be able to sustain their minimal efforts they have provided in teaching Native languages.

I believe that the legislature understands the social and economic costs to a society and to the state when a significant percent of the population has a poor education. It is my hope that our society will come to accept and understand that the incorporation of Native language and culture into our schools leads to improved academic success that ultimately benefits the individual students as well as our state and society.

Native languages contain intellectual wealth accumulated through thousands upon thousands of years. They have conveyed how Native people see and use the land. The difference in world views among different Alaska Native cultural groups was readily apparent to me when I was conducting field work in the North Slope studying whale hunting. I absolutely could not see the grey patches on the horizon that my companion hunters saw that signified open water. Neither did I know the over eighty terms they had in their language to distinguish the different types of ice (Nelson 1969). Knowledge of ice is critical

to the survival of the hunters who harvest whale, marine mammals and fowl on the sea ice. The 3,300 Tlingit place names that Sealaska Heritage will be publishing in a cultural geographic atlas provide knowledge about our environment and land in Southeast Alaska. Interestingly, these names may also provide information about climate change through thousands of years. Language is a uniquely a human gift central to our experience of being human and Alaska Natives. This knowledge and the differing world views are worthy of protection and transmittal to future generations. Linguistic and cultural diversity is a benefit to society.

Unfortunately Native languages are on the road to extinction unless we initiate immediate efforts to rectify this trend. I urge that the legislature act immediately to adopt SB 130, "An Act establishing the Alaska Native Language Preservation and Advisory Council and relating to the Preservation, Restoration, and Revitalization of Alaska Native languages."

I would like to dedicate my testimony to the late Dr. Bill Demmert of Klawock, who served as a Professor of Education at the University of Alaska Southeast. He was the first and only Native to serve as Commissioner of the State of Alaska Department of Education. He was an educator with national prominence and was instrumental in the passage of the Indian Education Act. He was also a staunch advocate of Native language restoration and studied how Native language contributes to academic success. We were fortunate to

have him serve on the Board of Trustees of the Sealaska Heritage Institute. I would also like to respectfully recommend that the state legislature consider incorporating his name into the title of SB 130 "The Bill Demmert Act establishing the Alaska Native Language Preservation and Advisory Council." It would be a tribute to all who have worked tireless to revitalize Alaska Native languages.

Gunulchéesh

Alaska Native Language Programs

January 2012

Alaska Natives are comprised of seven linguistic groups including the Inupiat, Yup'ik, Aleut, Athabascan, Tlingit, Haida and Tsimshian. Each has or had its own indigenous language. But today, no group is producing new speakers with Native as their first language. Many have language revitalization efforts in which students learn many nouns, some verbs, some greetings and introductions. None are producing fluent or even proficient speakers. Most programs are for beginners and a few are for intermediate learners. Very few programs are for advanced learners. Many communities have singing and dancing groups where individuals learn songs in their Native language and may or may not know the meaning of the words they are singing. At this time, many young Native individuals have expressed great interest in learning their language. Native language acquisition formerly occurred in the homes. Because of many factors, parents today do not know their Native language and are unable to teach the language to their children. The challenge of teaching Native languages has largely been left to schools and community organizations. This paper provides a brief summary of programs offered around the state. Not all regions responded to the request from Sealaska Heritage Institute (SHI) for information about their language programs. We received responses from seven regions. The Arctic Slope and Aleutian Pribiloff provided SHI the most detailed information. Other language revitalization programs may exist in Alaska of which we are not aware.

From Barrow to Metlakatla, community organizations and school districts are offering language programs. In the Arctic Slope, the schools teach the four dialects of Iñupiaq throughout the 12 schools in the district. The Iñupiaq Education program has created VIVA (Visual Iñupiaq Vocabulary Acquisition) online language units. Each unit contains its own assessment and scoring—students' keep track of their own progress. Once a unit is completed, the students practice their verbal pronunciation with a fluent speaker—the district employs fourteen fluent Iñupiaq speakers. This program is noteworthy for several reasons: sequential units based on the Greymorning method, scoring contained within each unit; emphasis on hearing the language tied with images rather than words and pronunciation work with fluent speakers. Classes are held 3-5 times per week in the elementary school and are available as electives

in the middle and high schools. Production of the VIVA units requires a full-time curriculum developer. The units are recorded in four Iñupiaq dialects. The North Slope Borough School District (NSBSD) is also working with cultural units and developing a math program based on the traditional Iñupiaq number system.

Nome is adapting its language program based on the NSBSD materials. They are receiving training from the curriculum developer on how to create their own programs using 'flash'. This region has a web-based vocabulary development game. They are recording fluent speakers of the different Iñupiaq dialects. Their record demonstrates the benefits of sharing resources, materials and staff knowledge to maximize the language revitalization efforts in our state.

In the northwest Arctic, 14% of residents are fluent in Iñupiaq. Of these speakers, 92% are over the age of 65.[2] Despite the disheartening statistics, communities are taking action to ensure the language survives. NANA Regional Corporation entered into a unique partnership with Rosetta Stone to produce an interactive computer learning program as part of the Rosetta Stone Endangered Language Program. Software for the two predominant dialects in the region was made available to the head of household for each family of shareholders and is available for sale. An additional effort to perpetuate the language in the region is the immersion school in Kotzebue, Nikaitchuat Ilisagviat. For 13 years, approximately 20 students age 3 through first grade have been learning all subjects solely in Iñupiatun. The Nikaitchuat staff hope to someday offer more grades at the school. The University of Alaska Fairbanks Chukchi Campus based in Kotzebue, offers an Iñupiaq A.A.S. degree and certificate program. Classes are available online so students in the villages are able to participate. Finally, the Aqqaluk Trust is a non-profit organization with the mission: "Empowering the Iñupiat people through language, culture and education." The Aqqaluk Trust coordinates the regional Iñupiaq Language Commission and conducts Camp Sivunniigvik each summer, at which children from across the region spend one week sessions on the banks of the Kobuk River enveloped in Iñupiaq traditions, values and the Iñupiaq language.

Bethel has operated an immersion school for more than 17 years. They have produced many materials including Big Books in their Yup'ik language.

Other regions are also making use of technology. The Kodiak area has produced an online audio dictionary and electronic Aluutiq flashcards. They

---

[2] Survey of Residents of the Northwest Arctic Borough conducted by the Aqqaluk Trust and the Native Village of Kotzebue in 2005.

also have a Stories and Lost Words project and are in a consortium with Port Lions and the Aluuttiq Museum. Today there are only 45 fluent speakers of the Alutiiq language, the traditional language of the Native people of the Kodiak Archipelago, only 11 of which can speak the Northern Dialect, the traditional language of the *Ag'uanermiut* (people of Afognak). All the speakers are Elders. Alutiiq, like so many Alaska Native languages, struggles for survival. Afognak Native Corporation has funded a language program operated by the Native Village ofAfognak and Native Village of Port Lions to create innovative language learning tools. See Alutiiq Language Website: http://www.ktuu.com/features/assignmentak/learning-alutiiqonline-20120112,0,5807593.story and Alutiiq iPhone Application: http://www.ktuu.com/videobeta/80965544-341f-44e4-8e14-5210bac33c9b/News/Afognak-Alutiiq-Connect-iPhone-app-intro. Through the joint efforts of the Alaska Native Corporations and Tribes in the Kodiak Archipelago and the Alutiiq Museum, language restoration efforts are underway.

The Chugach Region has produced many posters, videos and books. They also teach Aluutiq at Spirit Camp each summer.

The Aleutian Pribilof Islands region is the only one of the seven regions who reported that Native language still spoken in the home although we suspect this is also the case in Yup'ik villages. The village of Atka reports that Unangam Tunuu (Aleut) is still spoken in one-fourth of the homes. They report that there are 124 fluent speakers still living representing 3.5% of the enrolled tribal members. Two of the 12 schools in the region offer language and culture classes in the curriculum. Ten schools offer limited exposure to language and culture. In Atka, where ¼ of the homes still speak Unangam Tunuu (Aleut), a fluent speaker teaches language classes one hour/day. In St. Paul, a certified teacher is also a fluent Unangam Tunuu speaker. She teaches one language class, five days per week. There is an active singing and drumming group. Youth and elders collaborate to write lyrics for new songs. At community gatherings elders speak Unangam Tunuu. Three culture camps are held during the summer months. The region is seeking $1,000,000 to create a Rosetta Stone product for Unangam Tunuu. The corporation board of directors has committed themselves to one hour of language lessons during each of the three annual meetings.

Southeast Alaska has many and varied programs. Throughout the region, "language learners," who are teachers and who are yet learning their Native

language, teach with few exceptions all language classes in some cases in collaboration with fluent speakers. Yakutat has federal funding to write children's stories in Tlingit and develop learning materials for the stories. Local students and artists illustrate the stories. The core language staff work with fluent speakers on a weekly basis. Classes are taught outside the school system. Klukwan classes are taught in the school while in Haines, language classes are taught in the local museum. In Juneau, the Goldbelt Heritage Foundation is developing curriculum and working with teachers and fluent speakers to develop lessons using the Tlingit Verb Index. The region-wide entity, Sealaska Heritage Institute, produces curriculum and provides teacher training on a region-wide basis. SHI is concentrating on the Developmental Language Process (DLP) and has produced curriculum materials for academic content areas (math, science, social studies and literature), as well as Tlingit, Haida, and Tsimshian DLP units. SHI has also published Tlingit, Haida and Tsimshian dictionaries and has highly popular interactive language programs on its website. SHI sponsors summer basketball camps in which Native language instruction is integrated into basketball training. Both Goldbelt Heritage and SHI sponsor summer camps for youth. The camps feature language classes but are not conducted in the language. Other communities in Southeast have Tlingit language classes in the schools (Hoonah, Sitka and Kake). Wrangell and Ketchikan have programs after school.

In addition to offering classes, Ketchikan Indian Community has devoted time and grant money to improve advanced learner skills. One Haida, Tsimshian and Tlingit advanced learner is teamed with fluent speakers. They spend a significant amount of their week with the fluent speakers. The goal is to increase the learners' skills to proficiency. This is the only program in the state with that stated goal although others may be doing the same work.

University of Alaska Southeast has offered Tlingit classes at beginners and intermediate levels, as well as studies of oral literature and narratives. UAS also offers mentor-apprentice classes. The University of Alaska Anchorage and Fairbanks also offer Native language classes.

In summary, a significant effort is being expended in the state to revitalize Native languages. The programs focus on using technology to teach vocabulary. Most regions are recording fluent speakers. Some regions are sharing resources and adapting materials for their own dialects. None of the regions reported stability in their Native language. Fluent speakers are passing on with no new speakers replacing them. Hundreds of learners of all ages are

learning nouns, verbs, greetings and introductions. Few progress to proficiency.

The major expressed needs are:

- Programs to support teacher language learners to work with fluent speakers to increase their own language proficiency. Mentor apprentice programs appear to be very effective.
- Programs to recruit more language learners into the teaching of the language.
- Stable funding for these programs so that teacher/learners know they can count on their program continuing.
- Curriculum development at all levels and ongoing, teacher training workshops.

SB-131: Iran Divestment

Fact Sheet

- Iran has been listed as a "State Sponsor of Terrorism" by the U.S. State Department since 1984 and is currently under international sanctions for the regime's continued human rights abuses, sponsorship of terrorism, and pursuit of nuclear weapons. Iran has been linked with "directly supporting" Iraqi insurgents that have actively gone after U.S. soldiers and according to a recent IAEA report, the Iranian regime is carrying out activities, "relevant to the development of a nuclear explosion device."

- SB 131 would direct the Commissioner of Revenue to compile or acquire a list of companies that have invested an aggregate of $20 million or more in Iran's oil and gas development. Companies on that scrutinized list would be subject to divestment if the company cannot cure or explain the investments within 90 days. After that period, the State's fund managers would be required to liquidate the assets they hold for those companies within another 90 days.

- This legislation would be repealed if Iran is no longer considered a "State Sponsor of Terrorism," or if the United States determines that Iranian divestment policies interfere with our foreign policy.

- According to Legislative Research, no companies that currently do business on the North Slope would likely be subject to divestment. The same report identifies $79 million, or a tenth of one percent, of state funds may be subject to divestment.

- This bill would keep Alaska's investments from supporting our nation's enemies.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 131

Analysis

This bill would require that APFC divest any securities of publicly traded companies that are held in actively managed separate (non-commingled) funds. This bill would also require that APFC send letters to managers of actively traded commingled funds requesting that they consider divesting the listed securities. Based on consultations with external managers and other public funds, APFC has projected the transactional costs stated above for the divestment process. This estimate does not include any projected investment losses that may occur from selling the more illiquid stocks.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB131
2012 LEGISLATIVE SESSION

Analysis

The costs to implement this bill are indeterminate.

This bill requires the fiduciaries of the state's retirement systems, the Supplemental Annuity Plan and the deferred compensation plan to divest certain investments in publicly traded companies that conduct business operations or have direct investments in business operations in Iran. While Treasury believes that active and passive separate account managers will not charge additionally for divestment, Treasury will incur some costs in developing a list of companies that conduct or have direct investments in business operations in Iran. Other costs to be considered would include development of letters to fund managers of commingled investments, the opportunity cost of staff time to implement new policies and processes to implement this bill. The effect this bill will have on investment performance is unknown.

Lines of Questioning for the Permanent Fund

- First, can you explain the process that the Permanent Fund went through to give us both a zero and a $200,000 fiscal note?
    - So the $200,000 price tag came from fund managers. How many fund managers came back saying there would be a cost?
    - So only one fund manager came back with a cost. So you are saying that one fund manager would charge $200,000 to sell stocks in a handful of companies?
    - And how many other fund managers came back and said that there would be no additional cost?
    - Why is it that this particular fund manager would charge so much more than every other fund manager?
    - And why does this particular fund manager not fall under the exemptions on page 2, lines 5 through 11?

- The Governor made a surprise announcement this week that he is asking the Permanent Fund Corporation to divest their holdings from companies that do business in Iran. What is the Permanent Fund Corporation going to do in response to this letter?
    - Does the Permanent Fund Corporation have the legal authority to divest from Iran at the Governor's request?
    - Where would the Permanent Fund Corporation get the money to divest if they chose to honor the Governor's request?
    - If so, could a sitting Governor unilaterally decide to reverse this policy in the future?
- The new fiscal note seems a little high. I would like to note for the record that you and the Permanent Fund Corporation have been very responsive and helpful to me and my staff this past week. In fact, my staff has obtained the contract the Permanent Fund Corporation has with this specific fund manager. You have cautioned that some

of the information should remain confidential, so let me know if my questions cross a line.

- Are you allowed to name the fund manager that says it would cost them $200,000 to sell a handful of stocks?
- Did they give this quote for all of their funds and indexes, or just one?
- Is the $200,000 the cost it would be for them to divest from the $1 billion fund only, not the other two holdings that are excluded from this legislation?
- And what exactly does it mean for that $1 billion fund to be an "International Large-Cap Core Equity Investment?"
- Are there other fund managers that the Permanent Fund could go to that would be able to invest in a similar market?
- How much is the Permanent Fund Corporation paying this company annually for this quasi-passive

management? (it should be around $1.375 million annually)

- So you are saying that they would get a huge increase in their annual management fees for selling a handful of stocks? Going from under $350,000 in a quarter to $550,000 seems outrageous.
- Would there be any additional cost to leave this fund manager for another? Would we have to pay them more for terminating the agreement?
- Is there a section in the contract that allows for the Permanent Fund and the manager to come to an agreement as to how much should be charged in the agreement in the event unforeseen circumstances arise?
- Wouldn't the Permanent Fund have a good negotiating position, having a number of other fund manager options, to negotiate this cost down?

Governor Sean Parnell
STATE OF ALASKA

January 31, 2012

Mr. Michael Burns
Executive Director
Permanent Fund Corporation
801 West Tenth Street, Suite 302
Juneau, AK 99801

Dear Mr. Burns,

This will follow up on our meeting of November 21, 2011, regarding the divestiture of Permanent Fund investments from Iran. The International Atomic Energy Agency (IAEA) recently placed Iran under heavy scrutiny for "serious concerns regarding possible military dimensions to Iran's nuclear program." And, the IAEA believes Iran has "carried out activities relevant to the development of a nuclear explosive device." Additionally, Iran's ruling government has made it clear that it does not believe that citizens of Israel should be allowed to live or peaceably pursue their own interests.

I understand some believe free markets, rather than government policy, should drive our investment choices, but this very real threat requires action. No free market exists when one nation builds a nuclear arsenal while it continually and steadfastly advocates for the eradication of another entire nation, with our own not so far behind.

In my view, our State's policy should now be to divest ourselves of investments with companies doing business in Iran. This sanction comes as a last resort – an option our State has historically refused when presented. However, the time to stand on the principles of life and liberty is at hand, and we must step up along with our country and other states. For these reasons, I am asking that to the extent permitted by law, you pursue a policy of divestiture of State resources from companies that do business in Iran or with the current ruling government of Iran.

Sincerely,

Sean Parnell
Governor

MEMORANDUM January 26, 2012

SUBJECT: Sectional summary of SB 131 (Work Order No. 27-LS0785\M)

TO: Senator Bill Wielechowski
Attn: Samuel Gottstein

FROM: Dan Wayne
Legislative Counsel

You have requested a sectional summary of SB 131, a bill relating to divestment in certain companies doing business with Iran. Please note that a sectional summary of a bill is not an authoritative interpretation of a bill. The bill itself is the best statement of its contents.

Section 1 of the bill enacts a new section, AS 37.10.072. It states that the commissioner of revenue or a fiduciary of a fund listed in AS 37 may not invest in and shall cause the fund to divest in publicly traded securities of a company that the commissioner places on a list of scrutinized companies that conduct or have direct investments in business operations in Iran and must divest, if needed, within 90 days after the company is placed on the list. The commissioner is required to make reasonable efforts to investigate all publicly traded companies to determine whether the company is a scrutinized company that should be placed on the list. The commissioner must make certain reports based on the investigations into companies that may or may not be on the list.

Section 2 of the bill requires the Alaska Retirement Management Board to comply with the provisions of AS 37.10.072.

Section 3 of the bill requires the board of trustees of the Alaska Permanent Fund Corporation to comply with the provisions of AS 37.10.072.

Section 4 of the bill provides that the statutes enacted in the bill are repealed the day after Iran is removed from the United States Department of State's list of countries that have been determined to repeatedly provide for acts of international terrorism or, the United States Congress or the President of the United States, through legislation or executive order, declares that the Iran divestment authorized in the Act interferes with the conduct of United States foreign policy.

Section 5 of the bill requires the commissioner of revenue to diligently work on compiling the list of scrutinized countries within 90 days after the effective date of the Act.

Section 6 of the bill directs the Department of Law to submit written notice to the Attorney General of the United States describing this Act no more than 30 days after the effective date of the Act.

Section 7 of the bill provides for an immediate effective date.

Memorandum

TO: Senator Bill Wielechowski
FROM: Susan Haymes, Legislative Analyst
DATE: October 24, 2011
RE: Iran Divestment and State of Alaska Investments
LRS Report 12.070

You asked about economic sanctions against the government of Iran by means of the divestment of public assets in certain companies. Specifically, you asked about the potential effects of a "targeted divestment" law on the State of Alaska with respect to the Alaska Permanent Fund and other Alaska state funds.

Economic sanctions have been a major feature of U.S. Iran policy since the U.S. Embassy hostage crisis in 1979. In 1995, President Clinton issued executive orders prohibiting U.S. companies from investing in Iranian oil and gas and from trading with Iran. Also in 1995, Congress passed the Iran Sanctions Act (ISA), which required the U.S. government to impose sanctions on foreign firms investing more than $20 million a year in Iran's energy sector.[1] On July 1, 2010, President Obama signed the Comprehensive Iran Sanctions, Accountability and Divestment Act (CISADA, P.L. 111-95), which significantly expanded the authority of the ISA by imposing sanctions on sales to Iran of gasoline and related equipment and services. Among other things, the CISADA also authorizes state and local governments to divest shares of companies that are involved in trade with Iran that could be subject to sanctions under CISADA.[2]

Divestment of Alaska State Funds

In April 2011 (27th Legislature), Alaska lawmakers introduced SB 131, which would require the state to divest ownership in any publicly traded securities from scrutinized companies that conduct or have direct investments in business operations in Iran.[3] Under the proposed legislation, the commissioner of the Department of Revenue shall compile a list of scrutinized companies. The commissioner is required to provide written notice and an opportunity to comment in writing before the company is identified as a scrutinized company. The divestment process described in SB 131 is similar to the process used in other states that have passed legislation or are considering legislation requiring divestment from Iran.

In assembling a list of scrutinized companies, we note that many states appear to be sharing information concerning companies with business activities in Iran. Some states, such as California and Florida, use research performed by Institutional Shareholder Services/RiskMetrics Group and others to evaluate companies with possible links to Iran. Nevertheless, lists may vary somewhat.[4] For purposes of this report we use a list of 36 scrutinized companies compiled by Institutional Shareholder Services/RiskMetrics Group for the Minnesota legislature in January 2011.

[1] Originally called the Iran and Libya Sanctions Act (P.L. 104-172), Libya was removed from the law in 2004. Congress enacted sanctions in an effort to deny Iran the resources to further its nuclear program and its support of terrorist organizations such as Hizbollah, Hamas, and Palestine Islamic Jihad.

[2] Kenneth Katzman, "Iran Sanctions," Congressional Research Service, February 3, 2011.

[3] Under the legislation, business operations mean power production activities, mineral extraction activities, oil or gas-related activities, or the production of military equipment. Representatives Carl Gatto and Bob Lynn introduced a companion bill in the House, HB 2.

[4] We note that each state is required to review and update the list of scrutinized companies on a regular basis. The Florida State Board of Examination maintains a list of scrutinized companies as well as companies that are under continued examination and may be added later. RiskMetrics Group provides risk management and financial services.

The state of Alaska maintains invested assets totaling about $78 billion.[5] Of these investments, nearly $79 million–or about 0.1 percent– would be subject to divestment under SB 131 as proposed. We calculate that as of September 30, 2011, almost $71 million in Permanent Fund investments would require divestment and almost $8 million in other state assets would be targeted for divestment.

The following table shows the list of companies and the market value of the investments held by the Alaska Permanent Fund and other state funds that would be subject to divestment.

Permanent Fund and Other State Stock Holdings Potentially Subject to Iranian Divestment

Permanent Fund		
Company	**Market Value**	**Country**
Air Liquide L'	$8,312,454	France
China Petroleum and Chemical	$21,441,552	China
CNOOC Ltd	$1,890,363	China/Hong Kong
Daelim Industrial Company	$90,106	South Korea
Gazprom OAO	$8,674,991	Russia
GS Engineering and Construction	$116,464	South Korea
KunLun Energy Company Limited	$198,460	Hong Kong
MISC Berhard	$115,469	Malaysia
Oil and Natural Gas Corporation	$241,590	India
OMG AG	$3,771,598	Austria
PetroChina Company	$1,512,966	China
Petrofac Limited	$1,656,908	United Kingdom
Petronas Dagangan Bhd	$149,977	Malaysia
Petronas Gas Berhad	$325,262	Malaysia
PTT Exploration and Production	$344,206	Thailand
Sasol Limited	$11,935,379	South Africa
SGS SA	$2,098,084	Switzerland
Technip SA	$8,004,444	France
Total for Permanent Fund	$70,880,273	
Other State Funds Managed by the Division of Treasury		
Air Liquide L'	$2,916,692	France
Costain Group	$2,050	United Kingdom
Gazprom OAO	$4,543,890	Russia
OMV AG	$155,137	Austria
SGS SA	$289,862	Switzerland
Total for Other State Funds	$7,907,631	
GRAND TOTAL	$78,787,904	

Notes: The market value of the Permanent Fund holdings is the value as of September 30, 2011.
Sources: Permanent Fund holdings and market value can be accessed at *http://www.apfc.org/home/Media/investments/09302011WebHoldings.pdf*. Pam Leary, state comptroller, Department of Revenue, provided the information on other state holdings. Ms. Leary can be reached at 907.465.3751.

[5] As of September 30, 2011, the state's investments included $21.3 billion under the fiduciary responsibility of the Commissioner of Revenue, $18.4 billion under the fiduciary responsibility of the Alaska Retirement Management Board, and $38.2 billion in the Alaska Permanent Fund, *http://www.revenue.state.ak.us/treasury/*.

The Alaska Permanent Fund and the Alaska Retirement Management Board have in the past expressed reservations about the wisdom of divestment, citing increased administrative costs and possible declines in fund performance.[6] While, given the nature of the global investment marketplace, it is unlikely that the divestment of Alaska public funds from targeted companies would have a direct, negative impact on those companies, proponents of divestment point to the recent decisions by a number of major multinational companies to withdraw from Iran. For example, Royal Dutch Shell, France's Total SA, Italy's Eni Spa, Norway's Statoil ASA, all have agreed to end investments in Iran. At least 22 states and the District of Columbia have likewise enacted laws or adopted policies to divest public funds from companies active in Iran. We note that under the proposed legislation, the Act would be repealed when the U.S Department of State removes Iran from its list of terrorist countries, or the United States Congress or the President determines that Iran divestment interferes with the conduct of U.S. foreign policy.

We hope this is helpful. If you have questions or need additional information, please let us know.

The Risk Management Attributes and Broader Policy Implications of SB 131, entitled "Divest Investments in Iran"

Written Testimony before the Senate State Affairs Committee
of the Alaska State Legislature

Andrew K. Davenport
January 31, 2012

Mr. Chairman and Members of the Committee, thank you for the privilege of submitting this written testimony for consideration by the State Affairs Committee, as it, in turn, considers SB 131, a bill that calls on the Alaska Permanent Fund to divest of certain companies with ties to Iran. My familiarity with this issue area is extensive. I co-founded Conflict Securities Advisory Group (CSAG) and served as Vice President of that firm from 2001 to 2009. CSAG was the first independent research provider to identify and profile all corporate involvement in Iran – as well as other security-sensitive countries – to meet the risk management and compliance needs of the investment community, including for divestment purposes. I presently serve as Chief Operating Officer of RWR Advisory Group, a Washington, DC-based advisory firm that specializes, among other areas, in the risk to share value and corporate reputation related to corporate activity in these same countries. In addition to presiding over the research involved in profiling this activity, I have advised multinational corporations, institutional investors, asset managers and government agencies worldwide on the management of this risk category more broadly. Based on this background, I am pleased to offer my perspective on the merits of SB 131.

It is my view that the measures mandated for the Alaska Permanent Fund by SB 131 encourage a minimum level of prudent risk management with respect to those companies that continue to conduct business in Iran's energy sector that is in technical violation of U.S. sanctions law during a period when the temperature of Tehran's nuclear stand-off with the international community is at a historic peak. It is well known today that corporate activity in Iran, including activity that is legal under the jurisdictions that many foreign companies operate under, carries significant reputational and economic/financial risk. There are numerous examples of corporate ties to Iran harming a company's brand through negative press and shareholder and non-governmental organization (NGO) activism as well as encountering other downside risks, such as class-action lawsuits, the unexpected diversion of equipment and technology to internal security applications, rapidly expanding sanctions policies and unwitting partnerships with increasingly prevalent military front companies.(e.g., those linked to the Islamic Revolutionary Guard Corps). Moreover, these risks are asymmetric in the impact they can have on corporations, meaning that business activity involving financial sums that are typically insignificant relative to a company's overall bottom line or global revenues are material to the average investor on account of the disproportionate impact such business can have on share value and corporate reputation.

The Securities and Exchange Commission (SEC) has supported this view since May 2001, when the materiality of corporate activity in U.S.-sanctioned states was first publicly asserted in a letter to Congress from then-Chairman Laura Unger. Subsequently, in 2004, the SEC opened an Office of Global Security Risk that is charged with enforcing strengthened disclosure requirements on this topic by U.S.-listed companies – primarily foreign companies – that have business ties to Iran, but are not sufficiently describing the nature of that business to investors or are omitting the information entirely. For the same reason that some companies exiting Iran today reference shareholder concerns as a factor in their decision-making, institutional investors that have divested these companies in the past have often done so to protect the value of their investments. I have participated in the "back testing" of investment portfolios that have removed certain companies with ties to Iran and, although every investment situation is different, I have witnessed results that show a "de minimis" impact on returns with lower volatility. The "investor protection" basis for action has also made this a bipartisan issue with past vocal leaders on this topic ranging from former Missouri Treasurer Sarah Steelman (R) to former New York City Comptroller Bill Thompson (D). Both Sen. McCain and then-candidate Obama touted the divestment of Iran-linked companies from their personal portfolios in the 2008 presidential race.

Despite the potential materiality of a wide range of corporate activity in Iran, SB 131 focuses only on those companies with ties to Iran that violate the central provision of the Congressional "Iran Sanctions Act of 1996," as amended by subsequent legislation. This bill set a threshold of activity in Iran of $20 million or more in the development of the country's petroleum resources (the industry through which Iran raises the majority of its foreign currency and total government revenues). Any foreign company that violates this threshold is subject to special sanctions, enforceable at the discretion of the President. Accordingly, SB 131 draws what we consider to be a highly conservative line in the sand targeting a tier of corporate activity in Iran that has been internationally understood for many years to be the most risky.

Indeed, especially with today's backdrop on Iran, technical violations of this provision are so risky that few publicly-traded companies have the appetite to carry out such activity and those that do are often less sensitive to reputational risk and less protective of their share value. Many are partially or majority state-owned enterprises. In fact, the reality that the list of such companies is relatively small and the threshold for inclusion on the "scrutinized company" list is so high is a major factor in many public pension systems across the country dropping their opposition to the bill and, in some cases, agreeing to implement this targeted divestment model even in the absence of binding legislation. The proliferation of this model even led to the inclusion of language in the "Comprehensive Iran Sanctions, Accountability and Divestment Act" (CISADA) – enacted by the Congress in July 2010 – that gives Congressional endorsement of the divestment model embodied in SB 131 and seeks to shield those involved from certain legal liabilities that have been referenced by the investment community.

Over the years – and increasingly of late – the targeted divestment model has even been questioned on the basis that its "target" was, and remains, too narrow, too cautious and too conservative. The decision to peg this model to provisions in the "Iran Sanctions Act" as it stood some 6 to 7 years ago, when the targeted divestment initiative first emerged, has not been

revisited during the intervening period. The monetary level at which energy sector business with Iran can be called significant, however, has clearly diminished. Moreover, the objectives of the Congress differ from those of shareholders. The U.S. government is seeking to identify projects that have national security significance and shareholders (i.e., in this case, the beneficiaries of the Alaska Permanent Fund) are seeking to mitigate downward pressures on their investments. As demonstrated on numerous occasions, companies can experience negative press, controversy and even sanctions-related difficulties over transactions valued at far less than $20 million. Per the SEC conclusions referenced above, it would be defensible for the Alaska State Legislature to seek divestment from the Permanent Fund with regard to companies with ties to Iran that are significant, but below the very conservative threshold for risk management set forth in SB 131.

Indeed, even if there is a prerequisite for divestment that it address only companies that are targets of federal sanctions policy, as is the case with the current targeted model, advocates might focus on the fact that the past two years have seen a significant increase in the breadth of business activity in Iran that violates sanctions over and above the legacy provisions of the "Iran Sanctions Act." For example, an Executive Order issued by President Obama on November 21, 2011 lowered the threshold at which investments in Iran's petroleum resource industry is subject to sanctions from $20 million in a year to $5 million. It also targeted companies supporting Iran's petrochemical industry. CISADA expanded sanctions to include suppliers of refined petroleum product as well as support for Iran's efforts to produce such product domestically. Financial institutions are also more vulnerable to U.S. penalties stemming, in part, from Iran's new, official designation as a "primary money laundering concern" and new requirements issued by the Treasury Department that all banks meet their obligations to investigate and mitigate the risks associated with having correspondent banking accounts with banks that, in turn, have correspondent banking accounts with Iran (to minimize the chance of Iran seeking to access the U.S. financial system through a "bank shot," so to speak).

Since the targeted divestment model first started gaining traction in various states, these federal sanctions enhancements have become official policy and law, altering the landscape for risk management and potentially offering more, updated guidance to the investment community with regard to what type of business activity is viewed today as "beyond the pale" from a U.S. security perspective. Indeed, just as foreign companies modified their behavior in response to the "Iran Sanctions Act" (despite the scarcity of any actual enforcement of this law by multiple presidents), they have likewise been withdrawing from their refined petroleum partnerships, smaller-scale oil and gas projects and financial arrangements in response to new U.S. policies. Divestment efforts, however, have not kept pace. This reality reinforces our conclusion that companies in violation of the $20 million petroleum resource threshold laid out in SB 131 can, even more so today than several years ago, be viewed as comprising an especially elite category of worst offenders whose Iran-related activities make them suitable for divestment on risk management grounds.

Senate unanimously approves tough sanctions on Iran Central Bank

By Associated Press, Published: December 1

WASHINGTON — The Senate unanimously approved tough new sanctions on Iran's Central Bank amid fears of Tehran developing a nuclear weapon.

The 100-0 vote Thursday was for an amendment to the defense bill. Lawmakers had argued that concerns about a nuclear-armed Iran outweighed reservations about driving up oil prices and hurting Americans at the gas pump.

Sens. Bob Menendez of New Jersey and Mark Kirk of Illinois offered the amendment that would target foreign financial institutions that do business with the Central Bank of Iran, barring them from opening or maintaining correspondent operations in the United States. It would apply to foreign central banks only for transactions that involve the sale or purchase of petroleum or petroleum products.

Administration officials cautioned that driving up oil prices could mean more money for Iran.

EU Iran Oil Embargo Sanctions 'Unprecedented'

DON MELVIN 01/23/12 02:40 PM ET Associated Press

BRUSSELS — The European Union and Iran raised the stakes Monday in their test of wills over the Islamic republic's nuclear program, with the bloc banning the purchase of Iranian oil and Iran threatening to retaliate by closing the Strait of Hormuz, through which a fifth of the world's crude is transported.

The escalating confrontation is fraught with risks – of rising energy prices, global financial instability, and potential military activity to keep the strait open.

The EU's 27 foreign ministers, meeting Monday in Brussels, imposed an oil embargo against Iran and froze the assets of its central bank, ramping up sanctions designed to pressure Iranian officials into resuming talks on the country's nuclear program.

EU officials say the tighter sanctions are part of a carrot-and-stick approach, an effort to increase pressure while at the same time emphasizing their willingness to talk.

In Washington, Department of State Secretary Hillary Rodham Clinton and Department of the Treasury Secretary Timothy Geithner welcomed the EU decision, calling it "another strong step in the international effort to dramatically increase the pressure on Iran." In their joint statement, they said the EU sanctions, combined with earlier ones imposed by the U.S. and the international community, `will sharpen the choice for Iran's leaders and increase their cost of defiance of basic international obligations."

But the initial response out of Tehran, the Iranian capital, was harsh.

Ramin Mehmanparast, a spokesman for Iran's Foreign Ministry, called the economic sanctions "illogical and unfair" saying: "It is only understandable in the framework of propaganda and psychological war."

Mehmanparast was quoted by website of state broadcasting company as saying, "Pressure and sanctions against a nation that has a strong logic and reason for its policy is a failed method."

He said due to the world's long-term need for energy, "It is not possible to impose sanctions on Iran," which has huge resources of oil and gas.

And two Iranian lawmakers threatened that their country would close the strait in retaliation for the EU embargo.

Lawmaker Mohammad Ismail Kowsari, deputy head of Iran's influential committee on national security, said Monday the strait "would definitely be closed if the sale of Iranian oil is violated in any way."

The strait – just 34 miles (54 kilometers) wide at its narrowest point – runs alongside Iran and is the only way to get from the Persian Gulf to the open sea. Tensions over the potential impact its closure would have on global oil supplies and the price of crude have weighed heavily on consumers and traders. The U.S. and Britain both have warned Iran not to disrupt the world's oil supply.

After news of the EU move, benchmark crude for March delivery rose 90 cents on the day to $99.23 a barrel in early morning European time in electronic trading on the New York Mercantile Exchange. Brent crude was down 35 cents at $109.51 a barrel on the ICE futures exchange in London.

Many analysts doubt that Iran would maintain a blockade for long, but any supply shortages would cause world oil supplies to tighten temporarily. But Kowsari said that, in case of the strait's closure, the U.S. and its allies would not be able to reopen the route, and warned America not to attempt any "military adventurism."

An American aircraft carrier, the USS Abraham Lincoln entered the Gulf on Sunday without incident to conduct scheduled maritime security operations, and U.S. warships frequently operate in the Gulf. But when the carrier USS John Stennis departed the Gulf in late December, Iranian officials warned the U.S. not to return. The British Ministry of Defense said British and French warships joined the U.S. carrier group transiting through the Strait of Hormuz "to underline the unwavering international commitment to maintaining rights of passage under international law."

Russia's Foreign Ministry said the sanctions are a severe mistake likely to worsen tensions. "It's apparent that in this case there is open pressure and diktat, aimed at 'punishing' Iran for uncooperative behavior. This is a deeply mistaken policy, as we have told our European partners more than once," the ministry said in a statement. "Under pressure of this sort, Iran will not make any concessions or any corrections to its policies," it said.

The EU sanctions include an include an immediate embargo on new contracts for crude oil and petroleum products. Existing contracts with Iran will be allowed to run until July.

Last month, the U.S. enacted new sanctions targeting Iran's central bank and its ability to sell petroleum abroad, but it has delayed implementing the sanctions for at least six months, worried about sending the price of oil higher at a time when the global economy is struggling.

Other countries are steering clear of such measures altogether. China also does not support an embargo, and Japan's finance minister, Jun Azumi, has expressed concern about the effectiveness of U.S. sanctions on Iran – not to mention their potential impact on Japanese banks.

Some 80 percent of Iran's foreign revenue comes from oil exports and any sanctions that affect its ability to export oil would hit its economy hard. With about 4 million barrels per day, Iran is the second largest producer in OPEC.

"It means that we will paralyze, bit by bit, Iran's economic activity and keep the country from using a major part of its resources," said French Foreign Minister Alain Juppe. "You can be skeptical, but it is better than making war."

At the heart of the dispute is international unease about Iran's nuclear program. Iran says its nuclear program is peaceful, but the United States and other nations suspect it is trying to build nuclear weapons. Iran is now under several rounds of U.N. sanctions for not being more forthcoming about its nuclear program.

Late Monday, British Prime Minister David Cameron, German Chancellor Angela Merkel and French President Nicolas Sarkozy issued a joint statement urging Iran to suspend its sensitive nuclear activities.

"Our message is clear," the statement said. "We have no quarrel with the Iranian people. But the Iranian leadership has failed to restore international confidence in the exclusively peaceful nature of its nuclear program. We will not accept Iran acquiring a nuclear weapon."

Iran's denials of military intent have utterly failed to convince EU officials.

"The recent start of operations of enrichment of uranium to a level of up to 20 percent in the deeply buried underground facility in Fordo near Qom further aggravates concerns about the possible military dimensions to Iran's nuclear program," the foreign ministers said in a statement Monday.

That accelerated enrichment is in violation of six U.N. Security Council resolutions and 11 resolutions by the board of the International Atomic Energy Agency, "and contributes to rising tensions in the region," the statement said.

British Foreign Secretary William Hague called the embargo part of "an unprecedented set of sanctions."

"I think this shows the resolve of the European Union on this issue," Hague said.

The EU also decided to freeze the assets of the Iranian central bank. Together, the two measures are intended not only to pressure Iran to agree to talks but also to choke off funding for its nuclear activities.

Before Monday's decision, negotiators worked hard to try to ensure that the embargo would punish only Iran – and not EU member Greece, which is in dire financial trouble and relies heavily on low-priced Iranian oil.

The foreign ministers agreed to a review of the effects of the sanctions, to be completed by May 1. And they agreed in principle to make up the costs Greece incurs as a result of the embargo.

Raf Casert in Brussels, Nasser Karimi in Tehran, Matthew Pennington in Washington, and Gregory Katz in London contributed to this report.

DEPARTMENT OF THE TREASURY
WASHINGTON, D.C.

SECRETARY OF THE TREASURY

December 1, 2011

The Honorable Carl Levin
Chairman
Committee on Armed Services
Unites States Senate
Washington, D.C. 20510

Dear Chairman Levin:

I am writing to address amendment 1414 to S. 1867, the National Defense Authorization Act for Fiscal Year 2012, regarding the imposition of sanctions on foreign financial institutions that conduct business with the Central Bank of Iran (CBI).

The Obama Administration's determination to prevent Iran from acquiring nuclear weapons is unwavering. We are resolved to build and sustain as much pressure as necessary to bring Iran to meet its international obligations and address the international community's grave concerns with its nuclear program. I know that you and your colleagues in the Senate share this commitment.

We understand that this amendment was offered in this spirit. However, I am writing to express the Administration's strong opposition to this amendment because, in its current form, it threatens to undermine the effective, carefully phased, and sustainable approach we have undertaken to build strong international pressure against Iran. In addition, the amendment would potentially yield a net economic benefit to the Iranian regime.

We have steadily increased the pressure on Iran by tightening sanctions, closing loopholes, and encouraging other countries to do the same. Congress has been absolutely critical in providing some of the tools that we have used to accomplish that goal, and we are seeing genuine results. The collaborative approach the U.S. has taken with our international partners has led many to impose sanctions on Iran that were not even contemplated three years ago, including on Iran's energy sector.

Iran's greatest economic resource is its oil exports. Sales of crude oil line the regime's pockets, sustain its human rights abuses, and feed its nuclear ambitions like no other sector of the Iranian economy. We are committed to doing as much as possible to reduce Iran's oil revenue while concurrently working to stabilize global oil markets. Today, the United States does not permit the import of Iranian crude. Other countries have already begun to reduce their consumption of Iranian crude and the Administration is working hard to discourage anyone from taking advantage of the responsible policies of these countries. Our closest allies are seriously considering curtailing their own crude purchases altogether in the near future and we are doing everything possible to encourage them to make the right decision.

However, as currently conceived, this amendment threatens severe sanctions against any commercial bank or central bank if they engage in certain transactions with the CBI. This could negatively affect many of our closest allies and largest trading partners. Rather than motivating these countries to join us in increasing pressure on Iran, they are more likely to resent our actions and resist following our lead – a consequence that would serve the Iranians more than it harms them. Further, there is a substantial likelihood that this amendment, particularly if passed into law at this time and in its current form, could have the opposite effect from what is intended and increase the Iranian regime's revenue, literally fueling their suspect nuclear ambitions. The Administration is prepared at your convenience to share the details of our analysis on this point, in a classified briefing.

The Obama Administration strongly supports increasing the pressure on Iran significantly, including through properly designed and well-targeted sanctions against the CBI. The Administration has several legislative proposals to both enhance and expand the Comprehensive Iran Sanctions, Accountability, and Divestment Act (CISADA) and to strike at the CBI that we would like to discuss with you and your colleagues. We intend to work with our partners to achieve the objectives of this amendment, but in a fashion that we believe will have a greater and more sustainable impact on Iran. We ask that you continue to work with us on ways to improve this amendment and to consider other, more immediate and more effective steps that we can take to accomplish our shared goals while we work with our partners to bring about the effects this amendment is intended to achieve.

Sincerely,

Timothy F. Geithner

Wall Street Journal-

Missouri Treasurer's Demand: 'Terror-Free' Pension Funds

BY CRAIG KARMIN
June 14, 2007; Page C1

Sarah Steelman, the Missouri state treasurer, is emerging as a thorn in the side of a set of powerful global investors.

As pension funds face pressure from politicians to divest themselves from Iran and other countries deemed terrorism sponsors, she has staked out a zero-tolerance approach to investments like these. That's given the 49-year-old Republican a prominent voice in the wave of new legislation -- from Ohio to California -- targeting the $1 trillion pension fund industry.

Ms. Steelman's own state legislature has declined to go along with her campaign. But a dozen other states -- including Florida, California and Texas -- have passed laws that could compel pension funds to divest themselves of holdings in companies that do business in countries like these. While U.S. companies are banned from doing business in those countries, many foreign companies are active there.

Sarah Steelman, Missouri treasurer, contacted all 49 other state treasurers about terror free divestment laws.

The list of companies potentially affected is extensive. Ms. Steelman says that nearly 500 big foreign companies and multinationals do at least some business in what the U.S. government considers terror-sponsoring nations.

Proposals in other states are considerably less far-reaching than what Ms. Steelman would like to see. For instance, some states focus on prohibiting investments in just a couple dozen companies in Iran's energy sector.

Last summer, Ms. Steelman unveiled what she calls a "terror free" fund -- a small fund, intended as a model, designed to avoid investments in nations considered terror sponsors. In its first eight months of existence, her fund has returned 27%, she says. "People said fund performance was going to suffer. We've shown that's just not true."

Many pension funds dismiss those returns, pointing out that the period is too short to be meaningful.

The dispute raises questions about what role taxpayer supported pension funds should play in world affairs. Funds argue that while legislative efforts like these may be well-meaning, they conflict with a fund's fiduciary duty to get the best returns for beneficiaries. Complying with the anti-terror push, they say, could crimp returns.

Some fund managers also argue that the approach is misguided: Funds would have more influence over the offending companies by bringing pressure on them as shareholders.

"When you divest, you lose your place at the table," says Clark McKinley, spokesman for the California Public Employees' Retirement System. The $244 billion pension fund opposes pending legislation that could require Calpers to sell billions of dollars of investments in companies with Iran links.

The Center for Security Policy, a conservative Washington, D.C., think tank, says that it has identified 100 public pension funds in the U.S. that have about $188 billion invested in companies doing business in nations branded terror sponsors by the U.S. government.

"There is not a public pension fund out there that is not seriously looking at this issue," says Mark Tulay, a director at Institutional Shareholder Services, a consulting firm.

Ms. Steelman and other divestment proponents often cite the situation in South Africa two decades ago, when government sanctions and pension fund divestment were widely credited with helping end the apartheid regime.

Ms. Steelman embraced the antiterrorism issue early on in her term, which began in January 2005. She started by examining the backgrounds of the broker-dealers employed by the Missouri state treasury. She says she fired two European banks after learning of their business ties to Iran. She hired a money manager to screen for links to Iran and other blacklisted states for her new terror-free fund. That small $7 million fund invests Missouri money set aside for cultural activities. Ms. Steelman spent much of 2006 reaching out to state lawmakers and contacting all 49 of the other state treasurers about passing terror-free divestment laws. She has also offered guidance to officials in other states on how to respond to pension-fund objections.

"As soon as we introduced the legislation, we scrambled to find experts on the topic," says Joel Anderson, the California assemblyman who sponsored his state's bill calling for divestment from companies doing business in Iran. Ms. Steelman has "been very helpful with the hurdles we had to overcome." The bill passed unopposed in the Assembly earlier this month and now heads to the California Senate.

Ms. Steelman has had less luck winning over the pension funds — in her state or elsewhere. The antiterrorism bills vary from state to state: Some call for rapid divestment in more than 100 companies, while others are limited to about 20 and call for sales only after the funds talk to the companies.

Missouri's biggest public pension fund says it is waiting for clarification from Washington. "I'm looking for the federal government to give guidance on which companies to divest from, not the opinion of third-party organizations," says Steve Yoakum, executive director for the $32 billion Public School Retirement System of Missouri.

In general, pension-fund managers say complying with the new laws will cost money and hurt returns. Calpers, for instance, estimates that if the current bill becomes law, the fund would have to sell about $2 billion in investments at a cost of as much as $25 million. Calpers estimates that had a version of the California bill been in place in the past five years, it would have reduced the value of the fund's holdings by $725 million.

California State Teachers' System, a $171 billion pension fund, hasn't estimated the cost of compliance with the bill. But Calstrs Chief Executive Officer Jack Ehnes says he think a more effective strategy would be to make the case to these companies as major shareholders. "The first step is active engagement with the companies," he says.

Sanctions against Iran may destabilize, topple regime by 'ratcheting up hassle factor': expert

Peter Goodspeed Jan 28, 2012 – 5:29 PM ET

AFP/Getty Images

A handout picture obtained from the Iranian president's office shows Iranian President Mahmoud Ahmadinejad delivering a speech during a visit to the city of Kerman, 1,000km southeast of Tehran, on January 26, 2012.

The 9/11 terrorist attacks drove Mark Dubowitz, a young business whiz who worked as a Bay Street lawyer and high-tech venture capitalist in Toronto, to change careers.

He moved to Washington and became executive director of the Foundation for the Defense of Democracies (FDD), an aggressive new neo-conservative think-tank that helps shape U.S. thinking on war, terrorism and the Middle East.

Now, he is a recognized international expert on developing sanctions that might cripple Iran's oil industry.

Yuri Gripas

Mark Dubowitz is at his office in Washington on januray 26, 2012.

Many of the ideas generated over the past five years by the FDD and Mr. Dubowitz have made their way into the international sanctions package now being applied to Iran — restrictions on gasoline sales, curbed investments in natural gas development, embargoed oil exports, targeted sanctions aimed at its Revolutionary Guards Corps and bans on business dealings with its Central Bank.

"Oil is the lifeblood of the regime," Mr. Dubowitz said. "Iran is essentially a one-crop country: They sell oil. It also has the second-largest natural gas resources in the world, but it can't get it out of the ground because of investment restrictions. It can't distribute it. It is actually a net importer of gas. At the end of the day, the Iranians sell oil."

That's the main source of Iran's strength and its Achilles' heel.

"I think that it is probably very unlikely that economic pressure is going to change [Iran's Supreme Leader Ali] Khamenei's commitment to building a [nuclear] bomb," Mr. Dubowitz said.

"Men who talk about crushing the 'enemies of God' won't give up their enriched uranium because transaction costs have increased. The acquisition of the bomb is now probably inseparable from the ruling elite's religious identity."

But sanctions that cripple Iran's oil industry and rapidly deprive its government of crucial revenue could destabilize the country to a point where the regime might be in danger of falling.

"Designing sanctions to make Khamenei relent is a delusion," Mr. Dubowitz wrote recently. "Sanctions that could contribute to popular unrest and political tumult are not. The Great Arab Revolt and its forerunner, the Iranian summer of 2009, were propelled by profound frustration as well as indignation at tyranny. A democratic revolution might be reborn."

In the past five years, sanctions are estimated to have cost the government in Tehran dearly. It has lost more than US$60-billion in energy investment and US$14-billion in oil sales; gasoline exports to Iran have been cut by 90%, while an estimated US$4.4-trillion of Iranian natural gas has been prevented from reaching markets.

More recent sanctions imposed by Washington on companies doing business with Iran's Central Bank have made it enormously complicated for Iran to receive payment for its oil, particularly from China, India and South Korea.

But Mr. Dubowitz is still looking for ways to increase the pressure.

"My whole theory is that the goal of sanctions is not to impose a complete embargo on Iranian oil or to cut Iran off completely from international global markets, but to significantly ratchet up the hassle factor in doing business with Iran and to persuade 'white-hatted companies' from doing business with Iran, leaving the 'black-hatted companies' who would never comply with sanctions to negotiate significant concessions from the Iranians in the form of discounts on the price of oil or premiums on the supply of gasoline," he said.

"That's what the Chinese are doing now. They have literally and figuratively got the Iranians over a barrel so they are driving for discounts and better prices for oil. On the other side of it, the Chinese are selling the Iranians gasoline and charging them 25% to 30% premiums."

Similarly, there are banks around the world that are willing to do business with Iranian banks controlled by the Revolutionary Guard Corps and the Central Bank of Iran, but they are being forced to pay significantly for the increased risks.

"The ultimate goal is to see sanctions that aren't airtight, because they can never be airtight, but to see sanctions designed in a way that significantly drains the Iranian treasury of its hard earnings," he said.

"Sanctions should never be thought of as a 'silver bullet.' But they can be thought of as 'silver shrapnel' — part of a comprehensive strategy. I think they can significantly wound the regime."

Mr. Dubowitz, who was born in South Africa and raised in Toronto, studied at the University of Western Ontario and McGill University, before taking a law degree and a master's of business administration at the University of Toronto. After he moved to Washington, he picked up a master's in international public policy from John Hopkins University's School of Advanced International Studies.

He spent eight years working as a lawyer and venture capitalist in Toronto, focusing on fundraising for early-stage technology companies. He was also director of international business development for Doubleclick, a global Internet advertising company that was ultimately purchased by Google, and director of corporate development and manager of European and Asian operations for FloNetwork, an email messaging marketing company later bought by Doubleclick.

In his work at the FDD, Mr. Dubowitz said he found "the intersection of foreign policy, law and business."

"I had experience in all three," he said. "I wasn't some PhD who spoke Farsi and understood the inner workings of the theocratic regime. I wasn't an award-winning economist or an international trade lawyer. I didn't have particular depth in any one issue or area, but I had a pretty good experience in all three and an ability to integrate them."

Using that experience, he has produced eight reports that provide research and analysis in support of strong, broad-based energy sanctions on Iran.

Six of those reports are documents that have been shared only with the Obama administration and selected congressional offices.

"There are a lot of people who deserve credit for what has already happened," Mr. Dubowitz said.

"There are members of Congress and their particular, hard-working staff and people within the administration and internationally. It's one of those rare issues where there is broad and deep bipartisan support, which is rare in Washington, and there is a really impressive international coalition."

But time may be running out for sanctions to work and convince Iran to abandon its quest for nuclear weapons.

"I think sanctions have to impose severe economic pressure on this regime over the next 12 months or even sooner. If we are in June or July this year and these oil market sanctions, for whatever reason, are not leading to a significant drop in Iranian oil revenues, then we are in a situation where the range of peaceful alternatives is almost exhausted."

STATE OF NEW YORK

8668--A

2011-2012 Regular Sessions

IN ASSEMBLY

October 27, 2011

Introduced by M. of A. SILVER, FARRELL, CANESTRARI, LAVINE, WEINSTEIN, ENGLEBRIGHT, GLICK, MORELLE, P. RIVERA, CAHILL -- Multi-Sponsored by -- M. of A. ABINANTI, BENEDETTO, BRAUNSTEIN, BRINDISI, COLTON, COOK, CRESPO, CYMBROWITZ, DINOWITZ, ESPINAL, GABRYSZAK, GOLDFEDER, GOTTFRIED, HOOPER, JACOBS, JAFFEE, LANCMAN, LATIMER, LIFTON, LINARES, LUPARDO, MAGEE, MAISEL, MARKEY, McENENY, NOLAN, ORTIZ, PAULIN, PEOPLES-STOKES, REILLY, ROBERTS, RYAN, SCARBOROUGH, SCHIMEL, SIMANOWITZ, SIMOTAS, SPANO, SWEENEY, THIELE, TITONE, WEISENBERG, ZEBROWSKI -- read once and referred to the Committee on Governmental Operations -- committee discharged, bill amended, ordered reprinted as amended and recommitted to said committee

AN ACT to amend the state finance law and the general municipal law, in relation to enacting the Iran divestment act of 2012

THE PEOPLE OF THE STATE OF NEW YORK, REPRESENTED IN SENATE AND ASSEMBLY, DO ENACT AS FOLLOWS:

Section 1. This act shall be known and may be cited as the "Iran Divestment Act of 2012".

S 2. The legislature hereby finds and declares all of the following:

(a) Congress and the President have determined that the illicit nuclear activities of the Government of Iran, combined with its development of unconventional weapons and ballistic missiles, and its support of international terrorism, represent a serious threat to the security of the United States, Israel, and other United States allies in Europe, the Middle East, and around the world.

(b) The International Atomic Energy Agency has repeatedly called attention to Iran's unlawful nuclear activities, and, as a result, the United Nations Security Council has adopted a range of sanctions designed to encourage the government of Iran to cease those activities and comply with its obligations under the Treaty on the Non-Proliferation of Nuclear Weapons (commonly known as the "Nuclear Non-Proliferation Treaty").

EXPLANATION--Matter in ITALICS (underscored) is new; matter in brackets [ ] is old law to be omitted.

LBD13338-12-1

(c) On July 1, 2010, President Barack Obama signed into law H.R. 2194, the "Comprehensive Iran Sanctions, Accountability, and Divestment Act of 2010" (Public Law 111-195), which expressly authorizes states and local governments to prevent investment in, including prohibiting entry into or renewing contracts with, companies operating in Iran's energy sector with investments that have the result of directly or indirectly supporting the efforts of the government of Iran to achieve nuclear weapons capability.

(d) The serious and urgent nature of the threat from Iran demands that states, local governments, and private institutions work together with the federal government and American allies to do everything possible diplomatically, politically, and economically to prevent Iran from

acquiring a nuclear weapons capability.

(e) Respect for human rights in Iran has steadily deteriorated as demonstrated by transparently fraudulent elections and the brutal repression and murder, arbitrary arrests, and show trials of peaceful dissidents.

(f) The concerns of the state of New York regarding Iran are strictly the result of the actions of the government of Iran and should not be construed as enmity towards the Iranian people.

(g) In order to effectively address the need for the governments of this state to respond to the policies of Iran in a uniform fashion, prohibiting contracts with persons engaged in investment activities in the energy sector of Iran must be accomplished on a statewide basis.

(h) It is the intent of the legislature to fully implement the authority granted under Section 202 of the Comprehensive Iran Sanctions, Accountability, and Divestment Act of 2010 (Public Law 111-195).

S 3. The state finance law is amended by adding a new section 165-a to read as follows:

S 165-A. IRAN DIVESTMENT. 1. AS USED IN THIS SECTION, THE FOLLOWING DEFINITIONS SHALL APPLY:

(A) "ENERGY SECTOR" OF IRAN MEANS ACTIVITIES TO DEVELOP PETROLEUM OR NATURAL GAS RESOURCES OR NUCLEAR POWER IN IRAN.

(B) "FINANCIAL INSTITUTION" MEANS THE TERM AS USED IN SECTION 14 OF THE IRAN SANCTIONS ACT OF 1996 (PUBLIC LAW 104-172; 50 U.S.C. 1701 NOTE).

(C) "INVESTMENT" MEANS A COMMITMENT OR CONTRIBUTION OF FUNDS OR PROPERTY, A LOAN OR OTHER EXTENSION OF CREDIT; AND THE ENTRY INTO OR RENEWAL OF A CONTRACT FOR GOODS OR SERVICES.

(D) "IRAN" INCLUDES THE GOVERNMENT OF IRAN AND ANY AGENCY OR INSTRUMENTALITY OF IRAN.

(E) "PERSON" MEANS ANY OF THE FOLLOWING:

(1) A NATURAL PERSON, CORPORATION, COMPANY, LIMITED LIABILITY COMPANY, BUSINESS ASSOCIATION, PARTNERSHIP, SOCIETY, TRUST, OR ANY OTHER NONGOVERNMENTAL ENTITY, ORGANIZATION, OR GROUP.

(2) ANY GOVERNMENTAL ENTITY OR INSTRUMENTALITY OF A GOVERNMENT, INCLUDING A MULTILATERAL DEVELOPMENT INSTITUTION, AS DEFINED IN SECTION 1701(C)(3) OF THE INTERNATIONAL FINANCIAL INSTITUTIONS ACT (22 U.S.C. 262R(C)(3)).

(3) ANY SUCCESSOR, SUBUNIT, PARENT ENTITY, OR SUBSIDIARY OF, OR ANY ENTITY UNDER COMMON OWNERSHIP OR CONTROL WITH, ANY ENTITY DESCRIBED IN SUBPARAGRAPH ONE OR TWO OF THIS PARAGRAPH.

2. FOR PURPOSES OF THIS SECTION, A PERSON ENGAGES IN INVESTMENT ACTIVITIES IN IRAN IF:

(A) THE PERSON PROVIDES GOODS OR SERVICES OF TWENTY MILLION DOLLARS OR MORE IN THE ENERGY SECTOR OF IRAN, INCLUDING A PERSON THAT PROVIDES OIL

OR LIQUEFIED NATURAL GAS TANKERS, OR PRODUCTS USED TO CONSTRUCT OR MAINTAIN PIPELINES USED TO TRANSPORT OIL OR LIQUEFIED NATURAL GAS, FOR THE ENERGY SECTOR OF IRAN; OR

(B) THE PERSON IS A FINANCIAL INSTITUTION THAT EXTENDS TWENTY MILLION DOLLARS OR MORE IN CREDIT TO ANOTHER PERSON, FOR FORTY-FIVE DAYS OR MORE, IF THAT PERSON WILL USE THE CREDIT TO PROVIDE GOODS OR SERVICES IN THE ENERGY SECTOR IN IRAN AND IS IDENTIFIED ON A LIST CREATED PURSUANT TO PARAGRAPH (B) OF SUBDIVISION THREE OF THIS SECTION AS A PERSON ENGAGING IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED IN PARAGRAPH (A) OF THIS SUBDIVISION.

3. (A) A PERSON THAT IS IDENTIFIED ON A LIST CREATED PURSUANT TO PARAGRAPH (B) OF THIS SUBDIVISION AS A PERSON ENGAGING IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED IN SUBDIVISION TWO OF THIS SECTION, SHALL NOT BE DEEMED A RESPONSIVE BIDDER OR OFFERER PURSUANT TO SECTION ONE HUNDRED SIXTY-THREE OF THIS ARTICLE.

(B) (1) NOT LATER THAN ONE HUNDRED TWENTY DAYS AFTER THE EFFECTIVE DATE OF THIS SECTION, THE COMMISSIONER SHALL DEVELOP OR CONTRACT TO DEVELOP, USING CREDIBLE INFORMATION AVAILABLE TO THE PUBLIC, A LIST OF PERSONS IT DETERMINES ENGAGE IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED IN SUBDIVISION TWO OF THIS SECTION. IF THE COMMISSIONER HAS

CONTRACTED TO DEVELOP THE LIST, THE LIST SHALL BE FINALLY DEVELOPED NOT LATER THAN ONE HUNDRED TWENTY DAYS AFTER THIS SECTION SHALL TAKE EFFECT. SUCH LIST, WHEN COMPLETED, SHALL BE POSTED ON THE WEBSITE OF THE OFFICE OF GENERAL SERVICES.

(2) THE COMMISSIONER SHALL UPDATE THE LIST EVERY ONE HUNDRED EIGHTY DAYS.

(3) BEFORE FINALIZING AN INITIAL LIST PURSUANT TO SUBPARAGRAPH ONE OF THIS PARAGRAPH OR AN UPDATED LIST PURSUANT TO SUBPARAGRAPH TWO OF THIS PARAGRAPH, THE COMMISSIONER SHALL DO ALL OF THE FOLLOWING BEFORE A PERSON IS INCLUDED ON THE LIST:

(A) PROVIDE NINETY DAYS' WRITTEN NOTICE OF THE COMMISSIONER'S INTENT TO INCLUDE THE PERSON ON THE LIST. THE NOTICE SHALL INFORM THE PERSON THAT INCLUSION ON THE LIST WOULD MAKE THE PERSON A NON-RESPONSIVE BIDDER OR OFFERER. THE NOTICE SHALL SPECIFY THAT THE PERSON, IF IT CEASES ITS ENGAGEMENT IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED IN SUBDIVISION TWO OF THIS SECTION, MAY BE REMOVED FROM THE LIST.

(B) THE COMMISSIONER SHALL PROVIDE A PERSON WITH AN OPPORTUNITY TO COMMENT IN WRITING THAT IT IS NOT ENGAGED IN INVESTMENT ACTIVITIES IN IRAN. IF THE PERSON DEMONSTRATES TO THE COMMISSIONER THAT THE PERSON IS NOT ENGAGED IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED IN SUBDIVISION TWO OF THIS SECTION, THE PERSON SHALL NOT BE INCLUDED ON THE LIST.

(4) THE COMMISSIONER SHALL MAKE EVERY EFFORT TO AVOID ERRONEOUSLY INCLUDING A PERSON ON THE LIST.

(5) A PERSON THAT HAS A CONTRACT WITH THE NEW YORK STATE COMMON RETIREMENT FUND, THE NEW YORK STATE AND LOCAL EMPLOYEES' RETIREMENT SYSTEM, THE NEW YORK STATE AND LOCAL POLICE AND FIRE RETIREMENT SYSTEM, OR THE NEW YORK STATE TEACHERS' RETIREMENT SYSTEM, SHALL NOT BE DEEMED A PERSON THAT ENGAGES IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED IN SUBDIVISION TWO OF THIS SECTION ON THE BASIS OF THOSE CONTRACTS OR INVESTMENTS WITH SUCH RETIREMENT SYSTEMS, PROVIDED HOWEVER, THAT NOTHING IN THIS SUBPARAGRAPH SHALL PREVENT THE NEW YORK STATE COMMON RETIREMENT FUND, THE NEW YORK STATE AND LOCAL EMPLOYEES' RETIREMENT SYSTEM, NEW YORK STATE AND LOCAL POLICE AND FIRE RETIREMENT SYSTEM OR THE NEW YORK STATE TEACHERS' RETIREMENT SYSTEM FROM PURSUING A POLICY OF DIVESTMENT IN THE IRANIAN ECONOMY.

(C) NOTWITHSTANDING PARAGRAPH (A) OF THIS SUBDIVISION, A STATE AGENCY MAY PERMIT A PERSON ENGAGED IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED BY SUBDIVISION TWO OF THIS SECTION TO BE DEEMED A RESPONSIVE BIDDER OR OFFERER, ON A CASE-BY-CASE BASIS WITH A STATE AGENCY IF:

(1) THE INVESTMENT ACTIVITIES IN IRAN WERE MADE BEFORE THE EFFECTIVE DATE OF THIS SECTION, THE INVESTMENT ACTIVITIES IN IRAN HAVE NOT BEEN EXPANDED OR RENEWED AFTER THE EFFECTIVE DATE OF THIS SECTION, AND THE PERSON HAS ADOPTED, PUBLICIZED, AND IS IMPLEMENTING A FORMAL PLAN TO CEASE THE INVESTMENT ACTIVITIES IN IRAN AND TO REFRAIN FROM ENGAGING IN ANY NEW INVESTMENTS IN IRAN; OR

(2) THE STATE AGENCY MAKES A DETERMINATION THAT THE COMMODITIES OR SERVICES ARE NECESSARY FOR THE STATE AGENCY TO PERFORM ITS FUNCTIONS AND THAT, ABSENT SUCH AN EXEMPTION, THE STATE AGENCY WOULD BE UNABLE TO OBTAIN THE COMMODITIES OR SERVICES FOR WHICH THE CONTRACT IS OFFERED. SUCH DETERMINATION SHALL BE ENTERED INTO THE PROCUREMENT RECORD.

4. (A) A STATE AGENCY SHALL REQUIRE A PERSON THAT SUBMITS A BID OR OFFER IN RESPONSE TO A NOTICE OF PROCUREMENT, OR THAT PROPOSES TO RENEW AN EXISTING PROCUREMENT CONTRACT WITH A STATE AGENCY OR PROPOSES TO ASSUME THE RESPONSIBILITY OF A CONTRACTOR PURSUANT TO A PROCUREMENT CONTRACT WITH A STATE AGENCY OR OTHERWISE PROPOSES TO ENTER INTO A CONTRACT WITH A STATE AGENCY WITH RESPECT TO A CONTRACT FOR COMMODITIES, SERVICES, CONSTRUCTION, OR CONTRACTS ENTERED PURSUANT TO SECTIONS SIX AND SEVEN OF THE NEW YORK STATE PRINTING AND PUBLIC DOCUMENTS LAW, SECTION EIGHT OF THE PUBLIC BUILDINGS LAW, OR SECTION THIRTY-EIGHT OF THE HIGHWAY LAW, TO CERTIFY, AT THE TIME THE BID IS SUBMITTED OR THE CONTRACT IS RENEWED OR ASSIGNED, THAT THE PERSON OR THE ASSIGNEE IS NOT IDENTIFIED ON A LIST CREATED PURSUANT TO PARAGRAPH (B) OF SUBDIVISION THREE OF THIS SECTION. A STATE AGENCY SHALL INCLUDE CERTIFICATION INFORMATION IN THE PROCUREMENT RECORD.

(B) A PERSON THAT SUBMITS A BID OR OFFER IN RESPONSE TO A NOTICE OF PROCUREMENT OR THAT PROPOSES TO RENEW AN EXISTING PROCUREMENT CONTRACT WITH A STATE AGENCY OR PROPOSES TO ASSUME THE RESPONSIBILITY OF A CONTRACTOR PURSUANT TO A PROCUREMENT CONTRACT WITH A STATE AGENCY, OR OTHERWISE PROPOSES TO ENTER INTO A CONTRACT WITH A STATE AGENCY WITH RESPECT TO A CONTRACT FOR COMMODITIES, SERVICES, CONSTRUCTION, OR CONTRACTS ENTERED PURSUANT TO SECTIONS SIX AND SEVEN OF THE NEW YORK STATE PRINTING AND PUBLIC DOCUMENTS LAW, SECTION EIGHT OF THE PUBLIC BUILDINGS LAW, OR SECTION THIRTY-EIGHT OF THE HIGHWAY LAW SHALL NOT UTILIZE, ON THE CONTRACT WITH THE STATE AGENCY, ANY SUBCONTRACTOR THAT IS IDENTIFIED ON A LIST CREATED PURSUANT TO PARAGRAPH (B) OF SUBDIVISION THREE OF THIS SECTION.

5. UPON RECEIVING INFORMATION THAT A PERSON WHO HAS MADE THE CERTIFICATION REQUIRED BY SUBDIVISION FOUR OF THIS SECTION IS IN VIOLATION THEREOF, THE STATE AGENCY SHALL REVIEW SUCH INFORMATION AND OFFER THE PERSON AN OPPORTUNITY TO RESPOND. IF THE PERSON FAILS TO DEMONSTRATE THAT IS HAS CEASED ITS ENGAGEMENT IN THE INVESTMENT WHICH IS IN VIOLATION OF THIS ACT WITHIN NINETY DAYS AFTER THE DETERMINATION OF SUCH VIOLATION, THEN THE STATE AGENCY SHALL TAKE SUCH ACTION AS MAY BE APPROPRIATE AND PROVIDED FOR BY LAW, RULE OR CONTRACT, INCLUDING, BUT NOT LIMITED TO, IMPOSING SANCTIONS, SEEKING COMPLIANCE, RECOVERING DAMAGES OR DECLARING THE CONTRACTOR IN DEFAULT.

6. THE COMMISSIONER SHALL REPORT TO THE GOVERNOR AND THE LEGISLATURE ANNUALLY ON OR BEFORE OCTOBER FIRST, ON THE STATUS OF THE FEDERAL "COMPREHENSIVE IRAN SANCTIONS, ACCOUNTABILITY, AND DIVESTMENT ACT OF 2010" (PUBLIC LAW 111-195), "THE IRAN DIVESTMENT ACT OF 2012", AND ANY RULES OR REGULATIONS ADOPTED THEREUNDER.

S 4. The general municipal law is amended by adding a new section 103-g to read as follows:

S 103-G. IRANIAN ENERGY SECTOR DIVESTMENT. 1. AS USED IN THIS SECTION:

A. "ENERGY SECTOR" SHALL HAVE THE SAME MEANING AS DEFINED IN PARAGRAPH (A) OF SUBDIVISION ONE OF SECTION ONE HUNDRED SIXTY-FIVE-A OF THE STATE FINANCE LAW.

B. "FINANCIAL INSTITUTION" SHALL HAVE THE SAME MEANING AS DEFINED IN PARAGRAPH (B) OF SUBDIVISION ONE OF SECTION ONE HUNDRED SIXTY-FIVE-A OF THE STATE FINANCE LAW.

C. "INVESTMENT" SHALL HAVE THE SAME MEANING AS DEFINED IN PARAGRAPH (C) OF SUBDIVISION ONE OF SECTION ONE HUNDRED SIXTY-FIVE-A OF THE STATE FINANCE LAW.

D. "IRAN" SHALL HAVE THE SAME MEANING AS DEFINED IN PARAGRAPH (D) OF SUBDIVISION ONE OF SECTION ONE HUNDRED SIXTY-FIVE-A OF THE STATE FINANCE LAW.

E. "PERSON" SHALL HAVE THE SAME MEANING AS DEFINED IN PARAGRAPH (E) OF SUBDIVISION ONE OF SECTION ONE HUNDRED SIXTY-FIVE-A OF THE STATE FINANCE LAW.

2. FOR PURPOSES OF THIS SECTION, A PERSON ENGAGES IN INVESTMENT ACTIVITIES IN IRAN IF:

A. THE PERSON PROVIDES GOODS OR SERVICES OF TWENTY MILLION DOLLARS OR MORE IN THE ENERGY SECTOR OF IRAN, INCLUDING A PERSON THAT PROVIDES OIL OR LIQUEFIED NATURAL GAS TANKERS, OR PRODUCTS USED TO CONSTRUCT OR MAINTAIN PIPELINES USED TO TRANSPORT OIL OR LIQUEFIED NATURAL GAS, FOR THE ENERGY SECTOR OF IRAN; OR

B. THE PERSON IS A FINANCIAL INSTITUTION THAT EXTENDS TWENTY MILLION DOLLARS OR MORE IN CREDIT TO ANOTHER PERSON, FOR FORTY-FIVE DAYS OR MORE, IF THAT PERSON WILL USE THE CREDIT TO PROVIDE GOODS OR SERVICES IN THE ENERGY SECTOR IN IRAN.

3. A PERSON THAT IS IDENTIFIED ON A LIST CREATED PURSUANT TO PARAGRAPH (B) OF SUBDIVISION THREE OF SECTION ONE HUNDRED SIXTY-FIVE-A OF THE STATE FINANCE LAW AS A PERSON ENGAGING IN INVESTMENT ACTIVITIES IN IRAN AS DESCRIBED IN SUBDIVISION TWO OF THIS SECTION, SHALL NOT BE DEEMED A RESPONSIBLE BIDDER OR OFFERER PURSUANT TO SECTION ONE HUNDRED THREE OF THIS ARTICLE.

4. EVERY BID OR PROPOSAL HEREAFTER MADE TO A POLITICAL SUBDIVISION OF

THE STATE OR ANY PUBLIC DEPARTMENT, AGENCY OR OFFICIAL THEREOF WHERE COMPETITIVE BIDDING IS REQUIRED BY STATUTE, RULE, REGULATION OR LOCAL LAW, FOR WORK OR SERVICES PERFORMED OR TO BE PERFORMED OR GOODS SOLD OR TO BE SOLD, SHALL CONTAIN THE FOLLOWING STATEMENT SUBSCRIBED BY THE BIDDER AND AFFIRMED BY SUCH BIDDER AS TRUE UNDER THE PENALTIES OF PERJURY:

A. "BY SUBMISSION OF THIS BID, EACH BIDDER AND EACH PERSON SIGNING ON BEHALF OF ANY BIDDER CERTIFIES, AND IN THE CASE OF A JOINT BID EACH PARTY THERETO CERTIFIES AS TO ITS OWN ORGANIZATION, UNDER PENALTY OF PERJURY, THAT TO THE BEST OF ITS KNOWLEDGE AND BELIEF THAT EACH BIDDER IS NOT ON THE LIST CREATED PURSUANT TO PARAGRAPH (B) OF SUBDIVISION 3 OF SECTION 165-A OF THE STATE FINANCE LAW."

B. NOTWITHSTANDING PARAGRAPH A OF THIS SUBDIVISION, THE STATEMENT OF NON-INVESTMENT IN THE IRANIAN ENERGY SECTOR MAY BE SUBMITTED ELECTRONICALLY IN ACCORDANCE WITH THE PROVISIONS OF SUBDIVISION ONE OF SECTION ONE HUNDRED THREE OF THIS ARTICLE.

C. A BID SHALL NOT BE CONSIDERED FOR AWARD NOR SHALL ANY AWARD BE MADE WHERE THE CONDITION SET FORTH IN PARAGRAPH A OF THIS SUBDIVISION HAS NOT BEEN COMPLIED WITH; PROVIDED, HOWEVER, THAT IF IN ANY CASE THE BIDDER

CANNOT MAKE THE FOREGOING CERTIFICATION, THE BIDDER SHALL SO STATE AND SHALL FURNISH WITH THE BID A SIGNED STATEMENT WHICH SETS FORTH IN DETAIL THE REASONS THEREFOR. A POLITICAL SUBDIVISION MAY AWARD A BID TO A BIDDER WHO CANNOT MAKE THE CERTIFICATION PURSUANT TO PARAGRAPH A OF THIS SUBDIVISION ON A CASE-BY-CASE BASIS IF:

(1) THE INVESTMENT ACTIVITIES IN IRAN WERE MADE BEFORE THE EFFECTIVE DATE OF THIS SECTION, THE INVESTMENT ACTIVITIES IN IRAN HAVE NOT BEEN EXPANDED OR RENEWED AFTER THE EFFECTIVE DATE OF THIS SECTION, AND THE PERSON HAS ADOPTED, PUBLICIZED, AND IS IMPLEMENTING A FORMAL PLAN TO CEASE THE INVESTMENT ACTIVITIES IN IRAN AND TO REFRAIN FROM ENGAGING IN ANY NEW INVESTMENTS IN IRAN; OR

(2) THE POLITICAL SUBDIVISION MAKES A DETERMINATION THAT THE GOODS OR SERVICES ARE NECESSARY FOR THE POLITICAL SUBDIVISION TO PERFORM ITS FUNCTIONS AND THAT, ABSENT SUCH AN EXEMPTION, THE POLITICAL SUBDIVISION WOULD BE UNABLE TO OBTAIN THE GOODS OR SERVICES FOR WHICH THE CONTRACT IS OFFERED. SUCH DETERMINATION SHALL BE MADE IN WRITING AND SHALL BE A PUBLIC DOCUMENT.

S 5. The secretary of state shall submit to the attorney general of the United States a written notice describing this act within 30 days after the effective date of this act.

S 6. Severability. If any clause, sentence, paragraph, section or part of this act shall be adjudged by any court of competent jurisdiction to be invalid and after exhaustion of all further judicial review, the judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, section or part of this act directly involved in the controversy in which the judgment shall have been rendered.

S 7. This act shall take effect on the ninetieth day after it shall have become a law; provided, however, that effective immediately, the addition, amendment and/or repeal of any rule or regulation necessary for the implementation of this act on its effective date are authorized and directed to be made and completed on or before such effective date.

SUBJECT: Report on Iran Required by Laws of Minnesota 2009, Chapter 90

Laws of Minnesota 2009, Chapter 90, codified as *Minnesota Statutes*, section 11A.244, requires the State Board of Investment (SBI) to submit a report to the chairs of the legislative committees and divisions with jurisdiction over the SBI concerning the SBI's identification of, communication with and discontinuance of investment in certain companies with operations in Iran.

Chapter 90, section 1, subdivision 9 specifies that the SBI include in the report:

1. A list of scrutinized companies
2. Summary of correspondence with companies
3. A list of investments divested
4. A list of prohibited investments
5. A description of any progress in having investment management firms create investment funds that exclude Iran companies

As provided for in Section 1, subdivision 2 of Chapter 90, the SBI purchased Iran research services from RiskMetrics Group, now ISS, regarding companies with business operations in Iran.

Attachment 1 is the list of scrutinized companies.

Attachment 2 displays copies of letters received in 2010 from companies to which the SBI sent correspondence. The SBI sent a letter to a single company December 10, 2010 to which it has not received a reply.

Chapter 90 calls for divestment of securities of companies which do not publicly announce substantial action specific to Iran within 90 days of the SBI correspondence. The SBI divested approximately 5.2 million shares of stock of five companies currently on the list of Iran Companies Requiring Divestment. Two other companies are on the list, but no divestment is required until the end of January 2011.

Attachment 3 is the list of restricted companies sent to SBI equity and bond managers. The managers are explicitly instructed to refrain from purchasing securities of companies on this list.

SBI recognizes the impact on the entire portfolio of the Iran investment restrictions and is discussing with its consultant and Investment Advisory Council the feasibility of creating a non-Iran portfolio.

Correspondence with Companies

Technip

November 30, 2010

Minnesota State Board of Investment
60 Empire Drive
Suite 355
St Paul MN 55103
USA
Attn: Mrs Teresa J. Richardson

Dear Mrs Richardson,

Thank you for your letter inquiring about Technip's activities in Iran.

We believe that this is an important issue. Technip's activities in Iran have decreased significantly since 2004. Over the last five years, its activity there has been essentially limited to the completion of older projects. Technip's remaining activities in Iran consist principally of project management services. Technip pays no corporate income tax in Iran. The completion of projects in Iran generated less than 0.04% of Technip's revenues in 2009.

Additionally, in January 2007 Technip sold its 20% interest in Nargan, an Iranian engineering company.

Technip has no humanitarian involvement in Iran. Moreover, as per its corporate policy, Technip has no political involvement in this country.

If the EU or France were to increase sanctions against Iran, Technip would take any steps necessary to be in line with legal requirements as soon as practically possible in order to comply with such changes. In any case, as one of Technip's priorities is strict adherence to the law, our company will respect any deadlines that may be imposed.

Technip has various procedures in place to address risks in countries considered to be politically unstable. Technip may also decide to reduce its exposure to a specific region or country by deciding not to perform new projects there. Furthermore, Technip is in contact with export credit agencies and insurance companies to obtain insurance coverage against political risk, where required. In all cases, Technip is strictly in line with applicable legislation.

Technip devotes important resources to its employees' security. The Group has an in-house risk classification procedure for countries where Technip operates. Countries are classified into risk levels. This internal procedure is constantly updated and has a direct impact on travel by Technip employees: travel to high-risk countries is strictly prohibited.
A Security Committee makes decision with regards to travel limitations for classified countries, emergency response planning and other security issues.

Sincerely,
Kimberly Stewart

Mr. Howard Bicker
Executive Director
Minnesota State Board of Investment
60 Empire Drive Suite 355
St. Paul, MN 55103
United States

Dear Mr. Bicker:

Withdrawal from the Azadegan development project, Islamic Republic of Iran

Regarding our business activities in the Islamic Republic of Iran, we would like to inform you of the withdrawal of Azadegan Petroleum Development, Ltd. (APD) from the Azadegan development project in the Islamic Republic of Iran, where APD, INPEX CORPORATION's wholly owned subsidiary, had a 10% participating interest. This withdrawal has been approved by the National Iranian Oil Company.

Accordingly we believe that INPEX should not be identified as the company for the divestment.

If you have any further questions, please contact Hiroshi Ikeda, Manager Corporate Strategy & Planning Group (Phone: +81-3-5572-0230 / E-mail: hiroshi.ikeda@inpex.co.jp) or Munehiro Hosono, Manager IR Group (Phone: +81-3-5572-0234/ E-mail: munehiro.hosono@inpex.co.jp).

For your reference, please find attached the press release relating to this matter, which we announced today.

Sincerely yours,

Toshiaki Kitamura
President
INPEX CORPORATION

Mr. Howard Bicker
Executive Director
Minnesota State Board Of Investment

Dear Mr. Howard Bicker:

In my capacity as President of JX Holdings, Inc., I am taking the liberty of replying on behalf of the Company to your letter to Chairman Shinji Nishio, dated June 14th.

We have been purchasing Sudanese crude oil on an as-needed basis. These purchases account for less than 5% of our total crude oil purchases in unit terms. We purchase Sudanese crude oil from international trading companies. We have not contracted directly with the Sudanese government or The Sudan National Petroleum Corporation (Sudapet), nor do we have any intention of doing so. All of aforementioned transactions have been spot procurement, not purchases pursuant to long-term contracts.

We do not have any offices, exploration or production interests or facilities, or any other revenue-generating assets or interests in Sudan, nor do we have any intention of having any. Furthermore, we have never provided goods or services directly to the Sudanese government, nor do we have any intention of doing so.

Sudanese crude oil has very low sulfur content, making it one of the more environmentally friendly grades of crude oil. In Japan, it is one of the few grades of crude oil that meets users' quality specifications as a fuel for thermal power plants. It is difficult to secure substitute supplies of equivalent-quality crude oil sufficient to completely eliminate our purchases of Sudanese crude oil, but in fiscal 2009 we reduced our Sudanese crude oil purchases by some 50% in unit terms relative to fiscal 2008. We will continue to diligently endeavor to secure substitute crude oil supplies while also placing priority on Japan's energy security and environmental considerations. We request your understanding in this regard.

RE: Kanematsu Corporation

Dear Ms. Richardson:

Kanematsu Corporation asked my firm to look into the matter raised by your letter to Mr. Masaharu Hamakawa dated April 30, 2010.

In conducting our research regarding this matter, I contacted Jim Heidelberg of your office. Mr. Heidelberg advised me a consultant, RiskMetrics Group, had erroneously identified Kanematsu Corporation as a company with scrutinized business operations in Iran. He indicated that this was an error and that Kanematsu Corporation had been removed from that list. (See Attachment A.)

Kanematsu Corporation appreciates Mr. Heidelberg's confirmation that the Minnesota State Board of Investment ("MSBI") has removed Kanematsu Corporation from the MSBI's list of monitored companies. We thank you and your colleagues for correcting this matter quickly and in such a collegial manner.

Kanematsu Corporation is very concerned that it not be erroneously linked to scrutinized business activities in Iran. As such, we especially appreciated Mr. Heidelberg's confirmation that Kanematsu Corporation will not be publicly identified in connection with the MSBI's mission. We assume that if anyone should ever inquire about Kanematsu Corporation's initial inclusion on MSBI's list of scrutinized companies, MSBI staff will make clear that the proposed listing was erroneous, so as to ensure that no inference could be drawn that Kanematsu Corporation was at any time considered a company with scrutinized business operations in Iran. We also assume from Mr. Heidelberg's assurances that neither your April 30, 2009 letter nor this response will be included in your publicly-available reports to the Minnesota legislature.

As a final note, we are concerned that RiskMetrics Group has repeated its error regarding Kanematsu Corporation in communications to other clients. We would very much appreciate anything that MSBI can do to encourage RiskMetrics Group to correct its records and cease falsely suggesting that Kanematsu Corporation has conducted scrutinized business operations in Iran.

On behalf of Kanematsu, I thank you again for your office's responsiveness in correcting the record in connection with this matter.

Very truly yours,

Mark L. Johnson

To: Jim.Heidelberg@state.mn.us
Subject: Kanematsu Corporation
Importance: High

Dear Mr. Heidelberg,

Thank you for taking my calls this afternoon. To confirm, I represent Kanematsu Corporation. Your office sent a letter to my client on or about April 30, 2010, stating that Kanematsu had engaged in scrutinized business operations in Iran that are subject to sanctions under U.S. law and to investment restrictions or divestment by the State of Minnesota, pursuant to Minnesota Statute 11A.244.

As you and I just discussed, Kanematsu was erroneously identified as having engaged in scrutinized business operations in Iran. You explained that MSBI's outside consultant sent MSBI an email on May 7, 2010 stating that Kanematsu had been included in error. MSBI does not contend that Kanematsu has engaged in scrutinized business operations in Iran, and Kanematsu does not need to respond to MSBI's letter of April 30, 2010.

Please confirm that all of this is correct. Please also confirm that Kanematsu's name will not be publicly disclosed in connection with this matter.

We appreciate MSBI's willingness to promptly correct the record. Thank you very much.

Sincerely,

Mark L. Johnson

Attn: Teresa J. Richardson, Assistant Executive Director

Dear Ms. Richardson:

This letter is in response to your April 30, 2010 letter to Davide Trevisani, the CEO of Trevi Finanziaria Industriale S.p.A. ("Trevi"). With respect to your inquiry concerning Trevi's business activities in Iran, please note that one of Trevi's affiliates had been awarded a construction project to complete special foundation work for new quays at the commercial port of Bandar-Abbas in Iran. That project was substantially completed in September 2009, and neither Trevi's affiliate nor any other Trevi entity has any equipment or employees in Iran. Trevi is not engaged in any activities in Iran other than the collection of retention money due for work already completed. As such, we believe that Trevi does not have any so-called "scrutinized business operations" in Iran and should therefore be removed from the list of companies subject to divestment under *Minnesota Statutes*, Section 11A.244. If you require any further information or clarification, please do not hesitate to contact me.

Also, please share this information with the RiskMetrics Group if you are able to do so.

Sincerely,

Stefano Trevisani
Managing Director

To: Minn.Sbi@state.mn.us
Subject: Clarification on operations in Iran

Dear Teresa J. Richardson,

Reference is made to your letter dated April 30, 2010, concerning PTT Exploration and Production Plc.'s operations in Iran. We would like to clarify our activities in Iran as follows:

PTTEP Iran Company Limited, a subsidiary of PTTEP, holds 100% share in an Iranian exploration field called Saveh Block since 2005. The exploration activities include geological and geophysical studies as well as 2D seismic surveys, which were carried out during the first two years. The drilling of the first exploration well commenced in 2008, which was prolonged until end of 2009 due to technical challenges.

Over the five years of our exploration program, PTTEP's investment was mainly for the aforementioned exploration well. Due to technical justifications and safety concerns, the well was written off in 2009. In 2010, the company has conducted a feasibility study and post-well evaluation, whereby further investments will hinge upon the evaluation result.

Please refer to http://www.pttep.com/en/aboutPttep.aspx for more information concerning PTTEP's policy on worldwide operations.

Should you have any additional queries, please do not hesitate to contact us.

Yours sincerely,

PTTEP Investor Relations

Re: Minnesota State Board of Investment Iran Inquiry

Dear Ms. Richardson:

I am responding to your letter of April 30 addressed to Mr. B.K. Goenka, Chairman of Welspun Corp Limited, previously known as Welspun Gujarat Stahl Rohren Ltd. ("Welspun").

Under the applicable Minnesota's statute, section 11A.244, the Minnesota State Board of Investment reviews "scrutinized companies," which are defined as companies engaging in "scrutinized business activities." Scrutinized business activities are those activities subject to sanctions under the Iran Sanctions Act of 1996 (Public Law 104-172), as amended. The Iran Sanctions Act provides for the imposition of sanctions against entities that have made an investment of $20 million or more that has contributed to the enhancement of Iran's ability to develop its petroleum resources.

Welspun has not made any investment in the Iranian petroleum or energy sector. In fact, Welspun does not have any investments in Iran. Therefore, Welspun does not engage in any "scrutinized business operations" in Iran that would subject it to divestment or investment restrictions by the Minnesota State Board of Investment. As such, we respectfully request that Welspun be removed from the Minnesota State Board of Investment's list of scrutinized companies.

Please advise if you have any further questions regarding this matter.

Very truly yours,

For Welspun Corp Ltd

January 31, 2012

Mr. Michael Burns
Executive Director
Permanent Fund Corporation
801 West Tenth Street, Suite 302
Juneau, AK 99801

Dear Mr. Burns,

This will follow up on our meeting of November 21, 2011, regarding the divestiture of Permanent Fund investments from Iran. The International Atomic Energy Agency (IAEA) recently placed Iran under heavy scrutiny for "serious concerns regarding possible military dimensions to Iran's nuclear program." And, the IAEA believes Iran has "carried out activities relevant to the development of a nuclear explosive device." Additionally, Iran's ruling government has made it clear that it does not believe that citizens of Israel should be allowed to live or peaceably pursue their own interests.

I understand some believe free markets, rather than government policy, should drive our investment choices, but this very real threat requires action. No free market exists when one nation builds a nuclear arsenal while it continually and steadfastly advocates for the eradication of another entire nation, with our own not so far behind.

In my view, our State's policy should now be to divest ourselves of investments with companies doing business in Iran. This sanction comes as a last resort – an option our State has historically refused when presented. However, the time to stand on the principles of life and liberty is at hand, and we must step up along with our country and other states. For these reasons, I am asking that to the extent permitted by law, you pursue a policy of divestiture of State resources from companies that do business in Iran or with the current ruling government of Iran.

Sincerely,

Sean Parnell
Governor

Panetta: Iran Could Produce Bomb Next Year

U.S. Determined To Take Steps Necessary To Stop Iran

By Haaretz

Published January 30, 2012.

U.S. Defense Secretary Leon Panetta said on Sunday that Iran is only one year away from producing a nuclear weapon.

In an interview on the CBS show "60 Minutes," Panetta said that "the consensus is that, if they decided to do it, it would probably take them about a year to be able to produce a bomb and then possibly another one to two years in order to put it on a deliverable vehicle of some sort in order to deliver that weapon."

During the interview, Panetta reiterated Obama's opposition to Iran's nuclear program, and said that the U.S. shares common goals with Israel in its opposition to the program.

"The United States, and the president's made this clear, does not want Iran to develop a nuclear weapon. That's a red line for us. And it's a red line obviously for the Israelis so we share a common goal here," he told CBS.

"If they proceed and we get intelligence that they're proceeding with developing a nuclear weapon then we will take whatever steps are necessary to stop it," he added.

SPONSOR STATEMENT FOR SB 132

"An Act relating to requirements for persons holding provisional drivers' licenses; and providing for an effective date."

SB 132 provides for a *"provisional driver's license sticker"* for those drivers between 16 and 18 years of age who are driving under the Alaska Graduated License Program. This bill will identify those young drivers who have completed their initial *"instruction permit"* and have obtained a *"provisional driver's license"*. Upon obtaining their provisional license, they would obtain a sticker that shows that the vehicle is being driven by a driver with a new license.

If enacted, SB 132 would add a new subsection to AS 28.15.055 (Alaska's Provisional License Law) establishing a provisional license sticker and the responsibility of the driver to display it in the car they are operating. SB 132 would continue the responsibilities of the driver and the other responsible parties established in the 2005 Provisional Driver's License Law.

Alaska has very challenging driving conditions. This includes winter cold weather and darkness, extended daylight hours with crowded summer roads and numerous distractions in driving. Every year, teen drivers account for about 20 percent of the fatalities and major injuries that occur on Alaska's roads. Experience is important in keeping people safe on Alaska's roads year round and was a reason behind the Alaska Graduated License Program. By adding a *"provisional sticker"* to the car, other drivers can respect the level of experience the new driver has and drive appropriately.

Finally the bill provides guidance to the Department of Motor Vehicles and Department of Public Safety on issuing and enforcing the *"provisional driver's sticker"*.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB132

Analysis

The effective date of this bill is January 1, 2013.

This bill would require provisional drivers to adhere a sticker to the vehicle that they are operating that designates them as a provisional driver license holder. It would also make it an infraction with a fine of not more than $300 for failure to display the sticker.

This bill will have a minor fiscal impact on the Division of Motor Vehicles (DMV). DMV will absorb the costs in its operating budget.

A BILL

FOR AN ACT ENTITLED

"An Act relating to requirements for persons holding provisional drivers' licenses; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 28.15.055 is amended by adding a new subsection to read:

(b) A person holding a provisional driver's license shall display in the rear window of each vehicle operated by the person a moveable sticker issued by the department that identifies that the vehicle is operated by a provisional licensee. The department may charge a fee for the issuance of a sticker. Failure to display a sticker as required by this subsection is an infraction and may be punished by a fine of not more than $200. However, a person charged with violating this section may not be convicted if the person

(1) has not previously been arrested, charged, or cited for a violation of this section; and

(2) produces in court proof that the person has obtained and displayed

the sticker required by this subsection.

* **Sec. 2.** This Act takes effect January 1, 2013.

Alaska Statistics for drivers ages 16-17 between 2002-2011

The Total Drivers in Fatal Crashes by Age, Alaska 2002-2011

- Fourteen 16 year olds were involved in fatal crashes in Alaska between 2002-2011
- This is 1.3% of the total amount of drivers in fatal crashes
- Eighteen 17 year olds were involved in fatal crashes in Alaska between 2002-2011
- This is 1.7% of the total amount of drivers in fatal crashes

The total Drivers License in Alaska by Age between 2002-2011

- 61,254 sixteen year olds were licensed, this is 1.2% of the total
- 74,882 seventeen year olds were licensed, this is 1.5% of the total

Provisional Licensed Drivers

- Provisional Licensed Drivers are hazardous due to:
- Apprehension
- Lack of experience
- Weather conditions
- No drivers education requirement
- Alaska's diversity from other states

Solution

- A person holding a provisional driver's license shall display in the rear window of each vehicle operated by the person a sticker issued by the department that identifies that the vehicle is operated by a provisional licensee..

N

L

L
EBY 776J

Why This Solution?

- This is a simple solution to benefit Alaskan drivers.
- It will impress other driver's to be more cautious driving around the novice teen driver
- It will provide other drivers the information necessary to understand the Provisional Licensee's position
- This will assist law enforcement officers in implementing the law

Enforcement

- Failure to display a sticker as required by this subsection is an infraction and may be punished by a fine of not more than $300.

Procedures

- The state of Alaska will supply the Department of Motor Vehicles with stickers to distribute to those persons acquiring a Provisional License
- Those acquiring a Provisional License will pay for the sticker as part of the permitting process.
- Sticker will be placed on the rear window of the operating vehicle

Summary

- Teen drivers with Provisional License are statistically more hazardous to themselves and other Alaskans
- Require Provisional drivers to identify their status
- Reduce the number of accidents and infractions in Alaska, and help save Alaskan lives

SENATOR BILL WIELECHOWSKI

Senate Bill 136: Income Tax Credit for Employing a Veteran
Sponsor Statement

Our veterans are some of the most highly trained, highly educated, and highly skilled workers that we have. When businesses hire veterans, they are getting proven leaders with solid work ethics who can solve problems efficiently while staying focused and contributing to an improved bottom line.

Despite many employers acknowledging the advantages of hiring someone who has served in the Armed Forces, veterans continue to see higher than average unemployment rates nationwide. In June 2011, according to the U.S. Bureau of Labor Statistics, one million U.S. veterans were unemployed and the jobless rate for post-9/11 veterans was 13.3%. The picture was even worse for young, male veterans between the ages of 18 and 24, who saw an unemployment rate of 21.9%.

Senate Bill 136 will assist Alaska's veterans get civilian jobs when they leave the service and provide direct benefits to Alaska businesses. The legislation provides a $2,000 credit for each veteran hired who works at least 1,560 hours within a 12-month period, or approximately 30 hours a week. The tax credit can be applied in the first year after 12-months of employment and any credits not used could be used in a later tax year.

This is a win-win situation. Struggling Alaskan businesses can get the tax help they need, while Alaska's veterans have an increased chance of finding employment.

MEMORANDUM January 17, 2012

SUBJECT: Sectional Summary for SB 136 (Work Order No. 27-LS0983\I)

TO: Senator Bill Wielechowski
Attn: Kendra Kloster

FROM: Donald M. Bullock Jr.
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Amends AS 43.20 by adding a new section, AS 43.20.047, to provide a tax credit against the corporation income tax for employing an Alaska veteran; states the requirements for the credit and the amount of credit available for each Alaska veteran that is hired; and requires recordkeeping to support eligibility for the credit.

Section 2. Makes the Act take effect July 1, 2012.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 136
2012 LEGISLATIVE SESSION

Analysis

Bill Language:
The bill provides an income tax credit of $2,000 for each veteran who is hired and who works 1,560 hours or more, during the 12 consecutive months immediately following the date the Alaska veteran is first employed. Any unused credit may be carried forward. The credit is not refundable, nor transferrable.

Revenues:
It is difficult to know how many Alaska veterans will be hired as a result of this legislation and, therefore, difficult to determine its affect on revenues. However, for each Alaska veteran hired in the state that meets the requirements of this bill, corporate income tax revenues will decrease $2,000 in one year.

Expenditures:
Department of Revenue can administer the provisions of this bill utilizing existing resources.

Hiring Military Veterans is Good Business

Unemployment rates high for these individuals

BY BILL WHITMORE

If your company's diversity recruiting strategy fails to include military veterans, you are missing out on working with some of our country's most outstanding men and women. Organizations that fail to recognize the extraordinary leadership qualities veterans bring to the workplace pass up the opportunity to work with results-oriented employees who have a strong sense of accountability and responsibility. It is time for our country's corporate leaders to awaken to the reality that combat leadership and military discipline translate into dynamic employees who can enhance an organization's productivity.

While the national unemployment rate hovers around 9.7 percent for civilians, the unemployment rate for young male veterans, including those returning from Afghanistan and Iraq, is more than double the national average at 21.6 percent, according to the Bureau of Labor Statistics. Isn't it time to shine the employment spotlight on the brave men and women who serve our country?

What essential set of life skills do military veterans bring to corporate America that makes them an indispensable pairing? The military trains our men and women to lead by example, as well as understand the nuances of delegation and motivation. As General Douglas McArthur once said: "A true leader has the confidence to stand alone, the courage to make tough decisions, and the compassion to listen to the needs of others." Military veterans understand the value of teamwork, which they can apply in our country's offices and board rooms. Veterans understand their role within an organizational framework and serve as exemplary role models to subordinates while demonstrating accountability and leadership to supervisors.

Bill Whitmore

Veterans generally enter the work force with identifiable skills that can be transferred to the business world, and are often skilled in technical trends pertinent to business and industry. And what they don't know, they are eager to learn – making them receptive and ready hires in work environments valuing ongoing learning and training. Veterans represent diversity and collaborative teamwork in action having served with people from diverse economic, ethnic and geographic background – as well as race, religion and gender. Even under dire stress, veterans complete tasks and assignments in a timely manner as they have labored under restrictive schedules and resources on the battlefields and military installations they've served.

Employers can find qualified veterans from a variety of sources including the Employer Partnership of the Armed Forces, Employer Support of the Guard and Reserve, Military.com, HireVeterans.com and the Wounded Warriors Project. Employers can become true partners with selected veterans' organizations and work with them proactively to ensure they are maximizing their ability to recruit from this extremely qualified talent pool.

Lest we forget, the men and women who have chosen to serve our country are patriots who have made enormous sacrifices to ensure our safety and freedom. By employing military veterans, we are saying, "thank you for your service" and for protecting us from terrorism and other threats. ❑

LEGISLATIVE RESEARCH REPORT

DECEMBER 28, 2011

REPORT NUMBER 12.119

STATE AND FEDERAL TAX CREDITS FOR BUSINESSES THAT HIRE VETERANS

PREPARED FOR SENATOR BILL WIELECHOWSKI

BY TIM SPENGLER, LEGISLATIVE ANALYST

You wished to know whether any states provide tax credits for employers who hire veterans or for veterans who are starting a business. Additionally, you wanted to know if federal tax benefits exist for businesses hiring veterans.

Briefly, Vermont offers both benefits when veterans have recent military history, while a few other states provide benefits for businesses hiring veterans under limited circumstances.[1] Federal tax benefits are available to employers who hire veterans through the *Returning Heroes* and *Wounded Warrior* tax credit programs.

Alaska

As you may know, Alaska does not provide tax credits to employers for hiring veterans or for veterans starting their own businesses. The state does provide, however, a five percent bid preference (that may not exceed $5,000) if a bidder for a state contract is an Alaska veteran and is a "qualifying entity." According to AS 36.30.175—Alaska Veterans' Preference—a qualifying entity means the following:

1. Sole proprietorship owned by an Alaska veteran;
2. Partnership under AS 32.06 or AS 32.11 if a majority of the partners are Alaska veterans;
3. Limited liability company organized under AS 10.50 if a majority of the members are Alaska veterans; or
4. Corporation that is wholly owned by individuals and a majority of the individuals are Alaska veterans.[2]

[1] None of the states with credits were able to provide us with data regarding the effectiveness of the benefit.

[2] For more information on how Alaska's veterans' preference is applied please contact Vern Jones, chief procurement officer, Department of Administration, (907) 465-5684.

Other States

Vermont

On May 25th, 2011, House Bill 275 was signed into law in Vermont and codified at 32 V.S.A. 5930nn. The legislation, entitled the Veterans' Tax Credit Act, provides employers with a $2,000 tax incentive for hiring veterans who have returned from deployment in Afghanistan or Iraq within the last two years. In order to qualify for the tax credit, businesses must employ veterans before the end of 2011. The act also provides veterans who start new companies with a $2,000 benefit. To qualify for this credit, the veteran must hold at least 50 percent ownership in the company.

Specifically, to be eligible for the tax credits a Vermont veteran must meet the following prerequisites:

- have left federal, active duty within the past 24 months;
- have been a resident of Vermont at the time of entry into military service or served in a guard or reserve unit located in Vermont; and
- be eligible to receive unemployment from the Vermont Department of Labor, or would be eligible except unemployment has been exhausted.

Clayton Clark, director of Vermont's Office of Veterans Affairs notes that earlier this year he queried fellow state directors asking if their states offered similar veteran tax benefits and none did. This corresponds to what we found in our review.[3]

We include, as Attachment A, various documents pertaining to the tax credit in Vermont including the state statute, a question and answer document on the credit, and the application Vermont veterans use to certify their eligibility for the tax credit.

California

The Enterprise Zone Program (EZP) in California entitles employers that hire and employ qualified applicants—including certain veterans—to tax credits. The California EZP was established in 1984 to stimulate business investment in depressed areas of the state and to create job opportunities. If a company is located in one of California's 43 EZPs, the company may be eligible for up to $31,000 in California tax credits (over five years) if the veteran hired meets any one of the following three tests:

- left military service within the last 48 months;
- is a service-related disabled veteran; or
- is a Vietnam era veteran.[4]

[3] Clayton Clark can be reached at (802) 828-3379. For this report, we contacted numerous state veteran's offices both telephonically and by email, searched many state and national veteran websites, and conducted a West Law search.

[4] More information on California's Enterprise Zone Program can be accessed at www.caez.org/.

Illinois

Illinois employers can earn an income tax credit for hiring veterans of Operation Desert Storm, Operation Enduring Freedom, or Operation Iraqi Freedom. The credit is five percent of the total wages paid to every qualified veteran hired after January 1, 2008. The credit may not exceed $1,200 annually. Veterans must work at least 185 days during the tax year for the employer to qualify for the credit.[5]

West Virginia

Entities hiring economically disadvantaged Vietnam or Korean era veterans, unemployed West Virginia National Guard members, or *any* disabled veteran, are entitled to a state tax credit. The credit available to the employer is 25-30 percent of the first $5,000 in wages or compensation paid to the veteran.[6]

Federal Tax Benefits

On November 21, 2011, President Obama signed legislation that provides tax credits to employers who hire military veterans. The *VOW to Hire Heroes Act* contains two components—the *Returning Heroes Tax Credit* and the *Wounded Warriors Tax Credit*—that provide credits to businesses that hire veterans. The Act passed both bodies of Congress unanimously and, while the legislation is not expected to lead to the creation a significant number of new jobs, it is hoped that it will help many veterans secure employment.

The **Returning Heroes Tax Credit** is intended to provide an incentive for businesses to hire unemployed veterans in the following ways:

- *Short-term unemployed:* A new credit of 40 percent of the first $6,000 of wages (up to $2,400) for employers who hire veterans who have been unemployed at least 4 weeks.

- *Long-term unemployed:* A new credit of 40 percent of the first $14,000 of wages (up to $5,600) for employers who hire veterans who have been unemployed longer than 6 months.

The **Wounded Warrior Tax Credit** will double the existing tax credit for businesses that hire long-term unemployed veterans with service-connected disabilities as follows:

- Maintains the existing Work Opportunity Tax Credit for employers that hire veterans with service-connected disabilities (currently the maximum is $4,800).

- Introduces a new credit of 40 percent of the first $24,000 of wages (up to $9,600) for firms that hire veterans with service-connected disabilities who have been unemployed longer than 6 months.[7]

We hope you find this information to be useful. Please let us know if you have questions or need additional information.

---

[5] To file for Veteran's Tax Credit, Illinois employers complete Schedule 1299-D, "Income Tax Credits."

[6] For disabled veterans, the credit is the percentage of disability multiplied by the first $5,000 in wages. We include, as Attachment B, West Virginia Annotated Code 21A-2C-4, which pertains to the tax credit and tax schedule J—the "West Virginia Military Incentive Credit."

[7] Detailed information on these tax credit programs is available at *www.whitehouse.gov/the-press-office/2011/11/21/fact-sheet-returning-heroes-and-wounded-warrior-tax-credits.*

Chapter 904 - Anchorage, Alaska
"An Agenda of Service"

January 19, 2012

Senator Bill Weilechowski
Chairman
Senate State Affairs Committee
Alaska State Legislature

Senator:

As you know we were very much involved in the development of a veteran jobs package in Washington, DC that was finally approved by the Congress and signed by the President. An important component of this package was a tax incentive for American businesses to hire veterans, with some additional incentives for disabled veterans. The incentives start at $2,400 in the federal package.

Like so many Alaskans we have heard time and again about how imposing our state incorporation taxes are. So, in an effort to encourage Alaskan businesses to also hire veterans we were very pleased with your interest in an additional incentive, right here in Alaska to hire veterans.

We strongly support SB 136, and would suggest that the tax credit be at $2,600. This would allow a combined tax credit (federal/state) of $5,000 per veteran hired at a minim of 32 hours a week and retained for most of a year.

With the provision of SB 136, we have shared with bill with 48 other VVA State Council Presidents, and I can report that a number of them have asked their legislators to seriously consider doing the same.

With passage of this bill, Alaska will continue to be viewed nationally as a very veteran friendly state.

I wanted to again thank you for the Town Hall Meeting you and your colleagues held in east Anchorage last year. It was without question one of the best to date and I think those Members of the legislature who attended got something substantive out of it. Certainly SB 136 was one of those ideas presented at that meeting.

It is an honor,

Ric Davidge

VETS HELPING VETS

2808 E. TUDOR ROAD, SUITE 3
ANCHORAGE, ALASKA, 99507
907-433-0011

"Making a difference one person at a time"

Date: 22 January 2012

Subject: Support Letter for SB136 Income Tax Credit for Employing Veterans

To whom it may concern,

On behalf of many Alaska Veterans and the Vets Helping Vets organization of Anchorage, Alaska, I am writing this letter of support for the Income Tax Credit for Employing Veterans bill.

My name is Calista Anderson; I am the President of the Vets Helping Vets organization located here in Anchorage at 2808 E. Tudor Rd. , and a proud military (US Army) wife of 17 years. My husband along with many other spouses, sons, daughters and mothers and fathers have made many sacrifices and will continue to do so today and in the future for all the freedoms we enjoy in our way of life today. Many of these are now business owners. Too many have given the ultimate sacrifice! In saying this, every state in America should have such a bill as this put in to motion, but especially here in Alaska with the enormous amount of unemployment we have right here in our own community. Now and always in the future every business should receive a tax credit for hiring veterans, as we will always have veterans in our country. The reason we have the ability to open a business anytime or any place we choose is because of these veterans that ensured we are free, not living under a dictatorship as many countries today are forced to do so. Offering this bill will encourage business owners to hire more veterans, giving them a chance to improve their lives and the chance to get back on their feet, a hand UP, not a hand OUT. Many of our veterans have fallen thru the cracks to many times for too long, providing this tax credit bill to businesses in our state will be a great incentive to reach out to many more veterans and to decrease the percentage rate of unemployed and homeless veterans in Alaska, therefore, giving veterans an opportunity to improve their quality of life as well as for their families. By hiring our veterans and allowing them to learn new trades opens many doors for them and their families to begin a normal way of life, the dream they had when they entered the military to defend our freedoms, the AMERICAN DREAM. Not only will it give business owners a tax credit but in many ways for many people it will give a sense of pride and self-worth that needs to be restored today and for the business owners that tax break that many of them deserve as well. Passing such a bill as this can only benefit our local business

owners and our nation's heroes that deserve that second chance. Employing our veterans and getting them off the streets should always be a priority in our state and across our nation, as "homeless " and "veteran" should never come together in the same sentence. Veterans voluntarily gave up so much of their "normal" way of life to protect ours; allowing business owners to employ them with a tax credit will provide a sense of normalcy and appreciation back to our veterans and some businesses across our great state.

When making your decision to pass this law, please remember that all of our veterans (that are many of our business owners today), gave some, however, some gave ALL.

In addition, we are fully supportive also of the Military Training Credit bill as well. This is very important for our military; training is very important and is the very thing that provides our military with the knowledge to continue to keep our country free.

Sincerely,

Calista Anderson

US Army wife and President of Vets Helping Vets of Anchorage, Alaska

CS FOR SENATE BILL NO. 150(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, Ellis, Meyer, Menard

A BILL

FOR AN ACT ENTITLED

"An Act relating to applying military education, training, and service credit to occupational licensing and certain postsecondary education and employment training requirements; providing for a temporary occupational license for qualified military service members; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 08.01 is amended by adding a new section to read:

Sec. 08.01.064. Military education, training, and service credit; temporary license. (a) Notwithstanding another provision of law, the department or applicable board shall accept military education, training, and service as equivalent to some or all of the qualifications otherwise required of an applicant for a license or certificate issued under this chapter if the applicant provides satisfactory evidence of successful completion of the education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

FISCAL NOTE #1

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB150 S/A

Analysis

The proposed legislation requires the Workforce Investment Board to facilitate a statewide policy to determine credit towards a degree or program offered by a vocational or technical center in the state of Alaska for a member of the nation's armed forces. This will be conducted via teleconferences between the state's applicable training center organizations.

There is no fiscal impact to the department as a result of this legislation.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 150

Analysis

SB 150 would require the department or board to accept relevant experience, training or service acquired while serving in the armed forces. The bill would allow greater flexibility for those exiting military service to become temporarily licensed in Alaska.

The following is a detailed cost analysis:

Personal Services consist of a long term non-perm Regulations Specialist I (Range 13) and an Administrative Assistant (Range 14). The Regulation Specialist I will work with boards, commissions, and staff to create regulations for new "temporary license" types for all licenses, and will craft clarifying regulations for programs with existing temporary licenses. The Administrative Assistant II will work with the Regulations Specialist and existing Publications Specialist II to draft correspondence to boards and commissions, create new forms and applications, liaison with the Department of Law regarding these regulations changes, and ensure timelines are maintained. This position will administer the military licensing program, including the receiving and tracking of military applications to ensure they are expedited, providing administrative support to licensing staff, customer support to military personnel, and organizing an accurate structure of the new license types into the licensing database. Once these regulations are in place, updates can be managed by existing staff and the Regulations Specialist position will be eliminated.

Services include the initial legal and start up costs, and ongoing support services.

Commodities include general supply costs.

Under the self-sufficiency statue of AS 08.01.065, regulatory programs are required to pay the cost of regulation through licensing fees. The funding source in establishing this position is Receipt Supported Services funded entirely from licensing fees.

MEMORANDUM

DATE: January 25, 2012

TO: Senate State Affairs Committee

FROM: Senator Bill Wielechowski

SUBJECT: Changes from CS SB150 (version E) to CS SB150 (version X)

The following are changes made in the Committee Substitute for Senate Bill 150:

- Page 2, line 16 – added the word "temporary" before "license" to clarify that section (c) was referring that the boards may issue temporary license extension of 180 days.

- Page 5, line 15 – adds Section 5 to include transitional language allowing the Department of Commerce, Community, and Economic Development and applicable boards to immediately begin implementing regulations to accept military education, training and service.

- Page 5, line 22 – add Section 6 adds an effective date of December 31, 2013. This will allow the Departments and boards enough time to adopt regulations for accepting equivalent military education, training and service.

- Page 5, line 23 – adds Section 7 to allow section 5 to take effect immediately.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, Ellis, Meyer, Menard

A BILL

FOR AN ACT ENTITLED

"An Act relating to applying military education, training, and service credit to occupational licensing and certain postsecondary education and employment training requirements; providing for a temporary occupational license for qualified military service members; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 08.01 is amended by adding a new section to read:

Sec. 08.01.064. Military education, training, and service credit; temporary license. (a) Notwithstanding another provision of law, the department or applicable board shall accept military education, training, and service as equivalent to some or all of the qualifications otherwise required of an applicant for a license or certificate issued under this chapter if the applicant provides satisfactory evidence of successful completion of the education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

(b) If the department or applicable board is otherwise authorized to issue a temporary license or certificate, the department or applicable board shall issue a temporary license or certificate to a person who

(1) applies to the department or relevant board in a manner prescribed by the department or board;

(2) meets the requirements in AS 08.01.063(a)(3) - (6); and

(3) while on active duty in the armed forces of the United States or any state, as described in (a) of this section,

(A) held a current license or certificate in another state, district, or territory of the United States and has practiced in the area of the license or certificate; or

(B) was awarded a diploma or certificate by a branch of the armed forces of the United States or any state, as described in (a) of this section, that met standards for an equivalent license or a certificate of technical training.

(c) A temporary license or certificate issued under (b) of this section is valid for 180 days and may be extended at the discretion of the department or applicable board for one additional 180-day period if the holder of the license or certificate applies for an extension on a form approved by the department or applicable board.

(d) The department or applicable board may adopt regulations necessary to implement this section.

*** Sec. 2.** AS 14.40.210 is amended by adding a new subsection to read:

(c) The president of the University of Alaska shall implement a policy and procedure for the acceptance of academic credit toward a degree or technical program offered by the university if an applicant provides satisfactory evidence of successful completion of relevant military education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

*** Sec. 3.** AS 14.48.060(b) is amended to read:

(b) A postsecondary educational institution must be maintained and operated, or, in the case of a new institution must demonstrate that it can be maintained and

operated so that

(1) the quality and content of each course or program of instruction, training, or study are such as may reasonably and adequately achieve the stated objective for which the course or program is offered;

(2) the institution has or has access to adequate space, equipment, instructional materials, and personnel where applicable to achieve the stated objective of the course or program of study and to provide education of good quality;

(3) the education or experience qualifications of directors, administrators, supervisors, and instructors are such as may reasonably ensure that the students will receive education consistent with the objectives of the course or program of study;

(4) the institution provides a catalog or brochure containing information describing the programs offered, program objectives, length of program, schedule of tuition, fees, and all other charges and expenses necessary for completion of the course of study, cancellation and refund policies, and other material facts concerning the institution and the program or course of instruction that are reasonably likely to affect the decision of the student to enroll, together with any other disclosures specified by the commission by regulation; and that this information is provided to prospective students before enrollment;

(5) upon satisfactory completion of training, the student is given appropriate educational credentials by the institution, indicating that the course of instruction or study has been satisfactorily completed by the student;

(6) adequate records are maintained by the institution to show attendance, progress, or grades, and that satisfactory standards are enforced relating to attendance, progress, and performance;

(7) the institution is maintained and operated in compliance with all pertinent ordinances and laws relating to the safety and health of persons upon the premises of the institution;

(8) the institution is financially sound and capable of fulfilling its commitments to students;

(9) neither the institution nor its agents engage in advertising, sales,

collection, credit, or other practices which are false, deceptive, misleading, or unfair;

(10) the chief executive officer, trustees, directors, owners, administrators, supervisors, staff, and instructors of the institution are of good reputation and character and have not been convicted of a violation of AS 14.48.020 or 14.48.150 or AS 45.50.471 - 45.50.561 or a comparable law in another state or province;

(11) the student housing owned, maintained, or approved by the institution is appropriate, safe, and adequate;

(12) the institution has a fair and equitable cancellation and refund policy; [AND]

(13) the charges set by the institution for tuition, fees, books, and supplies are fair and equitable**; and**

(14) the institution accepts military education, training, or service credit or hours toward a degree or technical program offered by the institution if

(A) the institution otherwise accepts transfer credits or hours; and

(B) the credit or hours transfer process meets the requirements of the accrediting body of the institution or the commission.

* **Sec. 4.** AS 23.15.820(a) is amended to read:

(a) The Alaska Workforce Investment Board shall

(1) administer the Alaska technical and vocational education program established in AS 23.15.820 - 23.15.850;

(2) facilitate the development of a statewide policy for a coordinated and effective technical and vocational education training system in this state and, to the extent authorized by federal and state law, plan and coordinate federal, state, and local efforts in technical and vocational education programs;

(3) adopt regulations under AS 44.62 (Administrative Procedure Act) to carry out the purposes of AS 23.15.820 - 23.15.850, including regulations that set standards for the percentage of a grant that may be used for administrative costs; the regulations must clearly identify and distinguish between expenses that may be included in administrative costs and those that may not be included in administrative

costs; the percentage allowed for administrative costs may not exceed the lesser of five percent or the amount permitted under the requirements of a federal program, if applicable;

(4) administer the grant program under AS 23.15.840 and establish grant administration requirements including accounting procedures that apply to qualified entities and their grantees;

(5) facilitate the development and implementation of a statewide policy and procedure that provides for the acceptance of credit or hours toward a degree or technical program offered by a vocational or technical training center in the state for an applicant who provides satisfactory evidence of successful completion of relevant military education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

* **Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

MILITARY EDUCATION, TRAINING, AND SERVICE CREDIT: TRANSITION. The Department of Commerce, Community, and Economic Development and applicable boards may immediately promulgate regulations necessary to implement AS 08.01.064, added by sec. 1 of this Act, except that the effective date of the regulations may not be earlier than the effective date of secs. 1 - 4 of this Act.

* **Sec. 6.** Sections 1 - 4 of this Act take effect December 31, 2013.

* **Sec. 7.** Section 5 of this Act takes effect immediately under AS 01.10.070(c).

SENATOR BILL WIELECHOWSKI

MEMORANDUM

DATE: January 20, 2012

TO: Senate State Affairs Committee

FROM: Senator Bill Wielechowski

SUBJECT: Changes from SB150 to CS SB150 (version E)

The following are changes made in the Committee Substitute for Senate Bill 150:

- Page 2, line 10 – 14: by request of the Department of Defense language was included to add the word "diploma or certificate" which properly references the training and education documents provided to service members after the completion of their education and training programs.

- Page 2 and 3, section 3: by request of the Commission on Postsecondary Education, moved section three to amend AS 14.48.060(b): minimum standards in establishing the criteria required by the commission, rather than creating a new section (d).

- Page 2, line 1 – 3: additional language was added stating a temporary license is issued to a board which is already "authorized to issue a temporary license". Previous language would have required all boards to issue temporary licenses which would have required an onerous process and not necessary or recommended that all boards have temporary licenses.

- Page 2, line 13 & 14: removed part (c) stating the department or applicable board shall expedite the procedure for issuance of a license. Department of Commerce stated this expediting language would cause a need to increase staff due to the increased time frame for processing which is not the original intention. The Department has stated they will continue to work in a timely manner to process and review occupational licenses, but the expediting language could be a burden.

SENATOR BILL WIELECHOWSKI

Senate Bill 150: Military Training Credit
Sponsor Statement

Senate Bill 150 will help eliminate the red tape veterans face when they leave the service and seek employment or education in a field where they have been working for years. This bill directs state boards to accept relevant military education, training, and service as equivalent to some or all of the qualifications required while applying for a license or certificate. In addition, it authorizes the issuance of a temporary license or certificate for active duty service members who had an equivalent license or certificate issued in another state.

The United States Department of Defense has designated this effort as a top priority across the nation. According to their data, as of June 2011, one million veterans were unemployed and the jobless rate for post-9/11 veterans was 13.3%, with young male veterans experiencing an unemployment rate of 21.9%. Data also indicates that last year, 1,286 military members separated or retired and called Alaska home. This legislation will help those veterans find employment quicker to support their families.

When recruiting, the military highlights its educational advantages, promising young men and women that service will give them an advantage toward a college degree and a better career. However, many veterans who attend college after tours of duty are denied credit for military courses and specialized skills, forcing them to waste time taking classes on subjects they have already mastered.

Senate Bill 150 also directs the University of Alaska and Alaska Commission on Postsecondary Education to implement policies and procedures to accept relevant military experience as credit toward a degree or technical program.

SENATOR BILL WIELECHOWSKI

Senate Bill 150: Military Training Credit

SUBJECT: Separating Service members are frequently delayed or denied getting post-Service employment and education credit even though they have applicable military education, training and experience which can qualify them for licenses and/or provide academic credit towards degree requirements.

MESSAGE: Separating Service members leave the military with documented training and experience that can prepare them for civilian employment; however, this documentation is not always used by state entities to qualify them for licenses required for their occupation or to provide them academic credit. Reported unemployment rates of separating Service members that are higher than national averages have brought attention to supporting issues such as expedited licensure and increased academic credit recognition to alleviate this problem.

BACKGROUND: As of June 2011, one million Veterans were unemployed and the jobless rate for post-9/11 veterans was 13.3%, with young male Veterans experiencing an unemployment rate of 21.9%.

SENATE BILL 150:

- Requires the Department of Commerce and Boards to accept relevant military education, training, and service as equivalent to some or all of the qualifications required while applying for a license or certificate.

- Authorizes the issuance of a temporary license or certificate for active duty service members who had an equivalent license or certificate issued by another state.

- Requires the President of the University of Alaska and Alaska Commission on Postsecondary Education to implement a policy and procedure for the acceptance of military education, training and service credit as academic credit toward a degree or technical program offered in the University.

SENATE BILL NO. 150

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY SENATOR WIELECHOWSKI

Introduced: 1/13/12
Referred: Prefiled

A BILL

FOR AN ACT ENTITLED

"An Act relating to applying military education, training, and service credit to occupational licensing and certain postsecondary education and employment training requirements; and providing for a temporary occupational license for qualified military service members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 08.01 is amended by adding a new section to read:

Sec. 08.01.064. Military education, training, and service credit; temporary license. (a) Notwithstanding another provision of law, the department or applicable board shall accept relevant military education, training, and service as equivalent to some or all of the qualifications otherwise required of an applicant for a license or certificate issued under this chapter if the applicant provides satisfactory evidence of successful completion of the education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

(b) Notwithstanding another provision of law, the department or applicable board shall issue a license or certificate to a person who

(1) applies to the department or relevant board in a manner prescribed by the department or board;

(2) meets the requirements in AS 08.01.063(a)(3) - (6); and

(3) while on active duty in the armed forces of the United States or any state, as described in (a) of this section,

(A) held a current license or certificate in another state, district, or territory of the United States and has practiced in the area of the license; or

(B) met standards for an equivalent license or a certificate of technical training established by a branch of the armed forces of the United States or any state, as described in (a) of this section.

(c) The department or applicable board shall expedite the procedure for issuance of a license under (b) of this section.

(d) A license issued under (b) of this section is valid for 180 days and may be extended at the discretion of the department or applicable board for one additional 180-day period if the license holder applies for an extension on a form approved by the department or applicable board.

(e) The department or applicable board may adopt regulations necessary to implement this section.

* **Sec. 2.** AS 14.40.210 is amended by adding a new subsection to read:

(c) The president of the University of Alaska shall implement a policy and procedure for the acceptance of academic credit toward a degree or technical program offered by the university if an applicant provides satisfactory evidence of successful completion of relevant military education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

* **Sec. 3.** AS 14.48.060 is amended by adding a new subsection to read:

(d) In addition to the minimum standards established under (b) of this section, the commission shall develop and implement policies and procedures that require a postsecondary educational institution to provide credit toward a degree or program for

a person enrolled in the postsecondary educational institution if the person provides satisfactory evidence of successful completion of relevant military education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

* **Sec. 4.** AS 23.15.820(a) is amended to read:

(a) The Alaska Workforce Investment Board shall

(1) administer the Alaska technical and vocational education program established in AS 23.15.820 - 23.15.850;

(2) facilitate the development of a statewide policy for a coordinated and effective technical and vocational education training system in this state and, to the extent authorized by federal and state law, plan and coordinate federal, state, and local efforts in technical and vocational education programs;

(3) adopt regulations under AS 44.62 (Administrative Procedure Act) to carry out the purposes of AS 23.15.820 - 23.15.850, including regulations that set standards for the percentage of a grant that may be used for administrative costs; the regulations must clearly identify and distinguish between expenses that may be included in administrative costs and those that may not be included in administrative costs; the percentage allowed for administrative costs may not exceed the lesser of five percent or the amount permitted under the requirements of a federal program, if applicable;

(4) administer the grant program under AS 23.15.840 and establish grant administration requirements including accounting procedures that apply to qualified entities and their grantees;

(5) facilitate the development and implementation of a statewide policy and procedure that provides for the acceptance of credit toward a degree or technical program offered by a vocational or technical training center in the state for an applicant who provides satisfactory evidence of successful completion of relevant military education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

*** Sec. 3.** AS 14.48.060(b) is amended to read:

(b) A postsecondary educational institution must be maintained and operated,

or, in the case of a new institution must demonstrate that it can be maintained and operated so that

(1) the quality and content of each course or program of instruction, training, or study are such as may reasonably and adequately achieve the stated objective for which the course or program is offered;

(2) the institution has or has access to adequate space, equipment, instructional materials, and personnel where applicable to achieve the stated objective of the course or program of study and to provide education of good quality;

(3) the education or experience qualifications of directors, administrators, supervisors, and instructors are such as may reasonably ensure that the students will receive education consistent with the objectives of the course or program of study;

(4) the institution provides a catalog or brochure containing information describing the programs offered, program objectives, length of program, schedule of tuition, fees, and all other charges and expenses necessary for completion of the course of study, cancellation and refund policies, and other material facts concerning the institution and the program or course of instruction that are reasonably likely to affect the decision of the student to enroll, together with any other disclosures specified by the commission by regulation; and that this information is provided to prospective students before enrollment;

(5) upon satisfactory completion of training, the student is given appropriate educational credentials by the institution, indicating that the course of instruction or study has been satisfactorily completed by the student;

(6) adequate records are maintained by the institution to show attendance, progress, or grades, and that satisfactory standards are enforced relating to attendance, progress, and performance;

(7) the institution is maintained and operated in compliance with all pertinent ordinances and laws relating to the safety and health of persons upon the premises of the institution;

(8) the institution is financially sound and capable of fulfilling its commitments to students;

(9) neither the institution nor its agents engage in advertising, sales, collection, credit, or other practices which are false, deceptive, misleading, or unfair;

(10) the chief executive officer, trustees, directors, owners, administrators, supervisors, staff, and instructors of the institution are of good reputation and character and have not been convicted of a violation of AS 14.48.020 or 14.48.150 or AS 45.50.471 - 45.50.561 or a comparable law in another state or province;

(11) the student housing owned, maintained, or approved by the institution is appropriate, safe, and adequate;

(12) the institution has a fair and equitable cancellation and refund policy; [AND]

(13) the charges set by the institution for tuition, fees, books, and supplies are fair and equitable**; and**

(14) the institution accepts military education, training, or service credit or hours toward a degree or technical program offered by the institution if

(A) the institution otherwise accepts transfer credits or hours; and

(B) the credit or hours transfer process meets the requirements of the accrediting body of the institution or the commission.

*** Sec. 4.** AS 23.15.820(a) is amended to read:

(a) The Alaska Workforce Investment Board shall

(1) administer the Alaska technical and vocational education program established in AS 23.15.820 - 23.15.850;

(2) facilitate the development of a statewide policy for a coordinated and effective technical and vocational education training system in this state and, to the extent authorized by federal and state law, plan and coordinate federal, state, and local efforts in technical and vocational education programs;

(3) adopt regulations under AS 44.62 (Administrative Procedure Act) to carry out the purposes of AS 23.15.820 - 23.15.850, including regulations that set standards for the percentage of a grant that may be used for administrative costs; the regulations must clearly identify and distinguish between expenses that may be

included in administrative costs and those that may not be included in administrative costs; the percentage allowed for administrative costs may not exceed the lesser of five percent or the amount permitted under the requirements of a federal program, if applicable;

(4) administer the grant program under AS 23.15.840 and establish grant administration requirements including accounting procedures that apply to qualified entities and their grantees**;**

(5) facilitate the development and implementation of a statewide policy and procedure that provides for the acceptance of credit or hours toward a degree or technical program offered by a vocational or technical training center in the state for an applicant who provides satisfactory evidence of successful completion of relevant military education, training, or service as a member of the armed forces of the United States, the United States Reserves, the National Guard of any state, the Military Reserves of any state, or the Naval Militia of any state.

SENATOR BILL WIELECHOWSKI

MEMORANDUM

DATE: January 20, 2012

TO: Senate State Affairs Committee

FROM: Senator Bill Wielechowski

SUBJECT: Changes from SB150 to CS SB150

The following are changes made in the Committee Substitute for Senate Bill 150:

- Page 2, line 10 – 14: by request of the Department of Defense language was included to add the word "diploma or certificate" which properly references the training and education documents provided to service members after the completion of their education and training programs.

- Page 2 and 3, section 3 – by request of the Commission on Postsecondary Education, moved section three to amend AS 14.48.060(b): minimum standards in establishing the criteria required by the commission, rather than creating a new section (d).

MEMORANDUM January 18, 2012

SUBJECT: Revised sectional summary for SB 150
(Work Order No. 27-LS1117\B)

TO: Senator Bill Wielechowski
Attn: Kendra Kloster

FROM: Jean M. Mischel
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Requires the Department of Commerce, Community, and Economic Development and AS 08.01 Boards to accept relevant military education, training, and service credit toward the qualifications required for an occupational license or certificate issued under AS 08.01. Authorizes the issuance of a temporary license or certificate for active duty service members who had an equivalent license or certificate issued by another state or who met military standards for an equivalent license or certificate.

Section 2. Requires the President of the University of Alaska to implement a policy and procedure for the acceptance of military education, training, and service credit as academic credit toward a degree or technical program offered by the University.

Section 3. Requires the Alaska Commission on Postsecondary Education to develop and implement policies and procedures that require a postsecondary education institution to provide military education, training, and service credit toward a degree or program offered by the institution.

Section 4. Requires the Alaska Workforce Investment Board to facilitate the development and implementation of a statewide policy and procedure that provides for the acceptance of military education, training, and service credit toward a degree or program offered by a technical training center in the state.

Chapter 904 - Anchorage, Alaska
"An Agenda of Service"

January 19, 2012

Senator Bill Weilechowski
Chairman
Senate State Affairs Committee

Senator:

As you and other members of the state legislature heard during your very successful town hall meeting this winter, many members of the service, upon separation and becoming veterans basically loose any consideration for the value of the training they have received in service and the work they have done in a number of vocations for years in the most challenging of environments – combat.

This just doesn't make much sense. We must find a way for the state through its licensing programs and/or for the University of Alaska to recognize the value of both these veterans' training and service.

Your bill, SB 150 should jump start this process, and hundreds of veterans in Alaska will thank you for this. But let me also point out that 48 other State Council Presidents of VVA have been sent this bill and based on questions to me while in DC last week, there is a great deal of interest in this idea.

This is NOT to suggest that our new veterans may not need additional training to meet licensing or other civilian standards for such. But it is to strongly suggest that this experience and training should be seriously considered by the state et al.

It is critical in this time of military downsizing and international redeployments, that we make every effort in Alaska, with the highest per capita number of veterans, to welcome, enable and embrace these men and women who have walked in hell for us.

It is an honor,

Ric Davidge
President, VVA 904

SPONSOR STATEMENT

SB 178 – Alaska Operating Endowment Fund
"A Plan for Funding the Future"

Recently, the credit rating agency Standard & Poor's upgraded the State of Alaska's bond rating to AAA, the highest credit rating in state history. This is a result of prudent financial management of state finances. The Legislature has taken the lead on this issue by instituting strong fiscal practices and placing upwards of $16 billion in savings.

While high oil prices have provided the state a healthy budget surplus, it's important to ensure Alaska's finances stay strong by enhancing state savings, avoiding wasteful spending, and providing the public works infrastructure that will help grow our economy. At the same time, the Legislature needs to seriously consider options for creating a fiscal framework that will protect our substantial savings from irresponsible spending in the future.

SB 178 will create the Alaska Operating Endowment Fund as a depository for the state's savings in order to generate revenue for the benefit of future generations of Alaskans. It is the intent of the Senate Finance Committee that approximately $15 billion will be used to capitalize the Fund. This number was calculated by combining the current balance of the Constitutional Budget Reserve Fund, the Constitutional Budget Reserve Fund – Special Subaccount, the Statutory Budget Reserve Fund and the estimated FY12 revenue surplus.

Once the Fund has been capitalized, the Department of Revenue shall manage and invest the fund subject to the same investment criteria established for the Alaska Permanent Fund Corporation. At the end of each fiscal year, the Department of Revenue will determine the average market value of the Fund for the preceding three fiscal years. Once that is determined, an amount not to exceed four and one half percent may be available for General Fund appropriations by the Legislature. This will provide a steady stream of funding for the state far into the future that is not subject to the volatility of oil prices. It will also aim to protect the Legislature from overspending in years of surplus revenue and provide a cushion for years when the state is facing deficits.

If you assume the same asset allocation utilized by the Alaska Permanent Fund Corporation and their projected annual rate of return of 7.5%, in FY16 the Fund would generate $781 million in revenue. By FY23 there would be a little over $1 billion available for General Fund appropriations with an end of year balance of $23.9 billion in the Fund.

Sponsor(s): SENATE FINANCE COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to the Alaska operating endowment fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 37.14 is amended by adding new sections to read:

Article 10. Alaska Operating Endowment Fund.

Sec. 37.14.850. Alaska operating endowment fund established. (a) The Alaska operating endowment fund is established as a separate endowment fund of the state. Appropriations may be made to the Alaska operating endowment fund.

(b) Money in the fund does not lapse under AS 37.25.010. Nothing in this section exempts money transferred to the fund from the requirements of AS 37.07 (Executive Budget Act).

Sec. 37.14.860. Fund management. The Alaska operating endowment fund shall be managed and invested by the Department of Revenue, subject to the same powers and duties established for the Alaska Permanent Fund Corporation in

AS 37.13.120 and the regulations adopted by the Board of Trustees of the Alaska Permanent Fund Corporation. The department shall retain income in the fund. The department shall, not less frequently than annually, prepare, publish, and distribute a financial report showing fund investment revenue and expenditures.

Sec. 37.14.870. Use of the fund. (a) As soon as practicable after June 30 of each fiscal year, the Department of Revenue shall determine the average month-end market value of the Alaska operating endowment fund for the immediately preceding three fiscal years. The department shall identify four percent of that amount as available for appropriation by the legislature for the purpose described in (b) of this section.

(b) Each fiscal year, the legislature may appropriate the amount identified under (a) of this section from the Alaska operating endowment fund for any public purpose.

Sec. 37.14.880. No dedicated fund. Nothing in AS 37.14.850 - 37.14.870 creates a dedicated fund or dedicates state revenue.

*** Sec. 2.** This Act takes effect July 1, 2012.

Division: Treasury Division — Date/Time: 2/21/12 12:00 AM
Approved by: Angela Rodell, Deputy Commissioner — Date: 2/21/2012

(Revised 8/17/2011 OMB)

Analysis

The bill provides for the Alaska Operating Endowment Fund to be managed by the Commissioner of Revenue. This fiscal note assumes a fund balance of $15 billion in order to estimate costs. It is anticipated that the balance of $15 billion in the fund will be achieved by moving $5.3 billion in investments from the Constitutional Budget Reserve Main Fund, $5.1 billion in investments from the CBRF Sub Account Fund, $2.6 billion in investments from the Statutory Budget Reserve Fund and an estimated $2 billion in FY2012 revenue surplus. The operating expenditures include the costs associated with investment management fees, audit, accounting and custody fees and other costs incurred by Treasury to manage the funds based on the fund moving towards an asset allocation of 41% fixed income, 27% domestic equity, and 32% international equity. It is anticipated that the investments moved from other funds will be transitioned to the new asset allocation in such a manner, as to minimize losses.

Note that this fiscal note includes all costs associated with managing this fund which is assumed to be sourced from the fund itself. However, the incremental budget request by Treasury would only be for the additional services needed to manage the new fund. Personal services costs would not be a budget increase request as it relates to finite internal costs that are spread amongst all funds managed by Treasury.

MEMORANDUM February 24, 2012

SUBJECT: Dedicated funds (SB 178, Work Order No. 27-LS1255\A)

TO: Senator Bert Stedman
Attn: Darwin Peterson

FROM: Lisa Moritz Kirsch
Legislative Counsel

You have asked whether SB 178 creates a dedicated fund in violation of article IX, sec. 7 of the Constitution of the State of Alaska. I believe it does not because the money in the proposed endowment fund would be subject to appropriation by the legislature for any public purpose.

State funds may be appropriated into and out of the fund.[1] New subsection AS 37.14.870(b) provides:

> (b) Each fiscal year, the legislature may appropriate the amount identified under (a) of this section, ***or any other amount***, from the Alaska operating endowment fund ***for any public purpose***. (emphasis added)

Therefore the use of the fund is not limited to any specific purpose, and the amount the legislature may appropriate is not limited. The Department of Revenue will calculate an amount it determines "available for appropriation" under AS 37.14.870(a), but under the subsection quoted above the legislature is free to appropriate that amount or some other amount.

The Alaska Supreme Court has held that similar language creating the Alaska marine highway system fund (AS 19.65.060) did not create a dedicated fund. According to the court, "the expectations created by the act are merely a 'talking point' because they impose no legal restraint on the appropriation power of the legislature."[2] Here the act explicitly states that the legislature may appropriate money in the fund for any public purpose. Please let me know if you have additional questions.

SB178-- Alaska Operating Endowment Fund

Sample--$15 billion initial appropriation to the endowment in FY13

		7.50%	4.50%	
	BoY Balance	Earnings	Payout	EoY Balance
FY13	15,000	1,125		16,125
FY14	16,125	1,209		17,334
FY15	17,334	1,300		18,634
FY16	18,634	1,398	781	19,251
FY17	19,251	1,444	828	19,866
FY18	19,866	1,490	866	20,490
FY19	20,490	1,537	894	21,132
FY20	21,132	1,585	922	21,795
FY21	21,795	1,635	951	22,478
FY22	22,478	1,686	981	23,183
FY23	23,183	1,739	1,012	23,910

Notes:

1) Assumes payout begins in FY16.

2) Appropriating money from the CBRF to the endowment leaves a liability to repay the CBRF.

3) Earnings on the CBRF remain in the CBRF; they are currently available for use only with a supermajority vote.

4) Earnings on other funds are currently available for appropriation as UGF.

5) Future returns are based on 2011 Callan capital market assumptions and median expected returns. Actual results will vary.

Anchorage CPI used for Alaska

The Anchorage CPI is probably the most important cost-of-living index in Alaska. Anchorage is the only community in the state where the U.S. Department of Labor's Bureau of Labor Statistics produces such an index, and it is often treated as the de facto statewide inflation measure.

Anchorage is one of 27 urban areas in the country where the BLS tracks changes in consumer prices, and among cities with their own CPIs, Anchorage is the smallest. For the nation and some of the largest metro areas, the index is produced monthly. Others come out every other month, and for the rest — like Anchorage — it's twice yearly.

In most cases, price changes in Anchorage do not differ radically from Alaska's other urban areas, so the Anchorage CPI is probably a decent proxy. However, in the smaller and more remote communities — particularly those off the road system — spending habits may differ greatly from Anchorage. Despite this shortcoming, no good substitute exists.

CPI shows what we buy

The U.S. Department of Labor goes to great lengths and expense to produce the consumer price index. Intermittently, BLS conducts elaborate surveys of consumers' spending habits to examine the market basket of goods and their location-specific weights. The

Long Term U.S. Inflation

Updated July 2006

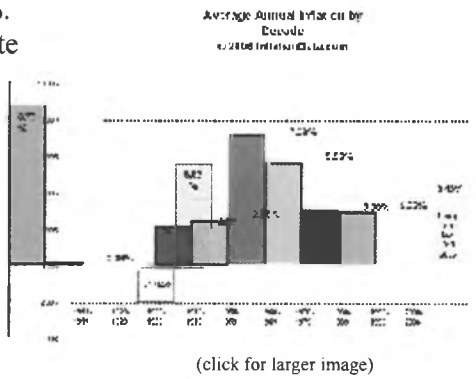
Today's 50 Top Trending Stocks

1,929% Inflation!

The Chart to the right shows the Annual Inflation Rates for each decade. Each bar represents the average Annual Inflation for the decade (not the total cumulative inflation for that 10 year period).

The final Yellow bar shows the average annual inflation rate since the government began tracking it in 1913.

As we can see the Average annual inflation rate is 3.43%. That doesn't sound too bad until we realize that at that rate prices will double every 20 years.



(click for larger image)

That means that every two bars on average prices have doubled or about 5 doublings since they began keeping records.

Five Doublings sounds like prices increased by 10 times right? But it gets even worse than that! Because it isn't just a arithmetic doubling it is compounded. So just as compound interest can multiply your savings, compound inflation can multiply the effects of inflation. As you can see from the cumulative Inflation chart since 1913 we have seen 1929% inflation.

Senator Bettye Davis

Date: January 31, 2012

To: Senator Bill Wielechowski
Chair, State Affairs

From: Senator Bettye Davis

RE: **Request for SB 179 "Missing Vulnerable Adult Response Plan" to be heard in the State Affairs Committee**

Senator Wielechowski,

You currently have in your possession SB 179 – **"An Act relating to missing vulnerable adult prompt response and notification plans."** I am requesting that SB 179 be heard in the State Affairs Committee as soon as possible and have included the bill packet.

SB 179 creates a new statewide alert system to help find vulnerable missing adults. The system, which is similar to the nationwide Amber Alert program, would help local law enforcement notify the public when a mentally or physically impaired Alaskan goes missing. This program is of immediate importance because of the urgency of the issue that it seeks to address. The tragic incident in December of 2011 when a 63-year-old woman in Fairbanks who suffered from Alzheimer's Disease froze to death after becoming disoriented while driving and running out of gas, provides an indication of the immediacy of the issue. With Alaska's increasing senior population and the corresponding growth in the number of Alaskans suffering from Alzheimer's Disease and related dementia, such incidents as the tragedy in Fairbanks can be expected to occur more frequently. Furthermore, the dangers posed by the elements and the potential for wandering into isolated areas that are particular to Alaska create an even greater urgency for an alert system to be implemented. Such a system, which would be operated by the Department of Military Affairs and the Department of Public Safety, is a necessary tool in the protection of Alaska's citizens.

Thanks in advance for your consideration. If you have any questions, please contact Celeste Hodge at (907)-465-4906.

SPONSOR STATEMENT

SENATE BILL 179-*"MISSING VULNERABLE ADULT RESPONSE PLAN"*

SB179 creates a new statewide alert system to help find vulnerable missing adults. The system, which is similar to the nationwide Amber Alert program, would help local law enforcement notify the public when a mentally or physically impaired Alaskan goes missing.

According to the Alaska Commission on Aging, there were approximately 7,785 Alaskans suffering from Alzheimer's Disease and related dementia in 2010, and that number is expected to grow to more than 17,000 by 2030. Alaska has the fastest growing senior population in the nation and we can't afford to ignore this problem any longer.

Recently, in Fairbanks, a 63-year-old woman suffering from Alzheimer's Disease froze to death after she became disoriented while driving, ran out of gas, and tried walking several miles to seek help. This incident and several others like it demonstrate the need for an alert system to assist in the search for missing vulnerable adults. When a vulnerable adult goes missing, his or her best chance of survival is if someone finds them within 24 to 48 hours.

The bill calls for the Department of Military Affairs to coordinate with Department of Public Safety to create and implement prompt response and notification plans that would use a voluntary network of statewide and local newspapers as well as radio and television stations to rapidly alert the public that a vulnerable adult is missing. The bill also calls for both departments to establish standards on what triggers an alert and when a vulnerable adult is officially considered missing. This legislation would ensure the search for Alaska's most vulnerable citizens happens a lot faster.

Currently, there are 28 states that have implemented or will implement Silver Alert programs, an increase of 10 states since the National Association of States United for Aging and Disabilities (NASUAD's) last report.

Session: (January – April)
State Capitol, Room #30, Juneau, AK 99801-1182 Phone: (907) 465-3822 · Fax: (907) 465-3756 · Toll Free: (800) 770-3822

716 West 4th Avenue, Anchorage, AK 99501-2133 · Phone: (907) 269-0144 · Fax: (907) 269-0148

A **Silver Alert** is a public notification system in the United States to broadcast information about missing persons - especially seniors with Alzheimer's Disease, dementia or other mental disabilities - in order to aid in their return.

Silver Alerts use a wide array of media outlets—such as commercial radio stations, television stations, and cable TV—to broadcast information about missing persons. Silver Alerts also use variable-message signs on roadways to alert motorists to be on the lookout for missing seniors. In cases in which a missing person is believed to have gone missing on foot, Silver Alerts have used Reverse 911 or other emergency notification systems to notify nearby residents of the neighborhood surrounding the missing person's last known location.

Supporters of Silver Alert point to America's growing elderly population as a reason to support new programs to locate missing seniors. Approximately 6 in 10 dementia victims will wander at least once, health care statistics show, and the numbers are growing worldwide, fueled primarily by Alzheimer's disease.[1] If not found within 24 hours, up to half of wandering seniors with dementia suffer serious injury or death.[2]

History

In December 2005, Oklahoma state Representative Fred Perry (R-Tulsa) announced his intention to introduce an "AMBER Alert for seniors," which he dubbed "Silver Alert."[3] In March 2006, the Oklahoma House of Representatives passed H.R. 1075, a resolution calling for a Silver Alert system to find missing seniors.[4] In response to this non-binding resolution, the Oklahoma Department of Public Safety added Silver Alert notifications to the statewide alerts sent to law enforcement agencies and the media for rapid distribution.[5] In April 2009, Governor Brad Henry signed legislation permanently establishing the Silver Alert program.[6]

In Georgia, public efforts to locate missing seniors increased following the April 2004 disappearance of Mattie Moore, a 68-year-old Atlanta resident suffering from Alzheimer's disease. Eight months after Moore's disappearance, her body was found 500 yards from her home.[7] The City of Atlanta created "Mattie's Call" to coordinate and support Metro Atlanta law enforcement, emergency management and broadcasters to issue an urgent bulletin in missing persons cases involving persons with Alzheimer's disease, dementia and other mental disabilities.[8] Legislation to create a statewide Mattie's Call program was enacted in April 2006.[9]

In Florida, Mary Zelter, an 86-year-old resident of Largo, drove away from her assisted living facility on Feb. 26, 2008 and never returned. Her body was found a week later 10 miles (16 km) away in the Intracoastal Waterway near a Clearwater boat ramp. Her submerged car was nearby. This tragedy prompted Pinellas County officials to create a Silver Alert pilot program that later grew into a statewide initiative.[10]

[edit] National growth

29 states and New York City[11] have Silver Alert or similar programs targeting missing seniors. More than 195 million people live in jurisdictions served by Silver Alert or a similar program.

20 states have missing senior recovery programs that are formally called "Silver Alert":

- Arkansas[12]
- Connecticut[13]
- Florida[14]
- Illinois[15]
- Indiana[16]
- Kansas[17]
- Louisiana[18]
- Maine[19]
- Maryland[20]
- Massachusetts[21]
- Mississippi[22]
- Nevada[23]
- New Jersey[24]
- North Carolina[25]
- Oklahoma[26]
- Rhode Island[27]
- South Carolina[28]
- Tennessee[29]
- Texas[30]
- West Virginia[31]

Additionally, 9 states have programs to help locate missing seniors that are not officially called "Silver Alert" but contain criteria similar to existing Silver Alert programs:

- Alabama, Missing Senior Alert[32]
- Delaware, Gold Alert[33]
- Colorado, Missing Senior Citizen Alert[34]
- Georgia, Mattie's Call[35]
- Kentucky, Golden Alert[36]
- New Hampshire, Missing Senior Citizen Alert[37]
- New York, Golden Alert[38]
- Ohio, Missing Adult Alert[39]
- Virginia, Senior Alert[40]

alzheimer's association

8 February 2012

Senator Bill Wielechowski
Chairman, Senate State Affairs Committee
State Capitol Room 101
Juneau AK, 99801

Dear Senator Wielechowski:

On behalf of the Alzheimer's Association, I am pleased to extend our support for Senate Bill 179, sponsored by Senator Bettye Davis, which would address the need for a prompt response system when a vulnerable adult has gone missing. The Association supports creating a system that provides for dissemination of relevant information about missing individuals with Alzheimer's disease or a related dementia to appropriate law enforcement personnel.

An estimated six out of ten people with Alzheimer's disease will wander from their homes or caregiving facilities at some point during the disease process. Most people with dementia who wander are found within 1.5 miles of home, and 50 percent of individuals who wander risk serious injury or death if not found within the first 24 hours. Environmental dangers pose serious threats to people with Alzheimer's who are particularly vulnerable to succumb to natural elements such as weather, and who may lose their ability to remember when to eat or drink. An immediate response with emphasis on local searching is imperative once an individual with dementia is reported missing.

The Alzheimer's Association supports a comprehensive approach to constructing a notification, or "silver alert", system that addresses the needs of persons with dementia and their families. This approach includes first responder dementia training and coordinating search efforts between families, caregivers and local authorities. The system should be interoperable with existing programs, such as the MedicAlert and Safe Return program, which is a nationwide identification, support and enrollment program providing assistance to adult wanders and their families.

I appreciate the opportunity to comment on this issue and applaud Senator Davis for spearheading this effort.

With best regards,

Randi Chapman
Director, State Affairs
Alzheimer's Association

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB179

Analysis

This bill amends AS 44.41 by adding a new section requiring the Department of Public Safety, in cooperation with the Department of Military and Veterans' Affairs, to develop and implement missing vulnerable adult response and notification plans using statewide and local radio and television broadcasters and newspaper publishers.

It is not anticipated that compliance with this legislation will have a fiscal impact on the Division of Alaska State Troopers.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB179

Analysis

This bill amends AS 44.41 by adding a new section requiring the Department of Public Safety (DPS), in cooperation with the Department of Military and Veterans' Affairs (DMVA), to develop and implement missing vulnerable adult response and notification plans using statewide and local radio and television broadcasters and newspaper publishers.

It is expected that DPS will implement the notification using DMVA's modernized emergency alert system, EMnet. This system is new and it is anticipated that it includes all the capabilities necessary to implement the missing vulnerable adult notification on a statewide or regional basis. Therefore, a zero fiscal note is being submitted.

Celeste Hodge

Subject: FW: 27-LS1250\A - An Act relating to missing vulnerable adult prompt response and notification plans
Attachments: Silver Alert Updated Report_11-9-10.pdf

Celeste,

Per your request, and after review of the draft legislation, I am providing the following response from our Emergency Operations Section:

A portion of the Alaska Amber Alert Plan involves the local law enforcement agency and the Alaska State Troopers providing additional "emergency public information" to broadcast outlets to assist with the recovery effort. Most Sliver Alert plans revolve around that. Not using EAS, but notifying and providing information on the missing person, vehicle, etc, and the broadcast outlets voluntarily providing that information to their viewers/listeners. In many cases State DOTs or those who control highway signs would also post the information to the public, as well as the investigating law enforcement agency providing a BOLO alert in the state APSIN/NCIC systems.

Attached is a seven page report from the 2010 summary of States performed by the National Association of States United for Aging and Disabilities. The report is a summary of states that have plans, and the enabling legislation behind it. It doesn't speak to operational aspects.

From an EAS standpoint there is no event code that is designated for missing persons (adults), so we couldn't utilize EAS like we do for Amber alerts, which uses the special "Child Abduction Emergency" code.

We certainly could work with DPS on this plan, the same players from AST, DHS&EM, APD, and the Alaska Broadcasters Association could work out the plans that would be required by the bill/law.

So, to be clear, we have no issues on the draft legislation.

Please do not hesitate to contact me should you have any questions. Thank you.

Sincerely,

Mike O'Hare

SILVER ALERT INITIATIVES IN THE STATES

11/9/2010

Protecting Seniors with Cognitive Impairments

Silver Alert Initiatives in the States

PROTECTING SENIORS WITH COGNITIVE IMPAIRMENTS

INTRODUCTION

In March 2009, NASUAD released a report that identified states that have a Silver Alert program, how they fund it, and how each administers the program. The report revealed that 18 states have a Silver Alert program, 14 states had pending legislation, and 18 states did not have legislation.

Several states have implemented Silver Alert programs since our last report. The following chart reflects the updated status of states across the country.

States with Silver Alert Programs		States with Pending Legislation	States Without Silver Alert Programs
Alabama *	Mississippi *	California	Alaska
Arizona	Missouri	Hawaii	Idaho
Arkansas **	New Hampshire	Massachusetts	Illinois
Colorado	New Jersey *	Pennsylvania	Iowa
Connecticut *	New Mexico		Maine
Delaware	North Carolina		Michigan
Florida	Oklahoma		Montana
Georgia	Ohio		Nebraska
Indiana *	Rhode Island		Nevada
Kansas *	South Carolina		New York
Kentucky	Tennessee *		North Dakota
Louisiana	Texas		Oregon
Maryland *	Virginia		South Dakota
Minnesota	West Virginia *		Utah
			Vermont
			Washington
			Wisconsin ***
			Wyoming

* State has legislation that went into effect since NASUAD's 2009 Report.
** Arkansas has a Memorandum of Understanding that establishes the Silver Alert Program.
*** Wisconsin governor vetoed legislation for a lack of funding.

States with Silver Alert Programs

Currently, there are 28 states that have implemented or will implement Silver Alert programs, an increase of 10 states since the NASUAD's last report. The following section provides a brief summary of the legislation that establishes the programs, the agencies administering the programs, and the program requirements for initiating an alert. The links below will provide you with further information on each state's Silver Alert program.

Alabama

The Alabama Missing Senior Citizen Alert Act (HB 33) went into effect on June 1, 2009. The purpose of this law is to provide immediate response to missing or lost seniors age 60 or older who are at risk of bodily harm or death and to gain the voluntary assistance of the broadcast media to help locate missing seniors. The Department of Public Safety, who administers this program, works collaboratively with other local and state law enforcement agencies, the Alabama Association of Broadcasters and licensed broadcasters in the state.

To view the legislation, please visit the following Web site.

http://www.dps.state.al.us/ABI/pdf/MissingSeniorAct.pdf

Arkansas

House Bill 2087, "An Act to Establish the 'Silver Alert System' for Adults Who Are Living with Dementia or Other Cognitive Impairment," was filed, but it never became law. However, in March 2009, the Arkansas State Police entered into a Memorandum of Understanding with the Arkansas Sheriffs' Association and the Arkansas Association of Chiefs of Police to host an Internet website that provides Arkansas broadcasters and news organizations a means to receive Arkansas Silver Alerts that are shared with the public. Silver Alerts are disseminated for missing persons 18 years of age or older who are living with dementia or other cognitive impairment.

To view the legislation, please visit the following Web site.

http://staging.arkleg.state.ar.us/ftproot/bills/2009/public/HB2087.pdf

Connecticut

Substitute Senate Bill 451 went into effect July 1, 2009 establishing Connecticut's Silver Alert System. The Department of Public Safety's Missing Child Information Clearinghouse administers the program and notifies the public of missing persons 65 years of age or older and anyone 18 or over who has a mental impairment.

To view the legislation, please visit the following Web site.

http://search.cga.state.ct.us/dtSearch_lpa.html

Indiana

Governor Mitch Daniels signed Senate Bill 307 to establish the Indiana Silver Alert, effective July 1, 2009. The Indiana Clearinghouse for Information on Missing Children and Missing Endangered Adults administers the program and works collaboratively with private organizations and law enforcement agencies in alerting the public of missing persons age 18 or older with mental illness, dementia, or other mental or physical incapacity.

To view the legislation, please visit the following Web site.

Kansas

The Kansas Silver Alert Plan was implemented on July 30, 2009 following a resolution that called for the establishment of this senior alert system, but did not require it by law (SHL Resolution 2506). It is administered by the Kansas Bureau of Investigation, which collaborates with local law enforcement agencies and the media to alert the public of missing persons living with dementia or persons over age 65 with a medical or mental condition or one who is at risk of harming himself.

The following Web site provides the protocol and policies for the Silver Alert Plan.

http://www.ksag.org/page/attorney-general-establishes-silver-alert-protocol

Maryland

In October 2009, Maryland established its Silver Alert Program (HB 192) that is designed to alert the public about missing persons with cognitive impairments such as Alzheimer's or dementia. The Department of State Police administers the statewide program and works collaboratively with the State Highway Administration on this initiative.

You can view the bill by going to the following Web site.

http://mlis.state.md.us/2009rs/fnotes/bil_0002/hb0192.pdf

Mississippi

The Mississippi Silver Alert System Act of 2010 (HB 664) went into effect July 1, 2010. The Bureau of Investigation of the Department of Public Safety will be responsible for implementing the statewide alert system. The purpose of the Silver Alert System is to provide a tiered, rapid response system to notify the public about missing endangered adults age 18 or older with dementia or other cognitive impairments. The Bureau of Investigation will work with local law enforcement agencies and the Mississippi Highway Patrol Headquarters Communication Center to alert the public about missing persons.

You can view the bill by going to the following Web site.

http://billstatus.ls.state.ms.us/documents/2010/pdf/HB/0600-0699/HB0664PS.pdf

New Jersey

The Silver Alert System Act went into effect on December 22, 2009. The State Police administers the program and disseminates missing person information on people age 65 or older to broadcast media, the Department of Transportation, the New Jersey Highway Authority, the New Jersey Turnpike Authority, and the South Jersey Transportation Authority.

You can view the bill by going to the following Web sites.

http://www.njlea.state.nj.us/2008/Bills/A3000/2844_I1.HTM

http://www.njlea.state.nj.us/2008/Bills/S2000/1844_I1.HTM

Tennessee

The Tennessee Senior Alert Act went into effect on August 4, 2009. The Tennessee Bureau of Investigation administers the Silver Alert system that provides a statewide system for the rapid dissemination of information on missing persons age 18 or older who have dementia or other cognitive impairment.

You can view the bill by going to the following Web site.

http://www.capitol.tn.gov/Bills/106/Bill/HB0346.pdf

West Virginia

HB 2504 was signed into law by Governor Joe Manchin and went into effect on July 10, 2009 establishing the West Virginia's Silver Alert Plan. The State Police administers the program by providing alerts for cognitively impaired missing persons to broadcast media, the Department of Transportation, the Division of Highways, the West Virginia Turnpike Commission, and affected authorities. HB 2504 does not specify an age requirement of a cognitively impaired missing person.

You can view the bill by going to the following Web site.

http://www.legis.state.wv.us/Bill_Text_HTML/2009_SESSIONS/RS/BILLS/hb2504%20enr%20sub.htm

Pending Legislation

California

On December 22, 2008, Senators Alquist, Correa, and Oropeza introduced SB 38, a bill that would establish a missing senior person alert system. The bill specifies that a missing person would have to be 65 years of age or older and must have an impaired mental condition. As of August 27, 2009, there has been a second reading of the bill and it is currently being held in committee.

You can view the bill and its history by going to the following Web site.

http://www.legislature.ca.gov/cgi-bin/port-postquery?bill_number=sb_38&sess=CUR&house=B&author=alquist

Hawaii

Since January 2009, Hawaii legislators have introduced six bills that would establish a Silver Alert system in their state. However, it appears that SB2226 SD2 HD1 is the only bill that has received considerable action. It was introduced January 21, 2010 and, as of March 12, 2010, it passed the second reading as amended in HD 1 and was referred to the Committee on Judiciary without opposition. The bill specifies that the public alert would be made for missing senior citizens and defines a senior citizens as one who is 65 years of age or older.

You can view the bill and its history by going to the following Web site.

http://www.capitol.hawaii.gov/session2010/bills/SB2226_HD1_.pdf

http://www.capitol.hawaii.gov/session2010/lists/measure_indiv.aspx?billtype=SB&billnumber=2226

Massachusetts

H4344 (new draft of S322, H44, and H603) would establish a Silver Alert community response system to protect seniors. This Silver Alert system would be used to alert the public of missing adults with serious memory impairment such as Alzheimer's disease or other dementia. The last action recorded for this bill was on November 17, 2009 when the Joint Committee on Community Development and Small Business reported favorably on it and referred it to the House Committee on Ways and Means.

You can view the bill and its history by going to the following Web site.

http://www.mass.gov/legis/bills/house/186/ht04pdf/ht04344.pdf

http://www.mass.gov/legis/186history/h04344.htm

Pennsylvania

On March 5, 2009, the General Assembly of Pennsylvania referred HB 726 to Committee on Aging and Older Adult Services. HB 726, which is also referred to as the Silver Alert for Missing Senior Citizens Act, would establish a statewide alert system for notifying the public of missing persons age 65 or older who have an impaired mental condition and whose disappearance poses a credible threat to the senior citizens' health and safety. The Secretary of the Department of Aging is responsible for appointing a director to serve as the statewide coordinator of the alert system.

You can view the bill and its history by going to the following Web site.

http://www.legis.state.pa.us/cfdocs/billinfo/billinfo.cfm?syear=2009&sind=0&body=H&type=B&BN=0726

NASUAD will continue to monitor pending legislations.

Legislation That Did Not Pass

Nevada

According to the Nevada Silver Haired Legislative Forum, AB 4 that would establish a statewide Silver Alert system was referred to the Health and Human Services Committee and died on April 11, 2009 due to no further action being taken on the bill.

Vetoed Legislation

Wisconsin

Unfunded legislation to establish a Silver Alert program was vetoed by Governor Jim Doyle.

Silver Alert

Modeled after the Amber Alert, the Silver Alert is an emergency system in which law enforcement can broadcast regional or statewide alerts for missing seniors and/or other adults with Alzheimer's or other cognitive disorders.

A growing number of states are enacting laws that call for the development of the Silver Alert program and some have implemented their own notification systems.

Activation criteria varies from state to state, see list below for information on the Silver Alert program in your state.

Alabama

Fairbanks woman's death sheds light on harsh reality of living with Alzheimer's disease

by Dorothy Chomicz / dchomicz@newsminer.com
12.03.11 - 12:28 am

FAIRBANKS — When you are caring for a loved one with Alzheimer's, the possibility of that person wandering off is an ever-present worry. In fact, six out of 10 Alzheimer's patients will wander at some point, and many do so repeatedly, according to the Alzheimer's Association website (www.alz.org).

The situation becomes even more serious in places like Alaska, where severe weather conditions can spell death for someone who has wandered outside and is unprepared for the elements.

This danger was brought to reality this week when Bonnie L. Scott, a 63-year-old Fairbanks woman who suffered from Alzheimer's, became confused while driving an acquaintance home in Fairbanks and ended up 80 miles northeast on the Steese Highway.

Scott wandered away from her vehicle after running out of gas, and Alaska State Troopers were able to follow her footprints into the woods, where they found her body. She had died of exposure after walking by a manned Department of Transportation maintenance facility in which she could have found shelter and aid.

Most cases of wandering do not occur in vehicles and are instead instances of the individual simply walking out of the door while a caretaker is distracted or sleeping.

To minimize the risk of wandering, experts suggest making changes around the home, such as camouflaging exit doors by painting them the same color as the wall, and draping door knobs with same-color cloth.

Placing a mirror next to the door can also stop the potential wanderer — they either think there is someone else there, or they become distracted by their own reflection.

Extra door latches can be placed at the tops or bottom of doors, where they will not be noticed, and car keys should be kept hidden. Chimes or alarms can be placed on doors to alert the caregiver.

Since wandering is often caused by restlessness, fear or physical need, make sure that basics such as hunger, thirst and the need to use the toilet are all met regularly.

If it is physically possible, provide the individual with recreational opportunities such as short, supervised walks or get them to help with simple household chores. Reassure them if they feel agitated or fearful, and give them a routine to help them feel secure.

Even though caregivers are often tempted to keep a person's Alzheimer's a secret, it is important that neighbors and family members be told of potential wandering, and be provided with a good contact number. Always keep a current, clear photo of the individual on hand, and consider keeping one on file with your local police department.

Keep as much identification as possible on the person — place it in every coat, purse, pocket or wallet, and think about providing the person with an ID bracelet or necklace.

Since identification is only helpful once the person has been found, consider purchasing an electronic tracking device that can be used to locate them before tragedy occurs. According to the Alzheimer's Foundation of America website, a person with dementia "only stands a 50 percent chance of survival if they are not found within the first 24 hours."

Finally, do not leave the individual alone. Since it is virtually impossible for one person to keep an Alzheimer's sufferer in sight at all times, it is essential that the caregiver establish a support network that can help out and provide a break when needed.

Alzheimer's Resource of Alaska provides services, information and education to Alaskans dealing with Alzheimer's and has five offices statewide. They can be reached at their Fairbanks office at 452-2277, or visited at www.alzalaska.org.

SB 198: A Bill Relating to Police Officer Protections and Certifications
SPONSOR STATEMENT

Police officers in Alaska provide some of the most valuable services to our citizens. Their protection and service allows us to enjoy our communities safely and comfortably. SB 198 acknowledges the value of police officers and proposes changes to statute.

SB 198 requires due process hearings to occur before a police officer has a certificate revoked. Currently, statute allows for revocation of a certificate by the Police Standards Council without a hearing. Revocation of a certificate can mean the end of a career and should be the last resort used to punish those worst offenders. SB 198 also sets a standard for clear and convincing evidence before revocation occurs and allows for suspension before revocation.

SB 198 also adds court officers to the definition of police officers. By doing this, court service officers are recognized for the work they perform. Court officers carry weapons, can arrest people, and serve warrants. Including them in the definition for police officers allows for streamlined training and certification by the Police Standards Council. This change also puts court officers under an already existing framework of liability.

SB 198 provides protection for police officers against retaliation for refusing to take a lie detector test. Evidence in Alaska shows a retaliatory tendency against officers who opt out of taking a lie detector test. Several other states have passed similar protections for public safety officers.

Lastly, SB 198 makes the personal information of police officers confidential. This section provides security and assurance to officers that their safety is a priority. Police officers and their families should not be subject to harassment in or out of their work environment. This section provides guarantee that their employment will not compromise their or their families' safety.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB198

Analysis

This bill establishes procedures relating to the issuance, suspension, and revocation of certification of police officers by the Alaska Police Standards Council (APSC); makes court services officers subject to certification by the APSC; makes confidential certain information that personally identifies a police officer; and prohibits public employers of police officers from requiring police officer applicants or employees to submit to a lie detector test.

The potential fiscal impact to the Department of Public Safety (DPS) relates to the portions of this bill that make binding on the Alaska Police Standards Council (APSC) decisions issued as a result of arbitration, grievance, or administrative hearing proceedings (to include reversal of disciplinary actions) and that preclude APSC from holding revocations hearings prior to a decision being issued in any of these proceedings.

When DPS terminates a trooper, they make a recommendation to the APSC to revoke the trooper's police officer certification. The APSC takes the recommendation under advisement and makes an independent decision whether to revoke the tooper's certification. This process runs independently from any grievance, arbitration, or administrative hearing and serves to limit the liability of the state to pay back wages to the period of time between when the employee was terminated and when the certification was revoked.

The Public Safety Employees Association (PSEA) may file a grievance on behalf of that former trooper. If the case is not settled between PSEA and the State, it will go to arbitration. The arbitrator will determine either that the termination was justified and uphold the state's action or grant the grievance and impose some lesser level of discipline. When the grievance is granted, DPS is ordered to make the former employee whole.

If the APSC is prohibited from revoking a trooper's certification until a final administrative decision is issued (which can take many years), DPS could potentially be required to pay hundreds of thousands of dollars in back wages to cover the period of time from the date of termination until the date of the decision.

Should this bill become law, APSC will be required to amend their regulations dealing with denial and revocation of certificates. Any costs associated with a regulation project could be absorbed within the APSC's existing budget.

The actual fiscal impact to the department cannot be estimated because it is dependent on the number of terminations where the final administrative decision is in the trooper's favor; therefore, an indeterminate fiscal note is being submitted.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB198

Analysis

This bill will have no fiscal impact on the Labor Relations.

Justices Allow Ban on Polygraph Use

By Joan Biskupic
Washington Post Staff Writer
Wednesday, April 1, 1998; Page A01

The Supreme Court ruled yesterday that state and federal governments may ban the use of polygraph evidence in court, declaring that doubts and uncertainties remain about the accuracy of the so-called lie-detector tests.

Close to 30 states, including Maryland and Virginia, ban polygraph evidence, and some legal experts said yesterday's 8 to 1 decision may prompt the states that do not have outright prohibitions on polygraphs to consider imposing them.

The ruling marks the first time the high court has taken up the issue of polygraph testing, and it comes at a time when the machines are increasingly being used outside the courtroom. Prosecutors use them to extract confessions from suspects and defense lawyers use them for leverage in plea bargains. The military uses them to safeguard national security and prevent espionage, and companies often rely on them to uncover employee wrongdoing or to monitor workers in sensitive jobs.

Although the test results can still be used for these purposes, the Supreme Court yesterday said they can be banned from courtrooms, and sent a signal that their accuracy is in doubt.

Advocates of polygraphs say the instruments have grown increasingly sophisticated in recent years in their ability to determine whether a person is lying by recording their breathing, blood pressure and skin conditions.

But several justices expressed skepticism about the science and the ability of any examiner using the polygraph device to accurately gauge whether someone is telling the truth.

"There is simply no consensus that polygraph evidence is reliable," Justice Clarence Thomas wrote for the court.

Because "uncertainties plague even the best polygraph exams," the court found that prohibiting a defendant from introducing the results of a polygraph test, to show he is telling the truth, does not violate his right to fully defend himself.

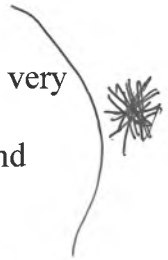
Yesterday's case involved Edward G. Scheffer, a former U.S. airman who was court-martialed for using methamphetamines, passing bad checks and going AWOL. Yet he had passed a polygraph test asking whether he had used illegal drugs. The U.S. Court

of Appeals for the Armed Forces said the military's automatic ban on polygraphs was unconstitutional and that Scheffer had a right to at least try to lay a foundation for the reliability of the polygraph result, as he would other evidence.

But the Supreme Court reversed that decision, ruling that Scheffer was not "significantly impaired" by exclusion of the polygraph evidence.

Although only one justice dissented, the majority spoke with no definitiveness.

Thomas and three other justices sought not only to uphold bans on polygraph evidence, but to discourage states from ever allowing their use in court. "By its very nature, polygraph evidence may diminish the jury's role in making credibility determinations," Thomas said, joined by Chief Justice William H. Rehnquist and Justices Antonin Scalia and David H. Souter.



But the other justices in the majority broke ranks, saying that perhaps in the future another dispute might offer a more compelling case for the introduction of polygraph testimony.

Justice Anthony M. Kennedy wrote in a concurring statement that he agreed with the majority that a defendant does not have a constitutional right to use polygraph evidence, but he doubted that an automatic exclusion of the evidence was "wise." Joined by Justices Sandra Day O'Connor, Ruth Bader Ginsburg and Stephen G. Breyer, Kennedy said some later case may be more compelling to say that defendants have a right to introduce polygraphs.

Justice John Paul Stevens, who was the lone dissenter, emphasized the value of the tests to a defendant and noted that the military gives "hundreds of thousands of such tests and routinely uses their results for a wide variety of official decisions."

Stevens called the government's position inconsistent. While it routinely uses the test and says it is an "effective investigatory tool," the Justice Department said it was not reliable enough to be used in court and, unlike other scientific evidence, could mislead a jury by purporting to show the "truth."

"There will always be critics of the polygraph," said Gordon L. Vaughan, counsel for the American Polygraph Association. "But I think the opinions suggest that there is an ongoing debate about the reliability of the polygraph." Thomas wrote that most states ban polygraph evidence, and Vaughan said that breaks down into 29 states with outright bans, 16 states that allow some test results if both the prosecution and defense agree to it. One state, New Mexico, makes them generally admissible.

LIST OF STATES THAT SUSPEND POLICE CERTIFICATES

1. Arizona - R13-4-109. Denial, Revocation, Suspension, or Cancellation of Peace Officer Certified Status

2. Colorado - Title 24-31-305 2 (a) - Suspension

3. Delaware - Title 1-800-7.1.9 - Suspension

4. Georgia -Title 35-8-7.1 - Suspension

5. Michigan - 28.609b Revocation or suspension of certification; judicial review; jurisdiction; subpoena.

6. Montana - 23.13.702 GROUNDS FOR SANCTION, SUSPENSION, OR REVOCATION OF POST CERTIFICATION

7. Nevada - NAC 289.290 Denial, revocation, suspension and reinstatement of certificate. (NRS 289.510)

8. New Hampshire - Pol 402.02 Revocation or Suspension.

9. New Mexico - 10.29.1.11 GROUNDS FOR DENIAL, REVOCATION OR SUSPENSION OF POLICE OFFICER OR TELECOMMUNICATOR CERTIFICATION; REPORTING REQUIREMENTS

10. Texas - Title 37.7.223.15 - Suspension of License

11. Utah - Title 53-6-211. Suspension or revocation of certification

STATES WITH POLYGRAPH PROTECTION FOR POLICE OFFICERS

Alaska Senate
Chairman Wielechowski
State Affairs Committee

February 24, 2012

Dear Senator Wielechowski,

I am employed as a Court Services Officer (CSO) with the Alaska State Troopers. I wish to take this opportunity to request your support of SB198. The passage of this legislation would require that CSO's be certified by the Alaska Police Standards Council (APSC) and standardize the training which CSO's receive. Passage of this legislation would greatly enhance the professionalism of the officers serving the State of Alaska court system and increase the accountability of individual officer performance.

Sincerely,

Thomas Robson

Alaska Senate
Chairman Wielechowski
State Affairs Committee

February 24, 2012

Dear Senator Wielechowski,

My name is Charles Taylor. I am employed as a Court Services Officer (CSO) with the Department of Public Safety, Division of Alaska State Troopers, and I am stationed in Kenai. I ask you to support SB198 both in Committee and on the Floor in its entirety and specifically, as it applies to CSO's (SB 198; Section 4). Alaska Statutes currently require that peace officers be certified. However, there is currently no requirement that CSO's be certified. This bill will correct the issue consistent with current law.

Additionally, I view SB198 as a simple and inexpensive fix that protects the State and its resources. In my employment I am uniformed and equipped similar to State Troopers. Consequently, citizens often mistake me as an Alaska State Trooper. Unlike Troopers, the approximately 60 Court Services Officers serve without any type of State-recognized certification. Without formal recognition of training and qualifications through certification, the State of Alaska may be open to greater liability arising out of actions performed by CSO's. Thank you.

Sincerely,

Charles Taylor

Phone: (907) 252-7356

4228 Laurel Street, Anchorage, Alaska 99508
Phone (907) 337-1979 FAX (907) 337-1753 E-Mail psea@psea.net

Dear Senator Wielechowski:

On behalf of the Juneau Police Department employees represented by PSEA, I wish to express our support for Senate Bill 198. SB 198 will improve the quality of police officers protecting Alaskans by strengthening due process, elevating standards, and providing more tools at the Alaska Police Standards Council. This legislation improves this regulatory body and by doing so improves the quality of police officers in Alaska.

My thanks go out to you and the Senate State Affairs Committee for introducing this important legislation.

Lee Phelps

Vice President for the Juneau PSEA chapter/Police Officer
Juneau Police Department
6255 Alaway Ave
Juneau, AK 99801
907-500-0648

Dear Senator Wielechowski,

I am writing in support of SB198 and ask you to support this bill both in Committee and on the Floor. As an Alaska State Trooper who works regularly with Court Services Officers (CSO), I am concerned with the fact that CSO's are currently serving without any type of State-recognized (APSC) certification. Requiring certification for this position will provide consistent job requirements and increased avenues for accountability on the job. Thank you.

Sincerely,
Rob Cox
(907) 350-4656

Federal courts are split on whether polygraph results may be introduced. "This ruling could have some tendency to discourage the admission of polygraphs," said Charles W. Daniels of the National Association of Criminal Defense Lawyers.

Charles L. Hobson, of the Criminal Justice Legal Foundation, which sided with the government, said the ruling in United States v. Scheffer properly gives state and federal governments the ability to limit questionable evidence.

Senate District P

Senate Bill 206 Sponsor Statement

"An Act enacting the Interstate Mining Compact and relating to the compact; relating to the Interstate Mining Commission; and providing for an effective date."

This act authorizes the State to join and participate in the Interstate Mining Compact Commission.

Alaska has a unique and important relationship with mining. It was the lure of gold that brought thousands of eager prospectors, and served as the founding purpose for many cities and communities. As the territory and later the State grew, zinc, lead, coal, sand, gravel, and other subsurface products all played roles in this all-important sector. Today, mining is Alaska's second-largest industry, and it continues to thrive.

Alaska's five operating mines – Ft. Knox, Greens Creek, Red Dog, Usibelli, and Pogo – employ more than 2,000 people combined. The mining industry also creates public revenue by paying both state and local taxes. Interest in Alaska's mining potential continues to spur new exploration and investment in the subsurface minerals of the Last Frontier.

The Interstate Mining Compact Commission is a coalition of mining states that join together to represent the environmentally sound resource development interests of its members on a national level. Established in 1971, the IMCC recognizes the basic importance of the mining industry to the nation, and believes that the collective voice of mining states is an important aspect in preserving and advocating for states' rights. IMCC regularly serves as the spokesperson for mining states in Washington D.C., and works to represent the member states efficiently and articulately to executive agencies.

Mining was foundational to Alaska's statehood. It continues to be a major economic driver and will play an important role in the state's future. Joining the IMCC gives Alaska the opportunity to build on our successes, share what works with others, work together to build a better mining industry, and foster a better understanding and constructive relationship with the federal agencies.

I urge your support of SB 206.

Senator_Cathy_Giessel@legis.state.ak.us

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB206

Analysis

This bill would authorize Alaska to join and participate in the Interstate Mining Compact.

This fiscal note has two components, annual membership and travel.

Membership Dues:
Membership in the commission requires annual dues paid by each party state. The amount of dues to be paid by each party state is covered under Article VII of the Compact and Bylaws. There are currently 19 member states, Alaska's addition would bring that total to 20.

Specifically; each party state is required to pay one half of the commission's annual budget, in equal shares. With Alaska as a member, Alaska's portion would be 1/20th of half the annual budget. The other half of the annual budget is also paid by the member states but is paid in proportion to the value of the minerals, ores and other solid matter mined in each member state.

DNR estimates that Alaska's share for dues in the first membership-year will be approximately $40.0. This amount will fluctuate in future years based on the amount of the commission's annual budget and the value of the minerals, ores and other solid matter mined in Alaska annually. This value is based on national valuation reports prepared by federal agencies to insure impartial uniformity assessment of mining data. If the annual dues are significantly higher than $40.0, DNR may request supplemental funding in that year.

Travel costs:
Membership and participation in the Interstate Mining Compact Commission will require two or more trips per year by Commissioner, department staff, and possibly other representives of the Governor's office. The department estimates $20.0 per year for this expense.

SB 206 – Interstate Mining Compact & Commission
Sectional Analysis

Passage of SB 206 would elevate Alaska from associate membership to full membership in the Interstate Mining Compact Commission, allowing the Governor to be an active, voting member.

Section 1: Amends AS 27 by adding:

- Sec. 27.08.010, which contains and enacts into law the Interstate Mining Compact, which includes the following articles:
    - **Article 1:** Findings and Purpose – finds the importance of mining to the state and proposes to support environmentally sound mining,
    - **Article 2:** Definitions – defines "mining" and "state",
    - **Article 3:** State Programs – ensures a member state has adequate mining regulations, which Alaska does,
    - **Article 4:** Powers – specifies the power of the Commission to study, make recommendations, and gather and disseminate information on mining-related issues,
    - **Article 5:** The Commission – creates the Commission,
    - **Article 6:** Allows the Commission to establish Advisory, Technical, and Regional Committees,
    - **Article 7:** Finance – details how the Commission's finances are to be handled,
    - **Article 8:** Entry Into Force and Withdrawal – describes that states must enact the compact to participate and must repeal the act to withdraw,
    - **Article 9:** Effects on Other Laws – maintains that the compact does not limit, repeal, or supersede any state laws,
    - **Article 10:** Construction and Severability – Provides that all phrases, clauses, sentences and provisions are severable;
- Sec. 27.08.020, which provides for an alternate; and
- Sec. 27 27.08.030, which requires the Interstate Mining Compact Commission to file its bylaws and amendments with the Department of Natural Resources.

Section 2: Provides for an immediate effective date.

MEMORANDUM OF UNDERSTANDING

BETWEEN THE

UNITED STATES DEPARTMENT OF LABOR,
MINE SAFETY AND HEALTH ADMINISTRATION

AND THE

INTERSTATE MINING COMPACT COMMISSION

I. Introduction

In this Memorandum of Understanding (MOU or Agreement), the U.S. Department of Labor, Mine Safety and Health Administration (MSHA) agrees with the Interstate Mining Compact Commission (IMCC) to facilitate coordinated and timely communications that promote and protect the mining industry's most precious resource, miners.

As part of the Department of Labor (DOL), MSHA administers the Federal Mine Safety and Health Act of 1977 (Mine Act) as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), Pub. L. 109-236, and regulations to enforce compliance with mandatory safety and health standards as a means to eliminate fatal accidents; to reduce the frequency and severity of nonfatal accidents; to minimize health hazards; and to promote improved safety and health conditions in the Nation's mines. MSHA's first priority is the miner's health and safety.

The IMCC is an organization composed of the Governors of its member states concerning mining regulatory matters. The Commission provides a forum for interstate action and communication on issues concerning mining and related issues. This interstate action stimulates the development and production of each member State's mineral wealth through an effective cooperative regulatory effort that insures the health and safety of our Nation's miners and is protective of human health and the environment. In September of 1996, the Chairman, by way of a resolution adopted by the Commission, established the Mine Safety and Health Committee as an official standing Committee to serve as a liaison between MSHA and IMCC on issues concerning the health and safety of miners. The resolution provided that "[t]he Committee is tasked with responsibility for monitoring issues, policies, regulations and statutes that would impact the states; and for establishing a meaningful state/federal relationship with MSHA that will ensure effective communication and cooperation on matters of mutual concern and interest."

II. Purposes

A. The objectives of this MOU are to set forth an understanding between MSHA and the member states of the IMCC to consult, coordinate, and cooperate effectively and efficiently in carrying out their respective duties concerning miners' health and safety and:

1. To minimize duplication of efforts;
2. To reduce the potential for conflicting standards and procedures; and
3. To provide consistent enforcement of standards.

B. It is in the best interest of the Federal and State governments as well as the public that a coordinated federal-state effort should be conducted to:

1. Encourage a culture of safety in the mining industry.
2. Encourage mine operators to live up to their legal and moral responsibility to provide a safe and healthful workplace for all miners.
3. Encourage mine operators to fully comply with state and federal regulations.
4. Encourage mine operators to provide effective training for their miners.

C. By working together, member States of the IMCC and MSHA intend to increase governmental efficiency and provide for an enhanced health and safety environment in our Nation's mines through more effective training and improved intergovernmental communications and coordination.

III. Authorities

The authorities for this MOU are the following:

A. The Federal Mine Safety and Health Act of 1977, as amended, 30 U.S.C. § 801 *et seq.*;
B. 30 U.S.C. § 962;
C. Title 30 of the Code of Federal Regulations (C.F.R.) parts 1-199;
D. Section 204(b) of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. § 1534; and
E. Exec. Order No. 13132 "Federalism" (Aug. 10, 1999).

IV. Consultation and Coordination

A. To realize the maximum benefit of a cooperative relationship, taking into account the mission of MSHA and the member States of the IMCC, it is necessary to maintain regular communication. This regular communication should be at the District offices and Headquarter levels of MSHA with the respective agencies of the member States of the IMCC.

B. This communication should include the exchange of information and discussion of common issues of concern. The member States of the IMCC and MSHA commit to work toward an effective working relationship on key issues that impact both State and Federal governments in the area of miner health and safety in order to:

1. Achieve a higher level of communication and coordination on key governmental functions;
2. Provide meaningful sharing of information on Federal rules and policies that may impact State mine safety and health regulatory programs and proposed State rules, regulations, and policies;
3. Establish the practice of sharing of information on unsafe mining practices or willful conduct to violate mine safety and health laws;
4. Insure effective training of miners through state-administered programs;
5. Increase governmental efficiency and effectiveness;
6. Encourage a culture of safety in the mining industry;
7. Encourage mine operators to live up to their legal and moral responsibility to provide a safe and healthful workplace for all miners; and
8. Enhance the health and safety of the Nation's miners.

C. To promote open and effective communication, MSHA intends to meet with the member States of the IMCC on a regular basis, at least annually. The parties may conduct these meetings through online conferencing or other available electronic resources.

D. MSHA, through its Coal Mine Safety and Health Administrator, will provide a contact person within MSHA for the member States of IMCC to resolve differences between the States and MSHA that may arise in the field or at the local level.

E. To achieve a higher level of coordination on key governmental functions, the member States of the IMCC and MSHA may enter into supplemental memoranda of understanding at the District or Headquarters levels. These key governmental functions may include, but are not limited to:

1. Accident investigation and reporting,
2. Emergency notification and response,
3. Mine rescue teams and training,
4. Certification, decertification, and qualification of key miner positions--foreman, examiners, blasters and electricians,
5. Coal waste impoundment safety;
6. Underground mine mapping;
7. Mine plan approvals; and
8. Liaisons with family members and the public following mine accidents.

V. Administrative

A. This agreement creates no private right of action against the Federal Government, IMCC, or the member States of IMCC. This agreement creates no rights in any third parties.

B. This agreement is subject to the availability of funds. This agreement will not be construed as obligating funds. Any work that requires the expending or obligating of funds will be accomplished through a separate agreement. Nothing in this agreement obligates MSHA to expend appropriations or enter into any contract or other obligations.

C. Nothing in this agreement shall be interpreted as limiting, superseding, or otherwise affecting MSHA's, IMCC's, or the IMCC member States' normal operations or decisions in carrying out their statutory or regulatory duties. This agreement does not limit or restrict the parties from participating in similar activities or arrangements with other entities. This agreement also does not limit or restrict the parties from taking any other action necessary.

D. Any modification to this agreement must be signed by both parties. Before MSHA may modify this MOU, it must comply with the Department of Labor Manual Series 3-1700 procedures.

E. A party may terminate its participation under this agreement upon at least 30 days written notice to the other party.

F. This Agreement constitutes the entire agreement between the parties concerning the subject matter and supersedes any prior understanding, written or oral.

VI. Points of Contact

For MSHA:
Name: Kevin G .Stricklin
Title: Administrator for Coal Mine Safety and Health
Address: 1100 Wilson Blvd., Suite 2424
Arlington, VA 22209
Telephone: (202) 693-9502
E-mail: stricklin.kevin@dol.gov

For IMCC:
Name: Gregory E. Conrad
Title: Executive Director
Address: 445-A Carlisle Drive
Herndon, VA 20170

Telephone: (703) 709-8654
E-mail: gconrad@imcc.isa.us

VII. Public Information Coordination

Public disclosure of information regarding activities conducted under this MOU will be subject to the Freedom of Information Act (5 U.S.C. § 552) and the public information and disclosure laws of IMCC and its member states. Prior to disclosure of requested information, the parties may consult regarding any proposed disclosure.

VIII. Resolution of Issues

The Parties should refer conflicts arising under this MOU to their respective points of contact for resolution. If a satisfactory resolution cannot be achieved at this level, the responsible points of contact must refer the matter to the Assistant Secretary of Labor for Mine Safety and Health and the Chairman of the IMCC Mine Safety and Health Committee.

IX. Period of Agreement

This MOU will become effective upon the date of final signature of both parties, as designated below, and remain in effect for three years.

Gregory E. Conrad — Date: May 11, 2011
Executive Director

Interstate Mining Compact Background

The mining industry is one of the most basic and important in the Nation. Our manufacturing activities, transportation systems, and the comfort of our homes depend on the products of mining. Yet it is also true that generations of mining operations have had their effect on the surface of our land and on the condition of other resources. There is an urgent need to find improved means of turning mined lands to their most useful functions and to find ways of reducing the undesirable effects of mining operations on other property and resources. The necessary programs should be undertaken with due regard for the interests of all land and other resource users, including homeowners, ming and other industries, recreationsists, conservationists, and the general public.

Governmental action to assist mining industries in their efforts to become more efficient in their methods, thereby increasing yields at lower costs, also is in the public interest. Such activities can and should go hand in hand with programs aimed at improving the usefulness of the surface of mined land.

Individual states have the power to establish and maintain programs of land and other resource development, restoration and regulation appropriate to cope with the surface effects of mining. The Interstate Mining Compact would not shift responsibility for such programs. On the other hand, states acting singly without reference to actions in other jurisdictions labor underserious handicaps in mounting desirable programs. While physiographic, climatic and regional differences in density of population and varying availability of recreational facilities make the application of rigid, single standards inappropriate, fundamental equity would be served by making it possible for individual states to construct their programs in such a way that those mining operations which actually are similarly situated be afforded similar types of assistance and be subjected to comparable regulatory patterns. There is much that an insterstate agency like the Interstate Mining Commission established by this compact could do to develop and pool experience in dealing with mining problems.

The Interstate Mining Compact could do much to overcome the limitations just outlined. The Interstate Compact to Conserve Oil and Gas (in successful operation for about thirty-five years and now participated in by virutally every olld and gas producing jurisdiction of the United States), suggests some of the accomplishments that might result from interstate efforts in the field of the mining of solid substances. "The form statute for the conservation of oil and gas," and the many other suggestions of the Interstate Oil Compact Commission, have brought an inceasing degree of comparability into state programs affecting the production of oil and natural gas. Also, that Commission serves as a forum for the exchange of useful information in its field of interest. While the focus of an Interstate Mining Compact as here envisaged would be somewhat different from that of the Oil and Gas Compact, and while its format bears only slight resemblance to the Oil and Gas Compact, its basic approach is the same. By adopting the compact, states would obligate themselves to undertake and maintain certain types of programs. In addition, an interstate body with roots in each of the party states and an ability to facilitate the sharing of knowledge would be placed in operation.

The Interstate Mining Compact had its beginnings in 1964. In April of that year in Roanoke, Virginia, the Council of State Governments held a conference on surface mining, attended by state and federal legislative and administrative officials, by mining industry representatives, and by conservationists. In the aftermath of this meeting, the Southern Governors' Conference, that Fall, called on the Council of State Governments to assist the states in developingone or more compacts to deal with surface mining problems. These initiatives led to the subsequent adoption in many states of strengthened laws and programs for regulating surface mining; and to supplement these intra-state activities, the Interstate Mining Compact was drafted and became available for their consideration in the legislative sessions of 1996.

Welcome

The Interstate Mining Compact Commission is a multi-state governmental agency / organization that represents the natural resource interests of its member states. First envisioned in 1964, the Commission came into existence in 1970 with the entry of its first four states. Since that time, 19 additional states have enacted legislation bringing them into the Compact, and 5 additional states have become associate members as they pursue enactment of legislation which will make them full members. The Commission established its headquarters in the Northern Virginia suburbs of Washington, D.C. in 1988. The states are officially represented by their Governors who serve as Commissioners. The Commission operates through several committees composed of duly appointed representatives of the Governors from their respective Departments of Natural Resources or Environmental Protection.

What We Do

The Commission exercises several powers on behalf of the states, all of which are of a study, recommendatory or consultative nature. The Commission does not possess regulatory powers, as some Compacts do. The Commission provides a forum for interstate action and communication on issues of concern to the member states. It is the potential to stimulate the development and production of each state's mineral wealth through effective regulatory programs that draws many of the states together in the prosecution of the Commission's work. Given the environmental sensitivities associated with this objective, a significant portion of the Commission's work is dedicated to the environmental protection issues naturally associated with this mineral development. It is the significant value and clout that comes from "compacting" together and speaking with a strong, united voice that can make a difference in each state's efforts to implement effective regulatory programs that will conserve natural resources and secure a vibrant state (and thus national) mineral economy.

Initiatives

- Liaison with Federal government and Congress
- Monitoring of regulatory and legislative developments
- Development and communication of State positions and recommendations on Federal rulemakings and national legislation
- Information gathering and dissemination
- Coalition building with related State organizations
- Interaction with environmental and industry groups
- Public mining and minerals education outreaches

Issues pursued by IMCC

- Mine waste regulation under the Resources Conservation and Recovery Act (RCRA)
- Regulatory implementation issues arising under the Surface Mining Control and Reclamation Act (SMCRA) such as: primacy, federal oversight, enforcement, the Applicant/Violator System, bonding, citizen participation, acid mine drainage, single source coal reporting, national technology transfer, and environmental protection standards
- Reform of the 1872 Mining Law
- Groundwater and stormwater regulations
- Inactive and abandoned mine reclamation
- Underground Mine Mapping
- Mine Placement of Coal Combustion Wastes
- Mine Safety and Health Issues
- Zoning and other land use restrictions

Committees

- Abandoned Mine Lands (AML) and Reauthorization of the AML Program under SMCRA
- Awards
- Education Work Group
- Finance & Administrative
- Environmental Affairs, Coal Section

- Environmental Affairs, Noncoal Section
- Mine Safety and Health
- Resolutions

Council of
Alaska Producers

Comments on SB206: Interstate Mining Compact and Commission

March 29, 2012

Senator Bill Wielechowski
Chair, Senate State Affairs Committee
Capitol Building
Juneau, AK 99811

Dear Senator Wielechowski,

The Council of Alaska Producers (CAP) appreciates the opportunity to comment on SB206, the bill that would allow Alaska to join the Interstate Mining Compact and Commission (IMCC) as a full member.

CAP is a non-profit trade association formed in 1992 and serves as a spokesperson for the large metal mines and major metal developmental projects in the state. The Council brings together mining companies with interest in Alaska to represent and inform members on legislative and regulatory issues, to support and advance the mining industry, to provide education to members, the media, and the general public on mining related issues, and to promote economic opportunity and environmentally sound mining practices.

The Council fully supports SB206 and we believe that full membership within the IMCC will solidify the State as a leader in permitting and regulation of the mining industry.

CAP has always supported a permitting and regulatory process that is rigorous, science based, transparent, and predictable. We believe Alaska is a leader in this arena, however as mining technologies advance and our understanding of the environment continues to grow, our permitting agencies must continue to learn and adapt as well.

Full membership within the IMCC will allow our resource agencies to have a dedicated forum to collaborate with their peers in other mining states. Within the IMCC they will be able to freely exchange information and best practice in regard to permitting, regulatory and reclamation issues and be able to apply these lessons learned to Alaska.

Historically the IMCC has consisted mainly of coal producing states in the eastern and southern portions of the country. With the resurgence of interest in metal mining throughout the west, including Alaska, it is important that the western states become part of the IMCC to ensure they are part of the collective discussion on issues raised by the development of mining opportunities. By being one of the first western states to join as a full member, Alaska can show true leadership in its efforts to responsibly develop our mineral resources.

Council of
Alaska Producers

Finally, CAP supports this bill as it allows us to join in with other mining states in working with the federal government on state primacy of permitting and regulatory issues. This is best supported by the following statement from the IMCC website:

"The IMCC was founded on the premise that the mining industry is one of the most basic and important to the Nation. Our manufacturing activities, transportation systems, and the comfort of our homes depend on the products of mining. At the same time, it is essential that an appropriate balance be struck between the need for minerals and the protection of the environment. We recognize that individual states have the power to establish and maintain programs of land and other resource development, restoration and regulation appropriate to cope with the surface effects of mining. The IMCC would not shift responsibility for such programs. On the other hand, our member states believe a united position in dealing with the federal government affords us a decided advantage. Our commission feels strongly that the collective voice of many is important in our efforts to preserve and advocate states' rights."

We thank the committee for taking up SB206 and we urge you to move this bill out of committee in an expeditious manner.

Thank you for your consideration,

Michael Satre

CS FOR SENATE BILL NO. 208( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR PASKVAN

Only 4 states don't have such a system. A mutual aid.

A BILL

FOR AN ACT ENTITLED

"An Act establishing an Alaska intrastate mutual aid system and relating to the duties of the Alaska division of homeland security and emergency management and the duties of the Alaska State Emergency Response Commission."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 26.23.040(b) is amended to read:

(b) The Alaska division of homeland security and emergency management shall play an integral part in the development and revision of local and interjurisdictional disaster plans prepared under AS 26.23.060 **and 26.23.500 - 26.23.549**. To this end, it may employ or otherwise secure the services of professional and technical personnel capable of providing expert assistance to political subdivisions, their disaster agencies, and representatives of interjurisdictional disaster planning and service areas. These personnel shall consult with political subdivisions and agencies on a regular basis and shall make field examinations of the areas, circumstances, and conditions to which particular local and interjurisdictional disaster

plans are intended to apply and may suggest or require revisions.

*** Sec. 2.** AS 26.23.040(e) is amended to read:

(e) The Alaska division of homeland security and emergency management shall

(1) determine requirements of the state and its political subdivisions for food, clothing, and other necessities in the event of a disaster emergency;

(2) procure and pre-position supplies, medicines, materials, and equipment;

(3) adopt standards and requirements for local and interjurisdictional disaster plans;

(4) periodically review local and interjurisdictional disaster plans;

(5) establish and operate, or assist political subdivisions, their disaster agencies, and representatives of interjurisdictional disaster planning and service areas to establish and operate, training programs;

(6) plan and make arrangements for the availability and use of any private facilities, services, and property and, if necessary and if in fact used, provide for payment for use under terms and conditions agreed upon by the parties;

(7) establish a register of persons with types of training and skills important in disaster prevention, preparedness, response, and recovery;

(8) prepare, for issuance by the governor, orders, proclamations, and regulations as necessary or appropriate in coping with disasters;

(9) cooperate with the federal government and any public or private agency or entity in achieving any purpose of this chapter and in implementing programs for disaster prevention, preparedness, response, and recovery;

(10) develop and carry out procedures and policies to effectively employ disaster relief funds made available by the governor's authority or by special legislative action; these procedures shall include application and documentation by disaster victims or applicants, review, verification and funding approval, and processing of appeals;

(11) do other things necessary or proper for the implementation of this chapter;

(12) **coordinate the operation of the Alaska intrastate mutual aid system among participating political subdivisions of the state and develop, in coordination with the political subdivisions and appropriate state and federal agencies, comprehensive guidelines and procedures for the Alaska intrastate mutual aid system, including record keeping and reimbursement procedures and forms for use by political subdivisions requesting and providing assistance;**

(13) to the extent that money is available from an appropriation for the purposes of this paragraph,

(A) award grants for the purpose of forming local emergency planning committees under AS 26.23.073;

(B) in order to comply with 49 U.S.C. 5116(a)(2)(B), make funds available to local emergency planning committees for developing and maintaining emergency plans under AS 26.23.073 and 26.23.075;

(C) make funds available to local emergency planning committees to implement 42 U.S.C. 11022(e) and 42 U.S.C. 11044; and

(D) award grants for training local emergency planning committees and for training and equipping the emergency response organizations identified in the local plans that execute the plans developed by the committees under AS 26.23.073 and 26.23.075.

* **Sec. 3.** AS 26.23.071(e) is amended to read:

(e) The commission shall

(1) serve as the state emergency response commission required under 42 U.S.C. 11001 - 11005;

(2) facilitate the preparation and implementation of all emergency plans prepared by state agencies under other authorities; the statewide, interjurisdictional, and local plans prepared under this chapter**, including the Alaska intrastate mutual aid system**; and the state and regional plans prepared under AS 46.04.200 - 46.04.210;

(3) review the plans described in (2) of this subsection according to the criteria established in AS 26.23.077;

(4) designate, and revise as necessary, the boundaries of emergency

planning districts under AS 26.23.073;

(5) establish a local emergency planning committee under AS 26.23.073(d) for each emergency planning district;

(6) supervise and coordinate the activities of local emergency planning committees;

(7) establish procedures for receiving and processing requests from the public for information under 42 U.S.C. 11044, including tier II information under 42 U.S.C. 11022; procedures established under this paragraph shall designate the Department of Environmental Conservation as the state agency to receive and process these requests on behalf of the commission;

(8) review reports about responses to disaster emergencies and make recommendations to the appropriate parties involved in the response concerning improved prevention and preparedness;

(9) perform other coordinating, advisory, or planning tasks related to emergency planning and preparedness for all types of hazards, community right-to-know reporting, toxic chemical release reporting, or management of hazardous substances;

(10) recommend procedures to integrate, as appropriate, hazardous substance response planning under 42 U.S.C. 11001 - 11005, federal contingency planning under 33 U.S.C. 1321 and other federal laws applicable to hazardous substance discharges, and state, regional, and local planning under this chapter and AS 46.04.200 - 46.04.210;

(11) to the extent consistent with the constitution and law of the state, perform all other functions prescribed for state emergency response commissions under 42 U.S.C. 11001 - 11005; and

(12) adopt regulations necessary to carry out the purposes of AS 26.23.071 - 26.23.077**, 26.23.500 - 26.23.549,** and 42 U.S.C. 11001 - 11005.

*** Sec. 4.** AS 26.23.077(a) is amended to read:

(a) The commission shall review and make recommendations about local, interjurisdictional, regional, and state emergency plans, including **the Alaska intrastate mutual aid system established in AS 26.23.500, other** plans prepared

under this chapter and AS 46.04.200 - 46.04.210, and all emergency plans prepared by state agencies under other authorities.

* **Sec. 5.** AS 26.23 is amended by adding new sections to read:

Article 3A. Alaska Intrastate Mutual Aid System.

Sec. 26.23.500. Alaska intrastate mutual aid system established. (a) The Alaska intrastate mutual aid system is established to provide for mutual assistance among participating political subdivisions of the state in preparing for and responding to a disaster. Except as provided in (b) of this section, all political subdivisions of the state shall participate in the system.

(b) A political subdivision may withdraw from participation in the Alaska intrastate mutual aid system established in (a) of this section. To withdraw, the governing board of a political subdivision shall adopt a resolution declaring that the political subdivision elects not to participate in the system and provide a copy of the resolution to the Alaska division of homeland security and emergency management. A political subdivision that withdraws may later elect to participate by adopting a resolution declaring the election of the political subdivision to participate and by delivering a copy of the resolution to the Alaska division of homeland security and emergency management.

(c) The provisions in AS 26.23.500 - 26.23.549 may not be construed to affect other mutual aid systems or agreements authorized elsewhere by law, do not prohibit a participating political subdivision from entering into other agreements with another political subdivision, including agreements entered into under AS 26.23.070 - 26.23.077, 26.23.180, AS 46.04.200, or 46.04.210, and do not affect any other agreement to which a political subdivision may be a party now or in the future.

(d) The provisions of AS 26.23.500 - 26.23.549 may not be interpreted to preclude the eligibility of a political subdivision for state or federal disaster funding or disaster readiness funding.

Sec. 26.23.510. Requests for assistance from another political subdivision. (a) Except as otherwise provided in this section, a political subdivision of the state that is a participating political subdivision under AS 26.23.500(a) may request and receive assistance from another participating political subdivision for

(1) response, mitigation, or recovery activities related to a local disaster emergency declared under AS 26.23.140;

(2) response to a disaster emergency declared by the governor under AS 26.23.020;

(3) disaster prevention training exercises conducted under AS 26.23.150; or

(4) other drills or exercises conducted in preparation for a disaster.

(b) The principal executive officer or an authorized designee of the principal executive officer of a participating political subdivision that is requesting assistance, shall request assistance directly from the principal executive officer or authorized designee of the principal executive officer of another participating political subdivision. Requests may be made orally or in writing and shall be reported directly to the Alaska division of homeland security and emergency management as soon as is practicable. A request for assistance that is made orally must be confirmed in writing within 30 days after the date of the initial oral request.

(c) A responding political subdivision shall have sole discretion to withhold or withdraw requested assistance to provide reasonable protection and services within its own territorial limits.

(d) Consistent with guidelines and procedures developed by the Alaska division of homeland security and emergency management under AS 26.23.040(e), a responding political subdivision shall document all assistance that is being provided to a requesting political subdivision at the time the assistance is provided and deliver copies of the documentation to the political subdivision that requested assistance within 30 days after the assistance is provided.

(e) The political subdivision requesting assistance shall have sole operational control over assistance provided under AS 26.23.500 - 26.23.549. This subsection does not prohibit a responding political subdivision from withdrawing assistance.

Sec. 26.23.515. Qualifications of emergency responders. An emergency responder holding a license, certificate, or other permit issued by a state agency, or a political subdivision of the state evidencing the responder's qualification in a professional, mechanical, or other skill shall be considered to be licensed, certified, or

permitted in the requesting political subdivision during the emergency, disaster, drill, or exercise, subject to limitations and conditions prescribed by the principal executive officer of the requesting political subdivision in writing.

Sec. 26.23.520. Emergency responder not an employee of a requesting political subdivision. An emergency responder from a political subdivision that responds to a political subdivision requesting assistance is not an employee of the political subdivision requesting assistance and is not entitled to any right, privilege, or benefit of employment from the requesting political subdivision, including compensation, wages, salary, leave, pension, health, or another benefit.

Sec. 26.23.525. Workers' compensation and benefits following injury to or death of emergency responder. An emergency responder that is responding to and rendering assistance in a political subdivision that has requested assistance under AS 26.23.510 who sustains an injury or dies in the course of providing assistance to the requesting political subdivision under AS 26.23.500 - 26.23.549 is entitled to receive only the benefits otherwise authorized by law for an injury sustained, or a death that occurs in the course of employment with, or while providing services to, the responding political subdivision. This section does not affect the right of a person to receive benefits to which the person would otherwise be entitled under any law, nor does it affect entitlement to any other benefits or compensation authorized by state or federal law.

Sec. 26.23.530. Reimbursement for assistance provided and disputes relating to reimbursement. (a) A political subdivision that has received assistance from another political subdivision under AS 26.23.510 shall reimburse the political subdivision that provided assistance for the true and full value of the assistance provided. Requests for reimbursement shall be made in accordance with procedures and guidelines developed by the Alaska division of homeland security and emergency management under AS 26.23.040(e). However, if authorized by law, a responding political subdivision may donate its assistance provided under AS 26.23.500 - 26.23.549 to a requesting political subdivision.

(b) If a dispute regarding reimbursement arises between political subdivisions, the political subdivision asserting the dispute shall provide written notice to the other

political subdivision identifying the reimbursement issues in dispute. If the dispute is not resolved within 90 days after receipt of the dispute notice by the political subdivision asserting the dispute, either party to the dispute may request arbitration under AS 09.43.300 - 09.43.595 (Revised Uniform Arbitration Act) by giving written notice to the other party. Costs of the arbitration, including compensation for the arbitrator's services, must be borne equally by the political subdivisions participating in the arbitration, and each political subdivision shall bear its own costs and expenses, including legal fees and witness expenses, in connection with the arbitration proceeding.

Sec. 26.23.540. Tort liability of participating political subdivisions and emergency responders. For purposes of liability, all persons responding under the operational control of the requesting political subdivision shall be considered to be agents of the requesting political subdivision. An action for damages for an act or omission may not be brought against a responding political subdivision, or an officer or employee of a responding political subdivision, in providing assistance under AS 26.23.500 - 26.23.549. This section does not preclude liability for civil damages that are the result of gross negligence or reckless or intentional misconduct.

Sec. 26.23.549. Definitions. In AS 26.23.500 - 26.23.549,

(1) "assistance" means emergency responders and resources provided by a responding political subdivision in response to a request from a requesting political subdivision;

(2) "emergency responder" means an employee of a responding political subdivision or of a contractor under contract with a responding political subdivision or a member of a volunteer fire department registered with the state fire marshal that provides services to the responding political subdivision, who is designated in writing by that responding political subdivision as possessing skills, qualifications, training, knowledge, or experience that may be needed, under a request for assistance under AS 26.23.500 - 26.23.549, for

(A) response, mitigation, or recovery activities related to a disaster; or

(B) participation in drills or exercises in preparation for a

disaster;

(3) "operational control"

(A) means the limited authority to direct tasks, assignments, and use of assistance provided pursuant to a request for assistance under AS 26.23.500 - 26.23.549 for

(i) response, mitigation, or recovery activities related to a disaster; or

(ii) participation in drills or exercises in preparation for a disaster;

(B) does not include medical protocols or standard operating procedures observed in the responding political subdivision, or any right, privilege, or benefit of ownership or employment, including disposition, compensation, wages, salary, pensions, health benefits, leave, seniority, discipline, promotion, hiring, or firing;

(4) "resources" means supplies, materials, equipment, facilities, energy, services, information systems, and other assets, except for emergency responders, that may be needed, under a request for assistance from a political subdivision, for

(A) response, mitigation, or recovery activities related to a disaster; or

(B) participation in drills or exercises in preparation for a disaster;

(5) "state agency" has the meaning given in AS 37.05.990.

MEMORANDUM March 2, 2012

SUBJECT: Sectional summary of CSSB 208( )
(Work Order No. 27-LS0611\B)

TO: Senator Joe Paskvan
Attn: Anna Sorensen

FROM: Alpheus Bullard
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Requires the Alaska division of homeland security and emergency management ("division") to play an integral part in developing and implementing the Alaska Intrastate Mutual Aid System ("mutual aid system") established by sec. 5 of the bill.

Section 2. Requires the division to coordinate the operation of the mutual aid system and assist in the development of certain guidelines and procedures for the mutual aid system.

Section 3. Provides that the Alaska State Emergency Response Commission ("commission") will facilitate the preparation and implementation of the mutual aid system.

Section 4. Requires the commission to review and make recommendations about the mutual aid system.

Section 5. Establishes the mutual aid system between participating political subdivisions of the state. Provides that every political subdivision is a participating member of the mutual aid system unless the subdivision withdraws. Provides what assistance a political subdivision may request assistance for. Addresses qualifications and employment of, and workers' compensation for, emergency responders. Establishes reimbursement procedures for, and tort liability of, participating political subdivisions. Provides definitions for the provisions establishing the mutual aid system.

Memo

To: Senator Bill Wielechowski, Chair, Senate State Affairs Committee

From: Senator Joe Paskvan JP

Re: Hearing request for Senate Bill 208: Disaster Planning and Services

---

I respectfully request that Senate Bill 208, "An Act establishing an Alaska intrastate mutual aid system and relating to the duties of the Alaska division of homeland security and emergency management and the duties of the Alaska State Emergency Response Commission," be scheduled for a hearing in the Senate State Affairs Committee.

Senate Bill 208 was developed using the National Emergency Management's model legislation for an intrastate mutual aid system as a guide. This system, detailed in SB208, will provide a framework for mutual assistance among the participating political subdivisions in the prevention of, response to, and recovery from any disaster that results in a formal declaration of local disaster emergency. The umbrella mutual aid system, provided for in SB208, would supplement existing and future mutual aid agreements by establishing a comprehensive, integrated system of mutual aid at the state level that will ensure an efficient and effective response to all hazards and disasters.

Please feel free to contact myself or my staff, Anna Sorensen, with any questions you may have.

Thank you for your consideration.

SB 208: Disaster Planning and Services

"An Act establishing an Alaska intrastate mutual aid system and relating to the duties of the Alaska division of homeland security and emergency management and the duties of the Alaska State Emergency Response Commission."

In 2004 the National Emergency Management Association (NEMA) in conjunction with the Federal Emergency Management Agency (FEMA) and a host of emergency response organizations, began developing and promoting model legislation for an intrastate mutual aid system (IMAS). The goal of IMAS is to provide a framework for all political subdivisions within a state to receive and render aid to other subdivisions within a state in times of need.

SB 208 will implement this model legislation in a manner that will be beneficial for Alaskan communities. The system detailed in SB 208 will provide a framework for mutual assistance among the participating political subdivisions – regions, boroughs, municipalities, and other local jurisdictions - in the prevention of, response to, and recovery from any disaster that results in a formal declaration of local disaster emergency.

The employees and volunteers who serve in emergency services recognize that emergencies transcend political jurisdictional boundaries. They, and the local agencies they serve, understand that intergovernmental coordination is essential for the protection of lives and property and for best use of available assets. Currently, the Alaska Disaster Act does provide for political subdivisions to create mutual aid agreements, which, in practice, works well for neighboring entities or service areas that have an established history of providing mutual aid to one another. These local mutual aid agreements vary widely in their scope and may not all address key issues of liability and compensation. Further, they may not encompass all emergency services. Through SB 208, a statewide agreement would be developed to supplement existing regional or local agreements by establishing a comprehensive, integrated system of mutual aid at a state level that will ensure an efficient and effective response to all hazards and disasters.

SB208 would allow all political subdivisions to automatically be included in the statewide mutual aid system. A political subdivision may elect to withdraw by enacting an appropriate resolution by its governing body. This legislation would not prevent participating entities from entering into supplementary agreements with other political subdivisions or impact any existing or future agreements. If a participating entity cannot provide assistance to a requesting entity, they are not obligated or bound to provide assistance.

Thank you for your consideration for SB 208. I urge you to support this vital piece of legislation which will provide meaningful support and structure for Alaska's emergency services.

BILL NO. SB208

Analysis

This bill establishes the Alaska intrastate mutual aid system. The Division of Homeland Security and Emergency Management will coordinate the operation of the Alaska intrastate mutual aid system among participating political subdivisions of the state and develop, in coordination with the political subdivisions and appropriate state and federal agencies, comprehensive guidelines and procedures for the Alaska intrastate mutual aid system, including record keeping and reimbursement procedures and forms for use by political subdivisions requesting and providing assistance.

There is no fiscal impact to the Department of Military and Veterans Affairs for this bill.

ALASKA FIRE CHIEF'S ASSOCIATION

2358 Bradway Road, North Pole, Alaska 99705
Phone: (907) 488-3400 FAX: (907) 488-6118

March 5, 2012

Senator Joe Paskvan
State Capitol Room 115
Juneau AK, 99801

Reference: SB 208 "An Act establishing an Alaska intrastate mutual aid system and relating to the duties of the Alaska division of homeland security and emergency management and the duties of the Alaska State Emergency Response Commission."

Dear Senator Paskvan,

On behalf of the Alaska Fire Chiefs Association I want to thank you for introducing SB 208. The Alaska Fire Chiefs Association fully supports this bill and encourages its adoption.

The Alaska Fire Chiefs Association in conjunction with the International Association of Fire Chiefs, the Federal Emergency Management Agency (FEMA), and the Alaska Division of Homeland Security have been working over the last two years to develop an intrastate mutual aid system for the State of Alaska. Currently we are one of only four States who do not have a system in place or the statutory ability that allows communities to come to the aid of other communities in the time of an emergency.

Mutual aid is defined by FEMA as "...agreements between agencies, organizations, and jurisdictions that provide a mechanism to quickly obtain emergency assistance in the form of personnel, equipment, materials, and other associated services. The primary objective is to facilitate rapid, short-term deployment of emergency support prior to, during, and after an incident.

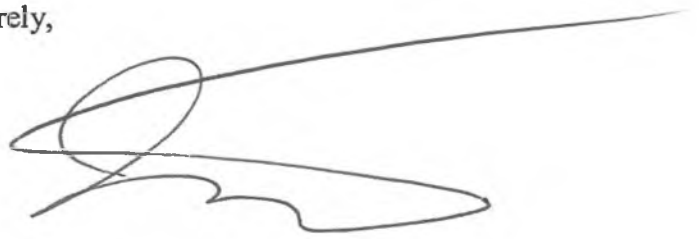
Currently local communities may have mutual aid agreements to provide Fire services to their neighboring communities as provided under AS 18.70.150 "Adoption of Mutual Fire Aid Agreements". However these agreements are limited in scope and do not provide for all of the potential needs of communities.

SB 208 gives us the needed framework that will allow us to develop a comprehensive intrastate mutual aid system. SB 208 addresses several key issues including liability and compensation that are not currently addressed in State Statutes. SB 208 will allow one Alaskan community to assist another Alaskan community no matter the location or need however, in no way are communities obligated or required to provide assistance.

The Alaska Fire Chiefs Association is committed to seeing a comprehensive intrastate mutual aid system work in Alaska and would like to see our organization included as one of the participating groups to whom which the Alaska Division of Homeland Security and Emergency Management would coordinate with in the operation of the Alaska Intrastate Mutual Aid System as amended in SB 208 Sec.2.AS 26.23.040(e).12.

The Alaska Fire Chiefs Association supports SB 208 and urges its adoption. We look forward to working with the State and local communities in the development of an Alaska Intrastate Mutual Aid System.

Sincerely,



Jeff Tucker, Fire Chief

Juneau, AK 99801-1182

RE: Support of SB 208

Dear Chair Wielechowski: Bill

I'm writing on behalf of Food Bank of Alaska and the state-wide anti-hunger network, in support of SB 208 – Disaster Planning and Services, sponsored by Senator Joe Paskvan.

In times of disaster, access to safe food and water are a critical part of emergency response services. Food Bank of Alaska currently participates in Alaska VOAD (Volunteer Organizations Active in Disaster) and also responded in times of disaster at the Miller's Reach and Hooper Bay fires. SB 208 will create an infrastructure that provides for coordinated, comprehensive, and consistent emergency response throughout Alaska. Based on model legislation for intrastate mutual aid systems (IMAS), SB 208 is promoted by the National Emergency Management Association (NEMA), Federal Emergency Management Agency (FEMA) and other emergency response organizations.

Food Bank of Alaska believes that SB 208 will provide an efficient structure for emergency services that will benefit everyone in Alaska. I encourage members of the Senate State Affairs Committee to vote in favor of this legislation.

Should you have any questions or if I can be of any assistance, please feel free to contact me at 907-222-3111 or smorgan@foodbankofalaska.org.

Thank you for your consideration.

Sincerely,

Susannah Morgan
Executive Director

March 12, 2012

The Honorable Bill Wielechowski, Chair
Senate State Affairs Committee
Alaska State Capitol, Room 101
Juneau, AK 99801-1182

Subject: Support for SB 208, Disaster Planning and Services

Dear Chair Wielechowski:
The Alaska Commission on Aging (ACoA) is pleased to offer our support of SB 208, a bill to establish a comprehensive intrastate mutual aid system (IMAS) that would allow all political subdivisions to transcend their jurisdictional boundaries to receive and render aid to other political subdivisions in the event of disasters and emergencies. This legislation is authored by Senator Joe Paskvan. We believe that this legislation is good public policy that will provide for a consistent and integrated mutual aid system to ensure an effective response in disaster situations.

Older persons with health problems are among the most vulnerable of Alaska's residents. When an emergency or natural disaster occur, they are the most likely to suffer from the direct impact of the force. Many have physical or cognitive impairments that limit their ability to respond and seek help. Frail older persons with special health problems on medication, equipment, or who have mobility needs are at heightened risk during a disaster and require special assistance to get to places offering food and emergency shelter. The horrific experiences of Hurricane Katrina and the loss of life of older adults who were abandoned in nursing homes and assisted living facilities highlight the need to improve disaster response preparedness and planning for vulnerable populations.

Disasters know no political boundaries. They can happen at any time, in any place, and to any one. SB 208 provides an integrated and structured framework to provide efficient and effective emergency aid and relief to older Alaskans and all Alaskan residents when the unthinkable strikes. Thank you for your consideration and support of SB 208. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Sincerely,

Denise Daniello

February 29, 2012

Senator Joe Paskvan
Alaska State Capitol Building
Juneau, Alaska 99811

Dear Senator Paskvan,

Thank you for introducing SB 208; An Act establishing an Alaska intrastate mutual aid system and relating to the duties of the Alaska division of homeland security and emergency management and the duties of the Alaska State Emergency Response Commission.

The model legislation that has been put forth by the collaboration of NEMA and FEMA, to promote an Intrastate Mutual Aid System (IMAS), is legislation that the Alaska Municipal League believes should be implemented within the State of Alaska. The ability for one political subdivision to receive and/or render aid to another is both wise and important to all involved.

Emergencies have no respect for jurisdictional boundaries that we impose upon our state. Therefore, emergency responders must be able to depend on other political subdivisions for coordination in order to protect lives and property. SB 208, as we interpret it, would allow for a statewide agreement, rather than the Alaska Disaster Act which provides for mutual aid between neighboring political subdivisions.

The Alaska Fire Chief's Association is a member of AML and we support their hard work and commitment to enhancing all safety needs with regards to fire fighting. Because of this relationship and the importance to municipalities to be able to help protect their residents, we stand in strong support of SB 208.

Thank you for the opportunity to comment.

Sincerely,

Kathie Wasserman

Cc: Ray Ritari
Subject: SB 208 Disaster Planning and Services

Senator, due to a time conflict I will not be able to attend the Senate State Affairs Committee meeting on March 13th, however, I would like to offer a few comments to you, the sponsor, regarding the position of the Alaska State Fair on this issue.

The Alaska State Fair (ASF) supports your Bill. ASF management has been working with the Mat-Su Borough EMS (MSB) and the State Homeland Security and Emergency Management Division in regards to emergency planning in the event of a disaster. Signatory to an agreement to develop an initial plan to create shelter for the people of the Mat-Su Borough in the event of a disaster are MSB, State of Alaska, Department of Corrections, MSB School District, American Red Cross, City of Palmer and Mat-Su Regional Medical Center. The MOU purpose is to form a partnership to plan, prepare, and implement mass sheltering protocols for use on the Alaska State Fair grounds.

To that end Senator Paskvan, the ASF has pledged it's assets, where needed, to support the MSB in any fashion that they can. Primarily, in several meetings management of ASF has had with their partners, ASF has offered buildings and infrastructure to be considered for use in mass sheltering. ASF has approximately 130,000 sf under cover that could POTENTIALLY, be used for mass sheltering. Approximately 30,000 sf could be placed in service almost immediately for sheltering.

In summation Senator, the Alaska State Fair stands ready to support the local political subdivision in a statewide mutual aid system and pledge our assets as needed in the event of a disaster.

Thank you.

SB 222: Appropriation for Base Closure & Realignment Strategies
Sponsor Statement

"I believe that in the future, whoever holds Alaska will hold the world. I think it is the most important strategic place in the world."
- U.S. General Billy Mitchell to the U.S. Congress in 1935

Defense Secretary Panetta recently announced that the Pentagon will seek new rounds of military base closures as part of the budget-cutting process. Over the next decade, the Army will drop from 562,000 to 490,000 soldiers and the Marine Corps from 202,000 to 182,000 marines in an effort to cut $487 billion. These cuts could have a devastating impact on Alaska's and our nation's security.

During the 2005 Base Closure and Realignment Commission (BRAC), Eielson Air Force Base was originally designated for realignment. A strong community and state effort opposed the Department of Defense recommendation by pointing out the critical strategic importance of Eielson, the loss of training opportunities, and the fact that its realignment would not have produced the estimated savings DoD anticipated.

As the Department of Defense begins to review options for budget cuts and base closure and realignments are considered, states across the nation have begun advocating for their military bases and personnel. It is of vital importance that Alaska uses every avenue to persuade the President and Defense Secretary that Alaska's geographic location is of great strategic importance for the nations' security. In addition, Alaska's military force is of great importance to our economy with 32 military installations, more than 23,000 active duty service members and more than 37,000 active family members, contributing approximately 13 percent to Alaska's economy.

Senate Bill 222 proposes to appropriate $300,000 to the Department of Military and Veterans' Affairs for a specialized consulting firm to advocate to the United States Department of Defense, U.S. Congress and the President that Alaska's military bases and service members are of strategic importance to the defense of our nation. It is imperative that Alaska begins a strategic effort to protect our military bases and personnel. Passage of SB 222 will provide Alaska another tool to fight for Alaska's Armed Forces.

Alaska politicians pledge to oppose military base cutbacks

By DAN JOLING
(01/27/12 16:24:34)

Defense Secretary Leon Panetta's announcement that the Pentagon will seek new rounds of military base closures drew a swift response from Alaskans who watched a similar process nearly gut Eielson Air Force Base in Fairbanks in 2005.

Alaska's congressional delegation and Gov. Sean Parnell issued a joint statement saying they will stand together to resist attempts to close or shrink Alaska bases.

"Alaska's military bases provide essential defense for the nation," Sen. Mark Begich, D-Alaska, said in the statement. "They are even more important with the administration's new focus on security concerns in the Pacific and with international attention on the changing Arctic."

Panetta at a news conference Thursday said the Army by will be cut by 80,000 soldiers, from 570,000 to 490,000, by 2017. He also called for additional rounds of base closures and realignment.

Under the closure process, defense officials submit a list of bases to a Base Closure and Realignment Commission. The commission analyzes the recommendations and sends its own list to the president, who can ask for more evaluation. The president eventually sends the report to Congress, which can pass a joint resolution to reject the full report. If Congress does not pass the joint resolution, the report becomes law.

The military in May 2005 recommended closure of 33 major bases and substantial reductions at 29 more. That included the recommended partial shutdown of Eielson Air Force Base, the sprawling air field in the Fairbanks North Star Borough, which housed a squadron of F-16 fighters and A-10 Thunderbolts. The Defense Department recommended Eielson for "warm" status, a part-time base where squadrons from other bases could use for training.

Begich, Parnell, U.S. Sen. Lisa Murkowski and Rep. Don Young on Thursday stressed Alaska's strategic importance to the nation, but an underlying issue is the role the military plays in the state's economy — 32 installations, more than 23,000 active duty service members, more than 37,000 active family members. It adds up to more than 13 percent of the state economy.

The Pentagon in 2005 projected Eielson's loss at 2,821 military jobs and 319 civilian jobs — just under 4 percent of the Fairbank North Star Borough population without counting 3,300 dependents. The military estimated a savings of $2.7 billion over 20 years at Eielson.

When the BRAC commission visited Fairbanks a month after the announcement, the community responded with fervor. More than 3,000 residents filled a civic center for the hearing. The late U.S. Sen. Ted Stevens, retired Air Force General Pat Gamble and retired Army Maj. Gen. Mark Hamilton, the current and former presidents of the University of Alaska, made impassioned statements in opposition to Eielson changes, noting its strategic importance on polar air routes and its location at the mid-way point of the trans-Alaska pipeline.

The testimony and show of community support worked. The base lost its A-10 warthogs but kept the F-16s and most permanent employees.

Young called Panetta's announcement unwelcome and not surprising, but said it's only the beginning of a long process that will include opportunities to support Alaska's military installations.

Begich said he supports saving money in nearly every area of the federal budget, including the cutting of overseas military bases, which are more expensive to operate and maintain.

"But requesting congressional approval to begin another domestic BRAC process in 2013, shortly after spending billions to complete the most recent BRAC round just doesn't make sense," he said.

Murkowski, who was serving her first term in 2005, said the military's increased commitment to Asia and the Pacific underscores the importance of Alaska bases.

"If the Defense Department is true to its strategy, contribution to the military mission should grow in the coming years," she said in the statement.

Department of Defense to Request Additional Base Closures and Realignments: Implications for Contractors and Communities

On January 26, 2012, Secretary of Defense Leon Panetta unveiled key features of the Obama Administration's defense budget request for fiscal year 2013. Among the key features of the Department of Defense's (DOD's) spending priorities for fiscal year 2013 will be a request that Congress authorize at least one more round of domestic military base realignments and closures (BRAC rounds). If approved by Congress, new rounds of base closures could have both positive and negative implications for government contractors. The actual fiscal year 2013 budget request will not be transmitted to Congress until February 13.

Base realignment and closure refers to a process designed to save costs and increase operational efficiency by closing excess military installations and realigning and redistributing the asset inventory among remaining defense bases. More than 350 installations have been closed in five previous BRAC rounds: 1989, 1991, 1993, 1995 and 2005.

New legislation would be required to implement another BRAC round. If the legislation followed the process in the most recent 2005 round, then DOD would submit recommendations for closure/realignment to an independent commission (the BRAC Commission), which may accept, reject or amend the DOD recommendations. The revised list is then submitted to the President for approval. In the 2005 BRAC Round, DOD recommended 190 closures and realignments, and the BRAC Commission approved 119 with no changes and accepted 45 others with modest amendments. The Commission rejected 13 DOD recommendations and significantly modified 13 others.

Because base closures are so politically charged, recent rounds have been structured to insulate base closure recommendations from the normal political aspect of lawmaking. Under these procedures, the President certifies the recommendations of the BRAC Commission and transmits them to Congress. Fast track parliamentary procedures have been established so that the entire package of recommended base closures automatically goes into effect unless Congress adopts a joint resolution of disapproval rejecting the package within 45 days of the President's submission or the adjournment *sine die* of the session of Congress, whichever occurs earlier.

Experience with past BRAC rounds has shown that base closures and realignments can save the government money, although the savings have proved more modest than many initial forecasts.[1] There are also significant fiscal, economic and environmental consequences that flow from base closures at the state and local level, including the loss of jobs and challenges

with developing and implementing a viable base reuse plan. There are also strategic and operational considerations associated with BRAC for DOD.

For affected communities and contractors alike, the ability to ensure potential candidates for closure or realignment survive can often depend on making a case that such action would be inconsistent with evaluation and closure criteria. It is not too early for state and local governments whose installations will be under scrutiny to begin developing a national security and business case to resist closure or realignment.

For contractors with business operations at military installations subject to potential closure or realignment, particularly companies in the construction and service industries, the prospect of another BRAC round can have significant financial consequences. At this stage, it is important to assess which bases with company operations are the most likely candidates for closure or realignment. Ultimately, business judgments will have to be made about whether and in connection with which bases a company should wage a campaign (because that is what it will take) to shape the perceptions and decisions of DOD and a future BRAC Commission.

Given the political environment, it seems unlikely Congress will authorize another round of base closures and realignments in an election year. Nevertheless, given the size of the federal deficit and debt ceiling, the weak economy and the imperative for DOD to achieve real long term savings required by the Budget Control Act of 2011[2] (not to mention the threat of sequestration), one or more future rounds of base closure seem inevitable. As Deputy Secretary of Defense Ashton Carter recently said, "If we have ... unneeded basing structure in our armed forces in a time when we're trying to deal with the deficit reduction, national security imperative that we face, how can we not put on the table unneeded basing structure?"[3] Businesses and communities that stand to be affected by another BRAC round should anticipate this eventuality and begin preparing now to protect their interests and be meaningful participants in the process.

Panetta: 'Sequestration' Would Upend Military Strategy

By Karen Parrish
American Forces Press Service

WASHINGTON, Jan. 8, 2012 – The Defense Department's new 10-year strategy will go "out the window" if the federal Budget Control Act's additional spending cuts go into effect next year, Defense Secretary Leon E. Panetta said.

"If we had to do over a trillion dollars in cuts in this department, I have to tell you that the strategy that we developed, we'd probably have to … start over," Panetta said during an interview with Rachel Martin that aired today on the NPR program "Weekend Edition."

President Barack Obama unveiled the strategy in a rare Pentagon appearance Jan. 5 alongside Panetta and other DOD leaders, saying he called for the strategy review to inform the budget process. The strategy is based on $487 billion in budget cuts over ten years.

The Budget Control Act, which Congress passed and Obama signed in August, includes automatic spending cuts across government, including about $500,000 to the Defense Department, to go into effect in 2013. The sequestration cuts, as they are known, were triggered by a congressional committee's inability to agree on specific cuts last fall. Those across-the-board cuts will be in addition to the $487 billion the administration has proposed in DOD savings, unless Congress takes additional action.

Officials would not discuss specific cost-cutting proposals before the budget is due out early next month. But Panetta said last week he knows many proposals in the fiscal 2012 budget request will be politically sensitive.

"There is no doubt that the fiscal situation this country faces is difficult, and in many ways we are at a crisis point. But I believe that in every crisis there is opportunity," he said on Jan. 5. "Out of this crisis, we have the opportunity to end the old ways of doing business and to build a modern force for the 21st century that can win today's wars and successfully confront any enemy, and respond to any threat and any challenge of the future."

The strategy calls for reducing the number of men and women in uniform. The secretary told NPR "the human side" of defense spending cuts makes difficult choices even harder.

"What's going to happen to those people that come back to this country from the battle zones? How are we going to deal with them? What kind of jobs are we going to be able to provide them? How are we going to care for them?" he said.

During the strategy's rollout at the Pentagon, Panetta repeated his often-stated pledge that DOD will "not break faith" with service members.

"I commit to you that I will fight for you and for your families," he said.

Troop cuts also will affect the military's ability to bring troops to bear quickly, Panetta told NPR.

"Part of our approach here is to make sure that we maintain a strong National Guard and a

strong reserve," he said. "They have been fully operational — we have brought them into battle zones. They have gained as much experience as the active force. But … if we are dealing with a leaner and meaner force, if we have to mobilize, there's only one place to go — and that's to the National Guard and to our reserve units."

The new, leaner military will retain the ability to fight on multiple fronts, Panetta emphasized.

"That's the most important message the American people have to know," he said. "This force is going to be able to fight any enemy, any aggressor that tries to take us on."

The secretary said despite the strategy's emphasis on the Asia-Pacific region as a defense focus, he does not view China's military buildup as a direct threat to the United States.

"The fact is, as a major power, they have that capability," he added. "What we have to ensure is that it's used for the right reasons."

China and the United States face common threats in the region, the secretary said: "The whole issue of Korea and the stability of Korea, the whole issue of nuclear proliferation, the whole issue of providing free access to our ships that are operating in that area."

Panetta said he intends for the military to work with China and other Pacific nations "to make sure that we secure that area for the future."

Obama: Defense Strategy Will Maintain U.S. Military Pre-eminence

Alaska Delegation & Governor Oppose BRAC

For Immediate Release
Thursday, January 26, 2012

The Alaska Congressional Delegation and Alaska Governor Sean Parnell issued a united set of statements defending Alaska's military bases and expressing their importance to military operations and national security. The show of support follows an announcement from Defense Secretary Leon Panetta to seek two new rounds of Base Closure and Realignment Commissions (BRAC).

The last round of BRAC took place in 2005 and changes were completed in fall of 2011. Alaska's military constitutes more than 13 percent of Alaska's economy, with 32 military installations, more than 23,000 active duty service members and more than 37,000 active family members.

Governor Sean Parnell:

"Alaskans will stand united against closing our nation's most strategic military facilities in the Arctic. With the instability in the Pacific Rim and Middle East, now is not the time to experiment with this strategic advantage. I am working aggressively with our communities, elected officials, and the Department of Defense to fight any erosion of the military in Alaska."

Senator Lisa Murkowski:

"Secretary Panetta's announcement today about potential BRAC moves reinforced Alaska's key strategic role – especially given the Pentagon's newly-stated military strategy highlighting Asia and the Pacific. Our state's role in ensuring US military dominance in the Pacific theatre is significant. If the Defense Department is true to its strategy, contribution to the military mission should grow in the coming years.

"Alaska's active duty Army and Air Force units in Alaska are primarily responsible for delivering military assets to the U.S. Pacific Command. Secretary Panetta also acknowledged that our Nation will protect or increase its investment in homeland missile defense, reinforcing Fort Greely's contribution.

"And while it may seem like yesterday that the Interior turned out by the thousands to oppose the potential closure of Eielson Air Force Base, I would like to believe that Eielson is in a stronger position today. The exercises that launch from Eielson play a key role in training allied Armed Forces to fulfill the expectations of our new military strategy and our Air National Guard refueling wing is pivotal in supporting US air missions in the Pacific area of responsibility that the Pentagon is touting as an even higher priority in the new military framework."

Senator Mark Begich:

"I support cost-savings in virtually every area of the federal budget. I have proposed billions of dollars in DOD cuts to include closure of overseas bases which the Department has the authority to do immediately. But requesting Congressional approval to begin another domestic BRAC process in 2013, shortly after spending billions to complete the most recent BRAC round just doesn't make sense.

"We must look hard at closing overseas military installations, which are more expensive to operate and maintain, before considering closure of domestic bases.

"Alaska's military bases provide essential defense for the nation. They are even more important with the administration's new focus on security concerns in the Pacific and with international attention on the changing Arctic. I'll be using my position on the Senate Armed Services Committee to demonstrate the enormous strategic value of Alaska's military bases, and oppose any misguided attempt to close them."

Congressman Don Young:

"While today's announcement is unwelcome news, it shouldn't come as a surprise. It's important to note that this is the beginning of a long process that will include countless opportunities for us to stand up and support Alaska and Alaska's military installations by illustrating their strategic importance to the expanding Arctic exploration and the overall defense of this nation. I want to make one thing clear, as someone who fought alongside Senator Stevens against previous BRAC closure attempts, I know firsthand that if we stay united in our cause and present the facts, we will be in an excellent position to beat back any attempts to close, shrink, or realign Alaskan bases."

Task force meeting to protect SC military bases from spending cuts

By JEFF WILKINSON
jwilkinson@thestate.com

The South Carolina Military Base Task Force is set to meet today to discuss ways to protect the state's installations from deep cuts proposed by the Obama administration and the Defense Department, particularly to the Army and Marines.

It will be the first time the task force has met since Haley took office more than a year ago.

Critics claimed that Haley, who didn't make appointments to the board until about three weeks ago, was tardy in building a plan to preserve the $13 billion that is pumped into South Carolina's economy each year by its four major bases in Columbia, Charleston, Sumter and Beaufort.

But the appointments — which include heavy hitters such as Secretary of Commerce Bobby Hitt and SC Adjutant Gen. Bob Livingston, as well as mayors, chamber of commerce heads and county council chairs from the four military communities — now pave the way for a state-wide strategy, said Maj. Gen. William "Dutch" Holland, a former commander of the Ninth Air Force, the planning and logistical arm of Air Force air power in the Middle East and Southwest Asia.

"I think we're OK," said Holland, now executive director of the Shaw-Sumter Partnership for Progress and a member of the task force. "This is good impetus to get us all together, lock the door ... and decide where we want to go on a united basis."

SC Comptroller General Richard Eckstrom is chairman of the committee.

Haley spokesman Rob Godfrey said Haley will work with the state's federal delegation and the task force to protect SC military bases from cuts.

"It's time to speak with one voice as we move to protect all of our military bases and defense programs," he said in a release.

A spokeswoman for Commerce said both Hitt and deputy commerce secretary George Patrick — a retired major general and former executive coordinator of the task force — will attend today's meeting.

"Secretary Hitt is keenly aware of the impact that the military presence has on South Carolina's overall economy," spokeswoman Amy Love said in a release.

In January, Obama and the Defense Department mandated $487 billion in cuts to the U.S. military over the next 10 years — cuts that are expected to impact South Carolina's major military installations. And they and the Pentagon have asked for two more rounds of base closings and realignments, called BRAC, in 2013 and 2015.

A mutual effort between the state and the military communities paid off in the last round of BRAC, in 2005, when Fort Jackson and Shaw Air Force Base gained missions, most notably the national Drill Sergeant School at Fort Jackson and Third Army at Shaw.

Ike McLeese, president and CEO of the Greater Columbia Chamber of Commerce, said that in addition to fending off losses and positioning the installations to gain missions, the task force also needs to develop strategies for caring for service members returning from Iraq and Afghanistan and finding employment for those forced to leave the service.

Among the priorities are:

- Finding jobs with the state for those forced to leave the service because of draw downs
- Ensuring that returning SC National Guard members and Reservists retain their jobs or find new ones after deployment
- Establishing a state-wide network for attaining those goals

"In the past we've targeted issues that were mental or physical in nature," said McLeese, a task force member. "Now the thing that has moved to the No. 1 priority is helping them find jobs."

Legislators prepare to challenge any Ohio base cuts

Rickenbacker, Mansfield in line to lose planes; Obama expected to seek closings in 2013, 2015

By Jessica Wehrman
The Columbus Dispatch • Friday February 10, 2012 5:42 AM

Comments: 0 Tweet 1 ShareThis

WASHINGTON — Days before President Barack Obama releases a budget expected to call for two rounds of military base closures within the next five years, the Ohio congressional delegation already has begun coordinating how to spare Ohio bases.

Obama, as part of his fiscal 2013 budget, is expected to call for base closure rounds to begin in 2013 and 2015.

If Congress agrees, the process, aimed at helping to reduce a massive federal deficit, would require an independent commission to make recommendations on which bases to close and which to realign. Congress would then have to approve or disapprove the list agreed to by the independent commission.

During the last round, in 2005, Wright-Patterson Air Force Base — the state's only active-duty military base — gained missions.

But with federal law calling for at least $487 billion in cuts during the next decade, lawmakers worry that the state could bear the brunt of some of those cuts.

"The expectation is, if we're prepared, we'll end up with better outcomes for the community and the military," said Sen. Rob Portman, R-Ohio, who organized a meeting yesterday of the state's congressional delegation. "Today we started the process."

The state's delegation is already worried about Obama's budget, which will include the elimination of some aircraft at the Air National Guard bases at Rickenbacker and in Mansfield.

Last week, the Air Force announced plans to retire six of the 18 KC-135 tankers at Rickenbacker and four C-27J cargo planes in Mansfield.

Early indications, however, show Wright-Patterson might actually gain intelligence and surveillance work under the president's fiscal 2013 budget.

In all, the state's military installations support 43,950 jobs, according to material compiled by Ohio's congressional delegation, including 27,000 at Wright-Patterson. Rickenbacker and the Defense Supply Center Columbus combined support about 9,200 jobs.

Rep. Steve Austria, R-Beavercreek, said the group, which also included Reps. Mike Turner, R-Centerville; Jim Jordan, R-Urbana; Dennis Kucinich, D-Cleveland; and Steve Stivers, R-Upper Arlington, hopes to apply lessons learned during the 2005 base closure process to future rounds of base closures.

"We need to put a plan together as a delegation," he said.

Sen. Sherrod Brown, D-Ohio, wasn't at the meeting, but he said he wants to work with the delegation "to make sure the process is done fairly."

"I'll continue working with the delegation to do the right thing," he said. "We will work across party lines."

To protect the state's bases, Portman said, the delegation will have to rally community support, take a thorough inventory of the value of the state's military bases and make plans for how to proceed when legislation proposing base closures comes to Congress.

"We aren't competing with one another," Portman said. "We're working as a team."

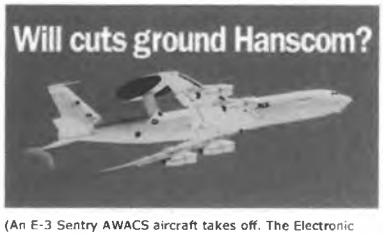
Hanscom base cuts draw concern

By Chris Camire, ccamire@sentinelandenterprise.com
Posted: 02/24/2012 06:35:47 AM EST

BEDFORD -- Military officials are downplaying reports of dramatic job cuts at Hanscom Air Force Base, but local business officials remain on edge over the future of the facility's role in the local economy.

Hanscom could lose three-quarters of its funding for contract workers over the next four years and an additional 380 government jobs due to a reduction in military spending.



(An E-3 Sentry AWACS aircraft takes off. The Electronic Systems Center at Hanscom was awarded a contract in 2010 to upgrade the French AWACS fleet with more modern capabilities. Photo courtesy Hanscom AFB)

Cuts to the base's Electronic Systems Center, which employs 1,250 contractors, are set to begin in April. The center will see a 10 percent to 15 percent budget reduction in the first year, according to base spokeswoman Sarah Olaciregui.

Olaciregui cautioned, however, that the total number of jobs to be cut in the long term has not been decided.

"It may take some time before all the effects of these changes are fully known and understood," she said.

Hanscom generates $5 billion in annual economic activity, according to Maureen Rogers of the Woburn-based North Suburban Chamber of Commerce. The base has led to the creation of 16,000 jobs that generate a combined annual income of $423 million, she said.

Rogers added that local businesses, such as restaurants and caterers, worry about what the future holds for the local economy should the base suffer steep cuts.

"The base personnel might go to the local restaurants. They have children in the school system. It just increases unemployment with every single cut," said Rogers, who represents 30 companies that do business with Hanscom. "Military may leave this area and go elsewhere."

Advertisement

Hanscom has no planes and few uniformed personnel. The facility largely focuses on developing high-tech weapons and communications systems with the assistance of private contractors that employ hundreds of people who live throughout the region.

Contractors that could be affected by the proposed cuts include Oasis Systems in Lexington, Odyssey Systems Consulting Group in Wakefield and Burlington, Gemini Industries in Billerica, Quantech Services in Lexington, and Sumeria Systems Inc. in Danvers.

"They're trying to reduce the cost of doing business -- overhead, discretionary spending, contract support -- which is what we do," said David Clapp, division manager of PESystems Inc., of Littleton, which reviews Hanscom's contracts with such companies as Raytheon Co. and Boeing. "Unfortunately, the easiest thing for them to cut is the contractors. We think we play an important role in Hanscom's success."

Clapp, who has worked for PESystems since 2001, said the company has about 300 people employed at Hanscom. It would be a huge blow if cuts to the Electronic Systems Center are enacted, he said.

"Our main line is federal support contracts," Clapp said. "What we try to do is diversify, but overall, defense is in a decline right now, so it's difficult. We've chosen our course of action. Now we have to make the best of it."

Members of Congress and local officials are urging the military to rethink the changes.

"We've already started the discussion, asking for justifications for these cuts and getting all the information we need," said U.S. Rep. John Tierney, a Salem Democrat. "We will deal with the Washington element and the local element."

Tierney said domestic bases are often targeted when the Pentagon needs to make spending cuts, but he suggested the military would be better served examining spending on international bases and weapons systems he described as "seriously over budget and behind schedule."

U.S. Rep. Niki Tsongas, a Lowell Democrat, said she plans to highlight the strategic importance of Hanscom to Pentagon officials. She said the base has met critical communications, technology and other security needs for the military for decades.

"The Air Force's mission at Hanscom is supported by the universities and innovative high-tech companies that are unique to Massachusetts, and the presence of these institutions has helped the Air Force to confront current threats and prepare for future ones," Tsongas said in a statement.

As the wars in Iraq and Afghanistan wind down, Defense Secretary Leon Panetta has said the military is looking to close domestic bases as early as next year. Hanscom is on that list.

Hanscom narrowly avoided being shut down in 2005, thanks to state officials convincing the Pentagon that the Bedford installation plays a unique role in advancing military innovation and technology.

Former U.S. Sen. Edward Kennedy and former Gov. Mitt Romney co-chaired a public-private effort to protect the local base.

Now state leaders are once again being asked to tout the important role Hanscom plays in protecting the U.S.

"If there isn't a significant demonstration of support, that could be misinterpreted as a laissez-faire attitude -- like, OK, so maybe the base will close or downsize, but we'll move on," Bedford Selectman Michael Rosenberg said. "That's not the way we should feel. Sometimes you really have to have a brass band and a major, visible, public demonstration of support."

Federal budget cuts will likely hit Texas military bases

Some expect building spree will soon come to an end

By Gary Martin
Updated 10:55 p.m., Sunday, February 19, 2012

WASHINGTON — Nearly a decade of military expansion that helped buoy the Texas economy during the recession is coming to an end as Pentagon officials ponder budget cuts and a shrinking force structure.

"It looks to me like the big building boom from the military is screeching to a halt," said Nelson Wolff, the Bexar County administrative judge who has overseen a decade of defense-related growth in San Antonio.

President Barack Obama's budget blueprint for fiscal year 2013 contains $450 million in military construction projects in Texas — far less than the $640 million set aside last year and nearly a third of the $1.1 billion the state received in 2010.

Obama also has proposed two rounds of base closures as the Pentagon withdraws from wars in Iraq and Afghanistan.

"In some cases, that left us unsure where we need to make the 'milcon' investments," said Lt. Gen. Larry Spencer, the Pentagon director for force structure and resources.

Military construction proposals shrunk for Air Force, Army, Navy and the Marines as the Pentagon grapples with other cuts in spending dictated by last year's debt-limit deal between the administration and Congress.

The Defense Department also is finishing the last round of base closures from 2005, which prompted building booms in San Antonio and Bethesda, Md., where the military's medical operations were consolidated.

'One-year pause'

Last year, Obama sought $331 million for military medical consolidation in San Antonio alone.

The 2013 budget out last week includes $80 million for the ongoing construction of a hospital at Lackland to replace Wilford Hall Medical Center.

Overall, the Air Force military construction budget shrank by $900 million, said Maj. Gen. Edward Bolton Jr., Air Force deputy assistant secretary for budget.

"This one-year pause will give us time to ensure proper investment of limited resources in light of the ongoing budget reduction pressures and potential force structure changes," Bolton said during a Pentagon budget briefing.

The Army saw a similar building spree at Fort Bliss, in El Paso, when the U.S. Army's 1st Armored Division was moved from Germany.

Last year, Fort Bliss saw $286 million in construction; this year's total is $214.6 million.

As the Pentagon turns off the spigot for military construction, Defense Secretary Leon Panetta told the Senate Armed Services Committee that further reductions are being eyed at overseas bases.

The Defense Department announced the removal of two of four combat brigades in Europe. That would still leave 70,000 U.S. military personnel stationed abroad, where facilities could be pared.

"Finding further reductions and consolidations in our overseas force posture should be our first priority," Panetta said.

Nonetheless, the Obama administration's budget blueprint for military expansion at domestic bases for fiscal 2013, which begins Oct. 1, will impact the economies of states with multiple military installations.

Texas will still receive $450 million in construction projects, if approved by Congress.

State panel reviewing

The Texas Military Preparedness Commission, a panel appointed by Gov. Rick Perry, reviewed the president's budget last week in Austin.

"It's about being prepared, because the DoD budget plays a big role in our state's economy," said state Sen. Leticia Van de Putte, D-San Antonio, chairwoman of the Texas Senate Committee on Veterans Affairs and Military Installations.

Texas has more than 131,500 active-duty military and 48,000 civilian employees, according to the U.S. Census Bureau.

State officials estimate that the economic impact of the U.S. military payroll for active-duty, reserves and civilians to be more than $77 billion.

The economic impact for San Antonio is estimated at $15 billion. For the state as a whole, military contracts totaled more than $60 billion.

Federal military spending is one sector of the state's economy that helped Texas replace all 433,400 jobs that were shed during the recession as the state economy rebounded more quickly than the United States as a whole, according to Texas Comptroller Susan Combs.

Nationally, through January, only 36 percent of recession-hit jobs have been recovered, Combs said.

Two of the largest projects for Texas are the ongoing construction of hospitals at Fort Bliss and Lackland.

Building at Fort Bliss alone accounts for $4.6 million in annual economic impact for the El Paso region, according to Rep. Silvestre Reyes, D-El Paso.

San Antonio 'lucky'

Wolff said the San Antonio area has been "very lucky" in terms of military expansion, mainly due to the 2005 base closure round and consolidation of military medicine at Fort Sam Houston, which created thousands of construction jobs.

Texas lawmakers are hopeful that state installations will be key to future expansion.

They point to expanding high-technology missions at Ellington Field Joint Reserve Base in Houston, where MQ-1 Predator drones are remotely manned, and at Lackland, where Air Force cybersecurity operations are conducted.

And Texas lawmakers say they will oppose additional rounds of base realignment and closure, commonly referred to by the acronym BRAC.

"Strategic needs have changed, and we certainly can't afford to maintain non-essential overseas bases," said Sen. Kay Bailey Hutchison, R-Texas.

Ready for the ax

Sen. John Cornyn, R-Texas, noted that the 2005 closures were completed just last year. "Congress is not ready for another BRAC, and neither is the military," Cornyn said.

Wolff, meanwhile, is bracing for the possibility. "You can't expect Congress to meet spending guidelines without cutbacks," the administrative judge noted.

Just the reduction in military construction will be felt by Texas cities.

"It does have an economic impact when you do cut back, but there is a clear consensus we need to cut back on spending" Wolff said.

"It doesn't surprise me. I think it needs to be done. We are going to get prepared," he said.

State Leaders Push To Save Military Bases

Task Force Will Focus On Hanscom Air Force Base

POSTED: 7:03 am EST March 5, 2012
UPDATED: 12:54 pm EST March 5, 2012

Related To Story

BEDFORD, Mass. -- Some of the Massachusetts' top state leaders are launching a new push to save hundreds of military jobs on Monday, gathering at Hanscom Air Force Base in Bedford to convene a task force to explore what might be lost and what can be done.

Sen. John Kerry, U.S. Rep. Niki Tsongas and Lt. Gov. Tim Murray are concerned about the loss of jobs, both on and off base, because base cuts also affect off-base civilian contractors. None of the cuts would come without a fight, officials said.

Click Like For Boston News Updates:

"What is clear is that the federal government and the U.S. military across the board will be engaging in belt-tightening with the winding down of the wars in Iraq and Afghanistan," Murray said last month, adding that no final decisions have been made about Hanscom or any of the state's other bases.

Murray is leading the Military Asset and Security Strategy Task Force, which is trying to minimize funding and job cuts at the state's six military bases. The Pentagon is looking to close bases in order to meet $500 billion in defense cuts agreed to by President Barack Obama and Congress as part of the deficit-reduction pact.

"It trickles all down," said Maureen Rogers of the North Suburban Chamber of Commerce. She said the economic impact of losing 40 to 45 civilian base jobs this year and 100 to 175 off-base contractor positions next year, could have wide-ranging consequences.

"There are caterers, there are restaurants, everything else. There could be, potentially, a $5 billion economic impact, that we've found, for Hanscom Air Base," said Rogers.

Lt. Gen. Charles Davis is the commander at the Electronic Systems Center, where the cost cutting proposals are focused. The center is facing a total cut of 245 positions, 62 of which are currently filled.

"It's not pleasant right now, especially if you're the one losing a job, but I'm trying to tell everybody there's no reason to panic right now," said Davis.

There's also the possibility of more cuts over the next four years, slashing contractor budgets by 75 percent.

Hanscom was the second of at least six visits to the state's military bases. In addition to Hanscom, Murray has toured Barnes Air National Guard Base in Westfield and plans to tour Westover Air Reserve Base in Chicopee later this month.

In April, Murray plans to tour the Massachusetts Military Reservation / Otis Air National Guard Base in Falmouth, Natick Soldier Systems Center in Natick and Fort Devens.

"The reality is, tough budget choices will be made and we've got to be all hands on deck to ensure that the mission and workers at Hanscom aren't hurt in the process," said Kerry. "We've got a good story to tell and we're going to tell it, because technologies and equipment conceptualized, researched, developed and manufactured at facilities across Massachusetts help the military execute its mission at the highest levels."

"Massachusetts has the immediate ability to meet our country's national security needs in cyber-technology, advanced manufacturing, bio-science and many other critical areas," said U.S. Sen. Scott Brown. "I will continue working at the federal level to spotlight the military value in Massachusetts and greater New England."

With cuts looming, NY pols trying to protect military installations worry about air bases

MICHAEL HILL Associated Press

Share / Save

ALBANY, N.Y. — With broad defense cuts looming, some New York officials working to protect the state's military installations are focusing on Air National Guard and Reserve bases.

President Barack Obama this month proposed a leaner defense budget for 2013 amid troop drawdowns in Iraq and Afghanistan. Meanwhile, Defense Secretary Leon Panetta is soon expected to formally request two new rounds of domestic base closures and realignments as a way to cut long-term costs.

The expected cuts could have major effects in New York, which is home to dozens of military installations, including Fort Drum in northern New York, the Niagara Falls Air Reserve Station and the Army National Guard's Camp Smith near Peekskill in the Hudson Valley. Combined, the active duty, National Guard and Reserve installations employ tens of thousands of troops and civilians from Long Island to western New York, and they are critical to the economies in many upstate areas.

Though it does not appear likely New York will be hit as severely as it was in the mid-'90s base closure round — which shut down active duty Air Force bases in Plattsburgh and Rome — there are still worries.

"There's no doubt there will be cuts. We are trying to limit the cuts and trying to grow the missions and present New York as the future for the military," said U.S. Sen. Kirsten Gillibrand, who sits on the Senate Armed Services Committee.

Gillibrand, U.S. Sen. Charles Schumer and other members of New York's congressional delegation have been trying to secure and extend missions at New York's military installations as a way to protect them from being shuttered or shrunk in the coming years.

Gillibrand said she is particularly concerned about the five bases maintained by the Air National Guard and Air Reserves in New York, as well as the Air Force research lab in Rome. The Air Force announced planned nationwide force reductions this month that would lean heavily on the Guard and would trim Reserve forces as well.

One focus for politicians is on Niagara Falls, where the 914th Airlift Wing of the Air Force Reserve and the 107th Airlift Wing of the New York Air National Guard share a tactical airlift mission. There are plans to reduce the number of C-130 transport planes, which has raised fears that fewer planes could leave the 107th without a mission, said Niagara Military Affairs Council chairman Merrell Lane.

Lane, whose group advocates for the base, said it is the largest employer in Niagara County and the loss of the Guard mission could cost about 800 civilian jobs.

"Western New York has always struggled," Lane said. "And the loss of that many jobs to western New York would be — it just wouldn't be good."

Members of New York's congressional delegation advocating for the Guard and Reserve at Niagara Falls have touted the base's proximity to the Canadian border. Gillibrand and others have asked Homeland Security Secretary Janet Napolitano for a new Border Patrol station at a Niagara Falls military base.

In a similar vein, members of Congress are lobbying against a proposed $30 million cut to the Air Force Research Lab in Rome, touting the central New York facility's role in cyber-security. And they have lobbied Panetta not to retire transport planes at Stratton Air National Guard Base near Schenectady.

Officials say they are concerned about every military installation across the state, though some seem immune from major cuts because they have recently gained missions or are being upgraded.

In the Hudson Valley, the 105th Airlift Wing at Stewart Air National Guard Base is receiving C-17 Globemaster cargo planes to replace an older type of transport.

The Air National Guard's 174th Fighter Wing at Syracuse has operated unmanned Reaper drones over Afghanistan since December 2009 and also has a Reaper maintenance training facility. Last fall, the wing began flying the drones out of Fort Drum's Wheeler-Sack Army Airfield for takeoff and landing practice.

Fort Drum is home to the oft-deployed 10th Mountain Division and funding has already been approved for a new training complex to replace World War II-era buildings. Obama's budget proposal includes still more for Fort Drum, including $95 million for an aircraft hangar and $25.9 million for a data terminal complex for the Missile Defense Agency.

"I actually think Fort Drum will be fine," Gillibrand said, "and largely because Drum is one of the premier training bases in the whole

USAF Force Structure Changes: Sustaining Readiness and Modernizing the Total Force

New Strategic Guidance

For the last decade, the United States has undertaken extended operations in Iraq and Afghanistan. As we responsibly draw down from these operations, take steps to protect our Nation's economic vitality, and protect our interests in a world of accelerating change, we face an inflection point. The changing geopolitical environment and our changing fiscal circumstances merited a reassessment of U.S. defense strategy. Out of this assessment, the Department of Defense (DoD) developed a strategy that transitions our defense enterprise from an emphasis on today's wars to preparing for future challenges, protects the broad range of U.S. national security interests, advances the Department's efforts to rebalance and reform, and supports the national security imperative of deficit reduction by reducing defense spending. The resulting strategic guidance provided a set of precepts to guide decisions regarding the size and shape of the force over subsequent budget cycles.

To implement the new strategic guidance, the Joint Force will need to recalibrate its capabilities and make selective additional investments to succeed in the following missions: countering terrorism and irregular warfare, deterring and defeating aggression, projecting power despite anti-access/area denial challenges, countering weapons of mass destruction, operating effectively in cyberspace and space, maintaining a safe, secure, and effective nuclear deterrent, defending the homeland and providing support to civil authorities, providing a stabilizing presence, conducting stability and counterinsurgency operations, and conducting humanitarian, disaster relief, and other operations.

These missions will determine and shape the capabilities required by the future Joint Force, and the Air Force must continue to provide key capabilities in all 10 mission areas. However, the overall capacity, or size of the force, will be based on the requirements that the following missions demand: countering terrorism and irregular warfare, deterring and defeating aggression, maintaining a safe, secure, and effective nuclear deterrent, and defending the homeland and supporting civil authorities. U.S. forces will no longer be sized to conduct large-scale, prolonged stability operations.

The new guidance requires U.S. forces to remain capable of deterring and defeating aggression by any potential adversary. Credible deterrence results from maintaining both the capabilities required to deny an aggressor the prospect of achieving his objectives and from the complementary capability to impose unacceptable costs on the aggressor. Our planning envisages forces that are able to fully deny a capable state's aggressive objectives in one region by conducting a combined arms campaign across all domains – land, air, maritime, space, and cyberspace. Even when U.S. forces are committed to a large scale operation in one region, they

will be capable of denying the objectives of – or imposing unacceptable costs on – an opportunistic aggressor in a second region.

The Air Force employed this guidance to prepare an FY13 budget request that ensures the Air Force meets the capability and force-sizing requirements directed by the new strategic guidance, and is:

- Adaptable and capable of deterring aggression and providing a stabilizing presence, especially in the highest priority areas and missions in the Asia-Pacific region and the Middle East, while still ensuring our ability to maintain our defense commitments to Europe and other allies and partners;
- Ready, rapidly deployable, and expeditionary such that it can project power on arrival;
- Capable of conducting homeland defense and providing support to civil authorities;
- Armed with cutting edge capabilities that exploit our technological, joint, and networked advantage;
- Able to reconstitute quickly or grow capabilities as needed; and
- Manned and led by the highest quality professionals.

To deliver the capabilities required by the new strategic guidance and remain within funding constraints, the Air Force made difficult choices in all core functions, including the decision to divest portions of combat and combat enabler forces. The guiding principle was balance. To retain critical core capabilities and maintain our ability to rapidly respond to mission demands, the Air Force balanced risk to force structure and modernization, while maintaining readiness and people programs across all mission areas. We will provide more details about our FY13 decisions on modernization, readiness, and people programs in the coming weeks.

This paper will focus on the decisions we made to divest aircraft and re-mission units, with a particular emphasis on how these choices affect the Air National Guard (ANG) and Air Force Reserve. Our programmed reductions follow detailed assessments of future conflict scenarios and enduring rotational deployment requirements and were chosen to maintain capable and lethal forces while preserving ready and sustainable Active and Reserve Components. The Air Force will be smaller, but will remain highly capable, lethal, ready, agile, and deployable.

Air Force Aircraft Reductions

The Air Force FY 13 Budget Request achieves $8.7 billion in savings across the Active and Reserve Components by retiring over 200 aircraft in FY 13 and nearly 300 aircraft over the FYDP, consistent with the new strategic guidance. Our programmed force reductions are wide ranging and affect over 60 installations. Without the Total Force re-missioning actions described later in the paper, they would have significantly affected 24 units and left eight installations without an Air Force presence. They will have direct impact in 33 states, but in order to support Total Force re-missioning, the manpower realignment plan built by the Reserve Components will significantly

affect additional units in all 54 states and territories. We will be able to provide manpower adjustments by installation and state in the coming weeks.

Our analysis of requirements driven by the new strategy shaped all of our decisions. Our force sizing analysis answered two complementary questions: what is the maximum, or surge, requirement posed by the force sizing model of the new strategy; and what is the steady state, or post-surge, requirement for deployed rotational forces? Because the new guidance requires the Joint Force to be capable of fighting one large scale, combined arms campaign with sufficient combat power to also deny a second adversary, and deemphasized large-scale, prolonged stability operations, our FY13 budget request accepts risk by retiring fighter, mobility, and intelligence, surveillance, and reconnaissance (ISR) aircraft excess to the surge requirements of the new force sizing construct. Although the U.S. has removed all combat forces from Iraq and the new strategic guidance reduces the steady state requirement for ground forces, we expect Air Force steady state rotational requirements to remain nearly constant, or perhaps increase, under the new strategy. This continuing rotational post-surge requirement is a key factor in determining the required mix between Active and Reserve Component forces due to differences in sustainable deployment rates and operations tempo.

Where possible, we attempted to retire all aircraft of a specific type, allowing us to also divest the unique training and logistic support structure for that aircraft. Where that was not possible, we worked to retire the oldest aircraft first, and redistributed aircraft into effective and economical units, eliminating other units when that was most efficient. Where we retained older aircraft, we are taking steps to ensure they will remain viable into the future.

Combat Air Forces

As directed by the new strategic guidance, we accepted risk in our Combat Air Forces by retiring or reclassifying aircraft from seven squadrons: five A-10 squadrons, one F-16 squadron, and one training/support coded F-15 Aggressor squadron. Because of the Department's evolving posture, one of the retiring squadrons is an overseas squadron. We chose to retire more A-10s as a result of guidance to size our forces for one large scale combined arms campaign with sufficient combat power to also deny a second adversary, without conducting a large scale, prolonged stability operation. The A-10 remains essential for combined arms and stability operations and we retain enough A-10s to meet the requirements of the new strategic guidance, but multi-role platforms provide more utility across the range of the potential missions for which we are directed to prepare.

After reductions, we retain 54 combat-coded fighter squadrons and maintain the capabilities and capacity required to meet the requirements of new strategic guidance at increased risk while providing a bridge to the Fifth Generation F-35. Although we transfer five F-15 Aggressor aircraft to attrition reserve status and eliminate one Aggressor squadron flag, we maintain a robust Aggressor training capability. We will relocate our F-16 Aggressor squadron in Alaska from Eielson AFB to Elmendorf AFB, allowing us to achieve savings in base support at Eielson beginning in FY15.

Mobility Air Forces

We also reduced our mobility capacity in line with the requirements of the new strategic guidance and the parallel reductions in land forces, retiring all 27 C-5As, retiring or canceling procurement of all 38 planned C-27Js, and retiring the 65 oldest C-130s. We chose to retire C-5As because of historically lower mission capable rates relative to the C-17 and C-5M. Retiring the entire C-5A fleet provides additional savings in training and logistics support that could not have been achieved by spreading retirements over multiple aircraft types. Divesting the entire C-27J fleet also achieves savings by substituting the lower life cycle costs of the more capable C-130 for the niche C-27J capability. As part of our C-130 retirement strategy, we streamline operations and maintenance by realigning some additional C-130 aircraft to ensure Reserve Component units operate only one C-130 type at any location.

After retirements, we will maintain a fleet of 275 strategic airlifters (52 C-5Ms and 223 C-17s) and 318 C-130s (134 C-130Js and 184 C-130Hs) and our analysis shows that the remaining aircraft are sufficient to meet the airlift requirements of the new strategy, including our commitment for direct support of the Army. We appreciate Congress' support in adjusting the legislated mandatory number of strategic airlifters. Given the changes in strategy and force sizing, we will be seeking a new minimum of 275 aircraft.

We also retire 20 KC-135s and maintain a fleet of 453 air refueling aircraft, sufficient to meet refined requirements. KC-46 development remains on track for initial deliveries in FY16.

Intelligence, Surveillance, and Reconnaissance

Intelligence, surveillance, and reconnaissance reductions divest all 18 Block 30 RQ-4s, generating $2.5 billion in Future Years Defense Program (FYDP) savings by choosing to rely on the proven capability of the mature U-2S aircraft and sensors. The U-2 has superior sensor capabilities now, meets the new Joint Requirements Oversight Council (JROC) force structure requirement, and is viable through 2040. We generate additional savings by eliminating funding for all 11 RC-26s while transferring the more capable MC-12 fleet from the Active Component to the Air National Guard in FY14. We also retire one E-8C aircraft that is damaged beyond economical repair.

Reserve Component Aircraft Reductions and Re-Missioning

The Air Force has enjoyed great success in leveraging our Total Force Enterprise to present our enduring capabilities to the Joint warfighter, and we have successfully met the demand of increased operations tempo over the last two decades through a combination of volunteerism, selective mobilization, and the creation of Active, Reserve, and Guard Associations. The Air National Guard and Air Force Reserve are integrated into all major Air Force mission areas, train to the same high standards as the Active Component, and are invaluable partners in meeting our many and varied commitments. Over the years, we have adjusted the mix between Active and Reserve Components to ensure we maintained a ready and sustainable force and could meet our

surge and rotational requirements. However, two decades of military end strength and force structure reductions have shifted the ratio of Active to Reserve Component forces. In 1990, the Reserve Component represented 25 percent of the Total Force end strength; that percentage has increased to 35 percent today. Reserve Component aircraft ownership also increased from approximately 23 percent to 28 percent over the same period.

Our Reserve Components have proven to be a superb investment -- providing critical Air Force capabilities through a very challenging time. However, our analysis tells us we have reduced the Active Component to the point that further reductions would limit our ability to respond quickly to multiple crises or sustain long duration commitments without asking our Airmen – Active and Reserve Component – to deploy at rates that cannot be sustained by our Total Force Airmen and their families. We also know that the entire Total Force – Active Component, Air National Guard, and Air Force Reserve – depends on the Active Component to recruit, train, and equip the Airmen of the future. Further Active Component aircraft reductions would require detailed analysis to ensure we do not make the Active Component too small to provide the skilled aircrew, maintenance, and support personnel required to sustain the Total Force. Maintaining the appropriate Active/Reserve mix will remain critical to sustaining Air Force capabilities for forward presence and rapid response, meeting overseas rotational demands with a smaller force, and taking care of our most precious resource, our people.

As we were driven to consider reductions in FY13, we carefully considered the ratio between the Active and Reserve Components and made choices that:

1) Ensured the Total Force could fulfill the Air Force's surge requirements as directed by the force sizing construct of the new strategic guidance;
2) Maintained the balance between Active and Reserve Components required to fulfill continuing rotational requirements at deployment rates and personnel tempos that are sustainable for both the Active and Reserve Components;
3) Made sure the Active Component retained the recruiting, training, and operational seasoning base required to sustain the Active Air Force, Air National Guard, and Air Force Reserve into the future; and
4) Ensured the Reserve Component remains relevant and engaged in both enduring and evolving missions.

The Air National Guard and Air Force Reserve were involved in all analysis and decisions, and employed the following principles and strategies to build Reserve Component aircraft reduction and re-missioning plans.

The Air National Guard's Capstone Principles informed Air Force decisions involving the ANG:

1) Allocate at least one flying unit with ANG equipment to each state;
2) Recapitalize concurrently and in balance with the regular component;
3) Manage Air National Guard resources with Air National Guard people;

4) Adopt missions that fit the militia construct; and
5) Build dual-use capabilities.

The Air Force Reserve employed the following realignment strategies in selecting specific locations for aircraft reductions:

1) Ensure aircraft reductions do not negatively impact operational support to the Combatant Commands;
2) Ensure force structure movements do not create any new Air Force bills;
3) Ensure risk is minimized by optimizing crew ratios to exploit expected increase in mission capability rates; and
4) Considered locations that continued to have an Air Force mission due to the presence of another Air Force Component.

Total Force Aircraft Reductions by Fiscal Year

FY 13 Actions: Divests all C-27J aircraft, eliminating aircraft based at or planned for Warfield AGS (Martin State), MD (4), Kellogg AGS (Battle Creek), MI (4), Fargo AGS (Hector), ND (4), Mansfield Lahm AGS, OH (4), Great Falls, MT (4), Bradley , CT (4), and Key Field AGS (Meridian), MS (6). Removes A-10s from Barksdale AFB, LA (retires 21 and transfers three), Selfridge ANGB, MI (21), Ft Smith, AR (20), Ft Wayne, IN (20), and an Active Component overseas location (20). Removes F-16s from Des Moines, IA (21) and transfers Active Component F-16 Aggressors from Eielson AFB, AK (19) to Joint Base (JB) Elmendorf-Richardson, AK (19). Aircraft retirements and transfers result in net reductions of C-130Hs at JB Elmendorf-Richardson, AK (4 H2) (eliminating an Active association), Niagara, NY (3 H2) (eliminating a Reserve association), Rosecrans AGS (St Joseph), MO (10 H2.5), Youngstown-Warren, OH (6 H2), Louisville, KY (1 H2.5), Charleston, WV (1 H3), Cheyenne, WY (1 H2.5), Stratton AGS (Schenectady), NY (4 H2), Dobbins ARB, GA (7 H2), and Pittsburgh, PA (7 H2). The Pittsburgh actions result in the closure of the associated Air Reserve Station at Pittsburgh, PA (closure does not exceed Base Realignment and Closure (BRAC) threshold in accordance with 10 U.S.C. § 2687). Retires KC-135s from Rickenbacker, OH (6), Pittsburgh ANGB, PA (4), Tinker AFB, OK (4), and Altus AFB, OK (three Active Component) as well as three Backup Aircraft Inventory (BAI) aircraft from Sky Harbor (Phoenix), AZ (1), Sioux City AGS, IA (1), and March ARB, CA (1). Reduces KC-135s at McGhee-Tyson, TN (2) and Gen Mitchell, WI (2). Begins retirement of the C-5A fleet at JB San Antonio (Lackland AFB), TX (5) and eliminates an E-8C damaged beyond economical repair from Robins ARB, GA (1). Retires Active Component Block 30 RQ-4s from Beale AFB, CA (18).

Proposed FY 14 Actions: Removes C-130Hs from Maxwell AFB, AL (7 H2), Naval Air Station (NAS) Joint Reserve Base (JRB) Ft Worth (Carswell), TX (8 H2) and Minneapolis-St Paul (8 H3), and removes C-130Js from Keesler AFB, MS (10). Continues to retire C-5As at JB San Antonio (Lackland AFB), TX (3) and Shepherd Field AGS (Martinsburg), WV (5). Converts Active Component F-15Cs at Nellis AFB, NV (5) from Primary Aircraft Inventory (PAI) to BAI status. Transfers 42 Active Component MC-12s from Beale AFB to the Air National Guard.

Proposed FY 15 Actions: Retires remaining Air National Guard C-5As based at Shepherd Field (Martinsburg), WV (6), and additional Air Force Reserve C-5As at JB San Antonio (Lackland AFB) (2). Eliminates funding for all 11 RC-26 aircraft, retiring aircraft based at Ellington Field (Houston), TX (1), Kirtland AFB, NM (1), Tucson, AZ (1), Fresno, CA (1), Fairchild AFB, WA (1), Key Field (Meridian), MS (1), Dannelly Field, AL (1), Truax AGS (Madison), WI (1), Hancock Field AGS (Syracuse), NY (1), Charleston, WV (1), and Jacksonville, FL (1).

Proposed FY 16 Action: Completes retirement of the Air Force Reserve C-5A fleet by divesting the remaining aircraft at JB San Antonio (Lackland AFB), TX (6). Removes C-130H from Savannah, GA (8 H2) and Little Rock, AR (eight Active Component H3). Removes C5Ms from Westover, MA (8).

Proposed FY 17 Actions: Removes C-130Hs from Niagara, NY (8 H2), Little Rock, AR (three Reserve Component H2), Charlotte, NC (2 H3), and Little Rock AR (six Active Component H3).

Total Force Re-Missioning by Fiscal Year

As a Total Force – Active Air Force, Air National Guard, and Air Force Reserve -- we have developed a detailed re-missioning plan that realigns continuing missions to preserve 14 of 24 units, maintains an Air Force presence on seven of the eight affected installations, expands Reserve Component participation in our growing ISR mission, and preserves an appropriate Active and Reserve Component force mix. The Air Force FY13 budget request commits approximately $600 million over the FYDP to execute and sustain re-missioning actions that establish new MQ-1/9 Remote Split Operations Squadrons, transfer the MC-12 fleet to the Air National Guard, thicken Reserve Component ISR and cyber participation, and transfer Active Component C-17s to the Reserve Component.

FY 12 Actions: Transfers six WC-130 aircraft from Nashville, TN to Luis Munoz, Puerto Rico, replacing retiring C-130Es. Establishes an MQ-1/9 Remote Split Operations (RSO) squadron at Nashville. Enlarges Nashville's Intelligence Squadron into a Targeting Group and creates a new Cyber/ISR Group.

FY 13 Actions: Completing a FY12 PB action, transfers eight C-17s from the Active Component to the Air National Guard at Memphis, TN (replacing C-5As). Adds C-130Hs at Youngstown-Warren, OH (4 H2.5) and Cheyenne, WY (1 H3). Establishes an ISR Group and expands the Net Warfare Sq at Warfield AGS (Martin State), MD to replace divested C-27s; establishes an Intelligence Targeting Group at Fargo AGS (Hector), ND; creates four additional MQ-1/9 RSO elements at Ft Smith, AR (replacing A-10s), Des Moines, IA (replacing F-16s), Kellogg AGS (Battle Creek), MI (replacing C-27s), and Willow Grove, PA; adds KC-135s to Selfridge ANGB, MI (4). Adds A-10s at Whiteman AFB, MO (3).

Proposed FY 14 Actions: Transfers 42 Active Component MC-12s to the Air National Guard by assigning between nine and eleven aircraft to each of four Air National Guard locations -- Ft Wayne, IN (replacing A-10s), Bradley, CT (replacing C-27s), Key Field AGS (Meridian), MS (replacing C-27s), and NAS Ft Worth JRB (Carswell), TX (replacing C-130s). Creates an Active Association at Beale AFB, CA to conduct MC-12 training and provides an additional deployed Combat Air Patrol

forward using up to six Air National Guard aircraft. Final aircraft assignments for the four Air National Guard locations and the Active association at Beale will be determined as part of the Air Force's FY14 budget submission after completion of a program plan and operational concept. Transfers C-130Js to Dobbins ARB, GA (10) (replacing C-130Hs) and C-130Hs to Rosecrans AGS (St Joseph), MO (8 H3) and Great Falls, MT (8 H2) (replacing C-27s).

Proposed FY 15 Action: Transfers eight Active Component C-17s to the Air National Guard at Shepherd Field AGS (Martinsburg), WV (replacing C-5As).

Proposed FY 16 Action: Within the Air Force Reserve, transfers eight C-5Ms from Westover ARB, MA to JB San Antonio (Lackland AFB), TX, (replacing C-5As). Replaces C-130H2s at Savannah, GA (8) with C-130H3s. Replaces Active Component C-130H3s (8) at Little Rock AFB, AR with C-130H1 (7).

Proposed FY 17 Action: Dobbins ARB, GA receives two additional C-130Js for a total of 12. Replaces C-130H2s at Niagara, NY (8) with C-130H3s. Replaces Active Component C-130H3s (6) at Little Rock AFB, AR with C-130H1s (7).

After proposed reductions and re-missioning, Reserve Component end strength will make up 33 percent of Total Force military personnel, a reduction of two percent from the FY12 President's Budget (PB) position. The Reserve Component will own 24 percent of Total Force aircraft, two percent less than their FY12 PB share. Within the Combat Air Forces, the percentage of total aircraft in the Reserve Component will be 38 percent, four percent less than in FY12. For the Mobility Air Forces, the Reserve Component share shifts from 51 percent to 46 percent.

Additional Actions

In addition to specific re-missioning actions, the Air Force has also taken a variety of steps to secure the future of the Air National Guard and Air Force Reserve in a balanced Total Force.

Future Aircraft Flow Down

We remain committed to acquiring the F-35A as our future multi-role fighter. Although delivery of the F-35 has been delayed, it is still the future of both Active and Reserve multi-role squadrons. The Air Force has acquired 12 F-35s to date and plans to acquire over 160 more through FY17. The full-rate production plan is yet to be determined.

We have decided to pursue a scalable Service Life Extension Program (SLEP) for approximately 350 F-16s. Although our oldest F-16s will remain viable through the end of this decade, we plan to begin fielding aircraft with SLEP structural improvements in 2017. The program will ensure the F-16 remains viable and relevant for future Active and Reserve Component multi-role fighter squadrons until the F-35 arrives in greater numbers. We will also upgrade combat avionics for a substantial portion of the SLEP-ed aircraft with aircraft delivery beginning in FY18.

We are committed to developing a detailed aircraft flow down plan that describes how the F-35 and modernized and SLEP-ed F-16s will be integrated into the Total Force and replace aging aircraft. We will build a detailed plan after we have a clearer view of F-35 delivery schedules and

have completed Force Composition Analysis studies to determine the optimum Active and Reserve Component unit size and force mix for our remaining multi-role fighter force. As always, the leadership of the Air National Guard and Air Force Reserve will be active partners in determining this mix.

We are also committed to making sure our 184 remaining C-130H variants remain viable and relevant. We developed the C-130 Avionics Modernization Program (AMP) to ensure our C-130H fleet met basic communication, navigation, surveillance, and air traffic management (CNS/ATM) requirements. We later determined that there are less technically complex approaches to meet these requirements and resolve select obsolescence issues. Therefore, our FY13 budget submission terminates the C-130 AMP. However, we have funded an FY13 new start CNS/ATM program to ensure our C-130H fleet will remain viable and relevant, while generating more than $2.2 billion in savings over the FYDP.

Strategic Basing Process

The Air Force Strategic Basing Process was established by the Secretary of the Air Force in August 2009 to create an open, transparent, and consistent process for selecting preferred Total Force basing options. We will employ the Strategic Basing Process to identify preferred Active and Reserve Component basing locations for new aircraft as they become available as part of our recapitalization and modernization efforts.

BRAC 2005 established Eglin AFB as the Initial Joint Training Site for the F-35A. In July 2010, the Air Force announced preferred alternatives for further basing of the initial 250-300 F-35As, identifying Hill AFB and Burlington ANGB as the initial operational locations and Luke AFB as the next training location after Eglin, accommodating all F-35As currently scheduled for delivery through FY19. The Air Force will announce future preferred and reasonable alternatives approximately three years prior to delivery of aircraft to the next round of bases. Given current F-35 production estimates, the next set of F-35 basing decisions will include domestic and overseas bases and will not be required prior to FY17. Over the next two years, we will determine the optimum size of Active and Reserve Component F-35 units and the total number of required F-35 operating locations.

The Air Force is currently developing requirements for the first two KC-46 bases, and expects to approve basing criteria in March 2012, identify candidate installations in June 2012, select preferred and reasonable alternatives in December 2012, and make final decisions in December 2013. These first two bases will begin receiving aircraft in FY16. We will announce future preferred and reasonable alternatives approximately three years prior to delivery of aircraft to the next round of bases. Given current production estimates, the next KC-46 basing decisions will not be required prior to FY14. We are committed to creating associations at all KC-46 operating locations in the continental United States.

Potential Legislative Changes

In coordination with the Air National Guard and Air Force Reserve, the Air Force and the Department of Defense are reviewing the authorities that might be needed to address the impact

of programmed force reduction and re-missioning actions on the affected members of the Air National Guard, Air Force Reserve, and their families.

Air Force Total Force Enterprise and Associations

The Air Force Total Force Enterprise (TFE) management approach provides an inclusive, fact-based, and iterative process designed to maximize combat capability and optimize force structure through a range of innovative organizational constructs and personnel policies that optimize and integrate the capabilities of all Air Force components.

Associations are an integral part of balancing the Total Force to meet the current and future air, space and cyber requirements of the Joint warfighter. Total Force Integration (TFI) associations pair two units, (host and associate) representing two Air Force components, operating together. The host unit is assigned the physical resources for mission accomplishment (aircraft, equipment, facilities) and the associate unit shares those resources. Currently, there are three types of TFI associations: Classic, Active and Air Reserve Component (ARC).

Classic Associations pair units as an Active Component host with a Reserve Component associate which can improve operational synergies and add capacity during surge operations at reduced cost. Active Associations pair a Reserve Component host and an Active Component associate to improve access to aircraft and total rotational capacity by assigning Active Component Airmen in Reserve Component units, allowing the highly experienced Reserve Component to help develop and season maturing Active Component Airmen. ARC Associations pair a Reserve Component host and a Reserve Component associate to deliver operational and organizational efficiencies.

There are currently 100 TFI associations across a variety of weapons systems/functional areas and Air Force Major Commands. The Air Force is planning to add Active Associations at all ARC fighter locations, and Air Mobility Command intends to establish Active or Classic Associations at all continental U.S. KC-46 locations. The Air Force will continue to explore additional opportunities for associations in order to create efficiencies, encourage retention of valuable human capital, and above all, increase Air Force combat capabilities.

New Associations

The Air Force has decided to maintain 18 assigned F-16 aircraft at Air National Guard fighter squadrons to support new F-16 Active Associations at Truax AGS (Madison), WI, Buckley, CO, Joe Foss Field, SD, and Duluth, MN, in addition to the Associations already programmed at Burlington, VT, and Dannelly Field, AL. Although the previously programmed Active Association at Barksdale AFB, LA, is eliminated with the Air Force Reserve Command A-10 retirement, the Active Associations at Whiteman AFB, MO, NAS Ft Worth JRB (Carswell), TX and Homestead ARB, FL will continue as planned. The Chief of Staff of the Air Force has directed the Air Force to develop additional Active Associations at all ARC fighter locations to ensure that the Total Force is able to absorb and season enough young pilots and maintainers to meet future Total Force requirements.

The AF FY13 budget request also establishes C-130J Active Associations at Dobbins ARB, GA starting in FY14, Quonset Point Airport, RI in FY16, and Channel Islands, CA in FY17, as well as an

Active Association with a C-130H unit in FY13 at a location still to be determined. Additionally, Classic Associations will be established in intelligence at Fort Meade, MD, Offutt AFB, NE and Hurlburt Field, FL, and in program analysis at Wright-Patterson AFB, OH. We have also established a new association with the MC-12W mission transfer to the Air National Guard in FY 14. An Active Association will be stood up to operate the MC-12W Flying Training Unit at Beale AFB, using up to six Air National Guard aircraft. The Active Association will also provide one Combat Air Patrol (CAP) of deployed capability.

The Air Force previously funded a RED HORSE Active Association at Beale AFB, CA, as well as Classic Associations in cyber at JB San Antonio (Lackland AFB), TX; Aviation Foreign Internal Defense at a location to be determined; Security Forces at Davis-Monthan AFB, NM; and intelligence at Wright-Patterson AFB, OH, and JB Langley-Eustis, VA. In all, 15 new Associations are programmed, and the Air Force will explore additional opportunities for associations in our FY14 budget submission.

Military Personnel Appropriation Budget Activity Code

We are normalizing our approach to how we program ARC Military Personnel Appropriation (MPA) man day funding by improving the way we forecast, plan, program, and fund MPA man day accounts in our budget build process. These inputs will ensure adequate and predictable funding to support the required level of Reserve Component participation. Our normalization efforts include introducing MPA requirements into our corporate planning process earlier and working with the Office of the Secretary of Defense to create a distinct budget activity with a sub-account dedicated to facilitating more flexible Reserve Component operations, increasing opportunities for Reserve Component participation, and tracking MPA within the Air Force Military Personnel Account. If approved, we would expect to include this account in our FY14 budget submission.

Improving Strategic Planning Transparency and Processes

We have embarked on an effort to examine Active Air Force, Air National Guard, and Air Force Reserve composition across all the Air Force's major functions through the Total Force Enterprise Review Process and System Force Composition Analyses. The Total Force Enterprise Evaluation Group reviews and provides oversight of all Total Force Associations and ensures they have met the requirements for effective operations. Force Composition Analyses examine individual weapons systems or processes and make recommendations for an appropriate Active/Reserve Component mix based on analysis of combat requirements, Total Force capacity, and system and manpower costs.

Most importantly, we have strengthened and refined our corporate processes to ensure that the Air National Guard and Air Force Reserve are involved at every step of our analysis and decision making. Air Force senior leaders have directed that the Air Force Reserve and Air National Guard will continue to be fully represented during system Force Composition Analyses and will participate fully in development of the Core Function Master Plans that guide actions to organize, train and equip the Total Force in each core function.

Air Force Reserve Component 2020 Study

We believe the Air Force Reserve Components set the DoD standard for Total Force integration and operational effectiveness, but we must ensure that we continue to improve our performance and processes to maximize our contribution to the Joint Force of 2020 and beyond. The Chief of Staff of the Air Force and Reserve Component leadership are developing terms of reference to guide an independent study that will evaluate our on-going efforts to optimize the Total Force and make recommendations to guide and shape our future efforts. The study team will likely be led by a former Chief of Staff of the Air Force and will include a former Director of the Air National Guard and Chief of the Air Force Reserve.

Conclusion

We remain fully committed to the essential contributions of the Total Force and have taken proactive steps to:

- Address the impact of force structure reductions in our Reserve Components by re-missioning units with enduring missions and assigning aircraft with extended life spans and improved capabilities;
- Plan for robust use of associations as we field F-35 and KC-46 units;
- Increase the number of associations between existing Active and Reserve units;
- Normalize our management of Reserve Component man days; and
- Improve the transparency of Total Force planning and develop our Total Force vision for the future.

The future of the Air Force depends on sustaining strong and ready Reserve Components, and we believe the Air Force Total Force sets the standard for integrating Active and Reserve Components to improve efficiency and effectiveness in peace and war. The force reductions proposed in the Air Force FY13 budget request were developed in response to new DoD strategic guidance, informed by reduced funding, and shaped by analysis to ensure that the Total Force will continue to fulfill the Air Force's surge requirements and meet continuing rotational demand. We will ensure that the Reserve Component remains engaged and relevant as the Active Component maintains the recruiting, training, and operational seasoning base required to sustain the Total Force into the future.

CS FOR SENATE CONCURRENT RESOLUTION NO. 1( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR DAVIS

A RESOLUTION

Designating May of each year as Lupus Awareness Month.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS, according to the Lupus Foundation of America, lupus is an acute, chronic, and often lifelong disease affecting the immune system by causing inflammation and tissue damage; and

WHEREAS major gaps exist in the understanding of the causes and consequences of lupus; and

WHEREAS lupus can affect any body part, including the skin, lungs, heart, kidney, and brain; and

WHEREAS lupus can cause seizures, strokes, heart attacks, miscarriages, and organ failures; and

WHEREAS anyone may develop lupus for reasons that are not understood; and

WHEREAS lupus strikes mostly women of childbearing age; and

WHEREAS women of color develop lupus at a rate two to three times the rate that Caucasians develop lupus; and

WHEREAS lupus can be particularly difficult to diagnose because its symptoms are

similar to the symptoms of other illnesses; and

WHEREAS new drugs have not been approved by the United States Food and Drug Administration for lupus during the last 50 years; and

WHEREAS current treatment for lupus can have damaging side effects; and

WHEREAS the Lupus Foundation of America designates National Lupus Awareness Month to show support for the estimated 1,500,000 Americans who suffer from lupus; and

WHEREAS more than 3,000 cases of lupus have been diagnosed in Alaska in patients 10 to 87 years of age; and

WHEREAS 10 members of the Lupus Foundation of America, Alaska Chapter, recently passed away from lupus;

BE IT RESOLVED that the Alaska State Legislature designates May of each year as Lupus Awareness Month; and be it

FURTHER RESOLVED that the Alaska State Legislature encourages the people of the state to observe Lupus Awareness Month with appropriate activities to increase awareness of lupus and show support for people diagnosed with the disease.

MEMORANDUM February 25, 2011

SUBJECT: Lupus Awareness Month; resolution or bill (CSSCR 1( ))
(Work Order No. 27-LS0099\B)

TO: Senator Bettye Davis
Attn: Celeste Hodge

FROM: Dennis C. Bailey DCB
Legislative Counsel

This draft accompanies committee substitute for SCR 1, sponsor blank, that changes the resolution to designate May of every year as Lupus Awareness Month rather than designating Lupus Awareness month for 2011.

I discussed with Celeste Hodge of your office the issue of whether the resolution could be modified to include the longer effect or if a bill would be required to make Lupus Awareness Month effective for every year. Either option is available.

A resolution is "used to reflect the will, wish, view, or decision of both houses speaking concurrently. It is used to handle the internal business of the legislature, including requesting action of executive agencies and interim committees, and fixing the time and place of joint assemblies." Uniform Rule 49(a)(3), Legislative Affairs Agency, *Manual of Legislative Drafting* at 76. The resolution essentially requests that Lupus Awareness Month be observed, but relies heavily on institutional memory. I have not found a prohibition against using a resolution to express the legislative view that Lupus Awareness Month be recognized each year. You could also consider using a new resolution each year recognizing Lupus Awareness Month.

Alternatively, a period of recognition lasting indefinitely has been designated in statute. *See*, *e.g.*, AS 44.12, 44.12.075, 44.12.098. Designating Lupus Awareness Month in statute would need to be implemented by a bill rather than a resolution. A resolution might simply be forgotten after the year in which it was passed, in contrast with a statute which would create an ongoing reminder for official agencies to observe Lupus Awareness Month.

If I may be of further assistance, please advise.

Senator Bettye Davis

SCR1 -27-LS0099\M - *"Designating May 2011 as Lupus Awareness Month"*

SPONSOR STATEMENT

SCR1 designates May 2011 as Lupus Awareness Month and encourages Alaskans to observe Lupus Awareness Month with appropriate activities that provide both lupus education and support for people diagnosed with the disease.

According to the Lupus Foundation of America, lupus is an acute, chronic and often lifelong disease affecting the immune system by causing inflammation and tissue damage. Major gaps exist in the understanding of the causes and consequences of lupus. Lupus can affect any body part, including the skin, lungs, heart, kidney, and brain. Lupus can cause seizures, strokes, heart attacks, miscarriages and organ failure. Lupus strikes mostly women of childbearing age and women of color develop lupus at a rate two-to-three times the rate that Caucasians develop lupus. Lupus is difficult to diagnose because its symptoms are similar to the symptoms of other illnesses. New drugs have not been approved by the United States Food and Drug Administration specifically for lupus during the last 50 years. Current treatment for lupus can have damaging side effects.

Each year, May is designated as Lupus Awareness Month to show support for the estimated 1.5 million Americans with lupus. More than 3,000 cases of lupus have been diagnosed in Alaska in patients 20 to 87 years of age. Ten members of the Lupus Foundation of America, Alaska Chapter recently passed away from lupus. Designating May 2011 as Lupus Awareness Month will help increase awareness of lupus and show support for those diagnosed with the disease.

SENATE CONCURRENT RESOLUTION NO. 1

What I Need to Know About Lupus

If you have been diagnosed with lupus, you will want to know as much as you can about the disease. Lupus is a chronic, autoimmune disease that can damage any part of the body (skin, joints, and/or organs inside the body). Normally the immune system produces proteins called antibodies that protect the body from foreign invaders, such as bacteria and viruses. With lupus, the immune system cannot tell the difference between these foreign invaders and the body's healthy tissues and creates autoantibodies ("auto" means "self") that attack and destroy healthy tissue. These autoantibodies cause inflammation, pain, and damage in various parts of the body.

Lupus is a disease of flares (the symptoms worsen and you feel ill) and remissions (the symptoms improve and you feel better). Lupus can range from mild to life-threatening and should always be treated by a doctor. With good medical care, most people with lupus can lead a full life.

What Causes Lupus?

No one knows what causes lupus. However, scientists believe that hormones, genetics (heredity), and environment are all involved. Hormones regulate many of the body's functions. In particular, the sex hormone estrogen is believed to play a role in lupus. Men and women both produce estrogen, but estrogen production is much greater in females.

Scientists have noted some common triggers among people who have lupus, including exposure to the sun, an infection, a medication taken to treat an illness, pregnancy, and giving birth.

However, that does not mean that estrogen, or any other hormone for that matter, causes lupus.

While no gene or group of genes has been proven to cause lupus, the disease does appear in certain families. And, although lupus can develop in people with no lupus in their family history, other autoimmune diseases may be present in some family members. Certain ethnic groups (people of African, Asian, Hispanic/Latino, Native American, or Pacific Island descent) have a greater risk of developing lupus, which may be related to genes they have in common.

Your genes may increase the chance that you will develop lupus, but scientists believe some kind of environmental trigger can set off the illness or bring on a flare, such as:

- *ultraviolet rays from the sun or from fluorescent light*
- *sulfa drugs and some tetracycline drugs, which make a person more sensitive to the sun*
- *penicillin or certain other antibiotic drugs*
- *infection*
- *a cold or a viral illness*
- *exhaustion*
- *injury*
- *emotional stress*
- *anything that causes stress to the body such as surgery, an accident, pregnancy, or giving birth*

Facts About Lupus

- Lupus is not contagious.
- Lupus is not like or related to cancer.
- Lupus is not like or related to HIV or AIDS.
- It is believed that at least 1.5 million people in the U.S. have lupus.
- More than 16,000 new cases of lupus in the U.S. are reported each year.
- Lupus strikes mostly women of childbearing age.
- Women of color are 2-3 times more likely to develop lupus.
- People of all races and ethnic groups can develop lupus.

Forms of Lupus

Systemic lupus erythematosus is the most common form of lupus, and is what most people mean when they refer to "lupus." Systemic lupus can be mild or severe. Some of the more serious complications involving major organ systems are:

- *inflammation of the kidneys (lupus nephritis)*
- *an increase in blood pressure in the lungs (pulmonary hypertension)*
- *inflammation of the heart muscle (myocarditis)*
- *hardening of the arteries (coronary artery disease)*
- *inflammation of the nervous system and brain*
- *inflammation of the brain's blood vessels*

Cutaneous lupus erythematosus is limited to the skin. Although cutaneous lupus can cause many types of rashes and lesions (sores), the most common rash is raised, scaly and red, but not itchy; it is called a *discoid rash* because the areas of rash are shaped like disks, or circles. Another common example of cutaneous lupus is a rash over the cheeks and across the bridge of the nose, known as the *butterfly rash*. Hair loss and changes in the pigment, or color, of the skin are also symptoms of cutaneous lupus.

Drug-induced lupus is a lupus-like disease caused by certain prescription drugs. The drugs most commonly connected with drug-induced lupus are hydralazine (used to treat high blood pressure or hypertension), procainamide (used to treat irregular heart rhythms), and isoniazid (used to treat tuberculosis). The lupus-like symptoms usually disappear within six months after these drugs are stopped.

Neonatal lupus is a rare condition that can affect infants of women who have lupus. At birth, the infant may have a skin rash, liver problems, or low blood cell counts, but all of these symptoms disappear completely after several months with no lasting effects. A very small percentage of infants with neonatal lupus may also have a serious heart defect; however, most infants of mothers with lupus are entirely healthy.

Another common example of cutaneous lupus is a rash over the cheeks and across the bridge of the nose, known as the butterfly rash.

What Are the Symptoms of Lupus?

Because lupus can affect so many different organs, a wide range of symptoms can occur. The most common symptoms of lupus, which are the same for females and males, are:

- *extreme fatigue (tiredness)*
- *headaches*
- *painful or swollen joints*
- *anemia (low numbers of red blood cells)*
- *fever*
- *swelling (edema) in feet, legs, hands, and/or around the eyes*
- *pain in chest on deep breathing (pleurisy)*
- *butterfly-shaped rash across cheeks and nose*
- *sun- or light-sensitivity (photosensitivity)*
- *hair loss*
- *blood clotting problems*
- *fingers turning white and/or blue when cold (Raynaud's phenomenon)*
- *ulcers in mouth or nose*

Most people with lupus will be treated by a rheumatologist, who is a specialist in the diseases of joints and muscles.

What Kinds of Doctors Treat Lupus?

Most people with lupus will be treated by a *rheumatologist*, who is a specialist in the diseases of joints and muscles. The rashes or lesions from cutaneous lupus require treatment from a *dermatologist*, a specialist in diseases that affect the skin (including the scalp and the mouth).

Because lupus can cause damage to any part of the body, other specialists may be necessary, such as a *nephrologist*, who specializes in kidney problems; a *cardiologist*, who specializes in heart problems; a *neurologist*, who specializes in problems that affect the brain and nervous system; or a *perinatologist*, who specializes in high-risk pregnancies.

The Lupus Foundation of America (LFA) is the nation's leading nonprofit voluntary health organization dedicated to finding the causes of and cure for lupus and providing support and services to all people affected by the disease. The LFA and its network of chapters pursue this mission through programs of research, education and advocacy. Contact the LFA or a chapter that serves your area to find out how you can become involved in our mission and how we can help you. For more information call 1-800-558-0121 or visit us online at www.lupus.org.

CS FOR SENATE CONCURRENT RESOLUTION NO. 2( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS DAVIS, Ellis

A RESOLUTION

Proposing amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** Rule 1(a), Uniform Rules of the Alaska State Legislature, is amended to read:

(a) At the time for convening of the first regular session of a legislature, the lieutenant governor calls each house to order separately and calls the roll of members whose election has been certified. The lieutenant governor then administers the oath of office to the new members and, pending the election of [TEMPORARY] presiding officers **pro tempore**, preserves order and decorum in the house.

* **Sec. 2.** Rule 1(b), Uniform Rules of the Alaska State Legislature, is amended to read:

(b) When the house by a majority vote of the full membership of the house selects a [TEMPORARY] presiding officer **pro tempore**, the [TEMPORARY] presiding officer **pro tempore** assumes the chair, and the lieutenant governor withdraws. The [TEMPORARY] presiding officer **pro tempore** then calls for nominations for a **regular** [PERMANENT] presiding officer, and the nominee receiving a majority vote of the full membership of the house becomes the **regular**

[PERMANENT] presiding officer for the two-year duration of the legislature. If a **regular** [PERMANENT] presiding officer is not elected by the seventh legislative day, on the eighth legislative day, the [TEMPORARY] presiding officer **pro tempore** shall call for nominations for a **regular** [PERMANENT] presiding officer from the floor. A roll call vote shall be taken on the persons nominated. Election of a **regular** [PERMANENT] presiding officer requires a majority vote of the full membership of the house.

*** Sec. 3.** Rule 1(c), Uniform Rules of the Alaska State Legislature, is amended to read:

(c) Pending the organization of the house, a secretary assigned by the Legislative Council assists the lieutenant governor**, the presiding officer pro tempore,** and the **regular** [TEMPORARY AND PERMANENT] presiding **officer** [OFFICERS] in the performance of their duties.

*** Sec. 4.** Rule 4, Uniform Rules of the Alaska State Legislature, is amended to read:

Rule 4. Duties of the Presiding Officer. The presiding officer of each house has the duties set forth in Section 575, MASON'S MANUAL OF LEGISLATIVE PROCEDURE, 2000 edition, when not inconsistent with these Uniform Rules. In the absence of the regular presiding officer, the majority leader of the house **shall serve** [SERVING EX OFFICIO] as presiding officer**. In the absence of the regular presiding officer, and in the absence of the majority leader of the house, the presiding officer pro tempore elected under Rule 1(b) shall preside over sessions of the house. When presiding during sessions of the house, the majority leader or the presiding officer pro tempore elected under Rule 1(b) may exercise the duties of the regular presiding officer. The** [PRO TEMPORE SHALL PRESIDE; EXCEPT THAT THE] regular presiding officer**, the majority leader, or the presiding officer pro tempore** may temporarily relinquish the chair to any member.

MEMORANDUM February 8, 2011

SUBJECT: Sectional Summary to SCR 2 with amendment
(Work Order Nos. 27-LS0031\A.1 & 27-LS0031\M)

TO: Senator Bettye Davis
Attn: Tom Obermeyer

FROM: Doug Gardner
Director

You requested a sectional summary for the enclosed proposed language amending section 4 of SCR 2, a bill relating to proposed amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore. You may rely on my prior memo for a sectional summary of sections 1 - 3 of SCR 2. At your request, I am enclosing a blank amendment and a blank committee substitute.

As a preliminary matter, a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

In the proposed amendment and blank committee substitute, **section 4** amends Uniform Rule 4 by establishing that, in the absence of both the regular presiding officer (Speaker of the House) and the absence of the majority leader, the presiding officer pro tempore previously elected in Uniform Rule 1(b) serves as the presiding officer pro tempore. The result of the language amending section 4 of SCR 2, is that the presiding officer pro tempore elected at the start of the first session of a legislature, in addition to the presiding officer pro tempore's duties set out in Uniform Rule 1(b), will continue for both sessions to serve as a "backup" in the absence of the regular presiding officer (Speaker of the House) and majority leader.

If you have additional questions, please advise.

MEMORANDUM January 28, 2011

SUBJECT: Sectional Summary to SCR 2 (Work Order No. 27-LS0031\A)

TO: Senator Bettye Davis
Attn: Tom Obermeyer

FROM: Doug Gardner
Director

You requested a sectional summary of SCR 2, a bill relating to proposed amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore.

As a preliminary matter, a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1 of the bill amends Uniform Rule 1(a) by replacing "temporary" with the phrase "pro tempore," making the use of the term "pro tempore" consistent throughout Uniform Rule 1.

Section 2 of the bill amends Uniform Rule 1(b) by replacing "temporary" with the phrase "pro tempore" in two places in Uniform Rule 1(b). Again, replacing "temporary" with "pro tempore" achieves consistency throughout Uniform Rule 1 when describing the "pro tempore" officer. This section also replaces "permanent" with the word "regular" when identifying the regular presiding officer in four places in Uniform Rule 1(b). The term "regular" is used to replace reference to the existing "permanent" officer, and provides consistency in describing the "regular" officer throughout Uniform Rule 1.

Section 3 of the bill amends Uniform Rule 1(c) by replacing the phrase "temporary and permanent," with "the presiding officer pro tempore," and "regular," and also replaces "officers" with "officer." Again, the proposed amending language is used to achieve consistency throughout Uniform Rule 1.

Section 4 of the bill amends Uniform Rule 4 by deleting the phrase "majority leader of the house serving ex officio as," and adds the phrase "during sessions of the house and may exercise any other duty of the regular presiding officer." This section also adds the phrase "or the presiding officer pro tempore," to the existing phrase "regular presiding

officer." The amending language allows the regular presiding officer or the presiding officer pro tempore to temporarily relinquish the floor to any member. However, this section changes the existing language of Uniform Rule 4 by deleting reference to the majority leader of the house. This section provides that the presiding officer pro tempore, who is selected under Uniform Rule 1(b), is not necessarily the majority leader of the house, but is the officer pro tempore elected by the house by a majority vote as provided in Uniform Rule 1(b). This section amending Uniform Rule 4 continues to allow that where the regular presiding officer is absent or unavailable, the presiding officer pro tempore, selected in Uniform Rule 1(b), presides over the house, and may exercise the same duties as the regular presiding officer.

ALASKA STATE LEGISLATURE

UNIFORM RULES

ADOPTED 1981

by the

TWELFTH LEGISLATURE - FIRST SESSION

AS AMENDED 1985, 1988, 1989, 1991, 1998, 2001, 2003, 2004, 2008

Legislative Affairs Agency

ORGANIZATION OF FIRST SESSION

Rule 1. Organization of First Session. (a) At the time for convening of the first regular session of a legislature the lieutenant governor calls each house to order separately and calls the roll of members whose election has been certified. The lieutenant governor then administers the oath of office to the new members and, pending the election of temporary presiding officers, preserves order and decorum in the house.

(b) When the house by a majority vote of the full membership of the house selects a temporary presiding officer, the temporary presiding officer assumes the chair and the lieutenant governor withdraws. The temporary presiding officer then calls for nominations for a permanent presiding officer and the nominee receiving a majority vote of the full membership of the house becomes the permanent presiding officer for the two-year duration of the legislature. If a permanent presiding officer is not elected by the seventh legislative day, on the eighth legislative day the temporary presiding officer shall call for nominations for a permanent presiding officer from the floor. A roll call vote shall be taken on the persons nominated. Election of a permanent presiding officer requires a majority vote of the full membership of the house.

(c) Pending the organization of the house a secretary assigned by the Legislative Council assists the lieutenant governor and the temporary and permanent presiding officers in the performance of their duties.

(d) The Uniform Rules of the Legislature of the previous regular session or any authorized revision of those rules are used as the temporary rules until the Rules Committee reports on and the legislature in joint session adopts permanent uniform rules.

(e) The presiding officer shall announce, not later than the day following election, the appointment of a Committee on Committees consisting of five members including the presiding officer. The presiding officer chairs the Committee on Committees. The committee is responsible for nominating the members of the standing committees as set out in Rule 20 and the member who is to chair each standing committee to serve for the two-year duration of the legislature. The membership of each committee shall total to an uneven number. On each standing committee the minority is entitled to the number of seats that is proportional to the number of minority members compared to the total house membership or to one seat, whichever is greater. In calculating the number of seats the minority is entitled to, fractional numbers that represent the minority proportional entitlement to a seat shall be ignored. The report of the Committee on Committees is subject to approval by a majority vote of the full membership of the house. For purposes of this subsection "minority" means a group of members who have organized and elected a minority leader and who constitute at least 25 percent of the total house membership.

ORGANIZATION OF SECOND SESSION

Rule 2. Organization of Second Session. The presiding officer of each house during the first regular session presides during the second regular session or any special session and administers the oath to any new members.

LEGISLATIVE SESSION STAFF

Rule 3. Legislative Session Staff. (a) Each house elects an internal administrative officer (a chief clerk in the house and a secretary in the senate) to serve for the two-year duration of the legislature. The officer is nominated by the Rules Committee and elected by a majority vote of the full membership of the house. The chief clerk and secretary are responsible for the selection and supervision of the staff of their offices and are subject to the direction of the presiding officer and Rules Committee according to law and legislative rule.

(b) The Rules Committee of each house is responsible for the selection and direction of the session staff assigned to each chamber (sergeant-at-arms and their assistants, pages and messengers) and is the source of approval for hiring session assistants for standing, special, and joint committees and caucuses and secretarial help to be assigned to individual members. The Rules Committees of the house and senate shall decide jointly and within the amount budgeted for session staff the compensation and conditions of employment of those working under their individual supervision. The director of administrative services of the Legislative Affairs Agency shall assist and make recommendations to the Rules Committees regarding staff compensation and related matters.

(c) The sergeant-at-arms shall attend all sessions of the house unless absent for the purpose of discharging the duties of the office. The sergeant-at-arms shall maintain order on the floor of the chamber and in the galleries and adjoining hallway, and assure that any person not permitted by law or legislative rule to be present in the chamber is removed from the chamber. The sergeant-at-arms shall assure that a member does not leave the chamber during a call of the house, and shall act to secure the attendance in the chamber of members missing during a call of the house.

DUTIES OF THE PRESIDING OFFICER

Rule 4. Duties of the Presiding Officer. The presiding officer of each house has the duties set forth in Section 575, MASON'S MANUAL OF LEGISLATIVE PROCEDURE, 2000 edition, when not inconsistent with these Uniform Rules. In the absence of the regular presiding officer, the majority leader of the house serving ex officio as presiding officer pro tempore shall preside; except that the regular presiding officer may temporarily relinquish the chair to any member.

Senator Bettye Davis

SCR 2, 27-LS0031 - "Proposing amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore."

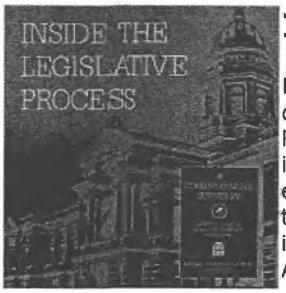
SPONSOR STATEMENT

SCR 2 amends Uniform Rules 1 and 4 to increase the roles and responsibilities of Presiding Officers Pro Tempore. The term "pro tempore" is derived from the Latin phrase "for a time." To make the titles more consistent throughout the Rules and to recognize increased status and duties of Presiding Officers Pro Tempore in the leadership of both houses, Sections 1 and 2 of Uniform Rule 1 change the titles of *Temporary Presiding Officers* to *Presiding Officers Pro Tempore* and *Permanent Presiding Officers* to *Regular Presiding Officers*.

Section 4, Rule 4, Uniform Rules is amended and establishes that in the absence of both the Regular Presiding Officer (Senate President/Speaker of the House) and in the absence of the Majority Leader, the Presiding Officer Pro Tempore previously elected in Uniform Rule 1(b) serves as the Presiding Officer Pro Tempore.

The result of the language amending section 4 of SCR 2 in the original bill is that the Presiding Officer Pro Tempore elected at the start of the first session of a Legislature, in addition to the Presiding Officer Pro Tempore's duties set out in Uniform Rule 1(b), will continue for both sessions to serve as a "backup" in the absence of the regular presiding officer (President of the Senate/Speaker of the House) and Majority Leader. These changes effectively create a third permanent position in the leadership without changing the present leadership structure. The Regular Presiding Officer, the Majority Leader and the Presiding Office Pro Tempore may temporarily relinquish the chair to any member.

These changes in the Uniform Rules mean that in addition to the few minutes of prominent duties, honor, and high visibility assigned to the Presiding Officer Pro Tempore to help organize the houses at the beginning of every two year session, the Presiding Officer Pro Tempore may function in capacities delegated in the absence of the Regular Presiding Officer and Majority Leader.



Inside the Legislative Process

Now, *Inside the Legislative Process* is becoming an electronic document—making its information more accessible to legislators and legislative staff. The electronic version will include all sections published since 1996. Access the electronic edition of *Inside the Legislative Process* through the Published Sections List. Please note that the individual sections are published as PDFs, which will require Adobe Acrobat Reader to download the documents.

As of January 2010

Background

Inside the Legislative Process is a nationally-recognized, valuable research tool, providing some of the best information on state legislative processes. It is produced through a cooperative effort between the American Society of Legislative Clerks and Secretaries (ASLCS) and the National Conference of State Legislatures (NCSL).

In 1975, ASLCS authorized its first comprehensive survey of the structure, size, function and operations of the clerks' and secretaries' offices in the 50 state legislatures. The survey proved to be an extraordinarily useful document, not only to the Society's members but also to the NCSL and to others who are interested in the management and procedures of legislative chambers. The data proved so beneficial that the surveys have been continued. Surveys were conducted in 1975, 1979, 1982, 1985, 1988, 1992, 1996, 1997, 1998, 1999, 2000, 2002, 2004, 2006 and 2008.

The publication format for *Inside the Legislative Process* has changed over the years. In 1975, the data were compiled into charts for use by ASLCS members. From 1979 through 1992, editions were published every three to four years as stand-alone books. Beginning with the 1996 edition, *Inside the Legislative Process* became a publication with its information divided among several general topic tabs in a three-ring binder.

Topics Covered by Various Editions

Legislatures deal with a large number of parliamentary issues—too many to be addressed in a single survey. As a result, the topics covered by each edition of *Inside the Legislative Process* typically vary.

Year*	Topics Covered
1979 (available in printed format only)	Selection and duties of the clerk and secretary; staff; parliamentary authority; journals; calendars; bills; committee process; legislative procedures; public information offices; publications; computerization; roll call voting systems; fiscal information; recording of session or committee meetings
1982 (available in printed format only)	Office of the chief clerk and secretary; salaries and benefits; bill processing; printing of legislative documents; referral of bills to committee; calendaring process; advance public notice of committee meetings; taping of committee meetings and floor sessions; parliamentary authority; public information; media coverage; computerization
1985 (available in printed format only)	Office of the chief clerk and secretary; salaries, benefits and personnel policies; printing of legislative documents; referral of bills to committee; calendaring process; advance public notice of committee meetings; committee consideration and reporting of bills; taping committee meetings and floor sessions; conference committee procedures; media coverage; electronic roll call voting systems; computerization
1988 (available in printed format only)	Calendaring process; handling of floor amendments; voting practices; consent calendars; introduction and referral of bills; courtesy or personal resolutions; ceremonial practices (including prayer practices); referral of bills to committee; appointment of standing committee chairs and members; standing committee size and structure; committee scheduling during the session; legislative party caucuses; bill processing; printing of legislative documents; capitol facilities; salaries, benefits and leave policies

1991 (available in printed format only)	Legislative organization; regular, extraordinary or special sessions; committee consideration of bills; committee report information; advance notice of committee meetings and open meeting requirements; expediting the legislative process; readings of bills; processing of bills; debate; taping committee meetings and floor sessions; public information; printing (of legislative documents); document charges; the journal; selection of the principal clerk; selection of other chamber offices; staff functions; parliamentary authority; fringe benefits; leave plans and time
1996	Opening day of session; new member orientation; mechanisms used to streamline bill processing; sponsorship limits for legislation; referral of bills, standing committees; subcommittees; conference committees; floor amendments; vote requirements; roll call voting machines and practices; censure, expulsion and other disciplinary actions
1997	Rules committees; access to printed legislative documents; electronic access to legislative documents; communicating with legislators
1998	Engrossing process; enrolling procedures; the calendaring process; end-of-session logjam; the veto process
1999	Legislative party caucuses; legislative leaders; recording legislative proceedings; media or public information services; the principal clerk or secretary (which also includes info on other job positions within the office); parliamentary authority
2000	Legislative organizational sessions; transition process; germaneness requirements; reconsideration processes; the legislative journal; archiving legislative documents
2002	Bill prefiling; personal, congratulatory, ceremonial or courtesy resolutions; prayer practices; open meetings and notice requirements
2004	Regular and special or extraordinary sessions; committee procedures
2006	Floor Amendment procedures; automation of journal production
2008	Readings of bills; mandatory roll call votes; messaging

Legislative Leaders

Leadership positions. At the beginning of each legislative session, decisions are made concerning leadership positions. Among the first is the determination of which titles will be used and the number of individuals who may hold each position. The most common leadership titles are president of the Senate, speaker of the House, majority leader and minority leader. However, there usually are no limits to the names and numbers of leadership positions that may exist, and table 99-2.13 illustrates the variety used by legislative chambers.

Selection and terms. Once titles and the number of individuals to hold each position have been set, the actual selection of legislative leaders commences. It is one of the key steps taken to organize a legislative chamber, and tables 99-2.14 through 99-2.18 illustrate how state legislatures choose their leaders.

The presiding officer—that is, the president of the Senate or speaker of the House—typically is elected by a vote of the full body. However, in the states shown below, the person who is elected by the people to serve as lieutenant governor acts as the president of the Senate.

Alabama
Arkansas
California
Connecticut
Delaware
Georgia
Idaho
Indiana
Michigan
Mississippi
Missouri
Nebraska
Nevada
New Mexico
New York
North Carolina
North Dakota
Oklahoma
Pennsylvania
Rhode Island
South Carolina
South Dakota
Texas
Vermont
Virginia
Washington

The president pro tem selects other caucus leaders in three states. In Alabama, the president pro tem appoints the Senate majority leader and assistant majority leader. The Senate assistant majority leader and the majority whip are appointed by this leader in Connecticut. In the Indiana Senate, the president pro tem chooses the majority leader, assistant majority leader and majority whip.

The majority leader appoints other caucus leaders in the Connecticut Senate and House, Florida Senate and House, Iowa Senate, Minnesota Senate, Oregon Senate and Rhode Island Senate. The specific leaders who are selected by the majority leader are:

Connecticut Senate	Assistant majority leader, majority whip
Connecticut House	Deputy majority leader
Florida Senate	Majority whip
Florida House	Majority floor leader, majority caucus chair
Iowa Senate	Majority caucus secretary
Minnesota Senate	Majority whip, majority caucus secretary
Oregon Senate	Assistant majority leader, majority whip
Rhode Island Senate	Majority whip

In the Delaware House, the speaker pro tem is the most senior member of the majority caucus. The chairman of the District of Columbia Council is elected by the citizens of Washington, D.C.

In most legislatures, there is no limit to the number of years that an individual may hold a leadership position. However, 24 chambers reported that some of their leadership positions have term limits—either official or unwritten. Table 99-2.19 highlights these limits.

Roles and responsibilities. The roles and responsibilities of legislative leaders vary considerably among the states. Shown below are brief synopses of the duties typically associated with selected leadership positions. Tables 99-2.20 through 99-2.36 provide more detailed information on leaders' duties.

President of the Senate. The president is the principal leader of the Senate. The president typically will 1) preside over the daily sessions of the Senate, 2) preserve order in the chamber, 3) state parliamentary motions, 4) rule on parliamentary questions, 5) appoint committee chairs and members, 6) refer bills to committee, 7) sign legislation, writs and warrants, and 8) act as the official spokesperson for the chamber. In about 26 states, the lieutenant governor serves as the president of the Senate, and many of these duties often are assumed by the president pro tem.

President pro tem of the Senate. The primary roles assigned to the president pro tem are to 1) preside over the Senate in the president's absence, 2) exercise the powers and duties of the president in his or her absence, and 3) assume other duties as assigned by the president. Sometimes, this is an honorary position, with few substantive duties assigned. In states where the lieutenant governor presides over the Senate, the president pro tem often assumes duties associated with a president.

Speaker of the House or Assembly. The speaker is the principal leader of the House or Assembly. The speaker typically will 1) preside over the daily sessions of the House or Assembly, 2) preserve order in the chamber, 3) state parliamentary motions, 4) rule on parliamentary questions, 5) appoint committee chairs and members, 6) refer bills to committee, 7) sign legislation, writs and warrants, and 8) act as the official spokesperson for the chamber.

Speaker pro tem. The primary roles assigned to the speaker pro tem are to 1) preside over the House or Assembly in the speaker's absence, 2) exercise the powers and duties of the speaker in his or her absence, and 3) assume other duties as assigned by the speaker. In some states, this is an honorary position, with few substantive duties assigned.

Majority leader or majority floor leader. The primary functions of a majority leader usually relate to floor duties. The majority leader 1) is the lead speaker for the majority party caucus during floor debates, 2) develops the calendar, and 3) assists the president or speaker with program development, policy formation and policy decisions.

Majority whip. The duties of the majority whip are to 1) assist the floor leader, 2) ensure member attendance, 3) count votes, and 4) generally communicate the majority position on issues.

Majority caucus chair. The majority caucus chair generally 1) develops the majority caucus agenda with other principal leaders, 2) presides over the majority caucus meetings, and 3) assists with the development of policy.

Majority caucus secretary. The main responsibility of the majority caucus secretary is to keep records of caucus meetings.

Minority leader or minority floor leader. The minority leader is the principal leader of the minority party caucus. The minority leader is responsible for 1) developing the minority position, 2) negotiating with the majority party, 3) directing minority caucus activities on the chamber floor, and 4) leading floor debate for the minority caucus.

Minority Whip. The major responsibilities for the minority whip are to 1) assist the minority leader on the chamber floor, 2) count votes, and 3) ensure attendance of minority party members.

Minority caucus chair. The minority caucus chair 1) presides over caucus meetings and 2) assists the minority leader with policy development.

Minority caucus secretary. The main responsibility of the minority caucus secretary is to keep records of caucus meetings.

WOMEN IN ELECTIVE OFFICE 2011

In 2011, 89 women serve in the U.S. Congress. Seventeen women serve in the Senate and 72 women serve in the House. The number of women in statewide elective executive posts is 68, while the proportion of women in state legislatures is 23.3 percent.

CONGRESS

In 2011, women hold **89**, or **16.6%**, of the 535 seats in the 112th U.S. Congress — **17**, or **17.0%**, of the 100 seats in the Senate and **72**, or **16.6%**, of the 435 seats in the House of Representatives. Congresswoman Nancy Pelosi (D-CA), who was the first woman Speaker of the House, is now minority leader.

Seventeen (12D, 5R) women serve in the **Senate: Kelly Ayotte** (R-ND), **Barbara Boxer** (D-CA); **Maria Cantwell** (D-WA); **Susan Collins** (R-ME); **Dianne Feinstein** (D-CA); **Kirsten Gillibrand** (D-NY); **Kay Hagan** (D-NC); **Kay Bailey Hutchison** (R-TX); **Amy Klobuchar** (D-MN); **Mary Landrieu** (D-LA); **Claire McCaskill** (D-MO); **Barbara Mikulski** (D-MD); **Lisa Murkowski** (R-AK); **Patty Murray** (D-WA); **Jeanne Shaheen** (D-NH); **Olympia Snowe** (R-ME); and **Debbie Stabenow** (D-MI).

Seventy-two women from 27 states serve in the House of Representatives; **48** are Democrats and **24** are Republicans. In addition, three Democratic women serve as the Delegates to the House from Guam, the Virgin Islands and Washington, DC.

STATEWIDE ELECTIVE EXECUTIVE OFFICES

In 2011, **68** women hold statewide elective executive offices across the country; women hold **21.6%** of the 315 available positions. Among these women, **38** are Democrats, **29** are Republicans, and **1** was elected in a nonpartisan race.

STATE LEGISLATURE (cont.)

The states with the **highest percentages** of women state legislators are:

State	% Women	State	% Women
Colorado	40.0	Washington	31.3
Vermont	37.8	Maryland	30.9
Arizona	34.4	Illinois	29.4
Hawaii	32.9	Connecticut	28.9
Minnesota	31.8	Nevada	28.6

MUNICIPAL OFFICIALS

As of August 2010, among the 100 largest cities in the U.S., **7** had women mayors. One is African American (Stephanie Rawlings-Blake, Baltimore). In order of city population,[1] the mayors are:

City	Mayor	Rank
Houston, TX	Annise D. Parker	5
Baltimore, MD	Stephanie Rawlings-Blake	21
Fresno, CA	Ashley Swearengin	40
Tampa, FL	Pam Iorio	59
Stockton, CA	Ann Johnston	73
Glendale, AZ	Elaine M. Scruggs	85
Chula Vista, CA	Cheryl Cox	94

As of August 2010, of the 249 mayors of U.S. cities with populations 100,000 and over, **33**, or **13.3%**, were women, including two African Americans, and one Asian/Pacific Islander. Of the 1156 mayors of U.S. cities with populations 30,000 and above, **202**, or **17.5%**, were women.[2]

PERCENTAGES OF WOMEN IN ELECTIVE OFFICES

Year	U.S. Congress	Statewide Elective	State Legislatures	Year	U.S. Congress	Statewide Elective	State Legislatures

WOMEN IN STATE LEGISLATURES 2011

In 2011, **1,718**, or **23.3%** of the 7,382 state legislators in the United States are women. Women currently hold **415**, or **21.1%**, of the 1,971 state senate seats and **1,303**, or **24.1%**, of the 5,411 state house or assembly seats. Since 1971, the number of women serving in state legislatures has more than quintupled.

Year	Women Legislators	% of Total Legislators	Year	Women Legislators	% of Total Legislators	Year	Women Legislators	% of Total Legislators
1971	344	4.5	1989	1,270	17.0	2002	1,682	22.7
1973	424	5.6	1991	1,368	18.3	2003	1,654	22.4
1975	604	8.0	1993	1,524	20.5	2004	1,659	22.5
1977	688	9.1	1995	1,532	20.6	2005	1,674	22.7
1979	770	10.3	1997	1,605	21.6	2006	1,681	22.8
1981	908	12.1	1998	1,617	21.8	2007	1,732	23.5
1983	991	13.3	1999	1,664	22.4	2008	1,751	23.7
1985	1,103	14.8	2000	1,670	22.5	2009	1,797	24.3
1987	1,170	15.7	2001	1,666	22.4	2010	1,809	24.5
						2011	**1,718**	**23.3**

The party breakdown for women serving in state legislatures in 2011 is:

	Total Legislators		State Senators		State Reps.	
	#	%	#	%	#	%
Democrats	1,052	61.2	259	62.4	793	60.8
Republicans	649	37.8	144	34.7	505	38.8
Nonpartisans*	11	0.6	11	2.7	----	----
Progressives	4	0.2	---	---	4	0.3
Independent	2	0.1	1	0.2	1	0.1
Total	1,718	99.9	415	100.0	1,303	100.0

The states with the **highest percentages** of women state legislators are:

State	% Women	State	% Women
Colorado	40.0	Washington	31.3
Vermont	37.8	Maryland	30.9
Arizona	34.4	Illinois	29.4
Hawaii	32.9	Connecticut	28.9
Minnesota	31.8	Nevada	28.6

The states with the **lowest percentages** of women state legislators are:

State	% Women	State	% Women
South Carolina	9.4	Wyoming	15.6
Oklahoma	12.8	Louisiana	16.0
Alabama	13.6	West Virginia	16.4
Mississippi	14.4	Pennsylvania	16.6
North Dakota	14.9	Kentucky	18.1

Women in State Legislative Leadership
Three women serve as presidents of senates: Michelle L. Fischbach (R-MN), Therese Murray (D-MA), and M. Teresa Paiva-Weed (D-RI). Two women serve as speakers of state houses: Rebecca Lockhart (R-UT) and Sheila Y. Oliver (D-NJ).

Women of Color in State Legislatures
Of the 1,718 women legislators serving nationwide, **349** or **20.3%** are women of color. They include 96 senators and 253 representatives; 331 are Democrats, 16 are Republicans, and two are non-partisan. Women of color constitute 4.7% of the total 7,382 state legislators.

The First Women Legislators
In 1894, the first women state legislators were elected to serve in the United States. Three Republican women were elected to the Colorado House of Representatives: Clara Cressingham; Carrie C. Holly; Frances Klock. The first woman state senator, Democrat Martha Hughes Cannon, was elected to the Utah State Senate in 1896.[+]

---

* In Nebraska, where the legislature is unicameral, legislators are elected on a nonpartisan basis.

SCR 11 - WALTER HICKEL DAY OF THE ARCTIC

Sponsor Statement

SCR 11 establishes August 18, 2011 as Walter J. Hickel Day of the Arctic. The date has been selected to match our former Governor's birthday, and the title 'Day of the Arctic' has been chosen to honor what Walter Hickel knew to be true decades ago - that Alaska, rich with resources, can provide for Alaskans and the world for centuries to come.

During the 1950s Walter Hickel played a major role in the fight to get Alaska's statehood land entitlement, which gave us 103 million acres of land to hold in common. From 1966-1969, he served as the second Governor of Alaska. During his term, he successfully pushed to open Prudhoe Bay to oil development, creating the foundation for our economy today.

From 1969 to 1970 Walter Hickel served as the US Secretary of the Interior. This was when the critical permitting process for our Trans-Alaska Pipeline was taking place. In that capacity, he helped turn plans into a construction project, getting our valuable resource to market.

In 1990, he was elected to his second term as Governor of Alaska. During this term he led the way internationally on the issue of by-catch fish waste, and negotiated the $1 billion Exxon Valdez oil spill settlement.

In 1973, Walter Hickel authored a piece for Readers Digest that declared 'the Day of the Arctic has come.' Today, the points he made in that article are still applicable. The Walter Hickel Day of the Arctic will honor the vision and legacy he left for all Alaskans, and I urge your support.

A Reader's Digest REPRINT

The Day of the Arctic Has Come

"The eyes of the world are turning north. We must start using our Arctic resources—including natural beauty and fossil fuel—right now"

By Walter J. Hickel
Governor of Alaska, 1966-69; Secretary of the Interior, 1969-70

Up here in my office in Anchorage, I sit 90 minutes flying time east of Soviet territory and 90 minutes south of our rich North Slope oil fields, and I wish there was some way I could make the rest of America grasp the urgent importance to our nation of Alaska and this whole top of the world.

It is a vast, forbidding territory as mysterious as the moon, yet under its cover of ice and snow lies a unique opportunity for the future.

Take a good look at a schoolroom globe. Look down at the Arctic—ten million square miles, extending roughly from the 60th parallel up and across the North Pole. Within it lie most of Alaska, almost half of Canada, all of Greenland and Iceland, parts of Scandinavia, an incredible sweep of northern Russia and Siberia, plus most of their continental shelves and islands. In area, it's as big as Western Europe, the continental United States, Japan, India and China combined—nations which support two billion people. The Arctic, just as big, is practically unpeopled, and all but unknown.

Now, focus in on Alaska. Note that the shortest air route from New York to Tokyo, or to Peking, is not through Honolulu but along the Great Circle route through Alaska. Note, too, how the Pacific coasts of North America and Asia stretch south like legs of a wishbone, and how Alaska sits there strategically, atop the entire Pacific basin.

More than this, Alaska is a treas-

ure-house of natural beauty and fossil fuel—fuel that lies undeveloped and unused, at a time when we desperately need it to produce energy to run our country.

How much fuel? Nobody knows. Some 30 billion barrels of oil have already been located on the North Slope—enough to supply the "lower 48" with two million barrels a day, from now until the year 2000. And that's not all. Estimates of other Alaska oil reserves, both on- and offshore, add another 20-30 billion barrels. And if you count potential continental-shelf reserves out to a depth of 200 meters, the total swells unbelievably, by another 600-780 billion barrels. To top all this, Alaska's coal reserves may exceed 120 billion tons, and natural-gas reserves are estimated at 238-438 trillion cubic feet.

Thus, Alaska is 1) geographically a crossroads of the globe, 2) a place of incalculable economic potential. In world politics, these two things add up to tremendous clout. But the northern regions of Russia, Siberia and Canada share similar strategic locations and the same rich potential. This is why the whole Arctic is destined to become a dominant force in the economic-political balance of the world. This is why I believe the world's power center is destined to shift from the Middle East to the Arctic.

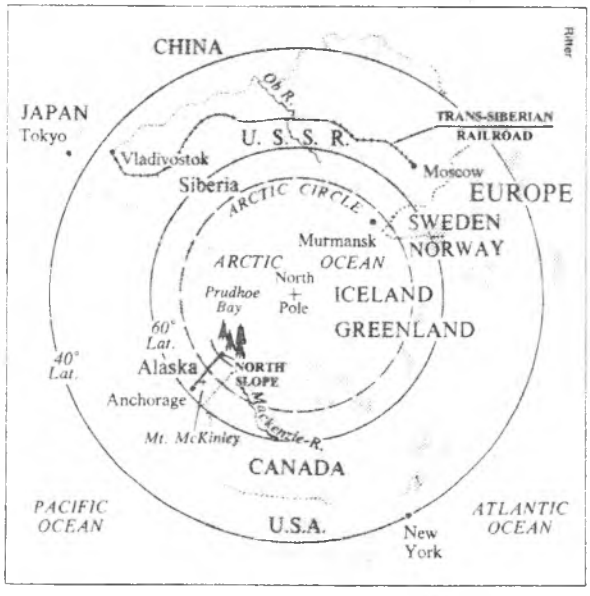
What should we Americans be doing about it right now? I am convinced that we should get on with the job of extracting North Slope oil, so that we can reduce our dependence on Venezuela and the Middle East, and start damming up the critical and unnecessary flow of American dollars abroad.

As living space for man, the Arctic will never compete with the softer climates: no one is going to buy a retirement home on Prudhoe Bay. That is why the Arctic is a perfect location for a storehouse of wealth. And what a storehouse, for everything from mineral resources to the rarer resources of natural beauty and wildlife—perhaps most precious of all, in the long run. They will refresh the spirit of man as long as he inhabits earth.

The unique Arctic conditions encourage two opposite points of view. One says: "Exploit it fast. Get in—grab—and get out." The other warns: "The Arctic is a precious wilderness, so delicate and fragile we should lock it up. Man should stay out forever."

Both viewpoints are wrong. Today we can get the oil out—and the gas, the iron and the copper—without seriously disrupting the environment. We know better now than simply to take over the engineering techniques that worked in Texas and Oklahoma. We have learned to work *with* the Arctic elements, rather than against them.

This is something the Russians have learned, too. It began when they built the Trans-Siberian railroad in the 1890s, across 5500 miles of blizzard-swept desolation—"rusty streaks of iron through the vastness



of nothing to the extremities of nowhere," as detractors scoffed. Then, recognizing potential in the region, Lenin in 1921 set up an institute to study the waters north of Siberia, the "Northeast Passage" between the Atlantic and the Pacific.

Fearful of depending on other nations, Soviet leaders were determined to find and develop raw materials within their own borders. As a result, new cities have materialized in the Soviet Arctic and sub-Arctic at fantastic speeds, and established ones have grown. Novosibirsk, on the River Ob in Siberia, now has a population of 1.1 million.

Today, oil-production plans for western Siberia stagger the mind: two million barrels a day by 1975, and double that by 1980, or some 40 percent of the U.S.S.R.'s total. Overall, including offshore areas, the Soviet Arctic may contain nearly a half-*trillion* barrels of oil, or almost as much as the "proved" reserves (540 billion barrels) of the rest of the world. Even more overwhelming are the Soviet Arctic's natural-gas reserves, estimated in 1970 at 425 trillion cubic feet (15 trillion more than ours at that time).

The Russians have laid down some 18,000 miles of oil pipelines plus 39,000 miles of gas pipelines, and will soon begin piping gas—probably to Austria and West Germany this year, Italy next year, and later Belgium. Before long, we may even be depending on Russia to ease *our* energy crisis. For example, under Soviet study now is the feasibility of constructing two 56-inch pipelines, one to carry western Siberian natural gas northwest to Murmansk for tanker shipment to our East Coast, the other to convey eastern Siberian gas southeast to a port near Vladivostok for shipment to our West Coast. Their combined length: 4000 miles—five times that

of our proposed trans-Alaska oil pipeline.*

Understandably, the Russians now say, "There is no Russia without Siberia." They have turned a corner in their attitude toward the Arctic. It is time for us to do the same. The Arctic is not as difficult as it is different. Our challenge is to appreciate that difference. Let's stop being afraid of the Arctic. Let's roll up our sleeves and get started.

We need, for example, information about the continental shelf and the offshore lands of the Arctic. We need up-to-date polar maps. We need answers to questions about international sovereignty over Arctic waters and their seabeds. We ought to know more about Arctic transportation and communications systems, about the problems of large human settlements in the far north. We need a comprehensive study, leading to a coördinated national policy for Arctic development.

It is a responsibility we share with all the nations that rim the Arctic Ocean: the Soviet Union, the Scandinavian countries and, closest of all, Canada, on whose Mackenzie River delta and Arctic islands oil and natural gas have recently been discovered in enormous quantities. The region can become a hostile arena of economic and possibly military conflict. Or it can become a shining example of how nations can plan, live and work together, intelligently and wisely, with love for their planet Earth. We must join other Arctic nations in a federated approach to our common problems and opportunities. We owe it to future generations of the whole world.

As much as we have yet to learn, one thing is clear to me here in Anchorage—as clear as the peak of Mt. McKinley, 20,300 feet high against the blue Alaskan sky across the inlet. We need to move *right now*. The eyes of the world are turning north. We must start using our Arctic resources, those of natural beauty and those that meet man's other needs. And we must take the first steps, whatever our government and Congress judge them to be, toward coöperative international development of the whole polar region.

I have dreamed of the day when Americans would change their attitude toward Alaska and the Arctic. It begins to look as though history, economics and world politics are with me, and as though the day has begun.

A Tribute
to
Walter J. Hickel
from
The President of Iceland
Ólafur Ragnar Grímsson

As we in the North look back over the life of Walter Hickel on his 90th birthday, we salute a visionary leader, a true statesman who has transformed our view of the world.

Now, in the early 21st century, the Arctic and the Northern regions are finally being recognized as the Earth's most crucial territory, of monumental significance for the future of mankind.

All his life, Wally has been the champion of the North, from the times of President Eisenhower to the Administration of Barack Obama.

He has served with distinction, not only America but also all nations of the North; convinced people in every continent of the importance of the resource-rich commons.

He has been both a visionary and a man of action – a proud Alaskan who has inspired us all.

It was my great fortune to welcome Wally to the Presidential Residence in Iceland in the early years of my presidency. That meeting transformed my mission. Ever since then, it has been my privilege to serve as a footsoldier in Wally's forces, to benefit from his wisdom and insights, his comments and conclusions; to enjoy his stories and his jokes.

Wally Hickel has shown as a campaigner, as a Governor, as an activist and as a statesman, how one man can change the world.

On the occasion of his 91st birthday, Dorrit and I, and all Wally's friends and admirers in Iceland, send our congratulations to him and his family.

The people of the North salute a great leader and thank him for his work and inspiration.

Ólafur Ragnar Grímsson

SPONSOR STATEMENT FOR SCR 16

"Proclaiming May 2012 to be Celiac Disease Awareness Month."

SCR 16 designates May 2012 as Celiac Disease Awareness Month.

Celiac disease - often referred to as gluten intolerance - affects an estimated 3 million men, women and children in the United States. It is one of the most common genetic diseases in the world and affects an estimated 1 in 133 Americans. Assessments indicate that over 5,300 Alaskans (according to the 2010 Census, Alaska's population is 710,231) are living with this disease and, sadly, 97% (nearly 5,200) don't even know it.

Misdiagnosis is common and costly. Individuals who are incorrectly diagnosed and not treated for celiac disease can face health care costs averaging $5,000-$12,000, not including lost work time. The average length of time for a person to be correctly diagnosed is 6-10 years; left undiagnosed and untreated, Celiac disease can lead to cardiovascular disease, diabetes, autoimmune diseases, malnutrition, vitamin deficiencies, loss of calcium, osteoporosis, lactose intolerance, infertility, certain forms of cancer, depression, and neurological complications. There is no known cause or cure for this disease. It is treated by maintaining a strict, lifelong adherence to a gluten-free diet.

While no cure has yet been found, researchers are hard at work looking for a way to combat and eliminate this genetic disorder. Prestigious institutions like the University of Chicago Celiac Disease Center – which is seeking to find a cure by 2026 – and the University of Maryland Center for Celiac Research are sponsoring teams of scientists and doctors who are tirelessly searching for ways to fight and eventually end Celiac disease.

SCR 16 would observe Celiac Disease Awareness Month by promoting awareness of this prevalent disease, lending to early detection and correct diagnosis. It also provides an opportunity to honor our dedicated health professionals and to recognize individuals and their families whose lives have been affected by this disease.

THE UNIVERSITY OF CHICAGO
CELIAC
DISEASE CENTER

Celiac Disease Facts and Figures

Celiac disease is an inherited autoimmune disorder that affects the digestive process of the small intestine. When a person who has celiac disease consumes gluten, a protein found in wheat, rye and barley, the individual's immune system responds by attacking the small intestine and inhibiting the absorption of important nutrients into the body. Undiagnosed and untreated, celiac disease can lead to the development of other autoimmune disorders, as well as osteoporosis, infertility, neurological conditions and in rare cases, cancer.

Prevalence of Celiac Disease in the United States

- In average healthy people: 1 in 133
- In people with related symptoms: 1 in 56
- In people with first-degree relatives (parent, child, sibling) who are celiac: 1 in 22
- In people with second-degree relatives (aunt, uncle, cousin) who are celiac: 1 in 39
- Estimated prevalence for African-, Hispanic- and Asian-Americans: 1 in 236
- In the landmark prevalence study on celiac disease, investigators determined that 60% of children and 41% of adults diagnosed during the study were asymptomatic (without any symptoms).
- During the prevalence study, researchers found that 21% of patients with a positive anti-endomysial antibody test could not receive a biopsy due to the refusal of their physician to perform the procedure or the insurance company to pay for it.
- Only 35% of newly diagnosed patients had chronic diarrhea, dispelling the myth that diarrhea must be present to diagnose celiac disease.

Source: A multi-center study on the sero-prevalence of celiac disease in the United States among both at risk and not at risk groups. Fasano et. al., Archives of Internal Medicine. February 2003.

- Celiac disease affects at least 3 million Americans.
- The average length of time it takes for a symptomatic person to be diagnosed with celiac disease in the US is four years; this type of delay dramatically increases an individual's risk of developing autoimmune disorders, neurological problems, osteoporosis and even cancer.

Source: Characteristics of adult celiac disease in the USA: results of a national survey. Green, P.H. et.al. American Journal of Gastroenterology, 2001, 2006.

- The incidence of autoimmune diseases in the general US population is 3.5%.

5839 S. Maryland Avenue, MC4069
Chicago, IL 60637
T: 773.702.7593
F: 773.702.0666
www.CeliacDisease.net

In a 1999 study, Ventura, et.al. found that those diagnosed with celiac disease between 2-4 years of age had a 10.5% chance of developing an autoimmune disorder. Additional findings are outlined in the table below:

Age at diagnosis	Chance of developing autoimmune condition
4 – 12 yrs of age	16.7%
12 – 20 yrs of age	27%
Over 20 yrs of age	34%

- Early diagnosis of celiac disease thus is important, as it might prevent complications, and awareness is the key. A recent study in North America shows that an active case-finding strategy in the primary care setting is an effective means to improve the diagnostic rate of Celiac Disease: by screening with the blood test all subjects belonging to known "at-risk" groups such as those listed above, the diagnosis rates increased more than 40-folds.

Source: Duration of exposure to gluten and risk for autoimmune disorders in patients with celiac disease. SIGEP Study Group for Autoimmune Disorders in Celiac Disease. Ventura A. et.al. Gastroenterology 1999 Aug;117(2):297-303. Rampertab SD et al. Trends in the Presentation of Celiac Disease Am J Medicine 2006 Catassi C et al. Detection of Celiac disease in primary care: a multicenter case-finding study in North America. Am J Gastroenterol 2007

Celiac disease affects 1% of healthy, average Americans. That means at least 3 million people in our country are living with celiac disease—97% of them are undiagnosed.

Chronic Illness in the United States
Below is a list of some commonly known chronic illnesses and the number of people affected in the United States:

- Epilepsy affects 2.7 million
- Cystic Fibrosis affects 30,000 people
- 17,000 people are living with hemophilia
- Parkinson's disease affects 1,000,000 individuals
- Ulcerative colitis affects 500,000 people
- Crohn's disease affects 500,000 Americans
- 2.1 million Americans are living with rheumatoid arthritis
- Lupus affects 1.5 million people
- Multiple sclerosis affects 400,000 people in the United States

Putting Celiac Disease in Perspective

- Type 1 Diabetes affects 3 million people; 6% (180,000) of those diagnosed also have celiac disease.
- 610,000 women in the US experience unexplained infertility; 6% (36,600) of these women might never learn that celiac disease is the cause.
- 350,000 people in the United States are living with Down Syndrome; 12% (42,000) of them also have celiac disease.
- The number of people with celiac disease in the U.S. would fill 4,400 Boeing 747 airplanes.
- It would take 936 cruise ships to hold every American with celiac disease.
- Americans with celiac disease could fill Comiskey Park (now US Cellular Field, with 40,000 seats) to watch the Chicago White Sox 55 times.
- U.S. fans with celiac disease could fill Soldier Field, the home of the Chicago Bears, 37 times.
- The number of people with celiac disease in the U.S. is roughly equal to the number of people living in the state of Nevada.
- Alaska, Delaware, Washington DC, Hawaii, Idaho, Maine, Montana, Nebraska, New Hampshire, New Mexico, North Dakota, Rhode Island, South Dakota, Utah and Vermont all have populations that are less than 2,200,000 the number of people living with celiac disease in the United States.

Facts about the Gluten-Free Diet

- In 2004 the Food Allergen Labeling and Consumer Protection Act became law. This legislation went into effect in 2006 and makes it possible, for the first time, for people with celiac disease to read a food label and determine in a few easy steps if a product is safe to eat. The University of Chicago Celiac Disease Center helped to pass this law.

THE UNIVERSITY OF CHICAGO
CELIAC
DISEASE CENTER

- There are more than 2,000 gluten free food items available in the United States, and consumers are more likely to find these foods in regular grocery stores.
- From 2004 – 2005, sales of gluten-free foods increased by 77.8 million dollars (a growth of 14.6%).
- The US Department of Agriculture projects that the gluten-free industries revenues will reach $1.7 Billion by 2010.

Data from **www.bakingbusiness.com** August 2005.

Multi-Million Dollar Commitment Spurs First-Ever Mouse Model Studies at University of Chicago's Unique Celiac Disease Center

University of Chicago Celiac Disease Center Advisory Board Campaign Aims to Uncover New Treatments for World's Most Common Genetic Autoimmune Disease

CHICAGO (May 27, 2009) – The University of Chicago Celiac Disease Center Advisory Board has partnered with The University to launch a two million dollar campaign to support the first-ever mouse model for celiac disease, the world's most common genetic autoimmune disease. Celiac disease affects approximately three million Americans and is triggered by the consumption of gluten--a protein found in wheat, barley and rye.

For the first time, researchers at the University of Chicago Celiac Disease Center will examine the underlying causes of the disease, test new therapies and identify new targets for treatment through mouse model research. Currently a gluten-free diet is only known treatment for celiac disease, offering only partial allevation of symptoms.

At least ninety-seven percent of people with celiac disease have not been diagnosed. The symptoms are numerous, ranging from intestinal symptoms to neurological and psychological disorders. If undiagnosed and untreated, it can lead to osteoporosis, infertility, neurological conditions, and cancer. In addition, patients with celiac disease have a significantly higher chance of developing other autoimmune diseases, in particular Type-1 diabetes.

Bana Jabri, M.D., Ph.D., Associate Professor, University of Chicago Medical Center, one of the world's leading celiac disease researchers, will develop the new mouse model with the goal of identifying new remedies and preventive treatments aimed at children of families with celiac disease history. The studies will also shed new light on events triggering the development of Type-1 diabetes.

The University of Chicago Celiac Disease Center is the first of its kind in the country. It has been dedicated to raising awareness and meeting the needs of those affected by the disease nationwide through education, research and advocacy since 2001.

- more -

"There is a critical need to provide the proper resources to those who suffer from celiac disease," said Stefano Guandalini, M.D., professor of pediatrics at the University of Chicago Medical Center, founder and medical director of the Celiac Disease Center. "This commitment from University of Chicago Celiac Advisory Board reaffirms the Celiac Disease Center's mission to bring cutting edge research, education and encouragement to those affected by the disease".

Dr. Jabri believes it is essential to create a mouse model of celiac disease to better understand the chain of events leading to celiac disease, its link to autoimmune diseases, and provide sustainable funds to continue programming for many years to come.

About the University of Chicago Celiac Disease Center
The University of Chicago Celiac Disease Center has fundamentally improved the care, diagnosis and awareness of celiac disease. In addition, it provides the infrastructure and support that is needed to advance cutting-edge celiac research, including investigations into structure of gluten peptides and the mechanisms by which gluten modifies self molecules. The University of Chicago Celiac Disease Center is a 501-c3 non-profit organization, completely funded by donor contributions.

Celiac Disease

National Digestive Diseases Information Clearinghouse

U.S. Department of Health and Human Services

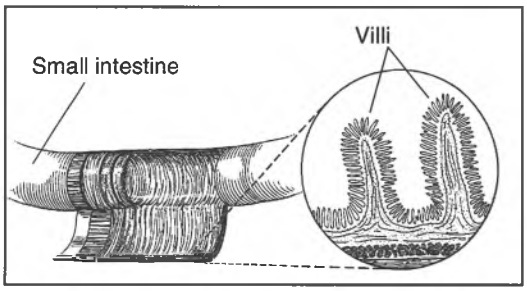
NATIONAL INSTITUTES OF HEALTH

NIDDK
NATIONAL INSTITUTE OF DIABETES AND DIGESTIVE AND KIDNEY DISEASES

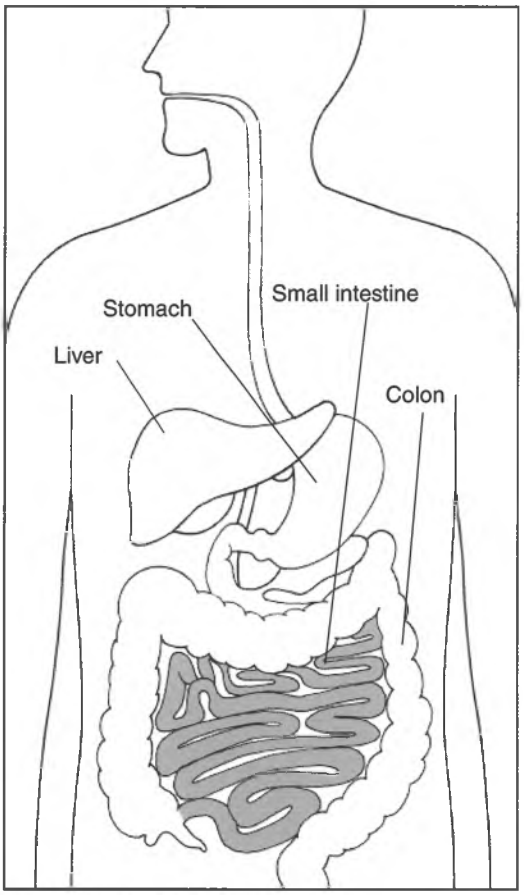
What is celiac disease?

Celiac disease is a digestive disease that damages the small intestine and interferes with absorption of nutrients from food. People who have celiac disease cannot tolerate gluten, a protein in wheat, rye, and barley. Gluten is found mainly in foods but may also be found in everyday products such as medicines, vitamins, and lip balms.

When people with celiac disease eat foods or use products containing gluten, their immune system responds by damaging or destroying villi—the tiny, fingerlike protrusions lining the small intestine. Villi normally allow nutrients from food to be absorbed through the walls of the small intestine into the bloodstream. Without healthy villi, a person becomes malnourished, no matter how much food one eats.



Villi on the lining of the small intestine help absorb nutrients.



The small intestine is shaded above.

Celiac disease is both a disease of malabsorption—meaning nutrients are not absorbed properly—and an abnormal immune reaction to gluten. Celiac disease is also known as celiac sprue, nontropical sprue, and gluten-sensitive enteropathy.

Celiac disease is genetic, meaning it runs in families. Sometimes the disease is triggered—or becomes active for the first time—after surgery, pregnancy, childbirth, viral infection, or severe emotional stress.

What are the symptoms of celiac disease?

Symptoms of celiac disease vary from person to person. Symptoms may occur in the digestive system or in other parts of the body. Digestive symptoms are more common in infants and young children and may include

- abdominal bloating and pain
- chronic diarrhea
- vomiting
- constipation
- pale, foul-smelling, or fatty stool
- weight loss

Irritability is another common symptom in children. Malabsorption of nutrients during the years when nutrition is critical to a child's normal growth and development can result in other problems such as failure to thrive in infants, delayed growth and short stature, delayed puberty, and dental enamel defects of the permanent teeth.

Adults are less likely to have digestive symptoms and may instead have one or more of the following:

- unexplained iron-deficiency anemia
- fatigue
- bone or joint pain
- arthritis
- bone loss or osteoporosis
- depression or anxiety
- tingling numbness in the hands and feet
- seizures
- missed menstrual periods
- infertility or recurrent miscarriage
- canker sores inside the mouth
- an itchy skin rash called dermatitis herpetiformis

People with celiac disease may have no symptoms but can still develop complications of the disease over time. Long-term complications include malnutrition—which can lead to anemia, osteoporosis, and miscarriage, among other problems—liver diseases, and cancers of the intestine.

Why are celiac disease symptoms so varied?

Researchers are studying the reasons celiac disease affects people differently. The length of time a person was breastfed, the age a person started eating gluten-containing foods, and the amount of gluten-containing foods one eats are three factors thought to play a role in when and how celiac disease appears. Some studies have shown, for example, that the longer a person was breastfed, the later the symptoms of celiac disease appear.

Symptoms also vary depending on a person's age and the degree of damage to the small intestine. Many adults have the disease for a decade or more before they are diagnosed. The longer a person goes undiagnosed and untreated, the greater the chance of developing long-term complications.

What other health problems do people with celiac disease have?

People with celiac disease tend to have other diseases in which the immune system attacks the body's healthy cells and tissues. The connection between celiac disease and these diseases may be genetic. They include

- type 1 diabetes
- autoimmune thyroid disease
- autoimmune liver disease
- rheumatoid arthritis
- Addison's disease, a condition in which the glands that produce critical hormones are damaged
- Sjögren's syndrome, a condition in which the glands that produce tears and saliva are destroyed

How common is celiac disease?

Celiac disease affects people in all parts of the world. Originally thought to be a rare childhood syndrome, celiac disease is now known to be a common genetic disorder. More than 2 million people in the United States have the disease, or about 1 in 133 people.[1] Among people who have a first-degree relative—a parent, sibling, or child—diagnosed with celiac disease, as many as 1 in 22 people may have the disease.[2]

Celiac disease is also more common among people with other genetic disorders including Down syndrome and Turner syndrome, a condition that affects girls' development.

---

[1]Fasano A, Berti I, Gerarduzzi T, et al. Prevalence of celiac disease in at-risk and not-at-risk groups in the United States. *Archives of Internal Medicine*. 2003;163(3):268–292.

[2]Ibid.

How is celiac disease diagnosed?

Recognizing celiac disease can be difficult because some of its symptoms are similar to those of other diseases. Celiac disease can be confused with irritable bowel syndrome, iron-deficiency anemia caused by menstrual blood loss, inflammatory bowel disease, diverticulitis, intestinal infections, and chronic fatigue syndrome. As a result, celiac disease has long been underdiagnosed or misdiagnosed. As doctors become more aware of the many varied symptoms of the disease and reliable blood tests become more available, diagnosis rates are increasing.

Blood Tests

People with celiac disease have higher than normal levels of certain autoantibodies—proteins that react against the body's own cells or tissues—in their blood. To diagnose celiac disease, doctors will test blood for high levels of anti-tissue transglutaminase antibodies (tTGA) or anti-endomysium antibodies (EMA). If test results are negative but celiac disease is still suspected, additional blood tests may be needed.

Before being tested, one should continue to eat a diet that includes foods with gluten, such as breads and pastas. If a person stops eating foods with gluten before being tested, the results may be negative for celiac disease even if the disease is present.

Intestinal Biopsy

If blood tests and symptoms suggest celiac disease, a biopsy of the small intestine is performed to confirm the diagnosis. During the biopsy, the doctor removes tiny pieces of tissue from the small intestine to check for damage to the villi. To obtain the tissue sample, the doctor eases a long, thin tube called an endoscope through the patient's mouth and stomach into the small intestine. The doctor then takes the samples using instruments passed through the endoscope.

Dermatitis Herpetiformis

Dermatitis herpetiformis (DH) is an intensely itchy, blistering skin rash that affects 15 to 25 percent of people with celiac disease.[3] The rash usually occurs on the elbows, knees, and buttocks. Most people with DH have no digestive symptoms of celiac disease.

DH is diagnosed through blood tests and a skin biopsy. If the antibody tests are positive and the skin biopsy has the typical findings of DH, patients do not need to have an intestinal biopsy. Both the skin disease and the intestinal disease respond to a gluten-free diet and recur if gluten is added back into the diet. The rash symptoms can be controlled with antibiotics such as dapsone. Because dapsone does not treat the intestinal condition, people with DH must maintain a gluten-free diet.

[3]Rodrigo L. Celiac disease. *World Journal of Gastroenterology*. 2006;12(41):6585–6593.

Screening

Screening for celiac disease means testing for the presence of autoantibodies in the blood in people without symptoms. Americans are not routinely screened for celiac disease. However, because celiac disease is hereditary, family members of a person with the disease may wish to be tested. Four to 12 percent of an affected person's first-degree relatives will also have the disease.[4]

How is celiac disease treated?

The only treatment for celiac disease is a gluten-free diet. Doctors may ask a newly diagnosed person to work with a dietitian on a gluten-free diet plan. A dietitian is a health care professional who specializes in food and nutrition. Someone with celiac disease can learn from a dietitian how to read ingredient lists and identify foods that contain gluten in order to make informed decisions at the grocery store and when eating out.

For most people, following this diet will stop symptoms, heal existing intestinal damage, and prevent further damage. Improvement begins within days of starting the diet. The small intestine usually heals in 3 to 6 months in children but may take several years in adults. A healed intestine means a person now has villi that can absorb nutrients from food into the bloodstream.

[4]Ibid.

To stay well, people with celiac disease must avoid gluten for the rest of their lives. Eating even a small amount of gluten can damage the small intestine. The damage will occur in anyone with the disease, including people without noticeable symptoms. Depending on a person's age at diagnosis, some problems will not improve, such as short stature and dental enamel defects.

Some people with celiac disease show no improvement on the gluten-free diet. The most common reason for poor response to the diet is that small amounts of gluten are still being consumed. Hidden sources of gluten include additives such as modified food starch, preservatives, and stabilizers made with wheat. And because many corn and rice products are produced in factories that also manufacture wheat products, they can be contaminated with wheat gluten.

Rarely, the intestinal injury will continue despite a strictly gluten-free diet. People with this condition, known as refractory celiac disease, have severely damaged intestines that cannot heal. Because their intestines are not absorbing enough nutrients, they may need to receive nutrients directly into their bloodstream through a vein, or intravenously. Researchers are evaluating drug treatments for refractory celiac disease.

The Gluten-free Diet

A gluten-free diet means not eating foods that contain wheat, rye, and barley. The foods and products made from these grains should also be avoided. In other words, a person with celiac disease should not eat most grain, pasta, cereal, and many processed foods.

Despite these restrictions, people with celiac disease can eat a well-balanced diet with a variety of foods. They can use potato, rice, soy, amaranth, quinoa, buckwheat, or bean flour instead of wheat flour. They can buy gluten-free bread, pasta, and other products from stores that carry organic foods, or order products from special food companies. Gluten-free products are increasingly available from mainstream stores.

New Food Labeling

The Food Allergen Labeling and Consumer Protection Act (FALCPA), which took effect on January 1, 2006, requires food labels to clearly identify wheat and other common food allergens in the list of ingredients. FALCPA also requires the U.S. Food and Drug Administration to develop and finalize rules for the use of the term "gluten free" on product labels.

"Plain" meat, fish, rice, fruits, and vegetables do not contain gluten, so people with celiac disease can freely eat these foods. In the past, people with celiac disease were advised not to eat oats. New evidence suggests that most people can safely eat small amounts of oats, as long as the oats are not contaminated with wheat gluten during processing. People with celiac disease should work closely with their health care team when deciding whether to include oats in their diet. Examples of other foods that are safe to eat and those that are not are provided in the table on page 8.

The gluten-free diet requires a completely new approach to eating. Newly diagnosed people and their families may find support groups helpful as they learn to adjust to a new way of life. People with celiac disease must be cautious about what they buy for lunch at school or work, what they purchase at the grocery store, what they eat at restaurants or parties, and what they grab for a snack. Eating out can be a challenge. When in doubt about a menu item, a person with celiac disease should ask the waiter or chef about ingredients and preparation or if a gluten-free menu is available.

Gluten is also used in some medications. People with celiac disease should ask a pharmacist if prescribed medications contain wheat. Because gluten is sometimes used as an additive in unexpected products—such as lipstick and play dough—reading product labels is important. If the ingredients are not listed on the label, the manufacturer should provide a list upon request. With practice, screening for gluten becomes second nature.

The Gluten-free Diet: Some Examples

In 2006, the American Dietetic Association updated its recommendations for a gluten-free diet. The following chart is based on the 2006 recommendations. This list is **not** complete, so people with celiac disease should discuss gluten-free food choices with a dietitian or physician who specializes in celiac disease. People with celiac disease should always read food ingredient lists carefully to make sure the food does not contain gluten.

Allowed Foods		
amaranth	legumes	seeds
arrowroot	millet	sorghum
buckwheat	nuts	soy
cassava	potatoes	tapioca
corn	quinoa	teff
flax	rice	wild rice
Indian rice grass	sago	yucca
Job's tears		
Foods to Avoid		
wheat		barley
• including einkorn, emmer, spelt, kamut		rye
• wheat starch, wheat bran, wheat germ, cracked wheat, hydrolyzed wheat protein		triticale (a cross between wheat and rye)
Other Wheat Products		
bromated flour	graham flour	self-rising flour
durum flour	phosphated flour	semolina
enriched flour	plain flour	white flour
farina		
Processed Foods that May Contain Wheat, Barley, or Rye*		
bouillon cubes	French fries	seasoned tortilla chips
brown rice syrup	gravy	self-basting turkey
candy	imitation fish	soups
chips/potato chips	matzo	soy sauce
cold cuts, hot dogs, salami, sausage	rice mixes	vegetables in sauce
communion wafers	sauces	

*Most of these foods can be found gluten-free. When in doubt, check with the food manufacturer.

Source: Thompson T. *Celiac Disease Nutrition Guide*, 2nd ed. Chicago: American Dietetic Association; 2006. © American Dietetic Association. Adapted with permission. For a complete copy of the *Celiac Disease Nutrition Guide*, please visit *www.eatright.org*.

Points to Remember

- People with celiac disease cannot tolerate gluten, a protein in wheat, rye, and barley.
- Untreated celiac disease damages the small intestine and interferes with nutrient absorption.
- Without treatment, people with celiac disease can develop complications such as osteoporosis, anemia, and cancer.
- A person with celiac disease may or may not have symptoms.
- Diagnosis involves blood tests and, in most cases, a biopsy of the small intestine.
- Since celiac disease is hereditary, family members of a person with celiac disease may wish to be tested.
- Celiac disease is treated by eliminating all gluten from the diet. The gluten-free diet is a lifetime requirement.
- A dietitian can teach a person with celiac disease about food selection, label reading, and other strategies to help manage the disease.

Hope through Research

The National Institute of Diabetes and Digestive and Kidney Diseases conducts and supports research on celiac disease. Researchers are studying new options for diagnosing celiac disease, including capsule endoscopy. In this technique, patients swallow a capsule containing a tiny video camera that records images of the small intestine.

Several drug treatments for celiac disease are under evaluation. Researchers are also studying a combination of enzymes—proteins that aid chemical reactions in the body—that detoxify gluten before it enters the small intestine.

Scientists are also developing educational materials for standardized medical training to raise awareness among health care providers. The hope is that increased understanding and awareness will lead to earlier diagnosis and treatment of celiac disease.

Participants in clinical trials can play a more active role in their own health care, gain access to new research treatments before they are widely available, and help others by contributing to medical research. For information about current studies, visit *www.ClinicalTrials.gov*.

The Celiac Disease Awareness Campaign

To meet the need for comprehensive and current information about celiac disease, the National Digestive Diseases Information Clearinghouse (NDDIC), a service of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), launched the Celiac Disease Awareness Campaign. The Awareness Campaign is the result of the combined ideas and efforts of the professional and voluntary organizations that focus on celiac disease, along with the NIDDK, the National Institutes of Health, and the Centers for Disease Control and Prevention.

Visit *www.celiac.nih.gov* to learn more about the Awareness Campaign.

You may also find additional information about this topic by visiting MedlinePlus at *www.medlineplus.gov.*

This publication may contain information about medications. When prepared, this publication included the most current information available. For updates or for questions about any medications, contact the U.S. Food and Drug Administration toll-free at 1–888–INFO–FDA (463–6332) or visit *www.fda.gov*. Consult your doctor for more information.

The National Digestive Diseases Information Clearinghouse (NDDIC) is a service of the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK). The NIDDK is part of the National Institutes of Health of the U.S. Department of Health and Human Services. Established in 1980, the Clearinghouse provides information about digestive diseases to people with digestive disorders and to their families, health care professionals, and the public. The NDDIC answers inquiries, develops and distributes publications, and works closely with professional and patient organizations and Government agencies to coordinate resources about digestive diseases.

Publications produced by the Clearinghouse are carefully reviewed by both NIDDK scientists and outside experts. This fact sheet was originally reviewed by Ciaran Kelly, M.D., Beth Israel Deaconess Medical Center; Mitchell Cohen, M.D., Cincinnati, Children's Hospital Medical Center; Walter Reed Army Medical Center; National Foundation for Celiac Awareness; Celiac Disease Foundation; Celiac Sprue Association/USA, Inc.; and Centers for Disease Control and Prevention staff. The gluten-free diet chart was reviewed by Alice Bast and Nancy Dickens, National Foundation for Celiac Awareness; Cynthia Kupper, R.D., C.D., Gluten Intolerance Group; and Elaine Monarch, Celiac Disease Foundation.

This publication is not copyrighted. The Clearinghouse encourages users of this fact sheet to duplicate and distribute as many copies as desired.

This fact sheet is also available at *www.digestive.niddk.nih.gov*.

Celiac Disease Facts and Figures

Celiac disease is an inherited autoimmune disorder that affects the digestive process of the small intestine. When a person who has celiac disease consumes gluten, a protein found in wheat, rye and barley, the individual's immune system responds by attacking the small intestine and inhibiting the absorption of important nutrients into the body. Undiagnosed and untreated, celiac disease can lead to the development of other autoimmune disorders, as well as osteoporosis, infertility, neurological conditions and in rare cases, cancer.

Prevalence of Celiac Disease in the United States

- In average healthy people: 1 in 133
- In people with related symptoms: 1 in 56
- In people with first-degree relatives (parent, child, sibling) who are celiac: 1 in 22
- In people with second-degree relatives (aunt, uncle, cousin) who are celiac: 1 in 39
- Estimated prevalence for African-, Hispanic- and Asian-Americans: 1 in 236
- In the landmark prevalence study on celiac disease, investigators determined that 60% of children and 41% of adults diagnosed during the study were asymptomatic (without any symptoms).
- During the prevalence study, researchers found that 21% of patients with a positive anti-endomysial antibody test could not receive a biopsy due to the refusal of their physician to perform the procedure or the insurance company to pay for it.
- Only 35% of newly diagnosed patients had chronic diarrhea, dispelling the myth that diarrhea must be present to diagnose celiac disease.

Source: A multi-center study on the sero-prevalence of celiac disease in the United States among both at risk and not at risk groups. Fasano et. al., Archives of Internal Medicine. February 2003.

- Celiac disease affects at least 3 million Americans.
- The average length of time it takes for a symptomatic person to be diagnosed with celiac disease in the US is four years; this type of delay dramatically increases an individual's risk of developing autoimmune disorders, neurological problems, osteoporosis and even cancer.

Source: Characteristics of adult celiac disease in the USA: results of a national survey. Green, P.H. et.al. American Journal of Gastroenterology, 2001. 2006.

- The incidence of autoimmune diseases in the general US population is 3.5%.

5839 S. Maryland Avenue, MC4069
Chicago, IL 60637
T: 773.702.7593
F: 773.702.0666
www.CeliacDisease.net

In a 1999 study, Ventura, et.al. found that those diagnosed with celiac disease between 2-4 years of age had a 10.5% chance of developing an autoimmune disorder. Additional findings are outlined in the table below:

Age at diagnosis	Chance of developing autoimmune condition
4 – 12 yrs of age	16.7%
12 – 20 yrs of age	27%
Over 20 yrs of age	34%

- Early diagnosis of celiac disease thus is important, as it might prevent complications, and awareness is the key. A recent study in North America shows that an active case-finding strategy in the primary care setting is an effective means to improve the diagnostic rate of Celiac Disease: by screening with the blood test all subjects belonging to known "at-risk" groups such as those listed above, the diagnosis rates increased more than 40-folds.

Source: Duration of exposure to gluten and risk for autoimmune disorders in patients with celiac disease. SIGEP Study Group for Autoimmune Disorders in Celiac Disease. Ventura A, et.al. Gastroenterology 1999 Aug;117(2):297-303. Rampertab SD et al. Trends in the Presentation of Celiac Disease Am J Medicine 2006 Catassi C et al. Detection of Celiac disease in primary care: a multicenter case-finding study in North America. Am J Gastroenterol 2007

Celiac disease affects 1% of healthy, average Americans. That means at least 3 million people in our country are living with celiac disease—97% of them are undiagnosed.

Chronic Illness in the United States
Below is a list of some commonly known chronic illnesses and the number of people affected in the United States:

- Epilepsy affects 2.7 million
- Cystic Fibrosis affects 30,000 people
- 17,000 people are living with hemophilia
- Parkinson's disease affects 1,000,000 individuals
- Ulcerative colitis affects 500,000 people
- Crohn's disease affects 500,000 Americans
- 2.1 million Americans are living with rheumatoid arthritis
- Lupus affects 1.5 million people
- Multiple sclerosis affects 400,000 people in the United States

Putting Celiac Disease in Perspective

- Type 1 Diabetes affects 3 million people; 6% (180,000) of those diagnosed also have celiac disease.
- 610,000 women in the US experience unexplained infertility; 6% (36,600) of these women might never learn that celiac disease is the cause.
- 350,000 people in the United States are living with Down Syndrome; 12% (42,000) of them also have celiac disease.
- The number of people with celiac disease in the U.S. would fill 4,400 Boeing 747 airplanes.
- It would take 936 cruise ships to hold every American with celiac disease.
- Americans with celiac disease could fill Comiskey Park (now US Cellular Field, with 40,000 seats) to watch the Chicago White Sox 55 times.
- U.S. fans with celiac disease could fill Soldier Field, the home of the Chicago Bears, 37 times.
- The number of people with celiac disease in the U.S. is roughly equal to the number of people living in the state of Nevada.
- Alaska, Delaware, Washington DC, Hawaii, Idaho, Maine, Montana, Nebraska, New Hampshire, New Mexico, North Dakota, Rhode Island, South Dakota, Utah and Vermont all have populations that are less than 2,200,000 the number of people living with celiac disease in the United States.

Facts about the Gluten-Free Diet

- In 2004 the Food Allergen Labeling and Consumer Protection Act became law. This legislation went into effect in 2006 and makes it possible, for the first time, for people with celiac disease to read a food label and determine in a few easy steps if a product is safe to eat. The University of Chicago Celiac Disease Center helped to pass this law.

THE UNIVERSITY OF CHICAGO
CELIAC
DISEASE CENTER

- There are more than 2,000 gluten free food items available in the United States, and consumers are more likely to find these foods in regular grocery stores.
- From 2004 – 2005, sales of gluten-free foods increased by 77.8 million dollars (a growth of 14.6%).
- The US Department of Agriculture projects that the gluten-free industries revenues will reach $1.7 Billion by 2010.

Data from **www.bakingbusiness.com** August 2005.

DISEASE CENTER

St. Elias
Specialty Hospital
a Providence Partner

January 24th, 2012

Alaska State Legislature
120 4th Street, State Capitol
Juneau, AK 99801-1182

Dear Committee Members of the House and Senate,

As a diagnosed celiac, I am writing to ask you to join with Senator Cathy Giessel (R-AK) by co-sponsoring SCR 16, which endorses May as Celiac Disease Awareness Month.

Celiac Disease affects 1 in 133 individuals in the United States or roughly 1% of our population. This equals over 3 million Americans, including more than 5,000 Alaskans. These facts were confirmed in 2004 by the National Institutes of Health, yet 97% are undiagnosed with this autoimmune disease because of the lack of awareness and research.

Your support and passage of this resolution will encourage screening and early detection thereby eliminating costly medical expenses from delayed diagnosis and unnecessary years of suffering with a compromised quality of life. The average length of time from symptoms onset to diagnosis is 6-10 years. I was diagnosed after 9 years of misery. This resolution will also serve to align the United States with South America, Europe and Australia for the international observance of May as Celiac Disease Awareness month.

As a celiac who desires to decrease the number of those undiagnosed and hurting, I thank you in advance for your support.

Sincerely,

Brandy Wendler

Brandy Wendler, RN, MSN, ACNP-BC
St. Elias Specialty Hospital Director of Infection Control and Employee Health
Founder/Executive Director, A Spoonful of Wellness
Leader of the Anchorage CDF Gluten-free Support Group

Office of Senator Cathy Giessel
State Capitol Room 7
Anchorage, AK 99801

Dear Senator Giessel,

My name is Deb Wheaton and I have Celiac Disease.

I am writing you today to add my support to SR 16, your bill to designate May as Celiac Disease Awareness Month in Alaska. Last year I worked closely with the Celiac Disease Foundation and California State Senator Robert Huff to achieve the designation for California. As you may know, May has already been recognized as National Celiac Awareness Month, and states such as California, New York, Oregon, No. Carolina and Ohio have recently come on board. Such designations on the state level allows for increased awareness of the *"#1 Disease You've Never Heard Of"*.

My personal crusade:

- Early diagnosis is a personal crusade/passion for me. After being sickly most of her young life, my daughter, Amy, was finally diagnosed in her early 20's. The delay in diagnosis for both of us was over 10 years, which is typical for most Celiacs. This is a genetic disorder and although a simple blood or gene test is all that is needed, somehow it is almost always the last test a Dr. will do. My mother died at age 62 from a Celiac related disease – without ever being diagnosed. On a Gluten-Free diet, my daughter and I are each living a normal healthy life. We have our lives back! And how different all of our lives might have been, if we only had the knowledge. So, my goal is to help raise awareness, which will increase the likelihood that our kids ....their parents, and their grandparents will be tested.

We know that our best hope to raise awareness is through word of mouth and the media. Raising awareness will increase diagnosis and saves lives. Declaring May as Celiac Awareness Month in Alaska will help bring attention to the disease and facilitate that goal.

- *Celiac Disease is the #1 autoimmune disease in the United States. It is a genetic disorder, affecting **1 in 133 Americans**, requiring a life-time commitment to a strict gluten-free diet. Ingestion of even a crumb of wheat, rye and/or barley can cause a severe reaction.*
- According to Dr. Peter Green, Director of the Celiac Disease Center, Columbia University, and author of *"Celiac Disease: The Hidden Epidemic"*, Celiac is the #1 genetic autoimmune disease in the country as well as the most common in the world. It is also the most under-diagnosed and/or misdiagnosed with **the average delay in diagnosis being 10 years.**
- ***There is no cure.** The "cure" requires a life-time commitment to a strict Gluten-Free diet. Ingestion of even a* crumb *of wheat, rye and/or barley can cause a severe reaction. Left untreated related diseases include Type 1 Diabetes, Rheumatoid Arthritis, Osteoporosis and Thyroid Disease, and certain types of cancer.*

Thank you for helping us shine a light on *"The #1 disease that you've never heard of".*

Sincerely,

Deb Wheaton

Dear Committee Members of the House and Senate,

As the Executive Director/CEO of Celiac Disease Foundation, and on behalf of the millions our organization serves, I am writing to ask you to join with Senator Cathy Giessel (R-AK) by co-sponsoring SCR 16, which endorses May as Celiac Disease Awareness Month, aligning the United States with Australia, Europe and South America for the international observance of May as Celiac Disease Awareness Month.

Celiac Disease, a chronic, genetic, multi-system, multi-symptom, autoimmune disease, affects nearly 3 million people in the United States – 1 in 133, including children – as confirmed in 2004 by the National Institutes of Health. Yet 95% of those affected are undiagnosed or mis-diagnosed because of lack of awareness and research. Undiagnosed Celiac disease can lead to early-onset osteoporosis, delayed growth or onset of puberty, spontaneous miscarriages, infertility, depression, among other conditions.

Your support and passage of SCR 16 will encourage screening and early detection thereby eliminating costly medical expenses from delayed diagnosis and unnecessary years of suffering with a compromised quality of life.

I thank you in advance for your support.

Sincerely,

Rita T. Hopkins

Alaska State Legislature
120 4th Street, State Capitol
Juneau, AK 99801-1182

Dear Committee Members of the House and Senate:

The Center for Celiac Research at the University of Maryland has been recognized for the past 15 years as a world leader in the field of celiac disease and gluten sensitivity. The Center houses a comprehensive, multidisciplinary program covering clinical care for adults & children, support services, education and scientific research. The paramount goal of the Center is to increase the awareness of celiac disease and gluten sensitivity in order to provide better care, better quality of life, and more adequate support for the gluten-free community.

It is very important for the following reasons that May is designated as Celiac Awareness Month in the state of Alaska, as it is in Maryland and many other states.

- millions of individuals and their family members are facing the challenges of living with celiac disease; and
- celiac disease is a lifelong autoimmune intestinal disorder found in individuals who are genetically susceptible; people with the disease cannot tolerate certain proteins found in common cereal grains such as wheat, barley and rye; and
- when a person with celiac disease eats foods containing these proteins their immune system responds by damaging the small intestine, which can lead to malnourishment; if left untreated, this damage can be chronic and life-threatening; and
- researchers at the Center for Celiac Research have determined that celiac disease affects 1 in 133 Americans, and it is now considered to be the most common genetic disorder in the world; research indicates that there are approximately 2.5 million people with celiac disease in the U.S., yet only approximately 120,000 of those have been diagnosed; and
- Celiac Disease Awareness Month provides an opportunity to recognize individuals and their families whose lives have been affected by this disease, honor dedicated health professionals and researchers, and raise public awareness.

Sincerely,

Alessio Fasano, M.D.
Professor of Pediatrics, Medicine, and Physiology
Director, Center for Celiac Research and Mucosal Biology Research Center

CS FOR SENATE CONCURRENT RESOLUTION NO. 17( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR DAVIS

A RESOLUTION

Celebrating the 100th anniversary of the Girl Scouts of the United States of America and proclaiming 2012 as the Year of the Girl.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS March 12, 2012, marks the 100th anniversary of the Girl Scout movement, which began on March 12, 1912, in Savannah, Georgia, when Juliette "Daisy" Gordon Low organized a group of 18 girls and provided the girls with the opportunity to develop physically, mentally, and spiritually; and

WHEREAS, for 100 years, the Girl Scouts have helped millions of girls and women develop courage, confidence, and character, so that those girls and women could act to make the world a better place; and

WHEREAS the award-winning Girl Scout Leadership Experience helps girls discover themselves, establish values, connect with others, and take action to make the world a better place; and

WHEREAS the Girl Scout Gold Award, the highest honor in the Girl Scouts, requires a girl to make a measurable and sustainable difference in the girl's community by assessing a need, designing a solution, finding the resources and support to achieve that solution,

completing the project, and inspiring others to sustain it; and

WHEREAS the Girl Scout Gold Award honors leadership in the Girl Scout tradition, and, as high school students, Girl Scout Gold Award recipients have already changed the world; and

WHEREAS the Girl Scout programs in science, technology, engineering, math, environmental awareness, healthy living, financial literacy, and global citizenship help girls develop a solid foundation in leadership; and

WHEREAS, since its founding in 2000, the Girl Scout Research Institute has become an internationally recognized center for original research, research reviews, and surveys that provide significant insights into the lives of girls; and

WHEREAS, through the dedication, time, and talent of volunteers of different backgrounds, abilities, and areas of expertise, the Girl Scouts of Alaska serves more than 6,000 girls in grades kindergarten through 12 across the state; and

WHEREAS more than 50,000,000 American women are Girl Scout alumnae, 3,200,000 girls and adult volunteers are active members of the Girl Scouts, and the Girl Scouts of the United States of America is the largest member of the World Association of Girl Guides and Girl Scouts, a global movement of more than 10,000,000 girls in 145 countries;

BE IT RESOLVED that the Alaska State Legislature celebrates the Girl Scouts of the United States of America for 100 years of leadership and expertise and proclaims 2012 the Year of the Girl.

COPIES of this resolution shall be sent to Marge Stoneking, Chief Executive Officer, Girl Scouts of Alaska; Jane Angvik, Chair and Lifetime Member, Girl Scouts of Alaska; Mary Siroky, First Vice Chair, Girl Scouts of Alaska; Lynda Zaugg, Second Vice Chair and Lifetime Member, Girl Scouts of Alaska; Mary Killorin, Secretary, Girl Scouts of Alaska; Linda Freed, Treasurer and Lifetime Member, Girl Scouts of Alaska; and the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

SCR 17 "Celebrating the 100th Anniversary of the Girl Scouts of the United States of America and proclaiming 2012 as the Year of the Girl."

Sponsor Statement

SCR17 declares 2012 to be the "Year of the Girl" in honor of the 100th anniversary of the Girl Scouts of the United States of America. Girl Scouts of the USA is the largest organization for girls in the world and its mission is to build girls of courage, confidence and character to make the world a better place. As they celebrate their 100th anniversary as an organization this year, SCR17 recognizes the positive impact that the Girl Scouts have made historically and continue to make in the lives of girls and women throughout the United States.

Statistics indicate the need for such organizations as the Girl Scouts to help mitigate issues with safety, sexual activity and pregnancy, tobacco and substance abuse, and violence among girls. Also, participation in organizations like the Girl Scouts holds great potential for increasing the rate of civic activism and volunteering among girls and women throughout their lives.

Studies indicate that girls who participate in Girl Scouts develop important leadership skills and self-confidence, which help them in many other aspects of their lives. Research shows that girls who participate in Girl Scouts develop a strong sense of self, develop positive values, gain practical life skills, seek challenges in the world, and develop critical thinking, all of which can benefit girls in such important areas as education, physical and mental health, and sports and physical activity.

The Girl Scouts of Alaska includes 6,000 girls ages 5-17 and 1,500 volunteers. Some of the activities that the Girl Scouts of Alaska reported in their December 2011 newsletter included participation in the "Girl Scouts Forever Green" public action project encouraging changes in aspects of daily life to conserve natural resources and protect the environment. Also, the newsletter reported that the Girl Scouts of Alaska conducted a Single Soldier program in which girls wrote letters to soldiers overseas without wives or children to help keep their spirits up, and they also put together nine robotics teams that will compete in statewide robotics competitions in January 2012.

SCR17 honors Girl Scouts of the USA for their contribution to the lives of girls and women and to society by declaring 2012 to be the "Year of the Girl."

girl scouts

About Girls Scouts of the USA

The Girl Scout Promise

On my honor, I will try:
To serve God and my country,
To help people at all times,
And to live by the Girl Scout Law.

The Girl Scout Law

I will do my best to be
honest and fair,
friendly and helpful,
considerate and caring,
courageous and strong, and
responsible for what I say and do,
and to
respect myself and others,
respect authority,
use resources wisely,
make the world a better place, and
be a sister to every Girl Scout.

Who We Are

Girl Scouts of the USA (GSUSA) is the largest organization for girls in the world. Our mission is to build girls of courage, confidence, and character, who make the world a better place. Through activities in science and technology, business and economic literacy, and outdoor and environmental awareness, Girl Scouting provides girls with opportunities for fun and friendship, while fostering the development of leadership skills and self-esteem.

Founded by Juliette Gordon Low in Savannah, Georgia, on March 12, 1912, Girl Scouts of the USA was chartered by the United States Congress on March 16, 1950. Today, there are 3.2 million Girl Scouts: 2.3 million girl members and 890,000 adult members working primarily as volunteers.

What We Do

Girls develop their leadership potential through activities that enable them to discover their values and skills, and the world around them; connect with others in a multicultural environment; and take action to make a difference in the world.

Our Structure

Headquartered in New York City, Girl Scouts has 112 chartered councils nationwide. These councils provide direct services to girls and the volunteers who work with them, and to the communities they serve. Girl Scouting is open to all girls from kindergarten through high school.

National Leadership

National Honorary President: Michelle Obama
Chair, National Board of Directors: Connie L. Lindsey
Chief Executive Officer: Anna Maria Chávez

Key Alumnae Stats

- Ten of seventeen women (59 percent) in the United States Senate are former Girl Scouts.
- Forty-five of seventy-five women (60 percent) in the House of Representatives are former Girl Scouts.
- Fifty-three percent of all women business owners are former Girl Scouts.
- Seventy-six percent of all Girl Scout alumnae report that Girl Scouts had a positive impact in their lives.

For More Information

If you are interested in joining, volunteering with, or donating to Girl Scouts in your community, please call 800-GSUSA-4-U (800-478-7248) or visit www.girlscouts.org.

Girl Scout Mission

Girl Scouting builds girls of courage, confidence, and character, who make the world a better place.

100 Years

Founder Juliette Gordon Low organized the first Girl Scout Troop on **March 12, 1912**, in Savannah, Ga.

An American Institution

Girl Scouts of the USA was chartered by the U.S. Congress on **March 16, 1950**.

Still Growing Strong

Today, there are **3.2 million Girl Scouts**—2.3 million girl members and 880,000 adult members working primarily as volunteers.

Empowering Girls

In Girl Scouts, girls discover the fun, friendship, and power of girls together. Through a myriad of enriching experiences, such as extraordinary field trips, sports skill-building clinics, community service projects, cultural exchanges, and environmental stewardships, girls grow courageous and strong. Girl Scouting helps girls develop their full individual potential; relate to others with increasing understanding, skill, and respect; develop values to guide their actions and provide the foundation for sound decision-making; and contribute to the improvement of society through their abilities, leadership skills, and cooperation with others.

At Home and Abroad

Girls at home and abroad participate in **troops and groups in more than 92 countries** through USA Girl Scouts Overseas, and over **100 local Girl Scout councils** offer girls the opportunity for membership across the United States.

An International Family

Through its membership in the World Association of Girl Guides and Girl Scouts (WAGGGS), Girl Scouts of the USA is part of a worldwide family of **10 million girls and adults in 145 countries**.

A Pivotal Part of Women's History

More than **50 million American women** enjoyed Girl Scouting during their childhood—and that number continues to grow as Girl Scouts of the USA continues to inspire, challenge, and empower girls everywhere.

Annual Report

We are acutely aware of girls' changing needs. That's why in 2010 we embarked on a journey to develop strategies which will ensure that the Girl Scout Movement is perfectly situated to honor the legacy and promise of the *next* 50 million Girl Scouts. Learn more about these crucial objectives and goals in our Annual Report.

Girl Scout History

Juliette "Daisy" Gordon Low assembled 18 girls from Savannah, Georgia, on March 12, 1912, for a local Girl Scout meeting. She believed that all girls should be given the opportunity to develop physically, mentally, and spiritually. With the goal of bringing girls out of isolated home environments and into community service and the open air, Girl Scouts hiked, played basketball, went on camping trips, learned how to tell time by the stars, and studied first aid.

Within a few years, Daisy's dream for a girl-centered organization was realized. Today, Girl Scouts of the USA has a membership of over 3.2 million girls and adults, a significant growth from its modest beginnings nearly a century ago. In fact, more than 50 million women in the U.S. today are Girl Scout alumnae. We invite you to learn about our robust organization and its rich history. From our willingness to tackle important societal issues, to our commitment to diversity and inclusiveness—Girl Scouts is dedicated to every girl, everywhere.

December Newsletter

My Promise, My Faith

December is a month of religious, spiritual, and cultural holidays for all of the world's major religions. It is therefore an opportune time to update you on how Girl Scouts can interface with any faith.

Although Girl Scouts is a secular organization, and Girl Scouts recognizes that religious instruction comes from the home and one's faith community, we are values based and encourage faith in God -- as defined by each member and her family. Indeed, the Girl Scout Promise and Law are in alignment with many faith organizations' teachings.

For girls who are interested in finding out what their faith and Girl Scouting have in common, Girl Scouts has its own national faith recognition award called My Promise, My Faith. The requirements and guidelines for earning a My Promise, My Faith award are included in The Girl's Guide to Girl Scouting. Girls can earn this pin once a year at each grade level. You can read my full blog post for more on this topic.

Happy December from Girl Scouts of Alaska!

Yours in Girl Scouting,
Marge Stoneking, CEO

Girl Scouts Declares 2012 Year of the Girl

We all know that 2012 is Girl Scouts 100th Anniversary! Now, Girl Scouts of the USA is also declaring 2012 the Year of the Girl.

As Anna Maria Chavez, CEO of Girl Scouts of the USA explained, "We want to make sure that a baby girl born in 2012 will grow up in a new and vastly differently world." She's referring to the fact that, despite so much progress on behalf of women and girls in the last

century, men still outnumber women in most leadership positions as well as science and technology jobs. It's not just a matter of equity. The fact that girls are interested and capable, yet opting out of these choices, has significant implications for our country.

By declaring 2012 the Year of the Girl, we hope to rally the nation around the cause of girls' leadership. Breaking down societal barriers that hinder girls from leading will take a nation-wide effort, and the involvement of individuals and groups beyond the family of Girl Scouts. Do you want to be a part of the movement? Sign up here to get updates directly from the campaign.

Women of Science

We are getting excited for our 20th annual Women of Science events around the state! The theme this year aviation.

We still need more presenters to help us bring science, technology, engineering and math (STEM) to life for girls.

If you know someone who uses STEM in any aspect of their work, please encourage them to share their expertise with girls! Past presenters have included female pilots, photographers, civil engineers, architects, and medical professionals. Do you know someone who can help us show girls how STEM skills are being used in real jobs in the real world?

Call Kay Shoemaker in Anchorage (907-273-0393) or Julie Alexander in Mat-Su (907-376-3822) with your suggestions. Thank you!

National Council Results

At the 2011 National Council session in Houston, Texas, members voted on important policy matters affecting the future of Girl Scouting. In addition to voting on officers to serve for the 2011-2014 term, the following issues were decided:

1. A general program fee for girls was approved, to help with the additional costs involved in executing the Girl Scout program. The fee will be reflected as an annual council fee not to exceed $12.
2. A proposal to change the timing of the election of national delegates was voted down.
3. The question of whether to offer the Girl Scout membership year on a rolling cycle, instead of our current October 1 - September 30 year, was deferred to a committee. Councils using e-Council may have difficulty handling a rolling enrollment system, so the committee will address these and other concerns before bringing the issue to a vote again.

To review the full slate of proposals considered and the outcome of the voting, click here.

Count Down to 100th Anniversary!

Here at the council office we are counting down the days until 2012 when a year-long celebration of 100 years of Girl Scouting will finally begin! We are excited about all the girls who have taken our Centennial Celebration Challenge and are sending us photos and descriptions of their projects. We hope you are also thinking about parades and other events in your area that you can participate in to share with your community the legacy of Girl Scouting in Alaska.

Here are some of the 100th anniversary events to watch for.

- Girl Scouts Forever Green (February - April)
- Southeast Camp-In (March 10)
- Statewide Campfires (March 12)
- Troop 2012 (March 12)

- Juneau Auction (March 17)
- Young Women of Distinction Luncheon (March 29, Anchorage)
- Centennial Celebration Challenge (through May 7)
- 100 Geocaches (Year-Long and Ongoing)
- Year of the Girl (Year-Long and Ongoing) [create anchor back to earlier text]

If you are planning something, please share it with us so we can help spread the word.

Do you have any questions about our 100th Anniversary -- what's happening and what you can do? Please call or email Anne Gore at 273-0315 or agore@girlscoutsalaska.org.

Girl Scouts Forever Green

Girl Scouts Forever Green is the Girl Scouts 100th Anniversary national Take Action project. The project asks everyone -- both Girl Scouts and the public at large -- to commit to changing some aspects of their daily lives to help protect the environment and conserve natural resources. The project suggests specific actions in three categories: reduce plastics, save energy, and save water.

Each action pledged, such as planting a tree, or turning off lights when not in use, has a measurable environmental impact associated with it. And, Girl Scouts' goal is to engage 800,000 Girl Scouts (25 percent of each council's membership) by the end of December 2012. Because the projects are aligned with the It's Your Planet, Love It! leadership journey, girls can earn awards as they work to create positive change for the environment.

Anyone who participates in Girl Scouts Forever Green is eligible to receive the patch shown here. We also have stickers, pledge cards, brochures and posters available for you to print out and use to motivate others to take action, too. The more participation, the greater the environmental impact!

Be sure to visit the Girl Scouts Forever Green website to learn about the three projects, take the pledge, and get more tips, tools, and resources. Also, check out our Girl Scouts Forever Green program offerings at Spring Creek Farm [link to anchor GSFG 67] on the first Saturday of February, March, and April 2012.

Questions? Email Kay Shoemaker kshoemaker@girlscoutsalaska.org or Anne Gore agore@girlscoutsalaska.org.

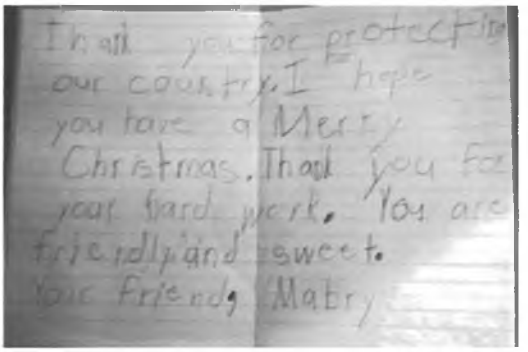
United Way Holiday Guide

Holidays are a time of year when we come together as a community. We make the extra effort to look for the things that bring us together and unite us, as families, as faith communities, as neighbors, as people.

United Way board member Rick Fox recently put it perfectly when he said that he gives to give back. We've all had those moments in our lives where someone did something a little extra to help us in some way. This holiday, United Way of Anchorage asks you to consider making plans to give back.

To help you find the opportunity that is right for you, they offer this guide to giving. It includes a Quick Finder to easily match your gift with your favorite organization, a directory of local organizations, and special sections with ways you can Give, Advocate, and Volunteer. Click on the image above to see United Way's full Holiday Guide.

Letters to Soldiers



Some of our United States soldiers serving overseas do not have wives or children to send them letters and keep their spirits up. If you want to let them know that someone is thinking of them and they are not alone, send your letters to the Single Soldier program care of:

CSM Kirk Johnson

501st IN

TF SPARTAN

Please do not use last names in your letters, and write about general interest issues.

News from Southeast

Juneau Auction, March 17

Come to the Girl Scouts Annual Southeast Benefit Auction March 17th at the Juneau Arts and Humanities Council from 6 to 10pm! Traditionally an autumn event, this year's auction moves to March to coincide with the 100th anniversary of Girl Scouting. We're planning a big party in keeping with this benchmark year!

We'll have a vast array of items to bid on, both in an outcry and silent auction format. Guests will enjoy hors d'oeurves and a no-host bar.

The Auction Committee is busy securing donations from regional and statewide donors and businesses; There are a variety of volunteer positions needing to be filled to help make this event something truly spectacular. To contribute with donations or to volunteer, please contact Mary Siroky at 789-7616.

Proceeds raised at the Auction assist Southeast Girl Scouts with memberships, camperships, and travel assistance.

Juneau Cookie Kick-Off

Join the Juneau Girl Scouts as we kick off the Girl Scout Cookie Season at this fun festival of training, crafts, and games! Juneau Girl Scouts will gather in the gym at DZ Friday on January 6th from 6 to 8pm to learn by participating in cool activities! Learn about the cookies, about selling and goal-setting, and about marketing the fun way!

New this year for parents of Girl Scouts is an orientation of their own called "the Cookie Rookie" where moms and dads learn practical ways to be supportive of their girls.

Prev Next

The cost of the event is $5 per girl, including a patch and supplies!

Robotics Rocks!

As of publication, eight of Girl Scouts of Alaska's nine robotics teams have competed in qualifying tournaments. They have all done well and are

eligible to compete in the Championship Tournament on January 28th at South High School in Anchorage.

- Rockin' Wolves (Soldotna) received the Robot Design award
- Lego Experts (Anchorage) received the Judge's Choice award: Rising Stars
- Robotchicks (Anchorage) received the Project award
- Mat-Su Macaroi (Mat-Su) received the Core Values award
- Blight Busters (Anchorage) were the 2nd place Champions in their qualifier tournament
- Killer Cantaloupes (Juneau) were the 1st place Champions in their qualifier tournament
- Nine Northern Computer Cookies, or N2C2 (Juneau) were the 2nd place Champions in their qualifier tournament

Girlz vs. Food are scheduled to compete in their qualifier tournament on Saturday, December 17th at South High School.

Opportunities for Adult Volunteers

Conference Call Classes

Girl Scouts of Alaska strives to provide our adult volunteers with the support and information you need to succeed. Conference calls are a great way to share your experience and questions with other volunteers, parents and staff from across our council without having to leave the comfort of your home. Check out these upcoming opportunities:

January 12, 2012, 7-8pm

- 100th Anniversary and the Centennial Challenge - Learn 100 creative ways you and your girls can celebrate Girl Scout's 100th Anniversary.

February 9, 2012, 7-8pm

- Service Unit Team Talk - Service Unit Teams will talk with our CEO about how to make our organization stronger.

March 8, 2012, 7-8pm

- Opportunities for Adults – BREAK UP your routine and learn about new opportunities to volunteer with Girl Scouts, and recognize others for their efforts. In this conference call we'll address:
  - Pathways
  - Chaperones
  - Host Families
  - Journey in a Weekend
  - Series
  - Events
  - Indirect Opportunities
  - Adult Learning
  - Adult Awards

April 12, 2012, 7-8pm

- Re-engaging Girls – Learn how Bridging, Pathways, the New Girl's Guide to Girl Scouts, Awards and more can re-engage girls in Scouting. In this conference call we'll address:
  - Bridging
  - Pathways
  - Girls Guide to Girl Scouting
  - Awards
  - Girl Adult Partnership
  - Spring Break Ideas

May 10, 2012, 7-8pm

- Wrapping Up for Next Year – Take time to celebrate what you've accomplished, make plans for the summer and prepare yourself, the girls and their parents for next year. We'll cover:
  - Ceremonies
  - Early Bird Registration
  - Reports and other Paperwork

- Plans for Summer - Hiking, Camping, Parades
- Returning Next Year or Disbanding?
- Bank Account
- What to Tell Parents

Opportunities for Girls

Apply for Girls' World Forum

Girl Scouts of Alaska (GSAK) is seeking letters of interest from teenage Girl Scouts to attend the 2012 Girls' World Forum, hosted by Girl Scouts of the USA and the World Association of Girl Guides and Girl Scouts (WAGGGS) July 12-16, 2012 in Chicago.

Two GSAK girls (ages 14-18 on July 12) will be selected to represent Girl Scouts of Alaska as delegates to the Girls' World Forum. This is the third and final event in a series of forums celebrating WAGGG's centennial, and the first in the United States.

The WAGGGS Global Action Theme, which is the focus of the three forums is "Together We can Change Our World." The theme addresses the United Nations Millennium Development Goals. During the WAGGGS Girls' World Forum, girls from around the world will focus on three millennium goals including: goal 1- to end poverty and hunger, goal 3 - to promote gender equality and empower women, and goal 7 - to achieve global environmental sustainability. Girls' World Forum attendees will work together to learn more about, to plan, and to engage in taking action to help achieve these three worldwide goals by 2015.

Are you interested in expanding your Girl Scout impact and network to partner with WAGGGS on global issues affecting girls? Are you committed to taking action to truly make the world a better place? If you said yes, then you are who Alaska is looking for to represent us at the Girls' World Forum. Please write a letter of interest to:

Marge Stoneking, CEO

Girl Scouts of Alaska

3911 Turnagain Blvd East

Anchorage, AK 99517

In your letter of interest, please address the following questions:

1. Why do you think it's important to address the Millennium Development Goals (MDGs)?
2. How have you, your community, and/or your GS Council worked to achieve one or more of the MDGs?
3. What interest/experience do you have in international events?
4. Whether you speak any international languages other than English, and what is your level of fluency?

FYI: Registration costs will be covered by Girl Scouts of Alaska for the two selected delegates, and girls may earn $1.00/box cookie credits in the 2012 GSAK Cookie Program to offset travel fees. Travel fees will be in the neighborhood of $2,000, to be determined early in 2012. Girl delegates will be accompanied by young women (18-30) volunteer chaperones.

Spirit of Youth Nominations being accepted now!

December 31, 2011 is the last day to submit a nomination to be eligible for the 2012 Spirit of Youth Award! The application is simple and can be completed on the Spirit of Youth website. Nominations in any of the 11 categories can be submitted for teens (or teen groups) ages 12-19.

Nomination Categories:

- Cultural Activities
- Overcoming Challenges

- Participation in Government or Business
- Life saver (crisis response) & Prevention
- Service (to children, peers or community)
- Fine Arts (dance, theater, music, art)
- Technology & Media
- Faith-based Service
- Science and Environmental efforts

Research demonstrates that youth who are recognized for their accomplishments by those around them are better able to build confidence in their future! Submit your nomination today.

To learn more about Spirit of Youth or listen to past winners and their radio stories, visit www.spiritofyouth.org.

STEM Program Opportunity

Girl Scouts of the USA is proud to be an outreach partner with the Joan Ganz Cooney Center at Sesame Workshop and E-Line Media to introduce the second annual National STEM Video Game Challenge open to all Girl Scouts! This challenge invites game makers to show their passion for playing and making video games and aims to motivate children's interests in Science, Technology, Engineering, and Math (STEM).

Up for grabs is almost $200,000 in cash and prizes, with multiple ways to win! The entry period is open through March 12th, 2012. Finalists will be selected by a distinguished panel of judges and winners will be announced in the spring of 2012 at a major public event.

For more information on how Girl Scouts can enter the Youth Prize competition (middle school & high school) go to www.STEMChallenge.org.

This challenge also compliments the Entertainment Technology Badge, where girls can dig into video game development! If you have girls interested in earning this badge, encourage them to enter the STEM Video Challenge as well!

Art Contest

The Anchorage Youth Development Coalition (AYDC) and Alaska Youth & Parent Foundation are developing an online directory for Anchorage youth services, programs and opportunities. A diverse group of Anchorage youth has named this directory Anchorage Youth Central.

AYDC is sponsoring a contest to develop a logo or icon for this new online directory. Youth ages 24 and under are eligible to submit drawings, graphic designs, pictures or paintings depicting an appropriate image to use as the logo/icon for this new web-based directory.

A diverse group of youth will judge the submissions and the winner will be awarded a $100 Fred Meyer gift card. Please submit any entries to nicole@aydc.org or bring them by our office at 3350 Commercial Dr. #103 NO LATER THAN 5pm on December 30.

Girl Helpers Needed

The Alaska State Employees Association/Union annual Winter Festival needs 3-4 girls ages 11 or older to assist with kids activities for this family friendly event. Activities may include face painting, ring toss, bowling, and other games. The Winter Festival is January 14 from 11am - 5pm. If your Girl Scout or Troop is interested in helping, please contact Rose Scogin at wildakrose@aol.com or 344-7735.

Pen Pal Requests

Desiree West, a fifth grader from Avon, Indiana is interested in finding a pen pal in Alaska.

If you want to be her pen pal, please write to:

Desiree West

Sent: Saturday, January 22, 2011 2:07 PM
To: Sen. Con Bunde; senator_John_coghill@legis.state.sk.us; Sen. Bettye Davis; Sen. Fred Dyson; Sen. Johnny Ellis; Sen. Dennis Egan; Sen. Hollis French; Sen. Lyman Hoffman; Sen. Charlie Huggins; Sen. Albert Kookesh; Sen. Lesil McGuire; Sen. Linda Menard; Sen. Kevin Meyer; Sen. Donny Olson; Sen. Joe Paskvan; Sen. Bert Stedman; senator_gary_steven@legis.state.ak.us; Sen. Joe Thomas; Sen. Tom Wagoner; Sen. Bill Wielechowski
Subject: American Legion Auxiliary Alaska Girls State

First I want to welcome the newly elected Senators to the 27th Legislative First Session 2011.

Next I want to personally thank each and every one of the Senators, Representatives and their staff that helped the Alaska Girls State program for 2010. You were awesome. It amazes the young ladies each time that a real legislative person takes the time to help out at Girls State or come talk to them at a general assembly. Thank you so much from the bottom of my heart. We are here to educate the young citizens (who will be voting age in the next year) and what better way to do that then have the actual legislative personel there helping us. It is amazing how many of them are knowagable about current and world affairs.

Now for who I am: My name is Debra Henderson and I am in my third year of being the American Legion Auxiliary Alaska Girls State Director. I live in Ninilchik, Alaska and work for the Ninilchik Village Tribe as the Procurement Officer (12 years). I am on the Kenai Peninsula Fair Board, the Ninilchik Community Library Board and the American Legion Auxiliary Department of Alaska Girls State Director. I have three grown children and 6 grand children.

I have contacted the Senators and Representatives each year about helping out with the session. American Legion Auxiliary Girls State is a nonpartisan program that teaches young women responsible citizenship and love for God and Country. Since the inception of the Girls State program in 1937, nearly 1 million young people have had the opportunity to learn firsthand how their state and local government works.

High school girls who have completed their junior year spend an intensive week of study, working together as self-governing citizens at Auxiliary-sponsored Girls State programs in every state (with the exception of Hawaii).

Participants learn how to participate in the functioning of their state's government in preparation for their future roles as responsible adult citizens. Two girls are selected from each Girls State program to attend Girls Nation, a national government training program. Girls Nation "senators" meet for a week in Washington, D.C. in July (fully expense paid trip), where they run for political office, campaign for the passage of legislation and possibly meet with their state representatives and senators. Capping off the week of Girls Nation is often times a meeting with the President of the United States at the White House.

Programs/Activities:

At Alaska Girls State, the "citizens"study local and state government processes for one week in June. The 2011 Alaska Girls State Session is June 12th-18th at the Meier Lake Conference Center in Wasilla Alaska. At the beginning of the session, each citizen is given a party affiliation (Nationalist or Federalist). They set up their own city and hold city elefctions. They set up state governments with Speaker of the House and President of the Senate and administer them according to the laws of Alaska. The young ladies

un for a legislative office (this is mandatory), run a campaign and we hold a primary nd general election. Each citizen is required to write at least one bill to be presented. t is amazing to watch these ladies grow through the week. It is a once in a lifetime pportunity.

Alaska Girls State is ran by volunteers, who for one week give up their lives for these girls, the program and what we believe in. There is about 20 staff. The citizens write daily articles and a daily newsletter is published.

low you are probably wondering why I am emailing each of you:
would like to invite each of you to attend part of our program, help out by being a uest speaker or just to stop by and enjoy a meal with the citizens and staff. If you are nterested please let me know. For 2009 there was 40 delegates and 2010 there was 1. My goal is to increase it by one each year until we get the program back where it vas in the 90's (60-70). It is getting harder and harder for us to get our information nto the public schools since 911. Then if we get it into the schools, to find someone hat is passionate about government or knows the American Legion and what we stand or. Usually the information gets put on someone's desk and covered up. Our hands are ied fromt he point of putting the application packets into the schools. If you are nterested in any of these opportunities, please let me know.
Also if you know of any juniors in high school that would be interested in our session, please give them this email address. We are also on the web at www.alaskagirlsstate.org.

Good Luck in your legislative endeavors and God Bless.

For God and Country,
Debra Henderson, Girls State Directror
American Legion Auxiliary Dept. of Alaska

Senator Bettye Davis with Connie Lindsay, President of the National Board of Directors for the Girl Scouts of the United States of America

Safety

Tweet 0 1

The safety of girls and youth is always a concern, whether in everyday life or cyberspace. That safety extends to girls and youths' physical and emotional safety. Adults and youth in all fields—youth development, education, sports, out-of-school time—can play an integral part in empowering girls and youth to be safe and in ensuring their safety.

Feeling Safe: What Girls Say

How America's Youth Are Faring Since September 11

The Net Effect: Girls and New Media

The Ten Emerging Truths

Statistics

• For girls aged 8 to 17, 72% defined safety as not being physically hurt and 46% defined it as not having their feelings hurt. But when asked what actually **worried**them the most, the number one concern, noted by 32%, was being teased or being made fun of. (The Girl Scout Research Institute, *Feeling Safe: What Girls Say (2003))*

• Bullying or harassment is a particularly prominent problem at the junior high or middle high school level. Three-quarters of junior high or middle high school principals say that bullying or harassment is a serious problem at their school, compared to 43% of elementary school principals and 45% of senior high school principals. (Gay, Lesbian, and Straight Education Network and the National Association of Secondary School Principals, *The Principal's Perspective: School Safety, Bullying, and Harassment, 2008)*

• Teens aged 13 to 17 were less likely than preteens aged 8 to 12 to feel physically (62% vs. 72%) and emotionally (57% vs. 64%) safe. (The Girl Scout Research Institute, *Feeling Safe: What Girls Say (2003))*

• Almost one quarter of teenage girls (23%) have fewer than three adults they could go to if they were in trouble or needed help, compared with only 11% of preteen girls who feel this way. (The Girl Scout Research Institute, *Feeling Safe: What Girls Say (2003))*

• Seventy-one percent of girls aged 13 to 18 believed that it is wrong to meet people off-line that they have initially met through online communications. (The Girl Scout Research Institute, *The Net Effect: Girls and New Media (2002))*

• After experiencing cyberbulling, over half of teen victims aged 13 to 17 claim to have been angry (56%), one-third feeling hurt (33%) and embarrassed (32%), and over one in ten feeling scared (13%). Females are more likely than males to report all these emotions; especially females aged 13 to 15. (Harris Interactive, *Trends and Tudes: Cyberbullying, April 2006)*

• An alarming percentage of girls aged 13 to 17 report posting personal information online: their real age (72%), a fake age (23%), photos or videos of themselves (70%), photos or videos of friends (61%), city they live in (55%), name of school (48%), and cellphone number (7%). (Cox Communications, *Teen Internet Safety Survey Wave II, March 2007)*

• In 2002, 75% of girls aged 13 to 18 reported being given Internet rules by their parents, however, 43% also reported breaking those rules at least once. (The Girl Scout Research Institute, *The Net Effect: Girls and New Media (2002))*

• An increasing percentage of girls aged 13 to 17 say their parents talk to them about the dangers of sharing personal information online: 78% in 2007 versus 72% in 2006. (Cox Communications, *Teen Internet Safety Survey Wave II, March 2007)*

• In 2005, the prevalence of having ridden with a driver who had been drinking alcohol was higher among female high school students (29.6%) than male high school students (27.2%). (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• In 2005, the prevalence of having driven when they had been drinking alcohol was higher among white female (10.1%) than black female (3.5%) and Hispanic female (6.4%) high school students. (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• The number one concern, noted by 32% of girls ages 8-17, was being teased or being made fun of. (GSRI, *Feeling Safe: What Girls Say* (2003)

• Three-thirds (74.2%) of LGBT students reported feeling unsafe in school because of their sexual orientation, gender, gender expression, race or ethnicity, a real or perceived disability, or their actual or presumed religion. (Gay, Lesbian, and Straight Education Network, *The 2005 National School Climate, 2005)*

• Elementary and secondary school principals reported that while nearly all (96%) of their schools have anti-bullying policies, less than half specifically mention sexual orientation (46%) or gender identity or expression (39%). (Gay,

Sexual Activity and Pregnancy

Tweet 0 2

Girls and boys from early ages are exposed to varying messages about sexual activity and pregnancy from intended and unintended sources. Those varying messages influence the decisions youth make. Youth development, education, health, out-of-school time, social services, and government organizations can have a positive effect on girls and boys as they face decisions related to sexual activity and pregnancy.

Also See:

Teens Before Their Time

Statistics

• In 2005, roughly a third of both male and female high school students reported being sexually active. (ChildTrends.org, *Child and Youth Indicators Databank: Sexually Active Teens, 2006)*

• In 2005, 44.1% of sexually active female high school students did **not** use a condom at their most recent sexual intercourse compared with 30% of males. (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• Females and males report similar levels of any oral sex experience; in 2002, 54% of teen females and 55% of teen males reported engaging in oral sex. (ChildTrends.org, *Child and Youth Indicators Databank: Oral Sex, 2006)*

• In 2005, 12% of high school females had sexual intercourse with four or more persons during their lifetime compared to 16.5% of high school males. (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• Annually, there are over 750,000 teen pregnancies. Eight in ten of these pregnancies are unintended and 81% are to unmarried teens. (*The Guttmacher Institute, U.S. Teenage Pregnancy Statistics, National and State Trends and Trends by Race and Ethnicity, 2006)*

• After increasing 23% between 1972 and 1990 to an all-time high, the teen pregnancy rate for girls aged 15-19 declined 36% between 1990 and 2002 (the most recent year that nationally-representative data is available). (*The Guttmacher Institute, U.S. Teenage Pregnancy Statistics, National and State Trends and Trends by Race and Ethnicity, 2006)*

• Teen pregnancy rates vary among the three largest racial/ethnic groups. Between 1990 and 2002, rates for African-American and non-Hispanic white teens (aged 15-19) declined 40% and 34% respectively. The rate for Hispanics teens aged 15-19 declined 19% during the same time period. (*The Guttmacher Institute (2006) U.S. Teenage Pregnancy Statistics, National and State Trends and Trends by Race and Ethnicity)*

• Teen girls (50%) are far less likely than teen boys (69%) to say the decision to use contraception is shared equally by both partners. (The National Campaign to Prevent Teen Pregnancy, *Science Says: American Opinion on Teen Pregnancy and Related Issues 2007)*

• Six in ten sexually experienced teens (60%) say they wish they had waited longer to have sex, including 67% of those aged 12-14 and 57% of those aged 15-19. Almost equal proportions of teen boys (73%) and teen girls (78%) say that being a virgin is not embarrassing. (The National Campaign to Prevent Teen Pregnancy, *Science Says: American Opinion on Teen Pregnancy and Related Issues 2007)*

• The overwhelming majority of teens (90%) think it is important for teens to be given a strong message that they should not have sex until they are at least out of high school. It is also the case that a clear majority of teens (56%) believe young people should be getting information about abstinence and contraception, rather than either/or. (The National Campaign to Prevent Teen Pregnancy, *Science Says: American Opinion on Teen Pregnancy and Related Issues 2007)*

• Just as young girls are confronted with difficult "teen" issues like dating and sex at an increasingly early age, they are learning that their family confidantes are often unwilling or unable to discuss such issues. (The Girl Scout Research Institute, *Teens Before Their Time (2000))*

Tobacco Use and Substance Abuse

Tweet 0

Even though cigarette smoking may be in decline for teenage girls and boys, substance abuse continues. Organizations from all fields—youth development, education, health, government, media—can serve as a positive force in helping youth make healthy decisions about tobacco and illicit drug use.

Also See:

The New Normal? What Girls Say About Healthy Living

Statistics

• Approximately 41.6% of females ages 12 or older reported using an illicit drug at some point in their lives. Approximately 12.1% of females ages 12 and older reported illicit drug use in the past year and 6.1% reported illicit drug use in the past six months. (Substance Abuse and Mental Health Services Administration, *2005 National Survey on Drug Use and Health)*

• Approximately 35.9% of female high school students surveyed nationwide in 2005 used marijuana during their lifetime. This is down from 7.6% in 2003 and 38.4% in 2001. (Centers for Disease Control, *Youth Risk Behavior Surveillance —United States 2005)*

• For 8th-graders, female and male students continued to have similar rates of daily smoking (4%) in 2005. White 8th-graders (5%) continued to smoke at a higher rate than either their Black or Hispanic peers (2% and 3%, respectively). (Childstats.gov, *America's Children in Brief: Key National Indicators of Well-Being, 2006)*

• Among youth aged 12 to 17, the rate of current illicit drug use was similar for boys (10.1%) and girls (9.7%). While boys aged 12 to 17 had a higher rate of marijuana use than girls (7.5% vs. 6.2%), the rate for nonmedical use of prescription-type psychotherapeutics was similar for boys and girls (3.1% and 3.6%, respectively). (Substance Abuse and Mental Health Services Administration, *National Survey on Drug Use and Health: 2005)*

• In 2005, among youth aged 12 to 17, the percentage of females who were current drinkers (17.2%) was higher than that for males (15.9%). (Substance Abuse and Mental Health Services Administration, *National Survey on Drug Use and Health: 2005)*

• In 2005, 23.5% of high school females engaged in episodic heavy drinking (i.e., had more than 5 drinks of alcohol in a row on more than one day) compared to 27.5% of their male counterparts. (Centers for Disease Control, *Youth Risk Behavior Surveillance—United States 2005)*

• In 2005, among youths aged 12 to 17, current cigarette smoking in 2005 was equally prevalent among females (10.8%) and males (10.7%). The rate for females in this age group declined from 13.6% in 2002 to 10.8% in 2005. The rate for males in this age group declined from 12.3% in 2002 to 10.7% in 2005. (Substance Abuse and Mental Health Services Administration, *National Survey on Drug Use and Health: 2005)*

• In 2005, the rate of substance dependence or abuse among females aged 12 to 17 was similar to the rate among their male counterparts (8.3% vs. 7.8%). (Substance Abuse and Mental Health Services Administration, *National Survey on Drug Use and Health: 2005)*

• In 2005 high school females (13.5%) were more likely than high school males (11.3%) to have used inhalants one or more times during their life (e.g., sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high). (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• Females generally have had lower rates of heavy drinking; however, this has not been true at 8th grade in the last several years, and at 10th grade, girls overtook boys in 2005 in their 30-day prevalence of alcohol use. And for the last four years, 8th-grade girls have had a higher 30-day prevalence of smoking than boys. (Monitoring the Future, *National Results on Adolescent Drug Use: Overview of Key Findings, 2006)*

• One in four high school females was offered, sold, or given an illicit drug on school property in the past year. (OJJDP, *Juvenile Victims and Offenders: 2006 National Report)*

Violence

Tweet 0 3

Youth experience varying forms and degrees of violence and in different environments. Some experience violence at alarming rates and some less frequently. Some experience violence because of real or perceived characteristics. In whatever form against youth, violence leaves a negative and lasting effect. There is much opportunity for all fields to mitigate the experience and effects that violence, in all its forms, has on youth.

The Ten Emerging Truths

Statistics

• Nationwide, the prevalence of having been in a physical fight was higher among 9th grade female (37.2%) than 10th grade female (27.6%), 11th grade female (25.0%), and 12th grade female (20.3%) students. (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• In 2005, 9.2% of students nationwide had been hit, slapped, or physically hurt on purpose by their boyfriend or girlfriend (i.e., dating violence). Overall, the prevalence of dating violence was higher among black female (12.0%) than white female (8.5%) and Hispanic female (9.0%) high school students. (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• In 2005, while the overall percentage of students reporting being victims of hate speech is not significantly different for females and males, females were more likely to report being targets of hate-related words based on gender discrimination than were males (3% compared with 1%). However, males were more likely to report being targets of hate-related words based on race discrimination compared with females (5% compared with 4%). (ChildTrends.org, *Child and Youth Indicators Databank: Victims of Hate Speech)*

• Two-thirds (65%) of LGBT teens report that they have been verbally or physically harassed or assaulted during the past year because of their perceived or actual appearance, gender, sexual orientation, race/ethnicity, disability, or religion. (Gay, Lesbian, and Straight Education Network, *From Teasing to Torment: A Survey of Students and Teachers, 2005)*

• In 2005, female high school students were more than twice as likely as their male peers to report being physically forced to have intercourse (11% compared with 4%). Eight percent of all students in grades 9 through 12 reported having been raped at some time in their lives. (ChildTrends.org, *Child and Youth Indicators Databank: Adolescents Who Have Ever Been Raped)*

• Female teens aged 12 to 17 are more likely than males to be victims of physical abuse in the home though the opposite is true for children under the age of eight. (ChildTrends Databank: *CrossCurrents: Violence in the Lives of Children, August 2003)*

• By the time they are in high school, one in ten females reports that she has been raped in her lifetime, compared with one in 20 males. (ChildTrends Databank, *CrossCurrents: Violence in the Lives of Children, August 2003)*

• An estimated 1,600 persons under age 18 were murdered in the U.S. in 2002—10% of all persons murdered that year. About one-third (36%) of these juvenile murder victims were female. About 4 in 10 (39%) of these victims were under age 6, 1 in 10 (10%) were ages 6–11, 1 in 10 (8%) were ages 12–14, and 4 in 10 (43%) were ages 15–17. (Office of Juvenile Justice and Delinquency Prevention, *Juvenile Victims and Offenders: 2006 National Report)*

• Among kidnap victims under age 6 known to law enforcement, the numbers of male and female victims were essentially equal. For victims ages 12 to 17, the ratio was almost three female victims for each male victim. For victims ages 25–34, the ratio was almost 4 to 1. (Office of Juvenile Justice and Delinquency Prevention, *Juvenile Victims and Offenders: 2006 National Report)*

• About two-thirds of female victims ages 15–17 were kidnapped by an acquaintance, and one-quarter by a stranger. (Office of Juvenile Justice and Delinquency Prevention, *Juvenile Victims and Offenders: 2006 National Report)*

• Compared to other students their age, girls' playing violent video games differs from boys' playing: 52% of tween females (8 to 12 year-olds) and 38% of teen females (13 to 18 year-olds) never play violent video games versus 11% of tween boys and 10% of teen boys. (Harris Interactive, *Trends and Tudes: Video Gaming: General and Pathological Use, March 2007)*

• One in four girls was involved in physical fights. (OJJDP, *Juvenile Victims and Offenders: 2006 National Report)*

• Half (51.4%) of LGBT students reported having had their property, such as their car, clothing or books stolen or

deliberately damaged at school in the past year with about a tenth (11.3%) reporting that it happened frequently or often. (Gay, Lesbian, and Straight Education Network, *The 2005 National School Climate, 2005)*

Civic Engagement and Volunteering

Tweet 1 2

Girls and boys participate in civic engagement activities and volunteering in different ways, venues, and times throughout their adolescence and young adulthood. From what the following statistics and trends indicate, there is much opportunity for youth development, civic, political, and educational organizations to positively affect how youth contribute to society as they grow older.

The Ten Emerging Truths: New Directions for Girls 11-17

Voices of Volunteers 18-29

Statistics

• For girls ages 11-12, 73% reported improving the world around them as their favorite activity (i.e., activities related to the environment or helping others). (The Girl Scout Research Institute, *The Ten Emerging Truths: New Directions for Girls 11-17 (2002))*

• Girls ages 11-17 participate in student government at markedly increasing levels: 5% of girls ages 11-13; 12% of girls ages 13-15; and 20% of girls ages 16-17. (The Girl Scout Research Institute, *The Ten Emerging Truths: New Directions for Girls 11-17 (2002))*

• **More** young women aged 15 to 25 participate in the following activities than young men: raising money for charity (27% for women vs. 22% for men); regular volunteering for non-political groups (21% vs. 16%); active group membership (22% vs. 18%); membership in political groups (17% vs. 15%); and, participating in a run/walk/ride for charity (20% vs. 15%). (Center for Information and Research on Civic Learning and Engagement, *The Civic and Political Health of a Nation, 2006)*

• **Less** young women aged 15 to 25 participate in the following activities than young men: regular voting (ages 20 to 25) (25% for women vs. 28% for men); persuading others to vote (31% vs. 39%); donating money for a political campaign (5% vs. 9%); and, regular volunteering for a political group (1.3% vs. 2.4%) (Center for Information and Research on Civic Learning and Engagement, *The Civic and Political Health of a Nation, 2006)*

• In the 2004 election, 55% of females ages 18-24 reported registering to vote, compared with 48% of males the same age. Similarly, 45% of females reported actually voting, compared with 39% of males. (ChildTrends.org, *Child and Youth Indicators Databank: Youth Voting, 2006)*

• Voter turnout rates among voters ages 18-29 declined: women (27% in 1994 versus 24% in 2002) and men (25% in 1994 versus 21% in 2002). (Center for Information and Research on Civic Learning and Engagement, *Quick Facts about Young Voters: 2006)*

• From 1990 to 2000, consistent young volunteers were more likely to be female (14 percent) than male (11 percent). They were also more likely to be from higher SES households. (National Center for Education Statistics, *Volunteer Service by Young People from High School through Early Adulthood, 2003)*

• From 1990 to 2000, females (50%) were more likely than males (38%) to volunteer in high school, but no differences were detected between the sexes two years out of high school (38% for males and 39% for females). Male volunteering declined further to 29% by the eighth year after scheduled high school graduation; no change was detected in female volunteering (37%). (National Center for Education Statistics, *Volunteer Service by Young People from High School through Early Adulthood, 2003)*

• As of 2003, female college graduates were more likely than their male counterparts to have volunteered in the past year (50% vs. 43%). Among those who had volunteered, women were more likely than men to have served in educational or religious institutions, while men were more likely than women to have done other volunteer work with children or to have participated in poverty or neighborhood improvement projects. (National Center for Education Statistics, *Where Are They Now? A Description of 1992–93 Bachelor's Degree Recipients 10 Years Later, 2006)*

• College students follow the national trend in volunteering, with females (33%) volunteering at a higher rate than males (26.8%). Both male and female college students were more likely to volunteer for an educational or youth services organization than any other type of organization: 33.6% of male college students, and 30.2% of female college students volunteered at an educational or youth services organization. With a little over 22% of both male and female college students, religious organizations remained the second most popular place for volunteering among both genders. (Corporation for National and Community Service, *College Students Helping America, 2006)*

Education

Tweet 0

Education remains a critical factor in the lives of youth today, especially with the advent and consequences of No Child Left Behind (2001), and continued changes in demographic, academic, and technological demands of the workforce. With girls and boys exhibiting different educational trends and needs from K-16, there is opportunity for out-of-school time and youth development programs to benefit girls and boys socially, emotionally, as well as academically.

Teens Before Their Time

The Girl Difference

Statistics

• Female kindergarteners (83%) are somewhat more likely than their male counterparts (79%) to exhibit the following positive social behaviors: ease in joining others in play; ability to make and keep friends; and positively interacting with peers. (ChildTrends.org, *Child and Youth Indicators Databank: Kindergartners' Social Interaction Skills, 2006)*

• In 2005, female fourth- and eighth-graders both scored higher on average in reading than their male counterparts. (National Center for Education Statistics, *The Nation's Report Card: Reading 2005)*

• In 2005, female fourth- and eighth-graders scored lower on average in mathematics than their male counterparts. However, both male and female fourth-graders' average scores were higher in 2005 than in any previous assessment year. (National Center for Education Statistics, *The Nation's Report Card: Mathematics 2005)*

• In 2005 eighth- and twelfth-grade male students outperformed female students in science. (National Center for Education Statistics, *The Nation's Report Card: Science 2005)*

• A slightly higher percentage of females than males completed high school in 2005 (87% compared with 85%, respectively). In 2005, females were also more likely than males to have completed some college (62% compared with 52%, respectively) and to have received at least a bachelor's degree (32% compared with 26%, respectively). (ChildTrends.org, *Child and Youth Indicators Databank: Educational Attainment, 2006)*

• In 2004, 9% of females ages 16 to 24 were high school dropouts, compared with 12% of males. Females comprise one-half of the population and make up 43% of the dropouts in this age group. (ChildTrends.org, *Child and Youth Indicators Databank: High School Dropout Rates, 2006)*

• In 2005, high school females (14.8%) were nearly half as likely as high school males (27.4%) to use computers more than 3 hours on an average school day for something **not** related to school work (e.g., played video or computer games). (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• In 2000, the majority of students who took AP tests received a passing score that would earn college credit, but female test takers were less likely than their male counterparts to earn passing scores. (National Science Foundation, *Science and Engineering Indicators 2006)*

• In 2000, sex differences occurred in science coursetaking but not in mathematics. More females than males completed courses in advanced biology, Advanced Placement (AP) or International Baccalaureate (IB) biology, and chemistry. Males completed physics and AP/IB physics courses at higher rates than females. (National Science Foundation, *Science and Engineering Indicators, 2006)*

• In 2000, women earned more than half of the degrees awarded in psychology (78%), biological/agricultural sciences (59%), and social sciences (55%), and almost half (47%) in mathematics. However, women received 21% of bachelors degrees awarded in engineering, 27% in computer sciences, and 43% in physical sciences. (National Science Foundation, *Science and Engineering Indicators 2006)*

• For girls ages 8-12, aspirations after high school are largely educational and professional: 93% for college education; 76% for a career; 67% for marriage; and, 63% for children. (The Girl Scout Research Institute, *Teens Before Their Time (2000))*

Physical and Mental Health

Tweet 3 1

Girls and boys from childhood to young adulthood experience varying degrees of physical and mental health. Although recent statistics show a disturbing trend among of youth health behaviors, there is opportunity for youth development and community-based organizations, health and education field, and public policy makers to engage and empower youth in healthy practices.

The New Normal? What Girls Say About Healthy Living

Weighing In Helping Girls Be Healthy Today, Healthy Tomorrow

Statistics

• More than 10 percent of children between the ages of 2 and 5 are overweight, double the proportion since 1980. (Fitness.gov, The President's Council on Physical Fitness and Sports)

• In 2003–2004, Black, non-Hispanic girls were at particularly high risk of being overweight (25%), compared with White, non-Hispanic and Mexican American girls (16% and 17%, respectively). (Childstats.gov, *America's Children in Brief: Key National Indicators of Well-Being, 2006)*

• A daughter's dissatisfaction with her weight is greater if her mother is also dissatisfied with her own weight, in spite of how much a daughter *actually* weighs. (The Girl Scout Research Institute, *The New Normal? What Girls Say About Healthy Living (2006))*

• In 2005, females were more likely than males to engage in disordered eating with 6% of females reporting vomiting or using laxatives to control weight compared with 3% of males. (ChildTrends.org, *Child and Youth Indicators Databank: Disordered Eating—Symptoms of Bulimia, 2006)*

• Although about two-thirds of girls aged 8 to 17 correctly identified themselves as being either normal weight or overweight, one-third have a distorted idea about their weight—either perceiving themselves as too heavy when they are, in fact, of normal weight, or feeling their weight is "about right" when they actually are too heavy. Specifically, 45% of girls that were overweight and 61% of girls at risk of being overweight see themselves as normal weight, while 14% of normal weight girls believe they are overweight. (The Girl Scout Research Institute, *The New Normal? What Girls Say About Healthy Living (2006))*

• In 2005, female youth were nearly twice as likely as male youth to report seriously considering suicide (22% versus 12%) and attempting suicide (11% versus 6%). However, males were far more likely to succeed in committing suicide. (ChildTrends.org, *Child and Youth Indicators Databank: Suicidal Teens, 2006)*

• Overall, the prevalence of having seriously considered attempting suicide was higher among white female (21.5%) and Hispanic female (24.2%) than black female (17.1%) students. (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• In 2005, there were 5.5 million youths aged 12 to 17 (21.8%) who received treatment or counseling for emotional or behavior problems in the year prior to the interview. Adolescent females were more likely than adolescent males to report past year treatment for mental health problems (23.6% vs. 20.0%). (Substance Abuse and Mental Health Services Administration, *National Survey on Drug Use and Health: 2005)*

• In 2005 high school females (8.1%) were nearly twice as likely as their male counterparts (4.6%) to take diet pills, powders, or liquids without a doctor's advice to lose weight or to keep from gaining weight. Further, high school females (6.2%) were three times as likely as their male counterparts (2.8%) to vomit or take laxatives to lose weight or to keep from gaining weight. (Centers for Disease Control, *Youth Risk Behavior Surveillance—2005)*

• For many girls, health is the absence of illness or of unhealthy behavior. Being free of drugs, alcohol, and tobacco was cited by the greatest number (87%) of girls as being very important. (The Girl Scout Research Institute, *The New Normal? What Girls Say About Healthy Living (2006))*

Lesbian, and Straight Education Network and the National Association of Secondary School Principals, *The Principal's Perspective: School Safety, Bullying, and Harassment, 2008)*

• Students from schools with an inclusive policy are more likely to feel very safe at school (54% vs. 36%) and one-third as likely to skip a class because they felt uncomfortable or unsafe (5% vs. 16%) (Gay, Lesbian, and Straight Education Network, *From Teasing to Torment: School Climate in America, 2005)*

• Seven in ten (69%) elementary and secondary school principals believed that professional development for school personnel would be most helpful in reducing bullying or harassment of LGBT students in their school. (Gay, Lesbian, and Straight Education Network and the National Association of Secondary School Principals, *The Principal's Perspective: School Safety, Bullying, and Harassment, 2008)*

Sports and Physical Activity

Tweet 24 1

Although sports and physical activity are a part of girls' and boys' lives in and out of school at varying levels, girls tend to be less active than boys. The sports, education, youth development, and out-of-school time fields can provide opportunity for girls to engage in positive, healthy physical activity.

The New Normal? What Girls Say About Healthy Living

GirlSports Basic National Evaluation

Statistics

• High school females were much more likely (51.7%) than their male counterparts (40%) to **not** attend physical education class one or more days in an average school week. (Centers for Disease Control, *Youth Risk Behavior Surveillance—United States 2005)*

• In 2005, a much higher percentage of adolescent males participate in vigorous physical activity than do their female peers. Within all racial and ethnic subgroups, activity levels for males are between 13 and 19 percentage points higher than for females. For all grades, activity levels for males are between 10 and 20 percentage points higher than for females. (ChildTrends.org, *Child and Youth Indicators Databank: Vigorous Physical Activity by Youth, 2006)*

• In 2005, more high school females (72.2%) than their male counterparts (56.2%) did **not** meet currently recommended levels of physical activity—doing any kind of physical that increased their heart rate and made them breathe hard for a total of at least 60 minutes per day. (Centers for Disease Control, *Youth Risk Behavior Surveillance —United States 2005)*

• The more physically active girls are, the greater their self-esteem and the more satisfied they are with their weight, regardless of how much they weigh. Eighty-three percent of very active girls say that physical activity makes them feel good about themselves. (The Girl Scout Research Institute, *The New Normal? What Girls Say About Healthy Living (2006))*

• For girls ages 11-17 it is the *perception* of being overweight, not just weight alone, that inhibits participation in sports and physical activities. (The Girl Scout Research Institute, *The New Normal? What Girls Say About Healthy Living (2006))*

• For teen girls, being both physically active and a team sports participant is associated with a lower prevalence of sexual risk-taking behaviors. (Kulig, K., Brener, N. & McManus, T. *Pediatrics and Adolescent Medicine, 2003)*

• Many girls ages 11–17 say they do not play sports because they do not feel skilled or competent (40%) or because they do not think their bodies look good (23%). (The Girl Scout Research Institute, *The New Normal? What Girls Say About Healthy Living (2006))*

• A study of school reading texts found that boys were represented in physical activities 65% of the time, while girls were represented 35% of the time. In addition, boys dominated throwing and catching activities, while girls dominated dance and swing-set activities. (Henschel-Pellet, H.A. *Research Quarterly, 2001)*

• In 2001, 1 in 2.5 girls participated in high school sports—up from 1 in 27 in 1971. That figure represented an 800% increase from 1971. For boys, the figure has remained constant at 1 in 2. (Women's Sports Foundation, *Women's Sports and Physical Activity Facts and Statistics, 2007)*

• Overall, females are somewhat less likely than their male counterparts to watch four or more hours of TV on an average weekday. The largest difference appears among twelfth graders, where 17% of females watch four or more hours of TV on an average weekday compared to 24% of males. (ChildTrends.org, *Child and Youth Indicators Databank: Watching Television, 2006)*

RESEARCH SUMMARY: WHAT GIRLS SAY

While the topic of gender and leadership has been widely explored by social scientists and management practitioners, little or no specific in-depth research has been done on how youth, especially girls, view leadership itself. In particular, little is known about how they understand their leadership experiences, their motivations for pursuing these opportunities, or the implications of their current behaviors and attitudes on their future lives. What kind of leadership does this generation of girls aspire to and connect with? What do we need to know in order to support the next generation of girl and women leaders?

Change It Up! What Girls Say About Redefining Leadership presents findings from a national study of almost 4,000 girls and boys on a broad spectrum of issues related to leadership: how they define it; their experiences, failures, and successes with leadership experimentation; their aspirations, hopes, and fears; the effect of gender biases and stereotypes; and predictors of leadership aspiration. From the evidence of this report, girls are clearly saying we need to "change it up" in how we define and think about leadership.

MAJOR FINDINGS

INSIGHT #1

GIRLS ARE REDEFINING LEADERSHIP IN MEANINGFUL TERMS

The conception of leadership in today's culture is too limiting. Even at a young age, girls have well-formed ideas about what it means to be a leader. The top-of-mind definition of leadership is expressed in terms of authority exercised through command and control. However, both girls and boys find this definition of leadership the least appealing or aspirational. **Their preferred definitions of leadership imply personal principles, ethical behavior, and the ability to effect social change.**

The gap between the kind of leadership girls aspire to and the conventional command-and-control definition may help explain some of this ambivalence. Girls are also more likely to be driven toward leadership by altruistic motives, whereas boys are more likely to be motivated by power and money.

- Youth set the benchmark for leadership skills very high. Leadership is highly idealized and perceived to require a wide range of skills and qualities that do not seem attainable. **Only 21% of girls believe they currently have most of the key qualities required to be a good leader.**
- The desire to be a leader among Asian American (59%), African American (53%), and Hispanic girls (50%) is higher in comparison with Caucasian girls (34%).
- Over 90% of girls say they want to or would not mind being leaders.

INSIGHT #2

SELF-CONFIDENCE + SKILLS = NEW GIRL LEADERS

Self-confidence is the strongest driver of leadership aspirations. **Youth who report high self-regard on a number of leadership skills and qualities are more likely to aspire to leadership.**

- **Girls from higher income and diverse racial and ethnic backgrounds are more likely to desire leadership.** These girls rate themselves higher on leadership skills and dimensions, are more likely to report having had a leadership experience, and are more likely to think of themselves as leaders. It is these attitudes, self-perceptions, and experiences that drive leadership aspirations in youth, not their race/ethnicity or income.
- The greatest single barrier to leadership seems to be low self-regard about skills and qualities.
- Barriers to leadership are consistent among girls and boys, but **girls experience fears and inhibitions about social acceptance more acutely**, in the form of stress, fear of talking in front of others, aversion to seeming bossy, and peer pressure.
- **External barriers in the general environment still exist for girls and young women.** While most youth (82%) agree that girls and boys are equally good at being leaders, 52% also agree that "girls have to work harder than boys in order to gain positions of leadership." Women are still judged to be better than men at stereotypically "female" things like "taking care of others" and "running a household," while men are judged to be better at things such as "running a state or country" and "running a business."

INSIGHT #3

OPPORTUNITIES + EXPERIENCES + SUPPORT = NEW GIRL LEADERS

Other factors influencing girls' leadership aspirations include family, particularly mothers, and peers—who can play both a negative and a positive role. Participation in organized and informal activities and exposure to leadership opportunities are strongly correlated with leadership aspirations. Yet girls relate that environments in which they can develop leadership skills are scarce. **Notably, youth do not feel they have much power to change things or teach/help others in many environments, which is the kind of leadership they aspire to the most.**

- **Overall, four in six girls (67%) believe they have had some opportunity to be a leader.** The large majority (86%) say their most recent experience being a leader was a positive one. African American and Hispanic girls are more likely than Caucasian girls to report enjoying their experiences as leaders.
- Girls derive greater satisfaction from learning (31% vs. 22%) in leadership experiences; boys derive greater satisfaction from being in charge (26% vs. 16%). Girls and boys equally cite "being able to effect change" as a reason for their positive experiences.

- Girls say their mothers are the most likely to encourage them to be leaders, followed by teachers and fathers. However, 39% of girls report having been discouraged or put down, usually by peers and classmates, when they were trying to lead.
- Youth do not feel they have much power to change things or teach/help others in any environment. When asked to rate environments in which they felt they could effect change, "school" is the highest—at 23%—but "none" gets the same rating. After-school environments are rated significantly lower at 7%.

INSIGHT #4

GIRLS HAVE A RANGE OF LEADERSHIP IDENTITIES

Girls vary widely in terms of their leadership aspirations and self-perceptions and fall into five categories of leadership identity. The categories range from girls (and boys—both sexes fall into exactly the same categories in exactly the same proportions) who think of themselves as leaders and actually want to be leaders to those who do not think of themselves as leaders and do not want to be leaders. A comparison of these groups reveals substantial differences not only among their respective orientations to leadership, but also in relation to their general attitudes, goals, aspirations, and behaviors.

- (36%) LEADERSHIP VANGUARD: Youth already think of themselves as leaders and actively desire to be leaders. They have the highest self-confidence, higher focus on academic, personal, and career success, and high social change values.
- (25%) AMBIVALENT LEADERS: Youth think of themselves as leaders and would not mind being leaders, although leadership is not expressly a goal for them. They share most of the attributes and behaviors of Vanguard leaders, only to a lesser degree.
- (4%) HOPEFULS: Youth want to be leaders but do not think of themselves as leaders. They are not as confident as the Vanguard leaders, or even the Ambivalent leaders.
- (26%) UNMOTIVATED: Youth would not mind being leaders but do not think of themselves as leaders. They have relatively low self-confidence and are unmotivated in pursuing leadership opportunities.
- (8%) REJECTERS: Youth do not want to be leaders and do not think of themselves as leaders. This group of girls and boys has the lowest self-confidence, feels powerless to change the world, and is more likely to believe that leadership cannot be learned.

CONCLUSIONS AND RECOMMENDATIONS

Girls today aspire to leadership not in the form in which it most commonly appears in the culture—command and control—but to a model that is purpose-driven and oriented toward social change. As well, the leadership aspirations and experiences of youth are greatly dependent on their perceptions of their own abilities and their opportunities and experiences to exercise leadership.

Opportunities to develop leadership skills are scarce, and youth-developing organizations such as the Girl Scouts need to give youth the opportunity to effect change, which is what they are passionate about. The impact of positive adult role models, especially mothers, and supportive environments cannot be underestimated.

Overall, to be relevant to and successful with girls, a leadership program must address their aspirational or preferred definition of leadership, their need for emotional safety, and their desire for social and personal development. To encourage future girl leaders and support those already interested in leadership:

- **Frame communications about leadership in ways that are appealing to girls.** Understand the types of leaders girls want to become and help them realize that vision. Emphasize the skills and activities associated with the program, not just the end result.
- **Help girls see leadership as attainable.** Girls do not need to have all the skills and qualities they associate with being a leader to actually be one.
- **Work on enhancing girls' self-confidence in their skills and abilities.** Leadership can become a natural by-product of this skill and confidence development.
- **Create opportunities for girls to experience a broad range of leadership activities in a supportive environment.** Make clear that leadership is multi-dimensional and encourage girls to experiment with different roles and types, from social change and political activism to the more traditional, in a supportive environment that allows them to attempt new things and "try leadership on."
- **Understand the barriers to leadership for girls, including the fear of peer ridicule and persistent stereotypes about what it means to be "feminine."** Things like speaking in front of others and not wanting to upset anyone can be prohibitive.
- **Do not treat girls as one homogenous group.** Understand where girls already are in terms of leadership and help guide them forward in the most appropriate way for them.
- **Identify and create opportunities to engender positive leadership aspirations, behaviors, goals, and self-perceptions across environments.** This includes school, home, house of worship, peer group, community organizations, and the Internet, among others.

METHODOLOGY

The study combined qualitative and quantitative research from the Girl Scout Research Institute and Fluent, a New York based research firm. In January of 2007, researchers conducted focus groups and ethnographies with 165 girls, boys, and mothers in four regions across the country. Upon completion of the qualitative research, a nationwide online survey was administered to a national stratified sample of 2,475 girls and 1,514 boys between the ages of 8 and 17 years. The online survey was fielded from June 22, 2007, to June 29, 2007. The margin of error did not exceed 1.5%. The sample was weighted to reflect the U.S. Census representation of racial/ethnic groups among the target-age population.

is the preeminent organization for and leading authority on girls, with 3.6 million girl and adult members. Now in its 96th year, Girl Scouting builds girls of courage, confidence, and character, who make the world a better place.

, formed in 2000, is a center for research and public policy information on the healthy development of girls. Its main goal is to elevate the voices of girls on key issues that affect their lives, such as their emotional and physical health and safety. The GSRI originates national projects and initiatives, synthesizes existing research, and conducts outcomes evaluation to support the development of Girl Scout programs and to provide information to educational institutions, not-for-profits, government agencies, public policy organizations, parents seeking ways to support their daughters, and girls themselves. The GSRI includes staff and advisers who have expertise in child development and advisers from academia, industry, government, and not-for-profit organizations.

, located in Washington, D.C., educates representatives of the legislative and executive branches of federal, state, and local government and advocates for public policy issues important to girls and Girl Scouting.

Subject: Girl Scouts of Alaska Troop 49
Attachments: CIUI Research Summary-What Girls Say (Eng).pdf; Girl Scouts Declares 2012 the Year of the Girl.doc

Dear Girl Scout Troop 49;

Girl Scouts of Alaska is very grateful for Honorary Troop 49. Your enthusiastic response to launching Troop 49 this past year affirmed your commitment to the girls of Alaska, their welfare and leadership potential, today and into the future. You can renew your membership online for 2012 at http://www.girlscoutsalaska.org/for-girls/join.

As 2011 comes to a close, we want to share some highlights of what Girl Scouts in Alaska has been up to and give you a preview of what 2012 will bring. 2012 is the centennial of Girl Scouts of the USA. In 2011:

- Our rural traveling day camp served 22 Southwest villages, reaching 33% of the region's K-12 girls. This program has been growing for ten years now. We work in partnership with Job Corps, Food Bank, and local tribal organizations to make it happen.
- Over 2,200 Alaskan girls went to Girl Scout camp this summer.
- In Southeast and the Yukon-Kuskokwim regions, 500 new girls experienced Girl Scouts for the first time.
- Over 1,600 girls in Bethel, Juneau, Kodiak, Ketchikan, Sitka, Soldotna, Mat-Su, and Anchorage spent a day doing hands-on science and technology activities with female Alaskan scientists in our signature Women of Science & Technology events.
- Dozens of girls in Kodiak, Juneau, Wasilla, Soldotna, and Ketchikan learned outdoor living skills such as shelter building, outdoor cooking, tent pitching and lashing, and fire-building.
- We kicked off our 100th Anniversary celebration at our Statewide Encampment, drawing nearly 1,000 girls and 400 adults from all over the state. Girls camped out at the Palmer State Fairgrounds for three nights. Thanks to hundreds of Alaskan volunteer presenters, girls discovered new experiences from civil defense to roller derby to wildlife management. A NASA astronaut visited and shared her experience as one of the first women in the space program and what life is like in space.
- Forty Alaskan teenagers traveled abroad, and twenty-six Alaskan teenagers traveled in the U.S. through Girl Scouts.
- In November, Girl Scouts of Alaska sent six girls to the national Girl Scout Leadership Institute (GSLI) where they learned about leadership, marketing, global citizenship, and more. GSLI participants reported back:
    - The top three things they feel are most important: education, environment, and women's issues.
    - The biggest concern in American girls' daily lives is body image.
    - They asked the adults to demonstrate leadership and Girl Scout pride.

- The GSLI co-occurred with the triennial Girl Scout National Convention, held this year in Houston, Texas. This year's Convention was particularly special, as it launched the national 100th anniversary celebration and the **Year of the Girl**. The following key messages were shared over and over at Convention:
    - Girl Scouts has done amazing things for girls and women in the first 100 years; We've grown from the original 18-girl troop to over 50 million girls served;
    - 10% adult women were once Girl Scouts, and 2/3 of women leaders are former Girl Scouts;
    - Women make up 50% of the US workforce and over 50% of college grads;
    - Women are the great untapped leadership resource;
    - Girl Scouts is the pipeline for building leadership in both girls and women;
    - Girls think about leadership differently than boys. Girls think it is about helping others and working collaboratively to make a difference in the community. Boys think of leadership as power and making money (Source: Girl Scout Research Institute *Change it Up*; summary report attached).
    - The challenge for Girl Scouts in the next 100 years is to bring gender balance to the leadership of this country and this world.

One of the convention highlights was the internal kickoff of 2012 as the **Year of the Girl** , which evoked great excitement and energy. Building on that, we are excited to share the attached **Year of the Girl** press release, which will be distributed to national media this week. Additionally, a Web page www.girlscouts.org/YearoftheGirl/ is live on www.girlscouts.org and is a place you can go to for additional information about the **Year of the Girl**. On that website, you will have the ability to share your e-mail address to receive additional information as the campaign progresses.

As part of the **Year of the Girl** campaign, Girl Scouts of the USA will launch on January 31 a landmark cause asking all members of society to join us in support of girls to help them realize their leadership potential. We will encourage mothers, fathers, and all adults, corporations, members of government, as well as other nonprofits to help girls reach their leadership potential -- because when girls succeed, so does society. We all have a role to play in making that happen. Together, we can get girls there.

We'll be in touch again soon to share with you our 2012 Girl Scouts of Alaska event calendar as well as ways you can join us in celebrating 100 years of Girl Scouting and promoting **Year of the Girl.** In the meantime, **please save the date for the evening of March 17th**, when we'll be commemorating our centennial and raising funds for girls in Southeast Alaska at the **Girl Scouts of Alaska, Southeast Auction** right there in Juneau.

Yours in Girl Scouting,

Marge Stoneking

Girl Scouts Declares 2012 the Year of the Girl

CEO Anna Maria Chávez Announces Girl Scouts Plans to Start Transforming American Leadership During the Iconic Organization's 100th Anniversary

NEW YORK, N.Y. — In a move designed to focus national attention on girls and the issues they face, Girl Scouts of the USA (GSUSA) has declared 2012 the Year of the Girl: a celebration of girls, recognition of their leadership potential, and a commitment to creating a coalition of like-minded organizations and individuals in support of balanced leadership in the workplace and in communities across the country.

The announcement comes as GSUSA assumes new leadership under CEO Anna Maria Chávez and prepares to celebrate its centennial in 2012, using this important moment in its history to launch a major initiative to change the landscape for girls and young women. The initiative, which also includes the largest fundraising and advocacy campaign dedicated to girls' issues in the nation's history, will be formally announced in January and will extend well beyond the Year of the Girl in 2012.

"The Year of the Girl is only a beginning," said GSUSA Chief Executive Officer Anna Maria Chávez. "We can't transform American leadership in a year, but we can transform expectations in a year. We can transform awareness in a year. We can set in motion a generational change, and make certain that a baby girl born in 2012 will experience her life in a new and vastly different world. Only Girl Scouts, with its scale and time-honored place in society, can launch this initiative. If not us, who? If not now, when? When girls succeed, so does society. We know that together, we can get her there."

This declaration serves as the foundation for Girl Scouts' broader, multiyear, multipronged effort to break down societal barriers that hinder girls from leading and achieving success in everything from technology and science to business and industry.

During the Year of the Girl, local Girl Scout offices nationwide will mix celebrations of the organization's 100 years as the premier leadership experience for girls with efforts to create a sense of urgency around girls' issues.

"Girl Scouts is at the forefront of building girl leaders, GSUSA National President Connie L. Lindsey said. "We embrace the opportunity we have to develop the next generation and future generations of leaders that understand the interconnectedness of the global community. Our girls will understand that they matter. And when they dream their future, they see a world of shared leadership: where the values of courage, confidence, and character really do make the world a better place."

About Girl Scouts of the USA

Founded in 1912, Girl Scouts of the USA is the preeminent leadership development organization for girls, with 3.2 million girl and adult members worldwide. Girl Scouts is the leading authority on girls' healthy development, and builds girls of courage, confidence, and character, who make the world a better place. The organization serves girls from every corner of the United States and its territories. Girl Scouts of the USA also serves American girls and their classmates attending American and international schools overseas in 90 countries. For more information on how to join, volunteer, reconnect, and donate to Girl Scouts, call 800-GSUSA-4-U or visit www.girlscouts.org.

In Girl Scouts, leadership isn't just about building future leaders—it's about **building girl leaders for today.**

—Kathy Cloninger, CEO, Girl Scouts of the USA

THE NEW GIRL SCOUT LEADERSHIP EXPERIENCE

From founding libraries in America's heartland to establishing free medical clinics in India, each year 2.6 million Girl Scouts take the lead in bettering their communities and the world. Girl leaders have been at the heart of Girl Scouts since its founding in 1912, when Juliette Gordon Low recognized that developing girls' leadership abilities was critical for ensuring they would be the change-makers of the future.

Since Low's time, the world has changed dramatically. Social, cultural, and economic shifts that once took shape over a generation or more are now rapid and often have a global impact. This ever more complex and uncertain world clearly requires a new kind of leader—one who values diversity, inclusion, and collaboration and is committed to improving neighborhoods, communities, and the world.

Girl Scouts is, as it always has been, the organization best positioned to offer girls the tools they need to be successful leaders now and throughout their lives. As Girl Scouting approaches its 100th anniversary, the Movement is using its expertise to create a completely new approach for *what* girls do in Girl Scouting, *how* they do it, and how they will *benefit*.

A good leader is someone who works with others to **make things happen.**

—Annie, 17, Girl Scout Senior, North Carolina

Called the New Girl Scout Leadership Experience, this model engages girls in **discovering** themselves, **connecting** with others, and **taking action** to make the world a better place. This model begins with a definition of leadership that girls understand and believe in: a leader, girls say, is defined not only by the qualities and skills one has, but also by how those qualities and skills are used to make a difference in the world.

Research suggests that the youth development field is moving from the model of one individual leader to a model of shared leadership. This more inclusive and empowering approach is also the one girls most value (see *Exploring Girls' Leadership*, Girl Scout Research Institute, 2007). It encourages girls to take increasing responsibility for designing and implementing activities, and this results in extensive opportunities for them to see how their actions can impact the lives of others.

To develop and evaluate this model objectively, youth development experts, volunteers, and council and national staff identified 15 anticipated outcomes, or benefits, of the leadership experience. Tying the new program experience to outcomes serves three vital functions: to measure the impact of the experience; to determine what modifications are needed; and to communicate, to internal and external audiences, how girls are benefiting.

Leadership is knowing what you believe and putting it into action.

—Meaghan, 14, Girl Scout Cadette, Ohio

The Framework

The New Girl Scout Leadership Experience identifies three "keys" to leadership:

Discover: Girls understand themselves and their values and use their knowledge and skills to explore the world.

Connect: Girls care about, inspire, and team with others locally and globally.

Take Action: Girls act to make the world a better place.

All experiences in Girl Scouting incorporate the Discover, Connect, and Take Action keys to leadership. Girl Scout experiences are also, as much as possible, girl led and encourage learning by doing (experiential learning), and cooperative learning. These three processes promote the fun and friendship that have always been so integral to Girl Scouting.

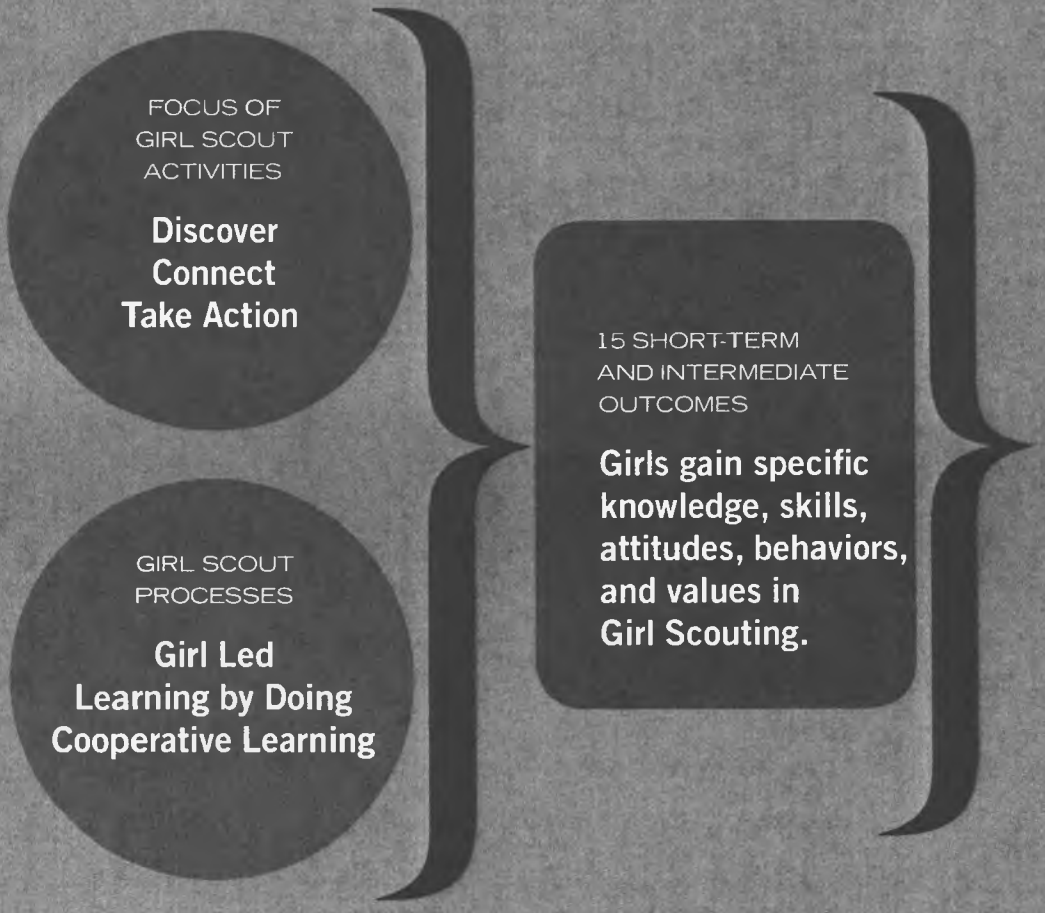
As girls take part in Girl Scouts, facilitators can review the outcomes, and the signs of those outcomes, to gauge the benefits of the experience. The signs of the outcomes reflect what girls might think, say, or do—during and after a leadership experience—and help adults determine the success of the experience.

Outcomes charts, organized by the three Leadership Keys and by grade level, detail all 15 outcomes. Although detailed and comprehensive, the charts are an easy-to-use reference and can be used in varying ways. For example, volunteers coaching girls through experiences will want to know where related outcomes and signs are in the charts and how they fit into the leadership model. The signs are simply examples; they are not official assessments of ability and are not to be used to compare one girl to another.

Understanding the Model

The diagram at right shows the various components of the leadership experience and their tie to the larger goal that girls have the courage, confidence, and character to make the world a better place. When Discover, Connect, and Take Action activities are *girl led* and involve *learning by doing* and *cooperative learning*, girls achieve the desired and expected short-term leadership outcomes, ultimately resulting in Girl Scouting achieving its mission.

THE NEW GIRL SCOUT LEADERSHIP EXPERIENCE



Outcomes in the New Girl Scout Leadership Experience

The diagram at right lists the 15 leadership outcomes and where they "live" within the Discover, Connect, and Take Action keys of leadership.

You may be wondering: How do you know that girls are having an effective leadership experience? Surely, discovering, connecting, and taking action are different for Girl Scout Brownies and Girl Scout Seniors.

The signs are what let adults know if girls at each grade level are achieving leadership skills. Checking the outcomes is like noting road signs on a journey—the signs that let you know you're getting closer to your destination. Similarly, seeing the age-appropriate signs during Girl Scout activities lets adults know that girls are achieving the intended outcomes.

Definitions of each outcome, and the signs for each, are organized in user-friendly reference tables beginning on page 23. Each outcome has its own reference table, as does each grade level. The tables are organized exactly as they are listed in the diagram at right, under the Discover, Connect, and Take Action keys to leadership.

Leadership

THE 15 OUTCOMES OF THE NEW GIRL SCOUT LEADERSHIP EXPERIENCE

1 Girls develop a strong sense of self.

2 Girls develop positive values.

3 Girls gain practical life skills.

4 Girls seek challenges in the world.

5 Girls develop critical thinking.

1 Girls develop healthy relationships.

2 Girls promote cooperation and team building.

3 Girls can resolve conflicts.

4 Girls advance diversity in a multicultural world.

5 Girls feel connected to their communities, locally and globally.

1 Girls can identify community needs.

2 Girls are resourceful problem solvers.

3 Girls advocate for themselves and others, locally and globally.

4 Girls educate and inspire others to act.

5 Girls feel empowered to make a difference in the world.

Reading the Outcome Reference Tables

Each outcome reference table has six sections, one for each of the six Girl Scout grade levels:

Girl Scout Daisy (grades K–1)
Girl Scout Brownie (grades 2–3)
Girl Scout Junior (grades 4–5)
Girl Scout Cadette (grades 6–8)
Girl Scout Senior (grades 9–10)
Girl Scout Ambassador (grades 11–12)

Most likely, you will zero in on those outcomes you find most meaningful—ones that relate to a specific grade level or a specific impact on girls.

The chart at right shows one section of an outcome reference table and what each row and column mean.

SECTION FROM THE OUTCOME REFERENCE TABLES FOR GIRL SCOUT BROWNIES

This heading shows where the outcome belongs within the three keys to leadership development (Discover, Connect, Take Action).

This part of the table names the outcome and gives its definition.

Connect

OUTCOME **1**

Girls develop healthy relationships.

Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Brownie 2–3	begin to understand how their behavior contributes to maintaining healthy relationships.	identify healthy/unhealthy behaviors (e.g., honesty, caring, bullying) when presented with a relationship scenario.
	are better able to show empathy toward others.	make empathetic statements (e.g., "I helped Kim with that because she was getting frustrated") and/or report being more caring in their interactions with others.

This column shows the Girl Scout grade level.

This column defines the outcome for each grade level.

This column gives the signs of what girls might do or say that shows they achieved the outcome.

Using the Outcome Reference Tables

The outcome reference tables are being used to create resources and awards to ensure that girls engage in activities that lead to leadership skills. The Girl Scout Research Institute is using the tables to design a national system of outcomes measurement. Councils can also use the tables in a variety of ways, even focusing on one particular outcome at a time. Keep in mind, however, that according to the Girl Scout approach, leadership is the result of discovering, connecting, and taking action, so it is important to incorporate outcomes from all three Leadership Keys.

When Implementing Girl Scout Program

The signs in the outcome reference tables can give council staff ideas about how to design activities. A council, for example, may want to organize activities that help Girl Scout Cadettes feel empowered to make a difference in the world. The Take Action outcome reference table suggests that this can be accomplished at the Cadette level by providing opportunities for girls to feel that their opinions, ideas, and contributions are taken seriously by adults.

When Writing a Grant Proposal

Suppose a council fund development team is writing a grant proposal to support a program that helps Girl Scout Juniors develop a strong sense of self. The Discover outcome reference tables can be used to explain to potential funders what a strong sense of self means for this grade level and what its signs are. The fund development team can then include this information in its grant proposal.

When Training Volunteers

Suppose a council adult learning team wants to guide volunteers on partnering with Girl Scout Juniors so that the girls advance diversity. The Connect outcome reference table shows that for Girl Scout Juniors, advancing diversity means being able to identify discrimination and being more aware of ways to promote inclusiveness. The indicators suggest that the adult learning team should select activities for volunteer development that focus on how Girl Scout Juniors might identify discrimination.

When Recruiting

Suppose a council membership team wants to recruit adult volunteers based on a community's specific needs. The council could, for example, choose the outcome of gaining practical life skills, with a focus on healthy living. Outcomes from across all grade levels could be used to appeal to a broad range of volunteers. The membership team can also look at the indicators in the reference table to detail the signs of this outcome—further incentive for healthy-minded adults to volunteer in the community.

SHARE HOW YOU USE THE TABLES

As you discover other ways to make use of the reference tables, e-mail the Girl Scout Research Institute (gsresearch@girlscouts.org) so your ideas can be shared with other councils and Girl Scouts of the USA.

What leadership means to me is bringing others together as one and helping them **do things they have never tried before.**

—Shelby, 11, Girl Scout Junior, Colorado

Looking Ahead

Now that we have begun to chart the benefits of the New Girl Scout Leadership Experience and orient staff and volunteers to those benefits, plans are under way to develop measurement systems.

Through spring 2008, the GSRI will test measurements of the New Girl Scout Leadership Experience outcomes and program processes in a pilot study. Developing the signs for how the processes of girl led, learning by doing, and cooperative learning look for each grade level will be a major part of the work. The results will provide a baseline for future comparisons and initial measurement tools that will be ready in time for the 2008 National Council Session. The GSRI is also working with councils to develop a five-year plan for an integrated local/national outcomes measurement system. *Exploring Girls' Leadership* and an original study (forthcoming 2008) will further illuminate what leadership means for girls, which factors encourage them to aspire to leadership, and how Girl Scouting can make a difference.

The New Girl Scout Leadership Experience represents a leap forward in how Girl Scouting builds girls of courage, confidence, and character. By achieving the intended outcomes, girls will be prepared to be leaders who make the world a better place.

OUTCOMES ARRANGED BY
LEADERSHIP KEY
Take Action

LEADERSHIP KEY

Discover

Girls understand themselves and their values and use their knowledge and skills to explore the world.

OUTCOMES

1 **Girls develop a strong sense of self.**

2 **Girls develop positive values.**

3 **Girls gain practical life skills.**

4 **Girls seek challenges in the world.**

5 **Girls develop critical thinking.**

Discover

OUTCOME **1**

Girls develop a strong sense of self.

Girls have confidence in themselves and their abilities, feel they are able to achieve their goals, and form positive gender, social, and cultural identities.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	are better able to recognize their strengths and abilities.	make positive statements about their abilities or demonstrate to others what they can do (e.g., "I was a good friend to Luna today").
Brownie 2–3	positively identify with their gender and cultural, linguistic, racial, and ethnic groups.	name things they like about being a girl. recognize how their characteristics make them unique (e.g., when drawing a picture of themselves, a girl can say, "I am Korean, and I speak Korean and English").
	have increased confidence in their abilities.	express pride in their accomplishments when speaking with others.
Junior 4–5	are better able to recognize how situations, attitudes, and the behaviors of others affect their sense of self.	compare how various situations (home, school, etc.) bring out various aspects of self.
	gain a clearer sense of their individual identities in relation to, and apart from, outside influences.	report increased confidence in dealing with outside pressures that try to dictate their thoughts and behaviors (e.g., peer pressure, advertising, cultural traditions).
Cadette 6–8	are better able to negotiate the effects of sociocultural factors, gender issues, and stereotyping/bias on to their sense of self.	describe how cultural influences affect their self-image (e.g., magazines dictating "right" body shape and size; effects of racist/sexist comments). make use of strategies to resist peer pressure (e.g., communicate with confidence, take responsibility for own actions).
	show an increase in self-efficacy.	report increased belief in their ability to achieve personal goals.
Senior 9–10	are better able to recognize and address personal and social barriers to reaching personal goals.	make connections between societal issues (e.g., prejudice based on gender or race) and their opportunities to achieve goals. report on ways they overcame gender, ethnic, and/or economic challenges to achieving their goals.
	are better able to recognize the multiple demands and expectations of others while establishing their own individuality.	describe challenges they face in finding a balance between accepting group beliefs and thinking/making decisions for themselves.
Ambassador 11–12	feel they are better equipped to pursue future/life goals.	report that they have options and possibilities for pursuing life/career goals. report increased confidence to get the job/education they envision.
	increase their sense of autonomy.	report being more self-reliant.

*Can you think of other sample indicators/signs?

Discover

OUTCOME **2**

Girls develop positive values.

Girls form their beliefs and values based on the Girl Scout Promise and Law, learn to consider ethical aspects of situations, and are committed to social justice and community service and action.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	begin to understand the values inherent in the Girl Scout Promise and Law.	identify actions that are fair/unfair, honest/dishonest in various scenarios.
	recognize that their choices of actions or words have an effect on others and the environment.	give an example of when their actions made something better for someone else.
Brownie 2–3	begin to apply values inherent in the Girl Scout Promise and Law in various contexts.	explain how they will take responsibility on the playground, at home, and at school.
	are better able to examine positive and negative effects of people's actions on others and the environment.	explain the difference between right and wrong choices. provide alternative choices to actions that harm the environment (e.g., throw plastic bottles in recycle bin, not in trash can).
Junior 4–5	gain greater understanding of ethical decision-making in their lives.	give examples of using the Girl Scout Promise and Law in deciding to "do what's right."
	have increased commitment to engage in sustainable community service and action.	feel it's important to help people and the environment in ways that will have a long-term positive impact. exhibit increased interest in Take Action Projects on issues of fairness and social justice in their communities.
Cadette 6–8	are better able to examine their own and others' values from individual, cultural, and global perspectives.	report greater appreciation for the diversity of values based on individual and/or cultural differences.
	demonstrate increased commitment to addressing issues of fairness, ethics, and justice in their communities.	identify instances that raise questions about issues of fairness, ethics, and/or social justice in their communities.
Senior 9–10	are better able to recognize and resolve ethical dilemmas.	give examples of making ethical decisions in their everyday lives and can explain why they made them (e.g., consider both direct and indirect consequences of their actions).
	strengthen their own and others' commitment to being socially, politically, and environmentally engaged citizens of their communities.	report increased positive attitudes of social responsibility and citizenship.
Ambassador 11–12	act consistently with a considered and self-determined set of values.	choose educational and career goals in line with the values they consider important.
	demonstrate commitment to promoting sustainable solutions to regional, national, and/or global problems.	report increased interest in learning more about making a sustainable impact beyond their local communities.

*Can you think of other sample indicators/signs?

Discover

OUTCOME 3

Girls gain practical life skills—girls practice healthy living.**
Girls gain skills that prepare them for a positive, healthy, and independent future.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	gain greater knowledge of what is healthy for mind and body.	name behaviors that contribute to good health (e.g., eating fruit, getting exercise).
Brownie 2–3	are better at making healthy choices and minimizing unhealthy behaviors.	identify two hours of after-school sports as healthier than two hours of after-school computer games. name healthy choices they make (e.g., walking every day, choosing healthy snacks).
Junior 4–5	gain greater understanding of what it means to be emotionally and physically healthy.	describe how being stressed can affect physical health.
	are more aware of family, cultural, and media influences on making healthy choices.	list ways in which media promotes/inhibits healthy behavior (e.g., fast food ads).
Cadette 6–8	are increasingly committed to practicing and promoting healthy behavior.	report increased interest in learning more about how exercise, diet, relaxation, and other activities can give balance to their lives.
	are more knowledgeable about how family and cultural differences affect healthy living.	give examples of various cultures' definitions and practices of healthy living.
Senior 9–10	act as role models for younger girls in making healthy choices.	describe strategies for resisting pressure to engage in unhealthy behaviors (e.g., alcohol use or unhealthy dieting).
	show cultural sensitivity in their efforts to promote healthy living in their communities.	report increased knowledge of specific health needs in their diverse communities (e.g., responsive to religious or cultural beliefs).
Ambassador 11–12	are better able to address health issues in their lives, their local communities, and globally.	report using self-care practices to bring balance to their lives. identify ways their school's health education could better address the needs of young women.
	are more interested in leading and/or participating in advocacy projects related to health issues, globally or locally.	report increased knowledge of organizations that advocate for health-related issues, locally or globally.

*Can you think of other sample indicators/signs?

**Healthy Living is one example of a practical life skill. Outcomes and indicators for other practical skills will be developed over time.

Discover

OUTCOME **4**

Girls seek challenges in the world.
Girls develop positive attitudes toward learning, seek opportunities for expanding their knowledge and skills, set challenging goals for themselves, and take appropriate risks.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	demonstrate increased interest in learning new skills.	ask lots of questions/make lots of observations about the world around them.
Brownie 2–3	are more open to learning or doing new and challenging things.	enjoy trying new activities (e.g., building a fire, pitching a tent). report doing things they thought they couldn't do.
	recognize that one can learn from mistakes.	feel it is OK to make mistakes and might describe an instance in their own lives where they learned from a mistake.
Junior 4–5	increasingly recognize that positive risk-taking is important to personal growth and leadership.	when asked to identify attitudes important to accomplishing goals, mention risk-taking and give examples from their own lives.
	are better at exploring new skills and ideas.	report using a variety of resources to pursue topics of interest (e.g., the Internet, popular culture, art, poetry).
Cadette 6–8	are better able to distinguish positive and negative risk-taking.	when given risk-taking scenarios, identify and distinguish between positive and negative risk (e.g., riding with a driver who has been drinking vs. calling home for a ride even though parents will be angry).
	recognize the importance of challenging oneself for one's positive growth.	report how setting challenging goals helped them do better in school.
Senior 9–10	demonstrate increased enthusiasm for learning new skills and ideas and expanding existing ones.	increasingly offer their own ideas for exploring new topics or making existing ones more challenging.
	show increased courage to challenge their own and others' beliefs and opinions.	engage in a discussion with someone who has different political views. express preferences even when they differ from the majority's opinion.
Ambassador 11–12	increasingly set challenging goals for the future.	see themselves in roles/positions they previously considered unattainable.
	have increased confidence to discuss and address challenging issues and contradictions in their lives and in their local and global communities.	look for ways personal habits conflict with achieving goals that are important to them (e.g., fighting global warming). learn more about a controversial issue from someone who has experienced injustice or from a victim's advocate.

*Can you think of other sample indicators/signs?

Discover

OUTCOME **5**

Girls develop critical thinking.

Girls learn to examine ideas from a variety of viewpoints and further use critical thinking to explore implications of gender issues for their lives and their leadership development.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	recognize that the thoughts and feelings of others can vary from their own.	make statements that show they recognize another's feelings or opinions, such as "You are sad" and/or "You are happy."
Brownie 2–3	are increasingly able to consider other viewpoints in deciding what to do or believe.	listen to and consider each others' opinions when making decisions.
	are better able to recognize and examine stereotypes (based on gender, race, income, ability, etc.) that they encounter.	identify ways they or others are treated differently based on gender, race, income, and ability and can explain why stereotyping is harmful.
Junior 4–5	show greater skill in gathering and evaluating information.	consider various factors before deciding what to believe (e.g., how credible is the source of information, is there a hidden agenda).
	are better able to consider multiple perspectives on issues.	show increased interest in learning about different sides of issues (e.g., with other girls, in public forums).
Cadette 6–8	are better able to examine issues and ideas from various perspectives.	debate or discuss various perspectives on an issue they are concerned about (e.g., women's rights, global warming).
	have increased understanding of positive and negative ways that media impact their own and others' lives.	give examples of how TV shows can promote sexism, racism, and other -isms or how the Internet can promote freedom of information or allow disinformation.
Senior 9–10	are better able to analyze their own and others' thinking processess.	give examples of the steps they followed and why they made a specific decision or formed an opinion.
	are better able to apply critical thinking skills to challenge stereotypes and biases.	question assumptions behind inequities they encounter (e.g., female athletes earning less than male athletes).
Ambassador 11–12	are increasingly able to address local/global/societal barriers to women's leadership.	discuss various obstacles facing women leaders now and in the past (e.g., discrimination based on gender, race, class, ability). express interest in Take Action Projects that address gender inequality, locally or globally.

*Can you think of other sample indicators/signs?

LEADERSHIP KEY

Connect

Girls care about, inspire, and team with others locally and globally.

OUTCOMES

1. **Girls develop healthy relationships.**
2. **Girls promote cooperation and team building.**
3. **Girls can resolve conflicts.**
4. **Girls advance diversity in a multicultural world.**
5. **Girls feel connected to their communities, locally and globally.**

Connect

OUTCOME **1**

Girls develop healthy relationships.

Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	are better able to demonstrate helpful and caring behavior.	spontaneously offer to help someone in need of assistance (e.g., opening door, carrying package).
	are better able to identify and communicate their feelings to others.	express their feelings verbally (e.g., "I feel lonely when the others don't include me"), rather than nonverbally (e.g., crying, withdrawing, lashing out).
Brownie 2–3	begin to understand how their behavior contributes to maintaining healthy relationships.	identify healthy/unhealthy behaviors (e.g., honesty, caring, bullying) when presented with a relationship scenario.
	are better able to show empathy toward others.	make empathetic statements (e.g., "I helped Kim with that because she was getting frustrated") and/or report being more caring in their interactions with others.
Junior 4–5	strengthen communication skills for maintaining healthy relationships.	name communication strategies that help them in their relationships (e.g., listening to the ideas of others, encouraging others instead of criticizing them).
	are more competent in addressing negative treatment by others.	identify bullying tactics and aggressive behaviors in others. name people they can turn to for help when dealing with difficulties in relationships.
Cadette 6–8	have more positive, trusting relationships with others.	report having at least one girl or adult they can talk to about anything.
	are able to use positive communication and relationship-building skills.	give examples of behaviors they use to promote mutual respect, trust, and understanding.
	feel more comfortable with new feelings that accompany adolescence and ways of expressing feelings in relationships, including sexual feelings.	talk about healthy decision-making (e.g., encouraging self-respect in themselves and others) when presented with relationship scenarios.
Senior 9–10	are better able to recognize and address challenges to forming and maintaining healthy relationships with others.	recognize that people hold different beliefs about relationships (e.g., based on gender, culture). identify behaviors that hinder the development of positive relationships (e.g., backstabbing, gossip).
	have increased knowledge of what healthy dating entails.	report that it is important to be able to communicate their needs effectively. recognize unhealthy dating behaviors when presented with a dating scenario.
Ambassador 11–12	strengthen strategies for maintaining healthy relationships.	give examples of using assertive behaviors and might explain when and why these work/don't work.
	are better able to protect their rights in relationships.	actively seek information on healthy dating behaviors (e.g., how to avoid risky sexual activity, where to get help for abusive relationships). report knowing whom to contact when faced with unhealthy relationships (e.g., a hotline, school counselor, trusted adults).

Can you think of other sample indicators/signs?

Connect

OUTCOME **2**

Girls promote cooperation and team building.

Girls recognize the value of working together and learn to make decisions that benefit the whole group. They can build effective teams, learn to be accountable for shared goals, and show recognition for others' accomplishments and contributions.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	begin to learn how to work well with others.	name something about themselves that helps them work well in a group (e.g., "I listen well").
Brownie 2–3	gain a better understanding of cooperative and team-building skills.	be able to identify strengths or talents that each girl brings to group projects (e.g., "Monica is good at drawing and I am a really good singer"). describe ways to make group projects more fun (e.g., switching roles, brainstorming, listening to each other).
Junior 4–5	are better able to initiate and maintain cooperation on their teams.	with minimal adult guidance, apply specific strategies for promoting cooperation (e.g., listening to all ideas, rotating tasks and roles, developing shared goals).
	increasingly recognize how cooperation contributes to a project's success.	consistently prefer solving problems in teams or as a group and explain why this can be more effective than working alone.
Cadette 6–8	have a greater understanding of team building.	list criteria for what makes a good team (e.g., clear roles, trust, respect, diversity).
	are better able to address obstacles to effective group work and team building.	describe obstacles to group work (e.g., not being willing to compromise, concern with individual interests over group goals, always wanting to be the person talking) and suggest possible solutions.
Senior 9–10	strengthen their abilities to build effective teams to accomplish shared goals.	identify specific strategies for building effective teams (e.g., paying attention to interests, strengths, team dynamics). demonstrate that they can reach consensus on common goals.
	are committed to mentoring others on effective strategies for cooperative work and team building.	help others work better as a team (e.g., encourage them to reach consensus on project goals, create "listening" exercises for other girls, recognize each others' achievements).
Ambassador 11–12	are able to promote cooperation and effective team building in their communities.	describe how their Take Action Project encouraged sustained cooperation among various people/organizations in their communities.
	recognize the value of cooperation and team building for effective leadership and for their future careers.	report that cooperation and team-building skills helped them in other spheres of their lives.

*Can you think of other sample indicators/signs?

Connect

OUTCOME **3**

Girls can resolve conflicts.

Girls learn to recognize and analyze different conflict situations and develop skills for constructive conflict resolution and prevention.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	begin to understand what conflict is.	give examples of conflict situations in their lives.
	learn simple conflict-resolution strategies.	express feelings using "I statements" when they find themselves in a conflict situation (e.g., "I'm sorry I hurt your feelings").
Brownie 2–3	are better able to apply basic strategies for conflict resolution when conflicts arise.	name helpful ways to deal with anger/frustration in a conflict (e.g., talk things out instead of acting out or hitting).
Junior 4–5	are better able to select conflict-resolution strategies to fit the situation.	describe and/or demonstrate conflict-resolution responses for various settings, such as home, school, or neighborhood. explain why one strategy works in one situation but not another (e.g., at home can resolve conflict with sibling by talking with parent; but this would not work at the playground).
	are better at analyzing conflict situations.	give reasons why they fight with each other.
Cadette 6–8	strengthen their conflict-resolution and prevention strategies.	say how they manage their emotions (e.g., anger, hurt) to diffuse a conflict situation (e.g., don't lose their temper).
	have a greater understanding of how conflict-resolution skills contribute to effective leadership.	give examples of how their conflict-resolution skills helped them succeed on a project.
Senior 9–10	can increasingly apply effective strategies for conflict resolution and prevention.	report using effective anger-management skills and strategies.
	are better able to analyze conflict situations in their communities and globally, and offer possible solutions.	identify deeper social roots of conflicts among various groups in their communities (e.g., conflicting interests, racism, sexism, other forms of prejudice). describe how certain conflicts in their communities can be avoided by applying prevention strategies they learned.
Ambassador 11–12	are better able to develop their own approaches to conflict resolution and prevention.	give examples of how they adapted conflict-resolution strategies to personal situations (e.g., argument with parent or at a teen dance).
	increasingly apply conflict-resolution skills to working toward peaceful and fair relations in their communities.	report using conflict-resolution skills to contribute to peace and fairness in their communities (e.g., become peer mediators at school).

* Can you think of other sample indicators/signs?

OUTCOME **4**

Girls advance diversity in a multicultural world.

Girls learn to think and act in a way that promotes an inclusive environment, respecting and valuing diverse backgrounds, viewpoints, and life experiences.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	recognize that it's OK to be different.	identify characteristics that make them different from other girls (e.g., hair color, food preferences, other likes/dislikes, family structure).
	increasingly relate to others in an inclusive manner.	notice when others are excluded from activities (e.g., "It's not fair that no one is playing with Annie").
Brownie 2–3	begin to understand the meaning of diversity.	explore their differences and similarities (e.g., based on culture, ethnicity, ability, life experiences).
	strengthen their appreciation of differences in others.	not make fun—and might encourage others not to make fun—of those who look/talk/behave differently from themselves.
Junior 4–5	recognize the value of promoting diversity in the world.	report that it's important to promote inclusiveness in various contexts and can explain why. demonstrate increased interest in interacting with others from different backgrounds (e.g., ethnicity, culture, class, religion, gender, ability).
	develop greater awareness of various forms of discrimination in the world.	when presented with various situations (e.g., from stories, news, movies, music, or their community), identify discrimination.
Cadette 6–8	are more aware of the issues, perspectives, and experiences of people from various backgrounds, locally and globally.	identify main challenges as well as privileges that various groups experience in today's world (e.g., women and men, ethnicities, abilities).
	learn strategies for promoting diversity and creating more inclusive environments.	actively include people of diverse backgrounds in their activities/events. actively encourage others to behave in inclusive ways (e.g., petition for a wheelchair-accessible park gazebo, use effective ways to speak out against exclusion and discrimination).
	can examine the negative impact of stereotyping, prejudice, discrimination, and privilege on their lives and the lives of others.	when given examples from the media, describe the negative impact of stereotyping and prejudice (based on ethnicity, religion, language, class, sexuality, gender, and ability).
Senior 9–10	are actively engaged in promoting diversity and tolerance.	create materials to educate others on how to contribute to more inclusive environments with their peers, in school, in their neighborhoods, etc. (e.g., Web sites, how-to guides, events).
	are increasingly able to address challenges to promoting inclusive attitudes and diversity.	plan activities/events showing the harmful consequences of prejudice and discrimination on people in their communities. place high value on empathy and open-mindedness when interacting with people from diverse backgrounds.
Ambassador 11–12	are actively engaged in promoting diversity and tolerance, locally and/or globally.	give examples of meaningful collaboration with people from diverse backgrounds for their global Take Action Projects.
	are increasingly able to address various challenges to promoting inclusive attitudes and diversity, locally and/or globally.	identify the main reasons that prevent people from embracing diversity (e.g., racism, sexism, lack of education, lack of empathy) and can suggest possible solutions (e.g., increase understanding by educating people about diverse cultural values and traditions).

*Can you think of other sample indicators/signs?

Connect

OUTCOME **5**

Girls feel connected to their communities, locally and globally.

Girls feel that they are part of a larger community and recognize the importance of building diverse, supportive, social networks for their personal and leadership development.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	are better able to identify people and places that make up their community and understand their various contributions.	identify people who provide services in their communities (e.g., doctors provide medical care, teachers provide education).
	gain increased understanding of how they belong to various groups in their communities.	give examples of the various groups to which they belong (e.g., Girl Scouts, sports team, religious community).
Brownie 2–3	have greater interest in participating in community events, activities, and social networks.	positively describe their participation in at least one community event and/or activity (e.g., help at a cancer walk, start a "Park Keeper" club).
	recognize the importance of being part of a larger community.	give examples of how group/community members help and support each other (e.g., in their neighborhood, school).
Junior 4–5	are better able to recognize the importance of knowing about, and actively participating in, community groups.	identify various sources of information for what is going on in their communities (e.g., the Internet, magazines, interviews with people). describe how being involved in their communities resulted in stronger connections to others (e.g., Take Action Project resulted in an adult from the community volunteering to teach girls a particular skill).
	begin to feel part of a larger community of girls/women.	enjoy connecting with girls/women locally, nationally, or globally (e.g., through reading about them, face-to-face interactions, e-mail).
Cadette 6–8	strengthen existing relationships and seek to create new connections with others in their communities.	use various ways to connect with others, locally and globally (e.g., the Internet, get-togethers, *destinations*, events). feel more confident contacting community members for help with community service and action projects (e.g., teachers, youth organizations, after-school clubs).
	gain greater understanding of the importance of community networks for themselves and others.	describe how their participation in larger communities supported their personal and leadership goals (e.g., provided safe environment, helped gain skills).
Senior 9–10	actively seek to bring people together in local and global networks.	give an example of organizing a local or global event that brought together diverse members of their communities. develop friendships with Girl Guides from other countries (e.g., e-mail pals, joint international projects, visits to World Centers).
	feel that their connections with diverse members of their communities are important resources for personal and leadership development.	make friends with girls/women through the World Association of Girl Guides and Girl Scouts (WAGGGS) and can explain why these connections are important to them.
Ambassador 11–12	have extensive feelings of connection with their local and global communities.	report more positive attitudes toward different members of their communities. place high value on providing support for diverse members of their communities.

LEADERSHIP KEY

Take Action

Girls act to make the world a better place.

OUTCOMES

1. Girls can identify community needs.
2. Girls are resourceful problem solvers.
3. Girls advocate for themselves and others, locally and globally.
4. Girls educate and inspire others to act.
5. Girls feel empowered to make a difference in the world.

Take Action

OUTCOME **1**

Girls can identify community needs.

Girls learn to identify issues in their local and global communities and come up with realistic possibilities for action.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	gain increased knowledge of their communities' assets.	name people/places they consider helpful and valuable in their communities.
Brownie 2–3	develop basic strategies to identify community issues.	use various ways to gain information about their communities (e.g., the Internet, library, personal interviews). list things about their community that are valuable and things that could be improved.
	gain a greater understanding of how Take Action Projects might impact their communities.	explain how the issue they agreed to take action on can benefit their community (e.g., other girls, families, a church).
Junior 4–5	learn to use strategies to determine issues that deserve action.	use community asset mapping to identify opportunities to better their communities.
	are better able to determine whether projects can be realistically accomplished.	consider time and/or financial constraints before selecting an issue to tackle.
Cadette 6–8	strengthen their ability to decide which community issue deserves action.	report using a variety of tools (e.g., community mapping, interviewing, observations) to identify needs, assets, and potential impact of their planned projects.
	begin to address deeper causes of issues in their communities.	identify multiple causes for a problem they wish to address. explain the difference between a quick fix and long-term solutions (e.g., reading to someone learning English as a second language vs. teaching someone to read).
Senior 9–10	are more skilled in identifying their local or global communities' needs that they can realistically address.	report considering multiple factors before deciding on the appropriateness of a project for their community (e.g., feasibility, balance of assets and needs, sustainable impact). seek advice from community members/leaders before selecting issues for action.
	choose Take Action Projects that aim to address deeper causes of issues in their communities.	feel confident using tools that help them identify root causes of community problems (e.g., causal mapping).
Ambassador 11–12	are more skilled in identifying issues that balance feasibility with achieving long-term changes in their local or global communities.	identify community partners that can continue their project goals into the future.
	choose Take Action Projects that aim to address deeper causes of issues in their communities.	interview staff and residents of a homeless shelter to identify root causes of homelessness in that community.

*Can you think of other sample indicators/signs?

Take Action

OUTCOME **2**

Girls are resourceful problem solvers.

Girls can use their knowledge and skills to set up and implement creative and effective "action plans," locate tools and resources they need, and know when, where, and how to enlist help from others.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	learn the basics of planning a project.	with adult guidance, make a list of resources needed to complete their project (e.g., materials for creating get-well cards for a children's hospital).
Brownie 2–3	are better able to develop a basic plan to reach a goal or a solution to a problem.	identify two or three steps and resources (people, materials, information) needed to reach a goal or solve a problem (e.g., how to get ready for camp).
	are better able to create alternative solutions to problems.	reflect on a real-life problem or a scenario and state an alternative solution, such as "Next time, I will do this instead."
Junior 4–5	are better able to create an "action plan" for their projects.	outline steps, resources, and time lines and assign responsibilities for their project with minimal adult guidance. report increased confidence in creating action plans for their goals.
	gain a greater ability to locate and use resources that will help accomplish their project goals.	feel confident contacting community partners who can help them achieve their goals (e.g., school officials who can display girls' fliers on bulletin boards).
Cadette 6–8	are able to create and implement detailed action plans for their projects.	demonstrate independence in thinking through the required components of their action plans (e.g., location of resources, time lines, responsibilities). report being more able to keep themselves "on track," requesting adult help if needed.
	increasingly seek out community support and resources to help achieve their goals.	identify people/organizations in their communities to help on some aspect of their project (e.g., obtain editing guidance for media projects).
Senior 9–10	are better able to effectively plan and carry out action projects with minimal adult guidance.	create detailed action plans, organize, and coordinate with others in the community, managing time and anticipating possible problems and resource needs on their own.
	are able to assess their progress and adjust strategies as necessary.	identify alternative ways to accomplish goals if initial plans prove unsuccessful. identify things they could do better and/or differently next time they work on a community service or action project.
Ambassador 11–12	are better able to independently plan, organize, and manage Take Action Projects.	report increased knowledge and skill in various aspects of project planning and implementation. monitor their own progress and determine criteria for success.
	actively seek partnerships to achieve greater community participation and impact for their Take Action Projects.	describe their efforts to engage community partners—locally or globally—in the implementation of community service and action projects. explain how partnerships with others maximize the impact of their Take Action Projects.

*Can you think of other sample indicators/signs?

Take Action

OUTCOME **3**

Girls advocate for themselves and others, locally and globally.

Girls develop the ability to speak out on their own behalf and seek opportunities to act and speak on behalf of others.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	recognize that they can act on behalf of others.	recognize situations when they can "make something better" for someone else (e.g., through words or actions).
Brownie 2–3	gain a better understanding of their rights and those of others.	name rights people have in their schools, families, or communities (e.g., to be safe, to be treated fairly, to be heard).
	learn and begin to apply basic advocacy skills.	define what advocacy means and give examples of advocates in their communities. use words or actions to show concern and intervene when another person is not being treated well (e.g., stand up for someone being teased).
Junior 4–5	strengthen their abilities to effectively speak out or act for themselves and others.	identify concrete steps they can take to effect desired changes (e.g., who to contact about creating safer streets for bicycling in their neighborhood).
Cadette 6–8	recognize the importance of advocacy in accomplishing positive changes for themselves and others.	can give examples of how youth can influence and/or participate in community decision-making (e.g., influence the library to remain open longer, start a teen hotline, form an antidiscrimination group).
	gain greater ability to use specific advocacy skills to address issues of interest.	report using various strategies to speak out for themselves and others on issues of interest (e.g., writing letters, petitions, creating public announcements).
Senior 9–10	have a greater understanding of how the decisions and policies of various institutions have effects on their lives and the lives of others.	report increased knowledge about how public decisions in their schools, communities, and local governments affect people's private lives (e.g., decisions about education, juvenile justice).
	use advocacy skills and knowledge to be more active on behalf of a cause, issue, or person, locally or globally.	give examples of advocating for an issue in their school or neighborhood (e.g., more healthful cafeteria food, increased awareness of eating disorders, reproductive health, effects of poverty).
Ambassador 11–12	recognize that they have the rights and abilities to participate in the development of public policy that affects their lives and the lives of others.	report increased interest and confidence in participating in projects or initiatives that promote positive social changes.
	are better able to consider the community/global impact of their advocacy efforts.	describe how their advocacy efforts helped their community or the broader society.
	actively seek partnerships with other organizations that provide support and resources for their advocacy efforts.	report working with organizations that share their advocacy goals.

*Can you think of other sample indicators/signs?

Take Action

OUTCOME **4**

Girls educate and inspire others to act.

Girls learn to effectively explain their ideas to others and motivate them to get involved in community service and action.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy **K–1**	are better able to assist peers and seek help from them.	respond to requests for help/assistance with actions or words.
Brownie **2–3**	are better able to explain their ideas or teach new skills to others.	demonstrate or teach a skill to other girls (e.g., how to sell cookies, how to make a puppet).
	can communicate their reasons for engaging in community service and action.	explain why they chose a community action project (e.g., meals to seniors, holiday gifts to needy children), how/why it benefited others, and what they learned from it.
Junior **4–5**	learn various strategies to communicate and share Take Action Projects with others.	use various ways to tell others about their Take Action Projects (e.g., fliers, presentations). explain what makes a successful persuasive message/action for various audiences (e.g., presentation to peers, petitions to officials).
Cadette **6–8**	show increased commitment to educate others on how to better their communities.	organize a show-and-tell for younger Girl Scouts to educate them about how to be more active in community affairs.
	are better able to identify and select various methods for informing others about their Take Action Projects.	report knowing how to tailor their messages to various audiences (e.g., young girls vs. senior citizens).
Senior **9–10**	are better at inspiring and mobilizing others to become more engaged in community service and action.	shape messages (e.g., in a flier, speech, publication, or Web campaign) to explain the importance of taking action on an issue they care about. organize an awareness day in their schools on an issue they care about (e.g., emotional health, Internet safety).
Ambassador 11–12	are better able to evaluate the effectiveness of their efforts to reach/educate diverse audiences and can adjust their communication strategies accordingly.	implement innovative ways to access hard-to-reach audiences (e.g., using the Internet to engage remote rural populations). work with other youth/community organizations to spread their messages more effectively.

*Can you think of other sample indicators/signs?

Take Action

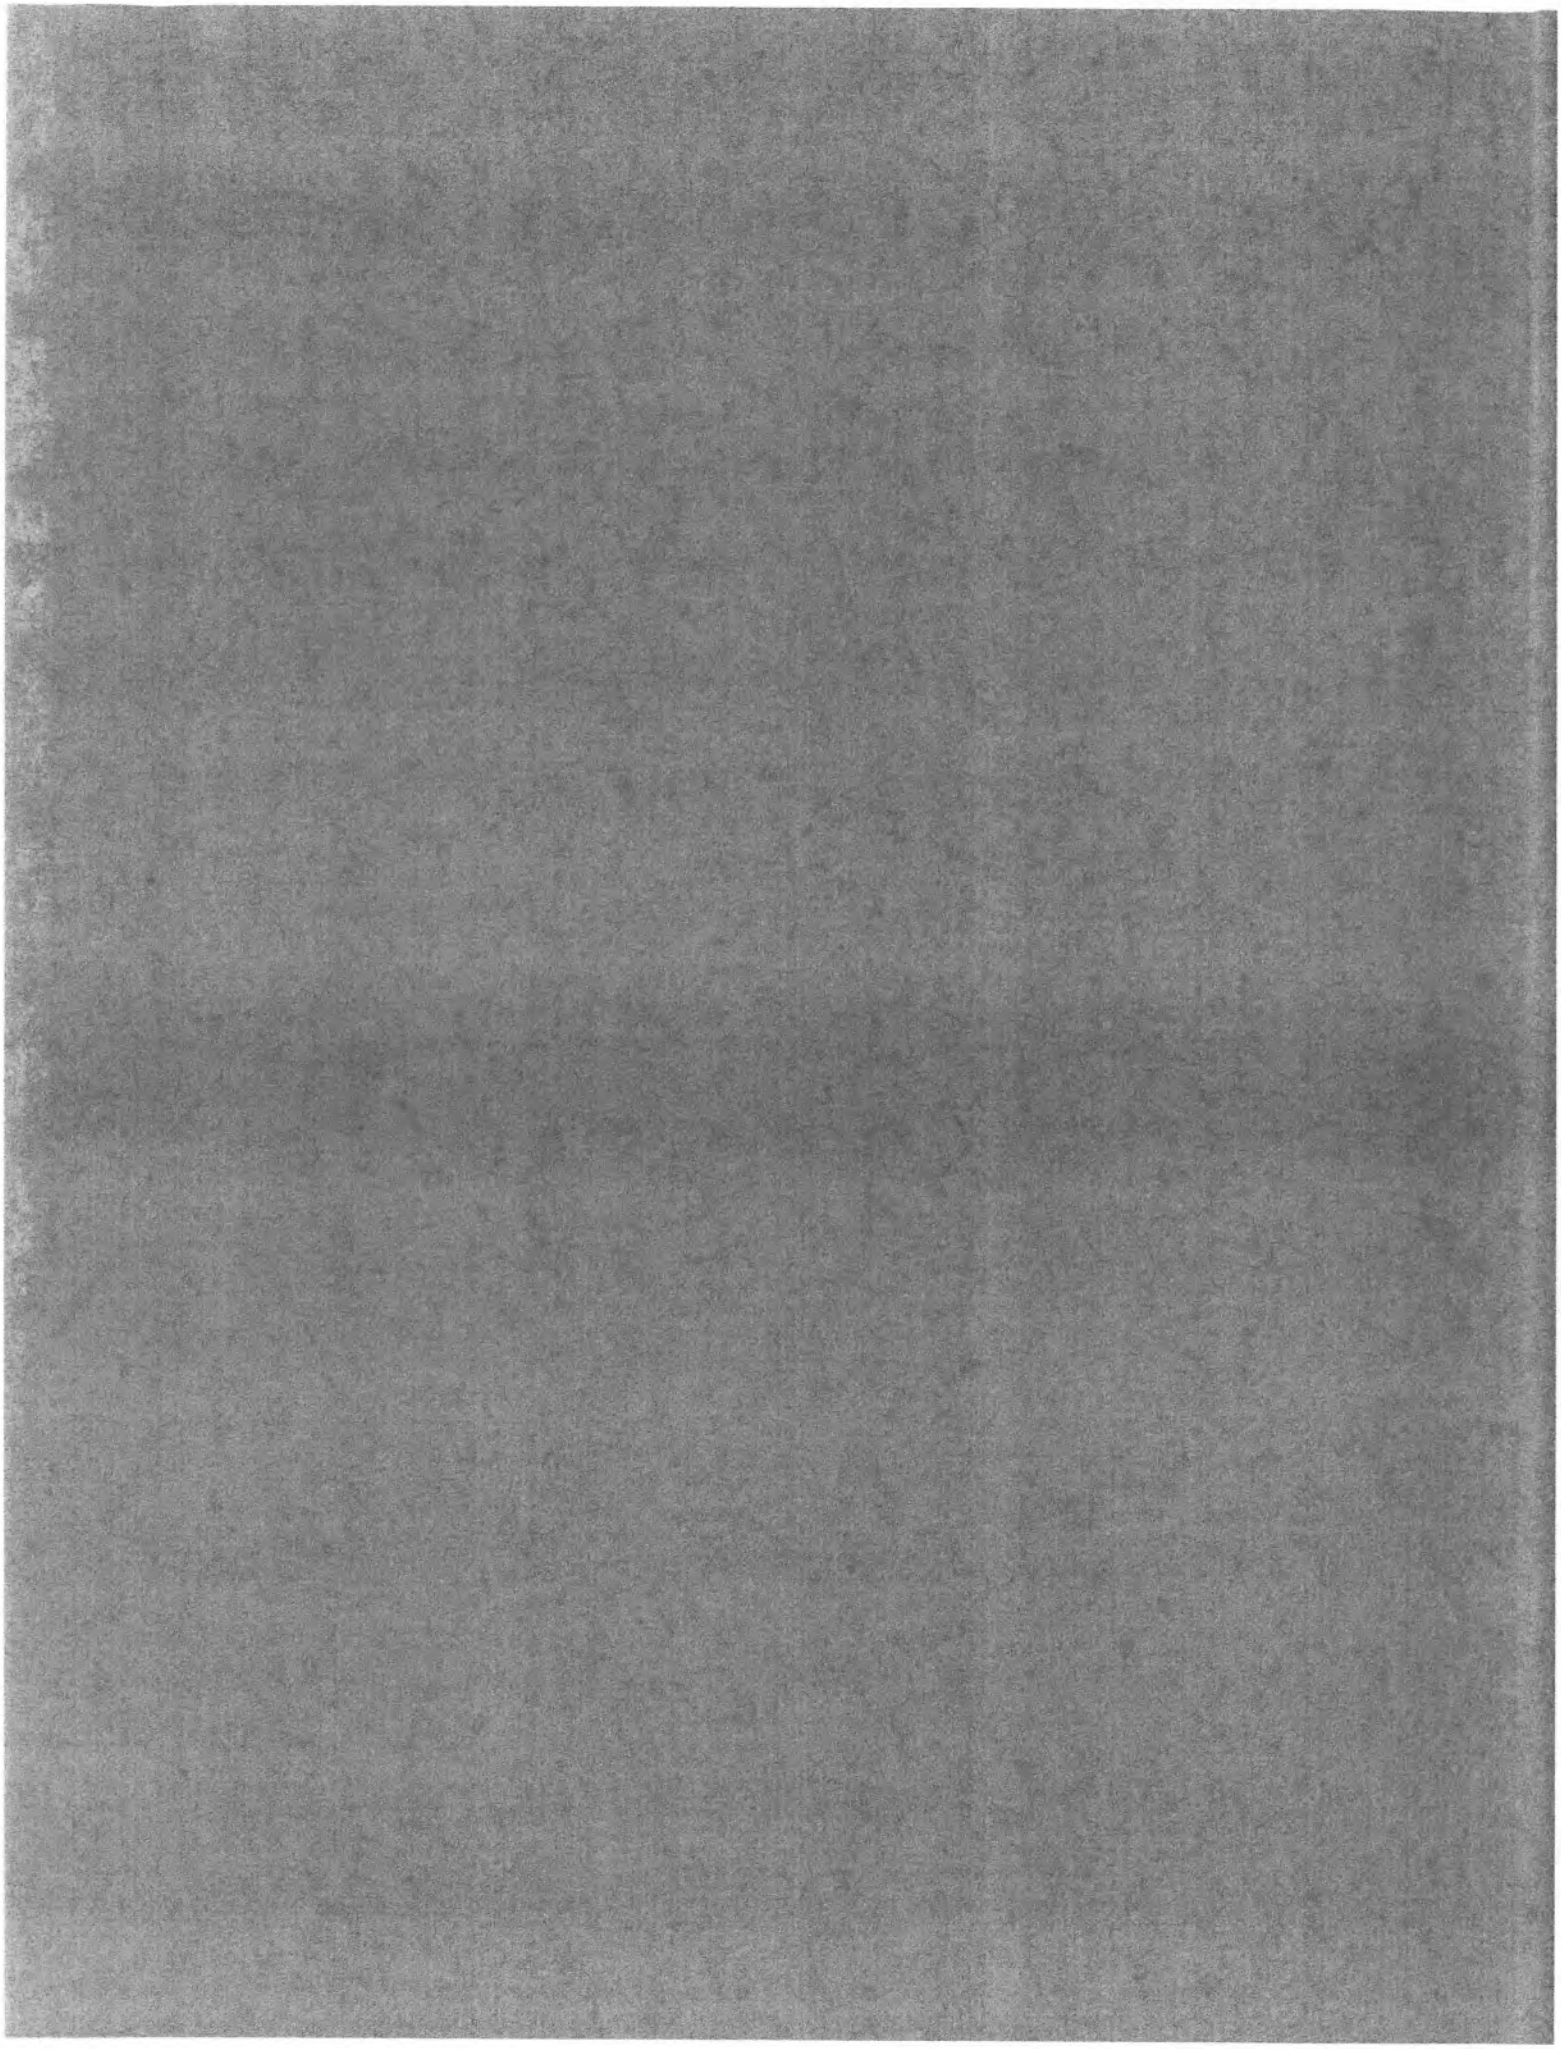
OUTCOME 5

Girls feel empowered to make a difference in the world.

Girls feel empowered to use their leadership skills to effect change in their lives and their world and feel their contributions are valued in the larger community.

GIRL SCOUT GRADE LEVEL	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Daisy K–1	feel their actions and words are important to others.	give an example of something they have done to make them feel like an important part of their group (e.g., help choose an activity, lead a game, help make up a rule).
Brownie 2–3	increasingly feel they have important roles and responsibilities in their groups and/or communities.	describe ways their actions contributed to bettering something (for their families, neighborhood, environment).
	exhibit increased determination to create changes for themselves and others.	give examples when they succeeded in making a positive change for themselves or others.
Junior 4–5	are more confident in their power to effect positive change.	describe various expressions of power around them (e.g., power over others, power to do something, power with others). explain how shared power helped them create better or longer-lasting changes (e.g., working together vs. doing it alone).
	feel they have greater opportunities for involvement in the decision-making of their communities.	give examples of when they participated in the decision-making processes in their Girl Scout council, church, school, etc.
Cadette 6–8	feel more valued by others for their ability to apply leaderships skills toward positive change.	feel that their opinions, ideas, and contributions are taken seriously by adults. express pride that their Take Action Projects improved functioning of some aspect of their communities (e.g., contributed to cleaner air, safer streets, better opportunities for young people).
	have increased confidence to participate in decision-making processes in their groups or communities.	show interest in providing and/or receiving input from community members on community issues.
Senior 9–10	are better able to address challenges to their feeling of empowerment.	identify internal and/or external barriers to feeling empowered to create change (e.g., not being taken seriously because they are "just kids"). describe strategies for ensuring that their voices and opinions are heard.
	feel they have greater access to community resources and more equal relationships with adults in their communities.	report that adults in their communities invite their input and/or participation in community affairs.
Ambassador 11–12	feel capable of using their skills to better the functioning and governance of communities, locally or globally.	create an action plan that could be implemented to include more young people in setting town priorities.
	feel their projects and ideas are valued/respected by stakeholders in their local and/or global communities.	give examples of positive reports (e.g., local news coverage) about their Take Action Projects.

*Can you think of other sample indicators/signs?



OUTCOMES ARRANGED BY

GRADE LEVEL

Daisy

Brownie

Junior

Cadette

Senior

Ambassador

GIRL SCOUT GRADE LEVEL

Daisy

grades K–1

Girl Scout Daisies understand themselves and their values and use their knowledge and skills to explore the world.

DISCOVER OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop a strong sense of self: Girls have confidence in themselves and their abilities, feel they are able to achieve their goals, and form positive gender, social, and cultural identities.	are better able to recognize their strengths and abilities.	make positive statements about their abilities or demonstrate to others what they can do (e.g., "I was a good friend to Luna today").
Girls develop positive values: Girls form their beliefs and values based on the Girl Scout Promise and Law, learn to consider ethical aspects of situations, and are committed to social justice and community service and action.	begin to understand the values inherent in the Girl Scout Promise and Law.	identify actions that are fair/unfair, honest/dishonest in various scenarios.
	recognize that their choices of actions or words have an effect on others and the environment.	give an example of when their actions made something better for someone else.
Girls gain practical life skills—girls practice healthy living:** Girls gain skills that prepare them for a positive, healthy, and independent future.	gain greater knowledge of what is healthy for mind and body.	name behaviors that contribute to good health (e.g., eating fruit, getting exercise).
Girls seek challenges in the world: Girls develop positive attitudes toward learning, seek opportunities for expanding their knowledge and skills, set challenging goals for themselves, and take appropriate risks.	demonstrate increased interest in learning new skills.	ask lots of questions/make lots of observations about the world around them.
Girls develop critical thinking: Girls learn to examine ideas from a variety of viewpoints and further use critical thinking to explore implications of gender issues for their lives and their leadership development.	recognize that the thoughts and feelings of others can vary from their own.	make statements that show they recognize another's feelings or opinions, such as "You are sad" and/or "You are happy."

*Can you think of other sample indicators/signs?

**Healthy Living is one example of a practical life skill. Outcomes and indicators for other practical skills will be developed over time.

Girl Scout Daisies care about, inspire, and team with others locally and globally.

CONNECT OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop healthy relationships: Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.	are better able to demonstrate helpful and caring behavior.	spontaneously offer to help someone in need of assistance (e.g., opening door, carrying package).
	are better able to identify and communicate their feelings to others.	express their feelings verbally (e.g., "I feel lonely when the others don't include me"), rather than nonverbally (e.g., crying, withdrawing, lashing out).
Girls promote cooperation and team building: Girls recognize the value of working together and learn to make decisions that benefit the whole group. They can build effective teams, learn to be accountable for their shared goals, and show recognition for others' accomplishments and contributions.	begin to learn how to work well with others.	name something about themselves that helps them work well in a group (e.g., "I listen well").
Girls can resolve conflicts: Girls learn to recognize and analyze different conflict situations and develop skills for constructive conflict resolution and prevention.	begin to understand what conflict is.	give examples of conflict situations in their lives.
	learn simple conflict-resolution strategies.	express feelings using "I statements" when they find themselves in a conflict situation (e.g., "I'm sorry I hurt your feelings").
Girls advance diversity in a multicultural world: Girls learn to think and act in a way that promotes an inclusive environment, respecting and valuing diverse backgrounds, viewpoints, and life experiences.	recognize that it's OK to be different.	identify characteristics that make them different from other girls (e.g., hair color, food preferences, other likes/dislikes, family structure).
	increasingly relate to others in an inclusive manner.	notice when others are excluded from activities (e.g., "It's not fair that no one is playing with Annie").
Girls feel connected to their communities, locally and globally: Girls feel that they are part of a larger community and recognize the importance of building diverse, supportive social networks for their personal and leadership development.	are better able to identify people and places that make up their community and understand their various contributions.	identify people who provide services in their communities (e.g., doctors provide medical care, teachers provide education).
	gain increased understanding of how they belong to various groups in their communities.	give examples of the various groups to which they belong (e.g., Girl Scouts, sports team, religious community).

*Can you think of other sample indicators/signs?

GIRL SCOUT GRADE LEVEL

Brownie

grades 2–3

Girl Scout Brownies understand themselves and their values and use their knowledge and skills to explore the world.

DISCOVER OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop a strong sense of self: Girls have confidence in themselves and their abilities, feel they are able to achieve their goals, and form positive gender, social, and cultural identities.	positively identify with their gender and cultural, linguistic, racial, and ethnic groups.	name things they like about being a girl. recognize how their characteristics make them unique (e.g., when drawing a picture of themselves, a girl can say, "I am Korean, and I speak Korean and English").
	have increased confidence in their abilities.	express pride in their accomplishments when speaking with others.
Girls develop positive values: Girls form their beliefs and values based on the Girl Scout Promise and Law, learn to consider ethical aspects of situations, and are committed to social justice and community service and action.	begin to apply values inherent in the Girl Scout Promise and Law in various contexts.	explain how they will take responsibility on the playground, at home, and at school.
	are better able to examine positive and negative effects of people's actions on others and the environment.	explain the difference between right and wrong choices. provide alternative choices to actions that harm the environment (e.g., throw plastic bottles in recycle bin, not in trash can).
Girls gain practical life skills—girls practice healthy living:** Girls gain skills that prepare them for a positive, healthy, and independent future.	are better at making healthy choices and minimizing unhealthy behaviors.	identify two hours of after-school sports as healthier than two hours of after-school computer games. name healthy choices they make (e.g., walking every day, choosing healthful snacks).
Girls seek challenges in the world: Girls develop positive attitudes toward learning, seek opportunities for expanding their knowledge and skills, set challenging goals for themselves, and take appropriate risks.	are more open to learning or doing new and challenging things.	enjoy trying new activities (e.g., building a fire, pitching a tent). report doing things they thought they couldn't do.
	recognize that one can learn from mistakes.	feel it is OK to make mistakes and might describe an instance in their own lives where they learned from a mistake.
Girls develop critical thinking: Girls learn to examine ideas from a variety of viewpoints and further use critical thinking to explore implications of gender issues for their lives and their leadership development.	are increasingly able to consider other viewpoints in deciding what to do or believe.	listen to and consider each others' opinions when making decisions.
	are better able to recognize and examine stereotypes (based on gender, race, income, ability, etc.) that they encounter.	identify ways they or others are treated differently based on gender, race, income, and ability and can explain why stereotyping is harmful.

*Can you think of other sample indicators/signs?

**Healthy Living is one example of a practical life skill. Outcomes and indicators for other practical skills will be developed over time.

Girl Scout Brownies care about, inspire, and team with others, locally and globally.

CONNECT OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop healthy relationships: Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.	begin to understand how their behavior contributes to maintaining healthy relationships.	identify healthy/unhealthy behaviors (e.g., honesty, caring, bullying) when presented with a relationship scenario.
	are better able to show empathy toward others.	make empathetic statements (e.g., "I helped Kim with that because she was getting frustrated") and/or report being more caring in their interactions with others.
Girls promote cooperation and team building: Girls recognize the value of working together and learn to make decisions that benefit the whole group. They can build effective teams, learn to be accountable for their shared goals, and show recognition for others' accomplishments and contributions.	gain a better understanding of cooperative and team-building skills.	be able to identify strengths or talents that each girl brings to group projects (e.g., "Monica is good at drawing and I am a really good singer"). describe ways to make group projects more fun (e.g., switching roles, brainstorming, listening to each other).
Girls can resolve conflicts: Girls learn to recognize and analyze different conflict situations and develop skills for constructive conflict resolution and prevention.	are better able to apply basic strategies for conflict resolution when conflicts arise.	name helpful ways to deal with anger/frustration in a conflict (e.g., talk things out instead of acting out or hitting).
Girls advance diversity in a multicultural world: Girls learn to think and act in a way that promotes an inclusive environment, respecting and valuing diverse backgrounds, viewpoints, and life experiences.	begin to understand the meaning of diversity.	explore their differences and similarities (e.g., based on culture, ethnicity, ability, life experiences).
	strengthen their appreciation of differences in others.	not make fun—and might encourage others not to make fun—of those who look/talk/behave differently from themselves.
Girls feel connected to their communities, locally and globally: Girls feel that they are part of a larger community and recognize the importance of building diverse, supportive social networks for their personal and leadership development.	have greater interest in participating in community events, activities, and social networks.	positively describe their participation in at least one community event and/or activity (e.g., help at a cancer walk, start a "Park Keeper" club).
	recognize the importance of being part of a larger community.	give examples of how group/community members help and support each other (e.g., in their neighborhood, school).

*Can you think of other sample indicators/signs?

Girl Scout Brownies act to make the world a better place.

TAKE ACTION OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls can identify community needs: Girls learn to identify issues in their local and global communities and come up with realistic possibilities for action.	develop basic strategies to identify community issues.	use various ways to gain information about their communities (e.g., the Internet, library, personal interviews). list things about their community that are valuable and things that could be improved.
	gain a greater understanding of how Take Action Projects might impact their communities.	explain how the issue they agreed to take action on can benefit their community (e.g., other girls, families, a church).
Girls are resourceful problem solvers: Girls can use their knowledge and skills to set up and implement creative and effective "action plans," locate tools and resources they need, and know when, where, and how to enlist help from others.	are better able to develop a basic plan to reach a goal or a solution to a problem.	identify two or three steps and resources (people, materials, information) needed to reach a goal or solve a problem (e.g., how to get ready for camp).
	are better able to create alternative solutions to problems.	reflect on a real-life problem or a scenario and state an alternative solution, such as "Next time, I will do this instead."
Girls advocate for themselves and others, locally and globally: Girls develop the ability to speak out on their own behalf and seek opportunities to act and speak on behalf of others.	gain a better understanding of their rights and those of others.	name rights people have in their schools, families, or communities (e.g., to be safe, to be treated fairly, to be heard).
	learn and begin to apply basic advocacy skills.	define what advocacy means and give examples of advocates in their communities. use words or actions to show concern and intervene when another person is not being treated well (e.g., stand up for someone being teased).
Girls educate and inspire others to act: Girls learn to effectively explain their ideas to others and motivate them to get involved in community service and action.	are better able to explain their ideas or teach new skills to others.	demonstrate or teach a skill to other girls (e.g., how to sell cookies, how to make a puppet).
	can communicate their reasons for engaging in community service and action.	explain why they chose a community action project (e.g., meals to seniors, holiday gifts to needy children), how/why it benefited others, and what they learned from it.
Girls feel empowered to make a difference in the world: Girls feel empowered to use their leadership skills to effect change in their lives and their world, and feel their contributions are valued in the larger community.	increasingly feel they have important roles and responsibilities in their groups and/or communities.	describe ways their actions contributed to bettering something (for their families, neighborhood, environment).
	exhibit increased determination to create changes for themselves and others.	give examples when they succeeded in making positive change for themselves or others.

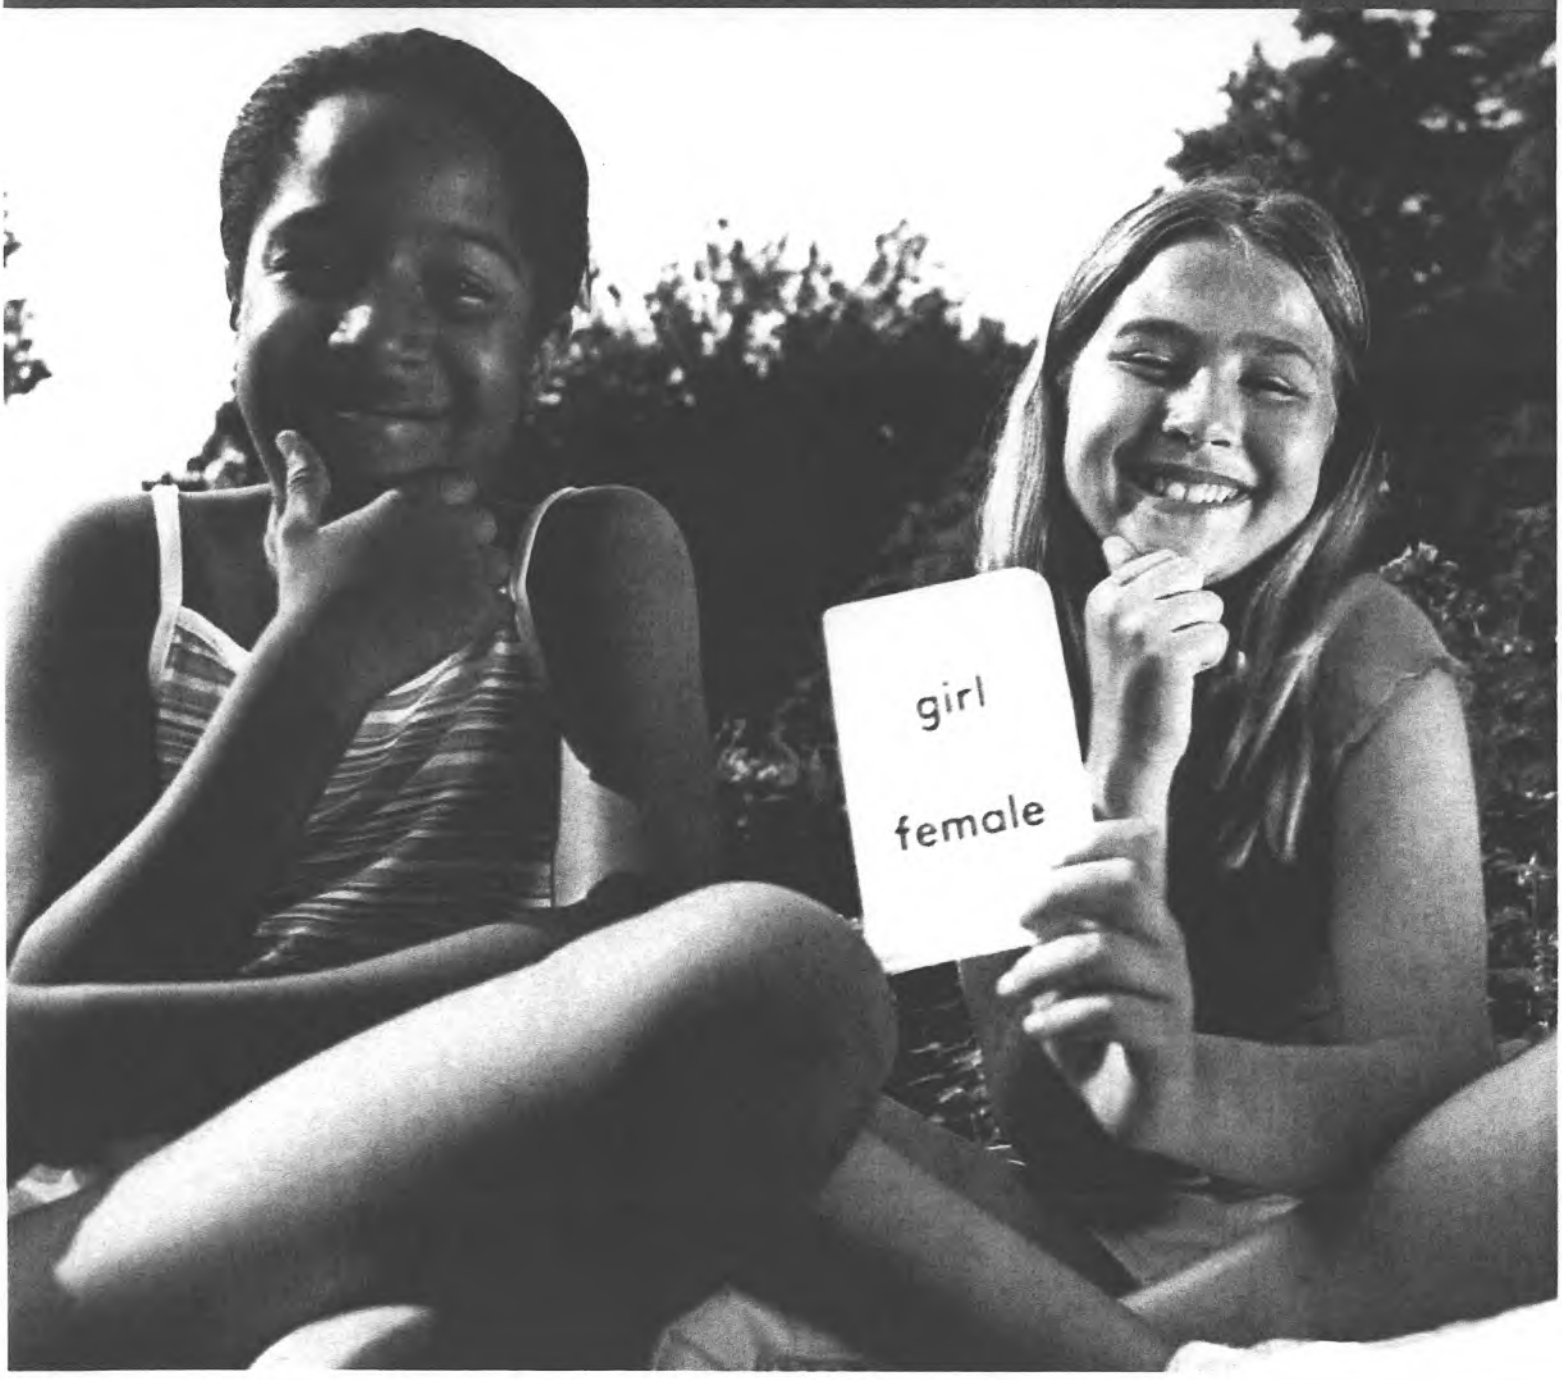
GIRL SCOUT GRADE LEVEL

Junior

grades 4–5



Girl Scout Juniors understand themselves and their values and use their knowledge and skills to explore the world.

DISCOVER OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop a strong sense of self: Girls have confidence in themselves and their abilities, feel they are able to achieve their goals, and form positive gender, social, and cultural identities.	are better able to recognize how situations, attitudes, and the behaviors of others affect their sense of self.	compare how various situations (home, school, etc.) bring out various aspects of self.
	gain a clearer sense of their individual identities in relation to, and apart, from outside influences.	report increased confidence in dealing with outside pressures that try to dictate their thoughts and behaviors (e.g., peer pressure, advertising, cultural traditions).
Girls develop positive values: Girls form their beliefs and values based on the Girl Scout Promise and Law, learn to consider ethical aspects of situations, and are committed to social justice and community service and action.	gain greater understanding of ethical decision-making in their lives.	give examples of using the Girl Scout Promise and Law in deciding to "do what's right."
	have increased commitment to engage in sustainable community service and action.	feel it's important to help people and the environment in ways that will have a long-term positive impact. exhibit increased interest in Take Action Projects on issues of fairness and social justice in their communities.
Girls gain practical life skills—girls practice healthy living:** Girls gain skills that prepare them for a positive, healthy, and independent future.	gain greater understanding of what it means to be emotionally and physically healthy.	describe how being stressed can affect physical health.
	are more aware of family, cultural, and media influences on making healthy choices.	list ways in which media promotes/inhibits healthy behavior (e.g., fast food ads).
Girls seek challenges in the world: Girls develop positive attitudes toward learning, seek opportunities for expanding their knowledge and skills, set challenging goals for themselves, and take appropriate risks.	increasingly recognize that positive risk-taking is important to personal growth and leadership.	when asked to identify attitudes important to accomplishing goals, mention risk-taking and give examples from their own lives.
	are better at exploring new skills and ideas.	report using a variety of resources to pursue topics of interest (e.g., the Internet, popular culture, art, poetry).
Girls develop critical thinking: Girls learn to examine ideas from a variety of viewpoints and further use critical thinking to explore implications of gender issues for their lives and their leadership development.	show greater skill in gathering and evaluating information.	consider various factors before deciding what to believe (e.g., how credible is the source of information, is there a hidden agenda).
	are better able to consider multiple perspectives on issues.	show increased interest in learning about different sides of issues (e.g., with other girls, in public forums).

*Can you think of other sample indicators/signs?

**Healthy Living is one example of a practical life skill. Outcomes and indicators for other practical skills will be developed over time.

Girl Scout Juniors care about, inspire, and team with others locally and globally.

CONNECT OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop healthy relationships: Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.	strengthen communication skills for maintaining healthy relationships.	name communication strategies that help them in their relationships (e.g., listening to the ideas of others, encouraging others instead of criticizing them).
	are more competent in addressing negative treatment by others.	identify bullying tactics and aggressive behaviors in others. name people they can turn to for help when dealing with difficulties in relationships.
Girls promote cooperation and team building: Girls recognize the value of working together and learn to make decisions that benefit the whole group. They can build effective teams, learn to be accountable for their shared goals, and show recognition for others' accomplishments and contributions.	are better able to initiate and maintain cooperation on their teams.	with minimal adult guidance, apply specific strategies for promoting cooperation (e.g., listening to all ideas, rotating tasks and roles, developing shared goals).
	increasingly recognize how cooperation contributes to a project's success.	consistently prefer solving problems in teams or as a group and explain why this can be more effective than working alone.
Girls can resolve conflicts: Girls learn to recognize and analyze different conflict situations and develop skills for constructive conflict resolution and prevention.	are better able to select conflict-resolution strategies to fit the situation.	describe and/or demonstrate conflict-resolution responses for various settings, such as home, school, or neighborhood. explain why one strategy works in one situation but not another (e.g., at home can resolve conflict with sibling by talking with parent; but this would not work at the playground).
	are better at analyzing conflict situations.	give reasons why they fight with each other.
Girls advance diversity in a multicultural world: Girls learn to think and act in a way that promotes an inclusive environment, respecting and valuing diverse backgrounds, viewpoints, and life experiences.	recognize the value of promoting diversity in the world.	report that it's important to promote inclusiveness in various contexts and can explain why. demonstrate increased interest in interacting with others from different backgrounds (e.g., ethnicity, culture, class, religion, gender, ability).
	develop greater awareness of various forms of discrimination in the world.	when presented with various situations (e.g., from stories, news, movies, music, or their community), identify discrimination.
Girls feel connected to their communities, locally and globally: Girls feel that they are part of a larger community and recognize the importance of building diverse, supportive social networks for their personal and leadership development.	are better able to recognize the importance of knowing about and actively participating in community groups.	identify various sources of information for what is going on in their communities (e.g., the Internet, magazines, interviews with people). describe how being involved in their communities resulted in stronger connections to others (e.g., Take Action Project resulted in an adult from the community volunteering to teach girls a particular skill).
	begin to feel part of a larger community of girls/women.	enjoy connecting with girls/women locally, nationally, or globally (e.g., through reading about them, face-to-face interactions, e-mail).

*Can you think of other sample indicators/signs?

Girl Scout Juniors act to make the world a better place.

TAKE ACTION OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls can identify community needs: Girls learn to identify issues in their local and global communities and come up with realistic possibilities for action.	learn to use strategies to determine issues that deserve action.	use community asset mapping to identify opportunities to better their communities.
	are better able to determine whether projects can be realistically accomplished.	consider time and/or financial constraints before selecting an issue to tackle.
Girls are resourceful problem solvers: Girls can use their knowledge and skills to set up and implement creative and effective "action plans," locate tools and resources they need, and know when, where, and how to enlist help from others.	are better able to create an "action plan" for their projects.	outline steps, resources, and time lines and assign responsibilities for their project with minimal adult guidance. report increased confidence in creating action plans for their goals.
	gain a greater ability to locate and use resources that will help accomplish their project goals.	feel confident contacting community partners who can help them achieve their goals (e.g., school officials who can display girls' fliers on bulletin boards).
Girls advocate for themselves and others, locally and globally: Girls develop the ability to speak out on their own behalf and seek opportunities to act and speak on behalf of others.	strengthen their abilities to effectively speak out or act for themselves and others.	identify concrete steps they can take to effect desired changes (e.g., whom to contact about creating safer streets for bicycling in their neighborhood).
Girls educate and inspire others to act: Girls learn to effectively explain their ideas to others and motivate them to get involved in community service and action.	learn various strategies to communicate and share Take Action Projects with others.	use various ways to tell others about their Take Action Projects (e.g., fliers, presentations). explain what makes a successful persuasive message/action for various audiences (e.g., presentation to peers, petitions to officials).
Girls feel empowered to make a difference in the world: Girls feel empowered to use their leadership skills to effect change in their lives and their world, and feel their contributions are valued in the larger community.	are more confident in their power to effect positive change.	describe various expressions of power around them (e.g., power over others, power to do something, power with others). explain how shared power helped them create better or longer-lasting changes (e.g., working together vs. doing it alone).
	feel they have greater opportunities for involvement in the decision-making of their communities.	give examples of when they participated in the decision-making processes in their Girl Scout council, church, school, etc.

*Can you think of other sample indicators/signs?

Cadette

grades 6–8

Girl Scout Cadettes understand themselves and their values and use their knowledge and skills to explore the world.

DISCOVER OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop a strong sense of self: Girls have confidence in themselves and their abilities, feel they are able to achieve their goals, and form positive gender, social, and cultural identities.	are better able to negotiate the effects of sociocultural factors, gender issues, and stereotyping/bias on their sense of self.	describe how cultural influences affect their self-image (e.g., magazines dictating "right" body shape and size; effects of racist/sexist comments). make use of strategies to resist peer pressure (e.g., communicate with confidence, take responsibility for own actions).
	show an increase in self-efficacy.	report increased belief in their ability to achieve personal goals.
Girls develop positive values: Girls form their beliefs and values based on the Girl Scout Promise and Law, learn to consider ethical aspects of situations, and are committed to social justice and community service and action.	are better able to examine their own and others' values from individual, cultural, and global perspectives.	report greater appreciation for the diversity of values based on individual and/or cultural differences.
	demonstrate increased commitment to addressing issues of fairness, ethics, and justice in their communities.	identify instances that raise questions about issues of fairness, ethics, and/or social justice in their communities.
Girls gain practical life skills—girls practice healthy living:** Girls gain skills that prepare them for a positive, healthy, and independent future.	are increasingly committed to practicing and promoting healthy behavior.	report increased interest in learning more about how exercise, diet, relaxation, and other activities can give balance to their lives.
	are more knowledgeable about how family and cultural differences affect healthy living.	give examples of various cultures' definitions and practices of healthy living.
Girls seek challenges in the world: Girls develop positive attitudes toward learning, seek opportunities for expanding their knowledge and skills, set challenging goals for themselves, and take appropriate risks.	are better able to distinguish positive and negative risk-taking.	when given risk-taking scenarios, identify and distinguish between positive and negative risk (e.g., riding with a driver who has been drinking vs. calling home for a ride even though parents will be angry).
	recognize the importance of challenging oneself for one's positive growth.	report how setting challenging goals helped them do better in school.
Girls develop critical thinking: Girls learn to examine ideas from a variety of viewpoints and further use critical thinking to explore implications of gender issues for their lives and their leadership development.	are better able to examine issues and ideas from various perspectives.	debate or discuss various perspectives on an issue they are concerned about (e.g., women's rights, global warming).
	have increased understanding of positive and negative ways that media impact their own and others' lives.	give examples of how TV shows can promote sexism, racism, and other -isms or how the Internet can promote freedom of information or allow disinformation.

*Can you think of other sample indicators/signs?

**Healthy Living is one example of a practical life skill. Outcomes and indicators for other practical skills will be developed over time.

Girl Scout Cadettes care about, inspire, and team with others locally and globally.

CONNECT OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop healthy relationships: Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.	have more positive, trusting relationships with others.	report having at least one girl or adult they can talk to about anything.
	are able to use positive communication and relationship-building skills.	give examples of behaviors they use to promote mutual respect, trust, and understanding.
	feel more comfortable with new feelings that accompany adolescence and ways of expressing feelings in relationships, including sexual feelings.	talk about healthy decision-making (e.g., encouraging self-respect in themselves and others) when presented with relationship scenarios.
Girls promote cooperation and team building: Girls recognize the value of working together and learn to make decisions that benefit the whole group. They can build effective teams, learn to be accountable for their shared goals, and show recognition for others' accomplishments and contributions.	have a greater understanding of team building.	list criteria for what makes a good team (e.g., clear roles, trust, respect, diversity).
	are better able to address obstacles to effective group work and team building.	describe obstacles to group work (e.g., not being willing to compromise, concern with individual interests over group goals, always wanting to be the person talking) and suggest possible solutions.
Girls can resolve conflicts: Girls learn to recognize and analyze different conflict situations and develop skills for constructive conflict resolution and prevention.	strengthen their conflict resolution and prevention strategies.	say how they manage their emotions (e.g., anger, hurt) to diffuse a conflict situation (e.g., don't lose their temper).
	have a greater understanding of how conflict-resolution skills contribute to effective leadership.	give examples of how their conflict-resolution skills helped them succeed on a project.
Girls advance diversity in a multicultural world: Girls learn to think and act in a way that promotes an inclusive environment, respecting and valuing diverse backgrounds, viewpoints, and life experiences.	are more aware of the issues, perspectives, and experiences of people from various backgrounds, locally and globally.	identify main challenges and privileges that various groups experience in today's world (e.g., women and men, ethnicities, abilities).
	learn strategies for promoting diversity and creating more inclusive environments.	actively include people of diverse backgrounds in their activities/events. actively encourage others to behave in inclusive ways (e.g., petition for a wheelchair-accessible park gazebo, use effective ways to speak out against exclusion and discrimination).
	can examine the negative impact of stereotyping, prejudice, discrimination, and privilege on their lives and the lives of others.	when given examples from the media, describe the negative impact of stereotyping and prejudice (based on ethnicity, religion, language, class, sexuality, gender, and ability).
Girls feel connected to their communities, locally and globally: Girls feel that they are part of a larger community and recognize the importance of building diverse, supportive social networks for their personal and leadership development.	strengthen existing relationships and seek to create new connections with others in their communities.	use various ways to connect with others, locally and globally (e.g., the Internet, get-togethers, *destinations*, events). feel more confident contacting community members for help with community service and action projects (e.g., teachers, youth organizations, after-school clubs).
	gain greater understanding of the importance of community networks for themselves and others.	describe how their participation in larger communities supported their personal and leadership goals (e.g., provided safe environment, helped gain skills).

*Can you think of other sample indicators/signs?

Girl Scout Cadettes act to make the world a better place.

TAKE ACTION OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls can identify community needs: Girls learn to identify issues in their local and global communities and come up with realistic possibilities for action.	strengthen their ability to decide which community issue deserves action.	report using a variety of tools (e.g., community mapping, interviewing, observations) to identify needs, assets, and potential impact of their planned projects.
	begin to address deeper causes of issues in their communities.	identify multiple causes for a problem they wish to address. explain the difference between a quick fix and long-term solutions (e.g., reading to someone learning English as a second language vs. teaching someone to read).
Girls are resourceful problem solvers: Girls can use their knowledge and skills to set up and implement creative and effective "action plans," locate tools and resources they need, and know when, where, and how to enlist help from others.	are able to create and implement detailed action plans for their projects.	demonstrate independence in thinking through the required components of their action plans (e.g., location of resources, time lines, responsibilities). report being more able to keep themselves "on track," requesting adult help if needed.
	increasingly seek out community support and resources to help achieve their goals.	identify people/organizations in their communities to help on some aspect of their project (e.g., obtain editing guidance for media projects).
Girls advocate for themselves and others, locally and globally: Girls develop the ability to speak out on their own behalf and seek opportunities to act and speak on behalf of others.	recognize the importance of advocacy in accomplishing positive changes for themselves and others.	give examples of how youth can influence and/or participate in community decision-making (e.g., influence the library to remain open longer, start a teen hotline, form an antidiscrimination group).
	gain greater ability to use specific advocacy skills to address issues of interest.	report using various strategies to speak out for themselves and others on issues of interest (e.g., writing letters, petitions, creating public announcements).
Girls educate and inspire others to act: Girls learn to effectively explain their ideas to others and motivate them to get involved in community service and action.	show increased commitment to educate others on how to better their communities.	organize a show-and-tell for younger Girl Scouts to educate them about how to be more active in community affairs.
	are better able to identify and select various methods for informing others about their Take Action Projects.	report knowing how to tailor their messages to various audiences (e.g., young girls vs. senior citizens).
Girls feel empowered to make a difference in the world: Girls feel empowered to use their leadership skills to effect change in their lives and their world, and feel their contributions are valued in the larger community.	feel more valued by others for their ability to apply leaderships skills toward positive change.	feel that their opinions, ideas, and contributions are taken seriously by adults. express pride that their Take Action Projects improved functioning of some aspect of their communities (e.g., contributed to cleaner air, safer streets, better opportunities for young people).
	have increased confidence to participate in decision-making processes in their groups or communities.	show interest in providing and/or receiving input from community members on community issues.

* Can you think of other sample indicators/signs?

GIRL SCOUT GRADE LEVEL

Senior

grades 9–10

Girl Scout Seniors understand themselves and their values and use their knowledge and skills to explore the world.

DISCOVER OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop a strong sense of self: Girls have confidence in themselves and their abilities, feel they are able to achieve their goals, and form positive gender, social, and cultural identities.	are better able to recognize and address personal and social barriers to reaching personal goals.	make connections between societal issues (e.g., prejudice based on gender or race) and their opportunities to achieve goals. report on ways they overcame gender, ethnic, and/or economic challenges to achieving their goals.
	are better able to recognize the multiple demands and expectations of others while establishing their own individuality.	describe challenges they face in finding a balance between accepting group beliefs and thinking/making decisions for themselves.
Girls develop positive values: Girls form their beliefs and values based on the Girl Scout Promise and Law, learn to consider ethical aspects of situations, and are committed to social justice and community service and action.	are better able to recognize and resolve ethical dilemmas.	give examples of making ethical decisions in their everyday lives and can explain why they made them (e.g., consider both direct and indirect consequences of their actions).
	strengthen their own and others' commitment to being socially, politically, and environmentally engaged citizens of their communities.	report increased positive attitudes of social responsibility and citizenship.
Girls gain practical life skills—girls practice healthy living:** Girls gain skills that prepare them for a positive, healthy, and independent future.	act as role models for younger girls in making healthy choices.	describe strategies for resisting pressure to engage in unhealthy behaviors (e.g., alcohol use or unhealthy dieting).
	show cultural sensitivity in their efforts to promote healthy living in their communities.	report increased knowledge of specific health needs in their diverse communities (e.g., responsive to religious or cultural beliefs).
Girls seek challenges in the world: Girls develop positive attitudes toward learning, seek opportunities for expanding their knowledge and skills, set challenging goals for themselves, and take appropriate risks.	demonstrate increased enthusiasm for learning new skills and ideas and expanding existing ones.	increasingly offer their own ideas for exploring new topics or making existing ones more challenging.
	show increased courage to challenge their own and others' beliefs and opinions.	engage in a discussion with someone who has different political views. express preferences even when they differ from the majority's opinion.
Girls develop critical thinking: Girls learn to examine ideas from a variety of viewpoints and further use critical thinking to explore implications of gender issues for their lives and their leadership development.	are better able to analyze their own and others' thinking processes.	give examples of the steps they followed and why they made a specific decision or formed an opinion.
	apply critical thinking skills to challenge stereotypes and biases in their lives and in society.	question assumptions behind inequities they encounter (e.g., female athletes earning less than male athletes).

* Can you think of other sample indicators/signs?

** Healthy Living is one example of a practical life skill. Outcomes and indicators for other practical skills will be developed over time.

Girl Scout Seniors care about, inspire, and team with others, locally and globally.

CONNECT OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop healthy relationships: Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.	are better able to recognize and address challenges to forming and maintaining healthy relationships with others.	recognize that people hold different beliefs about relationships (e.g., based on gender, culture). identify behaviors that hinder the development of positive relationships (e.g., backstabbing, gossip).
	have increased knowledge of what healthy dating entails.	report that it is important to be able to communicate their needs effectively. recognize unhealthy dating behaviors when presented with a dating scenario.
Girls promote cooperation and team building: Girls recognize the value of working together and learn to make decisions that benefit the whole group. They can build effective teams, learn to be accountable for their shared goals, and show recognition for others' accomplishments and contributions.	strengthen their abilities to build effective teams to accomplish shared goals.	identify specific strategies for building effective teams (e.g., paying attention to interests, strengths, team dynamics). demonstrate that they can reach consensus on common goals.
	are committed to mentoring others on effective strategies for cooperative work and team building.	help others work better as a team (e.g., encourage them to reach consensus on project goals, create "listening" exercises for other girls, recognize each others' achievements).
Girls can resolve conflicts: Girls learn to recognize and analyze different conflict situations and develop skills for constructive conflict resolution and prevention.	can increasingly apply effective strategies for conflict resolution and prevention.	report using effective anger-management skills and strategies.
	are better able to analyze conflict situations in their communities and globally, and offer possible solutions.	identify deeper social roots of conflicts among various groups in their communities (e.g., conflicting interests, racism, sexism, other forms of prejudice). describe how certain conflicts in their communities can be avoided by applying prevention strategies they learned.
Girls advance diversity in a multicultural world: Girls learn to think and act in a way that promotes an inclusive environment, respecting and valuing diverse backgrounds, viewpoints, and life experiences.	are actively engaged in promoting diversity and tolerance.	create materials to educate others on how to contribute to more inclusive environments with their peers, in school, in their neighborhoods. (e.g., Web sites, how-to guides, events).
	are increasingly able to address challenges to promoting inclusive attitudes and diversity.	plan activities/events showing the harmful consequences of prejudice and discrimination on people in their communities. place high value on empathy and open-mindedness when interacting with people from diverse backgrounds.
Girls feel connected to their communities, locally and globally: Girls feel that they are part of a larger community and recognize the importance of building diverse, supportive social networks for their personal and leadership development.	actively seek to bring people together in local and global networks.	give an example of organizing a local or global event that brought together diverse members of their communities. develop friendships with Girl Guides from other countries (e.g., e-mail pals, joint international projects, visits to World Centers).
	feel that their connections with diverse members of their communities are important resources for personal and leadership development.	make friends with girls/women through the World Association of Girl Guides and Girl Scouts (WAGGGS) and can explain why these connections are important to them.

*Can you think of other sample indicators/signs?

Girl Scout Seniors act to make the world a better place.

TAKE ACTION OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls can identify community needs: Girls learn to identify issues in their local and global communities and come up with realistic possibilities for action.	are more skilled in identifying their local or global communities' needs that they can realistically address.	report considering multiple factors before deciding on the appropriateness of a project for their community (e.g., feasibility, balance of assets and needs, sustainable impact). seek advice from community members/leaders before selecting issues for action.
	choose Take Action Projects that aim to address deeper causes of issues in their communities.	feel confident using tools that help them identify root causes of community problems (e.g., causal mapping).
Girls are resourceful problem solvers: Girls can use their knowledge and skills to set up and implement creative and effective "action plans," locate tools and resources they need, and know when, where, and how to enlist help from others.	are better able to effectively plan and carry out action projects with minimal adult guidance.	create detailed action plans, organize, and coordinate with others in the community, managing time and anticipating possible problems and resource needs on their own.
	are able to assess their progress and adjust strategies as necessary.	identify alternative ways to accomplish goals if initial plans prove unsuccessful. identify things they could do better and/or differently next time they work on a community service or action project.
Girls advocate for themselves and others, locally and globally: Girls develop the ability to speak out on their own behalf and seek opportunities to act and speak on behalf of others.	have a greater understanding of how the decisions and policies of various institutions have effects on their lives and the lives of others.	report increased knowledge about how public decisions in their schools, communities, and local governments affect people's private lives (e.g., decisions about education, juvenile justice).
	use advocacy skills and knowledge to be more active on behalf of a cause, issue or person, locally or globally.	give examples of advocating for an issue in their school or neighborhood (e.g., more healthful cafeteria food, increased awareness of eating disorders, reproductive health, effects of poverty).
Girls educate and inspire others to act: Girls learn to effectively explain their ideas to others and motivate them to get involved in community service and action.	are better at inspiring and mobilizing others to become more engaged in community service and action.	shape messages (e.g., in a flier, speech, publication, or Web campaign) to explain the importance of taking action on an issue they care about. organize an awareness day in their schools on an issue they care about (e.g., emotional health, Internet safety).
Girls feel empowered to make a difference in the world: Girls feel empowered to use their leadership skills to effect change in their lives and their world, and feel their contributions are valued in the larger community.	are better able to address challenges to their feeling of empowerment.	identify internal and/or external barriers to feeling empowered to create change (e.g., not being taken seriously because they are "just kids"). describe strategies for ensuring that their voices and opinions are heard.
	feel that they have greater access to community resources and more equal relationships with adults in their communities.	report that adults in their communities invite their input and/or participation in community affairs.

*Can you think of other sample indicators/signs?

GIRL SCOUT GRADE LEVEL

Ambassador

grades 11–12

Girl Scout Ambassadors understand themselves and their values and use their knowledge and skills to explore the world.

DISCOVER OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop a strong sense of self: Girls have confidence in themselves and their abilities, feel they are able to achieve their goals, and form positive gender, social, and cultural identities.	feel they are better equipped to pursue future/ life goals.	report that they have options and possibilities for pursuing life/career goals. report increased confidence to get the job/education they envision.
	increase their sense of autonomy.	report being more self-reliant.
Girls develop positive values: Girls form their beliefs and values based on the Girl Scout Promise and Law, learn to consider ethical aspects of situations, and are committed to social justice and community service and action.	act consistently with a considered and self-determined set of values.	choose educational and career goals in line with the values they consider important.
	demonstrate commitment to promoting sustainable solutions to regional, national, and/or global problems.	report increased interest in learning more about making a sustainable impact beyond their local communities.
Girls gain practical life skills—girls practice healthy living:** Girls gain skills that prepare them for a positive, healthy, and independent future.	are better able to identify health issues in their lives, their local communities, and globally.	report using self-care practices to bring balance to their lives. identify ways their school's health education could better address the needs of young women.
	are more interested in leading and/or participating in advocacy projects related to health issues, globally or locally.	report increased knowledge of organizations that advocate for health-related issues, locally or globally.
Girls seek challenges in the world: Girls develop positive attitudes toward learning, seek opportunities for expanding their knowledge and skills, set challenging goals for themselves, and take appropriate risks.	increasingly set challenging goals for the future.	see themselves in roles/positions they previously considered unattainable.
	have increased confidence to discuss and address challenging issues and contradictions in their lives and in their local and global communities.	look for ways personal habits conflict with achieving goals that are important to them (e.g., fighting global warming). learn more about a controversial issue from someone who has experienced injustice or from a victim's advocate.
Girls develop critical thinking: Girls learn to examine ideas from a variety of viewpoints and further use critical thinking to explore implications of gender issues for their lives and their leadership development.	are increasingly able to address local/global/ societal barriers to women's leadership.	discuss various obstacles facing women leaders now and in the past (e.g., discrimination based on gender, race, class, ability, etc.). express interest in Take Action Projects that address gender inequality locally or globally.

*Can you think of other sample indicators/signs?

**Healthy Living is one example of a practical life skill. Outcomes and indicators for other practical skills will be developed over time.

Girl Scout Ambassadors care about, inspire, and team with others locally and globally.

CONNECT OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls develop healthy relationships: Girls learn to form and maintain meaningful and caring relationships, communicate effectively, protect their rights in relationships, and know when to seek help from others.	strengthen strategies for maintaining healthy relationships.	give examples of using assertive behaviors and might explain when and why these work/don't work.
	are better able to protect their rights in relationships.	actively seek information on healthy dating behaviors (e.g., how to avoid risky sexual activity, where to get help for abusive relationships). report knowing whom to contact when faced with unhealthy relationships (e.g., a hotline, school counselor, trusted adults).
Girls promote cooperation and team building: Girls recognize the value of working together and learn to make decisions that benefit the whole group. They can build effective teams, learn to be accountable for their shared goals, and show recognition for others' accomplishments and contributions.	are able to promote cooperation and effective team building in their communities.	describe how their Take Action Project encouraged sustained cooperation among various people/organizations in their communities.
	recognize the value of cooperation and team building for effective leadership and for their future careers.	report that cooperation and teambuilding skills helped them in other spheres of their lives.
Girls can resolve conflicts: Girls learn to recognize and analyze different conflict situations and develop skills for constructive conflict resolution and prevention.	are better able to develop their own approaches to conflict resolution and prevention in their lives and communities.	give examples of how they adapted conflict-resolution strategies to personal situations (e.g., argument with parent or at a teen dance).
	increasingly apply conflict-resolution skills to working toward peaceful and fair relations in their communities.	report using conflict-resolution skills to contribute to peace and fairness in their communities (e.g., become peer mediators at school).
Girls advance diversity in a multicultural world: Girls learn to think and act in a way that promotes an inclusive environment, respecting and valuing diverse backgrounds, viewpoints, and life experiences.	are actively engaged in promoting diversity and tolerance, locally and/or globally.	give examples of meaningful collaboration with people from diverse backgrounds for their global Take Action Projects.
	are increasingly able to address challenges to promoting inclusive attitudes and diversity locally and/or globally.	identify the main reasons that prevent people from embracing diversity (e.g., racism, sexism, lack of education, lack of empathy) and can suggest possible solutions (e.g., increase understanding by educating people about diverse cultural values and traditions).
Girls feel connected to their communities, locally and globally: Girls feel that they are part of a larger community and recognize the importance of building diverse, supportive social networks for their personal and leadership development.	have extensive feelings of connection with their local and global communities.	report more positive attitudes toward different members of their communities. place high value on providing support for diverse members of their communities.

*Can you think of other sample indicators/signs?

Girl Scout Ambassadors act to make the world a better place.

TAKE ACTION OUTCOMES	BY GRADE LEVEL Girls...	SAMPLE INDICATORS/SIGNS When the outcome is achieved, girls might... *
Girls can identify community needs: Girls learn to identify issues in their local and global communities and come up with realistic possibilities for action.	are more skilled in identifying issues that balance feasibility with achieving long-term changes in their local or global communities.	identify community partners that can continue their project goals into the future.
	choose Take Action Projects that aim to address deeper causes of issues in their communities.	interview staff and residents of a homeless shelter to identify root cause of homelessness in the community.
Girls are resourceful problem solvers: Girls can use their knowledge and skills to set up and implement creative and effective "action plans," locate tools and resources they need, and know when, where, and how to enlist help from others.	are better able to independently plan, organize, and manage Take Action Projects.	report increased knowledge and skill in various aspects of project planning and implementation. monitor their own progress and determine criteria for success.
	actively seek partnerships to achieve greater community participation and impact for their Take Action Projects.	describe their efforts to engage community partners—locally or globally—in the implementation of community service and action projects. explain how partnerships with others maximize the impact of their Take Action Projects.
Girls advocate for themselves and others, locally and globally: Girls develop the ability to speak out on their own behalf and seek opportunities to act and speak on behalf of others.	recognize that they have the rights and abilities to participate in the development of public policy that affects their lives and the lives of others.	report increased interest and confidence in participating in projects or initiatives that promote positive social changes.
	are better able to consider the community/global impact of their advocacy efforts.	describe how their advocacy efforts helped their community or the broader society.
	actively seek partnerships with other organizations that provide support and resources for their advocacy efforts.	report working with organizations that share their advocacy goals.
Girls educate and inspire others to act: Girls learn to effectively explain their ideas to others and motivate them to get involved in community service and action.	are better able to evaluate the effectiveness of their efforts to reach/educate diverse audiences and can adjust their communication strategies accordingly.	implement innovative ways to access hard-to-reach audiences (e.g., using the Internet to engage remote rural populations). work with other youth/community organizations to spread their messages more effectively.
Girls feel empowered to make a difference in the world: Girls feel empowered to use their leadership skills to effect change in their lives and their world, and feel their contributions are valued in the larger community.	feel capable of using their skills to better the functioning and governance of communities, locally or globally.	create an action plan that could be implemented to include more young people in setting town priorities.
	feel their projects and ideas are valued/ respected by stakeholders in their local and/or global communities.	give examples of positive reports (e.g., local news coverage) about their Take Action Projects.

*Can you think of other sample indicators/signs?

Acknowledgments

112TH CONGRESS
1ST SESSION

S. RES. 310

Designating 2012 as the "Year of the Girl" and congratulating Girl Scouts of the USA on its 100th anniversary.

IN THE SENATE OF THE UNITED STATES

NOVEMBER 3, 2011

Ms. MIKULSKI (for herself and Ms. COLLINS) submitted the following resolution; which was referred to the Committee on the Judiciary

---

RESOLUTION

Designating 2012 as the "Year of the Girl" and congratulating Girl Scouts of the USA on its 100th anniversary.

Whereas, for more than 100 years, Girl Scouts of the USA (referred to in this preamble as "Girl Scouts") has inspired girls to lead with courage, confidence and character;

Whereas the Girl Scout movement began on March 12, 1912, when Juliette "Daisy" Gordon Low (a native of Savannah, Georgia) organized a group of 18 girls and provided the girls with the opportunity to develop physically, mentally, and spiritually;

Whereas the goal of Daisy Low was to bring together girls of all backgrounds to develop self-reliance and resourcefulness, and to prepare each girl for a future role as a professional woman and active citizen outside the home;

Whereas, within a few years, there were nearly 70,000 Girl Scouts throughout the United States, including the territory of Hawaii;

Whereas Girl Scouts established the first troops for African-American girls in 1917 and the first troops for girls with disabilities in 1920;

Whereas today more than 50,000,000 women in the United States are alumnae of the Girl Scouts, and approximately 3,300,000 girls and adult volunteers are active members of the Girl Scouts;

Whereas Girl Scouts live in every corner of the United States, Puerto Rico, the territories of the United States, and more than 90 countries overseas;

Whereas Girl Scouts is the largest member of the World Association of Girl Guides and Girl Scouts, a global movement comprised of more than 10,000,000 girls in 145 countries worldwide;

Whereas the robust program of Girl Scouts helps girls develop as leaders and build confidence by learning new skills;

Whereas the award-winning Girl Scout Leadership Program helps each girl discover herself and her values;

Whereas the Girl Scout Leadership Program leadership model helps girls develop skills such as critical thinking, problem solving, cooperation and team building, conflict resolution, advocacy, and other important life skills;

Whereas core programs around Science, Technology, Engineering and Math (referred to in this preamble as "STEM"), environmental stewardship, healthy living, financial literacy, and global citizenship help girls develop a solid foundation in leadership;

Whereas STEM programming, first introduced in 1913 with the "electrician" and "flyer" badges, offers girls of every age science, technology, engineering, and math activities that are relevant to everyday life;

Whereas the award-winning STEM program helps girls build strong, hands-on foundations to become future female leaders and meet the growing need for skilled science and technology professionals in the United States;

Whereas healthy living programs—

(1) help each Girl Scout build the skills necessary to maintain a healthy body, an engaged mind, and a positive spirit; and

(2) teach girls about fitness and nutrition, body image, self-esteem, and relational issues, especially bullying;

Whereas through the 100th Anniversary Take Action Project, "Girl Scouts Forever Green", Girl Scouts is honoring the commitment of Juliette Low to the outdoors by engaging families, friends, and communities to improve the environment and protect the natural resources of the United States;

Whereas the financial literacy programming of Girl Scouts, most notably the iconic Girl Scout Cookie Program, helps girls set financial goals and gain the confidence needed to ultimately take control of their own financial future;

Whereas the beloved tradition of the Girl Scout Cookie Program has a proven legacy in the United States, as more than 80 percent of highly successful businesswomen were Girl Scouts;

Whereas Girl Scouts has also helped millions of young girls become good global citizens through international ex-

changes, travel, "take action" and service projects, and newer programs such as "twinning" (where girls in the United States connect with girls in other countries) and virtual Girl Scout troops;

Whereas Girl Scouts has helped girls advance diversity in a multicultural world, connect with local and global communities, and feel empowered to make a difference in the world;

Whereas the Girl Scout Gold Award, the highest honor in Girl Scouting, requires a girl to make a measurable and sustainable difference in the community by—

(1) assessing a need;

(2) designing a solution;

(3) finding the resources and the support to implement the solution;

(4) completing the project; and

(5) inspiring others to sustain the project;

Whereas the Gold Award honors leadership in the Girl Scout tradition because Gold Award recipients have already changed the world as high school students;

Whereas two-thirds of the most accomplished women in public service in the United States were Girl Scouts;

Whereas research by Girl Scouts shows that Girl Scouts alumnae—

(1) have a positive sense of self;

(2) are engaged in community service;

(3) are civically engaged;

(4) have attained high levels of education; and

(5) are successful according to many economic indicators;

Whereas, in addition to the outstanding programs that Girl Scouts offers, Girl Scouts has evolved into the premier expert on the healthy growth and development of girls;

Whereas, since the founding of the Girl Scout Research Institute in 2000, the Institute has become an internationally recognized center for original research, research reviews, and surveys that provide significant insights into the lives of girls;

Whereas the research conducted by Girl Scouts not only informs Girl Scout program development and delivery, but also helps bring the voice of girls to key issues in the public sphere;

Whereas, by bringing greater attention to the health, education, and developmental needs of girls, Girl Scouts provides a voice for girls with policymakers, business leaders, educators, and all other stakeholders who care about the healthy growth and development of girls;

Whereas Girl Scouts ensures that issues such as STEM education, bullying prevention, unhealthy perceptions of beauty as portrayed by the media, and many other important issues—

(1) are brought to the attention of the public; and

(2) are addressed through public policy at the national, State, and local levels; and

Whereas Girl Scouts of the USA is recognizing its 100th anniversary by designating 2012 as the "Year of the Girl": Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the importance of empowering girls to lead with courage, confidence, and character;

(2) congratulates Girl Scouts of the USA on its 100th anniversary; and

(3) designates 2012 as the "Year of the Girl".

H. RES. 460

Expressing support for designation of 2012 as the "Year of the Girl" and celebrating the 100th anniversary of Girl Scouts of the USA.

IN THE HOUSE OF REPRESENTATIVES

NOVEMBER 4, 2011

Ms. WASSERMAN SCHULTZ (for herself and Ms. GRANGER) submitted the following resolution; which was referred to the Committee on Oversight and Government Reform

---

RESOLUTION

Expressing support for designation of 2012 as the "Year of the Girl" and celebrating the 100th anniversary of Girl Scouts of the USA.

Whereas for more than 100 years, Girl Scouts of the USA has inspired generations of girls to lead with courage, confidence, and character;

Whereas the Girl Scout Movement began on March 12, 1912, when Savannah, Georgia, native Juliette "Daisy" Gordon Low gathered 18 girls to provide them the opportunity to develop physically, mentally, and spiritually;

Whereas Daisy Low's goal was to bring together girls of all backgrounds to develop self-reliance and resourcefulness as well as prepare them for future roles as professional women and for active citizenship outside the home;

Whereas within just a few years, there were nearly 70,000 Girl Scouts nationwide, including the territory of Hawaii;

Whereas the first African-American troops were established in 1917, and by 1920, troops for girls with disabilities were established;

Whereas today, more than 50,000,000 women in the United States are Girl Scout alumnae, and 3,300,000 girls and adult volunteers are active members;

Whereas Girl Scouts live in every corner of the United States, Puerto Rico, United States territories, and more than 90 countries overseas;

Whereas Girl Scouts is the largest member of the World Association of Girl Guides and Girl Scouts, a global movement comprised of more than 10,000,000 girls in 145 countries worldwide;

Whereas Girl Scouts' robust program helps girls develop as leaders and build confidence by learning new skills;

Whereas the award winning Girl Scout Leadership Program helps girls discover themselves and their values, connect with others, and take action to make the world a better place;

Whereas this leadership model helps girls develop skills such as critical thinking, problem solving, cooperation and team building, conflict resolution, advocacy, and other important life skills;

Whereas core programs around Science, Technology, Engineering and Math (STEM), environmental stewardship, healthy living, financial literacy, and global citizenship help girls develop a solid foundation in leadership;

Whereas Girl Scouts' STEM programming, first introduced in 1913 with the "electrician" and "flyer" badges, offers girls of every age science, technology, engineering, and math activities that are relevant to everyday life;

Whereas these award-winning programs help girls build strong, hands-on foundations to become future female leaders and meet the growing need for skilled science and technology professionals in the United States;

Whereas healthy living programs help Girl Scouts build the skills they need to keep their bodies healthy, their minds engaged, and their spirits positive and teaches girls about fitness and nutrition, body image, self esteem, and relational issues, especially bullying;

Whereas through the 100th Anniversary Take Action Project, Forever Green, Girl Scouts is honoring Daisy Low's commitment to the outdoors by engaging families, friends, and communities to improve the environment and protect its natural resources;

Whereas Girl Scouts' financial literacy programming, notably, the iconic Girl Scout cookie sale, helps girls set financial goals and gain the confidence they need to ultimately take control of their own financial future;

Whereas this beloved United States tradition has a proven legacy, more than 80 percent of highly successful businesswomen were Girl Scouts;

Whereas Girl Scouts has also helped millions of young girls become good global citizens through international exchanges, travel, take action and service projects, and newer programs like "twinning" and virtual Girl Scout troops;

Whereas Girl Scouts has helped girls advance diversity in a multicultural world, connect with their communities, locally and globally, and feel empowered to make a difference in the world;

Whereas the Girl Scout Gold Award, the highest honor in Girl Scouting, requires girls to make a measurable and sustainable difference in their community, assess a need and design a solution, find the resources and the support to make it happen, complete the project, and also inspire others to sustain it;

Whereas the Gold Award honors leadership in the Girl Scout tradition and Gold Award recipients have already changed the world as high school students;

Whereas two-thirds of the Nation's most accomplished women in public service were Girl Scouts;

Whereas Girl Scouts' research shows that Girl Scouts alumnae have a positive sense of self, are engaged in community service, are civically engaged, have attained high levels of education, and are successful on a number of economic indicators;

Whereas beyond its outstanding program, Girl Scouts has evolved into the premier expert on girls' healthy growth and development;

Whereas since its founding in 2000, the Girl Scout Research Institute has become an internationally recognized center for original research, research reviews, and surveys that provide significant insights into the lives of girls;

Whereas Girl Scouts' research informs not only Girl Scouts' program development and delivery, but also helps bring girls' voices to key issues in the public sphere;

Whereas by bringing greater attention to girls' health, education, and developmental needs, Girl Scouts is the voice for girls with policymakers, business leaders, educators, and all other stakeholders who care about girls' healthy growth and development;

Whereas Girl Scouts ensures that issues, such as STEM education, bullying prevention, unhealthy perceptions of beauty as portrayed by the media, and many other important issues, are brought to the public's attention, and addressed through public policy at the national, State, and local level; and

Whereas Girl Scouts of the USA is recognizing its 100th anniversary by designating 2012 as the "Year of the Girl": Now, therefore, be it

Resolved, That the House of Representatives—

(1) recognizes the importance of empowering girls to lead with courage, confidence, and character;

(2) congratulates Girl Scouts of the USA on its 100th anniversary; and

(3) supports the "Year of the Girl".

A CONCURRENT RESOLUTION

HONORING GIRL SCOUTS OF THE USA ON ITS ONE HUNDREDTH ANNIVERSARY.

(TEXT OF BILL BEGINS ON NEXT PAGE)

HCR 2041

Whereas, for more than 100 years, Girl Scouts of the USA (Girl Scouts) has inspired girls around the world to lead with courage, confidence and character; and

Whereas, the Girl Scout movement began on March 12, 1912, when Juliette "Daisy" Gordon Low, a native of Savannah, Georgia, organized a group of 18 girls to provide them with the opportunity to develop physically, mentally and spiritually; and

Whereas, Miss Low's goals were to bring together girls of all backgrounds to develop self-reliance and resourcefulness and to prepare each girl for a future role as a professional woman and active citizen outside the home; and

Whereas, within a few years, there were nearly 70,000 Girl Scouts throughout the United States, including the territory of Hawaii; and

Whereas, Girl Scouts established the first troops for African-American girls in 1917 and the first troops for girls with disabilities in 1920; and

Whereas, today more than 50,000,000 women in the United States are alumnae of the Girl Scouts, and approximately 3,300,000 girls and adult volunteers are active members of the Girl Scouts; and

Whereas, the robust program of Girl Scouts helps girls develop as leaders and build confidence by learning new skills and discovering herself and her values; and

Whereas, through their participation in Girl Scout activities and programs, girls develop such skills as critical thinking, problem solving, cooperation and team building, conflict resolution, advocacy and other vital skills that will remain with them throughout their lives; and

Whereas, healthy living programs help each Girl Scout to maintain a healthy body, an engaged mind and a positive spirit by teaching them about fitness and nutrition, body image, self-esteem and relational issues, especially bullying; and

Whereas, Girl Scouts promotes financial literacy, most notably through the iconic Girl Scout Cookie Program, which helps girls set financial goals and gain the confidence needed to ultimately take control of their own financial future; and

Whereas, by bringing greater attention to the health, education, and developmental needs of girls, Girl Scouts provides a voice for girls with policymakers, business leaders, educators, and all other stakeholders who care about the healthy growth and development of girls; and

Whereas, Girl Scouts of the USA is recognizing its 100th anniversary by designating 2012 as the "Year of the Girl".

Therefore

Be it resolved by the House of Representatives of the State of Arizona, the Senate concurring:

That the Members of the Legislature congratulate Girl Scouts of the USA on the auspicious occasion of its 100th anniversary and honor this outstanding organization for a century of empowering girls to lead with courage, confidence and character.

House Resolution

A resolution honoring the 100th anniversary of Girl Scouts of the United States of America and recognizing 2012 as "The Year of the Girl" in the State of Florida.

WHEREAS, on March 12, 1912, Juliette "Daisy" Gordon Low gathered 18 local girls together in Savannah, Georgia, for a Girl Scouts meeting to provide them the opportunity to develop physically, mentally, and spiritually, and

WHEREAS, on June 10, 1915, the organization was incorporated as Girl Scouts, Inc., under the laws of the District of Columbia, and on March 16, 1950, Girl Scouts of the United States of America was chartered by the United States Congress, and

WHEREAS, over the last 100 years, the Girl Scouts have helped millions of girls and women develop courage, confidence, and character, equipping them with the skills to make the world a better place, and

WHEREAS, presently, there are more than 50 million Girl Scouts alumnae and 3.2 million active members in the United States, with additional troops and groups in more than 145 countries worldwide, and

WHEREAS, the award winning Girl Scout Leadership Program helps girls discover themselves and their values, connect with others, and take action, and

WHEREAS, this leadership model helps girls develop skills such as critical thinking, problem solving, cooperation and team

building, conflict resolution, advocacy, and other important life skills, and

WHEREAS, core programs around science, technology, engineering, and math (STEM), environmental stewardship, healthy living, financial literacy, and global citizenship help girls develop a solid foundation in leadership, and

WHEREAS, since its founding in 2000, the Girl Scout Research Institute has become an internationally recognized center for original research, research reviews, and surveys that provide significant insights into the lives of girls, and

WHEREAS, through the dedication, time, and talent of volunteers of different backgrounds, abilities, and areas of expertise, the Girl Scouts Program has been delivered to over 100,000 girls in grades K-12 across the State of Florida, NOW, THEREFORE,

Be It Resolved by the House of Representatives of the State of Florida:

That Girl Scouts of the United States of America is recognized and commended on the occasion of its 100th anniversary and that 2012 is recognized as "The Year of the Girl" in the State of Florida.

	VERSION:	Adopted
	VERSION DATE:	01/17/2012

Florida Senate - 2012(NP) SR 2020
By Senator Rich

Senate Resolution
A resolution recognizing 2012 as the "Year of the Girl" and celebrating 100 years of Girl Scouting in the State of Florida.

WHEREAS, March 12, 2012, marks the 100th Anniversary of the Girl Scouts of the United States of America, which began in 1912 when Juliette "Daisy" Gordon Low, a native of Savannah, Georgia, gathered 18 girls to provide them the opportunity to develop physically, mentally, and spiritually, and

WHEREAS, for 100 years, Girl Scouting has helped build courage, confidence, and character in millions of girls and women who aspire to make the world a better place, and

WHEREAS, this leadership model assists girls in developing skills, such as critical thinking, problem solving, cooperation, team building, conflict resolution, advocacy, and other important life skills, and

WHEREAS, the award-winning Girl Scout Leadership Program aids girls in discovering themselves and their values, connecting with others, and taking action to make the world a better place, and

WHEREAS, core programs that focus on science, technology, engineering, math, environmental stewardship, healthy living, financial literacy, and global citizenship help girls develop a solid foundation in leadership, and

WHEREAS, since its founding in 2000, the Girl Scout Research Institute, an extension of the Girl Scouts of the Unites States of America, has become an internationally recognized center that conducts original research, evaluations, reviews, and surveys; releases critical facts and findings; and provides resources essential for the advancement of the well being and safety of girls living in today's world, and

WHEREAS, through the dedication, time, and talent of volunteers of different backgrounds, abilities, and areas of expertise, the Girl Scout program is available to more than 100,000 participating girls in grades K-12 across the state of Florida, and

WHEREAS, more than 50 million American women are Girl Scout alumnae today, and 3.3 million girls and adult volunteers in the United States are active members in the Girls Scouts, and

WHEREAS, Girl Scouts is the largest member of the World Association of Girl Guides and Girl Scouts, a global movement comprised of more than 10 million girls in 145 countries worldwide,

NOW, THEREFORE,

Be It Resolved by the Senate of the State of Florida:

That 2012 be recognized as the "Year of the Girl" and that the Girl Scouts of the United States of America be applauded for 100 years of leadership and expertise as the voice for and of girls.

SCR 18
A Resolution Establishing August 4, 2012, as Raoul Wallenberg Remembrance Day

The purpose of this Resolution is to establish August 4, 2012, as Raoul Wallenberg Remembrance Day in commemoration of the extraordinary life and sacrifice of this Swedish diplomat, credited with saving more than 100,000 Jews during the Holocaust, on the 100th anniversary of his birth.

Raoul Wallenberg was born August 4, 1912 in Sweden. His father, Raoul Wallenberg Sr., was an officer in the Swedish Navy, and grandfather Gustav Wallenberg was the Swedish Ambassador to Japan. Raoul Wallenberg attended college in the United States, graduating from the University of Michigan in 1935 with a baccalaureate degree in Architectural Design.

In 1939 Wallenberg's business dealings brought him to Hungary, where he began to know the Hungarian Jewish community and became increasingly concerned with the fate of Europe's Jewish communities who were beginning to fall prey to Hitler's advance across Europe. In 1944 during WWII, United States Secretary of State Cordell Hull requested the cooperation of Sweden, a neutral nation, in protecting the lives of 750,000 Hungarian Jews facing extermination at the hands of the Nazis. Raoul Wallenberg agreed to the request, and went to Hungary to protect Jews and victims of the Nazis under his official profession as a Swedish diplomat.

With extraordinary courage and with total disregard for the constant danger to himself, this young diplomat out-dueled Nazi Lieutenant Colonel Adolf Eichmann in Budapest, Hungary from July through December 1944 and miraculously saved more than 100,000 innocent men, women and children from the death camps. Raoul Wallenberg then endured tragic imprisonment and death in a Soviet Gulag in violation of Wallenberg's diplomatic immunity and international law.

The late U.S. Congressman Tom Lantos, rescued by Wallenberg in Budapest, served for several years as economic adviser and chief of staff to former Alaska Congressman Mike Gravel. In 1981 President Ronald Reagan posthumously awarded Mr. Raoul Wallenberg the highest Congressional award making Wallenberg an Honorary Citizen of the United States.

SCR 19 is brought forth in honor of the courageous valor of Raoul Wallenberg whose life demonstrated moral courage and love in the face of incomprehensible evil, and showed us that one person can make a difference.

Sep 21, 2011 - Introduced in House. This is the original text of the bill as it was written by its sponsor and submitted to the House for consideration. This is the latest version of the bill currently available on GovTrack.

HR 3001 IH

112th CONGRESS
1st Session
H. R. 3001

To award a Congressional Gold Medal to Raoul Wallenberg, in recognition of his achievements and heroic actions during the Holocaust.

IN THE HOUSE OF REPRESENTATIVES

September 21, 2011

Mr. MEEKS (for himself, Mr. SHERMAN, Mr. BERMAN, Ms. HAYWORTH, and Mr. GRIMM) introduced the following bill; which was referred to the Committee on Financial Services

A BILL

To award a Congressional Gold Medal to Raoul Wallenberg, in recognition of his achievements and heroic actions during the Holocaust.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the 'Raoul Wallenberg Centennial Celebration Act'.

SEC. 2. FINDINGS.

The Congress finds as follows:

(1) Raoul Wallenberg was born in Europe on August 4, 1912, to Swedish Christian parents.

(2) In 1935, he graduated from the University of Michigan in Ann Arbor, completing a five-year program in three-and-a-half years.

(3) In a letter to his grandfather, Wallenberg wrote of his time in America: 'I feel so at home in my little Ann Arbor that I'm beginning to sink down roots here and have a hard time imagining my leaving it. . . . Every now and then I feel strange when I think about how tiny my own country is and how large and wonderful America is.'.

(4) Raoul returned to Sweden, where he began a career as a businessman, and afterwards, a Swedish diplomat.

(5) In 1936, Raoul's grandfather arranged a position for him at the Holland Bank in Haifa, Palestine. There Raoul began to meet young Jews who had already been forced to flee from Nazi persecution in Germany. Their stories affected him deeply.

(6) He was greatly troubled by the fate of Jews in Europe, confiding to actress Viveca Lindfors the horrific plight of Jews under Nazi Europe.

(7) Under the direction of President Franklin D. Roosevelt, the War Refugee Board was established in January 1944 to aid civilians that fell victim to the Nazi and Axis powers in Europe.

(8) One of War Refugee Board's top priorities was protection of the 750,000 Hungarian Jews still alive.

(9) It was decided that Raoul Wallenberg, aged 31 at the time, would be most effective in protecting Jews and victims of the Nazis in Hungary under the War Refugee Board. He was recruited by Iver Olsen, an agent for the Office of Strategic Services and sent to Budapest, Hungary, under his official profession as a Swedish diplomat. He was instructed to use passports and other creative means to save as many lives as possible.

(10) Wallenberg created a new Swedish passport, the Schutzpass, which looked more imposing and official than the actual Swedish passport. He reportedly put up huge place cards of it throughout Budapest to make the Nazis familiar with it. He unilaterally announced that it granted the holder immunity from the death camps. The Schutzpasses alone are credited with saving 20,000 Jewish lives.

(11) In one example of his heroism, Wallenberg was told of a Nazi plot to round up several thousand Jewish women and acted swiftly to save them. Former Wallenberg staffer, Agnes Adachi, recalls the time when she and other staff, spent the whole night making around 2,000 Schutzpasses before 6 a.m. They were all completed and personally delivered to the women in time to save their lives.
(12) Using the money the United States put into the War Refugee Board, Wallenberg was able to purchase about thirty buildings, which he used as hospitals, schools, soup kitchens, and safe houses for over 8,000 children whose parents have already been deported or killed.
(13) Tommy Lapid, a young boy who was staying with his mother in a Swedish safe house (his father was already dead), gave an eyewitness account of how his family was helped by Wallenberg and the War Refugee Board: 'One morning, a group of Hungarian Fascists came into the house and said that all the able-bodied women must go with them. We knew what this meant. My mother kissed me and I cried and she cried. We knew we were parting forever and she left me there, an orphan to all intents and purposes. Then two or three hours later, to my amazement, my mother returned with the other women. It seemed like a mirage, a miracle. My mother was there--she was alive and she was hugging me and kissing me, and she said one word: Wallenberg.'.
(14) Even as the war was coming to a close, Wallenberg remained vigilant and attentive to the people under his care. Adolf Eichmann, the SS colonel charged with the extermination of Jews in Eastern Europe, was determined to exterminate the 70,000 Jews kept as prisoners in a guarded ghetto in Budapest. As soon as Wallenberg heard of the plot, he sent Pal Szalay, an Arrow-Crossman senior official, who defected and turned to Wallenberg. Szalay was sent to speak to General Schmidthuber, who was ordered to spearhead the ghetto extermination in Budapest. Szalay informed Schmidthuber that, seeing as the war was coming to an end, if the planned massacre took place, Wallenberg would see to it personally that Schmidthuber would be prosecuted as a war criminal and hanged. The plans were ultimately abandoned and considered Wallenberg's last big victory.
(15) Of the 120,000 Hungarian Jews that survived, Raoul Wallenberg, acting under the War Refugee Board, is credited with saving an estimated 100,000 of them in a six-month period.
(16) Raoul Wallenberg's fate remains a mystery. In January 13, 1945, he contacted the Russians in an effort to secure food for the Jews under his protection--as he was still working hard to protect them.
(17) In 1981, President Ronald Reagan made Raoul Wallenberg an honorary citizen of the United States, an honor only previously extended to Winston Churchill.
(18) These findings show that Raoul Wallenberg showed exceptional heroism and bravery with his actions during the holocaust. Working with the War Refugee Board, a United State's agency, he was able to save about 100,000 Hungarian Jews, many of which were later able to immigrate to the United States.
(19) Indeed, hundreds of thousands of American Jews can directly or indirectly attribute their own lives to Raoul Wallenberg's actions during World War II. Many of the people Wallenberg saved have been influential citizens contributing to American institutions and culture, including Congressman Tom Lantos (February 1, 1928-February 11, 2008), Annette Lantos, and the Liska Rebbe, Rabbi Yoizef (Joseph) Friedlander, who carried forth the Liska Hassidic dynasty from Hungary to the United States after being saved by Raoul Wallenberg.
(20) His actions and character make him an excellent contender for a Congressional Gold Medal in time for the centennial of his birth, to celebrate his achievements and humanitarian accomplishments.

Public Law 97-54
97th Congress

Joint Resolution

Proclaiming Raoul Wallenberg to be an honorary citizen of the United States, and requesting the President to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

Oct. 5, 1981
[S.J. Res. 65]

Whereas the United States has conferred honorary citizenship on only one occasion in its more than two hundred years, and honorary citizenship is and should remain an extraordinary honor not lightly conferred nor frequently granted;

Whereas during World War II the United States was at war with Hungary, and had no diplomatic relations with that country;

Whereas in 1944 the United States Government through Secretary of State Cordell Hull requested the cooperation of Sweden, as a neutral nation, in protecting the lives of Hungarian Jews facing extermination at the hands of the Nazis;

Whereas Raoul Wallenberg agreed to act at the behest of the United States in Hungary, and went to Hungary in the summer of 1944 as Secretary of the Swedish Legation;

Whereas Raoul Wallenberg, with extraordinary courage and with total disregard for the constant danger to himself, saved the lives of almost one hundred thousand innocent men, women, and children;

Whereas Raoul Wallenberg, with funds and directives supplied by the United States, provided food, shelter, and medical care to those whom he had rescued;

Whereas the Soviet Union, in violation of Wallenberg's Swedish diplomatic immunity and of international law, seized him on January 17, 1945, with no explanation ever given for his detention and subsequent imprisonment;

Whereas Raoul Wallenberg has been a prisoner in the Soviet Union since 1945;

Whereas reports from former prisoners in the Soviet Union, as recent as January 1981, suggest that Raoul Wallenberg is alive;

Whereas history has revealed that heroic acts of salvation were tragically rare during the massacre of millions of innocent human beings during World War II; and

Whereas the significance of this symbol of man's concern for his fellow man has been tainted by the wall of silence that surrounds the fate of Wallenberg: Now, therefore, be it

Raoul Wallenberg, honorary U.S. citizenship.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Raoul Wallenberg is proclaimed to be an honorary citizen of the United States of America.

SEC. 2. The President is requested to take all possible steps to ascertain from the Soviet Union the whereabouts of Raoul Wallenberg and to secure his return to freedom.

Approved October 5, 1981.

LEGISLATIVE HISTORY—S.J. Res. 65 (H.J. Res. 220):

HOUSE REPORT No. 97-152, pt. 1, accompanying H.J. Res. 220 (Comm. on Foreign Affairs).

SPONSOR STATEMENT

SCR 19
A Resolution proclaiming September 24, 2012 as United States Marshals Day

The purpose of this Resolution is to proclaim September 24, 2012 to be US Marshals Day in honor of the long standing service of the United States Marshals and their deputies to the State of Alaska.

The United States Congress appointed the US Marshals Service on September 24, 1789. After the purchase of Alaska from Russia on October 18, 1867, Alaska was designated a military district of the United States and placed under the control of the War Department. The US Army was charged with maintaining law and order until troops were withdrawn in 1877.

In 1884, law and order in Territorial Alaska was assigned to the Marshals. At the start of the gold rush there was only one Marshal and ten Deputy Marshals, the sole law enforcement authority throughout Alaska.

The Alaska Peace Officer Memorial chronicles the eight brave Deputy US Marshals who died in the line of duty in early Alaska. The deputy marshals continued to be the main force of law in rural Alaska until the formation of the Alaska State Troopers. Many early-era troopers were former deputy US Marshals.

The commitment to Alaska continues strong today. In March 1999, the U.S. Marshal's Office established the Alaska Fugitive Task Force to pull together resources of federal, state and local agencies to apprehend state and federal fugitives, especially those wanted for crimes of violence and drug trafficking. The Task Force has arrested over 5,000 subjects in Alaska and extradited over 250 subjects to other States for adjudication of crimes. US Marshal and Alaska State Trooper partnerships include the Village Crime Reduction Program, Registered Sex Offender Compliance & Enforcement Project and the Badges and Books Program.

Many non-fictional books about Alaska's history make reference to the US Marshals. Stories of the frontier Alaskan Marshal still live today in the minds of many village Elders who remember having Marshals in their villages when they were children.

In honor of this legacy, and the rich history between the great state of Alaska and the US Marshals Service, the Alaska State Legislature hereby proclaims September 24, 2012 as US Marshals Day.

During Session (January - May): Alaska State Capitol • Juneau, Alaska 99801 • (800) 342-2199 • (907) 465-2199 • (907) 465-4587 (fax)

During Interim (June-December): 10928 Eagle River Road, Suite 238 • Eagle River, Alaska 99577 • (907) 694-6683 • (907) 694-1015 (fax)

senator.fred.dyson@legis.state.ak.us • www.akrepublicans.org

The United States Marshals Service in Alaska

A Brief History

The US Marshals Service was created by the First Congress in the Judiciary Act of 1789, signed into law by President George Washington on September 24, 1789.

After the United States purchased Alaska from Russia on October 18, 1867, Alaska was designated a military district of the United States and placed under the control of the War Department. The US Army was charged with maintaining law and order until troops were withdrawn in 1877. Alaska was then briefly governed in succession by the Treasury Department and the Naval Department.

Law and order was finally addressed by the Organic Act of May 17, 1884, making Alaska a civil and judicial district subject to the laws of Oregon. Law in the rugged Alaska Territory was now upheld by the US Marshals under a District Judge. At the start of the gold rush there was only one Marshal and ten Deputy Marshals, the sole law enforcement authority throughout Alaska.

In 1897, Deputy Marshals William C. Watt and James Mark Rowan were the first to be killed in the line of duty. The Alaska Peace Officer Memorial chronicles the many brave Deputy US Marshals who paid the ultimate sacrifice in early Alaska.

It was the tumult of the gold rush period which first brought to focus the need for additional law enforcement support to the US Marshal's Office which would continue to bear the responsibility for law enforcement in Alaska for the next forty years.

In 1941 the 15th Territorial Legislature established the Territory of Alaska Highway Patrol for the purpose of enforcing the traffic code, but did not provide the new organization with general police powers. In 1945, as lawlessness continued to thrive outside the jurisdiction of local police departments, the members of the Alaska Highway Patrol were deputized as Special Deputy US Marshals to fill this void.

In 1953, the Alaska Highway Patrol was reformed as the Alaska Territorial Police and granted full police powers by the Territorial Legislature. Additional personnel were hired from the ranks of the US Marshals.

With the advent of statehood in 1959, the Alaska Territorial Police was renamed the Alaska State Police and the organization became a division of the Department of Public Safety. The new State Police added 13 former US Deputy Marshals and 10 new recruits to their ranks, increasing their number to 78 commissioned officers. In 1967, the Alaska State Police were renamed the Alaska State Troopers.

The US Marshals commitment to Alaska continues to be strong. Today the Marshals are headquartered in Anchorage and maintain a two-man office in Fairbanks. The Juneau, Ketchikan and Nome sub-offices are manned during scheduled court arraignments.

In March 1999, the Alaska Fugitive Task Force was established to pull together resources of several agencies and concentrate apprehension efforts on state and federal fugitives, especially those wanted for crimes of violence and drug trafficking. With the assistance of the Alaska State Troopers, the Anchorage Police Department, the Alaska National Guard Counter-Drug Support Team, the Alaska State Probation/Parole Office and other municipal law enforcement agencies, the Task Force has arrested over 5,000 subjects in Alaska and extradited over 250 subjects to other States for adjudication of crimes.

Due to the vast geography of Alaska and the unique challenges of providing law enforcement services, Alaska Deputy US Marshals participate in a variety of special missions like the Alaska Fugitive Task Force and the sharing of US Marshal marine and aviation assets to assist Alaska State Troopers and local law enforcement agencies in the fight against sexual assault and bootlegging in Southwest Alaska. Current US Marshal and Alaska State Trooper partnerships include the Village Crime Reduction Program, Registered Sex Offender Compliance & Enforcement Project and the Badges and Books Program.

Many non-fictional books about Alaska's history make reference to the US Marshals. Stories of the frontier Alaskan Marshal still live today in the minds of many village Elders who remember having Marshals in their villages when they were children.

In honor of this legacy, and the rich history between the great state of Alaska and the US Marshals Service, the Alaska State Legislature is proud to proclaim September 24, 2012 as US Marshals Day.

AST & US Marshal Service

We are pleased to share information about our mutual endeavors with the US Marshal Service. Recently, there have been three targeted initiatives involving the cooperative efforts of the Alaska State Troopers (AST) and US Marshal Service (USMS), as well as other law enforcement agencies. These are the Registered Sex Offender Compliance and Enforcement Project, the Village Crime Reduction and Community Oriented Policing Program, and the Badges-and-Books Program. I'm attaching articles concerning the latter two projects which contain additional details about each initiative. The Sex Offender Compliance and Enforcement Project addressed the statewide need to verify the compliance status of registered sex offenders living in Alaska. At the end of this five-month sweep, AST and the USMS Sex Offender Investigations Branch (working in conjunction with multiple municipal police departments, the state probation and parole offices, and the District Attorney's Offices) traveled to 134 communities throughout Alaska and contacted or verified the status of 1,910 sex offenders who were required to register to confirm whether they were in compliance with Alaska's sex offender registration requirements. In addition to these targeted efforts, the ongoing joint partnership between AST and the USMS, along with local law enforcement and VPSO's, continues to have a positive impact on public safety throughout Alaska.

Trooper Steve Kevan somberly walked into the tight quarters of an Emmonak home and removed his hat and gloves. The sub-zero temperatures from outside could be felt emanating from Trooper Kevan's clothes as he sat down on a stool next to a fizzing container of pink liquid with eight blueberries floating on the surface. "You know why I am here, Mr. Kassock? You understand this is a serious matter, Home-brew?" Mr. Kassock nodded and took another drag off of his hand-rolled cigarette.

Normally Trooper Kevan is a larger-than-life character—and little of that has to do with his intimidating size. On this occasion he had a humble, quiet voice and his posture was unassuming. "I'd like to talk to you about it and ask you some questions, if that is okay. But first, I am going to read you your rights and see if you have any questions for me."

While Trooper Kevan continued his interview, a Deputy U.S. Marshal and Captain Steve Arlow, Commander of Alaska State Troopers' C Detachment, listened and looked around the small home for evidence of home-brew activity. A cousin of Mr. Kassock was sitting on the couch nearby and offering encouraging words and support.

Trooper Kevan, Captain Arlow and the Deputy U.S. Marshal, along with 31 other Law Enforcement officers, were in the Yukon-Kuskokwim Delta participating in a week-long Village Crime Reduction and Community-Oriented Policing Program (VCRP) backed by Governor Sean Parnell as a part of the "Safe Homes, Strong Families" initiative.

Trooper Steve Kevan field tests a batch of home-brew found in a home in Emmonak. Samples of the home-brew are also collected to send off for further analysis. Before leaving the home, Trooper Kevan poured the liquid down the drain and punctured the container with a knife to prevent further use.

VCRP is a multi-faceted operation. The Community-oriented policing aspect is vital in fostering positive relationships between villages and law enforcement officers. Communities in the area have repeatedly asked law enforcement to rid their villages of alcohol and violence. However, in many instances in the past and present, the people in the villages were unwilling to step forward with good tips that are needed to develop cases. By meeting with community leaders, school officials and the people living in the villages, more and more individuals realize they have to be apart of the process to reach the goal. Individuals are stepping forward more than ever to be a part of a working solution.

Alaska State Troopers and Deputy U.S. Marshals snapped a group shot in front of AST's two Caravans before heading into the field. The Caravans were used extensively during the operation to transport prisoners and officers.

A focus of the program was contacting all individuals required to register with the Sex Offender and Child Kidnapper Registry to verify compliancy status. During the sweep, 71 offenders were contacted. The contacts resulted in 16 arrests of individuals for being out of compliance. During the contacts, photos were taken of the offenders along with their home coordinates being logged and documented. Holding offenders accountable is one way for communities to safeguard families.

Trooper Josh Cook and a Deputy U.S. Marshal review paperwork before making contact with Sex Offenders and individuals on probation in Kotlik, AK.

Individuals on probation were contacted as apart of VCRP to verify their compliance regarding court-imposed conditions. The contacts were mostly positive and individuals were forthcoming and friendly during their visits. There were a few contacts that didn't go so smoothly. The very first contact of the operation resulted in a man jumping out a back window in an attempt to avoid law enforcement. One of the Marshals slipped on the ice while pursuing him. After a brief chase, and getting some help from witnesses in locating the man, the runner was taken into custody without further incident.

Yeast is one of the main ingredients for making home-brew. Troopers found an empty bag thrown away while investigating allegations of manufacturing alcohol during a case in Emmonak, AK.

More than a dozen firearms were seized during the compliancy contacts that took place in the Y-K Delta. Most of the weapons were discovered in Emmonak. It is against both state and federal law for a felon to have firearms in their possession or in their home, regardless of who owns the gun. The weapons had to be identified and logged then transported to a secure evidence holding facility in Bethel.

VCRP STATS

The Alaska Bureau of Alcohol and Drug Enforcement Investigators took advantage of the opportunity presented at VCRP to team with United States Postal Inspectors and conduct a number of drug and alcohol interdiction operations. Officers performed undercover buys as well as carried out airport and postal interdiction contacts. Their efforts produced 34 new cases, 2 felony arrests, 4 misdemeanor arrests and 2 probation arrests. In addition to the arrests, a large amount of alcohol, oxycodone and marijuana was seized.

The program was a very new experience for many of the Deputy U.S. Marshals and even some of the troopers. Due to a weather delay, initial plans had to be scrapped and re-worked. Instead of flying out to villages as the VCRP called for, some troopers and marshals jumped on snowmachines and headed out to villages relatively close to the hub village of Bethel. It was the first time riding a snow machine for many of the marshals.

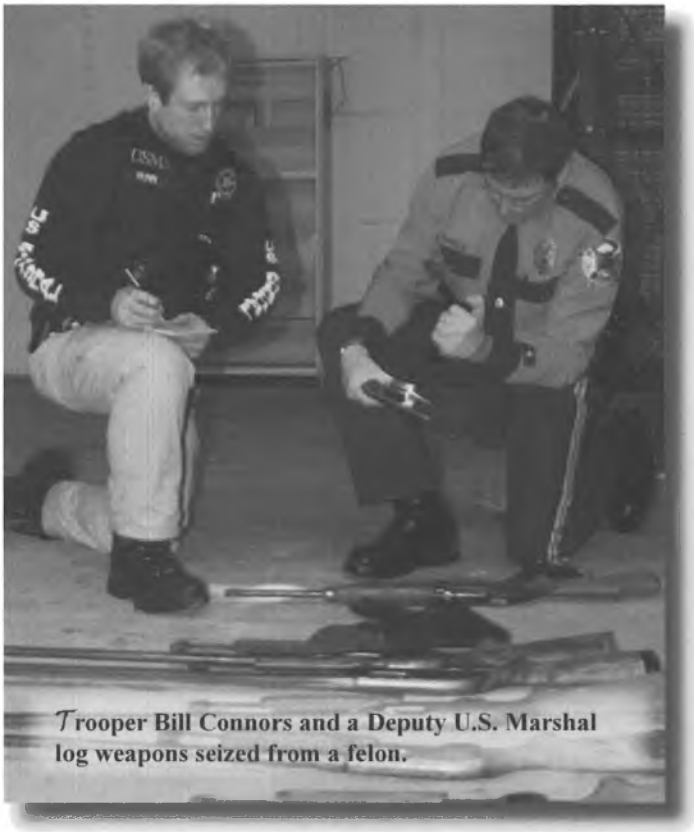
Trooper Andy Evarts, currently stationed in Fairbanks, has flown for AST for years and has logged many hours in the cockpits of a variety of planes. The VCRP took him to a region he

Before heading out to another village for compliancy checks troopers were called on to respond to a domestic violence incident in Emmonak. Troopers responded to a number of assaults in progess while out in Rural Alaska.

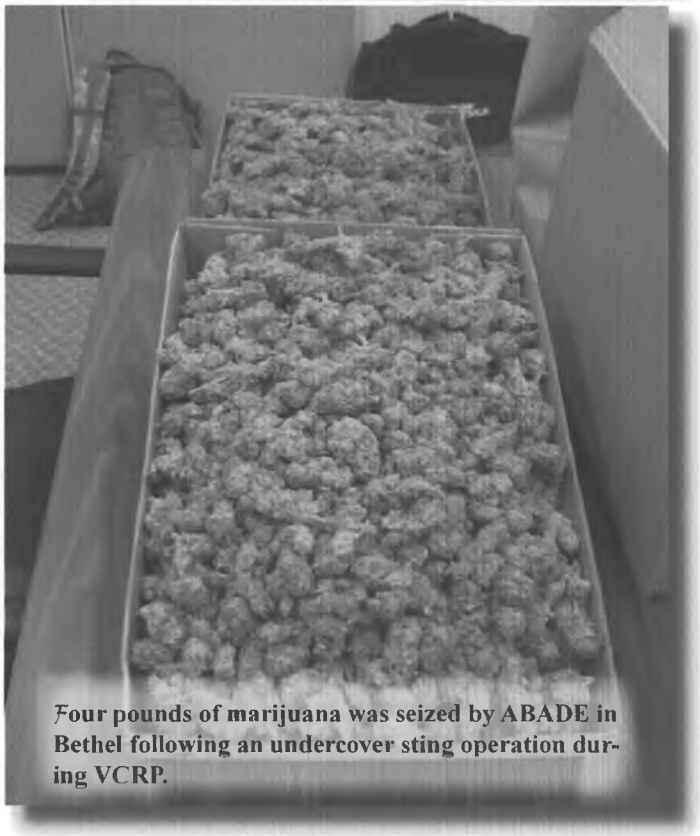
hadn't seen before.

The VCRP was a very unique program. Even though the U.S. Marshals and the Alaska State Troopers have had a strong, positive working relationship, this operation was the first of its kind with the two agencies pairing together in two-man teams and enforcing the laws side-by-side. Many other agencies were crucial in the success of VCRP by providing support, resources and manpower. The reach and scope of VCRP was enormous and the communities effected by the programs were grateful for the concentrated efforts put forth to help the villages re-gain control of the violence, alcohol and drug issues that cause turmoil.

Trooper Bill Conners has some difficulty finding and making out a serial number on a rifle seized from a felon.



Trooper Bill Connors and a Deputy U.S. Marshal log weapons seized from a felon.



Four pounds of marijuana was seized by ABADE in Bethel following an undercover sting operation during VCRP.

June 13, 2011

Western Alaska Flooded with Books

(BETHEL, Alaska) – On Tuesday June 7, 2011, Badges-and-Books launched its first patrol on the Lower Kuskokwim River. Alaska State Troopers, U.S. Marshal Service and the Village Public Safety Officer Program (VPSO) conducted the first of many boat patrols handing out children's books along the river systems in rural Alaska. The focus of this program was to visit traditional summer fish camps and contact as many children in those camps as possible. During the contacts Alaska State Troopers, U.S. Marshals, and VPSOs handed out reading books. The objective is to build positive relations and provide opportunities for rural children of Alaska to get to know law enforcement in a different light.

Photo: Chief Deputy Marshal Marc Otte, Capt. Steven Arlow, Trooper Perry Barr, Deputy Marshal Sonny Caudill (taking the Photo) with children from the village of Tuluksak, AK receiving badges-and-books gifts.

The patrol started in Bethel, AK and continued up the Kuskokwim river system and sloughs to Tuluksak, AK. Though fish camps were not heavily populated yet the program had some success in a few fish camps. A stop in Tuluksak provided for several children to visit the U.S. Marshal's patrol boat. Officers handed out books, snacks and other small law enforcement momentums.

The day's event was received well by the children and parents and will continue throughout the summer on both the Yukon/Kuskokwim Delta's.

Photo: Young boy from Kwethluk,AK at fish camp on the Kuskokwim reading after receiving a badges-and-books gift.

Books N Badges is a cooperative effort between Alaska State Troopers and the United States Marshals Service. The program would not be successful without the generous support of GCI and Northern Air Cargo.

Dear Senator Dyson:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing Senate Concurrent Resolution 19, a resolution proclaiming September 24, 2012 to be United States Marshals Day.

The APOA State Board of Directors recently reviewed this resolution and unanimously supports this resolution.

We thank you for your recognition of this illustrious law enforcement organization and its members for their contribution to the State of Alaska. Please contact the APOA office in Anchorage at 277-0515, if there is anything our organization can do to assist you in your work for our State.

Sincerely,

John Lucking, Jr.

SCR 20: Decoration of Honor
Sponsor Statement

This resolution awards the Alaska Decoration of Honor to twenty-five individuals who were killed in the line of duty while honorably serving our state and country in 2011.

The Alaska Decoration of Honor was established in 2007 to award military service members from Alaska, or those service members deployed while stationed in Alaska, who were killed in action or in support of combat action.

The Legislature must authorize the award by resolution so the decoration can be presented to the recipients' survivors. In 2008, the Legislature awarded the medal to 171 individuals dating back to statehood. From 2009 – 2010 we authorized the award for another thirty-six individuals.

Passage of SCR 20 will allow the families of these twenty-five individuals to receive the decoration in honor of their loved ones' sacrifice. While it is always our hope that all those in uniform will return home safely, the reality is a few will not and it is important we recognize and honor their service.

Dear Senator Wielechowski:

Senate Joint Resolution 4 has been read and referred to your State Affairs Committee for your members' consideration. By way of this letter, I am requesting a hearing on the resolution as soon as possible. As indicated by the resolution's title and content – honoring Ronald Reagan on the occasion of his 100th birthday, which is this coming February 6 – an expedited hearing would be in order and would be much appreciated.

If you or your committee staff have any questions regarding SJR 4, please contact John Manly of my staff at 465-5369.

Thank you for your consideration of this request for an expedited hearing.

Sincerely,

Senator Charlie Huggins

Constitutional Amendment to Modify the Constitutional Budget Reserve
SPONSOR STATEMENT

"A penny saved is a penny earned." – Benjamin Franklin

For the past five years the state has experienced large oil revenue surpluses, which have put the State in the enviable position of having the largest amount of money in savings in the nation ($16 billion), not including the Permanent Fund. This constitutional amendment will ensure that we continue to save for our future when we have large surpluses.

The Constitutional Budget Reserve (CBR) was established in 1991 in order to serve as a "rainy day" fund to help balance the state budget in times of budget deficits. In addition to investment returns and one time legislative appropriations, the only additions to the CBR are through settlement payments through litigation involving natural resources. While the CBR worked as a rainy day fund during budget deficits and was replenished after a few years of high oil surpluses, the CBR does not require savings during years with high oil revenues, which we as a state are facing today.

SJR 10 would cap the amount of unrestricted oil revenue that can be spent in a given year at $6 billion adjusted for inflation, and put 2/3 of the money above the cap into the CBR. This would not only require that the legislature save more money in times of high oil revenues, but would also put pressure on the legislature to restrain the growth of government, and create a more stable fiscal system.

SJR 10 would bring this constitutional amendment before the people for a statewide vote, and I urge you to support this joint resolution in order to allow Alaskans decide how best we should plan for our children's future.

Explanation of Changes of SJR 10 From Version "I" to S STA CS Version "D"

- **Page 1, line 14**: Removed "in population" to keep the $6 billion threshold from increasing too quickly.
- **Page 1, line 15:** Removed "on July 1" to allow time for officials to calculate actual annual unrestricted oil revenue.
- **Page 2, lines 7-8:** Added "that is not deposited into the permanent fund created under Section 15 of this article" to ensure that the proposed amendment will not apply to Permanent Fund royalty payments.

CS FOR SENATE JOINT RESOLUTION NO. 10(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR WIELECHOWSKI

A RESOLUTION

Proposing an amendment to the Constitution of the State of Alaska relating to deposits to the constitutional budget reserve fund from surplus oil revenue.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** Article IX, sec. 17(a), Constitution of the State of Alaska, is amended to read:

(a) There is established as a separate fund in the State treasury the budget reserve fund. Except for money deposited into the permanent fund under Section 15 of this article, **the following shall be deposited in the budget reserve fund:** all money received by the State after July 1, 1990, as a result of the termination, through settlement or otherwise, of an administrative proceeding or of litigation in a State or federal court involving mineral lease bonuses, rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments or bonuses, or involving taxes imposed on mineral income, production, or property, **and two-thirds of the difference between $6,000,000,000 adjusted by the cumulative change, derived from federal indices as prescribed by law, in inflation since July 1, 2013, and the actual annual unrestricted oil revenue as determined each year for the previous fiscal year** [SHALL BE DEPOSITED IN THE BUDGET RESERVE FUND]. Money in the

budget reserve fund shall be invested so as to yield competitive market rates to the fund. Income of the fund shall be retained in the fund. Section 7 of this article does not apply to deposits made to the fund under this subsection. Money may be appropriated from the fund only as authorized under (b) or (c) of this section. **In this subsection, "unrestricted oil revenue" means the amount received from oil lease bonuses, rentals, royalties, royalty sale proceeds, federal oil revenue sharing payments or bonuses, and taxes imposed on oil income, production, or property that is not deposited into the permanent fund created under Section 15 of this article.**

*** Sec. 2.** The amendment proposed by this resolution shall be placed before the voters of the state at the next general election in conformity with art. XIII, sec. 1, Constitution of the State of Alaska, and the election laws of the state.

SENATOR BILL WIELECHOWSKI

SJR 10: Saving for our Future

Fact Sheet

- This legislation would enhance the capacity of the Constitutional Budget Reserve (CBR) to serve as a 'rainy day' fund to help Alaska weather future fiscal and economic turmoil.

- SJR 10 would cap the amount of unrestricted oil revenue that can be spent in a given year. 2/3 of unrestricted oil revenue above $6 billion (annually adjusted for inflation) would be added to the CBR.

- Currently, there is no mechanism to add money automatically into the CBR when there are budget surpluses. Creating this mechanism ensures that savings will occur, despite short term political pressures.

- Cutting off the peaks and filling in the valleys of our oil revenue will provide greater stability.

MEMORANDUM January 11, 2012

SUBJECT: Sectional Summary of SJR 10 (Work Order No. 27-LS1091\I)

TO: Senator Bill Wielechowski
Attn: Samuel Gottstein

FROM: Lisa Moritz Kirsch
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Amends the Alaska Constitution to increase deposits to the constitutional budget reserve to two-thirds of the difference between $6 billion (adjusted annually using federal indices of population and inflation) and the annual unrestricted oil revenue. Defines "unrestricted oil revenue" as oil lease bonuses, rentals, royalties, royalty sale proceeds, federal oil revenue sharing payments or bonuses, or taxes imposed on oil income, production, or property.

Section 2. Provides that this amendment will appear on the ballot for voter approval at the next general election.

Anchorage Daily News January 8, 2012

Our View: State savings? Good idea

Some lawmakers aim to fortify reserves while surpluses last

Sen. Bill Wielechowski wants a constitutional amendment to limit state spending of unrestricted oil revenue to $6 billion a year, with two-thirds of the rest deposited in the Constitutional Budget Reserve.

Sens. Johnny Ellis, Bettye Davis, Tom Wagoner and Wielechowski want to tap Alaska's surplus for a $2 billion deposit into the Permanent Fund -- over and above the constitutional deposit requirement -- and $2 billion more to help cover the state's pension obligations. By whatever means work best -- and in whatever amounts make the most sense -- Alaska should do all of the above: cap spending of oil revenues, keep reserves strong, build the Permanent Fund and cover retirement costs.

"I think we've got an obligation to put as much money as we can into savings," Wielechowski said. He argues that talk of providing for our children and children's children is just talk unless we back it up with real money.

He's right. All of these savings mechanisms -- CBR, Permanent Fund, a proposed Alaska pension trust -- can help keep Alaska on a sound financial basis.

We're blessed. We've said if before and it bears repeating. Other states have struggled to make ends meet, laid off police and teachers and cut programs. Alaska counts its surplus in double-digit billions, last fall sent a dividend check of $1,174 to every resident and just had its credit rating raised to AAA.

While other states struggle to deal with less, our challenge is to wisely manage more. If Department of Revenue projections pan out, we'll have more than $5 billion in surplus oil money from the current fiscal year and the next. Wise management means savings. There should be broad agreement about that. The question then is what's the most effective way to save.

Wielechowski's amendment would use the authority of the state constitution to force lawmakers to save.

One legislature cannot bind a future legislature -- but the constitution can. At $6 billion (with growth allowed for population and inflation) we should have plenty of money for operations and robust capital spending before we hit the cap.

Personally, Wielechowski said, he'd like to build the CBR into a $50 billion fund that could earn enough money to help cover future state spending, making it both a reserve and an endowment. Some would argue that was the purpose of the Permanenet Fund, but politically the Permanent Fund has become all but untouchable for anything but dividends. That could change. Whether it does or not, it's a good idea to deposit some of our billions in the Permanent Fund for two reasons.

One, the deposit will put more of Alaska's wealth aside for future Alaskans. We can't settle for them the debate over the best use of Permanent Fund earnings. Our job is to make sure there's plenty to argue about. Our job is to make good on the promise of "permanent,"

turning the nonrenewable resource of oil into a renewable endowment that spans generations.

Two, while saving for the future the deposit will enhance the present and near future by putting more of Alaska's oil wealth to work now, which is likely to boost dividends.

Eat our cake and have it too? Yes, we can -- if we're smart. It's not all blue sky ahead -- federal money will diminish, we have some challenges unlike those of our neighbors in the

Lower 48, and recent history reminds us how fast reserves can burn. But Alaska has the means to spend, invest and save -- all at the same time.
We can argue about how well Alaska has done with its wealth, but Alaska has proved it knows how to save -- and the upcoming legislative session will be a good time to prove it again.

BOTTOM LINE: Let's make sure our billions outlast us.

Lawmakers will debate how much to save

Two bills would stash billions into the Alaska Permanent Fund.

By BECKY BOHRER

(01/17/12 07:33:27)

JUNEAU -- One of the big issues facing lawmakers this session will be how much to spend on immediate wants and needs and how much to save for the future.

This isn't a new debate. In recent years, majorities in the House and Senate, as well as the governor, have each taken credit for socking away money while still passing robust spending plans. For some lawmakers, however, attempts at fiscal prudence haven't gone far enough.

At least two bills pending before the Legislature -- the 2012 session opens today -- would put billions of dollars into the Alaska Permanent Fund, which is far more difficult for lawmakers to get access to than other state savings accounts. Another bill proposes a constitutional amendment that would cap spending and compel future savings.

"There's plenty of money to go around if we manage it wisely," said Sen. Johnny Ellis, D-Anchorage.

Ellis is the lead sponsor of SB142, which would move $2 billion from the Constitutional Budget Reserve Fund into the Permanent Fund. The measure would put another $2 billion from the reserve fund into a special fund intended to help address the state's pension debt. Ellis is separately proposing the creation of a pension reserve fund.

Ellis said legislation like this, which has at least one Republican co-sponsor, helps focus the conversation on saving. It's not clear how much traction the measures will get.

House Speaker Mike Chenault, R-Nikiski, said the Legislature has been doing the right thing the last several years by putting money into savings and being "somewhat frugal." But he said he doesn't think lawmakers should be mandated to put a certain amount aside, noting uncertainties about future revenues.

He said if it makes sense to put more money toward addressing the unfunded pension liability then that's what should be done. But he said lawmakers also must be careful about tying up liquid assets, as that could leave the state in a precarious financial position in the future.

A spokeswoman for Gov. Sean Parnell, Sharon Leighow, said the administration had no specific comment on the proposed legislation, pending further review. But she said Parnell has already committed to saving surplus revenue and proposed additional savings to draw from in leaner years.

"His fiscal responsibility is also demonstrated by record vetoes he exercised across the last two years," she said.

Alaska is in an enviable position among states. It didn't feel the effects of the U.S. recession nearly as much as most other states and high oil prices have helped to keep its treasury flush. As of July 1, the start of this fiscal year, Alaska had $15.9 billion in undesignated savings, a category that

includes the constitutional and statutory budget reserve funds and Permanent Fund earnings reserve account. Total market value of the Permanent Fund currently stands at about $39 billion.

But challenges lie ahead. The state's economy relies heavily on oil production and federal funding. Oil production has been declining and federal funding is expected to diminish, as Congress faces a massive deficit. Then there's the pension issue. The state is facing an estimated $11 billion unfunded pension liability.

Parnell has proposed cutting oil production taxes as a way to boost exploration and production, but his plan faces a tough road in the Senate.

Ellis' bill would be a one-time deal, as would a proposal by Rep. Mike Doogan, D-Anchorage, which would take $10 billion from the constitutional budget reserve and put that money into the Permanent Fund. Adding to the principal of the Permanent Fund would likely boost over time the size of the dividend that Alaskans receive. The last time the Legislature made a transfer from outside the Permanent Fund was 1985 -- and it was $300 million.

The state constitution would have to be amended for lawmakers to access the Permanent Fund principal.

The proposed constitutional amendment, by Sen. Bill Wielechowski, D-Anchorage, would be perpetual, capping at $6 billion the amount of unrestricted oil revenue that could be spent in a year and requiring that at least two-thirds of the money above the cap be put into the constitutional budget reserve. (The cap would be adjusted for inflation and population growth.)

If the measure passes the Legislature, Alaskans will get a chance to vote on it.

"I think this will be a big point this year in the Legislature because we've got a lot of money and want to make sure we don't blow it all," Wielechowski said.

Ellis said that over the last five years, about $11 billion has been put into the constitutional and statutory budget reserve funds. He credits the Senate's bipartisan majority with leading the way, noting that several years ago, senators had buttons made declaring that they were on a "savings spree."

Doogan said there's been more talk about saving recently but he argues that neither the Legislature nor the governor is taking the issue more seriously, noting the continued growth in Alaska's operating budget. Parnell has blamed recent year increases in large part on formula-driven programs, like education and Medicaid.

Doogan laughed when asked if he thought his bill, which was introduced last year, would get a hearing.

"The impetus is to spend money, not to save money," he said. "Politicians talking about saving money is a good thing, but I don't see that happening."

New constitutional proposal aimed at boosting savings

January 5, 2012

By Pat Forgey

JUNEAU EMPIRE
Alaska should be saving more for the future, a state senator says, and he's going to introduce legislation this year to try to force that to happen. At the same time, Gov. Sean Parnell wants to reduce how much Alaska makes from oil taxes, and is continuing to advocate for cuts.

Sen. Bill Wielechowski, D-Anchorage, said his proposed constitutional amendment is not a challenge to Parnell, who he praised for supporting more savings. Instead, he said, it is intended to highlight the fact that Alaska is consuming a limited oil resource.

Wielechowski said it is an idea that sounds difficult, but is getting some interest in the Legislature.

"I think there's a growing consensus among legislators that it is something we need to talk about," he said. "I know that it is something that I've thought a lot about."

Wielechowski proposed that state spending of unrestricted general fund revenue be capped at $6 billion, indexed for inflation and population growth.

Any leftover unspent money would then go into the voter-created Constitutional Budget Reserve (CBR). That's a hard-to-access state savings account that legislators can only dip into if they have overwhelming support.

"It forces savings into the CBR," Wielechowski said.

To do that, Wielechowski said, would take amending the Alaska Constitution. To start the process would take approval of two-thirds of the members of the Senate and House of Representatives, and then approval by voters in 2012.

Were his proposal in place this year it would likely force additional savings of $1.4 billion, he said.

Parnell spokeswoman Sharon Leighow didn't comment directly on Wielechowski's proposal, but said the governor has already committed to saving surplus revenue and holding down spending.

"The governor proposes to put billions in savings this year to draw from in more lean years. His fiscal responsibility is also demonstrated by record vetoes he exercised across the last two years," she said.

Wielechowski said he's asked the Legislative Finance Division to develop estimates of what the financial impact of such a measure would have been had it been in place over the last few years, and what impact it would have in the future.

"We've been good in recent years as far as savings go," he said.

In 2008, the Alaska Legislature, at the behest of then-Gov. Sarah Palin, added $1,200 to each Permanent Fund Dividend, both to share the state's oil proceeds with the public and defray the cost of the suddenly much higher gas and oil prices.

Wielechowski said he didn't know whether that extra payment would have been allowed under his proposal, and it would be up to the Legislative Finance Division to answer that question.

FALL 2009

3. The Constitutional Budget Reserve Fund: Its Purpose, History and Use

Boom and Bust History of Natural Resource Revenues

For all of recorded history, Alaska has been a resource extraction state. From sea otter fur to timber, to gold, and finally to oil and natural gas, Alaskans have relied on natural resources as the major economic driver in the state. Because of its economic dependence on natural resources, Alaska has had a long history of boom and bust cycles.

As early as 1778, Captain Cook observed that traders would likely find a lucrative market for sea otter pelts or "sea-beaver" as they were called at the time. In fact, Captain Cook went so far as to call the sea otter pelts "soft gold."[1] Fur from sea otters and seals did indeed become a major source of revenue for Alaskan traders. Yet less than fifty years after Captain Cook correctly predicted the value of the sea otter trade in Alaska, a "fur boom" ensued and sea otters were hunted to virtual extinction.[2] This pattern of discovery of a resource in commercial quantities, followed by a subsequent rush to harvest the resource and ultimately the depletion of the resource, sadly played out again and again in Alaska over the next hundred years. Gold caused the next natural major resource boom for Alaska only to crash in the early 1940s. Fishing, specifically salmon, was a leading source of revenue for the Alaskan economy during World War II.

Another significant source of revenue in Alaska is federal spending, especially military spending. During World War II, over a billion dollars in federal money flowed into the state over a relatively short period of time, leading some to refer to the period as a "defense rush." Yet Alaska experienced a painful contraction within a few years of the end of World War II.

While federal revenues were flowing into the state at a record pace, tax revenues from the two leading sources of government revenue, fishing and mining, were dropping. Revenues from fishing and mining dropped so dramatically in the 1940s that by 1948, alcohol taxes had overtaken fishing and mining to become Alaska's main source of revenue.[3] At the same time, spending for state services skyrocketed, leaving Alaska with a multi-million dollar budget shortfall in 1947.

[2] ibid.
[3] Cole, Terrance. *Blinded by Riches: The Permanent Funding Problem and the Prudhoe Bay Effect.* University of Alaska Institute of Social and Economic Research. Anchorage, Alaska, 2004.

Over the years there were numerous discussions of the need to stabilize revenues and protect Alaska from the boom and bust cycles associated with reliance on natural resources, but there never seemed to be enough of a surplus or a willingness to save until oil was discovered in Alaska in world-class quantities.

The Permanent Fund

By the late 1970s, numerous groups and individuals had pointed out the need for Alaska to establish a savings fund to protect against swings in commodity prices for natural resources. As early as 1941, then Territorial Governor Ernest Gruening called for a budget stabilization fund to guard against the revenue volatility experienced by a natural resources dependent economy.[4]

Gruening's dream of an "Alaska fund" came true in the form of the Alaska Permanent Fund. While one purpose of the Permanent Fund was arguably to create a "rainy day account" for government spending when oil revenues dwindled, it has not been used for that purpose. Former Governor Jay Hammond is credited with the idea of generating public support for protecting the Alaska Permanent Fund by paying out dividends to Alaskans. The idea has been quite effective.

While legislators may appropriate money from the earnings of the Alaska Permanent Fund for government projects, the dividend program has made any dipping into the Alaska Permanent Fund for purposes other than dividends extremely controversial.

The 1980s Bust and Impetus for CBR

In the mid-1980s, roughly a decade after the Alaska Permanent Fund was established, Alaska experienced another severe resource bust as the price of oil dropped to roughly $10 per barrel, bringing widespread foreclosures and bankruptcies to Alaska.

The 1980s bust was the same painful story Alaskans weathered through for over a century: resources flowed in and government spending grew, resources played out or values dropped and suddenly Alaskans were faced with a tremendous shortfall. As the individual income tax and several other state taxes were repealed in 1979-1980 as a result of soaring oil revenues, taxes paid by Alaskan residents plummeted. As Stephen Jackstadt and Dwight Lee noted, "real taxes paid to the state by individual Alaskans after 1980 were only 14 to 16 percent of the real taxes they paid during fiscal year 1976."[5]

Revenues were declining and state spending was expanding. Over the seven years from 1981 to 1988, state spending increased almost 2,000% with state spending representing approximately $70,000 per Alaskan.[6]

Statutory Budget Reserve

In 1986 as the Alaskan economy cratered under the pressure of $10 per barrel oil, the legislature created another "rainy day" account: the Statutory Budget Reserve. The Statutory Budget Reserve was created to cover General Fund shortfalls using "excess revenues" from more profitable years.

The Alaska Legislature seeded the Statutory Budget Reserve with the balance of the remaining General Funds at the end of fiscal year 1991, $696.3 million.[7] By fiscal year 1994, the legislature had appropriated all of the money in the Statutory Budget Reserve leaving it with a zero balance. However, in 2008 the Legislature deposited approximately $1 billion in the Statutory Budget Reserve, which remains in the account today.

The Statutory Budget Reserve served its purpose for a short period of time before lying empty for over a decade. There was concern among some state legislators that the problem with the Statutory Budget Reserve was that funds were available through a simple majority vote. Some felt the Statutory Budget Reserve was doomed to fail because the money in the fund was simply too easy to spend.

Constitutional Budget Reserve History and Passage

The statutory reserve fund alone was not sufficient to protect Alaska from declining oil production and volatile prices. In the late 1980s, Alaskan legislators began discussing the idea of creating another budget reserve to be enshrined in the Alaska Constitution. The concept of the Constitutional Budget Reserve (CBR) as we know it today (an account containing oil and

gas settlements from which appropriations generally require a three-quarter majority vote) came about as the state was considering the possibility of a large windfall from an oil settlement. Currently, CBR funds consist of revenues from the settlement of litigation over mineral taxes and royalties and the interest earned on those funds.

The legislation that created the CBR was sponsored by Senator Jan Faiks. Senator Faiks was the Chair of the Senate Judiciary Committee at the time and had just finished two years as the first female president of the Alaska State Senate from 1987 to 1988. Although Senator Faiks was the prime sponsor of the bill that created the CBR, the legislature changed the bill, which was ultimately combined with elements of a House Finance bill shepherded by Representative Kay Brown.

Originally, Senator Faiks' bill contained a number of provisions related to budgeting, one of which was labeled the Budget Stabilization Fund. Several other major sections in Faiks' bill were removed through the committee process including a constitutional spending limit to accompany the budget stabilization fund.

Today, under most circumstances the legislature can appropriate funds from the CBR only with a three-quarters majority vote. However, it is possible to make appropriations from the CBR with a simple majority vote under certain circumstances as provided in section 17(b) of the Constitution, and the legislature did so in 2003. Withdrawals from the CBR are required to be repaid.

The CBR was established in 1991, and since that time more than a dozen pieces of legislation have been introduced that would amend or change the CBR. However, the only significant changes to the CBR have been the asset allocation and the establishment of the CBR sub-account, a separate fund invested and managed with a longer time horizon than the main fund.

The CBR has been used heavily since 1991 and its exhaustion date is regularly forecasted as part of the official fall revenue forecast each year. There have been warnings that the State of Alaska will face a "fiscal gap" when the CBR is exhausted.

CBR Legislative and Balance History

Mary Halloran of the Governor's Office of Management and Budget summed up the impetus for the legislation in her comments before the Senate Finance Committee, which ultimately authorized the Constitutional Budget Reserve: "In mentioning the outstanding oil and gas litigation, [Halloran] said that, though the timeline is uncertain, it looks like the State could have some 'windfalls' during the next five years. [Halloran] said the Legislature has taken some very strong steps over the last couple of years to try to stabilize the spending limit, but there are still a number of programs 'out of control.'"[8]

Former Senator Jan Faiks recalled the passage of Senate Joint Resolution 5 (SJR 5) and creation of the CBR reserve as a bipartisan effort: "The decision was contentious because hardly anyone wanted to change the terms and conditions of the original Permanent Fund without approval from the people. So most Senators... insisted on another statewide vote and I think most House members agreed; thus, it was a bipartisan decision to propose a constitutional amendment. The Governor [Cowper] gets credit for recognizing the state had a real financial problem and he wanted to find a permanent solution. We knew the current situation of relying on the ups and downs of oil revenues was not good for either state or local governments. A bipartisan solution had to be found."[9]

Originally, SJR 5 was an updated version of a bill that had passed the Senate nearly unanimously in 1987. The bill called for a 50-30-20 distribution of the income of the Permanent Fund. Fifty percent of the Permanent Fund's earnings would have gone to the payment of dividends, thirty percent to inflation proofing and twenty percent to a budget stabilization fund. The twenty percent of earnings in Senator Faiks' bill as originally introduced eventually became the CBR as we know it today. One major piece of Senator Faiks' bill that was removed in the process was an appropriation limit. Another was a sunset clause under which the constitutional amendment would have expired after five years.

Just getting the bill out of the Senate was a challenge, even for the former Senate President Faiks. After failing to pass once and being returned to the Rules Committee on a motion by Senator Arliss Sturgulewski, SJR 5 was reported out of the Rules Committee and brought to the Senate Floor under a supplemental calendar on April 18,

[8] Testimony of Mary Halloran. 16th Alaska State Legislature, Senate Finance Committee. February 2, 1990. Transcribed by Alaska Legislative Records Dept.

[9] Faiks, Jan. "CBR." Email to Department of Revenue. November 10, 2009.

1990. The bill passed the Senate by a vote of 15-5 with Senators John Binkley and Michael Szymanski switching their votes to support passage.

Meanwhile, in the State House of Representatives, a bill with similar intent was making progress. House Joint Resolution 66 (HJR 66), while nominally sponsored by the House Finance Committee, was heavily supported by Representative Kay Brown. In fact, the legislative record describes Representative Brown as the Prime Sponsor of HJR 66. Co-Chairman of the House Finance Committee Ron Larson explained that the bill, "...evolved from the House Finance Fiscal Policy Subcommittee, chaired by Representative Brown, and was modified by the House Judiciary Committee."[10] The two bills (SJR 5 and HJR 66) finally collided in May of 1990 in the House Finance Committee.

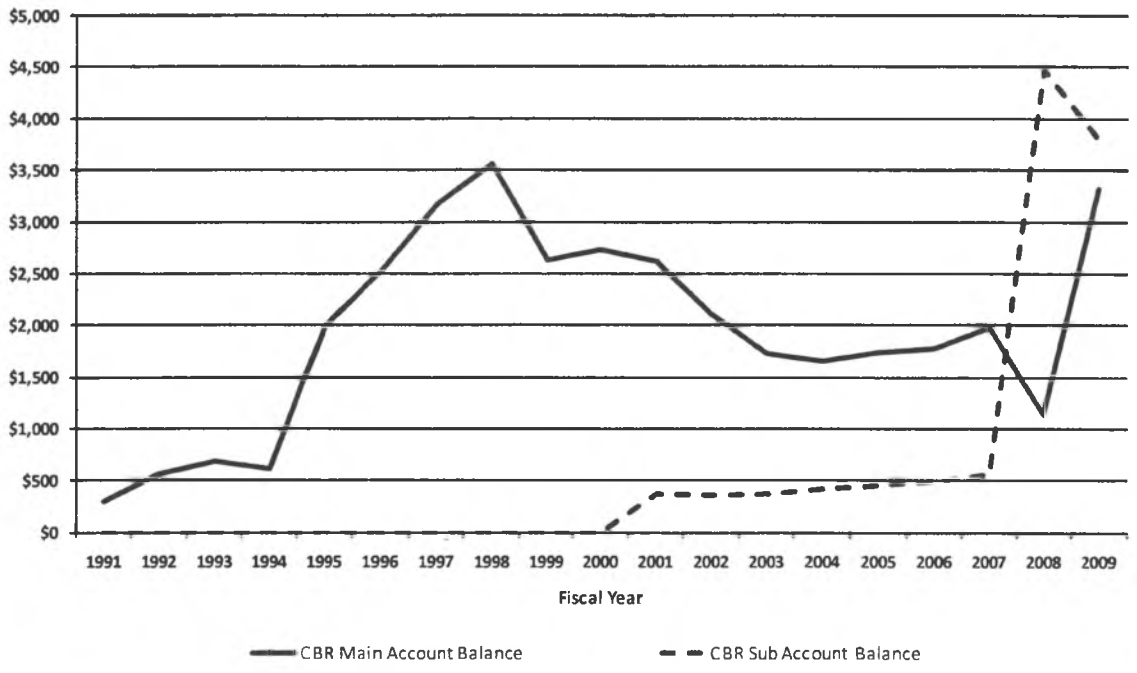
As is often the case with two pieces of similar legislation introduced separately in the House and Senate, the first bill to pass its respective house of origin typically becomes the "vehicle" or version to pass into law. In this case, SJR 5 by Senator Faiks had already passed the Senate and was assigned to the House Finance Committee for a hearing. HJR 66 never passed the House. However, the language from HJR 66 relating to the budget reserve, including the use of the term "budget reserve" rather than "budget stabilization fund" as it was referred to in SJR 5, was incorporated into SJR 5. Representative Brown testified before the House Finance Committee that the language in SJR 5 was nearly identical to the language in HJR 66 after the House Finance Committee had amended SJR 5.

In essence, SJR 5 was amended in the House to reflect the language of HJR 66. In the process, the spending limit in SJR 5 was eliminated. Numerous legislators and the Alaska Public Employees Association, a public employees union, opposed the constitutional spending limit.[11] Because the spending limit was deemed not politically viable, it was removed.

The Senate concurred with the House in a vote of 15-5 on May 8, 1990. The bill was sent to the governor on May 24, 1990, for signature. Governor Steve Cowper signed the bill almost exactly two months later on July 23, 1990.

Despite the passage of SJR 5 and the creation of the CBR, some question

Figure 3-1. Balance of the Constitutional Budget Reserve Main Account and Sub Account ($ million)



[10] Testimony of Ron Larson. 16th Alaska State Legislature, Senate Finance Committee. May 1, 1990. Transcribed by Alaska Legislative Records Dept.

remained about which funds were to be deposited into the CBR. Former Governor Cowper and a number of legislators sued then Governor Wally Hickel, Department of Revenue Commissioner Darrel Rexwinkle and the State of Alaska in 1993 to dispute the State's interpretation of "administrative proceeding." Former Governor Cowper and the legislators argued that the State had been improperly depositing funds received during the informal conference stage of dispute[12] into the General Fund when they should have been deposited into the CBR. The Alaska Superior Court ruled in favor of former Governor Cowper and required the state to properly fund the CBR, with interest and foregone earnings, by the end of the regular session of the 18th Alaska Legislature in 1994.[13]

In another instance, nearly a billion dollars in funds which should have been deposited in the CBR were spent instead. When oil companies ARCO, Unocal, BP Exploration and Chevron agreed to pay the state $1.7 billion to settle long-running disputes over payments of back taxes and royalties in 1992 and 1993, the governor and legislature appropriated over half the amount. By spending this settlement rather than saving it, the state was able to maintain overall spending and more than double capital spending, from $300 million to $616 million.[14]

Historically, funds from the CBR were usually appropriated for general purposes. However, the CBR has also been used to fund specific programs in a number of instances. For example, a 2004 legislative research report listed the following expenditures from the CBR for specific programs: expenditures for oil and gas litigation and state title to oil and gas lands, capitalization of the Alaska Mental Health Trust, Y2K assessment, compliance, and remediation, and establishment of the Power Cost Equalization endowment fund.[15]

Figure 3-1 illustrates the history of the balances in the Constitutional Budget Reserve and the sub-account of the CBR from the first deposit through fiscal year 2009. Figures 3-2 and 3-3 illustrate the balance of each the Constitutional Budget Reserve and the Constitutional Budget Reserve sub-account with contributions and withdrawals by year. Figure 3-4 presents this information in tabular form.

CBR as a Stabilization Fund or Alternative to Hedging

The CBR as it exists today functions as a budget stabilization fund in the same manner as funds in many other states and oil producing nations. Like many resource producing states, the State of Alaska is exposed to tremendous commodity price risk. This is a difficult position for a government as expenses typically cannot be scaled back as quickly as revenues fall.

As a result of commodity price exposure, a number of resource producing states and nations from Texas to Mexico have actively hedged oil prices. The State of Alaska has studied hedging oil prices on a number of occasions with the most detailed discussion occurring in 2002 under the direction of Department of Revenue Commissioner Wilson Condon. In its hedging report, the Department of Revenue raised some concerns with using the CBR to protect the State from commodity price volatility, but also recognized the role the CBR plays in smoothing state revenues. However, because the CBR already insulates the state from the volatility of commodity prices, the report concluded that hedging oil prices was not ideal until the CBR was depleted or nearly depleted.[16]

"Alaska has not yet needed to pay the costs or take the risks of hedging its future oil revenues because our cushion against fluctuating oil prices for the past decade has been the Constitutional Budget Reserve Fund (CBRF). The fund was established a decade ago for exactly that purpose — to fill the gap between a fluctuating revenue source and a constant need for public services," wrote the Department in 2002.[17]

Conclusion

Alaska's economy has always been at the mercy of commodity production and prices. After centuries of exhilarating resource booms followed all too regularly by severe busts, the State of Alaska created a budget stabilization fund in 1990: Alaska's Constitutional Budget Reserve. The CBR was created shortly after a time of economic crisis and with a view toward several large windfall settlements for the state.

Over nearly two decades, the CBR has almost single-handedly staved off massive budget shortfalls. In some years, withdrawals from the CBR reached a billion dollars in nominal terms. Yet the CBR remains vulnerable to prolonged overspending and the potential that oil prices may fall.

While the CBR is still vulnerable to overspending, and has at times appeared on the verge of exhaustion, the fund has acted as a buffer against commodity price volatility for almost two decades and can be expected to do so for the near future.

High Oil Prices Give Alaskans a Second Chance: How Will We Use this Opportunity?

By Scott Goldsmith

Prepared for ISER 50th Anniversary Celebration
Institute of Social and Economic Research • University of Alaska Anchorage
September 2011

Think about this: 10 years ago, it looked as if Alaska was on the brink of a tough transition to a post-Prudhoe Bay economy. Oil production was half of what it had once been, the state's oil revenues were about $2 billion, financial reserves were falling, and employment in the oil industry was down. The price of Alaska oil, adjusted to today's buying power, was $27 a barrel—and that was high by historical standards.

Things have changed dramatically since then: a combination of much higher oil prices—about $115 a barrel as this paper is being written—and revisions in the way the state calculates production taxes have caused state oil revenues to skyrocket, even though oil production is down 40% since 2002. We now find ourselves in a second huge oil-revenue boom, comparable to the one in the early 1980s (Figure 1).

But Alaskans who lived through that first boom remember how fast it ended, and how the economy fell into recession overnight—which quickly focused our attention on just how important oil is to Alaska. We promised that if another boom ever came around, we'd do a better job of managing our oil resources.

We now have that unexpected second chance, and the need to act is even more pressing. For decades, oil from huge, low-cost fields on state-owned land has supported much of the economy. But that oil is dwindling, and Alaska does face a difficult transition to a post-Prudhoe Bay economy.

Petroleum will still be the foundation of the economy, but developing new petroleum resources won't be as easy as previous development, and it won't be as profitable for the state. Other resource industries and the federal government will also still be important.

But no single resource will be able to match the enormous value of Prudhoe Bay oil. To keep Alaska prosperous, the state will need to take a more active role in managing its assets, particularly its petroleum assets. Alaska's people—and the institutions put in place since statehood—will shape decisions about how to move forward. This short paper summarizes the considerable assets Alaska will bring to the transition. We hope it will help Alaskans focus on the challenge of moving past Prudhoe Bay.

Figure 1. State Oil Revenues and Average U.S. Wellhead Oil Prices Per Barrel, 1960- 2011, In Today's Buying Power (2010 Dollars)

Revenues in state fiscal years (July-June) • Oil prices in calendar years

The Challenge

Two-thirds of the economic growth since statehood, as measured by jobs and income, can be traced to petroleum production, petroleum revenues, and petroleum spinoffs that have given a boost to other industries and households throughout the state.[1] Although these effects are most obvious in urban Alaska, they reach into every corner of the state—through generous public spending, low taxes, and the Permanent Fund dividend.

This prosperity has come from giant, low-cost fields—the largest being Prudhoe Bay—that the state owns on the North Slope. But now, those fields are in serious decline. As Figure 2 shows, we've used 80% of this high-revenue oil, with only about 20% of the identified 23 billion barrels of reserves remaining. Still, despite this situation, two things are currently creating a sense of complacency among Alaskans. There's a lot of petroleum employment right now, because more people are needed to squeeze the last reserves out of these fields. Also, high oil prices are bringing the state big revenues, even as production drops. Together, high employment and high prices have diverted our attention from the reality: when there is no oil left in the barrel, the associated jobs and revenues will also be gone.

And although it's impossible to predict how future events will unfold, Alaska's experience in the late 1980s—when a crash in oil prices ended the first huge oil-revenue boom—provides a glimpse of what could happen. Virtually all Alaskans were affected—by losing jobs, seeing the value of their houses plummet, or watching friends leave the state.

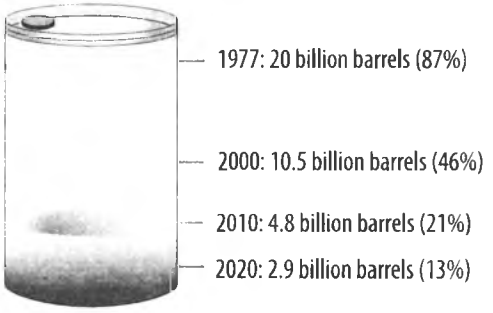
But luckily, the future doesn't have to be a repeat of the past. The state can play a significant role in shaping the transition to post-Prudhoe Alaska, by strategic use of all its assets. Alaskans need to keep in mind, however, that surprises—good and bad—will also continue to play a part in Alaska's future.

Petroleum Assets

Remaining Conventional Oil

• *The state might collect another $59 billion in revenues from existing production in the next decade, which could be used to cushion the transition—but those revenues aren't guaranteed.* The remaining 20% of the high-revenue oil from state lands is worth much more, per barrel, than the 80% already produced. That's because oil prices are so much higher today than in that past. The state revenues forecast depends on oil prices remaining high, but it also assumes that in the future production won't decline as fast, dropping just 2% a year through 2020, compared with 6% a year in the past.

Figure 2. How Much Conventional Oil Remains on State-Owned Land?



Source: Alaska Department of Natural Resources, historical production and projected future production

But the production rate on state lands—and the associated jobs and revenues—depends on investment decisions of petroleum companies. Those companies require a return on their investments consistent with opportunities elsewhere. Alaskans need to consider how to structure a tax policy that will not only bring in revenues in the short run, but encourage continued production at levels that keep the oil pipeline economically viable and future revenues flowing.

Natural Gas

• *A significant number of new jobs would be associated with finding and producing natural gas on state lands—but uncertainty in world gas markets means gas development isn't likely to happen as soon as many Alaskans hope.* There are known to be large reserves of natural gas on state lands on the North Slope. Some of that gas is already being put to use; it's reinjected into the ground to help boost production of high-value oil. The state has taken a number of steps to encourage construction of a gas pipeline, but the timeline is at least 10 years out—and today's market conditions can't be used as a basis for forecasting potential future state revenues from natural gas. It's likely gas will play a growing role in Alaska's future, but we can't rely on it as a centerpiece of a transition strategy.

Federal Lands and Non-Conventional Sources

• *Developing petroleum on federal lands onshore and offshore, as well as non-conventional sources on state lands, could produce thousands of jobs.* The potential of federal lands is huge, as are the estimated resources from unconventional sources like heavy oil. The timing of any development on federal lands is uncertain, and depends not only on economics and technology but also regulation, litigation, and legislation—over which the state has limited influence. Development of high-cost, non-conventional sources on state lands will also be affected by state tax policy. Whenever these resources are developed, they would generate employment that could match or exceed historical petroleum employment in Alaska. But potential state revenues from these resources are modest; they tend to be more remote and expensive to produce, and revenues would be shared with the federal government.

Money in the Bank

• *The state has big savings that can help pay for state government in the future, but it must continue to build those savings now.* The state currently has about $55 billion of financial assets in three accounts built on petroleum revenues—the Permanent Fund, the Constitutional Budget Reserve, and the General Fund (including but not limited to the Statutory Budget Reserve). These accounts represent the state's attempt to convert its non-sustainable oil reserves into a sustainable asset that can generate revenues long after the last drop of oil has been produced.

The size of these accounts is impressive—but even so their earnings aren't yet big enough to pay for much of state expenses—particularly since half the earnings of the largest account, the Permanent Fund, is dedicated to paying Permanent Fund dividends. But if we continue adding to those savings, they can eventually replace a substantial share of oil revenues from state lands.[2]

Other Natural Resources

• *Alaska's other natural resource industries will continue to support part of the economy—but their potential to grow is limited.* Minerals, seafood, timber, and our other natural resources, including the state's natural beauty, have always supported part of the economy.[3] With targeted public investments, appropriate regulatory policies, and other development strategies, these resource industries can continue to prosper. But their modest size, growth potential, and limited profitability mean that expecting these other natural resource industries to replace petroleum is not realistic.

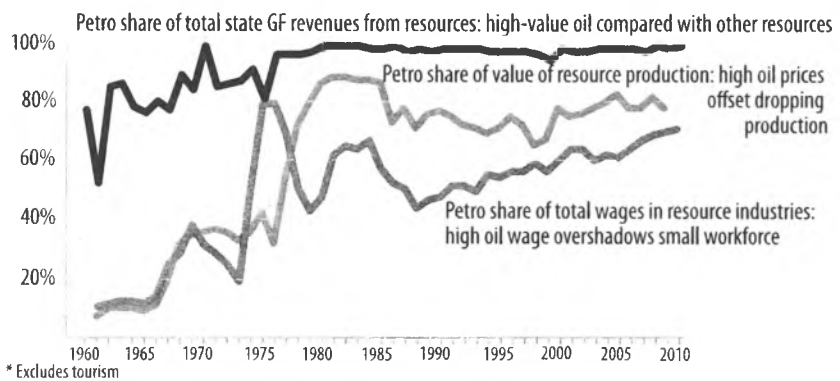
The dominance of petroleum among our natural resource industries is clear in the three measures shown in Figure 3.[4] Since 1977, petroleum has accounted for 60% of all wages paid in resource industries, 83% of the total value of resource production, and 98% of all state General Fund revenues from resource production. The figure also shows that despite continuing efforts to build on our resource base, nothing has changed petroleum's dominance since oil began flowing through the pipeline.

Many Alaskans find it hard to believe that other resources can't rival petroleum. Alaska is often described—correctly—as a storehouse of resources, waiting only for a key to unlock them. But there is no magic key. Alaska is an "island economy"—with high costs, distance from markets, and absence of scale economies. Only very valuable resources are economic to develop. Also, activities that Alaskans can readily see—like tourism—can seem more important than their dollar value indicates.

Federal Government

• *Federal spending supports an estimated one-third of jobs in Alaska, and it will continue to be important for the economy—but future federal spending won't grow as it did in the past.* A large share of Alaska's economic resilience, even as petroleum production was dropping, can be traced to growth in federal spending since the 1990s.[5] But given the federal government's budget woes, Alaska and other states are likely to see cuts—and even if new activities of the federal government were to bring new jobs, the state cannot directly tax the federal government and collect revenues, the way it does from petroleum and other private industries.

Figure 3. How Does Petroleum Contribute to Total Natural Resource Production?*



* Excludes tourism

Shaping Alaska's First 50 Years: Unique Legislation and Institutions

In 1959, the federal government owned 99% of Alaska land and controlled the natural resources. Much of the first 50 years of statehood have been shaped by new laws and institutions governing ownership and use of the land and the resources that are the foundation of the economy.[6] These laws and institutions will also provide the context for the transition to the post-Prudhoe Bay era.

Alaska Constitution (1956)

• Established a framework for the new state, but left Alaskans broad flexibility to build government structures.[7] Voters must approve any amendments.

• Reflects the importance of natural resources for Alaska, in a unique resource clause that calls for "utilization, development, and conservation" of the state's resources for the "maximum benefit of its people" and reserving fish, wildlife, and waters "for the people for common use."[8]

Alaska Statehood Act (1959)

• Changed Alaska from territory with weak powers and undeveloped or non-existent institutions to a state with the same rights and powers as all other U.S. states.

• Awarded the state authority to select 103 million acres of federal land, to provide an economic base. Those selections turned out to include North Slope land that has provided the state's oil wealth for 40 years.

1971 Alaska Native Claims Settlement Act (ANCSA) and Alaska Native Corporations

• Awarded Alaska Natives $1 billion and rights to select 44 million acres of federal land. The law called for creation of unique new business corporations—owned by Alaska Native shareholders—to manage the land and money. Some of these corporations are still struggling to be profitable. But others now rank among Alaska's biggest businesses, and are the best example of Alaska-owned businesses benefiting from resource development.

• Included a provision authorizing the U.S. Department of the Interior to close large areas to state and Alaska Native land selections and decide how much to add to parks and other national conservation areas. That led to passage of ANILCA, in 1980 (see below).

Alaska Permanent Fund (1976)

• Established after Alaskans in 1976 approved a constitutional amendment requiring at least 25% of royalties from natural resource production to be saved in a fund the legislature couldn't spend—a "permanent" fund. Analysts say the fund may not have been unique at the time, but it was certainly rare.

• Could be opened to spending through a new constitutional amendment. But the fund has a very strong constituency among Alaskans, largely because of something that is probably unequaled anywhere: Permanent Fund dividends—which are annual payments to all Alaska residents from the *earnings* of the Permanent Fund. The legislature can't spend the fund principal, but it can spend the earnings.

1980 Alaska National Interest Lands Conservation Act (ANILCA)

• Added 104 million acres of federal land to national parks, wildlife refuges, and other conservation areas, bringing the total national conservation areas in Alaska to about 150 million acres. It passed after a decade-long fight between those who wanted more land left open for development and those who wanted more kept undeveloped.

• Requires that rural Alaskans have preference for subsistence hunting and fishing on federal lands. That provision has put the state at odds with the federal government, because the Alaska Supreme Court has ruled that the resource clause of the state constitution (see above) prohibits the state from allocating resources among Alaskans based on where they live. As a consequence, the federal government has taken over from the state management of subsistence activities on federal lands.

People

Many of us who will make decisions about how to move to a post-Prudhoe Bay era weren't here when oil started flowing through the pipeline, or when an earlier generation of Alaskans made decisions that created our unique Alaska institutions. Likewise, the next generation of Alaskans—those who grow up here and those who move here later—will bear the consequences of our decisions.

The U.S. census gives us some information about how succeeding generations of Alaskans have changed the composition of the population over time. We have become not only more numerous, but older, more urban, more stable, and more ethnically and culturally diverse, particularly among younger Alaskans.

But that snapshot tells us little about who we are, and nothing about what we think is most important for a post-Prudhoe Alaska. It is useful to think about the population divided into cohorts by age, as shown in Figure 4.

All generations are influenced by shared life experiences that shape their beliefs and behavior. Alaskans in the oldest cohorts remember the struggle for statehood and the tough times during the Great Depression and World War II that fostered self-reliance in the Last Frontier. Many of the baby-boom generation came here at the start of the Prudhoe Bay era and have seen the state move from modest means to unimaginable wealth. Many younger Alaskans have lived their entire lives as rentiers—people who live on income from property or investment—with the government providing public services paid for entirely from oil wealth they had no role in acquiring.

Decision-making today is largely in the hands of older Alaskans and will be influenced by their perceptions of what Alaska is and should be. But the Alaska of the future envisioned by the younger cohorts could be a very different place, and they should also have a voice in decisions. In deciding how to move into the future, we need to think not only about ourselves, but about keeping Alaska prosperous for those generations to come.

Conclusions

The transition to a post-Prudhoe economy is the biggest challenge Alaska will face in the next 10 years. Fortunately, Alaska has a lot of potential for developing and producing significant new petroleum resources. Also, if high oil prices and other factors hold, there's a possibility the state can collect many more billions in oil revenues before the conventional reserves on state lands are used up. Alaskans can come together and use these resources, against the background of our unique institutions, to forge a smooth and successful transition.

But any number of roadblocks could derail a smooth transition. We all have a natural tendency to avoid decisions that require sacrifice in the near term to achieve a longer term goal. Obvious challenges to planning for the future include not focusing on the problem, not believing it's urgent, not understanding the issues, and not trusting government to act in the interests of the average Alaskan. Also, wishful thinking could win out over analysis based on reality.

We hope this summary will be at least one step in the direction of overcoming these challenges and keeping Alaska on track for the coming decades.

Revising the State Fiscal Plan to Account for Petroleum Wealth

by Scott Goldsmith

Web Note No. 9
May 2011

INTRODUCTION

In 2008 the Alaska Legislature passed and the governor signed into law a bill requiring the Office of Management and Budget (OMB) to prepare an annual state fiscal plan projecting state spending for 10 years and identifying the revenue sources to pay for that spending. One objective of the law was to get government and the general public thinking, discussing, and planning for the long-term fiscal health of the state in light of declining oil production.

These plans have not attracted the attention they deserve. In this Web Note we review the most recent fiscal year 2012 10-year plan and offer suggestions for improvement.

THE OMB FISCAL YEAR 2012 10-YEAR FISCAL PLAN

The fiscal plan consists of a number of scenarios, based on different assumptions about future petroleum revenues and the growth rate of General Fund spending. Each scenario tracks the BUDGET SURPLUS/SHORTFALL (difference between current revenues and expenditures) as well as TOTAL RESERVES (balance in the Constitutional and Statutory Budget Reserves). For example, "Scenario 3," depicted in the table and figure below, shows TOTAL RESERVES growing from $11.1 billion in FY11 to $19.6 billion in FY21, based on the Fall 2010 Alaska Department of Revenue forecast of General Fund revenues and a 6% growth rate in General Fund expenses.

Scenario 3: FY2012 Governor's Budget with 6% Annual Expenditure Growth

Oil Price & Production	FY 11	FY 12	FY 13	FY 14	FY 15	FY 16	FY 17	FY 18	FY 19	FY20	FY21
Fall 2010 forecast ANS West Coast ($/bbl)	$77.96	$82.67	$87.86	$92.41	$97.34	$100.08	$102.90	$105.80	$108.78	$111.84	$114.99
Fall 2010 forecast production (million bbl/d)	0.616	0.622	0.642	0.629	0.608	0.623	0.607	0.582	0.551	0.520	0.496
Revenue vs. Spending ($millions)											
General Fund Revenues[1]	$5,452.2	$5,730.3	$6,207.7	$6,787.8	$7,233.1	$7,822.4	$7,992.7	$8,060.4	$7,945.7	$7,810.7	$7,424.1
General Fund Expenses	$5,403.6	$5,446.4	$5,773.2	$6,139.6	$6,486.7	$6,876.0	$7,288.6	$7,725.5	$8,189.4	$8,680.7	$9,201.6
Budget Surplus/Shortfall	**$48.6**	**$343.9**	**$434.5**	**$648.2**	**$746.4**	**$946.5**	**$704.2**	**$334.6**			
Reserve Balances ($millions)											
CBRF Main Account Balance End of Year	$5,126.1	$5,346.9	$5,576.3	$5,814.8	$6,062.3	$6,319.7	$6,587.1	$6,864.2	$7,153.7	$7,453.7	$7,765.4
CBRF Subaccount Balance End of Year	$4,890.7	$5,242.2	$5,618.9	$6,022.7	$6,455.5	$6,919.4	$7,416.7	$7,949.6	$8,520.9	$9,133.3	$9,789.8
CBRF Total	**$10,016.8**	**$10,589.0**	**$11,195.2**	**$11,837.5**	**$12,517.8**	**$13,239.1**	**$14,003.7**	**$14,813.8**	**$15,674.6**	**$16,587.0**	**$17,555.2**
Statutory Budget Reserve Balance	$1,048.6	$1,392.4	$1,827.0	$2,475.2	$3,221.5	$4,168.0	$4,872.2	$5,206.6	$4,963.1	$3,793.0	$2,015.5
TOTAL RESERVES	**$11,065.4**	**$11,981.5**	**$13,022.1**	**$14,312.5**	**$15,739.3**	**$17,407.1**	**$18,875.9**	**$20,021.4**	**$20,637.7**	**$20,380.0**	**$19,570.6**

1 FY 2011 and FY 2012 General Fund Revenue includes: Corporate Dividends, Reappropriations and Carry Forward

Appropriations projections in the plan do not represent a commitment by the Administration to propose spending or generate revenue at a particular level in FY2011, FY2012 or any future year. The 10 year forecast shows that unanticipated budget shortfalls during the 10-year period could be filled primarily through the use of reserve funds; however, other fiscal tools including spending reductions would likely be used in addition to, or in lieu of, reserve funds.

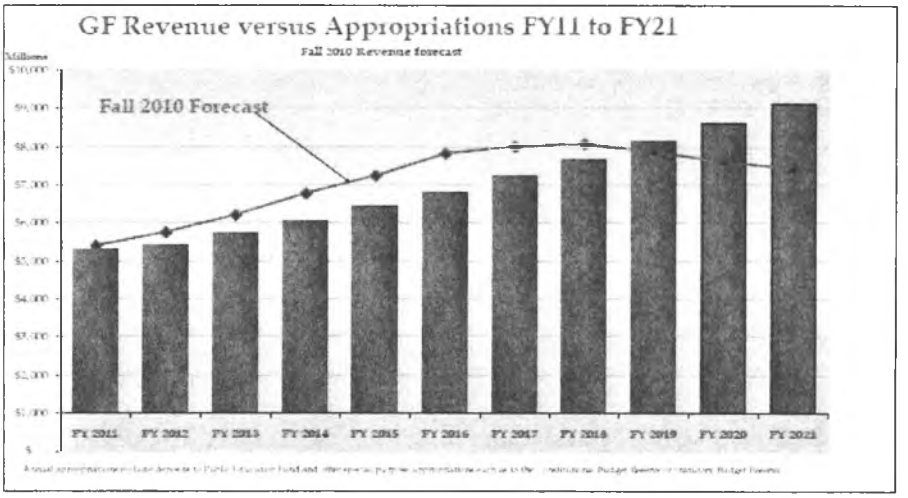
The plan will be revisited as conditions warrant.

This paper is part of ISER's *Investing for Alaska's Future* research initiative, funded by a grant from Northrim Bank.

Northrim Bank

Based on those assumptions, the state would enjoy a BUDGET SURPLUS through FY18, but growing annual expenses (the vertical bars below) would then begin to exceed revenues (solid line). An annual SHORTFALL would appear and start to grow.

Scenario 3: FY2012 Governor's Budget with 6% Annual Expenditure Growth



The BUDGET SHORTFALL occurs as soon as FY12 in the most pessimistic of the five fiscal plan scenarios but does not show up at all before FY21 in the two most optimistic of the scenarios (table below). The extreme sensitivity of state fiscal health to the growth rate of spending and future petroleum revenues is also illustrated by comparing TOTAL RESERVES in FY21 across the five scenarios. They vary from zero to $36.9 billion.

Table 1. Summary of 5 OMB Scenarios: BUDGET SHORTFALL and TOTAL RESERVES

Scenario	GF Revenues	GF Expenditure Growth Rate (Nominal $)[1]	Year of First BUDGET SHORTFALL	TOTAL RESERVES in 2021 (Billion$)
1	DOR Fall 2010	0%	-	$36.9
2	DOR Fall 2010	3%	-	$28.9
3	DOR Fall 2010	6%	2019	$19.6
4	$80 constant oil	3%	2013	$3.1
5	$70 constant oil	1%	2012	-

The state fiscal plan reflected in these scenarios is built on several elements:

- Contain growth in state spending
- Encourage oil and gas development to realize the projected revenue stream

[1] The fiscal plan is presented in nominal dollars and assumes inflation at 2.75% annually and population growth of 1% annually. So the General Fund expenditure growth rates in Scenarios 1 and 2 are negative or flat in inflation-adjusted dollars. This will be very difficult to achieve. For example, state Medicaid expenditures, one of the largest items in the budget, have been projected to grow at 8.9% annually. *See Long-Term Forecast of Medicaid Enrollment and Spending in Alaska: 2005-2025*, by the Lewin Group and ECONorthwest, 2006.

- Save all current account budget surpluses in the CBRF (Constitutional Budget Reserve) or other account
- Use accumulated surpluses to cover unanticipated revenue shortfalls or general fund expenses
- Continue Permanent Fund dividend appropriation using current formula[2]
- Reduce spending if accumulated surplus gets low or becomes depleted
- No new taxes

These plan elements are designed to ensure that public services can be provided, the economy can continue to prosper, and no fiscal burden will be passed on to the next generation of Alaskans in the form of new taxes or service cuts. But can it work?

If revenues are high and spending growth is slow, this plan should work for the next decade. And the higher than anticipated oil price in recent months has provided the state with an additional cushion to help ensure its success.

LOOKING BEYOND 10 YEARS

The problem with this approach is that petroleum revenues, which pay for at least 90% of General Fund spending, are non-sustainable. Eventually, even under the most optimistic assumptions, growing General Fund spending will overtake falling General Fund revenues from oil, the annual draw on reserves will increase, and TOTAL RESERVES will not only fall, they will disappear.

To avoid this problem, the fiscal plan suggests revenues from North Slope natural gas production after 2020 will be a "key element in providing for the future fiscal and economic stability of the state"[3] but there is no quantitative analysis to support that statement.

Let's extend OMB Scenario 3 for 10 years, out to FY32, and look at the results graphically. We assume General Fund spending (black line) continues to grow at 6% a year through FY32, nominal General Fund oil revenue after FY21 falls 5% annually (green area), and other revenues (red) grow 3% annually. The graph also shows spending from RESERVES (yellow). Gas revenues, based on an estimated wellhead value of $2 and the current tax structure, (blue) start in FY21. The projections are shown in inflation-adjusted dollars to allow comparisons of future and current values.[4]

We see that gas revenues reduce but are not large enough to eliminate the General Fund SHORTFALL. Gas revenues allow the size of the financial RESERVE to stay above $20 billion for several years, but eventually the force of growing expenditures and declining petroleum

[2] This element is not explicitly stated. Neither is the implied assumption that the Earnings Reserve of the Permanent Fund will not be available for appropriation for General Fund spending. In what follows we assume use of the Earnings Reserve to help fund the General Fund.

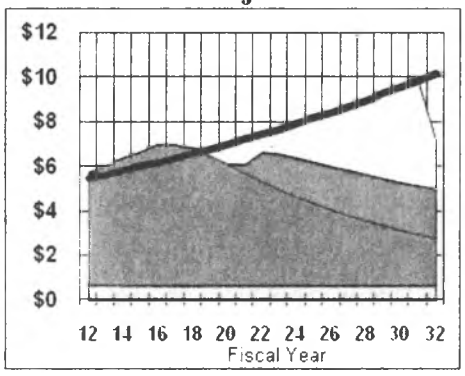
[3] OMB FY2012 10-Year Plan, Executive Summary, page 1.

[4] These projections are based on a simple spreadsheet model available from the author.

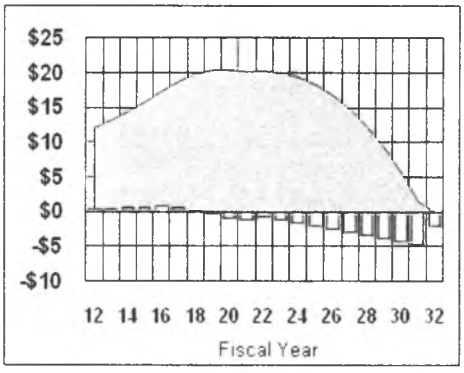
revenues leads to its rapid depletion through annual withdrawals (yellow). By FY32 the financial RESERVE is gone. By that time the annual SHORTFALL has grown to about $5 billion.

OMB FISCAL PLAN—EXTENDED (2012 Billion $)

GF Projection



Financial Reserve Balance



A SHORTFALL of $5 billion would not only devastate public spending—for education, health care, public safety, transportation, and other purposes—it would also have a ripple effect on the entire economy, resulting in a severe and long lasting recession. The prolonged recession of the mid-1980s demonstrated how sensitive the economy is to public spending and how every part of the economy suffers when government spending falls sharply.

The lesson from looking beyond this decade is that gas revenues could postpone depletion of petroleum revenues, but could not eliminate the underlying problem of non-sustainability and the fiscal gap.

DOWNSIDE RISK

What if the future does not look as the OMB Fiscal Plan describes?

The economic history of Alaska has been punctuated by pleasant surprises—like the discovery of oil at Prudhoe Bay, the oil price increase due to the Iran-Iraq war shortly after Prudhoe Bay production began, and the more recent positive oil price trend. But we need only remember the severe recession of the mid-1980s, brought about when Saudi Arabia increased oil production and drove down the price, to realize that unpleasant surprises also can and have happened.

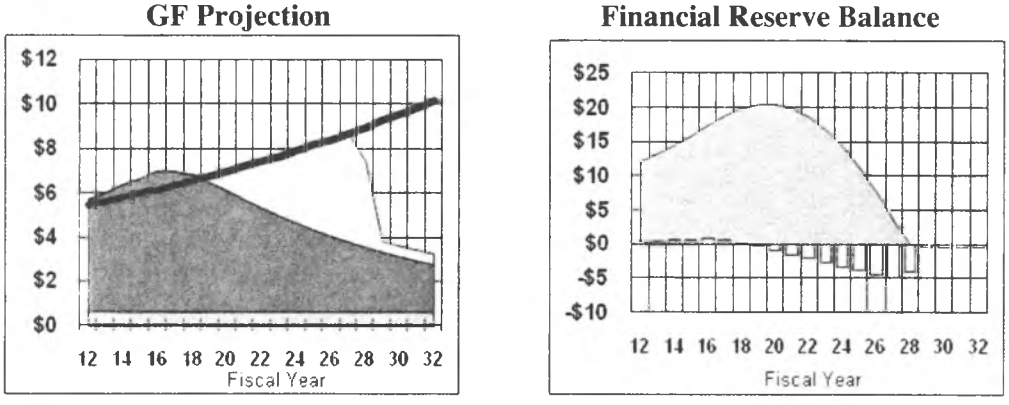
We should consider a broader range of different possible futures and how the fiscal plan would work under those conditions.

One possibility is that things will turn out better than anticipated in the OMB projection. Oil and gas revenues could end up higher than we expect. State spending could grow more slowly than projected. Under those circumstances, the reserve balance would grow more rapidly and we would be in the fortunate circumstance of having more money in the bank than expected. That outcome would be good in the near term, but with continued and growing dependence on a non-sustainable revenue source, the fiscal gap, when it appeared, could be even bigger than $5

billion. On the other hand, a delay or smaller revenues from gas commercialization; lower revenues from oil; or more rapid growth in General Fund expenditures could all have serious consequences for the fiscal future of the state within a few years.

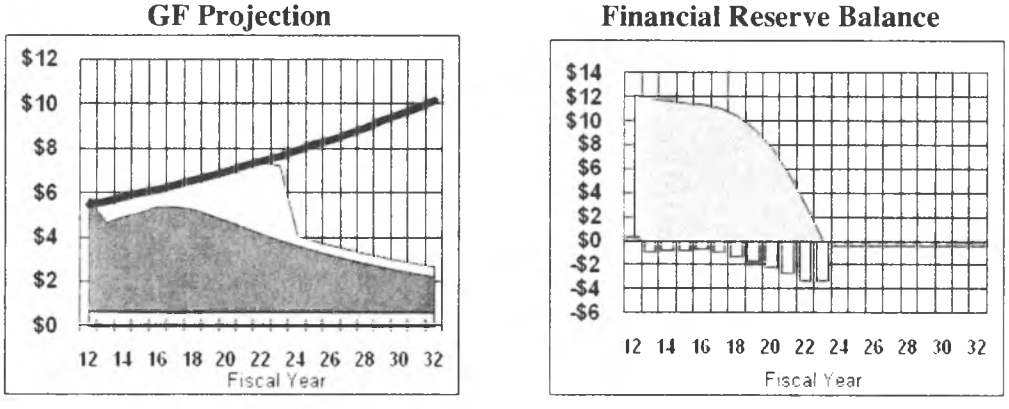
The next set of graphs shows what would happen if there were no revenues from gas. With declining General Fund oil revenues (green), the budget SHORTFALL that opens after FY18 grows and is filled using RESERVES (yellow) until they are gone in FY28. By that time the General Fund SHORTFALL has grown to more than $4 billion.[5]

OMB FISCAL PLAN—EXTENDED (2012 Billion $)
NO GASLINE



If oil revenues turn out to be 75% of the DOR Fall 2010 projection, the budget SHORTFALL begins immediately and the financial RESERVE is depleted in FY23.

OMB FISCAL PLAN—EXTENDED (2012 Billion $)
NO GASLINE
75% OF DOR OIL REVENUES



[5] Reserves used after FY28 shown in the graphs come from the portion of Permanent Fund earnings that are not used to pay the dividend or inflation proof the fund. That portion goes into the Earnings Reserve account of the Permanent Fund and is spent in the same year.

CLOSING THE FISCAL GAP

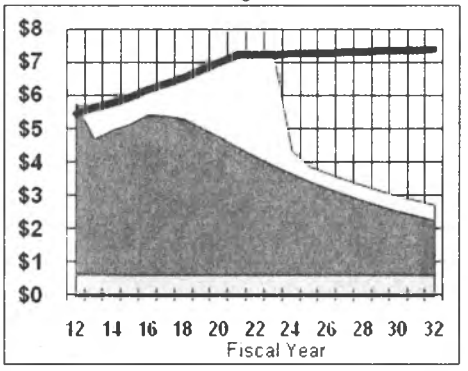
If commercialization of gas is delayed or oil revenues fall below current projections, we should be able to anticipate the need for corrective action to avoid huge budget SHORTFALLS. Three obvious possibilities are to cut spending, impose taxes, and divert the Permanent Fund dividend to the General Fund. Use of the Permanent Fund balance is a more drastic alternative.

a. Cut Spending

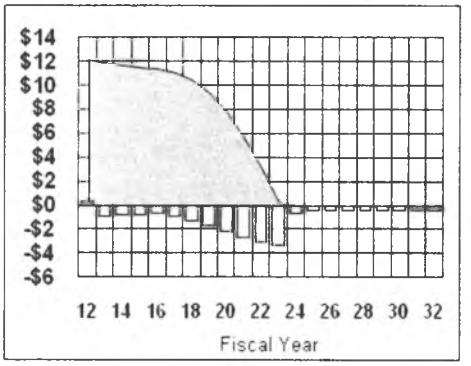
Holding General Fund spending (black line) constant in real terms after FY20 (3% annual growth) has little immediate effect, but it does marginally reduce the fiscal gap in later years.

OMB FISCAL PLAN—EXTENDED (2012 Billion $)
NO GASLINE
75% OF DOR OIL REVENUES
CUT SPENDING AFTER 2020

GF Projection



Financial Reserve Balance



b. Personal Taxes

Alaska is the only state without either a state sales tax or personal income tax. Nationally, households contribute on average about 4% of their income to the operation of state government through a combination of these taxes. If Alaska households supported state government at the same rate as households in other states, personal tax collections would be about $1,800 per capita—4% of personal income. If these taxes were imposed (shown in purple on the graphs on the following page)[6] before the financial reserves were depleted, it would postpone the arrival of the fiscal gap and cut down its size. The political challenge with this strategy is to collect tax revenues at the same time that the RESERVE holds several billion dollars.

[6] The estimate is based on an analysis by the Urban Institute-Brookings Institution Tax Policy Center of data from the U.S. census. In 2007 tax revenue from state income and sales taxes averaged 4.25% of personal income for the U.S. as a whole. It ranged from a low of 2.33% in Texas to a high of 7.88% in Hawaii. Applying the U.S. average rate to 2008 Alaska personal income of $30 billion results in an estimate of about $1.3 billion in tax revenue. Sales tax revenue would be about $600 million, and the personal income tax revenue would be about $700 million.

OMB FISCAL PLAN—EXTENDED (2012 Billion $)

c. Divert the Permanent Fund Dividend to General Fund

Diverting the entire dividend (red on the graph below) and adding personal tax revenues (purple) to cover General Fund spending would reduce the budget SHORTFALL and maintain the RESERVE (yellow) beyond FY32. But even in this case, after 20 years the RESERVE would soon be depleted because of the non-sustainability of the oil revenues.

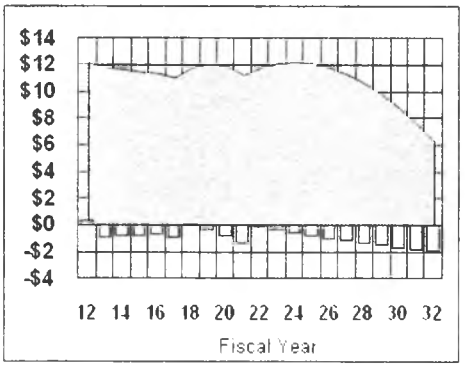
Financial Reserve Balance



d. Cash Out the Permanent Fund
Using the Permanent Fund balance to fill the budget gap would work for a number of years, but like petroleum revenues, the fund is a non-sustainable revenue source and would not provide a permanent solution to the fiscal dilemma the state faces.

FISCAL BURDEN

Looking out 20 years forces us to confront the fiscal reality that the state continues to depend on non-renewable revenues to fund government and to support the state economy.

Sooner or later spending will outrun available revenues. When that happens Alaskans will have to make do with less and pay more for what they get. Either way Alaskans at that time will bear a FISCAL BURDEN compared to the current generation.

The only way to minimize that burden is to save more current revenues from non-renewable petroleum production, but how can we decide how much saving is enough?

WEALTH PRESERVATION: THE MAXIMUM SUSTAINABLE YIELD

If we are serious about being able to fund necessary public services in the future without imposing a FISCAL BURDEN on future generations, we should save enough out of current revenues from non-renewable sources to maintain the real per capita value of our wealth. But because current petroleum revenues fluctuate from year to year, it is easier to turn the question on its head and ask not how much we need to save, but rather how much we can afford to spend to maintain the per person value of our wealth.

To do that we need to know the size of our petroleum wealth, including both the financial assets derived from past petroleum revenues and the value of petroleum still in the ground—the present value of future petroleum revenues.

We estimate the state's petroleum wealth as of June 30, 2010 (the beginning of fiscal year 2011) to have a value of $126 billion[7]—$45 billion held as financial assets (Table 2) and $81 billion as the present value of revenues yet to be collected from future oil and gas production (Table 3). This estimate of future revenues relies primarily on the Fall 2010 Alaska Department of Revenue projection.

[7] See ISER Webnote No. 7, "*How Much Should Alaska Save*?" available at www.iser.uaa.alaska.edu for more detail on this method of determining petroleum wealth.

Table 2. State Financial Assets as of June 30, 2010 (Billion $)

TOTAL	$45	
Permanent Fund	$33.3	Alaska Permanent Fund Corporation, 2010 Annual Financial Report
Constitutional Budget Reserve	$8.7	Alaska Department of Revenue, Treasury Division, Combined Schedule of Invested Assets, June 30, 2010
Statutory Budget Reserve	$1	Alaska Department of Revenue, Tax Division, Revenue Sources, Fall 2009
General Fund	$2	Author estimate
Other	-	

Source: ISER Web Note 7, *How Much Should Alaska Save?*
Note: Cash in the General Fund is a rough measure of the share of the General Fund that is not in restricted accounts (of which the Statutory Budget Reserve is one) and is not necessary to meet the cash flow requirements of the state. For completeness we show an "Other" category, which would consist of other unrestricted financial assets that could be appropriated to support state spending.

Table 3. Present Value of State Petroleum Revenues Yet to be Collected (Billion $)

Total Petroleum	$81
Oil	$74
State Land—North Slope 2011-2020	$45
State Land—North Slope 2021+	$27
State Land—Other Locations	-
State Land—Heavy Oil	$1
Federal NPRA	-
Federal OCS	$1
Federal ANWR	-
Gas	$7

Source: ISER Web Note 7, *How Much Should Alaska Save?*
Author estimate, based largely on Alaska Department of Revenue projections. Future revenues discounted at 5% real. Includes royalties paid into Permanent Fund.

A wealth portfolio of $126 billion should be able to generate annual earnings, after inflation, of $6.3 billion if it can achieve a real rate of return of 5%—the target earnings for the Alaska Permanent Fund. With a stable state population, we could spend the entire earnings of $6.3 billion each year and still maintain the value of our wealth for future generations to share. But since the population is increasing about 1% annually, we would need to reinvest 1% of the earnings back into the portfolio in order to maintain per capita value. Then the wealth portfolio would be growing over time at the same rate as population.[8] After that reinvestment the MAXIMUM SUSTAINABLE YIELD from the portfolio would be $5.04 billion.[9] The calculation is shown in Table 4.

[8] This is a simple version of what is known to economists as the Hartwick rule.

[9] It could also be called the BENCHMARK DRAW.

Table 4. MAXIMUM SUSTAINABLE YIELD: FY 2011 (Billion $)

PETROLEUM WEALTH	$ 126
Real Earnings @ 5%	$ 6.30
Reinvest for Population Growth @ 1%	$ 1.26
MAXIMUM SUSTAINABLE YIELD	**$ 5.04**

Over time, the MAXIMUM SUSTAINABLE YIELD would need to grow with the population, keeping real per capita yield constant at the current level of $7,100, based on a population of 710 thousand.)

The MAXIMUM SUSTAINABLE YIELD is the annual amount that could be spent for all purposes—government programs and the Permanent Fund dividend—from the entire petroleum wealth portfolio, including current petroleum revenues and earnings on all financial assets.

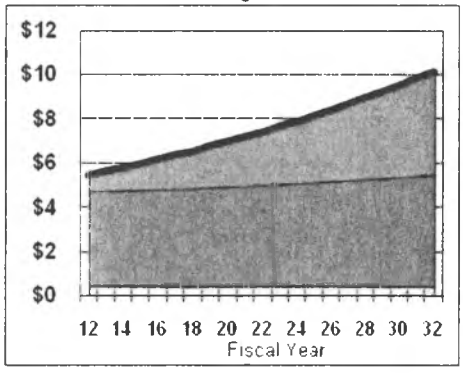
REVISING THE FISCAL PLAN TO TRACK WEALTH PRESERVATION

If we incorporated the objective of wealth preservation into the state fiscal plan, the sum of spending from three sources could not exceed the MAXIMUM SUSTAINABLE YIELD. These sources would be spending from the Permanent Fund, spending from other financial assets, and spending from current petroleum revenues. Revenues from recurring sources would fill any shortfall between total spending and the MAXIMUM SUSTAINABLE YIELD.

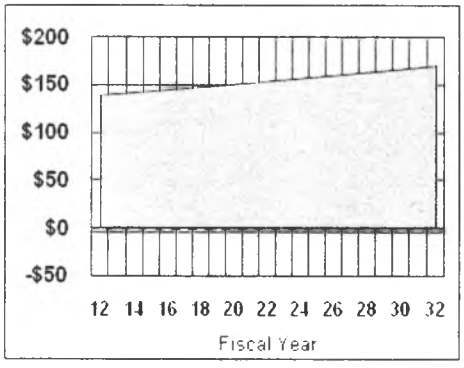
The fiscal plan would look like the next set of graphs, which assume 6% annual growth in General Fund spending (black line) and continuation of the current policies regarding the Permanent Fund and payment of the dividend. The MAXIMUM SUSTAINABLE YIELD remaining after paying the dividend becomes income to the General Fund, shown in green. The difference between current General Fund spending and revenue from the MAXIMUM SUSTAINABLE YIELD (blue area) must come from recurring revenue sources.[10]

REVISED OMB FISCAL PLAN (2012 Billion $)

GF Projection



Petroleum Wealth Balance



[10] The small red bar at the bottom is current non-petroleum General Fund revenue.

The entire petroleum wealth of the state is shown at the right; it includes all financial assets as well as the expected revenues from future petroleum production. The wealth grows over time through reinvestment of earnings at the same rate as population growth. The MAXIMUM SUSTAINABLE YIELD is the row of small yellow bars.

Adhering to this plan would ensure that petroleum wealth would be shared across generations and that the cost of spending on public programs above the MAXIMUM SUSTAINABLE YIELD level would be borne by those who benefit from that spending.[11]

MONITORING HOW WE'RE DOING

We can monitor how we're doing in meeting the objective of wealth preservation—without redoing the state fiscal plan—by comparing actual spending from wealth in the state fiscal plan to the MAXIMUM SUSTAINABLE YIELD level of spending. If we are spending more, then our wealth per capita is falling. If we are spending less, our wealth per capita is growing.

Table 5 shows estimated actual spending from petroleum wealth in FY12 to be about $6.1 billion. This consists of the General Fund oil revenues that will be spent, the General Fund investment earnings that will be spent, and the Permanent Fund Dividend.[12]

Table 5. FY2012 PROJECTED PETROLEUM WEALTH SPENDING (Billion $)

TOTAL	**$ 6.057**
GF Oil Revenues	$ 4.648
Minus: GF Oil Revenues Saved (Budget Surplus)	($ .094)
Plus: GF Investment Earnings	$ .183
General Fund	**$4.737**
Permanent Fund Dividend*	**$ 1.320**
Based on FY 2011 10-Year Fiscal Projection *Author Estimate for CY 2011 Distribution	

Estimated actual spending exceeds the MAXIMUM SUSTAINABLE YIELD by about $1.1 billion (Table 6). This is the amount by which our petroleum wealth is falling and also the amount of the FISCAL BURDEN passed on to future generations.

Table 6. Tracking FY2012 Wealth Preservation Performance (Billion $)

PROJECTED ACTUAL DRAW	$6.1
MAXIMUM SUSTAINABLE YIELD	$5.0
EROSION OF WEALTH	**$ 1.1**

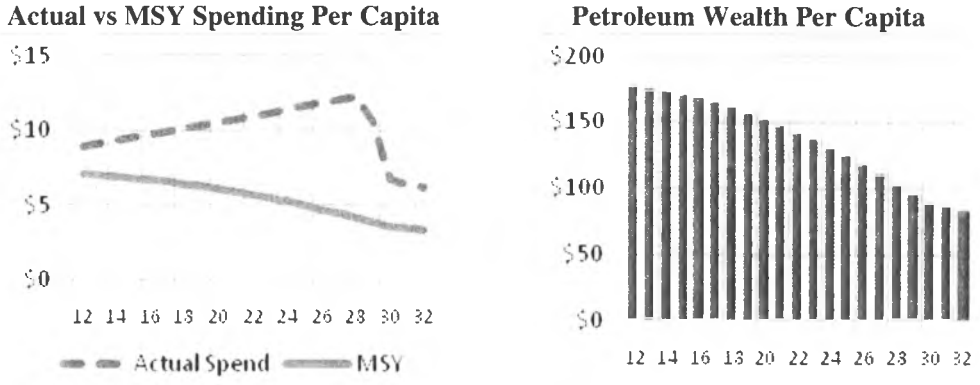
Because of the erosion of wealth, the MAXIMUM SUSTAINANABLE YIELD would be smaller next year. The decline would be small, but if the annual draws continued to exceed the

[11] In this way it is like the Norwegian fiscal model which consciously attempts to balance current and future generation needs.

[12] The actual draw will not be known until the end of the fiscal year.

MAXIMUM SUSTAINABLE YIELD the erosion of wealth would continue at an increasing rate. This can be seen in the next two graphs. The first shows the diverging paths of real per capita spending (rising)[13] and real per capita MAXIMUM SUSTAINABLE YIELD (falling). The gap each year (left-hand graph) is the growing FISCAL BURDEN. The second graph shows real per capita petroleum wealth, declining over time.

FY2011 OMB 10-YEAR FISCAL PROJECTION (2012$)
MONITORING WEALTH PRESERVATION (Thousand $)



FACTORING IN UNCERTAINTY AND CHANGING CONDITIONS

The MAXIMUM SUSTAINABLE YIELD can only be a general guideline for sustainability, because it will constantly change due to new forecasts of future petroleum revenues,[14] variations in the rate of population growth, or changes in the discount rate. But because we have some idea of the range within which these variables are likely to fall, the idea of MAXIMUM SUSTAINABLE YIELD can still help inform state fiscal policy. Based on this knowledge we can estimate that the current range for the MAXIMUM SUSTAINABLE YIELD is about $1 billion below and $1 billion above the point estimate of $5 billion.

The next figure shows that MAXIMUM SUSTAINABLE YIELD is not particularly sensitive to variations in the estimate of future petroleum revenues. The sloping lines indicate MAXIMUM SUSTAINABLE YIELD for different levels of estimated future petroleum revenues and rates of population growth. The lowest line, based on population growth of 1% annually, shows that if petroleum revenues have a value of $81 billion—our current estimate—the MAXIMUM SUSTAINABLE YIELD is $5 billion. The value of future petroleum revenues would need to be more than $105 billion before the MAXIMUM SUSTAINABLE YIELD increased to $6 billion. That would still be less than current spending from petroleum wealth.[15]

---

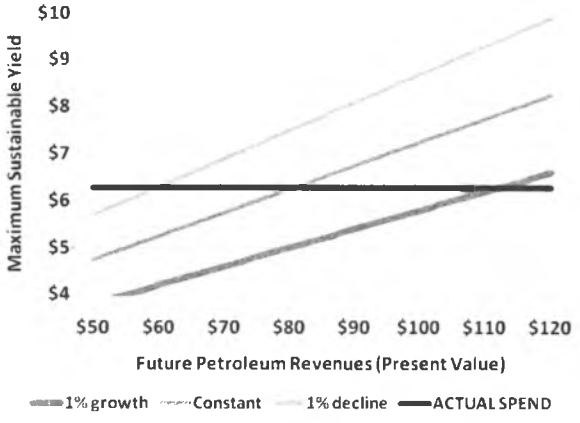
[13] The line drops off when the financial assets have all been spent.

[14] We know the exact value of petroleum wealth held as financial assets at any given time.

[15] For example, based on the current market value of the Permanent Fund and the Spring 2011 Department of Revenue forecast, our petroleum wealth portfolio would be about $136 billion, consisting of $50 billion in financial assets and $86 billion in petroleum revenues not yet collected. The MAXIMUM SUSTAINABLE YIELD from a portfolio with that value would be $5.4 billion. The large change in estimated value of the petroleum wealth portfolio has a small impact on the size of the MAXIMUM SUSTAINABLE YIELD.

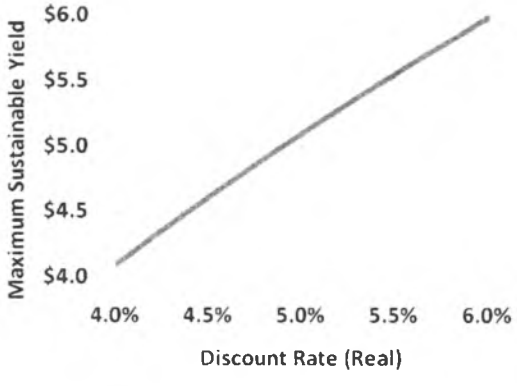
The other lines in the graph represent cases of zero population growth or negative population growth. MAXIMUM SUSTAINABLE YIELD would be significantly more if we think there will be fewer Alaskans in the future.

MAXIMUM SUSTAINABLE YIELD (2012) AS A FUNCTION OF PETROLEUM IN THE GROUND AND POPULATION GROWTH (BILLION $)



The next graph shows how the MAXIMUM SUSTAINABLE YIELD varies depending on the discount rate used to calculate the present value of future petroleum revenues and the rate of return on financial assets. At 5% the MAXIMUM SUSTAINABLE YIELD is $5 billion, but it is higher at higher discount rates and lower if the discount rate is lower.

MAXIMUM SUSTAINABLE YIELD (2012) AS A FUNCTION OF DISCOUNT RATE (REAL)



CONCLUSION

Alaska is blessed with tremendous public wealth—but because it comes from a non-sustainable source it creates special challenges for state fiscal policy. A successful plan requires that we recognize our obligation to future generations of Alaskans while at the same time providing for current needs. Although the future is sure to hold many surprises, we need to do our best to be prepared for them—both the bad and the good.

How Much Should Alaska Save?

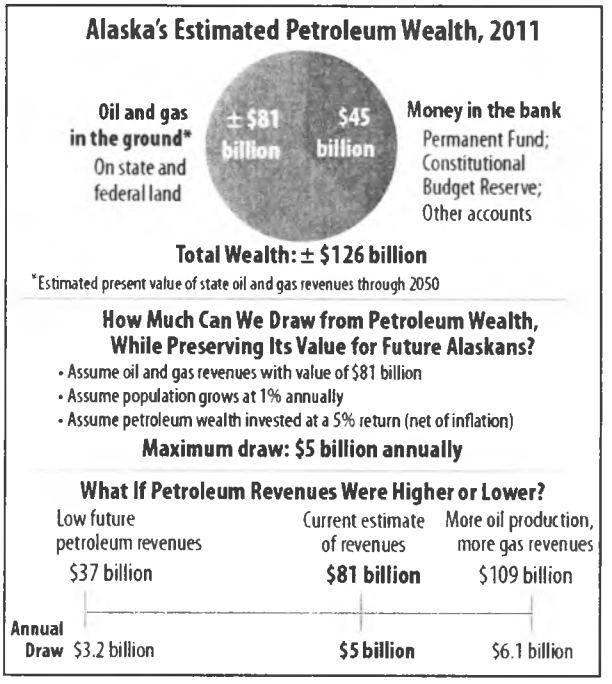
By Scott Goldsmith Web Note No. 7
February 2011

Summary

Alaska today is in the lucky position of having an estimated $126 billion in petroleum wealth—$45 billion in savings accounts derived from oil revenues, and $81 billion in future state revenues from oil and gas still in the ground--if current official state projections prove accurate.

Almost all state revenues come from oil, as they have for 30 years. But oil production is now only a third of what it once was, and analysts think that even with new discoveries and enhanced recovery, production from state lands will keep dropping. So Alaskans face a dilemma: how can we preserve this petroleum wealth for future generations, while still benefitting from it ourselves?

The answer is to limit how much we spend today from our petroleum wealth, and invest the savings in income generating assets. The income from those assets would grow over time and gradually replace declining petroleum revenues. We've already taken a major step, by depositing 24% of past oil revenues into savings accounts. Is that enough?



• *Alaska could draw up to $5.0 billion this year* and conserve its petroleum wealth at a constant value per resident. That assumes $81 billion in petroleum in the ground, state population growing at 1% a year, and annual income of 5% on state investments.

• *But the size of the wealth-preserving draw depends on actual future revenues*. It would be less if revenues projected by the Alaska Department of Revenue don't materialize, and more if production and prices are higher than currently expected. Because of this uncertainty, the level of the draw should take into account how much risk we feel comfortable with.

• *In the new fiscal year (FY2012), Alaska will draw about $5.5 billion* from petroleum wealth. The overdraw means we're eroding its value and putting a ***fiscal burden*** on future generations.

Keep in mind that how much Alaska can draw from its petroleum wealth (oil revenues and financial reserves) isn't the same as what the state can spend. But state spending above the draw from petroleum wealth should be funded by non-petroleum taxes and other revenues. Then the beneficiaries of that spending would be bearing the cost.

This research is part of ISER's *Investing for Alaska's Future* research initiative, funded by a grant from Northrim Bank.

Northrim Bank

I. Introduction

Virtually all of Alaska's state revenues come from oil, and since production is declining, we need to set some aside for future needs.[1]

The basic idea is simple. If some petroleum revenues are invested in productive assets like financial savings accounts, then income from those assets will grow over time and gradually replace declining petroleum revenues. In that way the non-sustainable petroleum tax base will be transformed into the sustainable tax base of a savings account. (See Appendix A for a simple arithmetic example of how this can work.)

Most Alaskans understand and support this idea, but it is hard to know HOW MUCH of current revenue to set aside. Future needs are unknown, and every dollar saved today means fewer dollars available to pay for the pressing needs we currently face.

Although Alaskans may never reach agreement about this tradeoff between current and future needs, we should not make the saving decision in a total vacuum and simply hope for the best. Rather, we should have some notion of a **target** —how much wealth we would like to have when we run out of petroleum, and a **rule** to guide our saving and spending decisions so that we can move towards that target.

II. The Target—Equal, Maximum, and Sustainable Benefits for All Alaskans

How much do we care about the well-being of future generations of Alaskans? As individuals many of us are likely to value our own current well-being over that of the next generation, for any number of personal reasons. We might expect to leave Alaska in the future, perhaps we have no children, or perhaps we feel the next generation should look out for themselves.

However, from the perspective of the state of Alaska, the next generation is important, and since future Alaskans are not yet here to speak for themselves, it falls to the state to look out for their interests. So when allocating public wealth, particularly from oil that belongs to all Alaskans, perhaps the state should show no favorites between current and future generations.

But equal treatment does not necessarily mean equal access to the oil wealth. For example, if we knew that the next generation of Alaskans would be twice as wealthy as we are, fairness might suggest that they should get a smaller share of the benefits of oil than we do. In that case we should use more of the oil revenues to meet current needs and save less.

But there is no guarantee than future generations of Alaskans will be better off than we are today. The current trend in the national economy suggests just the opposite might be the case. What is the likelihood that the next generation will be enjoying greater prosperity than us? No one can

[1] This is in addition to the need to set some aside for those "rainy days" when the oil price, and consequently revenues, takes a temporary dip. Unfortunately these price fluctuations have diverted our attention from the more fundamental problems discussed in this note.

answer that with confidence. But the neutral assumption seems to be that the next generation will be neither better nor worse off than we are.[2]

We also don't know how much wealth from our other natural resources will be available to the next generation. For example a dramatic increase in mining revenues could offset some of the fall in oil revenues, reducing the need to save.

But in the 50 years since Alaska became a state, revenues from our other natural resources have been insignificant compared to oil. It is safe to assume that the next generation will not be able to rely on state revenues from mining, seafood, timber, or tourism to replace those from petroleum in financing the state government. Since these other revenues are small compared with oil revenues, we can ignore them when deciding how much to save from oil revenues. (These other industries are of course important sources of jobs and income for Alaskans; we are referring here only to revenues the state derives from them.)

Because the Alaska population is growing, we need to decide whether equal treatment among generations means equal treatment for individuals. That seems reasonable, so the total benefit allotted to each generation would need to grow to maintain per capita equity across generations.

And finally, we need to decide how far into the future to look. Since the economic history of Alaska has always been based on resource development and there is little evidence that will change in the foreseeable future, we should conserve our wealth for all future generations of Alaskans.

If we value the well-being of individuals in future generations of Alaskans no more or no less than those in the current generation, if we have no strong reason to believe they will have higher incomes than current Alaskans, and if we think other natural resource wealth will remain about at its current level, then every Alaskan—current and future—should benefit equally from our petroleum wealth.[3]

That will happen, if our portfolio of petroleum wealth, no matter how it is held, grows at the same rate as population.[4] And that target gives us a rule: save enough each year so the portfolio of petroleum wealth grows at the same rate as the population.[5] Following this rule means that spending per person and petroleum wealth per person both remain constant over time, even after there are no more petroleum revenues to collect.

---

[2] We are assuming no significant growth in public sector needs per capita in the future—a strong assumption given past experience. But if there are new future needs they should be paid by the future beneficiaries.

[3] This is somewhat like the idea of "Generational Accounting", a method employed in Norway, to measure how different generations pay for and benefit from public services.

[4] This also obviously requires we do not dissipate some of our wealth before we begin to save. Equal sharing of nothing is not an attractive alternative.

[5] If wealth and spending per person are to remain constant while petroleum revenues fluctuate from year to year, the rule cannot be a constant savings RATE. The AMOUNT of saving each year must be set at the level that keeps wealth and spending per person constant.

There are many other possible targets that we could adopt, such as constant real wealth, maintenance of wealth for a fixed number of years, etc. and reasonable Alaskans can disagree on what target is the most appropriate.[6] But this target of equal and sustainable wealth for all generations of Alaskans is a clear BENCHMARK against which to measure our actual savings behavior. [7]

III. Alaska's Main Assets

The state petroleum wealth is held in two forms—money in the bank and petroleum in the ground—which together have a value of roughly $126 billon today.

III. a. Money in the Bank

The combined value of the largest financial assets—the Permanent Fund, the Constitutional Budget Reserve (CBR), the Statutory Budget Reserve, and the available balance in the General Fund—is about $45 billion (Table 1).[8]

Table 1. State Financial Assets as of June 30, 2010 (Billion $)

TOTAL	$45	
Permanent Fund	$33.3	Alaska Permanent Fund Corporation, 2010 Annual Financial Report
Constitutional Budget Reserve	$8.7	Alaska Department of Revenue, Treasury Division, Combined Schedule of Invested Assets, June 30, 2010
Statutory Budget Reserve	$1	Alaska Department of Revenue, Tax Division, Revenue Sources, Fall 2009
General Fund	$2	Author estimate
Other	-	
Note: The general fund estimate is a very rough measure of the share of the general fund not in restricted accounts (of which the Statutory Budget Reserve is one) and not necessary to meet the cash flow requirements of the state. For completeness we show an "Other" category which would consist of other unrestricted financial assets that could be appropriated to support state spending.		

III. b. Petroleum in the Ground

The value to the state treasury of our other large asset—petroleum in the ground—depends on how much is ultimately produced, at what price, and under what fiscal terms. These factors will determine future petroleum revenues collected by the state.

---

[6] It can be argued this is a "King Midas" approach to wealth management in that saving does not put petroleum wealth to work for the benefit of Alaskans, which usually means using savings to create jobs. However the sustainable flow of income generates a flow of benefits that is balanced between current and future generations whereas spending the wealth on job creation generally benefits only the current generation of Alaskans.

[7] An alternative strategy sometimes suggested is to save all petroleum revenues as they are received and spend only the earnings on the fund created from those revenues. This would result in growing spending over time which would favor future generations of Alaskans at the expense of current needs. This is essentially what has come to be known as the Cremo Plan.

[8] There are smaller unreserved balances in some other state accounts, which we exclude in order to keep the analysis simple.

The standard method for putting an economic value on a future stream of revenues is to calculate its present value. This is the amount someone would be willing to pay today for the right to receive those future revenues. For example, if revenues of $25 million, $20 million, $15 million, $10 million, and $5 million were expected in the next five years, and the discount rate was 5 percent, that revenue stream would have a present value of $67.05 million.

Present Value Example

End of Year	Annual Revenues	Discount Factor @ 5% Annually	Present Value of Revenues
Sum	**$ 75.00**		**$ 67.05**
1	$ 25.00	95.2%	$ 23.81
2	$ 20.00	90.7%	$ 18.14
3	$ 15.00	86.4%	$ 12.96
4	$ 10.00	82.3%	$ 8.23
5	$ 5.00	78.4%	$ 3.92

A person owning the asset that produces these annual revenues could hold onto it and collect the revenues as they are paid (Alternative 1) or sell the asset today (Alternative 2) for $67.05 million. The person would be indifferent between these two alternatives because in either case if the revenues were reinvested as received, the person would have $85.57 at the end of year 5.

Alternative 1. Invest Revenues as They Accrue

Year	Beginning Balance	Re-Investment Income	Annual Revenues	Ending Balance
1	$ -	$ -	$ 25.00	$ 25.00
2	$ 25.00	$ 1.25	$ 20.00	$ 46.25
3	$ 46.25	$ 2.31	$ 15.00	$ 63.56
4	$ 63.56	$ 3.18	$ 10.00	$ 76.74
5	$ 76.74	$ 3.84	$ 5.00	**$ 85.57**

Alternative 2. Take Net Present Value and Invest

Year	Beginning Balance	Re-Investment Income	Ending Balance
1	**$67.05**	$3.35	$70.40
2	$70.40	$3.52	$73.92
3	$73.92	$3.70	$77.62
4	$77.62	$3.88	$81.50
5	$81.50	$4.07	**$85.57**

Unfortunately, there is no long run comprehensive projection of future state petroleum revenues from which to calculate a net present value estimate of the value of petroleum in the ground.

The most widely used estimate of future oil revenues is the 10-year forecast the Alaska Department of Revenue (ADOR). Within the next decade almost all production will be oil from state-owned land on the North Slope between the Colville and Canning Rivers.[9] The most current projection forecasts nominal revenues for the period 2012 through 2020 to be $66 billion. Converted to net present value (using a 5% discount rate and a 2.75% inflation rate) this stream of future revenues has a value today of $45 billion (Appendix B.). In a world of perfect information and certainty, the state could sell this stream of future revenues today for that amount.

Looking further into the future, ADOR does estimate cumulative production of 5.3 billion barrels between FY2011 and FY2050.[10] Assuming a constant oil price and production decline rate of 5 % annually, we can estimate the revenue stream from North Slope state lands after 2020 and from it derive a $27 billion estimate of its present value (Appendix B). Thus the total net present value of oil revenues, primarily from state lands, is $72 billion ($45+$27).

Revenues from oil production from regions and reservoirs not included in the ADOR estimate (ANWR, some NPRA, OCS and heavy oil) cannot be easily forecast. Because production costs will generally be higher and the federal government will be taking a larger share of the revenues from most of this production, it is safe to assume that the per-barrel revenue from this oil will be less than current production on state land.

But in addition, because future revenues have a lower net present value than current revenues, estimates of the net present value of revenues from these regions will be small compared to those from state lands.[11] A rough estimate of the value of this oil in the ground is $2 billion, based on heavy oil production and modest OCS revenues (no sharing of federal royalties) with NPRA revenues included in the ADOR projection and no production from ANWR (Appendix C).

We assume commercialization of natural gas, but because of discounting, the net present value of gas revenues is also modest. Our estimate is based on the TransCanada AGIA application projection of revenues, but because it is several years old and the gas market has changed dramatically in the last few years, we adjust the net present value downward by 75%.

Adding these net present value amounts together, the total estimated value of state wealth in the form of petroleum in the ground is $81 billion with most of that wealth composed of near term production of oil on state lands.

---

[9] Alaska Department of Revenue, Fall 2010 Revenue Sources Book, page 38 states...."We do not include any estimates for undiscovered oil ... We exclude from our estimates production from most of the known heavy or viscous oil deposits; in fact we consider none of the approximately 20 billion barrels from the giant Ugnu deposit.... We exclude 97% of the viscous/heavy oil from the large West Sak field, projecting roughly 331 million barrels recovery out of the roughly 10 billion barrels in place. We also exclude 93% of the heavy oil at Schrader Bluff, projecting roughly 131 million barrels recovery out of over 2 billion barrels in place... We exclude these resources, both known and unknown, in order to avoid speculation and to reduce the uncertainty typically associated with the commercialization, timing and magnitude of resource development. Accordingly, we believe that our current estimates of ultimately recovery from the North Slope are reasonable."

[10] Alaska Department of Revenue, Fall 2009 Revenue Sources Book, page 37.

[11] For example, at a discount rate of 8% (5% real return plus inflation at 3%) a dollar of revenue available in 10 years has a net present value of only 46 cents and if available in 20 years its net present value is 21 cents.

Table 2. Value for State Petroleum Wealth in the Ground in 2010 (Billion $)

Total	**$81**	
Oil	$74	
State Land—North Slope 2011-2020	$45	Alaska Department of Revenue
State Land—North Slope 2021+	$27	Author estimate
State Land—Other Locations	-	
State Land—Heavy Oil	$1	Author estimate
Federal NPRA	-	Included in ADOR forecast
Federal OCS	$1	Author estimate
Federal ANWR	-	Author estimate
Gas	$7	TransCanada AGIA Application adjusted by author
Includes projected general fund and permanent fund revenues.		

Unlike the value of our financial assets, which we know with certainty, any estimate of the value of petroleum wealth in the ground could be off by 100% or more. If our estimate turns out to be too high, we might not save enough for the future. If it is too low, we could save more than necessary to maintain equity with future generations. We discuss how to deal with this uncertainty below.

IV. Establishing a BENCHMARK -- The Wealth Preserving Draw

A portfolio of assets worth $126 billion consisting of $45 billion in the bank and $81 billion in the ground could generate annual income of $6.3 billion in perpetuity (2010$), assuming a 5% real rate of return. [12] But for our wealth to grow with population increasing 1% each year, we would need to reinvest $1.25 billion of that income to maintain constant real per capita wealth. Consequently the current --BENCHMARK—or wealth preserving draw in FY2012 would be $5.0 billion (about $7,200 per person)—4% of our wealth, or the real rate of earnings minus the population growth rate (Table 3).

Table 3. FY2012 Wealth-Preserving Draw Calculation (Billion $)

Petroleum Wealth (Billion $)	Annual Sustainable Income (Billion $)	Population Growth Rate	BENCHMARK--Wealth Preserving Draw		
			Rate	Amount (Billion $)	Per Capita Amount
$126	$6.3	1 %	4 %	**$5.00**	**$7,180**

If we draw and spend more than this BENCHMARK, the value of our assets will not keep up with population growth and future generations will bear a **fiscal burden** (measured as the loss in per capita wealth of future generations due to overspending today).

[12] This is the target return on the Permanent Fund. If our other financial assets were similarly invested, they could earn a similar rate of return. Here we assume they are invested like the Permanent Fund.

If we draw less than the wealth preserving amount, our wealth will increase, future earnings will be higher, and with more wealth, future generations will be better off than us.

V. Implementation of the Rule—Are We Saving Enough Today?

The actual draw on our wealth in FY 2012 is yet to be determined, but is likely to be more than $5.5 billion, about $.5 billion more than the wealth preserving level of $5.0 billion.[13] This draw will reduce our per-capita wealth.

Spending from our wealth will consist of petroleum general fund revenues not saved ($4.6 billion), fund earnings spent (.2 billion) and Permanent Fund dividends paid ($.75 billion).

Table 4. FY2012 Estimated State Draw from Assets—FY2012 (Billion $)

General Fund Spending	$5.28	Office of Management and Budget, June 2010 Fiscal Summary—FY 2011 Enacted—This is increased by 3% by author assumption to estimate FY2012 spending
Minus: Non-Petroleum Revenues—Collected and Spent	$.49	Alaska Department of Revenue, Revenue Sources, Fall 2010
Equals: GF Petroleum Wealth Spending	$4.79	
Petroleum Revenues Spent	$4.60	
Earnings on Reserves Spent	$ .20	
Plus: Permanent Fund Dividend Distributed	$. 75	Permanent Fund Corporation, Fall 2010 adjusted by author to estimate CY 2011 spending
Equals: Total Asset Draw	**$5.54**	

Because the $5.54 billion draw from wealth will exceed the BENCHMARK or wealth-preserving amount--$5.0 billion, the value of state wealth (oil in the ground plus cash in the bank) will decline between the beginning and end of FY2012, as will the BENCHMARK moving forward into the next year.[14]

Table 5. State Wealth: Change in Value, FY2012 (Billion $)

Start of FY 2012	$126
Non-Sustainable Draw on Wealth	$.5
End of FY 2012	$125.5
% change	-.4%

Table 6. Sustainable Draw: Change in Value, FY2012 (Billion $)

Start of FY 2012	$5.04
Spend out of Assets	$.02
End of FY 2012	$5.02
% change	-.4%

[13] The FY 2012 budget level will be determined during the spring of 2011.

[14] Because we assume no inflation over the year, these changes are in real dollars.

These reductions are small, but in a year when there was much talk of "saving a portion of our windfall," they should give us pause. The amount of savings is not enough to maintain our wealth.

VI. How Sensitive is the Wealth-Preserving Draw Rate to Future Petroleum Revenues?

We can easily measure the value of our financial assets, but more than half of our wealth is petroleum in the ground. What if future petroleum revenues turn out to be more or less than we expect today? How would that change the calculation of the wealth preserving draw, and how should we deal with that uncertainty?

Table 7 shows a few cases to demonstrate that the range of estimates of our wealth is wide, and that the draw varies directly with the wealth estimate.[15] The known value of our financial assets puts a floor beneath the range, but because of the uncertainty about future petroleum revenues, the wealth preserving draw could easily range upwards of $6 billion.[16] [17]

Table 7. Sensitivity of 2012 BENCHMARK to Wealth Estimate

				Estimate in this Note			
WEALTH (billion $)	**$ 82**	**$ 97**	**$ 113**	**$ 126**	**$ 133**	**$ 147**	**$ 154**
FINANCIAL ASSETS	$ 45	$ 45	$ 45	**$ 45**	$ 45	$ 45	$ 45
PETROLEUM ASSETS	$ 37	$ 52	$ 68	**$ 81**	$ 88	$ 102	$ 109
State Land North Slope 2012-2020	$ 22-	$ 22	$ 45	**$ 45**	$ 45	$ 45	$45
State Land North Slope 2021-2050	$ 14	$ 27	$ 14	**$ 27**	$ 27	$ 27	$ 27
State Land Heavy Oil	0	$ 1	$ 1	**$ 1**	$ 1	$ 1	$ 1
NPRA	0	0	0	**0**	0	0	0
ANWR	0	0	0	**0**	0	0	$ 7
OCS	0	$-1	$ 1	**$ 1**	$ 1	$ 1	$ 1
Gas	0	0	$ 7	**$ 7**	$ 14	$ 28	$ 28
BENCHMARK @ 4%	**$ 3.26**	**$ 3.88**	**$ 4.50**	**$ 5.04**	**$5.32**	**$ 5.88**	**$ 6.16**

Given this uncertainty we need to consider what happens if the draw rate is set wrong. If we draw too much, we run down our wealth. If we draw too little, we end up with more wealth as time goes by. Either is unfair, if we're attempting to keep benefits equal between current and future Alaskans.

[15] The value of petroleum in the ground is also sensitive to the discount rate used to calculate present value.

[16] Limiting the time horizon—for example if our target were to cash out the asset in 50 years—would increase the draw.

[17] Increasing the population growth rate would reduce the draw for any given level of wealth.

The state should "hedge its bets" to increase the likelihood of not running out of its petroleum wealth too soon, by trying to draw somewhat less than the "best guess" amount. But just how much less is impossible to say.[18]

VII. Should Investment Count as Savings?

We have used the example of a financial account to illustrate the question of how much to save to preserve our wealth. But accumulating physical assets and human capital are also essential for a strong economy, and both generate benefits for Alaskans. Alaska is certainly richer today for the roads, airports, schools, and other public infrastructure that oil revenues have paid for. And spending on educational and health facilities have improved the quality of human capital.

We should count the spending of petroleum revenues on physical assets and human capital as investments that preserve wealth if they produce a sustainable flow of benefits valued as highly as the return on money in the bank. In fact this flow of money is the "opportunity cost" against which that spending should be compared (because that flow of money can be used directly to purchase benefits).

Unfortunately, public spending on physical assets or human capital is rarely subjected to a rigorous analysis of its benefits or comparison to its opportunity cost. If it were, much of it would come up short compared to its opportunity cost, and have to be classified as spending rather than investment.

Ideally, we should calculate how much wealth we have accumulated from investing in physical infrastructure and human capital development. This would provide a more complete picture of our current wealth when added to the value of oil in the ground and money in the bank.

But if we included physical infrastructure and human assets of the state in the wealth account, we would also need to allocate a share of the BENCHMARK spending each year to the preservation of those assets through expenditures on maintenance and replacement. This spending to maintain that part of our wealth portfolio would reduce the amount available for other purposes.

VIII. How Does Debt Influence the Calculation?

Debt financing of capital projects serves a useful function. It spreads payment for a project over its useful life. In that way, the direct beneficiaries of the project pay for it.

A portion of the BENCHMARK--wealth-preserving draw--could be used for debt service payments on capital projects financed by bonds, but borrowing would not change calculation of the size of the draw.

In some circumstances the interest rate on bonds might be less than the return on state financial investments, making it attractive to engage in "arbitrage"—borrowing at a low interest rate and investing the proceeds at a higher rate. If successful, this strategy would increase the total return on state wealth and therefore the size of the wealth-preserving draw.

---

[18] Using the "best guess" estimate of a wealth preserving draw means there is about a 50% chance of setting the draw too low, but also a 50% chance of setting it too high. "Hedging your bet" means setting it at a level that reduces below 50% the chance of it being too high.

IX. Have We Preserved our Wealth from North Slope Oil?

From FY1978 (when North Slope production began) through FY2010 the State of Alaska has collected $156 billion (in 2010 dollars) in oil revenues. That includes all taxes and royalties paid into the Permanent Fund, the Constitutional Budget Reserve, and the general fund (which includes the statutory budget reserve). Of that total, about $37 billion (24%) has been put into our various financial savings accounts—either through required or special contributions.

Has this saving been sufficient to preserve our wealth?

Based on actual revenues collected, expected revenues yet to be collected (Table 2), and a projected annual population growth rate of 1%, we appear to have done a pretty good job of preserving our wealth for both the current and future generations.

Prudhoe Bay wealth in 1978, in the form of future petroleum revenues (assuming the current projection of yet to be collected revenues is accurate), had a net present value of $88 billion (2010 $). Based on actual population growth, that could sustain a maximum annual draw of $7,180 per capita (2010$). If the state had adopted a BENCHMARK based on that amount, we would have accumulated $48 billion in financial assets today and our current portfolio would have a value of $127 billion. Since our estimate of actual wealth today is $126 billion, we appear to be on track (Appendix D.).

But in 1978 no one had put a dollar value on our petroleum wealth, and if they had, the estimate would have been much lower than $88 billion. No one expected the future price of oil to come anywhere close to $100, and ultimate production was not expected to exceed 10 billion barrels. (Cumulative North Slope oil production has recently passed the 16 billion barrel mark.)

So our apparent success at wealth preservation has been largely due to good luck. We appear to be on track today because prices, production, and oil revenues have all been higher than we anticipated. Of course if future revenues turn out to be less than we expect today, we will fall off the wealth preserving path.

X. Tracking Our Performance

As part of the annual state government budgeting process, we should keep track of our entire portfolio of wealth. If our goal is to preserve our wealth to share with future generations, we should then limit the annual draw from that wealth (use of current oil revenues and spending from financial reserves, including the Permanent Fund) to the BENCHMARK amount.

Spending above the BENCHMARK should be paid for with other taxes and revenues. In that way each generation would share equally in the benefits of our wealth and share equitably the responsibility of paying for the public services it enjoys.

Appendix A: The Mechanics of Wealth Preservation: A Simple Example

Table A. shows how a stream of petroleum revenues can be converted into a permanent financial asset that grows in value with the population. Initially the only asset is the future stream of petroleum revenues with a net present value of $227.8 million, using a 5% discount rate. At a 5% real rate of return an asset of that size can generate income of $11.4 million. If population (starting at 100 thousand) grows at 1% per year, $9.1 million of that income could be spent (with $2.1 million reinvested) and total wealth would increase at the same 1% rate as population. This would keep wealth per capita constant at $2,278. Each year both the asset and its income would grow 1% so the draw can also grow by 1%. The draw per capita would stay constant at $90.20 (Figure A.1). (Inflation is assumed to be zero to keep the example simple.)

In the first year, the state collects revenues of $50 million, which it allocates 82% ($40.9 million) to savings in a fund of financial assets and the remainder—$9.1 million—to the draw which it spends . At the start of the second year the net present value of the remaining stream of petroleum revenues has fallen to $189.2 million, but the decline has been offset by the $40.9 million in the financial account. Total assets have increased in value by 1%, to $230.1 million (Figure A.2).

In the second year, $45 million in revenue is collected, the draw is now $9.2 million, and the rest of the revenue, $35.8 million, is added to the $40.9 million in the financial account. This generates earnings at 5%, so at the end of the year the state has assets of $232.4 million—consisting of $153.7 million worth of oil in the ground and $78.7 million in the financial account.

In the early years, the draw for spending comes from a portion of petroleum revenues. Saving consists of the remainder of petroleum revenues, deposited into the fund, and all the earnings of the fund, which are reinvested. Over time the savings rate (share of petroleum revenues deposited in the fund) falls as a larger portion is required for the draw.[19]

Starting in year 10, funding the draw begins to transition to the earnings of the fund, and in year 11, the entire draw comes from the earnings of the fund, which has an ending balance of $251.7 million when the flow of petroleum revenues ends.

From that time forward the draw comes entirely from fund earnings. The fund and earnings continue to grow to maintain constant per capita levels.

[19] If during this time part of the draw comes from the financial assets, then saving from current petroleum revenues must be greater by an equal amount. Column D in the table is actually the net savings that must occur, regardless of its source.

NPV (Billion)	**$28**	**$1**	**$1**	**$13**	**$1**	**$45**	**$10**

Initial nominal value for estimates are $250 million for OCS, $100 million for heavy oil, $2,000 million for ANWR, and $100 million for NPRA.

Appendix D. Saving History and Future Potential

This table shows that in 1978 the wealth preserving draw was $7,180 per person (2010$), based on actual historical oil revenues and population combined with projected oil revenues (Table 2 in the text) and population growth of 1% annually.

At that level of draw each year we would have financial savings of $48 billion today (assuming a 5% real rate of return on investment), slightly more than actual financial savings of $45 billion.

End of Year	Petroleum Revenues (A)	Present Value of Future Petroleum Revenues (B)	BENCHMARK DRAW RATE = Actual Draw (C)	Petroleum Revenue Savings* (D=A-C)	Financial Fund Balance (E)	Sum of Assets (B+E)	Saving Ratio (D/A)	Pop	Assets/Pop (Thousand 2009$)	Real Per Capita Draw

Senator Bettye Davis

Date: February 1, 2012

To: Senator Bill Wielechowski
Chair, State Affairs

From: Senator Bettye Davis

RE: **Request for SJR11 "National Women's History Museum location acquisition" to be heard in the State Affairs Committee**

Senator Wielechowski,

You currently have in your possession SJR11 – **"Urging members of the Alaska delegation in Congress to support efforts by the National Women's History Museum to secure property in Washington, D.C., near the National Mall, as a permanent location for the National Women's History Museum."** I am requesting that SJR11 be heard in the State Affairs Committee as soon as possible and have included the resolution packet.

SJR11 urges Alaska's Congressional delegation to support legislation pending in Congress that allows a parcel of property near Washington D.C.'s National Mall to be purchased by the National Women's History Museum Institution for the permanent site of the National Women's History Museum building. Since its founding in 1996, the National Women's History Museum Institution has been working toward obtaining a permanent site near the National Mall for its building. Too often women were unsung heroes and their contributions went unnoticed. The displacement of women's history from the consciousness of the general public is indicated by the absence of women's history from K-12 curriculum. The achievements, leadership, courage, strength and love of the women who built America was and is as vital as that of the men whose names we know so well. The construction of a National Women's History Museum building among those on the National Mall would help bring to light an integral and transformative aspect of our nation's history that has for too long been obscured.

Thanks in advance for your consideration. If you have any questions, please contact Celeste Hodge at 465-5194.

Senator Bettye Davis

SJR 11 **"Urging members of the Alaska delegation in Congress to support efforts by the National Women's History Museum to secure property in Washington, D.C., near the National Mall, as a permanent location for the National Women's History Museum."**

Sponsor Statement

Senate Joint Resolution No. 11 urges members of the Alaska delegation in Congress to support efforts by the National Women's History Museum to secure property in Washington DC near the National Mall as a permanent location for the National Women's History Museum.

Women played and continue to play essential roles in many movements that helped shape the society we value so highly today. Such movements include the Labor Movement, the Women's Suffrage Movement, the Civil Rights Movement, the Women's Rights Movement, and the Environmental Movement. Women have long struggled to gain ground in a society largely dominated by men. Unfortunately, women achievements were marginalized and credit for their work and discoveries went to their male colleagues. Too often women were unsung heroes and their contributions went unnoticed. The displacement of women's history from the consciousness of the general public is indicated by the absence of women's history from K-12 curriculum. The achievements, leadership, courage, strength and love of the women who built America was and is as vital as that of the men whose names we know so well.

In the 1970's, that began to change as a movement to celebrate women's history gained momentum – a momentum we now feel each March during Women's History Month as we pay tribute to the millions of women who sacrificed so much to help create a better society and world.

Since its founding in 1996, the National Women's History Museum Institution, with the support of the National Foundation for women legislators, has been working toward obtaining a permanent site near the National Mall for its building. The construction of a museum that exhibits the rich history of women and their many contributions to society is long overdue. Furthermore, a location among the prestigious museums in and around the National Mall is fitting for an institution that would depict such an integral and transformative aspect of our nation's history which has for too long been obscured.

SJR11 urges Alaska's Congressional delegation to support legislation pending in Congress that allows a parcel of property near Washington D.C.'s National Mall to be purchased by the National Women's History Museum Institution for the permanent site of the National Women's History Museum building. SJR urges our congressional delegation to support the acquisition of property by the National Women's History Museum, which would constitute an enormous step forward in the effort of bringing to light a missing piece of our nation's history.

NWHM | NATIONAL WOMEN'S HISTORY MUSEUM

About NWHM

From Our Founder

A better world awaits the generation that absorbs what women and men have to share about life from a joint perspective. We have much to work toward...If we - and future generations - are to learn all the lessons of the past upon which to build the future, we must be aware of the true experiences and contributions of women. Clearly, men cannot get there alone. Together, all things are possible.

Karen Staser
Founder, National Women's History Museum

What is the National Women's History Museum?

The National Women's History Museum (NWHM), founded in 1996, is a nonpartisan, nonprofit educational institution dedicated to preserving, interpreting, and celebrating the diverse historic contributions of women, and integrating this rich heritage fully into our nation's history. NWHM is a 501(c)(3) organization.

Although women constitute a majority of the population, their lives, achievements, and contributions are underrepresented in museums. Recognition of the achievements made by American women will promote a better understanding of our history and culture for all who visit Washington, D.C. In 1999, *The President's Commission on the Celebration of Women in American History* called for a women's history museum on the Mall in Washington, DC, and specifically cited the NWHM in that role.

Obtaining a Permanent Site

From its founding, NWHM has worked hard towards obtaining a permanent museum site in the nation's capital on or near the National Mall. Such prestigious space requires Congressional approval. Click here to learn about the latest effort to secure a permanent home.

Supporters

The NWHM has the support of a strong and diverse network of national organizations representing citizens throughout the country:

- The NWHM Honorary Board of Directors comprises over 200 members of the U.S. Congress and past and present members of the Cabinet.
- The NWHM has organized a National Coalition, currently numbering 38, of leading national women's service and professional organizations. Together these organizations reach over 8.5 million members.
- Dr. Sally Ride, the first American woman in space, spearheaded the NWHM national outreach campaign beginning in September 2001. In more recent years, actress Meryl Streep, who is also the national spokesperson for the Site Campaign, authored a membership appeal, and actress Laura Dern authored one. NWHM's national membership has grown rapidly and approximately 36,000 people have become Charter Members.
- Newsletter – The NWHM newsletter, *A Different Point of View*, is published quarterly and mailed to current Museum members and supporters. The newsletter provides information on past and future educational events and programs sponsored by the Museum. The publication features seasonal stories about topics in women's history and notable American women, as well as updates on the progress of the museum.

NWHM | NATIONAL WOMEN'S HISTORY MUSEUM

About NWHM

Our Mission

The National Women's History Museum affirms the value of knowing Women's History, illuminates the role of women in transforming society and encourages all people, women and men, to participate in democratic dialogue about our future.

Our First Success

The Museum is in its infancy, but our founders have already accomplished a great deal. **NWHM** was the driving force behind the raising of the Woman Suffrage Statue, a monument to Susan B. Anthony, Elizabeth Cady Stanton, and Lucretia Mott, from the U.S. Capitol Crypt to the U.S. Capitol Rotunda. For the first time in our nation's history, our foremothers are honored with our forefathers!

NWHM NATIONAL WOMEN'S HISTORY MUSEUM

Faqs - General Questions

What is the mission of the National Women's History Museum?

The National Women's History Museum affirms the value of knowing Women's History, illuminates the role of women in transforming society and encourages all people, women and men, to participate in democratic dialogue about our future.

To do this, the Museum will research, collect and exhibit the contributions of women to the social, cultural, economic and political life of our nation in a context of world history. The museum will use innovative and engaging means including permanent and traveling exhibits, its CyberMuseum, educational programs, and outreach efforts to communicate the breath of women's experiences and accomplishments to the widest possible audience. The sharing of this knowledge will illuminate and encourage women and men, people of all classes, races and cultures to move into the future with respect, equal confidence, greater partnership, and opportunity.

Why "women's history" - isn't it all just "history?"

Women's contributions and accomplishments for the most part have been overlooked and consequently omitted from mainstream culture. The National Women's History Museum will help fill that void. Rather than rewriting current exhibitions at other history museums or having to decide what to omit elsewhere to "fit in" women's history, the NWHM will serve to place women's history along side current historical exhibitions.

Women's history is half of our national story. The objective is to promote scholarship and expand our knowledge of American history.

There's a great women's museum in Dallas, Texas. Do we need another? Why not just partner with the Susan B. Anthony House or another women's history site?

There's a great art museum in Philadelphia, but we still have the National Gallery of Art in DC!

Women's history is a lot more diverse than most people realize. Our museum is the only museum with the mission to reclaim women's history and create an accurate historical record which is appropriate for a national museum. Other organizations have different missions.

There is some confusion in the Washington area because there is a National Museum of Women in the Arts. Their focus is women artists; ours is women's history. It's an education process.

Think of it this way: If you went to an American history museum, you wouldn't just learn about the Revolutionary War, you'd learn all sorts of things from before and after the Declaration of Independence. It's the same thing with women's history - there's more than suffrage and the 19th Amendment.

When was the NWHM founded?

The National Women's History Museum was founded in 1996 by Karen Staser. Click here for a letter from our founder.

Where are you located?

The National Women's History Museum currently has administrative offices in Alexandria, VA while it works towards the goal of a permanent museum site. Staff will continue to work from this office until the museum opens.

How can I contact you?

You can call the Museum at 703-461-1920 Monday through Friday, 9 a.m - 5 p.m. If you call outside those hours (or all our lines are busy) leave a voicemail message, and someone will return your call as soon as possible.

If you prefer, you can email us at info@nwhm.org.

Or write to us - our mailing address is:
National Women's History Museum
Administrative Offices
205 S. Whiting Street Suite 254
Alexandria, VA 22304

NWHM | NATIONAL WOMEN'S HISTORY MUSEUM

Faqs - Permanent Site

If you don't have a building, what exactly do you do?

Even though the NWHM is still in the process of getting a permanent physical site, we've done quite a bit.

Our first success: NWHM raised $85,000 and generated public support to move this monument of Lucretia Mott, Elizabeth Cady Stanton, and Susan B. Anthony from the U.S. Capitol Crypt to the U.S. Capitol Rotunda.

NWHM created a traveling exhibit, **Rights for Women**, in honor of the 150th anniversary of the Women's Rights Convention held in Seneca Falls, New York. The exhibit was curated by Edith P. Mayo, Curator Emeritus, Smithsonian National Museum of American History, and displayed at the World Financial Center.

"Clandestine Women; the Untold Stories of Women in Espionage" opened in March 2002. This exhibition at the Women in Military Service For America Memorial honors all women intelligence officers who have served this country.

"Partners in Winning the War; American Women in World War II" opened in May 2004. The exhibition is a photographic tribute of posters, photographs, articles and documents that demonstrate the contributions and sacrifices of women in the effort to win the war.

On July 29th, 2005, the U.S. Senate passed S.501, the National Women's History Museum Act of 2005, by unanimous consent. Senator Susan Collins introduced the bill with 20 cosponsors, including all of the female Senators. The Senate previously passed a similar bill, S.1741, unanimously in 2003. Both of these bills identified the Annex of the Old Post Office Building as a permanent home for the museum. Both times the bill was referred to the House of Representatives where it never came up for a vote.

On a regular basis, NWHM adds CyberExhibits to its CyberMuseum. As of April 2009, there are 15 exhibits on various aspects of women's history and four in planning and research stages.

On March 25, 2009, Representative Carolyn Maloney introduced HR 6548 that identifies a different site at 12th Street and Independence Avenue as the museum's home.

Once we have a permanent site, we will continue to create online exhibits and programming that will be accessible from our website.

Is the National Women's History Museum a Smithsonian museum?

We are privately funded and just happen to be in the same town as most of the Smithsonian museums. Once a physical site is established, we will apply to the Smithsonian for an affiliation. This will allow us to borrow objects from the Smithsonian's collections for use in exhibitions.

NWHM Legislation Passes Out of House Committee

September 8th, 2011

NWHM is pleased to announce passage today of the National Women's History Museum bill in the House of Representatives Committee on Transportation and Infrastructure. Next stop, the House floor.

The NWHM bill was attached to other legislation supported by Committee Chairman John Mica (R-FL) and re-introduced as HR 2844, the National Women's History Museum and Federal Facilities Consolidation and Efficiency Act of 2011. Representative Carolyn Maloney (D-NY) is a cosponsor of the bill.

The legislative language in the new bill revises and further clarifies the boundaries of the site that NWHM will be allowed to purchase at 12th Street and Independence Avenue, SW., adjacent to the National Mall. This change eliminates any questions as to Congressional intent and will be helpful in site negotiations with the General Services Administration (GSA), the nation's landlord.

NWHM urges support for the passage of HR 2844. Please contact your Member of Congress to encourage their support for this bill. For more information on NWHM and legislation go to www.nwhm.org.

   Why not have a sample letter of support and a link from the NWHA web site to the Congressional members' e-mails? This would make it much easier for your membership to respond to your request that we contact our members of Congress in support of the bill.

Jennifer,

Senator Davis would like to request one complementary ticket for the National Women's History Museum's gala.

Thank so much for putting this together.

Pamela Marsch
Staff for Senator Davis

> "The de Pizan Honors"
> November 16, 2011
> Washington, DC
>
> October 4, 2011
>
> Dear NFWL Leader,
>
> The National Foundation for Women Legislators (NFWL) and the National Women's History Museum (NWHM) are hoping you will join us for the National Women's History Museum's 1052708

> This event is named for Christine de Pizan who lived in Italy in the early 1400s and was the first Western woman to write about women's impact on society and show how they were being left out of history. Now 600 years later, no country has succeeded in fulfilling her goal.

> The Museum's mission is to educate the public about women – primarily American — who have significantly shaped our world; the de Pizan Honors gala will honor female history-makers to ensure that their legacy remains alive. This year, we are paying tribute posthumously to three selected women with an award in their name presented to a contemporary counterpart.
>
> The contributions and life stories of the honorees will be part of a permanent exhibition within the soon-to-be-built, world-class National Women's History Museum. Legislation is pending in Congress that will provide a permanent site for the building at the National Mall alongside our nation's most iconic museums.
>
> NFWL has been an integral member of the National Women's History Museum's Coalition since its inception, and now Congress is on the verge of passing legislation that will provide a permanent home for the NWHM in Washington, DC, thanks to the support of our elected women nationwide who have advocated for the legislation. Over the past decade, NWHM has relied on online exhibits, temporary and special traveling exhibitions, newsletters, and speeches to accomplish its mission and communicate its message.
>
> Within a few short years NFWL will embark on its 75th Anniversary (originally founded in Connecticut in 1938). A large part of recognizing this milestone is seeing this process through and supporting the establishment and growth of the National Women's History Museum. In preparation, we would like you to serve as a key elected woman leader in your state to help us raise awareness about the Museum and the importance of educating our youth about ground-breaking women and their achievements. This will serve as a good issue for you to connect with your constituents, business leaders, and campaign donors on as you head into a busy election season and throughout the year.
>
> You make history everyday as a legislator. You connect with your constituents, respond to their needs, take on ground breaking issues, and move our country forward. It is actions like these that the NWHM honors. By attending the de Pizan Honors you will be at the forefront of this historical event. What you learn and the glass-breaking women you will meet will inspire you to carry the Museum's message back to your state.
>
> Though NFWL does not have funds to assist with travel expenses, we hope that you will consider coming to this powerful event to represent the women leaders in your state. We have a LIMITED number of complementary tickets for our elected women leaders, so we will need to hear from you right away if you would like to attend.
>
> This is an exciting time for women leaders. We hold a multitude of offices at all levels of government. Young women are attending college and earning advanced degrees at the highest rate in history and the future only looks bright for the girls and young women of tomorrow. While celebrating our current achievements and future hopes, it is important to acknowledge the accomplishments of our past. As a legislator you are at the heart of our nation's democracy. As a woman you are at the heart of our nation's society.
>
> I would be grateful if you would respond to Jennifer Rosen, NFWL's Director of Policy and Communications, as soon as possible to let us know if you would like to attend. Jennifer can be reached by email at Jennifer_Rosen@womenlegislators.org and by phone at 202-293-3040 ext. 1008. Thank you for your continued leadership, and I hope to see you in November in Washington, DC, with Meryl Streep!

History of National Women's History Month

By Molly Murphy MacGregor, Executive Director and Cofounder
National Women's History Project

Local Celebrations
As recently as the 1970's, women's history was virtually an unknown topic in the K-12 curriculum or in general public consciousness. To address this situation, the Education Task Force of the Sonoma County (California) Commission on the Status of Women initiated a "Women's History Week" celebration for 1978.

The week March 8th, International Women's Day, was chosen as the focal point of the observance. The local Women's History Week activities met with enthusiastic response, and dozens of schools planned special programs for Women's History Week. Over one-hundred community women participated by doing special presentations in classrooms throughout the country and an annual "Real Woman" Essay Contest drew hundreds of entries. The finale for the week was a celebratory parade and program held in the center of downtown Santa Rosa, California.

Mobilizing a Movement
In 1979, Molly Murphy MacGregor, a member of our group, was invited to participate in The Women's History Institute at Sarah Lawrence College, which was chaired by noted historian, Gerda Lerner and attended by the national leaders of organizations for women and girls. When the participants learned about the success of the Sonoma County's Women's History Week celebration, they decided to initiate similar celebrations within their own organizations, communities, and school districts. They also agreed to support an effort to secure a "National Women's History Week."

Presidential and Congressional Support
The first steps toward success came in February 1980 when President Carter issued the first Presidential Proclamation declaring the Week of March 8th 1980 as National Women's History Week. In the same year, Representative Barbara Mikulski, who at the time was in the House of Representatives, and Senator Orrin Hatch co-sponsored a Congressional Resolution for National Women's History Week 1981. This co-sponsorship demonstrated the wide-ranging political support for recognizing, honoring, and celebrating the achievements of American women.

A National Lobbying Effort
As word spread rapidly across the nation, state departments of education encouraged celebrations of National Women's History Week as an effective means to achieving equity goals within classrooms. Maryland, Pennsylvania, New York, Oregon, Alaska, and other states developed and distributed curriculum materials for all of their public schools. Organizations sponsored essay contests and other special programs in their local areas. Within a few years, thousands of schools and communities were celebrating National Women's History Week, supported and encouraged by resolutions from governors, city councils, school boards, and the U.S. Congress.

Each year, the dates of National Women's History Week, (the week of March 8th) changed and every year a new lobbying effort was needed. Yearly, a national effort that included thousands of individuals and hundreds of educational and women's organizations was spearheaded by the National Women's History Project.

National Women's History Month
By 1986, 14 states had already declared March as Women's History Month. This momentum and state-by-state action was used as the rational to lobby Congress to declare the entire month of March 1987 as National Women's History Month. In 1987, Congress declared March as National Women's History Month in perpetuity. A special Presidential Proclamation is issued every year which honors the extraordinary achievements of American women.

Presidential Message 1980
President Jimmy Carter's Message to the nation designating March 2-8, 1980 as National Women's History Week.

"From the first settlers who came to our shores, from the first American Indian families who befriended them, men and women have worked together to build this nation. Too often the women were unsung and sometimes their contributions went unnoticed. But the achievements, leadership, courage, strength and love of the women who built America was as vital as that of the men whose names we know so well.

As Dr. Gerda Lerner has noted, "Women's History is Women's Right." – It is an essential and indispensable heritage from which we can draw pride, comfort, courage, and long-range vision."

I ask my fellow Americans to recognize this heritage with appropriate activities during National Women's History Week, March 2-8, 1980.

I urge libraries, schools, and community organizations to focus their observances on the leaders who struggled for equality - - Susan B. Anthony, Sojourner Truth, Lucy Stone, Lucretia Mott, Elizabeth Cady Stanton, Harriet Tubman, and Alice Paul. Understanding the true history of our country will help us to comprehend the need for full equality under the law for all our people.

This goal can be achieved by ratifying the 27th Amendment to the United States Constitution, which states that "Equality of Rights under the Law shall not be denied or abridged by the United States or by any state on account of sex."

2011 Press Release

For More Information:
Contact the National Women's History Project **WWW.NWHP.ORG** or call 707-636-2888.

March is National Women's History Month.

This celebration, designated by Joint Resolutions of the House and Senate and Proclamations by five American Presidents, is an opportunity to honor and celebrate women's historic achievements.

Each year National Women's History Month employs a unifying theme and recognizes national honorees whose work and lives testify to that theme. For 2011, the theme is Our HISTORY is Our Strength. This year, instead of recognizing national honorees, local communities, organizations and institutions throughout the country are asked to honor women within their own communities or organizations.

Our HISTORY is Our Strength pays tribute to the millions of women who helped create a better world for the times in which they lived as well as for future generations. Knowing the challenges these women faced, grappled with, and overcame can be an enormous source of strength to all of us. During today's difficult times, Our HISTORY is Our Strength can serve as an important reminder to our nation that adversity can be overcome.

The stories of women's achievements are integral to the fabric of our history. Learning about women's tenacity, courage, and creativity throughout the centuries is a tremendous
source of strength. Until relatively recently, this sphere of women's history was overlooked and undervalued. Women's achievements were often distorted, disdained, and denied. But, knowing women's stories provides essential role models for everyone. And role models are genuinely needed to face the extraordinary changes and unrelenting challenges of the 21st century.

Discovering the remarkable achievements of women helps diminish the tendency of some modern-day pundits to dismiss and trivialize who women are and what they accomplish. In celebrating women's historic achievements, we present an authentic view of history. The knowledge of women's history provides a more expansive vision of what a woman can do. This perspective can encourage girls and women to think larger and bolder, and can give boys and men a fuller understanding of the female experience.

What is your school, community or organization doing to celebrate National Women's History Month this March? For more information and resources to commemorate multicultural women's history and to celebrate Our HISTORY is Our Strength, visit

National Women's History Project

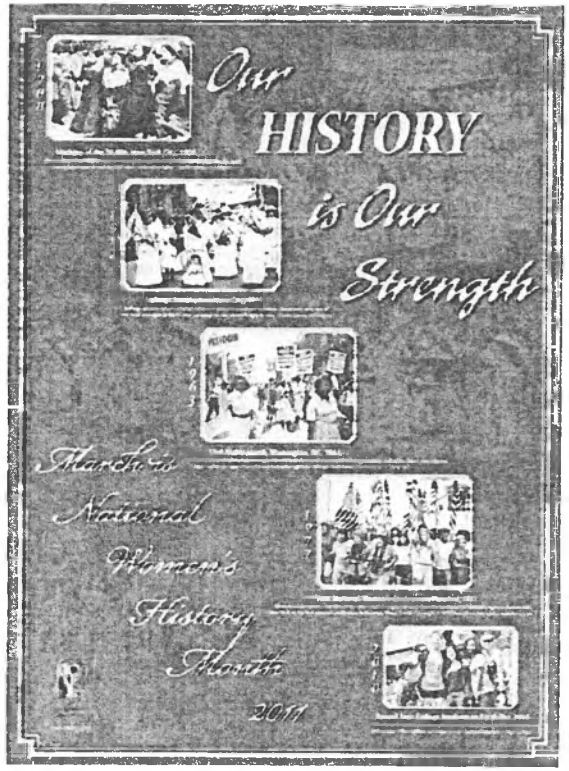
The National Women's History Project is a nonprofit, nonpartisan, educational organization committed to recognizing and celebrating the diverse and historic accomplishments of women by providing information and educational materials.

National Women's History Month 2011



The stories of women's achievements are integral to the fabric of our history. Learning about women's tenacity, courage, and creativity throughout the centuries is a tremendous source of strength.

Our HISTORY is Our Strength

March is celebrated as **National Women's History Month** in thousands of schools, communities and workplaces across the nation as well as on military bases throughout the world.

This celebration, designated by Joint Resolutions of the House and Senate and Proclamations by six American Presidents, is an opportunity to honor and celebrate women's historic achievements.

Each year **National Women's History Month** employs a unifying theme and honors women around the country whose work and lives testify to that theme.

For 2011, the theme is ***Our History is Our Strength.*** To date, we have recognized National Honorees, but this year local communities, organizations and institutions are invited to honor women within their own communities or organizations.

Our History is Our Strength pays tribute to the millions of women who helped create a better world for the times in which they lived as well as for future generations. Knowing the challenges these women faced, grappled with, and overcame can be an enormous source of strength to all of us. During today's difficult times, ***Our History is Our Strength*** can serve as an important reminder to our nation that adversity can be overcome.

Women have played and continue to play a crucial role in several important movements throughout U.S. history:

* **The Labor Movement** which began as early as 1765 when women formed the first society of working women.
* **The Women's Suffrage Movement** which was launched in 1848 at the first women's right conference held at Seneca Falls, NY.
* **The Civil Rights Movement** in which women held a variety of roles from leadership to organizers to participants.
* **The Women's Rights Movement** which was re-energized in the 20th Century with what is called the Second Wave.
* **The Environmental Movement** in which women played a key role from the early 19th century and which was officially launched on Earth Day, April 22, 1970

Here are some women who participated in these movements:

Frances Perkins, U.S. Secretary of Labor, began her advocacy for the labor movement when she witnessed the Triangle Shirtwaist Factory Fire in 1911. Appointed to the Cabinet in 1933, **Perkins** worked hard to secure legislation to enact unemployment relief, public works, Social Security, minimum wage, and the prohibition of child labor.

Alice Paul, represented the last generation of suffrage leaders, and brought fearlessness and tenacity to the fight for women's right to vote. She organized the first pickets at the White House in 1916 and 1917. Along with dozens of women, **Paul** was imprisoned, went on a hunger strike, and was force fed. After winning the vote, she worked to enact the Equal Rights Amendment.

Minnijean Brown Trickey was only 16 years old when she became one of the Little Rock Nine who integrated Central High School in 1957. Along with eight other African-American teenagers, she defied death threats, hostile white demonstrators, and even the Arkansas National Guard, to attend the all-white high school. **Brown-Trickey's** courage helped change the lives and education of all students throughout the country.

Bella Abzug, one of the most recognized and bold leaders of the 20th Century's Women's Movement, was elected to the U.S. Congress at the age of 50. She presided over the first government sponsored National Women's Conference at Houston in 1977. With great joy, **Abzug** took part in the last leg of the relay which had carried a torch from Seneca Falls, site of the first women's rights convention, into the stadium at Houston.

Rachel Carson is known as the founder of the contemporary environmental movement. In 1962, **Carson** published "Silent Spring," which documented the dangers of air pollutants and pesticides on animals, people, and land. Her writing boldly challenged the practices of agricultural scientists and even the government. **Carson** called for a change in the way humankind viewed the natural world.

Our HISTORY is Our Strength

CONGRESSIONAL LEADERS SUPPORT NATIONAL WOMEN'S HISTOR MUSEUM INITIATIVE

April 1, 2011

(WASHINGTON, DC) - The National Foundation for Women Legislators (NFWL) was pleased to join a bi-partisan coalition of elected women this week in the nation's capital to support the establishment of the National Women's History Museum (NWHM).

U.S. **Rep.Carolyn B. Maloney (D-NY)** and **U.S. Rep. Judy Biggert (R-IL)** hosted a press event on Capitol H to announce the reintroduction Aof the National Women's History Act and show their support for the establishment of a National Women's History Museum in a prominent location near The Mall in Washington, D Maloney and Biggert were also joined by their colleagues, **U.S. Rep. Marcy Kaptur (D-OH)** and **U.S. Rep. J: Schakowsky (D-IL)** for the announcement.

Maloney and U.S. Senator Susan Collins (R-ME) reintroduced The National Women's History Museum Act in both Chambers - the House Bill is **HR 1269** and the Senate Bill is **S. 680**.

This Bill provides a permanent site for NWHM where it will house its collections and further its educational services. The location at 12th Street S.W. and Independence Avenue S.W. is across the street from several of th nation's most iconic museums, such as the National Air and Space Museum, the National American History Museum and the National Gallery of Art. It's the right place for a comprehensive museum on women's

accomplishments. The bill provides that NWHM will pay fair market value for the vacant site and will fund the construction with private funds.

"Of the 210 statues in the Capitol building, only nine are of women; of the 2400 national historic landmarks in the country, only five percent document women's accomplishments," stated Maloney. "There are museums dedicated to airplanes and buildings and postage stamps-but no single location dedicated to celebrating the accomplishments of women, who are over half our country's population. We need to explain to our sons and daughters the roles that women have played in the life of our nation."

"This will be the first national museum dedicated to celebrating the unique and courageous contributions that women have made in American history," stated Biggert. "Thanks to the generous support of private contributor all across the country, this dream will come true at no cost to the American taxpayers. In fact, the Museum Foundation will pay the taxpayers fair market value for the current property - a small parking lot. They say women are more responsible when it comes to handling the household check book, and I think this project just proves that the same might be true for the national budget."

NWHM President & CEO Joan Wages said, "Washington, DC is a city of symbols and a beacon to the world. The National Women's History Museum will show that our nation honors our women. Women deserve this recognition for the many contributions they have made to the building of our country. "

HR 1269 was introduced with 22 cosponsors: Representatives Sandy Adams (R-FL), Tammy Baldwin (D-WI), Karen Bass (D-CA), Judy Biggert (R-IL), Marsha Blackburn (R-TN), Madeleine Z. Bordallo (D-GU), Susan A. Davis (D-CA), Barney Frank (D-MA), Raul M. Grijalva (D-AZ), Alcee L. Hastings (D-FL), Jaime Herrera Beutler (R-WA), Jesse L. Jackson Jr. (D-IL), Barbara Lee (D-CA), Cynthia M. Lummis (R-WY), Doris O. Matsui (D-CA), Gwen Moore (D-WI), James P. Moran (D-VA), Eleanor Holmes Norton (D-DC), Janice D. Schakowsky (D-IL), Jean Schmidt (R-OH), Jackie Speier (D-CA), and Fortney Pete Stark (D-CA).

S 680 was introduced with 19 cosponsors: Senators Daniel K. Akaka (D-HI), Kelly Ayotte (R-NH), Mark Begi (D-AK), Barbara Boxer (D-CA), Maria Cantwell (D-WA), Dianne Feinstein (D-CA), Kirsten Gillibrand (D-NY Kay Hagan (D-NC), Kay Bailey Hutchinson (R-TX), Mary Landrieu (D-LA), Joe Lieberman (I-CT), Jeff Merkley (D-OR), Barbara Mikulski (D-MD), Lisa Murkowski (R-AK), Patty Murray (D-WA), Mark Pryor (D-AR), Jeanne Shaheen (D-NH), Olympia Snowe (R-ME), and Debbie Stabenow (D-MI).

112TH CONGRESS
1ST SESSION

S. 680

To authorize the Administrator of General Services to convey a parcel of real property in the District of Columbia to provide for the establishment of a National Women's History Museum.

IN THE SENATE OF THE UNITED STATES

MARCH 30, 2011

Ms. COLLINS (for herself, Ms. MIKULSKI, Mrs. BOXER, Mrs. HUTCHISON, Mrs. MURRAY, Ms. SNOWE, Ms. LANDRIEU, Ms. STABENOW, Ms. CANTWELL, Ms. MURKOWSKI, Mrs. SHAHEEN, Mrs. GILLIBRAND, Mr. LIEBERMAN, Mr. AKAKA, Mr. PRYOR, Mr. MERKLEY, Mr. BEGICH, Mrs. FEINSTEIN, and Ms. AYOTTE) introduced the following bill; which was read twice and referred to the Committee on Environment and Public Works

---

A BILL

To authorize the Administrator of General Services to convey a parcel of real property in the District of Columbia to provide for the establishment of a National Women's History Museum.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Women's History Museum Act of 2011".

SEC. 2. DEFINITIONS.

In this Act, the following definitions apply:

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of General Services.

(2) CERCLA.—The term "CERCLA" means the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.).

(3) COMMITTEES.—The term "Committees" means the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(4) MUSEUM.—The term "Museum" means the National Women's History Museum, Inc., a District of Columbia nonprofit corporation exempt from taxation pursuant to section 501(c)(3) of the Internal Revenue Code of 1986.

(5) PROPERTY.—The term "Property" means the property located in the District of Columbia, subject to survey and as determined by the Administrator, generally consisting of Squares 325 and 326. The Property is generally bounded by 12th Street, Independence Avenue, C Street, and the James Forrestal Building, all in Southwest Washington, Dis-

trict of Columbia, and shall include all associated air rights, improvements thereon, and appurtenances thereto.

SEC. 3. CONVEYANCE OF PROPERTY.

(a) AUTHORITY TO CONVEY.—

(1) IN GENERAL.—Subject to the requirements of this Act, the Administrator shall convey the Property to the Museum, on such terms and conditions as the Administrator considers reasonable and appropriate to protect the interests of the United States and further the purposes of this Act.

(2) AGREEMENT.—As soon as practicable, but not later than 180 days after the date of enactment of this Act, the Administrator shall enter into an agreement with the Museum for the conveyance.

(3) TERMS AND CONDITIONS.—The terms and conditions of the agreement shall address, among other things, mitigation of developmental impacts to existing Federal buildings and structures, security concerns, and operational protocols for development and use of the property.

(b) PURCHASE PRICE.—

(1) IN GENERAL.—The purchase price for the Property shall be its fair market value based on its highest and best use as determined by an inde-

pendent appraisal commissioned by the Administrator and paid for by the Museum.

(2) SELECTION OF APPRAISER.—The appraisal shall be performed by an appraiser mutually acceptable to the Administrator and the Museum.

(3) TERMS AND CONDITIONS FOR APPRAISAL.—

(A) IN GENERAL.—Except as provided by subparagraph (B), the assumptions, scope of work, and other terms and conditions related to the appraisal assignment shall be mutually acceptable to the Administrator and the Museum.

(B) REQUIRED TERMS.—The appraisal shall assume that the Property does not contain hazardous substances (as defined in section 101 of CERCLA (42 U.S.C. 9601)) which require response action (as defined in such section).

(c) APPLICATION OF PROCEEDS.—The purchase price shall be paid into the Federal Buildings Fund established under section 592 of title 40, United States Code. Upon deposit, the Administrator may expend, in amounts specified in authorizations and appropriations Acts, the proceeds from the conveyance for any lawful purpose consistent with existing authorities granted to the Administrator.

(d) QUIT CLAIM DEED.—The Property shall be conveyed pursuant to a quit claim deed.

(e) USE RESTRICTION.—The Property shall be dedicated for use as a site for a national women's history museum for the 99-year period beginning on the date of conveyance to the Museum.

(f) FUNDING RESTRICTION.—No Federal funds shall be made available to the Museum for the purchase of the Property or the design and construction of any facility on the Property.

(g) REVERSION.—

(1) BASES FOR REVERSION.—The Property shall revert to the United States, at the option of the United States, without any obligation for repayment by the United States of any amount of the purchase price for the property, if—

(A) the Property is not used as a site for a national women's history museum at any time during the 99-year period referred to in subsection (e); or

(B) the Museum has not commenced construction of a museum facility on the Property in the 5-year period beginning on the date of enactment of this Act, other than for reasons

beyond the control of the Museum as reasonably determined by the Administrator.

(2) ENFORCEMENT.—The Administrator may perform any acts necessary to enforce the reversionary rights provided in this section.

(3) CUSTODY OF PROPERTY UPON REVERSION.—If the Property reverts to the United States pursuant to this section, such property shall be under the custody and control of the Administrator.

(h) CLOSING.—The conveyance pursuant to this Act shall occur not later than 3 years after the date of enactment of this Act. The Administrator may extend that period for such time as is reasonably necessary for the Museum to perform its obligations under section 4(a).

SEC. 4. ENVIRONMENTAL MATTERS.

(a) AUTHORIZATION TO CONTRACT FOR ENVIRONMENTAL RESPONSE ACTIONS.—The Administrator is authorized to contract with the Museum or an affiliate thereof for the performance (on behalf of the Administrator) of response actions on the Property.

(b) CREDITING OF RESPONSE COSTS.—Any costs incurred by the Museum or an affiliate thereof pursuant to subsection (a) shall be credited to the purchase price for the Property.

(c) NO EFFECT ON COMPLIANCE WITH ENVIRONMENTAL LAWS.—Nothing in this Act, or any amendment made by this Act, affects or limits the application of or obligation to comply with any environmental law, including section 120(h) of CERCLA (42 U.S.C. 9620(h)).

SEC. 5. INCIDENTAL COSTS.

Subject to section 4, the Museum shall bear any and all costs associated with complying with the provisions of this Act, including studies and reports, surveys, relocating tenants, and mitigating impacts to existing Federal buildings and structures resulting directly from the development of the property by the Museum.

SEC. 6. LAND USE APPROVALS.

(a) EXISTING AUTHORITIES.—Nothing in this Act shall be construed as limiting or affecting the authority or responsibilities of the National Capital Planning Commission or the Commission of Fine Arts.

(b) COOPERATION.—

(1) ZONING AND LAND USE.—Subject to paragraph (2), the Administrator shall reasonably cooperate with the Museum with respect to any zoning or other land use matter relating to development of the Property in accordance with this Act. Such cooperation shall include consenting to applications by

the Museum for applicable zoning and permitting with respect to the property.

(2) LIMITATIONS.—The Administrator shall not be required to incur any costs with respect to cooperation under this subsection and any consent provided under this subsection shall be premised on the property being developed and operated in accordance with this Act.

SEC. 7. REPORTS.

Not later than 1 year after the date of enactment of this Act, and annually thereafter until the end of the 5-year period following conveyance of the Property or until substantial completion of the museum facility (whichever is later), the Museum shall submit annual reports to the Administrator and the Committees detailing the development and construction activities of the Museum with respect to this Act.

1ST SESSION

H. R. 1269

To authorize the Administrator of General Services to convey a parcel of real property in the District of Columbia to provide for the establishment of a National Women's History Museum.

IN THE HOUSE OF REPRESENTATIVES

MARCH 30, 2011

Mrs. MALONEY (for herself, Ms. MOORE, Mrs. DAVIS of California, Ms. LEE of California, Ms. BALDWIN, Ms. SCHAKOWSKY, Ms. MATSUI, Mr. GRIJALVA, Ms. BASS of California, Mr. STARK, Ms. HERRERA BEUTLER, Mrs. SCHMIDT, Ms. SPEIER, Mrs. LUMMIS, Mrs. ADAMS, Ms. NORTON, Mrs. BLACKBURN, Ms. BORDALLO, Mr. FRANK of Massachusetts, Mrs. BIGGERT, Mr. HASTINGS of Florida, and Mr. MORAN) introduced the following bill; which was referred to the Committee on Transportation and Infrastructure

---

A BILL

To authorize the Administrator of General Services to convey a parcel of real property in the District of Columbia to provide for the establishment of a National Women's History Museum.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "National Women's History Museum Act of 2011".

SEC. 2. DEFINITIONS.

In this Act, the following definitions apply:

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of General Services.

(2) CERCLA.—The term "CERCLA" means the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 et seq.).

(3) COMMITTEES.—The term "Committees" means the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(4) MUSEUM.—The term "Museum" means the National Women's History Museum, Inc., a District of Columbia nonprofit corporation exempt from taxation pursuant to section 501(c)(3) of the Internal Revenue Code of 1986.

(5) PROPERTY.—The term "Property" means the property located in the District of Columbia, subject to survey and as determined by the Administrator, generally consisting of Squares 325 and 326. The Property is generally bounded by 12th Street, Independence Avenue, C Street, and the James Forrestal Building, all in Southwest Washington, Dis-

trict of Columbia, and shall include all associated air rights, improvements thereon, and appurtenances thereto.

SEC. 3. CONVEYANCE OF PROPERTY.

(a) AUTHORITY TO CONVEY.—

(1) IN GENERAL.—Subject to the requirements of this Act, the Administrator shall convey the Property to the Museum, on such terms and conditions as the Administrator considers reasonable and appropriate to protect the interests of the United States and further the purposes of this Act.

(2) AGREEMENT.—As soon as practicable, but not later than 180 days after the date of enactment of this Act, the Administrator shall enter into an agreement with the Museum for the conveyance.

(3) TERMS AND CONDITIONS.—The terms and conditions of the agreement shall address, among other things, mitigation of developmental impacts to existing Federal buildings and structures, security concerns, and operational protocols for development and use of the property.

(b) PURCHASE PRICE.—

(1) IN GENERAL.—The purchase price for the Property shall be its fair market value based on its highest and best use as determined by an inde-

pendent appraisal commissioned by the Administrator and paid for by the Museum.

(2) SELECTION OF APPRAISER.—The appraisal shall be performed by an appraiser mutually acceptable to the Administrator and the Museum.

(3) TERMS AND CONDITIONS FOR APPRAISAL.—

(A) IN GENERAL.—Except as provided by subparagraph (B), the assumptions, scope of work, and other terms and conditions related to the appraisal assignment shall be mutually acceptable to the Administrator and the Museum.

(B) REQUIRED TERMS.—The appraisal shall assume that the Property does not contain hazardous substances (as defined in section 101 of CERCLA (42 U.S.C. 9601)) which require response action (as defined in such section).

(c) APPLICATION OF PROCEEDS.—The purchase price shall be paid into the Federal Buildings Fund established under section 592 of title 40, United States Code. Upon deposit, the Administrator may expend, in amounts specified in authorizations and appropriations acts, the proceeds from the conveyance for any lawful purpose consistent with existing authorities granted to the Administrator.

(d) QUIT CLAIM DEED.—The Property shall be conveyed pursuant to a quit claim deed.

(e) USE RESTRICTION.—The Property shall be dedicated for use as a site for a national women's history museum for the 99-year period beginning on the date of conveyance to the Museum.

(f) FUNDING RESTRICTION.—No Federal funds shall be made available to the Museum for the purchase of the Property or the design and construction of any facility on the Property.

2012 SESSION

INTRODUCED

12102316D

HOUSE JOINT RESOLUTION NO. 91

Offered January 11, 2012
Prefiled January 10, 2012

Memorializing the Congress of the United States to support the establishment of a National Women's History Museum in Washington, D.C.

Patron—Comstock

Committee Referral Pending

WHEREAS, in 1987, Congress declared March to serve as "Women's History Month" to acknowledge the important role women have played in shaping America; and

WHEREAS, although women constitute a majority of the nation's population, their achievements and contributions are underrepresented in museums and memorials; and

WHEREAS, only 10 percent of the people identified in a recent survey of 18 history textbooks were women; and

WHEREAS, in 1999, The President's Commission on the Celebration of Women in American History called for a women's history museum to be established on the National Mall in Washington, D.C.; and

WHEREAS, the National Women's History Museum (NWHM), founded in 1996, is a nonpartisan, nonprofit, educational institution dedicated to preserving, interpreting, and celebrating the diverse historic contributions of women, and integrating the heritage of women fully into this nation's history; and

WHEREAS, the NWHM seeks a site on or close to the National Mall and in close proximity to the White House and U.S. Capitol Building; and

WHEREAS, the NWHM has identified federally owned property for sale near the National Mall; and

WHEREAS, legislation is currently pending in Congress seeking authorization for the NWHM to be able to purchase this property at fair market value with privately raised funds and no federal funds are being requested for the purchase of this land; and

WHEREAS, there are museums dedicated to flight, postage stamps, buildings, and many other important people and issues of interest but not to women, and yet women comprise 51 percent of the nation's population; and

WHEREAS, the NWHM will showcase the full history of women in the United States and the contributions they have made and continue to make in the marketplace, arts and sciences, government, entertainment, education, home, and community; and

WHEREAS, a coalition of 43 women's organizations representing eight million women, which includes the National Foundation for Women Legislators, supports the efforts of the NWHM to establish a permanent residence near the National Mall, the most prominent location for museums to be situated in the nation's capital; now, therefore, be it

RESOLVED by the House of Delegates, the Senate concurring, That the Congress of the United States be urged to support the establishment of a National Women's History Museum in Washington, D.C.; and, be it

RESOLVED FURTHER, That the Clerk of the House of Delegates transmit copies of this resolution to the Speaker of the United States House of Representatives, the President of the United States Senate, and the members of the Virginia Congressional Delegation so that they may be apprised of the sense of the General Assembly of Virginia in this matter.

2011 SC H 4183	AUTHOR:	Brady
	VERSION:	Adopted
	VERSION DATE:	05/05/2011

South Carolina General Assembly
119th Session, 2011-2012
H. 4183

House Resolution
Adopted by the House on May 5, 2011

A HOUSE RESOLUTION
TO SUPPORT THE ESTABLISHMENT OF A NATIONAL WOMEN'S HISTORY MUSEUM IN WASHINGTON, D. C., IN ORDER TO SECURE A PERMANENT HOME IN THE NATION'S CAPITAL THAT WILL HIGHLIGHT THE IMPORTANT ROLE WOMEN HAVE PLAYED IN SHAPING THIS GREAT NATION.

Whereas, in 1987, Congress declared March to serve as "Women's History Month" to acknowledge the important role women have played in shaping the United States of America; and

Whereas, although women constitute a majority of the nation's population, their achievements and contributions are underrepresented in museums and memorials; and

Whereas, only ten percent of the people identified in a recent survey of eighteen history textbooks were women; and

Whereas, in 1999, The President's Commission on the Celebration of Women in American History called for a women's history museum to be established on "The National Mall" in Washington, D. C.; and

Whereas, the National Women's History Museum (NWHM), founded in 1996, is a non-partisan, non-profit, educational institution dedicated to preserving, interpreting, and celebrating the diverse historic contributions of women, and integrating the heritage of women fully into the nation's history; and

Whereas, the NWHM seeks a site on or close to the National Mall and in close proximity to the White House and the United States Capitol Building; and

Whereas, the NWHM has identified a vacant lot that is a federally owned property for sale near the National Mall, located at 12th Street and Independence Avenue S. W.; and

Whereas, legislation is currently pending in Congress seeking authorization for the NWHM to be able to purchase this property at fair market value with privately raised funds, and no federal funds are being requested for the purchase of this land; and

Whereas, there are museums dedicated to flight, postage stamps, buildings, and many other important people and issues of interest but not to women, yet women comprise fifty-three percent of the nation's population; and

Whereas, the NWHM will showcase the full history of women in the United States and the contributions they have made and continue to make in the marketplace, arts and sciences, government, entertainment, education, home, and community; and

Whereas, representing eight million women, a coalition of forty women's organizations which includes the National Foundation for Women Legislators supports the efforts of the NWHM to establish a permanent residence near the National Mall, the most prominent location for museums to be situated in the nation's capital. Now, therefore,

Be it resolved by the House of Representatives:

That the members of the South Carolina House of Representatives, by this resolution, support the establishment of a National Women's History Museum in Washington, D. C., in order to secure a permanent home in the nation's capital that will highlight the important role women have played in shaping this great nation.

Be it further resolved that a copy of this resolution be forwarded to the members of the South Carolina Congressional Delegation.

STATE OF RHODE ISLAND

IN GENERAL ASSEMBLY

JANUARY SESSION, A.D. 2012

SENATE RESOLUTION

SUPPORTING THE ESTABLISHMENT OF A NATIONAL WOMEN'S HISTORY MUSEUM IN WASHINGTON, D.C.

Introduced By: Senators Lanzi, Paiva Weed, Lynch, Crowley, and Sosnowski

Date Introduced: January 17, 2012

Referred To: Recommended for Immediate Consideration

WHEREAS, In 1987, Congress declared March as "Women's History Month" to acknowledge the important role women have played in shaping America; and

WHEREAS, Although women constitute a majority of the nation's population, their achievements and contributions are underrepresented in museums and memorials; and

WHEREAS, In a recent survey of eighteen history books, only 10 percent of the people identified were women; and

WHEREAS, In 1999, the President's Commission on the Celebration of Women in American History called for a women's history museum to be established on the National Mall in Washington, D.C.; and

WHEREAS, The National Women's History Museum (NWHM), founded in 1996, is a nonpartisan, nonprofit, educational institution dedicated to preserving, interpreting, and celebrating the diverse historic contributions of women and fully integrating the heritage of women into this nation's history; and

WHEREAS, The NWHM seeks a site on or close to the National Mall and in close proximity to the White House and United States Capitol; and

WHEREAS, The NWHM has identified federally-owned property for sale near the National Mall; and

WHEREAS, Legislation is currently pending in Congress seeking authorization for the NWHM to be able to purchase this property at fair market value with privately raised funds. No

federal funds are being requested for the purchase of this land; and

WHEREAS, There are museums dedicated to flight, postage stamps, buildings, and many other important people and issues, but not to women, and yet women comprise 51 percent of the nation's population; and

WHEREAS, The NWHM will showcase the full history of women in the United States and the contributions they have made and continue to make in the marketplace, arts and sciences, government, entertainment, education, home, and community; and

WHEREAS, A coalition of 43 women's organizations representing 8 million women, which includes the National Foundation for Women Legislators (NFWL), supports the efforts of the NWHM to establish a permanent residence on the National Mall, the most prominent location for museums to be situated in the nation's capital; now, therefore, be it

RESOLVED, That this Senate of the State of Rhode Island and Providence Plantations hereby respectfully urges the esteemed members of the United States House of Representatives and the United States Senate to support the NWHM's efforts to secure a permanent home on or close to the National Mall for a museum that will highlight the important role women have played in shaping this great nation; and be further

RESOLVED, That the Secretary of State be and he hereby is authorized and directed to transmit duly certified copies of this resolution to the National Foundation for Women Legislators and the entire Rhode Island Congressional Delegation.

SJR 14: Protecting Military Personnel Cuts and Base Closures
Sponsor Statement

"I believe that in the future, whoever holds Alaska will hold the world. I think it is the most important strategic place in the world."
- U.S. General Billy Mitchell to the U.S. Congress in 1935

Our primary concern must always be national defense and the security of the United States and Alaska. Alaska's geographic location is of vital strategic advantage for current and future missions, force mobilization, and offensive and defensive operations, and is of strategic importance on polar air routes.

Defense Secretary Panetta recently announced that the Pentagon will seek new rounds of military base closures as part of the budget-cutting process. Over the next five years, the Army will drop from 562,000 to 490,000 soldiers and the Marine Corps from 202,000 to 182,000 marines in an effort to cut $487 billion over the next decade. These cuts could have a devastating impact on Alaska's and our nation's security.

Alaska's military force is of great importance to our economy with 32 military installations, more than 23,000 active duty service members and more than 37,000 active family members, contributing approximately 13 percent to Alaska's economy.

During the 2005 Base Closure and Realignment Commission (BRAC), Eielson Air Force Base was originally designated for realignment. A strong community and state effort opposed the Department of Defense recommendation by pointing out the critical strategic importance of Eielson, the loss of training opportunities, and the fact that its realignment would not have produced the estimated savings DoD anticipated.

It is imperative the Alaska Legislature officially show our support for Alaska's military bases and personnel. Passage of SJR14 will send a message to the United States Department of Defense, U.S. Congress and the President that Alaska's military bases and service members are of strategic importance to the defense of our nation.

CS FOR SENATE JOINT RESOLUTION NO. 14(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, McGuire

A RESOLUTION

Urging the United States Department of Defense to protect military bases and military personnel in the state for the defense and protection of the state and the nation.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS United States Secretary of Defense Leon E. Panetta recently announced that the Pentagon will seek new rounds of military base closures as part of the budget cutting process; and

WHEREAS United States Secretary of Defense Leon E. Panetta stated that, in an effort to cut $487,000,000,000 over the next decade, the number of soldiers in the United States Army will drop over the next five years from 562,000 to 490,000, and the number of marines in the United States Marine Corps will drop over the next five years from 202,000 to 182,000; and

WHEREAS the nation's primary concern must always be national defense and the security of the United States, including Alaska; and

WHEREAS the geographic location of Alaska provides a vital strategic advantage for current and future missions, force mobilization, and offensive and defensive operations, including the state's strategic importance for polar air routes; and

WHEREAS the state's strategic global position has been recognized since World War II and is very important to the United States, providing a prime location to defend the United States against the potential aggression of hostile nations; and

WHEREAS, from bases in Alaska, the United States Air Force can gain quick access to the Pacific and European theaters and can transition across the Arctic to arrive in Europe faster than if flying from the East Coast of the United States; and

WHEREAS, with 32 military installations, more than 23,000 active duty service members, and more than 37,000 family members of active duty service members, the military force in Alaska is economically important; and

WHEREAS the 63,000 square mile range of the military complex in the state provides a unique training and readiness compound unlike any other in the world; and

WHEREAS Alaska serves as a site activation command for the United States Missile Defense Agency; and

WHEREAS the United States Department of Defense recognizes Alaska as an important strategic location, recently increasing and upgrading the missile defense capability in the state; and

BE IT RESOLVED that the Alaska State Legislature strongly urges the United States Department of Defense to protect Alaska's military bases and to keep the number of military personnel in the state intact for the defense and protection of the state and the United States.

COPIES of this resolution shall be sent to the Honorable Barack Obama, President of the United States; the Honorable Joseph R. Biden, Jr., Vice-President of the United States and President of the U.S. Senate; the Honorable Leon E. Panetta, United States Secretary of Defense; the Honorable Harry Reid, Majority Leader of the U.S. Senate; the Honorable John Boehner, Speaker of the U.S. House of Representatives; and the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.

Alaska politicians pledge to oppose military base cutbacks

By DAN JOLING
(01/27/12 16:24:34)

Defense Secretary Leon Panetta's announcement that the Pentagon will seek new rounds of military base closures drew a swift response from Alaskans who watched a similar process nearly gut Eielson Air Force Base in Fairbanks in 2005.

Alaska's congressional delegation and Gov. Sean Parnell issued a joint statement saying they will stand together to resist attempts to close or shrink Alaska bases.

"Alaska's military bases provide essential defense for the nation," Sen. Mark Begich, D-Alaska, said in the statement. "They are even more important with the administration's new focus on security concerns in the Pacific and with international attention on the changing Arctic."

Panetta at a news conference Thursday said the Army by will be cut by 80,000 soldiers, from 570,000 to 490,000, by 2017. He also called for additional rounds of base closures and realignment.

Under the closure process, defense officials submit a list of bases to a Base Closure and Realignment Commission. The commission analyzes the recommendations and sends its own list to the president, who can ask for more evaluation. The president eventually sends the report to Congress, which can pass a joint resolution to reject the full report. If Congress does not pass the joint resolution, the report becomes law.

The military in May 2005 recommended closure of 33 major bases and substantial reductions at 29 more. That included the recommended partial shutdown of Eielson Air Force Base, the sprawling air field in the Fairbanks North Star Borough, which housed a squadron of F-16 fighters and A-10 Thunderbolts. The Defense Department recommended Eielson for "warm" status, a part-time base where squadrons from other bases could use for training.

Begich, Parnell, U.S. Sen. Lisa Murkowski and Rep. Don Young on Thursday stressed Alaska's strategic importance to the nation, but an underlying issue is the role the military plays in the state's economy — 32 installations, more than 23,000 active duty service members, more than 37,000 active family members. It adds up to more than 13 percent of the state economy.

The Pentagon in 2005 projected Eielson's loss at 2,821 military jobs and 319 civilian jobs — just under 4 percent of the Fairbank North Star Borough population without counting 3,300 dependents. The military estimated a savings of $2.7 billion over 20 years at Eielson.

When the BRAC commission visited Fairbanks a month after the announcement, the community responded with fervor. More than 3,000 residents filled a civic center for the hearing. The late U.S. Sen. Ted Stevens, retired Air Force General Pat Gamble and retired Army Maj. Gen. Mark Hamilton, the current and former presidents of the University of Alaska, made impassioned statements in opposition to Eielson changes, noting its strategic importance on polar air routes and its location at the mid-way point of the trans-Alaska pipeline.

The testimony and show of community support worked. The base lost its A-10 warthogs but kept the F-16s and most permanent employees.

Young called Panetta's announcement unwelcome and not surprising, but said it's only the beginning of a long process that will include opportunities to support Alaska's military installations.

Begich said he supports saving money in nearly every area of the federal budget, including the cutting of overseas military bases, which are more expensive to operate and maintain.

"But requesting congressional approval to begin another domestic BRAC process in 2013, shortly after spending billions to complete the most recent BRAC round just doesn't make sense," he said.

Murkowski, who was serving her first term in 2005, said the military's increased commitment to Asia and the Pacific underscores the importance of Alaska bases.

"If the Defense Department is true to its strategy, contribution to the military mission should grow in the coming years," she said in the statement.

Department of Defense to Request Additional Base Closures and Realignments: Implications for Contractors and Communities

On January 26, 2012, Secretary of Defense Leon Panetta unveiled key features of the Obama Administration's defense budget request for fiscal year 2013. Among the key features of the Department of Defense's (DOD's) spending priorities for fiscal year 2013 will be a request that Congress authorize at least one more round of domestic military base realignments and closures (BRAC rounds). If approved by Congress, new rounds of base closures could have both positive and negative implications for government contractors. The actual fiscal year 2013 budget request will not be transmitted to Congress until February 13.

Base realignment and closure refers to a process designed to save costs and increase operational efficiency by closing excess military installations and realigning and redistributing the asset inventory among remaining defense bases. More than 350 installations have been closed in five previous BRAC rounds: 1989, 1991, 1993, 1995 and 2005.

New legislation would be required to implement another BRAC round. If the legislation followed the process in the most recent 2005 round, then DOD would submit recommendations for closure/realignment to an independent commission (the BRAC Commission), which may accept, reject or amend the DOD recommendations. The revised list is then submitted to the President for approval. In the 2005 BRAC Round, DOD recommended 190 closures and realignments, and the BRAC Commission approved 119 with no changes and accepted 45 others with modest amendments. The Commission rejected 13 DOD recommendations and significantly modified 13 others.

Because base closures are so politically charged, recent rounds have been structured to insulate base closure recommendations from the normal political aspect of lawmaking. Under these procedures, the President certifies the recommendations of the BRAC Commission and transmits them to Congress. Fast track parliamentary procedures have been established so that the entire package of recommended base closures automatically goes into effect unless Congress adopts a joint resolution of disapproval rejecting the package within 45 days of the President's submission or the adjournment *sine die* of the session of Congress, whichever occurs earlier.

Experience with past BRAC rounds has shown that base closures and realignments can save the government money, although the savings have proved more modest than many initial forecasts.[1] There are also significant fiscal, economic and environmental consequences that flow from base closures at the state and local level, including the loss of jobs and challenges

with developing and implementing a viable base reuse plan. There are also strategic and operational considerations associated with BRAC for DOD.

For affected communities and contractors alike, the ability to ensure potential candidates for closure or realignment survive can often depend on making a case that such action would be inconsistent with evaluation and closure criteria. It is not too early for state and local governments whose installations will be under scrutiny to begin developing a national security and business case to resist closure or realignment.

For contractors with business operations at military installations subject to potential closure or realignment, particularly companies in the construction and service industries, the prospect of another BRAC round can have significant financial consequences. At this stage, it is important to assess which bases with company operations are the most likely candidates for closure or realignment. Ultimately, business judgments will have to be made about whether and in connection with which bases a company should wage a campaign (because that is what it will take) to shape the perceptions and decisions of DOD and a future BRAC Commission.

Given the political environment, it seems unlikely Congress will authorize another round of base closures and realignments in an election year. Nevertheless, given the size of the federal deficit and debt ceiling, the weak economy and the imperative for DOD to achieve real long term savings required by the Budget Control Act of 2011[2] (not to mention the threat of sequestration), one or more future rounds of base closure seem inevitable. As Deputy Secretary of Defense Ashton Carter recently said, "If we have ... unneeded basing structure in our armed forces in a time when we're trying to deal with the deficit reduction, national security imperative that we face, how can we not put on the table unneeded basing structure?"[3] Businesses and communities that stand to be affected by another BRAC round should anticipate this eventuality and begin preparing now to protect their interests and be meaningful participants in the process.

February 2012

USAF Force Structure Changes: Sustaining Readiness and Modernizing the Total Force

New Strategic Guidance

For the last decade, the United States has undertaken extended operations in Iraq and Afghanistan. As we responsibly draw down from these operations, take steps to protect our Nation's economic vitality, and protect our interests in a world of accelerating change, we face an inflection point. The changing geopolitical environment and our changing fiscal circumstances merited a reassessment of U.S. defense strategy. Out of this assessment, the Department of Defense (DoD) developed a strategy that transitions our defense enterprise from an emphasis on today's wars to preparing for future challenges, protects the broad range of U.S. national security interests, advances the Department's efforts to rebalance and reform, and supports the national security imperative of deficit reduction by reducing defense spending. The resulting strategic guidance provided a set of precepts to guide decisions regarding the size and shape of the force over subsequent budget cycles.

To implement the new strategic guidance, the Joint Force will need to recalibrate its capabilities and make selective additional investments to succeed in the following missions: countering terrorism and irregular warfare, deterring and defeating aggression, projecting power despite anti-access/area denial challenges, countering weapons of mass destruction, operating effectively in cyberspace and space, maintaining a safe, secure, and effective nuclear deterrent, defending the homeland and providing support to civil authorities, providing a stabilizing presence, conducting stability and counterinsurgency operations, and conducting humanitarian, disaster relief, and other operations.

These missions will determine and shape the capabilities required by the future Joint Force, and the Air Force must continue to provide key capabilities in all 10 mission areas. However, the overall capacity, or size of the force, will be based on the requirements that the following missions demand: countering terrorism and irregular warfare, deterring and defeating aggression, maintaining a safe, secure, and effective nuclear deterrent, and defending the homeland and supporting civil authorities. U.S. forces will no longer be sized to conduct large-scale, prolonged stability operations.

The new guidance requires U.S. forces to remain capable of deterring and defeating aggression by any potential adversary. Credible deterrence results from maintaining both the capabilities required to deny an aggressor the prospect of achieving his objectives and from the complementary capability to impose unacceptable costs on the aggressor. Our planning envisages forces that are able to fully deny a capable state's aggressive objectives in one region by conducting a combined arms campaign across all domains – land, air, maritime, space, and cyberspace. Even when U.S. forces are committed to a large scale operation in one region, they

will be capable of denying the objectives of – or imposing unacceptable costs on – an opportunistic aggressor in a second region.

The Air Force employed this guidance to prepare an FY13 budget request that ensures the Air Force meets the capability and force-sizing requirements directed by the new strategic guidance, and is:

- Adaptable and capable of deterring aggression and providing a stabilizing presence, especially in the highest priority areas and missions in the Asia-Pacific region and the Middle East, while still ensuring our ability to maintain our defense commitments to Europe and other allies and partners;
- Ready, rapidly deployable, and expeditionary such that it can project power on arrival;
- Capable of conducting homeland defense and providing support to civil authorities;
- Armed with cutting edge capabilities that exploit our technological, joint, and networked advantage;
- Able to reconstitute quickly or grow capabilities as needed; and
- Manned and led by the highest quality professionals.

To deliver the capabilities required by the new strategic guidance and remain within funding constraints, the Air Force made difficult choices in all core functions, including the decision to divest portions of combat and combat enabler forces. The guiding principle was balance. To retain critical core capabilities and maintain our ability to rapidly respond to mission demands, the Air Force balanced risk to force structure and modernization, while maintaining readiness and people programs across all mission areas. We will provide more details about our FY13 decisions on modernization, readiness, and people programs in the coming weeks.

This paper will focus on the decisions we made to divest aircraft and re-mission units, with a particular emphasis on how these choices affect the Air National Guard (ANG) and Air Force Reserve. Our programmed reductions follow detailed assessments of future conflict scenarios and enduring rotational deployment requirements and were chosen to maintain capable and lethal forces while preserving ready and sustainable Active and Reserve Components. The Air Force will be smaller, but will remain highly capable, lethal, ready, agile, and deployable.

Air Force Aircraft Reductions

The Air Force FY 13 Budget Request achieves $8.7 billion in savings across the Active and Reserve Components by retiring over 200 aircraft in FY 13 and nearly 300 aircraft over the FYDP, consistent with the new strategic guidance. Our programmed force reductions are wide ranging and affect over 60 installations. Without the Total Force re-missioning actions described later in the paper, they would have significantly affected 24 units and left eight installations without an Air Force presence. They will have direct impact in 33 states, but in order to support Total Force re-missioning, the manpower realignment plan built by the Reserve Components will significantly

affect additional units in all 54 states and territories. We will be able to provide manpower adjustments by installation and state in the coming weeks.

Our analysis of requirements driven by the new strategy shaped all of our decisions. Our force sizing analysis answered two complementary questions: what is the maximum, or surge, requirement posed by the force sizing model of the new strategy; and what is the steady state, or post-surge, requirement for deployed rotational forces? Because the new guidance requires the Joint Force to be capable of fighting one large scale, combined arms campaign with sufficient combat power to also deny a second adversary, and deemphasized large-scale, prolonged stability operations, our FY13 budget request accepts risk by retiring fighter, mobility, and intelligence, surveillance, and reconnaissance (ISR) aircraft excess to the surge requirements of the new force sizing construct. Although the U.S. has removed all combat forces from Iraq and the new strategic guidance reduces the steady state requirement for ground forces, we expect Air Force steady state rotational requirements to remain nearly constant, or perhaps increase, under the new strategy. This continuing rotational post-surge requirement is a key factor in determining the required mix between Active and Reserve Component forces due to differences in sustainable deployment rates and operations tempo.

Where possible, we attempted to retire all aircraft of a specific type, allowing us to also divest the unique training and logistic support structure for that aircraft. Where that was not possible, we worked to retire the oldest aircraft first, and redistributed aircraft into effective and economical units, eliminating other units when that was most efficient. Where we retained older aircraft, we are taking steps to ensure they will remain viable into the future.

Combat Air Forces

As directed by the new strategic guidance, we accepted risk in our Combat Air Forces by retiring or reclassifying aircraft from seven squadrons: five A-10 squadrons, one F-16 squadron, and one training/support coded F-15 Aggressor squadron. Because of the Department's evolving posture, one of the retiring squadrons is an overseas squadron. We chose to retire more A-10s as a result of guidance to size our forces for one large scale combined arms campaign with sufficient combat power to also deny a second adversary, without conducting a large scale, prolonged stability operation. The A-10 remains essential for combined arms and stability operations and we retain enough A-10s to meet the requirements of the new strategic guidance, but multi-role platforms provide more utility across the range of the potential missions for which we are directed to prepare.

After reductions, we retain 54 combat-coded fighter squadrons and maintain the capabilities and capacity required to meet the requirements of new strategic guidance at increased risk while providing a bridge to the Fifth Generation F-35. Although we transfer five F-15 Aggressor aircraft to attrition reserve status and eliminate one Aggressor squadron flag, we maintain a robust Aggressor training capability. We will relocate our F-16 Aggressor squadron in Alaska from Eielson AFB to Elmendorf AFB, allowing us to achieve savings in base support at Eielson beginning in FY15.

Mobility Air Forces

We also reduced our mobility capacity in line with the requirements of the new strategic guidance and the parallel reductions in land forces, retiring all 27 C-5As, retiring or canceling procurement of all 38 planned C-27Js, and retiring the 65 oldest C-130s. We chose to retire C-5As because of historically lower mission capable rates relative to the C-17 and C-5M. Retiring the entire C-5A fleet provides additional savings in training and logistics support that could not have been achieved by spreading retirements over multiple aircraft types. Divesting the entire C-27J fleet also achieves savings by substituting the lower life cycle costs of the more capable C-130 for the niche C-27J capability. As part of our C-130 retirement strategy, we streamline operations and maintenance by realigning some additional C-130 aircraft to ensure Reserve Component units operate only one C-130 type at any location.

After retirements, we will maintain a fleet of 275 strategic airlifters (52 C-5Ms and 223 C-17s) and 318 C-130s (134 C-130Js and 184 C-130Hs) and our analysis shows that the remaining aircraft are sufficient to meet the airlift requirements of the new strategy, including our commitment for direct support of the Army. We appreciate Congress' support in adjusting the legislated mandatory number of strategic airlifters. Given the changes in strategy and force sizing, we will be seeking a new minimum of 275 aircraft.

We also retire 20 KC-135s and maintain a fleet of 453 air refueling aircraft, sufficient to meet refined requirements. KC-46 development remains on track for initial deliveries in FY16.

Intelligence, Surveillance, and Reconnaissance

Intelligence, surveillance, and reconnaissance reductions divest all 18 Block 30 RQ-4s, generating $2.5 billion in Future Years Defense Program (FYDP) savings by choosing to rely on the proven capability of the mature U-2S aircraft and sensors. The U-2 has superior sensor capabilities now, meets the new Joint Requirements Oversight Council (JROC) force structure requirement, and is viable through 2040. We generate additional savings by eliminating funding for all 11 RC-26s while transferring the more capable MC-12 fleet from the Active Component to the Air National Guard in FY14. We also retire one E-8C aircraft that is damaged beyond economical repair.

Reserve Component Aircraft Reductions and Re-Missioning

The Air Force has enjoyed great success in leveraging our Total Force Enterprise to present our enduring capabilities to the Joint warfighter, and we have successfully met the demand of increased operations tempo over the last two decades through a combination of volunteerism, selective mobilization, and the creation of Active, Reserve, and Guard Associations. The Air National Guard and Air Force Reserve are integrated into all major Air Force mission areas, train to the same high standards as the Active Component, and are invaluable partners in meeting our many and varied commitments. Over the years, we have adjusted the mix between Active and Reserve Components to ensure we maintained a ready and sustainable force and could meet our

surge and rotational requirements. However, two decades of military end strength and force structure reductions have shifted the ratio of Active to Reserve Component forces. In 1990, the Reserve Component represented 25 percent of the Total Force end strength; that percentage has increased to 35 percent today. Reserve Component aircraft ownership also increased from approximately 23 percent to 28 percent over the same period.

Our Reserve Components have proven to be a superb investment -- providing critical Air Force capabilities through a very challenging time. However, our analysis tells us we have reduced the Active Component to the point that further reductions would limit our ability to respond quickly to multiple crises or sustain long duration commitments without asking our Airmen – Active and Reserve Component – to deploy at rates that cannot be sustained by our Total Force Airmen and their families. We also know that the entire Total Force – Active Component, Air National Guard, and Air Force Reserve – depends on the Active Component to recruit, train, and equip the Airmen of the future. Further Active Component aircraft reductions would require detailed analysis to ensure we do not make the Active Component too small to provide the skilled aircrew, maintenance, and support personnel required to sustain the Total Force. Maintaining the appropriate Active/Reserve mix will remain critical to sustaining Air Force capabilities for forward presence and rapid response, meeting overseas rotational demands with a smaller force, and taking care of our most precious resource, our people.

As we were driven to consider reductions in FY13, we carefully considered the ratio between the Active and Reserve Components and made choices that:

1) Ensured the Total Force could fulfill the Air Force's surge requirements as directed by the force sizing construct of the new strategic guidance;
2) Maintained the balance between Active and Reserve Components required to fulfill continuing rotational requirements at deployment rates and personnel tempos that are sustainable for both the Active and Reserve Components;
3) Made sure the Active Component retained the recruiting, training, and operational seasoning base required to sustain the Active Air Force, Air National Guard, and Air Force Reserve into the future; and
4) Ensured the Reserve Component remains relevant and engaged in both enduring and evolving missions.

The Air National Guard and Air Force Reserve were involved in all analysis and decisions, and employed the following principles and strategies to build Reserve Component aircraft reduction and re-missioning plans.

The Air National Guard's Capstone Principles informed Air Force decisions involving the ANG:

1) Allocate at least one flying unit with ANG equipment to each state;
2) Recapitalize concurrently and in balance with the regular component;
3) Manage Air National Guard resources with Air National Guard people;

4) Adopt missions that fit the militia construct; and
5) Build dual-use capabilities.

The Air Force Reserve employed the following realignment strategies in selecting specific locations for aircraft reductions:

1) Ensure aircraft reductions do not negatively impact operational support to the Combatant Commands;
2) Ensure force structure movements do not create any new Air Force bills;
3) Ensure risk is minimized by optimizing crew ratios to exploit expected increase in mission capability rates; and
4) Considered locations that continued to have an Air Force mission due to the presence of another Air Force Component.

Total Force Aircraft Reductions by Fiscal Year

FY 13 Actions: Divests all C-27J aircraft, eliminating aircraft based at or planned for Warfield AGS (Martin State), MD (4), Kellogg AGS (Battle Creek), MI (4), Fargo AGS (Hector), ND (4), Mansfield Lahm AGS, OH (4), Great Falls, MT (4), Bradley , CT (4), and Key Field AGS (Meridian), MS (6). Removes A-10s from Barksdale AFB, LA (retires 21 and transfers three), Selfridge ANGB, MI (21), Ft Smith, AR (20), Ft Wayne, IN (20), and an Active Component overseas location (20). Removes F-16s from Des Moines, IA (21) and transfers Active Component F-16 Aggressors from Eielson AFB, AK (19) to Joint Base (JB) Elmendorf-Richardson, AK (19). Aircraft retirements and transfers result in net reductions of C-130Hs at JB Elmendorf-Richardson, AK (4 H2) (eliminating an Active association), Niagara, NY (3 H2) (eliminating a Reserve association), Rosecrans AGS (St Joseph), MO (10 H2.5), Youngstown-Warren, OH (6 H2), Louisville, KY (1 H2.5), Charleston, WV (1 H3), Cheyenne, WY (1 H2.5), Stratton AGS (Schenectady), NY (4 H2), Dobbins ARB, GA (7 H2), and Pittsburgh, PA (7 H2). The Pittsburgh actions result in the closure of the associated Air Reserve Station at Pittsburgh, PA (closure does not exceed Base Realignment and Closure (BRAC) threshold in accordance with 10 U.S.C. § 2687). Retires KC-135s from Rickenbacker, OH (6), Pittsburgh ANGB, PA (4), Tinker AFB, OK (4), and Altus AFB, OK (three Active Component) as well as three Backup Aircraft Inventory (BAI) aircraft from Sky Harbor (Phoenix), AZ (1), Sioux City AGS, IA (1), and March ARB, CA (1). Reduces KC-135s at McGhee-Tyson, TN (2) and Gen Mitchell, WI (2). Begins retirement of the C-5A fleet at JB San Antonio (Lackland AFB), TX (5) and eliminates an E-8C damaged beyond economical repair from Robins ARB, GA (1). Retires Active Component Block 30 RQ-4s from Beale AFB, CA (18).

Proposed FY 14 Actions: Removes C-130Hs from Maxwell AFB, AL (7 H2), Naval Air Station (NAS) Joint Reserve Base (JRB) Ft Worth (Carswell), TX (8 H2) and Minneapolis-St Paul (8 H3), and removes C-130Js from Keesler AFB, MS (10). Continues to retire C-5As at JB San Antonio (Lackland AFB), TX (3) and Shepherd Field AGS (Martinsburg), WV (5). Converts Active Component F-15Cs at Nellis AFB, NV (5) from Primary Aircraft Inventory (PAI) to BAI status. Transfers 42 Active Component MC-12s from Beale AFB to the Air National Guard.

Proposed FY 15 Actions: Retires remaining Air National Guard C-5As based at Shepherd Field (Martinsburg), WV (6), and additional Air Force Reserve C-5As at JB San Antonio (Lackland AFB) (2). Eliminates funding for all 11 RC-26 aircraft, retiring aircraft based at Ellington Field (Houston), TX (1), Kirtland AFB, NM (1), Tucson, AZ (1), Fresno, CA (1), Fairchild AFB, WA (1), Key Field (Meridian), MS (1), Dannelly Field, AL (1), Truax AGS (Madison), WI (1), Hancock Field AGS (Syracuse), NY (1), Charleston, WV (1), and Jacksonville, FL (1).

Proposed FY 16 Action: Completes retirement of the Air Force Reserve C-5A fleet by divesting the remaining aircraft at JB San Antonio (Lackland AFB), TX (6). Removes C-130H from Savannah, GA (8 H2) and Little Rock, AR (eight Active Component H3). Removes C5Ms from Westover, MA (8).

Proposed FY 17 Actions: Removes C-130Hs from Niagara, NY (8 H2), Little Rock, AR (three Reserve Component H2), Charlotte, NC (2 H3), and Little Rock AR (six Active Component H3).

Total Force Re-Missioning by Fiscal Year

As a Total Force – Active Air Force, Air National Guard, and Air Force Reserve -- we have developed a detailed re-missioning plan that realigns continuing missions to preserve 14 of 24 units, maintains an Air Force presence on seven of the eight affected installations, expands Reserve Component participation in our growing ISR mission, and preserves an appropriate Active and Reserve Component force mix. The Air Force FY13 budget request commits approximately $600 million over the FYDP to execute and sustain re-missioning actions that establish new MQ-1/9 Remote Split Operations Squadrons, transfer the MC-12 fleet to the Air National Guard, thicken Reserve Component ISR and cyber participation, and transfer Active Component C-17s to the Reserve Component.

FY 12 Actions: Transfers six WC-130 aircraft from Nashville, TN to Luis Munoz, Puerto Rico, replacing retiring C-130Es. Establishes an MQ-1/9 Remote Split Operations (RSO) squadron at Nashville. Enlarges Nashville's Intelligence Squadron into a Targeting Group and creates a new Cyber/ISR Group.

FY 13 Actions: Completing a FY12 PB action, transfers eight C-17s from the Active Component to the Air National Guard at Memphis, TN (replacing C-5As). Adds C-130Hs at Youngstown-Warren, OH (4 H2.5) and Cheyenne, WY (1 H3). Establishes an ISR Group and expands the Net Warfare Sq at Warfield AGS (Martin State), MD to replace divested C-27s; establishes an Intelligence Targeting Group at Fargo AGS (Hector), ND; creates four additional MQ-1/9 RSO elements at Ft Smith, AR (replacing A-10s), Des Moines, IA (replacing F-16s), Kellogg AGS (Battle Creek), MI (replacing C-27s), and Willow Grove, PA; adds KC-135s to Selfridge ANGB, MI (4). Adds A-10s at Whiteman AFB, MO (3).

Proposed FY 14 Actions: Transfers 42 Active Component MC-12s to the Air National Guard by assigning between nine and eleven aircraft to each of four Air National Guard locations -- Ft Wayne, IN (replacing A-10s), Bradley, CT (replacing C-27s), Key Field AGS (Meridian), MS (replacing C-27s), and NAS Ft Worth JRB (Carswell), TX (replacing C-130s). Creates an Active Association at Beale AFB, CA to conduct MC-12 training and provides an additional deployed Combat Air Patrol

forward using up to six Air National Guard aircraft. Final aircraft assignments for the four Air National Guard locations and the Active association at Beale will be determined as part of the Air Force's FY14 budget submission after completion of a program plan and operational concept. Transfers C-130Js to Dobbins ARB, GA (10) (replacing C-130Hs) and C-130Hs to Rosecrans AGS (St Joseph), MO (8 H3) and Great Falls, MT (8 H2) (replacing C-27s).

Proposed FY 15 Action: Transfers eight Active Component C-17s to the Air National Guard at Shepherd Field AGS (Martinsburg), WV (replacing C-5As).

Proposed FY 16 Action: Within the Air Force Reserve, transfers eight C-5Ms from Westover ARB, MA to JB San Antonio (Lackland AFB), TX, (replacing C-5As). Replaces C-130H2s at Savannah, GA (8) with C-130H3s. Replaces Active Component C-130H3s (8) at Little Rock AFB, AR with C-130H1 (7).

Proposed FY 17 Action: Dobbins ARB, GA receives two additional C-130Js for a total of 12. Replaces C-130H2s at Niagara, NY (8) with C-130H3s. Replaces Active Component C-130H3s (6) at Little Rock AFB, AR with C-130H1s (7).

After proposed reductions and re-missioning, Reserve Component end strength will make up 33 percent of Total Force military personnel, a reduction of two percent from the FY12 President's Budget (PB) position. The Reserve Component will own 24 percent of Total Force aircraft, two percent less than their FY12 PB share. Within the Combat Air Forces, the percentage of total aircraft in the Reserve Component will be 38 percent, four percent less than in FY12. For the Mobility Air Forces, the Reserve Component share shifts from 51 percent to 46 percent.

Additional Actions

In addition to specific re-missioning actions, the Air Force has also taken a variety of steps to secure the future of the Air National Guard and Air Force Reserve in a balanced Total Force.

Future Aircraft Flow Down

We remain committed to acquiring the F-35A as our future multi-role fighter. Although delivery of the F-35 has been delayed, it is still the future of both Active and Reserve multi-role squadrons. The Air Force has acquired 12 F-35s to date and plans to acquire over 160 more through FY17. The full-rate production plan is yet to be determined.

We have decided to pursue a scalable Service Life Extension Program (SLEP) for approximately 350 F-16s. Although our oldest F-16s will remain viable through the end of this decade, we plan to begin fielding aircraft with SLEP structural improvements in 2017. The program will ensure the F-16 remains viable and relevant for future Active and Reserve Component multi-role fighter squadrons until the F-35 arrives in greater numbers. We will also upgrade combat avionics for a substantial portion of the SLEP-ed aircraft with aircraft delivery beginning in FY18.

We are committed to developing a detailed aircraft flow down plan that describes how the F-35 and modernized and SLEP-ed F-16s will be integrated into the Total Force and replace aging aircraft. We will build a detailed plan after we have a clearer view of F-35 delivery schedules and

have completed Force Composition Analysis studies to determine the optimum Active and Reserve Component unit size and force mix for our remaining multi-role fighter force. As always, the leadership of the Air National Guard and Air Force Reserve will be active partners in determining this mix.

We are also committed to making sure our 184 remaining C-130H variants remain viable and relevant. We developed the C-130 Avionics Modernization Program (AMP) to ensure our C-130H fleet met basic communication, navigation, surveillance, and air traffic management (CNS/ATM) requirements. We later determined that there are less technically complex approaches to meet these requirements and resolve select obsolescence issues. Therefore, our FY13 budget submission terminates the C-130 AMP. However, we have funded an FY13 new start CNS/ATM program to ensure our C-130H fleet will remain viable and relevant, while generating more than $2.2 billion in savings over the FYDP.

Strategic Basing Process

The Air Force Strategic Basing Process was established by the Secretary of the Air Force in August 2009 to create an open, transparent, and consistent process for selecting preferred Total Force basing options. We will employ the Strategic Basing Process to identify preferred Active and Reserve Component basing locations for new aircraft as they become available as part of our recapitalization and modernization efforts.

BRAC 2005 established Eglin AFB as the Initial Joint Training Site for the F-35A. In July 2010, the Air Force announced preferred alternatives for further basing of the initial 250-300 F-35As, identifying Hill AFB and Burlington ANGB as the initial operational locations and Luke AFB as the next training location after Eglin, accommodating all F-35As currently scheduled for delivery through FY19. The Air Force will announce future preferred and reasonable alternatives approximately three years prior to delivery of aircraft to the next round of bases. Given current F-35 production estimates, the next set of F-35 basing decisions will include domestic and overseas bases and will not be required prior to FY17. Over the next two years, we will determine the optimum size of Active and Reserve Component F-35 units and the total number of required F-35 operating locations.

The Air Force is currently developing requirements for the first two KC-46 bases, and expects to approve basing criteria in March 2012, identify candidate installations in June 2012, select preferred and reasonable alternatives in December 2012, and make final decisions in December 2013. These first two bases will begin receiving aircraft in FY16. We will announce future preferred and reasonable alternatives approximately three years prior to delivery of aircraft to the next round of bases. Given current production estimates, the next KC-46 basing decisions will not be required prior to FY14. We are committed to creating associations at all KC-46 operating locations in the continental United States.

Potential Legislative Changes

In coordination with the Air National Guard and Air Force Reserve, the Air Force and the Department of Defense are reviewing the authorities that might be needed to address the impact

of programmed force reduction and re-missioning actions on the affected members of the Air National Guard, Air Force Reserve, and their families.

Air Force Total Force Enterprise and Associations

The Air Force Total Force Enterprise (TFE) management approach provides an inclusive, fact-based, and iterative process designed to maximize combat capability and optimize force structure through a range of innovative organizational constructs and personnel policies that optimize and integrate the capabilities of all Air Force components.

Associations are an integral part of balancing the Total Force to meet the current and future air, space and cyber requirements of the Joint warfighter. Total Force Integration (TFI) associations pair two units, (host and associate) representing two Air Force components, operating together. The host unit is assigned the physical resources for mission accomplishment (aircraft, equipment, facilities) and the associate unit shares those resources. Currently, there are three types of TFI associations: Classic, Active and Air Reserve Component (ARC).

Classic Associations pair units as an Active Component host with a Reserve Component associate which can improve operational synergies and add capacity during surge operations at reduced cost. Active Associations pair a Reserve Component host and an Active Component associate to improve access to aircraft and total rotational capacity by assigning Active Component Airmen in Reserve Component units, allowing the highly experienced Reserve Component to help develop and season maturing Active Component Airmen. ARC Associations pair a Reserve Component host and a Reserve Component associate to deliver operational and organizational efficiencies.

There are currently 100 TFI associations across a variety of weapons systems/functional areas and Air Force Major Commands. The Air Force is planning to add Active Associations at all ARC fighter locations, and Air Mobility Command intends to establish Active or Classic Associations at all continental U.S. KC-46 locations. The Air Force will continue to explore additional opportunities for associations in order to create efficiencies, encourage retention of valuable human capital, and above all, increase Air Force combat capabilities.

New Associations

The Air Force has decided to maintain 18 assigned F-16 aircraft at Air National Guard fighter squadrons to support new F-16 Active Associations at Truax AGS (Madison), WI, Buckley, CO, Joe Foss Field, SD, and Duluth, MN, in addition to the Associations already programmed at Burlington, VT, and Dannelly Field, AL. Although the previously programmed Active Association at Barksdale AFB, LA, is eliminated with the Air Force Reserve Command A-10 retirement, the Active Associations at Whiteman AFB, MO, NAS Ft Worth JRB (Carswell), TX and Homestead ARB, FL will continue as planned. The Chief of Staff of the Air Force has directed the Air Force to develop additional Active Associations at all ARC fighter locations to ensure that the Total Force is able to absorb and season enough young pilots and maintainers to meet future Total Force requirements.

The AF FY13 budget request also establishes C-130J Active Associations at Dobbins ARB, GA starting in FY14, Quonset Point Airport, RI in FY16, and Channel Islands, CA in FY17, as well as an

Active Association with a C-130H unit in FY13 at a location still to be determined. Additionally, Classic Associations will be established in intelligence at Fort Meade, MD, Offutt AFB, NE and Hurlburt Field, FL, and in program analysis at Wright-Patterson AFB, OH. We have also established a new association with the MC-12W mission transfer to the Air National Guard in FY 14. An Active Association will be stood up to operate the MC-12W Flying Training Unit at Beale AFB, using up to six Air National Guard aircraft. The Active Association will also provide one Combat Air Patrol (CAP) of deployed capability.

The Air Force previously funded a RED HORSE Active Association at Beale AFB, CA, as well as Classic Associations in cyber at JB San Antonio (Lackland AFB), TX; Aviation Foreign Internal Defense at a location to be determined; Security Forces at Davis-Monthan AFB, NM; and intelligence at Wright-Patterson AFB, OH, and JB Langley-Eustis, VA. In all, 15 new Associations are programmed, and the Air Force will explore additional opportunities for associations in our FY14 budget submission.

Military Personnel Appropriation Budget Activity Code

We are normalizing our approach to how we program ARC Military Personnel Appropriation (MPA) man day funding by improving the way we forecast, plan, program, and fund MPA man day accounts in our budget build process. These inputs will ensure adequate and predictable funding to support the required level of Reserve Component participation. Our normalization efforts include introducing MPA requirements into our corporate planning process earlier and working with the Office of the Secretary of Defense to create a distinct budget activity with a sub-account dedicated to facilitating more flexible Reserve Component operations, increasing opportunities for Reserve Component participation, and tracking MPA within the Air Force Military Personnel Account. If approved, we would expect to include this account in our FY14 budget submission.

Improving Strategic Planning Transparency and Processes

We have embarked on an effort to examine Active Air Force, Air National Guard, and Air Force Reserve composition across all the Air Force's major functions through the Total Force Enterprise Review Process and System Force Composition Analyses. The Total Force Enterprise Evaluation Group reviews and provides oversight of all Total Force Associations and ensures they have met the requirements for effective operations. Force Composition Analyses examine individual weapons systems or processes and make recommendations for an appropriate Active/Reserve Component mix based on analysis of combat requirements, Total Force capacity, and system and manpower costs.

Most importantly, we have strengthened and refined our corporate processes to ensure that the Air National Guard and Air Force Reserve are involved at every step of our analysis and decision making. Air Force senior leaders have directed that the Air Force Reserve and Air National Guard will continue to be fully represented during system Force Composition Analyses and will participate fully in development of the Core Function Master Plans that guide actions to organize, train and equip the Total Force in each core function.

Air Force Reserve Component 2020 Study

We believe the Air Force Reserve Components set the DoD standard for Total Force integration and operational effectiveness, but we must ensure that we continue to improve our performance and processes to maximize our contribution to the Joint Force of 2020 and beyond. The Chief of Staff of the Air Force and Reserve Component leadership are developing terms of reference to guide an independent study that will evaluate our on-going efforts to optimize the Total Force and make recommendations to guide and shape our future efforts. The study team will likely be led by a former Chief of Staff of the Air Force and will include a former Director of the Air National Guard and Chief of the Air Force Reserve.

Conclusion

We remain fully committed to the essential contributions of the Total Force and have taken proactive steps to:

- Address the impact of force structure reductions in our Reserve Components by re-missioning units with enduring missions and assigning aircraft with extended life spans and improved capabilities;
- Plan for robust use of associations as we field F-35 and KC-46 units;
- Increase the number of associations between existing Active and Reserve units;
- Normalize our management of Reserve Component man days; and
- Improve the transparency of Total Force planning and develop our Total Force vision for the future.

The future of the Air Force depends on sustaining strong and ready Reserve Components, and we believe the Air Force Total Force sets the standard for integrating Active and Reserve Components to improve efficiency and effectiveness in peace and war. The force reductions proposed in the Air Force FY13 budget request were developed in response to new DoD strategic guidance, informed by reduced funding, and shaped by analysis to ensure that the Total Force will continue to fulfill the Air Force's surge requirements and meet continuing rotational demand. We will ensure that the Reserve Component remains engaged and relevant as the Active Component maintains the recruiting, training, and operational seasoning base required to sustain the Total Force into the future.

Memorandum

TO: Senator Bill Wielechowski
Senate State Affair Committee Chair

FROM: Rep. Bill Stoltze

DATE: April 6, 2012

RE: Calendar Request for CS HB64 (FIN) "An Act relating to permanent motor vehicle registration; and providing for an effective date."

Mr. Chair,

I request that CS HB64(FIN) be calendared for a hearing before the Senate State Affairs Committee at the earliest possible time. My staff member Darrell Breese will be carrying the bill.

Attached is a sponsor statement, supporting material and a copy of the legislation for consideration.

Sponsor Statement
CS HB 64 (FIN)

"An Act relating to permanent motor vehicle registration; and providing for an effective date."

The purpose of CS HB64 (FIN) is to offer the choice of permanent registration for personal-use, non-commercial trailers and certain motor vehicles when applied for at the Division of Motor Vehicles.

Permanent Motor Vehicle Registration

- Would be available to motor vehicles that are eight years or older
- Would cost $25, in addition to the regular biennial registration fee
- Provide the owner with the option of selecting the regular two-year, biennial, registration
- Is not transferable when ownership of the vehicle changes

Permanent Trailer Registration

- Would allow the owners of non-commercial trailers the same access to permanent registration that the 20th Legislature (HB404) extended to the owners of commercial trailers in 1998
- Provide the owner with the option of selecting the regular two-year, biennial, registration
- Would cost $25, in addition to the regular biennial registration fee
- Is not transferable when ownership of the vehicle changes

If passed, CS House Bill 64 (FIN) will result in a savings of nearly $19 million annually for Alaskan consumers.

Please join me in supporting this important legislation.

CS FOR HOUSE BILL NO. 64(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE HOUSE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES STOLTZE AND KELLER, Costello, Neuman, Lynn

A BILL

FOR AN ACT ENTITLED

"An Act relating to permanent motor vehicle registration; relating to the registration fee for noncommercial trailers and to the motor vehicle tax for trailers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 28.10.108(a) is amended to read:

(a) Except for a vehicle registered under AS 28.10.152 **or 28.10.155**, a vehicle required to be registered under this chapter shall be registered under the procedures set out in this section.

*** Sec. 2.** AS 28.10 is amended by adding a new section to read:

Sec. 28.10.155. Permanent motor vehicle registration. (a) The owner of a motor vehicle, other than a commercial motor vehicle, that is required to be registered under this chapter may elect to permanently register the motor vehicle in lieu of registration under AS 28.10.108 if the vehicle is at least eight years old. The permanent registration expires when the owner transfers or assigns the owner's title or

interest in the vehicle. A permanent registration may not be renewed. On receiving the proper application and fees, the department shall issue to the registered owner registration plates, tabs, and a permanent registration form.

(b) The fees for permanent registration must equal the fees that would be applicable if the motor vehicle were registered under AS 28.10.108, plus a permanent registration fee of $25. The motor vehicle registration tax for a permanently registered vehicle is the rate established for permanent motor vehicle registration under AS 28.10.431(j)(2). If a municipality has not established a tax for a permanently registered motor vehicle, the biennial rate established in AS 28.10.431(b) or (j)(1), if any, is levied upon the vehicle and is payable only once at the time a motor vehicle is permanently registered. Except as provided in AS 28.10.423(b), the owner of a permanently registered motor vehicle is not required to pay other registration fees or taxes under this chapter.

*** Sec. 3.** AS 28.10.411(f) is amended to read:

(f) A resident 65 years of age or older on January 1 of the year the vehicle is registered or a resident with a disability that limits or impairs the ability to walk and who provides proof of that disability as provided in 23 C.F.R. 1235.2 is entitled to an exemption from the registration fee required under this section for one vehicle subject to registration under AS 28.10.421(b)(1), (2), **or** (5), or **(i)** [(6)]. An exemption may not be granted except upon written application for the exemption on a form prescribed by the department.

*** Sec. 4.** AS 28.10.421 is amended by adding a new subsection to read:

(j) When a person registers a trailer not used or maintained for the transportation of persons or property for hire or for other commercial use, including a boat trailer, baggage trailer, box trailer, utility trailer, house trailer, travel trailer, or trailer rented or offered for rent, the person may choose to pay a biennial registration fee of $30 or to permanently register the trailer. If the person permanently registers the trailer, the person shall pay the biennial registration fee plus a permanent registration fee of $25. If the person permanently registers the trailer, no additional registration fees are required if the same person who initially registered the trailer continues to own the trailer. A new owner of a trailer previously registered under this subsection

shall register and pay the biennial registration fee or the permanent registration fee as provided in this subsection. The motor vehicle registration tax for a permanently registered trailer is the rate established for permanent trailer registration under AS 28.10.431(j)(3). If a municipality has not established a tax for a permanently registered trailer, the biennial rate established in AS 28.10.431(b) or (j)(1), if any, is levied upon the trailer and is payable only once at the time a trailer is permanently registered. If the person pays the registration tax as required by this subsection and AS 28.10.431, no additional registration taxes are required if the same person who initially registered the trailer continues to own the trailer.

*** Sec. 5.** AS 28.10.423 is amended by adding a new subsection to read:

(b) In addition to the permanent registration fee established in AS 28.10.155, a $2 fee is imposed on the owner of each permanently registered motor vehicle required to be inspected under an emission control program established in AS 46.14.400 or 46.14.510. That fee shall be collected biennially.

*** Sec. 6.** AS 28.10.431(b) is amended to read:

(b) The biennial tax is levied upon motor vehicles subject to the registration fee under AS 28.10.411 and 28.10.421 and is based upon the age of vehicles as determined by model year in the first year of the biennial period, according to the following schedule:

	Tax According to Age of Vehicle Since Model Year:							
	1st	2nd	3rd	4th	5th	6th	7th	8th or over
Motor Vehicle								
(1) motorcycle	$ 17	$ 15	$ 13	$ 10	$ 7	$ 5	$ 4	$ 4
(2) vehicles specified in AS 28.10.421(b)(1)	21	99	77	55	39	28	19	16
(3) vehicles specified in AS 28.10.421(b)(3)	121	99	77	55	39	28	19	16
(4) vehicles specified								

in AS 28.10.421(c)(1)-(4)								
5,000 pounds or less	121	99	77	55	39	28	19	16
5,001-12,000 pounds	198	154	121	99	77	55	33	22
12,001-18,000 pounds	447	392	348	304	260	227	205	194
18,001 pounds or over	546	469	403	348	304	260	216	194
(5) vehicles specified in AS 28.10.421(b)(4)	198	154	121	99	77	55	33	22
(6) vehicles specified in **AS 28.10.421(i)** [AS 28.10.421(b)(6)]	17	15	13	10	7	5	4	4
(7) vehicles specified in AS 28.10.421(d)(8)	121	99	77	55	39	28	19	16
(8) vehicles specified in AS 28.10.421(b)(2)	121	99	77	55	39	28	19	16
(9) vehicles eligible for dealer plates under AS 28.10.421(d)(9).	88							

* **Sec. 7.** AS 28.10.431(c) is amended to read:

(c) **Except as provided in (m) of this section, the** [THE] registration tax shall be levied, collected, enforced and otherwise administered in the same manner as provided for the registration fee in this chapter. Only one registration tax may be collected with respect to the same motor vehicle in the year for which the tax is paid.

* **Sec. 8.** AS 28.10.431(j) is amended to read:

(j) A municipality that imposes a motor vehicle registration tax as described under (a) of this section may also**, by passage of an appropriate ordinance, (1)** increase the scheduled amount of tax described under (b) or (*l*) of this section**, (2) establish a tax for a motor vehicle that is permanently registered under AS 28.10.155, or (3) establish a tax for a trailer that is permanently registered under AS 28.10.421(i)** [BY PASSAGE OF AN APPROPRIATE ORDINANCE]. A municipality that chooses to change the tax imposed under (b) or (*l*) of this section **or**

establishes a tax for permanently registered motor vehicles or trailers shall file a written notice of the change with the department by January 1 of the year preceding the year in which the change in tax is to take effect. A municipality may not change the amount of the tax imposed under this section more than once every two years. The department may charge a municipality a one-time fee to cover the cost to the department of implementing a change under this subsection.

* **Sec. 9.** AS 28.10.431 is amended by adding a new subsection to read:

(m) The department may not collect a registration tax established by a municipality under (j)(2) or (3) of this section for a permanently registered motor vehicle or trailer if the amount of the tax is greater than $100 unless the tax is for a motor vehicle subject to registration under AS 28.10.421(c)(3) and (4).

* **Sec. 10.** AS 28.10.421(b)(6) is repealed.

* **Sec. 11.** This Act takes effect January 1, 2015.

Estimated SUPPLEMENTAL (FY12) operating costs _____ *(separate supplemental appropriation required)*
(discuss reasons and fund source(s) in analysis section)

Estimated CAPITAL (FY13) costs _____ *(separate capital appropriation required)*
(discuss reasons and fund source(s) in analysis section)

Why this fiscal note differs from previous version (if initial version, please note as such)

1) Updated the changes in revenue due to updated vehicle counts.
2) Eliminated reference to the I/M fee, since the I/M program in Alaska will no longer be in effect.

(Revised 11/18/2011 OMB)

FISCAL NOTE

STATE OF ALASKA **BILL NO.** HB064
2012 LEGISLATIVE SESSION

Analysis

The effective date for this bill is January 1, 2014.

Expenditures
The database for Division of Motor Vehicles (DMV) will need programming to allow for permanent registration of non-commercial vehicles.
Estimated hours: 400
Cost per hour: $143
Total programming cost: 400 x $143 = $57,200.

Revenues
Motor Vehicle Registration Tax (MVRT): The DMV collects MVRT for 16 communities: Anchorage, Bethel, Bristol Bay Borough, Cordova, Dillingham, Juneau, Kenai Peninsula Borough, Ketchikan Gateway Borough, Kodiak Island Borough, Matanuska Susitna Borough, Nenana, Nome, Petersburg, Sitka, Unalaksa, and Whittier.

Eight percent of the MVRT collected is retained by the state as collection costs. Although the increase or decrease in revenues from the collection costs are indeterminate, the revenues will change proportionately with the registration fees.

Registration Fees:
Assumptions:
1) 369,500 vehicles will be eligible for permanent registration in 2014 (based on currently-registered vehicles). Half (184.7) will renew in 2014 and half will renew in 2015.

2) Approximately 24,800 vehicles will become eligible each year. This is an average of the number of currently registered vehicles with model years 2007-2011.

3) Only 10% of owners will elect for permanent registration, based on the following:
a) The biennial registration fee established in AS 28.10.421 is $100 for most of the vehicles eligible for permanent registration, making the fee for permanent registration $300.
b) The largest quantity of vehicles in the state are in areas with the highest MVRT. Three times the MVRT for vehicles in Municipality of Anchorage or the Matanuska Susitna Borough would be $210.
c) An owner of an eligible vehicle would have to decide whether a vehicle that's already at least 8 years old will last another 6+ years to justify the additional payment for permanent registration, which would be as high as $340: permanent ($300 reg + $210 MVRT = $510) versus biennial ($100 reg + $70 MVRT = $170).
d) Many owners of older vehicles are likely in the middle to lower income brackets; these owners are less likely to have the extra funds available to opt for permanent registration.
e) It's very likely that a vehicle that is at least 8 years old will have a major component fail within the next six years. An owner who has the financial resources to pay the additional $340 for permanent registration would likely opt to replace the vehicle rather than repair it; consequently, DMV assumes few of those owners would opt for permanent registration.
f) The owners of eligible vehicles who do not opt for permanent registration the first year it's available won't opt for it in subsequent years.

4) All permanently registered vehicles will stay in service for the next 6 years and will not change ownership. Although some vehicles may go out of service, the assumption is that an owner won't opt to pay the extra fees for permanent registration if their vehicle is not in good mechanical shape.

Analysis Continued

Calculations

	2014	2015	2016	2017	2018
2014: 184.7 current vehicles eligible for perm reg					
18.47 opt for perm reg (184.7 x 10%)					
Increase from perm reg (18.47 x $300)	5,541.0				
Loss in biennial fees (18.47 x $100)	(1,847.0)		(1,847.0)		(1,847.0)
2015: 209.5 vehicles eligible for perm reg					
including 24.8 newly eligible					
20.95 opt for perm reg (209.5 x 10%)					
Increase from perm reg (20.95 x $300)		6,285.0			
Loss in biennial fees (20.95 x $100)		(2,095.0)		(2,095.0)	
2016: 24.8 newly eligible for perm reg					
2.48 opt for perm reg (24.8 x 10%)					
Increase from perm reg (2.48 x $300)			744.0		
Loss in biennial fees (2.48 x $100)			(248.0)		(248.0)
2017: 24.8 newly eligible for perm reg					
2.48 opt for perm reg (28.4 x 10%)					
Increase from perm reg (28.4 x $300)				744.0	
Loss in biennial fees (2.48 x $100)				(248.0)	
2018: 24.8 newly eligible for perm reg					
2.48 opt for perm reg (24.8 x 10%)					
Increase from perm reg (2.48 x $300)					744.0
Loss in biennial fees (2.48 x $100)					(248.0)
Total Estimated Revenue Increase/(Decrease)	3,694.0	4,190.0	(1,351.0)	(1,599.0)	(1,599.0)

Performance Measures

The DMV expects this bill will have very little impact on its performance measures.

1) Only about 11% of registration renewals are processed at a DMV office.
2) DMV estimates a maximum of 2,480 newly-eligible vehicles will be placed under permanent registration each year. This would result in a work load reduction of approximately one-tenth of one percent.

Economic Impact

Once the initial vehicles with permanent registration go out of service, there would be an annual increase of revenues of approximately $496 .0 ($744.0 - $248.0), assuming that 10% of owners opt for permanent registration. Since this won't happen until some time after 2018, this can't be reflected on the fiscal note.

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 64

Analysis

Currently, the local vehicle inspection and maintenance (I/M) programs rely on the vehicle registraion process to notify vehicle owners of I/M testing requirements and to make sure those requirements are met. Elimination of that registration process will require the department to develop a stand-alone system to replace what is being done now as part of the vehicle registration system. Additionally, the department will need to update the State's air quality plan to reflect this change to how the I/M programs operate.

The first-year costs are for contractual services to develop the stand-alone computer programs to generate notifications and to track compliance, and to amend the state air quality plan. This effort is funded with General Funds. FY13 is the latest date these activities can occur and be ready for a January 2014 effective date for permanent vehicle registration. The $8.0 in contractual expenses in FY14 and FY15 will cover off-cycle registration renewals.

Starting in FY16, one new administrative position, and associated one-time start-up costs, is added to implement the revised I/M notification system for permanently registered vehicles. This position will be responsible for notifying over 4,000 vehicle owners monthly of their inspection requirements, checking to see inspections are done and referring violations to the local government and will be funded with General Fund Program Receipts generated through this fee program.

Summary of version
CSHB64 – 27-LS0327\S

Section 2 – Establishes a new fee for Permanent Motor Vehicle Registration
– Establishes that permanent registration is available for non-commercial motor vehicles for vehicles eight years old or older and that transfer of permanent registration is not allowed.
– Sets the fee for permanent registration for eligible vehicles at the biennial fee (currently $100) plus $25 for permanent registration.

- Also establishes that the Motor Vehicle Registration Tax established by municipalities, boroughs or cities is only payable at the time of registration.

Section 3 – Makes reference to the addition of a Motor Vehicle Registration Tax for vehicles permanently registered (Section 8 of the legislation)

Section 4 - Establishes a new fee for Permanent Motor Vehicle Registration
– Establishes that permanent registration is available for non-commercial trailers and that transfer of permanent registration is not allowed.
– Sets the fee for permanent registration for eligible trailers at the biennial fee (currently $30) plus $25 for permanent registration.

- Also establishes that the Motor Vehicle Registration Tax established by municipalities, boroughs or cities is only payable at the time of registration.

Section 5 – Adds permanently registered vehicles and trailers to the list of vehicles required to pay a $2 if they are under an emission control inspection program. (Currently there is nowhere in the state with an I/M program.)

Section 6 – References Section 8 of the legislation (Page 4, line 9) with regards to the base rate for Motor Vehicle Registration Tax set by the state.

Section 7 – References Section 9 of the legislation as it relates to the collection of the Motor Vehicle Registration Tax.

Section 8 – Allows municipalities, boroughs and cities to set a Motor Vehicle Registration Tax rate for vehicles and Trailers that are registered permanently.

- This must be done by the passage of an ordinance by the local governing body and can only be done once every two years.
- The state (Division of Motor Vehicles must be notified of such changes by January 1 of the previous year in which the change takes effect.

Section 9 – Establishes that the State (DMV) may not collect a motor vehicle registration tax, for permanently registered vehicles or trailers, if the rate established by a municipality, borough or city is greater than $100.

House Finance Committee
Juneau, Alaska

RE: HB 64 and HB 10

Dear Committee Members,

The Alaska Municipal League originally came out strongly against HB64 and HB10, as they both repealed the authority of municipalities to levy vehicle registration taxes. AML and the municipalities addressed those concerns during hearings in House Transportation committee meetings.

Thanks to the work of the bill's sponsor, this issue has been corrected. Our main issue has been alleviated to a large degree, in that municipalities, under the new CS, would be allowed to adjust rates to compensate for potential losses due to permanent registration. We have received a spread sheet from Mr. Breese, in Rep. Stoltze's office that enables each municipality to get a fairly accurate idea of what that loss might be.

We are not in disagreement that the reduction of time spent in line with DMV could better be spent elsewhere.

While individual municipalities may still have some concerns, AML will attempt to make this legislation work.

Thank you,

Kathie Wasserman

February 22, 2011

Representative Peggy Wilson
House Transportation Committee
Juneau, Alaska 99811

RE: HB64: An Act relating to Permanent Motor Vehicle Registration and providing for an Effective Date.

Dear Representative Wilson,

The Alaska Municipal League would like to go on record as opposing HB64. While the intent of the bill may be a positive one, the implementation will negatively affect both the State and the municipalities of the State of Alaska that currently realize a tax revenue from vehicle registration fees.

The main purpose stated in the Sponsor Statement is to make the "DMV re-registration process more user-friendly to the owners of qualifying vehicles and lighten the work load for DMV employees."

This fee of $100 (or 5 times the regular registration fee, whichever is less) MAY realize increased revenues during the first year of implementation. However, each year after that, the State of Alaska and the participating municipalities will see revenue losses. It seems amazing to us that legislation would be introduced that would purposely decrease revenue to the State to improve a more "user-friendly process." To stand in line every two years or send in re-registration papers by mail is hardly one of those things that come up on most people's list of "things-most-dreaded." However, to continue to erode the tax base of municipalities, resulting in decreases in basic services, can negatively impact health and safety. This legislation affects approximately 63% of the cars currently on Alaska's roads. It is nearly impossible, however, to estimate the decrease, as each municipality does not necessarily have records that can easily be compiled.

One of the suggestions from the sponsor of the bill is that municipalities could bill for annual taxes. This would add an entirely new database and increased employees to municipal offices.

As supporters of HB 30 and SB37, we also feel that this loss of revenue to the State will severely impact the ability of the proposed Transportation Infrastructure Fund, as registration fees will be used as a potential funding source.

Again, we would request that HB64 not move beyond this committee due to the decreased revenues that will be realized by the State of Alaska and 16 of Alaska's largest communities.

Sincerely,

Kathie Wasserman

Kathie Wasserman
Executive Director

Montana Code pertaining to permanent motor vehicle registration

61-3-562. Permanent registration -- transfer of light vehicle ownership -- rules. (1) (a) The owner of a light vehicle 11 years old or older subject to the registration fee, as provided in 61-3-321(2), may permanently register the light vehicle upon payment of a $87.50 registration fee, the applicable registration and license fees under 61-3-412, if applicable, the administrative fee and the annual one-time-only donation fee for a generic specialty license plate under 61-3-480, and an amount equal to five times the local option motor vehicle tax or flat fee on vehicles under 61-3-537 and, as applicable, either:

(i) (A) the original fee and four times the renewal fee for personalized plates; or

(B) five times the renewal fees for personalized plates; or

(ii) if a new set of license plates is not being issued, an insurance verification fee of $5, which must be deposited in the account established under 61-6-158.

(b) The following series of license plates may not be used for purposes of permanent registration of a light vehicle:

(i) Montana national guard license plates issued under 61-3-458(2)(b);

(ii) reserve armed forces license plates issued under 61-3-458(2)(c);

(iii) amateur radio operator license plates issued under 61-3-422; and

(iv) collegiate license plates issued under 61-3-465.

(2) In addition to the fees described in subsection (1), an owner of a truck with a manufacturer's rated capacity of 1 ton or less that is permanently registered shall pay five times the applicable fees imposed under 61-10-201.

(3) The owner of a motor vehicle that is permanently registered under this section is not subject to additional registration fees or to other motor vehicle registration fees described in this section for as long as the owner owns the vehicle.

(4) The county treasurer shall once each month remit to the state the amounts collected under this section, other than the local option motor vehicle tax or flat fee, for the purposes of 61-3-321(2) and 61-10-201. The county treasurer shall retain the local option motor vehicle tax or flat fee.

(5) (a) The permanent registration of a light vehicle allowed by this section may not be transferred to a new owner. If the light vehicle is transferred to a new owner, the department shall cancel the light vehicle's permanent registration.

(b) Upon transfer of a light vehicle registered under this section to a new owner, the new owner shall apply for a certificate of title under 61-3-201 and 61-3-216 and register the light vehicle under 61-3-303.

HB 64 Change in Registration Fee for Old Cars

Currently Registered Old Cars in Anchorage

Total passenger cars in Anchorage of all ages	190768	Total Number of registered passenger cars in 2010 from DMV website
Percent of passenger cars in Anchorage older than 8 years	63%	Percent older than 8 years from Feb 14 email from Alaska Municipal League (Leslie Peters)
Number of cars in Anchorage older than 8 years	120,184	Number of Vehicles in Anchorage currently older than 8 years = percentage over eight years * total number of registered passenger cars.. Half of these currently registered cars would renew their registration in 2012 and half in 2013.
Percent electing permanent registration	40%	Assumed. Change as necessary to investigate alternative scenarios
Percent of old cars that leave state or no longer register each year	10%	Assumed. Change as necessary to investigate alternative scenarios. Percent of current registered old cars that would no longer pay any type of registration fee each year either because they break down or leave the state.

Cars that age to more than 8 years each year in Anchorage

Number of cars that age from seven years old to eight years old each year.	8,823	This is the number of currently registered cars that become eligible for permanent registration each year because they age from seven years to eight years old = (Total number of registered passenger cars minus number of passenger cars more than eight years old) / 8. This assumes that the total cars that are less than eight years old are distributed evenly across each age class. In other words, 1/8 of the cars less than eight years old are one year old, 1/8 are two years old, 1/8 are three years old, and so on.
Percent electing permanent registration	40%	Assumed, Change as necessary for alternative scenarios.
Percent of old cars that leave state or no longer register each year	10%	Percent of current registered old cars that would no longer pay any type of registration fee each year either because they break down or leave the state.
Biennial fee for cars older than 8 years	70	Biennial registration fee effective in Anchorage starting in 2012 from Section 16 of AO 2010-81(S)
Permanent registration fee	100	Optional new permanent fee specified by HB 64. The permanent fee would be the minimum of either $100 or 5 times the biennial fee. Since $100 is less than $350 (=5*$70), the old cars would have the option of paying $100 as the permanent fee in Anchorage.

		2012	2013	2014	2015	2016	2017	
Current: Passenger Cars older than 8 years								
Number of cars that are currently 8 years or older and opt for permanent registration and change each year	24,037							Number of cars opting for permanent registration each year = number of cars older than eight years / 2 * percentage electing permanent registration
Revenues received from permanent registration		2,403,677	2,163,309					Gain of Permanent fees = number that opting for permanent registration * permanent registration fee.
Revenues lost from old cars that no longer pay biennial fee.		(1,682,574)	(1,514,316)	(1,362,885)	(1,226,596)	(1,103,937)	(993,543)	Loss of Biennial Fees = number of cars opting for permanent registration * biennial registration fee.
Additional Passenger Cars that age to more than 8 years								
Number of cars that are currently 8 years or less and age each year to over 8 years and opt for permanent registration	3,529							Number of additional cars that age to more than eight years and opt for permanent registration each year = number of cars that age to more than eight years * percentage electing permanent registration
Revenues received from permanent registration		352,921	317,629	285,866	257,279	231,551	208,396	Gain of Permanent fees = number of cars that age to more than eight years and opt for permanent registration * permanent registration fee.
Revenues lost from old cars that no longer pay biennial fee.		(247,045)	(222,340)	(200,106)	(180,095)	(162,086)	(145,877)	Loss of Biennial Fees = number of cars that age to eight years and opt for permanent registration * biennial registration fee.
Total Change in Revenues		**826,979**	**744,281**	**(1,277,125)**	**(1,149,412)**	**(1,034,471)**	**(931,024)**	**Sum of all revenue losses and gains for all old cars.**

TO: Senator Bill Wielechowski
Senate State Affair Committee Chair

FROM: Rep. Bill Stoltze

DATE: April 6, 2012

RE: Calendar Request for CS HB64 (FIN) "An Act relating to permanent motor vehicle registration; and providing for an effective date."

Mr. Chair,

I request that CS HB64(FIN) be calendared for a hearing before the Senate State Affairs Committee at the earliest possible time. My staff member Darrell Breese will be carrying the bill.

Attached is a sponsor statement, supporting material and a copy of the legislation for consideration.

CS FOR SENATE JOINT RESOLUTION NO. 15( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS OLSON, McGuire, Giessel, Dyson, Huggins, Wagoner, Wielechowski, Meyer, Menard, Egan, Davis, Thomas, Stedman, Stevens

A RESOLUTION

Urging the United States Congress to fund all the facilities and vessels necessary for the United States Coast Guard to fulfill its Arctic missions, including icebreakers and an Arctic Coast Guard base.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the purchase of Alaska in 1867 made America an Arctic nation; and

WHEREAS Alaska was admitted to statehood in 1959; and

WHEREAS Alaska deserves full recognition and assistance from the federal government like any other state; and

WHEREAS art. IV, sec. 4, of the Constitution of the United States, requires the United States to protect each of the states against invasion and does not specify a preference for protection of one state over any other; and

WHEREAS the United States Arctic Region Policy revised in 2009 calls for the protection of commerce, the protection of the environment, and improved safety, security, and reliability of transportation in the Arctic region; and

WHEREAS ice cover in the Arctic is at historic lows, and multiyear ice is decreasing;

and

WHEREAS the entire Arctic region, including the Arctic region of the United States, is experiencing increased human activity related to shipping, oil and gas development, commercial fishing, tourism, and other activities; and

WHEREAS the increased activity in the Arctic underscores a commensurate need for immediate investment in the Arctic region of the United States to enable the responsible development of resources, foster maritime commerce, safeguard the well-being of Arctic residents and ecosystems, facilitate emergency and disaster preparedness and response, and protect United States sovereignty; and

WHEREAS the Alaska Northern Waters Task Force, established in 2010, recommends that the Alaska State Legislature encourage the federal government to establish a United States Coast Guard base in the Arctic and to fund the construction of additional icebreakers and ice-capable vessels for the United States fleet; and

WHEREAS, as Northern sea routes open and foreign shippers set their sights on Asian markets, international shipping of oil and gas and other potentially hazardous cargo through the Bering Strait is rapidly increasing; and

WHEREAS the United States and its trading partners could reap economic benefits from accessing Northern sea routes with the help of modern, fully equipped icebreakers; and

WHEREAS the United States Coast Guard has 11 statutory missions, including search and rescue, marine safety, ports, waterways, and coastal security, drug interdiction, migrant interdiction, defense readiness, living marine resources, marine environmental protection, aids to navigation, ice operations, and other law enforcement; and

WHEREAS the United States Coast Guard's missions relate to protecting the public, the environment, and United States economic interests in the nation's ports and waterways, along the coast, on international waters, and in any maritime region, as required for national security; and

WHEREAS the National Contingency Plan further requires the United States Coast Guard to oversee oil spill planning and preparedness in coastal waters and to supervise oil spill response; and

WHEREAS the United States Congress and the Administration are mandated by numerous laws and policies to maintain icebreaking operations; and

WHEREAS those mandates include President Franklin D. Roosevelt's 1936 Executive Order 7521, which requires the United States Coast Guard to keep channels and harbors open to navigation by means of icebreaking operations; the Arctic Research Policy Act of 1984, which directs the United States Office of Management and Budget to build and deploy icebreakers and allocate funds necessary to support icebreaking operations; the Coast Guard Authorization Act of 2010, which requires the United States Coast Guard to promote safe maritime navigation by means of icebreaking where necessary, feasible, and effective; and the 2011 Unified Command Plan, which sets new boundaries and responsibilities for the United States combatant commands, and directed the United States Northern Command to take the lead in advocating for new resources in the Arctic; and

WHEREAS the binding Arctic Search and Rescue Agreement signed by the eight Arctic nations at the Arctic Council in May 2011 commits the United States to search and rescue response within the Arctic sector of the United States, including waters north of Alaska, Bristol Bay, and the Bering Sea; and

WHEREAS the promise to provide search and rescue operations in the Arctic sector of the United States is compromised without sufficient icebreakers and other United States Coast Guard assets; and

WHEREAS the January 2012 delivery of fuel to Nome, Alaska, by the Russian fuel tanker Renda, escorted by the United States Coast Guard's only polar class icebreaker, Healy, emphasized the need for increased United States icebreaker presence in the Arctic; and

WHEREAS, at present, the United States has only one polar class icebreaker in service, the United States Coast Guard Cutter Healy, a vessel designed for scientific research and response operations; and

WHEREAS a second polar class icebreaker, the United States Coast Guard Cutter Polar Star, is undergoing extensive repairs in Seattle, Washington, and is scheduled to return to service in 2013, at which time it is predicted it should function effectively for only another seven to 10 years; and

WHEREAS the United States Coast Guard Cutter Polar Star's sister ship, the United States Coast Guard Cutter Polar Sea, was taken out of service in 2011; and

WHEREAS Russia has a fleet of eight nuclear-powered icebreakers; China has one large icebreaking research ship supporting science in both polar regions and is building a

second, smaller but more powerful icebreaking research ship that is scheduled to be ready in 2013; Canada has committed $38,000,000,000 to a 30-year plan to build additional icebreakers and other ice-strengthened ships; and Sweden, Finland, South Korea, and Japan have added icebreakers to their fleets; and

WHEREAS the United States Coast Guard estimates that designing and constructing a new polar class ice breaker will take seven to 10 years; and

WHEREAS having a sufficient number of ice-capable vessels, including shallow-draft vessels with icebreaking capability, is vital for the United States Coast Guard to fulfill its expanding mission in the Arctic; and

WHEREAS the United States Coast Guard has very limited Arctic emergency response capabilities and no permanent bases near the Bering Strait chokepoint or on Alaska's North Slope to support the United States Coast Guard operations; and

WHEREAS the most northern United States Coast Guard base in the United States in Kodiak, Alaska, is more than 1,000 miles from possible Chukchi Sea drilling sites and nearly as far from existing Arctic shipping lanes in the Bering Strait, and that distance causes untenable logistical problems that negatively affect response times and capabilities; and

WHEREAS the United States Coast Guard should have a greater overall presence in the Arctic, with the ability to stage assets closer to future shipping, oil and gas drilling, and commercial fishing activities;

BE IT RESOLVED that the Alaska State Legislature urges the United States Congress and the Administration to fund all facilities and vessels necessary to enable the United States Coast Guard to fulfill its Arctic missions, including icebreakers and an Arctic Coast Guard base; and be it

FURTHER RESOLVED that the Alaska State Legislature urges the United States Congress and the Administration to consider all options to finance the refurbishment of our current polar class icebreakers, the acquisition of new icebreakers, and the long-term maintenance funding of the United States Coast Guard icebreaker fleet and Arctic facilities.

COPIES of this resolution shall be sent to the Honorable Barack Obama, President of the United States; the Honorable Hillary Rodham Clinton, United States Secretary of State; the Honorable Sergey Viktorovich Lavrov, Minister of Foreign Affairs of the Russian Federation; the Honorable Erkki Tuomioja, Minister for Foreign Affairs of Finland; the

Honorable Carl Bildt, Minister for Foreign Affairs of Sweden; the Honorable Jonas Gahr Støre, Minister of Foreign Affairs of Norway; the Honorable John Baird, Minister of Foreign Affairs of Canada; the Honorable Össur Skarphéðinsson, Minister for Foreign Affairs and External Trade of Iceland; the Honorable Villy Søvndal, Minister for Foreign Affairs of Denmark; the Honorable Admiral Robert J. Papp, Commandant, United States Coast Guard; Ambassador David A. Balton, Deputy Assistant Secretary for Oceans and Fisheries, United States Department of State; Rear Admiral Thomas F. Ostebo, Commander, United States Seventeenth Coast Guard District; the Honorable Sean Parnell, Governor of Alaska; the Honorable Mead Treadwell, Lieutenant Governor of Alaska; the Honorable Lisa Murkowski and the Honorable Mark Begich, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress; and all other members of the 112th United States Congress.

SJR 15 – Coast Guard Icebreakers & Arctic Base

SPONSOR STATEMENT

The Alaska Northern Waters Task Force's Final Report was released January 30, 2012. SJR 15 formalizes two of the Task Force's recommendations and calls for the United States to:

1. Forward base the US Coast Guard in the Arctic, and
2. Fund icebreakers and other ice capable vessels.

The entire Arctic region is experiencing increased human activity related to shipping, oil and gas development, commercial fishing, and tourism and this increased activity leads to a commensurate need for immediate investment in the United States Arctic to enable the responsible development of resources; foster maritime commerce, safeguard the well-being of Arctic residents and ecosystems; facilitate emergency and disaster preparedness and response; and protect United States sovereignty.

The Coast Guard's mission in the Arctic is broad and it's becoming increasingly clear that the Coast Guard lacks the necessary assets to adequately complete its mission – without a corresponding increase in Arctic investment by the United States, this deficiency will only worsen over time. Having a sufficient number of ice-capable vessels (including shallow-draft vessels with icebreaking capability) is vital for the Coast Guard to fulfill its expanding mission in the Arctic.

Congress and the Administration are mandated by multiple laws and policies to maintain icebreaking operations, including:

- A 1936 Executive Order from President Franklin Roosevelt

- The Arctic Research Policy Act of 1984
- The Coast Guard Authorization Act of 2010, and
- The 2011 Arctic Search & Rescue (SAR) Agreement

Should a tragedy – such as the recent wreck of the cruise ship Costa Concordia in Italy – occur in the Arctic, the Coast Guard would be hard pressed to respond with sufficient assets in a timely fashion given their single Polar Class Icebreaker and their nearest base being in Kodiak, over 900 miles away from Alaska's Arctic coast.

Other countries fully understand the need for more Icebreakers in the Arctic:

- Russia has a fleet of eight nuclear powered icebreakers;
- Canada has committed $38 billion to a 30-year plan to build additional icebreakers and other ice-strengthened ships;
- Sweden, Finland, South Korea, and Japan have recently added icebreakers to their fleets; and
- China has a large icebreaking research ship and will have a second vessel operational in 2013

Considering it will take from seven to ten years to design and construct just one new Polar Class icebreaker, it is time critical that the U.S. fund & construct additional Icebreakers. Delay on this action will inevitably lead to undesirable consequences for the United States in the Arctic.

The Coast Guard must have a greater overall presence in the Arctic, with the ability to stage assets closer to future shipping, oil and gas drilling, and commercial fishing activities. I urge your support for this resolution.

Statement for the Record
The Honorable Mead Treadwell
Lieutenant Governor
State of Alaska
Before the
United States House of Representatives
Committee Transportation on Transportation and Infrastructure
Subcommittee on Coast Guard and Maritime Transportation

"America is Missing the Boat"
December 1, 2011
Washington, D.C.

Introduction

Mr. Chairman, members of the Committee, Congressman Young, for the record, I am Mead Treadwell, the lieutenant governor of the State of Alaska. Thank you for inviting me to offer some views from Alaska about the future of Arctic shipping and maritime activities, and the need to ensure we are prepared to embrace those challenges and opportunities safely.

We've said it before – in my appearance before this Subcommittee in 2006 and in Governor Sean Parnell's Senate testimony in 2009,[1] and we'll say it again, because not much has changed: it is time for the nation to act – and act now – to add new polar class icebreakers to the United States Coast Guard's fleet. With so much happening in the North today, the need is more urgent and apparent than ever. We would like to ask this Committee, and by extension Congress and the Executive Branch, to look with us at the bigger picture – the historic changes happening in the Arctic and what they portend for world commerce and Alaska's shores – and recognize three imminent needs:

First, the United States must commission new heavy icebreakers to operate in the Arctic.

Second, we need legal measures in addition to icebreakers to protect our shores from the dangers of unregulated itinerant vessels carrying hazardous cargoes near our coasts.

And third, Congress and the Administration must fulfill the legal mandates that are already in place regarding icebreakers. These mandates reflect needs in commerce, science, and protection of Americans' sovereignty, safety, and security. The State of Alaska is responding to opportunities and risks associated with the historic changes in global shipping patterns resulting from changes in the Arctic Ocean. We are eager to continue in cooperation with the nation.

I. Congress needs to act now on icebreakers.
A. Other nations have already seen the big picture.

[1] Governor Sean Parnell made the case for icebreakers in the Arctic in his 2009 testimony before the Senate Subcommittee on Homeland Security Appropriations, stating, "The Coast Guard needs to move north and improve its capability – our heavy class icebreakers are on their last legs."

The purchase of Alaska in 1867 made America an Arctic nation, yet after 150 years, the myth of Seward's Folly still lingers. It's time to quit arguing whether investment in the North is worth it and recognize the valuable people, resources and location we gained as a nation.

Arctic resources include globally significant quantities of commercial fisheries, minerals, renewable energy sources, and world-class amounts of oil and gas. A 2008 U.S. Geological Survey estimates 13% of the world's undiscovered oil, and 23% of undiscovered gas lies in the Arctic. Six of the Arctic nations are already pursuing oil and gas development offshore, and energy may soon be the primary cargo transiting the Bering Strait.

America is one of only eight Arctic nations, and one of two with territory adjoining the Bering Strait – really a "Bering Gate," the only route from the Pacific to the Arctic.

Changes in the Arctic are creating opportunities in a once remote and harsh region. Ice cover is at historic minimums, and multi-year ice is decreasing. Icebreaking technology has advanced, bringing significant new efficiencies. Northern sea routes, sought by explorers for hundreds of years, are opening up.

Several sources report that international shipping of crude oil, refined products, and other potentially hazardous cargoes through the Bering Strait is growing rapidly as European and Asian shippers see the advantages of the Arctic route. Other Arctic – and even non-Arctic – nations have seen the potential, but America is missing the boat.

Most traffic occurs under arrangements for icebreaker escort by vessels working with Russia's Northern Sea Route Administration. We understand that last year, for the first time, Norway's Tschudi Shipping Company worked a partnership with Russian maritime authorities to bring 41,000 tons of iron ore from Kirkenes, Norway to China.

Again this year, Russian ships, and ships of other nations escorted by Russia's Northern Sea Route Administration, are coming in force. Hazardous cargoes are making the backhaul as well – at least one tanker bringing gas condensate to Asia this year is reported to have returned to Europe with aviation fuel.

In August of this year, Norway's *MV Nordic Barents* was the first non-Russian bulk cargo ship to transit the Northern Sea Route in Russian waters.

Other records are being set along the Northern Sea Route, from the *STI Heritage's* fastest-ever voyage from Murmansk to Thailand, transiting in just eight days, to the *Perseverance's* latest-ever northern voyage, which ended just two weeks ago on November 18. Altogether, the Northern Sea Route saw nine tankers carrying 600,000 tons of gas condensate pass by this year.

I joined an Arctic conference in Arkhangelsk, Russia in September, where Russia's Prime Minister Vladimir Putin told the Russian Geographical Society that his country sees the opportunities in the Arctic, and they are ready to pounce. Speaking of the Northern Sea Route at the Russian Geographical Society conference, Putin told us, "We are planning to turn it into a

key commercial route of global importance. … We see its future as an international transport artery capable of competing with traditional sea routes in cost of services, safety, and quality."[2] President Medvedev, dedicating a new northern rail project in Yakutsk – headed for the Bering Strait – indicated as much last month.

Russia intends to make the Northern Sea Route as important to global shipping and commerce as the Suez Canal.

And Russia is putting its money where its mouth is, building nine new icebreakers in the next decade, and discounting tariffs on icebreaker escorts to make sure that shippers find the Northern Sea Route for distance savings of up to 40 percent. Russia's claim to new extended continental shelf resources in the Arctic Ocean under the United Nations Convention on the Law of the Sea could give Russia greater control of Arctic shipping. Cargo moving through the Bering Strait this year – from Russian and American sources – is worth well over $1 billion. Add to that a Bering Sea fishery owned by both nations worth billions each year and the situation is clear: in monetary terms, there's billions to be made and billions to protect.

At the same Arkhangelsk conference, Russia's Academy of Sciences Vice President Nikolai Laverov showed a slide of Alaska's declining throughput in the Trans-Alaska Pipeline System (or TAPS) and Russia's competitive success in attracting Arctic investment. All Arctic energy production depends on access, and Russia has it. Russia is now in the lead in Arctic oil production – and they're keen to stay there.

Meanwhile, other Arctic and circumpolar nations are investing in fleets of icebreakers. The report of exactly how many ships are being operated by other countries varies (some count polar, medium and light icebreakers, as well as ice 'strengthened' or 'capable' vessels), but all the tallies make one thing clear: other nations have seen the writing on the wall and are investing in infrastructure. Sweden has at least four vessels; Finland, at least six; and Russia over two dozen (and counting). Canada has about eight, and even the European Union is constructing an icebreaker – a heavy, polar class icebreaker.[3]

Our Arctic neighbors are leaps and bounds ahead of our position, and non-Arctic nations are in hot pursuit.

A Chinese researcher, Mr. Li Zhenfu of Dalian Maritime University, writes that, "Whoever has control of the Arctic route will control the new passage of world economics and international strategies."[4] The prospect of commercial and strategic opportunities presented by receding sea ice cover and accessibility of Arctic resources has moved the Chinese government to allocate more resources for Arctic research, and they have asked to join the Arctic Council as an observer. China's Rear Admiral Yin Zhuo has asserted that no nation has sovereignty over the

Arctic, and said that China must plan to have an indispensable role in Arctic exploration as they have one-fifth of the world's population.[5]

Japan has stepped up its research in global environment, climate and marine science in the Arctic. And with China and Korea, Japan has applied for permanent observer status on the Arctic Council.

Polar air routes have characterized the jet age since the late 1950s, and Arctic air transport is now key to air cargo bound between North America or Europe and Asia. Governments and industries in Russia, Europe and Asia see the same potential for shipping. Why don't we?

B. Our national mandates are not being met.

The irony of America's present situation is painful: a staggering national debt weighs on the future of our children, while the contributions of a promising and abundant region go largely unnoticed. When we ask you for icebreakers, it's for safety, security, and American jobs. It's to serve American shipping, American exports. It's to help lower costs for Americans in regions like Western Alaska, which has a higher cost of living than anyplace in the nation. Americans lack jobs, our industries struggle with the cost of doing business, and rural Alaskans suffer the staggering cost of energy, while huge amounts of foreign energy are beginning to pass by our front door in tankers, taking advantage of game-changing shipping opportunities.

The United States is falling behind in maintaining an Arctic presence and in helping to set best practices as this region sees increasing international resource development and shipping. But more importantly, we are failing in our own national mandates, goals and policy.

In 1936, President Franklin Roosevelt issued Executive Order 7521, directing the Coast Guard, under the direction of the Secretary of the Treasury and with the cooperation of the Secretaries of War (Army), the Navy, and Commerce, to keep channels and harbors open to navigation by means of icebreaking operations. That order has never been implemented in the Arctic.

The Arctic Research and Policy Act of 1984 recognized that the United States was lagging behind other circumpolar nations even then, and it directs the Office of Management and Budget to "seek to facilitate planning for the design, procurement, maintenance, deployment and operations of icebreakers needed to provide a platform for Arctic research by allocating all funds necessary to support icebreaking operations, except for recurring incremental costs associated with specific projects, to the Coast Guard."

Last year's Coast Guard Authorization Act of 2010, section 307, implements the Arctic Marine Shipping Assessment (AMSA), mandating that the Coast Guard "shall promote safe maritime navigation by means of icebreaking where necessary, feasible, and effective..." That makes

President Roosevelt's order the law of the land for the entire nation. We welcome this mandate as Alaska has half the nation's coastline, and likely over half of America's ice.

That act also required that a report on the comparative cost-benefit analyses of icebreaker renovation or construction be delivered no later than October 15 of this year to the Senate Committee on Commerce, Science and Transportation, and the House Committee on Transportation and Infrastructure. It moreover required a report from the Commandant of the Coast Guard on the High-Latitude Study assessing the polar icebreaking requirements for Coast Guard missions, including search and rescue, marine pollution response and prevention, fisheries enforcement, and maritime commerce. We understand that full report is embargoed still by President Obama's administration.

This past spring, the President updated the United States military's Unified Command Plan to give U.S. Northern Command advocacy responsibility for Arctic capabilities. Accompanying shifts of UCP geographic boundaries mark the military's awareness of the vital and ever-growing importance of the Arctic. Then Commander of the Northern Command, U.S. Navy Admiral James Winnefeld, Jr., recognized the implications of the changing Arctic, and noted the gaps faced by the military, including infrastructure and mobility, and search and rescue capabilities.[6] General Charles Jacoby, his successor, formerly ran the U.S. Army in Alaska. He, too, knows our challenges.

Around the same time as this spring's announcement, a report by the National Research Council on the implications of climate change on national security cited major gaps in U.S. naval forces' ability to perform their missions in the Arctic.[7] That report advised that the U.S. Navy, Marine Corps and Coast Guard take action to ready themselves for Arctic conditions. The protection of our domestic security is the fundamental mandate of the U.S. Armed Forces, and it is threatened if we remain unprepared.

This year, in response to the recommendations of AMSA, the eight Arctic Council nations signed a binding Search and Rescue Agreement. Alaska supported this, and sent experts to the first multinational exercise conducted under this agreement in October in Whitehorse, Yukon Territory. Without icebreakers and other Arctic USCG assets, major deficiencies in the region's life safety response capabilities exist – and our promise to provide search and rescue in our sector of the Arctic is compromised.

Finally, the United States Congress, in the 2010 Coast Guard Authorization Act, charged the Committee on Marine Transportation Services (CMTS) to develop an integrated Arctic shipping regime, and to coordinate the establishment of domestic transportation policy to realize the goal set by President George W. Bush of safe, secure and reliable shipping in the Arctic. The AMSA Implementation Act, additionally, encourages the Coast Guard to negotiate agreements with

other Arctic nations through the International Maritime Organization. Those agreements would focus on aids to navigation; marine safety, tug, and salvage capabilities; oil spill prevention and response capability; maritime domain awareness (including long-range vessel tracking); and search and rescue.

The United States has been protecting our sovereign airspace along Alaska's shores for over 50 years. The United States Coast Guard has been protecting America's coast for over 200 years. Why don't we protect our sovereign waters along Alaska's Arctic coast with the same vigor?

America has a duty to protect its citizens in coastal communities and to safeguard their way of life. Coastal Alaskans have spent thousands of years relying on the sea for their food and clothing, for the heat they create from whale oil and the shelter they derive from driftwood. The majority of Alaska Natives in the North get more than half of their meat and fish from wild, local harvests. Sixty percent of those wild harvests are from marine mammals. It is imperative we ensure that the increasing foreign ship traffic off our shores does not jeopardize the freedom of Americans to maintain a subsistence lifestyle.

Mr. Chairman, the United States has a long history of national mandates and policy that require our action. And yet we fail to act on them. Moreover, the recent decision of the U.S. House of Representatives to retire the nation's only heavy icebreaking ships without replacements is a disappointment. But to the extent that the all-or-nothing approach forces a legitimate conversation about the need for icebreakers and an opportunity to spotlight the conversation – I applaud the decision.

We should, however, be cautious about the risky "game of chicken." If it fails, it fails Americans – and Alaskans most of all.

C. The savings and benefits outweigh the costs.

We understand that the action we are asking Congress to take will require significant funds. We understand the costs, but we cannot ignore our obligations or the major opportunities we face.

In a conference recently in Juneau, University of Alaska Professor Dr. Lawson Brigham, a former USCG icebreaker captain, noted that the U.S. Navy is building 47 Littoral Combat Ships at a price of $400-500 million each. He asked, why not consider building 45 of these ships, and allocating that other $800 million to $1 billion in the budget for the Coast Guard to build one major polar icebreaker?

Some have argued we should charge for icebreaker escort services as other nations do. Ship owners pay for services in the Panama and Suez Canals. U.S. vessels pay for oil spill preparedness and insurance. A bill pending in this Congress would have the U.S. lease, rather than own, icebreakers it needs in the Arctic. Long term charter agreements are in place in the Antarctic, and it has been argued that private contractors are able to build icebreakers more quickly and less expensively, operate them more efficiently in terms of cost and maintenance, and would bear the expense of decommissioning. This is worthy of consideration if it moves us forward faster in the Arctic.

However we work out our finances, America and its trading partners could reap huge economic benefits from accessing northern sea routes. Former U.S. Coast Guard Lieutenant Commander Scott Borgerson wrote nearly four years ago about the financial advantages available to world commerce through Arctic shipping.[8] He told us how plying the Northern Sea Route from Rotterdam to Yokohama instead of traveling via the Suez Canal would yield distance savings of more than 40 percent. He told us that one container ship voyage from Seattle to Rotterdam via the Northwest Passage instead of the Panama Canal could save about 20 percent of its costs – then about $3.5 million dollars.

Borgerson envisioned a future of global Arctic shipping where "a marine highway directly over the North Pole will materialize. Such a route," he wrote, "which would most likely run between Iceland and Alaska's Dutch Harbor, would connect shipping megaports in the North Atlantic with those in the North Pacific and radiate outward to other ports in a hub-and-spoke system."

As the Arctic Marine Shipping Assessment predicted, most Arctic shipping traffic today is destinational, carrying resources out from or products in to Arctic regions. But we need to envision a time, coming soon, when products travelling to and from non-Arctic ports traverse our Arctic Ocean and Bering Sea – and we need to be ready.

II. Our lack of legal protection.

I want to make sure Congress understands there are now two classes of ships operating in the Bering Strait region – those that are under contingency planning requirements for oil spills, and those that are not. U.S. vessels are highly regulated: by NOAA, by EPA air quality controls, by the Interior Department's BOEM and BSEE oversight of exploration – in fact, over 120 federal laws regulate the use of the coastal zone and offshore areas. But ships originating outside the U.S. – such as those traveling between Russia or Europe and Asia, are not even required to have a spill contingency plan, even though they pass by hundreds of miles of U.S. coastline. We face the prospect of increasing international ship traffic through the Bering Strait – carrying anything from crude oil to aviation fuel – with minimal requirements to prepare for oil spills, maintain air quality, or care for wildlife and subsistence needs.[9]

Icebreakers can help us reduce the risks brought about by that disparity. If we are to achieve our policy of advancing safe, secure and reliable shipping as the Arctic Ocean becomes more accessible, the U.S. must operate new polar class icebreakers. Without them, little or no appropriate government capability exists to enforce prevention measures or to respond to a spill in this region. It is folly to rely on aircraft and submarines alone to protect U.S. interests. We learned that tragic lesson when we lost six lives as a helicopter crashed trying to evacuate crew from the shipwrecked *Selendang Ayu* in 2004.

---

[8] Borgerson, Scott G. "Arctic Meltdown: the Economic and Security Implications of Global Warming." *Foreign Affairs*, vol. 87, no. 2.

[9] The State of Alaska has sought remedies to this situation in its comments on the USCG Port Access Route Study for the Bering Strait.

There are a range of legal ways and international agreements we might pursue to require safety measures from itinerant vessels transiting the Bering Strait. (None are quick or easy solutions, but measures that protect our national security rarely are.)

- Working on a vessel routing system to prevent collisions and groundings from increased shipping, following protocols of the International Maritime Organization, and coordinating with the Russian Federation. The State of Alaska provided comments to the USCG's Port Access Route Study for the Bering Strait regarding this approach.

- Having all Arctic nations seek ship owners' participation in an Oil Spill Response Organization with a contingency plan, perhaps as part of the upcoming Arctic Council Oil Spill Preparedness and Response Agreement. Alaska has joined U.S. delegations negotiating this agreement.

- Resolving the debate on Law of the Sea, and ratifying the Law of the Sea Treaty, which with Article 234 authorizes the extension of environmental law in traditionally ice-covered areas. As the debate on ratification continues, the State has asked for clarification of U.S. intent in implementing Article 234.

- Using existing authority in the Oil Pollution Act of 1990 to cover nontank vessels and working a reciprocal deal with Russia and Canada. The Final Rule on Nontank Vessel Response Plans and Other Vessel Response Plan Requirements Regulations is still under development within the Coast Guard and the Department of Homeland Security. Section 701 of the Coast Guard Authorization Act of 2010 directs that this final rule be issued no later than April 15, 2012.

- Forming an agreement with Canada and/or Russia similar to the 1817 Rush-Bagot Agreement, creating a mechanism like that of the St. Lawrence Seaway Development Corporation, whereby Arctic nations establish a shipping authority that administers the route, provides compliance, icebreaking, and other aids to navigation, including spill preparedness and response. (Borgerson also suggested this in his 2008 article, "Arctic Meltdown".)

III. How Alaska is helping America live up to the promise of the Arctic.

Mr. Chairman, Congress spoke last year in the Coast Guard Authorization Act of 2010 and AMSA Implementation, and charged the Committee on Marine Transportation System with this mission: to coordinate the establishment of domestic transportation policy to ensure safe and secure maritime shipping in the Arctic. I would like to say for the record now that as these processes get underway, we need to be ambitious, creative, and determined. The United States must acknowledge its responsibilities and embrace new possibilities. The Arctic needs resources, not just rules. What's happening in the Arctic Ocean and along northern sea routes has global, historic and exciting significance, and we need to take an active role. We must plan for an Arctic shipping future that could be like a new Suez Canal.

In a visit to D.C. last month, I briefed the leaders of CMTS in some activities the State of Alaska is conducting to help America move toward the new world of Arctic shipping, and how we are bringing resources to the table to help to achieve safety, create jobs, and spur exports of goods and services. We are hopeful the CMTS will mesh with the outcome of our current work with the Arctic Council, the International Maritime Organization, and the U.S. Coast Guard and Army Corps of Engineers, and Alaska's Northern Waters Task Force.

Below is a non-comprehensive list of these activities:

- **Arctic Council:** The State of Alaska actively supports the United States' work within the Arctic Council, and I serve as our state's liaison on Council issues. As we support the Council's work to implement recommendations of the 2009 AMSA, the State is active in implementing the Arctic Council's aforementioned Search and Rescue Agreement, signed at the Ministerial in Greenland this past May. We are likewise a participant in the Council's oil spill response instrument negotiations. In addition, through the Pacific Northwest Economic Region (PNWER), Alaska is bringing resources and support for the Arctic Council Sustainable Development Working Group's proposed aviation and maritime infrastructure project, which will survey the region's infrastructure needs.

- **USARC/Research programs:** Alaska is also deeply involved in Arctic research. I work closely with the U.S. Arctic Research Commission (USARC), which I chaired under Presidents Bush and Obama from 2006-2010, and served on from 2001-2010 as a Commissioner, and which is currently chaired by Ms. Fran Ulmer, former lieutenant governor of Alaska and former chancellor of the University of Alaska Anchorage. Our University is currently working hard to launch the newest ice-strengthened research vessel, the Sikuliaq (see KOO lee auk), in the nation's NSF-sponsored UNOLS fleet. Moreover, with the University vice president, I co-chair a State Committee on Research which is writing a research and development plan that assesses Alaska's research and development needs for our economy, health, safety, environment, and culture. Alaska researchers play a major role in our understanding of Arctic change and Arctic resources, Arctic engineering and methods of spill response in ice-covered waters.

- **USCG forward basing:** In Alaska we are supporting the U.S. Coast Guard's efforts to bring forward basing to Alaska's North Coast, and we're examining ways we can help provide hangars for fixed and rotary wing aircraft in Barrow and Nome. The Alaska National Guard air-refuelable helicopters and aircraft, as well as helicopters of the North Slope Borough, are America's front-line for search and rescue in the Arctic Ocean today – Coast Guard response is based much further away.

- **New and improved ports:** The State of Alaska has also joined with the U.S. Army Corps of Engineers to conduct a port study for western and northern Alaska. Our intent after the study is to foster investment to establish a deep water port in Western Alaska to serve as a port of refuge for Coast Guard vessels and itinerant traffic. The port would also meet the needs of large vessels, including fishing fleets, and resource export vessels. At the same time, we see a need to upgrade the minimal port facilities which now exist for cargo import and export in a range of Western Alaska communities.

- **Shuttle container shipping:** In 2006, the State of Alaska committed $50,000 for the first pre-feasibility study on transarctic container shipping, looking at the economics and logistics of trans-shipping containers from North America and Asia between Aleutian and Icelandic ports, thus tying North Atlantic and North Pacific shipping together through the Arctic. The results of the study are promising.[10] Recently, we have heard interest to look at this again from Aleutian, Asian and European ports that would send and receive cargo in such a system. One option to consider as we proceed would be to include this work under the Arctic Council's proposed Arctic Maritime and Aviation Transportation Infrastructure Initiative.

- **Early warning system:** The State is a major financial sponsor of the Automatic Identification System receiver network established by the Marine Exchange of Alaska, which now covers all traffic operating in the Arctic region, approaching or leaving the Bering Strait and the Aleutian Archipelago. The network provides location data and advanced warning to the U.S. Coast Guard and state emergency responders of all ships approaching state waters, and gives us – and communities – a heads-up on traffic, including stalled itinerant vessels that might be headed for a shipwreck.

- **Review of new regimes for shipping administration:** Last year, Alaska's State Legislature created the Northern Waters Task Force (NWTF).[11] This task force is charged with examining the effects of changes in the Arctic on shipping, energy and local industry and making recommendations on infrastructure and regulatory needs, mitigation strategies, and ways for the State to be involved in governance of Arctic shipping. NWTF will present their report to the Legislature in January of 2012. Early discussions indicate that international cooperation and investment in oil spill response capabilities will be among the measures recommended.

Conclusion

Mr. Chairman, members of the Committee, Alaska has and will continue to work hard on Arctic policy because we are America's Arctic – it's our home, our history, our heritage and our future. And we work hard with high hopes for outcomes.

But we ask for the U.S. to work hard with us. To reiterate, Mr. Chairman, we ask for three things.

First, we need icebreakers. Without action on this, America is putting its national security on the line, and we are going to miss the opportunities of the Arctic while watching other nations advance. Good policy only goes so far without the infrastructure to act upon it. We have mandated icebreakers more than once. We're missing the boat. Let's build them.

---

[10] Niini, M., M. Arpiainen, and R. Kiili. *Arctic shuttle container link from Alaska, US to Europe.* Report AARC K-63. Aker Arctic Technology Inc., Mar. 2006.

[11] Alaska State Legislature, HCR 22, Legislative Resolve No. 54 (2010), Establishing and relating to the Alaska Northern Waters Task Force. Available online: http://housemajority.org/coms/anw/pdfs/26/Scan001.pdf.

Second, while we wait for new icebreakers, we need to take legal action to protect our coasts and prevent spills in the Arctic and Aleutians. We made this clear in our comments to the U.S. Coast Guard's Port Access Route study, and we urge the U.S. to step up the pace.

And third, the federal and state governments need to continue working together through the CMTS and Arctic Council processes to ensure that America does not miss out on the historic, game-changing opportunities in Arctic shipping. Arctic shipping presents safety challenges for sure. But for America, it is an opportunity, and one that could pass us by.

Alaska encourages America's new shipping policy to be ambitious. It should keep us safe, create jobs, help improve the quality of life in Western Alaska, and generate goods and service exports, as polar aviation does today. We need to grasp the historic opportunities of the changing Arctic. America has been an Arctic nation for 150 years. It's time we started acting like it.

Thank you.

FROM USCG AUTH. ACT OF 2010

SEC. 307. ARCTIC MARINE SHIPPING ASSESSMENT IMPLEMENTATION.

(a) Purpose- The purpose of this section is to ensure safe and secure maritime shipping in the Arctic including the availability of aids to navigation, vessel escorts, spill response capability, and maritime search and rescue in the Arctic.

(b) International Maritime Organization Agreements- To carry out the purpose of this section, the Secretary of the department in which the Coast Guard is operating is encouraged to enter into negotiations through the International Maritime Organization to conclude and execute agreements to promote coordinated action among the United States, Russia, Canada, Iceland, Norway, and Denmark and other seafaring and Arctic nations to ensure, in the Arctic--

(1) placement and maintenance of aids to navigation;
(2) appropriate marine safety, tug, and salvage capabilities;
(3) oil spill prevention and response capability;
(4) maritime domain awareness, including long-range vessel tracking; and
(5) search and rescue.

(c) Coordination by Committee on the Maritime Transportation System- The Committee on the Maritime Transportation System established under a directive of the President in the Ocean Action Plan, issued December 17, 2004, shall coordinate the establishment of domestic transportation policies in the Arctic necessary to carry out the purpose of this section.

(d) Agreements and Contracts- The Secretary of the department in which the Coast Guard is operating may, subject to the availability of appropriations, enter into cooperative agreements, contracts, or other agreements with, or make grants to individuals and governments to carry out the purpose of this section or any agreements established under subsection (b).

(e) Icebreaking- The Secretary of the department in which the Coast Guard is operating shall promote safe maritime navigation by means of icebreaking where necessary, feasible, and effective to carry out the purposes of this section.

(f) Independent Ice Breaker Analyses-

(1) IN GENERAL- Not later than 90 days after the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating shall require a nongovernmental, independent third party (other than the National Academy of Sciences) that has extensive experience in the analysis of military procurements, to--

(A) conduct a comparative cost-benefit analysis, taking into account future Coast Guard budget projections (which assume Coast Guard budget growth of no more than inflation) and other recapitalization needs, of--

(i) rebuilding, renovating, or improving the existing fleet of polar icebreakers for operation by the Coast Guard;

(ii) constructing new polar icebreakers for operation by the Coast Guard;

(iii) construction of new polar icebreakers by the National Science Foundation for operation by the Foundation;

(iv) rebuilding, renovating, or improving the existing fleet of polar icebreakers by the National Science Foundation for operation by the Foundation; and

(v) any combination of the activities described in clause (i), (ii), (iii), or (iv) to carry out the missions of the Coast Guard and the National Science Foundation; and

(B) conduct a comprehensive analysis of the impact on all Coast Guard activities, including operations, maintenance, procurements, and end strength, of the acquisition of polar icebreakers described in subparagraph (A) by the Coast Guard or the National Science Foundation assuming that total Coast Guard funding will not increase more than the annual rate of inflation.

(2) REPORT- Not later than 1 year after the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating shall submit a report containing the results of the analyses required under paragraph (1), together with recommendations the Commandant considers appropriate under section 93(a)(24) of title 14, United States Code, to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives.

(g) High-Latitude Study- Not later than 90 days after the date of enactment of this Act or the date of completion of the ongoing High-Latitude Study to assess polar icebreaking mission requirements for all Coast Guard missions including search and rescue, marine pollution response and prevention, fisheries enforcement, and maritime commerce, whichever occurs later, the Commandant of the Coast Guard shall submit a report containing the results of the study, together with recommendations the Commandant considers appropriate under section 93(a)(24) of title 14, United States Code, to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives.

(h) Arctic Definition- In this section the term 'Arctic' has the same meaning as in section 112 of the Arctic Research and Policy Act of 1984 (15 U.S.C. 4111).

Marine Transportation

Introduction

Within the next ten to twenty years, the loss of perennial sea ice is expected to open Arctic waters for a part of each year to new shipping routes. Maritime powers have been searching for a shorter route from the Atlantic to Asia for centuries. The melting Arctic raises the possibility of two such routes:

- The Northern Sea Route runs along Russia's northern border from Murmansk to Providenya and could be used for trade between northeast Asia and northern Europe.
- The Northwest Passage runs through the Canadian Arctic Islands and the Alaskan Arctic Ocean and could be used for trade between northeast Asia and North America.

Source: Hugo AhleniUS, UNEP/GRID- Arendol

The economic benefits of these new routes could be significant. Of the two sea lanes, the Northern Sea Route holds particular promise due to superior depth, summers freer of ice, and comparatively direct routing. Therefore, it is anticipated that this will be the preferred Arctic sea lane in the near future. Ships sailing between East Asia and Western Europe could save more than 40% in transportation time and fuel costs by navigating this route instead of the Suez Canal.

Currently, most Arctic marine traffic is destinational, delivering goods and supplies to the Arctic or transporting minerals out of the region. In 2006, it was estimated that some 6,000 vessels operated in or transited the Arctic in tourism, minerals mining, oil and gas exploration, military operations, and other activities. Today this number has reached more than 7,000, and many nations are actively building more ships designed to operate in Arctic waters. Notably, traffic related to eco-tourism is expanding rapidly in the region. In 2004, an estimated 1.2 million passengers visited the Arctic; by 2007 this number had doubled.

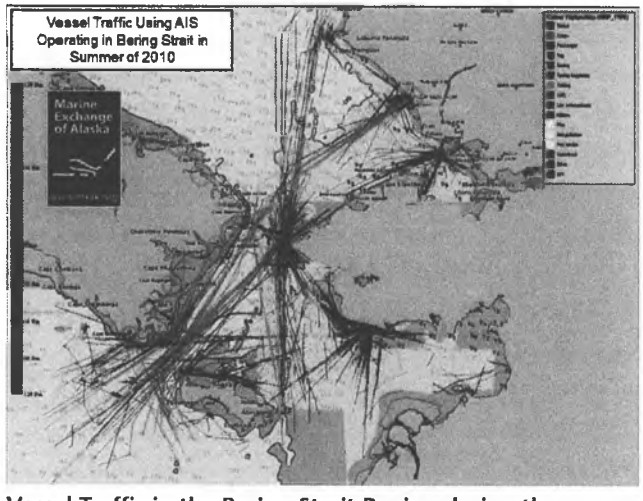
With increased shipping and marine traffic comes increased risk of vessel groundings, spills, collisions, pollutants, noise disturbances, and invasive species. This risk is particularly high due to the lack of detailed navigational charts, reliable weather forecasting, vessel traffic separation protocols, search and rescue infrastructure, and overall maritime domain awareness throughout the Arctic.

Based on these factors the ANWTF makes the following recommendations:

1. The ANWTF Recommends that the United States Work with the International Community to Finalize the Polar Code and Establish a Bering Strait Vessel Traffic Separation Scheme.

Maritime shipping is regulated through international treaties that establish standards for the safety and security of maritime operations. These standards are agreed upon through the International Maritime Organization (IMO), an agency of the United Nations.

Currently, ships navigating the Arctic are governed by the same requirements as any other open water ships. The IMO



Vessel Traffic in the Bering Strait Region during the summer of 2010 as depicted by the Marine Exchange of Alaska.

needs to finalize the Polar Code to supplement international maritime and environmental conventions that already apply in the Arctic. The Polar Code can provide additional requirements regarding rescue equipment, passenger safety, firefighting, ice navigation, and navigation in uninhabited areas. Additionally, the code can include requirements for ship construction, design, equipment, crew training, and operations. The IMO should also consider measures or regulatory frameworks to provide safety mechanisms for the regions of the central Arctic Ocean beyond coastal state jurisdiction.

The Polar Code is currently being drafted, and the rules are expected to be in force by 2014. The United States and Alaska should be actively involved in discussions with the IMO to ensure that Alaska's unique needs are met.

The United States and Russia need to begin a process with the IMO of establishing Bering Strait routing measures.

Clearly, all transient traffic in the future, regardless of the route taken, must transit the Bering Strait. This remote, narrow, and hazardous international strait is located in an environmentally sensitive area with little to no search and rescue or maritime disaster-response capability within 800 miles. Increased vessel traffic in the future will make this area particularly vulnerable to maritime disasters. It is only prudent that basic routing measures and vessel monitoring systems be put in place to reduce the risk of calamity in the Bering Strait.

2. The ANWTF Recommends the Establishment of Non-Tank Vessel Rules and Standards for Arctic Transit.

Today the most likely environmental threat to the Arctic is an incident involving a non-tank vessel. These are typically large commercial vessels with fuel tanks in excess of one million gallons of fuel and related hazardous cargos. These vessels make up the greatest percentage of transits, and they have proven over time to be the vessels most likely to experience an accident that puts them in jeopardy of sinking or running aground. Non-tank Vessel rules will require these vessels to meet more stringent standards of responsible-party requirements and allow government agencies to provide greater oversight.

Immediate implementation of the USCG Non-tank Vessel Response Plan (NTVRP) rules would advance development of a response capability as well as marine firefighting and salvage capacity in the Aleutians. This is critical in an area of the state that supports the largest commercial fishery in the country. This rule would require vessel response plans for non-tank vessels calling in U.S. ports. In combination with the tank vessel rule already in place, this rule would place the burden of providing sufficient salvage, firefighting, and response capabilities on all vessels passing through the Aleutians that call on U.S. ports. The requirement to comply with these rules would provide the necessary incentives for vessel owners/operators to fund increased salvage and spill response capabilities in the Aleutians. It may also be the means for financing an appropriate rescue tug for this economically and biologically important resource area.

3.The ANWTF Recommends that Navigational Charts and Other Aids to Navigation be Updated and Improved along with Vessel Tracking and Automatic Identification Systems (AIS).

For safe shipping, existing nautical charts for the Arctic need to be updated. In an effort to reduce the likelihood of accidents, an assessment of navigational needs should be undertaken to identify priority actions and target locations most likely to present hazards. Short and long range navigation aids will be needed, including buoys, iceberg and other sea-condition warning systems, high-risk-area vessel-traffic management systems, and improved communication technology.

Alaska currently has over 70 automatic identification stations that track vessels in Alaskan waters. The existing Automatic Identification System should be expanded across Alaskan northern waters beyond the Canadian border to Tuktoyuktuk. This should be a high priority. The current system—an international government/industry partnership—serves vital governmental and private sector needs by aiding safe, secure, efficient, and environmentally sound maritime operations. Expanding AIS will provide a clear record of transport across the U.S. Arctic waters, particularly for vessels servicing Canadian western Arctic communities or bound for transit through the Northwest Passage. AIS also provides emergency contact information, port data, locations of other vessels, and navigational information via the internet. Expanding the AIS network across the western Arctic will also allow for compliance under the International Maritime Organization Guidelines for Ships Operating in Polar Waters (Resolution A.1024(26)).

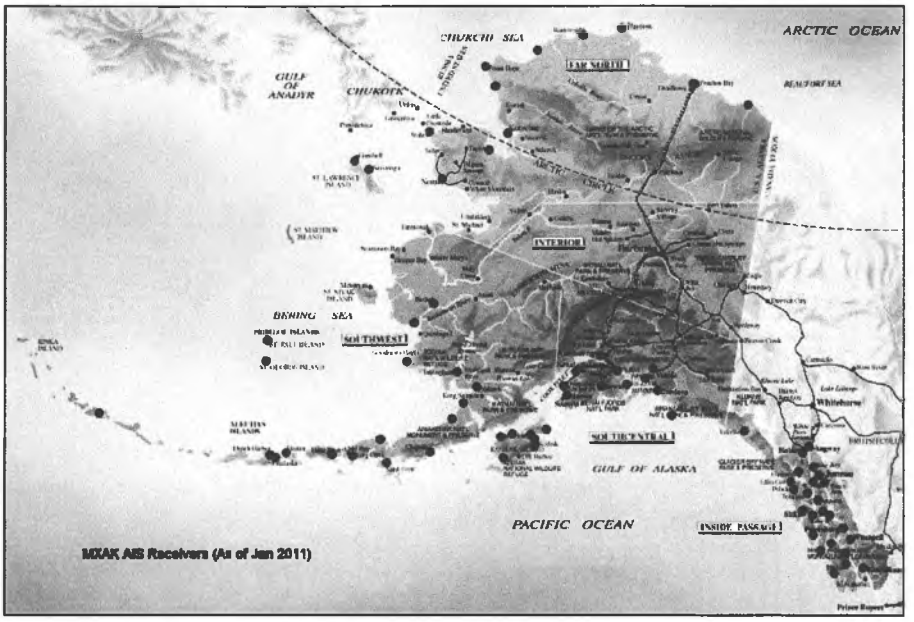
The Alaska State Legislature and the state of Alaska should continue to support the expansion of vessel tracking in the Arctic. The task force encourages the organizations and agencies involved in vessel tracking to pursue all channels of funding to increase their vessel tracking range.

4. Alaska Northern Waters Task Force Supports the National Oceanic and Atmospheric Administration's (NOAA) Hydrographic Arctic Mapping and Recommends that NOAA Also Include Detailed Near-Shore Bathymetric Mapping.

The ANWTF supports increased funding to expedite the mapping of the Arctic regions of Alaska, with particular support for updated mapping of coastal navigation routes and entrance routes to coastal villages.

The ANWTF concurs with the 2011 National Hydrographic Survey Priorities for Alaska. However, NOAA priorities for Alaska in the Bering Strait should be moved from priority two to priority one. The Bering Strait is the shipping choke point in Alaska's northern waters. It is imperative that up-to-date bathymetric information be provided for safe navigation. The ANWTF encourages the exchange of this information with the Russian government so that both governments have complete mapping of the entire strait.

The task force also supports NOAA's efforts to fund additional tidal observations to close the tidal data gap in accordance with the 2008 NOAA Network Gap Analysis for the National Water Level Observation Network. These increased observations will allow the joining of the digital mapping initiative vertical data with the Mean High Water and Mean Lower Low Water data that determine own-



Locations of the Marine Exchange of Alaska's AIS Receivers as of Jan 2011.

ership and jurisdiction of state, federal, Native, and private lands.

The ANWTF also encourages public release of bathymetric data collected by the U.S. Navy that would not threaten our national security, as well as public release of bathymetric data collected by private industry that would not threaten their proprietary economic interests.

5. The ANWTF Recommends that the Alaska State Legislature and the State of Alaska Continue to Support Maritime Training Centers in Alaska.

The need for trained and experienced mariners to operate in the Arctic is clear. The task force highly recommends the development of training programs throughout Alaska that can produce competent seafarers for safe operations in the Arctic. Specialized training—such as a USCG approved Ice Navigator curriculum that would implement the recommendations of the Arctic Marine Shipping Assessment and be consistent with the future requirements of the IMO Polar Code—is essential. In addition, qualifications, training, and experience standards for operation of icebreakers, arctic lightering operations, and high latitude navigation should be considered to ensure that increased maritime commerce in the Arctic is developed safely.

The ANWTF sees a real opportunity for Alaska to become the U.S. center of excellence in Arctic maritime training and seafarer development. Building on the state's strong university system, institutions such as the AVTEC Maritime Training Center, and practical training opportunities in Alaska's ice covered waters, this state is uniquely positioned to become an international leader in high latitude navigation safety training.

6. The ANWTF Supports Completion of the Aleutian Islands Risk Assessment; State of Alaska Participation in the U.S. Coast Guard Port Access Route Study; and Development of a Bering Strait Vessel Traffic Separation Scheme.

Aleutian Islands Risk Assessment

The Aleutian Islands Risk Assessment is a joint venture between the National Fish & Wildlife Foundation, the USCG, and the Alaska Department of Environmental Conservation. The project was organized in response to the grounding of the M/V Selendang Ayu in 2004 and the oil spill it caused. It is a multi-phase risk assessment of maritime transportation in the Bering Sea and the Aleutian Archipelago. Phase A of the Aleutian Island Risk Assessment has been completed.[1]

The study mainly focused on traffic following the great circle route through the Aleutian Islands and Bering Sea. The guiding principles applied to the analysis of risk reduction options were that prevention measures take priority over response measures and all measures should be realistic and practical.

The advisory panel assembled for the project developed recommendations for risk reduction options in two categories: those recommended for immediate implementation and those recommended for further study in Phase B of the assessment.

Options for immediate implementation include:

- Develop an enhanced vessel monitoring and reporting program;
- Enhance towing capabilities on USCG cutters, and increase cutter presence in the Aleutians;
- Stage additional emergency towing systems in the Aleutians.

1. The findings of the Aleutian Islands Risk Assessment can be found at http://aleutiansriskassessment.com/.

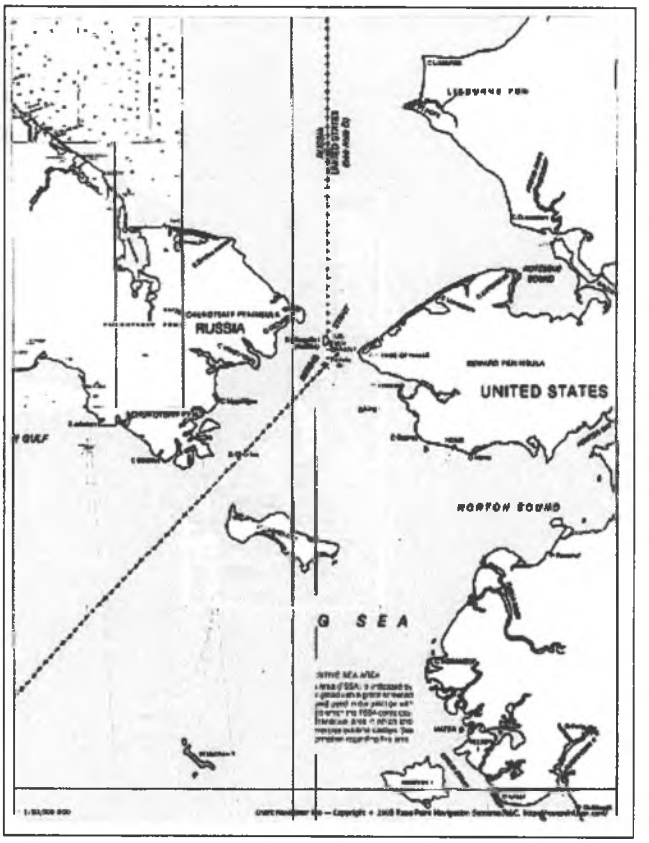
Options recommended for additional development or study in Phase B, prior to full implementation, include:

- Increase rescue tug capability in the Aleutians;
- Increase salvage and spill response capability in the Aleutians;
- Determine the boundaries of IMO Particularly Sensitive Sea Areas, and develop recommendations for associated protective measures;
- Strengthen the Aleutians Subarea Contingency Plan.

The ANWTF recommends that the risk assessment move forward with those risk reduction options that were identified by the advisory panel for immediate implementation. In addition, it is recommended that an additional risk reduction option be evaluated in Phase B of the project. A key consideration for reducing the risk of groundings and spills is offshore vessel routing for circumpolar traffic to provide timeframes for responding to disabled vessels. Offshore vessel routing has been successfully employed along the Pacific west coast and is a primary, cost-effective tool for reducing risk.

Bering Strait Port Access Route Study and Vessel Traffic Separation Scheme

The ANWTF recommends that the state of Alaska participate in and support the efforts of the USCG Port Access Route Study of the Bering Strait. Alaska should work with the USCG and Russia to bilaterally assess the risk of increased shipping through the Bering Strait and analyze the options for staging international assets to respond to that risk. The location of staging areas in Nome or other Alaska coastal locations should be considered for U.S. assets. Provideniya or other Russian coastal areas should be considered for Russian assets. This effort would contribute greatly to the development of any future IMO-led effort to establish internationally binding ship routing measures, such as a Bering Strait Vessel Traffic Separation Scheme.



The shaded region represents the Study Area for the USCG's Bering Strait Port Access Route Study as described in 75 FR 68568.

Planning and Infrastructure Investment

Introduction

A number of state initiatives are underway to look at the potential needs and feasibility of infrastructure projects in Alaska's Arctic region. These include the Alaska Department of Transportation and Public Facilities' (ADOTPF) Industrial Use Roads Study, several Arctic Ports studies, and similar work relating to possible land transportation links to Nome, Ambler, and the Umiat region.

Changes in temperature and precipitation are likely to hold enormous implications for both existing and future construction of all sorts. The ability to better predict and understand the effects of phenomena such as widespread thawing of permafrost will help Alaska prepare for considerable maintenance issues on existing roads, airports, buildings, and pipelines. Just as importantly, it will aid engineers when it comes to properly siting, designing, and constructing new infrastructure capable of withstanding future changes in their specific environments. These important concerns have also been examined in ADOTPF's "Impact of Climate Change on Alaska's Transportation Infrastructure."

These changes also pose significant challenges to some communities in Arctic coastal and riverine areas, most notably those located along the Bering and Chukchi Seas. A number of communities are threatened with increased rates of coastal erosion and flooding as a result of storm activity and battered shorelines once protected by shore-fast ice. These problems could become chronic as the climate warms, seasonal sea ice retreats, and destructive coastal storms become more frequent. These important concerns have been recognized in reports issued by the state of Alaska's Climate Change Subcabinet Immediate Action and Adaptation work groups.

Immediate investment in Arctic infrastructure is a foremost priority for Alaska and the entire United States. Alaska will need to explore ways to attract substantial sources of capital investment in addition to state and federal funding. Action is needed to enable the responsible development of resources; facilitate, secure, and benefit from new global transportation routes; and safeguard Arctic residents and ecosystems.

This investment will improve the safety, security, and reliability of transportation in the region—a goal established by the U.S. Arctic Policy signed by President Bush in 2009. As interest and activity in the Arctic continues to rise, America's preparedness in the region becomes ever more important to national security.

Increased human activity related to shipping, oil and gas development, commercial fishing, and tourism will require, at a minimum, new ports and safe harbors, equipment and facilities for oil spill response, additional Polar Class icebreakers for the U.S. fleet, and improved charting and mapping.

The U. S. Coast Guard's needs in these areas well illustrate the magnitude of infrastructure investment necessary in the Arctic. The Search & Rescue (SAR) agreement recently negotiated by the eight Arctic Nations through the Arctic Council commits the United States to search and rescue response in regions of the Arctic. Domestically, the National Contingency Plan requires the U.S. Coast Guard to oversee oil spill planning and preparedness in coastal waters and to supervise any oil spill response. Additionally, the U.S. Coast Guard's mission is to protect the public, the environment, and U.S. economic interests in the nation's ports and waterways, along the coast, on international waters, or in any maritime region as required for national security.[1]

At present, the Coast Guard has very limited Arctic emergency response capabilities and no permanent bases on Alaska's North Slope to support its operations. Basic needs there include communications, housing, and support facilities. It is especially notable that the Coast Guard has only one operational Polar Class icebreaker, the USCG Cutter Healy. Clearly, the Coast Guard does not have the assets required to carry out its expanding mission in the Arctic.

With transformation in the Arctic calling for a broad spectrum of new facilities on such a large scale, the state of Alaska must take an active role in regional planning efforts with communities and their stakeholders. This will help communities develop local strategies and ensure that the state is getting the most return on investment for local projects. Some communities may not have the resources to adequately prepare for the future, and the state should take this opportunity to help increase local capacity for the benefit of all Alaskans.

1. The ANWTF Recommends that the Alaska State Legislature Urge the United States to Forward Base the U.S. Coast Guard in the Arctic.

As human activity increases in Alaska's northernmost waters, the need to establish a Coast Guard base in the Arctic grows. The most northern Coast Guard base in the United States is in Kodiak, Alaska, more than 1,000 miles from pos-

1. The Coast Guard has 11 Statutory (non-discretionary) missions: Search and Rescue, Maritime Safety, Ports & Waterways Security, Drug Interdiction, Migrant Interdiction, National Defense, Living Marine Resources, Marine Environmental Protection, Aids to Navigation, Ice Operations, and Law Enforcement.

sible Chukchi Sea drilling sites and nearly as far from existing Arctic shipping lanes in the Bering Strait.[1] This distance causes untenable logistical problems that negatively impact response times and capabilities. The Coast Guard must have a greater overall presence in the Arctic, with the ability to stage assets closer to future shipping, oil and gas drilling, and commercial fishing activities.

The federal government should begin planning immediately to establish an Arctic base, and it must also move forward on interim measures for search and rescue and oil spill response in the region. The latter include working with communities to site required equipment at strategic locations, upgrading regional airports and associated storage facilities to enable efficient airlifting of assets, and increasing communications infrastructure.

2. The ANWTF Recommends that the Alaska State Legislature Urge the United States to Fund Icebreakers and Other Ice-capable Vessels.

At present, the United States has only one Polar Class icebreaker in service, the Coast Guard's Healy. A second Polar Class icebreaker, the Polar Star, is undergoing extensive repairs in Seattle and is not expected to return to service until 2013. Its sister ship, the Polar Sea, was decommissioned in 2011.

Meanwhile, Russia has a fleet of eight service-ready nuclear powered icebreakers, including an ice-breaking container ship. A ninth is under construction and will join their fleet in 2015. China owns the world's largest non-nuclear icebreaker and plans to launch a second by 2013. Canada has committed $38 billion to a 30-year plan to build additional icebreakers and other ice-strengthened ships suitable for Arctic service. Sweden, Finland, South Korea, and Japan are adding icebreakers to their fleets.[2]

The United States Coast Guard Cutter Healy is a medium strength vessel used most recently as a platform for scientific research. Its design is less suited to military missions. Congress has appropriated $60 million for repairs to the Polar Star. At this level of funding, its overhaul is estimated to provide for seven to ten years of additional service—the same length of time the Coast Guard estimates is required to design and construct a new Polar Class icebreaker, at a cost of about $860 million.

This limited number of icebreakers presents a major challenge to the Coast Guard mission in Alaska. Having ice-capable vessels is vital to maintain sovereignty, continue scientific research, and provide emergency and oil spill response. Overreliance on the Healy, which was not designed to meet all these challenges, poses risks for the United States and Alaska.

The ANWTF urges the state of Alaska to prevail upon the U.S. government to fund the construction of new heavy icebreakers and additional cutters for the U.S. Coast Guard. The Coast Guard is developing a long term vessel asset plan, but so far it has been unable to secure funding. It is expected that additional vessels will be required in support of oil spill response; these vessels must be capable of year-round Arctic operations. Immediate steps should be taken to begin construction of these assets.

Further, the ANWTF supports planning for other necessary facilities for search and rescue responsibilities, spill clean-up equipment and response vessels, and research. The Coast Guard needs this infrastructure to fulfill its mission.

3. The ANWTF Recommends that the Alaska State Legislature Support Search and Rescue Coordination Centers along the Coast to Assist Federal and State Responders.

The ANWTF supports search and rescue efforts at all levels—federal, state, and local. Because the USCG doesn't have an Arctic presence, local communities are often the first responders to an emergency.

The state of Alaska should coordinate planning with the USCG and local communities to develop strategies for increased search and rescue capabilities in the Arctic. Strategies may include purchase of equipment, training, and increased communications capability at the community level.

Other countries are already moving ahead with similar initiatives. Russia is currently in the process of building ten search and rescue centers along its Arctic coast line. Given the size of the Alaskan Arctic, effective local response will be critical. State planning should begin immediately.

4. The ANWTF Recommends Supporting the University of Alaska Fairbanks Scenarios Network for Alaska and Arctic Planning.

Scientists reviewing weather data for Alaska believe the state has been experiencing a warming trend with drier conditions in parts of the state. The ANWTF heard presentations on impacts this could have on Arctic communities and businesses. They include, among others, drier conditions in Interior Alaska resulting in more frequent and severe forest fires; species moving outside their historical ranges and perhaps displacing other species; changes in the active layer and permafrost in areas of the state resulting in loss of structural support and other adverse effects on roads and infrastructure; increase in the rate of coastal erosion in areas of

1. To put this distance into perspective, the distance between Kodiak and Barrow is about the distance between Los Angeles and Seattle.
2. For a list of ice breaker assets around the world go to: http://www.globalsecurity.org/military/world/icebreakers-list.htm

the state; and changes in hydrology including loss of surface ponds used for drinking water. It is important for state and local governments and industry to have a better understanding of possible future climatic conditions in the state when planning long-term infrastructure and critical services.

The University of Alaska Fairbanks formed the Scenarios Network for Alaska and Arctic Planning (SNAAP) to help decision makers understand possible future climate scenarios and their impacts in the state. SNAAP has developed data-driven models and scenarios for specific areas of the state that describe possible effects from longer-term changes in air temperature and precipitation. SNAAP has been working with other researchers to integrate down-scaled climatic models with terrestrial models to make predictions of landscape changes and the implications of such changes (melting permafrost, shifting and intensity of fire regimes, etc.) on the state's roads, airports, ports, pipelines, and rural communities. Both marine and terrestrial models should include predictions of impacts on resource development and related infrastructure. Such models would inform future infrastructure development and management.

The ANWTF recommends the state of Alaska support the work being done by SNAAP and encourages making this information, along with any important caveats on the limitations on such climatic predictions, available to state agencies, local governments, and the public to assist them in their long-term planning. The ANWTF believes this information could also be useful to agencies and organizations involved in setting standards for construction around the state.

5. The ANWTF Recommends Continuing the Analysis and Development of Ports and Safe Harbors in the Arctic Region.

Studies by the U.S. Coast Guard, the U.S. Navy, the Arctic Council, the U.S. Army Corps of Engineers, and the Alaska Department of Transportation and Public Facilities all identify the need to develop ports and harbors in Arctic Alaska. Given the long lead times for such construction, ports should be among the highest priorities for Arctic infrastructure.

Building on the findings of the 2008 and 2011 state/federal Alaska Regional Ports Workshops and the 2011 Arctic Ports Charette, the state of Alaska and the U.S. Army Corps of Engineers should continue analyzing options for deep- and medium-draft port and safe harbor construction in the Alaskan Arctic. The state should convene an industry-focused Alaska Arctic Ports Workshop to assess the pros and cons of alternative locations and types of ports, address environmental conditions and engineering approaches, and explore funding alternatives.

Locations to consider include:

- St. Paul Island in the Pribilof Islands. Here there is an existing harbor for the Central Bering Sea fishing fleet and fish processing facilities.
- St. Lawrence Island. There is no existing sea port on St. Lawrence.
- Nome/Teller. A medium-draft port exists at Nome. Considerations include expanding the Nome causeway, improving the Nome-Teller road, and developing a seasonal deep-draft port at Port Clarence Bay off Teller.
- Kotzebue/Cape Blossom. A shallow-draft port complex exists at Kotzebue. During the ice-free season, deep-draft freighters anchor 15 miles out to sea and cargo is lightered to port. Shallow-draft barges deliver cargo to area communities. Cape Blossom, across Kotzebue Sound, offers a potential deep-draft port site.
- Mekoryuk. Located on Nunivak Island, Mekoryuk has no boat harbor but does have moorage for small boats protected by a breakwater.
- Cape Thompson. Located on the Chukchi Sea about 26 miles southeast of Point Hope, Cape Thompson has previously been considered for a port site. It is located on a promontory with bulk rip-rap and aggregate potential and is broadly sheltered from the north by the spit of Point Hope. It has an old airstrip but is otherwise largely undeveloped.
- Wainwright. Wainwright is the nearest village to the Chukchi Sea OCS leases and is located on Wainwright Inlet, which is capable of sheltering shallow- to medium-draft vessels. It is located 90 miles west of Barrow. The city presently does not have a seaport.
- Point Franklin. Located between Wainwright and Barrow, Point Franklin and its adjacent barrier islands may serve as a shelter and possible port site for shallow- to medium-draft vessels.
- Barrow. With a population of more than 4000, Barrow boasts considerable infrastructure despite its remote location and is the geographic midpoint between the active exploration areas in the Beaufort and Chukchi Seas. Just east of Point Barrow is Eluitkaak Pass, which is the "notch" between the Barrow spit and the barrier islands of Elson Lagoon. Eluitkaak Pass is about 50 feet deep at its deepest, although it shallows at both ends toward the north and the south. Elson Lagoon, although shallow, is protected from the open ocean by barrier islands. At present there is no protected harbor at Barrow.
- Prudhoe Bay. Prudhoe Bay has been extensively developed for oil industry support. There is a causeway and dock system on the east and west sides of Prudhoe Bay that currently services the line-haul barges that transport drilling and production infrastructure to the North Slope. The community, made up almost entirely of oil industry

employees, is connected year-round to the North American road system by the Dalton Highway.

- Mary Sachs Entrance. This is a channel between barrier islands located about 60 miles north and east of Prudhoe Bay.

Plans for the development of deep-draft ports and improved safe harbors in northern waters should be intended also to improve access to inland resources in the region. Consideration should be given to the proximity of exploitable natural resources and access to them by navigable inland waterways or through the construction of railways or roads.

A key economic factor in the viability of developing natural resources in Alaska is the distance to an ocean port. Natural resources within 100 miles of a coast line typically have a higher probability of development due to shipping proximity. Development of resource transportation corridors to Arctic ports is critical for both shipping of product to market and for resupply of materials and equipment necessary for resource exploration, development, and extraction. Options for public-private partnerships (P3's) should be explored as a mechanism to capitalize development of the resource deposits and provide a return on investment to the state and private sector industries. Port planning for the Arctic should include a prioritized strategy for approaches to specific resource deposits and options for developing infrastructure to support exploration, development, and transportation of the resource.

6. The ANWTF Recommends the State of Alaska Consider Proposals to Expand Fiber Optic Cable Routes Across Northern Waters.

The retreat of sea ice and stability of the sea floor in the Arctic is creating interest in a potential fiber optic cable route from London to Tokyo via the Canadian Northwest Passage and Alaskan Arctic. Just as shipping routes are significantly shorter across the northern waters, so would be cable routes.

Linking Alaska's Arctic communities to trans-Arctic cable routes would bring many benefits. Increased communications will be needed in support of the Coast Guard's mission, including search and rescue and oil-spill response operations. Better communications are also required for the safe operations of ships transiting the region and offshore oil field development activities. At the same time, broadband links would enhance economic development and distance learning opportunities for Arctic communities.

The state should consider an assortment of strategies. In 2010, Kodiak Kenai Cable Company developed an international consortium for a Tokyo-London link with a landing at Prudhoe Bay. The company also proposed branches linking Kodiak with the more remote communities of Dutch Harbor, Nome, Kotzebue, and Barrow before rejoining the primary cable at the Prudhoe Bay landing. While this proposal was unsuccessful in obtaining funding, the effort produced valuable research, and the related Arctic Cable Company has now been formed.

On land, GCI's Terra SW has connected 65 coastal villages and communities in the Bristol Bay and Yukon-Kuskokwim Delta regions to a fiber optic/microwave network. GCI is exploring expanding the network to include the communities of northwest Alaska. On the North Slope of Alaska, the Arctic National Broadband Network initiative explored developing broadband capability between Barrow and Nuiqsut.

The state should continue to encourage fiber optic cable ventures that will include links to coastal hub communities and industry bases adjoining the northern waters.

7. The ANWTF Recommends that the State of Alaska Explore Models to Access Funding for Arctic Infrastructure.

As the state of Alaska determines its priorities for Arctic infrastructure projects, the Alaska Industrial Development and Export Authority (AIDEA) should begin examining which categories of projects are likely to meet its criteria for funding and which will need additional or wholly alternative sources.

The state should consult with financing and investment specialists to explore strategies to attract additional sources of capital to infrastructure priorities. Such considerations could include private sector investment as well as the creation of state, national, and international development corporations.

SENATOR BILL WIELECHOWSKI

SJR 16: Military Pensions
Fact Sheet

- The Defense Business Board released a suggested plan to convert military retirement from the current 20-year vesting system to a retirement system similar to a 401k
- The plan presented may not grandfather current service members
- Currently, a military service member who serves for 20 years can retire with their pension immediately
- The plan suggested by the Defense Business Board may not allow members to withdraw their retirement until they reach age 60-65
- Members of our Armed Forces should be allowed to maintain their current retirement plan as promised when signing up to serve
- Senate Joint Resolution 16 would urge the United States Congress to allow any service member who signed up under the current retirement plan the option to choose between staying with the current plan or moving to the new retirement system
- This resolution also urges the US Congress to support HR3520: Keeping Our Promises Act of 2011

Retiree Benefits for the Military Could Face Cuts

By JAMES DAO and MARY WILLIAMS WALSH

As Washington looks to squeeze savings from once-sacrosanct entitlements like Social Security and Medicare, another big social welfare system is growing as rapidly, but with far less scrutiny: the health and pension benefits of military retirees.

Military pensions and health care for active and retired troops now cost the government about $100 billion a year, representing an expanding portion of both the Pentagon budget — about $700 billion a year, including war costs — and the national debt, which together finance the programs.

Making even incremental reductions to military benefits is typically a doomed political venture, given the public's broad support for helping troops, the political potency of veterans groups and the fact that significant savings take years to appear.

But the intense push in Congress this year to reduce the debt and the possibility that the Pentagon might have to begin trimming core programs like weapons procurement, research, training and construction have suddenly made retiree benefits vulnerable, military officials and experts say.

And if Congress fails to adopt the deficit-reduction recommendations of a bipartisan joint Congressional committee this fall, the Defense Department will be required under debt ceiling legislation passed in August to find about $900 billion in savings over the coming decade. Cuts that deep will almost certainly entail reducing personnel benefits for active and retired troops, Pentagon officials and analysts say.

"We've got to put everything on the table," Defense Secretary Leon E. Panetta said recently on PBS, acknowledging that he was looking at proposals to rein in pension costs.

Under the current rules, service members who retire after 20 years are eligible for pensions that pay half their salaries for life, indexed for inflation, even if they leave at age 38. They are also eligible for lifetime health insurance through the military's system, Tricare, at a small

fraction of the cost of private insurance, prompting many working veterans to shun employer health plans in favor of military insurance.

Advocates of revamping the systems argue that they are not just fiscally untenable but also unfair.

The annual fee for Tricare Prime, an H.M.O.-like program for military retirees, is just $460 for families and has not risen in years, even as health care costs have skyrocketed. Critics of the system say the contribution could be raised substantially and still be far lower than what civilians pay for employer-sponsored health plans, typically about $4,000.

Those critics also argue that under the current rules, 83 percent of former service members receive no pension payments at all — because only veterans with 20 years of service are eligible. Those with 5 or even 15 years are not, even if they did multiple combat tours. Such a structure would be illegal in the private sector, and a company that tried it could be penalized, experts say.

"It cries out for some rationalization," said Sylvester J. Schieber, a former chairman of the Social Security Advisory Board. "Why should we ask somebody to sustain a system that's unfair by any other measure in our society?"

But within military circles, and among many members of Congress, the benefits are considered untouchable. Veterans groups and military leaders argue that the system helps retain capable commissioned and noncommissioned officers.

And having volunteered to put their lives at risk, those people deserve higher-quality benefits, supporters argue. The typical beneficiary, they add, is not a general but a retired noncommissioned officer, with an average pension of about $26,000 a year.

"The whole reason military people are willing to pursue a career is because after 20, 30 years of extraordinary sacrifice, there is a package commensurate with that sacrifice upon leaving service," said Steven P. Strobridge, a retired Air Force colonel who is the director of government relations for the Military Officers Association of America, which is lobbying against changes to the benefits.

A wild-card factor in the debate is the withdrawal of American troops from Iraq and Afghanistan, which some experts say could avoid the stigma of cutting benefits while troops are at war.

"The fact that you are getting out of Iraq and Afghanistan does make it easier," said Lawrence J. Korb, a senior Pentagon official in the Reagan administration who was a co-

author of a recent proposal for reducing the cost of military health care. "When the war in Iraq was in terrible shape, it was hard to get people to join the military, and no one wanted to touch any military benefits."

By far the most contentious proposal circulating in Washington is from a Pentagon advisory panel, the Defense Business Board. It would make the military pension system, a defined benefit plan, more like a 401(k) plan under which the Pentagon would make contributions to a service member's individual account; contributions by the troops themselves would be optional. Mr. Panetta has said that if adopted, the plan would not apply to current military personnel.

While health care costs for active and retired troops are growing faster, military pension costs are larger. Last year, for every dollar the Pentagon paid service members, it spent an additional $1.36 for its military retirees, a much smaller group. Even in the troubled world of state and municipal pension funds, pensions almost never cost more than payrolls.

Citing the fiscal hazards and inequities of the system, the Defense Business Board proposal would allow soldiers with less than 20 years of service to leave with a small nest egg, provided they served a minimum length of time, three to five years. But it would prevent all retirees from receiving benefits until they were 60.

The business board says that its proposal would reduce the plan's total liabilities to $1.8 trillion by 2034, from the $2.7 trillion now projected — all without cutting benefits for current service members.

Steve Griffin of Tallahassee, Fla., is the type of soldier the defense board is trying to appeal to: a former captain who did two tours in Iraq, he left the Army in 2010 after five years of service and thus receives no pension.

Yet in a sign of the deep support for the existing system, Mr. Griffin says it should be left alone because it provides incentives for recruitment and rewards retirees who have endured great hardship.

"Yes, it would be nice for people like me," Mr. Griffin, 28, said of the proposal. "But I think the retirement system now is fair. We shouldn't take anything from it. If anything, we should add to it."

Much like in the debate over Social Security, questions about the sustainability of the military pension system abound.

Each year the Defense and Treasury Departments set aside more than $75 billion to pay not only current and future benefits but also pensions for service many years in the past. But the retirement fund has not accumulated nearly enough money to cover its total costs, with assets of $278 billion at the end of 2009 and obligations of about $1.4 trillion.

The government tries to close the shortfall by simply issuing more Treasury securities each year, thereby adding to the nation's debt.

Given the political potency of veterans groups, it is unclear whether anyone in Congress will lead an effort to revamp the pension or retiree health systems.

But the debt ceiling agreement approved this summer by Congress, under which the Pentagon must find $400 billion in reductions over the next 12 years, may force cuts once considered unthinkable. And if Congress does not adopt the recommendations of the bipartisan committee studying deficit reduction, the mandated reductions in Pentagon spending would more than double, to about $900 billion, and fall on just about every category of defense spending.

Deficit hawks, led by Senator Tom Coburn, Republican of Oklahoma, have begun taking smaller steps, pushing for an array of cuts to military benefits, including ending subsidies for base commissaries and tightening disability compensation for diseases linked to Agent Orange.

But those trims are considered marginal compared with the deeper reductions many experts say are necessary to contain Pentagon spending.

"If the trend continues, it will call into question the military's ability to do other things, like buy equipment, do maintenance, train troops and equip them," said Nora Bensahel, a senior fellow at the Center for a New American Security, a nonprofit organization with ties to the Obama administration.

"At some point, the cost pressures by the retirement benefits will really start to impede military capabilities."

Don't Go After Military Pensions

By DARRELL DRIVER, JIN PAK and KYLE JETTE

Washington

AS the nation's budget pressures prompt officials to scour the Defense Department for cuts, one tantalizing target is the military retirement system. The Pentagon has reportedly been considering replacing the guaranteed pension that, for more than a century, has been a fundamental compact between the United States and its soldiers, in favor of a market-based 401(k) approach. But this would be a grave mistake, a disincentive to future volunteers and a threat to national security.

Needless to say, there are critical differences between the civilian and military work forces. Soldiers who have risked their lives for our nation should not also have to risk their retirement savings in stocks. But there are many more mundane sacrifices required of career service members that also make it hard for them to build up the kind of wealth — whether in their houses, their careers or the careers of their spouses — that cushions civilian retirees from the whims of the market.

Service members are often required to move, for example, which hinders their ability to build home equity. Many have to put off purchasing homes, and those who do buy do not have the option of choosing not to move if their mortgages become underwater. For this reason, the housing crash of recent years has hit service families especially hard.

Frequent moves also make it hard for service members' spouses to find work and progress in their own careers. This is most likely a primary reason that median household incomes for military families are lower than those of their civilian counterparts.

Most important, the unique skills people learn on the battlefield do not easily translate into private sector employment, and many military retirees struggle to find new work. While the officer who managed a military transportation hub might anticipate an equivalent job from a civilian firm, and while a young private who served one deployment could relatively easily return to school or an entry-level job, an infantry sergeant first class who has spent a decade

or more on multiple deployments to the world's most dangerous places would not find the same ready options.

For these individuals, there can be a significant financial cost to agreeing to remain in military service beyond the years when it would be easiest to make the transition to more marketable civilian jobs. But these are the people the military needs, and needs to retain.

The military pension helps compensate for their sacrifices. Soldiers and their families are more willing to put off other careers, and to accept frequent displacement, lower earnings and even the risk of being ordered back to active duty after beginning new careers, because of the promise of future compensation. The guaranteed pension is one of the biggest incentives keeping talented people in the military.

No one knows for sure how a shift to a 401(k) model would affect these families and their decisions to remain in military service. But we do know that there is a spike in retirements once soldiers complete the 20-year minimum to qualify for full pensions, and we can only assume that these people would retire far sooner without them. And it's likely that many would not join up at all.

As policy makers continue their deliberations on military spending cuts — which are scheduled to begin again next month — they must keep the unique nature of military service in mind when they look to the costs and benefits of the retirement plan. And they should remember that no one imagined, back in the 1970s, that our all-volunteer force would last this long. Most believed that conscription would again be needed if the nation ever engaged in a significant conflict. The United States military has proved them wrong so far, but we should not underestimate the role the guaranteed pension has played in its resilience.

Darrell Driver, Jin Pak and Kyle Jette are lieutenant colonels in the United States Army.

OFFICE OF THE UNDER SECRETARY OF DEFENSE
4000 DEFENSE PENTAGON
WASHINGTON, D.C. 20301-4000

PERSONNEL AND
READINESS

DEC 14

The Honorable Bill Wielechowski
United States Senator
716 West 4th Avenue
Suite 540
Anchorage, AK 99501

Dear Senator Wielechowski:

Thank you for your letter dated November 23, 2011, to Secretary Panetta regarding proposed changes to the military retirement system. Since this matter falls under my purview, this office has been asked to respond.

Various media outlets and military service organizations have been reporting on a variety of proposals to change the military retirement system. The most recent proposal by a task group of the Defense Business Board recommends replacing the current defined benefit retirement with a defined contribution retirement, much like the 401(k) plans used by many businesses for their employees. This proposal, among others, is useful to the Department of Defense (DoD) in evaluating current business operations. Its presentation does not mean it will be adopted or supported by the DoD. Any recommendation to fundamentally change the military retirement system must be approached with great caution and thoughtful analysis. The impact on military accessions, retention and force structure must be carefully assessed, as well as the effect on the overall retirement package of our individual retiring Service members. In making these evaluations, we are acutely aware of the unusual and demanding requirements placed on our military members and their families. We are also mindful of our responsibility to be good stewards of the taxpayer's money.

The military retirement system, as with all other military compensation and benefits, is a fair subject of review for effectiveness and efficiency. However, no changes to the current retirement system have been approved, and no changes will be made precipitously or without careful consideration of potential consequences for both the current and future force. The DoD will not break faith with our current career force and will include grandfathering in any proposal it might support.

We hope you find this response helpful and ask that you share this response with the other Alaska state senators who signed the letter to Secretary Panetta. Thank you for your interest in the men and women who proudly serve in our Nation's Armed Forces.

Sincerely,

Virginia S. Penrod
Deputy Assistant Secretary

United States Senate

WASHINGTON, DC 20510

September 23, 2011

The Honorable Leon E. Panetta, Secretary
U.S. Department of Defense
1400 Defense Pentagon
Washington, DC 20301-1400

Dear Mr. Secretary:

We are gravely concerned about recommendations proffered by the Defense Business Board with regard to America's military retirement, primarily those recommendations altering and/or cutting the military retirement benefits which our career military members who are currently serving our great nation have been promised and are relying upon to assist with their retirement needs.

While deficit reduction is essential, balancing the budget and curbing costs in the U.S. Department of Defense by cutting retirement benefits to those now serving is patently unfair to our military members and their families and puts in jeopardy the recruitment and retention of our nation's future all-volunteer force. We have heard from countless veterans and constituents asking that Congress do the right thing by ensuring that these important benefits are not pulled out from under those who are working hard for what they have been promised.

The current retirement system is a considerable enticement in preserving a career voluntary military force, and any proposed changes must be calculated in that light. Many of our constituents have stated that the current retirement system was a major factor in their decision to choose to serve, or to continue serving in uniform. Contrary to the belief of some, military service is not comparable to the private sector; and a retirement system that works for a civilian career may not necessarily be appropriate for the military.

On this subject, you have said, "People who have come into the service, who have put their lives on the line, who have been deployed to the war zones, who fought for this country, who have been promised certain benefits for that – I'm not going to break faith with what's been promised to them." We believe, as do our constituents, that we must follow your lead and ensure that our government upholds the promises we have made to our military.

Certainly, Congress will be looking to you regarding cuts in defense spending; yet it is our worry that some members will also look to these recommendations by the Defense Business Board. We encourage you then to ensure the security of America's military by relaying to Congress your deep commitment that our nation not undertake any detrimental changes or reductions in military retirement for those who are serving. While our nation must cut spending and balance the budget, we simply cannot do it on the backs of America's military and their families.

Thank you for your consideration in this matter. Please be assured we will assist you in this effort in any way that we can.

Sincerely,

E. Benjamin Nelson

ALASKA STATE LEGISLATURE

November 23, 2011

The Honorable Leon E. Panetta, Secretary
U.S. Department of Defense
1400 Defense Pentagon
Washington, DC 20301-1400

Dear Mr. Secretary,

We write to express our concern about some of the recommendations submitted by the Defense Business Board with regard to changing the military retirement system, primarily the recommendations to cut the military retirement benefits upon which our service members have been promised.

We understand the effort of balancing the budget and curbing costs for the Department of Defense, however, cutting benefits to military service members who protect our nation is not the avenue we hope the Department will act upon. Those active duty members who are currently serving were made promises by our nation regarding the benefits they would receive, and we as a nation have an obligation to keep those promises.

The suggested changes will jeopardize the recruitment and retention of our military and compromise the financial security of military families. The men and women who serve our country deserve a secure retirement. Moreover, the current retirement system is an incentive to preserving our volunteer military force. Many of our constituents have come to rely upon the current system to take care of their families after their time serving in the military. Altering this system and breaking the promises made will have a devastating impact on morale and a detrimental impact on our ability to attract the best and brightest to our armed forces.

We encourage you to continue providing a secure retirement for America's military by not reducing the military retirement system for those who are serving our country. While you continue to face decisions on balancing the budget, we truly hope you will reconsider cutting benefits to military members and their families and keep the benefits that have been promised.

We appreciate your consideration.

Sincerely,

Senator Bill Wielechowski | Senator Johnny Ellis | Senator Joe Paskvan | Senator Dennis Egan

Senator Hollis French | Senator Albert Kookesh | Senator Donny Olson

DEFENSE BUSINESS BOARD

Modernizing the Military Retirement System

Task Group

July 21, 2011

These are the final briefing slides as approved by the Defense Business Board in their public meeting held July 21, 2011. The full DBB report, expected in August 2011, will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Task Group Overview

Terms of Reference

In order to support the Secretary of Defense's efficiency initiatives, review the current structure and function of the military retirement system. Begin with a review of the current reform thinking on military retirement benefits. This research and analysis will help to provide recommendations for optimizing the Department's military retirement system.

Deliverables

Provide recommendations that will enable the system to be fiscally sustainable and recruit and retain the highest personnel required for our nation's defense.

Task Group Members

Richard Spencer (Chair)
Patrick Gross
David Langstaff
Phil Odeen
Mark Ronald
Bobby Stein
Jack Zoeller

DBB Executive Secretary

Catherine Whittington

These are the final briefing slides as approved by the Defense Business Board in their public meeting held July 21, 2011. The full DBB report, expected in August 2011, will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Methodology: Interviews

- Current DoD
  - Vice Chairman, Joint Chiefs of Staff (VCJCS)
  - Chief of Staff of the Air Force (CSAF)
  - Chief of Naval Operations (CNO)
  - Commandant of the Marine Corps (CMC)
  - Chief of Navy Reserve
  - Chief of Navy Personnel, DCNO, Manpower, Personnel, Training & Education, N1
  - Director, Plans and Resources, Office of the Deputy Chief of Staff of the Army, G1
  - Military Deputy for Budget, Office of the Assistant Secretary of the Army, Financial Management & Comptroller (ASA(F&MC))
  - Under Secretary of Defense for Personnel and Readiness (USD(P&R))
  - Director for Military Compensation (OUSD(P&R))
  - Joint Chiefs of Staff Working Group
  - Members who wrote the 11th Quadrennial Review of Military Compensation (QRMC)
- Former DoD and Government Officials
  - HON John Hamre
  - HON Ken Krieg
  - ADM Vern Clark, USN (Retired)
  - HON David M. Walker
  - HON Richard Danzig
- Defense Ministries
  - Canada
  - France
- Institutes and Government Agencies
  - Institute for Defense Analysis (IDA)
  - Congressional Budget Office (CBO)
  - Center for Strategic and International Studies (CSIS)
  - Center for Strategic and Budgetary Analysis (CSBA)
  - RAND Corporation
  - Office of Thrift Savings Plan
  - OSD Office of the Actuary

These are the final briefing slides as approved by the Defense Business Board in their public meeting held July 21, 2011. The full DBB report, expected in August 2011, will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Where We Are Today

- The All Volunteer Force has proven to be an outstanding success
- Congress has shown consistent support for the military through increases in both compensation and benefits
- Military compensation is higher than that of average civilians with similar education levels (see **Appendix A**)
  - Enlisted pay ranks in the top quartile of that of high school graduates
  - Officer pay ranks in the top quartile of that of college graduates
- Retiree healthcare (TRICARE) is significantly more generous than civilian programs
- Military retirement exceeds levels in the private sector
- 83% of military personnel receive no retirement benefits

Findings

DoD has maintained the structure of its retirement benefits, which was created prior to the All Volunteer Force

- Retirement plans are an important component of both private and public sector compensation systems
- Over the last few decades, private sector plans have shifted from defined benefit to defined contribution to address longer life spans and unaffordable costs
- The military retirement system has not materially changed for over 100 years
  - The current military retirement system was designed for an era when life spans were shorter,
  - Pay was not competitive with civilian pay, and
  - Second careers were rare since military skills did not transition easily to the private sector
- Military retirement funds are not able to be invested in higher yielding equities and bonds

These are the final briefing slides as approved by the Defense Business Board in their public meeting held July 21, 2011. The full DBB report, expected in August 2011, will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Findings (Continued)

Military retirement is more generous and expensive compared to the private sector

- DoD pays retirees 40 years of retirement benefits for 20 years of service
  - Military skills are transferrable to the private sector
  - Second careers are now common for those retiring in their 40s
  - Payout after 20 years makes retention difficult – 76% leave between years 20 and 25
  - 20 years of service earns a lifetime of payments of 50%, ramping up to 87.5% for 35 years of service
- Retirement funds accrued for personnel serving less than 20 years are effectively applied to the benefits of those serving more than 20 years
- For those serving more than 20 years, the retirement contribution is 10 times greater than the private sector
  - Average private sector pension contributions range from 4-12% per year; military retirement benefit equates to 75% of annual pay per year for those who retire
  - Immediate payout after 20 years has no comparison in the private sector

For FY11, total government contribution will be $46B**

**Does not include $64.1B in unfunded liability amortization payment

These al[illegible]e final briefing slides as approved by the Defense Business Board in their [illegible]lic meeting held July 21, 2011. The full DBB report, expected in August 2[illegible] will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Findings (Continued)

"One Size Fits All" has structural disadvantages

- Surveys consistently report that military retirement has little value in recruitment or retention for at least the first 10 years of service
- The current plan is highly inflexible and especially poorly suited for periods of significant change (e.g., when downsizing the force)
  - It will be very difficult to release personnel with 15 or more years of service, yet these age groups are a likely target for downsizing
  - As a result, DoD will likely require special pay to ease transitioning out of the military (as was done in the 1990s), therefore, increasing costs
- The current system does not compensate for those in high risk situations or extenuating circumstances (e.g., combat duty, hardship tour, and separation from family)

Assessment

The Retirement Plan is Unfair

- The military retirement system lacks fairness in several dimensions.
  - Personnel serving 5, 10, even 15 years receive no retirement pay. Those serving 20+ years are endowed with a lifetime benefit.
  - The risky nature of military service is an important justification for the 20-year plan. However, most of the troops engaged in combat serve far less than the required 20 years. (Only 12%-13% of enlisted troops earn retirement pay).
- Retirement is a cost element attributable to each Service member, yet only 17% receive this benefit.
- There is no difference in retirement benefits between those who have served in high risk and low risk positions.

83% of those who serve will receive no retirement benefit

These are the final briefing slides as approved by the Defense Business Board in their public meeting held July 21. 2011. The full DBB report, expected in August 2011, will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Assessment (Continued)

The Retirement Plan is Unaffordable

- The costs of military retirement will seriously undermine future military warfighting capabilities
- For each dollar of current pay, the retirement plan accrues 33 cents, for a total of $24B** in FY11
- Costs are rising at an alarming rate; future liability will grow from $1.3T (of which $385B is funded) to $2.7T by FY34.
- Increases in inflation and life expectancy will further increase military retirement benefit costs
  - +1% inflation increase = $3.0B military retirement benefit service cost increase
  - +1 year of life expectancy = $300M military retirement benefit service cost increase

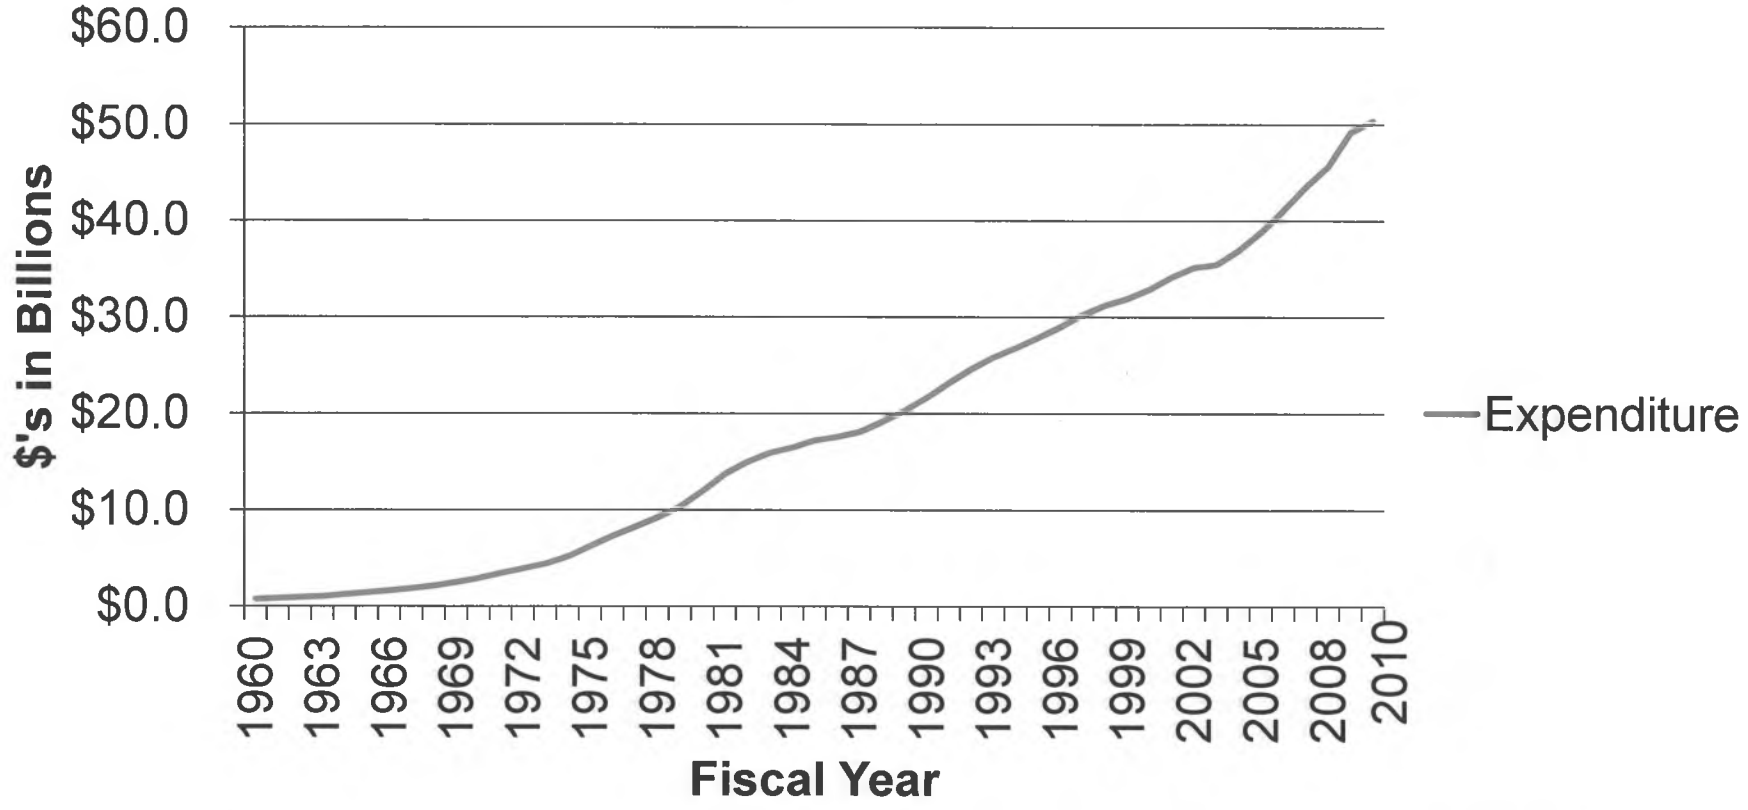
Action must be taken to contain these spiraling costs or they will undermine future warfighting capabilities

**Does not include Treasury interest of $22B

These a[illegible]e final briefing slides as approved by the Defense Business Board in the[illegible]blic meeting held July 21, 2011. The full DBB report, expected in August [illegible], will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Military Retirement Trust Fund Payments/Expenditures

Military Retirement Trust Fund Expenditures by Fiscal Year



Military retirement payments continue to increase ($50B in 2010; $108B in 2035)

Source: Valuation of the Military Retirement System, September 2009, OSD Office of the Actuary, Dec 10

These are the final briefing slides as approved by the Defense Business Board in their public meeting held July 21, 2011. The full DBB report, expected in August 2011, will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Assessment (Continued)

The Retirement Plan is Inflexible

- The current system cliff vests at 20 years of active service
- Personnel with fewer years of service earn no retirement
- Only 7% of personnel leave between the 15th and 20th year of service, compared to 76% of those serving 20 to 25 years
- Years served is the only factor in the retirement benefit calculation, regardless of whether the Service member's career risk profile is in an administrative role or a high risk combat role
- Modifying the retirement system would create an effective force shaping tool

These al[illegible] final briefing slides as approved by the Defense Business Board in their [illegible]ic meeting held July 21, 2011. The full DBB report, expected in August 2[illegible], will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Recommendation

A Comprehensive Solution: A New Defined Contribution Plan

- The most flexible and readily available plan would be based on the existing Uniformed Military Personnel Thrift Savings Plan (TSP), but with the government providing annual contributions (see **Appendix C**)
  - Payments into the plan would include an option for military member contributions
  - Plan accounts would be transportable into the private sector and back into the military
- DoD contributions could vary depending on circumstances, such as larger contributions for personnel at risk or on hardship tours
- The Defined Contribution Plan would provide flexibility to assist in force shaping and sizing
- The individual account would provide for rights for survivorship
- Fully disabled participants would qualify for an immediate pension formulated with VA benefits as presently structured

These a[illegible]e final briefing slides as approved by the Defense Business Board in thei[illegible]lic meeting held July 21, 2011. The full DBB report, expected in August 2[illegible], will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Key Elements of A New Defined Contribution Plan

- Establish a mandatory TSP program for all Military Service Personnel
  - The government contribution, including extra incentives, would be funded at a percentage level comparable to the highest end of a private sector pension plan
  - The plan would vest after 3 to 5 years, payable at age 60 to 65 (or Social Security age)
  - Partial withdrawals (or loans) to cover education, healthcare, or other specified emergencies
- Plan would be risk adjusted to recognize combat roles, family separation, and other unusual duty, for example:
  - Double contributions for years in combat zones or high risk positions
  - Greater contributions for hardship tours
  - Retirement age could be lowered using similar metrics
- Like most private sector severance plans, the option of a time formulated transition payment should be considered to facilitate the change to a new career
- Comprehensive solution would apply to reserve as well as active duty personnel

The new plan would enhance fairness and flexibility, and provide a more affordable cost structure

These are final briefing slides as approved by the Defense Business Board in their public meeting held July 21. 2011. The full DBB report. expected in August 20 will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Attributes of A New Defined Contribution Plan

- **Individual Features**
  - Uniformed Military Personnel TSP individual account
  - Payout options to include: traditional payout, annuity, or lump sum
  - Partial payout options to include: education, home ownership, or business acquisition
  - Right of survivorship transferability upon death
- **Military Service Features**
  - Affordable, fair, and flexible solution to current system
  - Risk profile multiplier and vesting option provides tool for force management either encouraging or discouraging retention
  - Active Duty and Reserves under one plan
- **Coverage**
  - No impact on existing retired population
  - Fully disabled veterans not effected by new plan
- **Transition Alternatives for All Present Active Duty Personnel**
  - Higher Cost Alternative – No transition (see **Appendix E**)
  - Lower Cost Alternative – Immediate transition with no loss of accrued benefits (see **Appendix F**)

These are the final briefing slides as approved by the Defense Business Board in their public meeting held July 21, 2011. The full DBB report, expected in August 2011, will contain more detailed text which will reflect the totality of the points discussed and modifications adopted by the Board during their deliberations.

Conclusions

- The current military retirement system is out of date.
  - It is unfair, unaffordable, and inflexible.
  - As costs escalate, the continuation of the system will seriously erode future military capabilities.
- A comprehensive alternative that would fix these shortcomings is required.
  - All military personnel earn retirement benefits.
  - Costs are far more manageable in future years.
  - Contributions are flexible and reward longer service, high risk assignments, and family separation.
  - Retired and disabled members would be unaffected. They would still receive current benefits.
- Modifying the existing system to reduce cost would have to be dramatic to address affordability. The system would continue to be unfair and inflexible.
- Implementation should be phased-in to ensure current military personnel are treated fairly with due consideration to cost.

HR 3520 IH

112th CONGRESS

1st Session

H. R. 3520

To amend title 10, United States Code, to ensure that the retired pay benefits promised a person when they join the Armed Forces are not reduced.

IN THE HOUSE OF REPRESENTATIVES

November 29, 2011

Mr. YOUNG of Alaska introduced the following bill; which was referred to the Committee on Armed Services

A BILL

To amend title 10, United States Code, to ensure that the retired pay benefits promised a person when they join the Armed Forces are not reduced.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the `Keeping Our Promises Act of 2011'.

SEC. 2. PROTECTION OF RETIRED PAY BENEFITS FOR CURRENT MEMBERS OF THE ARMED FORCES.

Section 1411 of title 10, United States Code, is amended by adding at the end the following new subsection:

`(c) No Reduction in Retired Pay Benefits for Current Members- Notwithstanding the effective date or specified applicability of any change regarding the entitlement of members or former members of the armed forces to retired or retainer pay under this title or to the computation of such retired or retainer pay under the formulas of the table in section 1401(a) of this title or of any other provision of law, the change shall not apply to a member or former member who first became a member of the armed forces before the effective date of the change unless--

`(1) the member or former member affirmatively accepts the change; or

`(2) the change would have the effect of expanding the entitlement or eligibility of the member or former member to retired or retainer pay or increasing the amount of such retired or retainer pay.'.

Protect Military Pensions

The Pentagon is considering a system that would cut and privatize military retirement in order to reach its budget reduction goals. Instead of being eligible for a pension after twenty years, servicemembers will contribute to a 401k every month that cannot be accessed until they reach traditional retirement age.

11

Please sign our petition to Secretary Panetta below!

Dear Secretary Panetta,

We are concerned about the proposed plan to cut and privatize military retirement. Not all careers are created equal, and our troops deserve a retirement system that respects their sacrifice, both now and in the future. The Pentagon budget should not be balanced on the backs of servicemembers and their families. We should not do so, especially, when we are overpaying for unnecessary defense contracts and extending our commitment in wars that aren't making us any safer. It is simply unacceptable to ask troops to today or in the future to throw their pension on a Wall Street roulette wheel. Additionally, by gutting the guaranteed pension program, we destroy one of the key programs that helps the military recruit and keep its best and brightest. If we end the pension system as we know it down the road, we almost certainly will lose many men and women who would otherwise make a career of military service. For these reasons, we find this proposal unacceptable and ask that you keep the current retirement system that respects the sacrifice of the men and women who defend this nation.

SENATOR LESIL MCGUIRE

Welcoming the Arctic Council Task Force for Arctic Marine Oil Pollution Preparedness and Response to the state for its March 2012 meeting and urging the task force to use its time in the state to inform and inspire the work of the task force.

The Arctic Council consists of eight Arctic Nations: Canada, Denmark, Finland, Iceland, Norway, Russia, Sweden, and the United States as well as six international organizations representing Arctic Indigenous Peoples. The Arctic Council was established in 1996 as a high level intergovernmental forum to provide a means for promoting cooperation, coordination and interaction among the Arctic States, with the involvement of the Arctic Indigenous communities and other Arctic inhabitants on common Arctic issues, in particular issues of sustainable development and environmental protection in the Arctic.

On May 12 of 2011, the Arctic Council signed the Nuuk declaration which established an agreement on cooperation in aeronautical and maritime search and rescue in the arctic. In the Nuuk declaration, the Ministers of the Arctic Council member states decided to "establish a Task Force, reporting to the senior Arctic Officials, to develop an international instrument on Arctic marine oil pollution preparedness and response, and called for the Emergency Prevention, Preparedness and Response (EPPR) and other relevant working groups to develop recommendations and/or best practices in the prevention of marine oil pollution.

The purpose of Senate Joint Resolution (SJR) 17 is to welcome the Arctic Council Task Force for Arctic Marine Pollution Preparedness and Response to Alaska. The task force will be in Alaska in March of 2012 to exchange information and experiences regarding marine pollution preparedness and response. The task force is currently developing a framework for international cooperation between the eight arctic states to combat oil spill pollution.

As the only arctic state in the nation, Alaska has an important role to play in protecting the arctic. As host for the March task force meeting, it is important that the State welcome the international delegates to Alaska and highlight the issues that are important to Alaskans. The timely passage of SJR 17 will accomplish both of these objectives and I encourage your support.

Task Force on Oil Spill Preparedness and Response

Category: Task Forces Published on 29 December 2011 Written By Linnea Nordström

In the Nuuk Declaration dated 12 May 2011, the Ministers of the Arctic Council member states decided "to establish a Task Force, reporting to the Senior Arctic Officials, to develop an international instrument on Arctic marine oil pollution preparedness and response, and called for the Emergency Prevention, Preparedness and Response (EPPR) and other relevant working groups to develop recommendations and/or best practices in the prevention of marine oil pollution; the preliminary or final results of both to be presented jointly at the next Ministerial meeting in 2013".

In the Senior Arctic Officials' Report to Ministers in May 2011 in Nuuk, Greenland, the Senior Arctic Officials stated the following:

"The Arctic is likely to see increased shipping and efforts to exploit the natural resources of the region in the coming decades. This, in turn, increases the potential for harm to both human life and the Arctic environment. Arctic Council working groups have developed various oil-related and emergency response-related products, but there is no marine oil pollution response instrument specific to the Arctic. The International Convention on Oil Pollution Preparedness, Response and Co-operation (OPRC) is a framework for international cooperation in combating incidents or threats of marine oil pollution, to which all eight Arctic States are parties. Article 10 of the OPRC promotes the development of bilateral and multilateral agreements for oil pollution preparedness and response, such as on a regional basis."

The Senior Arctic Officials recommended that the Ministers "mandate a task force to develop an international instrument on Arctic marine oil pollution preparedness and response" and further recommended that "the EPPR working group in close collaboration with other relevant working groups develop recommendations and/or best practices in the prevention of marine oil pollution. The preliminary or final results of both should be presented at the next Ministerial meeting in 2013".

The Task Force is co-chaired by Norway, Russia and the United States. The first two meetings of the Task Force were held in Oslo in October 2011, and in St.Petersburg in December 2011.

Pressing Issues in the Arctic

September 7, 2011
Anchorage, Alaska

Julia L. Gourley
U.S. Senior Arctic Official
Office of Ocean and Polar Affairs
U.S. Department of State

TRB TRANSPORTATION RESEARCH BOARD
OF THE NATIONAL ACADEMIES
MARINE BOARD

Key International Issues in the Arctic

- Search and Rescue Capability
- Oil Spill Prevention, Preparedness and Response
- Regulation of Arctic Shipping
- Managing the Environmental and Societal Impacts of Increased Arctic Shipping

Arctic Marine Shipping Assessment (AMSA)

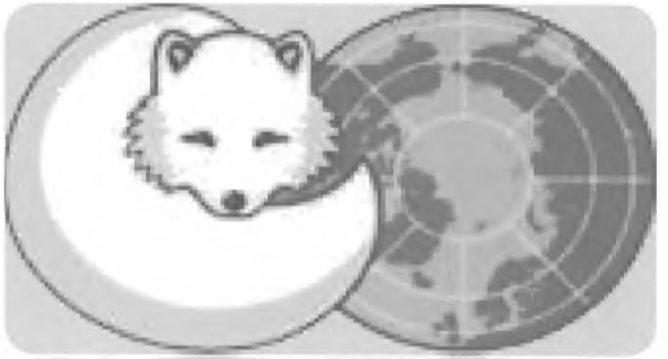
- U.S. co-led with Canada and Finland development of the AMSA in the Arctic Council from 2004 – 2009
- AMSA remains the seminal work on the future of Arctic shipping
- Contains a number of recommendations in three categories:
  - Enhancing Arctic Marine Safety
  - Protecting Arctic People and the Environment
  - Building the Arctic Marine Infrastructure
- The Arctic Council, through its working groups, is following up on a number of the recommendations

Arctic Search & Rescue (SAR) Agreement

- Arctic states recently concluded a binding agreement on maritime and aeronautical SAR (first ever among the Arctic states)
- Expecting all Arctic states to soon notify the Canadian depositary that they are ready to implement domestically (only U.S. and Russia have so far)
- What the Agreement Does:
    - Defines Areas of Arctic In Which Each Party Has Responsibility for SAR Response
    - Parties Committed to Provide Mutual Assistance In Response To Incidents
- Main means of implementation will be exercises – both tabletop and actual
- Canada holding the first tabletop exercise in Whitehorse in October
- First Effort To Maximize Effect of Limited SAR Capacity in Remote Arctic Region

Arctic Council: Oil Spill Task Force

- **Arctic Council established Oil Spill Task Force in May 2011**
- **Task Force charged with developing instrument for arctic oil spill preparedness and response**
- **Task Force chaired by U.S./Russia/Norway**
  - **AMB Dave Balton: co-chair**
  - **U.S. Delegation led by USCG Admiral**
- **First Meeting: 17-18 October in Oslo**
  - **U.S. interagency coordinating proposal**
  - **Possible U.S. lead on drafting effort for final instrument**

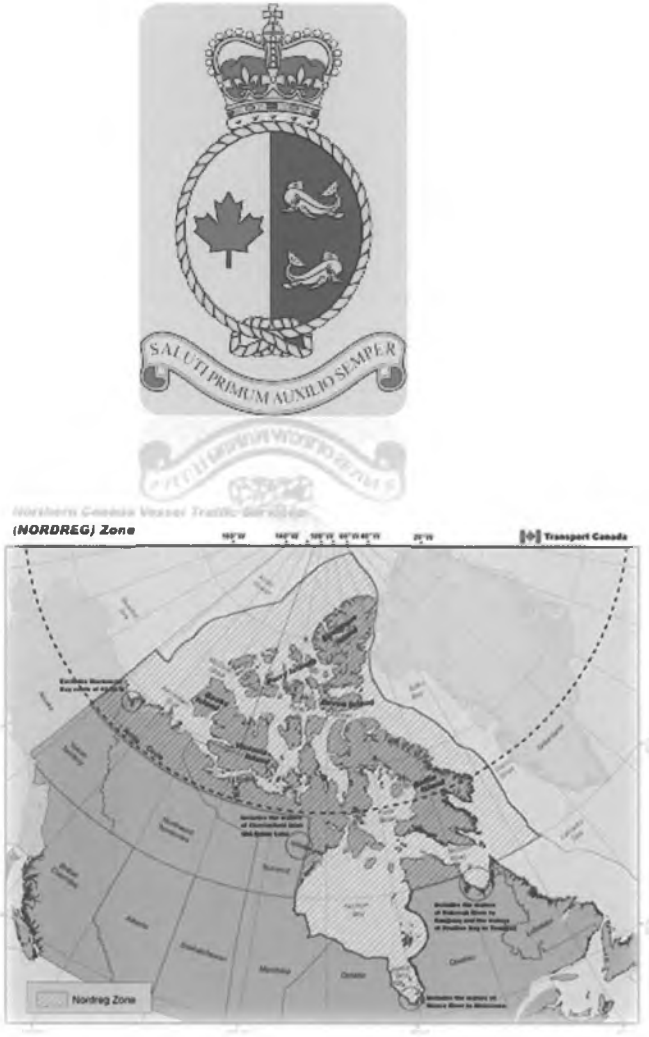


The Polar Code

- Based on MSC and MEPC's 2002 non-binding guidelines for ships operating in ice-covered waters (MSC/Circ.1056-MEPC/Cir.399)
- 86th Session of MSC (2009) approved development of mandatory Polar Code
- Ship Design & Equipment (DE) sub-committee has lead for development effort
- Correspondence Group working on draft for DE
    - Current structure includes both mandatory provisions and non-binding recommendations
    - Applicable to Arctic & Antarctic
    - Based on functional requirements (ship design & operational) unique to polar areas
    - Likely limited SOLAS/MARPOL regulated vessels in first instance
- Aggressive timeline for development

IMO

Northern Canada Vessel Traffic Services (NORDREG) Zone



- Effective July 1, 2010, all ships in Canada's claimed Arctic waters must register/report
- Canada claims authority to deny entry to EEZ, straits, territorial sea
- US supports safety/environmental protection objectives, BUT
- Concerned that NORDREGs are inconsistent with important law of the sea principles related to navigation rights and freedoms
- US and others urging Canada to submit NORDREGs to IMO to provide solid legal foundation and broad international acceptance

CMTS: Arctic IAT

CMTS
U.S. Committee on the Marine Transportation System

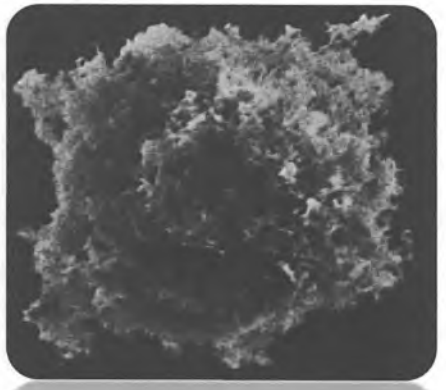
- **Committee on Marine Transportation formed Arctic Interagency Action Team (IAT) in January 2010.**
- **CMTS Arctic IAT is developing a U.S. Arctic Maritime Transportation System: Overview & Policy Recommendations report. All CMTS agencies are participating in this effort.**
- **The report will:**
  - **identify gaps in the U.S. Arctic MTS and risks associated with various alternative actions & mitigation plans**
  - **provide recommendations for safe, secure & environmentally sound utilization of the U.S. Arctic for maritime transportation**
  - **build upon the Arctic Council's Arctic Marine Shipping Assessment 2009 Report**

Environmental Issues: Back Carbon

- **AMSA recommended: Arctic states "decide to support the development of improved practices and innovative technologies for ships in port and at sea to help reduce current and future emissions of greenhouse gases (GHGs), Nitrogen Oxides (NOx), Sulfur Oxides (SOx) and Particulate Matter (PM), taking into account the relevant IMO regulations."**
- **Black Carbon (BC), a component of PM, has particularly negative effects in the Arctic and is of prime importance to most members of the Arctic Council**
- **Although scientific uncertainty remains about BC's warming effects, there is far less uncertainty about its negative effects on albedo (i.e. surface reflectivity)**

Environmental Issues: Back Carbon

- **AC Task Force on Short-lived Climate Forcers (SLCFs) recommended that the Arctic states take action domestically to mitigate BC emissions as soon as practicable**
- **Norway recently proposed action on BC at the IMO Marine Environment Protection Committee (MEPC), but a number of countries opposed the proposal, including Russia (which also generally opposes action in the Arctic Council on BC)**
- **The general policy view is that if the Arctic states can significantly reduce BC emissions – which is relatively easy and cost-effective – we may be able to slow cryospheric melting and thawing, buying precious time while the global debate on carbon dioxide continues**



Environmental Issues: Invasive Species & Ballast Water

- **Little is known about whether and how invasive species may enter the Arctic marine environment and what effects they may have**
- **Increased shipping could lead to the introduction of invasive species through ballast water, as has happened in other oceans**
- **This is an area the Arctic Council may want focus on, beyond the AMSA recommendation that the Arctic states ratify the IMO Ballast Water Convention**

Impacts on Indigenous Peoples

- **Increased shipping in the Arctic will inevitably affect the livelihoods of Arctic indigenous peoples**
- **The AMSA recommends:**
  - **Arctic states conduct surveys of indigenous maritime uses;**
  - **engage with Arctic communities;**
  - **the Arctic Council undertaking some of these activities now**

Executive Summary

The Aleutian Islands is a region of Alaska that supports rich and diverse marine resources, including some of the nation's most productive commercial fisheries. A major marine shipping route, known as the Great Circle route, which is used by international commercial shipping vessels, intersects the region. Domestic shipping occurs within the region to support the local communities and economic infrastructure. Past vessel accidents in the Aleutian Islands that have resulted in loss of cargo, oil spills and loss of life established the need to initiate a multi-phased study to assess the risks posed from maritime transportation in the Bering Sea and the Aleutian Archipelago. This report is a summary of Phase A of the Aleutian Islands Risk Assessment and includes the recommendations of the Advisory Panel assembled for the project.

This report documents the process, analysis, and outcomes of Phase A of the Aleutian Islands Risk Assessment. Phase A began in May 2009 with the establishment of an organizational structure made up of four groups: a Management Team, an Advisory Panel, a Risk Analysis Team, and a Technical Peer Review Panel. Over a two-year period, the Advisory Panel met in person or by web-conference fourteen times. The major work conducted and discussed under Phase A included:

- The development of a risk report analyzing the likelihood of spills based on vessel traffic through the Aleutians,
- The creation of a risk matrix to analyze the potential consequences of vessel-source spills, and
- A qualitative assessment and prioritization of risk reduction options.

The Risk Analysis Team developed the following six studies:

- Semi-quantitative vessel traffic study,
- Marine spill frequency and size study,
- Baseline spill study,
- Consequence analysis study,
- Accident scenario and causality study, and
- Evaluation and prioritization of risk reduction options study.

Accompanying reports were developed for each study and are summarized in this synthesis report. Each study and report built upon each other and was reviewed by the Project Team. All reports were developed with opportunities for public input and review.

Based on discussion and the analysis of Risk Reduction Options (RRO), the Advisory Panel developed recommendations that characterize all RRO's considered into three categories:

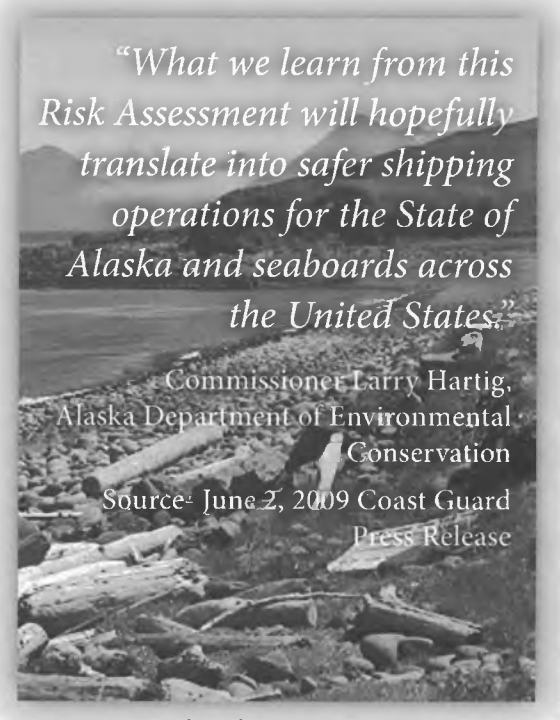
- RRO recommended for immediate implementation

- RRO recommended for Phase B Study, and
- RRO considered but set aside.

Two key principles were applied to the RRO analyses: (1) prevention measures take priority over response measures, and (2) all measures should be realistic and practical, and should support the basis for the Advisory Panele's recommendations.

The recommendations of risk reduction measures present a consensus of the Advisory Panel. The RRO's found to be sufficiently effective and practical for immediate implementation include:

- Develop an enhanced vessel monitoring and reporting program,
- Enhance towing capabilities on U.S. Coast Guard cutters and increase cutter presence in the Aleutians,
- Stage additional Emergency Towing Systems (ETS) in the Aleutians,
- Initiate the process to establish International Maritime Organization (IMO) Particularly Sensitive Sea Areas,
- Strengthen the Aleutians Subarea Contingency Plan, and
- Increase salvage and spill response capability in the Aleutians.



In some cases, the recommendations for immediate implementation have elements that require further study. The four Risk Reduction Options that require additional work or study as Phase B of the Aleutian Islands Risk Assessment prior to full implementation are:

- Increase rescue tug capability in the Aleutians,
- Increase salvage and spill response capability in the Aleutians,
- Determine the boundaries of the IMO Particularly Sensitive Sea Areas, and develop recommendations for associated protective measures, and
- Strengthen the Aleutians Subarea Contingency Plan.

All of the risk reduction option recommendations considered are described in this report, with additional background and detailed descriptions in Appendix A of this report.

The Advisory Panel's recommendations are presented in this report to the decision makers in the U.S. Coast Guard, State of Alaska, and local governments. The decision as to which measures will be adopted ultimately rests with the decision makers.

The Management Team has deemed Phase A of the Risk Assessment complete and will initiate Phase B in late 2011.

Project Background

1. Project Background

1.1 Need for the Study

The Aleutian Islands is a region that supports rich and diverse marine resources, including some of the nation's most productive commercial fisheries. While the Aleutian region is remote and sparsely populated, it is intersected by a major marine shipping route utilized by international commercial shipping vessels carrying various cargoes from the west coast of North America to Asia along the North Pacific Great Circle route (Figure 1).

Figure 1. North Pacific Great Circle route.

While a majority of the vessel traffic along the Great Circle Route passes through the region without making any port calls, accidents involving these vessels have the potential to significantly and adversely impact coastal and marine ecosystems, economies, and human activities in the Aleutian region. The frequency of storms, high winds, and severe sea conditions in this region increase the potential for accidents to occur. Limited infrastructure, coupled with these challenging operating conditions, often limit the potential to mitigate or respond to incidents in this remote region.

Vessel accidents have caused past oil spills in the Aleutian Islands, including the 2004 M/V Selendang Ayu incident (Figure 2). This incident, which involved loss of life of the ships' crew and resulted in a significant fuel oil spill, spurred a court settlement that established funding for a comprehensive risk assessment (United States of America v. IMC Shipping Co. PTE.).

Figure 2. M/V Selendang Ayu. Photo credit: Magone Marine

In response to the directive for an Aleutian Islands Risk Assessment, the National Fish & Wildlife Foundation (NFWF), US Coast Guard (USCG) and State of Alaska Department of Environmental Conservation (ADEC) initiated a multi-phase study assessing the risks from maritime transportation in the Bering Sea and the Aleutian Archipelago (Figure 3).

Figure 3. Study area for the multi-phase study assessing the risks from maritime transportation in the Bering Sea and the Aleutian Archipelago.

1.2 Previous Work and Related Studies

In support of a safety improvement activity, a formal Ports and Waterways Safety Assessment (PAWSA) for the Aleutian Islands was conducted in Anchorage, Alaska on July 24-25, 2006 and sponsored by the U.S. Coast Guard and the Alaska Department of Environmental Conservation. Twenty participants representing waterway users, regulatory authorities, and stakeholders attended the workshop. A Waterway Risk Model, incorporating 24 risk factors associated with both the causes and the effects of waterway casualties, was used throughout the workshop to guide discussions and numerical assessments. Based on extensive discussions during the workshop, concentrations of risks were noted by the participants in three locations: Unimak Pass, Dutch Harbor and North of Akun Island. The PAWSA participants judged that additional risk reduction actions were needed with respect to 14 or the 24 risk factors in the Waterway Risk Models. (PAWSA Workshop Report for Aleutian Islands, July 2006).

In 2007, the State of Alaska and the US Coast Guard determined that the Aleutian Islands Risk Assessment must follow a well-designed process to ensure a meaningful outcome. Consequently, they asked the Transportation Research Board (TRB), part of the National Academies, to examine the available data and develop a framework for the most appropriate and scientifically rigorous approach possible to complete the comprehensive risk assessment in a series of discrete phases.

To conduct this study, the TRB empanelled the Committee for Risk of Vessel Accidents and Spills in the Aleutian Islands: A Study to Design a Comprehensive Assessment. The committee included individuals with expertise in risk assessment methods and practices; risk assessment data and analyses; risk analyses, with emphasis on evaluation and prevention of ship accidents; commercial shipping, with emphasis on North Pacific operations; navigation safety and voyage planning; US Coast Guard missions and

operations related to waterway management and accident response; environmental protection; and regulatory approaches to ship safety and accident prevention.

The committee met three times. During a multiday meeting (October 29–November 2, 2007) in Alaska with a site visit to Dutch Harbor, the committee heard from stakeholders and reviewed available data pertinent to its charge. Stakeholders discussed specific hazards presented by Aleutian shipping operations and a range of possible mitigation measures they believed should be considered for implementation.

At its second meeting, held in Washington D.C. on January 7–8, 2008, the committee reviewed presentations on related maritime risk assessments conducted in Puget Sound, San Francisco, and Europe as well as spill response and environmental impact.

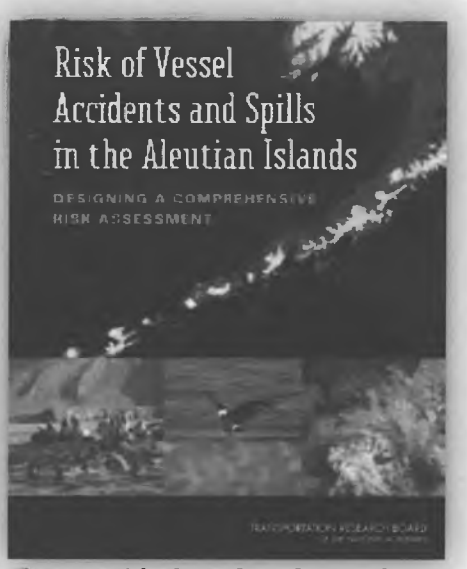


Figure 4. Risk of Vessel Accidents and Spills in the Aleutian Islands.

The efforts of this committee culminated with the completion of their report titled: Risk of Vessel Accidents and Spills in the Aleutian Islands (TRB, 2008). This report included recommendations for a methodology and approach for the Aleutian Islands Risk Assessment (Figure 4).

1.3 Phase A Methodology

The TRB recommended a two-phase approach to the Aleutian Islands Risk Assessment: a Preliminary Risk Assessment (Phase A) followed by a Focused Risk Assessment (Phase B). Phase A involved the establishment of a management structure, made up of four groups: a Management Team, an Advisory Panel, a Risk Analysis Team, and a Peer Review Panel. The major work under Phase A included the development of a risk report analyzing the likelihood of spills based on vessel traffic through the Aleutians, then creating a risk matrix to analyze the potential consequences of vessel-source spills, and finally conducting a qualitative assessment and prioritization of risk reduction options. Phase A was complete in 2011.

Phase B will further evaluate and also implement the risk reduction options recommended during Phase A and will report on the implementation process and findings.

The Preliminary Risk Assessment (Phase A) was conducted through a series of technical studies, which were refined as the project progressed (Section 3 of this report describes each Study). Six studies, each with accompanying reports, were conducted:

- Semi-quantitative vessel traffic study
- Marine spill frequency and size study
- Baseline spill study
- Consequence analysis
- Accident Scenario and Causality Study
- Evaluation and Prioritization of Risk Reduction Options

"The Panel is focused on recommendations that can be implemented with little or no red tape."

Gary Folley, Management Team member -
Alaska Department of Environmental Conservation

2. Aleutian Islands Risk Assessment Organizational Structure

The TRB methodology for Phase A recommended a management structure consisting of four groups: a Management Team, an Advisory Panel, a Risk Analysis Team, and a Peer Review Panel. A fifth group, the Facilitation Team was also formed to coordinate the activities of the other four groups.

2.1 Management Team

The Management Team was comprised of those agencies responsible for allocating the funds for the risk assessment, as well as for ensuring the work is carried out in an effective and useful way. The Management Team members were the US Coast Guard, the State of Alaska Department of Environmental Conservation, and the National Fish and Wildlife Foundation, which was responsible for allocation of the project funding. The Management Team's first priority was to establish an Advisory Panel consisting of stakeholders and recognized experts with knowledge and expertise on all issues pertinent to maritime transportation risks in the Aleutian Islands region.

2.2 Advisory Panel

The Advisory Panel provided a structured stakeholder/participatory approach intended to build trust, clarify project values and goals, and incorporate local knowledge into the risk assessment. The Advisory Panel operates as an independent entity from the Management Team and managed their affairs using a charter and followed an established set of protocols. (Charter and Protocols online at http://www.aleutiansriskassessment.com/documents.htm).

Figure 5. The Management Team and Advisory Panel in Dutch Harbor.

The Advisory Panel consisted of stakeholders and authorities with local knowledge and expertise on issues pertinent to the assessment, such as local infrastructure, relevant industries, waterways and their navigation, weather, and habitats. The Advisory Panel included members and alternates representing the

following interests: fisheries, local government, mariners, environmental organizations, local non-governmental organizations, resource managers, and subsistence users. Advisory Panel members were selected to represent stakeholder interests, rather than specific organizations. For example, the Advisory Panel representative for fisheries was intended to represent fisheries interests at a broad and inclusive level rather than a specific fishery. Advisory Panel members were encouraged to reach out to other organizations and individuals within their stakeholder interest group.

Table 1 lists the Advisory Panel membership.

Table 1. Advisory Panel make-up.

Panel Member	Organization	Area of Expertise
Tom Gemmell	Marine Conservation Alliance	Fishing
Brent Paine*	United Catcher Boats Association	Fishing
Shirley Marquardt	Mayor of Unalaska (current)	Local government
David Arzt	Alaska Marine Pilots	Mariner, Pilot
Peter Garay*	Alaska Marine Pilots	Mariner, Pilot
Bob Umbdenstock	Resolve Marine Group	Mariner, Salvor
Mike Ruiz*	American Marine Corporation	Mariner, Salvor
Eugene Makarin	American President Lines, Ltd.	Mariner, Containerships
Simon Lisiecki	BP Shipping (retired)	Mariner, Innocent Passage
Mayak Mishra*	Fleet Management Limited	Mariner, Innocent Passage
Louis Audette	K Sea Transportation	Mariner in Local Trade, Oil Barges/Tankers
Mike Baker*	Aleut Enterprise, LLC	Mariner in Local Trade, Oil Barges/Tankers

2.3 Risk Analysis Team

The Risk Analysis Team for the Phase A Preliminary Risk Assessment performed the risk analysis technical studies under the direction of the Management Team. The Risk Analysis Team was comprised of experienced marine traffic experts, spill modeling and risk assessment scientists from Environmental Resources Management (ERM)

and Det Norske Veritas (DNV), selected through a competitive bid process. The Risk Analysis Team authored all of the Technical Studies summarized in Section 3 of this report.

2.4 Technical Peer Review Panel

The Management Team, in consultation with the National Academy of Science, TRB, established the Technical Peer Review Panel. Collectively, Technical Peer Review Panel members have expertise in all aspects of marine risk assessment. Its role was to perform peer review of the approaches, methodologies, models, and algorithms used by the Risk Analysis Team to ensure that assumptions were based on the best available data, that uncertainties had been properly described, that analyses had the appropriate level of rigor for the level of assessment, that the work was of consistently high quality, and that findings were properly justified.

The Aleutian Islands Risk Assessment (AIRA) Technical Peer Review Panel consists of the seven members listed in Table 2.

Table 2. Peer Review Panel make-up.

Panel Member	Affiliation
Dr. CJ Beegle-Krause	President, Environmental Research for Decision, Inc.
Dr. Paul S. Fischbeck	Director, Center for the Study & Improvement of Regulation, Department of Social & Decision Sciences – Carnegie Mellon University
Dr. John D. Lee	Professor, Department of Industrial and Systems Engineering, College of Engineering, University of Wisconsin
Dr. Thomas M. Leschine	Director, University of Washington School of Marine Affairs
R. Keith Michel	Chairman of the Board, Herbert Engineering Corporation
Dr. Ali Mosleh	Professor of Mechanical Engineering, University of Maryland
Dr. Beverly Huey (TRB Staff)	Senior Program Officer, Transportation Research Board of the National Academies

2.5 Facilitation Team

The Facilitation Team supported the Management Team and had the key role of assembling, facilitating, and documenting Advisory Panel activities and project process. The Facilitation Team developed and maintained a website throughout the life of the project, summarizing the process and timeline and serving as a central repository for project reports and related documents (www.aleutiansriskassessment.com). The website was used along with e-mail lists and public notices to communicate the project status, meeting announcements, and opportunities for public comments or input. The Facilitation Team also created private, password-protected websites for use by the Management Team and Advisory Panel in sharing and reviewing draft documents and interim work products.

The Facilitation Team was comprised of project management, facilitation, and risk assessment professionals from Nuka Research and Planning Group, LLC and Pearson Consulting, LLC.

Emergencies such as the Golden Seas event again illustrate the crucial need for better response mechanisms, such as larger tugs in the Aleutian Island area."

Whit Sheard, Advisory Panel member/NGO Environmental

(Source: Towline.com, December 7, 2010)

3. Technical Studies

3.1 Overview

Phase A (Preliminary Assessment) of the Aleutian Islands Risk Assessment was conceived to include eight separate tasks. The Risk Assessment Team was responsible for conducting and reporting on these tasks, resulting in a set of six Technical Study reports (http://www.aleutiansriskassessment.com/documents.htm). This section summarizes the key findings from the six technical reports completed for Phase A:

- Semi-quantitative Traffic Study Report (DNV and ERM, 2010a)
- Marine Spill Frequency and Size Report (DNV and ERM, 2010b)
- Baseline Spill Study Report (DNV and ERM, 2010c)
- Consequence Analysis Report (DNV and ERM, 2011a)
- Accident Scenario and Causality Study Report (DNV and ERM, 2011b)
- Risk Reduction Options Evaluation Report (DNV and ERM, 2011c)

Phase A started with an analysis of the vessel traffic patterns in the Aleutians for both the present (2008/2009) and in the future year of 2034 (DNV and ERM, 2010a). Next, the Risk Analysis Team used modeling to predict the most likely accidents, spills, and spill sizes (DNV and ERM, 2010b), and then applied these predictions to develop six general spill scenarios (DNV and ERM, 2010). The next step was to analyze the potential consequences of various spill scenarios, which led the Risk Analysis Team to focus on 16 accident scenarios resulting in high spill risk, and the anticipated impacts of these scenarios on environmental and socio-economic resources (DNV and ERM, 2011a).

Figure 6. Vessel in the Aleutian Islands.

The 16 high risk spill scenarios were further analyzed to consider the causes of each incident (DNV and ERM, 2011b). Based on these identified causes, the final technical study under Phase A ranked each of the 16 scenarios based on their likelihood and consequences, and then considered potential

risk reduction options that related back to the causes of the spills (DNV and ERM, 2011c). The risk reduction options were evaluated based on cost, practicality, ease of implementation, and effectiveness for mitigating risks associated with the highest-ranking scenarios. Semi-qualitative approaches were used throughout, with a greater emphasis on modeling for the spill scenarios and a greater reliance on the Advisory Panel's professional judgment in ranking risks and weighing potential risk reduction options.

3.2 Semi-quantitative Traffic Study

The semi-quantitative traffic study included three elements: (1) summarization of vessel traffic patterns in the study area during the base year (2008/2009), including the types of vessels, frequency of transit, routes, and cargo; (2) prediction of anticipated changes in the vessel traffic patterns based on changes in trade, vessel characteristics, and regulations; and (3) forecast of changes in the fleet expected over a 25-year period (2009 – 2034). The final report, completed in September 2010, incorporates comments from the Management Team, Advisory Panel, and Peer Review Panel (DNV and ERM, 2010a).

The report established a baseline of vessel traffic in the study area based on Automated Information System (AIS) data from the Marine Exchange of Alaska (MXAK). MXAK data did not cover the entire study area, nor did it include the small commercial fishing vessels and barges that do not carry AIS onboard. However, it is believed that the areas for which there is no AIS data do not represent a significant portion of vessel activity. Where possible, the authors of the report collected data from shore-based facilities (ports, harbors, and ferry terminals) and the US Coast Guard's database of Vessel Response Plans to enhance MXAK data.

Analysis of the AIS data from MXAK showed that 2,219 vessels transited the study area from August 1, 2008 – July 31, 2009. Many of these were deep-draft vessels transiting through the area along the North Pacific Great Circle Route. Other vessel traffic was from domestic operations, including fishing vessels, tugs and barges, and government vessels. The AIS data was used to estimate main traffic routes for the study area (Figure 7).

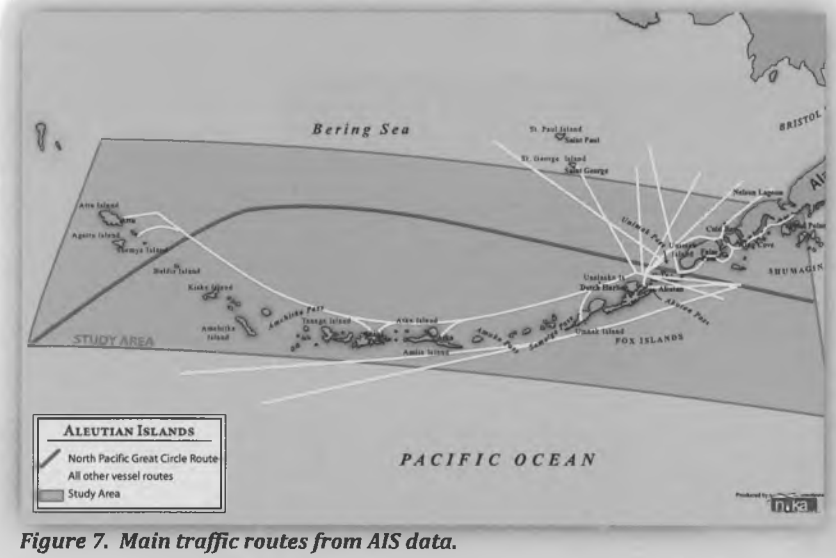

Figure 7. Main traffic routes from AIS data.

The North Pacific Great Circle Route is the primary route for vessels trading between ports on the Pacific coasts of the United States and Canada and the Pacific ports in East Asia. Common commodities transiting this route include commercial goods, machinery,

wood, coal, and agricultural products. Vessels operating in the study area are not expected to change significantly, with the exception of a continued increase in the use of double hulled oil tankers, as mandated by the Oil Pollution Act of 1990 and the 2006 Amendment to the Revised MARPOL Annex 1.

The study found that the following factors *are likely to* impact vessel traffic patterns in the Aleutian Islands over the next 25 years:

- **Transit of chemical carriers & container ships:** Chemical carriers and container ships are expected to transit the study area more than twice as often in the next 25 years due to the anticipated growth in trade between East Asia and North America. Increased trade from East Asia to North America will be driven by four main categories of goods: machinery (including vehicles), chemicals, mixed freight, and base metals. Chemicals and cereal grains are expected to represent the increase in goods traveling from North America to East Asia.
- **Barge delivery of diesel fuel and home heating oil:** Barge activity of this type is expected to increase as the population of the area grows. An increase in barge trips delivering oil to mining operations is possible, but the extent of this potential increase is unlikely to be significant. The increase in barge activity for this purpose will be even smaller if the Donlin Creek mine proceeds with its current plan to supply the operation with diesel via pipeline instead of barge shipments.

The study also considered the following factors for their potential to impact vessel traffic through the study area, but found these *unlikely to* impact vessel traffic patterns in the Aleutian Islands over the next 25 years:

- **Changes in vessel size:** As ships have generally reached their size potential relative to waterway and port depths, it is not expected that the size of ships transiting the study area will increase significantly over the next 25 years.
- **Vessel activity associated with fisheries:** Conservative management of the Aleutians' fisheries means that the number of fishing vessels is not likely to change significantly, though vessel types may be upgraded.
- **Shipping through Arctic regions due to ice melt:** Though shipping via the Northern Sea Route and the Northwest Passage is expected to increase significantly in the next 25 years as sea ice melts in the Arctic region, this is not expected to have a significant impact on vessel traffic in the study area. Instead, an increase in shipping through the Arctic region is expected to represent an increase in the movement of commodities between Russia and Europe (which does not require transiting the study area).
- **Vessel activity associated with oil and gas developments:** Based on a 2009 study commissioned by Shell Exploration and Production, the report concludes that while vessel activity associated with oil and gas activity may increase for short periods of time, it is unlikely to result in long-term changes in vessel types, frequency of transit, or cargo.

3.3 Marine Spill Frequency and Size Study

The second study completed by the Risk Analysis Team estimated the frequency of marine accidents and provided marine spill scenarios for both a baseline year (2008/2009) and future year (2034). The final report, completed in September 2010, incorporates comments from the Management Team, Advisory Panel, and Peer Review Panel. (DNV and ERM, 2010b)

The report used the Marine Accident Risk Calculation System (MARCS), which provides probabilities about spill frequency, size, location, and vessel type. These probabilities laid the groundwork for the development of baseline spill scenarios, and the Risk Analysis team applied the MARCS output to develop six example scenarios involving potential vessel accidents resulting in spills within the study area.

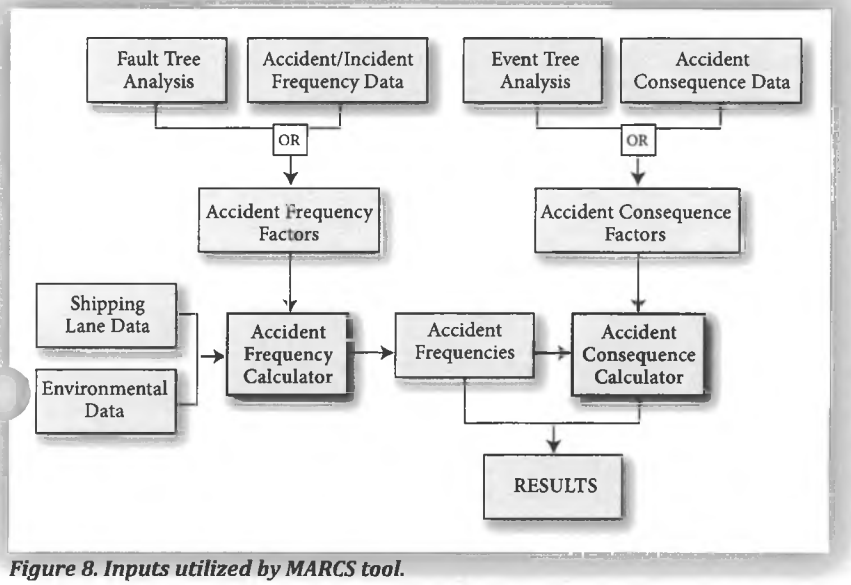

Figure 8. Inputs utilized by MARCS tool.

MARCS relies on data inputs from the following categories: vessel traffic, environment, on-board operations, and external operations (Figure 8). The predicted accidents and spills derived from MARCS modeling for the baseline year were generally similar to actual historical data as collected by the US Coast Guard, with the exclusion of the M/V Selendang Ayu spill in 2004. However, as the report notes, use of MARCS (or any other) modeling requires numerous assumptions and is subject to uncertainties.

The MARCS model was used to develop vessel transit plots that display the traffic input data based on the frequency of all vessel transits per traffic lane. Figure 9 shows that during the base year (2008/2009) the heaviest amount of traffic (illustrated in red) occurred in Unimak Pass, the traffic lane to the Southeast of Unimak Pass, and the traffic lane to the Northwest from the Unalaska area. During the future year (2034) the heaviest amount of traffic (illustrated in red) is forecasted to occur along the Great Circle Route and the traffic lane to the Northwest from the Unalaska area.

Table 3 summarizes the predicted accidents for the 2008/2009 baseline year and future year of 2034. Overall, the number of accidents was predicted to increase by 11%, from 8.67 accidents per year in the baseline year to 9.61 in the future year. Groundings remain the primary type of accident, changing slightly from 96% in the baseline year to 91% in the future year. However, there was a significant change in the types of vessels associated with these accidents. Fishing vessels were the most common vessel type associated with predicted accidents in the baseline year (72%). By 2034, container ships

Base Year Vessel Traffic Plot (2008/2009)

Key

Color	Transit Frequency (ship movements per day within each calculation location)
	0.0 to 0.1
	0.1 to 0.5
	0.5 to 1
	1 to 5
	5 to 10
	> 10

Figure 9. Vessel traffic plots.

are predicted to be the most common vessel type associated with predicted accidents (65%). This built on the prediction in the Vessel Traffic Study (DNV and ERM, 2010a), which estimated that container vessels are expected to transit the area with increasing frequency as trade between North America and East Asia grows.

Most accidents were predicted to take place in Unimak Pass, Akutan Pass, and the approach to Dutch Harbor. For this reason, these areas were also the most likely to experience a spill.

Overall, both bunker and cargo spills were predicted to increase slightly in the future, largely due to the increasing transit of container ships. However, the increase was expected to be limited by the fact that double-hulled vessels will become more prevalent by 2034, reducing the estimated spill size and outflow per accident.

Table 3. Comparison of predicted accidents and spill risk for base year and future year.

Accidents/Spill Risks	Predicted for Base Year: 2008/2009	Predicted for Future Year: 2034
Total predicted accidents	8.67	9.61
Groundings as % of total accidents (both drift and powered groundings)	96%	91%
Top vessel category associated with accidents	Fishing vessels (72%)	Container ships (65%)
% of accidents resulting in bunker spill	8	8
Total bunker spill risk per year	1,584 bbl (240 tons)	2,904 bbl (440 tons)
Types of vessel most likely to be associated with bunker spill	Container ships (48%)	Container ships (64%)
Types of accidents most likely to be associated with bunker spill	Drift grounding (42%)	Drift grounding (38%)
Total cargo spill risk per year	4,045 bbl (613 tons)	6,006 bbl (910 tons)
Types of vessel most likely to be associated with cargo spill	Tank barges (72%)	Tank barges (39%)
Types of accidents most likely to be associated with cargo spill	Powered grounding (45%)	Drift grounding (40%)

3.4 Baseline Spill Study

The baseline spill study characterizes six example spills resulting from vessel accidents in the Aleutians study area. The final report, completed in September 2010, incorporated comments from the Management Team, Advisory Panel, and Peer Review Panel (DNV and ERM, 2010c).

The six spill scenarios were initially described in the Spill Frequency and Size Study report (DNV and ERM, 2010b). The purpose of modeling potential spill scenarios and their impacts on shoreline and marine ecology was to understand and identify priority hazards.

The spill scenarios and impacts were modeled using the GEMSS® - Chemical and Oil Spill Impact Module (COSIM) models. COSIM used the results from MARCS, which predicted spill sizes and frequencies (Section 3.3). As with all models, numerous assumptions were used which added uncertainty to the outputs. Extensive inputs to COSIM were required, including the information obtained from the vessel traffic study (DNV and ERM, 2010a) and MARCS analysis (DNV and ERM, 2010b), as well as data on winds, currents, salinity, temperature, weather, bathymetry, shoreline and sediment characteristics, and biologically sensitive areas. To test the application of COSIM to the study area, an additional scenario of the actual M/V Selendang Ayu spill was completed and the results compared with observations and reports from the 2004 spill. The comparison was favorable. The spill scenarios were all run for seven days.

3.5 Consequence Analysis

In order to anticipate spill consequences, MARCS data generated during the Spill Frequency and Size Study (DNV and ERM, 2010b) were used to develop 16 scenarios

believed to represent the high risk spills, either in terms of their potential frequency, potential size, or a combination of the two. A Consequence Analysis report presents spill scenarios that were modeled based on locations and vessel types that were considered to pose the highest risk of a spill with the greatest possible consequences (DNV and ERM, 2011a). Scenarios at six locations were developed, all of which were located along the typical transit route for large vessels (Figure 10). Three locations (North Unimak Pass, Sanak Island, and Attu Island) were chosen because they represent areas where spills were most likely to occur, due to vessel traffic and conditions.

Figure 10. Scenario location map.

Three other locations (Adak Island, Amlia Island, and Urilia Bay) were chosen due to their proximity to environmentally sensitive areas or areas of economic importance – the worst areas for a spill in terms of potential environmental or socio-economic consequences. Multiple scenarios were run for North Unimak Pass, Sanak and Attu; one scenario each was run for Adak, Amlia, and Urilia. Table 4 summarizes all scenarios run for the six locations (16 scenarios total).

The heavily traveled North Pacific Great Circle Route, which intersects the Aleutian Islands study area, passes near critical environmental habitat as well as fisheries of significant economic importance. The consequence analysis report describes the following aspects of the study area: physical conditions, habitat, fish, seabirds, mammals, invasive species (rats), and socio-economic resources including commercial and recreational fisheries, subsistence resources, historic sites, recreation and tourism, and coastal development. There are multiple protected areas, including the Alaska Maritime National Wildlife Refuge, which covers 19,820 sq. km, or almost all of the Aleutian Islands area.

The likelihood of environmental and socioeconomic resources being impacted by the 16 spill scenarios was analyzed along with the nature and extent of the predicted impacts. The analysis focused on impacts related to the release of hydrocarbons or other

chemicals from vessel fuel or cargo, but also included a discussion of the potential for rat infestations and the associated impacts on seabird populations and plants.

Table 4. Summary of spill scenarios and includes resources most likely impacted.

Scenario	Location	Vessel Type & Incident	Volume & Type of Oil	Season	Resources Most Likely to be Impacted Significantly
1	North Unimak Pass	Container Ship Collision	3,050 bbl Bunker C	Summer	Shoreline Benthos Bird habitat Fish (including shellfish and larvae)
2	North Unimak Pass	Bulk Carrier Collision	18,244 bbl Bunker C	Summer	Shoreline Benthos Bird habitat Fish (including shellfish and larvae)
3	North Unimak Pass	Crude Oil Tanker Collision	428,080 bbl Crude oil	Summer	Shoreline Benthos Bird habitat Fish (including shellfish and larvae)
4	North Unimak Pass	Product Tanker Collision	26,754 bbl Diesel	Winter	Marine mammal habitat
5	North Unimak Pass	Tank Barge Collision	40,677 bbl Diesel	Summer	Fish (including shellfish and larvae)
6	Sanak Island	Container Ship Drift Grounding	3,050 bbl Bunker C	Summer	Marine mammal habitat
7	Sanak Island	Bulk Carrier Drift Grounding	18,244 bbl Bunker C	Summer	Marine mammal habitat
8	Sanak Island	Crude Oil Tanker Drift Grounding	428,080 bbl Crude Oil	Summer	Marine mammal habitat Shoreline Benthos Fish (including shellfish and larvae)
9	Sanak Island	Tank Barge Drift Grounding	40,677 bbl Diesel	Summer	Marine mammal habitat
10	Holtz Bay Attu Island	Container Ship Drift Grounding	25,420 bbl Bunker C	Winter	Marine mammal habitat Nesting birds (early spring – late summer only)
11	Holtz Bay Attu Island	Bulk Carrier Drift Grounding	18,244 bbl Bunker C	Summer	Marine mammal habitat Nesting birds (early spring – late summer only)
12	Holtz Bay Attu Island	Crude Oil Tanker Drift Grounding	428,080 bbl Crude Oil	Spring	Fish (including shellfish and larvae)
13	Holtz Bay Attu Island	Product Tanker Grounding	54,561 bbl Diesel	Spring	Marine mammal habitat Nesting birds (early spring – late summer only)
14	Adak Island	Tank Barge Grounding (powered/drifting)	40,677 bbl Diesel	Summer	Marine mammal habitat Nesting birds (early spring – late summer only)
15	Amlia Island	Container Ship Drift Grounding	40,677 bbl Bunker C	Summer	Marine mammal habitat Nesting birds (early spring – late summer only)
16	Urilia Bay	Bulk Carrier Drift Grounding	18,244 bbl Bunker C	Spring	Marine mammals

** It is unclear whether any VTS would provide coverage as far as Sanak Island.*

Table 5 identifies the resources most likely to be impacted by the 16 spill scenarios. Other impacts may occur, but the resources listed in the table are the ones identified by the Risk Analysis Team as being the most likely to suffer significant impacts.

Table 5. Description of RROs as recorded at the workshop (Risk Team summary).

RRO	Description of RRO as Recorded at the Workshop
Enhance Vessel Monitoring Program	
Satellite tracking plus AIS	Increase area coverage, increase number of vessels covered, implement an alarm system; integration of all monitors
Long-range ID and tracking (LRIT)	Enhance ability to identify and monitor vessel movements and communicate with vessels engaged in questionable situation and provide alarm notification to USCG and State and response vessels
Establish Vessel Tracking System (VTS) in Unimak and Akutan Passes	
Manned VTS/Direct Communication with Vessels	Meets IMO procedures and standards; new equipment, personnel, integration of systems
Traffic Separation Scheme in Unimak Pass	Voluntary; mark lanes on nautical chart to control traffic direction
Speed Restrictions	Dropped because low benefits, high unintended consequences, difficult to implement
Increase Rescue Tug Capability	
Dedicated rescue tug(s)	Open sea capability, always available
Non-dedicated rescue tug	Open sea capability, similar capability to dedicated tug but with cost-sharing, variable availability
Seasonal, dedicated tug	Open sea capability, similar capability to dedicated tug but only available seasonally (Oct 1 thru May 30)
Tugs of opportunity program	Tug regardless of size but available to respond; implement a program
Increase Emergency Towing System (ETS) Capabilities	
Expand shore-based ETS	There is an ETS system in Dutch Harbor; expanding system in Dutch Harbor to other locations (e.g., add one in Adak and one in location to be determined); provide greater coverage
Require emergency towing arrangements on deep draft vessels	For vessels not in innocent passage
Enhanced USCG Capabilities	
Enhance towing capabilities on cutters	See tug of opportunity
Increase number of cutters	Self-explanatory
Increase inspections	Not evaluated because there is no practical way to reduce risk further from the current inspection program
Split Captain of the Port (COTP) zones	Currently 3 zones - change or add Unalaska as COTP city to theoretically reduce response time; RRO is very high up in causal chain and within institutional organization/management, which is difficult to evaluate
Establish Restricted Areas	
Identify certain areas (to be defined) that should be avoided to reduce environmental or socioeconomic consequences/impacts	
IMO PSSA/ATB/SA	Measure does not reduce spill severity once it occurs but there is a benefit to reduce severity by preventing the accident from happening
Seasonal Routing	No formal mechanism for implementation; further consideration deferred
Increase Spill Response Capability	
Ocean-rated OSRO/PRAC - Open	No response capability except an Oil Spill Response Organization (OSRO) with only inland capability; this Ocean measure assumes Open Ocean

RRO	Description of RRO as Recorded at the Workshop
Near-shore rated OSRO/PRAC	See Ocean-rated OSRO/PRAC
Increase Salvage and Firefighting Capability via Regulations	New regulations go into effect in Feb 2011 for tank vessels; includes tugs, marine salvagers available, increase capability of lightering; ensure the regulations adequately address and are tailored for the Aleutian Islands. Salvage and marine firefighting regulations (subpart I) would apply
Local Community Response Agreements	Not considered further because part of the existing baseline; no delta in risk reduction effectiveness
Phase Out OPA90 Alternative Compliance	The OPA90 Alternative Compliance should NOT be phased out at this time; therefore, not an option.
Bolster Area Contingency Plans	
Establish requirements for vessels in innocent passage	Not likely to be implementable; therefore not evaluated further
Set area standards for vessels with VRP calling at US ports	Use local contingency plans to set standards; is a mechanism thus not evaluated further
Develop more geographic response strategies	Tail end of causal chain; enables a minimizing of impacts with prompt and proper response
Potential places of refuge planning	Already exists; baseline condition, no need to evaluate
Storm and severe weather rules	Stay the course; part of existing baseline condition; not evaluated further
High-Frequency radar surface current monitoring	Way of tracking oil and where it might go/trajectory; shore-based; assume transportable units set up as needed to monitor currents to help understand where spill might go; a tool in the toolbox; not enough information/knowledge of system to evaluate further
Require more training and drills	New Vessel Response Plan (VRP) regulations require additional training; part of baseline condition and not evaluated further at this time
Raise Liability Limits and Civil Penalties	
Increase liability and civil penalties	Cost of penalties is relatively low compared to response; but need limits within reason to obtain insurance; if raised too high insurance companies won't insure and may increase number of uninsured vessels; the General Accounting Office report states that OPA requires review of insurance
Increase State civil penalties	Intent to encourage better operations of vessel and vessel company

3.6 Accident Scenario and Causality Study

An Accident Scenario and Causality Study report provided additional information and analysis about the 16 scenarios developed in the Consequence Analysis Report, including identifying the potential causes of accidents such as those described in the scenarios (DNV and ERM, 2011b).

The Accident Scenario and Causality Study considered the Accident Fault Trees that underlie the MARCS model estimates of accident frequencies. In MARCS, the accident frequencies are calculated as the frequency of a critical situation, which is accident dependent, multiplied by the probability that an accident will occur given that the critical situation has occurred. Fault trees were developed for the Drift Grounding and Powered Grounding accident types, as shown in Figures 11 and 12.

The causality analysis found that, in general, the collisions (Scenarios 1-5) and powered grounding (Scenario 14) were attributed to human error, while the drift groundings

(Scenarios 6 - 13 and 15 – 16) were attributed to technical failures.

Further analysis of the scenarios as compared to historical data from 15 actual spills showed that the spill volumes used in the scenarios were likely over-estimated, which is consistent with the project's intent to examine high risk scenarios.

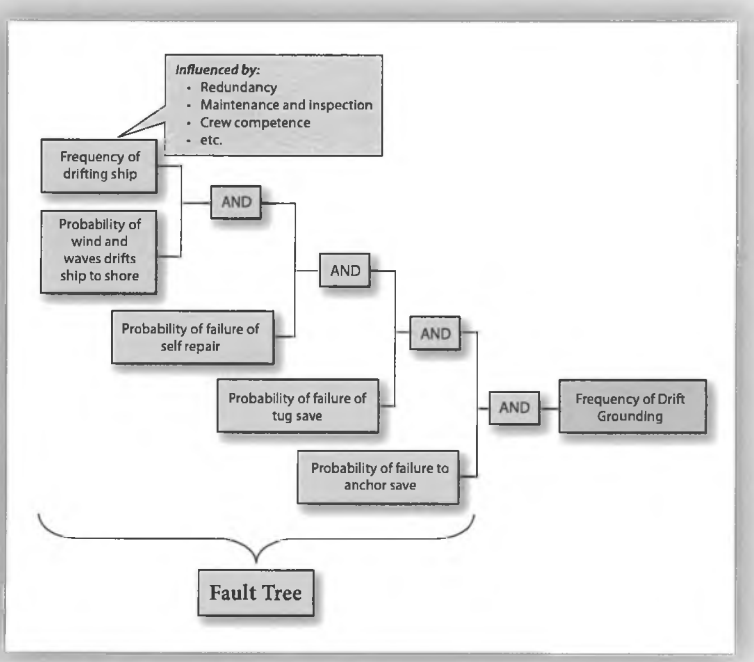

Figure 11. Fault tree for drift grounding accidents.

3.7 Risk Reduction Options Evaluation

The Risk Reduction Options Evaluation report summarized the outcomes of two workshops held in the fall of 2010, during which the Advisory Team, Management Team, Risk Analysis Team and Facilitation Team reviewed the worst case scenarios and their probable impacts developed during the previous technical studies during Phase A (DNV and ERM, 2011c).

The process used to evaluate risk reduction options as they related back to spill causes identified for the 16 worst case scenarios is summarized in Figure 13.

Seventeen potential risk reduction options were considered, each within the context of the 16 scenarios. Table 5 lists the Risk Reduction Options (RRO) considered as recorded at the workshop. An additional 13 RRO were considered but set aside during the workshop. These RROs are discussed in Section 6 of this report.

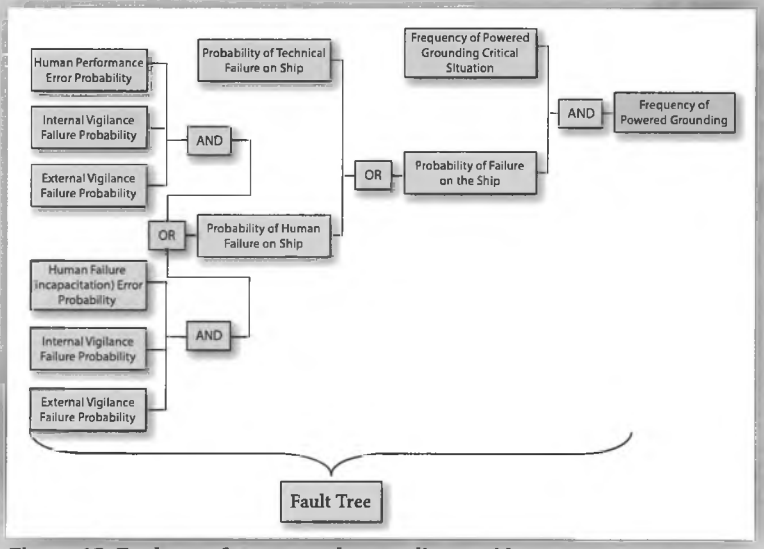

Figure 12. Fault tree for powered grounding accidents.

First, the scenarios were ranked according to their associated consequences (including the area impacted, probability of impact, and sensitivity of affected resources). The five scenarios that ranked the highest in terms

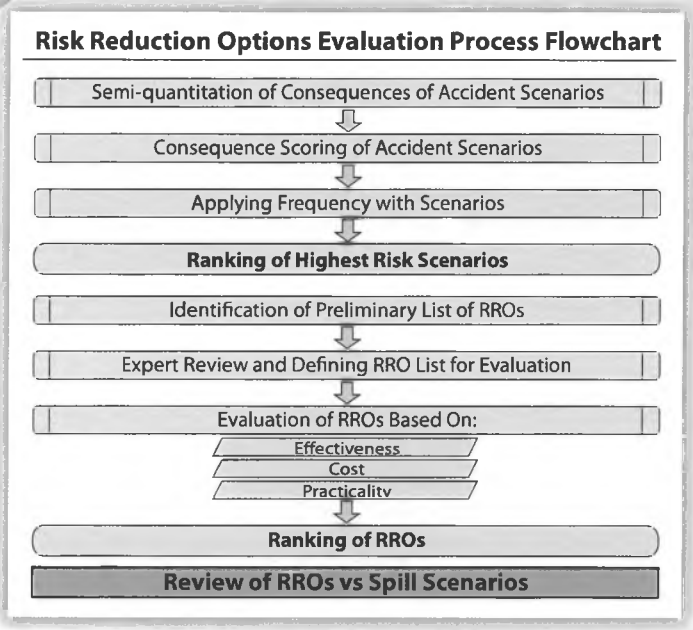

Figure 13. Risk Reduction Options evaluation process.

of their potential consequences were, in order: 2, 16, 3, 8, and 12 (Table 5). Next, the scenarios were ranked according to their estimated frequency, or likelihood of occurring anywhere in the study area. When frequency and consequence were combined, Scenarios 2, 8, and 16 were identified, through this semi-quantitative process, as posing the greatest risk.

Risk reduction options were evaluated based on the three main criteria of effectiveness, costs, and practicability. The factors considered in determining whether an RRO might be effective at reducing risk were:

- RRO might reduce the frequency of a specific accident type (e.g., a tug might prevent a drifting ship from grounding).
- RRO might reduce the frequency of several accident types (e.g., options aimed at improving crew competence should reduce most or all accident types).
- RRO might prevent a spill from occurring if an accident happens (e.g., double-hulled tank barges will prevent the spill of cargo in some accidents).
- RRO might reduce the severity of the consequence of a spill (e.g., by ensuring that ships are routed away from certain areas at certain times of the year to protect migratory species).

The factors considered regarding the cost of an RRO were:

- The capital cost of the RRO.
- The annual operating cost of the RRO.
- Who bears the capital and operating cost directly, and who ultimately pays the cost after cost recovery. Typical cost bearers are the shipping industry, one or more ports, the State of Alaska and/ or the federal government.

The factors considered regarding the practicability of an RRO were:

- Which party can implement the RRO? Some RROs can be implemented by local decision; others require international agreement. Typical implementers are similar to typical cost-bearers, namely the shipping industry, one or more ports, the State of Alaska, the federal government and/ or the IMO.
- How long will it take to implement the RRO (what is the lead time during which the system operates without the full risk-reducing benefit of the RRO)?
- How easy is it to implement or enforce the RRO?

The 9 risk reduction options were evaluated first for effectiveness for all 16 scenarios. The results are summarized in Table 6.

Table 6. Overview of risk reduction options and extent to which they reduce accident frequency and spill severity.

RRO	Extent to which Accident Frequency and Severity are reduced when the accident type is Collisions	Extent to which Accident Frequency and Severity are reduced when the accident type is Drift Groundings	Extent to which Accident Frequency and Severity are reduced when the accident type is Power Groundings
Satellite tracking + AIS	***Frequency***: No change ***Severity***: Moderate (responsible parties can identify accident location quickly)	***Frequency***: Strong (early identification of drifting ship) ***Severity***: Moderate (responsible parties can identify accident location quickly)	***Frequency***: Strong (early identification of drifting ship) ***Severity***: Moderate (responsible parties can identify accident location quickly)
Manned VTS/Direct Communications with Vessels	***Frequency***: Strong (external vigilance applied) ***Severity***: Moderate (responsible parties can identify accident location quickly)	***Frequency***: Weak (early identification of drifting ship) ***Severity***: Moderate (responsible parties can identify accident location quickly)*	***Frequency***: Strong (early identification of drifting ship) ***Severity***: Moderate (responsible parties can identify accident location quickly)
Traffic Separation Scheme in Unimak Pass	***Frequency***: Strong (traffic separated) ***Severity***: No change	***Frequency***: No change ***Severity***: No change	***Frequency***: No change ***Severity***: No change
Dedicated rescue tug(s)	***Frequency***: No change ***Severity***: Moderate (prompt response by tug)	***Frequency***: Strong (tug can take control of drifting ship) ***Severity***: Moderate (prompt response by tug)	***Frequency***: No change ***Severity***: Weak
Non-dedicated rescue tug	***Frequency***: No change ***Severity***: No change (tug is assumed to be absent in summer)	***Frequency***: Strong (tug can take control of drifting ship) ***Severity***: Moderate (prompt response by tug)	***Frequency***: No change ***Severity***: Weak
Seasonal, dedicated tug	***Frequency***: No change ***Severity***: No change (tug is assumed to be absent in summer)	***Frequency***: No change ***Severity***: No change (tug is assumed to be absent in summer)	***Frequency***: No change ***Severity***: Weak
Tugs of opportunity program	***Frequency***: No change ***Severity***: Weak (due to prompt response by tug; though less effective than dedicated tug)	***Frequency***: Weak (partial coverage) ***Severity***: Weak (due to prompt response by tug; though less effective than dedicated tug)	***Frequency***: No change ***Severity***: Weak
Expand shore-based ETS (one exists in Dutch Harbor already)	***Frequency***: No change ***Severity***: Moderate (can take control of ship that starts to drift due to collision)	***Frequency***: Moderate (can take control of ship that starts to drift due to collision) ***Severity***: Weak (can take control of ship that starts to drift due to collision)	***Frequency***: No change ***Severity***: Weak
Require emergency towing arrangements on deep draft vessels	***Frequency***: No change ***Severity***: Moderate (can take control of ship that starts to drift due to collision)	***Frequency***: Strong (can take control of drifting ship; appropriate tow package) ***Severity***: Weak (can take control of ship that starts to drift due to collision)	***Frequency***: No change ***Severity***: Weak
Enhance towing cap on cutters	***Frequency***: No change ***Severity***: Weak (can take control of ship that starts to drift due to collision)	***Frequency***: Weak (enhanced availability of tow-equipped vessels) ***Severity***: Weak (can take control of ship that starts to drift due to collision)	***Frequency***: No change ***Severity***: Weak
Increase number of cutters	***Frequency***: No change ***Severity***: Weak (can take control of ship that starts to drift due to collision)	***Frequency***: Weak (enhanced availability of tow-equipped vessels) ***Severity***: Weak (can take control of ship that starts to drift due to collision)	***Frequency***: No change ***Severity***: Weak
IMO PSSA and associated measures (e.g., ATBA)	***Frequency***: No change ***Severity***: Moderate (route vessels away from sensitive areas)	***Frequency***: Moderate (route vessels away from shore) ***Severity***: Moderate (route vessels away from sensitive areas)	***Frequency***: Moderate (route vessels away from shore) ***Severity***: Moderate (route vessels away from sensitive areas)

RRO	Extent to which Accident Frequency and Severity are reduced when the accident type is Collisions	Extent to which Accident Frequency and Severity are reduced when the accident type is Drift Groundings	Extent to which Accident Frequency and Severity are reduced when the accident type is Power Groundings
Ocean rated OSRO/PRAC – Open Ocean	***Frequency***: No change ***Severity***: Weak (open-ocean response capability)	***Frequency***: No change ***Severity***: No change	***Frequency***: No change ***Severity***: No change
Near shore rated OSRO/PRAC	***Frequency***: No change ***Severity***: Moderate (near-shore response capability)	***Frequency***: No change ***Severity***: Moderate (near-shore response capability)	***Frequency***: No change ***Severity***: Moderate (near-shore response capability)
Increase salvage and firefighting cap through regs	***Frequency***: No change ***Severity***: Strong (state-of-the-art response capability)	***Frequency***: Weak ***Severity***: Strong (state-of-the-art response capability)	***Frequency***: No change ***Severity***: Strong (state-of-the-art response capability)
Develop more geographic response strategies	***Frequency***: No change ***Severity***: Weak (some enhancement of response capability)	***Frequency***: No change ***Severity***: Weak (some enhancement of response capability)	***Frequency***: No change ***Severity***: Weak (some enhancement of response capability)
Increase State civil penalties	***Frequency***: Weak (potential for extra vigilance among crew/vessel owners) ***Severity***: No change	***Frequency***: Weak (potential for extra vigilance among crew/vessel owners) ***Severity***: No change	***Frequency***: Weak (potential for extra vigilance among crew/ vessel owners) ***Severity***: No change

The nine risk reduction options targeting Scenarios 2, 8 and 16 were evaluated during the second of the two fall 2010 workshops. Table 7 shows the risk reduction options that ranked highest in one or more categories.

Table 7. Risk reduction options that ranked highest in one or more categories.

Risk Reduction Options	Most Effective	Least Cost	Most Practical	Most Cost Effective	Cheapest & Easiest
Satellite Tracking & AIS (1a)	X		X	X	
Increased state civil penalties (9b)		X	X		X
Traffic separation scheme in Unimak Pass (2b)		X			
Tugs of opportunity program (3d)			X		
Expand shore-based ETS			X		

None of the risk reduction measures under consideration ranked highest across all categories. Taking into consideration the best professional judgment shared at the workshop, the following risk reduction measures were identified as being the most effective at reducing risk for the following worst-case scenarios:

- **Scenarios 1-5 (collisions):** Frequency was reduced by the manned Vessel Traffic System (VTS)/direct communications with vessels and the traffic separation scheme in Unimak Pass. Severity was reduced most by increasing salvage and firefighting capabilities through regulations.
- **Scenarios 6-13, 15, and 16 (drift groundings):** Frequency was reduced by satellite tracking and AIS; dedicated rescue tugs; non-dedicated rescue tug; seasonal, dedicated tug; and requiring emergency towing arrangements on

deep draft vessels. Again, severity was reduced most by increasing salvage and firefighting capabilities through regulations.

- **Scenario 14 (powered grounding):** Frequency was reduced by satellite tracking and AIS and the manned VTS/direct communications with vessels. Again, severity was reduced most by increasing salvage and firefighting capabilities through regulations.

Risks from the highest ranking scenarios, 2 and 16, were most effectively mitigated by: enhancing the vessel monitoring program, establishing VTS in Unimak and Akutan Pass, increasing rescue tug capability, and increasing spill response capability.

Based on the analysis of Risk Reduction Options (RRO) completed during the 2010 workshop, the Advisory Panel has developed recommendations that characterize all RROs considered into three broad categories:

- RRO Recommended for Immediate Implementation
- RRO Recommended for Phase B Study
- RRO Considered but set aside

In formulating these recommendations, the Advisory Panel focused on two key principles:

- Prevention measures take priority over response measures.
- All measures should be realistic and practical.

Sections 4, 5, and 6 of this report present the RRO recommendations from the Advisory Panel.

"What we do know is we now have the tools and the training that we've never had before to increase the chance of a successful response to a distressed vessel. And we've also raised the safety bar for our guys on those tugs to respond."

Mayor Shirley Marquardt
(AIRA Advisory Panel meeting and ETS Exercise)
Cordova Times, September 17, 2009

4. Risk Reduction Options Recommended for Immediate or Future Implementation

The recommendations of risk reduction measures represent a consensus of the Advisory Panel and are presented to the decision makers in the U.S. Coast Guard, State of Alaska, and local governments. The decision as to which measures will be adopted ultimately rests with the decision makers.

Several of the Risk Reduction Options (RRO) considered were found to be sufficiently effective and practicable to warrant immediate implementation. These RROs include:

- Develop an Enhanced Vessel Monitoring and Reporting Program
- Enhance towing capabilities on U. S. Coast Guard cutters and increase cutter presence in the Aleutians
- Stage additional Emergency Towing Systems in the Aleutians
- Initiate the process to establish IMO Particularly Sensitive Sea Areas
- Strengthen the Aleutians Subarea Contingency Plan
- Increase Salvage and Spill Response Capability in the Aleutians

Several of the Risk Reduction Options (RRO) considered were found to show promise but to require additional work or study prior to full implementation. In some cases, the recommendations include immediate implementation of some elements, with further study required for others. These RROs include:

- Increase Rescue Tug Capability in the Aleutians
- Increase Salvage and Spill Response Capability in the Aleutians
- Determine the boundaries of the Particularly Sensitive Sea Area (PSSA) and develop recommendations for associated protective measures
- Strengthen the Aleutians Subarea Contingency Plan

The recommendations are presented here as they were developed by the Advisory Panel. Additional background on each RRO is included in Appendix A.

4.1 Enhanced Vessel Monitoring and Reporting Program

The Aleutian Islands Risk Assessment Advisory Panel recommended that a robust vessel monitoring program be established for the Aleutians Subarea.

The Panel envisioned a program whereby any vessel operating in the area would be monitored by an automated system with alarms in place to report any anomalies in the behavior of the vessel, given a set of assumptions for each vessel type. The system operator would review anomalies flagged by the software, and if appropriate the situation would be reported to US Coast Guard for consideration.

Enhanced vessel monitoring and reporting would have three primary objectives:

- Detect anomalous vessel activity (i.e. identify vessels that are adrift) so a timely and effective response can be undertaken
- Immediately locate vessels that may be able to render assistance such as, tugs, fish processing vessels, etc.

- Validate vessels compliance with Reduced Risk Vessel Routing measures, safety fairways and Areas To Be Avoided (ATBA)

The Advisory Panel anticipated that an enhanced vessel monitoring program would directly reduce the risk of drift groundings by increasing situational awareness for vessel operators and the appropriate agents and agencies. This program would also indirectly reduce the risks of collisions and power grounding by gathering data on vessel movements that can be analyzed in future risk assessments.

The Advisory Panel determined that this risk reduction option is practical, technologically feasible, readily available, and should be implemented without further delay. Identifying the appropriate funding sources for additional build out of the AIS receivers in the Aleutian Island region is a priority.

Implementation options included the addition of AIS receivers at key locations, to expand coverage of the region. Two AIS receivers are scheduled to be added during 2011, at locations in Nikolski (low elevation) and Atka Island. Several other locations were identified by the Advisory Panel as critical to expanding AIS coverage: Unimak Island at Scotch Cap; Shemya, Adak mountaintop (abandoned White Alice site); Akutan mountaintop; and Nikolski mountaintop (abandoned White Alice site).

Other vessel tracking technologies were also identified as having the potential to supplement available information and enhance vessel monitoring and reporting. The Long Range Identification and Tracking (LRIT) System, which operates off secure satellite networks rather than over non-secure VHF radio (as does AIS), may have some limited applicability, although LRIT data is more difficult to access and more limited in detail with position reports sent every six hours. Voluntary vessel monitoring systems, where vessels are equipped with satellite transponders outside of AIS coverage areas, may also provide additional vessel monitoring capability. The Advisory Panel also noted

that maritime insurance clauses covering vessels transiting Unimak Pass specify that the vessels carry navigational equipment that may also be utilized to enhance vessel monitoring.

4.2 Enhance Towing Capabilities on US Coast Guard Cutters and Increase Cutter Presence in the Aleutians

The Aleutian Islands Risk Assessment Advisory Panel recommended increased US Coast Guard (USCG) patrol coverage and emergency towing capability in the Aleutian Island region. USCG vessels often reach the scene of a disabled vessel ahead of rescue tugs, and are the first line of defense against a grounding or oil spill. They recommended that the USCG take two key actions:

- Replace the Acushnet (decommissioned in 2011) with a vessel that has towing capability and maximize cutter patrol time in the Bering Sea/Aleutian Island region. Consider a vessel similar in capability to an ATF 166 Powhatan class tug with a 75- ton bollard pull.
- Evaluate the current towing packages onboard all cutters operating in Alaska and upgrade to best available Emergency Towing System technology such as lightweight floating lines. (Available at http://dec.alaska.gov/spar/perp/aiets/home.htm)

The Advisory Panel determined that increasing the USCG presence in the region is practical, technologically feasible, readily available, and should be implemented without further delay. They concluded that maintaining and improving US Coast Guard towing capabilities in the Bering Sea is imperative for mitigating the risks of drift groundings.

4.3 Stage Additional Emergency Towing Systems in the Aleutians

Not every vessel transiting in or through the Aleutian Island region is required by regulations to have onboard emergency towing equipment or deployment procedures and training for crew. Recognizing these deficiencies, the Aleutian Islands Risk Assessment Advisory Panel recommended that the US Coast Guard, State of Alaska, local governments, and the maritime industry procure and stage one or more additional Emergency Towing Systems (ETS) at suitable locations in the Aleutians. The ETS is a relatively inexpensive risk reduction option and the existing systems have proven, through deployment, to be a successful measure for preventing drift groundings. The Panel and Team also recommended that training and exercises with the ETS be continued on at least an annual basis.

This risk reduction measure would reduce the risks of drift groundings. The Advisory Panel determined that this risk reduction option is practical, technologically feasible, readily available, and should be implemented without further delay.

4.4 Increase Rescue Tug Capability in the Aleutians

Increased rescue tug capability was identified as an obvious option to reduce the number of drift groundings in the Aleutian Islands, based on several recent incidents in the region. The Aleutian Islands Risk Assessment Advisory Panel recommended that additional rescue tug capability be developed for the Aleutians. Further analysis is necessary to determine:

- What management/funding model would most likely be successful in establishing and maintaining a rescue tug capability?
- What capability is required of the rescue tug?
- Where should the rescue tug(s) be stationed?

A rescue tug can reduce risks of drift groundings by preventing the ship from drifting into shoal waters. The Advisory Panel recommended that the maritime industry, US Coast Guard, the State of Alaska, and local governments work together to find a way to develop and deploy rescue tug capability in the Aleutians.

Five options were considered for increasing rescue tug capability:

1. **Dedicated Tug(s):** A vessel with open water capability, stationed at a fixed point until it is summoned for use (100% available for rescue).
2. **Non-Dedicated Tug(s):** A vessel with open water and similar capabilities to the dedicated tug that can be engaged in other activities in addition to emergency response. The vessel may be financially supported by other activities with expected variable availability.
3. **Seasonal Dedicated Tug(s):** A vessel with open water capability, stationed at a fixed point but only available seasonally (October 1-June 1).

4. **Tug/Vessel of Opportunity Program:** A tug or vessel transiting or located in the study area, regardless of size, that's available to assist during an emergency.
5. **Combination** of the four above or stepped approaches.

Each of these options should be considered in further studies recommended for Phase B of the project. This recommendation complements the recommendation to Increase Salvage and Response Capability in the Aleutians, and the Panel recognized that there may be one solution to both recommendations.

They suggested that Phase B studies should include at a minimum:

Management/Funding Study – This study will consider management and funding schemes to operate a rescue tug program for the Aleutians.

Tug Capability Study – This study will determine the desirable and suitable capabilities of a rescue tug for the Aleutians. The study should define the range of tug specifications (size, bollard pull, horsepower, propulsion) suitable for the weather conditions and vessels transiting the Great Circle Route (DNV and ERM, 2010a). It should illustrate the options for suitable tugs by posing three alternatives of vessel specification that would meet a range of rescue capabilities. Capital and operating costs estimates should be provided for each of these options. The study should also describe the current capabilities (year-round and seasonal) that exist in the study area.

Tug Location Study – This study will consider the site options for rescue tug(s), including vessel transit routes, response time, and alternative rescue resources.

4.5 Increase Salvage and Spill Response Capability in the Aleutians

The Advisory Panel recognized the need to increase salvage and spill response capability in the Aleutians. They recommended that the US Coast Guard immediately publish the Nontank Vessel Response Plan (NTVRP) rule (Docket No. USCG-2008-1070) that has been under development since Congress passed the Coast Guard and Maritime Transportation Act of 2004. This rule would require vessel response plans for nontank vessels calling in US ports. This nontank vessel rule, in combination with the tank vessel rule already in place, would place the burden of providing sufficient salvage, firefighting, and response capabilities on all vessels passing through the Aleutians that call on US ports. (Note that vessels engaged in innocent passage – foreign flagged-vessels not calling on US ports or transferring or lightering oil in US waters – are exempted from VRP requirements). The requirement to comply with these rules would provide the necessary incentives for vessel owners/operators to fund increased salvage and spill response capabilities in the Aleutians.

Determining exactly what salvage and spill response capabilities would be necessary and appropriate for the extreme operating environment in the Aleutians requires further study during Phase B of this project. Currently, there are no significant on-water oil spill response resources in the Aleutian Subarea. Federal law requires both tank and nontank vessels calling in US ports, to have contracts with an oil spill removal organization to provide substantial salvage and response resources in the nearshore, offshore, and open ocean operating areas. Yet, the Advisory Panel recognized that the ocean environment in the Aleutian Islands, northern Gulf of Alaska, and Bering Sea present tremendous challenges to oil spill response, and may render existing spill cleanup technologies insufficient most of the time. The Panel recommended that investing in an extensive regulatory driven capability that will not be effective is imprudent. However, increasing response capabilities in the nearshore area, which can reasonably be expected to be effective to remove oil and protect sensitive areas should be pursued.

The Advisory Panel recommended conducting a gap analysis that considers two components:

Capability Gap Analysis – Identify any gap in the existing capabilities in the Subarea Plan and the capabilities required for salvage (including emergency towing) and oil spill response for the largest vessels transiting the subarea in innocent passage.

Response Gap Analysis – Identify the percentage of time that an oil spill response system would be precluded from operations due to environmental conditions, such as wind, sea state, visibility, currents, or ice. A response gap analysis should be conducted for both nearshore and open ocean operating areas.

The results of these analyses should be used to determine the appropriate prevention and response resources necessary for the Aleutian Subarea.

This recommendation will reduce the risks of impacts from all vessel casualty types by increasing the capability to respond to future incidents. Based on these analyses, to be completed in Phase B, a recommendation can be developed regarding the most effective response resources for the extreme operating conditions found in the Aleutians.

4.6 Establish IMO Particularly Sensitive Sea Areas and Associated Protective Measures

The Aleutian Islands and surrounding waters clearly meet the criteria established by the International Maritime Organization (IMO) for designation as a Particularly Sensitive Sea Area (PSSA), in that the Aleutians are ecologically sensitive and vulnerable to impacts from international shipping. Therefore, the Aleutian Islands Risk Assessment Advisory Panel recommended that the US Government petition the IMO Marine and

Environmental Protection Committee to designate the Aleutian Island region, or a portion therein, as a PSSA. A collaborative effort should be undertaken to delineate the boundaries of the PSSA and the associated protective measures concurrent with this international effort to establish the PSSA designation. At a minimum the following protective measures should be considered:

- areas to be avoided (ATBA)
- ship routing
- ship reporting
- recommended tracks for vessels in innocent passage, and
- a traffic separation scheme in Unimak Pass.

The effort to determine the boundaries of the PSSA and establish the associated protective measures should begin with the US Coast Guard, State of Alaska, and members of the Advisory Panel working with the IMO Subcommittee on Safety of Navigation during Phase B of this project.

This risk reduction measure would reduce the risks of drift groundings, power groundings, and collisions; and could lessen the impacts of any spills that do occur.

4.7 Strengthen Aleutians Subarea Contingency Plan

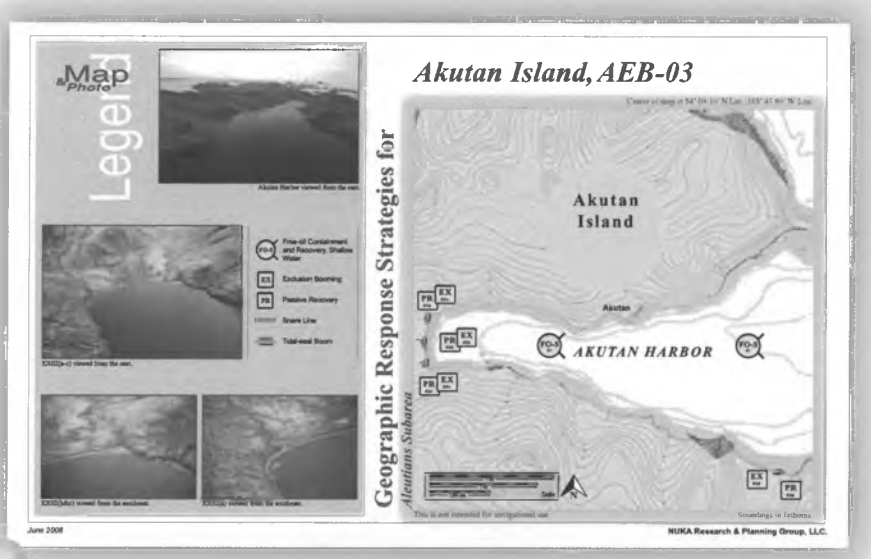
The Aleutian Islands Risk Assessment Advisory Panel recommended that the Aleutians Subarea Committee strengthen the Aleutians Subarea Contingency Plan for Oil and Hazardous Substance Releases (Subarea Plan) to ensure that it is adequate to remove a worst case discharge and to mitigate or prevent a substantial threat of such a discharge from vessels transiting the Aleutian Islands, particularly vessels in innocent passage. The Panel and Team further recommended that the US Coast Guard ensure that vessels transiting the Aleutians Subarea that are required to have an approved Vessel Response Plan have sufficient resources to implement the protection measures specified in the Subarea Plan.

Specific recommendations include:

1. Revise the Subarea Plan to emphasize prevention measures and systems. The current version of the plan is focused on response and does not contain enough planning for measures to prevent the threat of a discharge.
2. The gap analysis recommended in the Increase Salvage and Spill Response Capability in the Aleutians section above will provide the information necessary to determine the appropriate salvage and response resources that should be available in the Aleutian

Subarea for use under both the Subarea Plan and Vessel Response Plans. These resources should be listed in the Subarea Plan.

3. Develop additional Geographic Response Strategies for high priority sites. Geographic Response Strategies (GRS) are site-specific plans to protect high priority sites and have the potential to mitigate damages after a vessel casualty that results in a spill. While some GRS are listed in the current subarea plan, additional GRS should be developed throughout the Aleutians. The Subarea Plan should specify the minimum amount of response equipment necessary to implement GRS likely to be deployed during a worse case discharge.



4. Conduct additional planning for Potential Places of Refuge (PPOR). PPOR planning identifies potential places where a vessel may be moved to either prevent a casualty or minimize damage after a casualty. While some PPOR planning has been done and is listed within the current Subarea plan, additional PPOR planning (such as pre-positioned mooring buoys) should be developed.

5. Once the Subarea Plan has been modified to incorporate these recommendations, the US Coast Guard should ensure that vessels that are required to have Vessel Response Plans to maintain sufficient capability to implement the protection measures described in the Subarea Plan.

Although tasked to plan and respond to a worst case discharge, the Aleutian Subarea Committee is not funded or staffed adequately to do so, plus the equipment caches owned by the federal and state responders are inadequate to respond to a worst case discharge. The Advisory Panel recommended that funding for these measures should come from the Oil Spill Liability Trust Fund to support planning and preventive measures associated with strengthening the Aleutians Subarea Plan.

These recommendations are congruent with existing law and will reduce the risks from all vessel casualty types by increasing prevention and response capabilities in the Aleutians Subarea. The gap analysis should be conducted as part of Phase B of this project. The other recommendations require no further study and should be implemented without further delay. The Subarea Committee should address these recommendations and submit budget requests to pursue implementation.

5. Risk Reduction Options Considered but Not Recommended for Implementation

During the September and October 2010, and March 2011 Aleutian Islands Risk Assessment meetings, the Advisory Panel discussed and evaluated twenty-seven risk reduction options. Of these risk reduction options, thirteen were recommended for immediate or future implementations (Section 4), and fourteen were considered and set aside. Table 8 summarizes the rationale for setting aside these RROs at this point.

Table 8. Consensus Decision and Discussion for RRO considered but not recommended for implementation.

RRO	Discussion & Consensus Decision
Speed Restrictions	The Advisory Panel determined that this risk reduction option would be difficult to implement and enforce considering the amount and various types of vessels transiting through the region. The Panel concluded there was a low benefit and would result in a high-unintended consequence if pursued.
Seasonal Routing	The Advisory Panel concluded that there is no formal mechanism for implementing seasonal routing throughout the study area and further consideration was deferred.
Increase Coast Guard Vessel Inspections	The Coast Guard currently has a vessel inspection program that has been implemented in Alaska and the United States. The Advisory Panel decided not to evaluate this risk reduction option because there is no practical way to reduce risk further based on the current inspection program.
Split Western Alaska Captain-of-the-Port (COTP) Zone	Currently three COTP zones exist in Alaska. The three zones are: Southeast Alaska, Western Alaska and Prince William Sound. The Captain of the Port and their representatives enforce, within their respective areas, port safety and security and marine environmental protection regulations. The Western COTP zone is the largest of the three and includes Cook Inlet, Kodiak, Aleutian Islands, Bristol Bay, the Northwest Arctic and North Slope. There are three Marine Safety Detachment offices within the Western Alaska COTP zone which are located in Kenai, Kodiak and Unalaska. The Advisory Panel discussed the need to create an additional COTP within the Western Alaska zone, thus reducing the area of responsibility for one Captain. It was suggested to change and/or add Unalaska as a COTP city with the intent of decreasing or reducing the response times currently stipulated in the federal Marine Firefighting, Salvage and Emergency Lightering rules. The Advisory Panel concluded that this risk reduction option was very high on the causal chain within the institutional organization/management (USCG) and would be difficult to implement or evaluate.
State of Alaska Local Response Agreements	The Community Spill Response Program administered by the ADEC Prevention and Emergency Response Program began in the early 1990s. The state recognized the importance of local involvement and has worked with communities to provide coordinated and effective responses, and to expand the network of resources available to protect human health and the environment from the risks associated with oil and hazardous substance spills. The Advisory Panel did not consider this risk reduction option primarily because it is an existing program. They encourage local communities without Community Response Agreements to contact the ADEC and work towards establishing agreements with the goal of expanding local capabilities and increasing response coordination.

RRO	Discussion & Consensus Decision
Phase out OPA 90 Alternate Compliance	This risk reduction option was added during the September meeting based on public input. Oil spill prevention programs, contingency planning and preparedness have undergone significant enhancements and changes since the passage of the Oil Pollution Act of 1990 (OPA 90). Due to these changes, the Alaska Petroleum Distributors and Transporters, an ad-hoc group of non-persistent Alaska fuel barge operators have worked with the state and federal regulatory agencies to implement prevention measures and achieve a level of spill prevention and response agreeable to all parties. This agreement is referred to as an "alternate compliance agreement" and was originally established in 1998 after a series of workshops. The agreement was modified in 2002. An Alaska non-persistent tank barge operator may voluntarily elect to subscribe to the alternate compliance agreement as opposed to meeting full compliance with OPA 90 in Alaska. The Advisory Panel concluded that the alternate compliance agreement should not be eliminated due to the unintended consequences placed on commercial operators. Eliminating this option would result in a decrease of operators and a significant increase in the cost of fuel distributed in rural Alaska because of the cost of full compliance with OPA 90.
Establish Requirements for Vessels in Innocent Passage	The Advisory Panel was keen on the concept of establishing requirements for vessels transiting through the Aleutian Island region on innocent passage but after numerous discussions concluded that because of the international maritime rules governing the right of innocent passage it would be difficult to promulgate rules acceptable to the IMO.
Set Area Standards for Vessels with Vessel Response Plans calling at US Ports	The Advisory Panel recommended that rather than attempting to set area standards for vessels required to have a federal vessel response plan, examine the use of local or area contingency plan as a means of establishing standards.
Increase Training and Drills	Training and drills are required under OPA90 and state law and will be expanded and required under the salvage and firefighting rules. Part of the baseline for every new requirement or regulation is a training requirement and component for compliance. Therefore, the Advisory Panel did not consider examining this risk reduction measure further.
Storm and Severe Weather rules	Since the mid-1990s the City of Unalaska, Alaska Marine Pilots, U.S. Coast Guard and local maritime industry have negotiated and established storm and weather rules for the Port of Dutch Harbor. These rules are reviewed annually and adjusted accordingly based on incidents or observations. The Advisory Panel concluded that the existing process is working well and no further evaluation of this risk reduction option was necessary.
High-Frequency (HF) Radar Surface Monitoring Currents	This risk reduction option was added during the September meeting at the recommendation of an Advisory Panel member. Ocean researchers use this technology to measure surface current velocity fields near the coastline. A HF radar system can measure surface currents averaged over 15 minutes as far offshore as 50 miles. The Advisory Panel concluded that HF radar is not a risk reduction measure but a tool that could be used during or after a spill to track and map oil transported by nearshore currents. HF radar is certainly a tool in the oil spill response kit but not considered by the Panel to be a risk reduction option.
Increase Federal Liability and Civil Penalties	The Advisory Panel concluded that the cost of penalties is relatively low compared to the cost of response. The liability limits need to be reasonable in order for operators to obtain insurance. If limits are too high then insurance companies won't insure and this may increase the number of uninsured vessels. The Government Accounting Office GAO report states that OPA requires review of the insurance limits every three years but has not been done since 1990. Essentially, the federal government needs to comply with OPA 90 by reviewing insurance limits every three years and implementing the necessary adjustments.

RRO	Discussion & Consensus Decision
Manned Vessel Tracking System	Due to the volume of traffic passing through Unimak and Akutan Pass there was initial interest from some of the Aleutian Island Risk Assessment Advisory Panel members to consider establishing a manned Vessel Tracking Service (VTS). Based on subsequent discussions, the Advisory Panel recommends reserving this risk reduction option from further consideration for the following reasons: • Under current federal law, the USCG is the only entity authorized to establish a VTS. The VTS would need to meet IMO procedures and standards. • An in-depth study would be required to determine whether the USCG VTS is the best choice over an expanded and upgraded Automatic Identification System (AIS) or a Vessel Traffic Monitoring System (VTMS). • Regulatory changes would be needed to establish the control zone and to mandate who must participate, possibly involving submittal to the International Maritime Organization for review, approval and adoption. • The cost to purchase VTS equipment and increase the number of personnel to implement a VTS in Dutch Harbor would be substantially higher than the USCG's other twelve VTSs. • Establishing and maintaining radar and communications equipment in a remote and hostile environment will not be easy or inexpensive. All mountaintop access is by helicopter only. • There is little technical support in Dutch Harbor for such an enterprise and it would have to be developed. • There is currently no public notice by the USCG to establish a formal, manned VTS for Unimak Pass.
Evaluate and Determine Whether to Increase State Civil Penalties	The original intent of the state civil penalty scheme and law focused on the oil industry and not the entire maritime industry transiting through Alaska waters. Alaska's civil penalties approach is based upon the following premise and intent: • All oil discharges will cause environmental and natural resource harm • For that portion of the damage which is readily identifiable and quantifiable, existing legal remedies provide an adequate means of recovery • A substantial portion of the damage caused by oil pollution cannot be determined with certainty • The public should be compensated for those damages which are not readily identifiable and quantifiable • The scheme is intended to pre-determine the loss from oil pollution which is not readily identifiable and/or quantifiable, through the use of civil penalties based on objective criteria of the characteristics of the oil and the sensitivity of the receiving environment • Provide a meaningful incentive to safe operations by setting out the consequences of the unlawful act in advance in an effort to prevent the discharge of oil before it occurs • It is intended to both compensate the public for damages and to provide an incentive for safe operations. During the March 2011 meeting, the Advisory Panel reached the conclusion that increasing state civil penalties was not a risk reduction option and agreed to set this option aside as a recommendation.

"There is no silver lining once oil hits the water. Loss of human life, damage to resources, and oil spill cleanup costs all underscore the importance of preventing spills in the first place."

Ed Page, Advisory Panel member/General-Mariner
(March 2011 AP meeting)

Appendix A. Background on Risk Reduction Options

This section provides background information about the RROs discussed in Sections 4, 5, and 6 of this report.

A.1 Enhanced Vessel Monitoring and Reporting

The RRO for enhanced vessel monitoring and reporting was recommended for immediate implementation, as summarized in Section 4.1.

Robust vessel monitoring and reporting is a high national priority for the U.S. Coast Guard and Department of Homeland Security. Vessel tracking is a vital component of the U.S. Coast Guard's national plan to increase maritime domain awareness, and the development of National Automatic Identification System (NAIS) is a key initiative to enable the Coast Guard to identify, track, and communicate with marine vessels using the Automatic Identification System (AIS). The genesis of the NAIS mission need comes from the Maritime Transportation Security Act, which directs the Coast Guard to implement a system to collect, integrate, and analyze information concerning vessels operating on or bound for waters subject to the jurisdiction of the United States. The Coast Guards latest projection for building NAIS in Alaska is 2018. Other Coast Guard initiatives proposed and subsequently eliminated for Alaska is Rescue 21, an advanced command, control, and direction finding communication system.

Automatic Identification System (AIS)

On December 31, 2004 the International Maritime Organization (IMO) required that all ships above 300 gross tons engaged on International voyages and cargo ships of 500 gross tonnage and upwards not engaged on international voyages and all passenger ships irrespective of size to be equipped with Automatic Identification System (AIS) equipment. This technology is akin to aircraft transponders and comprised of a VHF/FM based transponder that transmits the vessels GPS acquired position to other vessels and to terrestrial receiving stations where they exist. The regulation requires a ship's name, position, course, speed, destination and other data, based on the nature of the cargo and the voyage, be transmitted continuously in real time. This allows all vessels within the range of the transponder to see the progress and course of other AIS equipped vessels to aid collision avoidance. The information can be displayed onboard on a minimum keyboard display (MKD) or a vessel's navigation plotter. Each AIS equipped vessel in the area is displayed as a character on the screen along with the other information noted above. Currently the Marine Exchange of Alaska has a contract to provide U.S. Coast Guard AIS capability in Alaska.

The AIS shore receiver network operated by the Marine Exchange of Alaska receives vessel data transmitted by nearby vessels (up to 200 miles away) and disseminates it to authorized users. The US Coast Guard and State of Alaska have access to the AIS information through contract with the Marine Exchange as does the maritime industry.

The Marine Exchange of Alaska has installed and operates most AIS receivers in Alaska. The Marine Exchange currently has six AIS receivers along the Aleutian chain from Unimak Island to Adak.

- Adak – two receivers
- Unalaska – two receivers
- Akutan – two receivers

It is unlikely that the entire study area can be covered by AIS in the near future, but additional sites are needed to increase the current coverage. The following locations are considered critical to the success of the system and could be in operation within a year if funding is secured:

- Nikolski low elevation – scheduled for 2011,
- Atka Island – scheduled for 2011,
- Unimak Island at Scotch Cap,
- Shemya,
- Adak mountaintop (an abandoned White Alice site),
- Attu Island,
- Akutan mountaintop and
- Nikolski mountaintop (also an abandoned White Alice site).

Long Range Identification and Tracking System (LRIT)

In addition to IMO requiring the tracking of vessels via AIS, in 2007 IMO implemented the Long Range Identification and Tracking System initiative intended to provide port and coastal states information on vessels operating in or near their coasts in light of emerging security concerns. Unlike AIS which broadcasts across unsecured channels substantial amounts of information on a vessel several times a minute via VHF communications, LRIT is a satellite based system that simply sends a vessel's serial number and location 4 times a day over a secure network. The information may be acquired by authorized coastal and flag states for a fee. As a 20 knot vessel would cover 120 nautical miles between position reports (6 hours polling interval), LRIT does not provide the granularity of data needed to address safety and environmental concerns. LRIT information is not available to the general public and would be inappropriate for a search and rescue vessel tracking option.

Voluntary Vessel Monitoring

In addition to LRIT, many vessels are tracked by other satellite systems to aid safety and efficiency as per company policy (Alaska Marine Highway System, Alaska Marine Lines, Northland Services, etc.) or to satisfy fishing regulations, i.e. VMS (Vessel Monitoring System). The types of satellite transponders and their polling/reporting rates vary from

every 30 minutes to a few times a day. In most cases vessels automatically send reports every three hours with the operating cost of such systems averaging $1-$3 dollars a day with the equipment ranging from $500 to $2,500. In addition to AIS, the Marine Exchange of Alaska also installs and disseminates satellite transponders and its vessel tracking system receives and processes satellite position reports along with AIS reports. Thus vessels, such as the Alaska Marine Highway System ferries, operating outside the range of AIS receiving sites are still tracked when also equipped with a satellite transponder.

Maritime Insurance Clause associated with Vessel Tracking in the Bering Sea

In addition to international and federal vessel monitoring and tracking requirements, insurers for maritime commerce worldwide, such as Lloyds of London, have specific requirements for vessels passing through Unimak Pass. The Bering Sea Transit Clause (b) of their standards reads:

> "Notwithstanding anything contained in this insurance to the contrary, it is hereby agreed that when on through voyage to or from the Far East, the insured vessel may navigate the Bering Sea provided that:
>
> > The vessel has onboard the appropriate Hydrographic Charts corrected up to date Entry is made through the Unimak Pass and exit west of Buldir Island or vice versa and The vessel is equipped and properly fitted with marine radar, a satellite navigator, a sonic depth sounding apparatus, radio direction finder and gyro compass, all fully operational and manned by qualified personnel. (Alternatively the vessel may enter or leave through the Amchitka, Amukta or Attu passes, but only when equipped and properly fitted with marine radar, a satellite navigator, sonic depth sounding apparatus, radio direction finder, gyro compass and a weather facsimile recorder, all fully operational and manned by qualified personnel).
>
> Insurance hereunder permits the insured vessel to use the Bering Sea, entering through Unimak Pass and leaving west of Buldir Island or vice versa, on through voyages to the Far East, provided the vessel is equipped with the marine radar and GPS and also sonic depth sounding apparatus and GMDSS/radio direction finder."

A.2 Increase USCG Presence in the Bering Sea and Aleutian Islands

The RRO for increased USCG presence and towing capability was recommended for immediate implementation, as summarized in Section 4.2.

USCG vessels have rendered assistance by arresting the drift or providing emergency towing to numerous fishing vessels and freighters in the ?Bering Sea and Pacific Ocean. USCG vessels often reach the scene of a disabled vessel ahead of rescue tugs, and are the first line of defense against a grounding or oil spill. USCG vessels operating in Alaska waters include buoy tenders, patrol boats, medium and high endurance cutters, and ice breakers.

There are only two USCG cutters home ported in Alaska, the Alex Haley and the Munro, both stationed in Kodiak. These cutters primarily perform law enforcement and

search and rescue in the Bering Sea/Aleutians region. The recently decommissioned cutter Acushnet was home ported in Ketchikan, but is not scheduled to be replaced. USCG cutters from other Pacific homeports also patrol Alaska waters.

Each USCG cutter has towing capability, equipment and a trained crew. The cutters carry a hawser, messenger line, and line-throwing gun. The crews train for towing at least twice per year and when on patrol respond to vessels in distress, including towing situations. Refresher training is conducted with the US Navy every two years.

The important presence and towing capability of Coast Guard vessels has proven to be valuable during incidents by arresting the drift of a vessel until larger commercial assets can reach the scene. In 2004, the Alex Haley performed a 41-hour tow of a 593-foot, 46,000-ton bulk freighter; and while in service the USS Edenton towed the 58,000-ton battleship USS Wisconsin. During the Selendang Ayu incident the Alex Haley attempted a tow but the messenger line parted. Later the tug Sidney Foss arrived on-scene and the Alex Haley was stood down while the Sidney Foss (3,000 horsepower) prepared a tow; the Sidney Foss' towline eventually parted. The Alex Haley remained on scene to provide assistance (http://www.ntsb.gov/publictn/2006/MAB0601.htm). (Marine Accident Brief, 12/8/2004).

On February 8, 2011 the USCG cutter Morgenthau (home ported in California but on temporary assignment in Alaska) attempted to establish a tow with the 58-foot fishing vessel F/V Terrigail near Unalaska Island, but establishing the tow failed because the tow line became tangled in the Morgenthau's propeller. This incident points to the need to evaluate the towing systems onboard the cutters operating in the region to ensure that the best available technology is utilized. The new Emergency Towing Systems (http://dec.alaska.gov/spar/perp/aiets/home.htm) (ADEC, 2008) utilize lightweight floating lines that are less likely to become entangled in propellers.

Maintaining and improving US Coast Guard towing capabilities in the Bering Sea is imperative for mitigating the risks of drift groundings.

A.3 Stage Additional Emergency Towing Systems in Alaska

The RRO for additional emergency towing systems was recommended for immediate implementation, as summarized in Section 4.3.

A proposed mitigation measure to reduce risk is to enhance the shore-based Emergency Towing System project initially implemented by the City of Unalaska and Alaska Department of Environmental Conservation. Following the near grounding of the M/V Salica Frigo on March 9, 2007, the Mayor of Unalaska convened a Disabled Vessel Workgroup to address the possibility of future groundings and to discuss local emergency response solutions. This initial meeting led to the formation of the ETS workgroup, whose goal was to develop emergency towing capabilities for disabled vessels in the Aleutian Subarea using locally available tugboats in conjunction with ETS equipment stationed in Unalaska (ADEC, 2008). Based on the Aleutian Subarea vessel traffic, the ETS workgroup implemented two ETS in order to serve a wider range of vessels. The City of Unalaska purchased a system suitable for vessels up to 50,000

DWT and the ADEC purchased a system capable of towing vessels greater than 50,000 DWT; both systems are stored in Unalaska. The ETS consists of a lightweight towline, a messenger line to assist in deploying the towline, a line-launcher, a lighted buoy, and chaffing gear. These components may be configured to deploy to a disabled ship from the stern of a tugboat or airdropped to the ship's deck via helicopter.

Since 2007, the project continues to expand and annual exercises/training have been held in Unalaska. An ETS manual was updated in 2008 and the ADEC has purchased and stored a 10-inch (> 50,000 DWT) ETS at the USCG Air Station Kodiak. In 2010, ADEC received additional funds, which will allow them to purchase two more 10-inch ETS packages. Tentative plans are to stage one system at USCG Air Station Sitka and the other at US Navy Supervisor of Salvage warehouse at Fort Richardson, Alaska for deployment to a potential vessel in distress.

A.4 Increase Rescue Tug Capability in the Aleutians

The RRO for enhanced rescue tug capability was recommended for addition study as part of Phase B of the Aleutian Islands Risk Assessment, as summarized in Section 4.4.

In 2004, there were four resident tugs in the study area, all located at Dutch Harbor (Nuka Research & Planning Group and Cape International, Inc, 2006). These four tugs had limited horsepower and sea-keeping ability to potentially respond as a rescue/assist tug for a ship in distress. Additionally, there are about 200 voyages through the region each year by tugs in trade and these transient tugs range from 1,200 to 7,000 horsepower (Nuka Research & Planning Group and Cape International, Inc., 2006). Tugs in trade typically have a barge in tow, which hampers their ability to respond to calls for emergency assistance. There has not been a study conducted that specifically examines tug capabilities and operational/response expectations based on weather conditions typically experienced in the Bering Sea and Gulf of Alaska. Recognizing this limitation, additional information is needed to determine what type of program could or should be implemented for the Aleutian Island region.

Securing funding for a Rescue Tug is expected to be the greatest challenge. Some associated issues that should be considered are:

Requiring funding by shippers through vessel response plan regulations or alternative compliance to those regulations. The Neah Bay rescue tug in the State of Washington is paid for by the Washington State Maritime Cooperative (Washington State Maritime Cooperative, 1995) and was driven by contingency plan regulations.

The Merchant Marine Act of 1920, Section 27, referred to as the Jones Act, deals with cabotage (coastal shipping), and requires that all shipments (including salvage) between US ports be carried in US flagged ships, built in, owned by and crewed by US citizens. Therefore, vessels being considered for use must be compliant with this act. This may reduce the number of available vessels for consideration.

Salvage Laws. Maritime law distinguishes between contract salvage and true salvage. A vessel contractually obligated to respond cannot expect a salvage award other than as

specified under the payment terms agreed in advance (contract salvage). Traditionally, a vessel that voluntarily responds and succeeds in removing another vessel from "maritime peril" (true salvage) can expect remuneration for those services. Depending on the risk involved, the successful volunteer may realize an award equal to a significant percentage of the residual value of the rescued vessel, its bunker, and its cargo. This was given as one of the reasons the captain of the M/V Selendang Ayu delayed allowing rescue operations until it was too late.

In the USA, OPA 90 requires that every vessel's response plan include provisions to activate the services of a tug if needed or so directed by the Federal On-Scene Coordinator (USCG). The UK system includes a statutory requirement that the casualty vessel accept and pay for services from a dedicated tug kept in position by public funding and called out by the government overseer. Wherever transiting vessels pay an annual or per trip fee to keep a dedicated tug on standby contract, that tug cannot respond on commercial terms other than those incorporated in the agreement.

A.5 Increase Salvage and Spill Response Capabilities in the Aleutians

The RRO for increased salvage and spill response capabilities was recommended for additional study as part of Phase B of the Aleutian Islands Risk Assessment, with immediate implementation of the final rule for non-tank vessel contingency plans, as summarized in Section 4.5.

The amount and type of salvage and oil spill response equipment required in the region is under the jurisdiction of two agencies, the USCG and ADEC. In State waters, which extend three miles from shore, ADEC requires tank vessels, tank barges, and nontank vessels to have an approved oil discharge prevention and contingency plan (Cplan) that meets state planning standards for discharge removal (18 AAC 75.400). In State and Federal waters tank vessels (includes barges) and nontank vessels must have an approved vessel response plan (VRP) (33 CFR Part 155). Vessels in innocent passage do not require a vessel response plan, but will likely have a Shipboard Oil Pollution Emergency Plan (SOPEP). The Area Contingency Plan covers spill response for vessels in innocent passage.

It is not known how many vessels are required to carry these plans, but with the exception of the vessels carrying only SOPEP plans, each vessel must have access to equipment and personnel necessary to execute the Cplan and/or VRP for their vessel. In general terms this means contracting with a State Primary Response action Contractor (PRAC) or a Federal Oil Spill Removal Organization (OSRO) to meet the oil spill planning standards for the vessel (USCG, 2008). OSROs are approved for specific operating environments: River/Canal, Inland, Offshore, Nearshore, and Great Lakes based on their response capability. Planning standards differ between vessels and state/federal regulations, but generally the planholder must be able to stop the discharge, lighter unspilled oil from damaged tanks, observe and monitor the oil slick, contain and skim the oil from the water, and prevent oil from reaching wildlife and sensitive areas. The biggest response planning standards that apply to vessels trading in the Aleutians

are for oil tankers carrying persistent oil (1 trip per month with a maximum of 26.8 million gallons cargo) but the planning standards for tank barges (5 trips per month with a maximum of 6.3 million gallons cargo) and large container ships (160 trips per month with a maximum of 2.2 million gallons of fuel) are also substantial (DNV and ERM, 2010a).

The actual oil spill response capability in the Aleutians is a small fraction of the spill response capability in other areas with similar vessel traffic. For example, there is not a single dedicated spill response vessel in the entire subarea nor is there an OSRO that is classified to respond in the Open Ocean, Offshore, or Nearshore operating environments. Outside of ports and harbors, there is no resident oil spill response capability in the Aleutians to respond to the 185 transits per month reported from the Vessel Traffic Study. The reasons for this apparent inequity in response capability are not clear but mostly seem to be due to exceptions being granted to the regulatory requirements through the alternative planning criteria process.

Recently the USCG implemented new Salvage and Marine Firefighting requirements for tank vessels that are required to carry VRP (33 CFR Part 155.4030). Similar requirements will be extended to nontank vessels when the nontank Vessel Response Plan rule is published. These regulations establish specific planning requirements for vessels operating within fifty miles of the nearest COTP city. Vessels operating in the Aleutians would not have to meet the timeframes published in these requirements because the entire Aleutian subarea is more than fifty miles from Anchorage, Alaska, which is the COTP for this area.

Another consideration is the response gap in the Aleutians. A response gap is the percentage of time that the environmental conditions (wind, sea state, visibility, currents, etc.) exceed the limitation of the response system. No response gap analysis has been conducted for the Aleutians but experience has shown that there are substantial periods of time when a marine spill response would not be possible no matter what the oil spill response capability.

A.6 Establish IMO Particularly Sensitive Areas and Associated Protection Measures

The RRO for establishment of IMO particularly sensitive areas was recommended for additional study as part of Phase B of the Aleutian Islands Risk Assessment, as summarized in Section 4.6.

A PSSA is an area that is afforded special protection through action by the International Maritime Organization (IMO) because of its significance for recognized ecological, socio-economic, or scientific attributes where such attributes may be vulnerable to damage by international shipping activities. Although a separate and distinct process from PSSA's is a Ports Access Route Study [1], which the Coast Guard uses to designate fairways and traffic separation schemes to provide safe access routes for vessels proceeding to and from ports. In 1985, the Coast Guard conducted a Ports Access Route

1 Ports and Waterway Safety Act, 33 U.S.C. 1223

Study for Unimak Pass and on December 2, 1986, a safety fairway was established.[2] A PSSA includes one or more associated protective measure appropriate to the particular circumstances of the area. These protective measures can include Areas to Be Avoided: an area within defined limits in which either navigation is particularly hazardous or it is exceptionally important to avoid casualties and which should be avoided by all ships, or by certain classes of ships. Other potential protective measures are ship routing systems, ship reporting systems, or vessel traffic schemes.

An application for PSSA designation should contain a proposal for an associated protective measure or measures aimed at preventing, reducing or eliminating the threat or identified vulnerability. IMO guidelines provide advice to IMO Member Governments in the formulation and submission of applications for the designation of PSSAs to ensure that in the process, all interests - those of the coastal State, flag State, and the environmental and shipping communities - are thoroughly considered on the basis of relevant scientific, technical, economic, and environmental information regarding the area at risk of damage from international shipping activities. The guidelines update resolution A.927 (22) Guidelines for the Designation of Special Areas under MARPOL 73/78 and Guidelines for the Identification and Designation of Particularly Sensitive Sea Areas.

Two PSSAs have been established in the United States—the Northwestern Hawaiian Islands Marine National Monument and the Florida Keys. The IMO has adopted certain areas to be avoided (ATBA) and mandatory Ship Reporting System for the Northern Hawaiian Islands PSSA. Likewise, the Florida Keys' PSSA includes Areas to be Avoided and established three non-anchoring areas within the 3,000 square nautical mile zone.

Areas within the Aleutian Island region have been identified by the Federal government (Marine Protection Areas, Alaska Maritime Refuge and Stellar Sea Lion Critical Habitat), State of Alaska (Most Environmentally Sensitive Areas), Aleutians West Coastal Resource Service Area and East Aleutian Borough as having designations for special significance including subsistence use, areas suitable for study and understanding history and pre-history, important habitat areas, areas suitable for commercial fishing and seafood processing facilities, and natural hazards.

In considering how and where to establish a PSSA in the Aleutian Island region, the unintended consequences and potential impacts to vessel routing will need to be considered. Non-government organizations or state governments through the US Coast Guard, the US Representative to the IMO who makes the final decision, can initiate a PSSA. The application and approval process for obtaining a PSSA designation can take up to a year or more.

A.7 Strengthen the Area Contingency Plan

The National Oil and Hazardous Substances Pollution Contingency Plan (National Contingency Plan or NCP) (40 CFR Part 300), which is part of the Clean Water Act, establishes the organizational structure and procedures for preparing for and

2 Federal Register, 1985. Ports Access Study, Unimak Pass, Alaska. Federal Register 50(52):10.877. U.S Department of Transportation. U.S. Coast Guard, CGD 83-068

responding to discharges of oil and releases of hazardous substances, pollutants, and contaminants. Under the NCP, there are three levels of contingency planning: the NCP which establishes the national response organization; Regional Contingency Plans (RCP) which establish regional response organization; and Area Contingency Plans which establish response organizations and set contingency planning standards for defined Areas within each Region (40 CFR Part 300 Sec. 210). Area Committees (AC) are responsible for development of Area Contingency Plans (ACP) (40 CFR Part 300 Sec. 205).

Alaska is somewhat unique in that the State is both a Region and an Area. The Alaska Federal/State Preparedness Plan for Response to Oil & Hazardous Substance Discharges/Releases (Unified Plan) serves as the Regional Contingency Plan for the Alaska Region. The Unified Plan, supplemented by 10 Subarea Plans, also serves as the ACP for the Alaska Area. In Alaska the Alaska Regional Response Team (ARRT) is responsible for the development of the Unified Plan. Federal regulations direct that the Area Contingency Plans must address both spill prevention and response such that they "shall be adequate to remove a worst case discharge under Sec. 300.324, and to mitigate or prevent a substantial threat of such a discharge, from a vessel, offshore facility, or onshore facility operating in or near the area." (40 CFR Part 300 Sec. 210(c)). Currently, the Aleutians Subarea Plan has very little planning for prevention of spills and there is very little capability to implement the measures necessary to respond to a discharge in the subarea.

Federal regulations require that ACPs describe in detail the responsibilities for preventing or mitigating the threat of a discharge and cleaning up a discharge for owners and operators of vessels and facilities as well as federal, state and local agencies. The ACPs are also required to describe how contingency plans prepared by owners and operators of vessels and facilities operating in the Area must integrate into the spill prevention and response planning system established in the ACP (40 CFR Part 300 Sec. 210(c)(3)).

Owners and operators of tank vessels carrying oil as cargo and nontank vessels over 400 gross tons carrying fuel oil for propulsion are required to develop a US Coast Guard-approved Vessel Response Plan (VRP) for their operations in US waters (33 CFR Part 155). The VRP must include a geographic-specific appendix for each Captain of the Port (COTP) zone through which the vessel will transit. VRPs are required by federal regulation to be consistent with the ACPs in effect six months prior to the submission date for the VRP (33 CFR Part 155 Sec. 1030(h)). The evaluation criteria for VRP state that response resources identified in the plan must meet limitations stated in the applicable ACP (33 CFR Part 155 Sec. 1050(a)(2)).

Foreign-flagged vessels engaged in innocent passage are exempted from the VRP requirements (33 CFR Part 155 Sec. 1015); however, the ACP regulations require that the Area Contingency Plan identify sufficient equipment, resources, and planning to respond to spill risks from any operations in the Area (40 CFR Part 300 Sec. 210). Since vessels engaged in innocent passage may be operating without a VRP, the ACP becomes the default response plan for spills from vessels not subject to US oil spill planning

regulations. Currently, the ACP does not contain sufficient resources to respond to a worst case discharge from a vessel in innocent passage. Phase A of the Aleutian Islands Risk Assessment identified vessels engaged in innocent passage as a significant oil spill risk for the region; therefore, it is important that the ACP include adequate planning and resources to manage a spill from an innocent passage vessel.

The Aleutian Islands are part of the Aleutians Subarea and part of the Western Alaska Captain of the Port Zone. Therefore, vessels operating in the Aleutian Islands that are required under federal regulation to develop VRPs must ensure that the VRPs are consistent with the Unified Plan and Subarea Plan for the Aleutians, as well as with any operating measures put in place by the Captain of the Port of Western Alaska. (Note that vessels engaged in innocent passage – foreign flagged-vessels not calling on U.S. ports or transferring or lightering oil in U.S. waters – are exempted from VRP requirements). ODPCPs prepared by vessel owners and operators under State statutes and regulations must also be consistent with the Unified Plan and Subarea Plans. Currently there is no evaluation of the ability of the VRP holder to meet the requirements established in the ACP during the USCG VRP review process.

Operators of tank vessels and nontank vessels that operate or transfer oil in state waters are required by the State of Alaska to prepare Oil Discharge Prevention and Contingency Plans (ODPCP) or equivalent plans for nontank vessels (AS 46.04.030.). These plans are submitted to the Alaska Department of Environmental Conservation (ADEC) for review and approval under relevant state regulations (18 AAC 75.425, 445 and 455). Alaska Statutes require that ODPCPs are consistent with the state regional and master plans, which include the Unified Plan and applicable Subarea Contingency Plans (AS 46.04.200 and AS 46.04.210). State planning requirements do not apply to vessels operating outside State waters, which extend three miles from shore, so these regulations do not apply to most vessels on the Northern Great Circle route passing through the Aleutians.

ALASKA STATE LEGISLATURE

SENATE STATE AFFAIRS COMMITTEE

Senate Joint Resolution 20: Relocation of the 18th F-16 Squadron
Sponsor Statement

"Relating to Eielson Air Force Base and the strategic importance of retaining the 18th F-16 Aggressor Squadron in the Fairbanks North Star Borough."

The United States Air Force recently released a proposed plan to reallocate military assets due to impending budget cuts. As part of an effort to reduce costs and achieve $8.7 billion in savings in FY13, the United States Air Force has recommended the relocation of the 18th F-16 Aggressor Squadron from Eielson Air Force Base to Joint Base Elmendorf-Richardson.

This move will have drastic impact on the Fairbanks economy and will reduce the operational capabilities at Eielson, making it vulnerable in future base realignment and closure rounds. The benefits and strategic importance of Eielson Air Force Base now and into the future far outweigh the negligible savings achieved by the transfer of the squadron.

Eielson is at the forefront of protecting the United States interests in the Pacific Theater and serves a critical function in reinforcing the region. It helps to secure important oil infrastructure, including the Trans-Alaska Pipeline System, which supplies a significant portion of the nation's energy needs. Eielson AFB also has access to the largest joint air and land training range in the United States with minimal air space congestion and is well-suited to perform operations for unmanned vehicles and live fire exercises.

The Alaska Legislature must vigorously defend Alaska military assets for the protection of our state and nation.

Eielson's Strategic Importance: Overview

Conservative estimates say that the Arctic Ocean will be ice-free in the summer within 20 years. This will provide a quick shipping lane between the Pacific and Atlantic Oceans. "We have to prepare for the world coming to the Arctic," said Rear Adm. Gene Brooks, commander of the Coast Guard's Alaska district. Up to 25% of the world's undiscovered oil and gas is in Arctic Ocean area.

Our wide-open spaces, including the Joint Alaska-Pacific Range Complex, offer an unmatched military training environment. Our varied climate prepares soldiers and airmen to operate anywhere in the world.

About 13 percent of the state economy depends on the military, with the impact more strongly felt near larger installations.

Close proximity to North Korea, Pakistan, Iran, and China – all nuclear powers.

General Hamilton:

- "Alaska, sitting at the top of the world, is within nine air hours of 95% of the industrial world."
- "Eielson's 90,000 acres and Ft. Wainwright's 1.6 million acres represent the best joint training spaces available to U.S. forces."
- Eielson has 63,000 square miles of training airspace, the largest overland instrumented training range in the world.

General Gamble:

"There are only two deployment routes from North America to Eastern and Central Asia. The first is through Alaska, and the second is through Hawaii and Guam. Of these two, the Alaska route is 1800 miles shorter, which translates into a one-day advantage receiving combat aircraft from the West Coast and a two-day advantage from the East Coast."

- Eielson supports NORAD and the Ground Based Missile Defense System: "Every day for more than 20 years, at least on KC-135 has been on short-notice alert in support of interceptors protecting the sovereign airspace."
- "Only one military base in the state has a runway long enough for all-weather tanker operations."
- Eielson secures the TransAlaska Pipeline.
- "Any Pacific Theater war plan would fully involve Eielson in an air bridge role."

- "...as we understand it, in all prior BRAC rounds, Eielson was 'categorically excluded' in recognition of its critical function in reinforcing the Pacific and defending Alaska."
- Few environmental constraints (noise, pollution, etc) compared to other bases.
- "Eielson's fuel system is another great base asset. It is completely self-contained. The crude comes right off the North Slope, it's refined in the neighboring North Pole, and it's piped directly to Eielson."
- "...failing to consider the consequence of diminished Air Force jet fuel production required to meet the demand of a wartime surge; and two, by moving aircraft from the largest unrestricted airspace in the U.S. to encroached airspace."
- "Eielson provides the infrastructure to air refuel the President's support aircraft when he moves through the Pacific."
- "Eielson supports a multi-million dollar network of seismic sensors which detect underground nuclear tests."
- Eielson has huge field storage capacity, large capacity parking ramp, and a long runway (8th longest runway in the United States.)
- Eielson is a self-contained base, making it very secure to terrorist attack: "Eielson's heat and electricity come from its own power plant burning locally mined coal, and Eielson has an entirely self-contained water supply and water treatment facility on base."

FACT SHEET

U.S. Air Force Fact Sheet

EIELSON FACTS AND FIGURES

The Base

Eielson Air Force Base occupies 63,195 acres southeast of Fairbanks, Alaska. The runway is oriented north to south and is 14,507 feet long. It was extended to its present length in the 1950s to accommodate B-36 aircraft, and is the second longest runway in North America.

Population

About 2,500 military people work at Eielson, which includes more than 340 Air Force Reserve and Air National Guard servicemembers. The base has approximately 930 houses and 387 dormitory rooms for the more than 2,000 military and family members who live on base. An additional 1,100 active duty, Reserve and Guard servicemembers and their families live off-base. More than 500 retirees from all branches of the military reside in the area.

Rounding out the total military-related population are about 480 civilian employees.

Economic Impact

The total payroll for active duty military employees is about $132 million. The base spent more than $79 million for constuction, services and procurement of materials, equipment and supplies in fiscal year 2011. More than 1,800 jobs were created valued at approximately $41 million.

Organizations

The 354th Fighter Wing mission is to prepare U.S. and allied aviation forces for combat, to deploy Airmen in support of global operations, and to enable the staging of forces to promote U.S. interests in the Asia-Pacific region. The 354 FW is the host unit at Eielson Air Force Base, Alaska and is assigned to 11th Air Force, headquartered at Elmendorf AFB, Alaska.

Eleventh Air Force falls under Pacific Air Forces, headquartered at Hickam AFB, Hawaii. The 354th Fighter Wing is divided into four groups and 10 wing staff agencies. The groups are Operations, Maintenance, Mission Support and Medical. The wing commander's staff agencies include the Historian, Protocol, Chaplain, Staff Judge Advocate, Safety, Finance, Manpower, Command Post, Military Equal Opportunity and Public Affairs.

Associate Units

· 168th Air Refueling Wing, Alaska Air National Guard, is the primary workhorse tanker unit for the Arctic Region and Pacific Rim, annually transferring more than 17 million pounds of fuel in flight to predominantly active-duty aircraft on operational missions. The wing's strategic location provides an invaluable rapid response capability for emergency and contingency situations, as well as enhancing the Air Force's total force global reach.

· The 353rd Combat Training Squadron is responsible for sponsoring training and experimentation in Alaska. In this capacity the squadron hosts Pacific Air Force's Red Flag - Alaska , Alaska Command's Northern Edge, and Pacific Command's Cooperative Thunder exercises. The 353rd has a detachment at Elmendorf Air Force Base. Beyond Red Flag - Alaska, the 353rd hosts an increasingly broad number of combat training events on the Pacific-Alaska Range Complex.

· Detachment 1, 66th Training Squadron, provides Arctic survival training to members of all branches of the military and the other uniformed services. The "Cool School" graduates about 650 students per year. Instructors at the Air Education and Training Command-

assigned unit also provide ground search and rescue capability on and around Eielson.

· Detachment 1, 210th Rescue Squadron, Alaska Air National Guard, provides maintenance and operations support for up to two HH-60G Pave Hawk rescue helicopters deployed to Eielson from Kulis Air National Guard Base in Anchorage. These aircraft provide alert rescue coverage for Eielson aircraft and logistics support for interior Alaska military ranges. The detachment is also assigned by 11th Air Force to provide search-and-rescue for both military and civil aviators north of the Alaska Range.

· Detachment 632, Air Force Office of Special Investigations provides professional investigative service for felony level criminal activity and counterintelligence matters to commanders of all Air Force activities. AFOSI Detachment 632 provides specialized investigative services for USAF and DoD resources located in the northern half of the State of Alaska.

· Detachment 460, Air Force Technical Applications Center operates and maintains the largest and northernmost seismic network in the United States Atomic Energy Detection System, as well as the sole field backup operations center for detection and analysis of foreign nuclear weapons tests. In addition, the detachment operates and maintains a network of gaseous and particulate air sampling units to detect airborne signatures of nuclear events.

Murkowski, Begich Fighting F-16 Aggressor Squadron Move from Eielson to Elmendorf, 4 C-130 Retirements at Elmendorf

Lawmakers to Introduce Legislation Monday That Would Prohibit Action

Senators Murkowski and Begich today issued a united set of statements opposing the Department of Defense's plans to relocate the F-16 Aggressor squadron from Eielson Air Force Base to Elmendorf Air Force Base and retire four C-130 transport aircraft at Elmendorf – as part of a nationwide Pentagon budget reduction strategy.

When the Senate returns to session on Monday, Murkowski and Begich will introduce legislation that would prohibit the Air Force from making these moves.

Senator Lisa Murkowski:

"While I am gratified the Air Force plans to keep the F-16 aggressor squadron in Alaska, I believe its rightful home is Eielson Air Force Base – at the gateway to the Joint Pacific Alaska Range Complex (JPARC). Today's announcement is identical to the BRAC proposal the Air Force advanced in 2005, when the Fairbanks community conclusively proved to the independent Base Realignment and Closure Commission that the Air Force would not achieve any savings by attempting to maintain a warm base in a cold place.

"Yet the Air Force suggests that today's action will result in a cost savings in Fiscal Year 2015. I no more believe that they will be able to achieve that cost savings in 2015 than they could in 2005. I'm going to do everything in my power to change the Air Force's plan.

"I am also concerned about the Air Force's plan to retire four C-130 transports at Elmendorf, with an anticipated loss of 120 active duty positions. The C-130 plays a crucial role in disaster relief missions. Coming on the heels of an earlier announcement that the Army National Guard will retire the remaining C-23 Sherpa, I need to be convinced that this action leaves the Air Force and Guard with sufficient assets to respond to a catastrophic earthquake or other natural disaster requiring immediately available airlift capacity."

Senator Mark Begich:

"Relocating the 18th Aggressor Squadron from Eielson to JBER is an unacceptable proposal. I will not support the Air Force's attempt to circumvent the law and the formal BRAC process by trying to piecemeal one of the most strategic installations in the country. As Alaska's only member of the Senate Armed Services Committee, I will fight this action every step of the way. A decision to relocate the F-16s from Eielson was already rejected in 2005, when the independent BRAC Commission overturned the Air Force's recommendation, recognizing Eielson has the best airspace and range complexes and the estimated costs savings were inaccurate. Nothing has changed since 2005. Eielson Air Force Base is critical to the defense of the United States.

"The Air Force also plans to retire 4 C-130Hs stationed at JBER. It is unfortunate this will result in the loss of the active duty personnel in the integrated unit that fly these planes. However, I am pleased Air Guardsmen of the 144th Airlift Squadron will retain eight C-130s and the manpower to continue to provide important lift capability in defense of our

nation and in support of our state. As members of our community, these Guardsmen will continue to make us proud in Alaska."

Murkowski, Begich File Legislation Prohibiting F-16 Move

WASHINGTON, D.C. – Senators Murkowski and Begich today introduced legislation (*attached*) in the U.S. Senate that would expressly bar the United States Air Force from planning or executing the relocation of F-16s from Eielson Air Force Base to Joint Base Elmendorf-Richardson – and requires that just as many, if not more, F-16s are based at Eielson this September.

Alaska's entire Congressional Delegation will be sitting down with U.S. Air Force Chief of Staff General Norton Schwartz on Thursday, to further discuss the Air Force's plan and question the reasoning.

The Senators issued the following statements after filing the bill:

Senator Lisa Murkowski:

"This is déjà vu all over again, reminding me of the Air Force's BRAC proposal for Eielson in 2005. Back then, Alaskans made the case that the Air Force wouldn't achieve any savings by attempting a move. 7 years later, I remain unconvinced that moving existing units from one part of Alaska to another is an efficient or effective way of cost-cutting. I want the Air Force to show me its math."

Senator Mark Begich:

"Moving F-16s from Eielson Air Force base to Anchorage will neither save money nor make our military stronger. If military leaders try to end-run the formal base-closing process with this piecemeal approach, I will do whatever I can through my position on the Senate Armed Services Committee to stop it. I'll work with community leaders to demonstrate this is not the right decision and keeping these fighter jets at Eielson makes strategic and economic sense. If we have to stop it through legislation, that's what we'll do."

###

S 2073 IS

112th CONGRESS

2d Session

S. 2073

To prohibit the permanent relocation of F-16 aircraft assigned to Eielson Air Force Base.

IN THE SENATE OF THE UNITED STATES

February 6, 2012

Ms. MURKOWSKI (for herself and Mr. BEGICH) introduced the following bill; which was read twice and referred to the Committee on Armed Services

A BILL

To prohibit the permanent relocation of F-16 aircraft assigned to Eielson Air Force Base.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PROHIBITION ON RELOCATION OF F-16 AIRCRAFT.

The Secretary of the Air Force--

(1) may not plan or execute the permanent relocation of any F-16 aircraft assigned to Eielson Air Force Base as of the date of the enactment of this Act; and

(2) shall ensure that the number of F-16 aircraft assigned to Eielson Air Force Base as of September 30, 2012, equals or exceeds the number of F-16 aircraft assigned to Eielson Air Force Base as of October 1, 2011.

Sen. Begich questions F-16 move

by Jeff Richardson/jrichardson@newsminer.com
02.28.12 - 11:19 pm

FAIRBANKS — Sen. Mark Begich questioned the legality of the Air Force's plan to relocate its F-16 squadron from Eielson Air Force Base during a hearing Tuesday, asking Defense Secretary Leon Panetta whether such a move needed to be part of a formal process.

The Alaska Democrat spoke to Panetta during a Senate Budget Committee hearing on the Department of Defense budget request and said such significant moves are typically part of the Base Realignment and Closure Commission process — known informally as BRAC — that is used to shift assets throughout the military.

On Feb. 3, the Air Force announced plans to move the 21-plane squadron from Eielson to Joint Base Elmendorf-Richardson by mid-2013, part of a proposed nationwide realignment that would affect 60 installations in 35 states.

Begich asked Panetta why such a major move wasn't part of the BRAC process. Eielson was targeted for closure in 2005 by the Defense Department but was deemed too strategically valuable to abandon by that year's BRAC members. The commission allowed only the partial downsizing of Eielson.

"That's the same debate we had with the BRAC, the exact same debate," Begich said. "We're not doing a BRAC now — we're just (relocating the squadron)."

The departure of the F-16 squadron would significantly alter the makeup of Eielson. Nearly half of the 3,100 military and civilian jobs at the base will be transferred to the Anchorage area if the move takes place.

Begich said he's received little explanation from the Air Force about why moving the F-16s makes strategic or economic sense. He said the move is especially mystifying in light of the Air Force's stated goal of boosting its role in the Asia-Pacific region.

"I don't get this, to be very frank with you, that it's almost like they picked a location … but they're now starting the analysis," Begich said to Panetta.

Panetta recommended Begich talk to the Air Force to get more details about the process. When Begich said he hadn't received a satisfactory response from Air Force leaders, Panetta said he would get back to him with the information.

Interior Alaska's Eielson Air Force Base closure: what's really going on?

by T_PHILLIPS on FEBRUARY 19, 2012

It's easy to get lost in the controversy...

Twenty-one F-16s (one of which is pictured above over Eielson Air Force Base, Alaska) are really being transferred from Eielson Air Force Base? After reading the major articles about the move and spending roughly 25 years in the Fairbanks area, I have compiled a report, along with my own thoughts, to clear up the confusion.

First, let's look at what we have been told (mostly from Alaska news sources):

Twenty-one F-16s may move from Eielson Air Force Base by summer 2013, followed by any associated personnel by the end of the year.

Nineteen of the F-16s would be relocated to Elmendorf Air Force Base in Anchorage. 1600 jobs would be cut with only 600 moving to Anchorage. The Pentagon would save $35 million over five years, according to authorities.

Air Force Lt. Gen. Hoog says that the National Guard's refueling unit would continue operation at the base even if the F-16s are relocated (the base would not close).

According to Hoog, "If you mapped out everyone who touches (the F-16s), you'd be looking at about 900 folks." So far, it is uncertain how many of the 1,800 active-duty personnel would leave the Fairbanks area. There are 2.1 to 2.3 family members for every active duty airman stationed at Eielson, according to Hoog, and let's not forget about the numerous civilian jobs that would also diminish.

Senators Lisa Murkowski and Mark Begich, as well as Borough Mayor Luke Hopkins, met on Saturday (2/18) with General Norton Schwartz (Chief of Staff to the U.S. Air Force) regarding the proposed move.

Both Hoog and Schwartz said an analyst will arrive in March to investigate the logistics of the move and the future of the base.

Mayor Hopkins and Governor Sean Parnell have both proposed spending state money to investigate the financial figures that would result from the move.

Some government spending has been put on hold ($45 million for the Eielson dorm project) while some spending continues ($14.8 million for a railroad upgrade to haul fuel to Eielson).

Ted Stevens is dead and can't protect Alaska from military spending cuts in Washington.

There are only a few months left for politicians to convince the Pentagon not to go through with the move.

Now let's think about what we have been told:

Alaskan politicians say that there is no better training place for the F-16s than the Interior. Shouldn't that decision be left to leading military strategy experts instead of bureaucrats?

The real reason there is such a fuss: THE AMOUNT OF MONEY LOST BY BUSINESSES IN INTERIOR ALASKA WILL BE MASSIVE. MONEY, MONEY, MONEY! MONEY TO LOSE and MONEY TO SPEND TO TRY NOT TO LOSE MORE MONEY!

Lisa Murkowski states that in rural areas of Alaska, military spending is responsible for 38% of the economy.

According to Wes Madden, the departure of even 1,500 people would drastically influence the housing market in a negative way. Oh no, the housing market would be hurt. The rental prices are already through the roof (and have been for awhile), even in west Fairbanks!

According to one Interior resident, *"A lot would change – fewer assaults, less traffic, smaller population, fewer Republicans – it would be horrible."*

While the above human is being a bit sarcastic, there is no doubt that a number of aspects of society could see a positive benefit from the closure of the base. I cannot help but fantasize about the crumbling of the east Fairbanks chain stores that might occur (they were not around for most of my life). Maybe some local businesses would actually benefit!

To summarize:

The military is interested in transferring some very expensive military technology Outside and to another location in the state. This change would majorly hurt the economy of Interior Alaska, resulting in businesses closing and housing prices plummeting. The population would decline along with crime and traffic.

Is the extra money for the economy really worth the negative impact the base has on society? Remember military fans, plenty of Ft. Wainwright troops will be returning in the next few months...

Sponsor Statement
HB 3
"An Act relating to issuance of driver's licenses."

Under current statute, Alaska driver's licenses are issued for a period of five years. The Department of Administration-Division of Motor Vehicles is afforded discretion to extend the expiration date for certain licenses beyond five years, but is not currently empowered to issue a license for *less* than five years. HB 3 would authorize DMV to issue driver's licenses that expire in less than five years for persons who are legally permitted to stay in the United States indefinitely or for less than five years. If a person is authorized to stay in the United States indefinitely, the DMV would issue a license that must be renewed annually. If a person is authorized to stay in the United States for less than five years, the DMV would issue a license that is only valid for the period of authorized stay.

Re: HB-3

Dear Representative Lynn:

Mr. Reiker of your office contacted me following the House State Affairs committee hearing this week concerning the above referenced bill.

Consistent with Department of Law practice, I had reviewed this bill prior to the committee hearing. In my review I saw no basis for constitutional challenge of it. Having revisited the bill following Mr. Reiker's contact that remains my position.

Sincerely,

JOHN J. BURNS
ATTORNEY GENERAL

Representative Wes Keller
Alaska State Capitol, Room 432
Juneau, Alaska 99801

Re: Letter of Support for HB 367

Dear Representative Keller,

The Alaska Mental Health Board and Advisory Board on Alcoholism and Drug Abuse support HB 367 recognizing the special needs presented by Alaskans experiencing fetal alcohol spectrum disorders (FASD) in the justice system.

Alaska's judges, prosecutors, defenders, and court staff work to ensure that everyone who appears in court is treated fairly and with respect. However, Alaskans experiencing FASD often present with special needs and situations that impede the course of justice. Low cognitive functioning, inability to understand and stay within accepted social norms, limited short term memory, impulsivity, and impaired judgment can all result in a person experiencing FASD not being able to explain his or her actions, understand why they resulted in a criminal charge, or understand the criminal justice process. Usually, these impairments do not rise to the level of legal incompetence – but they often make it hard for judges and juries to make decisions that serve our notions of fairness and justice.

Based on research in other jurisdictions, an estimated 60% of inmates experience an FASD, brain injury, or similar organic cognitive impairment. The cost of incarceration is very high and usually does not result in restoration or rehabilitation. In fact, according to a 2009 ISER Study,[1] the cost of prison far exceeds the cost of services. CSSD 151 allows judges – **at their discretion** – to modify presumptive sentences to take into account the defendant's disabilities and to provide the sort of sentence needed to prevent recidivism and ensure a just outcome for victims, defendants, and our communities.

We thank you for your work on behalf of all Alaskans.

Sincerely,

J. Kate Burkhart
Executive Director

To: Sen. Albert Kookesh
Subject:

Dear Senator Kookesh,

I understand that House Bill 3, requiring restricted term driver's licenses for holders of an indefinite visa, is now in the Senate State Affairs Committee. I urge you to let it die there. This bill is a solution in search of a problem.

Alaska does not to my knowledge have a major problem with undocumented workers. In my many years experience teaching at the University of Alaska I found the immigrant community to be hard- working and motivated and to contribute greatly to Alaska's economy.
To impose such petty bureaucratic hassles on them is a slap in the face.

It also lays an additional burden on state employees at a time when we are trying to streamline state government.

Sincerely,

Diana Conway

AS 28.15.101. Expiration and Renewal of Driver's License.

(a) Except as otherwise provided in this chapter, a driver's license expires on the licensee's birthday in the fifth year following issuance of the license. A license may be renewed within one year of its expiration upon proper application, payment of the required fee, and except when a license is renewed under (c) of this section, successful completion of a test of the licensee's eyesight.

(b) The department may defer the expiration of the driver's license of a person who is outside the state under terms and conditions that the department shall prescribe by regulation.

(c) A driver's license may be renewed by mail if the licensee complies with (a) of this section, except that a license may not be renewed by mail if:

(1) the most recent renewal of the applicant's license was by mail; or

(2) the applicant is 69 years of age or older on the expiration date of the driver's license being renewed.

State Driver's License Requirements

This table is current as of December 5, 2004. The information it contains was compiled by the National Immigration Law Center from statutes, state government websites, and information provided by advocates within each state. Note that the documents used to prove age and identity may have changed. To suggest corrections or additions to the table, or for the latest updates to the information it contains, contact Tyler Moran at moran@nilc.org

STATE	SSN REQUIREMENT?	LAWFUL PRESENCE REQUIREMENT?	ACCEPTABLE DOCUMENTS TO PROVE AGE, IDENTITY, RESIDENCY, LAWFUL PRESENCE AND SSN	COMMENTS & EXCEPTIONS TO RULES
AL	Yes (w/exception)	Yes	Applicants must present 2 forms of identification — at least 1 from the primary list, and at least 1 bearing a photo. Together, the documents must establish the applicant's name and date of birth, and that the applicant is lawfully present in the U.S. **Primary documents.** U.S. birth certificate, U.S. passport, U.S. military ID card, Alabama ID card, Alabama DL, Certificate of Naturalization, U.S. Certificate of Citizenship, U.S. Certificate of Birth Abroad, resident alien card, Social Security card; Valid non-U.S. passport. **Secondary documents.** DL issued in the U.S; International DL/ permit (not expired); marriage certificate, U.S. armed forces DL; U.S. military DD-14, professional license, Selective Service card, Veterans Administration card, medical insurance ID card (not expired), school ID (with photo), school enrollment form; W-2 form; documents from court of record including divorce decree, adoption decree; name change decree, bankruptcy decree; employment authorization document with valid social security card; Valid visa authorizing presence in the country for a period exceeding six months; Valid Employment Authorization Document (EAD); Valid I-94 Arrival/Departure Record; Original Form I-797, Notice of Action, showing approval of change of status or extension of stay Original Form I-797, Notice of Action, evidencing timely filing of an extension petition. **Documents to prove lawful presence** include, but are not limited to, original or certified copies of one or more of the following: I-551 stamp in foreign passport or I-551 stamp on Form I-94 (Arrival/Departure Record); proof of refugee, asylee, or parolee status, i.e., Form I-571 (Refugee Travel Document), or Form I-512 (Authorization for Parole of an Alien), or an immigration judge's order (IJO), certified by the clerk of the court, granting asylum or cancellation of removal; proof of lawful nonimmigrant status provided by the U.S. Dept. of Justice (Form I-94, Arrival/Departure Record, not expired, with required supporting document(s)); and U.S. Dept. of Defense Uniformed Services ID Card, along with International Travel Order (ITO) for international military student (IMS). Non-U.S. citizens with the following visa types are eligible to apply for an Alabama driver's license: A, E, F, J, L, M, NATO, O, P, R, and TN. ***Note:*** F-1 and M-1 visa holders also must provide a copy of Form I-20 (Certificate of Eligibility for Nonimmigrant Student Status). J-1 and J-2 visa holders must also provide a copy of Form IAP-66 (Certificate of Eligibility for Exchange Visitor Status). In addition to meeting the above ID requirements, an applicant who has been deported from the U.S. must present proof from the INS or CIS that his or her lawful presence status has been restored.	➢ Noncitizens lawfully residing in the state for a period exceeding six months and who are not authorized to work are not required to provide an SSN, but must provide proof of lawful presence exceeding six months from the date of application for a DL. ➢ Applicant's immigration documents must show that s/he may legally remain in the U.S. for at least 160 days from time of application. ➢ DLs will expire with the immigration document the license-holder presented at the time of application. ➢ Noncitizens may only use designated DMV offices. ➢ Lawsuit filed that challenges Dept. of Public Safety's policy of denying DLs to nonimmigrants and applicants for permanent residency. *Castro et al v. Coppage and Alabama Dept. of Public Safety*, No. 2:04cv400-W (U.S.D.C. Mid. Dist. Ala.).
AK	Yes (w/exception)	Yes	Applicants must present 2 pieces of identification, 1 to prove DOB and 1 to prove identity. **Documents to prove DOB.** An original or certified copy of a U.S. or Canadian birth certificate (from Vital Statistics); a passport issued by the U.S. or Canada; an Alaska learner's permit or other state-issued permit with a photo; an ID card issued by a state DMV office or Canadian DMV; and military ID for active duty, retiree or reservist. ***Note:*** When *two items* from the above list are presented, an identity document (listed below) is not required. **Documents to prove identity.** Employee ID card with photo, SSA card, military ID for dependent, passport, pilot's license, marriage license or certificate, and other evidence of comparable validity approved by a DMV supervisor.	➢ Applicants who have an SSN must present it. ➢ Lawful presence requirement is specified in neither a law nor regulation, but the combination of documents required creates a lawful presence requirement.

			Security card (metal card is *not* acceptable); Social Insurance card (Canadian residents only); student ID card with photo; vehicle title (vehicle registration not acceptable); welfare card; prison release document. **Proof of residency (must bear name and address).** Utility bills; hospital insurance card; auto or life insurance policies; W-2 or filed tax forms; voter registration card; bank account records; credit card statements; employment records; DMV computer records; rental agreements.	
DC	Yes	Yes (See comments)	**Applicants must present one of the following documents:** State-certified U.S. birth certificate or birth registration card; DC driver's license, learner's permit, or nondriver's ID card, which has not been expired for more than five years; driver's license, learner's permit, or nondriver's ID issued by another U.S. state or jurisdiction, which has not been expired for more than one year; U.S. passport that has not been expired for more than one year. **Applicants who do not have any of the above documents must present two of the following, one of which must bear the applicant's DOB:** Certified copy of high school records from a U.S. jurisdiction or territory; valid Form IAP-66 (Certificate of Eligibility for Exchange Visitor Status); U.S. military discharge papers (DD-214); U.S. military ID; health insurance card or policy stating applicant's full name, DOB, and SSN; valid college or university photo ID; original certified marriage certificate. **Proof of DC residency.** Complete utility bill showing applicant's name at current address, issued within the last 60 days; original lease or rental agreement with the name of the applicant listed as the lessee or renter (may include handwritten leases if notarized by lessee or authorized representative from a leasing company); voter registration card or certified voter registration application; written statement from a person owning the residence or residing with the applicant at the stated residence and a complete utility bill of that person and a copy of that person's valid DC driver's license or nondriver's ID card; deed, settlement agreement, or homestead exemption certificate; letter (on letterhead) from halfway house or shelter specifying that the applicant resides at that location. If the applicant is 16 or 17 years of age, the required notarized parental consent form will be accepted if accompanied by proper proof of DC residency of the parent or legal guardian.	➢ Lawful presence requirement is specified in neither a law nor regulation, but the combination of documents required creates a lawful presence requirement. ➢ DL expires when immigration document expires.
FL	Yes (w/exception)	Yes	Applicant must present proof of identification, date of birth and lawful presence. **Immigrants must present:** I-551 stamp in passport or on I-94 (Arrival/Departure Record); or Immigration judge's order, with the applicant's A-number, granting asylum; or Form I-797, with the applicant's A-number, stating that the applicant has been granted asylum; or I-797 or another form from CIS, with the applicant's A-number, stating the applicant's application for refugee status is approved. (**Note:** This list is not exhaustive. A list of all acceptable documents can be found at http://casey.hsmv.state.fl.us/intranet/ddl/MemberSvcs/NonImmigClass.html.) **Nonimmigrants must present:** Employment authorization card (Form I-6888 or I-766); or proof of nonimmigrant classification provided by the INS or CIS (Form I-94, Arrival/Departure Record, not expired, with required supporting attachment(s)). Any I-94 must be accompanied by a passport. Certain classifications require additional documentation. Some examples are: Persons with F-1 or M-1 visas must also present a Form I-20 (Certificate of Eligibility for Nonimmigrant Student Status); persons with J-1 or J-2 visas must also present a Form IAP-66(Certificate of Eligibility for Exchange Visitor Status). Persons classified as refugees, asylees, or parolees must present additional documentation. The following documents will be accepted only with a supporting document (including but not limited to a passport, Florida driver's license or ID card, driver's license issued by any other state, employment authorization card, employment ID, ID from home country, ID from school or college, Social Security card, or other INS or CIS document): I-571 (Refugee Travel Document); I-512 (Authorization for Parole of an Alien); immigration judge's order granting asylum or cancellation of removal. **Canadian Citizens.** Canadian citizens residing temporarily in the U.S. (i.e., those who do not have lawful permanent resident status) are in "nonimmigrant" status and are allowed to stay in the U.S. without obtaining CIS documentation. Canadians without	➢ Applicants who have an SSN must present it. ➢ License expires with visa or immigration document. ➢ Non–U.S. citizens must renew license and change-of-address in person. ➢ Non–U.S. citizens applying for an original driver's license are issued a 30-day, nonphoto, paper temporary permit and a receipt. All records are then examined and run against Florida Dept. of Law Enforcement, FBI, and immigration-related databases. Upon identity and legal status verification, a driver's license is issued within 30 days and mailed to the address on the driver's record. If a problem is detected, a denial-of-issuance letter is mailed to the applicant.

emergency ID photo issued and certified by driver licensing authority of U.S. or Canadian jurisdiction that includes applicant's name and DOB. **Secondary documents.** Second primary document; original U.S. Social Security card or Canadian Social Insurance card; certified copy of marriage certificate or license issued by government jurisdiction; U.S. or Canadian DL or ID card that has been expired for more than one year but not more than five; current U.S. or Canadian government jurisdiction employee photo ID card; U.S. or Canadian DL or ID card that is current but does not have color photo; certified copy of court order or judgment from U.S. or Canadian court of competent jurisdiction containing applicant's full legal name and DOB; any INS or CIS document approved as a primary document, but that has not been expired more than one year; certified copy of birth certificate issued by jurisdiction other than by state, territory or possession of U.S., D.C., or Commonwealth of Puerto Rico, or province or territory of Canada; certification of release or discharge issued by U.S. Dept. of Defense; Medicare, Medicaid, or health insurance card with applicant's name and applicant's individual Medicare, Medicaid, or health insurance ID number; unexpired color photo firearm or concealed weapon permit issued by chief of police in an organized, full-time police dept. or by county sheriff in local jurisdiction within U.S.; current pilot's license issued by U.S. Federal Aviation Administration; certified copy of school records or transcript containing applicant's full name and preferably DOB and issued by elementary, secondary, or post-secondary school; certificate of completion of Montana dept.-approved traffic or driver's education course containing applicant's name and DOB; current school photo ID card with student's name and student ID number; certified copy of fax or photocopy of certified copy of birth certificate of applicant's child, if certificate lists applicant's name and DOB as parent. **Proof of residency.** Any primary or secondary document; a U.S. or Montana income tax return from the previous year; a Montana voter registration card; a receipt for personal or real property taxes paid within the last year to the state of Montana or a Montana county; a current auto or life insurance policy or statement; a certified copy of school records issued by the school that the applicant is currently attending or that s/he attended within four months of the application; a written statement from the applicant's parent, guardian, or adult child that the applicant resides at the same address as the parent, guardian, or adult child, along with a copy of a document permitted under this rule that evidences the Montana residence address of the parent, guardian or adult child; the original copy of a rental agreement or rent payment receipt signed by the landlord or rental agent that includes the applicant's name and residence address; home mortgage or equity loan papers showing the applicant's name and residence address; any of the following, dated not more than four months prior to application: a payroll check or check stub, a bank statement, a utility bill or utility hook-up order, cancelled mail addressed to the applicant; if the applicant is homeless, a descriptive address of where the applicant actually resides, e.g. "under the west end of the East Street Bridge" (such an applicant must also provide a separate mailing address, as well as a written statement from a social service agency verifying that s/he is homeless).	➢ If ineligible for an SSN, the applicant must submit a letter from the SSA to that effect.

Fr: Representative Bob Lynn BL

Re: HB 3 (Version 27-LS0010\X) Issuance of Driver's Licenses

I am requesting a hearing for HB 3, "*An Act relating to issuance of driver's licenses*" at your earliest convenience.

I have attached supporting documentation.

The House State Affairs Committee heard the bill, and moved CS HB 3(STA) out of committee unanimously. CS HB 3(STA) moved out of the House Finance Committee unchanged. HB 3 passed the House of Representatives on a vote of 33 yeas, 2 nays.

Any questions or concerns can be directed to my staffer, Thomas Reiker, at 465-4965 or thomas_reiker@legis.state.ak.us .

Thank you in advance for your consideration.

Sincerely,

Representative Bob Lynn

Alaska Immigration Justice Project

The Honorable Bill Wielechowski, Chair
The Honorable Joe Paskvan, Vice-Chair

Re: HB 3

Dear Senator Wielechowski and Senator Paskvan:

Thank you for the opportunity to submit written testimony regarding Committee Substitute (State Affairs) for House Bill 3 (CS-HB3), Relating to Issuance of Driver's Licenses.

The Alaska Immigration Justice Project (AIJP) is the only agency in Alaska that provides legal services to Alaska's immigrant and refugee population. AIJP works with approximately 250 immigrant victims of domestic violence and sexual assault annually. Similarly, AIJP trains bilingual Alaskans to be professional interpreters in Alaska Native and foreign languages. I am writing to you because HB 3 will negatively impact the state for several reasons.

First, the legislation is overbroad and reaches into fields of law that are exclusively the province of the federal government. As the bill is written, United States citizens arguably fall within the group of people to whom this new one-year period applies because US Citizens are in the United States on an indefinite basis. Clearly, this is not the intended result. Similarly, the bill's language lacks any connection with any immigration status defined in the U.S. Immigration & Nationality Act. This presents tremendous problems for front-line DMV employees who will no longer be able rely on federal definitions to understand the differences in immigration statuses. In addition, HB 3 represents an effort by the state to divert into policy arenas that are properly reserved exclusively to the plenary power of the U.S. Congress. **HB 3 overreaches, it is overbroad and it is poorly drafted.** The result will be that, if enacted, this bill will be almost impossible to administer, and will likely subject the state to litigation in an effort to clarify the authority, purpose, intent and application of this statute.

Second, the legislation will harm immigrant victims of domestic violence. Immigration status is one of the most powerful tools that an abusive US citizen spouse can use to make sure their immigrant spouse does not seek safety and protection. The legislation

431 West 7th Ave., Suite 208, Anchorage, Alaska 99501
(907) 279-AIJP (2457) Fax (907) 279-2450

creates unnecessary barriers that will further entrap immigrant domestic violence victims. As you know, we can ill afford to exacerbate conditions that perpetuate domestic violence during a time in our state's history when we are devoting so many of our resources to counter this epidemic. **HB 3 undermines any progress that will be made in combating the horrors of domestic violence and sexual assault in our state.**

Finally, HB 3 undermines public safety. By refusing to license drivers, Alaska will have more unlicensed drivers on the road placing the public at risk.

Thank you for the opportunity to share our concerns.

Sincerely,

Robin Bronen
Executive Director

Subject: Stop HB 3 I don't want unfair treatment of lawful immigrants

Apr 6, 2011

Senator Bill Wielechowski
State Capitol, Room 101
120 4th Street
Juneau, AK 99801-1182

Dear Senator Wielechowski,

Please OPPOSE HB 3.

House Bill 3 invites racial profiling and unfair treatment of immigrants. It would unconstitutionally deny legal immigrants equal treatment in issuance of drivers' licenses.

HB 3 also threatens public safety by intruding federal immigration issues into state DMV driver and road safety functions. When there are already long lines at the DMV, we do not need a legislation that would require state employees to become experts in complex immigration rules and forms.

I don't want Alaska's DMV unfairly singling out persons of color for reasons that have nothing to do with safe driving.

Sincerely,

Mr. John Breiby

Re: Request for hearing on CSHB 8 (JUD) (27-LS0052\I)

Please consider this as a request for you to schedule CS for HB 8 "Federal Regulations and Executive Orders" before the Senate State Affairs Committee. I have included a packet of information and document in a .pdf version.

CS for HB 8 puts in place statutory language that Alaska will review and if necessary nullify federal statutes, regulations, executive or secretarial orders if it is determined they are unconstitutional or improperly filed. More and more the administration is circumventing Congress and imposing its own interpretation of the rule of law. CS for HB 8 gives us a tool to respond.

If you have any questions please feel free to contact my office.

Committee Substitute for House Bill 8 (FIN)
Sponsor Statement

"An Act relating to certain federal statutes, regulations, presidential executive orders, and secretarial orders; relating to the duties of the attorney general; and providing for an effective date."

CSHB 8 clarifies in Alaska Statute that a federal statute, regulation, presidential executive order, or secretarial order that is not properly adopted or is unconstitutional does not preempt state law. The Attorney General will continue to review and report federal statute, regulation, presidential executive order, or secretarial order that appear to have not been properly adopted. Under CSHB 8 those reports will be forwarded to the legislature for consideration.

CSHB 8 presumes Alaska Legislative interest in an important legal process called "nullification". Nullification is when a state 'nullifies' a federal law, proclaiming it to be void and inoperative, or 'non-effective' within the boundaries of that state. In other words it is not a law as far as that state is concerned. In CSHB 8 a negative review by the Attorney General would generate an alert to our Judiciary Committees so nullification legislation can be considered.

There has been disagreement regarding nullification going back to the late eighteenth century. Not surprisingly, federal courts have often leaned toward favoring federal power over state sovereignty in spite of the fact that our founding fathers clearly intended otherwise. Federalism is our historically unique and profound arrangement where sovereign and separate states got together and carefully designed a central government with limited powers. It is an illogical perversion of one of our most important founding principles to presume states must comply with unconstitutional federal language. CSHB 8 presumes a proper State responsibility to uphold and protect our constitution.

CSHB 8 is intended to provide important information to the Alaska State Legislature by tapping the expertise and evaluation of our Attorney General. Certainly the legislature has a responsibility to consider its response whenever there is question of constitutionality of a federal statute, or the process involved in regulation, presidential executive order, or secretarial order.

MEMO

To: Members of the Alaska Legislature

Date: March 31, 2011

Re: Sectional of CS for House Bill 8 (FIN) (27-LS0052)

Committee Substitute for House Bill 8 is broken into five sections:

1. Legislative findings that establish an understanding of the Supremacy Clause in relationship to state statute. It also recognizes that the U.S. Supreme Court has ruled that federal regulations, provided they are properly adopted, may also apply in Supremacy rules. The section also indicates that some executive orders and federal regulations do not always meet the constitutional or properly adopted criteria and therefore may not preempt state law.

2. Places into state statute that unconstitutional or improperly adopted federal statutes, executive orders, regulations, or secretarial orders do not preempt state statute.

3. Directs the Judiciary committee's in each house upon receipt of a report from the Attorney General that a federal statute, executive order, regulation, or secretarial order that preempts state statute and does not meet stated criteria to consider a response to the findings.

4. **Eliminated from the HB-** the requirement that the AG review all new Federal Statue, E.O., C.F.R., or S.O. Directs the Attorney General to submit reports of potential preemptive federal statues, executive orders, regulations, or secretarial orders that are unconstitutional or improperly adopted to the appropriate committees and establishes what documents need to be included in that report.

5. Effective date

Please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

(Revised 1/27/2011 OMB)

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 8(JUD)

Analysis

HB 008 would require the Attorney General to review federal regulations and presidential executive orders that "may be in conflict with and may preempt state law." If the Attorney General were to find that a federal regulation or executive order (1) is unconstitutional or was not properly adopted and (2) would preempt a state law if it were constitutional and properly adopted, the Attorney General would be required to report those findings to the chairs of the appropriate legislative committees. The Attorney General would be required to include in the report an explanation of the grounds for the findings.

The Code of Federal Regulations includes more than 157,000 pages. This bill would require the analysis as to whether a particular regulation was constitutional, properly adopted, or preemptive.

As such, the fiscal impact of this legislation to the Department of Law would likely be substantial but cannot be accurately determined at this time.

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 8(FIN)

Analysis

CSHB 008( ), Version "B" would require the Attorney General file a report with the chairs of the appropriate legislative committees if the Attorney General were to find that a federal statute, regulation, [or] executive order, or secretarial order (1) is unconstitutional or was not properly adopted and (2) would preempt a state law if it were constitutional and properly adopted. The Attorney General would be required to include in the report an explanation of the grounds for the finding and a written opinion that analyzes the basis for the finding.

There is no anticipated fiscal impact to Department of Law.

HB 8 The Judiciary Committee considered:

HOUSE BILL NO. 8
"An Act relating to certain federal regulations and presidential executive orders; relating to the duties of the attorney general; and providing for an effective date."

and recommends it be replaced with:

CS FOR HOUSE BILL NO. 8(JUD)
(same title)

The report was signed by Representative Gatto, Chair, with the following individual recommendations:

Do pass (5): Pruitt, Thompson, Keller, Lynn, Gatto

The following fiscal note(s) apply to CSHB 8(JUD):

1. Indeterminate, Dept. of Law

HB 8

The Finance Committee considered:

HOUSE BILL NO. 8
"An Act relating to certain federal regulations and presidential executive orders; relating to the duties of the attorney general; and providing for an effective date."

and recommends it be replaced with:

CS FOR HOUSE BILL NO. 8(FIN)
"An Act relating to certain federal statutes, regulations, presidential executive orders, and secretarial orders; relating to the duties of the attorney general; and providing for an effective date."

The report was signed by Representatives Stoltze and Thomas, Co-chairs, with the following individual recommendations:

Do pass (6): Fairclough, T. Wilson, Hawker, Costello, Stoltze, Thomas
Do not pass (1): Doogan

No recommendation (3): Gara, Joule, Edgmon

Amend (1): Guttenberg

The following fiscal note(s) apply to CSHB 8(FIN):

2. Zero, Dept. of Law

HB 8 was referred to the Rules Committee for placement on the calendar.

HB 8

The following, which was advanced to third reading from the April 9, 2011, calendar (page 878), was read the third time:

CS FOR HOUSE BILL NO. 8(FIN)
"An Act relating to certain federal statutes, regulations, presidential executive orders, and secretarial orders; relating to the duties of the attorney general; and providing for an effective date."

The question being: "Shall CSHB 8(FIN) pass the House?" The roll was taken with the following result:

CSHB 8(FIN)
Third Reading
Final Passage

YEAS: 29 NAYS: 11 EXCUSED: 0 ABSENT: 0

Yeas: Austerman, Chenault, Costello, Dick, Edgmon, Fairclough, Feige, Foster, Gatto, Hawker, Herron, Johansen, Johnson, Joule, Kawasaki, Keller, Lynn, Millett, Munoz, Neuman, Olson, Pruitt, Saddler, Seaton, Stoltze, Thomas, Thompson, P.Wilson, T.Wilson

Nays: Cissna, Doogan, Gara, Gardner, Gruenberg, Guttenberg, Holmes, Kerttula, Miller, Petersen, Tuck

And so, CSHB 8(FIN) passed the House.

Representative Austerman moved and asked unanimous consent that the roll call on the passage of the bill be considered the roll call on the effective date clause. There being no objection, it was so ordered.

Representative Gara later gave notice of reconsideration of the vote on CSHB 8(FIN), and reconsideration was taken up then.

The question to be reconsidered: "Shall CSHB 8(FIN) pass the House?" The roll was taken with the following result:

CSHB 8(FIN)
Third Reading
Final Passage
Reconsideration

YEAS: 29 NAYS: 10 EXCUSED: 0 ABSENT: 1

Yeas: Austerman, Chenault, Costello, Dick, Edgmon, Fairclough, Feige, Foster, Gatto, Hawker, Herron, Johansen, Johnson, Joule, Kawasaki, Keller, Lynn, Millett, Munoz, Neuman, Olson, Petersen, Pruitt, Saddler, Seaton, Stoltze, Thomas, Thompson, P.Wilson

Nays: Cissna, Doogan, Gara, Gardner, Gruenberg, Guttenberg, Holmes, Kerttula, Miller, Tuck

Absent: T.Wilson

And so, CSHB 8(FIN) passed the House on reconsideration.

Representative Austerman moved and asked unanimous consent that the roll call on the passage of the bill be considered the roll call on the effective date clause. There being no objection, it was so ordered.

CSHB 8(FIN) was referred to the Chief Clerk for engrossment.

SUPREMACY CLAUSE

"This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the contrary notwithstanding."

U.S. Const. art. VI, Paragraph 2

The Tenth Amendment to the U.S. Constitution reads:
The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people.

Submitted by the office of Representative Wes Keller quoting the Constitution of the United States.

Executive Orders

Dateline: 12/18/97

Executive Orders Defined
An Executive Order (EO) is a directive issued to executive-level agencies, department heads, or other employees from the President under the President's statutory, or constitutional powers. In many ways, the EO is similar to written orders, or instructions the president of a corporation might send to department heads or directors.Thirty days after it is officially published in the Federal Register, an EO becomes law. While the EO does bypass the U.S. Congress and the standard legislative law making process, no part of an EO may be illegal or unconstitutional. The first EO was issued in 1789 by none other than George Washington. Not until 1907 were EOs given official numbers.

Reasons for Issuing an Executive Order
Presidents typically issue an EO for one of these purposes:
1. Operational management of the executive branch
