3/10/11 HEARING ON VETERANS HOMELESS-NESS

<TARGET><BILL></BILL><SUBJECT>3-10-11 HEARING ON VETERANS
HOMELESSNESS</SUBJECT><COMM>SSTA27</COMM></TARGET>

ALASKA VETERANS FOUNDATION

Ending Chronic Veteran Homelessness in Alaska in Five Years
Anchorage Project (to be a pilot project/model for Alaska)

Amid all the customary rhetoric honouring military veterans on this Veterans Day, Alaska Beat would like to contribute a sobering statistic. According to a U.S. Department of Veterans Affairs estimate, cited by the National Coalition for Homeless Veterans, a mere eight percent of all Americans are military veterans, but nearly 20 percent of the estimated U.S. homeless population has served our nation's armed forces. We would add that out of the 20 homeless who have died on the streets in Anchorage this past 18 months, 5 were veterans.

If we are serious about ending veteran homelessness in five years, we cannot just do more of what we have been doing. Existing programs and approaches, as good as they are, have not solved this problem. We need new ideas, new approaches, and new partners willing to push the boundaries allowing the full inclusion of our homeless veterans "as they are" not as we wish they would be. First we must get them off the streets, and then we can start to help them find a new path. *Ric Davidge, Senate Testimony on ending veteran homelessness in Alaska.*

What: TWO New Projects:
We are requesting a one year predevelopment planning grant to support the Alaska Veterans Foundation, Inc. and its partners in creating two scalable and realistic model project plans in order to develop up to 70 single living units of permanent supportive housing in Anchorage. This predevelopment package is designed to be scalable for other areas of the state such as Fairbanks, the Mat-Su Valley, and large rural communities with sufficient homeless veteran populations to warrant such a facility/program

a) Housing First A **WET** harm reduction facility for chronic homeless veterans in Anchorage with application to other Alaskan communities. This is a 25 single living unit structure with offices and meetings rooms structured on the Housing First model. Although the location has not been finalized, we are working on securing an option for 5 acres in Eklutna adjacent to the 5 acres for VetCity. We have also located other options in this area. This co-location would enable staff cost savings as well as other program and facility efficiencies.

b) VetCity A **DRY** project based on the classic Honor Farm concept where residents work (are in training for work or working) no less than 6 days a week, and are then provided housing (up to 50 single, couple, small family cabins). No alcohol allowed. We provide direct integration into all of the trades through a relationship with Helmets to Hard Hats and other VA and state/federal DOL programs and labor organizations and the University of Alaska. The object is to provide an alcohol free, warm, safe environment that they contribute to (1/3 of their income) for as long as it may take to get them fully reintegrated into the work community anywhere in Alaska. Location is 5 acres in Eklutna.

Why? The Need: Although the annual VA Community Homelessness Assessment and Local Education Networking Groups (CHALENG) report to Congress has stated for some time that there are 600 homeless veterans in the area, after two years of effort we have not been able to independently confirm this "on the street" in Anchorage. We now know the 600 number is based on a VA formula. We have, however, confirmed, through the twice yearly Anchorage Homeless Connect and Stand Down events, about 80 to 100 unsheltered homeless veterans in need at a time. Of this group we believe there are fewer than 50 chronic homeless veterans in serious need of long term supportive housing. Other communities across Alaska report homeless veterans, but no serious studies have provided, by community, a clear understanding of the demand for permanent supportive housing for homeless veterans. This project will work with the University of Alaska and others in an attempt to better profile these needs by community.

The Anchorage Mayor's Homeless Leadership Team (HLT) has also released (May 2010) its recommendations to the Mayor after 8 months of concentrated study by the most knowledgeable leaders on this issue in Anchorage. **Both of these projects are directly consistent with the recommendations of the HLT** to the Mayor. The predevelopment funds/work will provide essential planning for appropriate Housing First and VetCity site selections (Eklutna), physical and program project designs, and a sustainable financial plan for at least the first five years for every 25 unit system of Housing First and VetCity concept. This is a part of HLT recommendation of 200 single living units for the chronic homeless in Anchorage.

Why segregate Veterans?
Most veterans come with a shopping cart of services and benefits earned through service and sacrifice that are not available to nonveterans. This includes grants, per diem, and other services, so it makes sense to bring veterans together pooling these programs. Neither of these facilities will be exclusive for veterans, but they must have a minimum of **75%** veterans to qualify for most of the VA, HUD, and DOL funding sources applicable. Furthermore, there is a long standing and well understood benefit to sitting veterans down together who have shared common experiences (combat and other) to work through their individual issues toward the goal of being a fully functional and appropriate member of the community.

VA National 5 year Program to end Veteran Homelessness
These two projects are within the scope and purpose of the new US Dept of Veteran Affairs national 5 year plan. The VA Secretary is fully committed to meeting veterans "as they are and as them come to us" which is a significant change in the approach of the VA to this challenge. We are members of the **National Committee to End Veteran Homelessness** through the Vietnam Veterans of America and the **National Coalition for Homeless Veterans** and therefore have ongoing direct access to the highest levels of the VA in Washington D.C. including the White House and the key Members of Congress and their staff who are supportive of this national initiative. We meet with and brief these offices and Members quarterly when in Wash DC for meetings.

Existing VA Programs/facilities: Although the Anchorage VA provides an excellent statewide 50 bed Domiciliary (at C & Benson, Anchorage) for recovering (alcohol/drug) homeless veterans which has good success, their barriers to entry, waiting list, failure rate, and recidivism clearly indicate the need for additional beds and a different approach for some vets. In our direct interviews with chronic homeless veterans we find them often unwilling to enter the Domiciliary for a host of reasons. The development of a Housing First facility and VetCity under a loose working partnership of the VA, Veterans Industries, the Municipality of Anchorage, some

Veteran Service Organizations, Trade Union apprenticeship programs, the Alaska Department of Labor, the University of Alaska, etc addresses those concerns.

Given the obvious relationships between this proposal and the existing VA Domiciliary program, we believe that adding these two new models to our community will actually allow the VA Domiciliary to be even more successful with those veterans that choose the VA Domiciliary model while allowing veterans unwilling to accept the Domiciliary concept to find success in our Housing First or VetCity models. The overarching goal of eliminating veteran homelessness is the same, the process and philosophy just a little different with these two additional approaches. Again, it's about meeting veterans "as they are" and then helping them make the appropriate choices that will enable them to be successful in the community.

The VA Community Homelessness Assessment and Local Education Networking Groups (CHALENG) report annually confirms that the VA needs additional facilities for this hard to serve population. We believe, consistent with the Mayor's Homeless Leadership Teams recommendations, that we need new beds in both a Housing First harm reduction model and a longer term supportive housing model like VetCity. These are both a little different then the domiciliary model, because they are designed to meet veterans "as they come to use" many of whom will not use VA programs for a range of reasons. In addition, Mayor Sullivan has expressed strong support for an approach that would build on the old Honor Farm concept. VetCity is based on that specific approach, but with much more intense job integration.

The **VA Grants and Per Diem** program **does not fund** any planning for projects like this. We have contacted the Technical Assistance partnership in Boston referred to us by the Washington, D.C. office of the VA Grants and Per Diem Assistant Director. This group has provided important assistance in the development of this proposal and we anticipate them having a very active and appropriately critical role in the predevelopment work to be funded by this appropriation. The Foundation is not able to fund this predevelopment planning internally; however we are actively working our way through the matrix of issues such as site selection and facility design options under our existing budget and programs. We believe that in partnerships with other nonprofits and for profits, our attempt to identify other funding sources for the project will assist in the financial sustainability of both of these ventures. But we want to get started now, and this predevelopment grant will facilitate that better then any other option we have discovered.

Site: We are currently in negotiations with the private owner (Harry Johnson) for two sites of five acres each in Eklutna. The VetCity site has previously been improved as a potential trailer court and thus has a good gravel pad, well house/water, sewer, and electricity in and functional. This 5 acre tract is our first priority in starting up the VetCity with small cabins now in design by Builders Choice. We have reached an agreement (Dec 1, 2010) on a lease purchase for this tract and have begun making monthly payments consistent with that agreement. We are confident that with the predevelopment appropriation we can leverage that commitment to secure the full purchase cost (under $400,000) for this 5 acre tract.

The second site for the Housing First model is directly adjacent to the 5 acres now under agreement. The owner is the same, and a veteran, who wants to work with us in the acquisition of this additional 5 acres once we have a full plan in place – that will be developed using this grant.

Why Eklutna? Given the community concerns raised with the municipal discussion around the "Red Roof Inn" Housing First project – although eventually approved, we decided to locate away from Anchorage neighborhoods. Although we originally wanted to locate adjacent to the new VA Clinic and joint hospital, land was not available for that option. This was not just in consideration of the NIMBY problem but also in the best interest of the veterans in our program as it keeps them from reconnecting with negative influences. We believe it critical that we provide a significant space/time barrier between our location and the "4th Ave subculture" that so often draws recovering veterans back to the street. The Eklutna location is perfect. Out of sight and out of mind, but only 20 minutes van ride to the VA Clinic/Hospital in east Anchorage just off the Glenn Highway and Muldoon Road.

Consistent with our statewide approach, we have a representative from Fairbanks participating in our planning team as the Housing First concept/design is to be scalable for possible development in other communities across Alaska. This will allow other locations across Alaska to trailer on our work and not have to start from zero. We believe this imperative if we are to meet the five year target for ending veteran homelessness in Alaska.

Occupants: Although communities talk about ending homelessness in a generic form, there is a significant difference between the "homeless" and the "chronic homeless." We know that the chronic homeless use a disproportionate amount of our community services and are generally regarded as "the homeless" in general conversation. But we also know that the majority of homeless persons/families are being adequately served with the existing transitional systems, programs, and facilities in Anchorage and in some other communities. Honestly addressing the "chronic" homeless veteran problem, most all with substance abuse combined with serious mental challenges and in some cases physical disabilities, is much more difficult. We believe it requires new approaches. The Housing First harm reduction model has now been proven in a number of communities across America. We think it's time we offered this proven program here in Anchorage and then across Alaska targeted toward veterans. Furthermore, the honor farm concept was a proven program for decades across America. We believe it can still work and our discussions with homeless veterans, the Anchorage Police Department, the Anchorage Fire Department and with lots of other providers gives us great hope that by combining these two programs in Eklutna we can realize the goal of ending homelessness for our Alaska veterans in 5 years. We also believe VetCity embraces the new "Healing Camp" programs developed by the Alaska Mental Health Trust and in operation in some rural communities. The Healing Camp program allows VetCity to directly meet cultural issues within our homeless veteran community.

Concept: Using the **Housing First - harm reduction model,** this project will likely be some form of loose **partnership** which we hope to have codified by an MOU between the VA/Anchorage and the Alaska Veterans Foundation, Inc. and its partner VetCity, Inc as well as some National Veteran Service Organizations – if they choose to participate - and other partners. Other than the Foundation, the Vietnam Veterans of America have committed to support this venture. We will continue to invite other NVSO's into this effort, but frankly their participation is not likely unless we show substantive commitments and progress. Approval of this grant will help us leverage wider participation. The Alaska Veterans Foundation & VetCity will play the role of developer and owner/manager of this Housing First Project and VetCity. The project will provide permanent supportive housing designed specifically for chronically homeless veterans. We believe that other national veteran service organizations should provide and collectively support a nationally accredited Veteran Service Officer on site no less than part-time and hold regular/monthly meetings in the common areas to help reintegrate these veteran tenants back

into, at least, the veteran community. The Vietnam Veterans of America, Anchorage Chapter 904 and its state and supportive national offices have made this commitment. We also think it important, consistent with their means and ability, that each veteran service organization in the community makes some annual financial commitment to the ongoing support of this project. We do not wish to in any way imply this commitment to be anything other than voluntary. This strategy will then, for the first time, actually reintegrate our chronic homeless veterans with their brother and sister veterans in our community. **This is an important part of this strategy.** That through our collective effort, as national veteran service organizations; we stand as a family of veterans in support of our bothers/sisters. The reason VVA has already made this commitment is their motto: ***"Never Again will One Generation of Veterans Abandon Another."*** Both the Housing First and VetCity concepts continue that commitment.

Based on existing successful models in other states/communities, the Alaska Veterans Foundation, Inc. and VetCity Inc. proposes to develop and operate one veteran-specific purpose built Housing First project comprised of 25 single living units (15 doubles, 10 singles). Included in this structure would be a common area space for the resident manager, small group room, and NVSO office. The Alaska Veterans Foundation, Inc. and VetCity, Inc. plan to develop this project as an operating example that can be replicated in other communities in whole or in part across Alaska, therefore the design and financing of these facilities needs to be scalable for application in other communities, such as Fairbanks. The Anchorage facility/program should function as a working model to assist other communities in understanding and developing their own facilities/programs given sufficient needs and partnerships.

Furnishings will be provided under a contract with VA/Veteran Industries (VI) located at the Anchorage VA Domiciliary based on the *All-A-Board Solid Pine Furniture* designs or something comparable. Veteran's Industries in Anchorage is more then capable of building this furniture in their existing wood shop at the Domiciliary and this work would provide appropriate training and critical income to veterans in recovery within the VI program.

Once completed, these two projects should provide 75 permanent supportive housing units (25 in housing first, and 50 in VetCity) in either a supportive, harm reduction, housing first strategy based on proven need and the successful Housing First models in Seattle, New York, Denver, and Boston or the classic Honor Farms of old. We believe both provide a place and service not now available to veterans in our community or in Alaska.

Services: The medical, mental health, and other "services" needed by the veteran tenants of these projects will be immediately available at the VA clinic/hospital in Anchorage through van transport. Facility and Case managers will be located on site or in coordination with the VA programs in Anchorage.

Transportation: There will be a need for ongoing transportation in and around Anchorage. The driver for this van or small bus should be provided under contract with Veterans Industries located at the Domiciliary in Anchorage. Grants are available to cover the purchase and operation of this vehicle. Optionally, residents who can qualify in VetCity can provide this service through work contacts.

Funding Options:

A. One Year Money (Predevelopment Planning Funds)

- **Predevelopment Budget**
  - Site plan/design/appraisal $ 75,000
  - Architectural and Engineering $100,000
  - Legal, Accounting $ 30,000
  - Environmental Assessment $ 15,000
  - Financial feasibility/underwriting $ 20,000
  - Project Management $ 60,000

  TOTAL $300,000

Property Acquisition

Available two 5 acre parcels in Eklutna currently owned by Harry Johnson. One improved and one partially improved. We have an independent appraisal in process on the partially improved tract and a lease purchase agreement in hand. The estimated purchase price for the first 5 acre partially improved tract is $380,000. We are now working on a purchase and site clean up strategy for the adjoining 5 acre improved site.

The final project design, budget, etc will be completed within one year for submission to the project's various partners and the US House and Senate Veteran's Affairs Committees and the VA (at all levels), the State of Alaska, and prospective partners for physical plant and operational funding. Once funded, the project will be contracted out for construction to SDVOB or Veteran Owned Businesses who must then work with VA Veteran's Industries in all hiring who often have experienced crafts persons in recovery.

B. Development Budget - No Year Money (planning, build, operate)

We wish we could give you an amount so we could get the project funded up front, do the planning and project development, then build both and open them, but there are just too many variables and the design, cost of materials, labor, site cleanup and development will take some time to develop a detailed development and operating Proforma budget. In addition, the Alaska Veterans Foundation, Inc. will need to asses and develop a financing sustainable model/plan incorporating a range of public and private resources to develop and operate these innovative permanent supportive housing projects. Further is the time needed for coordination with the local VA management and programs, and the leadership of the various Veteran Service Organizations through formal MOU's as well as all trade unions, the University of Alaska, the King Career Center, and other job training companies.

Our experience, however, is that unless there is a project and money committed to at least its planning with specific pre-development activities, it's very difficult to get this moving forward just as a concept. We believe these planning funds help give credibility to these two projects sufficient to leverage VA, NVSO, and other provider (private and public) commitments in cooperation.

These projects must be coordinated with the Municipality of Anchorage Coalition on Homelessness who support this request and the MOA Military and Veterans Affairs Commission, the Veterans Administration Homeless Programs, the Municipality of Anchorage including APD and AFD, the Vet Center, the VA Domiciliary, the VA Clinic and joint hospital as well as other local and statewide groups working in the homeless community to ensure appropriate coordination and identification of potential veteran tenants. We therefore believe it

very appropriate that these funds be appropriated through the Municipality of Anchorage, Homeless project. We have discussed this option with the Director of this program and find them more than willing to oversee these funds to ensure they are appropriately spent consistent with the direction of Congress.

After years of study and struggle to understand the failures of our transitional systems for our homeless veterans, we believe it is now time to offer these two programmatic alternatives - proven in other communities, to help end veteran homelessness in Anchorage and then across Alaska. This is the start, this is the opportunity, and the Foundation on behalf of its Board and that of VetCity is pleased to submit this request in an effort to get these concepts moving forward for all of us and our homeless veterans.

It is an honor,

Ric Davidge, Chairman
Alaska Veterans Foundation, Inc.
VetCity, Inc.

March 10, 2011
Senate State Affairs Committee

Testimony by Ric Davidge

What should be the role of the State of Alaska in ending veteran homelessness?

The US Secretary of Veterans Affairs and this federal administration have made this a top, secretarial and White House priority. They have announced a five year plan, a PowerPoint presentation of which is included in this packet. This sets up an opportunity for the State of Alaska to leverage federal interest and funds into addressing this national embarrassment.

Why veterans? Because they've earned it!

In addressing this challenge there are a number of up front questions the state needs to address:

- **How many homeless veterans are there in Alaska?**
  - This is a very interesting question, but honestly, we don't know
  - We do know that the US Dept of VA has been claiming in their annual report to Congress that there are an estimated 600 homeless veterans in Alaska.
  - We have not been able to verify this number on the ground in Anchorage
  - We think the number is much closer to about 100 at any time, based on
    - Twice annual Point-In-Time Counts (2011 report enclosed)
    - VA reports on actual veterans in their Domiciliary facility in Anchorage
    - Annual Stand Downs (for homeless veterans) in Anchorage

- **Where is the best place in Alaska for us to start addressing this challenge?**
  - One thing we do know is that Anchorage is the homeless capital of Alaska
    - This has been confirmed annually by the twice annual Point-In-Time Counts across the state
    - The Municipality of Anchorage has a very good plan to end homelessness
      - The Mayor's Leadership Team reviewed all issues, plans, and programs and provided the mayor a series of recommendations that will help end homelessness.
    - The Anchorage Coalition on Homelessness is a very active and functional organization of over 40 entities involved in providing some type of service for homeless Alaskan's
    - The Alaska Veterans Foundation, Inc. (well known 501c3) in partnership with VetCity, Inc. (a new 501c3) has developed and presented a proposal for the purposes of developing two facilities w/programs to end veteran homelessness in 5 years. This plan has been supported by dozens of local, state, and national organizations.

- **What should the state really do in addressing this challenge?**
  - Understand the challenge
  - Craft solutions that are responsive to the need and responsible in cost
  - Consider an active role for the AK Dept of Mil & Vet Affairs in this endeavor
    - AKNG training projects (medical, construction, etc)
    - The military academy (projects)
    - VSO services/assistance
  - Support the Alaska Veterans Foundation, Inc. proposal to get started ($300,000)
  - Provide structural support for identified solutions
    - Enable the direction of "profits" from the AHFC back into low income housing consistent with the mission of that agency.
      - Give state priority of ending veteran homelessness

- **What is the US Dept of Veterans Affairs doing about this challenge in Anchorage now?**
  - One of the oldest programs of the federal government is the Domiciliary. This facility, on C and Northern lights in Anchorage, provides a safe warm place for homeless veterans who are addicted/homeless, to work through a X month program to get clean/sober and ready for reintegration.
  - Up till recently, some of the rules of the "Dom", cause many to fail and go back on the street. The Dom has made significant improvements on retention now, but where do they go after the Dom? The VA has been asking for help here for years in their annual report to congress. The AK Vet Foundation proposal provides an alternative to the Dom with Housing First and more beds/doors for long term supportive housing.
  - Many come back in a few months and go though the program again and again. We think the AK Vet Foundation proposal provides the essential and missing long term supportive housing that will keep them off the street and making better choices.

- **Why are so many veterans homeless?**
  - We are the 8%. That is the percentage of Americans who have stood guard for America and advanced the notion of human freedom in many parts of the world
  - 25% of those homeless who died in Anchorage these past two years, were veterans
  - The Point-In-Time Count suggests that veterans make up about 15% to 20% of the homeless in Anchorage, but again only 8% of the population.
  - Well over 65% of all homeless veterans suffer from some level of mental disorder
  - Almost all suffer from both mental disorders and alcohol or drug additions. There way of self medicating their pain.

- **What do we need in facilities and/or services that are not now available?**
  - The VA Dom is working well within its structural limits, but
  - We need **long term supportive housing**, a need annually mentioned in the VA annual report on their efforts to end homelessness in Anchorage, and
  - **Housing First for veterans**
    - The Alaska Veterans Foundation, Inc. and VetCity, Inc. have prepared a proposal that is supported by dozens of local, state, and national organizations toward providing just these two facilities. Copy provided.

- **What are some suggestions on what the State of Alaska should do to help end veteran homelessness in the next five years?**
    - Initiate a statewide plan towards ending veteran homelessness in five years that is complementary to the federal plan. This should allow Alaska to leverage federal dollars that can support components of the state's effort.
        - The Alaska Housing Finance Corporation is the appropriate entity to head this up in partnership with the Municipality of Anchorage and the Alaska Veterans Foundation, Inc and the US Dept of Veterans Affairs.
        - Once a proven pilot is up and running, it would make sense to provide the designs, financial sustainability plan, etc to other communities such as Fairbanks who have homeless veterans
    - The Alaska Veterans Foundation, Inc. in partnership with VetCity, Inc **is the only proposal on the table** and has been the only one on the table for 2 years. The State of Alaska should support this proposal for the $300,000 in predevelopment funds to advance both the Housing First and Long Term Supportive Housing projects they have developed.
        - This then sets up a review of all plans, facility designs, etc in the next legislative session for the purpose of considering additional support for:
            - The professional development of a five year financial sustainability plan consistent with the VA and HUD programs on homelessness
            - The acquisition of land (two tracks = 10 acres/under lease/purchase agreement now)
            - Site preparation and development for both facilities
            - Construction of the Housing First (25 unit) facility
            - Construction of the first 20 Long Term Supportive Housing cabins
            - Support for VA and HUD grants that will provide
                - Vouchers for homeless veterans that will help cover the cost of facility operations
                - VA grants for "Grants and Per Diem" that can cover up to 65% of the cost of construction of these facilities and help pay for the day-to-day operation of these facilities
                - VA/HUD grants that will cover the cost of acquisition and operation of two 20 passenger busses to move veterans from the facilities in Eklutna to the VA Clinic/hospital, educational facilities such as trade union halls, etc.

So the question today is, what should the role of the State of Alaska be in helping end veteran homelessness?

We hope we have provided you some context around which you can discern an appropriate and immediate state effort to end veteran homelessness.

- Ric Davidge — Homelessness
- Trevor Brandeshu, Trevor Storrs - Co-Chair, ANC Coalition
- 600 homeless vets in AK

- What is State's Role in dealing w/ Vets' Homelessness

Trevor → "Need to make $19/hr for 40 hrs to pay for 2 bR Apt."

- 524 Vets at Brother Francis.
- 259 homeless vets in ANC

- 3,053 Vets below poverty line.
  - ✱ Total Vet homeless + in region

  Anc. - 145 ; ~~State~~ 259

- Cost of Homeless in ANC
  - Seattle - $100K - $150K / person - chronic homeless
  - Project Homeless - $20K - $25K

- Beacon Hill -- City Council

✱ Top 2 or 3 things we could do:
1. Ric - $300K from budget to leverage
2. Utilize AHFC -- create Housing Trust.
3. Supportive Services

What should be the role of the State of Alaska in ending veteran homelessness?

The US Secretary of Veterans Affairs and this federal administration have made this a top, secretarial and White House priority. They have announced a five year plan, a PowerPoint presentation of which is included in this packet. This sets up an opportunity for the State of Alaska to leverage federal interest and funds into addressing this national embarrassment.

Why veterans? Because they've earned it!

In addressing this challenge there are a number of up front questions the state needs to address:

- **How many homeless veterans are there in Alaska?**
  - This is a very interesting question, but honestly, we don't know
  - We do know that the US Dept of VA has been claiming in their annual report to Congress that there are an estimated 600 homeless veterans in Alaska.
  - We have not been able to verify this number on the ground in Anchorage
  - We think the number is much closer to about 100 at any time, based on
    - Twice annual Point-In-Time Counts (2011 report enclosed)
    - VA reports on actual veterans in their Domiciliary facility in Anchorage
    - Annual Stand Downs (for homeless veterans) in Anchorage

- **Where is the best place in Alaska for us to start addressing this challenge?**
  - One thing we do know is that Anchorage is the homeless capital of Alaska
    - This has been confirmed annually by the twice annual Point-In-Time Counts across the state
    - The Municipality of Anchorage has a very good plan to end homelessness
      - The Mayor's Leadership Team reviewed all issues, plans, and programs and provided the mayor a series of recommendations that will help end veteran homelessness
    - The Anchorage Coalition on Homelessness is a very active and functional organization of over 40 entities involved in providing some type of service for homeless Alaskan's
    - The Alaska Veterans Foundation, Inc. (well known 501c3) in partnership with VetCity, Inc. (a new 501c3) has developed and presented a proposal for the purposes of developing two facilities w/programs to end veteran homelessness in 5 years. This plan has been supported by dozens of local, state, and national organizations.

- **What should the state really do in addressing this challenge?**
  - Understand the challenge
  - Craft solutions that are responsive to the need and responsible in cost
  - Provide structural support for identified solutions
    - Enable the direction of "profits" from the AHFC back into low income housing consistent with the mission of that agency.
      - Give priority of ending veteran homelessness

- **What is the US Dept of Veterans Affairs doing about this challenge in Anchorage now?**
  - One of the oldest programs of the federal government is the Domiciliary. This facility, on C and Northern lights in Anchorage, provides a safe warm place for homeless veterans who are addicted to work through a X month program to get clean/sober and ready for reintegration.

- But often the rules of the "Dom" as it is called, cause many to fail and go back on the street.
- The recidivism rate of our Dom is %. Many come back in a few months and go though the program again and again. So what is needed?

- **Why are so many veterans homeless?**
  - We are the 8% That is the percentage of Americans who have stood guard for America and advanced the notion of human freedom
  - 25% of those homeless who died in Anchorage these past two years, were veterans
  - The Point-In-Time Count suggests that veterans make up about 15% to 20% of the homeless in Anchorage
  - Well over 65% of all homeless veterans suffer from some level of mental disorder
  - Almost all suffer from both mental disorders and alcohol or drug additions. There way of self medicating

- **What do we need in facilities and/or services that are not now available?**
  - The VA Dom is working well within its structural limits, but
  - We need **long term supportive housing**, a need annually mentioned in the VA annual report on their efforts to end homelessness in Anchorage, and
  - **Housing First for veterans**
    - The Alaska Veterans Foundation, Inc. and VetCity, Inc. have prepared a proposal that is supported by dozens of local, state, and national organizations toward providing just these two facilities. Copy provided.

- **What are some suggestions on what the State of Alaska should do to help end veteran homelessness in the next five years?**
  - Initiate a statewide plan towards ending veteran homelessness in five years that is complementary to the federal plan. This should allow Alaska to leverage federal dollars that can support components of the state's effort.
    - The Alaska Housing Finance Corporation is the appropriate entity to head this up in partnership with the Municipality of Anchorage and the Alaska Veterans Foundation, Inc and the US Dept of Veterans Affairs.
    - Once a proven pilot is up and running, it would make sense to provide the designs, financial sustainability plan, etc to other communities such as Fairbanks who have homeless veterans
  - Support the proposal from the Alaska Veterans Foundation, Inc. in partnership with VetCity, Inc. for the $300,000 in predevelopment funds to advance both the Housing First and Long Term Supportive Housing projects they have developed.
    - This then sets up a review of all plans, facility designs, etc in the next legislative session for the purpose of considering additional support for:
      - The professional development of a five year financial sustainability plan consistent with the US VA and HUD programs on homelessness
      - The acquisition of land (two tracks = 10 acres/under lease/purchase agreement now)
      - Site preparation and development for both facilities
      - Construction of the Housing First (25 unit) facility
      - Construction of the first 20 Long Term Supportive Housing cabins
      - Support for VA and HUD grants that will provide

- Vouchers for homeless veterans that will help cover the cost of facility operations
- VA grants for "Grants and Per Diem" that can cover up to 65% of the cost of construction of these facilities and help pay for the day-to-day operation of these facilities
- VA/HUD grants that will cover the cost of acquisition and operation of two 20 passenger busses to move veterans from the facilities in Eklutna to the VA Clinic/hospital, educational facilities such as trade union halls, etc.

FOOD FOR THOUGHT

- In 2009, at any given time,1,275 at-risk households in Anchorage were on AHFC's waiting list for housing
- In 2009, 1,765 households were homeless on any given night in Anchorage; 468 of these households included children
- At an August 19, 2010 Legislative Health Caucus, every presenter stressed the need for more affordable housing in Anchorage, including transitional, supportive & low-barrier
- Between 1982 & 2010 in Anchorage:
    1. Medical costs rose 418.6%
    2. Energy costs 258.8%
    3. Housing costs 174.4%
    4. All other costs 194.4%
    5. Minimum Wage rose 101.36% ($3.85 vs. $7.75)
    6. Average Monthly Wage rose 86.65% ($2,209 vs. $4,121-2009 number)
- In order to adequately address homelessness in our community, Anchorage needs an adequate, sustainable inventory of affordable housing, including permanent, transitional, supportive and low-barrier, encompassing rental and home ownership opportunities (Mayor's Homeless Leadership Team May 2010)

What Can You Do?

- Educate: Yourself and others regarding Homelessness in our community & state
- Advocate: For programs & funding with local, state & federal policy makers & elected officials
- Volunteer: At a shelter, food bank, or with a non-profit or faith based organization

VETERAN HOMELESSNESS PREVENTION PLATFORM

In October 2006, the National Coalition for Homeless Veterans (NCHV) participated in the National Symposium on the Needs of Young Veterans hosted by AMVETS in Chicago. As a subject matter expert on veterans at risk of homelessness, NCHV engaged in discussions with community-based service providers to identify the most critical needs of veterans returning from Operations Iraqi Freedom and Enduring Freedom (Afghanistan), and their recommendations on government and community interventions that would reduce those veterans' risks of becoming homeless.

The U.S. Department of Veterans Affairs, Department of Labor and their community-based service partners represented by NCHV have developed a nationwide network of assistance programs that has reduced the number of homeless veterans on the streets of America by more than 40% since 2005. The Chicago symposium, however, was one of the earliest national assemblies convened to explore strategies to prevent homelessness among combat veterans returning from war. The insights, client challenges and recommendations of those service providers still serve as the foundation of a comprehensive Veteran Homelessness Prevention Platform.

The recommendations in this document do not necessarily represent NCHV's position on specific legislative initiatives, but are presented to help frame the discussion and development of an effective veteran homelessness prevention strategy.

Causes of Homelessness

Homelessness is the end result of problems that an individual cannot resolve without assistance. Generally, these problems can be grouped into three categories – health issues, economic hardships and lack of affordable housing.

These issues impact all homeless individuals, but veterans face additional challenges when trying to overcome these obstacles: prolonged separation from traditional supports such as family and close friends; highly stressful training and occupational demands that can affect their personality, self esteem and ability to communicate with people in the civilian sector after their separation from military service; and non-transferability of some military occupational specialties into the civilian work force.

NCHV believes the key to veteran homelessness prevention is to help service members plan for their separation from the military – accounting for their health, employment and housing needs – well before their discharge. Just as critical is providing access to assistance to veterans who need help before they lose control of their lives and, ultimately, their homes and families.

Health Care Initiatives

Mental Health – The VA reports that nearly 30% of the veterans of Iraq and Afghanistan who have sought VA medical care since separating from the military have exhibited potential symptoms of mental and emotional stress. Close to one-half of those have a possible diagnosis of post-traumatic stress disorder (PTSD).

Of equal concern was the Government Accountability Office (GAO) report that a large percentage of Iraq War veterans whose Post-Deployment Survey responses indicated they were at risk of developing PTSD were not referred to Department of Defense or VA facilities for mental health screening and counseling *(GAO Report, May 16, 2006)*.

Primary and Long-term Rehabilitative Care – While the VA has greatly increased the capacity and services of its nationwide health care system, many communities are under-served by VA programs.

Many low-income veterans cannot afford health insurance, and many small and independent businesses do not offer health insurance coverage. These veterans and their families are one major medical problem removed from severe economic hardship that may, and often does, result in an increased risk of homelessness.

Recommendations:

- There should be a national "open door" policy that ensures access to immediate primary and mental health services to OIF/OEF veterans for five years after discharge in (1) areas that are under-served by VA facilities, (2) for immediate family members of OIF/OEF veterans, and (3) for long-term rehabilitative care. Fee-for-service policies, contracts with approved community and private health care providers in under-served areas or those with insufficient VA capacity to meet demand, and reimbursement by VA to those care providers must not place additional burdens on OIE/OEF veterans and their families.

- All VA medical centers and community-based outpatient clinics (CBOC) should have access to emergency mental health services on a 24/7 basis, whether on site or through approved community mental health programs. This critical support must be real-time, face-to-face.

- Implement universal enrollment in the VA Health Care System ***before*** discharge from active duty status, including eligible National Guard and Reserve personnel deployed to Iraq and Afghanistan. Ensure that a copy of a service member's medical records be transmitted to the VA Medical Center serving that veteran's home of record.

- All service members separating from active duty after deployment to Iraq, Afghanistan, or any combat theater, should receive mandatory mental health assessments and be screened for possible traumatic brain injury (TBI), Hepatitis-C, TB, HIV and other illnesses ***before*** discharge. Follow-up mental health assessments should be mandatory at six-month and one-year intervals after discharge. The VA medical center serving the veteran's home of record should be responsible for ensuring these follow-up assessments are scheduled, and recording the veteran's response.

- Service members who, on their Post-Deployment Assessment surveys, are identified as exhibiting signs of emotional or mental strains that could increase their risk of developing PTSD should be advised of that fact so they may ask for and receive proper supports to reduce that likelihood.

- National Veteran Health Insurance Program – Create a program based on a premium sliding scale to make health insurance available and affordable to all veterans and their families regardless of income status.

- Require the VA and Department of Defense to produce public service announcements (PSA) for television, radio, newspapers and magazines informing veterans where they can find assistance, coined as a benefit earned through their military service. Many veterans have no idea what benefits or assistance they are eligible for after their discharge; some are unsure of their veteran status.

- Congress should ensure funding of the VA "Resource Call Center" so that veterans – and their family members – who need assistance receive accurate, helpful information and referrals to VA and community resources in their area on a 24/7 basis.

Income Supports

For young veterans, economic hardships usually involve employment issues and mounting debt. The cost of housing in most communities makes it unlikely that a single wage earner will be able to afford a comfortable and safe rental unit. The recent housing crisis and economic downturn conspire against younger veterans in terms of both housing cost burden and employment security. Though many military occupations prepare veterans for the workforce, many combat arms specialties do not, and this affects younger OIF-OEF veterans more than other age cohorts.

According to an analysis of 2000 Census data performed by Rep. Robert Andrews (D-NJ) in 2005, about 1.5 million veterans – nearly 6.3% of the nation's veteran population – have incomes that fall below the federal poverty level, including 634,000 with incomes below 50 percent of the poverty threshold. Many of these veterans have no health insurance or access to education or training programs to increase their earnings potential.

OIF/OEF veterans are entitled to return to their pre-deployment jobs and pay scale under USERRA protection after their discharge, but increasingly many jobs are disappearing because of layoffs and business failures. Veterans who cannot find other employment quickly are in imminent danger of becoming dependent on shared living arrangements or becoming homeless.

Recommendations:

- Expand and Increase Funding for the Jobs for Veterans Act – The Jobs for Veterans Act enables the Department of Labor to provide veterans with employment preparation assistance and job placement services. There are nearly 2,500 employment specialists working with veterans through the Veterans Employment and Training Service (DOL-VETS). Disabled Veteran Outreach Program (DVOP) specialists help homeless veterans and those at-risk of becoming homeless find gainful employment; and Local Veteran Employment Representatives (LVERs) identify employers who are willing to hire veterans. The Act requires that federal contractors and government agencies give veterans a preference in their hiring policies. Additional funding would increase the number of DOL-VETS employment specialists in the field, create more job opportunities for veterans returning from Iraq and Afghanistan, and enhance the program's oversight and enforcement capabilities with respect to veteran preferences.

- Expand the Veterans Workforce Investment Program (VWIP) to all 50 states. Currently less than $8 million is distributed by the Department of Labor to 12 grant programs in select states to provide unemployed and under-employed veterans with job training and placement assistance. In view of the re-employment needs of OIF/OEF veterans during the current economic downturn, and considering young combat veterans are most impacted by that downturn, funds from the Recovery Act should be made available to VWIP programs in every state proportionate to the number of work-age unemployed OIF/OEF veterans in each state.

- Pass emergency legislation to provide unemployment compensation to OIF/OEF veterans who are not protected by USERRA (due to business failures and layoffs) at a percentage of their base military pay for a period of up to 12 months, rather than the current prevailing local rates. Employment protection is one of the guarantees that men and women consider when volunteering to serve in this nation's military – they should not be penalized for making that sacrifice.

- Implement a program through the Department of Veterans Affairs to provide grants to community organizations providing services to low-income veterans –and their families – in supportive housing. Eligible uses could include child care assistance, counseling and case

management, employment supports such as uniforms and training fees, transportation for VA appointments, emergency aid with utility bills, etc.

- Develop a federal certification project for certain trades and occupations that are readily accepted in the states, and DoD and VA should share the cost of certification for OIF/OEF veterans within one year after their discharge.

Access to Housing

According to the 2007 VA Community Homelessness Assessment and Local Education Networking Groups (CHALENG) Report, one of the highest-rated unmet needs among veterans in every region of the country is access to safe, affordable housing. This has been identified as a chronic community problem by many research and public interest groups, as well as government agencies and service providers.

Because of limited public assistance resources, access to public housing is usually subject to a priority system that favors single parents with dependent children, the elderly and persons with disabilities over veterans without an obvious substance abuse, mental illness or other disability. The reality is that in virtually every community in America there is a critical shortage of safe, decent affordable housing for individuals and families with low and extremely low incomes *(National Law Center on Homelessness & Poverty, National Alliance to End Homelessness, the council of Mayors, Harvard University, 2006)*. This becomes an even greater challenge in light of the more than 1.5 million veterans who live below the federal poverty level – about 6.3% of the men and women who have served in the military *(2000 U.S. Census)*.

Recommendations:

- Continue to increase the HUD-VA Supportive Housing Program (HUD-VASH) with another 20,000 Section 8 vouchers beyond the 20,000 funded since Fiscal Year 2008. The National Alliance to End Homelessness (NAEH) released an analysis of available data that showed up to 65,000 veterans could be classified as "chronically homeless." Those are veterans with serious mental illness, chronic substance abuse issues and other disabilities; and they will need supportive housing over a long period, many for the rest of their lives. At a 40,000 voucher level, only two-thirds of this special population would be served. Due to the time it would take to implement program expansion of this scale, reassessment of the need and the program's success would be ongoing and policy could be revised to reflect that data.
-
- Pass the Homes For Heroes Act – Originally introduced in the 110th Congress, in the House by Rep. Al Green (D-TX) and the Senate by Sen. Barack Obama (D-IL), this measure would make available to low- and extremely low-income veterans and their families 20,000 housing vouchers; fund grants to organizations providing services to low-income veterans in supportive housing; and create the position of Veterans Liaison within the Department of Housing and Urban Development to ensure the needs of low-income and homeless veterans are considered in HUD programs. The measure has been reintroduced in the House this year; a companion bill in the Senate has not yet been filed.

- Full implementation of the VA Enhanced Use Lease (EUL) "Mission Driven Housing" initiative – A critical piece of the strategy to develop supportive housing for homeless veterans and those at risk of becoming homeless. The VA has identified surplus or under-utilized properties at 49 sites that will be made available for project development and lease through a streamlined approval process. Thirty-four of those sites are for homeless housing projects only; the 15 others may include homeless housing and services in development proposals. Eight sites have been announced through the RFP process, the others will be announced as the VA is ready to proceed.

This is a historic initiative, and one NCHV believes will have a profound impact on reducing and preventing veteran homelessness.

- Create a national prime rate interest home loan program for OIF/OEF veterans – The VA home loan guarantee program has made home ownership a reality for millions of veterans. However, this program does little for young veterans with modest incomes. A special loan account, administered by a corporate partnership, to provide home loans at well-below market rate for OIF/OEF veterans would help these young veterans qualify for home ownership, allow them to build equity to strengthen their financial stability, and effectively reduce their risk of homelessness by reducing their mortgage payments. Funding institutions could be offered federal tax incentives to offset income loss due to the lower interest rates.

- Develop affordable housing programs for low-income veterans – Every community in the nation should incorporate into their 10-year plans a strategy to develop affordable housing stock to prevent homelessness among its low-income and extremely low-income individuals and families, with a set-aside for veterans in proportion to their representation in the homeless and low-income population estimates. Federal, state and local governments should develop incentives to drive this vital component of homelessness prevention through low-income housing tax credits; awarding of project-based Section 8 vouchers for approved developments; project funding support through the National Housing Trust Fund; formation of local and regional community land trusts; infusion of supportive services dollars through Community Development Block Grants and other funding streams; and tax credits for builders and contractors who work on these projects.

Anchorage Homeless Chronic Public Inebriate: An Overview

Homeless versus Homeless Chronic Public Inebriate

The issues of chronic public inebriation and homelessness are often perceived by the public as one in the same, but while they may have related issues, overall they include different demographics with distinct needs and different solutions.

According to the Alaska Homeless Management Information System and Alaska Housing Finance Corporation, the overall estimated homeless population (homeless - according to HUD definitions*) was 2,962 individuals as of January, 2009 (based on a single-night count). The Anchorage School District calculates that nearly 1,176 of those homeless are children[1].

Out of the single-night count 399 of the 2,962 homeless individuals claimed to be chronic alcoholics or substance abusers. This is a 38% increase from homeless chronic inebriate population estimates by UAA/BHRS in 2005[2].

Homeless Chronic Public Inebriate Activity Trends

The Anchorage Fire Department has collected data from the Community Service Patrol & Transfer Station (CSP&TS) and published the results in a *Summary and Analysis Report*[3]. This report is the most accurate source of information that the Municipality Of Anchorage has for assessing trends related to homeless chronic public inebriates.

This analysis shows that the activity at the CSP&TS has risen significantly in the past year.

Activity	2007	2008	Change 2007 - 2008
# CSP dispatch calls responded to	20,703	23,396	>13%
# Sleep-Off client intakes	20,463	23,104	>13%
# Unduplicated clients served	3,308	3,451	>4%
Average intake breath alcohol measure	.217	.277	>3%

Data reported by CSP&TS, also reveal a change in individual frequency of use between 2007 and 2008 at the Transfer Station.

Individual's Frequency Of Use	# Of Clients 2007	# Of Clients 2008		# Intakes 2007	# Intakes 2008
1 Intake	1,955	1,867		1,955	1,867

Totals	**3,308**	**3,451**		**20,463**	**23,104**

*The US Department of Housing and Urban Development (HUD) defines "homeless" as "those who lack a fixed, regular, adequate nighttime residence, including persons whose nighttime residence is a supervised public or private shelter designed to provide temporary living accommodations."

Anchorage Homeless Chronic Public Inebriate: An Overview

Homeless Chronic Public Inebriate Demographics

Overall, the gender of those served at CSP&TS in 2008 was: 78% male and 22% female. The ethnicities served at CSP&TS in 2008 were: 85% Alaska Native/American Indian; 12% Caucasian/White; 0.1% Black; 0.1% Hispanic; 2.8% Asian/Other/Unknown.

The Cost

Individuals who are homeless chronic alcoholics/substance abusers cost citizens of the Municipality of Anchorage and the community at large an increasingly high amount in money and resources each year. A breakdown of some of the costs for an individual is as follows:

One meal at Downtown Soup Kitchen[11] - $2.00
A day at Bean's Café[12] - $10.00
A night at Catholic Social Services Brother Francis Shelter[4] - $17.49
An intake at the CSP-Transfer Station[5] - $65.00
A day in an emergency room bed[7] - $101
A night in Jail or Prison[6] - $126.04
A day with a case manager[10] - $180.00
A day in a residential treatment bed[8] - $250.00 - $375.00
A day in a detox bed[9] - $400.00 - $500.00

Exact costs to society are challenging to calculate, such as the cost for APD to respond whenever they get a "man down" call, which may be an individual sleeping on the ground and supersedes all other dispatches, including suspected robberies, rapes, etc. Or, businesses that may be affected in ways such as, having to use company time to clean up the parking lot littered with empty liquor bottles.

Increased Crime Rates

In addition to the escalating trend that Anchorage has seen year-after-year with the homeless chronic public inebriate population, the APD Special Victims Unit (SVU) has seen an increase within the past year of reported sex crimes. Most sexual assaults have involved individuals (both victim and suspect) who are extremely intoxicated from alcohol and who are often homeless.

Conclusion

The issues of homeless chronic public inebriates, is not new to Anchorage. Rather than managing or simply reacting to these issues, the goal needs to be to end chronic alcohol/substance abuse and homelessness in our city and our community. To accomplish those ends requires working to: 1) Reduce deaths amongst chronically homeless inebriates 2) Reduce violence to and among the chronically homeless inebriates and 3) Reduce neighborhood impact from chronically homeless inebriates[13].

Services Provided

- Screening and early intervention
- Comprehensive assessment, treatment and continuing care by experienced staff
- Complete medical evaluation and primary and specialty medical care
- Mental health services, including PTSD treatment
- Problem solving group therapy
- Relapse prevention and substance refusal skills training
- Motivational enhancement
- Individual counseling
- Vocational Rehabilitation and employment services
- Big Book and Step Study groups
- Spiritual counseling
- AA, NA and AlAnon meetings
- Educational videos and discussion
- Family recovery interventions
- Consultation from professional medical center staff to address individual needs
- HUD/VASH Program assistance
- Grant Per Diem Program assistance
- Community network and housing re-integration services
- Homeless Veteran Outreach
- Veterans Justice Outreach
- Health Care for Re entry Veterans
- Supported Employment Program
- Homeless Veteran Supported Employment Program
- Programs are currently staffed in Anchorage and Fairbanks

Homeless Veterans Programs

FAX: (907) 273-4049

The Homeless Program are accredited by the Joint Commission and CARF.

Homeless Veterans Programs

The homeless program offers comprehensive psychosocial rehabilitation and healthcare services to eligible veterans who are homeless or whose mental health and/or substance abuse problems place them at risk for homelessness.

Referrals

Referrals may be made by physicians, employers, and other professionals as well as family members or patients themselves.

How to Contact Us

Call locally (907) 273-4000 . . . . or
Toll-free (800) 764-2995

Our Programs

Outreach Program provides a variety of community-based services with an emphasis on identifying and motivationally engaging veterans who may benefit from the services and programs of the HVS.

Domiciliary Care for Homeless Veterans provides a comprehensive biopsychosocial assessment and individualized solution-focused treatment plan that the resident actively pursues with the support and guidance of his/her case manager, the interdisciplinary treatment team, and other residents who function in the context of a therapeutic community.

Compensated Work Therapy Transitional Housing Program provides structured and supervised therapeutic housing in the community for at-risk and homeless veterans.

Compensated Work Therapy provides psychosocial rehabilitation services with a primary focus on vocational rehabilitation and employment services. Services include compensated work therapy, transitional work experience, and supported employment.

HUD/VA Supported Housing is a joint initiative between the Department of Housing and Urban Development and the Department of Veterans Affairs. This program provides housing vouchers to supplement the veteran's income to make it possible to afford adequate housing. A case manager also assists clients in establishing and maintaining successful independent living.

Grant and Per Diem Program is a partnership in which the VA pays a per diem rate for Veterans engaging in treatment with partner agencies in the community.

Health Care for Reentry Veterans/Veterans Justice Outreach is a new initiative engaging Veteran involved with the corrections system to prevent legal issues from escalating into homelessness.

Compensated Work Therapy Supported Employment works with Veterans with serious mental illness for rapid job placement and on-going support.

Homeless Veterans Supported Employment Program works with currently homeless Veterans for rapid job placement and on-going support.

Mission

Promote a healthy economy, strong communities, and protect consumers in Alaska.

Core Services

- Coordinate, develop and promote programs for sustainable economic growth.
- Regulate and enforce to protect the consumer and to provide a stable business climate.
- Assist in the development of sustainable energy systems and reduce the cost of energy in rural Alaska.
- Assist communities to achieve maximum local self-government and foster volunteerism statewide.

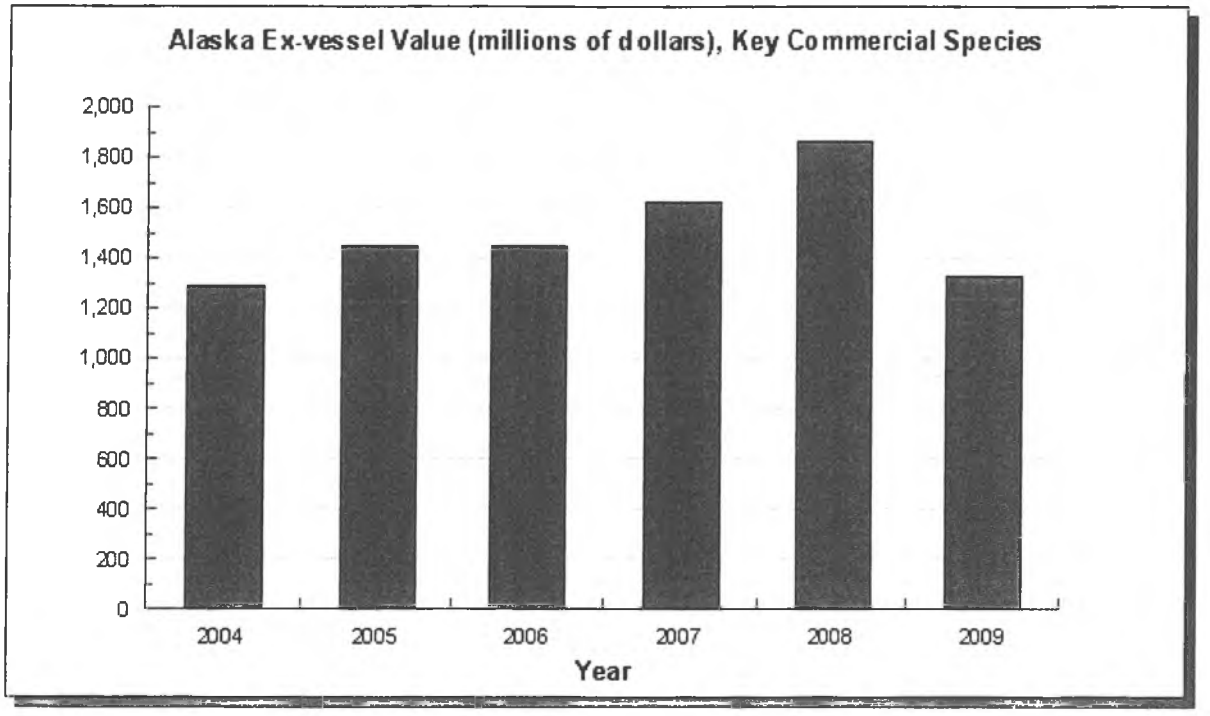
End Result:	Strategies to Achieve End Result
A: Sustainable economic growth. **Details >** • **TARGET #1: Increase by 0.5% the ex-vessel value of key commercial species in Alaska's commercial harvest.** • **STATUS #1: Ex-vessel value of key commercial species in Alaska's commercial harvest decreased 27% from CY2008-2009, target of a 0.5% increase was not met.** • **TARGET #2: One or more successful tourism development projects or new businesses developed in four to six rural Alaska community clusters each year.** • **STATUS #2: Met objective of assisting development of four to six new tourism projects or businesses by assisting in start-up of four new businesses and working with communities in**	A1: Implement economic development programs and projects. **Details >** • **TARGET #1: Restore advertising and public relations campaign supporting core U.S. marketing programs. Build consumer print and online media campaign that generates awareness among the target audience that Alaska seafood is a delicious, wild and sustainable choice.** • **STATUS #1: FY11 U.S. advertising and public relations campaign funded at one third lower level than FY08. Resulting in loss of certainty of key messages being delivered timely to millions of Americans.** • **TARGET #2: Provide technical assistance through mentorship in four to six rural community clusters each year through**

southeast and western Alaska on four new projects. • **TARGET #3: 2% increase per year in visitors between May 1 and September 30 annually.** • **STATUS #3: Tourism's five-year, 30% growth to over 1.7 million summer visitors showed a slight 0.4% decrease in 2008, followed by another 7.27% decrease in 2009.** • **TARGET #4: 19,000 jobs created and maintained in four years.** • **STATUS #4: Met the target of creating and maintaining 19,000 jobs in four years with 20,339 new jobs in the four years of 2005 – 2008.**	**Developing Alaska Rural Tourism program.** • **STATUS #2: Exceeded goal of providing mentorship services in four to six rural community clusters by assisting 11 tourism entrepreneurs in 11 communities.** • **TARGET #3: 500,000 brochures distributed to potential Alaska visitors annually.** • **STATUS #3: Exceeded target of distributing 500,000 brochures to potential Alaska visitors by distributing 610,760 brochures in FY10.**
End Result:	**Strategies to Achieve End Result**
B: Increase number of Alaska citizens who have access to local government services. **Details >** • **TARGET #1: 100% of municipal governments provide essential public services (i.e. elections, legal, health, financial/contracting, fuel).** • **STATUS #1: In FY10, 96% of municipal governments were estimated to have provided essential public services, an increase of 5% over the prior year.**	B1: Improve quality of department's available resources to the public. **Details >** • **TARGET #1: 5% increase per year in successful interventions in communities due to monitoring of key indicators.** • **STATUS #1: 38.46% increase in the number of successful interventions in communities due to monitoring of key indicators from FY09, significantly exceeding the target of 5%.**

Performance Detail

A: Result - Sustainable economic growth.

Target #1: Increase by 0.5% the ex-vessel value of key commercial species in Alaska's commercial harvest.
Status #1: Ex-vessel value of key commercial species in Alaska's commercial harvest decreased 27% from CY2008-2009, target of a 0.5% increase was not met.



Methodology: ADF&G, NOAA-NMFS, SMIS estimates, ASMI estimates

Table contains no rows.

Analysis of results and challenges: Over the past several years, Alaska has succeeded in raising the value of the seafood harvest; however, reduced harvest quotas and the global recession led to a decline in overall value of the resource in 2009. Value (ex-vessel) of key commercial species totaled nearly $1.3 billion in 2009, falling short of the 0.5% growth target for the year (-27 % growth from 2008 to 2009).

2009 Highlights: The ex-vessel value of Alaska pollock and Pacific cod fell by 34% ($249 million), accounting for most of the decline in total ex-vessel value across all fisheries. Alaska pollock and Pacific cod account for 55-to-65% of Alaska fisheries, by volume and roughly a third of their overall value. The North Pacific Fishery Management Council (NPFMC) lowered TAC's (Total Allowable Catch) for Alaska pollock by 18% in 2009, and while Pacific cod harvests were similar to 2008 the price of cod fell due, in part, to the rebound of wild cod stocks especially in the North Atlantic and the current crisis in Iceland.* Salmon values fell 12% to $398 million; sockeye were the only salmon species that didn't see lower ex-vessel prices. Halibut and sablefish values fell by 18% in 2009. The decline in ex-vessel value stems from lower quotas assigned to each species as well as recession-related problems in the restaurant industry. Shellfish values were essentially unchanged although the ex-vessel price for Bristol Bay red king crab and snow crab went up. For the second time in the past 10 years, the seafood industry paid over $100 million to federal, state, and local governments in the form of taxes, fees, and self-assessments (not including income taxes). Alaska seafood was far from the only protein source to be affected by the economic downturn; producer prices of pork, beef and chicken declined 13%, 10% and 4% in 2009. Collectively, the ex-vessel price per pound of Alaska seafood declined 11% in 2009.

Continuing support for marketing efforts will be needed to return ex-vessel values to those seen in 2008 and continue the upward growth trend. The outlook for 2010 is much improved as markets for Alaska seafood around the globe are rebounding from the poor economic conditions that plagued businesses in 2009. According to preliminary information from Alaska

Department of Fish & Game and trade press reports, early season prices for salmon, halibut and sablefish have generally increased. Through May 2010, export values are up for salmon, Alaska pollock and Pacific cod compared to last year. Future threats to the value of Alaska's fishery resource include foreign competition from Russia which harvests many of the same species, a possible resurgence of Chilean salmon farming, aggressive targeting of U.S. salmon market by Norwegian farmed salmon producers, incorporating Alaska seafood into changing palates, and the ever-present competition from other protein sources which fund their own expansive marketing campaigns.

*Iceland is the second largest cod producer in Europe behind Norway. The 2008/2009 financial crisis hit Iceland extremely hard, causing their currency to lose over half of its value relative to the dollar. As a result, it made their cod much cheaper from the European and American buyer's point of view. Cod imports into the U.S. from Iceland increased 44% in 2009 and contributed to a lower global price for cod.

Target #2: One or more successful tourism development projects or new businesses developed in four to six rural Alaska community clusters each year.
Status #2: Met objective of assisting development of four to six new tourism projects or businesses by assisting in start-up of four new businesses and working with communities in southeast and western Alaska on four new projects.

New Tourism Projects in Rural Alaska

Fiscal Year	YTD Total
FY 2010	7 -12.5%
FY 2009	8 +100%
FY 2008	4 +33.33%
FY 2007	3 -57.14%
FY 2006	7 0%
FY 2005	0

Methodology: Count of new projects in rural Alaska.

Analysis of results and challenges: The Developing Alaska Rural Tourism (DART) program was started in FY09 with a grant from the U.S. Economic Development Administration (EDA) and funding from the Alaska Department of Commerce Community and Economic Development. EDA funding was in place during FY10.

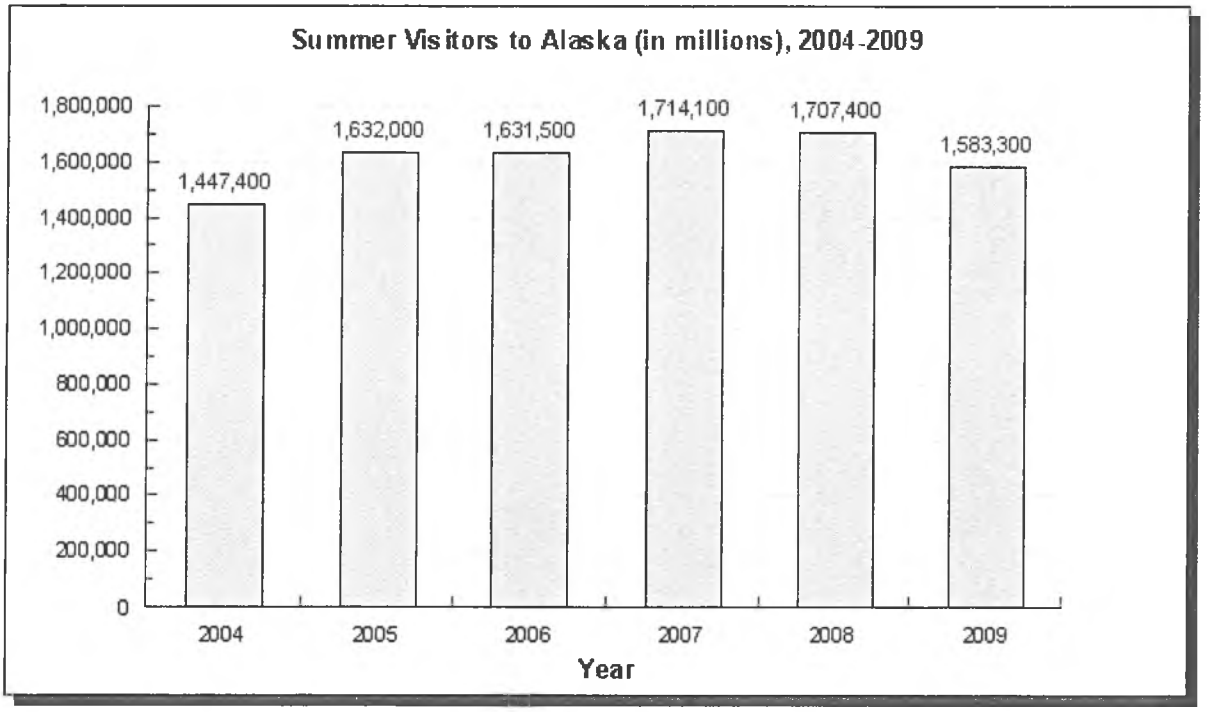
The FY10 Tourism Mentorship Assistance program was instrumental in the start-up or expansion of at least four new businesses in rural communities. The DART program also expanded opportunities for regional projects. These businesses and regional products include the following:
(1) Mentorship of business start-ups in Klukwan (Klukwan Cultural and Heritage Center),

Ouzinkie, Admiralty Island and Ruby;
(2) Guide training and 6-Pack training for polar bear viewing guides in Kaktovik;
(3) Tour itineraries in southwest Alaska and expanded tour products on Prince of Wales Island.

Related links:

- **Developing Alaska Rural Tourism Program**
- **Tourism Mentorship Assistance Program**

Target #3: 2% increase per year in visitors between May 1 and September 30 annually.
Status #3: Tourism's five-year, 30% growth to over 1.7 million summer visitors showed a slight 0.4% decrease in 2008, followed by another 7.27% decrease in 2009.



Methodology: Source: Alaska Visitor Statistics Program V, Interim Visitor Volume Report, Summer 2009, Prepared by the McDowell Group, Inc., for Alaska Office of Economic Development, December 2009.

The Interim Visitor Volume Report provides visitor volume estimates for Alaska between May 1 and September 30, 2009. Volume estimates are based on data collected for Alaska Visitor Statistics Program V, a study administered by the Alaska Department of Commerce, Community and Economic Development. The estimates are compiled using two sets of data: exiting traffic data (ferry embarkations, airplane enplanements, cruise passenger traffic, and highway border crossings) and visitor/resident ratio data (the ratio of out-of-state visitors to Alaska residents exiting Alaska, by traffic mode, location, and month). Summer ratio data was collected during the AVSP V summer study period, between May 1 and September 30, 2006. Nearly 50,000 travelers were tallied by survey field staff during this period. Ratios collected during 2006 were applied to 2009 traffic data to arrive at the estimates in this report.

Summer Visitors to Alaska (in millions), 2004-2009

Year	YTD Total
2009	1,583,300 -7.27%
2008	1,707,400 -0.39%
2007	1,714,100 +5.06%
2006	1,631,500 -0.03%
2005	1,632,000 +12.75%
2004	1,447,400

Analysis of results and challenges: The 2009 Alaska Visitor Statistics program (AVSP) estimates that 1.58 million out-of-state visitors came to Alaska between May and September 2009, a 7.27% decrease from 2008. Primarily responsible for the decline was the decrease in visitors exiting by air (15% drop in passengers), the state's second largest visitor segment. Visitors exiting by highway and ferry continued a pattern of decline. Cruise exits remained essentially the same.

Of the total visitors, 1,026,600 were cruise ship passengers; an estimated 482,800 entered and exited the state by air; and an estimated 63,900 entered or exited the state by highway or ferry.

Target #4: 19,000 jobs created and maintained in four years.

Status #4: Met the target of creating and maintaining 19,000 jobs in four years with 20,339 new jobs in the four years of 2005 – 2008.

Number of Jobs Created and Maintained

Year	YTD Total
2008	4,536 +48.77%
2007	3,049 -52.23%
2006	6,382 +0.16%
2005	6,372 +41.32%

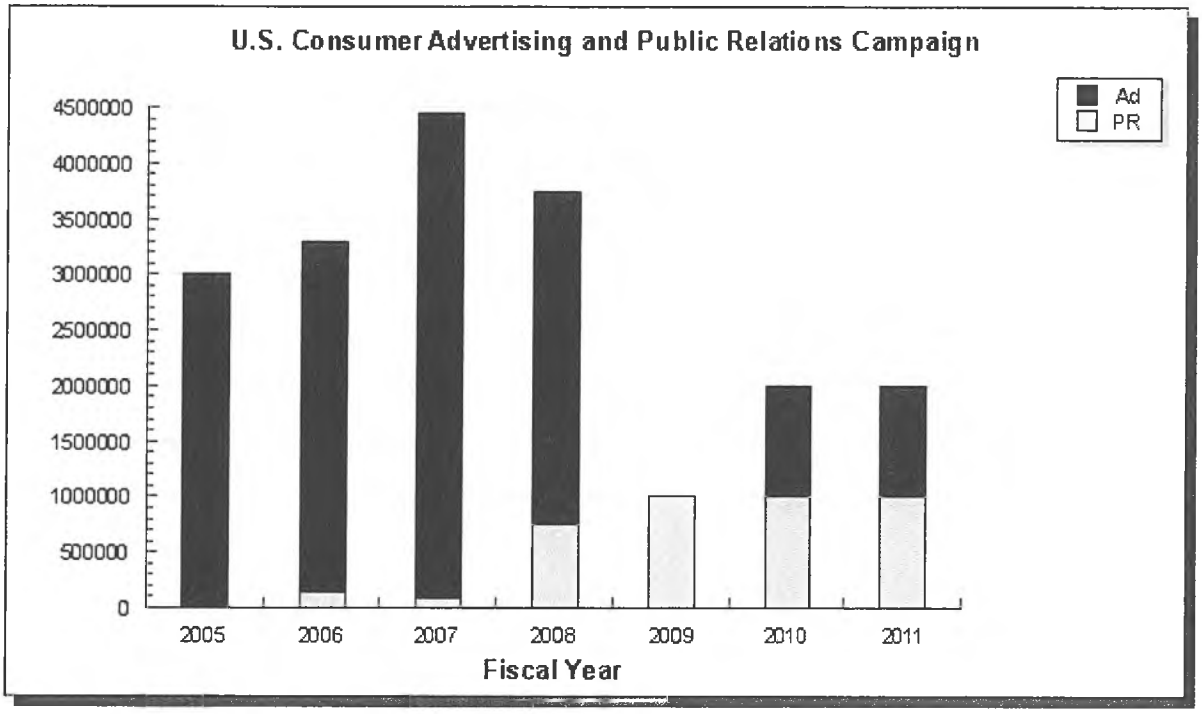
2004	4,509 -1.76%
2003	4,590

Methodology: This data is reported from the State of Alaska Department of Labor.

Analysis of results and challenges: This data represents all jobs created or maintained in Alaska from all sources including those from continued state investment in different programs that help to stimulate the economy and create jobs.

A1: Strategy - Implement economic development programs and projects.

Target #1: Restore advertising and public relations campaign supporting core U.S. marketing programs. Build consumer print and online media campaign that generates awareness among the target audience that Alaska seafood is a delicious, wild and sustainable choice.
Status #1: FY11 U.S. advertising and public relations campaign funded at one third lower level than FY08. Resulting in loss of certainty of key messages being delivered timely to millions of Americans.



Methodology: Alaska Seafood Marketing Institute; Schiedermayer & Associates

U.S. Consumer Advertising and Public Relations Campaign

Fiscal Year	PR	Ad
FY 2011	1000000 0%	1000000 0%
FY 2010	1000000 0%	1000000 0%

FY 2009	1000000 +33.33%	0 -100%
FY 2008	750000 +812.41%	2998000 -31.44%
FY 2007	82200 -46.2%	4372800 +38.94%
FY 2006	152800 0%	3147200 +4.91%
FY 2005	0	3000000

Analysis of results and challenges: ASMI was forced to curtail its overall promotional effort in FY10. The level of resources allocated to the effort in FY09 and FY10 did not allow for advertising placements that offer guaranteed delivery of key messages to the target audience according to a schedule. The resources allocated to consumer advertising and public relations are currently designed to obtain media exposure for Alaska Seafood, however this approach with less funds allocated than FY08 lacks the certainty of guaranteed, timely delivery of key messages to the target demographic, and awareness over time erodes. The goal is to regain the ability to reach as many people with key Alaska Seafood messages delivered via advertising as were reached through that means in FY08. Through consumer advertising in FY08, key messages were delivered according to schedule to more than 213 million U.S. households via cable TV, and to the readers of magazines with circulation totaling more than seven million.

Target #2: Provide technical assistance through mentorship in four to six rural community clusters each year through Developing Alaska Rural Tourism program.
Status #2: Exceeded goal of providing mentorship services in four to six rural community clusters by assisting 11 tourism entrepreneurs in 11 communities.

Number of Community Clusters Receiving Technical Assistance

Fiscal Year	YTD Total
FY 2010	11 +22.22%
FY 2009	9 0%
FY 2008	9 0%
FY 2007	9

Analysis of results and challenges: The Tourism Mentorship Assistance program (TMAP) was started in FY07 with a grant from the U.S. Department of Agriculture (USDA), Rural Development agency. The FY10 TMAP program is currently funded through a matching grant from the U.S. Economic Development Administration (EDA). The program is designed to provide 12-18 months of technical advice and assistance to potential entrepreneurs in rural Alaska.

The 11 entrepreneurs are located in Kaktovik, Perryville, Gambell, Nome, Bethel, Ruby, Tanana, Glennallen, Admiralty Island, Kodiak Island, and Klukwan.

Related links:

- **Developing Alaska Rural Tourism**

Target #3: 500,000 brochures distributed to potential Alaska visitors annually.
Status #3: Exceeded target of distributing 500,000 brochures to potential Alaska visitors by distributing 610,760 brochures in FY10.

Number of Alaska Marketing Brochures Distributed

Fiscal Year	YTD Total
FY 2010	610,760 +4.73%
FY 2009	583,156 +9.04%
FY 2008	534,816 -4.99%
FY 2007	562,904 -4.44%
FY 2006	589,082 +18.94%
FY 2005	495,277 -4.51%
FY 2004	518,693

Methodology: Source: July 20, 2010 Advertising Response Report.

Analysis of results and challenges: The role of the Alaska Travel Industry Association (ATIA) consumer marketing programs is to find potential visitors throughout North America and provide them with compelling information about Alaska in an effort to convert their interest in Alaska to actual travel to the state. Aggressive direct response programs in FY10 allowed ATIA to reach millions of potential visitors and resulted in 610,760 qualified requests for Alaska travel information. The goal for the year was exceeded and the total number of brochures distributed to consumers responding to the marketing increased over the prior year.

Each year, ATIA establishes a goal in regards to the number of marketing brochures distributed to potential visitors. ATIA also prints additional brochures for distribution to travel agents and Alaska residents.

Due to the high demand for Alaska travel information in FY10, ATIA printed additional copies of the State Vacation Planner mid-year so fulfillment of requests could be continued. When that supply was exhausted, Alaska postcards were sent to consumers directing them to the

official Alaska Travel website. They were also advised they would be among the first to receive the 2011 Vacation Planner in September.

ATIA will continue to measure the number of brochures being sent each week, along with the total for the year, and share this information with the state and ATIA's member businesses. This is important data because it substantiates how effectively ATIA marketing programs deliver Alaska's message.

B: Result - Increase number of Alaska citizens who have access to local government services.

Target #1: 100% of municipal governments provide essential public services (i.e. elections, legal, health, financial/contracting, fuel).
Status #1: In FY10, 96% of municipal governments were estimated to have provided essential public services, an increase of 5% over the prior year.

Percentage of Governments Providing Essential Public Services

Fiscal Year	YTD Total
FY 2010	96%
FY 2009	91%
FY 2008	83%
FY 2007	82%
FY 2006	83%
FY 2005	80%
FY 2004	85%

Analysis of results and challenges: There is no requirement for communities to report inadequate provision of public services, such as interruption of public utilities, reduction or elimination of police or public safety, not holding required public meetings or elections, or inadequate financial disclosure of public finances. DCRA is collecting this information through a new system called Community Status Report. Information for this data system is collected from other agencies that collect issue specific data. The challenge is to identify agencies that are collecting data on an ongoing basis and being able to incorporate these various systems into one comprehensive system.

B1: Strategy - Improve quality of department's available resources to the public.

Target #1: 5% increase per year in successful interventions in communities due to monitoring of key indicators.
Status #1: 38.46% increase in the number of successful interventions in communities due to monitoring of key indicators from FY09, significantly exceeding the target of 5%.

Number of Successful Interventions

Year	# of Interventions
2010	54 +38.46%
2009	39 +62.5%
2008	24 +14.29%
2007	21 +10.53%
2006	19

Analysis of results and challenges: This increase in successful interventions has been accomplished through reassignment of staff from other duties within the division to provide monitoring of tax reporting, fuel ordering, Power Cost Equalization reporting, and liens filed. Additional allocated resources both in staffing and travel allow the division to proactively contact communities prior to a financial crisis which may cause interruptions to electrical, sanitation, or governmental services.

Mission

Develop, conserve and enhance natural resources for present and future Alaskans.

Key Program Performance Indicators

Arrow indicates trend: ⬆ =Improving ⬇ =Worsening ➡ =Maintaining

FY11 Authorized as of 9/30/2010 (in thousands)

	Funding					Positions		
Department of Natural Resources Totals	UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
	$72,011.3	$25,513.6	$35,185.3	$19,782.7	$152,492.9	777	248	82

1. **Development and Use of State Land and Natural Resources**
Provide economic and recreational opportunities by facilitating responsible use and development of state land and water resources, which generate approx. 90% of the state's revenue. Acquire, dispose, and transfer state land. Defend title/rights to state land, navigable and public waters, trails.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$46,483.3	$25,448.1	$31,398.4	$10,079.3	$113,409.1	700	62	82

- **In FY10, five area wide oil and gas lease sales were held in the North Slope, North Slope Foothills, Beaufort Sea, Cook Inlet and Alaska Peninsula areas. A total of $11.8 million was received in valid bids, an estimated 482,594 new acres leased, and a potential 134 new leases awarded to-date. This is in line with FY09 when five lease sales were held in the same areas, with $12.8 million received in valid bids, an estimated 355,000 new acres leased and a potential 112 new leases were awarded.**
- **In FY10, 100 percent of pipeline right-of-way amendments and operational permits were processed within prescribed or negotiated timelines, consistent with FY09.**
- **In FY10, the state acquired 1.6 million acres of land from the federal government under the Statehood entitlement authority with another 6 million left to receive. Division of Mining, Land & Water project staff processed 100 percent of the Statehood entitlement conveyances that came in from the Bureau of Land Management; conveyance acreage received was 254,536 acres less than the previous year. Acreage added the last five years totals 8.3 million, which considerably increases the land management responsibilities of the department.**
- **In FY10, 87 percent of new applications from industry and individuals for use and development of state land were processed by the Division of Mining, Land & Water (575 processed of 662 received), an increase from 72 percent in FY09, when 473 of 655 were processed. Although this is an improvement in percentage processed over FY09, the backlog of unprocessed applications continues to increase, and stands at 2,376 at the end of FY10. Although we continue to try and improve processes, backlogs are increasing in part due to population and business growth, increased complexity and scrutiny, and litigation slows down the process time for permit issuance. These applications for land use permits and**

leases are fundamental to Alaska's development of jobs, businesses, new homes and recreational opportunities.

- In FY10, the Division of Mining, Land & Water sold 286 parcels of land, putting a total of 2,539 acres into private ownership, a decline from FY09 when 400 parcels of land were sold for a total of 3,583 acres.
- In FY10, the Division of Mining, Land & Water processed 69 percent (49 of 71) of new water right applications received, a slight increase from FY09 when 63 percent (78 of 124) of new applications received were processed, but both far below the 100 percent target. Although we continue to try and improve processes, water permit backlogs are increasing in part due to population and business growth, increased complexity and scrutiny, and litigation slows down the process time for permit issuance. Almost all development activities require water use permits and these activities positively impact Alaska businesses and families.
- In FY10, 94 percent of the 53 requests for title navigability determinations were responded to by the Division of Mining, Land & Water. This was an increase over FY09, when 86 percent of 42 requests were responded to. While this is an improvement in the percent responded to, and we continue to try and improve processes, the backlog continues to grow and stands at 9 at the end of FY10, up from 6 at the end of FY09.
- Forest management practice compliance was below standards in CY09, declining from 92 percent to 70 percent in the Interior because forest roads on State lands were not adequately maintained.
- Timber was sold to 52 Alaskan businesses in FY10, exceeding the target but down from 64 businesses in FY09. To compensate for the lack of available federal timber, the Division of Forestry is encouraging increased use of state forest land for Alaskan businesses by allowing uses that are pushing the state's maximum allowable yield for sustainable forests.
- In FY10, annual visits to Alaska state park units were 5.39 million with 72 percent of visits made by resident Alaskans, as compared to 5.22 million and 75 percent resident Alaskans visiting in FY09.
- The Division of Parks and Outdoor Recreation received $6.0 million in deferred maintenance funding in FY10. The cost of identified maintenance needs in state park units decreased to an estimated $65.8 million in FY10, a decrease of $1.4 million over FY09. Deferred maintenance needs grow an average of $5,000,000 per year; to make progress reducing the inventory of deferred projects, funding of more than $5,000,000 is needed annually.
- Since the Alaska Boating Safety program began, at least 19 Alaskan children have survived a water emergency thanks to a Kids Don't Float loaner life jacket, and Alaska's recreational boating fatality rate has declined. This summer (2010) saw 2 additional children saved in a rafting accident with loaner life jackets, bringing the lives saved count from 17 to 19. Life jacket wear rates in Alaska among adults have doubled, and wear rates among all age groups are now higher than the national average.
- In FY10, the Division of Geological and Geophysical Surveys published 480 square miles of new energy-related geologic mapping, down from 1,020 square miles in FY09. Geologic maps for three areas totaling 2,256 square miles are nearly completed and will be published in FY11, a significant increase over FY10. These publications are used by industry in making resource development decisions.
- In FY10, the Division of Geological and Geophysical Surveys published new airborne geophysical survey data for 653 square miles of high mineral-resource potential lands, exceeding the FY10 target of 640 and up from 442 square miles published in FY09. These publications are used by industry in making resource development decisions.
- At the end of FY10, the department had 20 online business services, out of an estimated total of 200, which is up from 19 in FY09 and 16 in FY08. The department continues the effort to streamline permit processes through the capital project for Unified Permitting; every improvement made in this area results in better services for our customers and improved efficiency for our staff.
- In FY10, 428 USDA-related inspections were requested and 100 percent were completed by the Division of Agriculture to meet statutory, federal, and international contract requirements related to commercial sales activity. These inspections represent approximately $66.4 million realized primarily from timber exports and domestic produce. This compares to 401 inspections requested and completed in FY09, representing approximately $43.1 million primarily from timber exports and domestic produce.

- **The Department of Natural Resources maintains Public Information Centers in Anchorage, Fairbanks, and Juneau, with staff available to respond to customer needs in person or via phone. In addition, many of our services are available electronically, including land status and mapping information, geological and geophysical information, recorded documents, and park cabin reservations.**

2. **Natural Resource Conservation and Protection**
Protect and enhance the value of state land and water resources and Alaska's coastal areas.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$1,887.2	$9.6	$1,218.0	$2,883.7	$5,998.5	34	5	0

- **In FY10, those projects requiring a 50-day individual consistency review were completed by the Division of Coastal and Ocean Management, on average, in 42 days, the same as in FY09.**

- **As of August 2010, there was no change to the number of Coastal District Plans approved since November 2009, when 25 of 28 Coastal Districts had approved plans in place. During FY10, one Coastal District completed a minor plan amendment, and four others are in the process of updating and amending their plans.**

3. **Wildland Fire Management**
Provide wildland fire protection on state, private and municipal lands.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$23,640.8	$55.9	$2,568.9	$6,819.7	$33,085.3	43	181	0

- **Calendar Year (CY) 2010 to date was an average fire season in both number of fire starts (648) and acres burned (1.1 million). However, due to low precipitation, the month of May had 230 fire starts which is nearly 50 percent more than the 10 year average for May. The 250,475 acres burned in May of 2010 is significantly higher than the 10 year average of 113,000 acres. These fire starts were due to an increase in human caused fires and lightning ignitions. Six of these fires were due to fires from the fall of 2010 burning through the winter. This early fire season threatened communities across the interior of Alaska. No structures were lost during this fire season but several interior communities were impacted by smoke. For comparison, the record fire year was CY2004 when 6.6 million acres burned, and CY2009 saw 3.0 million acres burned. For CY2009, the Division of Forestry safely managed the 9th largest fire season on record, by suppressing 93.2 percent of fires in critical/full protection at <10 acres, exceeding the target of 90 percent (but a slight decrease from 94.9 percent in CY2008). Kept significantly under the 5-year average loss of structures with 22 lost in CY2009 compared to a 5-year average of 49. Experienced a 7 percent decrease in human caused wildfire starts, with 241 in CY2009 compared to 259 in CY2008.**

- **Although in calendar year 2009 the number of firefighters qualified by the State of Alaska increased by 7 percent, in FY10, the number of firefighting resources delivered from the Lower 48 increased for the third consecutive year at a cost of more than $9 million.**

Mission

Develop, conserve and enhance natural resources for present and future Alaskans.

Core Services

- Meet our mission through both resource management (land, water, forest, subsurface) and regulatory activities
- Manage the human and commercial uses of state resources to ensure we provide maximum value to Alaskans
- Provide opportunities to utilize state land and water resources
- Acquire and provide hydrologic, geologic, geographic, historical site, and other land record and natural resource information
- Acquire land for public purposes and to fulfill statehood land entitlements.
- Make land available for sale to the public, and transfer land to municipalities
- Preserve and enhance the value of state land and water resources and Alaska's coastal areas
- Mitigate potential disasters and hazards
- Implement federal regulations and programs related to natural resources.

End Result: ▶▶	Strategies to Achieve End Result
A: Economic and recreational opportunities are provided, and state revenue is generated, by making land available for private, commercial and recreational use. **Details >** • **TARGET #1: Hold five area wide oil and gas lease sales to promote exploration and development of resources.** • **STATUS #1: In FY10, five area wide oil and gas lease sales were held in the North Slope, North Slope Foothills, Beaufort Sea, Cook Inlet and Alaska Peninsula areas. A total of $11.8 million was received in valid bids, an estimated**	A1: Process applications for land, subsurface, and water use in a timely manner. **Details >** • **TARGET #1: Process 90 percent of new applications received for permits and leases in a fiscal year.** • **STATUS #1: In FY10, 87 percent of new applications from industry and individuals for use and development of state land were processed by the Division of Mining, Land & Water (575 processed of 662 received), an increase from 72 percent in FY09, when 473 of 655 were processed. Although this is an improvement in**

482,594 new acres leased, and a potential 134 new leases awarded to-date. This is in line with FY09 when five lease sales were held in the same areas, with $12.8 million received in valid bids, an estimated 355,000 new acres leased and a potential 112 new leases were awarded.

- TARGET #2: Process 100 percent of pipeline right-of-way amendments and operational permits within prescribed or negotiated timelines.
- STATUS #2: In FY10, 100 percent of pipeline right-of-way amendments and operational permits were processed within prescribed or negotiated timelines, consistent with FY09.

- TARGET #3: Issue permits and leases for state land and water uses in a timely manner.
- STATUS #3: In FY10, the backlog of applications for land use permits and leases increased by 87 to a total of 2,376; and the backlog of applications for water rights applications increased by 22 to a total of 742.

- TARGET #4: Increase the amount of state land transferred into private ownership and to municipalities.
- STATUS #4: In FY10, the Department of Natural Resources sold 286 parcels, putting 2,539 acres into private ownership, a decline from FY09 when 400 parcels for 3,583 acres were sold. In FY10, no acreage was transferred to municipalities, down from 28,266 acres in FY09.

- TARGET #5: Increase number of visits to Alaska state park units.
- STATUS #5: In FY10, annual visits to Alaska state park units were 5.39 million with 72 percent of visits made by resident Alaskans,

percentage processed over FY09, the backlog of unprocessed applications continues to increase, and stands at 2,376 at the end of FY10. Although we continue to try and improve processes, backlogs are increasing in part due to population and business growth, increased complexity and scrutiny, and litigation slows down the process time for permit issuance. These applications for land use permits and leases are fundamental to Alaska's development of jobs, businesses, new homes and recreational opportunities.

- TARGET #2: Process 100 percent of new water right applications received.
- STATUS #2: In FY10, the Division of Mining, Land & Water processed 69 percent (49 of 71) of new water right applications received, a slight increase from FY09 when 63 percent (78 of 124) of new applications received were processed, but both far below the 100 percent target. Although we continue to try and improve processes, water permit backlogs are increasing in part due to population and business growth, increased complexity and scrutiny, and litigation slows down the process time for permit issuance. Almost all development activities require water use permits and these activities positively impact Alaska businesses and families.

- TARGET #3: Award oil, gas, and geothermal leases within nine months of sale.
- STATUS #3: In FY10, 100 percent of leases were awarded within nine months of sale. Average award time was six months, one month less than FY09.

- TARGET #4: Provide stable or increasing economic benefit from use of trees and forests on state

as compared to 5.22 million and 75 percent resident Alaskans visiting in FY09.

land by selling state timber to 40 or more Alaskan businesses.

- **STATUS #4: Timber was sold to 52 Alaskan businesses in FY10, exceeding the target but down from 64 businesses in FY09. To compensate for the lack of available federal timber, the Division of Forestry is encouraging increased use of state forest land for Alaskan businesses by allowing uses that are pushing the state's maximum allowable yield for sustainable forests.**

A2: Sell land to the public. **Details >**

- **TARGET #1: Sell 300 parcels of land (approximately 3,000 acres) per year.**
- **STATUS #1: In FY10, the Division of Mining, Land & Water sold 286 parcels of land, putting a total of 2,539 acres into private ownership, a decline from FY09 when 400 parcels of land were sold for a total of 3,583 acres.**

A3: Defend and maintain clear title to land. **Details >**

- **TARGET #1: Respond to 100 percent of requests for navigability determinations.**
- **STATUS #1: In FY10, 94 percent of the 53 requests for title navigability determinations were responded to by the Division of Mining, Land & Water. This was an increase over FY09, when 86 percent of 42 requests were responded to. While this is an improvement in the percent responded to, and we continue to try and improve processes, the backlog continues to grow and stands at 9 at the end of FY10, up from 6 at the end of FY09.**

A4: Acquire land from the federal government under the Statehood entitlement authority. **Details >**

- **TARGET #1: Each year, receive an additional 2,000,000 acres of the remaining entitlement of state land.**
- **STATUS #1: In FY10, the state acquired 1.6 million acres of land from the federal government under the Statehood entitlement authority with another 6 million left to receive. Division of Mining, Land & Water project staff processed 100 percent of the Statehood entitlement conveyances that came in from the Bureau of Land Management; conveyance acreage received was 254,536 acres less than the previous year. Acreage added the last five years totals 8.3 million, which considerably increases the land management responsibilities of the department.**

A5: Acquire and provide adequate information to support natural resource use and development decisions. **Details >**

- **TARGET #1: Publish 1,625 square miles of energy-related new geologic mapping in FY11.**
- **STATUS #1: In FY10, the Division of Geological and Geophysical Surveys published 480 square miles of new energy-related geologic mapping, down from 1,020 square miles in FY09. Geologic maps for three areas totaling 2,256 square miles are nearly completed and will be published in FY11, a significant increase over FY10. These publications are used by industry in making resource development decisions.**
- **TARGET #2: Publish 700 square miles of airborne geophysical survey data of minerals-interest lands in FY11.**
- **STATUS #2: In FY10, the Division of Geological and Geophysical Surveys published new airborne geophysical survey data for 653 square miles of high mineral-**

resource potential lands, exceeding the FY10 target of 640 and up from 442 square miles published in FY09. These publications are used by industry in making resource development decisions.

- **TARGET #3: Ail Department of Natural Resources business transactions and permit applications can be conducted electronically.**
- **STATUS #3: At the end of FY10, the department had 20 online business services, out of an estimated total of 200, which is up from 19 in FY09 and 16 in FY08. The department continues the effort to streamline permit processes through the capital project for Unified Permitting; every improvement made in this area results in better services for our customers and improved efficiency for our staff.**

- **TARGET #4: Customers receive accurate and timely assistance.**
- **STATUS #4: The Department of Natural Resources maintains Public Information Centers in Anchorage, Fairbanks, and Juneau, with staff available to respond to customer needs in person or via phone. In addition, many of our services are available electronically, including land status and mapping information, geological and geophysical information, recorded documents, and park cabin reservations.**

A6: Ensure compliance with statutory requirements and best practices. **Details >**

- **TARGET #1: 100 percent compliance with FRPA (Forest Resources and Practices Act) best management practices. Compliance is measured as the percentage of best management practices rated 4 or higher out of a**

perfect score of 5 in field inspections of forest operations.

- **STATUS #1: Forest management practice compliance was below standards in CY09, declining from 92 percent to 70 percent in the Interior because forest roads on State lands were not adequately maintained.**

- **TARGET #2: Inspect for compliance with USDA grade, USDA label laws and buyer specifications.**
- **STATUS #2: In FY10, 428 USDA-related inspections were requested and 100 percent were completed by the Division of Agriculture to meet statutory, federal, and international contract requirements related to commercial sales activity. These inspections represent approximately $66.4 million realized primarily from timber exports and domestic produce. This compares to 401 inspections requested and completed in FY09, representing approximately $43.1 million primarily from timber exports and domestic produce.**

A7: Improve safety of recreational boaters through effective implementation of the Division of Parks Boating Safety program.
Details >

- **TARGET #1: Boating Safety program actions result in lives saved.**
- **STATUS #1: Since the Alaska Boating Safety program began, at least 19 Alaskan children have survived a water emergency thanks to a Kids Don't Float loaner life jacket, and Alaska's recreational boating fatality rate has declined. This summer (2010) saw 2 additional children saved in a rafting accident with loaner life jackets, bringing the lives saved count from 17 to 19. Life jacket wear rates in Alaska among adults have doubled, and wear rates**

	among all age groups are now higher than the national average.
End Result:	**Strategies to Achieve End Result**
B: Alaska's coastal resources are managed to ensure a healthy and vibrant Alaskan coast that efficiently sustains long-term economic and environmental productivity. **Details >** • **TARGET #1: Review 100 percent of the resource development projects for compliance with the Alaska Coastal Management Program requirements.** • **STATUS #1: In FY10, the Division of Coastal and Ocean Management reviewed 100 percent of the resource development projects for compliance with the Alaska Coastal Management Program requirements, consistent with FY09.**	B1: Provide efficient delivery of project management and review services. **Details >** • **TARGET #1: Maintain a 50-day average consistency review timeframe for individual consistency reviews.** • **STATUS #1: In FY10, those projects requiring a 50-day individual consistency review were completed by the Division of Coastal and Ocean Management, on average, in 42 days, the same as in FY09.** • **TARGET #2: 100 percent of 28 active coastal districts develop approvable Coastal District Plans.** • **STATUS #2: As of August 2010, there was no change to the number of Coastal District Plans approved since November 2009, when 25 of 28 Coastal Districts had approved plans in place. During FY10, one Coastal District completed a minor plan amendment, and four others are in the process of updating and amending their plans.**
End Result:	**Strategies to Achieve End Result**
C: The state wildland fire protection program preserves the value of land and resources under protection, commensurate with the values at risk. **Details >** • **TARGET #1: Wildland fire protection on State, private and municipal land is commensurate with the values at risk.** • **STATUS #1: Calendar Year (CY) 2010 to date was an average fire season in both number of fire starts (648) and acres burned (1.1 million). However, due to low**	C1: Maintain and position adequate firefighting resources to contain most wildland fires through initial attack. **Details >** • **TARGET #1: Firefighting resources are available for response to wildland fires that pose a threat to life and property.** • **STATUS #1: Although in calendar year 2009 the number of firefighters qualified by the State of Alaska increased by 7 percent, in FY10, the number of firefighting resources delivered from the**

precipitation, the month of May had 230 fire starts which is nearly 50 percent more than the 10 year average for May. The 250,475 acres burned in May of 2010 is significantly higher than the 10 year average of 113,000 acres. These fire starts were due to an increase in human caused fires and lightning ignitions. Six of these fires were due to fires from the fall of 2010 burning through the winter. This early fire season threatened communities across the interior of Alaska. No structures were lost during this fire season but several interior communities were impacted by smoke. For comparison, the record fire year was CY2004 when 6.6 million acres burned, and CY2009 saw 3.0 million acres burned. For CY2009, the Division of Forestry safely managed the 9th largest fire season on record, by suppressing 93.2 percent of fires in critical/full protection at <10 acres, exceeding the target of 90 percent (but a slight decrease from 94.9 percent in CY2008). Kept significantly under the 5-year average loss of structures with 22 lost in CY2009 compared to a 5-year average of 49. Experienced a 7 percent decrease in human caused wildfire starts, with 241 in CY2009 compared to 259 in CY2008.	**Lower 48 increased for the third consecutive year at a cost of more than $9 million.**
End Result: ▶▶	**Strategies to Achieve End Result**
D: Adequate facilities, equipment, infrastructure and support services are available for programs and projects. **Details >**	D1: Increase maintenance efforts in state forestry facilities and equipment to provide clean, safe, and well-maintained facilities and equipment. **Details >** • **TARGET #1: Eliminate the deferred maintenance inventory of projects in Forestry and Firefighting facilities.** • **STATUS #1: The Division of Forestry has an inventory of identified deferred maintenance of $11 million in FY11. No targeted**

deferred maintenance funding was received in FY11.

D2: Increase maintenance efforts in state park units to provide clean, safe, and well-maintained park and recreational areas.
Details >

- **TARGET #1: Decrease the amount of deferred maintenance in state park units by $10 million per year.**
- **STATUS #1: The Division of Parks and Outdoor Recreation received $6.0 million in deferred maintenance funding in FY10. The cost of identified maintenance needs in state park units decreased to an estimated $65.8 million in FY10, a decrease of $1.4 million over FY09. Deferred maintenance needs grow an average of $5,000,000 per year; to make progress reducing the inventory of deferred projects, funding of more than $5,000,000 is needed annually.**

Performance Detail

A: Result - Economic and recreational opportunities are provided, and state revenue is generated, by making land available for private, commercial and recreational use.

Target #1: Hold five area wide oil and gas lease sales to promote exploration and development of resources.
Status #1: In FY10, five area wide oil and gas lease sales were held in the North Slope, North Slope Foothills, Beaufort Sea, Cook Inlet and Alaska Peninsula areas. A total of $11.8 million was received in valid bids, an estimated 482,594 new acres leased, and a potential 134 new leases awarded to-date. This is in line with FY09 when five lease sales were held in the same areas, with $12.8 million received in valid bids, an estimated 355,000 new acres leased and a potential 112 new leases were awarded.

Target #2: Process 100 percent of pipeline right-of-way amendments and operational permits within prescribed or negotiated timelines.
Status #2: In FY10, 100 percent of pipeline right-of-way amendments and operational permits were processed within prescribed or negotiated timelines, consistent with FY09.

Target #3: Issue permits and leases for state land and water uses in a timely manner.
Status #3: In FY10, the backlog of applications for land use permits and leases increased by

87 to a total of 2,376; and the backlog of applications for water rights applications increased by 22 to a total of 742.

Target #4: Increase the amount of state land transferred into private ownership and to municipalities.
Status #4: In FY10, the Department of Natural Resources sold 286 parcels, putting 2,539 acres into private ownership, a decline from FY09 when 400 parcels for 3,583 acres were sold. In FY10, no acreage was transferred to municipalities, down from 28,266 acres in FY09.

Target #5: Increase number of visits to Alaska state park units.
Status #5: In FY10, annual visits to Alaska state park units were 5.39 million with 72 percent of visits made by resident Alaskans, as compared to 5.22 million and 75 percent resident Alaskans visiting in FY09.

Annual Visits to Alaska State Park Units

Year	YTD Total
2010	5,396,037 +3.28%
2009	5,224,650 +4.99%
2008	4,976,545 +2.09%
2007	4,874,635 +4.44%
2006	4,667,601 +5.72%
2005	4,414,994 +4.17%
2004	4,238,417

A1: Strategy - Process applications for land, subsurface, and water use in a timely manner.

Target #1: Process 90 percent of new applications received for permits and leases in a fiscal year.
Status #1: In FY10, 87 percent of new applications from industry and individuals for use and development of state land were processed by the Division of Mining, Land & Water (575 processed of 662 received), an increase from 72 percent in FY09, when 473 of 655 were processed. Although this is an improvement in percentage processed over FY09, the backlog of unprocessed applications continues to increase, and stands at 2,376 at the end of FY10. Although we continue to try and improve processes, backlogs are increasing in part due to population and business growth, increased complexity and scrutiny, and litigation slows down the process time for permit issuance. These applications for land use permits and leases are

fundamental to Alaska's development of jobs, businesses, new homes and recreational opportunities.

Target #2: Process 100 percent of new water right applications received.
Status #2: In FY10, the Division of Mining, Land & Water processed 69 percent (49 of 71) of new water right applications received, a slight increase from FY09 when 63 percent (78 of 124) of new applications received were processed, but both far below the 100 percent target. Although we continue to try and improve processes, water permit backlogs are increasing in part due to population and business growth, increased complexity and scrutiny, and litigation slows down the process time for permit issuance. Almost all development activities require water use permits and these activities positively impact Alaska businesses and families.

Target #3: Award oil, gas, and geothermal leases within nine months of sale.
Status #3: In FY10, 100 percent of leases were awarded within nine months of sale. Average award time was six months, one month less than FY09.

Target #4: Provide stable or increasing economic benefit from use of trees and forests on state land by selling state timber to 40 or more Alaskan businesses.
Status #4: Timber was sold to 52 Alaskan businesses in FY10, exceeding the target but down from 64 businesses in FY09. To compensate for the lack of available federal timber, the Division of Forestry is encouraging increased use of state forest land for Alaskan businesses by allowing uses that are pushing the state's maximum allowable yield for sustainable forests.

A2: Strategy - Sell land to the public.

Target #1: Sell 300 parcels of land (approximately 3,000 acres) per year.
Status #1: In FY10, the Division of Mining, Land & Water sold 286 parcels of land, putting a total of 2,539 acres into private ownership, a decline from FY09 when 400 parcels of land were sold for a total of 3,583 acres.

A3: Strategy - Defend and maintain clear title to land.

Target #1: Respond to 100 percent of requests for navigability determinations.
Status #1: In FY10, 94 percent of the 53 requests for title navigability determinations were responded to by the Division of Mining, Land & Water. This was an increase over FY09, when 86 percent of 42 requests were responded to. While this is an improvement in the percent responded to, and we continue to try and improve processes, the backlog continues to grow and stands at 9 at the end of FY10, up from 6 at the end of FY09.

A4: Strategy - Acquire land from the federal government under the Statehood entitlement authority.

Target #1: Each year, receive an additional 2,000,000 acres of the remaining entitlement of

state land.
Status #1: In FY10, the state acquired 1.6 million acres of land from the federal government under the Statehood entitlement authority with another 6 million left to receive. Division of Mining, Land & Water project staff processed 100 percent of the Statehood entitlement conveyances that came in from the Bureau of Land Management; conveyance acreage received was 254,536 acres less than the previous year. Acreage added the last five years totals 8.3 million, which considerably increases the land management responsibilities of the department.

Number of Acres Acquired as per Statehood Entitlement

Fiscal Year	YTD Total
FY 2010	1,646,962 -13.39%
FY 2009	1,901,498 -21.81%
FY 2008	2,431,887 +863.31%
FY 2007	252,451 -87.4%
FY 2006	2,003,879 +34.52%
FY 2005	1,489,618 +5035.02%
FY 2004	29,009

A5: Strategy - Acquire and provide adequate information to support natural resource use and development decisions.

Target #1: Publish 1,625 square miles of energy-related new geologic mapping in FY11.
Status #1: In FY10, the Division of Geological and Geophysical Surveys published 480 square miles of new energy-related geologic mapping, down from 1,020 square miles in FY09. Geologic maps for three areas totaling 2,256 square miles are nearly completed and will be published in FY11, a significant increase over FY10. These publications are used by industry in making resource development decisions.

Target #2: Publish 700 square miles of airborne geophysical survey data of minerals-interest lands in FY11.
Status #2: In FY10, the Division of Geological and Geophysical Surveys published new airborne geophysical survey data for 653 square miles of high mineral-resource potential lands, exceeding the FY10 target of 640 and up from 442 square miles published in FY09. These publications are used by industry in making resource development decisions.

Target #3: All Department of Natural Resources business transactions and permit applications can be conducted electronically.
Status #3: At the end of FY10, the department had 20 online business services, out of an estimated total of 200, which is up from 19 in FY09 and 16 in FY08. The department continues the effort to streamline permit processes through the capital project for Unified Permitting; every improvement made in this area results in better services for our customers and improved efficiency for our staff.

Target #4: Customers receive accurate and timely assistance.
Status #4: The Department of Natural Resources maintains Public Information Centers in Anchorage, Fairbanks, and Juneau, with staff available to respond to customer needs in person or via phone. In addition, many of our services are available electronically, including land status and mapping information, geological and geophysical information, recorded documents, and park cabin reservations.

A6: Strategy - Ensure compliance with statutory requirements and best practices.

Target #1: 100 percent compliance with FRPA (Forest Resources and Practices Act) best management practices. Compliance is measured as the percentage of best management practices rated 4 or higher out of a perfect score of 5 in field inspections of forest operations.
Status #1: Forest management practice compliance was below standards in CY09, declining from 92 percent to 70 percent in the Interior because forest roads on State lands were not adequately maintained.

Target #2: Inspect for compliance with USDA grade, USDA label laws and buyer specifications.
Status #2: In FY10, 428 USDA-related inspections were requested and 100 percent were completed by the Division of Agriculture to meet statutory, federal, and international contract requirements related to commercial sales activity. These inspections represent approximately $66.4 million realized primarily from timber exports and domestic produce. This compares to 401 inspections requested and completed in FY09, representing approximately $43.1 million primarily from timber exports and domestic produce.

A7: Strategy - Improve safety of recreational boaters through effective implementation of the Division of Parks Boating Safety program.

Target #1: Boating Safety program actions result in lives saved.
Status #1: Since the Alaska Boating Safety program began, at least 19 Alaskan children have survived a water emergency thanks to a Kids Don't Float loaner life jacket, and Alaska's recreational boating fatality rate has declined. This summer (2010) saw 2 additional children saved in a rafting accident with loaner life jackets, bringing the lives saved count from 17 to 19. Life jacket wear rates in Alaska among adults have doubled, and wear rates among all age groups are now higher than the national average.

B: Result - Alaska's coastal resources are managed to ensure a healthy and vibrant Alaskan coast that efficiently sustains long-term economic and environmental productivity.

Target #1: Review 100 percent of the resource development projects for compliance with the Alaska Coastal Management Program requirements.
Status #1: In FY10, the Division of Coastal and Ocean Management reviewed 100 percent of the resource development projects for compliance with the Alaska Coastal Management Program requirements, consistent with FY09.

B1: Strategy - Provide efficient delivery of project management and review services.

Target #1: Maintain a 50-day average consistency review timeframe for individual consistency reviews.
Status #1: In FY10, those projects requiring a 50-day individual consistency review were completed by the Division of Coastal and Ocean Management, on average, in 42 days, the same as in FY09.

Target #2: 100 percent of 28 active coastal districts develop approvable Coastal District Plans.
Status #2: As of August 2010, there was no change to the number of Coastal District Plans approved since November 2009, when 25 of 28 Coastal Districts had approved plans in place. During FY10, one Coastal District completed a minor plan amendment, and four others are in the process of updating and amending their plans.

C: Result - The state wildland fire protection program preserves the value of land and resources under protection, commensurate with the values at risk.

Target #1: Wildland fire protection on State, private and municipal land is commensurate with the values at risk.
Status #1: Calendar Year (CY) 2010 to date was an average fire season in both number of fire starts (648) and acres burned (1.1 million). However, due to low precipitation, the month of May had 230 fire starts which is nearly 50 percent more than the 10 year average for May. The 250,475 acres burned in May of 2010 is significantly higher than the 10 year average of 113,000 acres. These fire starts were due to an increase in human caused fires and lightning ignitions. Six of these fires were due to fires from the fall of 2010 burning through the winter. This early fire season threatened communities across the interior of Alaska. No structures were lost during this fire season but several interior communities were impacted by smoke. For comparison, the record fire year was CY2004 when 6.6 million acres burned, and CY2009 saw 3.0 million acres burned.

For CY2009, the Division of Forestry safely managed the 9th largest fire season on record, by suppressing 93.2 percent of fires in critical/full protection at <10 acres, exceeding the target of 90 percent (but a slight decrease from 94.9 percent in CY2008). Kept significantly under the 5-year average loss of structures with 22 lost in CY2009 compared to a 5-year average of 49. Experienced a 7 percent decrease in human caused wildfire starts, with 241 in CY2009 compared to 259 in CY2008.

C1: Strategy - Maintain and position adequate firefighting resources to contain most wildland fires through initial attack.

Target #1: Firefighting resources are available for response to wildland fires that pose a threat to life and property.
Status #1: Although in calendar year 2009 the number of firefighters qualified by the State of Alaska increased by 7 percent, in FY10, the number of firefighting resources delivered from the Lower 48 increased for the third consecutive year at a cost of more than $9 million.

D: Result - Adequate facilities, equipment, infrastructure and support services are available for programs and projects.

D1: Strategy - Increase maintenance efforts in state forestry facilities and equipment to provide clean, safe, and well-maintained facilities and equipment.

Target #1: Eliminate the deferred maintenance inventory of projects in Forestry and Firefighting facilities.
Status #1: The Division of Forestry has an inventory of identified deferred maintenance of $11 million in FY11. No targeted deferred maintenance funding was received in FY11.

D2: Strategy - Increase maintenance efforts in state park units to provide clean, safe, and well-maintained park and recreational areas.

Target #1: Decrease the amount of deferred maintenance in state park units by $10 million per year.
Status #1: The Division of Parks and Outdoor Recreation received $6.0 million in deferred maintenance funding in FY10. The cost of identified maintenance needs in state park units decreased to an estimated $65.8 million in FY10, a decrease of $1.4 million over FY09. Deferred maintenance needs grow an average of $5,000,000 per year; to make progress reducing the inventory of deferred projects, funding of more than $5,000,000 is needed annually.

Year	YTD Total
2010	65,800,000 -2.08%
2009	67,200,000 +4.19%
2008	64,500,000 +25.73%
2007	51,300,000 +4.69%

2006	49,000,000 +13.16%
2005	43,300,000 0%
2004	43,300,000

Mission

Provide for the safe movement of people and goods and the delivery of State services.

Key Program Performance Indicators

Arrow indicates trend: ↑=Improving ↓=Worsening →=Maintaining

FY11 Authorized as of 9/30/2010 (in thousands)

	Funding					Positions		
Department of Transportation & Public Facilities Totals	UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
	$255,305.2	$62,583.9	$247,459.1	$3,957.2	$569,305.4	3,191	437	220

1. **Maintenance & Operations of State Transportation Systems**
Important to the safety of public use of the state's transportation systems; supports economic development in terms of travel industry, general public, and commercial vehicle transportation, etc.

	Funding					Positions		
	UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
	$245,944.0	$52,507.7	$126,540.2	$3,957.2	$428,949.1	2,160	216	129

- **The department's target of increasing by 15 centerline miles per year the national highway system (NHS) non-intermodal roads that meet current standards was exceeded this past year. In FFY2009, 1,521 miles of the State's NHS routes meet national standards, which is an increase of 75 miles over FFY2008.**
- **The department uses a 3-year moving average to track highway transportation safety through traffic fatalities. In 2009, this average was 4.41%, lower than the previous 3-year moving average. Alaska experienced 1.30 traffic fatalities per 100 million VMT in 2009. This compares to the early national estimate of 1.16 fatalities per 100 million VMT, which is the lowest on record at the national level.**
- **The department strives to reduce the number of occupational injuries and illnesses in the department to less than the national average. For 2008 the department's overall incident rate was 3.5, which is slightly higher than the 2008 national average of 3.4.**
- **The number of airports that were closed due to seasonally soft runway conditions or other issues decreased by three (3) from FFY2009 to FFY2010. This exceeded the target of reducing seasonally closed airports by one per year. Additionally from FFY2004 to FFY2010 there has been a reduction of closures from 23 to 8.**
- **Decreasing the deck area of bridges classified by the Federal Highway Administration (FHWA) as structurally deficient or functionally obsolete is calculated using a five year average. In 2009, the five year average for the deck area of all bridges classified as structurally deficient or functionally obsolete decreased by 1.9%, compared to a decrease of 1.7% for the five year average reported in the prior year.**
- **On-time Alaska Marine Highway System vessel departures in 2009 were 92% which is an improvement over the 88% previous 3-year average and well above the industry standard of 75.1%.**

- **In FY2009, Alaska Marine Highway System Vessel Car Deck Capacity Utilization rose by 1%, from 57% to 58%, and for the 4th year in a row, meeting the target of a 1% increase per year.**
- **The rural airport revenues collected in FY2010 increased by 4.45% from the prior fiscal year.**
- **During FFY2010, one runway lighting project was significantly completed, which meets the goal of increasing the number of runways with permanent lighting in remote communities by one per year. In addition, in 2010, the department received Airport Improvement Project funding for two (2) runway lighting projects.**

2. **Measurement Standards & Commercial Vehicle Enforcement**
Reduce risk of accidents or road damage from unsafe commercial vehicles and/or loads.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$2,003.0	$2,596.8	$2,585.2	$0.0	$7,185.0	75	0	0

- **99.3% of the commercial motor vehicles weighed at fixed and mobile inspection sites in FFY 2010 to date, were weight compliant, meeting the department's goal of 99%.**

3. **Transportation & Facilities Construction Program**
Provides the planning and management of construction projects across the department. This includes major repair and rehabilitation of all transportation modes, and state owned facilities, operated and maintained by the State of Alaska.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$7,358.2	$7,479.4	$118,333.7	$0.0	$133,171.3	956	221	91

- **The percentage of administrative and engineering costs compared to total project costs was 19.6% in FFY2010; it remains the same as in FFY2009, and is well within the department's target of 30%.**

Mission

Provide for the safe movement of people and goods and the delivery of State services.

Core Services

- The department is statutorily responsible for the planning, design, construction, maintenance, and operations of transportation facilities and buildings.
- Maintenance and Operations of State Transportation Systems: Highways, Airports, Alaska Marine Highway System, Public Facilities, Ports and Harbors and State Equipment Fleet.
- Measurement Standards & Commercial Vehicle Enforcement
- Transportation and Facilities Construction Program
- Program and Administrative Support

End Result:	Strategies to Achieve End Result
A: Provide a safe transportation system; eliminate injuries, fatalities and property damage. **Details >** • **TARGET #1: By 2020, reduce the 3-year moving average of traffic fatalities per 100 million vehicle miles traveled (VMT) by 3% per year.** • **STATUS #1: The department uses a 3-year moving average to track highway transportation safety through traffic fatalities. In 2009, this average was 4.41%, lower than the previous 3-year moving average. Alaska experienced 1.30 traffic fatalities per 100 million VMT in 2009. This compares to the early national estimate of 1.16 fatalities per 100 million VMT, which is the lowest on record at the national level.**	A1: Build and improve state-owned roads and highways to appropriate department standards. **Details >** • **TARGET #1: Increase by 15 centerline miles per year the national highway system (NHS) non-intermodal routes that meet current department standards.** • **STATUS #1: The department's target of increasing by 15 centerline miles per year the national highway system (NHS) non-intermodal roads that meet current standards was exceeded this past year. In FFY2009, 1,521 miles of the State's NHS routes meet national standards, which is an increase of 75 miles over FFY2008.** • **TARGET #2: Decrease by 3% on a five year average the deck area of all bridges (regardless of**

	ownership) classified by the Federal Highway Administration (FHWA) as structurally deficient or functionally obsolete. • **STATUS #2: Decreasing the deck area of bridges classified by the Federal Highway Administration (FHWA) as structurally deficient or functionally obsolete is calculated using a five year average. In 2009, the five year average for the deck area of all bridges classified as structurally deficient or functionally obsolete decreased by 1.9%, compared to a decrease of 1.7% for the five year average reported in the prior year.** A2: Preserve or improve condition of highway infrastructure. **Details >** • **TARGET #1: Increase Pavement Serviceability Rating (PSR) to 3.3 by October 2012.** • **STATUS #1: Pavement Serviceability Rating (PSR) is a national standard for reporting surface transportation condition and performance using a 0-5 rating, where 5 is perfect and 0 is failed. The average PSR for 2006 – 2010 was 3.1 (Fair), compared to last year's average of 3.2.**
End Result: ▶▶▶	**Strategies to Achieve End Result**
B: Provide a transportation infrastructure that supports and promotes economic growth. **Details >** • **TARGET #1: 80% of strategy targets are met or exceeded in the fiscal year towards the end result of providing a transportation infrastructure that supports and promotes economic growth.** • **STATUS #1: 83% of strategies met or exceeded targets in this area, providing a transportation infrastructure that supports and promotes economic growth.**	B1: Enhance economic activities through key transportation services. **Details >** • **TARGET #1: Alaska Marine Highway System meets or exceeds industry standard for on-time departures.** • **STATUS #1: On-time Alaska Marine Highway System vessel departures in 2009 were 92% which is an improvement over the 88% previous 3-year average and well above the industry standard of 75.1%.**

- **TARGET #2: Reduce the number of airports that are closed due to seasonally soft runway conditions or other issues by one (1) per federal fiscal year.**
- **STATUS #2: The number of airports that were closed due to seasonally soft runway conditions or other issues decreased by three (3) from FFY2009 to FFY2010. This exceeded the target of reducing seasonally closed airports by one per year. Additionally from FFY2004 to FFY2010 there has been a reduction of closures from 23 to 8.**

- **TARGET #3: Increase the number of runways in remote communities with permanent runway lighting by one (1) per federal fiscal year through FFY12.**
- **STATUS #3: During FFY2010, one runway lighting project was significantly completed, which meets the goal of increasing the number of runways with permanent lighting in remote communities by one per year. In addition, in 2010, the department received Airport Improvement Project funding for two (2) runway lighting projects.**

B2: Enhance economic activities through increased State revenue. **Details >**

- **TARGET #1: Increase AMHS Vessel Car Deck Utilization by at least 1% over the previous year.**
- **STATUS #1: In FY2009, Alaska Marine Highway System Vessel Car Deck Capacity Utilization rose by 1%, from 57% to 58%, and for the 4th year in a row, meeting the target of a 1% increase per year.**

- **TARGET #2: Increase revenue collected at rural airports by 5% over prior state fiscal year.**
- **STATUS #2: The rural airport revenues collected in FY2010**

	increased by 4.45% from the prior fiscal year. B3: Improve efficiency. **Details >** • **TARGET #1: 80% or above in customer service satisfaction with department services.** • **STATUS #1: In 2010 public satisfaction with the department's services resulted in a total satisfaction rating of 74% (combining very satisfied with somewhat satisfied). This is a decrease from the 2008 rating of 79.9%. Those reporting they were very satisfied, however, increased from 16.5% in 2008 to 26% in 2010.**
End Result:	**Strategies to Achieve End Result**
C: Carry out safe operations. **Details >** • **TARGET #1: Reduce the number of occupational injuries and illnesses in the department to less than the national average.** • **STATUS #1: The department strives to reduce the number of occupational injuries and illnesses in the department to less than the national average. For 2008 the department's overall incident rate was 3.5, which is slightly higher than the 2008 national average of 3.4.**	C1: Improve employees' awareness of workplace safety requirements. **Details >** • **TARGET #1: Reduce the number of occupational injuries and illnesses to less than the national average in the Alaska International Airport System (AIAS).** • **STATUS #1: For 2008 the overall incident rate for the Anchorage and Fairbanks Int. Airports was 5.2, which is lower than the 2008 national average of 5.8.** • **TARGET #2: Reduce the number of occupational injuries and illnesses to less than the national average within each of the three Regions and the MS/CVE Division.** • **STATUS #2: For 2008, the Incident rate for all (3) regions and MS/CVE was 4.05, which is lower than the 2008 national average of 4.4.** • **TARGET #3: Reduce the number of occupational injuries and illnesses to less than the national average in Statewide Operations.**

	• **STATUS #3: For 2008, the Incident Rate for Statewide Functions was 2.9, which is higher than the 2008 national average of 2.3.** • **TARGET #4: Reduce the number of occupational injuries and illnesses to less than the national average for Facilities functions.** • **STATUS #4: In 2008, the Incident rate for Facilities was 0, which is significantly lower than the 2008 national average of 1.2.**
End Result: ➤➤➤	**Strategies to Achieve End Result**
D: Reduce the risk of accidents or road damage from unsafe commercial vehicles and/or loads. **Details >** • **TARGET #1: 99% commercial motor vehicle weight compliance at fixed and mobile inspection sites.** • **STATUS #1: 99.3% of the commercial motor vehicles weighed at fixed and mobile inspection sites in FFY 2010 to date, were weight compliant, meeting the department's goal of 99%.**	D1: Reduce number of illegal oversize/overweight Commercial Motor Vehicles (CMVs) on highways. **Details >** • **TARGET #1: Increase the number of roadside (mobile enforcement) commercial truck inspections by 2% over the previous year.** • **STATUS #1: The number of roadside commercial truck inspections decreased in 2009 by 23.72%, bringing total inspections to 3,929.**
End Result: ➤➤➤	**Strategies to Achieve End Result**
E: Reduce design and construction project management costs. **Details >** • **TARGET #1: Maintain the percentage of administrative and engineering costs below 30% of total project costs.** • **STATUS #1: The percentage of administrative and engineering costs compared to total project costs was 19.6% in FFY2010; it remains the same as in FFY2009, and is well within the department's target of 30%.**	E1: Minimize administrative and engineering costs associated with projects. **Details >** • **TARGET #1: Maintain the percentage of administrative and engineering costs below 30% of total project costs for Central Region.** • **STATUS #1: The percent of administrative and engineering costs compared to total project costs for Central Region decreased by 5% to 18% in FFY2010, well within the department's target of 30%.**

- **TARGET #2: Maintain the percentage of administrative and engineering costs below 30% of total project costs for Northern Region.**
- **STATUS #2: The percent of administrative and engineering costs compared to total project costs for Northern Region increased by 1% to 21% in FFY2010, well within the department's target of 30%.**
- **TARGET #3: Maintain the percentage of administrative and engineering costs below 30% of total project costs for Southeast Region.**
- **STATUS #3: The percent of administrative and engineering costs compared to total project costs for Southeast Region increased by 11% to 21% in FFY2010, well within the department's target of 30%.**

Performance Detail

A: Result - Provide a safe transportation system; eliminate injuries, fatalities and property damage.

Target #1: By 2020, reduce the 3-year moving average of traffic fatalities per 100 million vehicle miles traveled (VMT) by 3% per year.
Status #1: The department uses a 3-year moving average to track highway transportation safety through traffic fatalities. In 2009, this average was 4.41%, lower than the previous 3-year moving average. Alaska experienced 1.30 traffic fatalities per 100 million VMT in 2009. This compares to the early national estimate of 1.16 fatalities per 100 million VMT, which is the lowest on record at the national level.

Year	3 Year Average % Change
2009	-4.41%
2008	- 3.87%
2007	- 8.72%
2006	- 9.04%
2005	- 6.26%
2004	3.09%

2003	- 4.59%

Analysis of results and challenges: The department's 3-year trend line showed a greater than 3% reduction for all years except 2004. Between 2007-2009 Alaska averaged 69 traffic fatalities, a decrease of 14 fatalities in comparison to the pre-Strategic Highway Safety Plan years of 2004-2006, which had an average of 83 traffic fatalities.

The U.S. national fatality rate decreased annually between 1994 and 2004, from 1.73 fatalities per 100 million vehicle miles traveled (VMT) in 1994, to 1.44 fatalities/100 million VMT in 2004, before again dropping to 1.27 fatalities per 100 million VMT in 2008. 2009 data will be available at the end of the 2010 calendar year. The final national VMT and fatalities for the previous year are typically reported late in the succeeding year. However, the early national estimate (http://www-nrd.nhtsa.dot.gov/pubs/811291.pdf) is 1.16 fatalities per 100 million VMT, which is the lowest on record. The 2008 national fatality rate was 1.25 fatalities per 100 million VMT. The 2009 final national rate will posted when available.

Reducing fatalities is an important indicator of the overall safety of the highway system, but fatality crashes are also a relatively rare outcome and thus the data can be subject to significant changes year-to-year. For example, a single crash event involving a large number of fatalities (such as a crash event involving many passengers in a van or bus) would skew the year's outcome significantly. For this reason, the data is smoothed by using a moving average of three or more years. Currently, the FHWA national practice is considering a three-year average.

The seasonal number of fatalities per month peaks each summer, when there is more economic and recreational activity thus more driving. A second peak occurs in winter, with long periods of darkness and poor driving conditions. Both spring and fall experience a lower level of fatalities, reflecting generally better weather conditions, but traffic is not yet at the peak of total driving.

Historically, the most frequently cited behavioral contributors to fatal and serious injury crashes in Alaska are impaired driving, unsafe speed, and failure to heed traffic control devices. Crash types resulting in the greatest number of fatalities include run-off-road, head-on, and intersection crashes.

The overall number of fatalities has been dropping since 2004 when it was at 101. The second highest year since then was 2007 with 82 and the lowest year was 2008 with 62 fatalities. The causes and effects of this decline are hard to link, but the increase in seatbelt usage, the higher enforcement in highway safety corridors and the new Bureau of Highway Patrol funded from the Alaska Highway Safety Office are all thought to be contributing factors. A countervailing factor at this time would be the increase in distracted driving from smart phones, including texting, email and internet use while driving.

A1: Strategy - Build and improve state-owned roads and highways to appropriate department standards.

Target #1: Increase by 15 centerline miles per year the national highway system (NHS) non-intermodal routes that meet current department standards.
Status #1: The department's target of increasing by 15 centerline miles per year the national

highway system (NHS) non-intermodal roads that meet current standards was exceeded this past year. In FFY2009, 1,521 miles of the State's NHS routes meet national standards, which is an increase of 75 miles over FFY2008.

National Highway System (NHS) Miles

Fiscal Year	Miles	Meeting National Stds	Improved Centerline
FFY 2009	2151	1521	75
FFY 2008	2148	1446	15
FFY 2007	2147	1431	11
FFY 2006	2147	1420	35
FFY 2005	2123	1385	41
FFY 2004	2113	1344	41
FFY 2003	2113	1303	82

*Methodology: Methodology: *Based on centerline miles that are not intermodal connectors, ramps, or wyes. Source: http://www.dot.state.ak.us/stwdplng/highwaydata/routelists.shtml#nhs_routes.*

Analysis of results and challenges: As of 2009, of the 2,151 NHS centerline miles there are 1,521 miles (70.7%) that meet national standards and 630 miles (29.3%), including much of the Dalton Highway, which do not meet these standards.

Target #2: Decrease by 3% on a five year average the deck area of all bridges (regardless of ownership) classified by the Federal Highway Administration (FHWA) as structurally deficient or functionally obsolete.
Status #2: Decreasing the deck area of bridges classified by the Federal Highway Administration (FHWA) as structurally deficient or functionally obsolete is calculated using a five year average. In 2009, the five year average for the deck area of all bridges classified as structurally deficient or functionally obsolete decreased by 1.9%, compared to a decrease of 1.7% for the five year average reported in the prior year.

Square Feet of Structurally Deficient & Functionally Obsolete Bridge Deck

Year	YTD Total	% Change (5 yr Avg)
2009	1,498,700	-1.9%
2008	1,471,400	-1.7%
2007	1,549,600	.6%
2006	1,581,800	1.6%
2005	1,803,300	4.6%
2004	1,649,800	n/a
2003	1,614,200	n/a

2002	1,503,000	n/a
2001	1,455,800	n/a

Analysis of results and challenges: Because the deficient bridge list is so dynamic a five year average comprised of the reporting year and four previous years is used as the metric.

It is important to note that the deficient bridge list is dynamic. Factors affecting bridge condition include:

•Age. Alaska's bridge population continues to age and currently 13% of the publically owned bridges are older than 50 years, which is nearing the end of their 50 to 75 year design life.

•Damage. Bridges may be damaged by a variety of means including: Overstressing primary members, steel corrosion, timber deterioration and rot, collision, scour, and earthquakes.

•Functionally obsolete by definition. New marine transfer structures designed for low speed, one way traffic may be considered functionally obsolete based on federal definition yet are adequate for their intended service.

•Rehabilitation and replacement. Structurally deficient bridges are typically removed from the list following rehabilitation or replacement. Replacement bridges are typically longer and wider than the bridge being replaced.

•Changes in annual daily traffic (ADT) and functional classification. Changes in ADT and functional classification may affect the determination if a bridge is deficient.

The deck area of structurally deficient and functionally obsolete (deficient) bridges, as defined by the FHWA, is used to distribute federal funds to state transportation departments. A reduction in the deck area of deficient bridges is believed to be a reasonable metric to evaluate how well the Department is addressing deficient bridge needs. Local Agency bridges are an important component of the state's transportation system and are included in this metric. However, the Department's ability to remedy deficiencies on non-state owned bridges is limited.

Biennial bridge inspections are required by Federal regulations to assure the safety of the traveling public. Using information from these inspections staff complete the following:

•Load rate bridges to determine their vehicle live load capacity. These calculations are used to permit overweight vehicles across bridges.

•Load post and close bridges as necessary.

•Develop repair recommendations to address maintenance and structural needs.

•Design repairs to address bridge needs.

•Because many of Alaska's roads do not have reasonable or, in many locations, any available detour routes recent bridge projects have focused on maintaining road access by rehabilitating or replacing structurally deficient bridges.

A2: Strategy - Preserve or improve condition of highway infrastructure.

Target #1: Increase Pavement Serviceability Rating (PSR) to 3.3 by October 2012.
Status #1: Pavement Serviceability Rating (PSR) is a national standard for reporting surface transportation condition and performance using a 0-5 rating, where 5 is perfect and 0 is failed. The average PSR for 2006 – 2010 was 3.1 (Fair), compared to last year's average of 3.2.

Yearly Statewide PSR Average

Year	Stwd Average PSR
2010	3.1
2009	3.2
2008	3.1
2007	3.0
2006	3.0

Methodology: Statewide PSR Average by Year

Analysis of results and challenges: The Pavement Serviceability Rating (PSR) was established as a National Standard in the "1995 Status of the Nation's Surface Transportation System: Condition and Performance – Report to Congress". It is a rating system from 0 to 5, where 5 is perfect and 0 is failed.

The rating system is broken down as:

Rating-PSR Value
Very Good - > 4.0
Good - >3.5 to 3.9
Fair - 3.1 to 3.4
Mediocre - 2.6 to 3.0
Poor - < 2.5

The ratings for Alaska were conducted for Class 1-4 which are all paved DOT-owned roadways and do not include local streets. They do include arterials and collectors (e.g. College Road in Fairbanks, C Street in Anchorage, and North Douglas Highway in Juneau).

The PSR value is determined from a mathematical formula using the International Roughness Index (IRI) and the rut depth measurements collected annually. The formula is slightly modified for the different classes of roadway equalizing the ratings.

The challenges in reaching the target rating of 3.3 are primarily due to rutting and smoothness factors:

•Rutting is mostly caused by studded tire usage for much of the year.

•Smoothness is affected by surface irregularities such as potholes, unevenness due to heaving of the surface from ice accumulation, depressions caused from thawing, and cracks.

•Permafrost prone areas are a special challenge requiring engineers to design for the delicate

balance to keep frozen ground frozen.

•Thermal cracking also seems to be a standard for Alaska at a rate of 50 cracks per mile. This results from a thermal material property of the long "ribbon" of asphalt. It will shrink in cold temperatures in all directions and break in a fairly uniform manner.

B: Result - Provide a transportation infrastructure that supports and promotes economic growth.

Target #1: 80% of strategy targets are met or exceeded in the fiscal year towards the end result of providing a transportation infrastructure that supports and promotes economic growth.
Status #1: 83% of strategies met or exceeded targets in this area, providing a transportation infrastructure that supports and promotes economic growth.

Analysis of results and challenges: The department uses a wide variety of strategies to provide a safe transportation infrastructure that supports and promotes economic growth. The infrastructure includes surface, air, and water transportation systems. These strategies range from providing timely, reliable AMHS vessel departures and increased rural airport availability to increasing revenue received by the department. In addition, the department reaches out to public users of the transportation systems to ascertain customer satisfaction with services and gain insight into areas within the department that require additional or special attention. As a result of these myriad strategies, the department has an overall positive economic impact on the state.

B1: Strategy - Enhance economic activities through key transportation services.

Target #1: Alaska Marine Highway System meets or exceeds industry standard for on-time departures.
Status #1: On-time Alaska Marine Highway System vessel departures in 2009 were 92% which is an improvement over the 88% previous 3-year average and well above the industry standard of 75.1%.

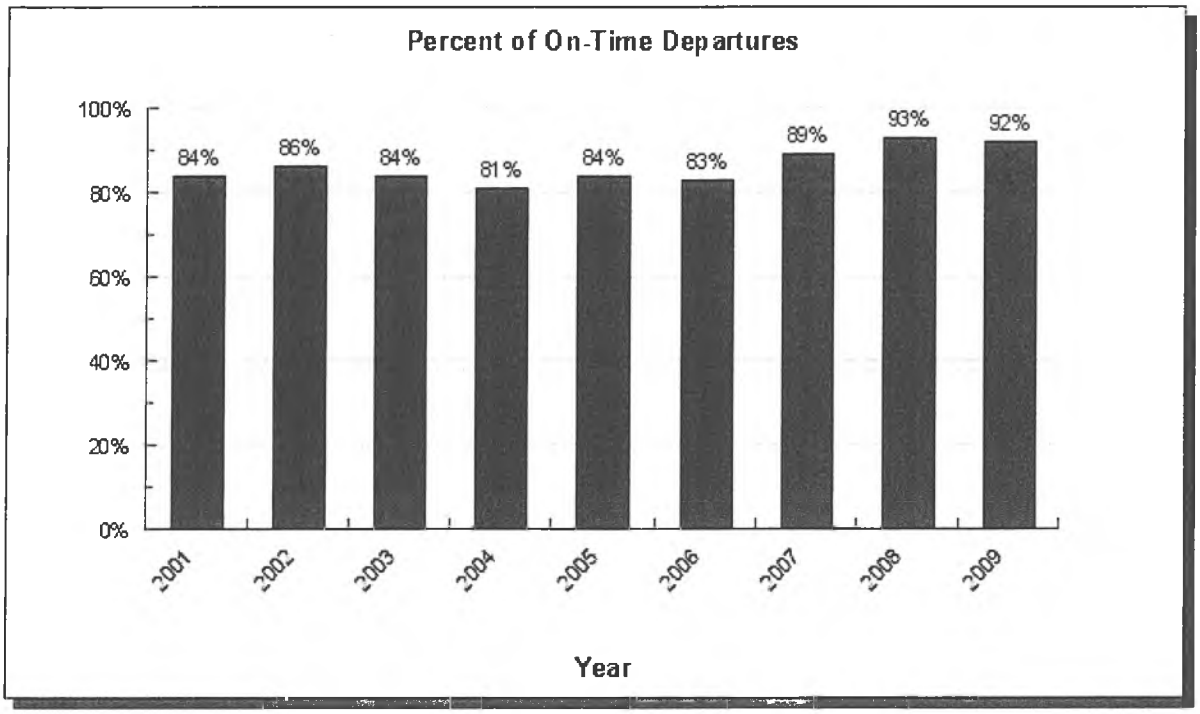

Table contains no rows.

Analysis of results and challenges: The target is for the Alaska Marine Highway System (AMHS) to consistently exceed the on-time departure benchmark of 75.1%. An on-time ferry departure is within 30 minutes of the scheduled departure time.

Numerous events can cause delays in ferry departure times, especially weather and tides. An additional relevant factor is the time it takes to load/unload large and/or low slung vehicles (RV's, trucks w/trailers, heavy equipment) during busy periods. Most of these factors are out of the control of AMHS. Nevertheless, making schedule modifications in the event of continual and systematic delays are within the department's control.

Target #2: Reduce the number of airports that are closed due to seasonally soft runway conditions or other issues by one (1) per federal fiscal year.

Status #2: The number of airports that were closed due to seasonally soft runway conditions or other issues decreased by three (3) from FFY2009 to FFY2010. This exceeded the target of reducing seasonally closed airports by one per year. Additionally from FFY2004 to FFY2010 there has been a reduction of closures from 23 to 8.

Change in Number of Airports that are Closed Seasonally

Fiscal Year	YTD Seasonal Closures	Change
FFY 2010	8	Reduction of 3
FFY 2009	11	Reduction of 2
FFY 2008	13	Reduction of 2
FFY 2007	15	Reduction of 2
FFY 2006	17	Reduction of 4

FFY 2005	21	Reduction of 2
FFY 2004	23	

Analysis of results and challenges: At the beginning of FFY2010 there were 11 airports (out of 253 total rural airports with which the department is involved) on the seasonal closure list with a target of improving by one (1) per year. By the end of FFY2010 only eight (8) airports experienced seasonal closure due to soft runway conditions or other issues. The Huslia and Kongiganak airports were improved during FFY2010. The Savoonga Airport was removed from the Temporary Seasonal Closure list in FFY2010, based on information from the airport manager that it was only closed briefly during heavy snow events which should not be considered as a temporary seasonal closure. The remaining eight (8) airports are: Akiachak; Ambler; Golovin; Koyuk; Kwigillingok; Nanwalek; Portage Creek; and Red Devil.

The department expects to meet the target of reducing the Temporary Seasonal Closure list by a minimum of one (1) airport annually for FFY2010 and FFY2011. After FFY2011 the delivery of improvements to the seasonal closure list is not expected on an annual basis; rather, it is expected to be one (1) airport every three (3) years. The challenges to addressing the Seasonal Closure on a continued accelerated basis are: 1) other competing priorities; 2) some airports are not eligible for federal funding; 3) extended project development times to acquire Native Allotments; and 4) very high cost for the benefit achieved.

Target #3: Increase the number of runways in remote communities with permanent runway lighting by one (1) per federal fiscal year through FFY12.
Status #3: During FFY2010, one runway lighting project was significantly completed, which meets the goal of increasing the number of runways with permanent lighting in remote communities by one per year. In addition, in 2010, the department received Airport Improvement Project funding for two (2) runway lighting projects.

Fiscal Year	Lighting Completed
FFY 2010	1 -50%
FFY 2009	2 +100%
FFY 2008	1 0%
FFY 2007	1

Analysis of results and challenges: Not all communities in Alaska have adequate runway surfaces and lighting to allow night time aircraft operations. The department's goal is to make rural communities accessible for medivac and other emergency aircraft on a 24 hour per day basis. A concerted effort has been taken to provide permanent lighting, portable runway edge lights or portable helicopter landing zone lighting in rural communities. There are still communities where permanent improvements are feasible and those airports are the focus of this measure.

The department's goal is to increase the number of lighted runways in remote communities by a minimum of one each federal fiscal year. In addition, the department intends to acquire

enough grant funding to construct permanent improvements at a minimum of one remote community each year through FFY12. The difference between funding and project completion targets is due to the complexity of projects in remote villages. It is not unusual for a project to take two to four years to complete.

The Department has achieved the funding goal for 2010 through a runway lighting system that was completed at Kongiganak Airport.

B2: Strategy - Enhance economic activities through increased State revenue.

Target #1: Increase AMHS Vessel Car Deck Utilization by at least 1% over the previous year.
Status #1: In FY2009, Alaska Marine Highway System Vessel Car Deck Capacity Utilization rose by 1%, from 57% to 58%, and for the 4th year in a row, meeting the target of a 1% increase per year.

Car Deck Capacity Utilization

Fiscal Year	YTD Total	Variance
FY 2009	58%	+1%
FY 2008	57%	+5%
FY 2007	52%	+5%
FY 2006	47%	

Methodology: The analysis converts capacity data into vehicle miles by taking the sum of each trip's vehicle capacity and multiplying it by the distance the ship travels. This produces the capacity number. Next, the analysis considers the actual sum of lineal feet of vehicle that were on board and multiplies that number by the distance they traveled. This produces the utilized number. Finally, the utilized number is divided by the capacity number to produce the utilization percentage.

Analysis of results and challenges: In FY2010, the Alaska Marine Highway System (AMHS) saw increased vehicle utilization for the 5th year in a row. This is a direct result of providing a consistent schedule and ever increasing marketing strategies as well as appropriate asset deployment.

AMHS remains committed to the current schedule and will strive for the earliest possible schedule releases. It is anticipated that car deck utilization will continue to increase.

Target #2: Increase revenue collected at rural airports by 5% over prior state fiscal year.
Status #2: The rural airport revenues collected in FY2010 increased by 4.45% from the prior fiscal year.

Fiscal Year	Revenue	% Change
FY 2010	$4,090.7	4.45%
FY 2009	$3,897.7	6.3%

FY 2008	$3,666.6	-1.84%
FY 2007	$3,735.2	12.96%
FY 2006	$3,306.7	-1.46%
FY 2005	$3,355.6	not available

Analysis of results and challenges: Statewide Aviation fell short of this target for FY2010; the aviation industry in our state continues to experience the effects of the current nationwide economic downturn. We work to meet our goal by responding to land-use inquiries promptly, processing applications quickly, using a web-based application process, and improving collection methods; as well as pursuing revenue opportunities through development of lease lots and lease lot access and amenities.

In addition, a 2006 market survey indicated that many rural land lease rental rates are well below market. Through 2015, statewide leasing regulations gradually increase rural airport land lease rental rates. Increasing rates is required to: 1) offset the rising costs of maintenance, management and operating costs of the rural airports; and 2) meet Federal Aviation Administration (FAA) requirements to: a) charge fair market rent for interim, non-aviation land use; and b) develop airports that are self sustaining. It is important to note that the phased in implementation of rate increases at the rural airports over several years provides airport businesses the opportunity to plan ahead and develop budgets accordingly.

B3: Strategy - Improve efficiency.

Target #1: 80% or above in customer service satisfaction with department services.
Status #1: In 2010 public satisfaction with the department's services resulted in a total satisfaction rating of 74% (combining very satisfied with somewhat satisfied). This is a decrease from the 2008 rating of 79.9%. Those reporting they were very satisfied, however, increased from 16.5% in 2008 to 26% in 2010.

Customer Satisfaction (very satisfied & somewhat satisfied)

Year	YTD Total	Very Satisfied	Somewhat Satisfied
2010	74.0%	26.0%	48.0%
2008	79.9%	16.5%	63.4%
2005	80.3%	not available	not available

Analysis of results and challenges: In January 2010, the department contracted with a private firm to conduct a survey to find out how the department does providing transportation services in Alaska, including roads, airports and ferry service. 1,239 people across the state participated in this survey. Even though the department has done well, resources are being directed to mitigate those problem areas identified in the survey (e.g., congestion relief, road smoothness, durable materials and rut repair). Areas of highest strength included directional signs, warning signs, road design, brush cutting and guardrails.

The department customer service satisfaction survey is conducted every other year. 1,200

people across the state participated in the January 2008 survey.

This measure will continue to gauge the department's success in addressing the survey issues.

C: Result - Carry out safe operations.

Target #1: Reduce the number of occupational injuries and illnesses in the department to less than the national average.

Status #1: The department strives to reduce the number of occupational injuries and illnesses in the department to less than the national average. For 2008 the department's overall incident rate was 3.5, which is slightly higher than the 2008 national average of 3.4.

Year	Region/MSCVE	Aviation	Facilities	Statewide	Department Total
Average	4.4	5.8	1.2	2.3	3.4
2008	4.05	5.2	0	2.9	3.5

Methodology: Average=National Average

Analysis of results and challenges: At present the department incident rate uses an average of recorded injuries over the 2008 calendar year and covers four Industry classification codes (NAICS). Each of these Industry classification codes are assigned nationally to a specific employee class, based on typical job functions for that class. It is important to note, typical job functions will vary across the classification index. The codes used in this analysis are as follows:

Support activities for road transportation in three regional elements and the Measurement Standards and Commercial Vehicle Enforcement (MS/CVE) Division (NAICS 488490).

Aviation functions (NAICS 488119).

Facilities support functions (NAICS 561210).

All other statewide functions, i.e.,Highway, Street & Bridge Construction (NAICS 237310).

The department began tracking and recording data in this fashion in 2008; previous data is not available. The national averages for Calendar year 2009 will be available within the next six months. State data for 2009 is being compiled and was not readily available due to this being a new measure.

The challenges for this Department are the inhospitable weather and terrain that employees work in with some employees working alone in areas. Other challenges include the diversity of jobs within the Department being maintenance and operations, construction, aviation, and marine operations where each has their own set of work practices. Each of the above mentioned operations are measured nationally under separate North American Index Coding System (NAICS) criteria because of the differences in operations and work practices. Because of the differences it is important that all aspects of safety and health are managed and monitored to reduce risk to lower our Incidence Rate.

To achieve the desired results all employees need to be trained and monitored to ensure this goal is met. Currently the Department has three actual safety professionals: one in Northern Region, one as the State-wide Program Coordinator for Safety and Health, and one in the Alaska Marine Highway System. The safety professional positions are important to ensure that training, facility inspections, and advice and consultation are provided to all employees to help mitigate/abate hazards, thus reducing injuries and illnesses.

C1: Strategy - Improve employees' awareness of workplace safety requirements.

Target #1: Reduce the number of occupational injuries and illnesses to less than the national average in the Alaska International Airport System (AIAS).

Status #1: For 2008 the overall incident rate for the Anchorage and Fairbanks Int. Airports was 5.2, which is lower than the 2008 national average of 5.8.

Analysis of results and challenges: AIAS safety management had included a full time safety employee as well as an active management role in targeting and eliminating hazards. This is a new target for this year, comparing injuries and illnesses to a national average benchmark. There are no comparisons compiled yet for current or previous years.

Target #2: Reduce the number of occupational injuries and illnesses to less than the national average within each of the three Regions and the MS/CVE Division.
Status #2: For 2008, the Incident rate for all (3) regions and MS/CVE was 4.05, which is lower than the 2008 national average of 4.4.

Analysis of results and challenges: Specific job functions are varied but include some similar tasks to those nationally. We are seeing a significant turnover in the workforce that brings with it an infusion of younger employees with high level of motivation to succeed. Challenges will include a continued forward progression to maintain and improve safe operations. This is a new target for this year, comparing injuries and illnesses to a national average benchmark. There are no comparisons compiled yet for current or previous years.

Target #3: Reduce the number of occupational injuries and illnesses to less than the national average in Statewide Operations.

Status #3: For 2008, the Incident Rate for Statewide Functions was 2.9, which is higher than the 2008 national average of 2.3.

Analysis of results and challenges: Much of the department's functions are unlike those of any other transportation element nationally. Inclement weather conditions, isolated and remote operational elements as well as diverse system, division and regional elements add to this dynamic. Each of these areas is consistently reviewed, monitored and adjusted as conditions warrant preserving the highest level of safety to all employees. An increased effort will be targeted to lower the overall rate in all future undertakings. Challenges include a decreased number of dedicated safety personnel within the department responsible for finding and

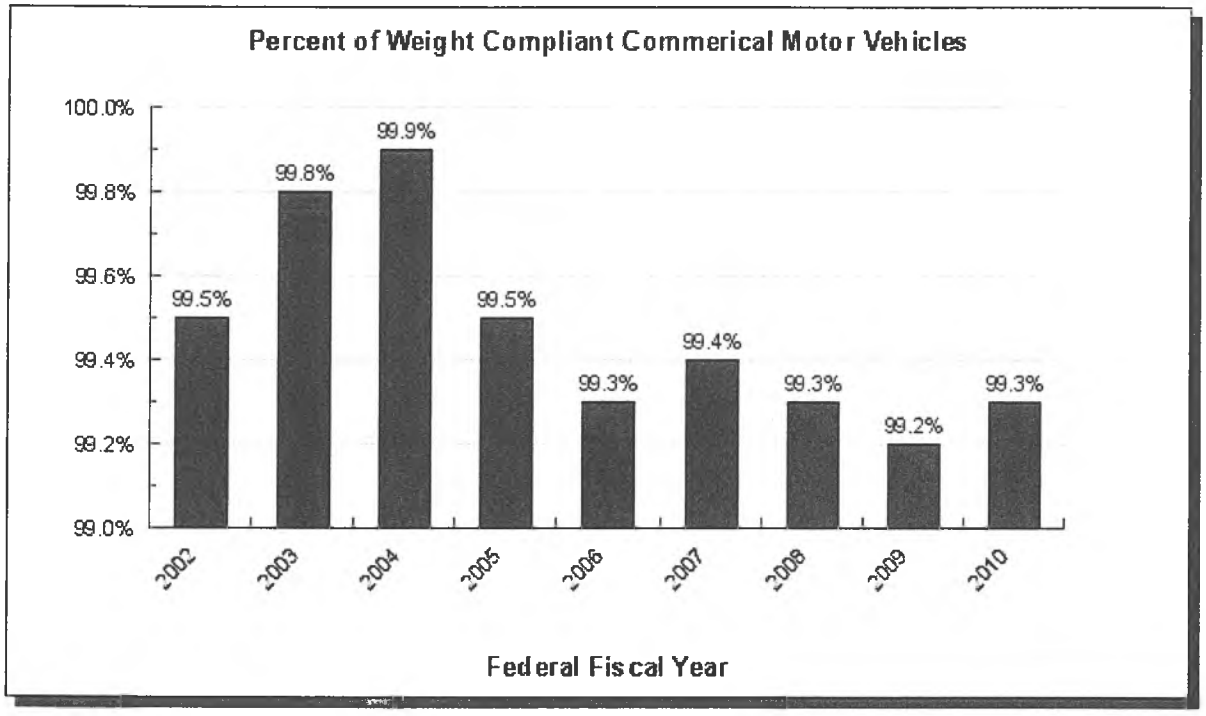
correcting discrepancies before they escalate into incidents. This is a new target for this year, comparing injuries and illnesses to a national average benchmark. There are no comparisons compiled yet for current or previous years.

Target #4: Reduce the number of occupational injuries and illnesses to less than the national average for Facilities functions.
Status #4: In 2008, the Incident rate for Facilities was 0, which is significantly lower than the 2008 national average of 1.2.

Analysis of results and challenges: In recent years Statewide Facilities functions have focused on improving the overall safety of employees by increasing safety awareness at all levels of operations. Challenges include continuing to provide essential functions within limited budget, time constraints as well as a shrinking workforce. To achieve a sustained superior incident rate facilities management will maintain its focus on excellence. This is a new target for this year, comparing injuries and illnesses to a national average benchmark. There are no comparisons compiled yet for current or previous years.

D: Result - Reduce the risk of accidents or road damage from unsafe commercial vehicles and/or loads.

Target #1: 99% commercial motor vehicle weight compliance at fixed and mobile inspection sites.
Status #1: 99.3% of the commercial motor vehicles weighed at fixed and mobile inspection sites in FFY 2010 to date, were weight compliant, meeting the department's goal of 99%.



Methodology: Data is reported on a federal fiscal year basis.

Table contains no rows.
Analysis of results and challenges: Division inspection efforts focus on maintaining the high level of compliance at weigh stations and improving compliance at the roadside inspection

locations. Weight compliant commercial motor vehicles do not contribute to premature deterioration of Alaska's roads and bridges.

The department continues to place emphasis on inspections through expanded mobile enforcement coverage, authorized traffic stops by selected and trained Commercial Vehicle Enforcement Officers, and conducting joint operations with the Alaska State Troopers and local police departments. Measurement Standards & Commercial Vehicle Enforcement (MS&CVE) does not interact with privately owned vehicles or their drivers; however the division is authorized by the Federal Motor Carrier Safety Administration (FMCSA) to use up to 5% of the Motor Carrier Safety Assistance Program (MCSAP) budget to fund other agencies to assist in these mandated efforts. MS&CVE routinely enters into contracts with local law enforcement agencies throughout the State to supplement enforcement efforts and to increase and encourage safe operations of commercial vehicles. Additionally this past year, MS&CVE funded the Alaska State Troopers to enhance enforcement efforts on unsafe practices involving CMVs on the Elliot and Dalton Highway (Haul Road), from Fairbanks to the end of the road.

D1: Strategy - Reduce number of illegal oversize/overweight Commercial Motor Vehicles (CMVs) on highways.

Target #1: Increase the number of roadside (mobile enforcement) commercial truck inspections by 2% over the previous year.
Status #1: The number of roadside commercial truck inspections decreased in 2009 by 23.72%, bringing total inspections to 3,929.

Fiscal Year	Total Inspections	% Change
FFY 2009	3,929	-23.72%
FFY 2008	5,151	-9.82%
FFY 2007	5,712	+5.36%
FFY 2006	5,421	+3.85%
FFY 2005	5,220	+66.4%
FFY 2004	3,137	+20.36%

Methodology: Data is reported on a federal fiscal year basis.

Analysis of results and challenges: Commercial Motor Vehicles (CMVs) that do not routinely pass through a fixed weigh station location for inspection are more likely to be non-compliant in both size and weight. Division inspection efforts focus on identifying and correcting non-compliant oversize and overweight vehicles as both pose serious threats to highway safety and premature deterioration of Alaska's roads and bridges. The frequency of roadside commercial vehicle inspections will be monitored to ensure that non-compliant CMVs operating on the public roadways are found and inspected.

Measurement Standards & Commercial Vehicle Enforcement (MS&CVE) did not achieve the target of increasing roadside (mobile enforcement) inspections by 5% over the previous year. The main reason for the decrease in the number of roadside inspections is due to position vacancies that, for budgetary purposes, were left unfilled longer than normal. Four Commercial

Vehicle Enforcement Officers were recently hired and are in the process of being trained. While MS&CVE has continued to conduct roadside inspections, these are now being done by a number of less experienced officers, thereby decreasing the number of overall inspections. As these officers become more experienced, we anticipate the number of roadside inspections to increase to previous levels. The time that it takes to train an officer to MS&CVE standards is lengthy and is continuous throughout their career.

E: Result - Reduce design and construction project management costs.

Target #1: Maintain the percentage of administrative and engineering costs below 30% of total project costs.
Status #1: The percentage of administrative and engineering costs compared to total project costs was 19.6% in FFY2010; it remains the same as in FFY2009, and is well within the department's target of 30%.

Fiscal Year	Central Region	Northern Region	Southeast Region	Department Total
FFY 2010	18%	21%	21%	20%
FFY 2009	23%	20%	10%	20%
FFY 2008	24%	19%	10%	20%
FFY 2007	22%	24%	26%	24%
FFY 2006	21%	23%	13%	18%
FFY 2005	20%	22%	23%	21%
FFY 2004	21%	26%	23%	22%

Analysis of results and challenges: The aim of this measure is to get more capital dollars into construction or into other related fieldwork by maintaining overhead costs at an acceptable level. This will benefit the private sector and the travelling public. Percentages are calculated by summing up all administrative and engineering costs, i.e. all costs that are not direct construction payments, right-of-way acquisition/relocation payments, or utility relocation payments, and dividing those administrative and engineering costs by the total of all project costs.

It is anticipated that this measure will undergo cost increases during FY2011 and into the future to account for increased storm water compliance during the design and construction of our projects due to new regulations. Nationally, erosion and sediment control allowances vary from about 1% to 10% of construction costs. The department is anticipating an overall 2% increase in administrative and engineering costs to account for storm water compliance.

E1: Strategy - Minimize administrative and engineering costs associated with projects.

Target #1: Maintain the percentage of administrative and engineering costs below 30% of total project costs for Central Region.

Status #1: The percent of administrative and engineering costs compared to total project costs for Central Region decreased by 5% to 18% in FFY2010, well within the department's target of 30%.

Analysis of results and challenges: Central Region has maintained a highly consistent percentage of administrative and engineering costs compared to total project costs and has met the target for six years in a row.

Challenges in continuing to meet this target include an increase in the number of employee retirements coupled with increased federal regulatory requirements.

Target #2: Maintain the percentage of administrative and engineering costs below 30% of total project costs for Northern Region.
Status #2: The percent of administrative and engineering costs compared to total project costs for Northern Region increased by 1% to 21% in FFY2010, well within the department's target of 30%.

Analysis of results and challenges: Northern Region has consistently met the target percentage of administrative and engineering costs compared to total project costs and for six years in a row.

Challenges in continuing to meet this target include an increase in the number of employee retirements coupled with increased federal regulatory requirements.

Target #3: Maintain the percentage of administrative and engineering costs below 30% of total project costs for Southeast Region.
Status #3: The percent of administrative and engineering costs compared to total project costs for Southeast Region increased by 11% to 21% in FFY2010, well within the department's target of 30%.

Analysis of results and challenges: Southeast Region met the target percentage of administrative and engineering costs compared to total project costs six years in a row.

Challenges in continuing to meet this target include an increase in the number of employee retirements coupled with increased federal regulatory requirements.

FY11 Authorized as of 9/30/2010 (in thousands)

Department of Revenue Totals	Funding					Positions		
	UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
	$51,673.3	$9,074.7	$171,708.7	$77,748.5	$310,205.2	877	40	20

1. **Funds Collection**
Collection activities for the Department of Revenue include but are not limited to: Child Support Services collecting from obligors, AHFC collecting rents and mortgage payments, and the Tax Division collecting state taxes owed.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$18,626.4	$1,098.3	$8,464.1	$36,186.8	$64,375.6	442	27	17

- **The Criminal Investigation Unit is gaining authorization to access state and national criminal records for criminals. By accessing a name, all criminal activity associated with the person would be displayed so that the investigator can coordinate his/her investigation with any other enforcement activity deemed necessary.**
- **Currently, department investigators are entering situations where unknown dangers are present. By sharing information between divisions and by using the criminal database, dangerous situations can be better managed or avoided.**
- **In FY2010, 95% of known taxpayers filed their tax returns and made their tax payments timely. This is a slight decrease from FY2009, but above the goal of 90%.**
- **The decrease in child support collections from the Permanent Fund Dividend and from other states resulted in decreased disbursements to custodial parents and children by Child Support Services of $12.4 million during FY2010, or -10.03% less than in FY2009.**

2. **Funds Distribution**
Distribution activities for the Department of Revenue include but are not limited to: Permanent Fund Dividend Division distribution of PFDs to eligible Alaskans, Child Support Services distributing payments to the custodial parent, and Tax Division distributing shared taxes to communities.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$9,085.5	$7,735.9	$29,312.9	$41,311.1	$87,445.4	307	13	1

- **The number of cases worked by the Permanent Fund Dividend Division's fraud unit in 2010 decreased compared to the previous year. Of the 442 cases open in 2010, 245 received criminal or other penalties, and 183 were denied payment of the PFD due to ineligibility.**

- **During FY2009, The Alaska Mental Health Trust Authority provided services to 20,569 beneficiaries (duplicated and unduplicated) in all areas of funding. The Trust also trained 6,216 professionals who work with beneficiaries to improve or create new skills and knowledge. This is an increase over the prior fiscal year in both categories.**

- **AHFC's Multi-Family unit production increased by 0.6% due to the availability of federal and state grants that cover the monetary gap between development costs and appraised value. AHFC has not met its 10% target and cannot compete with other financing options to pursue that level of originations.**

- **There are a total of 30 new Senior Housing units that will be available to seniors as a result of the AHFC 2010 funding cycle, an increase of 3.3%. AHFC is working to increase senior housing units by 10%.**

3. **Funds Investment**
Funds Investment activities for the Department of Revenue include but are not limited to: Permanent Fund Corporation investment of the fund, Treasury and ARMB investment of the state's funds and retirement systems, and AMHTA and AHFC corporate investments.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$23,740.5	$240.5	$133,513.6	$250.6	$157,745.2	123	0	2

- **During FY2010, returns for 9 of the 10 funds under the fiduciary responsibility of the Commissioner of Revenue exceeded the applicable 1-year target returns.**

- **The Permanent Fund FY2010 year end value was $33.3 billion, up $3.4 billion from the prior year. The 10-year rolling real rate of return was 1.1%, falling short of the 5% target**

- **Savings were achieved in each of the four issues of the Alaska Municipal Bond Bank and each one of the 12 loans made with those funds and one additional loan made directly from the bond bank. Savings aggregated $9.6 million. AMBBA has achieved its target of 100% for the past five years.**

- **As of the end of FY2010, five members of the Treasury Portfolio Investment staff have their Chartered Financial Analyst designation. This is consistent with the prior fiscal year and exceeds the Treasury Division's target of four.**

- **For FY2010 the Trust Land Office projected principal revenue was $2.5 million with $3.1 million received.**

4. **Safety for Alaskans**
The Long Term Care Ombudsman is located with the Alaska Mental Health Trust Authority and performs investigations on Alaskans in long term care who may be experiencing a negative care situation.

Funding					Positions		
UGF Funds	DGF Funds	Other Funds	Federal Funds	Total Funds	Full Time	Part Time	Non Perm
$220.9	$0.0	$418.1	$0.0	$639.0	5	0	0

- **There were a total of 486 different complaints received from complainants in FY2010 by the Long Term Care Ombudsman. Of these, 305 required action on the part of the LTCO, and 167 (54%) were partially or fully resolved to the satisfaction of the complainant.**

- **The Long Term Care Ombudsman conducted one formal training course for volunteers during FY2010. Training was also made available at 29 community education events.**

Mission

The mission of the Department of Revenue is to collect, distribute and invest funds for public purposes.

Core Services

- Coordinate, develop and promote programs for collection and investment of public funds
- Provide controls and enforcement for the collection, investment and payment of funds for the Tax Division, Treasury Division, Permanent Fund Dividend Division, and Child Support Services Division
- Provide administrative support for the following authorities, boards, and corporations: Alaska Retirement Management Board; Alaska Mental Health Trust Authority; Office of the Long-term Care Ombudsman; Alaska Municipal Bond Bank Authority; Alaska Natural Gas Development Authority; Alaska Housing Finance Corporation; and Alaska Permanent Fund Corporation

End Result:	Strategies to Achieve End Result
A: Maximize compliance with current tax and gaming statutes. **Details >**	A1: Increase audit coverage (audit activities improve compliance and revenue). **Details >** • **TARGET #1: Open 20 new audit cases (taxpayers that have not been audited by the Tax Division in the prior five years).** • **STATUS #1: The Tax Division opened 36 new audit cases in FY2010 due to an increase in audit staff and focusing on auditing new taxpayers discovered in previous years through compliance activities. These audits will be worked throughout FY2011 in addition to maintaining a target of 20 new audits for that year.**

End Result:	Strategies to Achieve End Result
B: Maximize the value of the funds under the stewardship of the Treasury Division. **Details >** • **TARGET #1: For the funds under the fiduciary responsibility of the Commissioner of Revenue, exceed the applicable 1-year target returns.** • **STATUS #1: During FY2010, returns for 9 of the 10 funds under the fiduciary responsibility of the Commissioner of Revenue exceeded the applicable 1-year target returns.**	B1: Portfolio Investment Officer staff is continually upgraded in experience and education. **Details >** • **TARGET #1: Increase average longevity of the investment officers to five years.** • **STATUS #1: The average longevity of the Treasury investment officers during FY2010 was 4.8 years, an increase over the prior year.** • **TARGET #2: At least four investment staff will have their Chartered Financial Analyst (CFA) designation.** • **STATUS #2: As of the end of FY2010, five members of the Treasury Portfolio Investment staff have their Chartered Financial Analyst designation. Performance Detail

A: Result - Maximize compliance with current tax and gaming statutes.

A1: Strategy - Increase audit coverage (audit activities improve compliance and revenue).

Target #1: Open 20 new audit cases (taxpayers that have not been audited by the Tax Division in the prior five years).
Status #1: The Tax Division opened 36 new audit cases in FY2010 due to an increase in audit staff and focusing on auditing new taxpayers discovered in previous years through compliance activities. These audits will be worked throughout FY2011 in addition to maintaining a target of 20 new audits for that year.

Number of New Audit Cases Opened

Fiscal Year	# of Audit Cases
FY 2010	36
FY 2009	40
FY 2008	78
FY 2007	42
FY 2006	5
FY 2005	14

Analysis of results and challenges: The Tax Division maintains 100% coverage in oil and gas income and production taxes (and new oil and gas audit subjects are not included in this measure). An audit presence in each of the other tax types improves long-term voluntary compliance as well as generates new audit revenues. Furthermore, once established, audit generated revenues tend to recur as taxpayers modify their reporting to become consistent with the audit findings. Not included in the new audit count are audits of exploration tax credit claims by existing taxpayers. These audits do not meet our definition of "new audits" although they represent new and expanded audit efforts by the division.

The division exceeded its goal in FY2010 as a result of new and stable audit staff in the Production, Corporate and Excise tax units. As in FY2009, we limited the scope on several audits, choosing to look at several taxpayers with similar audit issues as opposed to

conducting a full audit of a few taxpayers. Limited scope audits not only allow us to audit more taxpayers, but they also allow us to focus on audit issues that have a greater return to the State. We also opened several full-scope audits with the intent of looking at all aspects of the taxpayer's business, from internal controls to record keeping to compliance which resulted in fewer new audits from the previous year, but still above our goal.

We view twenty new audit subjects annually as an appropriate target and this remains our goal for FY2011.

B: Result - Maximize the value of the funds under the stewardship of the Treasury Division.

Target #1: For the funds under the fiduciary responsibility of the Commissioner of Revenue, exceed the applicable 1-year target returns.
Status #1: During FY2010, returns for 9 of the 10 funds under the fiduciary responsibility of the Commissioner of Revenue exceeded the applicable 1-year target returns.

One-year Return Data for Funds Managed by the Treasury Division

Fiscal Year	Fund	Actual Return	Target Return
FY 2010	Gen Fund/Other Non-segregated F	3.38%	2.36%
FY 2010	AK Children's Trust Fund	12.99%	13.01%
FY 2010	Public School Trust Fund	12.58%	12.56%
FY 2010	Int'l Airports Revenue Fund	4.59%	3.53%
FY 2010	Const Budg Resv Fund-Main Acc	5.74%	4.76%
FY 2010	Const Budg Resv Fund-Sub Acc	12.33%	11.87%
FY 2010	Retirement Hlth Ins Fund-Longter	12.48%	12.03%
FY 2010	Retirement Hlth Ins Fund-Maj Med	1.17%	0.16%
FY 2010	Power Cost Equalization Fund	12.74%	11.86%
FY 2010	Int'l Airports Development Fund	4.56%	3.56%

Methodology: FY2010 one-year return data is for the period 7/1/2009 through 6/30/2010.

Analysis of results and challenges: A combination of investments that is expected to produce the highest investment return for a given amount of risk is known as a "point on the efficient frontier." Each fiduciary for a fund reviews points on the efficient frontier and selects the combination of investments consistent with their appetite for risk and return of the fund. This selection is known as the target asset allocation. Target returns assume the total rate of return of passively managed indexes invested in the same proportions as the target asset allocation. A fund's investment return will differ from its target return if its asset allocation differs from the target asset allocation or if the returns of the underlying investments differ from those of the passively managed indexes.

B1: Strategy - Portfolio Investment Officer staff is continually upgraded in experience and education.

Target #1: Increase average longevity of the investment officers to five years.
Status #1: The average longevity of the Treasury investment officers during FY2010 was 4.8 years, an increase over the prior year.

Average Longevity of Investment Staff

Fiscal Year	Number of Years
FY 2010	4.8 years
FY 2009	4.4 years
FY 2008	4.2 years
FY 2007	4.6 years
FY 2006	3.8 years

Analysis of results and challenges: A seasoned investment staff contributes to improved investment performance. Turnover of the investment officers has been minimal in the recent few years, resulting in increased longevity of investment staff.

Target #2: At least four investment staff will have their Chartered Financial Analyst (CFA) designation.
Status #2: As of the end of FY2010, five members of the Treasury Portfolio Investment staff have their Chartered Financial Analyst designation. This is consistent with the prior fiscal year and exceeds the Treasury Division's target of four.

Number of Staff Holding CFA Designation

Fiscal Year	Number of Staff
FY 2010	5
FY 2009	5
FY 2008	5
FY 2007	5
FY 2006	4

Analysis of results and challenges: The Chartered Financial Analyst (CFA) designation takes a minimum of three years to obtain. No investment staff achieved the charter during FY2010.

C: Result - Collection and disbursement of child support due to the children served by Child Support Services Division.

Target #1: Increase collections by 0.75%, net of Permanent Fund Dividend collections.
Status #1: FY2010 collections net of Permanent Fund Dividends decreased 0.08% over FY2009. The division saw a $2.3 million increase in unemployment benefit collections and a $0.5 million reduction in child support collections by other states. This continues to show the downturn in the economy as more CSSD clients are unemployed or underemployed which results in lower monthly child support payments.

Percent Change in Total Collections for a Fiscal Year

Fiscal Year	% Change
FY 2010	-0.08%
FY 2009	-0.08%
FY 2008	3.25%
FY 2007	3.66%
FY 2006	3.72%
FY 2005	1.92%

Analysis of results and challenges: FY2010 collections net of Permanent Fund Dividends (PFDs) decreased by 0.08% over FY2009. Collections overall (including PFDs) were down 9.7%. $11.8 million less was received in PFD payments, a 53% decrease compared to the prior year. In addition, $0.5 million less was collected in child support payments received from other states. In contrast, collections from unemployment benefits continue to increase, a trend that began in FY2009. In FY2010, there was an increase of $2.3 million collected from unemployment benefits over FY2009. This continues to be an indication of the downturn in the economy as more CSSD clients are unemployed or underemployed, resulting in lower monthly child support payments.

The division is concerned about the economy and how this downturn will continue to impact child support collections in the coming year(s). Increased unemployment collections and less money coming in from other states are significant indicators of the struggling economy. The division anticipates that collections will continue to decrease in FY11, which is reflected in the lower target of 0.75% for the current year.

C1: Strategy - Improve the environment necessary for increased collections.

Target #1: Ensure that paternities established are at least 95%.
Status #1: The percentage of paternities established in FFY10 was 92.4%, an increase of 2.4% from the prior year.

Percentage of Paternities Established

Fiscal Year	% Established
FFY 2010	92.4%

FFY 2009	90%
FFY 2008	95%
FFY 2007	91%
FFY 2006	98%
FFY 2005	105%

Analysis of results and challenges: Percentage of paternities established is measured by the federal government by taking the number of children statewide with paternity established or acknowledged in the current fiscal year (3,951 in FFY10) divided by the number of children born out of wedlock statewide for the prior fiscal year (4,277 in FFY09), which is 92.4%.

The number of paternities established since FFY 2005 continues to fluctuate, however the number of cases in the division needing paternity established also fluctuates. This percentage has gone up and down over the years and is due to contingent factors that are out of the division's control such as cases that are still working their way through the court system, increases in the number of unwed births, or cases where no attempt is made by the family to establish paternity.

Target #2: Increase cases with orders to 93.5%.
Status #2: The division saw a decrease of 1.5% in the number of cases with orders when compared to the prior fiscal year.

Percentage of Cases with Orders

Fiscal Year	Cases with Orders	Change from Prior Year
FY 2010	91.5%	-1.5%
FY 2009	93.0%	-0.9%
FY 2008	93.9%	0.2%
FY 2007	93.7%	0.5%
FY 2006	93.2%	0.9%
FY 2005	92.3%	7.6%

Analysis of results and challenges: A case is eligible for collection when a court or administrative order has been established. Collections cannot be made without a proper order in place. Establishing this quickly and effectively is one of the keys to a successful child support program. Reviewing and streamlining the division's process in establishing orders will aid in the timeliness of collecting and distributing child support.

The division was not able to meet the target in FY2010 due to staff turnover, the time that it takes to train new staff, and an increase in the number of clients that applied for our services. As a result, CSSD is assigning resources to target this area in order to bring this measure more in line with the target of 93.5%.

D: Result - Improve business efficiencies and safety for Department employees investigating criminal activity related to the collection and distribution of funds for the Tax, Child Support Services and Permanent Fund Dividend Divisions.

D1: Strategy - Centralize all investigation staff from three divisions to one unit under the direction of the Commissioner to reduce duplication of efforts and combine some activities that would accommodate the needs of more than one program.

Legislators hear constituents on saving government money

MOVE: Surreptitious move to Anchorage among suggestions.

By SEAN COCKERHAM
scockerham@adn.com
Published: July 20th, 2011 03:48 PM
Last Modified: July 20th, 2011 03:48 PM

The public has never been shy to complain about government spending, so on Tuesday, some legislators seeking to make state government more efficient opened the microphone for anyone with an idea.

This is what they heard:

• There are too many phone books.

• They should refuse to attend legislative sessions in Juneau, effectively moving the capital.

• They shouldn't spend so much money on special sessions or state travel.

Those were some of the suggestions at a Senate State Affairs Committee hearing in Anchorage. About 10 people took the Senate committee up on its invitation for the public to offer ideas.

While the state doesn't produce any of the phone books, one person thought that government might have been wasting money advertising telephone numbers in each book.

John Spalding of Anchorage said legislators should drop their quest to construct a new office building in downtown Anchorage for themselves, and instead use state-owned land at the mothballed Kulis Air National Guard Base on Raspberry Road.

"If you're really serious, and I hope the hell you are, that something be done to quit spending so much money. Because one of these days the pot's going to

run dry and you're going to be running around trying to figure out how to make expenses," he said.

Spalding could be right. The state has a big budget surplus because of high oil prices. But those high prices are masking the long-term effect on the state treasury of the continued decline of North Slope oil production, which provides almost 90 percent of state government's general fund revenue that pays for roads, troopers, health care and much more.

On the other hand, if the crash comes, the relatively modest suggestions that emerged from the public wouldn't make much of a dent. Education and Medicaid are the big forces in state government spending and those are huge and difficult issues for legislators to deal with.

Shocking discovery for joint relief

Eat this, feel and look younger

Senate State Affairs Chairman Bill Wielechowski said it's still good to look for smaller efficiencies, though, while the Legislature works on the bigger costs. Wielechowski, of Anchorage, and Joe Paskvan of Fairbanks, both Democrats, were the only senators present for the public testimony taken over the lunch hour on Tuesday. Democratic Rep. Sharon Cissna of Anchorage also sat in.

One woman told lawmakers that replacing the leadership at the city-owned Port of Anchorage could save money, since the port expansion project has gone massively over budget and is sucking up state money. Another reported a state jobs center in Anchorage she said was overstaffed.

Lynn Willis of Eagle River said the Legislature should find a better way of drawing up the state budget. He mentioned that the Senate didn't unveil the capital budget until near the end of the spring legislative session, and the House claimed it was held hostage.

"I think that just breeds inefficiency and waste. So my suggestion is that during the summer, during the off months, you should be able, I would think, to get 80 percent of the vetting done in the budgeting process completed," Willis said.

Wielechowski said there's a website -- **http://savealaska.aksenate.org/** -- where the public can submit ideas. His State Affairs committee has also been hearing from commissioners of state departments about potential efficiencies. Wielechowski said he would like to see more video-conferencing instead of officials travelling in the state.

Another idea, he said, is to save money on fees to outside investment managers for the Alaska Permanent Fund and the Constitutional Budget Reserve. He said officials testified there could be millions saved if the state itself handled those parts that are "passively managed."

The State of Alaska has a number of children in foster care and receiving Medicaid even though family members who are financially and physically qualified are available for placement. Perhaps the legislature should investigate how many children are in the custody of the State of Alaska with fraudulent Child in Need of Aid cases and medical needs. Perhaps the legislature should investigate how many families are being misrepresented by court-appointed public defense attorneys and guardian ad litems so that children are unjustly retained in the custody of the State of Alaska even though qualified family members are available and capable of caring for the child without state or federal assistance. The State of Alaska would save millions if state officials that have been entrusted with the power to protect really care about the children and families in the State of Alaska. Instead, this power is being abused to unjustly deny families their civil and human right to care for and protect their children while increasing spending on fraudulent claims for social and welfare services. These are the type of issues that the citizens need to share with the legislature!

Here is some thoughts on saving for the SOA: Don't push out anymore printed material via mail. This is a no-brainer. Saves on postage, printing, and staff's time.
Another thought - departments that are loosing money, should be cut. Subsidies NO MORE!
State should review their benefit package.
State should hire a independent efficiency expert and determine if any cutbacks should occur or procedures be changed.
What can the SOA contract out vs. paying employees with benefits??

Legislators want to hear citizens

Anchorage Daily News / adn.com
Published: July 18th, 2011 08:15 PM
Last Modified: July 18th, 2011 08:16 PM

Know how state government can save some money? Today is your chance to tell state senators what you have in mind. The Senate State Affairs Committee, chaired by Anchorage Sen. Bill Wielechowski, is asking the public to come forward with ideas "on how to make Alaska's government more efficient and effective." The committee will be taking public testimony from noon to 1 p.m. at the Anchorage Legislative Information Office, 716 W. Fourth Ave.

In the morning, the committee will hear state commissioners make recommendations on how their own departments can be more efficient. The commissioners of Revenue, Natural Resources, Transportation and Commerce will speak from 9 a.m. to noon.

Committee members said the need for the hearing is highlighted by a report published earlier this year by the University of Alaska's Institute for Social and Economic Research, which said the state can't keep spending as much as it has with declining oil production.

STATE OF ALASKA

March 26, 2011

The Honorable Gary Stevens
President of the Senate
Alaska State Legislature
State Capitol, Room 111
Juneau, AK 99801-1182

Dear President Stevens,

I withdraw the appointments of Jennifer "Robin" Allen to the Board of Nursing and Jerrad "Shea" Hutchings to the State Commission for Human Rights. Since my letter dated February 1, 2011, both individuals have asked to resign from their respective boards for personal reasons.

Best regards,

Sean Parnell
Governor

Subject: RE: Shea Hutchings -- Human Rights Commission nominee

Finally got a call back, but wasn't at my desk. He asked if we could do it on Friday, but the committee only meets on Tuesdays and Thursdays. I left a message for him again. We'll see. He's certainly difficult to reach!

Are you able to give me his email address?

Thanks, Michelle

Hi Shea,

We are still hoping you will be on-line this morning for your confirmation hearing for the Human Rights Commission. Once again, the number to call is 855-463-5009. Please state that you are calling to testify before the Senate State Affairs Committee regarding your confirmation to the HRC.

Many thanks. We look forward to hearing from you,

Michelle

Subject: Still no word back from Shea Hutchings, nominee for Human Rights Commission

Hi Jason,

I have called Shea at least 3 times and emailed him once and still have no idea whether he will be present for his confirmation hearing tomorrow morning. The State Affairs Committee will take up a couple of bills before we begin the confirmation part of the meeting. I hope he is able to participate as we generally have a full agenda!

The call-in number for the meeting is 855-463-5009. I have provided this number to him several times already, but thought you should have it.

Anything you can do to provide assistance would be greatly appreciated.

KENNETH KIRK
Attorney at Law

March 14, 2011

Sen. Bill Wielechowski
Chairman, Senate State Affairs Committee

Via electronic transmission

Dear Sir,

I am writing in regard to my nomination to the Alaska Public Offices Commission.

APOC is a quasi-judicial body with significant authority in regard to regulation of lobbying, public official financial disclosures, and campaign finance. The method of appointment is unusual; four members must be members of the two major political parties (two members from each party), and the fifth member is a "neutral". I would be replacing one of the Republican members, so it is necessary that I be a Republican.

During the past year I have been the State Legal Counsel for my party (up until I was nominated for this position, at which point I resigned). In that capacity, I have had a number of matters before APOC. Two of those were contested matters which led to hearings before the commission; the rest involved advising party officers with regard to campaign finance matters, which required reviewing campaign finance statutes, regulations, and past APOC decisions. Beyond that, for more than 23 years I have been an attorney practicing in this state in a variety of areas of practice, and have served on many boards, commissions, and committees, including another that was quasi-judicial (the Anchorage Zoning Appeals Board).

In my time as State Legal Counsel, I came to the conclusion that they were certain beliefs to which it was absolutely critical that each APOC commissioner hold: 1) that all of the commissioners should be fair and evenhanded, regardless of their political backgrounds or affiliations, 2) that it important that the commission distinguish between people who were trying to comply but made an honest mistake, and those who blatantly violated the law, and 3) that much of what APOC does involves restrictions on free speech (as noted by the US Supreme Court in the *Citizens United* case), and therefore the commission must be careful to go no further than necessary to meet the legitimate objectives of the laws. I firmly believe in each of these points, and would keep them foremost in my mind if confirmed as an APOC Commissioner.

I look forward to the upcoming confirmation hearing, and in addressing any concerns you, or the other Senators, may have.

Sincerely,

Kenneth Kirk

Public Facilities Advisory Commission, Municipality of Anchorage, 1988-93

Board of Directors, Muldoon Community Assembly, 2005-present
Corporate secretary. Muldoon Community Assembly, 2006-present

Yes Commissioner (with hats off to the BBC)

By Kenneth Kirk

Good morning, is he in? Good... Hello, Humphrey. It's Jim Hacker. Do you have a moment?

Certainly, Commissioner, I always have time for you. Settling in well at the new job?

Quite, quite. But I have an issue regarding my old campaign funds, and I'm wondering if I might trouble you for some legal advice.

Absolutely not, Commissioner! I can do no such thing.

I don't understand, Humphrey. You've been my lawyer for years. You served as the legal advisor to every one of my campaign organizations when I was in the legislature. Now you won't talk to me because I'm in the executive branch?

It's not that at all, Commissioner. I'm happy to help you. I just can't help you on this phone call.

But why not? I'll pay you for your time, of course.

That's not the problem at all, Commissioner. I'm happy to help, but I can see from my caller I.D. that you're calling from your new office. That's an executive branch phone. You can't call me about a legislative campaign matter, on an executive branch phone.

But it's a local call, there's no cost to the government.

That's hardly the point, Commissioner. According to the campaign finance laws, the government can't provide "anything of value" to your campaign. And that includes a phone call.

That's rather silly. Alright, forget it, I'll send you an email.

Don't send it from your office email account. That's something of value as well, Commissioner.

Oh for heaven's sakes, I'll call you back on my personal cell phone.

. . . . . .

Humphrey? Alright, I'm on my cell phone now. Can you hear me?

Loud and clear, Senator.

I'm not a State Senator anymore, Humphrey. What happened to Commissioner?

You're calling me on a legislative campaign matter. I just wanted to keep our roles clear. No disrespect intended, of course. Now what is the problem?

I just discovered a contribution violation from the last time I ran. Completely innocent, mind you. It turns out we had a donor named Fowlds. He made one contribution of $500, the maximum allowed, then later donated another $100 at a fundraiser, but nobody caught it because the treasurer misread his name as Foulds the second time. So we had an illegal campaign contribution of $100.

You'll have to give it back to the donor, immediately.

That's a bit of a problem. After the campaign was over I held those funds for the next election, but then as soon as I was confirmed as a commissioner, I donated the remaining funds to my district political party. I don't have it, to give back.

Well, it's not too much of a problem. You can donate your own money to the campaign, then use it to refund the contribution.

Ah, thank you, Humphrey. I knew there had to be a simple, common-sense solution. I'll write out a check to the donor for $100 and be done with it.

"I just discovered a contribution violation from the last time I ran. Completely innocent, mind you."

Oh no, Senator. You can't do that. It has to go through a campaign account.

But there isn't any campaign account. We closed it.

You'll have to open another one.

For this one measly transaction?

Not just for that. You also have to pay my fee for this conversation.

Of course. Still, that's just two transactions.

And you have to file some paperwork with APOC. Your treasurer was a paid employee as I recall, so you'll presumably have to get her back on the payroll to deal with this.

Anything else, Humphrey?

I'm sure I'll think of something, Senator. I'll send you a memo. Do you still have your old P.O. Box from the campaign?

Don't tell me I have to open another post office box!

No, no. I'll send it to your home.

Good then. Although as I think about it, there might be another option to consider. Do I recall correctly that I can roll it over into a future campaign? Because you see, I've been thinking that if you-know-who doesn't run for Congress the next time around, I might want to go for that seat....

Senator! Hang up at once and call me back!

On a different phone?

It can be the same phone, just call me back right away.

Oh for heaven's....

. . . . . .

Alright, Humphrey. I'm calling you back. But why did you hav do that?

So there would be a clear dem tion on your cell phone bill. Y Jim, a congressional seat is a fe office. You have to comply with FEC regulations, not APOC. Th completely different and larg compatible.

It's Jim now, is it? So on this I take it, we can only discuss the sible congressional race?

That's the idea, yes. And a no disrespect.

None taken. But are you now g to tell me I have to report this p call to the FEC?

No, that's one of the differe between state and federal law. Al campaign finance laws, which a to everything from the Governor on down, consider even an em be a "contribution". The federal are more generous, not as intere in small things. No, you don't ha report this call. But by cutting when we did, you don't have as n to report to APOC.

So can I roll over that excess d tion to the congressional campa

Sorry, no. You'll have to refun Then, after you've filed the neces paperwork to accept contributi the donor can contribute that m back to your federal campaign.

This all seems terribly confus What's the point of all this comp ity?

It's all in the name of honest open government.

Really? All it seems to do, f what I can see, is make us all m dependent on the lawyers. We hardly support a candidate w out consulting legal counsel, a right?

Yes, commissioner.

April 4, 2011

The Honorable Bill Wielechowski, Chair
Senate State Affairs
State Capitol, Room 101
Juneau, AK 99801

Dear Senator Wielechowski:

Thank you for the opportunity to present to the Senate State Affairs Committee on Thursday, February 24, 2011. Below are the responses to questions that were raised during that session.

Q1: How do satellite offices function for the division of motor vehicles (DMV)? How much more do individuals pay for services? Are fees disclosed to customers? (Senators Wielechowski and Paskvan)

A1: DMV partners with various entities to provide services. Statewide the DMV has 33 full service offices and 91 business partners. Of the full service offices, 17 are state run and 16 are operated by commission agents.

Commission agents: The DMV partners with local governments, particularly in areas where there is not a large population base, to provide services. These offices do not charge more than the statutorily required fees for services, but retain a certain percentage of revenue collected.

Business partners: The DMV contracts with private businesses to provide title, registration and road skills testing services. These partnerships were established in 1998 and exist to provide residents with additional options for receiving services. These businesses are trained by the DMV to perform particular functions. In some instances, these businesses charge an additional fee on top of the statutorily required fees for conducting DMV transactions. The entities retain the additional charges and pass along full fees to the state. Additionally, these entities are contractually required to post their fee schedule for costs associated with transactions if an extra fee is charged.

Twenty-four dealerships and credit unions provide title and registration services. Sixteen cottage industries ("satellite offices") provide title, registration and driving records services. Eighteen emissions testing (I/M) businesses provide registration services, and 33 third party testers provide road skills testing services.

Q2: Provide information on the number of employees returning to state service after retiring, include: retire/rehire, retire/long-term non-permanent, and retire/contract work. (Senator Giessel)

A2: The attached spreadsheet documents the number of retirees currently employed in the executive branch by department. Please note that this data represents retirees receiving benefits through the Public Employee Retirement System (PERS), Teachers Retirement System (TRS) or the Judicial Retirement System (JRS). These individuals may have retired from any one of 160 participating employers.

Also included is the number of retirees who received payments from the state accounting system, AKSAS. It must be noted that this number represents only those retirees who use their social security number as their tax identification number. It does not include retirees who are employees of an organization doing business with the state or those who use a separate business tax identification number. The counted individuals are not employees, but contractors or other individuals who received payments unrelated to employment. It is not possible to identify contractors performing services in the state's 26-year-accounting system, so these numbers include all retirees receiving payments including contracted services, rentals, travel, and board-related payments.

Q3: Provide information on issues within state government around recruitment and retention. What are our problem areas? How many people do we have retiring on an annual basis? (Senator Paskvan)

A3: Generally speaking, recruitment difficulties exist in rural areas of the state, particularly when specialized skills and education are a requirement for the position. In urban areas recruitment is challenging for particular job classifications such as economists and health care professionals.

We are currently working to develop turnover reports by agency and job class through the Alaska Data Enterprise Reporting system. With this tool we will then work to identify and resolve problem areas.

The data provided below represents the number of state employees who retired in 2009 and 2010 and includes retirements from PERS, TRS, and JRS.

Year	Retirees
2009	647
2010	717

Q4: Has the Department of Administration weatherized buildings in the public building fund as the Department of Transportation and Public Facilities (DOT) has for other state buildings? If not, do we have plans to do so? (Senator Wielechowski)

A4: The Division of General Services has completed numerous energy efficiency and weatherization projects on buildings we manage, many of them in cooperation with DOT, using their energy performance contract.

I hope the questions raised during our presentation have been answered to your satisfaction. Please feel free to contact me at any time.

Sincerely,

Becky Hultberg
Commissioner

Alaska State Legislature

Please enter into the record my testimony to the S STA committee name

committee on CONFIRMATION HEARING BECKY HULTBERG bill/subject, dated 5 APRIL 2011.

04/05/10 Public Testimony: Theresa Absher, Glennallen resident and current state employee (907) 320-1266

In this time of ever increasing costs to live in rural Alaska, the new Alaska Geographic Differentials and pay freezes for small road system and southeast communities will be crippling to our region. Our school district enrollment has been steadily decreasing due to cost of living expenses that families cannot absorb. In the past week I have spoken to several families that will be relocating to the overcrowded school districts in the rail belt area, because they can no longer afford to live here. Even with subsistence supplementing food costs, heating with firewood and other cost saving measures, the costs to remain here are too high to maintain.

The AGD had an estimated error factor of +/- 14% for the Glennallen area, which is unacceptable. Nothing in the AGD addressed the fact that if items like appliances could even be purchased in this region, the cost of shipping is extremely high and should be a factor. My daughter attends school at UAF and regularly brings groceries home during her visits, because the cost is so much less than what is available here. Fairbanks cost of living was somehow calculated to be 3% higher than Glennallen, Tok Delta, Cantwell. If it is to be believed that our cost of living is so much lower than Anchorage, why do hunters and travelers to this region from urban areas bring their own supplies rather than try to purchase things here?

Do you know that the average Glennallen household income is $52,000 compared to $84,000 for Anchorage and Juneau? As of last Sunday the cost of gasoline at the pump was $4.40 per gallon. That is NOT what is being paid in Anchorage, Fairbanks or Juneau.

Please keep the pay freezes from going into effect 1 July 2011.

Signed: THERESA ABSHER

Please enter into the record my testimony to the S STA committee name

committee on CONFIRMATION HEARING BECKY HULTBERG, dated APRIL 5TH, 2011.

Letter to the Senate State Affairs Committee

The recent geographic differential study has been a real slap in the face to those of us who will be losing out starting this July.

It seems a pity that being frugal, denying our kids opportunities growing up, forgoing vacations, not eating out – all to be able to afford a house on state wages in Glennallen has resulted in a pay freeze. Since we can be frugal, we will be forced to remain frugal. And it's not like we purchased a great house. We have poured into it as much as the original cost to make it comfortable and it is still not to code.

But since we can sacrifice we will be made to continue sacrificing. Fortunately I have a year round job with the state which was necessary to supplement my husband's seasonal job with the state. I really feel for our techs who try to survive on their seasonal incomes alone.

I hope you can help us by coming to an agreement to not implement the new pay structure until a more equitable study can be done.

Rita Stadtmiller

Thank you for your time,

Rita Stadtmiller, program tech, Glennallen Fish & Game

Executive Branch
Retirees

The information provided documents the number of retirees currently employed in the executive branch who are not currently participating in the retirement system and who are receiving benefits through the PERS, TRS or the JRS. These individuals may have retired from any one of 160 participating employers.

Also included is the number of retirees who received payments as a contractor during calendar year 2010. It must be noted that this number represents only those retirees who use their social security number as their tax identification number. It does not include retirees who are employees of an organization doing business with the state or those who use a separate business tax identification number. These individuals are not employees, but contractors who were selected via a procurement process.

Executive Branch
Retirees

****Position Type**

Long and short term postions are most commonly used to complete a project, substitute for an employee on leave, and to supplement the workforce for a defined period of time. **Long Term** - over 120 days, **Short Term** - under 120 days

On -call positions are scheduled to work on an as-needed basis typically due to vacancies and employee absences. For example, the Pioneer Homes have a pool of certified nurse aides, Mt. Edgecumbe High School has substitute teachers, and the Division of Personnel & Labor Relations has Human Resource Technicians which are used for payroll processing. Additionally, the Division of Elections uses election workers for the statewide primary and general election.

Exempt positions are not established under the authority of the Department of Administration. Questions specific to these positions should be addressed to the employing agency.

*****Contractors**

In the executive branch, there are 470 retirees who received payment for services provided. Some individuals provided services for more than one agency and are therefore reported in the number provided for each agency they received payment from. The numbers provided are not all inclusive. We do not have a means of identifing retirees employed by a contractor or those who do not use their social security number as their tax identification number.

Commissioner's Office

Department of Revenue > Commissioner's Office

Commissioner Bryan Butcher

Commissioner Bryan Butcher was appointed to this position beginning in January, 2011 by Governor Sean Parnell. Mr. Butcher was the Director of Governmental Relations and Public Affairs for the Alaska Housing Finance Corporation (AHFC) for the last eight years and in a dual role was also Vice President of the recently formed Alaska Gasline Development Corporation (AGDC) since 2010. In 2009 Mr. Butcher served as a Special Assistant working on Economic Development issues for Governor Parnell. Mr. Butcher also served as a member of former Governor Sarah Palin's gasline team through the AGIA process.

Before joining AHFC in 2003, Mr. Butcher previously worked for the Alaska State Legislature as a Finance Committee Aide for the House and Senate Finance Committees for 12 years.

Mr. Butcher is also currently serving as the coordinator for Governor Sean Parnell's statewide transition team.

A lifelong Alaskan born and raised in Anchorage, Mr. Butcher holds a Bachelor of Science degree in Speech Communications from the University of Oregon.

Deputy Commissioner for Treasury Jerry Burnett

Deputy Commissioner Jerry Burnett was appointed to this position in January 2009 after having served as the Acting Deputy Commissioner for the preceding five months and Administrative Services Director and Legislative Liaison for the Department of Revenue for the previous four years. Other state service includes two years as Administrative Services Director at the Department of Corrections and twelve years as Finance Committee and Budget and Audit Committee staff to the Legislature. Outside of state service, Mr. Burnett worked as a

BRYAN D. BUTCHER

VICE PRESIDENT — Anchorage, AK

Alaska Gasline Development Corporation — **2010**

Worked as the Vice President for the newly established Alaska Gasline Development Corporation that was tasked with developing a plan on how an in-state gas pipeline can be designed, financed, constructed and made operational by December 31, 2015. This plan is due to be submitted to the legislature by July 1, 2011. Was in charge of the Corporation's budget, as well as working on the financing and outreach aspects of the task. Worked in concert with the Commercial Manager in meeting with gas pipeline construction companies, investment banks and gas producers to gauge interest in this project as required by state statute.

LEAD COORDINATOR — Alaska

The Transition Team of Alaska Governor Sean Parnell — **2010-2011**

In charge of putting together eight policy transition teams that included over 100 Alaskans in developing a transition team report on recommendations in the policy areas of Education, Health Care, Science and Technology, Public Safety and Justice, Resources, Energy and the Environment, Infrastructure, Financial Services and Business Investment and the Military.

SPECIAL ASSISTANT — Anchorage, AK

Alaska Governor Sean Parnell — **2009-2010**

Worked on issues in the broad policy area of economic development for the Governor, including the establishment of policy teams that met to advise the Governor on issues of importance to that particular sector of the economy.

DIRECTOR OF GOVERNMENTAL RELATIONS AND PUBLIC AFFAIRS

Anchorage, AK

Alaska Housing Finance Corporation — **2005-2010**

Responsibilities include all communications with the Governor, Legislature, Congress and the federal government on issues affecting the Corporation. Accomplishments include getting more flexibility for the Public Housing Division by having Congress include Alaska in the Moving to Work program and establishment of the Weatherization and Home Energy Rebate programs in the Corporation. Responsibilities included preparing and giving presentations on the Corporation's fiscal health and outlook to the credit rating agencies on Wall Street and assisting in virtually all areas of the Corporation's policy management, including Finance, Public Housing and Mortgage Operations. Also was responsible for all marketing, press relations and public outreach, including the successful educational campaign for the 2010 Veterans mortgage loan program general election vote.

Responsible for successful legislation passed including the establishment of the Alaska Housing Capital Corporation for the funding of future capital projects, expansion of the Teachers and Nurses Housing Loan program to include all health care professionals and expanding the Corporation's statutes to allow it to do more for homeless Alaskans.

MEMBER — Alaska

Governor Sarah Palin's AGIA Gas Pipeline Team — **2007-2008**

Worked on the evaluation aspects of the team focused on the financing and bonding proposals included in the applications received during the AGIA process.

CHAIR — Alaska

Department of Revenue Transition Team — **2006**

Was in charge of developing and compiling the recommendations for the Department of Revenue transition team document for the Administration of Alaska Governor Sarah Palin.

LEGISLATIVE LIAISON — Anchorage, AK

Alaska Housing Finance Corporation — **2003-2005**

Was in charge of relationship with the Governor and the Legislature in all communications, including passing of AHFC transfer plan legislation that resulted in an upgrade in the Corporation's credit rating from Standard and Poor's. Also successfully worked to get a $25 million AHFC bond bill passed by the legislature to fund sewer and water projects.

SENATE FINANCE COMMITTEE AIDE — Anchorage and Juneau, AK

Alaska State Senator Pete Kelly, Co-Chair — **2001-2003**

Senate Finance Committee

- Worked on the development of the $227 million transportation bond bill and $237 million education bond bill for the Senate Finance Committee that passed the legislature and was approved by voters in the November 2002 election.
- Was the Finance Committee staff person responsible for the development of the $1.4 billion state capital and public works budget, including road, port, school construction and public sanitation projects.
- Fiscal analysis and oversight of $2.3 billion State of Alaska operating budget, including the preparation of State Senate versions of state agency budgets for the $151 million Department of Community and Economic Development and the $134 million Department of Fish and Game.

Policy Development

- Development of strategy resulting in the successful passage of the State's operating and capital budgets by the legislature and subsequent signature into law by the Governor.

HOUSE FINANCE COMMITTEE AIDE — Anchorage and Juneau, AK

Alaska State Representative Gene Therriault, Co-Chair — **1999-2001**

House Finance Committee

- Was the Finance Committee staff person responsible for the development of the $1 billion state capital and public works budget, including road, port, school construction and public sanitation projects.
- Fiscal analysis and oversight of $2.3 billion State of Alaska operating budget, including the preparation of the State House version of the state budget for the $1.07 billion Department of Health and Social Services.
- Developed the missions and measures for the Department of Health and Social Services for the legislature. This included better defining the missions of the divisions in the department

and generating measures that would allow for the increase in the effectiveness and the efficiency of those divisions.

CHIEF OF STAFF — **Anchorage and Juneau, AK**
Alaska State Representative Terry Martin — **1998**
House Finance Committee

- Fiscal analysis and oversight of $2.3 billion State of Alaska operating budget, including the preparation of State House versions of state agency budgets for the $140 million Department of Revenue and the $28 million Department of Law.

Policy Development

- Development of legislation in the area of public finance, intended to produce a more "honest" budgetary method of accounting for the state's general fund.

Public Affairs Management

- Development of public outreach programs targeting constituents, community councils, trade organizations and special interest advocacy groups using direct mail, contact with the press and public appearances.

MANAGER OF CLIENT DEVELOPMENT — **Los Angeles, CA**
Global Stratagem Group — **1997**

Led efforts to develop private sector clients for strategic planning consulting firm, with an emphasis in infrastructure development and public affairs advocacy. Clients included Montgomery Watson Americas, Inc., Nelson NamePlate Co. and the City of Vernon, CA.

LEGISLATIVE COORDINATOR — **Anchorage, AK**
American Cancer Society/American Heart Association — **1997**
Public Affairs Management

Worked with executive directors of the American Cancer Society, the American Heart Association and their lobbyists to develop and execute a strategic plan to pass legislation that would fund children's programs by substantially increasing the tobacco tax in the State of Alaska. A primary component in executing the plan was targeting individuals who had strong relationships with individual legislators in order to gain those legislators' support. Activities included direct contact with influential political and community leaders in order to get them to personally lobby for the legislation. After unsuccessful attempts in the prior three legislative sessions, the legislation was successfully passed and signed into law by the Governor during the 1997 legislative session.

CHIEF OF STAFF — **Anchorage and Juneau, AK**
Alaska State Senator Steve Rieger — **1993-1997**
Senate Finance Committee

- Fiscal analysis and oversight of $2.6 billion State of Alaska operating budget, including the preparation of State Senate versions of state agency budgets for the $425 million Department of Health and Social Services, the $370 million University of Alaska, the $320 million Department of Transportation and the $91 million Department of Public Safety.
- Assisted in the development of the yearly state capital budget, ranging in size from $100 million to $325 million general funds.

Policy Development

- Development of legislation in areas of health and social services and public safety, including legislation reducing the overpayment of welfare amounts, a budget cutting matter, and a bill to extend state police protection coverage to parts of Senator Rieger's district not covered at the time.
- Oversight of the development of legislation dealing with the prioritization of the investments of the Alaska Permanent Fund, the Senator's top priority, a fund of approximately $24 billion.

LEGISLATIVE ASSISTANT — **Anchorage and Juneau, AK**
Alaska State Senator Rick Uehling — **1989-1993**
Senate Finance Committee

- Fiscal analysis and oversight of the $3.1 billion State of Alaska budget, including the preparation of State Senate version of the state agency budget for the $102 million Department of Corrections budget and assisted in the development of the state senate version of the $760 million Department of Education budget.
- Assisted in the development of the yearly state capital budget, ranging in size from $100 million to $500 million general funds.

Policy Development

- Development of legislation in areas of health and social services, natural resources and revenue, including passage of legislation dealing with the protection of workers from sexual harassment in the workplace. Also worked on a resolution urging Congress to open the Arctic National Wildlife Refuge to oil and gas exploration. Worked on legislation that came through the Senate Finance Committee for the Senator.

EDUCATION

UNIVERSITY OF OREGON — **Eugene, OR**
Bachelor of Science degree, Speech: Rhetoric and Communication, 1987.

WEST ANCHORAGE HIGH SCHOOL — **Anchorage, AK**
Graduated 1982.

State Commission for Human Rights

Mark S Fish

Anchorage, Alaska 99508

ENTERED 06-11-07

Profile:

I have the ability to work as part of a diverse team of individuals or as an independent agent. I am reliable, trustworthy and intellectually curious. I require few benefits. I am seeking to supplement my income while participating in an engaging workplace environment. I prefer part time employment and I am flexible on scheduling.

- **Major Achievements:**

λ Implemented Alaska Army National Guard (AKARNG) Aviation's first official Non Rated Crew member training program. This resulted in a deployable, night vision goggle trained, UH60 helicopter unit.

λ Supervised components of AKARNG Aviation in their first ever out of state deployment in support of Joint Task Force 6 (California border detail). This deployment resulted in the 1/207th Aviation Regiment being awarded Alaska's Distinguished Unit Citation.

λ Twenty years of service in the Alaska Army National Guard. Resulting in many Awards culminating with The Alaska Distinguished Service Medal.

Experience:

1984 - 2003 Alaska Army National Guard 1/207th Aviation Regiment

1984 -1987 **Utility Helicopter Repairman**

- Performed all aspect of helicopter maintenance and repair. Ensured Aircraft availability and airworthiness.

1988 -1993 **Tactical Transport Helicopter (Black hawk) Crew Chief**

- Operated as part of a coordinated flight crew during a multitude of mission profiles.

- Performed duties as flight instructor and unit trainer for other non- rated crew members.

1993-2003 **Aircraft technical inspector**

- Ensured all safety of flight maintenance was performed to established standards and was properly documented using computer based flight logs.

- Assessed maintenance trends and implemented control measures to minimize risk and provide a safe operating

environment.

1987- 2003 **Army Aviation Support Facility AKARNG**

1987- 1991 **Aircraft Mechanic (WG 5-10)**

- Responsible for performing operational and phase maintenance on assigned aircraft.

- Performed assigned duty as bench stock supply parts manager

1991 -2003 **Aircraft Mechanic (WG11)**

- Supervised a team of up to five mechanics in the inspection and reconstruction of assigned aircraft.

- Initiated parts request, prioritized and tracked parts throughout the procurement process. Coordinated the performance of specialized work orders with allied shops.

- Provided daily status reports and projected Phase completion dates to assist unit commanders in assessing unit needs and readiness.

Aug 2006-Nov 2006 **Volunteer Coordinator, Palin for Governor**

- Directed volunteers to scheduled and unscheduled tasks.
- Provided material support and a point of contact for statewide volunteers

2003-2006 **Public Service**

- Currently serving as President of Airport Heights Community Council and the Federation of Community Councils executive board.
- Served as a non-voting member of a Anchorage School District, Boundary Task Force.
- Served on nominating committee for the Federation of Community Councils

Training:

- Completed many Military resident courses including but not limited to Aviation Maintenance Management and Leadership Development.

Qualifications :

- Life long Alaskan hunter and fisher with an intimate knowledge of customary and traditional use of game resources. Traveled extensivly across Alaska very familiar with rual and urban Alaskan lifestyles.

Personal Details:

I pursue many different interests including hunting, fishing, building blackpowder rifles, history and current events

Mark S. Fish's positions and views on the issues:

Links are only provided where we have information. The first link is a report of all issues and questions made available to the candidates.

General: (political statement of goals, objectives, views, philosophies)

During a recent door to door event I was asked why I was a Republican. My answer is, the Republican Party was founded to protect the minority from the tyranny of the majority and there is no greater minority than the individual.

I am running to end property taxes on homeowners and ensure government lives up to it's constitutionally mandated duties.
I assert that an individual has a right to benefit from the fruit of their labor and should not fear unwarranted confiscation by government simply because they cannot meet the demands of the non tax paying public.

Preservation of individual life, liberty and property is the foundation of what has made our country great.
I will no longer stand by while social engineers dismantle this foundation and change government from the servant to the master of the people.

Personal: (gender, age, marital status, spouse's name and age, children's name and ages, home town, current residence)

Wife Mary, Mother Emma, Sisters Kathy and Karin, Brothers Alan and Gordon, 13 Nieces and Nephews, 20 Grand Nieces and Nephews. Most reside in Alaska.

Education: (times and places of schools, colleges, major, degrees, activities, sports)

Lincoln High School,Thief River Falls, Minnesota 1974
Anchorage School District 1977, General Educational Development

Press Release Wording

Joyce Skaflestad, is State of Alaska Retiree. Skaflestad previously served as a magistrate for Hoonah District Court from 1993-2004 and as an Interim Magistrate for the Yakutat District Court from 2005-2006. Skaflestad also routinely filled-in for the District Court Judge and Magistrate in Juneau. In 1998 Skaflestad was appointed by the Alaska Supreme Court as a Deputy Training Judge and worked in that capacity in addition to her magistrate duties until her retirement in 2004. Skaflestad has worked as a Deputy Training Judge in all 13 courts (including Pelican) in the First Judicial District.

Memorandum

TO: Senator Wielechowski, Chair
State Affairs Committee

FROM: Kirsten Waid
Secretary of the Senate

DATE: April 5, 2012

SUBJECT: Governor's Appointment Withdrawn
Dr. David Eichler – Alaska Public Offices Commission

The following appointee has resigned and should not be considered by your committee:

Alaska Public Offices Commission
Dr. David Eichler – North Pole

President Stevens referred the appointment to the State Affairs Committee on April 2.

Governor Sean Parnell
STATE OF ALASKA

April 5, 2012

The Honorable Gary Stevens
President of the Senate
Alaska State Legislature
State Capitol, Room 111
Juneau, AK 99801-1182

Dear President Stevens,

I withdraw the appointment of Dr. David Eichler to the Alaska Public Offices Commission. He has resigned from this Commission appointment.

Regards,

Sean Parnell
Governor

cc: Kirsten Waid, Senate Secretary, Alaska State Senate

I move that the Senate State Affairs Committee forward the appointment of Dr. David Eichler to the Joint Session with a recommendation that the members vote No.

I move that the Senate State Affairs Committee recommend to the Joint Session of the Legislature that Dr. David Eichler not be confirmed to serve on the Alaska Public Offices Commission. The Committee finds that past statements made by Dr. Eichler indicate he lacks the balanced temperament and judiciousness required of an APOC Commissioner.

Regents, University of Alaska Board of		David L Eichler

CS FOR SENATE BILL NO. 2( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS MENARD AND HUGGINS, Wagoner, Dyson, Giessel, Meyer

A BILL

FOR AN ACT ENTITLED

"An Act relating to National Rifle Association and breast cancer awareness special request license plates."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 28.10.181 is amended by adding new subsections to read:

(bb) Special request plates commemorating the National Rifle Association. Upon application by the owner of a motor vehicle, the department may issue registration plates commemorating the National Rifle Association. The commissioner, after consulting with representatives of the National Rifle Association in Alaska, shall determine the design and color of the plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

(cc) Special request breast cancer awareness plates. Upon application by the owner of a motor vehicle, the department may issue breast cancer awareness registration plates. The commissioner shall determine the design and color of the

plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

* **Sec. 2.** AS 28.10.421(d) is amended by adding new paragraphs to read:

(20) special request National Rifle Association plates ..... $50 plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the $50 fee required by this paragraph shall be collected only on the first issuance and the replacement of the special request plates; a $30 fee shall be collected biennially thereafter in the same manner as the fee required under (b), (c), (h), or (i) of this section; the commissioner of administration shall separately account for the fees received under this paragraph that the department deposits into the general fund; notwithstanding (g) of this section, the annual estimated balance in the account that is in excess of the cost of issuing special request plates may be appropriated by the legislature to establish and maintain a scholastic clay target program and for other youth shooting programs.

(21) special request breast cancer awareness plates..... $40 plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the $40 fee required by this paragraph shall be collected only on the first issuance and the replacement of the special request plates.

Re: Request for hearing of SB 2

Honorable Senator Bill Wielechowski

I respectfully request a hearing of the Committee Substitute for Senate Bill No. 2 before the Senate State Affairs Committee.

The CS for SB 2 will accomplish two objectives: it will establish NRA commemorative license plates from which money earned in excess of the cost of the plates may be appropriated by the Legislature to establish and maintain a scholastic clay target shooting program and for other youth shooting programs. This CS will also create Breast Cancer Awareness license plates.

Thank you for your consideration.

Committee Substitute for Senate Bill 2 Sponsor Statement

The **Committee Substitute for Senate Bill 2** will codify in law an option for an Alaska resident to purchase a **National Rifle Association** commemoration license plate for their vehicle. The annual estimated balance in the account that is in excess of the cost of issuing **special request plates** may be appropriated by the Legislature to establish and maintain a **scholastic clay target program** and for other youth shooting programs.

These special request plates will cost **$50 in addition** to the normal registration fee required for a particular vehicle. Alaskans who choose to purchase the plate must pay **a $30 fee** in addition to the normal two year renewal fee each time they renew their license plate tags. The idea behind the license plates is to help **fund scholastic clay target programs and give Alaska's young shooters a chance to have the resources seen in the Lower 48.**

This bill began as a grassroots effort by **a local entrepreneur** and small business owner who is heavily involved with **youth shooting programs, gun safety and competition**. His goal is to see opportunities open for students who desire to take part in competitive shooting programs that have **flourished nation-wide**. With help from funds that could come from NRA commemorative license plates, scholastic shooting programs would get a boost.

Tennessee is the most recent state to have proposed and passed an idea like the NRA piece of the **CS** for **Senate Bill 2**. Other states offering the license plates **are Idaho, Mississippi, North Carolina, Oklahoma and Virginia.**

Additionally, this **Committee Substitute** will make available special request **breast cancer awareness plates**. These plates will cost an additional $50 to purchase and will be collected on the first issuance and the replacement of the special request plates.

I've heard from many constituents who have had **their lives touched by breast cancer**, and this symbolic gesture is what they're asking for. Sometimes it's the little things the Legislature does that make our constituents happy. There isn't a member of either house who has not known someone dear to them who has been touched by this disease.

Please assist me by supporting the **CS for Senate Bill 2**.

Senator_Linda_Menard@legis.state.ak.us

Division of Motor Vehicles
Special Request License Plates
Fact Sheet

The purpose of this guide is to is to provide general information about special request plates and specifications for the design and layout of a plate.

The Division of Motor Vehicles (DMV) does not preprint special request plates. All such plates are ordered individually by the registered owner, either over the internet (if the plate has no eligibility requirements), at any DMV office, or through the mail. The owner must pick the plate number, which must display at least 2 but not more than 6 characters comprised of letters and numbers.

The design of the plate is a cooperative effort between the DMV and the organization requesting the new plate design. DMV requires the organization to provide a single point of contact with whom to work on the plate design. A letter from the chairman of the board, the president, or other appropriate authority, specifying the contact person, must be provided to DMV before plate design begins. The final plate design must be approved by the Commissioner of the Department of Administration.

General Design Rules:

- The legal function of a license plate is to identify a vehicle. All designs must comply with the requirement that law enforcement agencies be able to easily read the plate number.
- The plate design must accommodate a 6-character plate number for passenger vehicles and a 5-character plate number for motorcycles.
- The design must be in one of the following formats:
  - Cdr CorelDraw
  - Psd Photo shop color model 300 resolutions
  - Tif tagged image cmyk color model
  - Eps encapsulated post script cmyk color model
- The plate is 11-9/16" wide by 5-7/16" tall.
  - The top 1-1/4" banner is reserved for the word "ALASKA" and for the month and year validation tabs.
  - The left-hand 2-1/6" below the top banner is available for a logo or other unique design
  - The bottom 1" banner may contain a message, such as THE LAST FRONTIER.
- The background colors and the plate numbers must be contrasting so as to allow for easy reading of the plate number by law enforcement. A complex logo may be difficult to see, and a background that is too busy may be rejected.
- All plate designs will be screened by DMV for readability and compliance with the general design rules before submission to the Commissioner for approval.

It takes time to design a plate, get it approved by the Commissioner, and put it into production. Please allow 4 months from the date the design phase begins until the plate is ready for customers to order.

Senator Linda Menard
State Capitol, Room 3
Juneau, AK 99801

Dear Senator Menard,

I understand that you recently introduced and the 27th Alaska State Legislature is considering Senate Bill 2, an act relating to National Rifle Association special request license plates. Further, it has been conveyed that you are considering expanding this legislation to include breast cancer awareness specialty plates. This correspondence serves as notice that the Division of Motor Vehicles (DMV) does not object to the proposed legislation nor its expansion to include breast cancer awareness.

Should SB 2 become law, the DMV will work with the designated entities on a potential design for each plate. The DMV will also consult law enforcement to ensure that officers can easily identify the plate number for their purposes. The designs will then go before the Commissioner of Administration for final approval.

If you or your colleagues have any questions regarding the license plate process, please do not hesitate to contact me.

Sincerely,

Whitney H Brewster

Senator Linda Menard

I write this letter to show my support, and the support of the Mat-Su Second Amendment Task Force, for SB#2, now before the Senate.

I am a Life Member of the National Rifle Association (NRA), and have long thought that Alaska has needed NRA License Plates to raise needed funding for Sporting related Organizations.

The only group that I would suggest the residual funding, from the sales of these NRA Plates, should go to would be the "Alaska Scholastic Clay Target Program", which directly supports both the safe handling of firearms and also benefits Youth through the teaching of mental and physical disciplines.

I wholeheartedly hope that you will place your full support, for the passage of SB#2, behind this Legislation to see it through to fruition.

Respectfully yours,
Signed
Kenda K. Chapman, Life Member of the NRA

Kelly and Melinda Swihart
Wasilla, Alaska

Dear Representative Holmes, Herron and Senator Hoffman

I'm requesting your assistance to introduce a bill to the 2011 Alaska State Legistrature. I would like the DMV to issue a special breast cancer awareness license plate, with a pink ribbon. My wife Memry Dahl is a breast cancer survivor, and has been cancer free the past three years. I am so proud of her and the many other breast cancer survivors during what is one of the most difficult periods of their lives. This request is a way for me to show Memry and other survivors that I support and care about them and wish for a day when this disease no longer impacts their lives. I also want to give family and friends a way to support the breast cancer cause, and display their support on their vehicles. I hope that friends and family will not only display the breast cancer awareness license plates on their vehicle but that the state would assist in collecting donations and would donate the money to an Alaska cancer support group. I appreciate your assistance on this matter, I hope we can gather the support needed to make this a reality. Thank you

Sincerely,
Christopher Dahl

January 27, 2011

Senator Bill Wielechowski, Chair
Senate State Affairs Committee

RE: Request for Hearing SB 7, 27-LS00083\A -"An Act relating to the Civil Rights of Felons."

Dear Senator Wielchowski:

Senator Davis respectfully requests a hearing on SB 7 before the Senate State Affairs Committee. SB 7 allows felons to register to vote immediately upon release from incarceration and assume responsibility for their reintegration in their communities.

Included in this hearing package are the following:

1. Sponsor Statement
2. Current version of SB 7, 27-LS0083\A.
3. Sectional Summary (to be provided under separate cover)
4. Fiscal Notes (Committee responsibility, but note that the similar bill in the 26th Legislature, SB 68, listed zero fiscal notes for the Department of Corrections and Division of Elections).
5. Supportive Documents:
    - ACLU Model Testimony, February, 2007 on similar bill, SB 7 in 25th Legislature
    - NCSL Legisbrief, "Felon Voting Rights," April-May 2009
    - The Sentencing Project News: "Senate Committee Passes National Criminal Justice Commission Act of 2009," January 21, 2010
    - Alaska Justice Forum, "Felon Disenfranchisement and the Voting Rights Act – *Farrakhan V. Gregoire*: 'A Crowd of One.'" Winter, 2010
    - The Sentencing Project News: "Washington State: 9th Circuit Court Reverses Disenfranchising Law; Landmark Decision Could Go to Supreme Court." January 8, 2010
    - The Seattle Times: Gregoire signs bill to restore voting rights for some felons." May 5, 2009
    - Alaska Department of Corrections 2009 Offender Profile - excerpted sections

Please anticipate substantial in-person and teleconference testimony.

Also, please do not schedule a hearing February 21-24, 2011 due to office scheduling conflicts.

Please contact me if you need additional information.

Sincerely,

Thomas S. Obermeyer
Legislative Assistant

Senator Bettye Davis

SB 7 - "An Act relating to the civil rights of felons."

SPONSOR STATEMENT

The Alaska State Constitution Article V, Sec. 2 bars a person to vote "who has been convicted of a felony of moral turpitude unless his civil rights have been restored." The right to vote remains suspended from the date of conviction through the date of release from all conviction-related disabilities, including probation and parole (AS15.05.030; AS 15.60.010(39)). According to the Alaska Department of Corrections Offender Profile, in 2009 more than 10,000 Alaskans were ineligible to vote pursuant to this provision. This bill allows felons to register to vote immediately upon release from incarceration and start assuming responsibility for their reintegration in their communities.

Harsher sentencing laws over the past 30 years have allowed the prison population to balloon while reducing the rehabilitative model to almost non-existence. Article I, Section 12 of the Alaska Constitution requires: "Criminal administration shall be based upon . . . the principle of reformation." In Alaska the prison population increased from 800 prisoners in 1984 to over 5,000 in 2008, an increase of over 600%. Of those incarcerated in Alaska 48% were Caucasian, 52% were minorities. Although Alaska Natives represent only 16% of the population, they comprised 35% of total offenders in institutions in 2009. Likewise, African American represent 4% of the population but comprised 10% of the incarcerated. Nationally, minority felons are disproportionately disenfranchised under current law and the harm of this continued disenfranchisement after release is exacerbated by stigma and other forms of discrimination as they try to reenter society.

An estimated 5.3 million American citizens cannot vote because of a criminal conviction. Of these, 4 million are out of prison and living and working in communities. Restoring a person's right to vote is a critical element to successful reentry into society after incarceration and is consistent with our democracy's modern ideal of universal suffrage. The Democracy Restoration Act of 2009 was introduced in both houses of Congress to restore the right to vote to citizens once released from prison. It would affect more than 41,000 people on parole.

Felons across the country often cannot sit on juries, serve as teachers, firefighters or even barbers or plumbers; receive food stamps or live in public housing. These ex-offenders have a vested interest in what happens in society and if they are to participate they should have a right to vote.

The National Conference of State Legislatures (NCSL) in 2009 found that disenfranchisement still varies tremendously from state to state:

- In Maine and Vermont, felons do not lose their right to vote; even felons who are serving a prison sentence can vote.
- In 13 states and the District of Columbia, felons are ineligible to vote only while serving a prison sentence. Ex-offenders and those on probation and parole can vote.
- In 25 states, prisoners and people under community supervision, probation and/or parole are ineligible to vote, but ex-offenders are eligible.
- In eight states, all felons in prison and those in community supervision, as well as certain ex-offenders, are ineligible to vote.
- In Kentucky and Virginia, all felons and ex-offenders are permanently ineligible to vote, absent a pardon.

NCSL reported that between 1996 and 2008 28 states passed new laws on felon voting rights which included:

- Seven states repealed lifetime disenfranchisement laws, at least for some ex-offenders.
- Two states gave probationers the right to vote.
- Seven states improved data-sharing procedures among state agencies.
- Nine states passed requirements that ex-offenders be given information and/or assistance in regaining their voting rights at the time they complete their sentence.
- Twelve states simplified the process for regaining voting rights, for instance, by eliminating a waiting period or streamlining the paperwork process.

While this bill falls short of a Constitutional amendment to eliminate the voting prohibition entirely, it does limit disenfranchisement to those incarcerated and restores voting rights upon release. A hallmark of participatory democracy, voting affirms our membership in the social compact. Exclusion of criminal offenders from this process and from one of the most fundamental rituals of community involvement does nothing to promote public safety and reduce recidivism. It can only serve to impede social reintegration of these citizens. Felon disenfranchisement statutes rest on outdated retributory practices antithetical to contemporary standards of equal representation in the political process, standards explicitly stated in the Voting Rights Act.

Former US Supreme Court Justice Thurgood Marshall said:

"It is doubtful whether a state can demonstrate either a compelling or rational policy interest in denying former felons the right to vote. Ex-offenders have already paid their debt to society. They are as much affected by the actions of government as any other citizen and have as much of a right to participate in governmental decision-making. Furthermore, the denial of a right to vote to such persons is hindrance to the efforts of society to rehabilitate former felons and convert them into law abiding and productive citizens."

SENATE BILL NO. 7

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY SENATOR DAVIS

Introduced: 1/19/11
Referred: State Affairs, Judiciary

A BILL

FOR AN ACT ENTITLED

"An Act relating to the civil rights of felons."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 09.20.020 is amended to read:

Sec. 09.20.020. Disqualification of jurors. A person is disqualified from serving as a juror if the person

(1) has served as a juror in the state within one year of the time of examination for service; or

(2) has been convicted of a felony for which the person **is incarcerated, until the person is released from incarceration** [HAS NOT BEEN UNCONDITIONALLY DISCHARGED; UNCONDITIONAL DISCHARGE HAS THE MEANING GIVEN IN AS 12.55.185].

*** Sec. 2.** AS 15.05.030 is amended to read:

Sec. 15.05.030. Loss and restoration of voting rights. (a) A person convicted of a crime that constitutes a felony involving moral turpitude under state or federal law may not vote in a state, federal, or municipal election **while incarcerated for that**

crime [FROM THE DATE OF THE CONVICTION THROUGH THE DATE OF THE UNCONDITIONAL DISCHARGE OF THE PERSON]. Upon **release from incarceration** [THE UNCONDITIONAL DISCHARGE], the person may register under AS 15.07.

(b) The commissioner of corrections shall establish procedures by which a person **released from incarceration** [UNCONDITIONALLY DISCHARGED] is advised of the voter registration requirements and procedures. **The procedures established under this subsection must provide that, at the time of the person's release from incarceration,**

(1) the Department of Corrections shall provide the person a written notification of the person's restored right to vote; and

(2) the commissioner of corrections shall notify the director that the person ~~is entitled to be registered as a voter.~~ has been released from cust.

Comm. is

* **Sec. 3.** AS 15.07.135 is amended to read:

Sec. 15.07.135. Cancellation of registration of incarcerated [CONVICTED] persons. (a) The director shall make reasonable efforts to obtain the names of persons convicted of a felony involving moral turpitude **and incarcerated for that crime**. Promptly after receipt of evidence satisfactory to the director that a person has been convicted of a felony involving moral turpitude **and incarcerated for that crime**, the director shall cancel the registration of the person.

(b) Upon presenting proof that a person whose registration was canceled under (a) of this section has been **released from incarceration** [UNCONDITIONALLY DISCHARGED FROM CUSTODY], the person may register. The director shall make reasonable efforts to verify the **release from incarceration** [UNCONDITIONAL DISCHARGE] of persons applying for registration under this subsection.

* **Sec. 4.** AS 33.30.241(a) is amended to read:

(a) A person who is convicted of a felony involving moral turpitude as defined in AS 15.60.010 is disqualified from voting in a state**, federal,** or municipal election **while the person is incarcerated for that crime** [UNTIL THE PERSON'S UNCONDITIONAL DISCHARGE].

Elections.

* **Sec. 5.** AS 33.30.241(b) is amended to read:

(b) A person who is convicted of a felony is disqualified from serving as a juror **while the person is incarcerated for that crime** [UNTIL THE PERSON'S UNCONDITIONAL DISCHARGE].

* **Sec. 6.** AS 15.60.010(39) and AS 33.30.241(c) are repealed.

def. of uncond. discharge

conforming def. to uncond.

MEMORANDUM February 17, 2011

SUBJECT: "Civil rights" under art. V, sec. 2 of the state constitution
SB 7 (Work Order No. 27-LS0083\A)

TO: Senator Bill Wielechowski
Attn: Michelle Sydeman

FROM: Alpheus Bullard
Legislative Counsel

You have asked several questions relating to SB 7 ("[a]n Act relating to the civil rights of felons"). You asked whether crimes of moral turpitude are defined, how a court is likely to interpret "civil rights" under art. V, sec. 2[1] of the state constitution, and whether any provisions of SB 7 pose constitutional issues.

Moral turpitude

In general, a crime involving moral turpitude is one based on an action that is immoral or wrong in itself because it gravely violates moral sentiment or accepted moral standards of a community, not just because the legislature has prohibited the action. In legal terms, the difference is between an offense that is *malum in se* (a wrong in itself), and an offense that is *malum prohibitum* (wrong because it is prohibited). A statutory definition of felonies involving moral turpitude is provided at AS 15.80.010(9):

> (9) "felony involving moral turpitude" includes those crimes that are immoral or wrong in themselves such as murder, manslaughter, assault, sexual assault, sexual abuse of a minor, unlawful exploitation of a minor, robbery, extortion, coercion, kidnapping, incest, arson, burglary, theft, forgery, criminal possession of a forgery device, offering a false instrument for recording, scheme to defraud, falsifying business records, commercial bribe receiving, commercial bribery, bribery, receiving a bribe, perjury, perjury by inconsistent statements, endangering the welfare of a minor, escape, promoting contraband, interference with official proceedings, receiving a bribe by a witness or a juror, jury tampering,

---

[1] **Disqualifications.** No person may vote who has been convicted of a felony involving moral turpitude unless his civil rights have been restored. No person may vote who has been judicially determined to be of unsound mind unless the disability has been removed.

> misconduct by a juror, tampering with physical evidence, hindering prosecution, terroristic threatening, riot, criminal possession of explosives, unlawful furnishing of explosives, promoting prostitution, criminal mischief, misconduct involving a controlled substance or an imitation controlled substance, permitting an escape, promoting gambling, possession of gambling records, distribution of child pornography, and possession of child pornography[.][2]

Article V, section 2

Article V, sec. 2 provides that "[n]o person may vote who has been convicted of a felony involving moral turpitude unless his civil rights have been restored." It is not clear how an Alaska court would interpret this provision. The Alaska Supreme Court has not yet addressed what constitutes "civil rights" for the purposes of this clause. The section's reference to "civil rights" must include rights other than the right to vote, otherwise the provision would be unnecessary.

Origins of the provision

The minutes of the constitutional convention provide some insight, but no definitive answer, as to how "civil rights" in art. V, sec. 2 should be interpreted. The only discussion and debate of the provision (that would become art. V, sec. 2) occurred on December 15, 1955.[3] On that day, delegate John S. Hellenthal, chairman of the convention's committee on suffrage, elections and apportionment, described a debate the committee had when drafting "Committee Proposal No. 1. Article on Suffrage and Elections":

> HELLENTHAL: The reason that the [term "moral turpitude"] was used was that not all felonies involve moral turpitude, not all. There are some felonies that do not and the term "moral turpitude" is a generally accepted word. Now we adopted this language on the advice of the adviser who agreed with that contention and who felt that we should not require all persons convicted of any felony to have to go before the pardon board. Now that was the reason for the language. Other language that was rejected was "a felony of serious nature". Another suggestion was

---

[2] Note that under AS 15.05.030, a person may not vote if convicted of a crime that is a felony involving moral turpitude under state *or federal* law. No single definition of a crime or felony involving moral turpitude is provided under federal law. A good summary of the interpretation of the term, and the manner in which a court determines that a crime involves "moral turpitude" can be found in Nicanor-Romero v. Mukasey, 523 F.3d 992, 997 - 1000 (9th Cir. 2008) (summarizing Ninth Circuit law on moral turpitude and recognizing that the court has not relied on a consistent or easily applied set of criteria to identify crimes of moral turpitude) overruled on other grounds by Marmolejo-Campos v. Holder, 558 F.3d 903 (9th Cir. 2009).

[3] Minutes of the Constitutional Convention, Day 38 at 866 - 910.

> "convicted of an infamous crime". ***There was one group in the Committee who felt that any person who served his time should automatically be restored to his civil rights. The majority definitely felt, and later the unanimous opinion of the Committee was that construction would not be sound.*** But they felt that not all convicted felons should have to go before the pardon board but only those of the more serious felonies. Now, Alaska has a fairly good criminal code, but throughout the United States there are many many offenses which in Alaska are misdemeanors, are considered felonies, and vice versa, and that is why the moral connotation was added and only that.

Minutes of the Constitutional Convention, at 890 - 891 (emphasis added) .

There is no record of any delegate taking issue with the judgment of the committee (as described by Hellenthal) on this point.

Note also, in the committee's original proposal, the "Disqualification" section read:

> No person judicially determined to be of unsound mind and no person convicted of a felony involving moral turpitude, ***unless pardoned and restored to his civil rights***, shall be qualified to vote in any State or local election.

Minutes of the Constitutional Convention, "Appendix V. Committee Proposals" (emphasis added).[4]

Interpreting "civil rights"[5]

Federal law prohibits a convicted felon from possessing a firearm unless the felon's civil rights have been restored under state law. 18 U.S.C. 921(a)(20). The federal statute does not define "civil rights." For purposes of this statute, federal circuit courts have interpreted "civil rights" to include the right to vote, the right to seek and hold public office, and the right to serve on a jury. United States v. Dahms, 938 F.2d 131, 133 (9th Cir. 1991); United States v. Leuschen, 395 F.3d 155 (3d Cir. 2005) (appellant did not qualify for the restoration of civil rights defense because his right to sit on a jury had not been restored under Pennsylvania law).

---

[4] Though the record isn't clear, it seems that the committee on style and drafting removed the "*pardoned and*" language from the provision.

[5] The term "civil rights" has not had a fixed life in the law. Rights that were once considered as "political" (the right to vote) or "social" (right of unimpeded access to public accommodations) are now recognized as civil rights. See e.g. Voting Rights Act of 1965, 42 U.S.C. §§ 1973 - 1973aa-6 (2006) and Americans with Disabilities Act of 1990, 42 U.S.C. §§ 1201-12213 (Supp. 2008).

The Alaska Court of Appeals has addressed this statute as well, concluding that under Alaska law "defendants on probation or parole can not serve as jurors" and "[t]his disqualification means that, for purposes of federal firearms laws, [the defendant's] civil rights have not been restored." Barry v. State, 925 P.2d 255, 257 (Alaska App. 1996). The prohibition on felons serving as jurors is found in AS 33.30.241(b).[6] Another case dealing with juror qualifications makes a passing reference to "civil rights -- such as the right to vote or to carry a firearm." Singleton v. Alaska, 921 P.2d 636, 638 (Alaska App. 1996).

These cases do not specifically address art. V, sec. 2 of the Constitution of the State of Alaska, and they would not be binding on the Alaska Supreme Court as it interprets that provision. But, they are an indicator of how a court would interpret art. V, sec. 2 if required to do so. It is my legal opinion that an Alaska court is likely to interpret "civil rights" under art. V, sec. 2 to include the right to vote, the right to seek and hold public office, and the right to serve on a jury.

Parolees and probationers

Less clear is whether persons on parole or probation, would be considered by a court to have had their civil rights restored for the purposes of art. V, sec. 2. Under current law, "'unconditional discharge' means that a defendant is released from all disability arising under a sentence, including probation and parole." AS 12.55.185(18). This definition applies to the term as it is used in AS 09.20.020 (relating to qualifications of jurors), AS 15.05.030 (loss and restoration of voting rights), and AS 33.30.241 (effect of judgment of conviction on civil rights).[7]

Perhaps telling of how an Alaska court might approach the issue is Roman v. State, 570 P.2d 1235 (Alaska 1977). In Roman, the Alaska Supreme Court held that the Alaska

---

[6] **Sec. 33.30.241. Effect of judgment of conviction on civil rights.** (a) A person who is convicted of a felony involving moral turpitude as defined in AS 15.80.010 is disqualified from voting in a state or municipal election until the person's unconditional discharge.

(b) A person who is convicted of a felony is disqualified from serving as a juror until the person's unconditional discharge.

(c) In this section "unconditional discharge" has the meaning given in AS 12.55.185.

[7] The statutes have not always been so clear regarding the status of a person on parole or probation. See 1985 Op. Atty Gen. No. 103, File No. 366-333-85 (January 29), 1985 Alas. AG LEXIS 312 (under AS 33.30.310, repealed in 1986, which referred to "imprisonment" suspending a person's civil rights, some opinions of the attorney general said that "parolees and those under suspended sentences may vote, while others [said] they may not.")

constitution entitles a released offender, whether a probationer or parolee,[8] to the same protections against search and seizure as an ordinary person.

> Any justification for treating parolees differently from any other person must stem from their special status. They are entitled to all rights accorded other persons except where valid purposes of parole require restrictions. Clearly, parole authorities have a special interest in the otherwise private affairs of the parolee. Most courts and commentators and some legislatures, however, have recognized that parole conditions must be reasonably related to the rehabilitation of the offender and the protection of the public and must not be unduly restrictive of liberty.

Id. at 1240 (internal citations omitted).

It remains to be seen whether an Alaska court would hold that there is a state justification for preventing persons who are no longer incarcerated, but not yet free of a condition of probation or parole, from voting due to a valid purpose of parole or probation.

Constitutional issues posed by SB 7

If SB 7 raises a constitutional issue, it relates to the substance of the bill. Is it constitutional to permit a person, who has been convicted of a felony involving moral turpitude, to vote and to serve on a jury once released from incarceration? This returns us to how art. V, sec. 2 of the state constitution might be interpreted by a court. If a court interprets "civil rights" broadly, equating it with a felon's "unconditional discharge," then SB 7 would be found to be unconstitutional.

> "The interpretation of a statute or constitutional provision is a question of law to which we apply our independent judgment. 'We interpret the constitution and Alaska law according to reason, practicality, and common sense, taking into account the plain meaning and purpose of the law as well as the intent of the drafters.'"

West v. State, 2010 Alas. LEXIS 80, 12 - 13 (Alaska Aug. 6, 2010) citing Parsons v. State, 189 P.3d 1032, 1036 (Alaska 2008), quoting Native Vill. of Elim v. State, 990 P.2d 1, 5 (Alaska 1999).

Again, the Alaska Supreme Court has not addressed "civil rights," or what the "restoration" of these rights might mean for the purposes of the clause. if the court is to look to the intent of the drafters, the words of delegate Hellenthal - "*There was one group in the committee who felt that any person who served his time should automatically be restored to his civil rights. The majority definitely felt, and later the unanimous opinion of the committee* [*on suffrage, elections, and apportionment*] *was that construction would*

---

[8] Roman, 570 P.2d at 1237, n.3.

not be sound[,]" and the "*unless pardoned*" language included in the committee's original proposal, could be interpreted as expressive of an intent that runs contrary to SB 7's restoration of the right to vote upon release from incarceration (for persons convicted of a felony involving moral turpitude).

What weight might the court assign these fragments of information from Alaska's constitutional convention? It's not clear. The "unless pardoned" language was not in the convention's final product, and it was not the language the voters of the territory ratified on April 24, 1956. What should the opinion of the seven committee members say about "the intent of the drafters" or the voters who ratified the constitution? A court will apply it's own independent judgment as to the persuasive value of these points of information and it's not clear how this information might be assessed.

Note too, that a court's interpretation of art. V, sec. 2 will not occur in a vacuum. The subject of what "civil rights" are is complex. The question of whether a person who has been convicted of a felony involving moral turpitude may vote, or serve on a jury, involves both contemporary and half-century old understandings of what "civil rights" are; what a "fair cross section of a community" is for the purpose of constituting a jury;[9] and an evaluation of the justifications for preventing a person, who has been convicted of a felony involving moral turpitude and subsequently released (from incarceration), from casting a vote or serving on a jury.

Senate Bill 7 is not clearly unconstitutional. However, if challenged, those portions of the bill that would restore the right to vote to felons on probation or parole might be found to violate art. V, sec. 2 of the state constitution.

If you have questions, or if I can be of further assistance, please do not hesitate to contact me.

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 7

Analysis

Passage of this legislation will have potential impact on the Department of Corrections, specifically in the Division of Probation & Parole, as they would be responsible for providing written notification to the person receiving restored rights to vote as well as notification to the Division of Elections. This would create a significant increase in workload to DOC. In 2008 the Department of Corrections released 1,732 individuals on parole and 6,708 individuals on probation. In 2009 the Department of Corrections released 1,939 individuals on parole and 6,747 on probation. The number of individuals released from incarceration annually is significant.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB7

Analysis

This legislation has no fiscal impact for the Division of Elections.

PROCESSING FELONS

A person convicted of a felony involving moral turpitude cannot vote in a state or municipal election from the date of conviction through date of unconditionally discharged. The Division is notified in different ways by the Department of Corrections when a person has been convicted of a felony or has been discharged from a felony. Region III receives a statewide list of felons each month by the Department of Corrections and processes the names on the list. Each Regional Office receives notification from Department of Corrections and probation offices also of those who have been convicted or have been discharged.

FELONY CONVICTION

Prior to placing a felony conviction on a voter's record, staff must verify the conviction was for a felony involving moral turpitude. AS 15.60.010(9) provides a sample list. If the felony is not included in this list, the Division asks the AG's Office for advice on whether or not the felony involves moral turpitude.

When processing the Department of Corrections list of convicted felons, all information on the list must match the information on the voter's record before inactivating the record. Update the condition code of the voter's record to FC (felon convicted) and use the date of conviction as the suspend date. The list is the supporting document for microfilming and should be coded as SC (status change).

If the Regional Offices are notified by Corrections of a felony conviction, inactivate the voter's record in VREMS 1.10 using the FC code and suspend date of the conviction. All information on the letter must match the information on the voter's record before you change the status. Any type of condition code can be changed to a FC status including inactive voters and purged voters. The only code in VREMS that cannot be changed with an FC would be XX (deceased).

FELONY DISCHARGE

Department of Corrections sends the Regional Office a "Notification of Restoration of Rights" letter when a felon has been discharged. Update the voter's status from FC to FD in VREMS 1.10, using the date of discharge as the restored date. The information on the letter must match the information on the voter's record before you change the status. The letter is the supporting document for microfilming and should be coded as FD (felon discharge) and included with the SD documents. The voter must re-register to vote to activate the record.

If a Notification of Restoration of Rights letter is received for a voter record who has a condition code other than FC, the condition code must be updated first to FC, using the day prior to the felon's discharge date as the suspend date, and then to FD using the discharge date as the restored date. This applies even if the voter is listed as an active registered voter. This situation occurs when the Department of Corrections does not send the original notification when a felony occurs. The Notification of Restoration of

Rights letter is the supporting document for microfilming and should be coded as both FC and FD. If you change an active registered voter to FD that has a current registration date, the voter should be sent a letter indicating he or she can now re-register to vote.

If the Notification of Restoration of Rights letter does not have enough information to determine either the correct voter or the felony, contact Corrections to verify the information needed before updating the voter record. Also use the Court Records website to determine the felony or discharge dates (www.courtrecords.alaska.gov/)

Felony charges NOT involving moral turpitude, per AG's Office responses

- DUI
- Furnish alcohol to minor
- Misconduct involving weapons
- Probation violation (would apply if the violation was for a conviction of a felony involving moral turpitude)
- Stalking
- License or permit required for Alcoholic Beverages
- Failure to register as a sex offender

This letter is to serve as official notification that your probation supervision expired on January 25, 2011 and contact with the Fairbanks Probation Office is no longer required.

Pursuant to AS 15.05.030, please be advised that you should re-register with the Division of Elections (P.O. Box 110017, Juneau, AK 99811-0017), now that you have been discharged from probation supervision. Also, please be advised that your right to vote (after contacting Division of Elections), your right to be a member of a jury, and your right to hold elected office are automatically restored.

Although your above rights have been restored [rights to vote, jury service, and to hold elected office], you should be aware that your right to possess firearms (all shotguns, rifles, as well as handguns) and ammunition remains restricted. Possession of any rifle, shotgun, rifle and/or ammunition could subject you to prosecution for a felony criminal offense under state or federal law. Even if you received a suspended imposition of sentence and an order has been issued setting aside the conviction, your right to possess firearms and ammunition has not been restored. You should contact your attorney if you have questions.

Thank you for your cooperation during your probation/parole supervision and best of luck to you in the future. If you have any questions concerning this subject or any other matter, please contact me.

Sincerely,

Samantha M. Zinsli
Criminal Justice Technician II

CC: Director, Division of Elections
File
Clerk of Court

20-808.08

Sec. 15.80.007. Sale of voter registration and election management software. The director may sell voter registration and election management system data processing software. (§ 18 ch 36 SLA 1990)

Revisor's notes. — Formerly AS 15.60.007. Renumbered in 2010.

Sec. 15.80.008. Recognized political party status. (a) A political group that the director has not recognized as a political party may obtain recognized political party status if, on or before May 31 of the election year for which the political group seeks recognition, the political group

(1) files an application with the director;

(2) submits bylaws to the director and the United States Department of Justice as required of political parties in AS 15.25.014; and

(3) meets the definition of a political party in AS 15.80.010.

(b) The director shall verify that each political group seeking recognized political party status under (a) of this section and each recognized political party meets the definition of a political party in AS 15.80.010.

(c) The director shall perform a verification described in (b) of this section at least once a month after the date of certification of the preceding general election, except that the director may suspend the monthly verifications on and after June 1 and before November 30 of a general election year. For purposes of (b) of this section, the director shall verify that the voters who have submitted registration forms to the division of elections are qualified under AS 15.05.010 and have declared affiliation with the political group or recognized political party for which the verification is performed.

(d) Within 10 days after a verification under (c) of this section, the director shall provide to a political group seeking recognized political party status under (a) of this section written notification when the political group has obtained recognized political party status.

(e) The director may not withdraw recognized political party status from a political group that no longer qualifies as a political party until after the first verification after a general election at which a governor was elected. The director shall notify the political group in writing of the withdrawal of recognition. (§ 56 ch 2 FSSLA 2005)

Revisor's notes. — Formerly AS 15.60.008. Renumbered in 2010, at which time "AS 15.80.010" was substituted for "AS 15.60.010" in (a)(3) and (b) of this section to reflect the 2010 renumbering of AS 15.60.010.

Sec. 15.80.010. Definitions. In this title, unless the context otherwise requires,

(1) "absentee voting official" means a person appointed to serve as an absentee voting official in accordance with AS 15.20.045;

(2) "ballot" means any document provided by the director on which votes may be cast for candidates, propositions, or questions;

(3) "director" means the director of elections who is the chief elections officer of the state appointed in accordance with AS 15.10.105(a);

(4) "division" means the division of elections created under AS 15.10.105;

(5) "election board" means the board appointed in accordance with AS 15.10.120;

(6) "election official" means election board members, members of counting or review boards, employees of the division of elections, and absentee voting officials;

(7) "electronically generated ballot" means any ballot other than a paper ballot that is physically marked by the voter using a writing instrument or a mechanical device;

(8) "federal election" means a general, special, or primary election held solely or in part for the purpose of selecting, nominating or electing a candidate for the office of President, Vice-President, presidential elector, United States senator, or United States representative;

(9) "felony involving moral turpitude" includes those crimes that are immoral or wrong in themselves such as murder, manslaughter, assault, sexual assault, sexual abuse of a minor, unlawful exploitation of a minor, robbery, extortion, coercion, kidnapping, incest, arson, burglary, theft, forgery, criminal possession of a forgery device, offering a false instrument for recording, scheme to defraud, falsifying business records, commercial bribe receiving, commercial bribery, bribery, receiving a bribe, perjury, perjury by inconsistent statements, endangering the welfare of a minor, escape, promoting contraband, interference with official proceedings, receiving a bribe by a witness or a juror, jury tampering, misconduct by a juror, tampering with physical evidence, hindering prosecution, terroristic threatening, riot, criminal possession of explosives, unlawful furnishing of explosives, promoting prostitution, criminal mischief, misconduct involving a controlled substance or an imitation controlled substance, permitting an escape, promoting gambling, possession of gambling records, distribution of child pornography, and possession of child pornography;

(10) "general election" means the election held on the Tuesday after the first Monday in November of even-numbered years;

(11) "hand-counted ballot" means a ballot designated to be counted by hand in precincts where precinct tabulators are not available;

(12) "house district" means one of the districts described in art. VI, sec. 1, Constitution of the State of Alaska;

(13) "judicial district" means one of the districts defined in AS 22.10.010;

(14) "lieutenant governor" includes an appointed lieutenant governor, governor, or acting governor if a vacancy has occurred in the office of lieutenant governor or governor;

(15) "limited political party" means a political group which organizes for the purpose of selecting candidates for electors for President and Vice-President;

(16) "local election" means a regular or special election held by a borough, city, school district, or regional educational attendance area;

(17) "master register" means the list of all registered voters in the state which is maintained by the director of elections;

(18) "member of a political party" means a person who supports the political program of a party;

(19) "numerical identifier" means a voter's date of birth, the last four digits of a voter's social security number, a voter's Alaska driver's license number, or a voter's Alaska identification card number or voter identification number;

(20) "oath" includes affirmation;

(21) "official registration list" means the list of all voters qualified to vote at a particular election compiled in accordance with AS 15.07.125;

(22) "optically scanned ballot" means a paper ballot designed to be read by an optical scanning machine;

(23) "party district committee" means the political party committee that performs the executive function for a region representing an area larger than a precinct and smaller than the state;

(24) "political group" means a group of organized voters which represents a political program and which does not qualify as a political party;

(25) "political party" means an organized group of voters that represents a political program and

(A) that nominated a candidate for governor who received at least three percent of the total votes cast for governor at the preceding general election or has registered voters in the state equal in number to at least three percent of the total votes cast for governor at the preceding general election;

(B) if the office of governor was not on the ballot at the preceding general election but the office of United States senator was on that ballot, that nominated a candidate for United States senator who received at least three percent of the total votes cast for

Michell - I intend to "sit-in" via teleconference, and though I wholeheartedly would support returning the vote to felons, I have some questions about jury duty. In my 35 year career in law enforcement, though subpoenaed many times, I have never been selected for jury duty, neither for criminal nor civil cases. Judges have explained that though they would believe me to be impartial, it was the appearance that my position would naturally favor on the side of the prosecution that must be avoided. This bill would similarly then place those currently in the "system" to also have the appearance of leaning toward a "side" of the case; so I would suspect that any felon, though perhaps selected, would not serve anyway.

I also must ask if the eventual intent is to return weapons to felons, which when considering a Rural / subsistence life style, I would be interested in weighing in such a discussion.

MODEL TESTIMONY: ALASKA, FEBRUARY 2007

Testimony of

DANIEL LEVITAS

On behalf of

THE AMERICAN CIVIL LIBERTIES UNION

On

SB 7

AN ACT RELATING TO THE VOTING RIGHTS OF INDIVIDUALS WITH FELONY CONVICTIONS

Before the

STATE AFFAIRS COMMITTEE
IN THE TWENTY-FIFTH LEGISLATURE - FIRST SESSION
STATE OF ALASKA

February 22, 2007

Good afternoon Madam Chairman and members of the Committee. Thank you very much for the opportunity to testify today on SB 7, a measure addressing the voting rights of persons with felony convictions in Alaska. I urge your support for this important legislation.

My name is Daniel Levitas and I am a consultant to the American Civil Liberties Union on the issue of felon enfranchisement and am based in Atlanta, Georgia. Founded in 1920, the ACLU is a non-profit, nonpartisan organization with more than 500,000 members nationwide dedicated to preserving and protecting civil liberties and civil rights.

Currently there are an estimated 5.3 million Americans who are disfranchised as a result of a prior criminal conviction, including approximately 11,132 persons in Alaska, which represents 2.42% of the state's voting age population.[1] It is especially important to note that the majority of Alaska's disfranchised population is *not* in prison or jail, but actually living in the community. In fact, slightly more than half the 11,132 disfranchised persons in Alaska, or 6,010 people, are on felony probation (5,083 and 46%) or parole (927 and 8%).

Currently Alaska is one of 19 states where the right to vote is automatically restored upon completion of sentence, including the term of incarceration, probation and parole.

However, there are a growing number of states—20 to be exact—whose disfranchisement policies are less harsh than Alaska's and whose policies are likely to promote more effective reintegration of people with felony convictions. I hope that you and your colleagues in the Alaska legislature will give strong consideration to embracing this trend with the adoption of SB 7.

For example, in 13 states and the District of Columbia (including Oregon, Montana, Utah and Indiana), individuals with felony convictions can vote automatically upon release from prison.[2] In five

other states voting rights are restored automatically after release from prison and discharge from parole, but probationers may vote.[3] And in two states—Maine and Vermont—there are no felon disfranchising provisions.

In taking up SB 7, Alaska policymakers are hardly alone in considering less restrictive disfranchising provisions. Over the past ten years there has been a broad national trend of adopting less restrictive measures with 16 states implementing positive reforms to their felon disfranchisement policies. And legislators in Colorado and Washington State are currently debating measures nearly identical to SB 7, which would fully enfranchise all persons upon release from incarceration. And just last fall, Rhode Island voters approved a statewide ballot initiative that restored voting rights to approximately 15,000 individuals on parole and probation in that state.

This trend is also one that enjoys support across the political spectrum. While testifying last summer in favor of renewing the expiring provisions of the Voting Rights Act, former Cabinet Secretary Jack Kemp declared his support for felon enfranchisement. And Florida's new Governor, Charlie Crist, who said during his campaign that he favored instituting automatic restoration of voting rights, was recently scheduled to meet personally with Kemp to discuss how to move forward on this issue. In Virginia, one of only three states that still permanently disfranchise felony offenders, the Republican controlled state senate voted overwhelmingly early this month in favor of a constitutional amendment that would allow the General Assembly to restore voting rights to formerly incarcerated individuals who committed nonviolent crimes.

In Alaska, as is the case elsewhere in the United States, the vast majority of inmates are going to return to their communities. It is therefore in our collective interest for people with felony convictions to function as responsible taxpayers and citizens, recognizing the full range of their responsibilities to society. Passage of SB 7 would help facilitate this goal by enabling more people with prior felony convictions to vote and thereby giving them a higher stake in their Alaska communities. After all, people on probation and parole are law-abiding citizens who are living in the community, working or seeking work, raising their families and paying taxes.

Restricting voting rights does not prevent crime or provide compensation to victims. Instead, disfranchising people following their release from incarceration accomplishes exactly the opposite of what we should be doing to promote re-entry. In this way, prolonged disfranchisement of citizens with criminal convictions after their release from incarceration is actually harmful to the prospects for sustainable reintegration of people with felony convictions into society. In fact, extending the right to vote to individuals who are released from incarceration is also likely to reduce the chances that they will re-offend as recent research finds a link between voting participation and re-offense: people who voted after release from supervision were half as likely to be re-arrested as those who did not vote.[4] Similar effects were found among people with a prior arrest; 27% of non-voters were re-arrested, compared to 12% of people who had voted. [5]

In contrast, maintaining Alaska's current policy of disfranchising offenders who are deemed safe enough to be living and working in local communities on probation or parole can only discourage these offenders from becoming productive members of society, enhance their likelihood of re-arrest, and weaken democratic institutions by decreasing participation in the voting process.

Overall, criminal disfranchisement also has a disproportionate impact on minority communities. While disfranchisement policies prevent 2.5% of the total population from voting nationwide, they prevent 13% of the total population of African American men from casting a ballot.[6] In Alaska, while the majority of individuals with felony convictions are Caucasian, felony disfranchisement still has a very significant racially disproportionate effect. For example, 1,469 of the 11,132 Alaskans who are disfranchised as a result of a felony conviction are African American, which represents 7.6% of the overall black voting age population in the state. This compares with the aforementioned disfranchisement rate of just 2.4% for all

voters (including minorities). Put another way, African Americans are disfranchised at a rate nearly four times that of whites in Alaska as a result of current disfranchisement policy.

Alaska Natives are similarly impacted. According to state Department of Corrections statistics, in 2000, Alaska Natives constituted 31%[7] of the total disfranchised population, though they comprised only 15.6% of the total population.[8] And of the 5,046 persons on probation and parole as of December 2003, approximately 55% (or 2,774 persons) were white, while 28% were Alaska Natives, and approximately 9% were African American, which is more than double the state's 3.7% black population.[9] The remaining 6% of parolees and probationers were divided roughly equally between Latinos and Asian Americans/Pacific Islanders.

Voting is a fundamental right and a civic duty. As the U.S. Supreme Court stated in its landmark 1964 decision, Reynolds v. Sims, *"The right to vote freely for the candidate of one's choice is of the essence of a democratic society, and any restrictions on that right strike at the heart of representative government."*[10]

Thank you very much.

---

[1] Alaska's voting age population was 459,529 people as of December 31, 2004 – the date for which we have the most recent comprehensive data on disfranchised persons.

LEGISBRIEF

BRIEFING PAPERS ON THE IMPORTANT ISSUES OF THE DAY

APRIL-MAY 2009 VOL. 17, NO. 23

Felon Voting Rights

By Jennie Drage Bowser

Some felons never lose their right to vote.

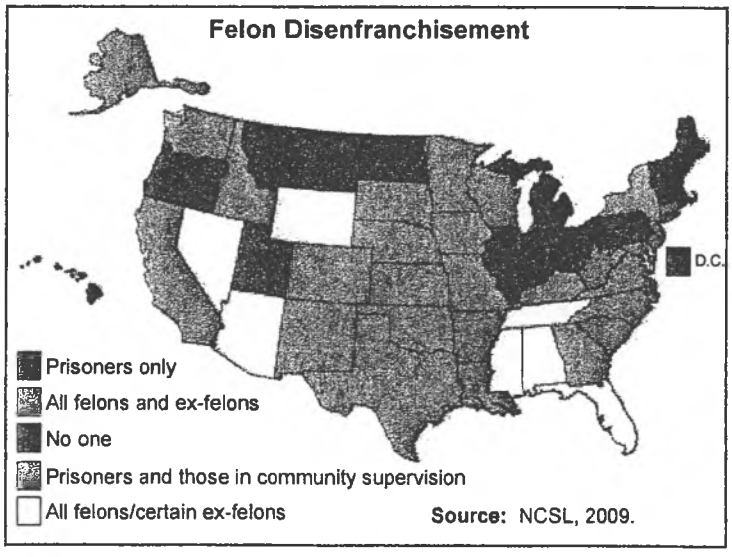
State approaches to felon disenfranchisement vary tremendously. In Maine and Vermont, felons never lose their right to vote. In Kentucky and Virginia, felons and ex-felons permanently lose their right to vote absent a pardon from the governor. The remaining 46 states have 46 different approaches to the issue.

According to the Washington, D.C.-based advocacy group, The Sentencing Project, 5.3 million Americans who were otherwise eligible to vote in 2008 were prevented from doing so due to a felony conviction. Of these, 2.1 million were ex-offenders who had served their sentences, 1.4 million were African-American men, and more than 676,000 were women.

Some states allow those serving a prison sentence to vote.

Categories of Disenfranchisement.

- In Maine and Vermont, felons do not lose their right to vote; even felons who are serving a prison sentence can vote.
- In 13 states and the District of Columbia, felons are ineligible to vote only while serving a prison sentence. Ex-offenders and people on probation and parole can vote.
- In 25 states, prisoners and people under community supervision (probation and/or parole) are ineligible to vote, but ex-offenders are eligible.
- In eight states, all felons in prison and those in community supervision, as well as certain ex-offenders, are ineligible to vote.
- In Kentucky and Virginia, all felons and ex-offenders are permanently ineligible to vote, absent a pardon.



All ex-offenders are eligible to vote in 40 states.

How Rights Are Restored. In 38 states, felons' voting rights are automatically restored upon completion of their sentence, which in some states includes probation and parole. In five states, certain ex-offenders are barred for life from voting, while the rights of others—generally first-time,

non-violent offenders—are restored automatically upon completion of their sentence. In the three remaining states where felons lose and can regain their voting rights, certain ex-offenders are barred from voting for life, while others can apply to have their rights restored.

Re-registering to vote often is a daunting process.

Barriers to Restoration of Voting Rights. Even in states where ex-offenders automatically regain the right to vote upon completion of their sentence, the process of re-registering to vote often is difficult. One reason is the complexity of the laws and processes surrounding disenfranchisement. In some cases, it is difficult to determine whose rights can be restored. This can vary according to the date of the crime, the conviction or the release from prison, or to the nature of the crime. The complex restoration process also can be daunting. It often involves lengthy paperwork, burdensome documentation, and involvement of several state agencies.

A second barrier to restoration of voting rights for ex-offenders is the often inconsistent communication among agencies. The methods of communicating the loss and restoration of voting rights among courts, corrections and elections officials are not always reliable, timely or consistent. This inconsistency can result in uneven application of the law, even when the laws are clear.

Another barrier is lack of information. Ex-offenders sometimes are not aware that they regain their voting rights automatically upon completion of their sentence. They go through life believing they cannot vote when, in fact, they can. In other cases, they are not informed of the process for regaining their rights or offered assistance in doing so. As long as they remain ignorant of the necessary steps, ex-offenders cannot begin the process of regaining voting rights.

A final obstacle is under-funding of parole boards in some states where offenders must apply to have their rights restored. A massive backlog of applications can exist because the agencies do not have adequate staff or resources to process them in a timely manner.

Most recent legislation seeks to expand felon voting rights.

State Action Most recent state legislation seeks to expand felon voting rights and ease the process of restoration. Between 1996 and 2008, 28 states passed new laws on felon voting rights.

- Seven repealed lifetime disenfranchisement laws, at least for some ex-offenders.
- Two gave probationers the right to vote.
- Seven improved data-sharing procedures among state agencies.
- Nine passed requirements that ex-offenders be given information and/or assistance in regaining their voting rights at the time they complete their sentence.
- Twelve simplified the process for regaining voting rights, for instance, by eliminating a waiting period or streamlining the paperwork process.

To date in 2009, 79 bills addressing the voting rights of felons and ex-offenders have been introduced in 25 state legislatures. In the 2007-2008 biennium, 129 bills were introduced in 27 states.

Felon Voting Rights

In 48 of the 50 states, at least some felons -- and in some states, all felons and ex-offenders -- lose their right to vote.

Background and History

The idea of taking away a criminal's right to vote has been around since ancient Greece and Rome. A condition called "civil death" in Europe involved the forfeiture of property, the loss of the right to appear in court, and a prohibition on entering into contracts, as well as the loss of voting rights. Civil death was brought to America by English colonists, but most aspects of it were eventually abolished, leaving only felon disenfranchisement intact in some parts of modern America.

The Face of Disenfranchisement

According to The Sentencing Project, 5.3 million Americans (1 in 40 adults) were unable to vote due to a felony conviction in the 2008 elections. This included 1.4 million African-American men, more than 676,000 women, and 2.1 million ex-offenders who have completed their sentences.

Categories of Disenfranchisement

State approaches to felon disenfranchisement vary tremendously. In Maine and Vermont, felons never lose their right to vote. In Kentucky and Virginia, felons and ex-felons permanently lose their right to vote absent a pardon from the governor. The remaining 46 states have 46 different approaches to the issue.

MAP HERE

In Maine and Vermont, felons do not lose their right to vote; even felons serving a prison sentence can vote.

In 13 states and the District of Columbia, felons are ineligible to vote only while serving a prison sentence. Ex-offenders and people on probation and parole can vote.

In 25 states, prisoners and people under community supervision (probation and/or parole) are ineligible to vote, but ex-offenders are eligible.

In eight states, all felons in prison and under community supervision, as well as certain ex-offenders, are ineligible to vote.

In Kentucky and Virginia, all felons and ex-offenders are permanently ineligible to vote, absent a pardon.

How Rights Are Restored

In 38 states, felons' voting rights are automatically restored upon completion of their sentence, which in some states includes probation and parole. In five states, certain ex-offenders are barred for life from voting, while the rights of others--generally first-time, non-violent offenders--are restored automatically upon completion of their sentence. In the three remaining states where felons lose and can regain their voting rights, certain ex-offenders are barred from voting for life, while others can apply to have their rights restored.

Voting Rights Restoration Process

Source

: U.S. Department of Justice, December 2000;
Updated by the National Conference of State Legislatures, January 2002

	Restoration Process
Alabama	The right to vote may be regained only through a pardon.
Alaska	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
Arizona	1st offense - rights are automatically restored; 2nd and subsequent offenses - must apply to court for restoration; If felony convictions resulted in a prison sentence, felon must wait until two years after your unconditional release from incarceration or completion of parole before felon can apply. If felony convictions resulted in a sentence of probation, felon may apply for restoration of your voting rights immediately upon discharge from probation.
Arkansas	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote. Felons must provide evidence of their eligibility to vote after discharge of their sentence.*
California	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
Colorado	Automatically restored upon completion of sentence and/or parole; felon must register to vote.
Connecticut	Felon may regain the right to vote upon submission of written or other satisfactory proof that all fines in conjunction with conviction have been paid and that felon has been discharged from confinement or parole. Felon must submit this information to the office of the Registrar of Voters. Probationers automatically regain the right to vote.*
Delaware	-A person convicted of murder, manslaughter or any felony constituting a sexual offense or an offense against public administration involving bribery, improper influence or abuse of office, may not have their voting rights restored. -Any other person who is disqualified as a voter because of a conviction of a crime shall have such disqualification removed upon being pardoned or five years after expiration of sentence, whichever may occur first. Expiration of sentence means satisfactory completion of imprisonment, probation and parole and satisfaction of all financial obligations required by the sentence, including restitution.
D.C.	Automatically restored upon release from confinement; felon must register to vote.
Florida	Civil rights, including the right to vote, are suspended when a person is convicted of a felony. A felon may have his or her civil rights restored by obtaining a full pardon, conditional pardon, or restoration of civil rights from the Governor of Florida.
Georgia	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
Hawaii	Automatically restored upon release from confinement; felon must register to vote.

Idaho	Automatically restored upon completion of sentence, probation and parole; felon must register to vote.
Illinois	Automatically restored upon release from confinement; felon must register to vote.
Indiana	Automatically restored upon release from confinement; felon must register to vote.
Iowa	Must obtain a pardon or a restoration of citizenship from the Governor.
Kansas	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
Kentucky	Must obtain a pardon from the Governor.
Louisiana	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
Maine	Eligibility to vote not affected.
Maryland	-A first time offender for theft or infamous crime, other than buying or selling votes, the right to vote is automatically restored upon completion of your sentence, including any probation or parole. -If convicted of two or more such crimes, a person is not eligible to vote unless and until a pardon is obtained. -If convicted of buying or selling votes, a person is permanently prohibited from voting in Maryland.
Massachusetts	Automatically restored upon release from confinement; felon must register to vote.
Michigan	Automatically restored upon release from confinement; felon must register to vote.
Minnesota	If convicted of treason or of a felony, the right to vote is automatically restored upon discharge from sentence. Discharge occurs either by order of the sentencing court, following stay of sentence or stay of execution of sentence, or upon final expiration of sentence.
Mississippi	Right to vote may be restored by a pardon or an executive order issued by the Governor upon discharge from probation. The right to vote may also be restored by a two-thirds vote of the state legislature.
Missouri	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote; however, a person is forever disqualified from voting if convicted of a crime connected to the exercise of the right to vote.
Montana	Automatically restored upon release from confinement; felon must register to vote
Nebraska	Must obtain a "warrant of discharge" from the Nebraska Board of Pardons to regain the right to vote; however, if sentenced to confinement in an adult correctional facility, the felon can only regain the right to vote by applying to the Board of Pardons for a warrant of discharge
Nevada	-Felons who have completed probation may apply 6 months after the expiration of their term of probation to have their rights restored.* -Felons who have completed parole or who have served their full sentence may immediately petition the State Board of Parole Commissioners who may petition the district court for restoration of civil rights. *
New Hampshire	Automatically restored upon release from confinement; felon must register to vote.

New Jersey	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
New Mexico	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote. *
New York	-If convicted of a felony and sentenced to incarceration, felon automatically regains the right to vote upon expiration of the maximum time to which he or she was sentenced, or upon discharge from parole, whichever occurs first. -If convicted of a felony but not sentenced to incarceration, or if the sentence was suspended, felon's conviction does not affect the right to vote.
North Carolina	Automatically restored upon completion of sentence, probation and/or parole. For a North Carolina conviction, the agency having jurisdiction over a felon at the time he or she was unconditionally discharged is required to issue a certificate to the clerk of the General Court of Justice in the county where the felon was convicted, and that clerk shall then file the certificate with the original record at no fee. Once this is done, the felon can simply register and vote.
North Dakota	Automatically restored upon release from confinement; felon must register to vote.
Ohio	Automatically restored upon release from confinement; felon must register to vote.
Oklahoma	Once a conviction has become final and the maximum time set forth in the felon's sentence has expired, his or her right to vote is automatically restored.
Oregon	Automatically restored upon release from confinement or completion of parole; felon must register to vote.
Pennsylvania	Automatically restored upon release from confinement; felon must register to vote; however, if a felon was not registered to vote at the time of his or her conviction, the felon may need to wait 5 years from the date of release from incarceration in order to vote.
Rhode Island	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
South Carolina	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
South Dakota	In South Dakota, the right to vote is restored upon termination of a felon's sentence. When the sentence has been fully discharged, including parole, a felon should receive a certificate from the Secretary of Corrections stating that he or she has been restored to the full rights of a citizen. The Secretary should file a copy of the certificate with the sentencing court. After receiving this certificate the felon must register to vote.
Tennessee	-Persons convicted of murder, aggravated rape, treason, or voter fraud after July 1, 1986, or of rape after June 30, 1996, are ineligible to have their voting rights restored. -For other felony convictions after June 30, 1996, a felon may seek restoration of voting rights after the maximum sentence imposed for his or her conviction has expired, or after the felon has been pardoned, by petitioning the circuit court of the county where the felon lives or was convicted. -If a felon was convicted after July 1, 1986 but before June 30, 1996 of a felony other than murder, aggravated rape, treason, or voter fraud , a felon may request that either the board of probation and parole or the authority that supervised or incarcerated him or her during the sentence issue a Certificate of Restoration of Voting Rights. A felon is eligible to request this certificate after either being pardoned or after the maximum sentence which was imposed for the conviction has expired.
Texas	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote; if convicted persons may also regain their voting rights if they have been granted a gubernatorial pardon or release from the resulting disability to vote.

Utah	Automatically restored upon release from confinement/completion of sentence; felon must register to vote.
Vermont	Eligibility to vote not affected.
Virginia	If convicted of a felony in Virginia, then a felon must obtain a "removal of political disabilities" from the Governor in order to regain the right to vote. A felon is eligible to apply for the removal of political disabilities if he or she completed the sentence more than 5 years ago and if all court costs and restitution have been satisfied.
Washington	In order to regain the right to vote, a felon must have his or her civil rights restored. Civil rights are restored by the issuance of a certificate of discharge. When a felon has completed all of the requirements of sentence, the Department of Corrections notifies the sentencing court. The sentencing court then issues and provides the felon with a certificate of discharge, which will have the effect of restoring the right to vote. A felon must then register to vote, unless the crime was committed before 1984.
West Virginia	Automatically restored upon completion of sentence, probation and/or parole; felon must register to vote.
Wisconsin	Automatically restored upon release from confinement/completion of sentence; felon must register to vote.
Wyoming	The right to vote may be regained either by a pardon or by restoration of civil rights. The Governor has the power both to pardon and to restore rights. The Governor may issue certificates of restoration of rights upon a person's completion of probation or expiration of the term of the sentence. A felon must submit a written application to the Governor in order to request a certificate restoring the right to vote.

SENATE COMMITTEE PASSES NATIONAL CRIMINAL JUSTICE COMMISSION ACT OF 2009

The bi-partisan National Criminal Justice Commission Act of 2009 (S. 714) was passed out of the Senate Committee on the Judiciary today by voice vote. The legislation, sponsored by Sen. Jim Webb (D-Va.) would create a commission to conduct a thorough evaluation of the nation's justice system and offer recommendations for reform at every stage of the criminal justice system.

The establishment of such a commission could not come at a more critical time. With 2.3 million people in prisons and jails, the United States has the highest incarceration rate in the world. Federal and state governments spend more than $50 billion each year on corrections, and the population behind bars continues to grow.

A new approach to crime prevention is necessary and the time for reform is upon us. The commission created by this legislation would establish an organized and proactive approach to studying and advancing programs and policies that promote public safety, while overhauling those practices that are found to be fundamentally flawed.

Felon Disenfranchisement and the Voting Rights Act — *Farrakhan V. Gregoire*: "A Crowd of One"

Deborah Periman

Sidebar story: Further Background on Felon Disenfranchisement

"Felon Disenfranchisement and the Voting Rights Act — *Farrakhan V. Gregoire*: 'A Crowd of One'" by Deborah Periman. *Alaska Justice Forum* 26(4): 1, 11–12 (Winter 2010). Early this year, the U.S. Court of Appeals for the Ninth Circuit issued its opinion in *Farrakhan v. Gregoire*, a challenge to Washington State's felon disenfranchisement law. The court's decision stands alone among the circuits in holding that state law denying felons the right to vote is a violation of section 2 of the Voting Rights Act, where discrimination in the state's criminal justice system results in race-based denial of the vote. Despite speculation, suggestions that the *Farrakhan* decision signals the demise of Alaska's disenfranchisement law are overstated. Nevertheless, the case is noteworthy for reopening the conversation about why we deny certain offenders the right to vote, and whether these laws reflect viable public policy or are simply relics of an era in which racial and class prejudices limited participation in the political process.

> [B]ecause the holding of *Farrakhan* I places us in a crowd of one among the circuits, I believe we should be particularly mindful before reversing the district court and invalidating felon disenfranchisement in the State of Washington.
>
> — Judge M. Margaret McKeown, dissenting, *Farrakhan v. Gregoire*, 590 F.3d 989, 1016 (9th Cir. 2010)

- Collateral consequences of criminal conviction

Early this year, the U.S. Court of Appeals for the Ninth Circuit issued its opinion in *Farrakhan v. Gregoire*, a challenge to Washington State's felon disenfranchisement law. The court's decision stands alone among the circuits in holding that state law denying felons the right to vote is a violation of section 2 of the Voting Rights Act (VRA), where discrimination in the state's criminal justice system results in race-based denial of the vote. Although there has been substantial speculation in the media over the implications of the decision, suggestions that the *Farrakhan* decision signals the demise of Alaska's disenfranchisement law are overstated. Nevertheless, the case is noteworthy for reopening the conversation about why we deny certain offenders the right to

vote, and whether these laws reflect viable public policy or are simply relics of an era in which racial and class prejudices limited participation in the political process.

Background: Felon Disenfranchisement and the Voting Rights Act

State laws throughout the country have traditionally barred those with certain types of criminal convictions from participating in the political process. Currently, 48 states and the District of Columbia have offender disenfranchisement statutes. These disenfranchisement laws are one component of the "civil death" once accorded criminal offenders. The concept of civil death dates back to ancient Athens and Rome, where those convicted of certain crimes entered a state of infamy marked by civic penalties such as the inability to vote, hold public office, and speak publicly on political issues. In medieval Europe and England, similar laws caused forfeiture of property and political rights for crimes punishable by death or life imprisonment. Laws disenfranchising felons were received into the American colonies as part of the general reception of the laws of England. Following the Revolution, in the allocation of power between the states and the federal government under the Constitution of 1787, the states retained control over access to the ballot. Almost immediately, the newly formed states adopted felon disenfranchisement laws, either constitutionally or through codification.

State control over access to the ballot was limited with ratification of the 15th Amendment, which prohibits states from abridging the right to vote "on account of race" and grants enforcement powers to Congress. Pursuant to the enforcement clause, and in conjunction with the mid-twentieth century civil rights movement, Congress enacted the Voting Rights Act of 1965. Its explicit purpose is to eliminate racial discrimination in voting throughout the United States in accordance with the mandate of the 15th Amendment. Section 2 of the Act provides that no prerequisite to voting shall be imposed in a manner that results in a denial of the right to vote on account of race or color (42 U.S.C. § 1973(a) (2010)). This standard is violated where, "based on the totality of the circumstances," it is shown that political processes in a state are not equally open to members of a class, in that such members "have less opportunity than other members of the electorate to participate in the political process..." (42 U.S.C. § 1973(b)).

Section 2 challenges to felon disenfranchisement laws are not new. Broadly speaking, these challenges assert that disproportionate numbers of minorities in the criminal justice system, and the concomitant denial of the vote to this class of citizens, result in *de facto* race-based exclusion of class members from the political process. To date the Courts of Appeals for the First, Second, Ninth, and Eleventh Circuits have analyzed the validity of such claims. Among the circuits, only the Ninth has held that challenges to felon disenfranchisement statutes raise valid Section 2 claims. The First, Second, and Eleventh Circuits are in accord (the latter two circuits sitting *en banc* as full courts rather than three judge panels) that such challenges fall outside the purview of the Voting Rights Act. These courts have concluded that Congress never intended the Act to deprive the states of their right to disenfranchise felons; such a result would impermissibly alter the balance of power between the federal government and the states, impinging on the states' traditional right to establish voter qualifications.

The Farrakhan Opinion

In a departure from this majority view, two members of the three judge panel in *Farrakhan v. Gregoire* held that the discriminatory impact of Washington state's disenfranchisement law stems

from racial discrimination in the state's criminal justice system; the resulting denial of the vote is, therefore, a violation of section 2. At the trial court level, the plaintiffs, minority citizens of Washington who lost their right to vote under the state felon disenfranchisement statute, presented reports of expert witnesses on racial disparities in all levels of Washington's criminal justice system. The reports highlighted studies showing that these disparities could not be explained by legitimate factors such as minorities' higher levels of criminal activity. Notably, one study found that "substantially more than one half of Washington State's racial disproportionality cannot be explained by higher levels of criminal involvement" (*Farrakhan*, 2010, n. 5).

These reports led the trial court to enter findings that racial discrimination exists in Washington's criminal justice system and that this discrimination "hinders the ability of racial minorities to participate effectively in the political process, as disenfranchisement is automatic" (*Farrakhan*, 2010, 995). Nevertheless, the lower court held that plaintiffs failed to establish a Voting Rights Act violation because it was discrimination in the justice system, and not the disenfranchisement statute itself, that caused the loss of voting rights. Following an initial appeal, remand to the trial court, and second appeal, Ninth Circuit Judge Tashima, writing for himself and Judge Reinhardt (with Judge McKeown dissenting), held that Section 2 of the Voting Rights Act "demands that...racial discrimination not spread to the ballot box." Thus, based on the "uncontroverted record" of discrimination in the justice system, Washington's disenfranchisement law violates federal civil rights law (*Farrakhan*, 2010, 1015). (See "Further Background: Scope of Analysis," page 1.)

Felon Disenfranchisement in Alaska

Disenfranchisement of felons in Alaska is rooted in the Alaska Constitution, which provides "No person may vote who has been convicted of a felony involving moral turpitude unless his civil rights have been restored" (Alaska Const. art V, § 2). The right to vote remains suspended from the date of conviction through the date of release from all conviction-related disability, including probation and parole (AS 15.05.030; AS 15.60.010(39)). According to the Alaska Department of Corrections Offender Profile, in 2009 more than 10,000 Alaskans were ineligible to vote pursuant to this provision.

There is no question that in Alaska, as elsewhere, racial minorities are disproportionately represented in the criminal justice system. For example, Department of Corrections figures show that in 2009 Alaska Natives comprised over 35 percent of total offenders in institutions, yet Alaska Department of Labor 2008 population figures estimated that Alaska Natives comprised about 16 percent of the total population in Alaska. African-Americans, estimated to have comprised just over 4 percent of Alaska's population, represented over 10 percent of offenders in Alaska correctional institutions. (See "Alaska Offender Profile 2009" in this issue.) Despite this well-known disparity, Alaska lacks an extensive body of empirical data establishing conclusively that the overrepresentation of minority groups in Alaska's criminal justice system is attributable solely to systemic racial discrimination. This is the critical distinction between Alaska and Washington. As noted above, the Farrakhan opinion rests on a finding of fact by the trial judge that "there is discrimination in Washington's criminal justice system on account of race"; in reaching this finding the court relied on "extensive," unrefuted studies showing that over half of Washington's racial disproportionality could not be explained by legitimate factors (*Farrakhan*, 2010, 994–995). It is unlikely a trial judge would find the existing data in Alaska a sufficient evidentiary foundation to support a similar finding of fact here. This does not imply that racial bias is absent from Alaska's

criminal justice system, merely that widespread empirical studies have not unequivocally ruled out all other explanations for disparity in the system. (See "Further Background: Ethnic Disparity in Alaska," page 1.)

Shifting Policy

Although Alaska's disenfranchisement statute does not appear vulnerable to an immediate *Farrakhan* challenge, the essential holding of the case suggests that state policymakers may wish to consider limiting the reach of the current statute, or proposing a Constitutional amendment to eliminate the voting prohibition entirely. (Senate Bill 68, currently pending in the Alaska Legislature, would limit disenfranchisement to those incarcerated, and restore voting rights upon release.) Academic literature makes clear that for generations disenfranchisement laws throughout the country have excluded minority citizens from the vote in overwhelmingly greater percentages than Caucasian, and that the rates of minority exclusion are growing. Moreover, there is evidence that dilution of minority voting attributable to disenfranchisement statutes has affected the outcome of elections in a number of jurisdictions. In this state, the disproportionate number of Alaska Natives excluded from the political process under the disenfranchisement statute is particularly troubling given Alaska's history of discrimination in voting practices. (See "Further Background: Preclearance under the Voting Rights Act," page 1.)

At an even more basic level, however, the right to vote is the hallmark of participatory democracy. It affirms our membership in the social compact. Exclusion of criminal offenders from this process, and from one of the most fundamental rituals of community involvement, does nothing to promote public safety and can only serve to impede social reintegration of these citizens.

In his February 2010 State of the Judiciary address, Chief Justice Carpeneti observed, "Probably no problem is of greater concern to us at this time than the alarmingly high rates of recidivism in our state." The recently established Alaska Prisoner Re-Entry Task Force was created to examine how the state might better assist offenders to make a successful transition from incarceration back into their communities. Voting is an integral part of this process; studies suggest that civic reintegration facilitates successful reentry and reduces the risk of recidivism.

For all of these reasons, there is growing recognition that felon disenfranchisement statutes rest on outdated retributory practices antithetical to contemporary standards of equal representation in the political process, standards explicitly stated in the Voting Rights Act. *Farrakhan*, though out of step with the weight of authority in its statutory interpretation, gives effect to the spirit of inclusion that lies at the core of the Voting Rights Act.

Deb Periman, J.D., is a member of the Justice Center faculty.

Further Background on Felon Disenfranchisement

Scope of Analysis

This case summary of *Farrakhan* provides a basic, simplified overview. It does not address the distinction between vote denial and vote dilution claims under the Voting Rights Act, nor does it address the impact of changes in Washington's disenfranchisement law over the course of the Farrakhan litigation, the various approaches taken by the courts in addressing Section 2's "totality

of the circumstances" standard, or *Senate Report 97-417*, which lists typical factors a court might consider in evaluating a challenged voting practice.

Ethnic Disparity in Alaska

In 2004, the Alaska Judicial Council published a comprehensive summary of criminal justice processes in Alaska. *Alaska Felony Process: 1999* (February 2004) was commissioned, in part, to identify whether "disproportionate numbers of ethnic minorities at all points in Alaska's criminal justice system" were the result of discrimination or of other legitimate factors. The Council reported that justice for felony defendants in Alaska after charges were filed was "in many respects substantially equal." Presumptive sentences showed no disparities associated with ethnicity. With the exception of drug offenses, non-presumptive sentences were uniformly imposed among ethnic groups. Disparity in drug sentencing was limited to African-Americans in Anchorage and Natives outside Anchorage. The Council concluded in the Executive Summary that the "isolated nature of these disparities appeared to be inconsistent with conscious discrimination." However, phases of the felony process other than sentencing, specifically pre-disposition incarceration, charge reduction and overall time of incarceration, did show disparities by ethnicity that could not be explained by legitimate criteria. For example, statewide African-Americans and Alaska Natives could expect to spend 7 days longer in predisposition incarceration than Caucasian defendants. Although this disparity could not be attributed to any factor measured in the study other than ethnicity, the Judicial Council noted that additional socioeconomic data might have explained some of the disparate outcomes.

Preclearance under the Voting Rights Act

Alaska is one of nine states covered in its entirety by Section 5 of the Voting Rights Act, which prohibits changes in election practices without federal review and approval. This "preclearance" status is the result of a state's historic use of tests or devices to restrict the opportunity to vote, or of statutorily defined underrepresentation in the voting process. In territorial Alaska, Natives faced a number of barriers to voting, among them a 1924 law requiring voters to read and write English. With the advent of statehood, Alaska's Constitution similarly limited voter participation to those who could "read or speak the English language," a limitation not repealed until 1970. These and myriad other factors led to less than 50 percent of Alaska's voting age population participating in the voting process in 1964, a level of under-participation that brought Alaska within Section 5's preclearance requirements.

Washington State: 9th Circuit Court Reverses Disenfranchising Law; Landmark Decision Could Go to Supreme Court

In a landmark case for individuals with felony records, a federal appeals court has thrown out Washington State's restrictions on felon voting on the basis that the current law violates the Voting Rights Act by creating discrimination in voting. The 2-1 decision in *Farrakhan v. Gregoire* would apply to all persons with convictions in the state, including 18,000 who are currently incarcerated, according to the Associated Press. Circuit Court Judge A. Wallace Tashima wrote that attorneys for six Washington state prisoners "have demonstrated that police practices, searches, arrests, detention practices, and plea bargaining practices lead to a greater burden on minorities that cannot be explained in race-neutral ways."

The 9th Circuit Court of Appeals found that discrimination does, in fact, exist in law enforcement, prosecutorial and judicial outcomes in Washington State and therefore, those with felony records should have the right to vote.

The lawsuit was filed in 1996 by Muhammad Shabazz Farrakhan while serving a three-year sentence at the Washington State Penitentiary for a series of felony-theft convictions. Five other minority inmates joined as plaintiffs in the lawsuit that contended that because nonwhites make up a large percentage of the prison population, a state law prohibiting inmates and parolees from voting is illegal because it dilutes the electoral clout of minorities, the *Seattle Post-Intelligencer* stated.

"In this case, we have proved that the criminal justice system in this state is biased against African-Americans, and the impact has been a violation of their voting rights," said Larry Weiser, a law professor at Gonzaga University School of Law who is the lead attorney in the lawsuit, and joined by several national civil rights organizations.

Gregoire signs bill to restore voting rights for some felons

By The Associated Press

OLYMPIA — Starting this summer, felons will be able to reregister to vote once they're no longer on parole or probation.

Gov. Chris Gregoire signed a bill Monday that eases the restoration of voting rights for felons who are no longer in state custody but owe court-ordered fines and restitution. It takes effect July 26.

The old law said felons couldn't vote until they'd completed their entire sentence, including paying all restitution and other court fees.

The new law removes the requirement that felons pay off all those debts before their rights are restored. However, their voting rights could be revoked if a felon willingly fails to make regular payments on those financial obligations.

Rep. Jeannie Darneille, the Tacoma Democrat who sponsored the measure, said the new law will "help someone who's been an ex-offender to reintegrate fully into society."

Vision Statement

The Alaska Department of Corrections enhances the safety of our communities. We provide secure confinement, reformative programs, and a process of supervised community reintegration.

Commissioner's Letter

The Mission of the Department of Corrections is to enhance the safety of our communities while providing secure confinement, reformative programs, and a process of supervised community reintegration.

I am pleased to make this profile available on line. This report is based on our best information and serves as a snapshot of a typical day. Data comes from our Offender Tracking Information System (OTIS), and is meant to give a general summary of Alaska's offender population.

The 2009 Offender Profile – which encompasses many hours of research and calculation on the part of department staff – serves as a valuable tool for our department in the successful accomplishment of our mission.

MEMORANDUM September 22, 2010

SUBJECT: Restoration of voting rights for certain felons
(Work Order No 27-LS0083\A)

TO: Senator Bettye Davis
Attn: Thomas Obermeyer

FROM: Alpheus Bullard TAB
Legislative Counsel

This memorandum accompanies the draft bill you requested that would restore voting rights to persons convicted of felonies involving moral turpitude once these persons are released from incarceration. This bill is based on a draft prepared by this office for introduction in the 26th Legislature. The draft raises several issues.

Restoration of civil rights

Article V, sec. 2 of the Alaska Constitution provides that "[n]o person may vote who has been convicted of a felony involving moral turpitude unless his civil rights have been restored." The Alaska Supreme Court has not yet addressed what constitutes "civil rights" for the purposes of this clause.

The constitutional reference to "civil rights" must include rights other than the right to vote, otherwise the provision would be unnecessary. However, there is no discussion in the minutes of the constitutional convention indicating what the framers understood as "civil rights" for purposes of this section.

Federal law prohibits a convicted felon from possessing a firearm unless the felon's civil rights have been restored under state law. 18 U.S.C. 921(a)(20). The federal statute does not define "civil rights." For purposes of this statute, federal circuit courts have interpreted "civil rights" to include the right to vote, the right to seek and hold public office, and the right to serve on a jury. United States v. Dahms, 938 F.2d 131, 133 (9th Cir. 1991); United States v. Leuschen, 395 F.3d 155 (3d Cir., Pa. 2005).

The Alaska Court of Appeals has addressed this statute as well, concluding that under Alaska statute "defendants on probation or parole can not serve as jurors" and "[t]his disqualification means that, for purposes of federal firearms laws, [the defendant's] civil rights have not been restored." Barry v. State, 925 P.2d 255 (Alaska App. 1996). Another case dealing with juror qualifications makes a passing reference to "civil rights -- such as the right to vote or to carry a firearm." Singleton v. Alaska, 921 P.2d 636 (Alaska App. 1996).

These cases do not specifically address article V, sec. 2 of the Constitution of the State of Alaska, and they would not be binding on the Alaska Supreme Court as it interprets that provision. But, they are an indicator of how a court would interpret art. V, sec. 2 if required to do so. Because art. V, sec. 2 would make little sense if "civil rights" did not refer to something more than the right to vote (which is a prerequisite for seeking public office in Alaska), the enclosed draft changes the qualifications for jury service as well. Accordingly, I've changed the title of the bill from "An Act relating to the voting rights of felons" to "An Act relating to the civil rights of felons."

"Incarceration"
This draft provides that a person convicted of a crime that constitutes a felony involving moral turpitude under state or federal law may not vote in a state, federal, or municipal election while incarcerated for that crime. "Incarcerated" is not defined in this draft or in current statute. Should a person who is sentenced to custody in a residential facility be permitted to vote? I am not aware of all sentencing options available in application to crimes constituting "a felony involving moral turpitude under state and federal law." I would recommend seeking the Department of Corrections' expertise on this point.

Felons released from the federal penitentiary system
This draft requires the commissioner of corrections to establish procedures by which a person released from incarceration is advised of voter registration requirements and procedures. The department is tasked with (1) providing a person released from incarceration with a written notification of the person's restored right to vote and (2) notifying the director of the division of elections that the person is entitled to be registered as a voter. I don't know if the Department of Corrections can fulfill these responsibilities for persons released from a federal facility. This is more a question of fact than a legal issue. Again, I would recommend that you seek the department's advice on this point.

Applicability provision
Please consider adding to the bill an applicability provision specifying the manner in which the bill's provisions are to be given effect, giving specific attention to the applicability of the bill's provisions to felons released before the Act's effective date and whether the department should be directed to notify them of their right to vote.

If you have questions, please contact me. I will be on mandatory leave from September 24th to October 22nd. If you have questions during this time, please do not hesitate to contact our office for another attorney's assistance.

Barred from voting for life, unless pardoned by the governor
Kentucky
Virginia

(1) In MS, the right to vote is lost permanently (absent a pardon by the governor) for the following offenses: murder, rape, bribery, theft, arson, obtaining money or goods under false pretense, forgery, perjury, embezzlement, and bigamy. Felons convicted of any crime other than these do not lose the right to vote.
(2) For certain serious offenses, either the restoration of voting rights by a court or board, or a pardon, is necessary.
(3) Only for first-time offenders. Recidivists must petition for restoration of voting rights.

(4) In Washington, certain offenders must apply with the Indeterminate Sentence Review Board for restoration of voting rights.

NATIONAL CONFERENCE *of* STATE LEGISLATURES

The Forum for America's Ideas

Felon Voting Rights
Permanent Disenfranchisement States

State	Who is permanently disenfranchised	How right to vote may be regained	Notes
Alabama §15-22-36, 15-22-36.1 §17-3-30, 17-3-31 Const. Art. 8 §182	All people convicted of a crime involving "moral turpitude" (includes all felonies)	*Nonviolent:* apply for Certificate of Eligibility to Register to Vote from Board of Pardons & Paroles; board must issue certificate within 45 days if all requirements are satisfied *Violent:* apply for a pardon from Board of Pardons & Paroles	
Arizona §13-904 et seq. Const. Art. 7 §2	All people convicted of two or more felonies	Obtain a Certificate of Absolute Discharge from the Bureau of Prisons, or an affidavit of discharge from a judge if the most recent sentence was probation; then submit an application for restoration of civil rights to the superior court in his/her county of residence. A two-year waiting period is required before applying if the most recent sentence was a prison term.	Right to vote is automatically restored upon completion of sentence for people with a single felony conviction
Delaware §15-1701 Const. Art. V §2 and 7	People convicted of murder, manslaughter, sexual offenses, or any felony involving a violation of the public trust (includes bribery, improper influence and use of office, and election offenses)	Apply for a pardon from the governor	Voting rights are automatically restored for all other ex-offenders five years after completion of sentence
Florida Rules 6, 9, 10A and 10B, Rules of	Serious crimes, excluding murder and sex crimes	Apply to have rights restored *without a hearing* before the Board of Executive Clemency	Voting rights restoration is automatic for most people convicted of non-violent

Executive Clemency §97.041(2)(b), 944.292 and 944.293 Const. Art. VI §4	Murder, sex crimes	Apply for rights without a hearing after waiting 15 years after completion of sentence, or petition the Board for a review and hearing	offenses.
Iowa IA Code §48A.30(d) and §914.1 et seq. Const. Art. II, §5	A person convicted of any infamous crime	Apply to the board of parole for recommendation or to the governor for a reprieve, pardon, commutation of sentence, remission of fines or forfeitures, or restoration of rights of citizenship.	Under an executive order signed January 14, 2011, voting rights will no longer be restored automatically upon completion of sentence, and will only be restored by the governor for individuals who have completed their sentence and paid all financial restitution and court costs as ordered.
Kentucky §116.025, 116.113 Const. §145 and 150	All people convicted of a felony, treason or bribery in an election	Submit Application for Restoration of Civil Rights to the Division of Probation and Parole, which forwards it to the governor.	
Mississippi Const. Art. 12 §241 §23-15-11, 23-15-19	People convicted or murder, rape, bribery, theft, arson, obtaining money or goods under false pretense, perjury, forgery, embezzlement or bigamy	Three options: 1) apply for a pardon from the governor 2) apply for an executive order restoring civil rights from the governor 3) ask the state legislature to pass a bill of suffrage on their behalf (requires a 2/3 majority)	People convicted of other offenses do not lose the right to vote
Nevada §176A.850, 213.090, 213.155, 213.157 Const. Art. 2, §1	Except for first-time non-violent felons, all people convicted of a felony.	1) obtain a pardon from the Board of Pardons Commissioners, or 2) petition for the restoration of civil rights in the court in which they were convicted	Rights are automatically restored upon completion of sentence for first-time non-violent felons
Tennessee §40-29-201 et seq.; 40-20-112; 2-19-143 Const. Art. 1 §5	People convicted after July 1, 1986, of voter fraud, treason, murder in the first degree, or aggravated rape.		Those convicted of any offense other than those listed to the left may request

	People convicted after July 1, 1996, but before July 1, 2006 of the above offenses or any other degree of murder or rape. People convicted on or after July 1, 2006 of all of the above offenses or felony bribery or misconduct by a public official.		a certificate of voting rights restoration from the pardoning authority, prison officials, or a parole officer
Virginia §53.1-231.2 Const. Art. II §1	All people convicted of a felony	1) after a five-year waiting period, petition the circuit court (not available to people convicted of violent or drug-related offenses); court's recommendation must be approved by the governor; or 2) after a two-year (for non-violent offenders) or five-year (for violent offenders) waiting period, apply to the governor for restoration of rights	

Washington §29A.08-520; 9.92.066; 9.94A.637; 9.94A.8859.95.260; chapter 9.96 Const. Art. VI §3	Certain sex offenders convicted after September 1, 2001	No procedure in place to obtain a certificate of discharge	All others may present a Certificate of Discharge to the voter registration official; certificate is received automatically upon completion of sentence. Ex-felons who owe court costs, fines or restitution can have voter registration revoked if they fail to make at least three payments over a 12-month period.
Wyoming §6-10-106; 7-13-105; 22-3-102 Const. Art. 6 §6	Except for people convicted of first-time non-violent felonies, all felons	Apply to the governor for a pardon or a restoration of rights after a five- to ten-year waiting period	First-time non-violent felons may, after a five-year waiting period, apply to the Wyoming Board of Parole for a certificate restoring voting rights

It's a cliché to say someone has seen it all. Then you meet Jimmy Tharpe.

"The sex offenders and the murderers, they're actually my easy ones," says the 62-year-old businessman matter-of-factly.

Tharpe is a landlord to criminals. He owns three houses in South Seattle that he rents, room by room, to a total of 18 ex-cons. They are rapists, drug dealers, petty thieves, con men. They're free, but not like you and me — they're on a treacherous journey back into society that Tharpe calls "re-entry."

"It's a tricky business," he says, laughing at his own understatement.

Example: Once, Tharp had a tenant who became a Nazi in prison. The guy dressed in uniform, saluted, the works. The trouble, beyond friction with other tenants, was that he had moved into Tharpe's rental house located in Seward Park.

"So I'm renting to an all-out Nazi, and my house happens to be in a Jewish neighborhood!" Tharpe recalls.

"I've got dozens of stories like that. I love it, but I gotta say — renting to ex-offenders is definitely not for everybody."

Only it may soon be. If Seattle city government gets its way.

You know how you can't bar housing or jobs to people on the basis of sex, race, sexual orientation, disability and so on? Those are called "protected classes" because under the law these attributes get a unique shield from discrimination.

The city wants to add ex-cons to the list.

Last week, the Seattle Office for Civil Rights proposed adding people with criminal records to Seattle anti-discrimination law. That includes recent convictions. A landlord could be fined, for example, for rejecting a tenant just out of prison for theft or drug dealing.

There are exceptions for arson, murder and other convictions if it can be shown they may threaten the safety of workers or neighbors.

The Office for Civil Rights says it is doing this because, "When people have done their time and leave prison, it is often difficult to find housing and employment."

That's no doubt true. But crime is a choice. And Seattle may be about to put it on the same status as those who are black or female or gay.

Doing so would be "crazy, bizarre, ridiculous," says the landlord to the ex-cons, who thought he had seen everything.

It also won't work, contends Tharp, 62, who has been housing ex-cons since 1997. The state, with some private landlords, has extensive re-entry programs for released prisoners. Many of these people are incorrigible, Tharp says. Seventy percent fail and go back to prison within three years.

"Now we're going to dump all the ex-offenders on private landlords and employers, who have no experience dealing with them?" he said.

Setting aside whether this will work, what I think is dicey is that, until now, anti-discrimination law was confined to things that go to the core of your being: race, color, sexual identity and so on. A few things on Seattle's list do involve choices, such as marital status and "political ideology." Plus there is one profession on Seattle's list — service in the military.

Crime is in no way like these others. It's not only a choice but a horrendous one that victimized society. For this reason, many ex-cons, even upon release, don't have the full rights of citizens. Many can't vote or own guns. Some are not entirely free, as they remain in some way monitored by the state.

Yet Seattle wants to elevate them all into a protected class anyway.

The landlord to the criminals says what might work is for the city to go the other way. Encourage landlords to take a chance on just-released ex-cons by making it easier to evict them if something goes wrong.

"You can't just wave a wand to get equality for ex-offenders," Tharp says. "They need to earn it."

At a forum last fall sponsored by homeless groups and the city, some ex-felons spoke movingly about how the end of their sentence can be when the hard time really begins.

"It feels like I'll never stop being punished for what I did," one said, recounting her difficulties being a mother to her daughter because she couldn't find work or a place to live.

I looked up this woman's record. Robbery, theft, dealing meth, restraining order for domestic violence — a 20-year-long rap sheet. She pleaded guilty to multiple counts of identity theft and forgery less than two years ago, in August 2009.

Maybe she is on a new path and just needs a break. But should a landlord be guilty of a civil-rights violation for not renting to her? Or an employer for not hiring her?

I wonder what's next. I bet people with bad credit would like to be a protected class, too.

Re: Senate Bill 7
ACLU Statement of Support

Chair Wielechowski, Vice-Chair Paskvan:

Thank you for the opportunity to submit a written statement of support for SB 7.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout the State of Alaska who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions.

Felony disfranchisement is a policy that bars citizens from the ballot box upon conviction of a felony. In the United States, over 5.3 million Americans cannot vote due to a felony conviction. Felony disfranchisement laws vary from state to state, but 48 states bar incarcerated individuals from casting a ballot, with only Maine and Vermont allowing inmates to vote. Eight states permanently ban certain individuals with a felony conviction from voting and two states bar all persons with felony convictions from voting.

The vast majority of disfranchised individuals are no longer incarcerated, but are living in their communities on probation or parole; 2.1 million of the disfranchised population have fully completed their sentence. These disfranchised individuals are tax-paying citizens, involved with the issues in their community, but unable to vote to affect them.

The impact of felony disfranchisement falls disproportionately upon communities of color. Nearly one and a half million African-American men, or 13%, are disfranchised due to felony convictions, a rate that is seven times the national average of one out of forty-one adults. If incarceration rates hold steady, three in ten of the next generation of black men can expect to be disfranchised at some point in their lives.

However, over the last decade the national trend has moved toward lowering barriers for the disfranchised. Since 1997, 19 states have made progressive changes to their felony disfranchisement laws, enfranchising over 700,000 formerly incarcerated individuals. In a democracy voting is a right, not a privilege. But for over 5 million Americans, that is not the case. We hope SB 7 will change that in Alaska.

Alaska Disfranchisement Policy
Alaska bars individuals with a felony conviction from voting until full completion of sentence, including incarceration, probation and parole. Upon completion of sentence the right to vote is automatically restored but individuals must include a copy of their discharge papers when registering to vote. Individuals with misdemeanor convictions never lose the right to vote, but they must vote by absentee ballot if in jail.

Who is Disfranchised in Alaska?
An estimated 10,176 people with felony convictions are barred from voting in Alaska. Approximately 44% of disfranchised people are in prison while 56% of disfranchised people are on probation or parole. Probationers and parolees are law-abiding citizens who are living in the community, working, raising their families and paying taxes.

Racial Impact
Alaska Natives are significantly overrepresented in the disfranchised population. Alaska Natives comprise 32% of the total disfranchised population, though they only comprise 16% of the total population of Alaska. African-Americans comprise 9.5% of the disfranchised population, yet comprise only 3.5% of the total population of Alaska.

Voting & Public Safety
Felony disfranchisement runs counter to the goal of public safety. Restricting voting rights does not prevent crime, nor does it provide compensation to victims. In fact, disfranchising persons after release from prison is antithetical to the reentry process and harmful to long-term prospects for sustainable reintegration of ex-offenders into society. Recent research finds a link between voting participation and reoffense; people who voted after release from supervision were half as likely to be re-arrested as those who did not vote. Similar effects were found among people with a prior arrest; 27% of non-voters were re-arrested, compared to 12% of people who had voted.

Far from making streets safer, felony disfranchisement may be detrimental to public safety. Voting demonstrates an individual's commitment to the institutions of American democracy. The irony of felony disfranchisement is that the very behavior that society strives to encourage – the commitment to the larger social and political collective – is undermined by a policy that requires people who desire to engage in that behavior to relinquish the right to vote.

Please feel free to contact the undersigned should you require any additional information. We are happy to reply to any questions that may arise, or to answer informally any questions which Members of the Committee may have.

Thank you again for the opportunity to share our thoughts.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

CS FOR SENATE BILL NO. 16( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS MEYER, Dyson, Giessel

A BILL

FOR AN ACT ENTITLED

"An Act relating to special request 'Choose Life' license plates and special request 'Pro-Family, Pro-Choice' license plates; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 28.10.181 is amended by adding new subsections to read:

(bb) Special request "Choose Life" plates. Upon application by the owner of a motor vehicle, the department may issue registration plates with the phrase "Choose Life" on the plate. The commissioner, after consulting with Alaska Choose Life, shall determine the design and color of the plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

(cc) Special request "Pro-Family, Pro-Choice" plates. Upon application by the owner of a motor vehicle, the department may issue registration plates with the phrase "Pro-Family, Pro-Choice" on the plate. The commissioner shall determine the design and color of the plates. The department may disapprove the issuance of registration

plates under this subsection when the requested plates are a duplication of an existing registration.

*** Sec. 2.** AS 28.10.421(d) is amended by adding new paragraphs to read:

(20) special request "Choose Life" plates $30

plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the fee required by this paragraph shall be collected biennially in the same manner as the fee required under (b), (c), (h), or (i) of this section; the commissioner of administration shall separately account for the fees received under this paragraph that the department deposits in the general fund; the annual estimated balance in the account that is in excess of the cost of issuing special request "Choose Life" plates may be appropriated by the legislature to programs supporting or benefiting adoption.

(21) special request "Pro-Family, Pro-Choice" plates $30

plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the fee required by this paragraph shall be collected biennially in the same manner as the fee required under (b), (c), (h), or (i) of this section; the commissioner of administration shall separately account for the fees received under this paragraph that the department deposits in the general fund.

*** Sec. 3.** This Act takes effect January 1, 2012.

CS FOR SENATE BILL NO. 16(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS MEYER, Dyson, Giessel

A BILL

FOR AN ACT ENTITLED

"An Act relating to special request 'Choose Life' license plates and special request 'Pro-Family, Pro-Choice' license plates; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 28.10.181 is amended by adding new subsections to read:

(bb) Special request "Choose Life" plates. Upon application by the owner of a motor vehicle, the department may issue registration plates with the phrase "Choose Life" on the plate. The commissioner, after consulting with Alaska Choose Life, shall determine the design and color of the plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

(cc) Special request "Pro-Family, Pro-Choice" plates. Upon application by the owner of a motor vehicle, the department may issue registration plates with the phrase "Pro-Family, Pro-Choice" on the plate. The commissioner, after consulting with Planned Parenthood of the Great Northwest, shall determine the design and color of

the plates. The department may disapprove the issuance of registration plates under this subsection when the requested plates are a duplication of an existing registration.

* **Sec. 2.** AS 28.10.421(d) is amended by adding new paragraphs to read:

(20) special request "Choose Life" plates $30

plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the fee required by this paragraph shall be collected biennially in the same manner as the fee required under (b), (c), (h), or (i) of this section; the commissioner shall separately account for the fees received under this paragraph that the department deposits in the general fund; the annual estimated balance in the account that is in excess of the cost of issuing special request "Choose Life" plates may be appropriated by the legislature to programs supporting or benefiting adoption.

(21) special request "Pro-Family, Pro-Choice" plates $30

plus the fee required for that vehicle under (b), (c), (h), or (i) of this section; the fee required by this paragraph shall be collected biennially in the same manner as the fee required under (b), (c), (h), or (i) of this section; the commissioner shall separately account for the fees received under this paragraph that the department deposits in the general fund; the annual estimated balance in the account that is in excess of the cost of issuing special request "Pro-Family, Pro-Choice" plates may be appropriated to the Alaska Children's Trust (AS 37.14.200).

* **Sec. 3.** This Act takes effect January 1, 2012.

SENATOR KEVIN MEYER
MAJORITY LEADER

TO: Senator Bill Wielechowski, Chairman
Senate State Affairs Committee

FROM: Senator Kevin Meyer

DATE: January 28, 2011

RE: SB16 Request for Hearing

I respectfully request the Senate State Affairs Committee to schedule a hearing for SB 16, "An Act relating to special request choose life license plates; and providing for an effective date."

The following documents are attached and will be sent electronically:

- Current version of the bill
- Sponsor Statement
- Back up material
- Witnesses/Testimony
  - Whitney Brewster, Division Director DMV
- Staff member assigned to the bill: Christine R. Marasigan, 465-6876

This bill would allow the Department of Motor Vehicles to issue a Choose Life specialty license plate for a fee.

Please contact Christine if you have any questions regarding this legislation.

Alaska State Legislature

Interim:
716 West 4th Ave.
Anchorage, Alaska 99501

Session:
State Capitol Building
Juneau, Alaska 99801-1182
(907) 465-4945

Senator Kevin Meyer
Senate District O

SPONSOR STATEMENT FOR SB 16

"An Act relating to special request choose life license plates; and providing for an effective date."

SB 16 would allow the State of Alaska to issue special license plates bearing the message, "Choose Life" for a fee. Currently 26 states allow their Department of Motor Vehicles to issue this type of license plate and 15 other states are working on the same legislation.

Currently the State of Alaska's Department of Motor Vehicles have several special issue license plates such as Military, Veterans, Iditarod Race Finishers, Historic Vehicles, Children's Trust, Fire Fighter/Emergency Medical Services and others. These plates are totally optional and are funded by an individual's fee of $30.

If SB 16 is passed, the design will be determined by the DMV and a group from Alaska Choose Life. In order to obtain a plate you must have a registered vehicle in the state of Alaska. While the fee is intended to cover the cost of the production of plates, if there is any revenue generated it may be appropriated by the legislature to programs that support adoption.

Poetic Licenses

Are "Choose Life" license plates free speech or state-sponsored infomercials?

By Dahlia Lithwick

Posted Thursday, Feb. 6, 2003, at 6:57 PM ET

This week, Virginia's House of Representatives approved the creation of specialty "Choose Life" license plates. The Iowa state Senate introduced a bill this week that would do the same. The ACLU has threatened to sue if the Virginia measure is signed into law, which will produce the ninth lawsuit over this issue in three years. Alabama, Florida, Hawaii, Louisiana, Mississippi, Oklahoma, and South Carolina already have "Choose Life" license plate programs, and 13 other states are considering enacting similar legislation. So, it's probably safe to say that a "Choose Life" tidal wave—and its litigation backlash—is poised to hit the nation.

The legal issue isn't complicated, and it helps to separate it from your feelings about abortion. It's a free speech question: Can state governments endorse speech representing only one side of an issue as controversial as abortion? Has the state, by opening up license plates as a forum for private speech, incurred a constitutional obligation to allow speakers of every viewpoint equal access to that forum?

Most of the courts that have considered the issue have wussed out on the First Amendment question altogether, finding the plaintiffs in those cases lacked legal "standing" to file suit, since they had never endeavored to sponsor "Choose Abortion" or "Choose Choice" license plates themselves. Another court decided last month that the "Choose Life" plates in South Carolina were unconstitutional, in that the state was promoting only one side in the debate. Immediately, a South Carolina legislator introduced a "Choose Death" license plate, which he insists fairly expresses the other side in the debate. Newspapers recently noted that the "Choose Death" plate may still prove popular with death-penalty enthusiasts (and perhaps with hunters, werewolves, and NRA members as well). Less clear is whether it will satisfy the plaintiffs from Planned Parenthood.

Poetic Licenses

License plates became a constitutional issue in 1977 when the Supreme Court decided , a case involving a family of Jehovah's Witnesses who had taped over the "Live Free or Die" part of their New Hampshire license plate. The Maynards claimed that New Hampshire violated their free speech rights by forcing them to broadcast a political sentiment with which they disagreed. The high court ruled that states could not force individuals to be "mobile billboards" for messages they loathed. The "Choose Life" cases don't involve this sort of compelled speech, however, since no one in any state is *forced* to purchase the specialty plates—people buy them voluntarily.

Specialty plates were virtually unheard-of in most states until 1987, when Florida issued a plate commemorating the space shuttle *Challenger*. That plate alone raised more than $30 million for space-related programs, and today Florida issues more than 50 specialty plates. Forty other states have specialty-plate programs, and for the most part they celebrate non-controversial organizations: sports teams, schools, veterans, NASCAR, or saving the whales, with the additional fees benefiting that cause. The "Choose Life" plates in Florida feature the words "Choose Life" in childlike crayon, along with a beaming boy and girl—presumably of the happily adopted variety—also rendered in the key of crayon. Most of states with "Choose Life" programs provide, as does Florida, that the proceeds of these sales go exclusively to organizations that counsel women with unwanted pregnancies to choose adoption. In fact, the legislation in most states expressly provides that any program offering referrals or even discussing the option of abortion is barred from funding.

When the first "Choose Life" legislation passed in Florida in 1998, then-Gov. Lawton Chiles vetoed it, stating that license plates were not necessarily the best forum for exploring the complex nuances of the abortion debate. But Gov. Jeb Bush signed the bill when he was elected in 1999, and the Louisiana legislature adopted similar legislation shortly thereafter. South Carolina followed in 2001. All have resulted in lawsuits, with the first two states' suits going to the Choose Lifers and the third

Slate

Poetic Licenses

going to the plaintiffs. So far.

In Florida, the courts have usually dismissed the suits, insisting that the plaintiffs (usually women's or pro choice organizations) didn't have "standing" to sue because they had never themselves attempted to get the opposite viewpoint onto any license plates. The Louisiana lawsuit went to the plaintiffs initially, because the district court felt that the plates discriminated in favor of just one viewpoint. This resulted in an injunction that was dissolved last March by the 5th Circuit court of appeals, who found that, as was the case in Florida, the plaintiffs had no standing to sue in the first place. The U.S. Supreme Court declined to hear that case this year.

One court that's really wrestled with the free speech issue was a federal district court in South Carolina, which last month found the "Choose Life" plates to be unconstitutional since they endorse only one side in the abortion debate. The state has appealed this ruling, and another Florida suit was revived last week, this time on the grounds that the plates impermissibly entangle church and state.

To understand the free speech issue, it's important to clarify whether specialty license plates represent government speech or private citizens' speech. Why? Because there is no question that the government may speak in a partisan manner without violating the Constitution. The First Amendment applies only to government efforts to restrict *private* speech; it doesn't apply back to the state itself. This is why the state is perfectly free to tell you to stay in school, or drive sober, without having to broadcast the opposing viewpoint. States may have preferences for all sorts of messages. But if, on the other hand, the government opens a forum for private speakers—if it creates a park or builds a street where you and I are free to talk—it cannot be in the business of censoring some viewpoints while permitting others. This is the core of the First Amendment. So, the legal test for the courts is simply this: When the state gives license plates to certain private organizations to broadcast their messages, is it more like the state is talking (akin to a public service

Print Powered By FormatDynamics

Slate

Poetic Licenses

announcement) or more like it's allowing private citizen to talk (like they would in a public square)? The former is constitutional, but the latter may well be censorship.

Different states have tended to take different positions on this issue, depending on the lawsuit. In the Louisiana suit, for instance, the state admitted candidly that the message of the plate is explicitly anti-abortion, but that this was valid government speech as it reflected the state's own preferences. Louisiana lawmakers had no problem admitting that the state legislature abhors abortion and likes adoption. This is hardly news if you look at Louisiana's "Choose Life" plate, which features the brown pelican—the state bird—holding a baby wrapped in a blanket in its beak. Other states have gone to the other extreme, arguing that the government is in no way endorsing or even involved in the message on the plates—it's a private commercial decision between a driver and an organization she supports—like a bumper sticker, according to one lawmaker. The truth is somewhere between the extremes. Of course the state is abetting this speech—its name is prominently displayed on the tag—but individuals also choose and display the tags freely. So, the truth is that the state is opening up some kind of forum, which means the state can't discriminate based on viewpoint.

Here's where the other strange state response comes in: Some argue that yes, they have opened up something like a public forum but that the messages they promote are not controversial, or have no opposing side. There can be no viewpoint discrimination, they contend, because who, they argue, is against the space shuttle? Who wants to take a stand against the Everglades? And who could possibly be against adoption? And throughout these cases, the states have insisted that the plates, while backed by pro-life groups and trumpeting the famous pro-life slogan, actually have nothing to do with abortion: They are simply "pro-adoption." In fact, when Jeb Bush signed the Florida plates into law he insisted: "It's a pretty tag and it says 'Choose Life' and it's for adoption. If people want to politicize that, they'll politicize anything." This would be a

Advertisement

Click here to find out more!

Slate

Poetic Licenses

more credible argument if the same legislators weren't withholding money from organizations that discuss abortion.

Ironically, the states simultaneously advance precisely the opposite argument as well: insisting that all specialty plates are by definition "political"; advocating environmentalism and the saving of endangered animals as they do. The "Choose Life" message, they argue, is no more "political" than these others. Richard H. Black, the Virginia delegate who introduced the bill there, says if the law is now that we must always sponsor opposing messages, the state needs to produce a "Virginia Is for Haters" plate to counter its "Virginia Is for Lovers" tags.

Here's the fundamental problem with all these arguments: Whether or not the tags are "controversial" or even "political" or "opposable" is irrelevant for First Amendment purposes, when the legislature is breezily permitting some to be created and others to be denied. The relevant question is whether state legislatures are taking it upon themselves to decide what "political" or "controversial" mean in the first place, and what standards they use to do so, because in doing so, they are by definition discriminating based on viewpoint. While different states have different mechanisms for approving the programs, most involve some advocacy group proving to the legislature that there is sufficient demand for the plates to generate income. That means that if an organization can get enough signatures pledging to buy the plates, the legislature will consider it. Which in turn means that only popular viewpoints can pass the initial threshold. And if *Maynard* taught us anything, it was that "the First Amendment protects the right of individuals to hold a point of view different from the majority." Permission to speak shouldn't be doled out by the state based on the popularity of the idea.

But that isn't the end of the unbridled discretion. Because once a bill is in the hands of the legislature, it seems to be a sort of political free-for-all as to whether *they* wish to approve or disapprove of any group's message. Arkansas refused to give the Knights of Columbus a specialty plate, for fear that the KKK would want one, too. The California legislature went

Print Powered By FormatDynamics

Slate

Poetic Licenses

berserk over whether the Boy Scouts should get plates, because some felt the group was discriminatory. So, state discretion doesn't stop with the promotion of only popular ideas. It becomes even more blatant as lawmakers decide whether *they* approve of the ideas, and apparently, they make these decisions without standards or rules either.

It's not at all clear how the "Choose Life" lawsuits will shake out. But it seems obvious that if a "Choose Life" tag is constitutional in Virginia, a "Honk If You Love al-Qaida" plate should be constitutional in New Hampshire, as well. Which would probably give a whole new meaning to "Live Free or Die."

Appeals court: God is OK on license plates

Ruling strikes down Vermont ban on religious expression on vanity placards

By Larry Neumeister

Associated Press

updated 10/8/2010 6:27:08 PM ET

NEW YORK— "THE REV" and "PSALM48" can join "ARMYMOM" and "DARE2BU" on the license plates of cars in Vermont after a federal appeals court ruled Friday that the First Amendment leaves room for religion on vanity plates.

The three-judge panel of the 2nd U.S. Court of Appeals in New York reversed a lower-court ruling in the state's favor in a case brought by Shawn Byrne of West Rutland, Vt., whose proposed vanity plate reference to a Bible passage had been rejected by the state in 2004.

Byrne appealed a September 2007 decision by a federal judge in Burlington, Vt., that rejected his 2005 claim that the state discriminated against him when it rejected his application for a license plate that would read: "JN36TN," a reference to the often-quoted Bible verse John 3:16.

Byrne did not immediately return a telephone message for comment.

Tom McCormick, an assistant attorney general, did not immediately respond to a phone message either.

In ruling, the 2nd Circuit noted that Vermont allows its residents to express themselves about personal philosophy and taste and to put inspirational messages and statements of affiliation on their license plates. But religion is ruled out.

Thus, the state's vehicles have plates such as: "BUTCHER," "BKEEPER," "LUV2FSH," "GOYANKS," "PEACE2U," "THNKPOS" and "MISUDAD." But not "REV 3 20" or "UM REV" and the like.

"The state rejected Byrne's message only because it addressed ... areas of otherwise permissible expression from a religious perspective," the appeals court wrote. "This

msnbc.com

the state cannot do."

It emphasized that its ruling was limited to the state's ban on religious messages, an area where it said the Supreme Court has been "extensive and clear" in its guidance.

As a result, it said, the state can keep its ban on vanity plates that refer to scatological subjects, genitalia, illicit drugs, racial epithets and other objectionable material.

The appeals court noted that the state's rules against religious expression on vanity plates had sometimes been unevenly applied.

Vote: Religious references OK on license plates?

For instance, it said, "GENESIS" can appear on a license plates as long as the driver insists it is a reference to a rock group rather than the Old Testament. And it said Byrne had shown that his proposed license plate would have been approved if he had given the state a secular meaning, saying he chose "JN36TN" because his name is John, he is 36 years old and he was born in Tennessee.

Associated Press Writer John Curran in Montpelier, Vt., contributed to this report.

Re: Senate Bill 16 – "Choose Life" License Plates
Constitutional Issues

Chair Wielechowski, Vice-Chair Paskvan:

Thank you for the opportunity to submit written testimony regarding Senate Bill 16, regarding Special Request "Choose Life" License Plates.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout the State of Alaska who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions. From that perspective, we wish to alert the Committee to potential constitutional issues which could arise with respect to this proposed legislation.

Government Viewpoint Neutrality Required

If a State chooses to introduce a system for creation of optional license plates, the State must have a viewpoint neutral process for determining how applications for optional license plate formats would be adopted.

For instance, a Missouri agency that regulated specialty license plates could not refuse to create a "Choose Life" license plate simply because such license plates made members of the committee uncomfortable. *Roach v. Stouffer*, 560 F.3d 860 (8th Cir. 2009).

While the license plates are theoretically "owned" by the state, these "message" plates consist of mixed government and individual speech. The plates constitute government speech, insofar as the government imposes general editorial control over the license plate content. They are individual speech insofar as a non-state group may propose a specialized plate format and the individual driver chooses to espouse the message.

Given the personal speech interests at stake, the government may not pick and choose among causes and messages it supports in adopting such optional license plates.

In a case directly on point, South Carolina adopted a "Choose Life" license plate by statute. Refusal of the state to authorize a pro-choice themed license plate constituted direct viewpoint discrimination and violated the First Amendment. *Planned Parenthood of South Carolina Inc. v. Rose*, 361 F.3d 786 (4th Cir. 2004).

Conclusion

We hope that the Senate State Affairs Committee will note the constitutional issues that can arise when "message" plates are approved, and we presume that the State of Alaska would follow constitutional mandates in establishing a process for approval of additional messages.

Please feel free to contact the undersigned should you require any additional information. We are happy to reply to any questions that may arise either through written or verbal testimony, or to answer informally any questions which Members of the Committee may have.

Thank you again for the opportunity to share our concerns.

Sincerely,

Jeffrey Mittman

adopted

COMMITTEE SUBSTITUTE

This CS corrects a drafting oversight by moving the effective date to 2012. Thus, beginning in 2012 we'd have a 120-day session.

adopted

AMENDMENT B.1

Currently every legislature is to convene and begin its work on the third Tuesday in January. With a 120-day session, that would mean concluding its work in mid-to-late May. The logistics of Juneau's economy, particularly regarding the housing and tourism market, should encourage the Legislature to wrap up as early in May as practical. This amendment would have the legislature convene on the second Tuesday in January during even years for its 120-day sessions. Adjournment would occur sometime between April 14-20 in odd years, and between May 7-14 in even years.

AMENDMENT B.2

This amendment, in lieu of Amendment B.1, would instead provide a consistent start of the Legislature by establishing that every legislature will convene on the second Tuesday in January, rather than just the years with 120-day sessions. Thus, adjournment would occur sometime between April 7-14 in odd years, and May 7-14 during even years.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 24.05.150(b) is amended to read:

(b) The legislature shall adjourn from a **first** regular session within 90 consecutive calendar days, including the day the legislature first convenes in that [REGULAR] session. **The legislature shall adjourn from a second regular session within 120 consecutive calendar days, including the day the legislature first convenes in that session.**

* **Sec. 2.** AS 24.05.150 is amended by adding a new subsection to read:

(c) Notwithstanding (b) of this section, the legislature may extend a first or second regular session once for up to 10 consecutive calendar days. An extension of the regular session requires the affirmative vote of at least two-thirds of the membership of each house.

* **Sec. 3.** Section 1 of this Act takes effect January 1, 2012.

* **Sec. 4.** Section 2 of this Act takes effect immediately under AS 01.10.070(c).

MEMORANDUM

To: **Senator Bill Wielechowski, Chair**
Senate State Affairs Committee

From: **Senator Gary Stevens**

Date: **January 20, 2011**

Re: **SB 18 Hearing Request**

I respectfully request a hearing of SB 18 before the Senate State Affairs Committee. "An Act relating to the duration of regular sessions of the legislature; and providing for an effective date," SB 18 is informally known as the 90/120-day session bill.

Please find attached the sponsor statement, current bill text, a sectional analysis, and supporting documents. A fiscal note from LAA has been requested and is forthcoming.

Thank you for your consideration of this request. Please contact myself, or my aide Tim Lamkin at extension 4925 with any questions or additional requirements you may have.

Thank you for your consideration.

SPONSOR STATEMENT
Senate Bill 18

Senate Bill 18 strikes a compromise by maintaining a 90-day first session, and a 120-day second session during each Alaska Legislature.

In the Fall of 2006, Alaskan voters narrowly passed ballot measure #1 to limit legislative sessions to 90 days. The Legislature has since worked under a 90-day session for 4 sessions. We've tried it. However, the best interests of Alaskans are not being served, nor are the arguments supporting passage of the ballot measure being proven true.

The most compelling argument in favor of shortening the session was the notion it would save money by reducing the cost of government. Obviously the costs of having regular legislative sessions have been reduced. However, the overall annual costs of the legislature have actually increased. Legislative salaries are still paid out, paper and copy costs accrue for more interim committee meetings, and legislator travel expenses accrue throughout the year, not just during session. There has not been a significant cost savings, if any, by reducing legislative sessions to 90 days.

As regards what other states are doing, half have no limit, and the other half range from 30 to 140 session days per year. It's very common to look at what other states are doing and to embrace or dismiss their policies depending on what side of an issue a person stands. Comparatively, Alaska is in the middle of the road on this issue and SB 18 would move us even closer to the middle.

There's also the idea that less time in Juneau means less time away from the home district, away from family, and normal interim activities (private sector work, etc), and thus greater "competition" among candidates who will have more incentive to run for office. Unfortunately there has been a steady decline in the total number of candidates running for state office since 2000, with the 2008 & 2010 election seasons showing the lowest number of candidates in a primary since 1998.

The bottom line is, the roughly $60 million spent on administering the Legislative ("Peoples') Branch of government, the watchdog of the Executive Branch, is a drop in the bucket compared to the $10 *billion* being spent by the executive agencies. And while the legislature respects and acknowledges the initiative process in Alaska, particularly the 90-day session vote in 2006, it is within the confines of Alaska's Constitution to resume a 120-day legislative session, at least partially as SB 18 proposes, to balance the power structure of Alaska's state government, and better serve the public.

Thank you for your support of this important issue.

SECTIONAL ANALYSIS
Senate Bill 18

SECTION 1: AS 24.05.150(b)
Establishes that the legislature shall adjourn its first regular session within 90 calendar days and its second regular session within 120 calendar days from the time it convenes.

SECTION 2:AS 24.05.150 (c)
Adds a new subsection (c) that reiterates Article 2, Section 8 of the Alaska State Constitution, providing for a 10-day extension of a regular session if made by an affirmative vote from two-thirds of the membership of each house.

SECTION 3:
Establishes the effective date of Section 1 of the bill to be January 1, 2013.

SECTION 4:
Establishes an immediate effective date of Section 2 of the bill.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 18
2011 LEGISLATIVE SESSION

Analysis

SB 18 increases the number of days of the second session of a Legislature from 90 days to 120 days, beginning with the 28th Legislature which convenes in January 2013. The second session would convene in 2014.

When the session was reduced from 120 to 90 days, the cost savings were redesignated into the special session contingency account in the event that reducing the number of session days resulted in more or longer special sessions. It is the intent of Senate Leadership that funding in the special session contingency account be used to absorb the cost of the additional 30 days of regular session.

This will reduce the funding available for special sessions after a second session of a Legislature and would result in a supplemental request for additional funds to cover a special session if one were called.

Attachment A

Impact Statement for Alaska Ballot Initiative 05LEGS (2006) "90 Day Regular Session," Alaska Legislative Affairs Agency

Fiscal Note to HB22 (2006), prepared by Karla Schofield, Deputy Director, Alaska Legislative Affairs Agency, Jan. 16, 2006

Ballot Initiative 05LEGS – 90 Day Regular Session

As required by AS 15.58.020 (6) (c) the Legislative Affairs Agency has prepared the following statement of costs and cost savings to the Legislative Affairs Agency of implementing the law proposed in Ballot Initiative 05LEGS.

The initiative would limit regular sessions of the Legislature to 90 days, including the day the legislature first convenes in that regular session. The 90 day limit would take effect beginning with the second regular session of the 25th Alaska Legislature in January 2008.

The Legislative Affairs Agency would realize a cost savings of $700,000 per year due to shortening the existing 121 day session to 90 days. However, shortening the regular session to 90 days may or may not result in more frequent special sessions so that legislators can work on single subject legislation, or work on legislation that did not make it through the process during the regular session. If more special sessions were held, the $700,000 cost savings realized by shortening the session, would be offset by the costs of holding more frequent special sessions.

FROM: Chuck Burnham, Legislative Analyst
RE: Comparing Selected Aspects of 90-day and 120-day Legislative Sessions
LRS Report 10.034

You asked that we compare certain impacts on the Alaska Legislature of reducing session lengths from 120 days to 90 days. Specifically, you asked us to compare annual costs to the legislature under the different session lengths, and the number of interim committee meetings held, on average, under each scenario.

Briefly, for reasons we discuss below, we find comparing the actual costs of recent 90-day sessions to previous 120-day sessions to be problematic. However, assuming no special sessions or other extraordinary costs, and that all other cost factors are equal, 90-day regular sessions are projected by the Legislative Affairs Agency to result in reduced costs of approximately $700,000 annually (in 2006 dollars), primarily attributable to reduced personnel expenditures. By comparison, recent 30-day special sessions have incurred average overall costs of approximately $900,000.

Our research indicates that the number of interim committee meetings held since the implementation of 90-day regular sessions does not exceed the annual average of such meetings in the previous eight years of 120-day sessions.

Background

As you know, sessions of the Alaska Legislature were reduced in length from 120 days to 90 days by a citizen's initiative (05LEG) that was narrowly approved in the 2006 statewide general election.[1] The shorter sessions took effect beginning with the second session of the 25th legislature (2008); therefore, two regular sessions and about 1.5 interim periods have elapsed since the initiative took effect. Given the relatively short time-period in which the 90-day session has been in place, we do not believe sufficient data are available to make a reliable determination as to the typical relative costs of these sessions of differing lengths.

Comparing the relative costs of recent sessions is further complicated by the two 30-day special sessions called in 2008 by Governor Palin primarily to address aspects of the Alaska Gasline Inducement Act (AGIA) and a number of other energy-related issues, which collectively cost approximately $1.84 million. It is unclear to us whether one or both of those sessions would have been necessary had the 2008 regular legislative session lasted longer than 90 days. Attributing the costs of those special sessions for the purpose of the comparison for which you asked is therefore problematic.

[1] More information on the initiative is available on the Division of Elections website at *http://www.elections.alaska.gov/petitions/status.php#05LEGS*.

"All Other Things Equal" Comparison

Given the issues discussed above, we believe the most reliable comparison of the relative costs of 90-day and 120-day sessions is made using historical expenditure data to determine relative session costs assuming no special sessions or other extraordinary expenditures.[2] Such data has been previously published by the Legislative Affairs agency in fiscal notes accompanying previous legislative attempts to shorten sessions (most recently HB22 [2006]), and as part of the ballot language for the initiative that successfully shortened regular sessions.[3] The last such calculation concluded that a 90-day session generates a reduction in costs of $700,000 annually, in 2006 dollars, as compared to a 120-day session, with the majority of those savings attributable to reduced expenditures for employee wages and benefits.[4] We again emphasize, however, that those savings would be reduced commensurate with costs for any special sessions that occur as a result of the shorter regular session.

To provide context to the differences in costs we discuss above, it is important to note that since the switch to 90-day sessions, the Legislature's overall operating budget has increased from about $53.4 million in fiscal year (FY) 2008 to just over $66 million in FY 10. Therefore, while a substantial sum, the annual reduction of $700,000 associated with the reduction in session lengths to 90 days represents about 1.05 percent of the Legislature's current-year operating costs.

Interim Meetings

According to the Alaska Legislature's Bill Action and Status Inquiry System (BASIS), a total of 449 interim meetings of official legislative entities occurred between May 7, 2000, and August 9, 2009.[5] Table 1 (following page) tallies these meetings by year and location. The number of hearings ranged from a low of 21 in 2000 to a high of 78 in 2001, and averaged about 47 annually for each of the full-year periods we reviewed (2001-2008). As you can see the 44 interim meetings in 2008, and 22 interim meetings thus far in the 2009 interim, do not exceed the average number of such meetings from 2000-2007.

[2] Please note, however, that special sessions in Alaska are not particularly "extraordinary." In fact, since 2003, the legislature has convened in special session ten times for a total of 176 days.

[3] We include copies of the fiscal note for HB 22(2006) and the applicable ballot language for 05LEGS as Attachment A. These documents were prepared by Karla Schofield, Deputy Director, Alaska Legislative Affairs Agency. Ms. Schofield can be reached at (907) 465-6626.

[4] Assuming costs for the legislature have increased with the rate of general inflation published by the Alaska Department of Labor, in 2008 this figure would have increased to about $747,600.

[5] Among the wide variety of information contained in BASIS are the hearing calendars for legislative entities for every year since 1993. The system is available online at *http://www.legis.state.ak.us/basis/*. May 7, 2000, marked the end of the third special session of the 21st Alaska Legislature, which immediately followed the second regular session.

ANALYSIS: *(Attach a separate page if necessary)*

CS HB22(STA) would limit the regular session to 90 days. If this legislation becomes law, the 1st Session of the 25th Legislature would convene for 90 days. The Legislature would realize a cost savings of approximately $21.9 per day for each day of a shorter session. Shortening the session by 30 days would result in a cost savings of, 30 times $21.9, or $657.0 per year.

The Legislature traditionally charges expenses occurring during session to session expense accounts and expenses occurring during the interim to interim expense accounts. For example: Most legislative staff payroll costs are charged to operating expense accounts during the interim. Staff salaries for most legislative staffers are charged to session during the session. The Legislature's payroll is higher

ANALYSIS CONTINUATION

during a legislative session. If the regular session were shortened to 90 days, the session payroll would decrease and the interim payroll would increase. There would be a decrease in the total amount of the payroll due to the higher cost of personal services during a session. The majority of the personal services costs would be a transfer of costs between allocations.

This fiscal note does not address the costs for special sessions.

The costs savings below are for items not needed for a shorter session.

	Per Day	times 30 days	Total
Personal Services	-14.0	30	-420.0
Travel			
Session per diem costs approx. 10.0 per day. If session were shortened more long term per diem claims would be filed during the year, approx. 23 claims per day 23 days @ 150/day = 3.5 10.0 - 3.5 = 6.5	-6.5	30	-195.0

NOTE: All Special Sessions were called by the Governor, except the 1st Special Session of the 14th Legislature, the 1st Special Session of the 17th Legislature, the Second Special Session of the 22nd Legislature, the First Special Session of the 25th Legislature, and the First Special Session of the 26th Legislature which were called by the Legislature.

Alaska State Legislature

Rep. Max Gruenberg

Rep. Bryce Edgmon

Rep. Paul Seaton, Chairman

HOUSE 90-DAY SESSION EVALUATION SUBCOMMITTEE

The following report is submitted with the unanimous consent of the House 90-Day Session Evaluation Subcommittee.

Introduction

In 2007 the Legislature passed HB 171 requiring Legislative Council to deliver a report to the full Legislature before the start of the 2010 session "considering issues related to the duration of the regular session and making recommendations regarding the amendment or repeal of any statutes or Uniform Rules implementing the 90-day regular session."

In 2008 Legislative Council created a subcommittee to assist in creating the 90-day session report. This subcommittee consists of three members of the House, appointed by the Speaker of the House, and three members of the Senate, appointed by the Senate President. House subcommittee members include Representative Seaton, Chair, Representative Edgmon, and Representative Gruenberg. Senate members are Senator Stevens, Senator Huggins, and Senator Wagoner.

House subcommittee members viewed our task as providing Legislative Council with a basis and recommendation for their report. House subcommittee members felt that we needed baseline information on which to base our recommendations. In order to gather this information the House members on the subcommittee submitted a "90-day Legislative Session Evaluation Survey" to all House members and House interim staff.

Senate members of the subcommittee determined that they would proceed on a different track and did not participate in the survey. This report exclusively discusses the deliberations of the House portion of the subcommittee hereafter referred to as "the subcommittee". House members will hereafter be referred to as Representatives.

Survey

An on-line survey provider called "SurveyMonkey" was utilized to deliver the survey. SurveyMonkey is the website of choice for entities such as Council of State Governments and the Western Interstate Commission for Higher Education. The survey site allows multiple answer surveys to be filtered and downloaded, at a cost of $19 per month. The subcommittee maintained this website for three months in order to collect as many responses as possible. The survey was e-mailed to all Representatives, and all interim House staff.

In order to achieve a maximum degree of participation among Representatives and House staff, the subcommittee determined that the survey should be delivered on an anonymous basis. However, it did include the option for respondents to provide their name if they wished.

For purposes of delineating staff responses regarding the impact of the 90-day session on moving expenses and other "personal" issues, the subcommittee determined that staff responses should be segregated between House staff residing in Juneau during the interim, and House staff residing elsewhere in Alaska during the interim, as these personal impacts would likely be different for the two groups.

The survey took into account that some Representatives, as well as many staff members may not have worked prior to the imposition of the 90-day session. An answer option was added to applicable comparative questions stating that the respondent was "unsure" as they have not worked during a 120-day session. In order to achieve objectivity the options for answering the "yes or no" questions were alternated so that one answer or the other was not listed first in order of preference. The subcommittee was also careful to give respondents the option to answer "no opinion" on pertinent questions so that they were not forced into picking one answer or the other if they did not have a position.

The survey contained 40 questions, in four general categories:
1. Impacts of the 90-day session on aspects of the personal lives of Representatives and staff such as moving expenses, housing, recreation time, health, etc;
2. Impacts of the 90-day session on the legislative office and constituent relations;
3. Impacts of the 90-day session on public participation and the committee process; and
4. Impacts of the 90-day session on miscellaneous aspects of the legislative process, as well as suggested changes to session structure, and length.

Results

The same survey was given to all Representatives and interim staff. The survey results are presented filtered into three groups: Representatives; House staff; and a combination of both. These surveys are attached as are all additional comments to survey questions.

The surveys presented with this report are largely self-explanatory so this report will not go into great detail discussing the survey results with a few exceptions. In the following narrative the number in parenthesis refers to the question number in the Representative survey. Although the staff survey has some different percentages there was not a difference on the main issues discussed below.

Thirty-one Representatives responded to this survey, as well as 47 non-Juneau House staff, and 23 Juneau-based House staff. Of the 31 Representatives, a large majority expressed displeasure with the 90-day session. Twenty Representatives prefer the session length at 120-days, 4 prefer the session to be set at 90-days, and 4 prefer it to be structured as 45-days, a 30-day break, and then another 45-days.

General trends can be seen by looking at the majority of responses to a number of issues. Sixty percent of responding Representatives answer that the 90-day session had a negative or somewhat negative effect on their health and sleep habits (question 9). Sixty-seven percent say the 90-day session had a negative or somewhat negative impact on their hiring and retention of staff (q.11) while only 3 percent say it had a positive or somewhat positive impact. Communication and interaction with constituents is generally seen as negatively impacted, with 83 percent saying they communicated less well (q.14), 79 percent saying they traveled less to the district (q.15), and 85 percent stating that they consider a 90-day session to be detrimental to their legislative effectiveness. Sixty percent heard a majority of negative comments about the 90-day length from their constituents compared to 7 percent hearing positive comments (q.17). The effect of the 90-day session is generally seen as disadvantageous to constituents, with 93 percent of responding Representatives feeling that they have less time to schedule meetings (q.18), and 97 percent believe there is less public testimony and more time constraints on public testimony (q. 22). Ninety percent also feel there is less than adequate evaluation of their personal legislation (q. 21); with 83 percent believing the 90-day session gives special interest groups more power to kill legislation (q.23), and 76 percent say committee chairs have more power to kill legislation (q.24). Seventy-nine percent say bills were not heard because they might take up too much committee time (q.26) while 87 percent feel there is more pressure to move bills with a single hearing because of the shortened session (q.25).

Representatives generally disagree with the validity of 90-day initiative proponent claims. Ninety-three percent do not think the shorter session cuts down legislative operating costs (q.13). Sixty-six percent do not believe the reduced number of session days leads to a greater number of people willing to run for office (q.32), and 83 percent do not see value in comparing the length of sessions to other states (q.31). Eighty-six percent of the responding Representatives feel the 90-day session cedes some of the power of the legislature to the Governor or the bureaucracy (q.33).

There is no majority opinion about the public desire for legislators to work longer sessions because of the change in legislators' compensation calculation from long-term per diem to salary (q.34), but 73 percent say the fact that the 90-day session was enacted by an initiative would have no effect on their willingness to change the session length (q.36). Sixty-seven percent of responding Representatives when combining all factors prefer the legislative session to be a 120-day structure.

Recommendations

Consistent with the above findings, the House subcommittee recommends that the Legislative Council introduce legislation to return legislative session duration to the constitutional specification of "...no later than one hundred and twenty consecutive calendar days from the date it convenes...."

If Legislative Council chooses to not follow the above recommendation, it should note that the survey polled respondents on three other measures the Legislature might take to improve a 90-day session. These results show that 65 percent of the responding Representatives support decreasing the length of time allowed to the Governor to submit budget amendments from 45 to 30 days. Twenty-two percent support a limit on the number of bills sponsored or co-sponsored, and 13 percent endorse a limit on the number of legislative citations an individual legislator can introduce (q.39). Five separate suggestions for uniform rule changes by individual Representatives are listed in the comment section (q.37).

MEMORANDUM

To: Senator Wielechowski, Chair
Senate State Affairs Committee

From Cathy Giessel

Date: January 31, 2011

Re: **Senate State Affairs Committee**
SB 18 Duration of Regular Legislative Sessions

Please include the attached email testimony regarding the length of legislative session in the committee packets for the next scheduled hearing of SB 18.

Thank you.

Subject: SB 18

Hi Senator Giessel,

Just a quick note to let you know that I oppose the lengthening of the legislative session (SB 18) beyond any parameter of the current 90 day format. I believe that the legislature should actually attempt to finish its business according to the law and adjourn before the 90 days are up. What the Senate did last year, adjourning after the deadline, was disrespectful (among other things) to the people who they represent.

Thanks for your time and public service,

Jerad McClure

Cathy,

I vote to stay at 90 here's why:

All who go to Juneau feel they "have" to make laws for respect of their peers and to be re-elected. The bigger and hairier the better. We have a bunch of laws difficult to enforce already. Taking up more unimportant laws because we have the time, does not address the pressing concerns of Alaska's socio and economic future.

An extra 30 days may lend itself to an "I have lots of time" mind-set. With the 90, you all have to stay high on the performance curve. If we do extend another 30 days, I would suggest delaying the start of the session for 2 weeks and require each of you to hold open forums, (with security), in your areas and where we are, to hear from your constituents. As it is, you are fresh off the campaign trail with an ear full of your supporters but little from the "people". How can you effectively represent the average without discussions and time to contemplate? Without that you may be lead to act on issues from people with wants rather than the needs of the State?

Thanks again for your personal commitment to serve the people of Alaska.

One of my concerns is that legislators are wasting valuable time on frivolous bills that have absolutely no impact on the direction our State is heading. It's as if they are in lala land and completely oblivious to the problems facing Alaska. Ninety days is plenty of time if the legislature cuts out the crap and gets down to work.

Dear Senator Giessel:

Below are my thoughts on this issue.

I do not support a bill to extend the state legislative session.

A proud member of National Write Your Congressman.

Sincerely,

April Hodges

To: Chair Senate State Affairs

Testimony to Senate State Affairs regarding SB 18 (Extending the Term of the Legislature)

I oppose extending the length of the legislative session. I understand the proponents believe that adding back the additional 30 days would somehow improve the legislative process. The record belies that assumption. The actual work of the legislature is traditionally delayed until the end of the session. The proponents of this legislation have offered nothing to change the status quo.

Time to hold a hearing is available. Legislative hearings can be held outside of the session. Legislators now earn an annual salary plus per diem for the days they work.

Nothing in this proposed legislation will stop individual legislators from simply killing bills. Individual legislators have granted themselves defacto veto power over legislation with absolutely no explanation required.

Nothing in the proposed legislation will expedite the resolution of bills that are not of a critical nature or have minimal impact on the citizens. Nothing in this bill will expand BASIS information regarding legislation so that we citizens can see exactly how many bills have been defeated, withdrawn, combined with similar bills or have been pending before specific committees for extended periods of time. Nothing in this legislation will stop the new tactic of not being able to act because studies won't be available for months.

No, you do not additional time to do what you do now. I oppose SB18. Thank you.

RE:SB18

Dear Senator Stevens,

It is my pleasure to tell you what a great job your aide Tim Lamkin did last week at chamber lunch presenting information on SB18 extending the second session of the Legislature back to 120 days.

I have represented the Juneau Chamber of Commerce as well as served on the Marine Transportation Advisory Board for the past 6 years. I have had the honor of visiting many legislators during this time regarding issues important to my community as well as all other communities served by the Alaska Marine Highway.

Before the legislative sessions were shortened to 90 days I could call on not only my delegation but legislators from around the state and felt confident that they would have time to hear what I had to say.

Since the change from 120 to 90 days I seldom go directly to any of my legislators during session. If I do I must be prepared to chase them down the hall or if I get lucky I might get 5 minutes of their time. Legislators and their staff seem to be racing from one meeting to the next. I can only imagine how difficult this must be for folks traveling to Juneau to see their legislators especially when I know legislators want to spend time with their constituents.

In conclusion, we whole heartedly support SB18 and hope that at least one year of each session is extended to 120 days. The ideal would be to revert back to 120 days every year.

Thank you so much for your service to the State of Alaska.

Respectfully,

Cathie Roemmich, CEO
Juneau Chamber of Commerce

CS FOR SENATE BILL NO. 26(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR MCGUIRE

A BILL

FOR AN ACT ENTITLED

"An Act setting special registration fees for alternative fuel vehicles; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 28.10.421 is amended by adding a new subsection to read:

(j) Instead of the otherwise appropriate biennial registration fee under (b) or (c) of this section, a $20 biennial registration fee is imposed on a qualified alternative fuel vehicle normally subject to a registration fee under (b) or (c) of this section. Instead of the otherwise appropriate annual registration fee under (h) of this section, a $10 annual registration fee is imposed on a qualified alternative fuel vehicle normally subject to a registration fee under (h) of this section. To be qualified under this subsection, an alternative fuel vehicle

(1) must be manufactured primarily for use on public streets, roads, and highways;

(2) may not have been modified from the original manufacturer

specifications;

(3) must be capable of achieving a speed of at least 55 miles an hour;

(4) must be a model year of 2010 or newer;

(5) must be fueled or powered

(A) solely by

(i) compressed natural gas;

(ii) liquefied natural gas;

(iii) liquefied petroleum gas;

(iv) hydrogen;

(v) a liquid at least 85 percent of the total volume of which consists of ethanol; or

(vi) electricity but only if the vehicle is powered by a motor that draws the electricity from a battery that has a capacity of at least four kilowatt-hours and is capable of being recharged from an external source of electricity; or

(B) by an engine capable of running on two fuels or power sources, one of which is gasoline or diesel and one of which is compressed natural gas, liquefied natural gas, liquefied petroleum gas, hydrogen, or electricity;

(6) must meet other requirements set by the department by regulation.

* **Sec. 2.** AS 28.10.421(j)(5)(B) is repealed December 31, 2015.

* **Sec. 3.** AS 28.10.421(j) is repealed December 31, 2019.

* **Sec. 4.** This Act takes effect January 1, 2012.

Senator Lesil McGuire

Sponsor Statement for Senate Bill 26

"An Act exempting vehicles fueled solely by electric drive or compressed natural gas from motor vehicle registration fees and taxes; and providing for an effective date."

Senate Bill 26 is a progressive approach in presenting incentives to the public for utilizing vehicles which employ the new technology of electricity or compressed natural gas. Other benefits of this bill include helping air quality and the potential for job increases with the new technology of products.

The automotive industry has been undergoing a significant transformation by moving toward the electrification of the automobile. Providing incentives would encourage many stakeholders and consumers to move forward with necessary changes, accelerate the deployment of second and third generations of the technology and achieve economies of scale more quickly, all leading to reductions in the cost of this new technology.

The availability of plug-in electric vehicles will be expanding and we need to prepare Alaska to be the "First Frontier" for this advanced technology and this bill readily supports its introduction.

Many states are already putting various types of incentives in place to make sure they attract these sorts of vehicles which drives new investment, development of new skills, while displacing petroleum and reducing local vehicle emissions.

This bill also includes CNG vehicles which will also displace petroleum and reduce emissions. These vehicles will assist Alaska in diversifying its energy requirements, which will reduce our risks from any potential shocks to the State's oil supply. In addition, supporting the sale of CNG vehicles will lower operating costs for consumers of these vehicles, many of which are struggling businesses still trying to recover from the local economy.

This bill shows that Alaska welcomes advanced technology and is getting itself "Plug-in Ready."

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR MCGUIRE

A BILL

FOR AN ACT ENTITLED

"An Act exempting vehicles fueled solely by alternative fuels from motor vehicle registration fees and taxes; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 28.10.411 is amended by adding a new subsection to read:

(g) A qualified alternative fuel motor vehicle is exempt from the registration fee required under this section and under AS 28.10.421. To be qualified under this section, an alternative fuel motor vehicle

(1) must be manufactured primarily for use on public streets, roads, and highways;

(2) may not have been modified from the original manufacturer specifications;

(3) must be capable of achieving a speed of at least 55 miles an hour;

(4) must be acquired from the manufacturer on or after October 1, 2010;

(5) must be fueled solely by

(A) compressed natural gas;

(B) liquefied natural gas;

(C) liquefied petroleum gas;

(D) hydrogen;

(E) a liquid at least 85 percent of the total volume of which consists of ethanol; or

(F) electricity but only if the vehicle is powered by a motor that draws the electricity from a battery that has a capacity of at least four kilowatt-hours and is capable of being recharged from an external source of electricity;

(6) must meet other requirements set by the department by regulation.

*** Sec. 2.** This Act takes effect immediately under AS 01.10.070(c).

Changes made from original SB 26 into CS

In the title:

Vehicles fueled solely by electricity or compressed natural gas

is changed to:

Vehicles fueled solely by alternative fuels

Added language starting on page 8 stating that a vehicle

1.) **Must be manufactured primarily for use on public roads**
2.) **May not have been modified from the original manufacturer**
3.) **Must be capable of achieving speed of at least 55mph**
4.) **Must be acquired from the manufacturer on or after October 1, 2010**

And on page 2; defining the fuel source as either

A) **Compressed natural gas**
B) **Liquefied natural gas**
C) **Liquefied petroleum gas**
D) **Hydrogen**
E) **A liquid at least 85 percent of the total volume of which consists of ethanol**
F) **Electricity—of at least 4 kilowatt hours and is capable of being recharged from an external source of electricity**

And must meet other requirements set by the department by regulation

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 26

Analysis

Expenditures: The database for Division of Motor Vehicles (DMV) does not currently distinguish fuel types for vehicles, so programming will need to be done to accomplish this.
Estimated hours: 140
Cost per hour: $143
Total programming cost: 140 x 143 = $20,020.

Revenues: Since DMV has not captured vehicles by fuel types, the impact on revenues cannot be accurately determined at this time. The initial reduction in revenues should be small, but as vehicles fueled by electricity and natural gas gain popularity, there will be a proportionate decrease in revenues .

If the bill includes an exemption for motor vehicle registration as well as registration fees, there will be a reduction in amounts collected and disbursed to communities through the Motor Vehicle Registration Tax program AS 28.10.431.

Performance Measures: DMV does not expect this bill to have any impact on its performance measures.

Economic Impact: This bill may possibily spur the sale of vehicles powered by electricity and natural gas.

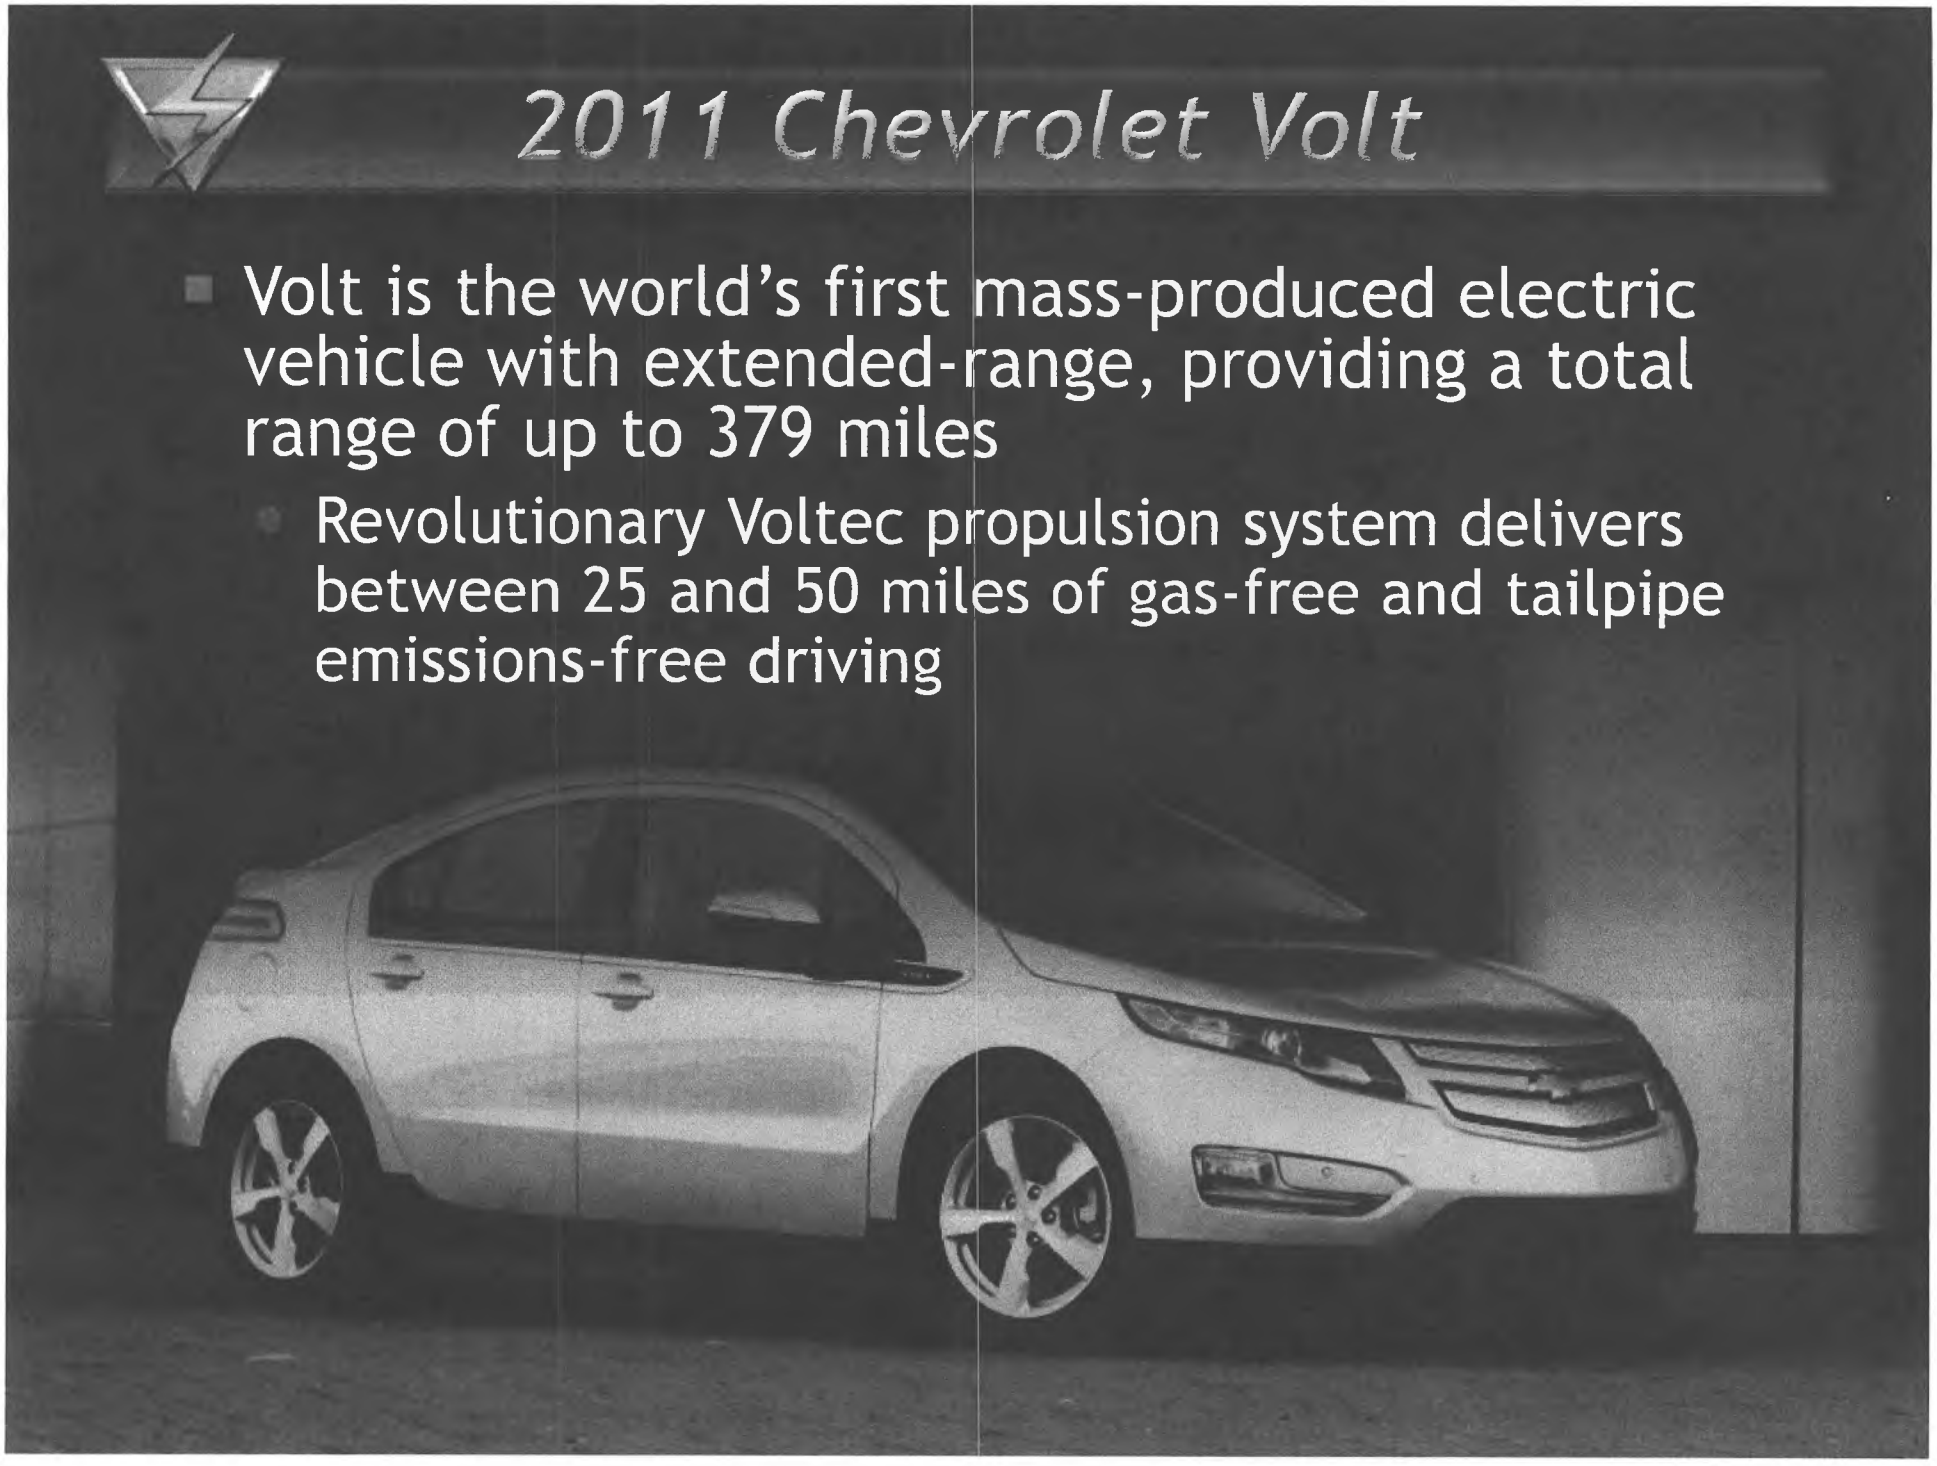
2011 Chevrolet Volt

- Volt is the world's first mass-produced electric vehicle with extended-range, providing a total range of up to 379 miles
  - Revolutionary Voltec propulsion system delivers between 25 and 50 miles of gas-free and tailpipe emissions-free driving



Volt Basics

- 2011 Volt was launched in December of 2010
- Nation wide within 12-18 months from launch
- An electric vehicle with extended-range capability
- Powered by a 16kWh lithium-ion battery pack
- Fully charged battery will provide 25-50 miles of gas-free and tailpipe emissions free driving (85% of drivers commute less than 50 miles per day)
- Extended range is achieved via an on-board gas generator which keeps the battery pack at its minimum required state of charge
- 120V charging (Standard)
  - Plugs into standard household outlet
  - Full charge 10 hours
- 240V charging
  - Full charge 4 hours
  - Enables more opportunity to drive electrically

Alaska Vehicle Market Specifics

AEL&P to offer experimental discounts to electric car users

Monday, December 20, 2010

Story last updated at 12/20/2010 - 10:42 am

AEL&P to offer experimental discounts to electric car users
By Pat Forgey | JUNEAU EMPIRE

There may not be any all-electric cars in Juneau yet, but the city's electric utility wants to be ready for them if they come.

"Juneau is an ideal location for an electric vehicle," said Gayle Wood, spokesperson for Alaska Electric Light & Power, which filed this week for a special electric vehicle power rate with the Regulatory Commission of Alaska.

AEL&P is proposing an experimental rate for up to six years in which off-peak power cost would be billed at a special rate, currently 5.62 cents per kilowatt-hour, and at 11.56 cents per kwh at other times. Off-peak hours are 10 p.m. to 7 a.m., according to the utilit's RCA filing.

What makes Juneau ideal for electric vehicles, Wood said, is that the cars' limited driving range would not be much of an issue with Juneau's limited road system.

"You just can't get too far away" from a charging station, she said.

Juneau currently doesn't have any charging stations, but Wood said AEL&P's proposal would also offer an incentive of $1,000 to help up to 10 experimental customers insteal electric vehicle charging stations, with separate meters.

In exchange, AEL&P would get data on vehicle use. The reimbursement would take place a year into the program, after the customer filled out their first annual survey form about electric vehicle usage.

Wood said she did not know of any all-electric vehicles in Juneau at this time.

"That's not to say that I haven't seen a few unusual looking cars in town that are probably electric," she said.

The rate would apply to either all-electric vehicles, or hybrids that can be plugged in.

Wood said even at gasoline prices as low as $2.50 a gallon, at AEL&P's off-peak rate, electric vehicles can operate at a quarter of that cost per mile.

AEL&P has adequate low-cost hydroelectric power available to meet load growth that might occur

from electric vehicles, which can benefit the environment by reducing use of gasoline and diesel, she said.

It could help the utility by providing off-peak demand for power, with the experimental program providing data on which the base future such programs.

AEL&P has asked the RCA to begin the program by Jan. 10, 2011 and it will be available until Jan. 10, 2012, or until 10 customers have signed up, she said.

The offer is open only to vehciles licensed to operate on public roads, rated to 40 miles on one charge. Motorcycle-type vehicles are not eligible.

The new rate may help spur electric vehicle use, she said, which could have economic and environmental benefits.

AEL&P is planning on installing a charging station at its Lemon Creek headquarters, and others may be coming as well, such as at businesses or city parking structures.

Wood likened the move to electric vehicles to the move from the horse-and-buggy travel to the automobile.

"It was an issue then, when people wanted to know 'where's my fuel supply?' and obviously that became less of an issue over time," she said.

SENATOR BILL WIELECHOWSKI

SB 29: Evaluating Tax Credits
SPONSOR STATEMENT

"Taxpayers deserve accountability."
-Byron Dorgan, former US Senator and Representative from North Dakota

Government programs are either funded by direct spending or indirectly through tax credits and other indirect expenditures. Direct spending is subject to annual review by the legislature with agencies and other recipients coming forward to justify their requests. This legislative oversight is vital to government efficiency and controlling government spending.

In contrast, Alaska "spends" about a billion dollars each year on tax credits, exemptions and other indirect expenditures without annually evaluating their impact. Although tax credits and other indirect expenditures are used by the legislature to accomplish specific policy goals, they are not subject to the same scrutiny as other operating and capital budget items and are not regularly evaluated for their effectiveness. Indirect tax expenditures include tax deductions, credits, exclusions, exemptions, deferrals, or other losses of state or local tax revenue due to statute.

Senate Bill 29 would help rectify this problem by increasing accountability and government review. This bill would require the Department of Revenue to regularly analyze tax expenditures and provide their analysis to the legislature and the public. The intent is to enable legislators to make more informed decisions about the efficacy of tax expenditures. Only nine states fail to publish a tax expenditure report: Alaska is one.

I ask that you support SB 29 to ensure that Alaska gets its money's worth for the close to one billion dollars a year it indirectly spends on tax credits and other indirect expenditures.

MEMORANDUM February 28, 2012

SUBJECT: Sectional summary of SB 29 (Work Order No. 27-LS0305\A)

TO: Senator Bill Wielechowski
Attn: Sam Gottstein

FROM: Lisa Moritz Kirsch
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill -- the bill itself is the best statement of its contents.

Section 1 adds a requirement that the governor consider the tax expenditure report prepared under section 3 of this bill before preparing the state budget.

Section 2 requires that the governor's fiscal plan address any issues raised in the tax expenditure report prepared under section 3 of this bill.

Section 3 requires that the Department of Revenue prepare a report that analyzes tax revenue losses due to tax expenditures.

Section 4 lists the data and analysis a tax expenditure report must include; requires electronic transmittal of the report to members of the legislature and posting on the Department of Revenue website; and defines "tax expenditure."

Section 5 provides an effective date of July 1, 2013.

Department of Revenue

(Revised 1/17/2012 OMB)

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 29

Analysis

Bill Language:
This bill would require the Department of Revenue to annually prepare and publish a report of tax expenditures. "Tax expenditures" are defined in this bill to be any of the following: tax deduction, tax credit, exclusion, exemption, deferral, or other loss of state and local tax revenue due to either an express provision of state tax law or resulting from the overall operation of state tax law. The bill would require the Department to identify the statutory authority for the expenditure, calculate the total amount of the tax expenditure and number of taxpayers who claimed the expenditure in the prior fiscal year, and forecast the amount of each tax expenditure claimed by all taxpayers for the current fiscal year. In addition the Department would be required to use this information to determine the public and private costs of administering the expenditure, whether each statute authorizing a tax expenditure achieved its purpose, whether each statute authorizing the expenditure is the most fiscally effective means of achieving its intended purpose, and then recommend either the support of repeal or extension of the authorizing statute.

The effective date of the bill is July 1, 2013.

Revenues:
This bill does not affect state tax revenues.

Expenditures:
This bill would require the Department of Revenue to analyze each and every tax expenditure claimed by every taxpayer in every tax type administered by the Department. The Department currently administers 22 tax programs. Compiling this report annually would be a major undertaking and would require significant staff resources.

The Department would need to compile tax expenditure information manually. We receive over 15,000 tax returns each year. We estimate that eight full-time tax technician positions would be required to compile, aggregate, and categorize all tax expenditures for all taxpayers in all tax types.

Four full-time auditor positions (2 Oil & Gas Revenue Auditor III positions, 1 Corporate Income Tax Auditor III position, and 1 Tax Auditor IV position) would be required to conduct the research to identify the statutory authority and legislative intent of each statute. Since most legislation does not contain intent language, the Department would be required to scan through all hearing minutes to determine intent.

Four full-time economist positions (2 petroleum economist positions and 2 Economists III positions) would be required to determine the public and private costs of administering the tax expenditure, whether the Department of Revenue believes the statute authorizing each expenditure meets its intent, whether each statute authorizing a tax expenditure provides the most fiscally effective means of achieving that intent, and whether it results in a fair and equitable distribution of tax burden on taxpayers.

The costs for this bill include the payroll and benefits costs for the 16 new full-time positions, the interagency costs associated with these positions, the travel costs for these positions, and the computer and office supply costs. It is assumed that half of these positions would be in Juneau and half would be in Anchorage.

Why this fiscal note differs from previous version (if initial version, please note as such)

Initial Version for Legislative Finance. This bill has been revised so that the Dept. of Revenue provides Tax Expenditure Reports to Legislative Finance, which would prepare reports addressing whether tax expenditures achieved their purpose.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 29

Analysis

This bill would require the Department of Revenue to annually prepare and publish a report of tax expenditures. The Legislative Finance Division would work with the Department of Revenue to prepare reports regarding whether selected significant tax expenditures achieved their purpose. This review would occur on a seven-year cycle.

The effective date of the bill is July 1, 2015.

This note assumes that the Department's $34.7 million management information system will generate the required information by FY16, and that reports regarding achievement of purpose will be brief assessments of the costs of tax expenditures versus the economic impacts of the tax expenditures. The projected cost is for annual contractual services to supplement the efforts of existing staff.

CS FOR SENATE BILL NO. 29(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR WIELECHOWSKI

A BILL

FOR AN ACT ENTITLED

"An Act relating to the reporting and analysis of certain information relating to tax credits, deductions, exclusions, exemptions, deferrals, and other tax expenditures; relating to bills creating tax expenditures; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SHORT TITLE. This Act may be known as the Alaska Tax Break Transparency Act.

*** Sec. 2.** AS 24.08 is amended by adding a new section to read:

Sec. 24.08.038. Tax expenditure bills. The legislature shall include a statement of the rationale and purpose of a tax expenditure in a bill creating a tax expenditure. In this section, "tax expenditure" has the meaning given in AS 43.05.090.

*** Sec. 3.** AS 37.07.020(a) is amended to read:

(a) **After considering the revenue and tax expenditure report prepared by the Department of Revenue under AS 43.05.090, the** [THE] governor shall prepare

a budget for the succeeding fiscal year that must cover all estimated receipts, including all grants, loans, and money received from the federal government and all proposed expenditures of the state government. The budget shall be organized so that the proposed expenditures for each agency are presented separately. The budget must be accompanied by the information required under AS 37.07.050 and by the following separate bills: (1) an appropriation bill authorizing the operating and capital expenditures of the state's integrated comprehensive mental health program under AS 37.14.003(a); (2) an appropriation bill authorizing state operating expenditures other than those included in the state's integrated comprehensive mental health program; (3) an appropriation bill authorizing capital expenditures other than those included in the state's integrated comprehensive mental health program; and (4) a bill or bills covering recommendations, if any, in the budget for new or additional revenue. The budget for the succeeding fiscal year and each of the bills shall become public information on December 15 at which time the governor shall submit copies to the legislature and make copies available to the public. The bills, identical in content to the copies released on December 15, shall be delivered to the rules committee of each house before the fourth legislative day of the next regular session for introduction.

*** Sec. 4.** AS 37.07.020(b) is amended to read:

(b) In addition to the budget and bills submitted under (a) of this section, the governor shall submit a capital improvements program covering the succeeding six fiscal years. The governor shall also submit a fiscal plan with estimates of significant sources and uses of funds for the succeeding 10 fiscal years. The fiscal plan

(1) must include sufficient details to identify

(A) significant sources of funds;

(B) significant uses of funds, including lump sum projections of

(i) operating expenditures;

(ii) capital expenditures;

(iii) debt service expenditures;

(iv) fund capitalizations;

(v) appropriations of income of the Alaska permanent

fund (art. IX, sec. 15, Constitution of the State of Alaska), if any;

(2) must balance sources and uses of funds held while providing for essential state services and protecting the economic stability of the state;

(3) must include projected balances of significant funds held in separate accounts, including the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska), the public education fund (AS 14.17.300), and the Alaska capital income fund (AS 37.05.565);

(4) must set out significant assumptions used in the projections with sufficient detail to enable the legislature to rely on the fiscal plan in understanding, evaluating, and resolving issues of state budgeting, including information that supports major areas of operating increases, such as population demographics that affect the need for particular government services**;**

(5) must consider issues raised by the revenue and tax expenditure report prepared by the Department of Revenue under AS 43.05.090.

*** Sec. 5.** AS 43.05.090 is amended to read:

Sec. 43.05.090. Preparation and publication of reports and statistics. The department shall prepare and annually publish statistics of the revenues derived under the tax laws administered by it**, including an analysis of tax revenue losses due to tax expenditures**.

*** Sec. 6.** AS 43.05.090 is amended by adding new subsections to read:

(b) The revenue and tax expenditure report must include

(1) the statutory authority for each type of tax expenditure;

(2) the annual sum of tax expenditures for the prior fiscal year, separately calculated for each type of expenditure, and the total number of taxpayers who benefitted from each type of expenditure;

(3) an estimate of tax expenditures for the current fiscal year, separately calculated for each type of expenditure;

(4) an estimate of the public costs of administering the tax expenditures.

(c) If the sum of tax expenditures of a specific type exceeds $1,000,000 in a fiscal year, the department shall analyze the use of the tax expenditure on the

following schedule to determine whether the statute authorizing the tax expenditure has achieved its purpose:

(1) tax expenditures existing on July 1, 2015, shall be analyzed once between July 1, 2015, and June 30, 2020, and before a delayed repeal of a tax expenditure;

(2) a tax expenditure created after July 1, 2015, shall be analyzed after it has been in effect for seven years or, if the statute authorizing the expenditure has a delayed repeal date, one year before the effective date of the delayed repeal of the tax expenditure.

(d) The department shall annually transmit an electronic copy of the revenue and tax expenditure report to each member of the legislature and make the report available to the public on the department's Internet website.

(e) In this section, "tax expenditure" means a tax deduction, tax credit, exclusion, exemption, or other loss of state tax revenue due to either an express provision of state tax law or resulting from the overall operation of state tax law; "tax expenditure" does not include federal tax expenditures under federal law adopted by reference in AS 43.20.021.

* **Sec. 7.** This Act takes effect July 1, 2015.

Alaska Program Scoring Notes

Alaska's Clear and Equitable Share/ Oil and Gas Production Tax Credits

Program Information: http://www.dog.dnr.state.ak.us/oil/programs/incentives/incentives.htm

There is no online recipient disclosure for this program.

Commercial Fishing Revolving Loan Program

Program Information: http://www.dced.state.ak.us/investments/tvpgi.cfml

There is no online recipient disclosure for this program.

Development Finance Program

Program Information: http://www.aidea.org/programsdevfin.html

Online Disclosure: http://www.aidea.org/projects.html

Detailed disclosure can be found by clicking on hyperlinks to project fact sheets. Points are awarded for inclusion of both the amount of subsidy disbursed and approved, and actual job creation figures.

Film Industry Tax Credit

Program Information: http://www.film.alaska.gov/incentive-program.htm

Online Disclosure: http://www.film.alaska.gov/pdf/2010-Report-to-Legislature-Final.pdf

Alaska earned points for disclosing both the amount approved (labeled in the document as "pre-qualified") and the actual amounts utilized.

Tax Credits	Applicable Tax Type	> $1 million
Exploration incentive credit	Oil & Gas Production	Yes
Qualified capital expenditure credit	Oil & Gas Production	Yes
Carried forward annual loss credit	Oil & Gas Production	Yes
Small producer/new area development credit	Oil & Gas Production	Yes
Transitional investment expenditure credit	Oil & Gas Production	Yes
Alternative credit for exploration	Oil & Gas Production	Yes
Cook Inlet jack-up rig credit	Oil & Gas Production	Yes
Property taxes paid to municipalities on oil and gas property	Oil & Gas Property Tax	Yes
Gas exploration and development credit	Corporate Income Tax	Yes
Gas storage facility credit	Corporate Income Tax	Yes
Film production tax credit	Corporate Income Tax	Yes
Minerals exploration incentive credit	Corp, Mining, Royalty	Yes
Education tax credit	Corp, Mining, Fish, Oil & Gas Production & Property	
Winn Brindle memorial education credit	Fishery	No
Salmon product development credit	Fishery	Yes
Community development quota credit	Fishery	No
Other taxes credit	Fishery	No
Timely filing credit	Motor Fuel Tax	No
Tax remittance credit	Tire Fee	No
Cigarette tax stamp discount	Cigarette Tax	Yes
Tax remittance credit	Other tobacco products tax	No

Tax Exemptions		
Reduced rate of tax for small breweries	Alcoholic Beverage	Yes
Credit for port taxes paid to Juneau & Ketchikan	Commerical Passenger Vessel	Yes
S-Corporations	Corporate Income Tax	Yes
New mining operations exempt for 3.5 years	Mining license tax	Yes
First $40,000 in net income	Mining license tax	?
Fuel used for heating	Motor Fuel Tax	Yes
Fuel used in foreign flights	Motor Fuel Tax	Yes
Fuel used by charitiable institutions	Motor Fuel Tax	No
Bunker fuel	Motor Fuel Tax	No
Oil and gas produced for use on a lease or property for drilling, production, or repressuring	Oil & Gas Production	Yes
Oil and gas reserves	Oil & Gas Property Tax	Yes
Oil and gas leases	Oil & Gas Property Tax	Yes
Intangible drilling and exploration expenditures	Oil & Gas Property Tax	Yes
Oil and gas pipeline transportation systems owned by a public utility	Oil & Gas Property Tax	Yes
Salmon harvested under a special harvest area permit	Salmon Enhancement Tax & Seafood Development Tax	No
Processors and fishermen who produce less than $50,000 worth of seafood products	Seafood Marketing Assessment	No

Trucks with gross vehicle weight greater than 8,500 pounds	Vehicle Rental Tax	?

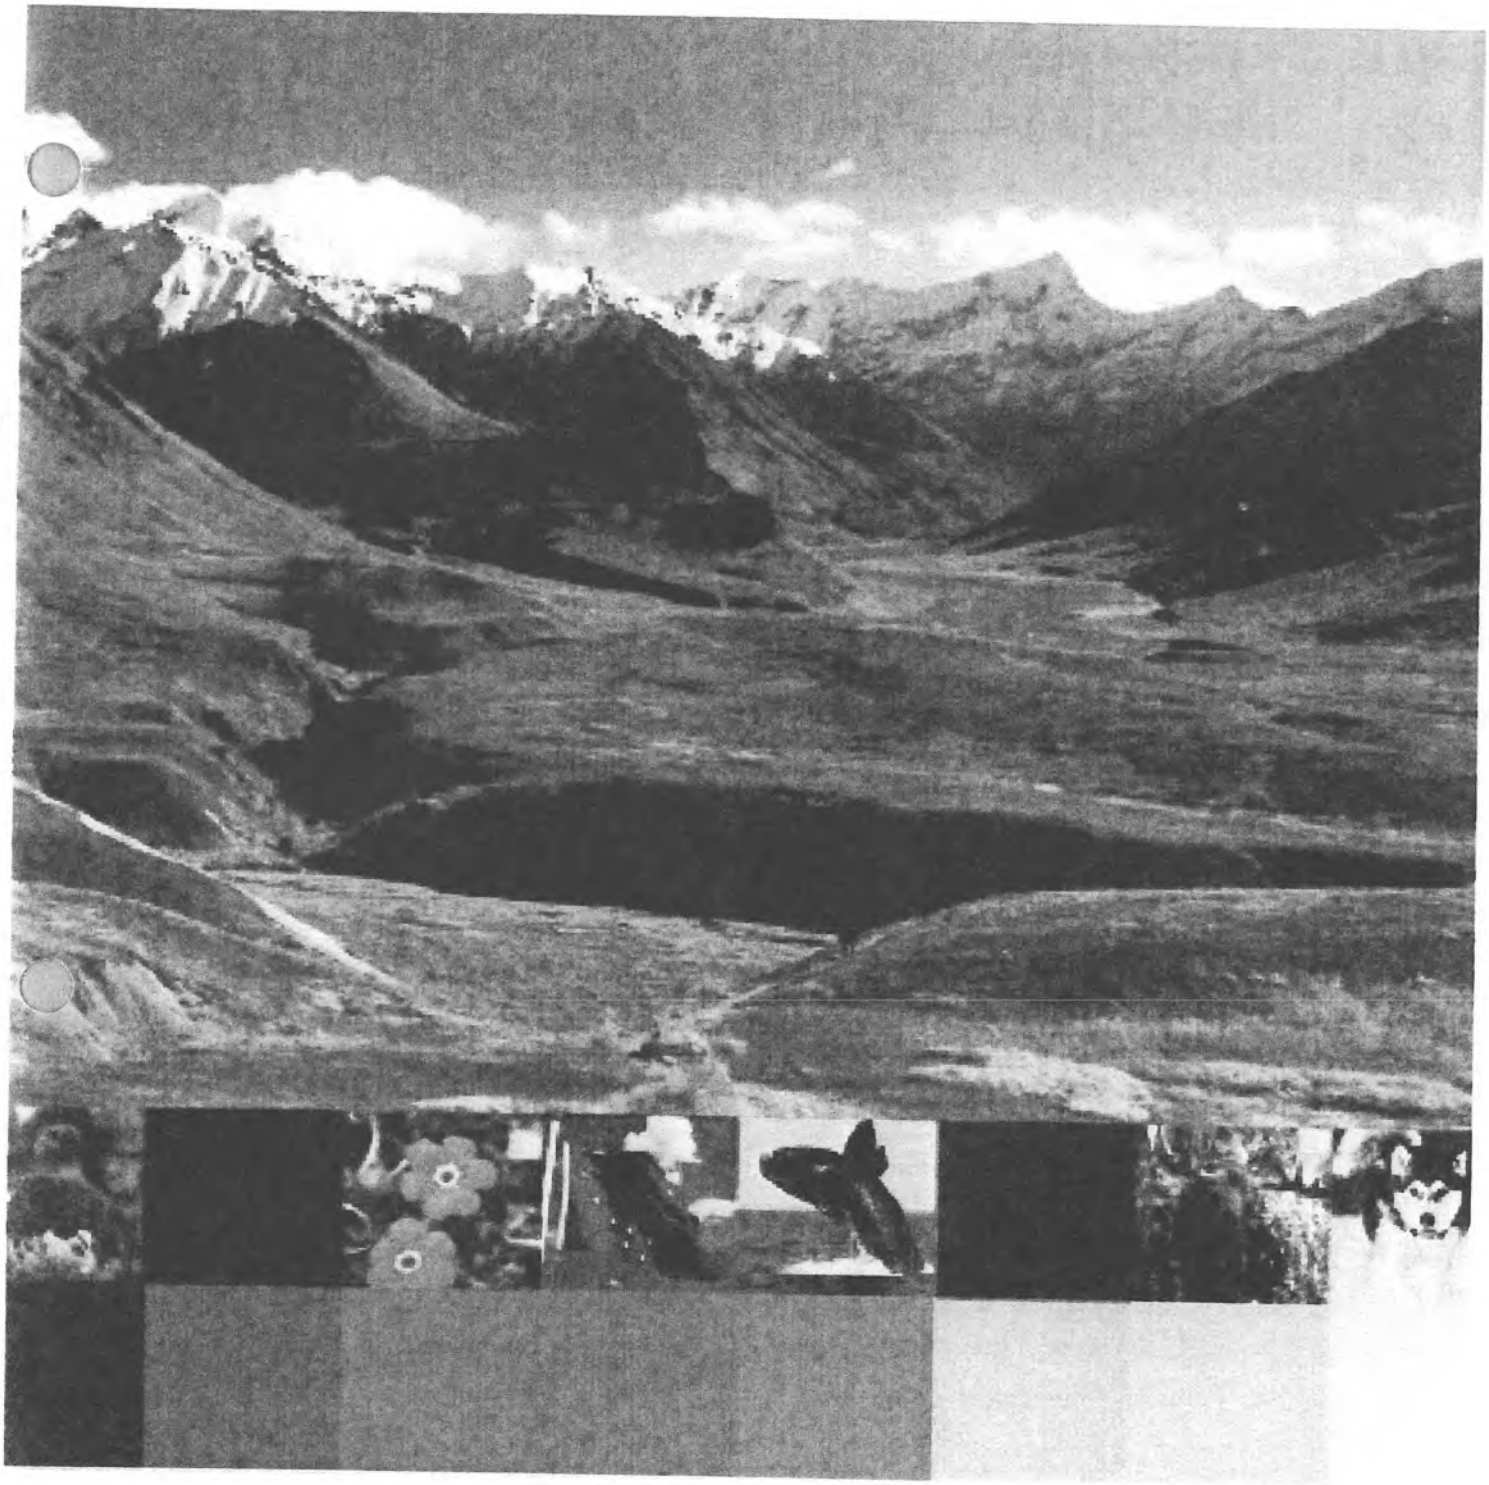
Rental trucks to move personal property	Vehicle Rental Tax	?
Vehicle rented while warranty work is done on private vehicle	Vehicle Rental Tax	?
Estates valued under $1.5 million	Estate Tax	?
Interest earned on federal govt. bonds	Corporate Income Tax	Yes

Tax Deferrals

I need to still research this. There could be a few.



FALL 2010

REVENUE SOURCES BOOK

STATE OF ALASKA
TAX DIVISION
DEPARTMENT OF REVENUE

3. The Role of Credits in Public Policy

Overview of Credits

Tax credits are a critical component of the state's overall tax structure. Tax credits are intended to encourage businesses to invest in various activities in the state such as oil and gas exploration and development, education, and film production. They are also used to implement public policy. This chapter provides an overview of the role that tax credits play in the state's tax system. Also presented is a complete listing of the tax credits currently available under state tax law and the amount of credits that have been granted in each of the past three years.

Sound tax policy involves moving beyond the "collection" of taxes into understanding the business perspective of the state's taxpayers, including what stimulates additional investment or brings new entrants into Alaska markets. The Tax Division regularly seeks input from taxpayers, legislators, the administration, and the public to gauge the impact of current and proposed tax policy on different industries. The Tax Division works toward developing collaborative relationships with taxpayers and staying informed in order to respond to the changing needs of the various industries in Alaska. The division regularly monitors the impact of the state's tax systems on industry as well as on the state budget. The division also conducts research on potential broad-based taxes such as sales and income taxes, and makes recommendations to the administration and the legislature on how a proposed tax might be structured and implemented. Officials with the division actively participate in discussions about tax effectiveness as well as decisions to suspend or lower taxes, which has happened with the motor fuel tax and the recently amended cruise ship taxes.

Although tax policy does not drive all business decisions, the state's tax structure, including incentives like tax credits, are integral to making decisions. The proper balance between taxes and incentives may enhance the economic viability of projects and influence the plans of Alaska businesses. Incentives can take many forms, including credits that can be directly applied against tax liabilities. Tax credits are among the most common methods of incentivizing business activity.

The Tax Division also understands the value of information regarding world markets. Since the state is competing globally for market dollars, understanding the impacts of changing world economies provides insight into refinements that may help keep the state's fiscal systems competitive.

The Tax Division stays informed about the state's industries in a variety of ways. In addition to continuously analyzing data reported by taxpayers, the division subscribes to various publications and organizations that are industry specific. The economic research group monitors oil, gas and mining activity throughout the world through daily, weekly and monthly publications. The division also stays current on state and local issues by attending industry events, such as the recent forum on offshore drilling and development sponsored by the Department of Interior, Bureau of Ocean Energy Management, held in Anchor-

age, meeting with other state agencies, and working and communicating with organizations like the Alaska Oil and Gas Association, the Resource Development Council for Alaska, Commonwealth North, and the Alaska Seafood Marketing Institute. State officials have had the opportunity to tour domestic and international industry facilities and learn about their operations through presentations and discussions. These activities are considered a fundamental part of the job of taxing and regulating industries in the state.

The Tax Division currently administers 21 different tax programs along with 16 tax credit programs. Most of the tax credit programs encourage spending and give tax credit for specific items or services designated by the program. A credit may be applicable to one tax type only, or it may be applicable to one of several tax types. The Education Tax Credit, for example, provides taxpayers credit for contributions to Alaska-based vocational education programs, accredited universities or colleges, or to the Alaska Fire Standards Council. A taxpayer is limited in the amount of credit they may receive, but the credit may be applied to any of the following tax types: the Alaska Corporate Income Tax, the Fisheries Business Tax, the Fishery Resource Landing Tax, the Insurance Premium Tax, the Mining License Tax, the Oil and Gas Production Tax, or the Oil and Gas Property Tax.

Some credit programs are very specific in how credits are earned and to which tax programs they apply. An example of such a credit is the new Oil and Gas Production Tax credit for exploration expenditures related to the first three wells drilled by the first jack-up rig in Cook Inlet. This credit may be applied against a production tax liability, transferred, or purchased by the state up to maximum dollar amounts specified in statute. If these exploration projects result in sustained production of oil or gas, then 50 percent of the amount of the credit received shall be repaid to the state over a 10-year period. The repayment provisions for this credit are unique. There are however, other credits that require that the benefit of any tax credit be incorporated in calculating, for example, a tariff for a pipeline or other asset that is regulated by the Federal Energy Regulatory Commission (FERC) or the Regulatory Commission of Alaska (RCA).

Most credit programs limit the dollar amount of credit available or only allow a certain percentage of expenditures to be the basis for the credit. Some credit programs have expiration dates and some programs have already expired, even though the credits themselves may be carried forward indefinitely. Some credits are transferable and some are redeemable for cash from the state treasury. Each credit program has its own rules and applications, tailored to the needs of the taxpayers under each program or to incentivize certain behaviors. We describe each individual tax credit program, categorized by tax type, in detail below.

Credits Applicable to the Oil and Gas Production Tax

Exploration Incentive Credit

Statutory Reference: AS 38.05.180(i)

Year of Implementation: 1978

Credit Applied to: Production tax, royalty

Transferability: Not transferable

Expiration Date: None

The exploration incentive credit authorized at AS 38.05.180(i) is among the earliest of oil and gas tax credits to be written into Alaska law. Implemented in 1978, this credit, which is available against either royalties or production tax, is included as a term of an oil and gas lease. Credit is earned for exploratory drilling on state land, and is based on the region where the drilling takes place and the depth of the well. Credit may also be received for geophysical work that is done two seasons immediately preceding an announced lease sale for the area where the work is performed. Maximum credit is 50 percent of the costs of the drilling or the geophysical work, not to exceed 50 percent of the tax or royalty obligation to which it is applied.

Department of Natural Resources records indicate that the last reported credit used under this program was in 1994. The department reports no activity in the program since that date.

Qualified Capital Expenditure Credit

Statutory Reference: AS 43.55.023(a) and (l)

Year of Implementation: .023(a) – 2006; .023(l) – 2010

Credit Applied to: Production Tax

Transferability: Transferable

Expiration Date: None

The qualified capital expenditure credit was passed as part of the Petroleum Profits Tax (PPT) in 2006, and was retained in the ACES tax and

expanded during the 2010 legislative session. The original credit under AS 43.55.023(a) provides a 20% credit for qualified capital expenditures for oil and gas operations. The credits can be applied against production tax liabilities, transferred to another company or purchased by the state.

In 2010, the legislature passed AS 43.55.023(l), which allows credit of 40 percent of qualified well lease expenditures incurred south of 68 degrees North latitude for oil or gas operations. These credits can be applied against production tax liabilities, transferred to another company or purchased by the state.

Carried-Forward Annual Loss Credit

Statutory Reference: AS 43.55.023(b)

Year of Implementation: 2006

Credit Applied to: Production Tax

Transferability: Transferable

Expiration Date: None

The credit for a carried-forward annual loss was part of the Petroleum Profits Tax passed in 2006. The percentage of allowable credit was increased by ACES from 20 percent to 25 percent. Like the qualified capital expenditure credit, carried-forward loss credits do not expire and may be transferred or purchased by the state, or applied to production tax liabilities.

Small Producer / New Area Development Credit

Statutory Reference: AS 43.55.024

Year of Implementation: 2006

Credit Applied to: Production Tax

Transferability: Not Transferable

Expiration Date: December 31, 2016 or ninth calendar year after producer first has oil or gas produced before May 1, 2016

With the passage of the Petroleum Profits Tax in 2006 came two credits under AS 43.55.024. One is a credit for up to $12 million for companies producing less than 100,000 barrels of oil equivalent per day anywhere in the state. The other is a credit for up to $6 million for companies producing less than 100,000 barrels of oil equivalent in areas other than the North Slope and Cook Inlet. These credits may only be used against production tax liabilities; they are not transferable and cannot be carried forward.

Alternative Credit for Exploration

Statutory Reference: AS 43.55.025(a)(1) – (4)

Year of Implementation: 2003

Credit Applied to: Production Tax

Transferability: Transferable

Expiration Date: Work must be performed before July 1, 2016

The Alternative Credit for Exploration, also called the "Exploration Incentive Credit," was implemented in 2003. It originally provided a credit of 20 or 30 percent for certain expenditures for oil and gas exploration. To further incentivize exploration activity, the ACES legislation increased the credit under the Alternative Credit for Exploration to 30 or 40 percent of eligible exploration expenditures.

Credits issued under this program may be applied against tax liabilities, transferred, or purchased by the state.

Cook Inlet Jack-Up Rig Credit

Statutory Reference: AS 43.55.025(a)(5) and (l)

Year of Implementation: 2010

Credit Applied to: Production Tax

Transferability: Transferable

Expiration Date: Work must be performed before July 1, 2016

AS 43.55.025(a)(5) was passed by the legislature in 2010 to incentivize investment in a jack-up rig for use in Cook Inlet. The credit is available to the first three unaffiliated persons that drill an offshore exploration well for oil or gas in Cook Inlet. Credit under this program will be granted for the lesser of 100 percent of exploration expenditures or $25 million to the first person who drills a qualifying well under the program. Credit for the lesser of 90 percent of exploration expenditures or $22.5 million is available to the second person, and credit for the lesser of 80 percent of exploration expenditures or $20 million is available to the third person who drills a qualifying well under the program.

Credit under this program may be granted in the form of a cash reimbursement from the state or it may be applied against tax liabilities. If the drilling under this program results in sustained production of oil or gas, 50

percent of the amount of the credit received shall be repaid to the state over a 10-year period.

Credits Applicable to the Corporate Income Tax

Internal Revenue Code Credits Adopted by Reference

Statutory Reference: AS 43.20.021

Year of Implementation: 1975

Credit Applied to: Corporate Income Tax

Transferability: Not transferable

Expiration Date: None

AS 43.20.021 adopts the Internal Revenue Code (IRC) for Alaska state corporate income tax liabilities, except where modified by provisions of state statute. The Internal Revenue Code authorizes tax credits, and by adopting the IRC, the state also authorizes those tax credits. Generally where a credit is allowed under the IRC, Alaska law limits its application to state corporate income tax to 18 percent of the credit amount apportioned to Alaska. The number and details of credit programs under the IRC are too voluminous to report here.

Gas Exploration and Development Credit

Statutory Reference: AS 43.20.043

Year of Implementation: 2003

Credit Applied to: Corporate Income Tax

Transferability: Not transferable

Expiration Date: January 1, 2016

This credit was enacted in 2003, but the credit program was expanded and extended in 2010. Credit under this program, which is applicable against the Alaska oil and gas corporate income tax, may be earned through exploratory gas drilling in areas of the state south of 68 degrees North latitude. Beginning in 2010, credit of 25 percent of qualified capital investments and 25 percent of annual costs incurred for qualified services are eligible for credit, not to exceed 75 percent of a company's corporate income tax liability before the application of other tax credits. Credits under this program may be carried forward for up to 5 years.

Gas Storage Facility Credit

Statutory Reference: AS 43.20.046

Year of Implementation: 2010

Credit Applied to: Corporate Income Tax

Transferability: Not transferable

Expiration Date: January 1, 2016

The legislature enacted this credit in 2010 to encourage the commercial operation of gas storage facilities by allowing a credit against the state corporate income tax in the amount of $1.50 for each 1,000 cubic feet of qualified, certified working gas storage capacity. The total amount of credit for a single gas storage facility may not exceed the lesser of $15 million or 25% of the costs incurred to establish the facility. This tax credit may be applied in addition to any of the other corporate income tax credits available to taxpayers and it may be refunded by the state.

Film Production Credit

Statutory Reference: AS 43.98.030

Year of Implementation: 2008

Credit Applied to: Corporate Income Tax

Transferability: Transferable

Expiration Date: The earlier of July 1, 2013 or the date that an aggregated total of $100 million in credits have been issued

The Film Production Credit is a credit available to companies that produce films in Alaska and spend at least $100,000 in eligible expenditures in a 24-month period. Credit against the state's corporate income tax is allowed in varying percentages for eligible film production expenditures, starting with a base credit rate of 30 percent of expenditures. An additional 10 percent credit is available for wages paid to Alaska residents; an additional 2 percent credit is available for expenditures made in a rural area; and an additional 2 percent credit is available for expenditures made in the state between October 1 and March 30. The credit program has a maximum budget of $100 million and expires upon exhausting the budget or July 1, 2013, whichever is earlier.

Credits Applicable to Multiple Tax Programs

Education Tax Credit

Statutory Reference: AS 21.89.070; AS 21.89.075; AS 43.20.014; AS 43.55.019; AS 43.56.018; AS 43.65.018; AS 43.75.018; AS 43.77.045

Year of Implementation: 1987

Credit Applied to: Corporate Income Tax, Production Tax, Property Tax, Mining License Tax, Fisheries Business Tax, Fishery Resource Landing Tax, Insurance Premium Tax

Transferability: Not Transferable

Expiration Date: None, although current rates of credit change on January 1, 2014

The Education Tax Credit allows credit for contributions for programs or facilities made to accredited Alaska universities or colleges and vocational educational programs, or, under AS 21.89.075, to the Alaska Fire Standards Council. Credit is allowed at the rate of 50% of the first $100,000 and 100% of the second $100,000 in contributions made to a qualifying institution. Credits received by any taxpayer may not exceed $150,000 annually across all eligible tax types. Beginning January 1, 2011, credit is available at the rate of up to 50 percent of annual contributions up to $100,000, 100 percent of the next $200,000 in contributions, and 50 percent of contributions higher than $300,000 annually. Credits received by any taxpayer may not exceed $5 million annually across all eligible tax types. On January 1, 2014, the maximum credit allowed reverts back to the limit set prior to January 1, 2011 or $150,000.

Minerals Exploration Incentive Credit

Statutory Reference: AS 27.30.030; AS 43.20.044

Year of Implementation: 1995

Credit Applied to: Corporate Income Tax, Mining License Tax, Mining Royalty

Transferability: Not Transferable

Expiration Date: None

The Minerals Exploration Incentive Credit is available to companies for expenditures on exploration activities such as surveying, drilling exploration wells, surface trenching, etc. for the purpose of mineral development in the state. The credit pays 100 percent of allowable expenditures up to a maximum of $20 million per year. The credit is limited to: (1) for the Mining License Tax – the lesser of 50 percent of tax liability at the mining operation where the exploration occurred or 50 percent of the taxpayer's total Mining License Tax for the year; (2) for Corporate Income Tax – the lesser of 50 percent of the Mining License Tax liability at the mining operation where the exploration occurred or the total Corporate Income Tax liability; (3) for mineral royalty – 50 percent of royalty liability from the mining operation where the exploration activity occurred. The credit may be carried forward, but must be used within 15 years.

Scholarship Contributions ("Winn Brindle") Credit

Statutory Reference: AS 43.75.032, AS 43.77.035

Year of Implementation: 1986

Credit Applied to: Fisheries Business Tax, Fishery Resource Landing Tax

Transferability: Not Transferable

Expiration Date: None

Credit under this program is available for 100 percent of contributions to the A.W. "Winn" Brindle memorial education loan account established under AS 14.43.250. A taxpayer may receive credit of up to 5 percent of his/her tax liability through contributions under this program.

Credits Applicable to Fisheries Taxes

Salmon Product Development Credit

Statutory Reference: AS 43.75.035

Year of Implementation: 2003

Credit Applied to: Fisheries Business Tax

Transferability: Not Transferable

Expiration Date: Last date an item may be placed into service is December 31, 2015

The Salmon Product Development Credit is a credit available for capital expenditures made to expand value-added processing of Alaska salmon. Credit is available for 50 percent of qualified expenditures up to 50 percent of the company's tax liability for the Fisheries Business Tax. The credit may be carried forward for three years.

Community Development Quota (CDQ) Credit

Statutory Reference: AS 43.77.040

Year of Implementation: 1993

Credit Applied to: Fishery Resource Landing Tax

Transferability: Not Transferable

Expiration Date: None

The Community Development Quota (CDQ) Credit is a credit available to

fisheries taxpayers who make contributions to Alaska nonprofit corporations to be used for purposes such as scholarships and training for fisheries businesses, and facilities for fisheries transport or processing, etc. Under this program, taxpayers receive credit for 100 percent of qualified contributions up to a maximum of 45.45 percent of the taxpayer's tax liability on fishery resources harvested under a CDQ.

Other Taxes Credit

Statutory Reference: AS 43.77.030

Year of Implementation: 1993

Credit Applied to: Fishery Resource Landing Tax

Transferability: Not Transferable

Expiration Date: None

In order to avoid double taxation on fisheries resources, credit is provided to taxpayers for payments made to other jurisdictions for taxes that are equivalent in nature to the Fishery Resource Landing Tax. The maximum credit under this program is the taxpayer's Alaska tax liability under the Fishery Resource Landing Tax.

A summary table showing all tax credits in current law, as well as the credits granted under each program for each of the past three years is shown on the following pages.

Summary of Alaska Tax Credits in Current Law

Description of Credit	Credit Rate and Maximum Credit	Amount of Credit Claimed (in $millions) FY 2008	FY 2009	FY 2010
Credits Applicable to the Oil and Gas Production Tax (see Note A)				
Exploration Incentive Credit, AS 38.05.180(f) A non-transferrable credit for the cost of drilling or seismic work performed under a limited time period established by the Commissioner of the Department of Natural Resources.	Up to 50% of the cost of drilling or seismic work, not to exceed 50% of the tax liability to which it is being applied. This credit may also be applied against the state royalty.	$0	$0	$0
Qualified Capital Expenditure Credit, AS 43.55.023(a) and (f) A transferable tax credit for qualified oil and gas capital expenditures in the state. Taken in lieu of exploration incentive credits under AS 43.55.025 and gas exploration credits under AS 43.20.043.	Credit is 20% of eligible expenditures, or 40% for well related expenses outside the North Slope. For credits earned for North Slope capital expenditures under AS 43.55.023 (a), no more than half the credit may be applied in a single calendar year.	Includes Carried-Forward Loss Credits $336	$391	$585
Carried-Forward Annual Loss Credit, AS 43.55.023(b) A transferable credit for a carried-forward annual loss, as defined as a producer or explorer's adjusted lease expenditures that are not deductible in calculating production tax values for the calendar year.	Credit is 25% of the carried-forward annual loss. If a transferable credit certificate is applied for North Slope losses, not more than half may be taken in one year.	Totals included in Qualified Capital Expenditure Credits above		
Small Producer / New Area Development Credit, AS 43.55.024(a) and (c) A non-transferable credit for oil and gas produced by small producers, defined as having average taxable oil and gas production of less than 100,000 BTU equivalent barrels per day, or for oil or gas produced on leases outside Cook Inlet and below 68 degrees North latitude, providing the producer has a positive tax liability on that production before the application of other credits. Credit is available until the later of 2016 or 9 years after first commercial production of oil and gas on the properties for which the credit applies.	Credit is 100% of tax liability for eligible oil and gas production. The credit is capped at $12,000,000 annually under the small producer credit for producers with no more than 50,000 BTU equivalent barrels per day. The credit then phases out, reaching zero for producers with 100,000 or more BTU equivalent barrels per day. Under the new area development credit, credit is available up to $6,000,000 per company annually.	$38	$21	$34
Alternative Credit for Exploration, AS 43.55.025 A transferable credit for expenditures for certain oil and gas exploration activities. Expires 7/1/2016.	Outside of Cook Inlet, credit is 40% for seismic costs outside an existing unit, 30% for drilling costs greater than 25 miles from an existing unit, 30% for pre-approved new targets greater than 3 miles from an existing well, and 40% for pre-approved new targets greater than 3 miles from a well and greater than 25 miles from an existing unit. For Cook Inlet, credit is 40% for seismic costs outside an existing unit, 30% for drilling costs greater than 10 miles from an existing unit, 30% for pre-approved new targets, and 40% for drilling costs that are greater than 10 miles from an existing unit and pre-approved new targets.	$95	$18	$41

Note A: Credits under these programs are calculated and tracked on a calendar year basis. Totals represent CY 2007, 2008, and 2009, respectively.

(continued on next two pages)

Summary of Alaska Tax Credits in Current Law

Description of Credit	Credit Rate and Maximum Credit	Amount of Credit Claimed (In $millions) FY 2008	FY 2009	FY 2010
Cook Inlet Jack-Up Rig Credit, AS 43.55.025(a)(5) and (l)				
A credit for exploration expenses for the first three wells drilled by the first jack-up rig brought in to Cook Inlet. Expenses only for drilling of wells from a jack-up rig for wells that test pre-Tertiary; all three wells must be drilled by unaffiliated parties.	Credit is 100% of costs for the first well up to $25 million, 90% of costs for the second well up to $22.5 million, and 80% of costs for the third well up to $20 million. If exploration well is brought into production, operator shall repay 50% of the credit over ten years following production start-up.	Credit program began in 2010		
Credits Applicable to the Corporate Income Tax				
Internal Revenue Code Credits Adopted by Reference, AS 43.20.021				
Under Alaska's blanket adoption of the IRC, taxpayers can claim all federal incentive credits. Federal credits that refund other federal taxes are not allowed. Multistate taxpayers apportion their total federal incentive credits.	For most credits, credit is limited to 18% of the amount of the credit determined for federal income tax purposes which is attributable to Alaska.	Not tracked		
Gas Exploration and Development Credit, AS 43.20.043				
A non-transferable credit for qualified expenditures for exploration and development of non-North Slope natural gas reserves.	Credit is 25% of qualified expenditures for investment after January 1, 2010; investments in existing units qualify. Credit is capped at 75% of tax liability as calculated before applying other credits.	Cannot be reported due to taxpayer confidentiality		
Gas Storage Facility Credit, AS 43.20.046				
A credit for the costs incurred to establish a gas storage facility. Does not apply to gas storage related to a gas sales pipeline on the North Slope. Facility shall operate as a public utility regulated by the Alaska RCA with open access for 3rd parties. Effective for facilities placed into service between January 1, 2011 and December 31, 2015.	Credit is $1.50 per thousand cubic feet of "working gas" storage capacity as determined by AOGCC. Maximum credit is the lesser of $15 million or 25% of costs incurred to establish the facility.	Credit program began in 2010		
Film Production Credit, AS 43.98.030				
A transferable credit for expenditures on eligible film production activities in Alaska. Producer must spend at least $100,000 in a consecutive 24-month period to qualify. Expires the earlier of 7/1/2013 or once $100 million of credits have been approved.	Credit is 30% of eligible film production expenditures, plus an additional 10% credit for wages paid to Alaska residents, plus an additional 2% credit for filming in a rural area, plus an additional 2% credit for filming between October 1 and March 30. Program is capped at $100 million for all projects.	$0	$0	<$1
Credits Applicable to Multiple Tax Programs				
Education Credit, AS 21.89.070 and .075, AS 43.20.014, AS 43.55.019, AS 43.56.018, AS 43.65.018, AS 43.75.018, AS 43.77.045 - Applicable to Corporate Income Tax, Fisheries Business Tax, Fishery Resource Landing Tax, Insurance Premium Tax, Mining License Tax, Oil and Gas Production Tax, Oil and Gas Property Tax				
A non-transferable credit for contributions to vocational educational programs or accredited Alaska universities or colleges for educational purposes or facilities; under AS 21.89.075 contributions to the Alaska Fire Standards Council also qualify.	Credit is 50% of annual contributions up to $100,000, 100% of the next $200,000 and 50% of annual contributions beyond $300,000. The credit cannot exceed $5,000,000 annually across all eligible tax types. The credit at these rates is effective from January 1, 2011 until December 31, 2013, at which point the maximum credit for any taxpayer is $150,000 per year.	$3	$2	$2

Summary of Alaska Tax Credits in Current Law

Description of Credit	Credit Rate and Maximum Credit	Amount of Credit Claimed (In $millions) FY 2008	FY 2009	FY 2010
Minerals Exploration Incentive Credit, AS 27.30.030, AS 43.20.044 - Applicable to Corporate Income Tax, Mining License Tax and Mineral Production Royalty				
A non-transferable credit for eligible costs of mineral or coal exploration activities. Credit must be used within 15 years.	Credit is 100% of allowable exploration costs with a maximum of $20 million. Credit is limited to: (1) for mining license tax, the lesser of 50% of the MLT liability at the mining operation at which the exploration occurred or 50% of total MLT liability; (2) for corporate income tax, the lesser of 50% of the MLT liability at the mining operation at which the exploration occurred or 50% or total CIT liability, and (3) for mineral royalty, 50% of royalty liability from the mining operation at which the exploration activity occurred.	$0	$0	<$1
Scholarship Contributions Credit, AS 43.75.032, AS 43.77.035 - Applicable to the Fisheries Business Tax and Fishery Resource Landing Tax				
A non-transferable credit for contributions to the A.W. "Winn" Brindle memorial education loan account established under AS 14.43.250.	Credit is 100% of contribution amount up to a maximum of 5% of tax liability.	<$1	<$1	<$1
Credits Applicable to Fisheries Taxes				
Salmon Product Development Credit, AS 43.75.035				
A non-transferable credit for eligible capital expenditures to expand value-added processing of Alaska salmon including ice making machines. Credit expires December 31, 2015 and may be carried forward for three years.	Credit is 50% of qualified investment up to 50% of tax liability incurred for processing of salmon during the tax year.	$5	$3	$4
Community Development Quota Credit, AS 43.77.040				
A non-transferable credit for contributions to an Alaska nonprofit corporation that are dedicated to fisheries industry-related expenditures. Credit is available only for fishery resources harvested under a community development quota (CDQ).	Credit is 100% of contribution amount up to a maximum of 45.45% of tax liability on fishery resources harvested under a CDQ.	<$1	$0	<$1
Other Taxes Credit, AS 43.77.030				
A non-transferable credit for taxes paid to another jurisdiction on fishery resources landed in Alaska.	Credit is 100% of taxes paid with a maximum of 100% of the Alaska tax liability on the fishery resources.	Not tracked		
	Total All Credits	$479	$436	$670

Summary of Alaska Tax Credits in Current Law ($ millions)

Description of Credit	Credit Rate and Maximum Credit	Amount of Credit Claimed		
		FY 2009	FY 2010	FY 2011
Credits Applicable to the Oil and Gas Production Tax (see Note A)				
Exploration Incentive Credit, AS 38.05.180(i) A non-transferrable credit for the cost of drilling or seismic work performed under a limited time period established by the Commissioner of the Department of Natural Resources.	Up to 50% of the cost of drilling or seismic work, not to exceed 50% of the tax liability to which it is being applied. This credit may also be applied against the state royalty.	$0	$0	$0
Qualified Capital Expenditure Credit, AS 43.55.023(a) and (l) A transferable tax credit for qualified oil and gas capital expenditures in the state. Taken in lieu of exploration incentive credits under AS 43.55.025 and gas exploration credits under AS 43.20.043.	Credit is 20% of eligible expenditures, or 40% for well related expenses outside the North Slope. For credits earned for North Slope capital expenditures under AS 43.55.023 (a), no more than half the credit may be applied in a single calendar year.	Includes Carried-Forward Loss Credits $391	$585	$640
Carried-Forward Annual Loss Credit, AS 43.55.023(b) A transferable credit for a carried-forward annual loss, as defined as a producer or explorer's adjusted lease expenditures that are not deductible in calculating production tax values for the calendar year.	Credit is 25% of the carried-forward annual loss. If a transferable credit certificate is applied for North Slope losses, not more than half may be taken in one year.	Totals included in Qualified Capital Expenditure Credits above		
Small Producer / New Area Development Credit, AS 43.55.024(a) and (c) A non-transferable credit for oil and gas produced by small producers, defined as having average taxable oil and gas production of less than 100,000 BTU equivalent barrels per day, or for oil or gas produced on leases outside Cook Inlet and below 68 degrees North latitude, providing the producer has a positive tax liability on that production before the application of other credits. Credit is available until the later of 2016 or 9 years after first commercial production of oil and gas on the properties for which the credit applies.	Credit is 100% of tax liability for eligible oil and gas production. The credit is capped at $12,000,000 annually under the small producer credit for producers with no more than 50,000 BTU equivalent barrels per day. The credit then phases out, reaching zero for producers with 100,000 or more BTU equivalent barrels per day. Under the new area development credit, credit is available up to $6,000,000 per company annually.	$21	$34	$38
Transitional Investment Expenditure Credit, AS 43.55.023(l) A non-transferable credit for qualified oil and gas capital expenditures incurred between March 31, 2001 and April 1, 2006. Only available to companies that did not have production in commercial quantities prior to January 1, 2008. Credit may not be used after December 31, 2013.	Credit is 20% of qualified oil and gas capital expenditures incurred between March 31, 2001 and April 1, 2006, not to exceed 10% of the capital expenditures incurred between March 31, 2006 and January 1, 2008.	Cannot be reported due to taxpayer confidentiality		
Alternative Credit for Exploration, AS 43.55.025 A transferable credit for expenditures for certain oil and gas exploration activities. Expires 7/1/2016.	Outside of Cook Inlet, credit is 40% for seismic costs outside an existing unit, 30% for drilling costs greater than 25 miles from an existing unit, 30% for pre-approved new targets greater than 3 miles from an existing well, and 40% for pre-approved new targets greater than 3 miles from a well and greater than 25 miles from an existing unit. For Cook Inlet, credit is 40% for seismic costs outside an existing unit, 30% for drilling costs greater than 10 miles from an existing unit, 30% for pre-approved new targets, and 40% for drilling costs that are greater than 10 miles from an existing unit and pre-approved new targets.	$18	$41	$13

Note A: Credits under these programs are calculated and tracked on a calendar year basis. Totals represent CY 2009, 2010, and 2011.

Credits. E-1b

Summary of Alaska Tax Credits in Current Law ($ millions)

Description of Credit	Credit Rate and Maximum Credit	Amount of Credit Claimed		
		FY 2009	FY 2010	FY 2011
Cook Inlet Jack-Up Rig Credit, AS 43.55.025(a)(5) and (l)				
A credit for exploration expenses for the first three wells drilled by the first jack-up rig brought in to Cook Inlet. Expenses only for drilling of wells from a jack-up rig for wells that test pre-Tertiary; all three wells must be drilled by unaffiliated parties.	Credit is 100% of costs for the first well up to $25 million, 90% of costs for the second well up to $22.5 million, and 80% of costs for the third well up to $20 million. If exploration well is brought into production, operator shall repay 50% of the credit over ten years following production start-up.	Credit program began in 2011		
Credits Applicable to the Corporate Income Tax				
Internal Revenue Code Credits Adopted by Reference, AS 43.20.021				
Under Alaska's blanket adoption of the IRC, taxpayers can claim all federal incentive credits. Federal credits that refund other federal taxes are not allowed. Multistate taxpayers apportion their total federal incentive credits.	For most credits, credit is limited to 18% of the amount of the credit determined for federal income tax purposes which is attributable to Alaska.	Not tracked		
Gas Exploration and Development Credit, AS 43.20.043				
A non-transferable credit for qualified expenditures for exploration and development of non-North Slope natural gas reserves.	Credit is 25% of qualified expenditures for investment after January 1, 2010; investments in existing units qualify. Credit is capped at 75% of tax liability as calculated before applying other credits.	Cannot be reported due to taxpayer confidentiality		
Gas Storage Facility Credit, AS 43.20.046				
A credit for the costs incurred to establish a gas storage facility. Does not apply to gas storage related to a gas sales pipeline on the North Slope. Facility shall operate as a public utility regulated by the Alaska RCA with open access for 3rd parties. Effective for facilities placed into service between January 1, 2011 and December 31, 2015.	Credit is $1.50 per thousand cubic feet of "working gas" storage capacity as determined by AOGCC. Maximum credit is the lesser of $15 million or 25% of costs incurred to establish the facility.	Credit program began in 2011		
Film Production Credit, AS 43.98.030				
A transferable credit for expenditures on eligible film production activities in Alaska. Producer must spend at least $100,000 in a consecutive 24-month period to qualify. Expires the earlier of 7/1/2013 or once $100 million of credits have been approved.	Credit is 30% of eligible film production expenditures, plus an additional 10% credit for wages paid to Alaska residents, plus an additional 2% credit for filming in a rural area, plus an additional 2% credit for filming between October 1 and March 30. Program is capped at $100 million for all projects.	$0	<$1	<$1
Credits Applicable to Multiple Tax Programs				
Education Credit, AS 21.89.070 and .075, AS 43.20.014, AS 43.55.019, AS 43.56.018, AS 43.65.018, AS 43.75.018, AS 43.77.045 - Applicable to Corporate Income Tax, Fisheries Business Tax, Fishery Resource Landing Tax, Insurance Premium Tax, Mining License Tax, Oil and Gas Production Tax, Oil and Gas Property Tax				
A non-transferable credit for contributions to vocational educational programs, accredited Alaska universities or colleges for educational purposes or facilities, annual intercollegiate sports tournaments, AK Native educational programs, facilities that qualify under the Coastal American Partnership; under AS 21.89.075 contributions to the Alaska Fire Standards Council also qualify.	Credit is 50% of annual contributions up to $100,000, 100% of the next $200,000 and 50% of annual contributions beyond $300,000. The credit cannot exceed $5,000,000 annually across all eligible tax types. The credit at these rates is effective from January 1, 2011 until December 31, 2020, at which point the maximum credit for any taxpayer is $150,000 per year.	$2	$2	$3

ALASKA
FILM.ALASKA.GOV

The Alaska Film Office
2012 Report to the 27th Legislature

February 15, 2012

Qualification Process
Production companies are required to apply for qualification for the production incentive. To determine if a production meets qualification requirements, a committee reviews the estimated Alaska budget; the script or a synopsis; projected salaries and work history of producers, directors, and actors; and the distribution plan. In addition to the qualification form and documentation, the committee evaluates any anticipated indirect benefits of the production.

A production that completes the process is issued a qualification notice (notice). The notice establishes the two-year period for production and a tax credit estimate. The notice also states the amount of an approved tax credit may vary based on actual qualified expenditures.

Final Application Process
After a production completes its Alaska operations, a final application and supporting documentation are submitted for review, verification, and calculation of the tax credit. In addition to the final application, productions must submit an expense report verified by an independent, Alaska Certified Public Accountant (CPA), a rough assembly of the production, and a sworn certification that the producer followed the laws of Alaska and AFO procedures.

Figure Three
Tax Credits Redeemed by Fiscal Year

FY2011	$ (193,765.00)
FY2012*	$ (2,224,995.41)

*FY2012 data presented is year-to-date as of February 6, 2012

The department initially provided suggested guidelines for CPAs performing expense report verifications. However, based on a program review, the AFO established mandatory CPA training and Agreed Upon Procedures (AUP) that must be followed when preparing the expense report. The training and AUP became mandatory in February 2012. The AFO completed the first CPA training session on January 27, 2012 with 38 attendees.

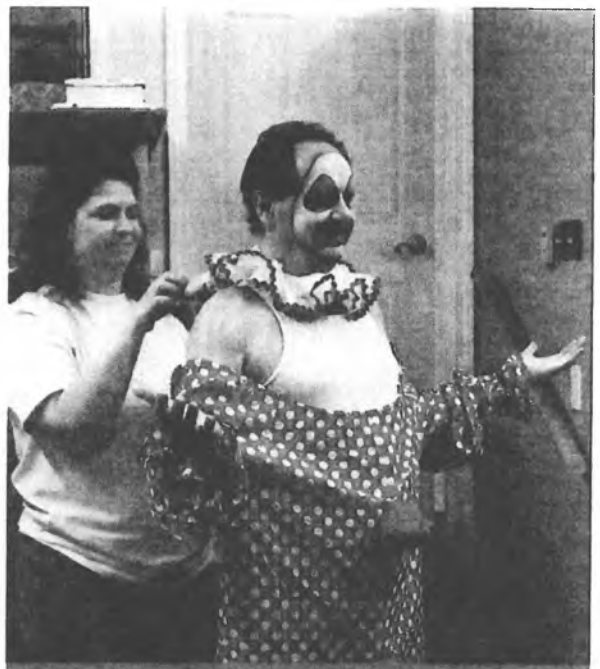
A DCCED committee of at least three people reviews the final application and determines the approved tax credit. In the short history of the program, 94.3 percent of requested tax credits have been awarded. After committee approval, the AFO notifies the production company and Revenue of the tax credit award.

Tax Credit Issuance and Transfer
Revenue issues tax credit certificates to producers and manages subsequent credit transfers. The tax credit may be used by producers or transferees as a credit against corporate income taxes within three years of the original date of issuance. Revenue typically issues both tax credit and transfer requests within two business days.

Tax credit certificates are assigned unique numbers when issued. Transfers are made to taxpayers using a form provided by Revenue. As directed by the transferor, replacement certificates are either returned to the transferor or sent directly to the transferee.

Revenue interprets "redeemed" to mean the date the tax return was filed, not the payment due date. The tax due can be reduced by the amount of the credit. The amounts shown above represent the fiscal year in which a credit was claimed on a return filed with Revenue. The average holding time for a tax credit, as of January 31, 2012, was 298 days.

The administrative duties of the film credit program consume approximately 18 percent of a full-time auditor position.



Chery Manning, producer, helps Ron Holmstrom, actor, don his costume for the award-winning short film, 'Change,' produced by Alaskans with a local cast and crew.

Center for American Progress

Tax Expenditures 101

What They Are and How They Slip Under the Radar

What are tax expenditures?

Tax expenditures are, quite simply, spending programs implemented through the tax code. These programs give people and businesses special tax credits, deductions, exclusions, exemptions, deferrals, and preferential rates in support of various government policies. Some of these programs help people save for retirement, buy a home, or pay for college; others encourage companies to invest in green energy technologies or build nuclear power plants; they even subsidize corporations that drill for oil or purchase real estate; and much more.

The government uses both tax expenditures and direct spending to support its policies. Direct spending is when the government takes taxpayer dollars and gives them to others to spend for a specific purpose. The government uses tax expenditures to accomplish the same goals as direct spending, but it transfers money by lowering taxes for an individual or company instead of giving them the money.

Consider this example to see the similarities between direct spending and tax expenditures: The government wants to create a program that provides $10,000 to every individual who weatherizes his or her home. The government can deliver the subsidy in one of three ways: (1) cut a check for $10,000, (2) create a tax expenditure like a refundable credit worth $10,000, or (3) use a combination of direct spending and tax expenditures. In all three cases the individual who weatherizes his or her home receives $10,000 from the government.

What makes tax expenditures different from other forms of government spending?

The government uses tax expenditures and direct spending for the same purposes, but tax expenditures receive different treatment in two key ways. Most tax expenditures are not subject to the same annual appropriations process as other forms of spending. This means they are less likely to be scrutinized.

Second, tax expenditures appear to be tax cuts instead of spending because they transfer funds to businesses and individuals through tax subsidies. It is therefore generally easier to win votes for tax expenditures than direct spending. And members of Congress often pursue their priorities through tax expenditures as a result, even if direct spending would be more effective and cost less.

What are the consequences of this differential treatment?

The cost of tax expenditures has skyrocketed over the last 20 years partly because they are excluded from the budget process and because they masquerade as tax cuts. Tax expenditures doubled in number between fiscal years 1974 and 2004, and the estimated revenue losses associated with them tripled. The government now spends $1.2 trillion on tax expenditures—more than half as much as it raises ($2.2 trillion) through the tax code. Tax expenditures will make up nearly 25 percent of total government spending this year and more than double the size of the government's nonsecurity discretionary spending.

The exponential growth of these programs is particularly evident in the energy sector where more than half of all energy programs are now funded through tax expenditures. The number of energy tax expenditure line items grew from 12 to 37 between 2000 and 2007, and spending in these areas increased from $3 billion to more than $10 billion.

What can be done to rein them in?

Three recently released reports from the Center for American Progress's Doing What Works project focus on the importance of treating tax expenditures like direct spending. One of these reports stresses the need to evaluate tax expenditures and subject them to the annual budget process. Another offers four questions policymakers should consider in deciding which tax expenditures to keep and which ones to cut. And the third applies these concepts to energy tax expenditures, with suggestions for how government can get energy tax expenditures under control.

But the gist of the reports is that spending programs delivered through tax expenditures should be subject to the same level of scrutiny as direct spending programs. We should make sure tax expenditures are efficiently delivering desired results. Tax expenditures that don't work or are misguided should be scrapped—just the same as ineffective spending programs.

CS FOR SENATE BILL NO. 30(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR DYSON

A BILL

FOR AN ACT ENTITLED

"An Act providing for the release of certain property in the custody of a law enforcement agency to the owner under certain conditions and relating to requests for that release by the office of victims' rights."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 12.36 is amended by adding a new section to read:

Sec. 12.36.070. Return of property by hearing. (a) The owner of property not belonging to a law enforcement agency that is in the custody of the agency under this chapter may request that the office of victims' rights request that the agency return the property to the owner. The request under this subsection shall be filed by the office of victims' rights on behalf of the owner after the office has conducted an investigation and has concluded that the owner is entitled to the return of the property under the factors listed in (c) of this section.

(b) Within 10 days after receipt of a request under (a) of this section and following reasonable notice to the prosecution, defense, and other interested parties,

the agency shall request a hearing before the court to determine if the property shall be released to the owner. If the property is being held in connection with a criminal case, the hearing shall be before the court with jurisdiction of the criminal case. If no criminal case is pending regarding the property, the hearing shall be before a district or superior court where the property is located.

(c) After a hearing, the court may order the return of the property in the custody of a law enforcement agency to the owner if

(1) the owner by a preponderance of the evidence provides satisfactory proof of ownership; and

(2) the law enforcement agency fails to prove by a preponderance of the evidence that the agency or another interested party is authorized to retain possession of the property.

(d) The court may impose reasonable conditions on an owner claiming property under this section.

* **Sec. 2.** AS 24.65 is amended by adding a new section to read:

Sec. 24.65.115. Authority to request return of property on behalf of certain persons. (a) Notwithstanding another provision of this chapter, the victims' advocate may file a request under AS 12.36.070 with a law enforcement agency for the return of property to an owner after having conducted an investigation and determining that the owner is entitled to the return of the property under the factors listed in AS 12.36.070(c). In fulfilling the requirements of this section, the victims' advocate may use any of the powers granted to the advocate under this chapter.

(b) In this section, "crime victim" includes any person who is the owner of property that is in the custody of a law enforcement agency.

SPONSOR STATEMENT

SB 30

An Act providing for the release of property in the custody of a law enforcement agency to the owner under certain conditions

SB 30 introduces within the Alaska Code of Criminal Procedure a process for victims of property crime to petition the court for relief in recovering their property held as evidence.

All too often victims of theft and robbery are victimized a second time by bureaucracy. This is particularly true in cases of property crimes where demonstrable loss occurs to the victim's person or business as a result of property being held for a protracted period of time by a law enforcement agency, usually at the direction of prosecution, defense counsel and/or other interested parties.

The law as currently written, provides discretionary authority to the prosecution for release of property, but does not clearly provide a right of hearing for a property owner to directly petition the court in those circumstances when property owners, prosecution and defense cannot come to agreement on return of property to the owner.

Victims of property theft often face the added burden of replacing stolen property. Small business owners who suffer property loss may face bankruptcy if the theft of property results in the inability to consummate a sale, continue their business operations, or the stolen property is uninsured or underinsured.

Property recovered by a law enforcement agency may be held as evidence for months or years. Property owners deserve protections in the law to ensure their property is held as evidence only as long as necessary for the prosecution and defense to physically retain the item, without jeopardizing the case.

SB 30 will provide property owners in the Alaska Code of Criminal Procedure, a clearly identifiable process to petition the court for the recovery of their property in those circumstances where they are otherwise not able to reach agreement with interested parties on the return of the property.

SENATOR FRED DYSON

SB 30 – SECTIONAL ANALYSIS

Section 1. Provides a right of hearing to property owners to request the return of their property, and requires a law enforcement agency to request a hearing before the court within 10 days of receipt of a request for hearing. It further provides that the court may return the property upon satisfactory proof of ownership, *and* the law enforcement agency does not prove that itself or another interested party is authorized to retain the property. Finally, it provides that the court may impose reasonable conditions on an owner claiming property.

During Session (January - May): Alaska State Capitol • Juneau, Alaska 99801 • (800) 342-2199 • (907) 465-2199 • (907) 465-4587 (fax)
During Interim (June-December): 10928 Eagle River Road, Suite 238 • Eagle River, Alaska 99577 • (907) 694-6683 • (907) 694-1015 (fax)

SENATOR FRED DYSON

SB 30 NOTES

1. Alaska Statutes - Title 12 *Code of Criminal Procedure*, Chapter 36 *Disposition of Recovered or Seized Property*, Sec. 20 *Return of Property*, provides the legal process for return of property.
2. 12.36.020(a) identifies those circumstances when a law enforcement agency may **not** return property to an owner.
3. 12.36.020(b) provides for the return of property to owners *at the discretion of the prosecuting attorney* where photographs are used as evidence in place of the property, stating *the prosecuting attorney **may** release the property to the owner upon presentation of satisfactory proof of ownership.*
4. 12.36.020(c) states that wrongfully taken or damaged property that is *not* properly photographed and authenticated under 12.45.086 *Photographic evidence of property wrongfully taken or damaged,* and used as evidence in a criminal or children's court proceeding, is to be returned to the owner *within 60 days after the final disposition of the case.*
5. 12.36.020(c) is problematic for two reasons. First, it is the property owner who suffers unjustly if the property was not properly photographed and authenticated; and second, final disposition of the case may be protracted for a long period of time. The return of property to its rightful owner may be hindered by concerns of prosecution, defense, and/or other interested parties.
6. 12.45.086 *Photographic evidence of property wrongfully taken or damaged,* defines the process for admissibility of photographs as evidence in criminal and children's court proceedings. This section states that properly submitted photographs are to be regarded to the same extent as if the property itself was introduced as evidence. This sounds good, but in practice falls short of its intent. 12.45.086(c) seems to recognize this problem by singling out only the theft of commercial fishing gear as being property that *shall be returned to the owner as soon as possible*. Nearly all thefts of property from businesses should be returned to the rightful owners ASAP.
7. SB 158 (last session, endorsed by the Alaska Peace Officers Association) sought to amend 12.36.020(c) by providing an alternative to waiting for final case disposition, which can take years. This allowed for the possibility of a law enforcement agency controlling the property to consult with the prosecuting attorney and defense counsel to determine if the property is no longer required to be retained as evidence, and if agreed on by all parties, returned to the rightful owner. In retrospect, this language placed all the discretion with the criminal justice entities, and still left victim property owners powerless to recover their property.
8. SB 297 corrects that deficiency by *providing directly to the property owner the right of a court hearing to recover possession of the owner's property*, and requiring that the law enforcement agency prove to the court that another parties' interest in the property overrides the owner's interest in having it returned. SB 297 is also endorsed by the Alaska Peace Officers Association.
9. 12.36.090 *Definitions* of "law enforcement agency" includes the Office of District Attorney, Department of Law, as this is a public agency having one of its principal functions being the enforcement of the criminal law.

During Session (January - May): Alaska State Capitol • Juneau, Alaska 99801 • (800) 342-2199 • (907) 465-2199 • (907) 465-4587 (fax)
During Interim (June-December): 10928 Eagle River Road, Suite 238 • Eagle River, Alaska 99577 • (907) 694-6683 • (907) 694-1015 (fax)

Senator Fred Dyson
Alaska State Senate
State Capitol
Juneau AK 99801-1182

Dear Senator Dyson:

On behalf of the Alaska Peace Officers Association (APOA), I would like to thank you for introducing Senate Bill 297, an act providing for the release of property in the custody of a law enforcement agency to the owner under certain conditions.

The APOA Executive Board's Legislative Committee recently reviewed this proposed legislation and decided to unanimously support this bill.

We thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515, if there is anything our organization can do to assist in the passage of this bill.

Sincerely,

John Lucking, Jr.
State President

RE: Senate Bill Number 297 – "An Act providing for the release of certain property in the custody of a law enforcement agency to the owner under certain conditions."

Dear Mr. Kopp:

The Alaska Office of Victims' Rights endorses Senate Bill Number 297 entitled, "An Act providing for the release of certain property in the custody of a law enforcement agency to the owner under certain conditions."

The Alaska Office of Victims' Rights appreciated the opportunity to speak with you directly on March 24, 2010 regarding the proposed legislation. The Alaska Office of Victims' Rights views this legislation as providing an important mechanism for crime victims to seek return of property seized during the course of a criminal prosecution.

It is the understanding of the Alaska Office of Victims' Rights that Senate Bill Number 297 is also endorsed by the Alaska Peace Officers Association and the Alaska Department of Law.

Thank you for the opportunity to meaningfully comment on Senate Bill Number 297.

Respectfully submitted,

D. Victor Kester

ANALYSIS: *(Attach a separate page if necessary)*

This bill provides for a statutory amendment to disposition of recovered or seized property for return of property by hearing. This note is indeterminate because the department may be required to represent law enforcement agencies at the hearings proposed in the bill. At this time we are not sure how many of these proceedings will occur. The issues raised may be complex, particularly if defense counsel opposes the return.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB030
2011 LEGISLATIVE SESSION

Analysis

This bill amends AS 12.36 by adding a new section regarding the return of property in the custody of a law enforcement agency. This legislation specifies that the owner of property in the custody of a law enforcement agency may request that the agency return the property. Further, that within 10 days of the request and following reasonable notice to all involved parties, a request for a court hearing shall be made.

Currently It is the standard practice of the department to return seized personal property as soon as possible. This legislation will not have a significant impact on the workload of the department.

Re: Long Phung Jewelry Store: APD Number 07-25111

Dear Police Chief Mew:

Some time ago, in I believe in June of 2007, the Anchorage Police Department served a warrant on my clients at their Jewelry store, Long Phung located at 510 East Northern Lights. The police officers removed a number of expensive pieces of jewelry. If I'm not mistaken, this was done in conjunction with an investigation into a suspected theft ring that was believed to be fencing stolen jewelry through jewelry stores.

In any event, over three years have passed. My clients have never been charged, nor were they ever accused of any wrong doing. I wrote to the APD on two occasions in 2007, asking for the return of the jewelry. (See attached.) Because I have had no response to my letters, I am contacting you directly.

Would you be so kind as to assist us in returning the items taken, or provide us with an update as to their status?

Thanks.

Sincerely,

Les Syren

Re: Long Phung Jewelry Store

Dear Detective Dunn:

The Lam family, including Van Lam, Van Nguyen, Kim Lam, Long Lam and Lan Lam have retained me to assist them with any matter you may wish to contact them about, including but not limited to Case Number 07-25111. They are wondering if you are finished with the items you seized from their jewelry store.

A couple of weeks ago I called and left a message asking for the return of the property, but I have not heard from you. Would you be so kind as to let us know if my clients can retrieve their property?

Sincerely,

Lester K. Syren

MEMORANDUM February 14, 2011

SUBJECT: Amendment A.3 - Providing for Office of Victims' Rights Participation with Return of Property
(Work Order No. 27-LS0344\A.3)

TO: Senator Fred Dyson
Attn: Chuck Kopp

FROM: Gerald P. Luckhaupt
Assistant Revisor

Enclosed is the amendment you requested. I have one comment. As I told Chuck Kopp of your staff, I am unsure of the constitutionality of this approach. The Office of Victims' Rights is located in the legislative branch, and so there are considerable limitations on the ability of that office to represent crime victims. Clearly, the office can investigate and provide information and assistance to crime victims, but problems develop when we attempt to assign functions to the office that would appear to be beyond the authority of the legislature. Specifically, trying to represent someone in dealings with the executive branch or in court is questionable.

Enclosure

ALASKA STATE SENATE

SENATOR FRED DYSON

Date: February 16, 2011

To: Senator Bill Wielechowski, Chair
Senate State Affairs Committee

From: Senator Fred Dyson for F.D.

Re: CS for SB 30 (STA)

On February 3, 2011 SB 30 was heard and held in State Affairs. Committee member comments indicated a concern that SB 30 may inadvertently open the door to a significant number of requests for hearing from property owners, and that some type of requirement or intermediary step be considered to prevent the hearings from becoming onerous to the Court system and law enforcement agencies.

In response to State Affairs Committee comments, and further review with the Office of Victims' Rights, private attorneys and various law enforcement entities, the CS for SB 30 (STA) is now before you for consideration. Primary changes to the original SB 30 are as follows:

Section 1

1. Property owners must make a request for hearing through the Office of Victims' Rights (OVR).
2. OVR will conduct an investigation into the request to make an initial determination if the owner is entitled to return of the property being claimed under the requirements of proposed 12.36.070(c): that the owner provides satisfactory proof of ownership, and the law enforcement agency is not able to show that the agency or another interested party is authorized to retain the property.
3. Once OVR makes such a determination, they will request on behalf of the owner that the agency return the property.
4. The court of jurisdiction is identified in cases involving a pending criminal case, and in situations where no criminal case is pending
5. Establishes the burden of proof to be a *preponderance of the evidence,* for both the property owner showing ownership and the law enforcement agency showing that they or another party are authorized to retain possession of the property.

Section 2

1. Establishes within Title 24, Chapter 65 *Office of Victims' Rights,* the authority for OVR to request a law enforcement agency for return of property on behalf of certain persons claiming property using any of the powers granted to OVR under this chapter
2. Establishes that the term *crime victim,* as used in this section, includes any person who is the owner of property that is in the custody of a law enforcement agency.

CS FOR SENATE BILL NO. 31(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS THOMAS, FRENCH, MENARD, AND WIELECHOWSKI

A BILL

FOR AN ACT ENTITLED

"An Act relating to the counting of ballots."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 15.15.360(a) is amended to read:

(a) The election board **or director, as may be appropriate,** shall count ballots according to the following rules:

(1) A voter may mark a ballot only by filling in, making "X" marks, diagonal, horizontal, or vertical marks, solid marks, stars, circles, asterisks, checks, or plus signs that are clearly spaced in the oval opposite the name of the candidate, proposition, or question that the voter desires to designate.

(2) A failure to properly mark a ballot as to one or more candidates does not itself invalidate the entire ballot.

(3) If a voter marks fewer names than there are persons to be elected to the office, a vote shall be counted for each candidate properly marked.

(4) If a voter marks more names than there are persons to be elected to the office, the votes for candidates for that office may not be counted.

(5) The mark specified in (1) of this subsection shall be counted only if it is substantially inside the oval provided, or touching the oval so as to indicate clearly that the voter intended the particular oval to be designated.

(6) Improper marks on the ballot may not be counted and do not invalidate marks for candidates properly made.

(7) An erasure or correction invalidates only that section of the ballot in which it appears.

(8) A vote marked for the candidate for President or Vice-President of the United States is considered and counted as a vote for the election of the presidential electors.

(9) Write-in votes are not invalidated by writing in the name of a candidate whose name is printed on the ballot unless the election board **or director** determines, on the basis of other evidence, that the ballot was so marked for the purpose of identifying the ballot.

(10) In order to vote for a write-in candidate, the voter must write in the candidate's name in the space provided and fill in the oval opposite the candidate's name in accordance with (1) of this subsection.

(11) A vote for a write-in candidate, other than a write-in vote for governor and lieutenant governor, shall be counted if the oval is filled in for that candidate and if the name, as it appears on the write-in declaration of candidacy, of the candidate or the last name of the candidate is written in the space provided.

(12) If the write-in vote is for governor and lieutenant governor, the vote shall be counted if the oval is filled in and the names, as they appear on the write-in declaration of candidacy, of the candidates for governor and lieutenant governor or the last names of the candidates for governor and lieutenant governor, or the name, as it appears on the write-in declaration of candidacy, of the candidate for governor or the last name of the candidate for governor is written in the space provided.

(13) In counting votes for a write-in candidate, the election board or director shall disregard any abbreviation, misspelling, or other minor variation in the form of the name of a candidate if the intention of the voter can be ascertained.

* **Sec. 2.** AS 15.15 is amended by adding a new section to read:

Sec. 15.15.365. Counting of write-in votes in general election. (a) Write-in votes on a general election ballot shall be counted by candidate only if the aggregate of all votes cast for all write-in candidates for the particular office is

(1) the highest number of votes received by any candidate for the office; or

(2) the second highest number of votes received by any candidate and the difference between the total number of votes received by the candidate having the highest number of votes and the aggregate of all votes cast for all write-in candidates for the office is less than the percentage necessary for a recount at the state's cost under AS 15.20.450.

(b) Write-in votes that do not meet the requirements of this section may not be individually counted under this section.

(c) If the director determines that the requirements of (a) of this section have been met,

(1) the director shall establish the place and date for counting those write-in votes; and

(2) in an election for federal or statewide office, the director shall count all write-in ballots under AS 15.15.360.

(d) This section does not apply to the counting of federal write-in absentee ballots submitted under 42 U.S.C. 1973ff.

1. SB 31: Counting of Write-in Votes

2. SB 33: Disposition of Service Members' Remains

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

Senate Bill 31:
An Act relating to the counting of write-in votes.

Sponsor Statement

"We start with the bedrock principle that the right of the citizens to cast their ballot and thus participate in the selection of those who control their government is one of the fundamental prerogatives of citizenship."
- Alaska Supreme Court, (*Miller v. Treadwell)*

Last fall, Alaskans reelected Lisa Murkowski to the United States Senate as a write-in candidate with nearly 100,000 votes statewide, something not witnessed by our nation in over fifty years. Because of the unique nature of write-in votes and confusion in state statute there was substantial debate over the validity of nearly 12,000 ballots. In the suit that followed, (*Miller v. Treadwell)*, Joe Miller argued that these ballots should not be counted because the name written was not *identical* to the way Senator Murkowski's name appeared on her declaration of candidacy. **Superior Court Judge William Carey and the Alaska Supreme Court both ruled against this argument, finding that judging the validity of a ballot based on the intent of the voter is paramount.**

Much of this case centered on the interpretation of state statute regarding the counting of ballots. Each court, in their findings, including Federal District Judge Ralph Bieistline, found that AS 15.15.360 was badly worded and left open for legitimate debate. **Senate Bill 31 looks to address this language by inserting a section that would place the intention of the voter above minor variations, mismarks or abbreviations.**

Senate Bill 31 follows on over fifty years of consistent precedent in support of a voter's intent and enfranchisement. In strengthening this statute by inserting federally recognized language from the Uniformed and Overseas Citizens Absentee Voting Act, **SB 31 will reduce potential future litigation while strengthening the public's perception of Alaska's democratic process.**

I urge you to join me in supporting Senate Bill 31.

Quotes of significance to Senate Bill 31 from the 2010 United States Senate Race Court Findings

"AS 15.15.360(a)(11) may not be well written, and it is clearly subject to different interpretations...AS 15.15.360, in general, is terse and somewhat unclear in comparison to the other state statutues. The statute, as Miller reveals, does lack the express language that most states have adopted which permits minor misspellings and errors." - Miller v. Campbell, pg. 15 Superior Court Judge William Carey

"While the issue may be moot, the public interest exception applies...this scenario is certainly susceptible to repetition any time a major write in effort for election to a public office in Alaska occurs." - Miller v. Campbell, pg. 8 Superior Court Judge William Carey

"We start with the bedrock principle that "the right of the citizens to cast their ballot and thus participate in the selection of those who control their government is one of the fundamental prerogatives of citizenship." - Alaska Supreme Court Miller v. Treadwell pg. 3

"In light of our strong and consistently applied policy of construing statutes in order to effectuate voter intent, we hold that abbreviations, misspellings or other minor variations in the form of the name of a candidate will be disregarded in determining the validity of the ballot, so long as the intention of the voter can be ascertained." - Alaska Supreme Court Miller v. Treadwell pg. 6

"Our interpretation of AS 15.15.360...is also consistent with the federally mandated standard for counting write in votes for those voters living or serving in uniform overseas. The Uniformed and Overseas citizens Absentee Voting Act provides that in counting the ballot of a uniformed voter or other voter who is overseas "any abbreviation, misspelling, or other minor variation in the form of the name of a candidate or political party shall be disregarded in determining the validity of the ballot if the intention of the voter can be ascertained." - Alaska Supreme Court Miller v. Treadwell pg. 7

"The Alaska Supreme Court did not make a finding clearly contrary to the face of the statute and its findings were entirely consistent with the State's past practices of making voter intent a priority. This is not to say that Miller's technical arguments are frivolous, for it is easy to understand his view as to the proper interpretation of AS 15.15.360 (a)(11). But it is just as easy to accept the interpretation given by the Alaska Supreme Court. What we have before us is a poorly drafted state statute. Wisdom would suggest that the Alaska Legislature act to clarify it to avoid similar disputes in the future." – Federal District Court Judge Ralph Bieistline pg. 7

Memorandum

TO: Senator Joe Thomas
FROM: Susan Warner, Legislative Analyst
DATE: January 21, 2011
RE: Legal History of Counting Write-in Votes in Alaska
LRS Report 11.113

You asked about the history in Alaska of write-in vote counting. You were particularly interested in legal precedents, and you asked for copies of pertinent decisions.

Within certain parameters defined by the U.S. Constitution, states have the authority to make their own election laws, and most states allow voters to write in the name of a candidate who is not listed on the ballot. Legal challenges occur most often in close races; courts then attempt to balance the constitutional right of citizens to elect the person of their choice against state laws that are designed to ensure efficient and orderly elections, among other things. The Alaska Supreme Court has consistently held that the right of citizens to select their government representatives is a fundamental prerogative of citizenship and should not be impaired or destroyed by "strained" statutory constructions.[1] As such, the Court in the most recent case (*Miller v. Treadwell,* 2010) held as follows:

> Voter intent is paramount, and any misspelling, abbreviation, or other minor variation in the form of the candidate's name on a write-in ballot does not invalidate a ballot so long as the intention of the voter can be ascertained.[2]

Alaska Voting Law

As you know, Alaska law does not allow write-in voting during primary elections, but provisions must be made for write-in voting on general election ballots. Alaska's rules for counting write-in ballots specify that a vote for a write-in candidate "shall be counted" if the oval is filled in and if the candidate's last name, or the candidate's name as it appears on the declaration of candidacy, is written in the space provided.[3] The law further specifies that the rules on counting ballots are, without exception, mandatory.

Miller v. Treadwell

Voter intent prevailed in litigation over the counting of write-in ballots in Alaska's 2010 U.S. Senate race. Joe Miller, the Republican senate candidate on the general ballot, argued that write-in votes for his opponent should not have been counted unless the candidate's name was spelled flawlessly. The Alaska Supreme Court ruled against Mr. Miller in *Miller v. Treadwell,* and the Court opinion begins with powerful language in support of voter enfranchisement. The Court proclaims that a citizen's right to vote is *of profound importance*; *key to participatory democracy;* and a *polar, cardinal*, and *bedrock principle*. The Court also notes that such longstanding principles have been consistently applied to election issues in Alaska over the past 50 years.

---

[1] *Carr v. Thomas,* 586 P.2d 622, 627(1978). We provide this document as Attachment A.

[2] *Miller v. Treadwell*, Alaska Supreme Court No. S-14112, December 22, 2010. Please note the recitation of pertinent case history entitled "Longstanding Alaska Election Principles" on page 2 of that decision (Attachment B).

[3] 15.15.360(a)(11).

Mr. Miller had argued that Alaska statutory language excludes any vote that is not spelled perfectly. The Superior Court held that if the legislature intended a candidate's name to be spelled perfectly, legislators would have used words like *exactly*, *precisely*, or *perfectly*.[4] The Supreme Court agreed and held that Alaska's statutory language is meant to be *inclusive* rather than *exclusive*:

> It is designed to ensure that ballots are counted, not excluded. And this inclusiveness is consistent with the overarching purpose of an election: to ascertain the public will. . . . Voter intent is paramount, and any misspelling, abbreviation, or other minor variation in the form of the candidate's name on a write-in ballot does not invalidate a ballot so long as the intention of the voter can be ascertained.

Additionally, the Court noted that Alaskan voters arrive at their polling places with a variety of backgrounds and capabilities, including some being raised without English as their first language, and such issues should not take away a person's right to decide which candidate to elect:

> We must construe the statute's language in light of the purpose of preserving a voter's choice rather than ignoring it.

Legal Precedents

The decision reached in *Miller v. Treadwell* reflects the tendency for all U.S. courts to favor voter intent over ambiguous statutory language, but election scholar Richard Hasen asserts that the Alaska Supreme Court—even before *Miller*—appears to have gone the furthest in giving emphasis to voter intent.[5] Alaska's 1978 precedent-setting case, *Carr v. Thomas,* involved the question of counting certain ballots, and Alaska's highest court declared that the state would need "clear and unmistakable" statutory language to take away a citizen's right to have his or her voted counted.

Alaska courts have consistently emphasized the importance of voter intent. The decisions for the following Alaska cases are attached to this document:

- *Willis v. Thomas*, 600 P.2d 1079 (1979). The Alaska Supreme Court depended on a determination of voter intent in ruling on the results of a recount of ballots in Senate District F (Attachment D).

- *Fischer v. Stout*, 741 P.2d 217 (1987). The Alaska Supreme Court ruled on whether certain votes or classes of votes were properly counted or rejected in the 1986 race for Senate District H. The Court held that ballots marked with a pen rather than punched still showed clear voter intent and should be counted (Attachment E).

- *Finkelstein v. Stout*, 774 P.2d 786 (1989). The Alaska Supreme Court ruled on a ballot recount for Seat A in House District 13. The Court considered voter intent with regard to questioned signatures on absentee ballots (Attachment F).

- *Edgmon v. Moses*, 152 P.3d 1154 (2007). The Alaska Supreme Court ruled on the results of a recount in the District 37 Democratic primary. Considering ballot markings, the Court found that marks clearly intended as votes should be counted (Attachment G).

[4] *Joe Miller v. Lieutenant Governor Craig Campbell*, Case No. IJU-10-1007CI, Memorandum of Decision and Order on Motion for Summary Judgment and Cross Motions, December 10, 2010. We provide this document as Attachment C.

Addressing Irregular Write-in Votes in Other States

Although Alaska statute does not address the inevitable misspellings and illegibility of written-in names, many states attempt to clarify how such votes will be counted, and these rules always give primacy to voter intent. There are variations among states, but this directive, by its very nature, is subjective and gives vote-counters the authority to determine who a voter intended to elect. Here are examples from four states:

- California accepts a "reasonable facsimile" of a write-in candidate's name (Cal. Elec. Code § 15342).
- Nebraska will count a write-in vote without the first name of the candidate, and the write-in name must be "reasonably close to the proper spelling" (Neb. Rev. Stat. § 32-615).
- Delaware allows for a "misspelled or minor variation" of a write-in candidate (Del. Code Ann. Title 15, § 4972 (b)(8)).
- Washington election officials are required to "exercise all reasonable efforts to determine the voter's intent (WAC 434-262-160).

Some states provide further guidance on counting irregular write-in votes. Washington State has an extensive, pictorial booklet on how election officials are expected to count nearly every deviation from what might be considered a standard marking, including samples of acceptable and unacceptable write-in votes. Attachment H is the portion of the booklet that deals with write-in votes, and the entire document can be viewed at ***http://www.sos.wa.gov/_assets/elections/2009StatewideStandardsonWhatisaVote.pdf***.

We hope this is helpful. If you have questions or need additional information, please let us know.

Our view: No doubt

State smart to review election, need for any changes in law

(01/03/11 19:17:26)

When federal Judge Ralph Beistline tossed Joe Miller's challenge to Alaska's U.S. Senate election, he granted that Alaska's law could be clearer about the primacy of voter intent.

He was right.

The requirement that a write-in candidate's name be written as it appears in its state-qualified form led to the arguments over spelling and how close voters had to be.

In addition, the state's decision to provide, at voters' request, lists of qualified write-in candidates prompted unsuccessful suits by both the Republican and Democratic parties.

While we disagreed with the Division of Elections on the latter point, state courts upheld their call. And the division ran a straight, fair election.

Lawmakers, however, should revisit the law to make clear that voter intent, not spelling, is the key test in deciding which write-in votes count, and to decide whether write-in lists either will or won't be provided at polling places in the future.

The division did well by Alaskans. But clarity in the law may help keep future elections out of court.

BOTTOM LINE: Election law should leave no room for doubt.

No 'spelling bee' election in Alaska

Ruth Walker | Christian Science Monitor | Dec 7, 2010

The 2010 elections, the gift that keeps on giving, have imparted new meaning to the phrase "all over but the shouting."

At this writing, Lisa Murkowski looks likely to be headed back to Washington as Alaska's senior senator and into the history books as the first candidate since Strom Thurmond in 1954 to win election to the Senate as a write-in. Her victory, if confirmed, as is now expected, will turn in part on a decision to honor ballots from voters who merely approximated the correct spelling of her name.

How should we feel about that? Are standards slipping irretrievably in the republic?

Her Democratic opponent has conceded defeat. But her Republican opponent, Joe Miller, whose own name was easier to spell and was, moreover, actually on the ballot, has had other ideas.

His campaign has challenged all ballots that fall short orthographically. State authorities, on the other hand, have been counting as valid all those who came close to spelling "Murkowski" right.

Alaskan law requires electoral officials to take into account "voter intent" when counting write-in votes. This standard is common across the country, it turns out. The Los Angeles Times quoted Richard Winger, editor of the election law journal Ballot Access News: "I am not aware of any state that says write-ins can't be counted unless the spelling is perfect."

As a copy editor, I'm with Mr. Miller. What kind of democracy can't spell its leaders' names right? As a student of language, though, I understand that spoken language came first, and that the written form of any word is an approximation of the spoken form; it's not the other way around. After all, there's a reason we call it "language" - from the Latin word for "tongue" - and not "scribblage," or something like that.

The case for a more generous interpretation of what counts as a valid vote for a write-in candidate starts with this primacy of spoken language.

Much of what we recognize as democracy began with spoken language, conversations, and debates in halls of assembly and the public square. Democracy was then furthered by written communication, especially after the development of the printing press.

More recently, speech has gained a boost from new forms of communication - from FDR's fireside chats to YouTube - that have let us hear, and hear repeatedly, what we otherwise might only have read.

Of course we need both modes: Writing - "print" - allows for rereading, for reflection and the consideration of nuance. Speech, especially live, in-person speech, provides immediacy and the expression of feelings.

Fix the law: Write-in ballot statute needs repair by Legislature

12.30.10 - 11:53 pm
Editorial

Federal Judge Ralph Beistline wrote in his Tuesday ruling dismissing Joe Miller's amended federal lawsuit in the U.S. Senate race that he can understand Mr. Miller's viewpoint regarding the wording of state election law.

Judge Beistline also said he can easily see the state's view when it comes to the law governing how a write-in candidate's name must appear on the ballot in order to be considered a valid vote.

The judge ultimately deferred to the Alaska Supreme Court, which ruled in Mr. Miller's state lawsuit that the name of Sen. Lisa Murkowski didn't have to be spelled correctly. Mr. Miller argued, in both state and federal court, that Alaska law required a precise spelling.

But Judge Beistline found the Alaska Supreme Court "did not make a finding clearly contrary to the face of the statute and its findings were entirely consistent with the state's past practice of making voter intent a priority."

But the judge, in his ruling, pointedly noted a problem:

"This is not to say that Miller's technical arguments are frivolous, for it is easy to understand his view …

"What we have before us is a poorly drafted state statute. Wisdom would suggest the Alaska Legislature act to clarify it to avoid similar disputes in the future. For now we have to work with what we have and that is what the Alaska Supreme Court has done."

Judge Beistline's message is clear and sound: The Legislature should clarify the law. It should do so this coming session while the subject is fresh.

Supreme Court takes reasonable approach in election challenge

by Dermot Cole / cole@newsminer.com

Dec 22, 2010 | 757 views | 0 | | 5 | |

FAIRBANKS — The Alaska Supreme Court said it relied on principles applied consistently during the past 50 years to reject Joe Miller's court case and approve the state's approach to counting ballots.

The decision Wednesday helps clear the way for Sen. Lisa Murkowski's re-election to be certified before the next Congress. Miller may pursue a federal court fight, however.

This unanimous ruling is not surprising, given the numerous decisions the court has made in contested elections over the years. The ruling also is reasonable.

The court declared that Miller is dead wrong in claiming state law requires the names of write-in candidates be spelled correctly.

"Our prior decisions clearly hold that a voter's intention is paramount," the four justices said. "In light of our strong and consistently applied policy of construing statutes in order to effectuate voter intent, we hold that abbreviations, misspellings or other minor variations in the form of the name of a candidate will be disregarded in determining the validity of the ballot, so long as the intention of the voter can be ascertained."

The court rejected Miller's argument that anything less than his point of view, supporting correct spelling, would threaten the integrity of the election process.

"But it is Miller's interpretation of the statute that would erode the integrity of the election system, because it would result in disenfranchisement of some voters and ultimately rejection of election results that constitute the will of the people," the judges said. "We have consistently construed election statutes in favor of voter enfranchisement."

The court also found its interpretation of state law is consistent with federal and state rules allowing misspellings on the federal write-in absentee ballot for military voters and civilians overseas.

"Miller's proposed construction of the statute would require us to impose a different, and more rigorous, voting standard on domestic Alaskans than on those who are serving in the military or living abroad," the court said.

Other states use the same approach as Alaska in counting ballots and "we see no basis for Miller to argue that the application of the standard in this election violates equal protection under either the state or federal constitution."

The portion of state law Miller said requires perfect spelling really applies to pseudonyms, the court said.

"The 'nickname' field allows a candidate to ensure that his or her pseudonym 'appears on the write-in declaration of candidacy' so that the write-in votes listing that pseudonym will count. Thus, the word 'appears' relates to a pseudonym's possible presence on the ballot, not the particular form of the vote and demonstrates that the statute is inclusive — it is designed to include, rather than exclude, votes."

MEMORANDUM January 25, 2011

SUBJECT: Providing the Director of Elections the authority to ascertain the intention of a voter under AS 15.15.360(a)
(CSSB 31( ), Work Order No. 27-LS0350\B)

TO: Senator Joe Thomas
Attn: Grier Hopkins

FROM: Alpheus Bullard
Legislative Counsel

You requested a blank committee substitute that would revise Senate Bill 31 (27-LS0350\M) and AS 15.15.360 to provide the Director of Elections (director) the authority, in counting votes for a write-in candidate, to disregard any abbreviation, misspelling, or other minor variation in the form of the name of a candidate if the intention of the voter can be ascertained.

AS 15.15.360 prescribes how an election board shall count ballots. The change you requested required modifications to the bill beyond the substitution of "director" for "election board" in the bill's ultimate paragraph.[1]

While a regulation, 6 AAC 25.085(d),[2] provides the director authority to establish the place and date for counting certain write-in votes, the director is not currently authorized

---

[1] Note the change to the bill's title.

[2] **6 AAC 25.085. Counting of write-in votes in general election.**

(a) Except as provided in 6 AAC 25.670, the provisions of this section apply for the counting of write-in votes in a general election in this state.

(b) Counting write-in votes in a general election by candidate will only be done under this section if the aggregate of all votes cast for all write-in candidates for the particular office is

(1) the highest number of votes received by any candidate for the office; or

(2) the second highest number of votes received by any candidate and the difference between the total number of votes received by the candidate having the highest number of votes and the aggregate of

under statute to count ballots outside of certain statutorily identified situations.[3] Nothing now in statute specifically authorizes the director to count ballots in a close election contest between a candidate on the ballot and a write-in candidate.

For this reason, your requested committee substitute includes an added section codifying the substance of 6 AAC 25.085 and further providing that the director shall count write-in ballots in certain elections for a federal or statewide office.

If I can be of further assistance please do not hesitate to contact me.

TLAB:med
11-006.med

Enclosure

---

all votes cast for all write-in candidates for the office is less than the percentage necessary for a recount at the state's cost under AS 15.20.450.

(c) Write-in votes that do not meet the requirements of this section will not be individually counted under this section.

(d) If the director determines that the requirements of this section have been met, the director will establish the place and date for counting those write-in votes.

[3] While the director has general administrative supervision over the conduct of state elections and may adopt regulations necessary for the administration of state elections (AS 15.15.010) and regulations prescribing the manner in which the precinct ballot count is accomplished so as to ensure accuracy in the ballot count (AS 15.15.350), the director is authorized to review or count ballots only in certain statutorily enumerated areas. The director must (1) count or review certain absentee and vote by mail ballots under AS 15.15.430, AS 15.20.082(c), AS 15.20.201(d), AS 15.20.480, and AS 15.20.800(e); (2) review and count certain ballots under AS 15.15.430; and (3) review all ballots in a recount election (AS 15.20.480).

Sponsor Statement: SB 33
An Act relating to the disposition of remains of a member of the military if the member dies while in a duty status

The intent of SB 33 is to ensure that active duty service members who make the ultimate sacrifice are properly honored by ensuring that their remains are disposed of by the person of their choosing.

The Department of Defense requires active duty service members, reservists and guard members to complete a Record of Emergency Data (DD Form 93) annually or prior to deployment. This form identifies the person authorized to direct disposition of a service member's remains in the event that service member is killed in the line of duty.

SB 33 will place the state in alignment with Department of Defense procedures, so that the person designated to handle disposition of remains is not called into question. Without compliance with these procedures, the handling of the remains may be delayed, and the service member's wishes not honored.

Twenty-one states have laws which comport with Department of Defense rules on disposition. At least four other states, including Alaska, are pursuing laws to comport.

SB 33 is supported by the Office of the Deputy Under Secretary of Defense.

Please join me in supporting this legislation to ensure the wishes of our service members are upheld and our fallen soldiers receive the proper burial they deserve.

MEMORANDUM January 21, 2011

SUBJECT: Sectional summary of SSSB 33 relating to the disposition of the remains of a member of the military if the member dies while in a duty status (Work Order No. 27-LS0188\B)

TO: Senator Bill Wielechowski
Attn: Michael Caulfield

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Gives a person the right to make the decisions about the disposition of the remains of a member of the state's organized militia who is in active state service, if the person is authorized by the member on DD Form 93, a Department of Defense emergency data form, to dispose of the member's remains if the member dies while in a duty status under 10 U.S.C. 1481.

Section 2. Gives a person the right to make the decisions about the disposition of the remains of a member of the military who is a state resident, if the person is authorized by the member on DD Form 93, a Department of Defense emergency data form, to dispose of the member's remains if the member dies while in a duty status under 10 U.S.C. 1481.

If I may be of further assistance, please advise.

TLB:plm
11-024.plm

SB 33 – Disposition of Remains of a Member of the Military

BACKGROUND:

- The Department of Defense requires active duty service members, reservists and guard to complete a Record of Emergency Data (DD Form 93), a form that identifies the person authorized to direct disposition of a service member's remains in the event that service member is killed in the line of duty.

- Twenty-one states have laws which comport with DOD rules on disposition. Three are pursuing laws which comport with DOD rules.

- Alaska State law does not currently recognize the DD Form 93.

PROBLEM:

- When there is no one specifically authorized to dispose of remains, the final wishes of the service member may not be followed. Additionally, disputes over the rightful controlling agent may lengthen an already painful process of burial.

STATUTORY SOLUTION:

- SB 33 would place the state in alignment with the Dept. of Defense Emergency Data Form (DD Form 93), so that the person designated to handle disposition of active duty service and guard member's remains is clearly identified.

- Supported by the Office of the Deputy Under Secretary of Defense.

Persons Authorized to Direct Disposition of Remains
DoDI 1300.18

E2.41*E2.42*. Person Authorized to Direct Disposition of Human Remains (PADD). A person, usually the PNOK (see E2.45*E2.46*.), who is authorized to direct disposition of human remains. For disposing of human remains, under the authority of Reference (l), the Secretary of the Military Department concerned is deemed to have such standing if no other such person is available. Service members will *shall* identify a PADD on their DD Form 93. (See instructions at Enclosure 7.) Absent the identification of a PADD by the Service member, then the PADD is recognized in the following order:

E2.41.1*E2.42.1*. Surviving spouse. The legal spouse is one who was married to the deceased as prescribed by civil law, was not divorced from the deceased and has not remarried at the time disposition of remains is to be made. The latter might apply in the case of a Service member who has been declared deceased, body not recovered at the time of the casualty incident, and whose remains are later recovered and identified. If the spouse has remarried at the time disposition is to be made, the right of disposition will go to the next person in order of priority, and the remarried spouse will take priority under paragraph E2.41.8*E2.42.8*.

E2.41.2*E2.42.2*. Children who have reached the age of majority in order of seniority (age).

E2.41.3*E2.42.3*. Parents in order of seniority (age) unless legal custody was granted to another person by reason of court decree or statutory provision. Step-parents, who have not adopted the Service member, serve in *loco parentis* and are not considered parents for PADD purposes.

E2.41.4*E2.42.4*. Blood or adoptive relative of the individual who was granted legal custody of the Service member by reason of a court decree or statutory provision. The person to whom custody was granted remains the PADD despite the fact that the individual had reached the age of majority at the time of death.

E2.41.5*E2.42.5*. Brothers or sisters of legal age in order of seniority (age). When the deceased person has full siblings, half-siblings, or step-siblings, the order of precedence is the full siblings then the half-siblings. Step-siblings are not eligible to direct disposition of remains. Adopted siblings are treated the same as full siblings when adopted by both of the deceased person's biological parents. Adopted siblings are considered as half-siblings when adopted by only one of the deceased person's biological parents.

E2.41.6*E2.42.6*. Grandparents in order of seniority (age).

Change 1, 8/14/09 ENCLOSURE 234 Dodo 1300.18, January 8, 2008

E2.41.7*E2.42.7*. Other adult blood relatives in order of relationship to the individual under the laws of the deceased's domicile. When two individuals are of equal relationship, priority will be determined by age.

E2.41.8*E2.42.8*. Remarried surviving spouse. The remarried surviving spouse is one who was not divorced from the deceased and has remarried at the time disposition of remains is to be made. The latter might apply in the case of a Service member who is declared deceased, body not recovered, and whose remains are later recovered and identified.

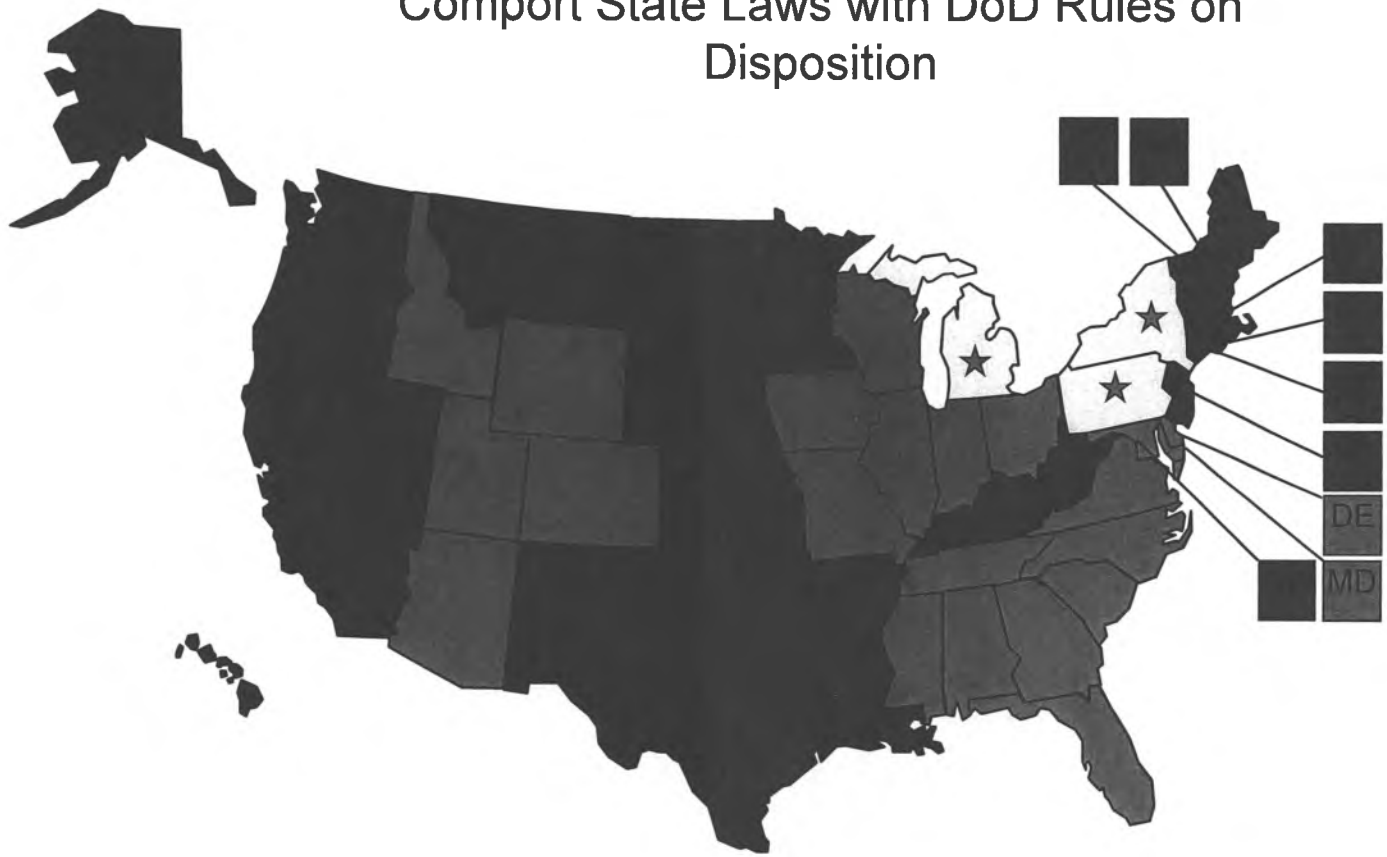
E2.41.9*E2.42.9*. Persons standing in *loco parentis*. *Loco parentis* means any person(s) or institution who acted in place of the member's parent(s) for a period of not less than 1

year at any time before the member joined the military. Seniority in age will control when the persons are of equal relationship.

E2.41.10*E2.42.10.* Legal representative of the estate may make disposition of remains when all efforts to identify or locate a person in categories (1) through (9) are unsuccessful. The legal representative must be properly appointed by a civil court having jurisdiction of the decedent's estate.

E2.41.11*E2.42.11.* When all known persons in categories (1) through (10) relinquish disposition authority or cannot be identified or located, then disposition of the remains will be made by the administrative determination of the Secretary of the Military Department concerned or their designee.

Comport State Laws with DoD Rules on Disposition



- Laws comport with the disposition instructions in Federal statutes and DoD rules
- ★ Legislation pursuing a favorable policy is filed.
- Actively pursuing favorable policy, but no legislation filed as yet.
- Policy not favorable, and Not currently considering favorable adjustments.

Information for Families

Issue 2: By the close of the 2010 legislative sessions, 36 states have adopted some of the measures that ensure deployment separations do not determine custody decisions for military members.

Comport State Laws with DoD Rules on Disposition

Issue: State laws on the disposition of human remains do not currently provide for the accommodation of the expressed, written wishes of service members through execution of the federally prescribed "Record of Emergency Data"

According to Section 564 of Public Law 109-163, effective January 2006, service members [as defined in Title 10, United States Code, Section 1481(a)(1) – (8)] must designate a person authorized to direct disposition of human remains (PADD). The law, Title 10, United States Code, Section 1482(c), specifies a list of possible designees, but does not stipulate any specific order.

States may not recognize the PADD as the legal designee because the state does not recognize the DD Form 93 (Record of Emergency Data) completed by service members to designate a PADD. The DD Form 93 restricts a services member to designating his or her "surviving spouse, blood relative of legal age, or adoptive relatives of the decedent. If neither of these three can be found, a person in loco parentis may be named."

Without a recognized agent, state statutes normally have a prescribed order of who is recognized as the next-of-kin designated to direct disposition, starting with a spouse, followed by adult children and parents. Because some state laws do not currently recognize the federal form as an acceptable one for service members, there have been several instances of civil actions between family members over the ultimate disposition of a fallen service member's remains.

Desired Outcome: Eliminate potential conflict with federal law, which may reduce the potential for family conflict at a time of bereavement, by states amending their laws on disposition of human remains to recognize the DD Form 93 as the authoritative written instrument for service members.

Progress: Ten states currently recognizes the DD 93 as the authoritative document for use by service members; however, we estimate nine states have statutes with sufficient latitude to allow for its use. The remaining states either do not provide for the designation of an agent, require use of a state specific form, or require a certain type of witnessing that might preclude the recognition of the DD Form 93. In order to add clarity for both family members and funeral directors, we believe statutes in all 50 states should include a statement recognizing the authority of the DD Form 93. The map below provides our current estimation of state flexibility for considering designations made on the DD Form 93.

- DD Form 93 (Record of Emergency Data)
- Public Law 109-163 Sec. 564
- Title 10 USC, Sec. 1481(a)(1-8)
- Title 10 USC, Sec. 1482(c)

Best Practice Examples:
The following are bills that were enacted in 2010 that provide for recognition of the DD Form 93:

Arizona HB 2400
Mississippi SB 2418
Maryland SB 408

BILL NO. SB 33

Analysis

There is no fiscal impact.

10 USC § 1481. Recovery, care, and disposition of remains: decedents covered

(a) The Secretary concerned may provide for the recovery, care, and disposition of the remains of the following persons:

(1) Any Regular of an armed force under his jurisdiction who dies while on active duty.

(2) A member of a reserve component of an armed force who dies while—

(A) on active duty;

(B) performing inactive-duty training;

(C) performing authorized travel directly to or from active duty or inactive-duty training;

(D) remaining overnight immediately before the commencement of inactive-duty training, or remaining overnight, between successive periods of inactive-duty training, at or in the vicinity of the site of the inactive-duty training;

(E) hospitalized or undergoing treatment for an injury, illness, or disease incurred or aggravated while on active duty or performing inactive-duty training; or

(F) either—

(i) serving on funeral honors duty under section 12503 of this title or section 115 of title 32;

(ii) traveling directly to or from the place at which the member is to so serve; or

(iii) remaining overnight at or in the vicinity of that place before so serving, if the place is outside reasonable commuting distance from the member's residence.

[(3) Repealed. Pub. L. 99–661, div. A, title VI, § 604(e)(3)(B), Nov. 14, 1986, 100 Stat. 3877.]

(4) Any member of, or applicant for membership in, a reserve officers' training corps who dies while

(A) attending a training camp,

(B) on an authorized practice cruise,

(C) performing authorized travel to or from such a camp or cruise, or

(D) hospitalized or undergoing treatment at the expense of the United States for injury incurred, or disease contracted, while attending such a camp, while on such a cruise, or while performing that travel.

(5) Any accepted applicant for enlistment in an armed force under his jurisdiction.

(6) Any person who has been discharged from an enlistment in an armed force under his jurisdiction while a patient in a United States hospital, and who continues to be such a patient until the date of his death.

(7) A person who—

(A) dies as a retired member of an armed force under the Secretary's jurisdiction during a continuous hospitalization of the member as a patient in a United States hospital that began while the member was on active duty for a period of more than 30 days; or

(B) is not covered by subparagraph (A) and, while in a retired status by reason of eligibility to retire under chapter 61 of this title, dies during a continuous hospitalization of the person that began while the person was on active duty as a Regular of an armed force under the Secretary's jurisdiction.

(8) Any military prisoner who dies while in his custody.

Senator,

Just wanted to send you a note in support of SB33 and HB27 which you have shown leadership on.

We work with the Alaska Veterans Foundation, Inc. and our local hospitals to ensure that no veteran dies alone. It happens.

Although your bill will not directly address this challenge it does make it clear the process we in Alaska will follow when faced with the remains of a service member and/or in some cases veteran with no next of kin available.

Unfortunately this is a growing problem due to the number of our citizens who are estranged from their immediate family.

Again, thanks for being there in support of our military and veterans.

It is an honor,

ALASKA VETERANS FOUNDATION

January 21, 2011

Senator Bill Wielechowski
Chairman
Senate Affairs Committee

REF: SB 33

One of the most frustrating and difficult problems we often face as the state's only statewide Veterans Foundation (501c3) representing about 80,000 veterans and their families, is when a veteran or service member dies or is killed in action and we can not find their family.

This happens more then you would think. It's really part of our culture now that many elderly veterans, as a result of divorce or estrangement, die without an ability to notify their next of kin. Just in December of last year we had a two tour Marine, Vietnam Veteran die at home alone and our best efforts and those of the US Department of Veterans Affairs as well as the Department of Defense were unable to find his ex-wife nor his son so that they could be involved in his internment at our National Cemetery.

We strongly support this bill, introduced by you on behalf of our active duty, guard, and reserves that makes it clear that the State of Alaska is in line with most other states in a process that provides for the disposition of service members remains.

We hope this bill becomes law this session, so that this year we can have a process recognized by the State to address this tragedy.

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

Sponsor Statement

Senate Bill 36

"An Act relating to an opt-out charitable giving program offered by an electric or telephone cooperative"

Senate Bill 36 gives statutory authority for electric and telephone cooperatives to offer an opt-out charitable giving program to their members, when the program has been approved by a majority of the membership. More than 250 electric cooperatives across the U.S. have implemented similar successful programs.

Senate Bill 36 allows the cooperative's members the opportunity to participate in a charitable giving program that will round their monthly bill to the next whole dollar amount, not to exceed 99 cents a month.

Under SB 36, the participating cooperative would clearly have to identify on each monthly billing statement the amount voluntarily added to a member's bill, after rounding to the next whole dollar, and provide instruction on how to opt out of the program, should a member so choose.

The monies collected under SB 36 may only be used for charitable donations and members are given the opportunity to claim a full refund of all amounts they paid under the program for at least the three preceding years.

Based on the collective generosity of cooperative members, charitable donations will add up quickly. Funds will then be disbursed back into the community to benefit qualified organizations and help neighbors in need.

I urge you to join me in supporting this important charitable giving program.

Good¢ents
building a stronger community

Good¢ents at a Glance

January 2011

About the program

Good¢ents, in the sense that it is a round up program, is not new. More than 250 electric cooperatives across the U.S. have implemented similar programs. And they have been wildly successful.

In 2010, GVEA's Member Advisory Committee suggested the co-op initiate a round-up program. The board of directors agreed it would benefit the cooperative and an amendment to the Bylaws allowing such a program was sent out for membership vote in the 2010 elections. This is how it was worded on the ballot:

> **GVEA Bylaw, Section 8. Utility Bill Round-up Program**
> **The Cooperative may establish a program to permit members to round up their bills to the nearest dollar. The monies collected shall be used for charitable purposes in the Cooperative's service area. Members may be automatically included in this program, but may voluntarily choose not to participate in the program by request to the Cooperative.**
>
> Discussion: … "This Section allows GVEA to form a fund to assist community organizations, but members may voluntarily choose not to participate. More than 250 electric co-ops have Operation Round Up programs. Approval of this amendment would make GVEA the first in Alaska with such a community-oriented program."

More than 70 percent of the membership that cast a ballot voted in favor of a round up program.

How the program will work

Good¢ents will round up a monthly electric bill to the next highest dollar. For example, a bill of $97.65 will round up to $98.00 with the additional 35 cents going to the Good¢ents fund. The small change, about 50 cents per bill per month, will add up quickly. The funds will be dispersed to qualified organizations and individuals in need on a quarterly basis by the Good¢ents Board of Trustees. The goal of the program is to help build a stronger community.

RCA Approval

In October, the RCA approved GVEA's amended tariff sheets for Good¢ents. At the same time, they cautioned us that Good¢ents may be in conflict with Alaska Statute 45.45.930, dealing with Opt-out Marketing Plans. Shortly thereafter, we received a letter from Senior Assistant Attorney General, Ed Sniffen, expressing the same concern.

GVEA had two options, hold fast to our attorney's written opinion that Good¢ents was not in conflict with AS 45.45.930, or pursue a legislative fix. We decided the best course of action was a legislative solution.

After meeting with Assistant AG Ed Sniffen and Senator Meyer's chief of staff, Josh Applebee about the situation, both agreed to support our efforts in a legislative solution.

Where we are now

Legislation has been introduced into the 27th Legislative session to formally authorize electric and telephone cooperatives to offer opt-out charitable giving programs. Senate Bill 36 was introduced by Senator Joe Thomas (D), Fairbanks and was referred to the State Affairs and Judiciary Committees.

SB 36 includes two provisions. The first to Alaska Statute 10.25.237, were it provides authorization for telephone or electric cooperatives to offer an opt-out charitable giving program. The second is an amendment to AS 45.45.930, which provides clarification that AS 45.45.930 does not apply to telephone or electric cooperative opt-out charitable giving programs.

http://www.gvea.com/goodcents/

Good¢ents Start Date: March 1, 2011

(earliest anticipated start date)

GVEA President and CEO Brian Newton answers two common questions.

You have good questions about the Good¢ents program. Here are a couple of the most frequently asked questions answered:

What is Good¢ents?
It's a program that rounds up a monthly electric bill to the next highest dollar. For example, a monthly bill of $97.65 would be rounded up to $98.00, with the additional 35 cents going to the Good¢ents fund. This small change, about 50 cents per month, will raise thousands of dollars every year that will go to building a stronger community.

Who chose to implement this round-up program?
In the spring of 2010, all GVEA members were mailed Bylaw election ballots. The addition of a round-up program, or Good¢ents, was one of the ballot initiatives members were asked to vote on. More than 70 percent voted in favor of a round up program.

Why should I participate?
Good¢ents is an inexpensive and easy way to give back to your community. The average member will give $6 per year; that's a mere 50 cents per month.

If I have multiple accounts, will they all be rounded up?
Yes. Every GVEA account will be rounded up to the nearest whole dollar. If you would prefer only certain accounts participate, please contact us.

Are my contributions tax deductible? Come tax time, how will I know how much I contributed over the year?
Yes, these contributions can be considered tax deductible, charitable donations. On your bills during first quarter of each year, we will include a line indicating how much you contributed over the previous year.

Who can apply for funds?
Non-profit groups and individuals/families in need in our service territory are welcome to apply. Groups based outside of our service territory are also welcome to apply if their works affect those in our service territory.

Why is GVEA automatically enrolling everyone in the program and requiring us to opt-out, rather than asking members to join?
Golden Valley's Member Advisory Committee and Board of Directors debated the notion of automatically enrolling all members versus voluntary enrollment. Research among the more than 250 cooperatives nationwide participating in similar programs showed we would have much better involvement if we chose the former. It's not because people don't want to participate, it's because most people simply wouldn't take the initiative to contact us to sign up.
The program is voluntary in the sense that a member can choose not to participate at any time.

What do I do if I don't want to participate in Good¢ents?
If you choose not to participate, all you have to do is call GVEA at (907) 458-4522 or email goodcents@gvea.com.
In addition, if anytime in the first three years you decide you want your money back, let us know and we'll refund the entire amount you've contributed.

Alaska State House of Representatives
House Labor and Commerce Committee
Representative Kurt Olsen, Chair

RE: House Bill 114, Opt-out Charitable Giving by Cooperatives

Dear Sirs,

Cordova Electric Cooperative supports adoption of HB 114. One of the core tenants of the Cooperative model is that of democratic membership control. As a private, non-profit corporation solely owned by the rate-paying members of the Cooperative, the members are financially vested as equity owners. Members of a Cooperative have the freedom to adopt charitable giving programs to benefit the sustainable development of their communities either by a direct vote to amend their bylaws, or by a vote of their elected board of directors to adopt a policy. The Laws of the State of Alaska should not intervene.

In the opt-out charitable giving programs, the members are free to participate or decline thus retaining their freedom of choice in the matter. I strongly encourage you to recommend this bill for adoption, recognizing that it allows Cooperatives the freedom to exercise their democratic membership control to adopt either opt-in or opt-out charitable giving programs should they choose to engage in charitable giving programs within their communities.

Sincerely,

Clay R. Koplin

February 4, 2011

House Labor and Commerce Committee
Representative Kurt Olson, Chair
Capitol Building, Room 24
Juneau, Alaska 99801

Dear Chair Olson, Vice-Chair Johnson and members of the House Labor and Commerce Committee:

I would like to go on record in support of an amendment to House Bill 114 that would add language to the Electric and Telephone Cooperative Act (Act) allowing electric cooperatives to finance the purchase of weatherization and energy efficiency products and services. Currently, the Act only allows cooperatives to finance the purchase of electrical and plumbing appliances, fixtures and apparatus.

Homer Electric Association, Inc. (HEA) has a Line of Credit program that offers financing to its members for the purchase of products covered under the Act. While this is a popular program, many of our members have inquired about using the Line of Credit program to purchase materials and products that would improve the energy efficiency of their home or business. Unfortunately, due to the limitations specified in the Act, HEA is unable to offer any assistance in the purchase of these types of products.

Homer Electric has worked very hard over the past several years to provide its members with information that will help lower their energy usage and manage their electric bill. Along with regular newsletter articles, web site information and media advertisements, HEA has sponsored Energy and Conservation Fairs to promote energy efficiency products and services. The fairs have attracted nearly 1,000 HEA members annually over the past two years.

As we continue to promote conservation, it makes sense to have energy efficiency and weatherization products included in the Line of Credit program.

We believe that HB 114 is an excellent bill and the proposed amendment will be a valuable addition to this legislation. Thank you for considering our request.

Sincerely,

Bradley P. Janorschke
General Manager

CS FOR SENATE BILL NO. 36(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR THOMAS

A BILL

FOR AN ACT ENTITLED

"An Act relating to an opt-out charitable giving program offered by an electric or telephone cooperative; and allowing for an electric cooperative to assist persons in acquiring and installing weatherization and energy efficiency products and services."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 10.25.010(a) is amended to read:

(a) Except as provided in (b) of this section, an electric or telephone cooperative may

(1) sue and be sued in its corporate name;

(2) have perpetual existence;

(3) adopt a corporate seal and alter it;

(4) construct, buy, lease, or otherwise acquire, and equip, maintain, and operate, and sell, assign, convey, lease, mortgage, pledge, or otherwise dispose of or encumber lands, buildings, structures, electric or telephone lines or systems, dams, plants and equipment, and any other real or personal property, tangible or intangible,

that is necessary, convenient, or appropriate to accomplish the purpose for which the cooperative is organized;

(5) buy, lease, or otherwise acquire, and use, and exercise and sell, assign, convey, mortgage, pledge or otherwise dispose of or encumber franchises, rights, privileges, licenses, and easements;

(6) borrow money and otherwise contract indebtedness, and issue evidences of indebtedness, and secure the payment of the indebtedness by mortgage, pledge, or deed of trust of, or any other encumbrance upon its real or personal property, assets, franchises, or revenues;

(7) construct, maintain, and operate electric transmission and distribution lines, or telephone lines along, upon, under and across publicly owned lands and public thoroughfares, including, without limitation, all roads, highways, streets, alleys, bridges, and causeways;

(8) exercise the power of eminent domain;

(9) become a member of other cooperatives or corporations or own stock in them;

(10) conduct its business and exercise its powers inside or outside the state;

(11) adopt, amend, and repeal bylaws;

(12) make all contracts necessary, convenient, or appropriate for the full exercise of its powers;

(13) make donations for the public welfare or for charitable, scientific, or educational purposes;

(14) **offer an opt-out charitable giving program as described in AS 10.25.237;**

(15) do and perform any other act and thing, and have and exercise any other power that may be necessary, convenient, or appropriate to accomplish the purpose for which the cooperative is organized.

*** Sec. 2.** AS 10.25.020 is amended to read:

Sec. 10.25.020. Powers of electric cooperative. An electric cooperative may

(1) generate, manufacture, purchase, acquire, accumulate, and transmit

electric energy, and distribute, sell, supply, and dispose of electric energy to its members, to governmental agencies and political subdivisions, and to other persons not exceeding 10 percent of the number of its members; however, a cooperative that acquires existing electric facilities may continue service to persons, not in excess of 40 percent of the number of its members, who are already receiving service from these facilities without requiring them to become members, and these persons may become members upon the terms as may be prescribed in the bylaws;

(2) assist persons to whom electric energy is or will be supplied by the cooperative in wiring their premises and in acquiring and installing electrical and plumbing appliances, equipment, fixtures, and apparatus**, and weatherization and energy efficiency products and services** by financing them, and, in connection with these services, wire or have wired the premises, and buy, acquire, lease, sell, distribute, install, and repair electric and plumbing appliances, equipment, fixtures, and apparatus**, and weatherization and energy efficiency products and services**;

(3) assist persons to whom electric energy is or will be supplied by the cooperative in constructing, equipping, maintaining, and operating electric cold storage or processing plants by financing them or otherwise;

(4) operate a waste heat distribution system;

(5) operate a heating distribution system that was in existence on June 9, 1988;

(6) provide sewer, water, or gas utility service if the cooperative has received a certificate of convenience and necessity under AS 42.05.221 - 42.05.281 from the former Alaska Public Utilities Commission or the Regulatory Commission of Alaska for each type of service provided;

(7) provide direct satellite television programming services; in this paragraph, "direct satellite television programming services" means a video broadcast signal that is received directly from a satellite by an end user.

* **Sec. 3.** AS 10.25 is amended by adding a new section to article 1 to read:

Sec. 10.25.237. Electric or telephone cooperative opt-out charitable giving program. (a) Notwithstanding AS 45.45.930 and if approved by the membership of the cooperative in accordance with this chapter, an electric or telephone cooperative

may offer its members an opportunity to participate in an opt-out charitable giving program that rounds the monthly bill of a member to the next whole dollar amount but does not exceed 99 cents a month.

(b) To qualify as an allowable opt-out charitable giving program under this section, the cooperative shall

(1) clearly identify on each monthly billing statement the amount added after rounding to the next whole dollar amount and provide instructions on each monthly billing statement explaining how to opt out of the program in person at the cooperative, in writing, by telephone, or by using the Internet;

(2) include a notation on each monthly billing statement informing the member that the amount rounded to the next whole dollar is a voluntary contribution by the member;

(3) use the program's proceeds only for the public welfare or charitable, scientific, or educational purposes but not for any political purpose or for the pecuniary profit of any individual or organization; in this paragraph, a charitable purpose includes the relief of poverty, distress, or other condition of public concern in the state; and

(4) allow a member the opportunity to claim a full refund of all amounts paid by the member under the program for at least the three preceding years.

*** Sec. 4.** AS 45.45.930 is amended by adding a new subsection to read:

(f) This section does not apply to an opt-out charitable giving program offered by an electric or telephone cooperative under AS 10.25.237.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 36
2011 LEGISLATIVE SESSION

Analysis

Senate Bill 36 gives statutory authority for electric and telephone cooperatives to offer an opt-out charitable giving program to their members, when the program has been approved by a majority of the membership. The agency does not predict a fiscal impact as a result of the proposed legislation. Accordingly, the agency submits a zero fiscal note.

From Senator Thomas

Proposed amendment:

(b) To qualify as an allowable opt-out charitable giving program under this section, the cooperative shall

(1) clearly identify on each monthly billing statement the amount added after rounding to the next whole dollar amount and provide instructions on each monthly billing statement explaining how to opt out of the program in person at the cooperative, in writing, by telephone, or by using the Internet;

(2) include a notation on each monthly billing statement informing the member that the amount rounded to the next whole dollar is a voluntary contribution by the member;

(3) use the program's proceeds only for [THE RELIEF OF POVERTY, DISTRESS, OR OTHER CONDITIONS OF GENERAL PUBLIC CONCERN BUT NOT FOR RELIGIOUS ORGANIZATIONS, POLITICAL ORGANIZATIONS, ORGANIZED LABOR UNIONS, OR OTHER LABOR ORGANIZATIONS, OR FOR ANY POLITICAL PURPOSE; AND] **the public welfare or charitable, scientific, or educational purposes. For the purposes of this section, a charitable purpose is the relief of poverty, distress, or other condition of public concern in the state. Notwithstanding the above, proceeds shall not be used for any political purpose or for the pecuniary profit of any individual or organization.**

(4) allow a member the opportunity to claim a full refund of all amounts paid by the member under the program for at least the three preceding years.

Subject: HB 114 amendment

Hi Jane. I'm attaching a proposed amendment to HB 114 to address the concerns that were discussed in House L&C about the definition of "charitable purpose." I had a chance to dig into this a little, and also collaborated with our charities guru, and the attached is what we think will do the best job. Here's a little of our research and reasoning:

It seems clear that the intent is for cooperatives to be able to distribute funds for charitable purposes, but not necessarily strictly to charitable organizations or 501(c)(3)s. Round-up programs in other states have grant programs that don't require funds to go strictly to 501(c)(3) organizations. If you were to limit distributions to charities, you might cut out other community organizations like public schools. I think the definition is not as important as the purpose of the actual giving. If it benefits the public, it is probably charitable. What is not charitable is benefiting the private interests of the members, specific individuals or groups—generally organizations should have conflict of interest policies to prevent that.

AS 10.25.010(a)(13) gives telephone and electric cooperatives the power to distribute funds for the "public welfare or for charitable, scientific, or educational purposes." So, the proposed amendment fits with that, and is consistent with the definition used by Alaska's gaming and the charitable solicitations acts.

The definition of a charity—whether it is found in charitable trust law, the internal revenue code/IRS regulations, state charitable solicitations laws, or Alaska Supreme Court decisions, is very broad. The Alaska Supreme Court has defined "other conditions of general public concern" to encompass a "vast array of possible programs and allows proceeds to be used for a broad range of uses, including 'political, educational, civic, public, charitable, patriotic, or religious uses'" *Roberts v. State Department of Revenue*, 162 P.3d 1214, 1222. There are two other AK supreme court cases that also define "charity" broadly—*Matanuska-Susitna Borough v. King's Lake Camp* and *Fairbanks North Star Borough v. Dena Nena Henash* that apply the "common law" definition of charity which they define as a "gift to the general public use" or "what is done out of good will and a desire to add to the improvement of the moral, mental, and physical welfare of the public generally." The Third Restatement of Trusts (which the Alaska Supreme Court relies on in defining "general public concern") states that charitable trust purposes include the relief of poverty, advancement of

knowledge or education, advancement of religion, promotion of health, governmental or municipal purposes, and other purposes that are beneficial to the community.

It is really going to be up to the cooperatives to organize the programs and set parameters on how they want to distribute the funds. If a cooperative was collecting funds claiming they were for a charitable purpose, but not actually using the funds for a charitable purpose, that would fall within the Attorney General's authority to enforce a charitable trust in addition to violating the Charitable Solicitations Act and Consumer Protection Act.

There may also be a constitutional equal protection issue with excluding religious and labor organizations. If they are similarly situated to other charities, the only reason they are being excluded is because they have some religious or labor affiliation. For example, the Salvation Army is a religious organization and Catholic Social Services is the social service arm of the Archdiocese of Anchorage. Providence Hospital and the Brother Francis Shelter in Anchorage may also be religious organizations. Churches and religious organizations are usually 501(c)(3) organizations. And some smaller communities may rely on religious organizations to do charitable work like providing soup kitchens, taking care of disaster victims, etc. The committee may be inadvertently be cutting out a number of charities with religious affiliations. It sounds like the reason the committee wants to exclude them is because Tanana Valley said religious organizations are excluded under their bylaws. Other cooperatives may not have that type of exclusion. If the issue of who to exclude should be something for the cooperatives to decide for themselves, then include in their bylaws (or the bylaws of the related organization they form to handle the grants).

I don't think there is a problem with excluding political campaigns. 501(c)(3) organizations are prohibited from giving money to political campaigns.

I hope this helps! Let me know if you have any questions. Feel free to share with the Judiciary Committee.

To: Senator Bill Wielechowski
Senate State Affairs Committee

From: Senator Hollis French HSF

RE: Hearing Request for SB 39 – U.S. Presidential Election Compact

---

This is a request that you schedule a hearing for SB 39 – U.S. Presidential Election Compact - at the earliest possible time. For the committee's use, I have attached a copy of the bill, a sponsor statement, a one page summary of the legislation, some news articles on the topic, Alaska specific poll data and a partial list of people who will be present to testify. No audio/visual equipment will be necessary for a bill hearing. A sectional analysis is forthcoming.

If you have any questions, please contact Andy Moderow in my office at 907-465-4923.

Senator Hollis French

Sponsor Statement

SB 39 – U.S. Presidential Election Compact

If there is one bedrock rule in elections it is this: the person with the most votes is the winner. This legislation would guarantee the Presidency to the candidate who receives the most votes in the United States.

The concept of 'the person with the most votes wins' is simple, but it hasn't always worked out that way in our Presidential elections.

In 1876 Samuel Tilden received 254,000 more votes that Rutherford Hayes; however, Hayes won the Electoral College tally by one vote by having won a number of states by very small margins. In 1888 Grover Cleveland led in the popular vote over Benjamin Harrison, 48.6 percent to 47.8 percent, but Harrison won the Electoral College by a 233-168 margin, largely by virtue of his 1 percent win in Cleveland's home state of New York. In 2000 Al Gore won the popular vote by just over 500,000 votes but lost in the Electoral College to George Bush 266-271. In 2004 a shift of only 60,000 votes in Ohio from George Bush to John Kerry would have resulted in Kerry winning the Electoral College despite losing the popular vote by over 3 million votes.

SB 39 corrects this defect in our Presidential elections not by doing away with the Electoral College but by modifying how each state's electoral votes are cast. Currently the state's Electoral College votes are cast 100% in favor of the popular vote winner in the state. The bill would have Alaska join a compact made up of states that have pledged to cast their electoral votes in favor of the national popular vote winner. The compact would not go into effect until enough states have joined to put a majority of the Electoral College votes in the compact.

The choice of how to allocate our vote within the Electoral College was given to us by Article II, Section I of the US Constitution. The founding fathers of our country left the decision on how to select electors up to each individual state legislature. The US Supreme Court has written that "the appointment and mode of appointment of electors belong exclusively to the states under the constitution of the United States." *McPherson v. Blacker*, 146 U.S. 1 at 29 (1892).

Many believe that the current system causes candidates to focus on swing states, and swing state issues, instead of approaching the country as a whole. It is beyond dispute that under the current system candidates spend their campaign funds on just a few states. Here's an example of how this plays out in Alaska. During the final 40 days of the 2008 election, 99% of all media expenditures were made in 17 states. Alaska, needless to say, was not one of them.

In a close presidential election that decides our country's future, all states should be swing states. Every vote should count, and should be sought by every candidate. This bill will promote truly national presidential campaigns, and it will ensure that the person sent to occupy the most powerful office in the world is the one who got the most votes in the election.

SENATE BILL NO. 39

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY SENATOR FRENCH

Introduced: 1/19/11
Referred: State Affairs, Judiciary, Finance

A BILL

FOR AN ACT ENTITLED

"An Act ratifying an interstate compact to elect the President and Vice-President of the United States by national popular vote; and making related changes to statutes applicable to the selection by voters of electors for candidates for President and Vice-President of the United States and to the duties of those electors."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 15.30 is amended by adding new sections to read:

Article 1A. Agreement Among the States to Elect the President by National Popular Vote.

Sec. 15.30.095. Agreement Among the States to Elect the President by National Popular Vote. The Agreement Among the States to Elect the President by National Popular Vote contained in this section is enacted into law and entered into on behalf of the State of Alaska with other states joining in it in a form substantially as set out in this section.

ARTICLE I. MEMBERSHIP

Any state of the United States and the District of Columbia may become a member of this agreement by enacting this agreement.

ARTICLE II. RIGHT OF THE PEOPLE IN MEMBER STATES TO VOTE FOR PRESIDENT AND VICE-PRESIDENT

Each member state shall conduct a statewide popular election for President and Vice-President of the United States.

ARTICLE III. MANNER OF APPOINTING PRESIDENTIAL ELECTORS IN MEMBER STATES

Before the time set by law for the meeting and voting by the presidential electors, the chief election official of each member state shall determine the number of votes for each presidential slate in each state of the United States and in the District of Columbia in which votes have been cast in a statewide popular election and shall add those votes together to produce a "national popular vote total" for each presidential slate.

The chief election official of each member state shall designate the presidential slate with the largest national popular vote total as the "national popular vote winner."

The presidential elector certifying official of each member state shall certify the appointment in that official's own state of the elector slate nominated in that state in association with the national popular vote winner.

At least six days before the day fixed by law for the meeting and voting by the presidential electors, each member state shall make a final determination of the number of popular votes cast in the state for each presidential slate and shall communicate an official statement of that determination within 24 hours to the chief election official of each other member state.

The chief election official of each member state shall treat as conclusive an official statement containing the number of popular votes in a state for each presidential slate by the day established by federal law for making a state's final determination conclusive as to the counting of electoral votes by Congress.

In event of a tie for the national popular vote winner, the presidential elector certifying official of each member state shall certify the appointment of the elector slate nominated in association with the presidential slate receiving the largest number

of popular votes within that official's own state.

If, for any reason, the number of presidential electors nominated in a member state in association with the national popular vote winner is less than or greater than that state's number of electoral votes, the presidential candidate on the presidential slate that has been designated as the national popular vote winner shall have the power to nominate the presidential electors for that state and that state's presidential elector certifying official shall certify the appointment of such nominees.

The chief election official of each member state shall immediately release to the public all vote counts or statements of votes as they are determined or obtained.

This article shall govern the appointment of presidential electors in each member state in any year in which this agreement is, on July 20, in effect in states cumulatively possessing a majority of the electoral votes.

ARTICLE IV. OTHER PROVISIONS

This agreement takes effect when states cumulatively possessing a majority of the electoral votes have enacted this agreement in substantially the same form and the enactments by those states have taken effect in each state.

Any member state may withdraw from this agreement, except that a withdrawal occurring six months or less before the end of a President's term shall not become effective until a President or Vice-President shall have been qualified to serve the next term.

The chief executive of each member state shall promptly notify the chief executive of all other states of when this agreement has been enacted and has taken effect in that official's state, when the state has withdrawn from this agreement, and when this agreement takes effect generally.

This agreement shall terminate if the electoral college is abolished.

If any provision of this agreement is held invalid, the remaining provisions shall not be affected.

ARTICLE V. DEFINITIONS

(A) "Chief election official" means the state official or body authorized to certify the total number of popular votes for each presidential slate.

(B) "Chief executive" means the Governor of a State of the United States or the Mayor of the District of Columbia.

(C) "Elector slate" means a slate of candidates who have been nominated in a state for the position of presidential elector in association with a presidential slate.

(D) "Presidential elector" means an elector for President and Vice-President of the United States.

(E) "Presidential elector certifying official" means the state official or body that is authorized to certify the appointment of the state's presidential electors.

(F) "Presidential slate" means a slate of two persons, the first of whom has been nominated as a candidate for President of the United States and the second of whom has been nominated as a candidate for Vice-President of the United States, or any legal successors to those persons, regardless of whether both names appear on the ballot presented to the voters in a particular state.

(G) "State" means a state of the United States and the District of Columbia.

(H) "Statewide popular election" means a general election in which votes are cast for presidential slates by individual voters and counted on a statewide basis.

Sec. 15.30.098. Implementation of agreement. In AS 15.30.095, "chief election officer" means the director of the division or other person appointed under this title to serve as the chief election official of the state.

*** Sec. 2.** AS 15.30.060 is amended to read:

Sec. 15.30.060. Notification of electors. **Except as provided in (b) of this section, when** [WHEN] the results of the election of presidential electors have been determined, the director shall send a certificate of election to each elector and shall notify the electors of the time and place of their meeting and of their duties as electors.

*** Sec. 3.** AS 15.30.060 is amended by adding a new subsection to read:

(b) Whenever the provisions of art. III of the Agreement Among the States to

Elect the President by National Popular Vote as set out in AS 15.30.095 relating to certification of the appointment of the elector slate nominated in that state in association with the national popular vote winner of a presidential election apply to determine the election of presidential electors, this subsection applies and the provisions of (a) of this section do not apply. If this subsection applies, notwithstanding AS 15.15.450, mandating that the director provide a certificate of election to the candidate receiving the largest number of votes, the director shall send a certificate of election to each elector determined under AS 15.30.095 and shall notify the electors of the time and place of their meeting and their duties as electors.

*** Sec. 4.** AS 15.30.090 is amended to read:

Sec. 15.30.090. Duties of electors. **Except as provided in (b) of this section, after** [AFTER] any vacancies have been filled, the electors shall proceed to cast their votes for the candidates for the **offices** [OFFICE] of President and Vice-President of the party that selected them as candidates for electors, or for the candidates for the **offices** [OFFICE] of President and Vice-President under AS 15.30.026 if the electors were named under AS 15.30.026, and shall perform the duties of electors as required by the constitution and laws of the United States. The director shall provide administrative services and the Department of Law shall provide legal services necessary for the electors to perform their duties.

*** Sec. 5.** AS 15.30.090 is amended by adding a new subsection to read:

(b) Whenever the provisions of art. III of the Agreement Among the States to Elect the President by National Popular Vote as set out in AS 15.30.095 relating to certification of the appointment of the elector slate nominated in that state in association with the national popular vote winner of a presidential election apply and determine the election of presidential electors, this subsection applies and the provisions of (a) of this section do not apply. If this subsection applies, after any vacancies have been filled, the electors shall proceed to cast their votes for the candidates for the offices of President and Vice-President of the party as provided in AS 15.30.095, and shall perform the duties of electors as required by the constitution and laws of the United States. The director shall provide administrative services and the Department of Law shall provide legal services necessary for the electors to

perform their duties.

National Popular Election of the President

National Popular Vote!

www.NationalPopularVote.com

March 9, 2010

"Agreement Among the States to Elect the President by National Popular Vote"

The National Popular Vote bill would guarantee the Presidency to the candidate who receives the most popular votes in all 50 states (and the District of Columbia).

The bill has passed 29 legislative chambers in 19 states (AR, CA, CO, CT, DE, HI, IL, ME, MD, MA, MI, NV, NJ, NM, NC, OR, RI, VT, WA) and been endorsed by 1,825 state legislators.

The bill has been enacted by state legislatures representing 61 electoral votes — 23% of the 270 necessary to activate the law (Hawaii, Illinois, Maryland, New Jersey, and Washington).

The shortcomings of the current system stem from the winner-take-all rule (i.e., awarding all of a state's electoral votes to the candidate who receives the most popular votes in each state).

Because of the winner-take-all rule, a candidate can win the Presidency without winning the most popular votes nationwide. This has occurred in 4 of the nation's 56 presidential elections (and 1 in 7 of the non-landslide elections). A shift of fewer than 60,000 votes in Ohio in 2004 would have defeated President Bush despite his nationwide lead of 3,500,000 votes.

Another shortcoming of the winner-take-all rule is that presidential candidates have no reason to poll, visit, advertise, or organize in states where they are comfortably ahead or hopelessly behind. In 2008, candidates concentrated over two-thirds of their campaign visits and ad money in just six closely divided "battleground" states. A total of 98% went to just 15 states. In other words, voters in two thirds of the states were essentially spectators to the election.

The U.S. Constitution gives the states exclusive and plenary control over the manner of awarding their electoral votes. The winner-take-all rule is not in the Constitution. It was not the Founder's choice and was used by only 3 states in the nation's first presidential election in 1789. Maine and Nebraska currently award electoral votes by congressional district — a reminder that an amendment to the U.S. Constitution is not required to change the way the President is elected.

Under the National Popular Vote bill, all the electoral votes from the enacting states would be awarded, as a bloc, to the presidential candidate who receives the most popular votes in all 50 states (and DC). The bill would take effect only when enacted by states possessing a majority of the electoral votes — that is, enough electoral votes to elect a President (270 of 538). The bill would replace the current state-by-state system of awarding electoral votes with a system based on winning the most individual votes in all 50 states (and DC).

The bill has been endorsed by the *New York Times*, *Chicago Sun-Times*, *Minneapolis Star-Tribune*, *Los Angeles Times*, *Boston Globe*, *Sacramento Bee*, Common Cause, and Fair Vote.

State polls show strong support for a national popular vote (AK–70%, AR–80%, CA–70%, CO–68%, CT–74%, DC–76%, DE–75%, ID–77%, IA–75%, KY–80%, ME–77%, MA–73%, MI–73%, MS–77%, MO–70%, NH–69%, NE–74%, NV–72%, NM–76%, NY–79%, NC–74%, OH–70%, OK–81%, PA–78%, RI–74%, SD–75%, UT–70%, VT–75%, VA–74%, WA–77%, WI–71%, and WV–81%). Support is strong in every partisan and demographic group.

The National Advisory Board of National Popular Vote includes former congressmen John Anderson (R–Illinois and later independent presidential candidate), John Buchanan (R–Alabama), Tom Campbell (R–California), and Tom Downey (D–New York) and former Senators Birch Bayh (D–Indiana), David Durenberger (R–Minnesota), and Jake Garn (R–Utah).

Additional information is available in our book *Every Vote Equal: A State-Based Plan for Electing the President by National Popular Vote* and at `www.NationalPopularVote.com`.

In summary, the National Popular Vote bill will guarantee that every voter in every state will be politically relevant in every presidential election and that every vote will be equal.

The New York Times

Drop Out of the College

New York Times Editorial
March 14, 2006

The Electoral College is an antidemocratic relic. Everyone who remembers 2000 knows that it can lead to the election of the candidate who loses the popular vote as president. But the Electoral College's other serious flaws are perhaps even more debilitating for a democracy. It focuses presidential elections on just a handful of battleground states, and pushes the rest of the nation's voters to the sidelines.

There is an innovative new proposal for states to take the lead in undoing the Electoral College. Legislatures across the country should get behind it.

Both parties should have reason to fear the college's perverse effects. In 2000, the Democrats lost out. But in 2004, a shift of 60,000 votes in Ohio would have elected John Kerry, even though he lost the national popular vote decisively.

Just as serious is the way the Electoral College distorts presidential campaigns. Candidates have no incentive to campaign in, or address the concerns of, states that reliably vote for a particular party. In recent years, the battleground in presidential elections has shrunk drastically. In 1960, 24 states, with 327 electoral votes, were battleground states, according to estimates by National Popular Vote, the bipartisan coalition making the new proposal. In 2004, only 13 states, with 159 electoral votes, were. As a result, campaigns and national priorities are stacked in favor of a few strategic states. Ethanol fuel, a pet issue of Iowa farmers, is discussed a lot. But issues of equal concern to states like Alabama, California, New York and Indiana are not.

The Electoral College discourages turnout because voters in two-thirds of the nation know well before Election Day who will win their states. It also discriminates among voters by weighing presidential votes unequally. A Wyoming voter has about four times as much impact on selecting that state's electors as a California voter does on selecting that state's.

The answer to all of these problems is direct election of the president. Past attempts to abolish the Electoral College by amending the Constitution have run into difficulty. But National Popular Vote, which includes several former members of Congress, is offering an ingenious solution that would not require a constitutional amendment. It proposes that states commit to casting their electoral votes for the winner of the national popular vote. These promises would become binding only when states representing a majority of the Electoral College signed on. Then any candidate who won the popular vote would be sure to win the White House.

The coalition is starting out by trying to have laws passed in Illinois and a few other states. Americans are rightly cautious about tinkering with mechanisms established by the Constitution. But throughout the nation's history, there have been a series of reforms affecting how elections are conducted, like the ones that gave blacks and women the vote and provided for the direct election of United States senators. Sidestepping the Electoral College would be in this worthy tradition of making American democracy more democratic.

The Fayetteville Observer

Our View: Electoral vote change would be good for the state and its people

The Fayette Observer Editorial
May 16, 2007

Four times since the framers met in Philadelphia in 1787, the presidency has gone to the candidate on the losing end of the popular vote. The republic still stands.

That's hardly a compelling argument for leaving things as they are. The Electoral College less than perfectly reflects the will of the people, and the threat of the "faithless elector" who tips an election the way his partisan bias dictates is real, if remote. Both threats would vanish if the election automatically went to the candidate for whom most registered voters pulled the lever.

This is the point at which the conversation normally would turn to amending the federal Constitution to abolish the Electoral College. But the state Senate has just passed a bill that would achieve a comparable effect by simple statute.

The bill provides that, if enough states join in to command a majority in the Electoral College, all of North Carolina's electoral votes will be awarded to the winner of the popular vote — not the statewide winner, but the one who wins nationwide. More than 40 states are already looking at substantially the same bill.

If it works as planned, the problem goes away, with no violence done to the Constitution.

Something else happens, too. North Carolina will less often find itself in political obscurity when the nation chooses its top leader.

During the 2000 election, one analyst noted that the candidates were focusing most of their time and effort on 11 swing states. Ironically, only three of those had more electoral votes than North Carolina, which was not one of the 11. If candidates understand that they have a real shot at our 15 electoral votes right up until the polls close on that fateful Tuesday in November, we are unlikely to be shrugged off or taken for granted again.

The arguments against it are no stronger than those for retaining the Electoral College in all its supreme majesty: (1) it's different; and (2) it means that North Carolina could end up giving its 15 votes to someone not favored by the majority of Tar Heel voters. The first argument lacks heft. The second would make perfect sense, but only if one could ignore the fact that presidential elections are held to enable individual Americans to put someone in the White House, not merely to express each state's collective pique or pleasure.

This is worth a try — for the sake of simplicity and fairness, and in the interest of raising our state's political profile.

Public Policy Polling

Alaska Survey Results

Q1 How do you think we should elect the President: should it be the candidate who gets the most votes in all 50 states, or the current electoral college system? If you think it should be the candidate who gets the most votes in all 50 states, press 1. If you think it should be the current electoral college system, press 2.

Candidate who gets the most votes in all 50 states	70%	*Current electoral college system*	30%

MEMORANDUM January 27, 2011

SUBJECT: Sectional summary of SB 39 (Work Order No. 27-LS0372/A)

TO: Senator Hollis French
Attn: Andy Moderow

FROM: Alpheus Bullard
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Ratifies an interstate compact to elect the President and Vice-President of the United States by national popular vote. Under the compact (and the bill), the presidential candidate who receives the most popular votes in all 50 states and the District of Columbia will win the presidency. Under the compact, all of the state's electoral votes would be awarded to the presidential candidate who receives the most popular votes in all 50 states and the District of Columbia. This compact would take effect only when enacted by states possessing a majority of the electoral votes, that is, enough electoral votes to elect a President, which is 270 of 538 electoral votes.

Sections 2 - 5. Conform statutes to the changes made by section one of the bill.

SB 39: An Act ratifying an interstate compact to elect the President and Vice-President of the United States by national popular vote
February 2011

Submitted By: Tara Ross
Author of *Enlightened Democracy: The Case for the Electoral College*

Overview

I urge you to vote against SB 39. It would create many new, logistical problems for our presidential election process. It would also essentially eliminate the Electoral College, an institution that protects less densely populated states such as Alaska and is critical to the success of our republican democracy.

Problems Created by SB 39. The National Popular Vote plan proposed by SB 39 contains many hidden problems. NPV awards the presidency to the winner of any plurality—even a very small one. Alaska could be required to cast its electoral votes for a candidate who did not qualify for the ballot in Alaska. Recounts would be controlled by 51 different standards (50 states plus D.C.), rather than one national standard. Chaos, litigation, and confusion would result. Some voters would be disenfranchised because their votes would be counted in different ways, depending on their state of residence.

Applying the Electoral College Today. The Electoral College provides many benefits that still serve Americans:

- *The Benefits of Federalism.* Presidential candidates must build national coalitions of voters. Historically speaking, the candidate who builds the broadest coalition will win. Thus, presidents are good representatives for all Americans; they do not merely represent one region, state, or special interest group.
- *Moderation and Compromise.* The Electoral College encourages Americans to work together, across state lines. A direct election system, by contrast, would result in multi-party presidential races, a fractured electorate, increasingly extremist third-party candidates, and constant recounts.
- *Stability and Certainty in Elections.* The Electoral College typically produces quick and undisputed outcomes. Any problems are isolated to one or a handful of states. Fraud is minimized because it is hard to predict where stolen votes will matter.

Conclusion. We must not allow the Electoral College to be eliminated through legislation such as SB 39. This important aspect of our Constitution continues to protect our freedom, just as it did when it was created in 1787.

THE SENATE OF THE STATE OF ALASKA
COMMITTEE ON GOVERNMENT OPERATIONS

SB 39: An Act Relating to the Agreement Among the States to Elect the President by National Popular Vote
February 2011

Submitted By: Tara Ross
Author of *Enlightened Democracy: The Case for the Electoral College*

Full Testimony

The bill before you, SB 39, represents the latest attempt to eliminate America's unique and successful presidential system. Abolishing the Electoral College would be unhealthy for the country and especially detrimental to less densely populated states such as Alaska. But eliminating the Electoral College through this roundabout manner, without going through a formal constitutional amendment process, carries its own special dangers.

Proponents claim the National Popular Vote plan outlined in SB 39 will ensure that all voters receive equal attention because each vote will be weighted equally. But the truth is the precise opposite. NPV will lessen the need of presidential candidates to obtain the support of voters in rural areas and in states such as Alaska.

Problems Created by NPV

The plan proposed by NPV is fraught with difficulties—some logistical, some philosophical. I will discuss these latter issues—arguments "for" and "against" the Electoral College—in a moment. But the logistical difficulties of changing the presidential election process without a constitutional amendment need to be fully explored.

The current presidential election process blends federalist and democratic principles. America holds 51 completely separate, purely democratic elections each presidential election year (one in each state, plus D.C.). Local election laws impact the manner in which each of these elections is held, but any differences among states' election codes don't matter. The unique laws of any particular state impact only voters within that state. The country holds 51 completely separate elections, and it achieves 51 different sets of results. Each state's single goal is to select a slate of electors that will represent it in the later, national election among the states. NPV would change this. America would still hold 51 separate elections, but NPV would attempt to derive one single result from these 51 elections. Suddenly, internal variances among states' processes—previously irrelevant—would matter a great deal. Seeking change through a constitutional amendment would avoid these problems. An amendment would help establish one set of national laws to govern one national election. Instead, consider just a few of the logistical problems that could occur with NPV in place:

First, note that NPV can't force states that have rejected NPV to participate in a run-off. Thus, it gives the presidency to the candidate winning *any* plurality, even a very small one. **NPV is not looking for a majority winner. It is not even looking for a minimum plurality.** As a practical and logistical matter, it can't. Thus, a candidate could win with only 15 or 20 percent of votes nationwide. But it gets worse. Under this scheme, Alaska could be forced to award its entire slate of electors to a candidate who was not on its own ballot. Imagine, for instance, that Ron Paul qualifies for the ballot in Texas and obtains a winning plurality solely from Texas voters. Paul did not bother to qualify for the ballot in a place like Alaska. Voters in that state did not have the chance to vote for—or against—him. Yet Alaska would *still* be forced to award its entire slate of electors to the choice of Texas voters. Alaska probably did not nominate a slate of electors for Paul because he was not on its ballot. NPV's compact offers a solution, but it is doubtful that voters in Alaska will like it. Paul would be entitled to personally appoint the three electors who will represent Alaska in the Electoral College vote. In all likelihood, he would select Texans to represent Alaska in the presidential election so that he would not be undermined by a "faithless" elector who was determined to vote for the choice of Alaska's voters.

There are other inconsistencies among states' ballots that would skew the election results. Some states allow felons to vote. Some states do not. States differ in their requirements for ballot qualification. Inevitably, Alaska would have to abide by national election results derived from policies with which it disagrees.

I wish I were done, but I am not. It gets even worse. States have different criteria for what does (or does not) trigger recounts within their borders. These differences could cause a whole host of problems. What if the national total is close—close enough to warrant a recount—but a recount can't be conducted because the margins in individual states were not close? Or perhaps recounts are conducted, but only in two or three states, each with a different idea of how to count a hanging chad. Perhaps a fourth state would see what is going on and choose to conduct a recount that its statutes previously deemed optional. Maybe this fourth state has a different definition of "hanging chad," and its sole goal is to counteract the efforts of the other states.

Such a state of affairs invites chaos, litigation, and confusion each and every election year. Some voters will be disenfranchised by the widely differing ideas of how to count a vote. What if such problems caused one state to pull out of the compact in violation of its terms? How would compliance be enforced? How much litigation would ensue before the presidential election could be resolved?

Formally eliminating the Electoral College through a constitutional amendment would be unhealthy for the country. But NPV's efforts to skirt the constitutional amendment process altogether would create added difficulties. These logistical nightmares could haunt the country each and every presidential election year.

The Benefits of the Electoral College

I do not mean to imply that the only problem with NPV is its logistical difficulties. Eliminating the Electoral College would do serious harm to a country as diverse as our own. The system provides our country with many great benefits that tend to remain unnoticed and thus unappreciated by most Americans.

The history of the Electoral College must be understood if its benefits are to be appreciated. The Founders sought to reconcile two seemingly irreconcilable goals: They wanted the people to govern themselves, but they also wanted to protect minority interests. A pure democracy would not accomplish this objective because it allows 51 percent of the people to rule the other 49 percent—all the time, without exception. If America were a pure democracy, imagine what could happen in the wake of an event like 9/11. A bare majority could enact any law it desired, even if that law were tyrannical, racist, or penalized some for their religious beliefs. The Founders thus did not create a pure democracy. Instead, their Constitution tempers its democratic aspects with republican and federalist characteristics. Safeguards such as the Senate (one state, one vote representation), supermajority requirements to amend the Constitution, and the Electoral College allow the majority to rule, but only while it acts reasonably. Minority political interests are protected.

The Electoral College provides three benefits that still protect Americans today.

The Benefits of Federalism

Electoral College opponents argue that presidential elections are undemocratic. They are wrong. America holds 51 purely democratic elections each presidential election year (each state, plus D.C.). Such a process combines democracy and federalism into one process. The result is that candidates can't win without nationwide support. Obama can't rely solely on big cities in California. Republicans can't rely solely on Texas. They must win simultaneous, concurrent majorities nationwide. They can't achieve those victories unless they reach out to a wide variety of voters. They will fail if they rely upon isolated pockets of support in one region or among voters in one special interest group.

Many dispute that our system creates national coalition-building, arguing that it instead causes a disproportionate focus on mid-sized "swing" states. These arguments appear true if we focus on one or a handful of election years in isolation. But if we look at the states' full histories of voting, we see that the identity of "swing" and "safe" states changes all the time. California is often viewed as irreversibly Democrat, but it voted for Republican candidate George H.W. Bush as recently as 1988. Texas used to be as undeniably Democrat as it is Republican today. States such as Georgia, Kentucky, and Louisiana all voted for Bill Clinton in the 1990s, but they were considered very safe Republican states in 2008.

Ultimately, the Electoral College ensures that the political parties must reach out to all the states. As a matter of history, no political party has ever been able to ignore any state for too long without feeling the ramifications at the polls.

Moderation and Compromise

The most likely consequence of a change to a direct popular vote is the breakdown of the two-party system. Today, third-party candidates do not receive much support. In a direct popular election, everything changes. A vote for Ross Perot or Ralph Nader is no longer "wasted," and the number of presidential candidates would increase. Voters would fracture their votes across many candidates. The result will be lower vote totals per candidate and an increased likelihood that two or more candidates will have close popular vote totals. Recounts would proliferate. Worse, extremist candidates could more easily sway an election, because no candidate is required to obtain majority support.

NPV proponents argue that the President should have the support of most Americans. But in real life, "most" Americans will never agree on their ideal candidate. Individuals' opinions differ too greatly. Given the general inability to obtain majority consensus (or even the consensus of a large plurality), the Electoral College provides the country with the next best alternative. Electing Presidents by states' electoral votes, rather than individuals' votes, creates a method of electing a President who is a good compromise candidate for most Americans, as represented by their states. The Electoral College requires moderation, compromise, and coalition-building from any candidate before he can be successful.

Stability and Certainty in Elections.

The Electoral College encourages stability and certainty in our political system. Events such as those that occurred in 2000 are rare. The Electoral College typically produces quick and undisputed election outcomes for two reasons: First, the system (along with the winner-take-all rule) tends to magnify the margin of victory, giving the victor a certain and demonstrable election outcome. Such certainty can't be provided by a direct popular election. Popular votes are often close, and these close votes can result in constant litigation and recounts. Second, the system controls the impact of fraud and error. In part, this is because it is difficult to predict where stolen votes will make a difference to the national outcome. But if one person can identify a problematic state (think Ohio in 2004), then, in all likelihood, everyone knows and that area is closely watched. It becomes harder to steal votes. To the degree that fraud and errors do occur, the Electoral College makes it possible to isolate the problem to one or a handful of states. The country is given a clear set of problems to resolve one way or another before moving on to a definitive election outcome.

Conclusion

The Electoral College is an important safeguard in our constitutional system of checks and balances, and it is critical to the success of our nation's republican democracy. I urge you to protect the Electoral College by voting "no" on SB 39.

Alaska State Legislature
Senator Gary Stevens
State Capitol Room 111
Juneau AK, 99801

RE:SB18

Dear Senator Stevens,

It is my pleasure to tell you what a great job your aide Tim Lamkin did last week at chamber lunch presenting information on SB18 extending the second session of the Legislature back to 120 days.

I have represented the Juneau Chamber of Commerce as well as served on the Marine Transportation Advisory Board for the past 6 years. I have had the honor of visiting many legislators during this time regarding issues important to my community as well as all other communities served by the Alaska Marine Highway.

Before the legislative sessions were shortened to 90 days I could call on not only my delegation but legislators from around the state and felt confident that they would have time to hear what I had to say.

Since the change from 120 to 90 days I seldom go directly to any of my legislators during session. If I do I must be prepared to chase them down the hall or if I get lucky I might get 5 minutes of their time. Legislators and their staff seem to be racing from one meeting to the next. I can only imagine how difficult this must be for folks traveling to Juneau to see their legislators especially when I know legislators want to spend time with their constituents.

In conclusion, we whole heartedly support SB18 and hope that at least one year of each session is extended to 120 days. The ideal would be to revert back to 120 days every year.

Thank you so much for your service to the State of Alaska.

Respectfully,

Cathie Roemmich, CEO
Juneau Chamber of Commerce

SPONSOR STATEMENT

SB 50

An Act relating to the powers and duties of the legislative audit division

This bill clarifies that the Division of Legislative Audit, under the direction of the Legislative Budget and Audit Committee, may audit not only state agencies, but also non-state entities who are recipients of grants and funds that are either provided by the state or funneled through the state. The audits are intended to ensure that the appropriate, ethical, and intended expenditures of grants and funds are in accordance with the purposes for which those funds were provided. Without this clarification there is some question about whether Legislative Audit has this authority.

The Legislature has, in the past, requested Legislative Audit to conduct audits as a result of allegations that non-profit organizations were disbursing grant funds inappropriately, such as "steering grants" to family members, or that grantees failed to follow state policy.

As state law is not clear in this area, the Division of Legislative Audit has expressed concerns regarding the authority to conduct such audits, particularly of non-state organizations that receive or utilize state funds or public funds that are administered by state departments.

Legislative Legal Services issued a memorandum opinion on December 18, 2007, and again on January 22, 2010 that if the Division of Legislative Audit is to be able to perform audits of private organizations receiving money from or through the state, the powers and duties of Legislative Audit, as identified in AS 24.20.271, should be amended to clearly state this authority.

Passage of SB 50 will make it clear that the Division of Legislative Audit, at the direction of the Legislative Budget and Audit Committee, has the authority to audit private organizations receiving money from or through the state.

MEMORANDUM December 18, 2007

SUBJECT: Authority of the Legislative Audit Division to audit persons, other than state agencies, who receive money from the state (Work Order No. 25-LS1259\A)

TO: Senator Fred Dyson

FROM: Theresa Bannister
Legislative Counsel

This memo accompanies a bill addressing the subject described above.

1. AS 24.20.271, the section that describes the powers and duties of the legislative audit division (LAD), is generally limited to state entities, including boards and commissions, and custodians of public funds and disbursing officers of the state.[1] However, AS 24.20.271(8) authorizes LAD to "complete studies and prepare reports, memoranda, or other materials as directed by the Legislative Budget and Audit Committee" (LB&A).

Under AS 24.20.281, a member of the legislature may "request that LB&A direct a special audit of any state agency or determine the propriety of any expenditure of state funds received by any political subdivision or other entity obtaining state funds." It is possible that "other entity" could be interpreted to cover private entities. Whether determining the propriety of the expenditure of state funds received by the entity would be interpreted to cover audits is not clear. Although "determining the propriety" appears to be an alternative to "special audit" in the sentence, the conclusion of the section appears to identify the legislator's request for either purpose with an "audit."

AS 24.20.201(a)(4) authorizes LB&A to review the expenditure of state funds. AS 24.20.201(a)(7) authorizes LB&A to prepare reports. It is possible that one of these could be broadly interpreted to cover private audits, but it is not a solid basis for the authority.

I recommend that, if you want LAD to be able to perform audits of private organizations receiving money from the state, you amend AS 24.20.271 (or AS 24.20.281) to clearly

---

[1] I would interpret "custodians" to include private persons who receive money from the state, because the term suggests a holder of money rather than a user (recipient) of money.

state that. Therefore, I have prepared a bill to authorize LAD to perform these additional audits.

2. Coverage of private audits. Your request mentioned "organizations." Do individuals ever receive money that you might want to have audited?

If I may be of further assistance, please advise.

MEMORANDUM January 22, 2010

SUBJECT: Authority of the Legislative Audit Division to audit non-governmental entities (CSSB 78(STA), Work Order No. 26-LS0194\P)

TO: Senator Fred Dyson

FROM: Jack Chenoweth
Assistant Revisor

Question Presented

Chuck Kopp of your office staff asked legislative research what authority the Legislative Audit Division has, at the direction of the Budget and Audit Committee, to conduct audits of non-governmental agencies, such as non-profit organizations, that receive state funds. Legislative research asked us to respond. I understand that you specifically would like to know whether Senate Bill 78 needs to pass in order to allow Legislative Audit to perform these types of audits.

Answer

It is more probable than not that an amendment based on or similar to the content of Senate Bill 78 is required before the auditor could investigate nongovernmental agencies. I reach this conclusion principally on the basis of a 1982 Opinion of the Attorney General, 1982 Op. (Inf.) May 20, 1982, the reasoning of which reads, in relevant part:

> The Office of Legislative Auditor is established by article IX, section 14, of the Alaska Constitution. Under section 14, the auditor has the power to conduct post-audits as prescribed by law. The Alaska Constitution has been implemented by the legislature by the enactment of AS 24.20.201. Under that section, the legislative budget and audit committee is established by law to supervise the work of the legislative auditor. The powers of that interim committee are specifically enumerated in AS 24.20.201(a)(1) - (12). The purpose of your proposed investigation apparently is to review the contracting practices of the Department of Natural Resources in regard to the sale of state royalty oil. Under AS 24.20.201(a)(6), the legislative budget and audit committee may make recommendations concerning appropriations, their expenditure and the fiscal policies and procedures of state government to the governor when appropriate and to the legislature. Unless it can be determined that the

> investigation concerns the "fiscal policies and procedures of state government," then it is our opinion that the legislative budget and audit committee has no power to conduct an investigation of this nature. . . .
>
> The legislative auditor has historically been used to carry out the post-audit function. However, under AS 24.20.271 the legislative audit division, under the direction of the legislative auditor, has the power to carry out the audit function assigned to the legislative auditor. Under AS 24.20.271(8), the audit division "shall complete studies and prepare reports, memoranda or other materials as directed by the legislative budget and audit committee." Under AS 24.20.271(6), the legislative audit division has access at all times to the books, accounts, reports or other records, whether confidential or not, of every state agency. In addition, the legislative audit division has the authority necessary to audit banks to verify a deposit of state money with a bank. [Currently authorized by AS 24.20.271(7).] No other provision of section 271 authorizes the division to obtain the books and papers of an entity which is not a state agency.
>
> . . . .

The opinion concludes that, while the power is clearly one that the legislature may grant, it did not then (and arguably still does not now) exist, and would need to be explicitly authorized before it could be exercised. I assume also that legal counsel for a private entity that would choose to resist an audit could find and would cite the reasoning of the 1982 opinion to avoid examination by state auditors.

While a credible argument could be offered that sufficient authority already exists in the current statutes, notably under existing AS 24.20.281,[1] to conduct these post-audits, given that the constitutional provision directs that audits may be conducted "as provided by

---

[1] AS 24.20.281 provides:

> **Special audit.** A member of the legislature may, in writing and with at least six days notice, request that the budget and audit committee direct a special audit of any state agency or determine the propriety of any expenditure of state funds received by any political subdivision or other entity obtaining state funds. Should a majority of the committee vote to approve the request, the legislative audit division shall make the audit.

This section did exist at the time of the 1982 opinion but is not cited or relied upon in it.

law," this office, too, has in the past recommended that the legislature amend AS 24.20.271,[2] to provide a statement of authority to exercise that authority, at least comparable to the authority prescribed to audit banks.

MEMORANDUM January 25, 2011

SUBJECT: Bill relating to the powers of the Legislative Audit Division (SB 50 - Work Order No. 27-LS0401\A)

TO: Senator Fred Dyson
Attn: Chuck Kopp

FROM: Doug Gardner
Director

This memo pertains to the bill described above, sent to you under separate cover.

1. Right to privacy. Please be aware that the new paragraph at AS 24.20.271(11) may raise a federal or state constitutional right to privacy issue if an audit under that paragraph covers information where there is a legitimate expectation of privacy. Alaska's guarantee of privacy is broader than the federal constitution's.[1] This state applies a three-part test to determine whether a person's privacy rights have been violated:[2]

> (1) whether a party seeking protection has a legitimate expectation that materials or information will not be disclosed; (2) whether disclosure is nonetheless required to serve a compelling state interest; and (3) if so, whether disclosure will occur in the least-intrusive manner with respect to the right of privacy.

The record confidentiality provisions of AS 24.20.301 require the agency to keep the information confidential and may be sufficient to cure the privacy issue. However, this may not be sufficient if the records include medical, school, children's, or other sensitive records.

To avoid the privacy issue when the new language is applied, you could limit the audit to financial records connected with the state money and to information that has had the personal indicators removed.

---

[1] See Myers v. Alaska Psychiatric Institute, 138 P.3d 238, 245 (Alaska 2006), quoting Anchorage Police Dep't. Employees Ass'n. v. Anchorage, 537 P.2d 494, 514 - 15 (Alaska 2001).

[2] Lawson v. Lawson, 108 P.3d 883, 887 (Alaska 2005), citing Alaska Wildlife Alliance v. Rue, 948 P.2d 976, 980 (Alaska 1997).

2. Other confidentiality considerations. Depending on the activities of the organization involved, there may be state statutory confidentiality provisions that would affect the application of the new language. And, if a private organization is heavily regulated by federal law or receives federal money through the state, federal law may limit or preempt an audit.

If I may be of further assistance, please advise.

LEGISLATIVE RESEARCH REPORT

FEBRUARY 22, 2010 REPORT NUMBER 10.178

STATE AUTHORITY TO AUDIT NON-PROFITS THAT RECEIVE STATE FUNDS

PREPARED FOR SENATOR FRED DYSON

BY TIM SPENGLER, LEGISLATIVE ANALYST

You asked whether other states audit non-profit and non-governmental agencies that receive state funds. Specifically, you wanted to know if states define this audit authority in statute.

According to Kinney Poynter, executive director or the National Association of State Auditors, Comptrollers and Treasures, most, if not all states have the authority to audit non-profits agencies that receive state funds although some do not define this authority in statute.[1] Some states provide auditing authority in their constitutions while many include language in *grant contracts* between state agencies and non-profit or non-governmental entities that specify the state's authority to audit. We identified 16 states that have statutory provisions that outline their ability to audit non-profit and non-governmental agencies that receive state funds.[2]

In some of the states we identified the language allowing audits is quite broad while in others it is more specific. We include, as Attachment A, the statutes from seven of the states (Georgia, Indiana, Kansas, Kentucky, Minnesota, Montana, and Wisconsin) that specify in statute the state's audit authority of non-profit agencies that receive state funds. Below we highlight the provisions in these states.

- **Georgia**: Georgia Code 50-20-4(a) states: "The state auditor shall review the nonprofit organization's reporting package or financial statements to ensure compliance with the requirements for audits and financial statement presentation for nonprofit organizations. If the state auditor finds such requirements have not been met, the state auditor within 60 days of receipt of the reporting package or financial statements shall submit a list of

[1] Kinney Poynter, executive director or the National Association of State Auditors, Comptrollers and Treasures can be reached at (859) 276-1147.

[2] The 16 states we identified that have statutory provisions defining their ability to audit non-profit entities are California, Colorado, Georgia, Hawaii, Indiana, Kansas, Kentucky, Louisiana, Massachusetts, Minnesota, Montana, New Jersey, New York, Pennsylvania, Texas, and Wisconsin. This should not be considered an exhaustive list of states with statutory provisions regarding auditing non-profits.

deficiencies to be corrected to the nonprofit organization and, if appropriate, to the auditor who performed the audit and to the affected state organizations."

- **Indiana**: Indiana Annotated Code 5-11-1-9(a) allows the state examiner to, ". . . examine all accounts and all financial affairs of every public office and officer, state office, state institution, and entity."

- **Kansas**: Kansas Statute 46.1114(c) (2) allows an audit of "any person who receives any grant of gift from the state. "Person" is defined in 46-1112 as ". . . an individual, proprietorship, partnership, limited partnership, association, trust, estate, business trust, group, or corporation, **whether or not operated for profit** . . ." (emphasis added)

- **Kentucky**: Kentucky Statute 43.050(2)(a) allows state auditors the authority to conduct audits and reviews of all state agencies that receives state funds, even indirectly. "State agency" is defined in 6.900(5)(b) "Any entity which receives any part of its funding or resources from state tax dollars, from funds or resources entrusted to the Commonwealth from other sources. . . "

- **Minnesota**: Minnesota Statute 3.978(2) states: "...All public officials and their deputies and employees, and all corporations, firms, and individuals having business involving the receipt, disbursement, or custody of public funds shall at all times afford reasonable facilities for examinations by the legislative auditor, make returns and reports required by the legislative auditor, attend and answer under oath the legislative auditor's lawful inquiries, produce and exhibit all books, accounts, documents, data of any classification, and property that the legislative auditor may need to inspect, and in all things aid the legislative auditor in the performance of duties."

- **Montana**: Montana Statute 5-13-304(8), states the auditor shall: "have the authority to audit records of organizations and individuals receiving grants from or on behalf of the state to determine that the grants are administered in accordance with the grant terms and conditions. Whenever a state agency enters into an agreement to grant resources under its control to others, the agency shall obtain the written consent of the grantee to the audit provided for in this subsection."

- **Wisconsin**: Wisconsin Statute 13.94(4)(a) allows the legislative auditor to audit ". . . every nonprofit corporation or cooperative or unincorporated cooperative association to which moneys are specifically appropriated by state law;"

Again, we provide these statutes in their entirety in Attachment A.

In Alaska, the state's ability to audit non-profit entities that receive state money is not codified in statute. Alaska Administrative Code 2 AAC 45.010, however, provides that any entity that receives a cumulative total of $300,000 or more from the state during a fiscal year **shall** submit an audit. Additionally, Pat Davidson, legislative auditor, points out that language included in the

majority of grant contracts between state agencies and non-profits specifies that the state has a right to perform audits.[3]

We hope you find this information to be useful. Please let us know if you have questions or need additional information.

[3] Pat Davidson, legislative auditor, can be reached at (907) 465-3830.

SB53 – REESTABLISHMENT OF THE ALASKA COMMISSION ON THE STATUS OF WOMEN

Senate Bill 53 "An Act reestablishing the Alaska Commission on the Status of Women; and relating to the purpose and powers of the Alaska Human Relations Commission."

Senate Bill 53 reestablishes the Alaska Commission on the Status of Women. The Alaska Legislature established the Alaska Commission on the Status of Women in 1978 (ch 120 SLA 1978). The Commission was tasked with implementing the recommendations contained in the preliminary study on the status of women. The Commission aimed to improve the status of women in the state by conducting research, serving as a referral service for information and education on existing resources for women, and making and implementing recommendations on the opportunities, needs, problems, and contributions of women in Alaska. The Commission was dedicated to the achievement of equal legal, economic, social and political status specifically for women in Alaska and was a statewide network for study and action on a variety of issues. In 1983, the Commission was renewed and renamed the Alaska Women's Commission (ch 52 SLA 1983).

The Commission conducted many public hearings and trainings, developed manuals on violence against women, education and welfare, conducted research to help women avail themselves of existing resources to meet their needs and implemented recommendations on the opportunities, needs, problems and contributions of women in the areas of education, homemaking, civil and legal rights, and labor and employment. The Commission developed a comprehensive statewide plan that identified the needs of children and youth and made recommendations to enhance the quality of life for women and children, as well as produced annual reports on the status of women and children in Alaska. The Alaska Women's Commission merged with the Alaska Human Relations Commission in 1993. The Alaska Human Relations Commission continues to exist in State Statue, but has never been funded and was declared inactive in 1996.

Over the past several decades, the participation and roles of women in the workforce has changed dramatically. Women are employed in more varied occupations and are more likely to work year-round than they have in the past. In addition, women have attained higher levels of education, and receive the majority of bachelor degrees granted. More mothers are part of the workforce, and thus, a women's contribution to family incomes have increased and is often critical for families' economic well-being. In 2008, working wives contributed 29 percent of their families' incomes, up from 24 percent in 1988. Nonetheless, even though more women are in the workforce than ever before, the difference in wages men and women receive for their work remains substantial. The gender wage gap persists in Alaska, and across a wide spectrum of occupations and industries. According to *Invest in Women, Invest in America,* women working full-time, year-round earn only 77 cents for

every dollar earned by men. In Alaska, men continue to earn significantly more on average than women in 2009. According to data obtained from the Alaska Department of Labor and workforce Development, the wage difference between men and women has not changed much since 2000. On average, women earned 66.6 percent of what men earned in 2009, which was the same as in 2006. Women and children continue to be the most common victims of domestic abuse. Women in Alaska lead the nation as victims of sexual assaults. Alaska has a struggling foster child system and Alaska's high school students, both male and female, drop out at alarming rates. Alaska has one of the lowest percentages of students entering and completing higher education programs and Alaska has a significant economic divide between our urban and rural communities, which negatively impacts all of us. These are a few areas of concerns facing women and children in our state and simply put, Alaska can no longer afford to ignore these statistics.

Alaska with its unique culture, history and challenges, combined with its large size and small population, calls for innovative forward thinking to deal with many of the difficult issues facing women and children throughout Alaska. Reestablishing the Alaska Commission on the Status of Women will allow Alaskans to focus attention on these critical issues that have negatively impacted women and children for decades.

TITLE 39. PUBLIC OFFICERS AND EMPLOYEES
CHAPTER 05. QUALIFICATIONS, APPOINTMENT, AND TENURE

Go to the Alaska Code Archive Directory

Alaska Stat. § 39.05.100 (2009)

Sec. 39.05.100. Qualifications for appointment

(a) A person appointed to a board or commission of the state government shall be and have been before the last general election, (1) a registered voter in the state, if the appointment is made at large or (2) a registered voter from the judicial district, if the appointment is made from a specific judicial district. The student member of the Board of Regents of the University of Alaska appointed under *AS 14.40.150(b)*, the student member of the Alaska Commission on Postsecondary Education appointed under *AS 14.42.015(d)*, and a member of the Alaska Human Relations Commission appointed under *AS 44.19.600*, are exempt from the requirement of this subsection if the member was not old enough to be a registered voter in the last general election.

(b) A member of a board or commission of the state government who ceases to reside in the state during the member's term terminates membership on the board or commission. For the purposes of this section, the acceptance of employment outside the state for a six-month period or longer, or physical absence from the state for one year or longer, or registration as a voter in a municipal, county, district, state, or national election in a voting precinct outside the state is considered as discontinuing residence in the state.

HISTORY: (§ 5 ch 64 SLA 1955; am § 1 ch 167 SLA 1957; am § 68 ch 14 SLA 1987; am §§ 10, 11 ch 16 SLA 1990; am E.O. No. 84 § 6 (1993))

NOTES:
REVISOR'S NOTES. --In 2008, in subsection (a), "*AS 14.42.015(d)*" was substituted for "*AS 14.42.015(e)*" to reflect the 2008 relettering of *AS 14.42.015(e)*.

OPINIONS OF ATTORNEY GENERAL. --An individual is eligible for appointment to a state board or commission where his voter registration was administratively cancelled and he has not reregistered to vote. *1987 Alaska AG Lexis*

255; 1987-1 Op (Inf.) Atty Gen. Alas 367.

Where the governor has appointed a person to a state board or commission and that appointee has been confirmed by the legislature, that person is in fact a member of the board or commission even though the appointee's voter registration was administratively cancelled. *1987 Alaska AG Lexis 255;* 1987-1 Op (Inf.) Alaska Stat. § 44.19.608 (2009)

Sec. 44.19.608. Purpose and powers relating to women's issues

(a) A purpose of the commission is to improve the status of women in the state by conducting research, by serving as a referral service for information and education that will help women avail themselves of existing resources to meet their needs, and by making and implementing recommendations on the opportunities, needs, problems, and contributions of women in the state including

(1) education;

(2) homemaking;

(3) civil and legal rights; and

(4) labor and employment.

(b) To accomplish this purpose, the commission may

(1) act as a clearinghouse and coordinating body for government and nongovernment information relating to the status of women;

(2) cooperate with public and private agencies in joint efforts to study and resolve problems relating to the status of women in Alaska;

(3) accumulate and compile information concerning discrimination against women;

(4) disseminate the results of research and compilation of data acquired under (3) of this subsection by publication and other methods such as public hearings, conferences, and seminars;

(5) study and analyze all facts relating to Alaska laws, regulations, and guidelines with respect to equal protection for women under the state constitution;

(6) recommend legislative and administrative action on equal treatment and opportunities for women;

(7) encourage women to utilize their capabilities and to assume leadership roles;

(8) encourage the development of regional and municipal women's councils or commissions.

Alaska Stat. § 44.19.610 (2009)

Sec. 44.19.610. Duties relating to children's issues

(a) The commission shall develop a comprehensive statewide plan that identifies the needs of children and youth, individually and as they relate to their families, and make recommendations to enhance their quality of life. In meeting this charge, the commission may

(1) recommend the services and programs that should be available for children and families in the areas of child care, health, social services, education, special education, child protection, parent and staff training, nutrition, poverty, mental health, safety, and employment of youth;

(2) identify the service needs of children and where gaps and overlaps in services exist;

(3) monitor the emerging needs of and problems facing children, and develop effective, comprehensive, and coordinated strategies to address those needs and problems;

(4) develop and recommend adoption of a process for monitoring and evaluating children's programs;

(5) provide opportunities for the public to participate in the planning and development of children's programs and policies;

(6) receive and act upon requests for recommendations from parents, state officials, members of state advisory committees, legislators, representatives of the state court system, and providers of children's services on matters related to children and youth;

(7) meet with and make recommendations to state officials and members of advisory committees who are responsible for the expenditure of state and federal money and provide recommendations to the legislature and the department on structural and procedural changes, contracting of services, establishment of standards, and the consolidation of efforts designed to deliver services in a more cost-effective manner;

(8) serve as a statewide clearinghouse for government and nongovernment programs and resources relating to

children, youth, and families;

(9) serve as an advocate for the interests of children by informing the public, including leaders of the business community, educators, local and state officials, the legal system, and the communications media of the nature and scope of problems faced by children;

(10) coordinate efforts and consult and cooperate with persons, departments, organizations, and groups, including other boards and commissions, interested in the problems and concerns of children and youth; and

(11) make recommendations to the governor, legislature, and state officials with respect to legislation, regulations, and appropriations for programs or services that benefit children and youth.

TITLE 47. WELFARE, SOCIAL SERVICES AND INSTITUTIONS
CHAPTER 18. PROGRAMS AND SERVICES RELATED TO ADOLESCENTS
ARTICLE 1. COMPREHENSIVE PLANNING

Go to the Alaska Code Archive Directory

Alaska Stat. § 47.18.010 (2009)

Sec. 47.18.010. Development of statewide plan

(a) With the advice of the Alaska Human Relations Commission, the department shall develop a comprehensive statewide plan to ensure the effectiveness and efficiency of state programs that relate to the prevention of adolescent pregnancy and the provision of services to adolescent parents and their children under *AS 47.18.100 -- 47.18.140*, and to peer counseling under *AS 47.18.200*.

(b) The plan developed under (a) of this section must

(1) review and include existing programs and services of state government;

(2) examine and consider the achievements and experiences of projects that are similar to those authorized under *AS 47.18.100 -- 47.18.140* and *47.18.200*;

(3) give priority to the consolidation and improvement of existing programs;

(4) make recommendations with regard to the need for new or expanded programs and services within the existing level of funding;

(5) consider the findings and recommendations of the Alaska's Adolescent Pregnancy and Parenthood Task Force; and

(6) make recommendations concerning the incremental implementation of the plan.

(c) The Department of Education and Early Development, the Department of Commerce, Community, and Economic Development, and the Department of Labor and Workforce Development shall assist the department in

developing the plan required under (a) of this section. In addition, through appropriate means, the department shall solicit advice from teens, parents, educators, school administrators, taxpayers, civic groups, community organizations, Native organizations, officials of local governments, religious institutions, and other concerned persons about how state programs can be coordinated and operated in a manner that will enhance their effectiveness and efficiency in addressing the many needs associated with adolescent parenting, the prevention of adolescent pregnancies, and the provision of adolescent peer counseling.

HISTORY: (§ 1 ch 94 SLA 1991; am E.O. No. 84 § 8 (1993))

NOTES:

REVISOR'S NOTES. --In 1999, in (c) of this section, "Department of Education" was changed to "Department of Education and Early Development" and "Department of Labor" was changed to "Department of Labor and Workforce Development" in accordance with §§ 89 - 90, ch. 58, SLA 1999, and "Community and Regional Affairs" was changed to "Community and Economic Development" in accordance with § 91(a)(14), ch. 58, SLA 1999.

In 2004, in (c) of this section, "Department of Community and Economic Development" was changed to "Department of Commerce, Community, and Economic Development", in accordance with § 3, ch. 47, SLA 2004.

NOTES APPLICABLE TO ENTIRE TITLE

REVISOR'S NOTES. --The provisions of this title were redrafted in 1984 to remove personal pronouns pursuant to § 4, ch. 58, SLA 1982, and in 1984, 1990, 1995, and 2008 to make other minor word changes.

ADMINISTRATIVE CODE. --For health and social services, see 7 AAC.

For hearings, see 7 AAC 49.

E.O. 084 (1993)

EXECUTIVE ORDER NO. 084

EXECUTIVE ORDER NO. 84

Under the authority of art. III, sec. 23, of the Alaska Constitution, and in accordance with AS 24.08.210 , I order the following:

* Section 1. FINDINGS. As governor, I find that it would be in the best interests of efficient administration to consolidate the duties and functions of the Alaska Women's Commission and the Alaska Commission on Children and Youth into a new Alaska Human Relations Commission in the Governor's Office. The consolidation should result in coordinated programs related to the welfare of children, youth, women, and families, and should maximize the effectiveness of federal and state money that is available for those programs.

* Sec. 2. AS 37.14.220 is amended to read:

Sec. 37.14.220. ADMINISTRATION OF THE FUND. The fund shall be administered by the Alaska Human Relations Commission [ALASKA COMMISSION ON CHILDREN AND YOUTH].

* Sec. 3. AS 37.14.230 is amended to read:

Sec. 37.14.230. POWERS AND DUTIES OF THE COMMISSION. When acting as administrator of the fund, the commission shall

(1) hold regular and special meetings it considers necessary; the commission may hold meetings by teleconference;

(2) award grants from the net income of the fund to community-based programs and projects that the commission finds will aid in the prevention of child abuse and neglect;

(3) monitor approved programs and projects for compliance with AS 37.14.200 - 37.14.270;

(4) before providing assistance to a program or project, approve written findings on the program or project that include a consideration of the means of measuring the effectiveness of the program or project;

(5) apply for, and use net income from the fund to obtain, private and federal grants for the prevention of child abuse and neglect;

(6) solicit contributions, gifts, and bequests to the fund;

(7) keep audio tape recordings of each meeting of the commission to be made available on request; and

(8) submit to the governor and the legislature by February 1 each year a report describing

(A) the child abuse and neglect prevention services that were provided by the programs and projects to which the commission awarded grants; and

(B) the annual level of contributions, income, and expenses of the fund.

* Sec. 4. AS 37.14.240 (d) is amended to read:

(d) Up to $150,000 per year may be appropriated from the principal of the fund for the administrative expenses of the commission relating to AS 37.14.200 - 37.14.270.

* Sec. 5. AS 37.14.270 (3) is amended to read:

(3) "commission" means the Alaska Human Relations Commission [ALASKA COMMISSION ON CHILDREN AND YOUTH] established under AS 44.19.600 [AS 44.19.521];

* Sec. 6. AS 39.05.100 (a) is amended to read:

(a) A person appointed to a board or commission of the state government shall be and have been before the last general election, (1) a registered voter in the

state, if the appointment is made at large or (2) a registered voter from the judicial district, if the appointment is made from a specific judicial district. The student member of the Board of Regents of the University of Alaska appointed under AS 14.40.150 (b), the student member of the Alaska Commission on Postsecondary Education appointed under AS 14.42.015 (e), and a member of the Alaska Human Relations Commission [ALASKA COMMISSION ON CHILDREN AND YOUTH] appointed under AS 44.19.600 [AS 44.19.521], are exempt from the requirement of this subsection if the member was not old enough to be a registered voter in the last general election.

* Sec. 7. AS 44.19 is amended by adding new sections to read:

ARTICLE 18. ALASKA HUMAN RELATIONS COMMISSION.

Sec. 44.19.601. CREATION OF COMMISSION; COMPOSITION. (a) There is created in the Office of the Governor the Alaska Human Relations Commission.

(b) The commission consists of two executive-branch members and seven public members, appointed by the governor, who serve at the pleasure of the governor.

(c) At least one public member must be a person who manages a household that includes the person's spouse and at least one child and who is not otherwise employed. At least one public member must be under the age of 21 at the time of appointment.

Sec. 44.19.602. APPOINTMENT; OFFICERS. (a) The members shall be appointed on a nonpartisan and nondiscriminatory basis by the governor. In making the appointments, the governor shall give due consideration to

(1) the recommendations made by civic organizations, women's organizations, educational and vocational groups, employer groups, labor unions, church groups, homemaker's clubs and organizations, and other groups having an

interest in the welfare and status of women;

(2) statewide geographical representation of the commission;

(3) minority and low-income representation;

(4) representation of senior citizens, persons with disabilities, and persons from a variety of occupational categories; and

(5) representation of persons with different marital statuses and persons with various numbers of children.

(b) The commission shall elect one of its members as chair. The chair may appoint other officers as necessary.

Sec. 44.19.604. TERMS OF OFFICE; COMPENSATION. (a) The term of office of a member of the commission is three years. Terms shall be staggered. A member may not serve more than six consecutive years.

(b) A vacancy shall be filled in the same manner as the original appointment. A person appointed to a vacancy serves for the unexpired portion of a term.

(c) Public members of the commission receive no compensation for their services but are entitled to per diem and travel allowances authorized by law for other boards and commissions.

Sec. 44.19.606. MEETINGS. A majority of the members constitutes a quorum for conducting business and exercising the powers of the commission. The commission shall meet at the call of the chairperson, at the request of the majority of the members, or at a regularly scheduled time as determined by a majority of the members.

Sec. 44.19.608. PURPOSE AND POWERS RELATING TO WOMEN'S ISSUES. (a) A purpose of the commission is to improve the status of women in the state by conducting research, by serving as a referral service for information and education that will help women avail themselves of existing resources to meet their

needs, and by making and implementing recommendations on the opportunities, needs, problems, and contributions of women in the state including

(1) education;

(2) homemaking;

(3) civil and legal rights; and

(4) labor and employment.

(b) To accomplish this purpose, the commission may

(1) act as a clearinghouse and coordinating body for government and nongovernment information relating to the status of women;

(2) cooperate with public and private agencies in joint efforts to study and resolve problems relating to the status of women in Alaska;

(3) accumulate and compile information concerning discrimination against women;

(4) disseminate the results of research and compilation of data acquired under (3) of this subsection by publication and other methods such as public hearings, conferences, and seminars;

(5) study and analyze all facts relating to Alaska laws, regulations, and guidelines with respect to equal protection for women under the state constitution;

(6) recommend legislative and administrative action on equal treatment and opportunities for women;

(7) encourage women to utilize their capabilities and to assume leadership roles;

(8) encourage the development of regional and municipal women's councils or commissions.

Sec. 44.19.611. DUTIES RELATING TO CHILDREN'S ISSUES. (a) The commission shall develop a comprehensive statewide plan that identifies the needs of

children and youth, individually and as they relate to their families, and make recommendations to enhance their quality of life. In meeting this charge, the commission may

(1) recommend the services and programs that should be available for children and families in the areas of child care, health, social services, education, special education, child protection, parent and staff training, nutrition, poverty, mental health, safety, and employment of youth;

(2) identify the service needs of children and where gaps and overlaps in services exist;

(3) monitor the emerging needs of and problems facing children, and develop effective, comprehensive, and coordinated strategies to address those needs and problems;

(4) develop and recommend adoption of a process for monitoring and evaluating children's programs;

(5) provide opportunities for the public to participate in the planning and development of children's programs and policies;

(6) receive and act upon requests for recommendations from parents, state officials, members of state advisory committees, legislators, representatives of the state court system, and providers of children's services on matters related to children and youth;

(7) meet with and make recommendations to state officials and members of advisory committees who are responsible for the expenditure of state and federal money and provide recommendations to the legislature and the department on structural and procedural changes, contracting of services, establishment of standards, and the consolidation of efforts designed to deliver services in a more cost-effective manner;

(8) serve as a statewide clearinghouse for government and nongovernment programs and resources relating to children, youth, and families;

(9) serve as an advocate for the interests of children by informing the public, including leaders of the business community, educators, local and state officials, the legal system, and the communications media of the nature and scope of problems faced by children;

(10) coordinate efforts and consult and cooperate with persons, departments, organizations, and groups, including other boards and commissions, interested in the problems and concerns of children and youth; and

(11) make recommendations to the governor, legislature, and state officials with respect to legislation, regulations, and appropriations for programs or services that benefit children and youth.

Sec. 44.19.612. GENERAL POWERS. The commission may

(1) use voluntary and uncompensated services of private persons and organizations as may be made available to the commission;

(2) select and retain the services of consultants whose advice is considered necessary to assist the commission in obtaining information;

(3) establish standing committees among the members to investigate and make recommendations on various areas of concern;

(4) create task forces composed of commission members and other experts as needed;

(5) hold public hearings;

(6) establish and maintain an office in Anchorage, or at a location determined to be the most appropriate location by a majority vote of the commission, and hire an executive director and technical and clerical staff that are necessary to perform the duties of the commission;

(7) accept monetary gifts or grants from the federal government or an agency of it, from any charitable foundation or professional association or from any other reputable sources for implementation of any program necessary or desirable for carrying out the purposes of the commission;

(8) take other actions reasonably necessary to carry out the duties of the commission.

Sec. 44.19.614. METHODOLOGY. (a) When conducting research, acting as a referral service, serving as a forum for ideas, and developing recommendations related to the welfare of women, the commission shall solicit and consider information and views from a variety of constituencies in order to represent the broad spectrum of diversity that exists with respect to possible approaches for meeting women's needs in the state.

(b) In formulating the strategy to address the needs of and problems facing children, the commission shall actively solicit advice and information from children and youth of all ages and socioeconomic backgrounds. The commission shall also seek advice and information from parents and children's services providers, including those with expertise in the areas of mental health, health care, prenatal care, adolescent drug and alcohol treatment, education, special education, early childhood education, early childhood special education, nonprofit funding sources, child abuse and neglect, domestic violence, child care, dependence, delinquency and the justice system, minority issues, and family support systems.

Sec. 44.19.616. ANNUAL REPORT. The commission shall prepare and publish an annual report on the status of children and women in the state, the commission's proceedings for the previous calendar year, and its recommendations and proposals for change. The commission shall provide the governor and the legislature with copies of the report by the 15th day of each regular legislative

session.

Sec. 44.19.618. TECHNICAL ASSISTANCE AND STAFF SUPPORT. The executive branch departments shall cooperate with the commission and provide technical assistance to the commission upon the request of the commission. The commission may use legal, technical, secretarial, and administrative services as may be provided by the governor;

* Sec. 8. AS 47.18.010 (a) is amended to read:

(a) With the advice of the Alaska Human Relations Commission [ALASKA COMMISSION ON CHILDREN AND YOUTH], the department shall develop a comprehensive statewide plan to ensure the effectiveness and efficiency of state programs that relate to the prevention of adolescent pregnancy and the provision of services to adolescent parents and their children under AS 47.18.100 - 47.18.140, and to peer counseling under AS 47.18.200 .

* Sec. 9. AS 39.50.200 (b)(50); AS 44.19.165 , 44.19.166, 44.19.167, 44.19.168, 44.19.169, 44.19.170, 44.19.171, 44.19.175, 44.19.180, 44.19.521, 44.19.523, 44.19.525, 44.19.527, and 44.19.529 are repealed. Sections 2, 4, 7, 9, 11, 16, and 21 of ch. 16, SLA 1990 are repealed.

* Sec. 10. TRANSITION. (a) The terms of the members of the Alaska Women's Commission established under AS 44.19.165 and of the Alaska Commission on Children and Youth established under AS 44.19.521 terminate on the effective date of this Order. Unless the appointment would be prohibited by AS 44.19.169 , repealed by this Order, or by AS 44.19.604 (a), added by this Order, the governor may appoint to the Alaska Human Relations Commission created under this Order a former member of the Alaska Women's Commission or of the Alaska Commission on Children and Youth. The terms of persons initially appointed to the Alaska Human Relations Commission must be set as provided in AS 39.05.055 , so as to establish the staggering of terms required by AS 44.19.604 (a).

(b) Contracts, rights, liabilities, and obligations created by or under a law amended

or repealed by this Executive Order, and in effect on March 12, 1993, remain in effect notwithstanding this Order's taking effect. Records, equipment, appropriations, and other property of agencies of the state whose functions are transferred under this Order shall be transferred to implement the provisions of this Order.

* Sec. 11. EFFECTIVE DATE. This Order takes effect March 13, 1993.

DATED: January 11, 1993

ANNUAL REPORT

ALASKA WOMEN'S COMMISSION

STATUS REPORT VOLUME 7, NUMBER 1 JANUARY 1988

1978-88: A Decade of Advocacy for Women's Equity

Futures Trading

In October 1987 the members of the Alaska Women's Commission elected Paula Ziegler as their new chair. Ziegler was first appointed to the Commission in July of 1986 and chaired the Legislative Committee during 1987. Ziegler is former state president of the League of Women Voters of Alaska. She also serves on the regional council of her church and is chair of women's issues for the local chapter of the American Association of University Women. Ziegler lives in Juneau.

The beginning of a new year is often the time to evaluate the past and reflect upon the future. Included with this newsletter is the annual report of the Alaska Women's Commission, evaluating our recent past. Even in a wind-down year, it is easy to quantify the accomplishments of the Commission and the positive impact this agency has had on economic, social, political and legal equality for women in Alaska.

Reflecting upon the future, however, is not as easy. If the legislature does not pass House Bill 4 this year, thereby reauthorizing the Commission in the Alaskan statutes, the Commission, its programs, publications and research will end. What will not end, though, are the reasons the Commission was established in the first place. The progress made to date improves some situations, but also reveals others where inequity still exists. The Commission's work is not done.

What would the future look like without the Alaska Women's Commission? It would be a future without the only agency in state government that speaks to that government about issues, policies and situations affecting women. It would be a future without an office that receives more than 1000 calls a year for information and help. It would be a future without the essential follow-up needed to rectify the inequities revealed by the recently concluded divorce study.

It would be a future without agency-sponsored statewide and regional conferences on such subjects as legal rights for women, equal educational opportunities, and women in the political process, and it would be a future without publications such as the Women's Legal Rights Handbook, the Economic Status of Alaska Native Women and An Assessment of Sex Equity in Alaska's Educational Institutions.

We can also say about the future, based on facts from the present, that the signs for women, children and families are challenging:

- of the 35 million people living in poverty in our country, 20 million are women;
- 70% of households in America headed by women live in poverty;
- 72% of women over 65 live on less than $5000 a year;
- in Alaska, more than half of all women participate in the labor force;
- between 1960 and 1980 in Alaska, the greatest increase in labor force participation was among women of childbearing age.

What we are left with is a question of trading—trading a future with a Women's Commission, and therefore with an agency in place to help meet these challenges, or a future with the challenges in place and no Commission.

The Alaska Women's Commission has a future because the only trade that makes sense is for a future *with* a Commission.

Dorothy Campbell, Title V
Information Assistant

Susan Smalley was appointed to the Commission by Governor Steve Cowper in October 1987. A former teacher, married with two sons, Smalley is a professional volunteer in the Kenai schools. A member of the United Methodist Church statewide planning committee, Smalley also helped establish the local chapter of League of Women Voters and served as President of it for two years. She currently coordinates a "parents day out" program at her church.

Linda Freed was appointed to the Commission in January 1988. Freed is the Director of the Community Development Department for the Kodiak Island Borough. A Kodiak resident since 1980, Freed is an active community volunteer, serving on the boards of the Kodiak Women's Resource Center & the Kodiak Public Broadcasting Corporation. Freed was also one of the founders of the Kodiak Women's Network, and is a member of AAUW, the Kodiak Arts Council and the Kodiak Council on Alcoholism.

The Alaska Women's Commission is dedicated to the achievement of equal legal, economic, social and political status for women in Alaska.

Established by the legislature in 1978, the Commission was reaffirmed and renewed in 1983 by the Legislature and the Governor.

Nine public members and one representative from the Attorney General's office are appointed by the Governor to staggered five year terms. They represent a wide range of backgrounds, interests and geographic areas. Meetings are held quarterly in various locations throughout the state and are open to the public.

The development of regional and municipal women's councils is being encouraged by the Commission. Councils advise the Women's Commission and coordinate local efforts to improve the status of women in Alaskan communities.

The Commission is a statewide network for study and action on a variety of issues. Current priorities include work on legislation, employment, civil and legal rights and issues relating to the family.

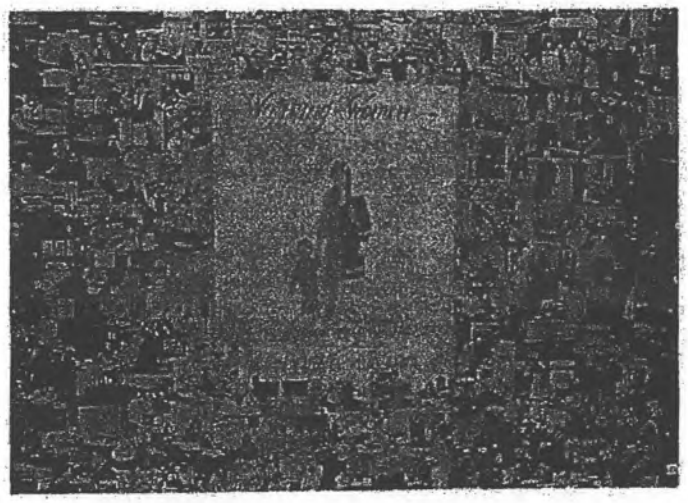
1987: A Challenge For Us All

Christine Callahan, Executive Director

Plummeting oil prices and vanishing jobs did not leave many Alaskans untouched in 1987. Families had to face problems they never faced before. Many lost their jobs and homes and continue to confront devastating financial hardships. The stress experienced by Alaskan families in 1987 was enormous.

Policymakers have spent long hours attempting to develop programs and strategies to help ease the pain and prevent more problems from developing. In the midst of this turmoil, equity has sometimes appeared to take a back seat. But equity is not a luxury for times of plenty. Its importance becomes even more apparent in adversity.

What is occurring on a large scale in our current economy has for too long been everyday reality for many of the women in our state. Based on research conducted by the Alaska Women's Commission we know that single parents have been struggling to make ends meet. We know that numerous women with inadequate or non-existent child support have faced monthly bills with well-founded fear and anxiety. We know the extent of women's unequal earning power. We know that, combined with the costs of such necessities as child care, these circumstances too often force women to seek public assistance and sacrifice their hard-won independence and self sufficiency.



Hundreds of women and the roles they fulfill are pictured in this collage from the North Slope Borough's Women's Conference, September 1987.

As recently as 1987, the Women's Commission conducted the first research to document the economic inequities of divorce in Alaska. What we found was, in Gov. Steve Cowper's words, ". . .eye opening evidence that women and children in Alaska are on the verge of becoming the state's New Poor." Divorced women faced with enormous mortgage payments on unsellable family homes see their meager resources eaten away while they try to keep their children in familiar neighborhoods and schools with at least their network of friends intact. Women who never dreamed it possible are unable to provide enough food for their children. Unless we change the laws regarding termination of marriage, we continue to condemn thousands of women and children to life on the edge of poverty.

Because of these problems in 1987 the Alaska Women's Commission stepped up its efforts to pass HB189, a bill that would make significant improvements in the laws governing divorce. The Commission included several seminars on this issue in its comprehensive Legal Rights Conference for Women, sponsored in partnership with community, educational and legal resources in the spring of 1987.

It is encouraging to see Alaskan leaders devoting their energy and imagination to solving these problems and ensuring that things do not get any worse. However it is important that the lessons learned from grappling with an austere economy are in turn applied to the situations that women have been struggling with for years. In addressing the dramatic problems of 1987, we must not overlook the quiet desperation that many women experienced long before oil prices dropped.

At this critical juncture it is unthinkable that the legislature would take any but the most positive action in assisting the populace to deal with serious economic adversity. This action should include reauthorizing the Alaska Women's Commission to continue its work for equity. Its work provides an important foundation for a sound and healthy economy and for economic development in which all Alaskans can share equally.

Legislative Advocacy 1987

The Commission's legislative committee undertakes various efforts in advocating for legislative reform. Basing much of its work on the Statutory Review which it completed in 1985, the Commission has proposed major legislative reforms to the Governor since 1986. The Commission also analyzes and advocates any pending legislation which impacts women in the state. It provides legislative information to women's organizations throughout the state through the Legislative Alliance for Women Statewide (LAWS).

Few bills in general passed both legislative bodies in 1987. However, Commission supported legislation will be considered again in the second session of the 15th Alaska Legislature.

Legislation	Prime Sponsor	House	Senate
HB 4 Alaska Women's Commission: Extends the Commission until June 30, 1991. Must pass Senate HESS, Judiciary and Finance before being scheduled for floor vote. Without passage, the Commission will terminate on June 30, 1988.	Rep. Davis	Passed 3/2/87	In S. HESS
HB 189 Divorce and Dissolution: Would require court to give greater scrutiny to dissolution cases. Makes career assets part of marital estate. Provides for interim spousal support.	Governor	H. HESS Subcommittee	
HB 224 Parental Leave: Provides for 18 weeks of unpaid leave for either parent after birth or adoption of a child. Exempts firms with less than 15 employees.	Rep. Brown	Passed 5/15/87	In S. HESS
SB 124 Parental Leave: Provisions are similar to HB 224	Sen. Josephson	S. HESS	

Legislative Alliance For Women Statewide

In 1987 the Commission continued its leadership role in the Legislative Alliance for Women Statewide.

Established by the Commission in 1985, the Alliance is a coalition representing nearly 20 women's organizations throughout Alaska. This organization analyzes and takes positions on legislation, and monitors budget and policy decisions which have direct impact on women's lives.

By providing a forum in which these diverse organizations can participate and work together, the Commission helps mobilize the tremendous energy and commitment contained in these groups. The Commission provides these organizations with an access point to the policy and decision makers whose actions affect their lives. In turn, policymakers benefit from having the information and feedback that this group provides to them.

Local Women's Councils

The Alaska Women's Commission statute was amended by the Alaska legislature in 1983 to include the development of local women's councils around the state. The purpose of the local councils is to ensure that local priorities and issues are addressed at that level. Initially, the councils were established in Commissioners' home communities in order to foster coordination.

During 1984 the Commission worked to establish councils in Anchorage and Sitka. In 1985 Juneau was successfully targeted. In 1986 the North Slope Borough Assembly passed an ordinance establishing the North Slope Borough Women's Council and in 1987 the Commission assisted women's organizations in the North Slope to form a task force to encourage recruitment and appointments to the Women's Council there.

Each council functions independently of the Women's Commission, consists of at least nine members, and meets quarterly. The duties of the local councils are to:

1. analyze and prioritize the needs of women at the local level;
2. recommend legislative and administrative action on women's issues to the Alaska Women's Commission;
3. disseminate research and publications of the Alaska Women's Commission to local women, and
4. serve as a clearinghouse for information relating to the status of women in local communities.

Focus '87–Women's Commission Forced into Wind-Down

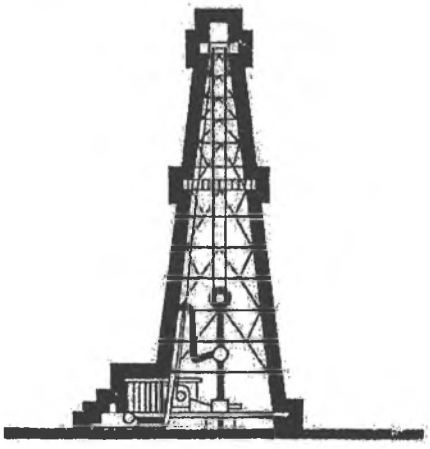
For the first time in Alaska's history, a substantive policy making board was forced into "wind-down" when the Alaska Women's Commission sunset bill was bottled up in two Senate committees during the legislative session.

Despite widespread support from thousands of people around the state, bipartisan support from a majority of legislators, the efforts of Governor Cowper and more than 20 statewide service and professional organizations, the bill to extend the Alaska Women's Commission did not pass the first session of the 15th legislature.

House Bill 4, sponsored by Representatives Mike Davis, Fran Ulmer, Niilo Kopenen, Johnny Ellis, Kay Brown, Dave Donley and Cliff Davidson sailed through the House with a resounding 33 to 2 vote on March 2, 1987. After nine weeks, two teleconferences and numerous scheduling delays, the bill passed out of Senate State Affairs. A last-minute measure to combine the Commission with two other agencies was introduced by Senator Paul Fischer on May 15 and forward action on House Bill 4 was halted.

As of July 1, 1987, the Commission officially entered its "wind-down" year with a budget of $196,800 — a 36 percent decrease from the previous fiscal year. With resources strapped and a depleted publication budget, the Commission launched a concerted drive to develop a statewide speaker's bureau.

Commissioners and staff have stepped up their efforts to bring the results of the Commission's research to as many people as possible. Hundreds of people have been reached personally, many thousands more through print and other media. The commitment and dedication to fostering equity have not diminished, and the Commission and its advocates will be back in January 1988 to urge swift passage of HB4 and reinstatement of the Commission's budget.



"At the current price of oil, only 9 minutes of pipeline flow would fund the entire annual budget of the Alaska Women's Commission."

The Question of a Merger

During the first session of the 15th Alaska Legislature, suggestions were made to consolidate the Alaska Women's Commission with the Alaska State Commission for Human Rights and the Office of Equal Employment Opportunity.

The agencies involved are functionally dissimilar. They provide different services to distinct target populations. History demonstrates that consolidation of these agencies is unworkable.

In 1972 the advisory board functioning as a Women's Commission was abolished and its funds and responsibilities transferred to the Human Rights Commission. Because of its own workload, the Human Rights Commission was unable to deal effectively with those responsibilities. In 1976, the shocking results of the *Preliminary Study on the Status of Women in Alaska* (a study commissioned by the Alaska State Legislature) led to the creation of a separate and independent Women's Commission. Since its creation in 1978, the Alaska Women's Commission's success and widespread recognition are fitting testimony to the need for a separate, independent commission targeted to a unique population distinct from that served by either the Human Rights Commission or the Office of EEO.

Governor Steve Cowper, the members of the Human Rights Commission and the Alaska Women's Commission, Representative Mike Davis (prime sponsor of AWC's reauthorization bill) and the membership of the Alaska Federation of Natives at their annual convention, are among the dozens of individuals and organizations who have opposed consolidation of these agencies.

The chart below illustrates the major differences among the agencies in question.

	Alaska Women's Commission	Human Rights Commission	Office of Equal Employment Opportunity
Enabling Legislation	44.19.165-180	AS 18.80.010-300	44.19.441-449
Type of Agency	Research, Advocacy and Education	Enforcement	Administrative and Compliance
Purpose	To implement the recommendations in the preliminary study of the status of women in Alaska mandated by the 9th legislature. To improve the status of women in Alaska by further research and by implementing additional recommendations on the opportunities, needs, problems and contributions of women in Alaska.	To prevent and eliminate discrimination on the basis of race, color, national origin, religion, sex, physical or mental disability, marital status, changes in marital status, pregnancy, parenthood and age in public and private sector employment, public accommodations, housing, finance and credit, and practices by the state and its political subdivisions.	To ensure fair employment practices in state government and to ensure compliance with AS 44.19.441-449 and Administrative Orders 75 and 81; To monitor the state affirmative action plan for the employment, retention and advancement of women, minorities, the handicapped, other disadvantaged workers; To develop and administer the state's federally required internal equal employment opportunity programs.
Target Population	The entire female population in Alaska.	All persons and classes of persons suffering discrimination in Alaska.	State employees, applicants for state employment, and former state employees.
Commission	Nine members and an ex officio member representing the attorney general's office who serve at the pleasure of the governor; commissioners not compensated for services.	Seven public members appointed by the Governor for staggered five-year terms and confirmed by the legislature; commissioners not compensated for services.	N/A

	Alaska Women's Commission	Human Rights Commission	Office of Equal Employment Opportunity
Role of Commissioners	Bring diverse perspectives, including those of homemakers, and interest, knowledge, or experience in the issues. Hire an executive director and other staff necessary to the commission's function. Establish standing committees and task-forces to research and make recommendations on the status of women. Establish policy and program direction.	Adjudicate cases of discrimination at public hearing and issue commission decisions and orders enforceable in court. Adopt regulations implementing and interpreting Alaska Human Rights Law. Appoint executive director approved by the governor and hire other staff. Establish policy and program direction.	N/A
Major Activities	Conduct research, accumulate and compile data about discrimination against women; Study and analyze Alaska laws, regulations and guidelines with respect to equal protection for women; Disseminate the results of research and compilation of data by publications, public hearings, conferences and seminars; Recommend legislative and administrative action on equal treatment and opportunities for women; Act as clearinghouse and coordinating body for governmental and non-governmental information relating to the status of women in Alaska; Encourage the development of regional and municipal women's councils or commissions; Encourage women to assume leadership roles, and conduct joint efforts to study and resolve women's problems with public and private sector agencies.	Accept complaints of discrimination from public; executive director may file on behalf of persons; Identify and eliminate discriminatory policies and practices of major impact; Conduct impartial investigations and attempt early resolution of cases; Determine violations of Human Rights Law and conciliate cases of discrimination; Obtain relief for complainants (back pay, lost jobs, pay differentials, a bias free workplace and other remedies); Counsel inquirers about Human Rights Law and redirect them to other sources of redress; Inform the public about rights and provide technical assistance to employers, landlords, businesses, lending institutions, and state/local governments.	Assist state officials to carry out EEO responsibilities and train state managers and supervisors in affirmative action; Offer orientation programs to employees to inform them of their rights; Monitor state personnel practices, analyze workforce composition and implement performance evaluation standards for affirmative action requirements; Prepare federally mandated EEO reports and plans; Prepare the affirmative action plan for the executive branch and ensure agency compliance with affirmative action plans and programs; Assist the Division of Labor Relations in collective bargaining negotiations; Accept, investigate and resolve informal complaints; Serve as primary state liaison with civil rights agencies and with community groups; Recommend action to the Governor relating to affirmative action and report to the Governor and legislature on progress.
Major Issues	Improving the status of women in Alaska; addressing the opportunities, needs, problems and contributions of Alaskan women. Issues include but are not limited to education, homemaking, civil and legal rights, labor and employment, health, economic equity, families and work, child care, family equity (divorce reform), welfare reform.	Discriminatory discharge and unfair employment policies and practices, denial of jobs to minorities, women and the disabled, sexual harassment and racial bias in the workplace, pay equity for women, mandatory retirement, accessibility for the disabled.	Equal employment opportunity and affirmative action in state employment practices; Meeting the federal EEO regulatory requirements as a condition for the state's receipt of federal funds.
Type of Staffing	3 full-time paid staff: one administrator/ program developer, one researcher, one support staff, 1 part-time paid staff (Senior Employment Program); An additional 600 to 1,000 hours of volunteer time is donated each year; 20 statewide women's organizations work on Commission issues and projects each year.	19 full-time paid staff: 1 administrator, 1 staff attorney, 3 supervisors, 8 investigators, 1 docket officer, 5 support staff with headquarters in Anchorage and Juneau and Fairbanks field offices; Worksharing agreements with EEOC and HUD and the Anchorage Equal Rights Commission increase staff case processing capability.	10 full-time paid staff: one administrator, six equal opportunity employment specialists, one data specialist, two support staff.
Proposed FY89 Budget	$204,600 General Funds $11,200 I/A Receipts	$945,700 General Funds $88,900 Federal Receipts	$551,800 General Funds

Research in the Forefront: Family Equity

When the Alaska Women's Commission was first established in 1978, it faced an appalling lack of data and statistics. While the *Preliminary Report on the Status of Women in Alaska*, authored in 1976, was a goldmine of information, it could not begin to approach the detail needed to correct discriminatory laws and establish equitable policies across the board. It was for this reason that the legislature directed the Commission to conduct further research. Since that time the Commission has made research a priority.

Good research builds on earlier findings. Early Commission studies on the status of Alaskan homemakers and problems with child support enforcement have been supplemented by Commission analysis of the social and economic status of all Alaskan women, Native women in particular. Because of Commission research, it was discovered in 1984 that Alaskan women were earning only $11,000 compared to $22,000 earned by male counterparts.

In 1985 the Commission worked with the Alaska Bar Association to review all of the Alaska statutes to uncover numerous laws which diminished or jeopardized economic equity. Setting out to correct these problems constituted the Commission's legislative platform of 1986. Commission research has been a catalyst for legislative advocacy and action.

Because education can open the door to better opportunity in life, in 1986 the Commission directed its research efforts to educational equity. Administrators throughout the educational system are working to improve their track records because of the 1986 report, "Commitment or Complacency?" which the Commission authored.

This year, 1987, saw the Commission turn its attention to the critical issue of family equity. Research from other areas in the country began to suggest that divorce reforms of earlier years were having unintended results. Women and children were being thrown into poverty because, it seemed, of the very efforts to make divorce laws more equitable.

The study of divorce and its economic impact on families is vitally important because of the number of people whose lives are affected by it. In Alaska, more than 11,000 people are affected each year, 3,000 of them children.

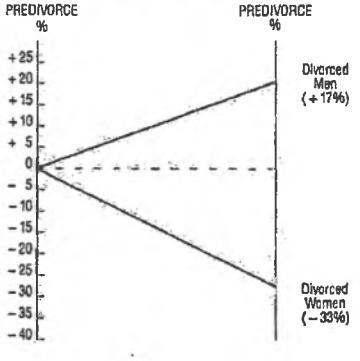
The results of the study, titled "Family Equity at Issue," were startling and disturbing. The Commission discovered that divorce in Alaska results in a significant drop in income for women and children. Men, on the other hand, usually benefit financially. Inadequate and poorly enforced child support awards, the near absence of alimony and unequal division of marital property are creating financial disaster for many women and their children.

Included in the findings was the alarming fact that the average child support award in Anchorage does not cover even half the cost of out-of-home day care (child care) necessary for most parents who work outside the home. Without this most basic element of financial support, single mothers with custody of their children can hardly hope to raise themselves out of poverty.

The study confirmed the importance of continuing the Commission's efforts to change the laws regarding divorce and dissolution in Alaska. In an effort to tap all available resources, the Women's Commission has contacted the Alaska Judicial Council to explore whether that agency can collaborate with the Commission in expanding the research on family equity to a statewide scope. It is essential to determine what impact divorce laws and procedures are having on the lives of rural women. Additional resources must be found to extend this research to rural Alaska, particularly since the Rural Research Agency no longer exists.

The results of the study on family equity have been presented to numerous groups throughout the state in an attempt to educate women and men regarding this critical issue. Future plans dependent on funding, include the development of brochures, videos and other materials to help people make more informed decisions when they go through a divorce.

Percentage Change in per Capita Income of Divorced Men and Women



Education: A Year In Review

One of the major components of the Commission's work is public education, getting information out to thousands of women each year on what their rights and opportunities are. This year Commission members and staff provided, attended or sponsored seminars, workshops and educational events as far north as Barrow and as far west as Bethel.

Commission-Sponsored Panels and Seminars

At each of its meetings during 1987, the Alaska Women's Commission invited community leaders and representatives to discuss issues of importance to women and families. These panels are offered as a dialogue between the Commission, policy makers and the public.

In March 1987, Senator Rick Halford, Representative Johnny Ellis, Commissioner Myra Munson, Barbara Miklos, Executive Director of the Council on Domestic Violence and Sexual Assault, and Sherrie Goll, lobbyist for the Alaska Women's Lobby, presented information on the Human Services Budget and how it impacts women and families.

In May 1987, now-Mayor Diane Carpenter, Cathy Feaster, director, Bethel Health Center, and Lorraine Beaver, head counselor, Tundra Women's Coalition Shelter, joined Commission member Mary Pete to discuss issues for women and children in Bethel and in the Yukon-Kuskokwim region of the state.

In September 1987, Assistant Commissioner Karen Perdue presented and discussed Welfare Reform with the Commission and the public.

Members of statewide women's organizations were invited to participate in a Commission sponsored seminar on Public Speaking at the September meeting as well.

Panelists Sherrie Goll, Rep. Johnnie Ellis, Sen. Rick Halford, Myra Munson and Barbara Miklos discuss budget cuts at the March 1987 Commission meeting in Juneau.

Members of women's organizations joined commissioners and staff for an October 1987 training session on effective public speaking.

Women's Legal Rights

In Alaska, women have the legal right to be treated equally with men. Yet, in practice, women often face problems obtaining that right. Nearly 100 women and men attended a free, one-day conference entitled "Legal Rights for Women" to learn more about women and the law. Sponsored by the Alaska Women's Commission, the conference was held at the Anchorage Community College Campus Center on Saturday, April 25th.

Local experts presented vital information on many legal issues of concern to women. Participants attended sessions on topics as wide ranging as divorce and dissolution, job discrimination, domestic violence, sexual harassment, juvenile law, welfare and other legal entitlement programs, property and custody issues, and equal employment opportunity.

Highpoints of the conference included keynote addresses on women's legal rights by Patty Kastelic, Executive Assistant to Governor Steve Cowper, and Nancy Gordon, Assistant Attorney General. Kastelic's comments focused on the historical perspective of women's rights. Gordon discussed recent Supreme Court decisions and their impact on women in Alaska.

Responses from conference participants reflect the need for continued opportunities to provide legal information to women.

Women's History Month

For the second year in a row, the Alaska Women's Commission distributed its "Celebration Series" portraying the lives and accomplishments of thirty Alaskan women. All television stations in the state carried the series of biographical spots during Women's History Month.

The profiles are representative of thousands of women whose courage and determination to make a difference inspire us all to strive for excellence. The "celebration stories" are made possible by a grant from the National Bank of Alaska.

Listed below are the women whose accomplishments were profiled in this Commission series.

Orah Dee Clark, Founder of Anchorage Schools; Mary Louise Rasmuson, Women's Army Corps and Arts Patron; Harriet Pullen, Skagway Entrepreneur; Erinia Callahan, Gold Miner; Mary Antisarlook, Reindeer Herder; Irene Ryan, Geologist; Lil Angerman, Union Organizer; Blanche McSmith, Activist; Rusty Dow, Truck Driver; Nettie Jones Ellison, Ketchikan Native Who Fought Discrimination; Lorene Harrison, Musician and Educator; Dora Keen and Barbara Washburn, Mountaineers; Lucy Cuddy, Teacher and First Bank Board Chairwoman; Marie Drake and Elinor Dusenbury, Alaska Flag Song Composers; Della Keats, Healer; Sadie Neakok, Magistrate; Margaret Murie, Arctic Explorer; Lydia Fohn-Hanson, Pioneer Homemaker; Amanda McFarland, Missionary; Edith Bullock, Tug and Barge Operator; Frances Howard, First Woman State Trooper; Evangeline Atwood, Author and Statehood Organizer; Barrett Willoughby, Author; Isabelle Barnett, Co-Founder of Fairbanks; Nell Scott, First Woman Legislator; Mahala Ashley Dickerson, Attorney; Pioneer Women Aviators; Women's Voting Rights; Women of the Constitutional Convention; Sisters of Providence and St. ann.

In Passing:

1987 saw the passing of statehood advocate and Alaskan historian Evangeline Atwood.

Born of Swedish missionaries, Atwood started many organizations in Alaska including the Alaska Statehood Association, the Anchorage P.T.A., the League of Women Voters and Alaskan World Affairs Council.

Profiled by the Commission in its "Celebration Series," Atwood worked to preserve the history of the state in her books and columns. Her books help us all to better appreciate and understand the history of the people and the state.

Alaska State Association of Colored Women's Clubs Holds State Convention

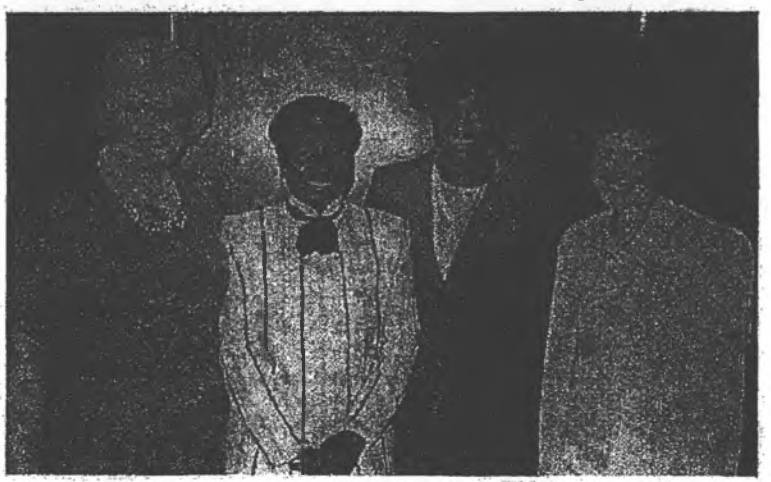
Christine Callahan updates convention delegates on HB4.

Patricia Ray was elected to serve as President of the organization for an additional two-year term at the Association's fourth biennial state convention in April 1987 in Anchorage.

Christine Callahan, executive director of the Alaska Women's Commission, addressed convention delegates on Commission legislation and activities.

Business And Professional Women's Clubs Honor National Vice President

In September 1987 the Business and Professional Women's Clubs of Alaska honored the national first vice president of the organization with a dinner in Anchorage. La Verne Collins, a member of the Anchorage Women's Commission, was elected to this post in 1987 and is working to effect change in national policies that impact women and families. She gave a stirring speech on parental leave and how to make it a national reality. "It has been said that this country does not have a family policy but I disagree," Collins said. "It does. Families are ON THEIR OWN." Along with the coalition of women's organizations working on this issue, BPW hopes to change that.



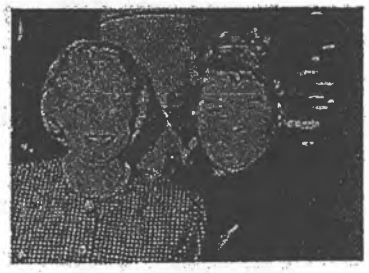
L. to R. Janet Bradley, Executive Director of the Alaska Human Rights Commission; Joy Green-Armstrong, Vice-Chair of the Alaska Women's Commission; La Verne Collins, First Vice President of Business and Professional Women's Clubs of America; and Christine Callahan, Executive Director of the Women's Commission share a moment at the dinner honoring Collins.

National Association of Commissions for Women

Paula Ziegler attended the June 1987 meeting of the National Association of Commissions for Women in Lexington, Kentucky as the Commission's representative. She attended sessions on the work force in the year 2,000 and implications for women, and on the implementation of pay equity in number of states. Ziegler had the opportunity to meet with Shirley Dennis, the chief of the Women's Bureau, about pending Welfare Reform legislation.

Jeannine Dowling, left, director of public affairs for Philip Morris U.S.A., and Paula Ziegler, Chair of the Alaska Women's Commission, joined more than 120 delegates from commissions across the United States and Puerto Rico at the 18th annual convention of the National Association of Commissions for Women in June 1987.

Women and the Constitution



Sandra Day O'Connor and Kay Linton at the Anchorage celebration of the Constitutional bicentennial, September 1987.

Celebrations surrounding the bicentennial of the Constitution of the United States were highlighted by the presence of Supreme Court Justice Sandra Day O'Connor, who spoke to a standing-room-only crowd at the Loussac Library in Anchorage in September 1987. Kay Linton, the past president of the Alaska Federation of Women's Clubs, has attempted to bring Justice O'Connor to Alaska for years. She succeeded this year in organizing this event for the Friends of the Library, on whose board of directors she currently serves.

The Alaska Women's Commission helped publicize and "broadcast" Justice O'Connor's appearance so that as many women as possible could attend this historic event.

The View from the Top of the World

In Barrow, the North Slope Borough Health Department, Substance Abuse and Treatment Service sponsored "A Delicate Balance — A Conference for Women" on September 25 & 26. Over 125 women from villages throughout the North Slope Borough attended workshops on family concerns, legal issues, health care and women's roles.

Christine Callahan, Commission Executive Director, and Charlotte Brower, former member of the Alaska Women's Commission, conducted a workshop with the entire conference group on how to establish an effective local women's commission.

The conference participants elected Charlotte Brower and Elsie Itta to a steering committee to recruit applicants for the North Slope Borough Women's Commission. Jeanne Cross of the Abused Women in Crisis program will serve as an alternate on the recruitment committee.

L. to R. Elsie Itta, Jeanne Cross and Charlotte Brower plan recruitment efforts for the North Slope Borough Women's Commission, September 1987.

Transitions

In October 1987 Kris Chatfield stepped down from her position as Chair of the Alaska Women's Commission. Elected to chair the group in September 1986, Chatfield has made extraordinary contributions to the Commission's work since her appointment by Governor Sheffield in September 1983.

Serving first as the Commission's Vice-Chair from 1984 through 1986, Chatfield chaired the Program Committee and served on the Native Issues Task Force. She helped craft the Commission's legislative agenda and was instrumental in helping to promote issues to the public through use of the media. She co-chaired the steering committee of the 1985 Statewide Women's Conference and helped make that huge undertaking an unqualified success. Kris will complete her term as a Commissioner in June 1988.

Christine Callahan, left, presents gavel to outgoing chairperson Kris Chatfield.

Education — Support

Speakers' Bureau

Providing information about the condition of women to the general public is essential to improving the status of women. In 1987, the Commissioners and staff gave 89 presentations and media interviews to present information on women's issues. Following is a list of the topics addressed by various organizations:

Divorce Research
Federal Aviation Administration Federal Women's Program

Forming a local women's council
North Slope Borough Women's Conference

Legislative Platform
Bering Sea Women's Group; Federal Aviation Administration Federal Women's Program; Soroptimists, Anchorage; Alaska Native Health Services / Federal Women's Program; Church Women United; First Congregational Christian Women's Fellowship; Business and Professional Women's Club, Fairbanks; American Association of University Women, Fairbanks; National Organization of Women Regional Conference; Soroptimists, Juneau; Business and Professional Women, Anchorage; Alaska Assoc. of Colored Women's Club; Alaska Women's Political Caucus; Business and Professional Women; League of Women Voters; Human Rights Commission; Business and Professional Women, Juneau; Republican Association of Professional and Business Women; Alaska Bar Association; Kenai Women's Coalition; Alaska Federation of Natives

Minority Women
Alaska Women's Resource Center; LaVerne University

Pay Equity
Unitarian Fellowship

Women's History
American Assoc. of University Women

Information And Referral

The Alaska Women's Commission increasingly has become a clearinghouse for information on services, programs, legislation, and issues which relate to women's concerns in the state of Alaska today.

In 1987, 1,206 calls and/or walk-in contacts were received on a wide range of topics. A predominant number of requests were for statistical and research information on Alaskan women. These requests came from individuals, legislators, educators, attorneys, researchers, the media, and other groups. Listed below are the number of requests by topic.

Commission programs/events.....159
Children.....37
Economics.....32
Small Business.....23
Education.....54
Employment.....74
Health.....25
Legal & civil rights.....113
Legislation.....157
Minority women.....43
Older women.....18
Politics.....47
Requests for Publications.....200
Violence/Sexual Assault.....19
Media contacts.....46
Women in history.....49
Other contacts.....110

The Commission also maintains a resource library of more than 500 books, periodicals, and files on issues affecting women. All materials are available to the general public.

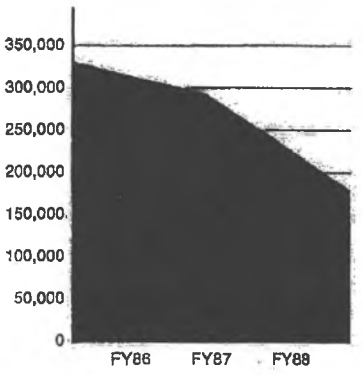
The Budget–A Successful Public-Private Partnership

The FY87 Commission budget was $262,600. Of this amount, $251,500 was state general funds and $11,100 was a federal grant which enabled the Commission to hire a Senior Employee in a job-readiness training program.

This amount was supplemented by generous in-kind donations of time, expertise and services from a large number of individuals, businesses, professionals and organizations. The Commission is at the forefront of state agencies in successfully pursuing alternative and creative sources of support. In fact, the reason the Commission has produced the quantity and quality of work for which it is known has been a successful public-private partnership involving countless volunteers.

In 1987 more than $22,000 of in-kind volunteer services were donated to Commission projects. Including all alternative sources of revenue and in-kind services, the Commission generated more than $100,000 in additional programmatic money to supplement its state budget.

In 1988 the Commission anticipates receiving a state budget of approximately $200,000, losing nearly 25% of its base funds. Reductions of this type have occurred over each of the past three years. Each major reduction of the basic programmatic and staff budget also reduces the Commission's ability to seek and secure additional sources of revenue.



The budget for the Alaska Women's Commission authorized by the legislature has declined by nearly 40% since FY86.

Upcoming Events

February 6—Alaska Women's Political Caucus will be holding its annual meeting in Anchorage. A distinguished panel of former women candidates will be discussing "When Winners Don't Win." Election and installment of new officers will follow the panel discussion. For further information call 277-1330.

February 21-24—Power of Politics and Government in Washington D.C. will be the first of three seminars on Power in America sponsored by the educational Foundation for Women's Resources. The seminars will provide opportunities to strengthen individual leadership skills and create avenues for women leaders to exert their influence and talents. For more information contact (703) 549-1102.

March—Women's History Month in Alaska. The Commission's T.V. spots on "Profiles of Alaskan Women" will air in communities throughout the state. Contact local women's organizations for other activities scheduled within your community.

March 3-5—Juneau residents can take a one-credit course in Women's History at the University of Alaska, Southeast. Registration is $15.00

March 5—Staying Power, Part I. A conference to unite and encourage women in their personal, professional and political lives will be held in Anchorage. This conference will discuss issues that unite all women and will create an action agenda to sustain the quest for equity in Alaska.

The conference will also prepare participants for Staying Power, Part II in October. Nationally known Bella Abzug and Shirley Chisholm will join other renowned speakers to inspire a recommitment to activism among professional women. Musical artist, Libby Roderick will also appear in concert.

Both conferences are sponsored by the University of Alaska, Anchorage, Alaska Pacific University and both the Alaska and Anchorage Women's Commissions. Call 786-1060.

March 14-16—Alaska Women's Commission will meet in Juneau.

March 17-18—Making Choices for Your Future, a leadership conference for young minority women will be sponsored by the Anchorage School District. Topics will include preparation for careers, peer pressure, self esteem, sex and race bias, health issues and communication with parents. For more information contact Jean Marie Crumb at 269-2265.

March 19—Women's Health Fair will be held in Juneau. Free health screening and health education will be provided.

March 25-27—Women: Exploring Options, Building Our Dreams, is the theme of Kodiak's women's conference. Sponsored by the Kodiak Area Native Association, the conference will feature as its keynote speakers, Senator Arliss Sturgulewski, Rosita Worl and Christine Callahan, Executive Director of the Alaska Women's Commission.

April 14-16—Southeast Alaska Native Women's Conference will be held in Juneau. Contact Patty Adkisson at 789-3377.

Action Agenda Survey

1988 marks the 10th anniversary of the Alaska Women's Commission. Over the past decade the Commission has witnessed dramatic changes resulting from its efforts in research, education and legislative advocacy to improve the status of women. The challenge now before us is to insure that the equity gained can be preserved and that appropriate social change can continue into the future. Targeting issues and concerns important to Alaskan women is essential if we are to continue achieving these results.

This survey solicits your viewpoint about issues important to women of Alaska, issues that personally concern you or which affect your community or the entire state of Alaska. The survey also asks how effective you believe the Women's Commission has been in addressing issues through its activities. By completing this survey, you will provide important direction to the Women's Commission as it establishes its Action Agenda for the 90's.

Issues

Under each of the following issues prioritize your top three concerns using a number scale, where #1 is the highest, #2 is of lesser priority and so on. Please include any other issues of concern if not stated.

FAMILY EQUITY
- ____ Child support
- ____ Child custody
- ____ Equal credit opportunity
- ____ Homemaker's rights
- ____ Equity in divorce laws
- ____ Other (please explain):

CHILD CARE
- ____ Employer sponsored child care
- ____ Publicly-subsidized child care
- ____ Parental Leave
- ____ State regulations of quality and licensing
- ____ Affordability
- ____ Latch key
- ____ Other (please explain):

ECONOMIC
- ____ Housing-affordability
- ____ Insurance and pensions
- ____ Economic development
- ____ Loan programs for women-owned businesses
- ____ Employment, job creation
- ____ Employment discrimination
- ____ Welfare Reform
- ____ Pay equity
- ____ Other (please explain):

EDUCATION
- ____ Access to education and training
- ____ Educational equity
- ____ Affordability of education
- ____ Other (please explain):

JUSTICE
- ____ Child abuse
- ____ Domestic violence/sexual assault
- ____ Victims' rights
- ____ Women in prison
- ____ Gender bias in the courts
- ____ Other (please explain):

HEALTH
- ____ Teen pregnancy
- ____ Reproductive rights
- ____ Occupational health hazards
- ____ Alcohol and substance abuse
- ____ Other (please explain):

Commission Activities

The Alaska Women's Commission provides education, research and advocacy to improve the status of women. Please rate their value to you.

EDUCATION — Indicate whether you attended any of the following conferences and rate their value to you.

	Attended		Value					
	Yes	No	Low				High	
Legal Rights Conference, Anchorage, 1987	☐	☐	1	2	3	4	5	N/A

Thanks

There are hundreds of people, organizations and businesses who helped the Alaska Women's Commission accomplish its goals in 1987. Thanks to all of those in Houston, Wasilla, Wrangell, Sitka, Kenai-Soldotna, Homer, Ketchikan, Petersburg, Port Alexander, North Pole, Kodiak, Bethel, Nome, Barrow, Fairbanks, Eagle River, Kotzebue, Juneau and Anchorage who contributed time, money or support to the Commission's efforts.

Thanks especially to the following for their contribution to conferences, workshops, legislative advocacy, seminars, research and media projects and/or to the effort to extend the Commission's life and work until 1991.

A Job Well Done

LaVerne Collins of Anchorage was recently elected first vice-president of the National Association of Business and Professional Women's Clubs of America.

Adele Bacon, state plumbing inspector in Fairbanks was recently installed as the first woman Vice-President of the International Association of Plumbing and Mechanical Officials. Bacon was also Alaska's first apprentice graduate in plumbing and the state's first female plumbing inspector.

Newly elected women mayors include: Valerie Bergman, Allakaket; Diane Carpenter, Bethel; Dora Ahkinga, Diomede; Maggie Scholtz, Goodnews Bay; Liv Gray, Hoonah; Marcella Padie, Houston; Elinor Okavik, Napaskiak; Carleta Lewis, North Pole; Mary Beaver, Russian Mission; Sarah Okbaok, Teller; Emma Ayojiak-Carolos, Toglak; Fern Neimeyer, Wrangell. Women hold 16 percent of the mayor's seats in Alaska.

Heather Flynn, Anchorage assemblywoman, was recently installed as President of the Alaska Municipal League.

Lorraine "Sammy" Crawford, a social studies teacher at Soldotna High School has been named 1988 Alaska Teacher of the year. She also is one of four finalists for National Teacher of the Year.

Mary Pete of Bethel was recently appointed to the State Council on Domestic Violence and Sexual Assault.

Ayana Augustine-Warren of Anchorage was recently honored at the Blacks in Government Conference with a Presidential Award for her advocacy on behalf of children with special needs. Augustine-Warren also serves as the Anchorage Chapter President of Blacks in Government.

Kay Kennedy of Fairbanks has been named Woman of Achievement by the National Federation of Press Women.

The award is the national groups highest honor.

Joan McCoy of Anchorage was elected treasurer of the National Federation of Press Women. She is the first national officer to come from Alaska.

Alaskan Rotary Clubs have opened their doors to women. Women members have been installed throughout the state including Eagle River, Fairbanks, Anchorage and Petersburg. Karen Van Meter of Eagle River was the first woman admitted to a Rotary Club in Alaska.

Patricia Ray, state president of the National Association of Colored Women's Club announced the formation of a new chapter in Juneau. Anita Price was elected president of the Juneau Chapter.

Donna Meyer, Anchorage, received the Outstanding Community School Urban Personnel award from the Alaska Association for Community Education.

March 25, 2011

The Honorable Bill Wielechowski, Chair
Senate State Affairs Committee
Alaska State Capitol, Room 101
Juneau, AK 99801-1182

RE: SB 53 (Davis)—Support

Dear Chair Wielechowski:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the Senate State Affairs Committee to support SB 53, authored by Senator Bettye Davis and co-sponsored by Senator Johnny Ellis.

SB 53 would reestablish the Alaska Commission on the Status of Women.

Women's issues are different from those of the entire population. AARP has always paid particular attention to women's issues simply because they are often unique and need to be viewed through a different lens.

We understand that the Alaska Commission on the Status of Women would address issues of importance to Alaska women of all ages.

But simply from the standpoint of women over the age of 50, we believe the Commission is worthwhile and should be re-established:

- Women are at a higher risk of poverty as they age. Nearly twice as many women as men will face poverty in their retirement years. Women earn 77 cents on the dollar compared to men. This translates as an average of $250,000 less over their work lives to invest in retirement.
- Women over age 50 are more than twice as likely as men over 50 to frequently miss activities due to a lack of transportation.
- Older women face particular challenges in getting access to training and educational programs that enable them to increase their job skills. The AARP Foundation has a scholarship program for older women with low incomes. A third of the recipients are grandparents and almost half of the recipients were in dead-end jobs.
- Working women are often the sole or primary economic support for their families, yet they tend to be concentrated in low-paying occupations. More than two-thirds of the part-time workforce is made up of women, with less job security and little or no access to employer-provided benefits.
- The vast majority of family caregivers are women. Many are forced to drop out of the labor force altogether to take on family caregiving responsibilities.

Health care access, displaced homemakers, widowhood, credit issues, economic vulnerability, out-of-pocket health costs, retirement system disparities, Social Security disparities, spousal pension rights…the list goes on and on…all good reasons to have an Alaska Commission on the Status of Women.

AARP recommends an "AYE" vote on SB 53.

Jennie Chin Hansen, President
Addison Barry Rand, Chief Executive Officer

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

Subject: SB53

I am writing in support of SB 53 which will be the subject of a hearing March 24. This is a great time to reestablish the Alaska Commission on the Status of Women. There are unique problems facing women and children in Alaska in the 21st century and it is right that the Legislature is moving forward with this.

Thank you for your efforts.

Dear Senators,

This message is in support of SB53 to reestablish the Alaska Women's Commission because of the needs delineated in this bill. I believe the Commission can offer support to women and children in many ways. In addition, women have many challenges maintaining small businesses in Alaska. We need resources that will focus on the many critical issues that negatively impact women entrepreneurs.

Please let me know if I can offer further assistance.

Sincerely,
Rose Stokes

Re: SB 53

Reestablishment of the Alaska Commission on the Status of Women

Dear Committee Members:

My name is Ramona (Miss Mona) Duby . i live in Anchorage. I am a daughter, sister, auntie and according to some, their "greatest auntie". I am **"NOW"** also proud to be a member of the Koniag, Inc. and Leisnoi, Inc. , corporations formed under the Alaska Native Claims Settlement Act. I say "NOW" because if you were here in the '60's, you may recall the prejudice faced by Alaska Natives and I had a very hard time being proud of my heritage. It took a long time, especially being a woman those years to come to grips with my heritage/womanhood.

I am the past president of Business and Professional Women/Anchorage Local Organization, past chartering president and president of Denali (Wasilla) Business and Professional Women, the '92-'93 President of the Alaska Federation of Business and Professional Women, an ATHENA Society Member, currently on the Board of Directors of Anchorage Community Mental Health Services, Inc., the Alaska Mental Health Board and have served on a variety of other boards and committees over the years.

I regret that I cannot testify in person on the important piece of legislation, however would like to offer my written testimony in support of SB53, the Reestablishment of the Alaska Commission on the Status of Women.

Because of the value of the information in the publications, I still have some that were published by the former Commission under the Cowper and Sheffield administration. The Legal Handbook and the Alaska Women's History Booklet are both excellent references that I have referred to on many occasions over the years. For years, we've heard how Alaska leads most other states in domestic violence and sexual assault not to mention substance abuse, and wage discrimination.

Unfortunately, I am one of the women who has faced every single one of the "issues" personally that are addressed in the statistics gathered on the status of women. From sexual assault / abuse when I was a child to wage and employment discrimination, domestic violence, alcohol and drug abuse, [illegible]e, mental illness, financial exploitation prior to the fair credit act of 1981, etc. Some of these issues I am still battling through on a daily basis. Perhaps with the re-establishment of the Alaska Commission on the Status of Women, providing the valuable and useful information as it did in the past, it will assist policy makers and funding organizations that with just a few hundred million dollars invested in treatment rather than billions of dollars in building prisons, Alaska will be not just the Great Land, but the GREATEST Land.

Please, I strongly urge you to join me in supporting the reestablishment of the commission.

Yours Sincerely,

Ramona (Miss Mona) S. Duby

Subject: Senate to Consider Reestablishing Alaska Women's Commission

Kathy:

This is very, very good. I was involved with the original establishment of the Women's Commission in Alaska and was a member of that group with Lillie McGarvey (a powerful Native woman).

When we were in Vermont, I was on the Governor's Commission for Women for 4-5 years and that was extremely productive. We did a lot to advance payment for women's services, domestic violence prevention work, legislative discussion in Montpelier and leadership skills for women in Vermont. It was a good experience for me.

I would expect that, if this costs a dime, it won't go anywhere. But we do have to keep trying.

Thank you for sharing and I will welcome any update as there is movement.

Thank you all who helped with the event honoring Elizabeth Peratrovich-
-
what a successful working together of the Alaska Native Sisterhood and the League of Women Voters!
Here is some news about the Alaska Women's Commission that I think as come to me because of Sen. Bettye Davis' sponsorship of the Elizabeth Peratrovich Day 2011 legislative citation, so I wanted to pass it along to all of you.

Please find attached a letter of support for SB 53 from the Arctic Business & Professional Women (Nome)

I am very ill with some kind of persistent pneumonia (7 weeks now!) but will crawl out of my sick bed to testify for this bill in the AM.

The impact of the reestablishment of the Commission will be immense not only for urban areas but especially for those of us in the rural areas. I live it!

Jana

Arctic Business & Professional Women
Post Office Box 814
Nome, Alaska 99762

Bill Wielechowski
Chair
House Committee on Health & Social Services

Dear Chairman Wielekowski and members of the HSS Committee,

The Arcitic Business & Professional Women (Nome) are in full support of reestablishing the Commission on the Status of Women - SB 53.

The purpose of the Commission was and still is important to the lives of women and children in this state. Unfortunately, since the demise of the Commission, the type of research focusing on the status of women in this state has been sorely lacking. That lack is reflected in general statistical information which does not clearly represent issues as we see and live them.

Our state is a vast one. It covers so many cultures, so many economic bases, and a wide range of ages and needs. The State of Alaska provides general services to all members of our societies but does ***not*** focus on the special needs of its women citizens.

I will bring up the unspoken truth: Without Women and Children, we would have ***no*** Society. No families. No enforcement of rules/laws except Thou Shall Not Kill!

Those of us who live in rural Alaska, the Frontier, as it were, understand and constantly battle against domestic violence, sexual assault, incest, other forms of women and child abuse. We fight against racial discrimination, hiring prejudices, and brushing under the rug violations of law, regulation, and policy.

To pursue a grievance means a woman must be able and willing to file with myriad state agencies for relief. It's confusing and oh so frustrating!

Before its demise, the ACSW provided a central clearing house for those women. Without it, women are left to try to make sense of federal, state, local laws and ordinances to even file a complaint, let alone receive relief.

The Arctic Business & Professional Women has taken on this task as our First Issue - untangling bureaucratic red tape for the women in our Region. We are a clearing house for information, relying on our contacts, our backgrounds, on the Blue Book, advising on how things are supposed to work

I will respectfully remind you that there is NO Community without women and children! The sustainability of any community relies and is based on the health and well-being of its women and children. Without us, it's just a camp, not a community.

As economies suffer, so does the status of women in this state! If you truly believe that women are an integral part of the future and of the economic and social bases of the State of Alaska, you will reinstate the Commission on the Status of Women.

Sincerely,
Jana Varrati
President,
Arctic Business & Professional Women

Senators,

I Support SB 53: Reestablish the Alaska Commission on Women

I support Senate Bill 53 to Reestablish the Alaska Commission on Women. There should be no question about this as it should have never gone away!

There was the survey that was recently done that shows a majority of Alaska women have been abused or are being abused at some time.

We know that women earn about 67 cents on the dollar for the same work that men do. I think it may have actually gotten worse in recent years and had been at 70 cents one time.

I'm hearing again the excuse that men are the breadwinners so they are being hired over women more than ever after the recession. Many women are the breadwinners; and regardless of that they deserve equal pay for equal work. If a man is single, do you expect him to take a lesser salary?

I have seen recently that there are still practices of assuming the woman, in an issue such as divorce or financial disagreements, is the one that is the problem. She is too often assumed to be the one at fault. It isn't just the ditzy blond prejudice but that women are fickle or some other excuse.

In fact, my daughter who is the owner of her house that she signed the mortgage on and continues to pay off, being the only one who ever paid a dime on it and holds all the paperwork, had the experience when her husband moved out of being treated as if she had no say in that house.

When she went to have the power, phone, TV, put in her name alone she had to argue the point and actually take her ownership paper work to the aforesaid companies before she could eventually have the changes made so she would not be without necessary services. (He was no longer there and had demonstrated he could care less, other than continuing to find ways to charge things to her.)

You may think I am prejudiced, but if you talk to other women you will see that this is typical. We certainly do need a Commission to help see that women get fair treatment regardless of their status.

Often women fear abandonment and tolerate too much mistreatment. Others attempt to better things and find the mountain they have to climb is just too steep. Years later perhaps the police investigate abuse that had gone on and wondered why a woman would tolerate such.

The climate, through conditions that sometimes continue to exist today, gives sanction to bad treatment. You still hear things like: "That's a woman for you!" "Must have been a woman driver!" "She just blew the whole paycheck!"

When do you hear: "She is the one who does the books and manages the check book!" "I can't believe how she holds down her full time job and goes home to fix a dinner from scratch!" "The best military pilots are women!" (They are equal or above the performance of men if you check.)

No more and no less, just treat women fair; the Commission will help make that happen.

Sincerely,

Doris Robbins

I am writing in support of SB 53 which will be the subject of a hearing March 24. This is a great time to reestablish the Alaska Commission on the Status of Women. There are unique problems facing women and children in Alaska in the 21st century and it is right that the Legislature is moving forward with this.

Thank you for your efforts.

Hi Jana:

You are just so awesome!!!!! Attached is the bill.

It will be heard on Thursday the 24th at 9:30

Please send letters to committee chair and copy Bettye. You can call Celeste Hodge in Senator Davis office for information if you are unable to access the bill from basis.

Hugs to you and thanks for all you do!

mona,

es, it's me, Jana. I'm trying to help on this bill but can't get the info about it reestablishing the AWC. I have our BPW members here ready to write letters, etc to support but I can't give them the basic info on which to base those letters. I lobbied the creation of the AWC, worked with them on so many issues, and was a member of first Anch. Women's Commission.

Help me, Sister!

Jana

Re: SB 53
Reestablishment of the Alaska Commission on the Status of Women

Dear Committee Members,

My name is Sue C. Johnson and I live in Anchorage. I am a mother, daughter, sister, wife, and very recently a grandmother, I am the Past President of the Alaska Women's Political Caucus, a member of the Athena Society (a program of the Anchorage Chamber of Commerce dedicated to encouraging the potential of women as valued members and leaders of the business community), a member of the League of Women Voters and the Business and Professional Women of Alaska.

I regret that I cannot testify in person on the important piece of legislation, but for the record, I have the following comments supporting the Reestablishment of the Alaska Commission on the Status of Women.

In my view, the Alaska Commission is a vehicle for addressing some of the very critical key issues facing Alaska as a society. That the Commission focuses on women's issues does not mean it is just some vehicle to "study women" - my husband says he has been doing that unsuccessfully his whole life. Rather, the focus on women encourages evaluation of important issues facing Alaska as a community.

During recent months and during election time, we heard over and over again about how we lead most other states in domestic violence and how most Alaskan women have experienced it firsthand. We have also heard about the astronomical number of rapes and sexual assaults that occur in our state. Rather than being leaders in sexual assault and rape of women, let's be leaders in how we treat the women of Alaska. I believe this commission would put us on track to do that.

We also know that many Alaskan women are the single wage earner for families and that the numbers of women in the workforce, as well as their chosen career paths have dramatically changed over the past several years. However, they still fall far behind men when it comes to wages and benefits, especially as they related to health care and retirement. One of the biggest complaints I hear regularly from young mothers is the difficulty in locating reliable, affordable and safe child care for their children. I've been hearing that same complaint for the thirty five plus years I have lived in Alaska and I have personally had the same experience. We can do better than that.

These are only small samplings of concerns facing Alaskan women and families. It is time to stop ignoring them. Alaskan women have made numerous contributions and sacrifices for the State of Alaska and they deserve to know the government is looking out for their best interests.

I urge you to support the reestablishment of the commission.

Respectfully Submitted,

Sue C Johnson

MEMORANDUM February 16, 2011

SUBJECT: 2011 Revisor's Bill, Section 3
(SB 61 (Work Order No. 27-LS0152\B.1))

TO: Senator Bill Wielechowski
Chair of the Senate State Affairs Committee
Attn: Michelle Sydeman

FROM: Kathryn L. Kurtz KK
Assistant Revisor

At Tuesday's hearing on SB 61, you raised a question as to the effect of sec. 3, and whether it makes a substantive change in the law.

In my response, I believe I indicated that the change was intended to bring the language of AS 08.29.200(b) into line with that of AS 47.24, as amended in 1994. I have since had a chance to look further into the history of the two provisions, and noticed that AS 08.29.200(b) was not enacted until 1998. It is not clear to me why it was not drafted using terminology consistent with AS 47.24. However, on further reflection, I believe it is possible that it was a deliberate drafting choice, and that changing the language of this provision might have a substantive effect.

For this reason, I recommend removing section 3. An amendment to do this is enclosed.

Thank you for your careful reading of the bill.

AMENDMENT #1

OFFERED IN THE SENATE

TO: SB 61

Page 2, lines 2 - 7:

Delete all material.

Renumber the following bill sections accordingly.

SENATE BILL NO. 61

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE RULES COMMITTEE BY REQUEST OF THE LEGISLATIVE COUNCIL

Introduced: 1/24/11
Referred: State Affairs, Judiciary

A BILL

FOR AN ACT ENTITLED

"An Act making corrective amendments to the Alaska Statutes as recommended by the revisor of statutes; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 03.22.050 is amended to read:

Sec. 03.22.050. Department to cooperate. The department shall cooperate with the college or department of the University of Alaska responsible for the Agricultural and Forestry Experiment Station and the **United States Department of Agriculture, Natural Resources Conservation Service** [UNITED STATES SOIL CONSERVATION SERVICE] by a formal memorandum of understanding and may cooperate with any department or agency of federal, state, or local government, research organization, or other organization concerned with conservation or agriculture.

*** Sec. 2.** AS 08.02 is amended by adding a new section to read:

Sec. 08.02.090. Definition. In this chapter, "department" means the

Department of Commerce, Community, and Economic Development.

* **Sec. 3.** AS 08.29.200(b) is amended to read:

(b) Notwithstanding (a) of this section, a person licensed under this chapter shall report incidents of

(1) child abuse or neglect as required by AS 47.17;

(2) harm or assaults suffered by **a vulnerable adult** [AN ELDERLY PERSON OR DISABLED ADULT] as required by AS 47.24.

* **Sec. 4.** AS 08.40.120(a) is amended to read:

(a) Each applicant shall be examined to determine the applicant's

(1) ability to understand plans, design specifications, and engineering terms commonly used in the electrical field;

(2) knowledge of electrical installations and wiring;

(3) familiarity with the regulations contained in the National Electrical Code and the National Electrical Safety Code, as approved by the **American National Standards Institute** [AMERICAN STANDARDS ASSOCIATION];

(4) familiarity with other installation and safety regulations approved by the **American National Standards Institute** [AMERICAN STANDARDS ASSOCIATION];

(5) personal skill and ability.

* **Sec. 5.** AS 08.42.060(a) is amended to read:

(a) The department shall examine applicants for an embalmer's license; the examination may include any or all of the following subjects: (1) theory and practice of embalming, (2) anatomy, (3) pathology, (4) bacteriology, (5) hygiene, including sanitation and public health, (6) chemistry, including toxicology, (7) restorative arts, including plastic surgery and demi-surgery, (8) funeral service arts and sciences [,] and funeral service administration, including accounting, funeral law, psychology, funeral principles, directing, and management, (9) Alaska vital statistics law, and (10) the provisions of this chapter and the regulations adopted by the department under this chapter. The department shall examine applicants for a funeral director's license; the examination may include any or all of the subjects included in (8), (9), and (10) of this subsection. The department may use the examination provided by the **International**

Conference of Funeral Service Examining Boards [CONFERENCE OF FUNERAL SERVICE EXAMINING BOARDS OF THE UNITED STATES, INC.] where it is applicable to the subjects in this section.

*** Sec. 6.** AS 08.86.180(b) is amended to read:

(b) This section does not apply to

(1) a person employed as a school psychologist, if the school district maintains appropriate supervision of psychological activities and professional conduct, and if the person is performing the psychological activities as part of the duties for which the person was employed, is performing the activities solely within the facilities of the school district in which the person is employed or under the supervision of the school district, and does not render or offer to render psychological services to the public for compensation in addition to the salary the person receives from the school district;

(2) an officer or employee of the United States government practicing psychology while in the discharge of the officer's or employee's official duties;

(3) a student, intern, or resident in psychology pursuing a course of study approved by the board as qualifying training and experience for a psychologist, if that person's activities constitute a part of that person's supervised course of study and that person is designated by titles such as "psychology intern" or "psychology trainee";

(4) a qualified member of another profession, in doing work of a psychological nature consistent with that person's training and consistent with the code of ethics of that person's profession, if the person does not hold out to the public by a title or description of services incorporating the words "psychology," "psychological," "psychologist," "psychometry," "psychotherapy," "psychotherapeutic," "psychotherapist," "psychoanalysis," or "psychoanalyst" or represent to be trained, experienced, or qualified to render services in the field of psychology; or

(5) a physician engaged in the normal practice of medicine for which the physician is licensed under AS 08.64.

*** Sec. 7.** AS 09.20.050(a) is amended to read:

(a) At such times as need may require, but not later than November 30 of each

year, the administrative director of **the Alaska Court System** [COURTS] shall prepare for each judicial district a list of the names of the residents of the district who are qualified by law for jury service. If the superior court is located in different cities in the same judicial district, the administrative director shall prepare for each location of the court a list of the names of the qualified residents of that portion of the district considered to be appropriate.

* **Sec. 8.** AS 09.20.050(c) is amended to read:

(c) A copy of the appropriate portion of the jury list shall be transmitted to the presiding judge of each judicial district and shall only be used to summon jurors and for other purposes of judicial administration. Duplicate names and the names of deceased persons and persons permanently excused from jury service shall be eliminated from the list before it is transmitted to the presiding judge. A questionnaire for prospective jurors may be adopted and submitted to them by the administrative director of **the Alaska Court System** [COURTS].

* **Sec. 9.** AS 09.20.080(b) is amended to read:

(b) If the list of prospective jurors for a court location does not produce sufficient names for a jury panel of minimum size, the administrative director of **the Alaska Court System** [COURTS] may authorize that additional names of prospective jurors be randomly selected from sources other than those listed in AS 09.20.050.

* **Sec. 10.** AS 14.07.020(a)(16) is amended to read:

(16) establish by regulation criteria, based on low student performance, under which the department may intervene in a school district to improve instructional practices, as described in AS 14.07.030(14) or (15); the regulations must include

(A) a notice provision that alerts the district to the deficiencies and the instructional practice changes proposed by the department;

(B) an end date for departmental intervention, as described in AS 14.07.030(14)(A) and (B) and (15), after the district demonstrates three consecutive years of improvement consisting of not less than two percent increases in student proficiency on standards-based assessments in **mathematics** [MATH], reading, and writing as provided in AS 14.03.123(f)(2)(A); and

(C) a process for districts to petition the department for continuing or discontinuing the department's intervention;

* **Sec. 11.** AS 14.40.809(b) is amended to read:

(b) The board shall

(1) make appropriate arrangements as necessary to fulfill the board's obligations under an advance college tuition savings contract;

(2) establish and adopt a formal plan for administration of the advance college tuition savings program; the terms and conditions of the plan shall be considered a part of an advance college tuition savings contract;

(3) establish investment objectives, criteria, and asset allocation guidelines for the fund based on prudent institutional investor guidelines and actuarial analysis of the earnings requirements for the advance college tuition savings plan;

(4) enter into contracts or agreements considered necessary for the investment of the fund, including contracts or agreements with investment managers, consultants, and other custodians of the fund;

(5) engage a financial advisor to [ANNUALLY] report **annually** on the investment performance of the fund;

(6) engage an independent firm of certified public accountants to audit the financial position of the fund;

(7) do all acts, whether or not expressly authorized, that the board considers necessary or proper in administering the assets of the fund;

(8) enter into reciprocal agreements with [SHELDON JACKSON COLLEGE,] Alaska Pacific University [,] and other eligible educational institutions or state tuition programs that the board determines to be beneficial to the advance college tuition savings program;

(9) coordinate savings options established under the Alaska advance college tuition savings program and the administration of the fund with the Alaska Higher Education Savings Trust (AS 14.40.802) including the creation of common administrative and record-keeping systems, marketing programs, and operating reserves.

* **Sec. 12.** AS 14.42.015(a) is amended to read:

(a) There is in the Department of Education and Early Development the Alaska Commission on Postsecondary Education consisting of

(1) two members of the Board of Regents of the University of Alaska designated by the members of that body;

(2) one person representing private higher education in the state selected **by the Board of Trustees** [JOINTLY BY THE BOARDS OF TRUSTEES] of Alaska Pacific University [AND SHELDON JACKSON COLLEGE] from among **its** [THEIR] membership;

(3) one person representing the Department of Education and Early Development selected by the state Board of Education and Early Development;

(4) four persons broadly and equitably representative of the general public appointed by the governor;

(5) one member of the Alaska Workforce Investment Board established by AS 23.15.550 designated by the members of that body;

(6) one person from the members of the local community college advisory councils appointed by the governor;

(7) two members from the legislature, one of whom shall be appointed by the president of the senate and one by the speaker of the house of representatives;

(8) one person appointed in accordance with (e) of this section who is a full-time student as defined in AS 14.43.160;

(9) one administrator appointed by the governor from a proprietary institution of postsecondary education that has an authorization to operate in the state issued under AS 14.48.

* **Sec. 13.** AS 14.42.015(d) is amended to read:

(d) A full-time postsecondary student shall be appointed to the Alaska Commission on Postsecondary Education from a list of nominees submitted to the governor. The governor shall make the appointment from the list within 60 days after it is submitted. The list must consist of the names of two nominees from Alaska Pacific University [, TWO NOMINEES FROM SHELDON JACKSON COLLEGE,] and two nominees from each campus of the University of Alaska. The nominees shall be selected by the students at Alaska Pacific University [, SHELDON JACKSON

COLLEGE,] and each campus of the University of Alaska by an election held on each campus. Elections under this subsection shall be held concurrently with student regent elections required under AS 14.40.150(b) and conducted under rules established by the Office of the Governor. The term of office of the student member of the commission is two years and begins June 1 of the year in which the appointment is made. Membership on the commission is immediately forfeited by a student member who ceases to be a full-time student. Within 60 days after a vacancy occurs, the governor shall appoint a successor from those students appearing on the list of nominees to serve for the unexpired term of the original appointee. The term "campus" used in this subsection means a portion of the University of Alaska designated as a "campus" by the Board of Regents.

*** Sec. 14.** AS 16.20.070 is amended to read:

Sec. 16.20.070. Relationship to other laws. AS 16.20.050 and **16.20.060** [16.05.060] do not affect AS 16.05.871 - 16.05.891.

*** Sec. 15.** AS 18.56.855(j) is amended to read:

(j) In this section, "authorized state officer" means

(1) the commissioner of the department of the state for a building owned by the state;

(2) the executive director of a public corporation for a building owned by the public corporation;

(3) the legislative council for a building owned by the legislature;

(4) the administrative director of **the Alaska Court System** [COURTS] for a building owned by the judicial system;

(5) any other person designated in writing by a person listed in (1) - (4) of this subsection.

*** Sec. 16.** AS 21.09.210(e) is amended to read:

(e) Payment to the director by an insurer of the tax upon its premiums required by this section shall be in lieu of all other taxes imposed by the state upon premiums, franchise, privilege, or other taxes measured by income of the insurer [COMMENCING WITH THE TAXABLE YEAR BEGINNING JANUARY 1, 1967].

*** Sec. 17.** AS 21.22.065(j) is amended to read:

(j) This section does not apply to

(1) an acquisition subject to approval or disapproval by the director under AS 21.22.010;

(2) a purchase of securities solely for investment purposes if the securities are not used by voting or otherwise to cause or attempt to cause the substantial lessening of competition in an insurance market in this state; if a purchase of securities for investment purposes results in a presumption of control under **AS 21.22.200(3)** [AS 21.22.200(2)], it is not solely for investment purposes unless the insurance supervisory official of the insurer's state of domicile accepts a disclaimer of control or affirmatively finds that control does not exist and the disclaimer action or affirmative finding is communicated by the domiciliary insurance supervisory official to the director;

(3) the acquisition of a person by another person resulting in a change of control of an insurer when both persons are neither directly nor through affiliates primarily engaged in the business of insurance if preacquisition notification is filed with the director under (c) of this section 30 days before the proposed effective date of the acquisition; however, the preacquisition notification is not required for exclusion if the acquisition would otherwise be excluded under this subsection;

(4) the acquisition of an already affiliated person;

(5) an acquisition if, as an immediate result of the acquisition,

(A) the combined market share of the involved insurers would not exceed five percent of a market;

(B) there would not be an increase in a market share of the larger writer; or

(C) the combined market share of the involved insurers would not exceed 12 percent of a market and the market share of the larger writer would not increase by more than two percent of a market;

(6) an acquisition for which a preacquisition notification would be required under this section due solely to the resulting effect on the ocean marine insurance line of business; or

(7) an acquisition of an insurer whose domiciliary supervisory

insurance official affirmatively finds that the insurer is in a failing condition, there are no feasible alternatives to improving this condition, the public benefits of improving the insurer's condition through the acquisition exceed the public benefits that would arise from not lessening competition, and these findings are communicated by the domiciliary supervisory insurance official to this state's director.

* **Sec. 18.** AS 21.34.900(6) is amended to read:

(6) "reciprocal state" means a state that the director has determined has enacted provisions substantially similar to those contained in AS 21.34.170 **and** [,] 21.34.180 [, AND 21.34.210];

* **Sec. 19.** AS 21.39.040(k) is amended to read:

(k) The director

(1) may adopt regulations detailing the format and content of a rating system filing under this section;

(2) shall [, BY JULY 1, 2002,] adopt regulations consistent with the National Association of Insurance Commissioners Property and Casualty Model Rate and Policy Form Act, including those provisions relating to the format and content of informational filings for rates for commercial insurance; the provisions of AS 21.39.030(a) apply to an informational filing authorized by the director; in this paragraph, "informational filing" means a filing that the director does not approve before its use and that meets the format and content requirements of regulations adopted by the director.

* **Sec. 20.** AS 21.40.010 is amended to read:

Sec. 21.40.010. Filing statement of ownership of equity securities. Every person who is directly or indirectly the beneficial owner of more than 10 percent of a class of an equity security of a domestic stock insurance company, or who is a director or an officer of the company, shall file with the department [ON OR BEFORE JULY 1, 1966, OR] within 10 days after becoming the beneficial owner, director, or officer, a statement of the amount of all equity securities of the company of which the person is the beneficial owner. Within 10 days after the close of each calendar month, if there has been a change in ownership during the month, the beneficial owner, director, or officer shall file with the department a statement indicating ownership at the close of

the calendar month, the changes in ownership that have occurred during the calendar month, and any other information required by the department. Statements shall be made in a form prescribed by the department.

*** Sec. 21.** AS 21.45.300(k) is amended to read:

(k) All adjusted premiums and present values referred to in this section shall for all policies of ordinary insurance be calculated on the basis of the Commissioner's 1958 Standard Ordinary Mortality Table, except that for any category or ordinary insurance issued on female risks, adjusted premiums and present values may be calculated according to an age not more than six years younger than the actual age of the insured. Except as provided in (*l*) [(1)] of this section, the calculations for all policies of industrial insurance shall be made on the basis of the 1941 Standard Industrial Mortality Table. All calculations shall be made on the basis of the rate of interest specified in the policy for calculating cash surrender values and paid-up nonforfeiture benefits. The rate of interest specified in the policy may not exceed three and one-half percent a year except that (1) a rate of interest not exceeding five and one-half percent a year may be used for policies issued on or after July 1, 1978, and (2) a rate of interest not exceeding six and one-half percent a year may be used for a single premium whole life or endowment insurance policy. In calculating the present value of paid-up term insurance with accompanying pure endowment, if any, offered as a nonforfeiture benefit, the rates of mortality assumed in the case of a policy of ordinary insurance, may be not more than those shown in the Commissioner's 1958 Extended Term Insurance Table. In the case of a policy of industrial insurance, the rates of mortality may be not more than 130 percent of the rates of mortality according to the 1941 Standard Industrial Mortality Table. The calculation of the adjusted premiums and present values for insurance issued on a substandard basis may be based on another table of mortality as may be specified by the insurer and approved by the director. This subsection does not apply to policies issued on or after the operative date of (w) of this section.

*** Sec. 22.** AS 21.45.300(m) is amended to read:

(m) Except as provided in (s) of this section, the adjusted premiums for a policy shall be calculated on an annual basis and shall be a uniform percentage of the

respective premiums specified in the policy for each policy year, excluding amounts payable as extra premiums to cover impairments or special hazards and also excluding a uniform annual contract charge or policy fee specified in the policy in a statement of the method to be used in calculating the cash surrender values and paid-up nonforfeiture benefits, that the present value, at the date of issue of the policy, of all adjusted premiums shall be equal to the sum of (1) the then present value of the future guaranteed benefits provided for by the policy; (2) one percent of either the amount of insurance, if the insurance be uniform in amount, or the average amount of insurance at the beginning of each of the first 10 policy years; and (3) 125 percent of the nonforfeiture net level premium as defined in (n) - (t) of this section. In applying the percentage specified in (3) of this **subsection** [PARAGRAPH] a nonforfeiture net level premium **may** [SHALL] not exceed four percent of either the amount of insurance, if the insurance is uniform in amount, or the average amount of insurance at the beginning of each of the first 10 policy years. The date of issue of a policy for the purpose of this subsection shall be the date as of which the rated age of the insured is determined. This subsection applies to all policies issued after the operative date of (w) of this section.

*** Sec. 23.** AS 21.96.070(f)(1) is amended to read:

(1) "school district" **means a borough school district, a city school district, a regional educational attendance area, or a state boarding school** [HAS THE MEANING GIVEN IN AS 14.03.126];

*** Sec. 24.** AS 22.15.100 is amended to read:

Sec. 22.15.100. Functions and powers of district judge and magistrate. Each district judge and magistrate has the power

(1) to issue writs of habeas corpus for the purpose of inquiring into the cause of restraint of liberty, returnable before a judge of the superior court, and the same proceedings shall be had on the writ as if it had been granted by the superior court judge under the laws of the state in such cases;

(2) of a notary public;

(3) to solemnize marriages;

(4) to issue warrants of arrest, summons, and search warrants

according to manner and procedure prescribed by law and the supreme court;

(5) to act as an examining judge or magistrate in preliminary examinations in criminal proceedings; to set, receive, and forfeit bail and to order the release of defendants under bail;

(6) to act as a referee in matters and actions referred to the judge or magistrate by the superior court, with all powers conferred upon referees by laws;

(7) of the superior court in all respects including but not limited to contempts, attendance of witnesses, and bench warrants;

(8) to order the temporary detention of a minor, or take other action authorized by law or rules of procedure, in cases arising under AS 47.10 or AS 47.12, when the minor is in a condition or surrounding dangerous or injurious to the welfare of the minor or others that requires immediate action; the action may be continued in effect until reviewed by the superior court in accordance with rules of procedure governing these cases;

(9) to issue a protective order in cases involving

(A) domestic violence as provided in AS 18.66.100 - 18.66.180; or

(B) stalking or sexual assault as provided in AS 18.65.850 - 18.65.870; -

(10) to review an administrative revocation of a person's driver's license or nonresident privilege to drive, and an administrative refusal to issue an original license, when designated as a hearing officer by the commissioner of administration and with the consent of the administrative director of the **Alaska Court System** [STATE COURT SYSTEM];

(11) to establish the fact of death or inquire into the death of a person in the manner prescribed under AS 09.55.020 - 09.55.069;

(12) to issue an ex parte testing, examination, or screening order according to the manner and procedure prescribed by AS 18.15.375.

*** Sec. 25.** AS 22.15.250 is amended to read:

Sec. 22.15.250. Disposition of fines. When by law any fees, fines, forfeitures, or penalties are levied and collected by the district judge or magistrate, the proceeds

and all other money collected shall be accounted for and transmitted to the administrative director of the **Alaska Court System** [JUDICIAL SYSTEM] for transfer to the general fund of the state except as provided in AS 22.15.270.

* **Sec. 26.** AS 22.20.037(a) is amended to read:

(a) Judicial employees shall be employed subject to classification and wage plans based on the merit principle and adapted to the special needs of the judiciary, as determined by the administrative director of **the Alaska Court System** [COURTS]. Except as otherwise provided by law, all employees of the **Alaska Court System** [ALASKA COURT SYSTEM] and the judicial council are subject to the general state laws regarding leave, retirement, and travel.

* **Sec. 27.** AS 22.20.037(c) is amended to read:

(c) The administrative director of **the Alaska Court System** [COURTS] shall conduct a salary survey annually to ensure that employees of the **Alaska Court System** [ALASKA COURT SYSTEM] receive salaries consistent with those paid to employees in the classified and partially exempt state service.

* **Sec. 28.** AS 22.20.037(d) is amended to read:

(d) The administrative director of the **Alaska Court System** [COURT SYSTEM] shall file a travel and compensation report with the legislature by January 31 of each year. The report must contain detailed information for the previous calendar year of the salaries, per diem, travel expenses, relocation expenses, and any additional allowances for

(1) each justice of the supreme court;

(2) each judge of the court of appeals; and

(3) the administrative director of the **Alaska Court System** [COURT SYSTEM].

* **Sec. 29.** AS 22.20.300 is amended to read:

Sec. 22.20.300. Administrative director. The chief justice of the supreme court shall, with the approval of the supreme court, appoint an administrative director to serve at the pleasure of the supreme court and to supervise the administrative operations of the **Alaska Court System** [JUDICIAL SYSTEM].

* **Sec. 30.** AS 22.20.310 is amended to read:

Sec. 22.20.310. Court system report. The administrative director **of the Alaska Court System** shall, not later than March 15 of each year, make available to the public and file with the senate secretary and the chief clerk of the house of representatives a report regarding the Alaska Court System. The report must include

(1) a profile of the Alaska Court System and its justices, judges, and magistrates;

(2) a summary description of the administration of the court system, including detailed descriptions of its facilities, programs, and personnel;

(3) average, mean, minimum, and maximum time periods between initial receipt and final disposition of cases classified by courts and by each justice, judge, and magistrate;

(4) information identifying each justice, judge, or magistrate who has had salary withheld under the authority of AS 22.05.140(b), AS 22.07.090(b), AS 22.10.190(b), or AS 22.15.220(c) and the number of times and the time periods of the occurrences;

(5) other information and data relevant to aiding the public and the legislature in understanding the organization, administration, caseload, disposition of cases, and accomplishments of the court system;

(6) the travel expenses and per diem for each justice, judge, or magistrate for the previous calendar year.

* **Sec. 31.** AS 22.20.320 is amended to read:

Sec. 22.20.320. Information systems guidelines and plan. The administrative director of **the Alaska Court System** [COURTS] shall establish information systems guidelines and prepare a short-range and long-range information systems plan for the court system. The guidelines and plan must be consistent with the telecommunications information guidelines and plan adopted by the commissioner under AS 44.21.350 - 44.21.390 and must be adapted to the special needs of the judicial branch as determined by the administrator of **the Alaska Court System** [COURTS].

* **Sec. 32.** AS 22.20.430 is amended to read:

Sec. 22.20.430. Bond. Before entering upon the duties of a public administrator, the public administrator shall execute and file with the administrative

director of the **Alaska Court System** [COURT SYSTEM] a surety bond in the form and amount to be determined by rule of the supreme court. The costs of the bond shall be paid by the court system.

* **Sec. 33.** AS 22.25.090(f) is amended to read:

(f) In this section, "dependent child" means an unmarried child of a justice, judge, or administrative director **of the Alaska Court System** who is dependent on the justice, judge, or administrative director for support and who is either (1) less than 19 years old, or (2) less than 23 years old and registered at and attending on a full-time basis an accredited educational or technical institution recognized by the Department of Education and Early Development. The age limits set out in this subsection do not apply to a child who is totally and permanently disabled.

* **Sec. 34.** AS 24.08.330(a) is amended to read:

(a) The Department of Education and Early Development is responsible for making official distribution of the Alaska Statutes to state executive branch agencies. The administrative director of the **Alaska Court System** [COURT SYSTEM] is responsible for distribution to the court system. Distribution shall be made on the basis of written lists submitted by the department and the court system to the Legislative Affairs Agency within 90 days after the last day of each regular session of the legislature. A legislator is entitled to receive one set of the statutes for the member's personal use, and this entitlement is restricted to the one set issued during a member's entire legislative service. The commissioner of education and early development may deposit one set of the statutes in each free public library within the state. The right of sale to persons and organizations remains exclusively with the publisher.

* **Sec. 35.** AS 33.05.030(b) is amended to read:

(b) The appointment of a probation officer shall be entered on the journal of the court in the judicial district where the probation officer shall be assigned, and one copy of the journal entry sent to the administrative director of **the Alaska Court System** [COURTS].

* **Sec. 36.** AS 36.30.030 is amended to read:

Sec. 36.30.030. Court system. The administrative director of **the Alaska Court System** [COURTS] shall adopt and publish procedures to govern the

procurement of supplies, services, professional services, and construction by the judicial branch. The procedures must be based on the competitive principles consistent with this chapter and must be adapted to the special needs of the judicial branch as determined by the administrative director of **the Alaska Court System** [COURTS]. The procedures must contain provisions for prohibiting procurement from a person that has headquarters in a country listed in Tier 3 of the most recent Trafficking in Persons Report published by the United States Secretary of State under 22 U.S.C. 7107(b)(1)(C). The procedures may contain provisions for restricting procurement from a person that conducts business in but does not have headquarters in a country listed in Tier 3 of the most recent Trafficking in Persons Report published by the United States Secretary of State under 22 U.S.C. 7107(b)(1)(C). The procedures must be consistent with the provisions of AS 36.30.080(c) - (e) and 36.30.085. Notwithstanding the other provisions of this section, the judicial branch shall comply with AS 36.30.170(b).

*** Sec. 37.** AS 38.07.010(a) is amended to read:

(a) The commissioner may select areas of state land classified as agricultural and contract for the land to be cleared or drained or both at state expense. In this selection and contracting, the commissioner shall be guided by the recommendations of the **United States Department of Agriculture, Natural Resources Conservation Service** [U.S. SOIL CONSERVATION SERVICE].

*** Sec. 38.** AS 38.07.050 is amended to read:

Sec. 38.07.050. Regulations. The commissioner shall, guided by recommendations of the **United States Department of Agriculture, Natural Resources Conservation Service** [U.S. SOIL CONSERVATION SERVICE], adopt regulations necessary to carry out the purpose of this chapter.

*** Sec. 39.** AS 38.07.060(3) is amended to read:

(3) **"crop"** ["CROPPED"] means **to manage** [THE MANAGEMENT OF] a domestic planting including harvest.

*** Sec. 40.** AS 39.35.680(22) is amended to read:

(22) "member" or "employee"

(A) means a person eligible to participate in the plan and who

is covered by the plan;

(B) includes

(i) an active member;

(ii) an inactive member;

(iii) a vested member;

(iv) a deferred vested member;

(v) a nonvested member;

(vi) a disabled member;

(vii) a retired member;

(viii) an elected public officer under AS 39.35.381;

(C) does not include

(i) former members;

(ii) persons compensated on a contractual or fee basis;

(iii) casual or emergency workers or nonpermanent employees as defined in AS 39.25.200;

(iv) persons covered by the Alaska Teachers' Retirement System except as provided under AS 39.35.131 and 39.35.381, or persons covered by a university retirement program;

(v) employees of the division of marine transportation engaged in operating the state ferry system who are covered by a union or group retirement system to which the state makes contributions;

(vi) justices of the supreme court or judges of the court of appeals or of the superior or district courts of Alaska;

(vii) the administrative director of **the Alaska Court System** [COURTS] appointed under art. IV, sec. 16 of the state constitution unless the director becomes a member under AS 39.35.158;

(viii) members of the elected public officers' retirement system (former AS 39.37); and

(ix) contractual employees of the legislative branch of state government under AS 24.10.060(f);

(D) may include employees of the division of marine transportation excluded under (C)(v) of this paragraph provided that

(i) the State of Alaska formally agrees to their inclusion through the process of collective bargaining; and

(ii) no collective bargaining agreement has the effect of obligating contributions made by the state under AS 39.30.150 in the event the state resumes participation in the federal social security system;

* **Sec. 41.** AS 40.25.123(c) is amended to read:

(c) The administrative director of **the Alaska Court System** [COURTS] shall supervise and adopt procedures for the operation and implementation of AS 40.25.110 - 40.25.140 by public agencies in the judicial branch.

* **Sec. 42.** AS 42.04.080(b) is amended to read:

(b) The commission shall adopt regulations [BY DECEMBER 31, 1999,] that establish standards of timeliness for the types of cases that come before the commission. The commission shall establish standards based in part on degrees of complexity of the cases.

* **Sec. 43.** AS 42.06.430 is amended to read:

Sec. 42.06.430. General provisions as to accounts, records, and reports. To the extent necessary to the performance of the duties of the commission as provided in this chapter:

(1) the commission by regulation shall, for the purposes of this section, classify pipeline facilities, and may designate the pipeline facilities or groups of pipeline facilities within the state that constitute a pipeline system for the purposes of this section;

(2) the commission may by regulation prescribe a uniform system of accounts for any classification of pipeline facilities which best represents and clearly reveals the investment, revenues, direct operating costs and other expenses of the subject classification of facilities, and may prescribe the manner in which the accounts and supporting records are kept in order to clearly show the investment, revenues, and costs pertaining to the subject facilities or to a pipeline system constituting a part of it;

accounts shall be maintained on the calendar year basis unless the commission specifically authorizes the maintenance of accounts on the basis of a fiscal year other than the calendar year;

(3) the commission may by regulation require a pipeline carrier or affiliated interest engaged in activities relating to pipelines to establish and maintain as part of its system of accounts continuing property records showing, as to property units which are actually being used in pipeline activity in this state, the year of placement in service, original cost and current location, and, as to a pipeline system, accounts and records in a manner showing, on a current basis, the original cost of the system in the state and related reserves for depreciation; from time to time the commission shall determine the proper and adequate rates of depreciation for each major class of property of an oil or gas pipeline facility;

(4) the pipeline carrier shall keep its accounts for its pipeline facilities located in this state separate from any accounts relating to any other business (including another pipeline facilities business, or a subsidiary business) it engages in, directly or indirectly; except as the commission provides, property, expense or revenue used in or derived from the other business may not be considered in establishing the rates and charges of the facility;

(5) the pipeline carrier shall keep books, accounts, papers, and records required by this chapter or by regulations adopted by the commission under this chapter in an office in this state and may not remove them from the state except upon written authority by the commission;

(6) for pipelines subject to the Interstate Commerce Act or the Natural Gas Act, the uniform system of accounts and manner of maintaining them and the property records kept and maintained shall, where considered practicable by the commission, be the same as required under regulations prescribed by the applicable federal agency; however, where federal law permits a pipeline carrier to consolidate its reporting for more than one pipeline in which it has an ownership interest, the commission shall require the reports to be made on an individual pipeline basis for any pipeline located wholly or in part in the state;

(7) within 90 days after the close of its authorized annual accounting

period, or within additional time granted by the commission for good cause shown, a pipeline carrier shall file a verified annual report with the commission; the annual report must consist of the following:

(A) for a pipeline subject to **the Interstate Commerce Act** [49 U.S.C. 1-1240 (INTERSTATE COMMERCE ACT)] or 15 U.S.C. 717 - 717w (Natural Gas Act), a copy of the annual report as filed with the appropriate federal agency under the applicable Act, and, for other pipelines, a report of general corporation information and financial statements in the same general format as the report of pipelines of the same classification subject to the jurisdiction of the appropriate federal agency;

(B) in the same general format as the report referred to in (A) of this paragraph, a statement of income and investment applicable to pipelines in this state, and a statement of investment, revenues, direct operating costs and other expenses, detailed in accordance with the uniform system of accounts to be applied under this chapter, for each pipeline system designated by the commission under (1) of this section; and

(C) such additional accounts and information as may be required under (2) of this section;

(8) the commission may require such additional accounts and information as may be necessary.

* **Sec. 44.** AS 43.55.023(a) is amended to read:

(a) A producer or explorer may take a tax credit for a qualified capital expenditure as follows:

(1) notwithstanding that a qualified capital expenditure may be a deductible lease expenditure for purposes of calculating the production tax value of oil and gas under AS 43.55.160(a), unless a credit for that expenditure is taken under AS 38.05.180(i), AS 41.09.010, AS 43.20.043, or AS 43.55.025, a producer or explorer that incurs a qualified capital expenditure may also elect to apply a tax credit against a tax levied by AS 43.55.011(e) in the amount of 20 percent of that expenditure; however, not more than half of the tax credit may be applied for a single calendar year;

(2) a producer or explorer may take a credit for a qualified capital expenditure incurred in connection with geological or geophysical exploration or in connection with an exploration well only if the producer or explorer

(A) agrees, in writing, to the applicable provisions of AS 43.55.025(f)(2); **and**

(B) submits to the Department of Natural Resources all data that would be required to be submitted under AS 43.55.025(f)(2).

* **Sec. 45.** AS 44.37.025(c) is amended to read:

(c) The department, with the concurrence of the administrative director of **the Alaska Court System** [COURTS], may appoint judicial employees to perform services in connection with recording, providing access to, and copying documents in locations where the department has not otherwise designated a public office to perform those functions.

* **Sec. 46.** AS 45.68.120(a) is amended to read:

(a) Registration is not required under AS 45.68.010 for

(1) a church or religious organization that is exempt from filing a federal annual information return under **26 U.S.C. 6033(a)(3)(A)** [26 U.S.C. 6033(a)(2)(A);]

(2) a candidate for national, state, or local office, and a political party or other committee or group if the candidate, party, committee, or group is required to file financial information with the Alaska Public Offices Commission under AS 15.13 or with the Federal Election Commission under 2 U.S.C. 431 - 456 (Federal Election Campaign Act);

(3) a charitable organization that does not intend to raise or receive contributions, excluding government grants, in excess of $5,000 during a fiscal year of the charitable organization, or that does not intend to receive contributions from more than 10 persons during a fiscal year of the charitable organization if, in either situation,

(A) all of the organization's functions, including solicitation, are performed by persons who are not paid for their services; and

(B) an officer or member of the organization is not paid or does

not otherwise receive all or a part of the assets or income of the charitable organization;

(4) a person or municipality who has a permit under AS 05.15.100.

* **Sec. 47.** This Act takes effect immediately under AS 01.10.070(c).

MEMORANDUM January 24, 2011

SUBJECT: Sectional Summary of the 2011 Revisor's Bill
(SB 61 - Work Order No. 27-LS0152\B)

TO: Senator Bill Wielechowski
Chair of the Senate State Affairs Committee
Attn: Michelle Sydeman

FROM: Kathryn L. Kurtz KLC
Assistant Revisor

The following is a sectional summary of the 2011 revisor's bill. The bill is prepared under AS 01.05.036, which provides, in part, that the revisor of statutes

> . . . shall prepare for submission to the legislature legislation for the correction or removal of the deficiencies, conflicts, or obsolete provisions, or to otherwise improve the form or substance of any portion of the statute law of this state.

To assist the reader in understanding the bill, I have summarized the contents by listing sections that have similar purposes or effects.

Sections that delete, repeal, or update obsolete provisions: Sections 1, 3 - 5, 11 - 13, 16, 18 - 20, 37, 38, 42, and 46 amend provisions that have become obsolete.

Sections that correct errors or oversights: Sections 6, 14, 17, and 21 - 23 correct errors or oversights.

Sections that improve the form or substance of the law: Sections 2, 7 - 9, 10, 15, 24 - 36, 39 - 41, and 43 - 45 propose amendments to improve the form or substance of the statutory law of Alaska.

Section 1. Changes a reference in AS 03.22.050 from "United States Soil Conservation Service" to "United States Department of Agriculture Natural Resources Conservation Service" to reflect the renaming of the service in 1994.

Section 2. Defines "department" for purposes of AS 08.02 as the Department of Commerce, Community, and Economic Development (DCCED). The term "department" is used but not defined in AS 08.02.010 and 08.02.050.

In AS 08.02.010, the effect of adding the definition will be to clarify that it is DCCED and not some other department that is responsible for enforcing compliance with professional designation requirements outlined in that section if there is a violation by a person who is not regulated by a board. Currently, only three of the affected professional groups are not regulated by boards: acupuncturists (AS 08.06), audiologists and speech pathologists (AS 08.11), and dietitians and nutritionists (AS 08.38). Chapters AS 08.06, AS 08.11, and AS 08.38 each define "department" as DCCED, so the addition of the definition in AS 08.02 is consistent with existing law.

For AS 08.02.050, the legislature's intent was explicit in the title of the Act enacting the section: "Authorizing the *Department of Community and Economic Development* to issue permits to certain agencies. . . ." Ch. 62, SLA 2002 (emphasis added).

Section 3. Amends AS 08.29.200(b) to use the term "vulnerable adult" rather than "elderly or disabled adult" for consistency with the terminology in AS 47.24.010 (as amended by sec. 2, ch. 129, SLA 1994).

Section 4. Changes two references to the "American Standards Association" in AS 08.40.120 to "American National Standards Institute" to reflect the current name of that organization.

Section 5. Amends AS 08.42.060(a) to change a reference to "Conference of Funeral Services Examining Boards" to "International Conference of Funeral Service Examining Boards" to reflect the change in that organization's name.

Section 6. Redesignates the last clause of AS 08.86.180(b)(4) as paragraph (b)(5), to correct an error in ch. 26, SLA 2010 (which showed two paragraphs designated (4), that were then combined into one editorially).

Section 7. Amends AS 09.20.050(a) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 8. Amends AS 09.20.050(c) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 9. Amends AS 09.20.080(b) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 10. Changes "math" to "mathematics" in AS 14.07.020(a)(16)(B) to conform to the usage found elsewhere in the Alaska Statutes.

Section 11. Removes the requirement in AS 14.40.809(b) that the University of Alaska Board of Regents enter into a reciprocal agreement with Sheldon Jackson College.

Sheldon Jackson College closed in 2007. Also changes "to annually report" to "to report annually" to remove the split infinitive.

Section 12. Amends AS 14.42.015(a) to remove Sheldon Jackson College from the selection process for the member of the Alaska Commission on Postsecondary Education representing private higher education. Sheldon Jackson College closed in 2007.

Section 13. Amends AS 14.42.015(d) to remove Sheldon Jackson College students from the selection process for the postsecondary student member of the Alaska Commission on Postsecondary Education. Sheldon Jackson College closed in 2007.

Section 14. Corrects a typographical error in Executive Order 114 in a cross-reference in AS 16.20.070. Until Executive Order 114, AS 16.20.070 correctly referred to AS 16.20.050 and 16.20.060, and not to AS 16.05.060.

Section 15. Amends AS 18.56.855(j) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 16. Deletes obsolete date reference in AS 21.09.210(e).

Section 17. Corrects an erroneous paragraph reference in AS 21.22.065(j)(2). This should have been changed in 1992 when paragraphs were added to AS 21.22.220 by ch. 67, SLA 1992.

Section 18. Deletes reference in AS 21.34.900(6) to AS 21.34.210, which has been repealed. This corrects an error in ch. 67, SLA 1992 (which repealed and reenacted AS 21.34.900(6) and repealed AS 21.34.210).

Section 19. Deletes obsolete date reference in AS 21.39.040(k)(2).

Section 20. Deletes obsolete date reference in AS 21.40.010.

Section 21. Changes a reference in AS 21.45.300(k) from "(1) of this section" to "(*l*) of this section" to correct an error in ch. 28, SLA 1984. Subsections in the Alaska Statutes are lettered, not numbered.

Section 22. Changes a reference in AS 21.45.300(m) from "(3) of this paragraph" to "(3) of this subsection" to correct an error in ch. 28, SLA 1984. In the Alaska Statutes, paragraphs are numbered subparts of lettered subsections. Also changes "shall not" to "may not" to conform to the drafting manual's style for imposing a prohibition.

Section 23. Deletes a reference in AS 21.96.070(f) to AS 14.03.126, which has been repealed, and inserts instead the text of the definition from former AS 14.03.126.

Section 24. Amends AS 22.15.100(10) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 25. Amends AS 22.15.250 in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 26. Amends AS 22.20.037(a) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 27. Amends AS 22.20.037(c) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 28. Amends AS 22.20.037(d) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 29. Amends AS 22.20.300 in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 30. Amends AS 22.20.310 in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 31. Amends AS 22.20.320 in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 32. Amends AS 22.20.430 in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 33. Amends AS 22.25.090(f) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 34. Amends AS 24.08.330(a) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 35. Amends AS 33.05.030(b) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 36. Amends AS 36.30.030 in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 37. Changes a reference in AS 38.07.010 from "United States Soil Conservation Service" to "United States Department of Agriculture Natural Resources Conservation Service" to reflect the renaming of the service in 1994.

Section 38. Changes a reference in AS 38.07.050 from "United States Soil Conservation Service" to "United States Department of Agriculture Natural Resources Conservation Service" to reflect the renaming of the service in 1994.

Section 39. Changes "cropped" to "crop" in AS 38.07.060, a definitions section, to match the usage in AS 38.07.020(b). The word "cropped" is not used in the chapter to which the definitions apply.

Section 40. Amends AS 39.35.680(22) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 41. Amends AS 40.25.123(c) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 42. Deletes obsolete date reference in AS 42.04.080(b).

Section 43. Changes a reference in AS 42.06.430(7)(A) from "49 U.S.C. 1-1240 (Interstate Commerce Act)" to "Interstate Commerce Act." The enacting law, sec. 5, ch. 6, FSSLA 1973, simply referred to "pipelines subject to the Interstate Commerce Act or the Natural Gas Act", without offering specific numbered citations to federal statutes. The specific U.S.C. references were apparently added editorially. Since then, the U.S.C. sections that comprised the Interstate Commerce Act have been revised, renumbered, and in some cases, repealed, so the spanned reference to the previous location of those sections is no longer useful.

Section 44. Amends AS 43.55.023(a)(2) to insert the word "and" between subparagraphs (A) and (B). This change is suggested at the request of the Department of Law. Although "and" can be inferred from the structure and content of the paragraph, and "or" would not make sense in this context, adding the word "and" is consistent with usage elsewhere in the section (for example, in subsection (*l*)(2)) and is intended to facilitate ease of use.

Section 45. Amends AS 44.37.025(c) in an effort to create uniformity among statutory references to the administrative director of the Alaska Court System.

Section 46. Amends a reference to federal law in AS 45.68.120(a). The cite to 26 U.S.C. 6033(a)(2)(A) was correct when enacted. However, that paragraph was renumbered in 2006 as 26 U.S.C. 6033(a)(3)(A). The text of the provision did not change.

Section 47. Provides an immediate effective date.

ALASKA STATE LEGISLATURE

SENATOR JOHN COGHILL

State Capitol, Room 504, Juneau, AK 99801-1182 (907) 465-3719
3340 Badger Road Suite #290, North Pole, AK 99705 (907) 488-5725

SUMMARY OF CHANGES IN CSSB 89 (27-LS0452\I)

Page 5, line 27, after "(a)(2)", language is amended to include subsection (a)(3) to clarify that limitations include (a)(2) – (a)(4); not (a)(2) and (a)(4).

Page 5, line 30, after "campaign activity," **during the state travel** has been added to make language consistent with language in section 4.

Page 7, lines 9 – 17, this subsection was rewritten to make it very clear a charity event ticket or charitable event gift may be received from a lobbyist, immediate family member, or person acting on behalf of a lobbyist, but the gift cannot be valued at $250 or more.

The new version deleted sections 9 and 10 of the original bill which extended deadlines for filing of disclosures for service on boards and commissions, interest in state contracts, participation in state loans, close economic associations, and representation of someone, as well as other disclosures, from 30 to 60 days.

Under the current bill, the only disclosure headlines extended to 60 days are travel gifts for the person of educating a legislator and charity tickets and charity gifts for charity activities sanctioned by the ethics committee.

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees to use legislative mailing lists for campaign purposes and nonlegislative purposes; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; allowing legislators and legislative employees, in certain circumstances, to participate in partisan political activity while on state travel; prohibiting a public member of the Select Committee on Legislative Ethics from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with

charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to refrain from disclosure under the Legislative Ethics Act; and establishing a seat for an alternate public member on the Select Committee on Legislative Ethics and clarifying the requirements related to participation by alternate members in the proceedings of the committee."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list for campaign purposes, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for

health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use

by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

*** Sec. 2.** AS 24.60.030(i) is amended to read:

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;**

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

*** Sec. 3.** AS 24.60.030 is amended by adding a new subsection to read:

(j) Notwithstanding the limitations under (a)(2) - (4) and (c) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity during the state travel, if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the

legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

* **Sec. 4.** AS 24.60.031 is amended by adding a new subsection to read:

(d) Notwithstanding the limitations under (a) and (b) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, during the state travel if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding meal breaks;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

* **Sec. 5.** AS 24.60.060(a) is amended to read:

(a) A legislator**,** [OR] legislative employee**, or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

* **Sec. 6.** AS 24.60.080(a) is amended to read:

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250 or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event, [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event**, and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

* **Sec. 7.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

*** Sec. 8.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and

occupation of the donor, a general description of the matter of legislative concern with respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

*** Sec. 9.** AS 24.60.105 is amended by adding a new subsection to read:

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate the United States Constitution, the Constitution of the State of Alaska, or other state or federal law. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

*** Sec. 10.** AS 24.60.130(n) is amended to read:

(n) **A member who participates at the commencement of a proceeding under AS 24.60.170 shall participate for the duration of the proceeding unless disqualified or unable to continue participating for any reason; however,**

provision shall be made for service by alternate members on the committee or on a subcommittee, as follows:

(1) when [WHEN] appointing members of the legislature to serve on the committee, the speaker of the house or the president of the senate, as appropriate, shall appoint an alternate member for each regular member**; an** [. AN] alternate must have the same qualifications as the regular member for whom the alternate stands as alternate and is subject to confirmation as required for the regular member**;**

(2) when selecting public members to serve on the committee, the Chief Justice of the Alaska Supreme Court shall also select one alternate public member; the alternate public member's selection is subject to ratification as required for selection of the regular public members;

(3) if, except as to a proceeding under AS 24.60.170, [. IF] a regular [LEGISLATIVE] member of the committee or a subcommittee is unable to **participate in** [ATTEND] a meeting, the chair of the committee or a subcommittee shall designate the regular member's alternate to **participate** [SERVE] in place of the regular member at the meeting, and the designated alternate**, unless for any reason unable to participate,** shall **participate for the duration of that meeting; if** [SERVE UNLESS UNABLE TO SERVE FOR ANY REASON. IF] a regular [LEGISLATIVE] member of the committee or a subcommittee is disqualified under (h) of this section from **participating in** [SERVING ON THE COMMITTEE OR THE SUBCOMMITTEE CONCERNING] a proceeding under AS 24.60.170 or if the regular member is unable to **participate** [ATTEND], the chair of the committee or a subcommittee shall designate the regular member's alternate to **participate** [SERVE] in place of the regular member **for the duration of** [IN] the proceeding unless the alternate is [ALSO] disqualified **or is for any reason unable to participate; the** [FROM SERVING. THE] designation shall be treated as confidential to the same extent that the identity of the subject of a complaint is required to be kept confidential.

*** Sec. 11.** AS 24.60.990(a) is amended by adding a new paragraph to read:

(17) "state travel" means travel with transportation or overnight lodging that is provided or paid for with state resources.

Referred:

Sponsor(s): SENATOR COGHILL

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees to use legislative mailing lists for campaign purposes and nonlegislative purposes; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; allowing legislators and legislative employees, in certain circumstances, to participate in partisan political activity while on state travel; requiring the Select Committee on Legislative Ethics to maintain a public record of certain ethics disclosures made by legislators and legislative employees; prohibiting a public member of the Select Committee on Legislative Ethics

from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to refrain from disclosure under the Legislative Ethics Act; eliminating an exemption for certain legislative employees, volunteers, and interns from the requirement under the Legislative Ethics Act that legislative employees attend a legislative ethics course; establishing a seat for an alternate public member on the Select Committee on Legislative Ethics; clarifying the requirements related to participation by alternate public members and alternate legislative members in the proceedings of the committee; amending the definition of 'legislative employee' in the Legislative Ethics Act; and repealing a procedure for appointment of alternate legislative members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Prohibited conduct and conflict of interest.

*** Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and

adds compassionate gifts exceptions 24.60.075

either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list for campaign purposes, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable

allows use of legislative mailing list for partisan activity per Opinion 04-

organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office;

allows use of legislative mailing list for campaign purposes

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

*** Sec. 2.** AS 24.60.030(i) is amended to read: Prohibited conduct and conflict of interest

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;** representation

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative

employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

Prohibited conduct and conflict of interest.

* **Sec. 3.** AS 24.60.030 is amended by adding a new subsection to read:

(j) Notwithstanding the limitations under (a)(2) - (4) and (c) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity during the state travel, if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding a meal break;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

adds exception to prohibite conduct for attending partisan activities while on state travel

* **Sec. 4.** AS 24.60.031 is amended by adding a new subsection to read:

Restrictions on fundraising

(d) Notwithstanding the limitations under (a) and (b) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, during the state travel if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding a meal break;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

sets a standard for attending partisan functions while on state travel.

* **Sec. 5.** AS 24.60.050(c) is amended to read:

(c) A legislator or legislative employee who participates in a program or receives a loan that is not exempt from disclosure under (a) of this section shall file with the committee by the date required under AS 24.60.105 a disclosure stating the amounts of the loans outstanding or benefits received during the preceding calendar year from nonqualifying programs. If the committee requests additional information necessary to determine the propriety of participating in the program or receiving the loan, it shall be promptly provided. The committee shall **maintain the disclosure as a public record and promptly forward the information contained in the disclosure** [PROMPTLY COMPILE A LIST OF THE STATEMENTS INDICATING THE LOANS AND PROGRAMS AND AMOUNTS AND SEND IT] to the presiding officer of each house who shall have it published in the supplemental journals on or before the next regularly scheduled publication of ethics disclosures. If a legislator or legislative employee asks the committee to keep any part of the disclosure confidential and a quorum of the committee determines by vote of a majority of committee members that making the entire disclosure public would cause an unjustifiable invasion of personal privacy, the committee may elect to publish only the fact that a person has participated in the program and the amount of benefit that the unnamed person received. The committee shall maintain the disclosure of the name of the person as confidential and may only use the disclosure in a proceeding under AS 24.60.170. If the disclosure becomes part of the record of a proceeding under AS 24.60.170, the disclosure may be made public as provided in that section.

provides for disclosure but no register

* **Sec. 6.** AS 24.60.060(a) is amended to read: Confidential Information

(a) A legislator, [OR] legislative employee, **or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

adds public members to prohibition of disclosing confidential information

* **Sec. 7.** AS 24.60.080(a) is amended to read: GIFTS

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250

or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event, [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event, **and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

clarifies that an allowable gift from a lobbyist is a charity event ticket or gift from a charity event must be less than $250.

* **Sec. 8.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

clarification of tickets & gifts from charity event

*** Sec. 9.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and occupation of the donor, a general description of the matter of legislative concern with

gifts from charity event more that $25 from non lobbyist must be reported

reporting of gift of travel's charity events increased to 60 days

respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

* **Sec. 10.** AS 24.60.105 is amended by adding a new subsection to read: Deadline for filing disclosure

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate the United States Constitution, the Constitution of the State of Alaska, or other state or federal law. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

allows for exceptions from disclosure

* **Sec. 11.** AS 24.60.112 is amended to read:

Sec. 24.60.112. Applicability to volunteers and educational trainees. A legislative volunteer or educational trainee shall be considered to be a legislative employee for purposes of compliance with AS 24.60.030 - 24.60.039, 24.60.060, 24.60.080, 24.60.085, **24.60.155.** 24.60.158 - 24.60.170, 24.60.176, and 24.60.178. If

requires volunteers to take ethics classes

a person believes that a legislative volunteer or educational trainee has violated the provisions of one of those sections, the person may file a complaint under AS 24.60.170. The provisions of AS 24.60.170 apply to the proceeding.

*** Sec. 12.** AS 24.60.130(h) is amended to read:

(h) A member is disqualified from participating as a member in any proceeding before the committee involving a complaint against the member or an employee whose work is supervised by the member or an advisory opinion requested by the member. If a regular legislative member of the committee is disqualified under this subsection from participating in a proceeding involving a complaint, the member's alternate shall be designated under **AS 24.60.131** [(n) OF THIS SECTION].

adds alternate members to disqualify to conform provisions

*** Sec. 13.** AS 24.60.130(o) is amended to read:

(o) Notwithstanding (h) [AND (n)] of this section **and AS 24.60.131**, if a complaint before the committee alleges a violation of this chapter by a group of legislators that includes a legislative member of the committee and that member's alternate, the member and alternate member are disqualified from serving on the committee with regard to the complaint. If the two disqualified members of the committee are members of the majority organizational caucus, the presiding officer of the house in which the two disqualified members serve shall appoint from that house an alternate to serve with regard to the complaint. If one of the two disqualified legislative members of the committee is not a member of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate to serve with regard to the complaint. If a complaint alleges a violation of this chapter that includes all legislative members of the majority organizational caucus of one house, the presiding officer of that house shall appoint from the other house an alternate to serve with regard to the complaint. If the complaint alleges a violation of this chapter that includes all legislative members of a minority organizational caucus of one house, the leader of that minority organizational caucus shall appoint from the other house an alternate to serve with regard to the complaint.

alternate to alternate

*** Sec. 14.** AS 24.60 is amended by adding a new section to read:

Sec. 24.60.131. Alternate members. (a) When appointing members of the

legislature to serve on the committee under AS 24.60.130(b), the speaker of the house of representatives or the president of the senate, as appropriate, shall appoint an alternate member for each regular member. The alternate member shall have the same qualifications for appointment to the committee as the regular member for whom the alternate stands as alternate. The alternate member's appointment is subject to confirmation as required for appointment of the regular member.

(b) When selecting public members to serve on the committee under AS 24.60.130(b), the Chief Justice of the Alaska Supreme Court shall select one alternate public member. The alternate public member's selection is subject to ratification as required for selection of the regular public members.

(c) Subject to (d) of this section, if a regular member of the committee or a subcommittee is unable to participate in a proceeding other than a proceeding under AS 24.60.170, the chair of the committee or subcommittee that holds the proceeding shall designate the regular member's alternate to participate in place of the regular member at the proceeding, and the alternate shall participate for the duration of that proceeding unless the alternate is unable to participate.

(d) If a regular member of the committee or a subcommittee or an alternate appointed under (a) or (b) of this section participates at the commencement of a proceeding under AS 24.60.170, the member shall participate for the duration of the proceeding unless the member is disqualified under AS 24.60.130(h) or is unable to continue participating. If the participating member is disqualified under AS 24.60.130(h) or becomes unable to participate, the chair of the committee or subcommittee that holds the proceeding shall designate the member's alternate to participate in place of the member for the duration of the proceeding unless the alternate is disqualified or is unable to participate.

(e) If both a regular legislative member and that member's alternate appointed under (a) of this section are not available to participate in a proceeding under AS 24.60.170 because they are disqualified under AS 24.60.130(h) or unable to participate, the presiding officer of the house in which the two members serve shall appoint from that house an alternate and designate that alternate to participate in the proceeding; however, if the two members who are not available to participate are not

members of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate and designate that alternate to participate in the proceeding.

(f) A designation under (c) - (e) of this section is a confidential proceeding under AS 24.60.170(*l*) unless the member who is replaced as a result of the designation waives confidentiality.

*** Sec. 15.** AS 24.60.155 is amended to read:

Sec. 24.60.155. Legislative ethics course. A person who is a legislator, legislative employee, **legislative volunteer, educational trainee,** or public member of the committee shall complete a legislative ethics course administered by the committee under AS 24.60.150(a)(4) within 10 days of the first day of the first regular session of each legislature. However, a person who first takes office, [OR] begins employment, **or begins service as a volunteer or trainee** after the 10th day of the first regular session of a legislature shall complete the course required by this section within 30 days after the person's first day of service and, thereafter, as required by this section. The committee may grant a person additional time to complete the course required by this section.

ethics course

*** Sec. 16.** AS 24.60.990(a)(11) is amended to read:

(11) "legislative employee" means a person, other than a legislator, who is compensated by the legislative branch in return for regular or substantial personal services, regardless of the person's pay level or technical status as a full-time or part-time employee, independent contractor, or consultant; it includes public members and staff of the committee; it does not include individuals who **are hourly employees who** perform functions that are incidental to legislative functions, [INCLUDING SECURITY, MESSENGER, MAINTENANCE, AND PRINT SHOP EMPLOYEES,] and other employees designated by the committee;

legislative employee definition

*** Sec. 17.** AS 24.60.990(a) is amended by adding a new paragraph to read:

(17) "state travel" means travel with transportation or overnight lodging that is provided or paid for with state resources.

Defined state travel

*** Sec. 18.** AS 24.60.130(n) is repealed.

Section 14 replaces Sec 18 dealing with Alternate Members

SENATOR JOHN COGHILL

Senate Bill 89 Legislative Ethics Amendments
Version D

This bill is a product of discussions by the Select Committee of Legislative Ethics over the past couple of years.

Two amendments requested by the committee address tickets to charity events and disclosure of gifts of tickets for and gifts from charitable events. First, the bill clarifies that legislators and legislative employees may not exceed the $250 limit when securing a ticket from lobbyists, immediate family members of lobbyists, or persons acting on behalf of a lobbyist and adds that the value of these tickets and gifts received at a charity event must be disclosed within 60 days of receipt. Second, they allow persons who are not lobbyists to give a gift of a ticket to a charitable event sanctioned by the Legislative Council to a legislator or legislative employee that has a value of $250.00 or more. However, the recipient of the ticket must disclose to the Select Committee on Legislative Ethics the value of the ticket that exceeds the $250.00 limit.

The bill also draws a bright line for legislators and legislative staff to follow for assisting constituents with problems they encounter with state agencies. Once an issue has been appealed to an administrative hearing officer, the legislator or legislative staffer may no longer make contacts with the agency, unless that person is a licensed professional to represent a person in such a proceeding and is being compensated for that representation.

Over years of discussion this bill is a first attempt at setting standards by which a legislator or a legislative staffed can participate in a partisan activity or a campaign fundraiser when traveling on legislative business. It also extends the reporting deadline for reporting gifts of travel and from charitable events from 30 to 60 days.

The bill adds public members of the ethics committee to the statute prohibiting members from knowingly making unauthorized disclosure of confidential information. This bill clarifies that disclosures prohibited by state and federal confidentiality laws are not required by the Select Committee on Legislative Ethics

The committee recommended a statute that would allow an alternate member of the ethics committee who participates in the beginning of a proceeding to participate in the entire proceeding. The Chief Justice of the Alaska Supreme Court would also be required to appoint one alternate for the public members.

SENATOR JOHN COGHILL

Sectional Version D

Senate Bill 89 Ethic Amendments

Section 1. Replaces "lawful gratuity" with the word "gift"; and adds new language allowing compassionate gifts. This section also allows a legislator to use his or her legislative mailing list for nonlegislative purposes. **Advisory Opinion 04-01**

Section 2. Draws a bright line for legislators and legislative employee to follow for assisting constituents with problems they encounter with state agencies. Once an issue has been appealed to an administrative hearing officer, the legislator or legislative employee may no longer make contact with the agency, unless the person is licensed in the state for such representation and the income from that representation is reported under AS 24.60.100. This section protects a legislator or legislative employee from inadvertent ex parte contact and allows contact if the legislator or legislative employee is a party or witness to the matter. **Advisory Opinion 08-03 and 05-01**

Section 3. This provision establishes a clear distinction as to when a legislator or legislative employee can participate in partisan activities and not be engaging in a prohibited conduct. **Advisory Opinion 10-01**

Section 4. This provision establishes a clear distinction as to when a legislator or legislative employee can participate in partisan activities that involve fundraising. **Advisory Opinion 10-01**

Section 5. This provision establishes how information that is not exempt from disclosure by a legislator or legislative employee will be retained and disclosed. ***Request of the Committee***

Section 6. Adds public members of the Select Committee on Legislative Ethics to the statute that prohibits disclosure of confidential information. ***Request of the Committee***

Section 7. Clarifies that a legislator or legislative employee may accept tickets for a Legislative Council sanctioned charity event or a gift from a sanctioned charity event from a lobbyist as long as it does not exceed $250.00 in value. ***Request of the Committee***

Section 8. Clarifies that persons who are not lobbyists can give a ticket or a gift in connection with a charitable event sanctioned by the Legislative Council to a legislator or legislative employee that has a value of $250.00 or more. However, the recipient of the ticket must disclose to the Select Committee on Legislative Ethics the value of the ticket that exceeds the $250.00 limit. Extends the reporting period to 60 days. ***Request of the Committee***

Section 9. Clarifies that if a legislator or legislative employee accepts tickets or a gift in connection with a charity event with a value of $250 or more must be reported within 60 days. ***Request of the Committee***

Section 10. Allows exceptions from filing a disclosure if it would violate the United States Constitution, the Constitution of the State of Alaska, or any other state or federal law. **Advisory Opinions 09-02 and 94-07**

Section 11. Requires legislative volunteers and educational trainees to complete the legislative ethics class. ***Request of the Committee***

Section 12. Adds alternate members to disqualification provisions. ***Request of the Committee***

Section 13. Adding reference to new section AS 24.60.131.pertaining to alternates to the statute providing that if both members are disqualified, the presiding officer may appoint another member. ***Request of the Committee***

Section 14. Completely rewrites the section for alternate members. Allows House Speaker, Senate President, and Chief Justice to appoint alternate members. If those members are disqualified all three can appoint an alternate to the alternate. ***Request of the Committee***

Section 15. Adds legislative volunteer and educational trainee to the statue that requires people to complete the legislative ethics course. ***Request of the Committee***

Section 16. Defines legislative employee.

Section 17. Defines state travel.

Section 18. Repeals that section of law that Section 14 replaces dealing with alternate members of the Select Committee on Legislative Ethics.

ADVISORY OPINION 2004-01

RE: Use of constituent information gathered by a legislator.

You are a legislator and therefore covered by the Legislative Ethics Code. You have requested an advisory opinion concerning facts and circumstances that you have related. The committee relies on facts that you have described in answering your questions. You have waived your right to confidentiality under AS 24.60.160(b).

Statement of Facts

You have asked the following questions:

1. Can constituent information gathered by a candidate who is subsequently elected to office be used by the legislator during his or her term of office?
2. Can constituent information gathered by a legislator be used by the legislator in his or her campaign for re-election and, if so, are there any restrictions on maintaining the database using state resources?

You characterized the information referred to in the questions as:
A. Voter information obtained from the Division of Elections for a small fee.
B. Information obtained from public sources such as Permanent Fund recipients and corporation and business licenses databases which can be downloaded by anyone from public agency internet sites for free or for a small fee.
C. Information gathered about individual constituents during a legislator's term, including email addresses, phone and fax numbers, and issue information.
D. Similar constituent information as in C obtained during a candidate's campaign.

Discussion

In this document
- "constituent" means a natural person residing within a legislator's district;
- "information" means contact information including name and address as well as any other information and facts known about the contact such as issues and legislation the contact is interested in;
- "database" means an organized body of related information which is in a format read by computer database programs.

1. Can constituent information gathered by a candidate who is subsequently elected to

office be used by the legislator during his or her term of office?

This question involves a legislator using, for legislative purposes, information gathered in the course of an election campaign, described in D above. This information was obtained using private resources. There is no prohibition in the ethics code on a legislator using private resources for legislative purposes, so a legislator may use for legislative purposes information gathered during non-legislative time without the use of legislative resources.

> 2. Can constituent information gathered by a legislator be used by the legislator in his or her campaign for re-election and, if so, are there any restrictions on maintaining the database using state resources?

It is assumed in this answer that "information gathered by a legislator" is information collected for the legislator, described in C above, with the help of legislative staff employed to handle constituent concerns using legislative equipment. This information is being gathered for the benefit of the legislator in performing public duties. As long as the purpose is to assist the legislator in performing current legislative duties, the building and maintenance of a database containing constituent information is permitted using legislative resources. As is the case with the files maintained by a legislator's office for legislative use, a database is considered to be the confidential property of the legislator.[1]

There is a general prohibition against using legislative resources for non-legislative purposes:

> (a) A legislator or legislative employee may not . . . (2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of either the legislator, legislative employee, or another person;

AS 24.60.030(a)(2). However there is an exemption for a de minimis use:

> [AS 24.60.030(a)(2)] does not prohibit (A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

We find that it is considered to be a de minimis use of public assets under AS 24.60.030(a)(2)(A) for a legislator to make a copy of a database created or maintained in the legislator's own office for personal or campaign use.[2]

In regard to voter information and other publicly available databases, the information described in A and B above, a legislator may obtain this information for legislative purposes. This information would probably be combined into the legislator's constituent database. As discussed above, a legislator can make a copy of the legislator's own database for personal or campaign purposes.

In the case of purchased databases, there may be copyright issues if a person copies a database rather than purchasing another license for separate use. If the legislator wants another copy of a commercial database, a separate license, if required, should be purchased with personal funds.

Conclusion

For the reasons stated above, the committee finds that constituent information gathered by a candidate using private resources can be used by that person if subsequently elected to serve as a legislator, and that constituent information gathered by a legislator using legislative resources such as staff time and

equipment for legislative purposes may be copied and used for personal or campaign use by a legislator as a de minimis use of public assets under AS 24.60.030(a)(2)(A).

Adopted by the Select Committee on Legislative Ethics on April 23, 2004

Members present and concurring in this opinion were:

H. Connor Thomas, Chair
Representative Mary Kapsner
Representative Norman Rokeberg
Senator Kim Elton
Senator Ben Stevens
Dennis "Skip" Cook, public member
Ann Rabinowitz, public member
Marianne Stillner, public member

Member present & abstained from voting because not present for entire discussion:

Herman G. Walker, public member

ADVISORY OPINION 2005-01

RE: AS 24.60.030(i) and legislative contacts with administrative decision makers

You are a legislator and therefore covered by the legislative ethics code. You have requested an advisory opinion concerning facts and circumstances that you have related. The committee relies on facts that you have described in answering your questions. You have waived your right to confidentiality under AS 24.60.160(b).

Statement of Facts

You have asked several specific questions in regard to AS 24.60.030(i).[1] This subsection makes it a violation of the legislative ethics code for a legislator or legislative employee to "attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact" a decision maker in an administrative adjudication. Such communication is only permitted if the communication with the decision maker is made in the presence of all parties to the adjudication, and made a part of the record; or, if the fact and substance of the communication is promptly disclosed to all parties and made part of the record.

You ask how AS 24.60.030(i) will be applied in the following situations.

1. Can a legislator[2] contact a decision maker without trying to influence the outcome of the case by asking the decision maker:
   a. if certain documents had been filed;
   b. whether a file was complete; or
   c. if there was other information that could be provided.
2. Who has the duty to disclose a contact to all parties in an adjudication under AS 24.60.030(i)(2)? What if the legislator does not know the identity or contact information of other parties?
3. If a legislator decides to advocate on behalf of a constituent, does that legislator have a duty to disclose the fact and substance of the contact to all parties to the hearing and make the contact a part of the record? Shouldn't the agency have the burden of distributing the substance of the contact with a decision maker to all parties?

Discussion

The provisions of AS 24.60.030(i) will only apply to an administrative matter that has progressed to a hearing. A legislator or legislative staff member may contact any administrative department with questions regarding a matter that is not the subject of a pending administrative adjudication.[3]

The ethical standards which prohibit ex parte contacts by legislators and legislative employees recognize that impartial fact finders and decision makers are an essential part of the due process of law.[4] Administrative decision makers are required to be impartial and may not engage in ex parte communications.[5] An ex parte communication is a contact or communication (personal communications or some form of evidence) with the decision maker that takes place outside the presence of all parties to the proceeding.

1. Obtaining information on behalf of a constituent in regard to an administrative adjudication.

While a legislator or legislative staff member may contact an administrative department with questions regarding a matter, once that matter is assigned to a hearing officer or other decision maker there should be no direct contact with the decision maker.

Once a matter is in a hearing process, questions to the administrative unit should be limited to procedural matters and case information. The answers to those questions can most likely be answered by a person other than the decision maker. For example, if the office of administrative hearings has jurisdiction of the matter, that office will be able to provide information about the case file without impairing the impartial role of the hearing officer.[6] If the adjudication is not within the jurisdiction of the office of administrative hearings, the agency holding the hearings will have procedures to insulate the decision makers from improper contacts. Legislators subject to AS 24.60 will be expected to make every effort to obtain basic procedural or case file information about a matter under administrative adjudication by means other than contacting the hearing officer. Also, in response to your questions, it would not be the proper function of any administrator in the adjudicatory process to give advice in response to your questions, but only to provide information about the case file, parties, scheduling or other routine procedural matters.[7]

In the rare instance that a communication with a hearing officer occurs the legislator must comply with AS 24.60.030(i)(2): the "fact and substance of the contact [must be] promptly disclosed by the legislator or legislative employee to all parties to the hearing and the contact [must be] made a part of the record." A failure by a legislator to properly make this disclosure may be held to be a violation of the legislative ethics code.

The committee is also concerned that ex parte contacts, by a legislator or legislative employee, with a decision maker creates an appearance of a violation of the ethics code. This is based on AS 24.60.010 which provides in pertinent part:

> The legislature finds that
>
> . . .
>
> (2) a fair and open government requires that legislators and legislative employees conduct the public's business in a manner that preserves the integrity of the legislative process and avoids conflicts of interest or even appearances of conflicts of interest;

. . .

2. Who has the duty to disclose a contact to all parties in an adjudication under AS 24.60.030(i)(2)? What if the legislator does not know the identity or contact information of other parties?

If contact with a decision maker does occur, a legislator or legislative employee must notify all parties and make the contact a part of the record. Complying with this requirement of disclosure to all parties is the responsibility of the legislator who initiated the ex parte contact, not the adjudicator hearing the

matter. Information about the other parties to the matter can be obtained as discussed in the answer to the first question.

There is no obligation to contact all parties in regarding communications with administrative departments or personnel initiated by a legislator when a matter has not yet been assigned to a hearing officer.

3. If a legislator decides to advocate on behalf of a constituent, does that legislator have a duty to disclose the fact and substance of the contact to all parties to the hearing and make the contact a part of the record? Shouldn't the agency have the burden of distributing the substance of the contact with a decision maker to all parties?

As discussed above, a legislator may advocate and communicate on an administrative matter on behalf of a constituent. AS 24.60.030(i) only applies once an administrative matter is assigned to an administrative decision maker. In the event that a legislator makes an ex parte contact with a decision maker, the requirements of AS 24.60.030(i)(2) apply. The ethics statute clearly places the responsibility for compliance with (i)(2) on the legislator making the ex parte contact, not the adjudication agency or the administrative agency who is a party to the matter.

Conclusion

For the reasons stated above, the committee finds that a legislator or legislative employee seeking information on an administrative matter that is assigned to a hearing officer, individual, board or commission should not attempt to contact the decision maker assigned to that matter.[8] Information about the procedural aspects of the matter may be sought from the office administering the hearing, but not the decision maker directly. If a legislator or legislative employee makes an ex parte communication and fails to comply with the requirements of AS 24.60.030(i)(2), it could be considered a violation of the legislative ethics code.

AS 24.60.030 does not apply to contacts in regard to administrative matters that have not been assigned to an administrative decision maker.

Adopted by the Select Committee on Legislative Ethics on November 9, 2005.

[1] This new subsection of AS 24.60.030, "Prohibitions related to conflicts of interest and unethical conduct," became effective July 1, 2005. The office of administrative hearings, created effective July 1, 2004, began hearing administrative proceedings that began on or after July 1, 2005. Sec. 92(a), ch. 163, SLA 2004. No previous advisory opinions have discussed AS 24.60.030(i).

This new subsection provides:

> (i) Except for supplying information requested by the hearing officer or the individual, board, or commission with authority to make the final decision in the case, or when responding to contacts initiated by the hearing officer or the individual, board, or commission with authority to make the final decision in the case, a legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the case unless the
> (1) contact is made in the presence of all parties to the hearing or the parties' representatives and the contact is made a part of the record; or
> (2) fact and substance of the contact is promptly disclosed by the legislator or legislative employee to all parties to the hearing and the contact is made a part of the record.

[2] All references in this opinion to a legislator also apply to legislative employees subject to AS 24.60.

[3] It may be difficult to determine from a constituent whether the matter of concern has reached the stage that this ethical prohibition applies so care should be taken to avoid contacting any person or entity that has the authority to make a final decision. It may be prudent for a legislator to make a call to the department administering a matter, to determine the appropriate person to contact for the information, in order to avoid inadvertently contacting a decision maker.

[4] Under the Alaska Constitution, a person may not "be deprived of life, liberty, or property, without due process of law." The Alaska Supreme Court has interpreted this provision as requiring an impartial fact finder. In re Robson, 575 P.2d 771 (Alaska 1978); K & L Distributors, Inc. v. Murkowski, 486 P.2d 351 (Alaska 1971). Questioning of a decision-maker while the case is pending impairs the impartiality of the judicial process. It may even invalidate the decision reached in the matter, causing the whole matter to be reheard. "To subject an administrator to a searching examination as to how and why he reached his decision in a case still pending before him, . . . sacrifices the appearance of impartiality - the *sine qua non* [essential condition] of American *judicial* justice . . . ." Pillsbury v. F.T.C., 354 F.2d 952, 963 (5th Cir Ct. of Appeals, 1966). "Legislative intervention which occurs during a pending decisional process of an agency endangers and may undermine the integrity of the ensuing decision, and it has been held that administrative decisions which are based in whole or in part on pressures emanating from the legislature may be invalid." 73 C.J.S. Sec. 31, Public Administrative Law and Procedure.

[5] For example *see* AS 44.62.630 in the Administrative Procedure Act, also *see* AS 44.64.050(b) regarding the standard of conduct for hearing officers in the office of administrative hearings.

[6] *See* AS 44.64.030 for the jurisdiction of the office of administrative hearings. Child support services and permanent fund dividend adjudications are under the jurisdiction of the office of administrative hearings.

AS 44.64.050 provides fundamental standards of conduct required of hearing officers. The chief administrative law judge is required to adopt regulations for a code of conduct.

> . . . The following fundamental canons of conduct shall be included in the code: in carrying out official duties, an administrative law judge or hearing officer shall
> (1) uphold the integrity and independence of the office;
> (2) avoid impropriety and the appearance of impropriety;
> (3) perform the duties of the office impartially and diligently;
> (4) conduct unofficial activities in ways that minimize the risk of conflict with the obligations of the office; and
> (5) refrain from inappropriate activity in seeking employment with another agency or employer or in seeking reappointment.

The proposed draft regulations at 2 AAC 64.030 provide:

> (b) The following guidelines apply to any determination on whether a hearing officer of administrative law judge has adhered to the canons [of hearing officer conduct]:
> (1) The requirement to uphold the integrity and independence of the office, and of the hearing function, dictates that a hearing officer or administrative law judge establish and personally observe high standards of conduct and avoid improper ex parte communications with private and agency parties on the subject of a hearing request; so that the integrity and independence of the office and hearing function will be preserved;
> . . .
> (3) The requirement to perform the duties of the office or of the hearing function impartially and diligently dictates that a hearing officer or administrative law judge . . .
> (B) not initiate, permit, or consider improper ex parte communications, . . .

"improper ex parte communications" are defined at 2 AAC 64.990(13) as

> a direct or indirect, oral or written communication between a decision maker and a party to a proceeding, or another person trying to influence the decision maker, which occurs outside the presence of the other parties, and without a notice and an opportunity to participate being given to the other parties.

[7] You have asked "can a legislator contact a decision maker to ask if there was other information that could be provided." This would require the decision maker or the administrator in charge of the case file to advise the legislator on how to conduct the case or influence the outcome. This would not be appropriate, as it impairs the impartiality of the hearing process.

[8] The only exceptions are described in AS 24.60.030(i):

> [e]xcept for supplying information requested by the hearing officer or the individual, board, or commission with authority to make the final decision in the case, or when responding to contacts initiated by the hearing officer or the individual, board, or commission with authority to make the final decision in the case . . .

ADVISORY OPINION 2008-03

SUBJECT: Conflict of Interest – Use of Government Resources

RE: Use of state resources by legislative aides working for constituents.

Note: Advisory Opinion 08-03 supersedes and is contrary to Advisory Opinion 07-04 adopted on December 12, 2007.

You are a legislative employee and therefore covered by the legislative ethics code. You have requested an advisory opinion concerning facts and circumstances that you have related in connection with three examples. You have asked the committee to provide guidance, in the form of an advisory opinion, as to whether or not the aide in each example given can provide the services described in a manner that is in compliance with restrictions on the use of state resources under the Legislative Ethics Act.[1]

Statement of Facts

Example 1. A constituent asks a legislative aide to serve as her "personal representative" before the Alaska Workers' Compensation Board. The aide understands that this duty will require acting on behalf of the constituent in the matter by communicating with the Board and the employer, creating, typing, copying and delivering motions and hearing exhibits, and attending the hearing as the constituent's advocate. The aide undertakes and accomplishes this duty, and, when transmitting documents on the constituent's behalf, uses legislative letterhead as a coversheet listing the documents transmitted, the intended recipients of the documents, and "information regarding meetings/timeframes/etc."

Example 2. On a constituent's behalf, a legislative aide uses legislative phone lines and e-mail to communicate with the Alaska's Child Support Enforcement Division and negotiate a settlement between the constituent, the Alaska CSED, and the California CSED. The settlement may net the constituent as much as $85,000 in child support back-payments.

Example 3. A legislative aide uses legislative letterhead and e-mail to pursue an informal appeal of the Alaska Permanent Fund Division's denial of a constituent's dividend eligibility. The denial is based on the constituent's alleged failure to meet legal requirements of Alaska residency because the constituent left the state for a time to attend a religious post-secondary school. The aide convinces the division to

reverse the denial by arguing that, because the education sought was not available at Alaska schools, the break in Alaska residency does not disqualify the constituent from eligibility.

Discussion

In the examples given, a hypothetical aide uses either legislative letterhead or legislative e-mail in the course of providing assistance to a constituent. In our Advisory Opinion 07-02, we concluded that an incumbent legislator may use legislative letterhead to communicate on any matter if the matter has a legislative purpose. The same is true of any "official" means of communication used by a legislator (or the legislator's aide) for a legislative purpose. An aide's use of legislative letterhead, legislative e-mail, legislative fax, or any other mode of communication identifiable on its face as legislative is permissible if it is for a legislative purpose.

AS 24.60.030(a)(2) says, in part, that a legislative employee may not

> (2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of either the legislator, legislative employee, or another person;

The committee notes that, while "legislative action" is defined in AS 24.60.990, "nonlegislative purpose" is not defined. Its opposite, "legislative purpose," is not defined either. The committee concludes that legislative purpose has a broader meaning than "legislative action" that could include the provision of services for constituents with problems dealing with government agencies.

The Legislative Ethics Act refers to constituent services twice in AS 24.60.030.

AS 24.60.030(e)(2) says a legislator may not directly, or by authorizing another to act on the legislator's behalf,

> (2) state or imply that the legislator will perform or refrain from performing a lawful constituent service as a result of a person's decision to provide or not provide a political contribution, donate or not donate to a cause favored by the legislator, or provide or not provide a thing of value;

AS 24.60.030(i) implies that the practice of using legislative resources to resolve constituents' problems in forums outside of the legislature is permitted by the Act. [2] AS 24.60.030(i) states:

> (i) Except for supplying information requested by the hearing officer or the individual, board, or commission with authority to make the final decision in the case, or when responding to contacts initiated by the hearing officer or the individual, board, or commission with authority to make the final decision in the case, a legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the case unless the
> (1) contact is made in the presence of all parties to the hearing or the parties' representatives and the contact is made a part of the record; or
> (2) fact and substance of the contact is promptly disclosed by the legislator or legislative employee to all parties to the hearing and the contact is made a part of the record.

We also note that the practice of using legislative resources to assist constituents with problems with

government agencies is not a requirement of legislative office, but is the choice of individual legislators. Our intent is not to interfere with a legislator's method of performing constituent services but to provide guidelines with regard to the use of government resources for the private benefit of a person. Legislative offices are one of the viable and necessary avenues by which Alaskans can access state government to obtain or improve service for themselves.

For purposes of this opinion, the committee defines "performing constituent service" as assisting constituents in navigating state bureaucracy and developing a communication line between the state agency and the constituent. The legislative intent in performing constituent service is threefold; to move the constituent's concerns forward, to make sure everyone involved knows what they need to know and to urge the government agency to take timely action. Constituents often do not know about laws, rules or regulations governing a particular agency or it may be they just do not accept the relevant parameters. The fact that state agency personnel are aware legislative offices are looking over their shoulders is positive. Occasionally, engaging in a constituent problem brings to light shortcomings in a law or regulation. A legislator may ask for a formal legislative review of the law or regulation or may introduce legislation to correct or clarify a statute. This type of action provides a benefit to the public in general.

But where do you draw the line when performing constituent services and the use of public resources? The use of public resources to provide help to constituents dealing with government agencies is not prohibited under AS 24.60.030(a)(2) as a nonlegislative purpose. However, that same paragraph prohibits the use of public resources "for the private benefit of either the legislator, legislative employee, or another person . . . ."

This opinion will focus on two areas. First, there is a difference between performing constituent services as defined above and advocating for a constituent's private interest. Legislators and staff must never cross the line and involve themselves in advocating a constituent's private interest. "Advocate" is defined in Webster's New World Dictionary to mean; a person who pleads another's cause, a person who speaks or writes in support of something, or to be in favor of.[3] In that regard, legislative aides should not enter into ongoing litigation or administrative processes regardless of professional certification or expertise. The Act does not prohibit a legislative aide from performing these activities on personal time.

In Example 1 of this opinion, the legislative aide served as the "personal representative" for a constituent before the Worker's Compensation Board; in Example 2, the legislative aide negotiated a settlement with the Alaska Child Support Enforcement Division and an outside state agency; and in Example 3, the legislative aide pursued an appeal for a constituent and convinced a state division to repeal the denial. All these examples fall within the realm of constituent advocacy and provide a private benefit to the constituent. The private benefit referred to does not mean the outcome is favorable to the constituent such as the award of back child support or the successful resolution of a law suit resulting in a monetary award. The amount of time spent on a constituent issue also does not factor into private benefit. The amount of time may depend on the area of the state where the constituent lives and the level of services available. This factor alone could add to the number of hours working on a constituent issue.

The private benefit received by a constituent in these examples is the free representation before the Workers Compensation Board, the free services of a negotiator on a child enforcement issue and the free services in appealing a denial. All these services are customarily performed on a fee basis.

Further, in Example 1, legislative letterhead was used to pursue an informal appeal for a constituent before the Worker's Compensation Board. Advocating a constituent's position with the use of legislative letterhead, a state resource, is also not a permitted use of state resources. In this instance,

there is an appearance of impropriety in that the legislator is attempting to influence the outcome of an issue with a government agency to be in favor of the constituent. AS 24.60.010 states, ". . . a fair and open government requires that legislators and legislative employees conduct the public's business in a manner that preserves the integrity of the legislative process and avoids conflicts of interest or even appearances of conflicts of interest; . . . . "
Secondly, state resources should not be used for activities such as obtaining records from a medical doctor, picking up records from a facility, creating and typing reports or listings of items requested by a state agency, to name a few. This type of preparation work is the responsibility of the constituent. State resources used for these activities would constitute a private benefit. Further, allowing these activities to be performed with the use of state resources would open the door to equal access of state resources for all individuals. As stated earlier, the role of legislative staff is to be the conduit between the constituent and the government agency. Keep in mind, a legislative aide is certainly not prohibited from providing assistance to a constituent if a roadblock occurs, for example, obtaining requested documents.

Conclusion

It is an established legislative practice to use legislative aides, as part of regular duties, to provide assistance to constituents on issues with government agencies. This creates a rebuttable presumption that an aide who does so is performing a service that has a legislative purpose. Providing assistance to constituents as defined in this opinion does not provide a private benefit to the constituent. The volume of public resources that may be expended to provide constituent assistance is not considered to be a private benefit. The volume of public resources expended is dependent upon the facts of the particular case. Performing constituent services does not include advocating for the constituent's private interest and/or preparation work to present the issue to the government agency. It is understood that a constituent may receive a private benefit such as a monetary award for a favorable solution to an issue which in and of itself is not considered a private benefit under AS 24.60.030. -

Adopted by the Select Committee on Legislative Ethics on August 19, 2008.

A unanimous vote of the Committee.

DCW:lmb
08-208.lmb

[1] This opinion treats the three examples given as hypothetical, and, as requested, reviews them only for compliance with Legislative Ethics Act provisions relating to the use of state resources. Other laws may apply. For example, a person may not engage in the practice of law in the state unless the person is a

licensed and active member of the Alaska Bar. AS 08.08.210. There is no special exception from this prohibition for constituent advocacy by a legislator or legislative aide. The unauthorized practice of law is a misdemeanor. AS 08.08.230. The "practice of law," as defined in Alaska Bar Rule 63, includes:

> (b) either (i) representing another before a court or governmental body which is operating in its adjudicative capacity, including the submission of pleadings, or (ii) for compensation, providing advice or preparing documents for another which affect legal rights or duties.

[2] Advisory Opinion 05-01, legislative contacts with administrative decision makers, further clarifies the prohibitions and requirements of AS 24.60.030(i).

ADVISORY OPINION 10-01

SUBJECT: Conflict of Interest – Use of State Resources

RE: Conflict of Interest – State Paid Travel and Collateral Campaign Activities

Note: This advisory opinion was rescinded at the June 14, 2010 Ethics Committee meeting. Refer to the August 19, 2008 letter to the Alaska Public Offices Commission for guidance in this area. (The letter is attached as an addendum to this opinion.)

This opinion was initiated by the Select Committee on Legislative Ethics.

Question Presented

In an August 19, 2008 letter to the Alaska Public Offices Commission, this Committee held that a legislator who travels on legislative business using state resources may not engage in political campaigning or other partisan political party activities during the trip. In reaching this decision, the Committee examined the restrictions imposed upon legislators under AS 24.60.030(a)(2)[1] and 24.60.030 (a)(5)[2], as well as the legislative purposes set out in AS 24.60.010. The committee, at their February 17, 2010 meeting, asked for a review of this position.

Discussion

While we note the prohibitions in the statute above, we also believe that a practical solution exists which ensures compliance with the statutes, provides a practical solution to the issue presented, and incorporates other provisions of AS 24.60 to ensure compliance. In short, we believe that the nature of the business rather than whether it is paid for with state resources should be the governing standard in determining whether an ethical violation has occurred. A statement signed by a legislator designating the primary nature and purpose of the business rather than whether it is paid for by state resources should suffice to govern whether or not collateral activities can or cannot occur. Violations or false statements made in this designation can be enforced pursuant to AS 24.60.030(3)[3]. If a legislator gives as his or her primary or sole purpose for taking the trip as engaging in political campaigning or partisan political activity, then he or she would not be entitled to state paid travel expenses. On the other hand, if the legislator gives as his or her primary purpose traveling to and from the Legislative session, visiting constituents, or engaging in other legislative business, then they should not be barred from engaging in

other incidental activities like political campaigning or partisan political activity during the trip. While this requires reliance on the "honor system," legislators are held to similar standards in soliciting, accepting or receiving gifts.[4]

As has been explained to us, this issue arises primarily in the context of travel by legislators and how it affects different legislators from around the state in different ways. Some legislators are not required to use any state funds to travel to and from the session or to service their constituents. Other legislators use state funds to travel back and forth to Juneau for the session and/or to meet with their constituents. Issues have arisen about whether it is appropriate to engage in other types of activities when State funds have been used to pay for travel expenses in ether context.

Previous discussions have cited AS 24.60.030(a)(2) and (5) for the proposition that if any travel expenses are paid by the State of Alaska to cover or reimburse travel costs, it is a violation of the ethics statute to engage in any activities which are characterized as political campaigning or other partisan political activity. These arguments are based upon the specific language in the statute and also on the limited exceptions set out in the accompanying statutory language[5]. While facially sound, this argument creates significant differences in how different legislators must conduct their affairs in the performance of their duties. For example, all out of town legislators who are compensated for traveling to and from their home towns to Juneau at the beginning of the session would never be able to engage in political campaigning or other partisan political activity before the session began or after it expired. Arguably, a violation could also be alleged if a legislator returned home at the state expense and promptly engaged in political campaigning or other partisan political activity. Neither of these scenarios is faced by legislators who incur no travel costs for attending the Legislative session in Juneau. Additionally, many legislators' representation districts are vast in size and require significant travel expenses in order to properly represent their constituents. If a legislator accepts state money to pay for travel costs to visit his or her constituents, they cannot then engage in any activities characterized as political campaigning or other partisan political activity during the trip. Again, this is not an issue for legislators who do not have to incur travel costs to visit their constituents.

We believe this argument blurs the distinction between direct costs and indirect costs associated with travel by legislators. Another way to look at indirect costs is that they are incidental costs.[6] Because of the nature of the expense, travel costs can either be a direct or indirect expense of a particular endeavor. If a legislator incurs travel expenses for the sole purpose of engaging in non-legislative purposes, or partisan political activity, or for his or her private benefit, then use of state funds to facilitate those activities would not be appropriate or permitted. But when a legislator engages in multiple activities – legitimate legislative business and other activities which may have specific prohibitions in statute – while traveling, it is the primary purpose of the trip that dictates when state funds can be used to cover travel expenses. The tenor of AS 24.60.030 is to preclude direct use of public funds for non-legislative purposes and it is not clear that travel expenses for mixed activities was intended to be prohibited. The primary harm that this subsection prevents is the use of state resources for the direct purpose of political campaigning or partisan political party activity.

Additionally, this argument ignores the prohibitory language found in AS 24.60.030(a)(3). This statute makes it an ethical violation for a legislator or legislative employee to "...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds." Legislators are currently required to fill out a pre authorization travel form naming their purpose for engaging in the proposed travel.[7] This "statement" could be challenged or evaluated in light of the legislator's actual activities at a later time. Certainly, if a legislator made a false statement in this context, he or she would be in violation of AS 24.60.030(a)(3). These statements are a part of the public record and can and may be scrutinized by citizens who could file a complaint based upon the actual

activities of the legislator. This Committee would then be called upon to make a determination of whether a violation has occurred under AS 24.60.170.

This opinion is consistent with committee decisions addressing similar issues. For instance, in Advisory Opinion 96-05, a legislator requested an advisory opinion about whether it is appropriate to accept payment for the costs of a trip on which the legislator conducted both legislative business and personal business. The Select Committee issued the following opinion:

> The ethics committee cannot comment on whether you have complied with legislative policy with regard to travel and per diem allowances. Legislative Council is the body which sets those policies, and which is, together with the House and Senate leadership and the chair of legislative committees, responsible for interpreting and implementing that policy. The ethics committee notes that in approving a request for travel funds, the individual entrusted with approval authority is responsible for reviewing the purpose of the proposed trip and determining that the use of travel money is a valid use of public funds.

Id., at p. 1. The opinion goes on to state:

> It is permissible under the legislative ethics code for a legislator to accept state payment for the costs of a trip on which he or she conducted governmental business. As noted above, the committee does not have authority, in the context of advisory opinions, to use its judgment in lieu of a legislator's judgment in determining what is necessary state business or how much state business is necessary to justify accepting state payment for a trip.
>
> The committee also cautions that if a legislator or legislative employee were to intentionally use a facade of legislative business to obtain a government-paid trip but were to fail to conduct any governmental business to justify governmental payment, the committee might well find a violation of AS 24.60.030(a)(2).

Id., at p. 2.

Conclusion

In short, the enforcement provisions under AS 24.60.030(a)(3) provide sufficient protection against improper use of state funds for transportation costs.[8]

Adopted by the Select Committee on Legislative Ethics on May 27, 2010.

August 19, 2008

Holly Hill, Executive Director
Alaska Public Offices Commission
2221 East Northern Lights, Rom 128
Anchorage AK 99508-4149

Ms. Hill:

The Select Committee on Legislative Ethics (Committee) is writing in regard to a request (from the former executive director, Brooke Miles) for input concerning regulations to be drafted by the Alaska Public Offices Commission in 2008 on the subject of paid state travel and collateral campaign activity.

Review and discussion of Advisory Opinion 06-03-CD issued by the Alaska Public Offices Commission on October 31, 2006 occurred at four committee meetings; December 12, 2007, January 16, 2008, May 12, 2008, and August 19, 2008.

The Committee looked at the restrictions imposed by AS 24.60, the Legislative Ethics Act, on a legislator or legislative employee who while traveling on legislative business using legislative resources engages in political campaigning or other partisan political activity.

A legislative resource, including money provided by the legislature to cover or reimburse costs incurred by a legislator or legislative employee while traveling on legislative business, is a government asset or

resource. A government asset or resource may not be used by a legislator or legislative employee for involvement in or support of or opposition to partisan political activity. AS 24.60.030(a)(2). More specifically, a legislator or legislative employee may not use or authorize the use of a government asset or resource for the purpose of political fund raising or campaigning. AS 24.60.030(a)(5). (Partisan political activity, political fund raising and campaigning are herein referred to as "partisan political activity.")

The legislature may wish to revisit the absolute restriction in AS 24.60 in view of the vast difference between urban and rural areas in our state. Legislative districts vary greatly in the land mass encompassing a district. Both cost and time expended to visit areas within a district also vary greatly. Travel for a matter of legislative concern or for partisan political activity can be quite costly and time consuming. The extreme example of traveling to a remote area of the state for legislative business and then returning to the legislator's home base and again traveling to the same area for partisan political activity was discussed.

Based on these factors, the Committee looked at de minimis use of state resources as a possible solution. However, de minimis use of a legislative resource for partisan political activity is prohibited under AS 24.60. To allow de minimis use of state resources for partisan political activity would require a legislative change in AS 24.60. Currently the only exception for de minimis use of state resources is for personal reasons if there is no cost to the state or the cost is promptly reimbursed.

If the legislature adopted an exception to AS 24.60.030 to permit partisan political activity that required the legislator to reimburse the state for pro-rated costs of such activity then the use might be considered de minimis. A legislator or legislative employee could then attend an event, for example, that had the overtones of being campaign related or was actually campaign related while on a legislative business trip if the primary purpose of the trip was for a matter of legislative concern. Committee members very strongly stated that a legislative trip should not be planned or scheduled around a campaign activity and further underscored no additional expenses to the state must be incurred when conducting the partisan political activities.

Under a de minimis use exception, the allocation formula allowed under Executive Branch ethics and outlined in AO 06-03-CD is the method the Committee feels is most equitable and fair. The allocation of state funds would be determined based on the percentage of time spent on state business and the percentage of time spent on partisan political activity. The percentage of time spent on a partisan political activity would be used to determine the allocated cost for reimbursement to the state.

After considerable debate, the committee determined travel to and from the legislator's home district to attend a legislative session should be exempt from the requirement of allocating costs for partisan political activity.

We hope our comments will be helpful to the Commission in preparing draft regulations on this subject. I am available to answer any questions.

Sincerely,

Herman G. Walker, Jr.
Chair, Select Committee on Legislative Ethics

Cc: Ethics Committee Members

[1] In pertinent part, AS 24.60.030(a)(2) states, "A legislator or legislative employee may not ... use public funds, facilities, equipment, services, or another government asset or resource for a non-legislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of the legislator, legislative employee, or another person..."

[2] In pertinent part, AS 24.60.030(a)(5) makes it unethical to" use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning..."

[3] AS 24.60.030(a)(3) makes it an ethical violation for a legislator or legislative employee to "...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds."

[4] Under AS 24.60.080 only four types of gifts require disclosure. Legislators are held to the "honor system" in determining how to identify other gifts received. A gift log is no longer required by statute but recommended. *See also* AS 24.60.010 (7)"compliance with a code of ethics is an individual responsibility..."

[5] AS 24.60.030 has a number of noted exceptions to the general rules that state resources may not be used for partisan political activity or political campaigning. See AS 24.60.030(a)(2)(A)-(K), AS 24.60.030(a)(5)(A)-(E), AS 24.60.030(d) and AS 24.60.030(h).

[6] AS 24.60.030(h) allows incidental campaign activities during the employee's workday while on government time. If the activity is more than incidental the employee shall take leave time. A similar analogy could be made regarding legislative travel.

[7] Each legislator must complete a Senate, House, Finance Committee or Legislative Council Pre Travel Authorization Form prior to travel for legislative business and a Legislative Affairs Agency Travel Claim form to request reimbursement after travel has been completed. Additionally, the Senate and House each year approve guidelines for travel and per diem for legislators. Legislative Council has also a travel and per diem policy for both legislators and legislative employees.

[8] The Committee recommends that the Legislature consider amending AS 24.60.030 to clarify this matter.

ADVISORY OPINION 2009-02

SUBJECT: Close Economic Association – Medical Services

RE: Close Economic Association

You are a legislative employee and therefore covered by the legislative ethics code. You have requested an advisory opinion concerning facts and circumstances that you have related. Unless stated otherwise, the committee relies on facts that you have described in answering your questions.[1]

Statement of Facts

You are also a licensed medical professional who sometimes provides outpatient medical services to legislative colleagues, including legislators and legislative employees, although you do not provide medical services to your supervisor or at your supervisor's direction. In some instances you provide medical services to a person on a one-time basis; in other instances you provide medical services in a series of appointments. In all instances you are paid at or close to the market value for the type of service you provide and you assess fees according to standards and practices commonly used in your profession. You are paid directly by your clients, although they may be eligible for reimbursement through a medical insurance benefit in some instances. You are subject to federal and state law, including the federal Health Insurance Portability and Accountability Act of 1996 (HIPAA), which require you to keep certain information relating to your services confidential.[2]

Discussion

You have asked if you are required to disclose the names of your clients, or other information about them, under AS 24.60.070, a section of the Legislative Ethics Act that requires disclosure of close economic associations. The section reads:

> Sec. 24.60.070. Disclosure of close economic associations.
> (a) A legislator or legislative employee shall disclose to the committee, which shall maintain a public record of the disclosure and forward the disclosure to the respective house for inclusion in the journal, the formation or maintenance of a close economic association involving a substantial financial matter with
> (1) a supervisor who is not a member of the legislature who has responsibility or authority, either directly or indirectly, over the person's employment, including preparing or reviewing performance evaluations, or granting or approving pay raises or promotions; this paragraph does not apply to a public member of the committee;

(2) legislators;
(3) a public official as that term is defined in AS 39.50;
(4) a registered lobbyist; or
(5) a legislative employee if the person required to make the disclosure is a legislator.
(b) A legislator or legislative employee required to make a disclosure under this section shall make a disclosure by the date set under AS 24.60.105 of the legislator's or legislative employee's close economic associations then in existence. A disclosure under this section must be sufficiently detailed that a reader of the disclosure can ascertain the nature of the association.
(c) When making a disclosure under (a) of this section concerning a relationship with a lobbyist to whom the legislative employee is married or who is the legislative employee's domestic partner, the legislative employee shall also disclose the name and address of each employer of the lobbyist and the total monetary value received by the lobbyist from the lobbyist's employer. The legislative employee shall report changes in the employer of the spouse or domestic partner within 48 hours after the change. In this subsection, "employer of the lobbyist" means the person from whom the lobbyist received amounts or things of value for engaging in lobbying on behalf of the person.
(d) In this section, "close economic association" means a financial relationship that exists between a person covered by this chapter and some other person or entity, including but not limited to relationships where the person covered by this chapter serves as a consultant or advisor to, is a member or representative of, or has a financial interest in, any association, partnership, business, or corporation.

Your relationship with your clients is financial, as defined by subsection (d), since you are paid by your clients to provide a professional service. However, this does not necessarily mean that relationship involves a "substantial financial matter," something that subsection (a) requires of an economic relationship in order for it to be a close economic association and require disclosure under the Legislative Ethics Act, and we do not need to resolve that question in order to respond to your request.

In AO 88-01 we considered whether certain information about a lawyer-legislator's private clients, including their names, is exempt from the disclosure requirements of the Legislative Ethics Act. We said:

> The statutory language is straightforward and on its face allows no exceptions. However, it is axiomatic that a state law may not be enforced to conflict with the state or federal constitution and, in some areas, federal legislation has preempted the state's regulatory power. Therefore the committee determines to read into the statute a limited exception. To the extent that disclosure would conflict with an established constitutional right or with a federal prohibition against disclosure which preempts state law, a legislator should disclose the existence of a client but not the client's name, and also disclose the subject of the representation and the body before which the matter is held.

For the same reasons we adopted the foregoing exception in 1988, today we read into the Legislative Ethics Act another exception to the Act's disclosure requirements: a person who is subject to the disclosure requirements of the Legislative Ethics Act may withhold disclosure of information they would otherwise be required by the Act to disclose, to the extent that disclosure would conflict with an established constitutional right or with the requirements of a federal law.

The federal Health Insurance Portability and Accountability Act (HIPAA) requires that providers of health care services maintain strict confidentiality of patient records. The Legislative Ethics Act does not require that you disclose information that HIPAA requires you to withhold; however, the exception

we have adopted in this opinion does not excuse compliance with the Act's disclosure requirements altogether. You are still required to comply with the disclosure requirements to the extent that your compliance does not conflict with HIPAA.

Conclusion

Based on the foregoing facts and for the reasons discussed above, the committee finds that AS 24.60.070 does not require you to disclose information that is required by law to be kept confidential, including information protected by confidentiality requirements of HIPAA. To the extent you are able to partially comply with the disclosure requirements of AS 24.60.070 without violating HIPAA requirements you should make a partial disclosure. You are responsible for determining what HIPAA requires of you in this regard, and for citing the specific HIPAA provisions that are relevant in your disclosure report to the committee.

Adopted by the Select Committee on Legislative Ethics on May 28, 2009.

Members present and concurring in this opinion were:

Senator Joe Thomas
Senator Tom Wagoner
Representative Berta Gardner
Representative John Coghill
H. Conner Thomas
Dennis "Skip" Cook
Ann Rabinowitz
Herman G. Walker, Jr.
Gary J. Turner, Chair

DCW:plm
09-105.plm

[1] On the committee's behalf, legislative counsel contacted you by phone on February 18, 2009 and you provided factual information in that conversation that is supplemental to the written facts you provided on February 11, 2009.

[2] Although you have also asked that the committee advise you on the federal Health Insurance Portability and Accountability Act of 1996 (HIPAA), interpretation of that law exceeds the authority of this committee under AS 24.60.140 and 24.60.160. You are responsible for determining what HIPAA requires of you in this matter.

Advisory Opinion 94-07

RE: Must participation in the Violent Crimes Compensation Commission Program be published in the journals?

You are a legislative employee covered by the legislative ethics code. You have filed a disclosure of participation in a state benefit program but asked that the committee refrain from publishing the disclosure in the journal.

Statement of Facts

The facts and circumstances that you have related, and on which the committee relies in answering your questions, are as follows:

You are a legislative employee, covered by the legislative code of ethics. During 1993, you received $763 from the Violent Crimes Compensation Program. You reported this participation in a state benefit program to the committee on February 15 but requested that the committee not publish the disclosure. The committee has chosen to treat your request for confidentiality as a request for an advisory opinion in order to give notice of its decision on the issue your request raises.

Discussion

Under AS 24.60.050(c), a legislator or legislative employee who participates in a state benefit or loan program that is not exempt under (a) of that section must disclose the participation. The programs and loans that are exempt from disclosure under subsection (a) are those that are generally available to members of the public, are subject to fixed, objective eligibility standards, and require minimal discretion in determining qualification. Under subsection (b), the committee publishes a list of programs designating those for which disclosure is required. Appendix G of the Standards of Conduct Handbook, prepared by the ethics committee and published in January 1993, lists those programs that must be reported. The Violent Crimes Compensation Program is one of the programs listed. Therefore, you are required to report your participation, which you did.

Under AS 24.60.050(c), the committee is required to

> promptly compile a list of the statements [of participation in programs or receipt of loans] indicating the loans and programs and amounts and send it to the presiding officer of each house who shall have it published in the supplemental journals within three weeks of the filing date.

The statute on its face does not provide any exceptions to the requirement that each person participating in a program or loan be included on the list that is published in the journals. However, the committee believes that an exception based on the constitutional right of privacy must be read into the publication requirement and should be applied in the case of programs such as the Violent Crimes Compensation Program.[1]

The committee staff contacted the Violent Crimes Compensation office to discuss the privacy issue. According to the staff of that office, the names of participants in the program and files relating to them are kept confidential. There is no public access through the commission to any information on an individual. They do publish an annual report from which any identifying information concerning individuals has been removed.

In Advisory Opinion 88-1, concerning disclosure of representation before a state agency, board, or commission under AS 24.60.100, the committee relied on the constitutional right to privacy and on the state supreme court's implementation of that right to find a limited exemption to the disclosure requirement imposed by the ethics code. The committee permitted the legislator-attorney to refrain from disclosing the name of a client whose privacy would be invaded by disclosure but did require disclosure of the existence of an unnamed client, the subject of the representation, and the body before which the matter was heard.

In Falcon v. Alaska Public Offices Com'n, 570 P.2d 469 (Alaska 1977), the court considered whether a doctor who had been appointed to the State Medical Board was required to reveal the names of patients on his financial disclosure statement. The court stated that whether a privacy invasion is justified turns on the precise nature of the privacy interest involved:

> There must be a "fair and substantial relation" between the statutory means and a legitimate governmental purpose. Thus to determine the validity of the disclosure provisions of the Conflict of Interest law, we must consider both the nature and the extent of the privacy invasion and the strength of the state interest requiring disclosure.

Id. at 476. (Footnotes omitted) In Falcon, the court found that the purposes of the Conflict of Interest law were to promote efficient, ethical government and preserve the integrity and fairness of the political process both in fact and in appearance. Those purposes are similar to the purposes of the legislative ethics code, stated at AS 24.60.010(1) and (2).[2] The court then considered how invasive the revelation of the names of the patients would be and noted that ordinarily disclosure of patients of a physician would involve only a minimal invasion of privacy but that in particular situations, the disclosure might have the effect of making public information that was confidential or sensitive. The court quoted a commentator on how to determine whether information should be considered sensitive:

> [s]ensitive information is that which a person desires to keep private and which, if disseminated, would tend to cause substantial concern, anxiety or embarrassment to a

reasonable person.

Id. at 479. The court gave an example of visits to a physician who specializes in contraceptive matters or abortions as private and sensitive information. The court then concluded: that the extent to which the governmental interest in promoting fair and honest government would not outweigh the individual's privacy interest in protecting sensitive personal information from public disclosure in those kinds of situations. Id. at 480.

Applying this analysis to your situation, the committee must decide whether your participation in the Violent Crimes Compensation program should be considered to be sensitive information. If the committee finds that the information is sensitive, it must weigh whether your privacy interest should take precedence over the governmental interest in public disclosure of your participation in the program. In making this judgment, the committee will consider the possibility of the appearance of impropriety in your participation as well as the possibility of actual impropriety. The committee will also consider the degree of influence you might have had because of your legislative position.

The committee finds that your participation in the Violent Crimes Compensation program should be considered sensitive personal information. You have expressed concern about having the events that happened made public and the committee finds that a reasonable person would have similar concerns. This conclusion is supported by the fact that the information is treated as confidential by the Violent Crimes Compensation Commission. Because the amount of money you received from the program was relatively small and because you do not occupy a position that can take official action or exert official influence over this state program, the committee finds that your name should not be made public.[3] However, in order to comply as completely as possible with the statutory requirements, the committee will publish the fact that a person required to make disclosures under the legislative code of ethics did participate in the program and will disclose the amount of the benefit that you and your family received. Your name will be kept confidential.

Conclusion

For the reasons stated above, the committee finds that under AS 24.60.050, you were required to report your participation in the Violent Crimes Compensation program to the committee but that your constitutional right to privacy requires the committee to keep your name confidential. Accordingly the committee will publish notice that a person required to disclose under AS 24.60.050 participated in that program and will report the amount you received.

Adopted by the Select Committee on Legislative Ethics on April 14, 1994. Members present and concurring in this opinion were:

Joseph P. Donahue, Chair
Representative Jerry Mackie
Representative Brian Porter
Margie MacNeille
Edith Vorderstrasse
Shirley McCoy

MINUTES from May 27, 2010
FULL COMMITTEE MEETING
Anchorage LIO, Room 220

1. **CALL THE MEETING TO ORDER:** Vice Chair Gary Turner called the meeting to order at 11:32 a.m. Roll call was taken by Joyce Anderson. Members present: Senator John Coghill, Senator Gary Stevens (attending by teleconference), Representative Les Gara (11:35 a.m.) alternate for Rep Gardner, Chair H. Conner Thomas (11:40 a.m.), Representative Craig Johnson (12:00) alternate for Rep Gatto, Gary J. Turner, Dennis (Skip) Cook, Antoinette (Toni) Mallott. Staff present: Joyce Anderson, Administrator. Absent: Herman G. Walker, Jr. Also present Brent Cole, Legal Counsel and Dan Wayne, LAA Legal Counsel (attending by teleconference).

2. **APPROVAL OF AGENDA:** Vice Chair Turner requested a motion to approve the agenda. Motion to move and approve the agenda made by Rep Johnson. No objections.

3. **APPROVAL OF MINUTES:** Sen Coghill motioned and moved to approve the minutes of the Senate Subcommittee meeting of February 17, 2010, and the Full Committee meeting minutes of February 17, 2010; no objections.

4. **PUBLIC COMMENT:** None.

5. **CHAIR/STAFF REPORT:**

   a. **Ethics disclosures:** Ms. Anderson stated that disclosures, filed between February 18th (deadline for annual disclosures) and April 18th (last day of session) will be published in the Legislative Journal at the end of June. The next publication of interim disclosures will be in January of 2011, unless deemed otherwise by House Clerk and Senate Secretary. A current list of disclosures submitted will be updated and posted on the Ethics website.
   b. There were eight late disclosures filed since the last committee meeting in February. Four were first time late filings and no fine was accessed; Rep Kawasaki, Rep Millett, Rep Stoltze and T. Bannister. The other four varied in reasons for lateness:

Rep Holmes was fined $25 for an inadvertent late filing; Sen Huggins was fined $25 for an inadvertent late filing; S. Long was fined $100 for a late filing; and Sen Dyson's late filing was waived since he had filed with APOC.

c. **Informal Advice Staff Report:** Ms. Anderson provided an explanation of the informal advice provided between November 1, 2009, and May 14, 2010. The report does not include routinely asked questions but questions involving more detailed advice. Ms. Anderson stated that the current method used in preparation of this report is tedious and time consuming. However, she is anticipating the availability of a database this summer which will simplify this task. The database is being developed by the State of Massachusetts and would be available free. Sen Coghill complemented Ms. Anderson on categorizing the report stating it was helpful to him to review advice in this manner.

6. **SECOND LEGAL OPINION:** Chair Thomas arrived at 11:40 a.m. and relieved Vice Chair Turner who was temporarily sitting in for him. Mr. Cole was not scheduled to arrive until 12Noon to present this item. Chair Thomas provided members a history of the subject and the discussions previously held leading up to this point, noting that there are members present today who were not present at prior meetings.

Chair Thomas referred members to the letter in today's meeting packet written by the Ethics Committee in response to APOC's (Alaska Public Offices Commission) request for the Ethics Committee's input concerning regulations on the subject of paid state travel and collateral campaign activity. At the time of this request, (December of 2007), APOC had no regulations in place. APOC's request is what generated the Ethics Committee to hold various discussions and ask for an advisory opinion on the subject. A draft opinion discussed at the January 2008 meeting was not approved or issued but the committee concluded there absolutely cannot be a mixing of state resources for campaigning or incidental partisan political activity. The Committee then wrote APOC stating the position of the Ethics Committee; however, no advisory opinion was ever adopted or a vote taken by the committee.

The Chair also noted that this issue comes up often, most recently, at his and Vice Chair Turner's confirmation hearings, where the House Judiciary Committee questioned both of them about the committee's advice and recommended that the Committee consider submitting a second opinion. The Chair stated that the question before them today is if they should adopt the second opinion or rely on the advice in the draft opinion written by Dan Wayne, LAA legal counsel.

The Chair asked Dan Wayne to go over his opinion and his view on Mr. Cole's second opinion. Mr. Wayne stated he reviewed Mr. Cole's opinion and indicated he did not agree with Mr. Cole's analysis. Mr. Wayne expressed that his opinion was based on **AS 24.60.030, "A legislator or legislative employee may not use public funds, utilities, equipment, services or another government asset or resource for a non-legislative purpose for involvement in or support of or opposition to partisan political activity or for the private benefit of either the legislator or legislative employee or another person."** Mr. Wayne provided the exceptions, as follows:

"This paragraph does not prohibit a) the limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duty. And either the cost or value of related use is nominal or the legislator or legislative employee reimburses the state for the cost of the use." If this were the only exception, "personal use" *could* encompass campaign use or political use. But there's another exception having to do with political campaigning, which is AS 24.60.030(a)(5), and states as follows: **"A legislator or legislative employee may not use or authorize the use of state funds, facilities, equipment, services or government asset or resource",** which is similar to the first exception he read.

He further stated, for the purpose of political fundraising or campaigning, there are five exceptions: **1) this paragraph does not prohibit a) the limited use of state property and resources for personal purposes.** This reiterates the "personal use" exception. It also says it doesn't prohibit the use of mailing lists, computer data or information obtained by a government agency and available to the general public for non-legislative purposes; it doesn't prohibit the storing or maintaining election campaign records in a legislator's office, and it doesn't prohibit a legislator from using a legislator's private office in the Capitol city during a legislative session and for the 10 days immediately before and the 10 days immediately after a legislative session. Also, a legislator is not prohibited from using photographs of him or herself.

He pointed out that what we don't see in this prohibition under 24.60.030(a)(5) is an exception that allows some sort of *de minimis* or case-by-case basis political campaign usage of state resources. In his opinion, he's said that's a "blanket" prohibition. If the exception had "allowed limited use of state property and resources for political purposes or political campaign purposes, or personal purposes including political campaign use," the statute would have so stated. Mr. Wayne stated he was willing to draft something else, if the Committee determined the statute should be interpreted otherwise.

The Chair asked if there were any questions. Sen Stevens asked Mr. Wayne to comment on what the words "primary purpose" means in the second opinion. Mr. Wayne explained that in his opinion the statute does not allow for any "splitting out" or any division between a primary purpose or secondary, minimal purpose as is the case with "personal, non-legislative" use of state resources. Mr. Wayne referred Sen Stevens to Mr. Cole for an explanation.

Sen Stevens pointed out that in Mr. Cole's opinion he mentioned the difference between a legislator who represents a district in downtown Anchorage versus one in rural Alaska with multiple cities/boroughs. For example, at the end of session, when he traveled to Homer from his Kodiak residence, his purpose was to explain what transpired in session. However, since people in Homer know he's running for office in August, it is very difficult reporting what the legislature did and report nothing on the fact that he's running for office. Sen Stevens felt that although this subject needs to simplified and clear and kept as separate as you can, it was very hard to do.

Member Cook stated he initially sided with the prohibition of campaigning with the use of state funds, however, can appreciate what legislators have said and their concerns.

He suggested adopting the formula that was developed when the state owned the aircraft for state travel; that if anyone is going to use the aircraft on state business, if campaigning occurred and exceeded 10%, then the legislator would reimburse the state. When there's reimbursement, you are not using state funds. The "limit" allows someone to address a campaign related question or issue if it inadvertently or unexpectedly comes up and would address concerns brought forth by Sen Stevens.

Rep Gara stated he agreed with Sen Stevens. He emphasized the importance of the word "for". For example, did you take the trip "for" the purpose of campaigning" or "for" a legislative purpose? "For" is the key word in the statute. He felt Mr. Coles' analysis was correct. Rep Gara stated that the practical matter is that people from Anchorage have an advantage over people from Kodiak or Nome, etc., because the reality of political campaigning is the activity is more prevalent in larger cities. If you're in Nome, most of your donations are going to come from outside of Nome. He pointed out the following example: I can go to a legislative meeting during the day in Anchorage and in the evening, I can go to a campaign activity after hours; others who come here for a legislative purpose cannot attend a campaign event after hours.

Vice Chair Turner stated that discussions on this have gone on for almost three years now. He respects the opinions and input from the legislators, but as he's gone on record in the past, there is an advantage to the incumbent, especially in an election year. For example, the challenger has to pay for his/her trip to Anchorage to campaign.

Chair Thomas asked Mr. Wayne about his footnote in his opinion (Draft Opinion 07-08) **"'Although legislators and legislative employees travel to the capital city and sometimes other locations within Alaska in order to participate in legislative sessions, the committee does not consider that travel, or travel outside of the capital, to be within the scope of this opinion...."** Mr. Wayne referred the Chair to wording from the letter written by the Ethics Committee to APOC in the second to last paragraph, **"After considerable debate, the committee determined travel to and from the legislator's home district to attend a legislative session should be exempt from the requirement of allocating costs for partisan political activity."** The Chair stated that the letter to APOC was written *after* Mr. Wayne's opinion was drafted and asked if Mr. Wayne could recollect background on the reasoning for his footnote. Mr. Wayne could not recollect the revolution of the footnote but recalled the committee having a lot of discussion about it and believed at the time there was no "black and white" legal authority to say that travel to and from the session from the home district was exempt, but that as a practical matter had been considered that way and the committee adopted that exception, informally, in their letter to APOC.

The Chair introduced Mr. Cole to the floor and requested that he provide the members a quick overview of his Second Legal Opinion.

NOTE: MR BRENT COLE'S TESTIMONY WAS INAUDIBLE; PLEASE REFER TO HIS SECOND LEGAL OPINION LETTER FOR DETAILS THAT MAY NOT BE IN THE MINUTES.

Mr. Cole explained that he was an "outsider" but aware of the issues and concerns by legislators as well as the general public. He stated his opinion was written with the existing statute in mind, regardless if it does not contain the best language or does not directly address the issue. Existing law has to be followed. He stated he did not focus on one or two provisions of the statute but encompassed all of the provisions in 24.60.030. Conflict of Interest and Unethical Conduct. Mr. Cole stated his opinion contained a melding of all concerns. His solution is provided in the second paragraph of his opinion stating, **"we believe that the nature of the business rather than whether it is paid for with state resources should be the governing standard in determining whether an ethical violation has occurred. A statement signed by a legislator designating the primary nature and purpose of the business rather than whether it is paid for by state resources should suffice to govern whether or not collateral activities can or cannot occur. Violations or false statements made in this designation can be enforced pursuant to AS 24.60.030(3) If a legislator gives as his her primary or sole purpose for taking the trip as engaging in political campaigning or partisan political activity, then s/he would not be entitled to state paid travel expenses."** Mr. Cole added that AS 24.60.030(a)(3) was not considered previously. AS 24.606.030(a)(3) makes it an ethical violation for a legislator or legislative employee to **"...make a false statement in connection with a request, or application for compensation, reimbursement, or travel allowance from public funds."**

The Chair requested comments, consideration or discussion on using percentages.

TESTIMONY FROM THE CHAIR, MR. COLE AND MR. WAYNE IS INAUDIBLE. SEN STEVENS MENTIONS DIFFICULTY IN HEARING TESTIMONY. HOWEVER, SEN STEVENS IN HIS TESTIMONY COMMENTS ON THE DISCUSSION BETWEEN THE CHAIR, MR. WAYNE AND MR. COLE.

Sen Stevens believes the terms "de minimis" and/or "primary" are understandable but splitting the cost and dealing with percentages could be difficult and cumbersome. Sen Stevens also refers to page 4 of Mr. Cole's opinion, **"...the individual entrusted with approval authority is responsible for reviewing the purpose of the proposed trip..."** noting that this is another "check and balance" on the use of state funds. It is the President of the Senate and the Speaker of the House who are responsible for reviewing and examining a request for state paid travel and have the authority to question a request and in turn either approve or deny the request. Basically, legislators are under the "honor system" when it comes to a request for reimbursement for legislative travel.

DUE TO THE DIFFICULTY OF HEARING TESTIMONY, SEN STEVENS NOTIFIES THE MEMBERS HE MAY LEAVE THE MEETING. MS. ANDERSON ASKED SEN STEVENS TO NOTIFY THE CHAIR WHEN HE LEAVES.

Rep Gara recommended the members interpret the statute as presented in Mr. Cole's opinion. He stated there will be a lot of problems if we do not. He provided the following scenario in relation to attending a conference: The conference lasts 6 hours but you are normally you're up 18 hours a day which leaves the remaining 12 hours to be spent doing whatever you do on your personal time, whether you're at the movies, shopping, visiting friends, etc, it's all "personal time". However, in this instance your

"free" time is not "de minimis" to the time spent at the legislative conference. If the committee approves a rule that says, "other than de minimis use", the above example would not fit into the box. He provided another example: If you go to Washington, DC, you're going to want to see many of the attractions which may result in spending a substantial amount of your day doing non-legislative business. We cannot take a set of rules designed to prevent corruption and use them to prevent rational activity. When rural members come in for a Caucus meeting, over a period of 2-3 days, most of the time they spend here, they are not doing legislative business. The meetings end at two o'clock and afterwards, they're dining at a restaurant, etc.

Rep Gara stated he feels the whole legislative process favors the incumbent, although attempts to level the playing field are made by limiting campaign contributions and limiting fundraising activities during legislative session. If we reject Mr. Cole's opinion, the current rule disfavors the incumbent. He explained that during the AGIA special session here in Anchorage, that lasted about 30 days, he was able to campaign and go door-knocking after hours. Others who were here from out of town could not do this on their free time. He reiterated his previous statement: Were you there "for" the AGIA or were you there "for" campaigning? Additionally, he felt what we are doing is regulating someone's free time. If a fundraiser were held during the day during the AGIA session, that is a different story and the person would have violated the statute.

Mr. Cook stated the legislature approves the statutes and the committee is trying work within that framework and has been for the last three years. He feels the statutes are clear in that there is an explicit prohibition on the use of state resources for campaign related activities in that there are exceptions for personal use but no exceptions for political campaigning activity. The simplest way to fix this problem would be for the legislature to amend AS 24.60.030 and remove the prohibition on political campaigning activity or put limits on it in the statute, as was done with the Executive Branch and the state jet. Legislators and the public get upset with the Committee for trying to impose rules, but the committee is only interpreting the statutes that were passed by the legislature. He recommends fixing the statute instead of asking the Committee to interpret it. He would like to see a reimbursement formula similar to AS 39.52.120(f) in which public funds weren't being used for campaigning.

Sen Coghill stated he agreed with Member Cook. However, when a person is in the political arena, that person is always a political person. S/he will always be a policy person with a point of view of a political nature. Under Mr. Wayne's opinion a legislator is always going to be "unethical" because partisan or political activities occur all of the time. Sen Coghill believes the committee needs to address it.

Sen Coghill voiced his opinion on the power of the incumbency. He agreed with Rep Gara. In Mr. Cole's opinion, there are certain disadvantages to legislators and incumbents. He would like to see the term "primary purpose" addressed. He would like take this opinion and move forward with it even though there are questions on the definition of the term "primary". He stated he would be willing to work with Sen Stevens in defining "primary purpose". Sen Coghill also stated that if he were elected again, he would take this issue to the legislature. He felt Mr. Cole's opinion should be

adopted, even though there are questions about what is considered "primary" and he questioned whether the premise of an honor system is reasonable to move forward with.

Sen Coghill motioned that we accept Mr. Cole's legal opinion and adopt the opinion for the Ethics Committee.

Vice Chair Turner stated he had a concern with there being two different standards. One based on AS 39.52.120, with the 90/10 split, and Mr. Cole's opinion, with the term "primary purpose". He believes there will be a lot of questions on why the Executive Branch holds one set of standards and why the Legislature holds another. Mr. Cole stated that the answer would be because there is a specific statute for the Executive Branch and there is not one for the Legislative Branch. Mr. Cole further added that it is not easy to pass any legislation in regards to ethics. Having the issue brought out into the public eye may force the legislature to act. The decision today is going to create more interest, hopefully making legislators realize the legislature needs to get together and address the issue. The public is going to demand it. What's consistent with the statute and what's consistent with reality must be balanced. The difficulty with Alaska is that it's very diverse. It's not just the Republicans or Democrats, it involves urban and rural and incumbent and non-incumbent. It encompasses a lot of different interests competing, which makes this a challenge.

Rep Johnson stated if the motion is adopted, it would be much easier for Sen Coghill, Rep Gara and himself to clarify this in statute through legislation. This would be the opinion the committee would be operating under and this is the law as it stands now. He stated the statute could then be crafted to be consistent with the committee's opinion and put one of the legislative committee member's names on it. The statute would endorse what has been previously determined as unethical behavior by the committee.

The motion was brought before the members for a vote.

YEAS: Sen Stevens, Sen Coghill, Rep Johnson, Rep Gara, Toni Mallott. NAYS: Skip Cook, Gary Turner, Chair Thomas; motion passes.

7. **FY2011 BUDGET BRIEFING:**

   a. **Travel:** Ms. Anderson briefed the members that the Committee had requested an increase in travel due to the fact the travel budget has been consistently exceeded. The Committee also requested an upgrade in the Administrator position and an increase in time for the Secretary's position. The travel budget received a decrease of $2,500 for FY11, the Secretary's position changed from 50% time to 60% time with benefits, and there was no change in the Administrator position. Members were referred to a handout reflecting travel expenses for legislators. Sen Stevens stated he approves travel for senators and travel expenses should be coming out of Senate funds and not Ethics Committee funds. Ms. Anderson stated she would notify LAA Accounting of this change.

   b. **Ethics meeting with House Finance:** Vice Chair Turner provided an update to the members on his and Ms. Anderson's meetings on February 16, 2010, with House

Finance committee members regarding the Ethics budget. Here is a recap: Speaker Chenault was noncommittal. Reps Dahlstrom and Kerttula both who were favorable for a budget increase. Rep Thomas thought the requests were somewhat reasonable but was not comfortable increasing the budget. Sen Stevens was in favor of the increase. Rep Hawker first wanted to know if we had submitted our budget to the governor and if he had accepted it. Ms. Anderson stated the ethics budget has never been presented to the governor in the past and she doesn't think the committee required to do so. They were unsuccessful in meeting with Rep Stoltze after numerous attempts. Rep Gara recommended going to both the governor and legislature for budget requests.

c. **Annual Report:** Ms. Anderson proposed to the committee that an annual report be prepared to improve the visibility of Ethics Committee within the Legislature. Ms. Anderson did some research and found that other Ethics Committees have annual reports. The report would include statistics and goal planning. Ms. Anderson proposed that the report be submitted to legislators at the beginning of legislative session. Sen Coghill stated that when session starts he already has at least 50 annual reports to read through. Rep Gara cautioned against preparing a report. The most important items are already available, the rulings and the informal advice. He stated the time to prepare a report exceeds the need of additional work on the administrator's plate. Chair Thomas suggested Ms. Anderson draft a report and present it to the committee for input to see if it would be beneficial or not.

8. **LEGISLATIVE OVERSIGHT OF ETHICS COMMITTEE:** Vice Chair Turner stated he felt the Ethics Committee is becoming more politicized. The committee is experiencing budget decreases and intent language placed in the budget by the House Finance Subcommittee –Legislature, to name a few. He also noted there are no minutes or an audio recording of the finance meeting in which to review the actual comments by legislators. Also, at the February 16 meeting previously mentioned, it was evident that many legislators may have had issues with many of the Advisory Opinions the Committee has recently passed and informal advice given by the Administrator. As Member Cook mentioned earlier, the committee interprets what's in statute. Additionally, at his and Chair Thomas' confirmation hearings, they felt attacked by some House Judiciary committee members who questioned why the Committee would recommend legislative changes to statutes as well as suggesting that the Committee bend the rules as necessary to fit each fact specific situation. Vice Chair Turner also noted that the Administrator salary is not at the same salary level as her peers in similar positions and upon requesting a salary increase, it was declined again.

Based on the above reasons, Member Turner has come to the conclusion that the Committee should discuss the possibility of becoming a "Commission" like other states have done. This would mean becoming an independent state agency, much like APOC. Vice Chair Turner referred to the article in the packet where Kentucky legislators understood how difficult it could be to sit in judgment of colleagues on ethics issues, then walk out of the meeting and ask those same colleagues for support on a bill or amendment.

Vice Chair Turner, through the Chair, requested that Ms. Anderson present her research to the members. Ms. Anderson stated the difference between a Committee and a Commission is that a Committee is made up of legislators and public members and a Commission is made up of public members only. On the handout titled, "Research of Ethics Oversight Agencies", there are six states which have Legislative Ethics Committees and/or Commissions, eight states that have State Ethics Commissions, Executive and Legislative Branches under one body, and thirty three states are comprised of legislators, and the remaining three states differ from all of them.

(INAUDIBLE – MINTUES REFLECT THE RECOLLECTIONS OF MS. ANDERSON REGARDING THIS QUESTION) Sen Coghill asked Ms. Anderson if she attended any seminars at the COGEL (Council on Governmental Ethics Laws) conference in December 2009 or talked to other participants about this concept and also the subject of budget issues. Ms. Anderson responded she attended a seminar on the subject of budgets and stated other jurisdictions have had problems with their budgets when a controversial decision or decisions were made by the ethics body.

Rep Gara stated that he understood Vice Chair Turner's concern and has witnessed some of it too, where the conduct of legislators was inappropriate toward the public members of the ethics committee, but did not believe that changing the status of Committee was going to change this type of conduct. APOC is a Commission and they get just as much, if not more than the Ethics Committee. Their budget has gone up and down as well. In the end, the Legislature has to approve the budget anyway.

Vice Chair Turner indicated Member Walker was in favor of this idea as well. Vice Chair Turner had hoped this would be a way to gain a little more independence. Under a Commission, the decision on the Administrator's salary would not be influenced by a legislator who may have a difficulty with the Administrator of the Ethics Committee or the committee itself. Having worked in the University system, salary levels are determined through the HR system without political influence. Additionally, the treatment received at the confirmation hearings for public members was influenced by the decision rendered by the Ethics Committee, and not by their personal service or qualifications, which is the point of a confirmation hearing.

Members agreed to table the item for the next meeting where Member Walker would have an opportunity to participate in this discussion.

Rep Johnson did not feel changing the status of the committee would change anything. He did not believe Vice Chair Turner's example of the University system applied, due to the fact the University is part of a collective bargaining unit. Sen Coghill noted there's always room for improvement. He understood Vice Chair Turner's point, with regard to the Committee becoming politicized where this can be an advantage or disadvantage. Sen Coghill noted that he's been on a lot of boards in the past and witnessed decisions from political influence, and unfortunately, it is not an uncommon practice. Rep Johnson stated he sat through the board of Fish & Game confirmations and the political influence is very notable. He apologized if the confirmation hearing was more brutal

than it should have been. He personally appreciates the public members' service on the Ethics Committee and asked the members not to take it personally.

Ms. Anderson stated this has been a challenging year for the Ethics office. Ms. Anderson stated that APOC is now fully staffed after being understaffed for many years. They are now able to perform audits which they have not been staffed to do in the past. The same is true for the ethics office. Her position started out as 80% time and then increased to 90% and is now 100%. During that time period her workload increased. Even before the increase in time, the hours worked were close to 95% to 98%. The ethics office now has a permanent part-time staff person. Now that APOC and the Ethics office have more resources, both agencies are able to do more than just maintain the office. There is time to conduct research and be proactive instead of just reactive. For example, the office reviewed legislative candidate web sites to ensure "solicitations for contributions during a legislative session" were not listed on the web site. Quite a few legislators were notified and removed the prohibiting language. More oversight has been occurring this year than in the past and some of it has not been received very well. Ms. Anderson feels this is unfortunate. The ethics office, in being proactive, is trying to prevent a complaint from being filed against a legislator or a staff person for violating the ethics code.

Chair Thomas recognized and acknowledged testimonies before him today and recommended more follow up on this subject at the next meeting.

9. **OTHER BUSINESS**: Sen Stevens requested to speak on an issue that is not on the agenda. Chair Thomas allowed Sen Stevens to proceed. Sen Stevens stated that he feels sometimes the ethics committee/office goes beyond its responsibilities and look for things to get involved in that the committee should not. One of which has caused consternation among staff and members of the legislature is in regards to the legislature's Accomplishment Book. It is a booklet that the majority publishes every year at the end of every session. It contains detail about what transpired regarding fiscal matters and accomplished legislation. It is his understanding that Ethics staff has now stated the Accomplishment Book is a campaign issue and cannot be distributed two months before the election. He disagrees with this statement because the booklet has been published after session every year and he does not feel this is a campaign-related-item. He would like the Committee members to address this.

Chair Thomas did not know what advice was provided and asked Ms. Anderson if she could respond. Ms. Anderson stated she was aware that Accomplishment Booklets are printed every year and stated that perhaps the staff person she spoke with may have misunderstood the comments she provided. Ms. Anderson stated she had originally met with the staff person regarding another issue and then asked about the Accomplishment Booklet and how it was going to be distributed. The staff person replied that it had already been distributed by E-mail. Ms. Anderson stated she went on to explain an Ethics statute states such a booklet cannot be "mass mailed" during the 60 days before an election if the publication is "from a legislator or about a legislator." She proceeded to pointed out to Sen Stevens that she did not say the booklet could not be distributed.

Sen Stevens stated it may have been a misunderstanding but he was making it clear now that he will allow any Senator to hand out any of the booklets at any time up to the day of an election. He asked Ms. Anderson if she had any objection. Ms. Anderson replied by stating "no" to his question and explaining the statute talks about a "mass mailing" but it does not talk about handing out individual Booklets. Mass mailing means it would be mailed to a group of individuals. Sen Stevens reiterated that is not up to the Ethics office to decide whether or not a Senator can do a mass mailing of the booklet to everyone in their district at any time.

Ms. Anderson replied that she would have to research the statute further about the definition of a "mass mailing" and get back to Sen Stevens. She read AS 24.60.030(c) which states, **unless approved by the committee, during a campaign period for an election in which the legislator or legislative staff employee is a candidate, the legislator or legislative employee may not use or permit another to use state funds, other than funds to which the legislator is entitled to under 24.10.110** (which is a legislator's personal allowance account) **to print or distribute a mass mailing to individuals eligible to vote for the candidate. Campaign period begins 60 days for the date of an election."**

Sen Stevens suggest there be a legal opinion and disagreed with the interpretation. He further stated the booklet was not a campaign item and that it contained the accomplishments of the legislature. Ms. Anderson stated the committee previously issued an advisory opinion on the subject and she would pull the opinion for reference. Sen Stevens stated he was not referring to any mass mailing other than how the Accomplishment Booklet could be distributed. He stated it should be up to the legislator to determine the distribution method and not Ethics. Chair Thomas recommended Sen Stevens request formal advice or a legal opinion. Sen Stevens stated he did not want a legal opinion and reiterated that he believed the Accomplishment Booklet could be published and distributed any way a legislator wanted.

Rep Gara requested a re-visit to an existing opinion regarding a link on a campaign web site that would take the viewer to a legislative website. He stated APOC had referred him to the Ethics office as they thought Ethics had a ruling on this topic. Ms. Anderson stated that APOC is the deciding authority on what can and cannot be on a Campaign website, not the Ethics Committee. She will forward a copy of her paperwork on this issue to Rep Gara.

10. **ADJOURN**: Member Turner made a motion to adjourn the meeting at 2:00 p.m

Alaska State Legislature

Select Committee on
Legislative Ethics

Physical Address:
716 W. 4th Ave., Suite 230
Anchorage, AK 99510-1468
PH: (907) 269-0150
FAX: (907) 269-0152

Mailing Address:
P. O. Box 101468
Anchorage, AK
99510-1468

MINUTES from June 16, 2010
FULL COMMITTEE MEETING
Anchorage LIO, Room 550

1. **CALL THE MEETING TO ORDER:** Chair Conner Thomas called the meeting to order at 12:05 p.m. Members present: Senator John Coghill, (via teleconference), Senator Gary Stevens, Representative Les Gara, (alternate for Rep Gardner), Representative Carl Gatto, Gary J. Turner, Dennis (Skip) Cook, Herman G. Walker, Jr., Antoinette (Toni) Mallott. Staff present: Joyce Anderson, Administrator. Also present: Brent Cole, Legal Counsel and Dan Wayne, LAA Legal Counsel (via teleconference).

2. **APPROVAL OF AGENDA:** Chair Thomas asked if there were any objections to the proposed agenda and hearing none, the agenda was approved.

3. **APPROVAL OF MINUTES:** Vice Chair Turner requested the word "almost" be inserted on page 4, third paragraph, first sentence, before "three years now". Member Walker made a motion to approve the minutes as amended. No objections.

4. **PUBLIC COMMENT:** Representative Craig Johnson stated he served as an alternate for Rep Gatto at the May 27th Ethics Committee meeting and wanted to clarify his position on the subject of legislative travel and campaign activity on the same trip. He did not believe it was a violation to have a conversation with a constituent on campaigning in a super market while traveling on state business. He did feel it would not be appropriate to schedule a state paid trip and a fundraiser at the same time. He further stated he believed there needed to be a balance between these two activities but questioned whether the Ethics Committee had the ability to do this within the structure of the law. Rep Johnson wanted the Committee to know for the record that he did not agree with what he and the Committee approved at the last meeting.

5. **CHAIR/STAFF REPORT:** Ms. Anderson informed the committee the NCSL's State Legislatures magazine, June edition, had published an article about 25 innovative web sites. The searchable database of more than 100 advisory opinions from 1984 to the present on our website was showcased. The article also mentioned disclosures could be filed online.

Ms. Anderson also informed the committee that she recently learned the audio from our Ethics Committee meetings were not available to the public and requested the Committee consider making them available, like other interim committees, on BASIS. The Committee determined the audios should be on BASIS. Sen Coghill suggested BASIS and the Ethics website be linked as well.

6. **REVIEW OF ACTION TAKEN AT MAY 27, 2010 MEETING - STATE PAID TRAVEL AND COLLATERAL CAMPAIGN ACTIVITIES:** Chair Thomas reminded members an advisory opinion was approved at the May 27 meeting authorizing collateral campaign activities when on a state paid trip as long as the trip was primarily for legislative business. The results were: YES: 5; NO: 3; with one member absent. A couple of days later, Rep Gara, who voted yes, requested reconsideration of his vote. (See his request via E-mail in meeting packet.)

Chair Thomas stated it was his role as chair to decide if the request was timely. Because the advisory opinion had already been made public, including notification to the Press, and advice had already been given out based on the opinion; he ruled the request was not timely. He stated he asked Ms. Anderson to contact each Committee member to see if there was any interest in rescinding the opinion. Several members expressed their interest in discussing this item further and possibly rescinding the advisory opinion.

Chair Thomas indicated if there was a motion today to rescind the committee's previous action and it passed, the item would be put on the table for discussion. Rep Gara made a motion to rescind the action taken by the Ethics Committee on May 27, 2010.

Discussion on State Paid Travel and Collateral Campaign Activities: Chair Thomas reminded members the Committee did not have the authority to set policy but only interpret the Legislative Ethics Act. The Chair gave the floor to Rep Gara to allow him the opportunity to explain his request to rescind and present his recommendations.

> Rep Gara summarized the E-mail he sent to members: We were given two options at the last meeting; one prepared by Mr. Brent Cole, outside legal counsel, and the other prepared by Mr. Dan Wayne, LAA Legal Counsel. He stated Mr. Cole's opinion was flawed in that campaign fundraising activities were permitted and Mr. Wayne's opinion was also flawed by banning of legitimate, free speech.

Rep Gara recommended accepting Mr. Cole's opinion focusing on the "primary purpose" rule and adding a statement indicating, **"fundraising on a state-paid trip can create the appearance of impropriety."**

The Chair asked Mr. Wayne if the Committee has the authority to make the type of modification Rep Gara is recommending and to also give his legal opinion on the freedom of speech issue. Mr. Wayne stated the Committee has the authority to interpret the statute based on the facts of the question and statutory language. He stated he understood Rep Gara's concerns.

Mr. Wayne pointed out in his updated opinion that if the political activity the person is engaged in is made possible by the use of state resources, and then s/he should not engage in it. The opinion included relevant examples. However, Mr. Wayne concluded the subject matter can be complicated and it would not be difficult to think of unusual conundrums that people could run into.

Sen Stevens agreed this issue was complicated and suggested the committee make it simple and clear for legislators to know when they are in violation and when they are not. He questioned if the legislature should be working this issue, not the Committee.

Member Walker stated that he understood the merit of Sen Stevens' position and Rep Gara's and believes this should be a legislative fix. The public members have been in favor of a legislative fix from the start. He stated there needs to be a balance between urban and rural legislators with the way the state is laid out. The balance should not be determined by this Committee.

Member Cook concurred with Member Walker stating he felt the Legislature should fix this issue, not the Committee. There are problems with both opinions but ultimately it's the statute that is the problem and needs to be addressed. He felt the statute was too absolute in that campaigning is prohibited and there are no exceptions, whatsoever. There are exceptions for everything else. If the Legislature can come up with a quick fix to the state jet issue (Administrator's Note: When this issue came to light, legislation was passed to address it the next legislative session), then they can fix and corrected this situation as well. Member Cook believes the Legislature does not want to loosen up the rules; they want the Ethics Committee to do it for them. As a member of the Committee, he is not willing to do what the Legislature should be doing. The Legislature passed the statute, let the Legislature fix it.

Member Mallott stated she was under the impression from the May 27 minutes that Sen Coghill was going to take this issue to the Legislature for review. Member Mallott also brought up a very common scenario that could occur while a legislator was visiting a village on state business. If a legislator declined an invitation to a potluck to discuss campaign issues, the legislator would be insulting the village and community. Potlucks are a common event in small villages.

Chair Thomas redirected the discussion and requested Mr. Cole to address Rep Gara's concerns before addressing Member Mallott's comments.

Mr. Cole stated it was not uncommon for a statute to be rewritten. He also stated it was not unusual to have two or three interpretations relating to the same statute. Legislators need guidance and he felt Mr. Wayne's interpretation allows for too many limitations for legislators while they are traveling on state business. He did not feel his opinion was "extreme", as some members had stated. He stated if legislators are on a state paid trip to a village, the legislator should be able to communicate with the people there on all facets.

Chair Thomas asked Mr. Cole if the Committee has the authority to revise the opinion as Rep Gara suggested. Mr. Cole stated he believed the Committee has the authority. It would first require rescinding the advisory opinion which has already been approved and then rewriting certain sections as the committee directed. However, he did not agree with Rep Gara's recommendation of prohibiting fundraising only.

Sen Stevens agreed with Mr. Cole's comment that legislators need guidance and it needs to be clear. If a legislator files paperwork to attend a meeting and states the meeting is the primary purpose of the trip, and he approves it as Senate President, and the legislator also attends a campaign fundraising event for himself or herself while on the trip, anyone can file a complaint saying that was not the primary purpose of the trip. In his opinion, it is obvious and clear to him that this person violated the ethics code.

Rep Gara agreed the issue is clarity. He did not agree with Mr. Wayne's opinion since it banned free speech. Rep Gara also stated he agreed that this was the Legislature's job but it was not realistic to expect it to pass. From past experience, even with the best intentions, it is difficult to pass a bill. That is why it is important to come up with something now; a rule that honors the statute but isn't unreasonable or with unintended circumstances.

Rep Gara stated Mr. Cole's opinion makes sense but liked the idea that the Ethics Committee could bar things that raise the appearance of impropriety. Chair Thomas added the Committee has in the past deemed the appearance of impropriety was not in and of itself an ethics code violation.

Mr. Cole stated he did not see how you could say fundraising raises the appearance of impropriety but then allows other candidate campaign activities. In his opinion all campaign activities raise the appearance of impropriety.

Rep Gatto agreed leeway was important but finding the right language was a difficult task. What a legislator might see and what another perceives as proper or improper can be very different.

Chair Thomas believed it boils down to the purpose of the trip; i.e., the specific set of circumstances. He does not believe they can come up with any rule that can guarantee a complaint won't ever be filed.

Sen Stevens stated that he was invited to attend two fundraisers the night before, which he did not attend, but questioned if the Committee was referring to personal fundraisers for the legislators on the state paid trip or any fundraiser. Mr. Wayne indicated there is another opinion on this subject. He believes the statute reads whether you are helping someone else raise money for their campaign or raising money for your campaign, it's all considered fundraising. This would include the situation where your name is listed on an invitation to a fundraiser. Mr. Wayne offered to look up the opinion and provide additional information. Sen Stevens then questioned if it included attending fundraisers for other candidates, such as a fundraiser for Sen Murkowski or President Obama. Member Cook stated the statute reads, "no partisan political activity", which includes all

levels of partisan political activity. Member Cook indicated that's the problem with the statute; it's very broad. Sen Stevens stated the words "primary purpose" definitely clarifies things for him and that he preferred the term.

Chair Thomas stated that there was a motion on the floor and asked each member to voice their opinion before taking a vote.

- Member Cook stated the Legislature should make the policy call through legislation.

- Sen Coghill stated he preferred Mr. Cole's opinion in that the term "primary purpose" was defined and was against rescinding the opinion.

- Rep Gara stated he would like a rule that meets the public's expectations – when on a state paid trip you are not going to a fundraiser on the same trip. He clarified the prohibition doesn't mean you shouldn't be able to talk to a voter or the press while on that trip. He is against the approved opinion and hopes the Committee comes up with a rational rule.

- *MEMBER MALLOTT'S COMMENTS WERE INAUDIBLE.*

- Member Walker had no comment at this time.

- Sen Stevens stated he was against rescinding the opinion without replacing it with something else. He believes in the honor system; i.e., signing paperwork that states the primary purpose of a trip is for legislative business. He believes the committee is delving in dangerous territory in that we are close to writing legislation which is not the Committee's job.

- Rep Gatto stated he was against rescinding the opinion.

- Chair Thomas agreed with Member Cook. The Legislature was clear when they wrote the current legislation. No state resources can be used for campaigning. He also agrees that the prohibition does not mean a legislator cannot talk on the phone about campaign issues. But he stated there are no exceptions in the current statute for the use of state resources and that is a concern that has been voiced by many members. He stated the Legislature should be addressing this issue. Chair Thomas explained that in August of 2008 the Ethics Committee's letter to APOC is what generated this discussion. There was an opinion drafted but never adopted. The Committee maintained its position that there were no exceptions in the statute.

Sen Stevens voiced concern and frustration over rescinding Mr. Cole's opinion due to the fact Legislators had been notified of the opinion and received advice based on the opinion and now the opinion may be rescinded today.

Chair Thomas agreed that it is frustrating to him as well, but if the current opinion is rescinded today and no other opinion is approved, the recommended advice to legislators and staff would be what was in place prior to adopting Mr. Cole's opinion in May. The advice provided after the May 27 opinion was adopted would stand and action taken by legislators and staff during the period the opinion was in force would not be in violation of the Act.

Chair Thomas asked Ms. Anderson to take a roll call vote. YEAS: Skip Cook, Rep Gara, Toni Mallott, Gary Turner, Herman Walker, Jr., Chair Thomas, NAYS: Sen Coghill, Rep Gatto, Sen Stevens. Motion to rescind the committee's May 27 action passes.

Chair Thomas suggested the members break for 10 minutes to review Mr. Wayne's advisory opinion.

Sen Stevens recommended legislators be notified immediately that Mr. Cole's advisory opinion was rescinded today. Ms. Anderson stated she would send out an "All Users" e-mail ASAP.

(Herman Walker leaves the meeting and does not return.)

1:40 p.m. - Members reconvened.

Mr. Wayne presented a revised draft of the 2008 advisory opinion not approved by the committee. He explained that he reviewed previous discussion on this subject and incorporated some of the examples in this opinion. He clarified his drafted opinion was to assist the Committee and not to advocate for any particular policy. The Committee can accept it, modify it or reject it.

(Sen Stevens temporarily leaves the meeting.)

Mr. Wayne proceeded to point out the changes he made from his first draft opinion. He changed the wording from "legislative resources" to "state resources" throughout the opinion to be consistent with the term used in statute. The examples will aid in understanding where the Committee might "draw the line". The long paragraph on page three is new and addresses the interpretation of the two prohibitions in statute in regard to legislators and staff traveling to and from legislative sessions. There was some discussion at previous meetings in relation to the term "incidental" and the long paragraph on page 3 and page 4 covers those concerns. The second paragraph on page 5 covers "inadvertent" campaign activity that many members voiced concerns about; for example, if you're approached by a constituent in the super market with a campaign related issue while traveling on a state paid business trip.

(Sen Stevens returns to the meeting.)

Sen Stevens requested a definition of the terms "political fundraising", "campaigning" and "partisan political activity". Mr. Wayne provided Sen Stevens some examples but explained there were no definitions in statute. Mr. Wayne indicated there are the

obvious examples of when you are campaigning, but there are also gray areas which may be more obvious or less obvious to some and fall subject to interpretation.

Rep Gara requested clarification regarding phone calls and a scenario during a month long special session. What if a legislator received a call from the press stating your opponent has accused you of doing something you did not and you feel you need to address it immediately, and you do, are you engaging in "political activity". Mr. Wayne stated he would have to know the facts of the subject matter that was before the press. Without the facts, he could not answer the question.

Vice Chair Turner commented that APOC also did not have definitions on these three terms. They have said it would greatly help them if there were definitions. He also commented that he did not fully agree with any of the options today and reminded the members there was still the option to adopt the Executive Branch's method, which was prompted by the use of the executive airplane by a sitting governor, such as portioning the expense out.

Members discussed what the next step should be. Rep Gara stated he could agree with members if the consensus was more discussion and more work on the issue. However, he was concerned about what was to be the rule in the meantime. He offered taking it to the Legislature, but felt time was of the essence. He felt that a ruling should be made today and requested feedback from members on his recommendation of adopting Mr. Cole's opinion with the exception of fundraising.

Sen Coghill indicated the pressing concerns were definitions, the freedom of speech issue, and when impropriety of fundraising occurs. He feels the Committee wants a rule that is "prescriptive" rather than something they can use as a guide. For example, the members want to be able to tell people when it is okay to fundraise rather than what is the impropriety in mixing legislative work with campaign work. He felt this was discussion for the Legislature, as was defining terms. He agreed that the statute was too narrow, but the Committee has been pretty clear about what an impropriety might look like. He voiced it was not impossible to get things passed in the Legislature it just takes tenacity. He felt the statute is what it is but there is also a record of the numerous discussions held on this issue and minutes available to the public that shows why the impasse is so difficult to navigate.

Members discussed the next step. Legislators asked what advice the Ethics office will be giving to legislators. Chair Thomas replied that the Committee will stand behind what the statute says and the position outlined in the committee's letter to APOC.

Rep Gara made a motion to accept Mr. Cole's opinion with the exception of fundraising, reiterating that he felt a rule needed to be in place today. If a ruling was not made today, he felt what could happen is that a complaint will be filed and then the Committee will be forced to come up with a rule. He disagrees with this practice.

The Chair disagreed with Rep Gara in that the Committee has already taken a position. The position the Committee has taken is outlined in the letter to APOC. What the Committee has not done is adopt an advisory opinion.

All members agreed there should not be a vote without Member Walker's presence. Rep Gara withdrew his motion.

Members reviewed the August 19, 2008 letter to APOC. Rep Gara noted that the freedom of speech issues continue to be a problem.

Chair Thomas concluded that the item today will be tabled for the next Committee meeting.

7. **ADJOURN**: Member Cook moved to adjourn the meeting at approximately 2:30 p.m. No objections.

6.731 General standards of conduct -- Penalties.

A legislator, by himself or through others, shall not intentionally:

(1) Use or attempt to use his influence as a member of the General Assembly in any matter which involves a substantial conflict between his personal interest and his duties in the public interest. Violation of this subsection is a Class A misdemeanor;

(2) Use his official position or office to obtain financial gain for himself, any members of the legislator's family, or a business associate of the legislator. Violation of this subsection is a Class D felony;

(3) Use or attempt to use his official position to secure or create privileges, exemptions, advantages, or treatment for himself or others in direct contravention of the public interest at large. Violation of this subsection is a Class A misdemeanor;

(4) Use public funds, time, or personnel for his private gain or that of another, unless the use is authorized by law. Violation of this subsection is a Class A misdemeanor;

(5) Use public funds, time, or personnel for partisan political campaign activity, unless the use is:

(a) Authorized by law; or

(b) Properly incidental to another activity required or authorized by law, such as elections to constitutional or party offices within the General Assembly. Violation of this subsection is a Class A misdemeanor;

(6) Use his official legislative stationery, or a facsimile thereof, to solicit a vote or a contribution for his or another person's campaign for election or reelection to public office, or use the great seal of the Commonwealth on his campaign stationery or campaign literature. For purposes of this subsection, "official legislative stationery" means the stationery used by a legislator on a day-to-day basis for correspondence related to his duties as a member of the General Assembly. Violation of this subsection is ethical misconduct.

(7) While in the discharge of the duties of his office, become intoxicated by the use of spiritous, vinous, or malt liquors, or any controlled substance, as defined in KRS 218A.010. Any legislator who is unable, incompetent, or disqualified to discharge any of the duties of his office because of the use of spiritous, vinous, or malt liquors, or any controlled substance, as defined in KRS 218A.010, shall be deemed to have violated this subsection. Violation of this subsection is ethical misconduct.

Effective: September 16, 1993

History: Amended 1993 (1st Extra. Sess.) Ky. Acts ch. 4, sec. 6, effective September 16, 1993. -- Amended 1988 Ky. Acts ch. 420, sec. 1, effective July 15, 1988. -- Created 1976 Ky. Acts ch. 262, sec. 6.

Formerly codified as KRS 6.775.

Montana Code Annotated 2009

2-2-121. Rules of conduct for public officers and public employees. (1) Proof of commission of any act enumerated in subsection (2) is proof that the actor has breached a public duty.

(2) A public officer or a public employee may not:

(a) subject to subsection (7), use public time, facilities, equipment, supplies, personnel, or funds for the officer's or employee's private business purposes;

(b) engage in a substantial financial transaction for the officer's or employee's private business purposes with a person whom the officer or employee inspects or supervises in the course of official duties;

(c) assist any person for a fee or other compensation in obtaining a contract, claim, license, or other economic benefit from the officer's or employee's agency;

(d) assist any person for a contingent fee in obtaining a contract, claim, license, or other economic benefit from any agency;

(e) perform an official act directly and substantially affecting to its economic benefit a business or other undertaking in which the officer or employee either has a substantial financial interest or is engaged as counsel, consultant, representative, or agent; or

(f) solicit or accept employment, or engage in negotiations or meetings to consider employment, with a person whom the officer or employee regulates in the course of official duties without first giving written notification to the officer's or employee's supervisor and department director.

(3) (a) Except as provided in subsection (3)(b), a public officer or public employee may not use public time, facilities, equipment, supplies, personnel, or funds to solicit support for or opposition to any political committee, the nomination or election of any person to public office, or the passage of a ballot issue unless the use is:

(i) authorized by law; or

(ii) properly incidental to another activity required or authorized by law, such as the function of an elected public officer, the officer's staff, or the legislative staff in the normal course of duties.

(b) As used in this subsection (3), "properly incidental to another activity required or authorized by law" does not include any activities related to solicitation of support for or opposition to the nomination or election of a person to public office or political committees organized to support or oppose a candidate or candidates for public office. **With respect to ballot issues, properly incidental activities are restricted to:**

(i) the activities of a public officer, the public officer's staff, or legislative staff related to **determining the impact of passage or failure of a ballot issue on state or local government operations**;

(ii) in the case of a school district, as defined in Title 20, chapter 6, compliance with the requirements of law governing public meetings of the local board of trustees, including the resulting dissemination of information by a board of trustees or a school superintendent or a

designated employee in a district with no superintendent in support of or opposition to a bond issue or levy submitted to the electors. **Public funds may not be expended for any form of commercial advertising in support of or opposition to a bond issue or levy submitted to the electors.**

(c) This subsection (3) is not intended to restrict the right of a public officer or public employee to express personal political views.

(4) A candidate, as defined in 13-1-101(6)(a), may not use or permit the use of state funds for any advertisement or public service announcement in a newspaper, on radio, or on television that contains the candidate's name, picture, or voice except in the case of a state or national emergency and then only if the announcement is reasonably necessary to the candidate's official functions.

(5) A public officer or public employee may not participate in a proceeding when an organization, other than an organization or association of local government officials, of which the public officer or public employee is an officer or director is:

(a) involved in a proceeding before the employing agency that is within the scope of the public officer's or public employee's job duties; or

(b) attempting to influence a local, state, or federal proceeding in which the public officer or public employee represents the state or local government.

(6) A public officer or public employee may not engage in any activity, including lobbying, as defined in 5-7-102, on behalf of an organization, other than an organization or association of local government officials, of which the public officer or public employee is a member while performing the public officer's or public employee's job duties. The provisions of this subsection do not prohibit a public officer or public employee from performing charitable fundraising activities if approved by the public officer's or public employee's supervisor or authorized by law.

(7) A listing by a public officer or a public employee in the electronic directory provided for in 30-17-101 of any product created outside of work in a public agency is not in violation of subsection (2)(a) of this section. The public officer or public employee may not make arrangements for the listing in the electronic directory during work hours.

(8) A department head or a member of a quasi-judicial or rulemaking board may perform an official act notwithstanding the provisions of subsection (2)(e) if participation is necessary to the administration of a statute and if the person complies with the disclosure procedures under 2-2-131.

(9) Subsection (2)(d) does not apply to a member of a board, commission, council, or committee unless the member is also a full-time public employee.

(10) Subsections (2)(b) and (2)(e) do not prevent a member of the governing body of a local government from performing an official act when the member's participation is necessary to obtain a quorum or to otherwise enable the body to act. The member shall disclose the interest creating the appearance of impropriety prior to performing the official act.

REPRESENTATIVE JOHN COGHILL

Sectional Version D

Senate Bill 89 Ethic Amendments

Section 1. Replaces "lawful gratuity" with the word "gift"; and adds new language allowing compassionate gifts. This section also allows a legislator to use his or her legislative mailing list for nonlegislative purposes.

Section 2. Draws a bright line for legislators and legislative employee to follow for assisting constituents with problems they encounter with state agencies. Once an issue has been appealed to an administrative hearing officer, the legislator or legislative employee may no longer make contact with the agency, unless the person is licensed in the state for such representation and the income from that representation is reported under AS 24.60.100. This section protects a legislator or legislative employee from inadvertent ex parte contact and allows contact if the legislator or legislative employee is a party or witness to the matter.

Section 3. This provision establishes a clear distinction as to when a legislator or legislative employee can participate in partisan activities and not be engaging in a prohibited conduct.

Section 4. This provision establishes a clear distinction as to when a legislator or legislative employee can participate in partisan activities that involve fundraising.

Section 5. This provision establishes how information that is not exempt from disclosure by a legislator or legislative employee will be retained and disclosed.

Section 6. Adds public members of the Select Committee on Legislative Ethics to the statute that prohibits disclosure of confidential information.

Section 7. Clarifies that a legislator or legislative employee may accept tickets for a Legislative Council sanctioned charity event or a gift from a sanctioned charity event from a lobbyist as long as it does not exceed $250.00 in value.

Section 8. Clarifies that persons who are not lobbyists can give a ticket or a gift in connection with a charitable event sanctioned by the Legislative Council to a legislator or legislative employee that has a value of less than $250.00. However, the recipient of the ticket must disclose to the Select Committee on Legislative Ethics the value of the ticket that exceeds the $250.00 limit. Extends the reporting period to 60 days.

Section 9. Clarifies that if a legislator or legislative employee accepts tickets or a gift in connection with a charity event with a value of $250 or more must be reported within 60 days.

Section 10. Allows exceptions from filing a disclosure if it would violate the United States Constitution, the Constitution of the State of Alaska, or any other state or federal law.

Section 11. Requires legislative volunteers and educational trainees to complete the legislative ethics class.

Section 12. Adds alternate members to disqualification provisions.

Section 13. If both members are disqualified, the presiding officer may appoint another member.

Section 14. Completely rewrites the section for alternate members. Allows House Speaker, Senate President, and Chief Justice to appoint alternate members. If those members are disqualified all three can appoint an alternate to the alternate.

Section 15. Adds legislative volunteer and educational trainee to the statue that requires people to complete the legislative ethics course.

Section 16. Defines legislative employee.

Section 17. Defines state travel.

Section 18. Repeals that section of law that Section 14 replaces dealing with alternate members of the Select Committee on Legislative Ethics.

ALASKA STATE LEGISLATURE

SENATOR JOHN COGHILL

State Capitol, Room 504, Juneau, AK 99801-1182 (907) 465-3719
3340 Badger Road Suite #290, North Pole, AK 99705 (907) 488-5725

SUMMARY OF CHANGES IN CSSB 89 (27-LS0452\D)

Page 6, line 4, after "(a)(2)"; language is added to include subsection (a)(3) to clarify that limitations include (a)(2) – (a)(4); not (a)(2) and (a)(4). **(Sec. 3)**

Page 6, line 21; after "campaign activity," **during the state travel** has been added to make language consistent with language in section 3. **(Sec. 4)**

Page 7, line 7; AS 24.60.050, **State Programs and Loans**, is amended to eliminate a requirement for the Ethics Committee to compile a list of loans and programs to submit to presiding officers, but rather requires them to maintain disclosures as public record and submit disclosures to presiding officers of legislature. **(Sec. 5)**

Page 8, lines 8 – 16; this subsection was rewritten to make it very clear a charity event ticket or charitable event gift may be received from a lobbyist, immediate family member, or a person acting on behalf of a lobbyist, but the gift cannot be valued at more than $250 and it must be reported. **(Sec. 7)**

The new version deleted sections 9 and 10 of the original bill which extended deadlines for filing of disclosures for service on boards and commissions, interest in state contracts, participation in state loans, close economic associations, and representation of someone, as well as, other disclosures, from 30 days to 60 days. Under the new CS, the only disclosures extended to sixty days are reporting of gifts from a charitable event including tickets and gifts of travel for educational purposes.

Page 11, line 27; adds legislative volunteers or education trainees to the persons required to take the ethics class. **(Sec. 11)**

Page 12, line 10, (Section 12 of SB 89) AS 24.60.130(n) is repealed on page 14, line 30. It is reenacted under Sec 14 of Version D on page 12, line 30 - page 14, line 6. **(Sec. 18)**

Page 12, line 12; deletes reference to repealed AS 24.60.130(n) and adds reference to new section AS 24.60.131 to subsection (o). **(Sec. 13)**

Page 12, line 30 – page 14, line 6; new section that consolidates the appointment of alternate members by the legislature and the Alaska Supreme Court and the method of disqualification of regular members of the committee and appointing alternate members. **(Sec. 14)**

Page 14, line 7 – 17; added legislative volunteer and educational trainee to the statute establishing the legislative ethics course. **(Sec. 15)**

Page 14, lines 18 – 26; amends the statutory definition for "legislative employee", to exclude hourly employees from ethics training, eliminating the specific listing of job positions. **(Sec. 16)**

Importance: High

Skip Cook or one of the other public members from the committee will be available to testify. They are very well versed on the travel issue and the other sections of the bill. As a matter of fact, they may carry more weight with Sen Wielechowski and other committee members.

I would go ahead and schedule the bill for Thurs, March 17, since Sen Wielechowski has already agreed to hear it that week. He may change his mind for any number of reasons. There will be more hearings.

Let me know if it is scheduled and I will have Skip Cook mark that date on his calendar so he doesn't schedule another meeting.

Rynnieva:

I talked to Michelle in Sen Wielechowski's office before I left Juneau yesterday and she told me the same information that you relayed to me that the bill will probably be scheduled for the week of March 14.

Just wanted to let you know that I will not be available to testify for a State Affairs meeting on Thurs that week. I was wondering if Sen Wielechowski could schedule SB 89 for Tues, March 15.

Let me know. Thanks.

If you think I should call Michelle, let me know.

SENATOR JOHN COGHILL

Senate Bill 89 Legislative Ethics Amendments
Sponsor Statement

This bill is a product of discussions by the Select Committee of Legislative Ethics over the past couple of years.

First the bill makes a couple of housekeeping amendment. It adds reference to the compassionate gifts statute to AS 24.60.030(a) as an exception to "Prohibited conduct and conflicts of interest. It also places in statute an allowance of use of legislative mailing lists for campaign purposes.

Two amendments requested by the committee address tickets to charity events and disclosure of gifts of tickets for charitable events that have a value of more than $250.00. They allow persons who are not lobbyists to give a gift of a ticket to a charitable event sanctioned by the Legislative Council to a legislator or legislative employee that has a value of more than $250.00. However, the recipient of the ticket must disclose to the Select Committee on Legislative Ethics the value of the ticket that exceeds the $250.00 limit. The bill clarifies that lobbyists, immediate family members of lobbyists, or persons acting on behalf of a lobbyist may not exceed the $250 limit.

The bill also draws a bright line for legislators and legislative staff to follow for assisting constituents with problems they encounter with state agencies. Once an issue has been appealed to an administrative hearing officer, the legislator or legislative staffer may no longer make contacts with the agency, unless that person is a licensed professional to represent a person in such a proceeding and is being compensated for that representation.

After over three years of discussion this bill is a first attempt to set standards by which a legislator or a legislative staffed can participate in a partisan activity or a campaign fundraiser.

The bill adds public members of the ethics committee to the statute prohibiting members from knowingly making unauthorized disclosure of confidential information.

The committee recommended a statute that would allow an alternate member of the ethics committee who participates in the beginning of a proceeding to participate in the entire proceeding. The Chief Justice of the Alaska Supreme Court would also be required to appoint an alternate.

The bill clarifies that disclosures prohibited by state and federal confidentiality laws are not required by the Select Committee on Legislative Ethics.

MEMORANDUM

Date: March 8, 2011

To: Senator Bill Wielechowski, Chairman
Senate State Affairs Committee

From: Senator John Coghill

Re: Senate Bill 89 Legislative Ethics

I respectfully request a hearing on SB 89 An Act clarifying legislative ethics statutes. I am attaching the back up for the hearing and looking forward to presenting it to the Senate State Affairs Committee.

Thanks for your consideration.

Summary of Version T

Sec. 1. **Replaces** "lawful gratuity" with **"gift"** to make section of law consistent with the usage of "gift".

Sec. 2. **Bright line** for legislators or staff being actively involved in constituent problems with the State. Exception of lawyers and provision for inadvertent exparte contact.

Sec. 3. **Eliminates requirement** of committee to **compile lists of financial disclosure** statements. They must only maintain public records and forward them to chief clerk and senate secretary.

Sec. 4. **Adds public members** to statute **prohibiting disclosure of confidential information.**

Sec. 5. Clarifies that a **ticket to a charity event from a lobbyist**, or gifts received because of the ticket from a lobbyist **cannot exceed $250**.

Sec. 6. **Further describes "a contribution to a charity event"** by clarifying it could be a ticket to a charity event or a gift in connection with a charity event.

Sec. 7. **Extend the reporting period** for gifts of travel for the purpose of obtaining information on legislative matters and disclosure of gifts from charitable events **from 30 days to 60 days.**

Sec. 8. **Allows for exceptions from disclosure** under the legislative ethics law **if** it would be in **violation of the state or federal constitution or state or federal law**. A written request with justification must be submitted to the committee.

Sec. 9. Requires anyone who is a **volunteer or educational trainee for more than 30 days to take the ethics training**.

Sec. 10. Adds cite for new section on Alternate Members to statute describing the committee, its structure and its duties.

Sec. 11. Adds cite for new section on Alternate Members to statute describing the committee, its structure and its duties.

Sec. 12. This is a **new section describing the process for appointing alternates.** The section adds a **new provision that provides for the Chief Justice to appoint an alternate public member.**

Sec. 13. **Adds legislative volunteers and educational trainees** who are in that capacity for **more than 30 days** to the statute requiring the Legislative ethics course.

Sec. 14. **Redefines** legislative employee.

Sec. 15. **Repeals** old statute describing the process for appointing alternates.

SB 89: Version T
Explanation of Changes

The committee substitute to SB 89 (version T) makes four changes to the bill:

1) It removes provisions allowing a legislator to use his/her legislative mailing list for campaign purposes.

    - On page 3 of version E, lines 3-4: deleted the underlined text

    - On page 4 of version E, lines 26-27: deleted the underlined text

2) It removes the provision allowing a legislator or legislative employee to campaign or participate in partisan activities while on state travel.

    - On page 6 of version E, deleted sections 3 and 4

3) It adds a provision stipulating that a legislator or legislative employee may request to refrain from making a disclosure if making the disclosure would violate a rule adopted formally by his or her trade or profession, if state or federal law requires the person to follow that rule.

    For example, lawyers may be barred from revealing the name of a client if revealing the name of that client would cause the client harm.

    My understanding is that state law requires attorneys licensed in the state to follow Alaska Bar Association rules.

This new language is on page 10, lines 15-18.

4) It adds language clarifying the requirement that volunteers or educational trainees complete the legislative ethics class. This requirement would only apply to volunteers or trainees who work more than 30 days. Casual or drop-in volunteers or trainees – those who come for an afternoon or several days – would not be required to take the course.

   This is consistent with existing statute (AS 24.60.155), which requires employees who begin after the 10th day of the session to complete the course within 30 days.

CS FOR SENATE BILL NO. 89(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR COGHILL

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; requiring the Select Committee on Legislative Ethics to maintain a public record of certain ethics disclosures made by legislators and legislative employees; prohibiting a public member of the Select Committee on Legislative Ethics from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to

refrain from disclosure under the Legislative Ethics Act; relating to the applicability of certain provisions of the Legislative Ethics Act to certain legislative employees, volunteers, and interns; establishing a seat for an alternate public member on the Select Committee on Legislative Ethics; clarifying the requirements related to participation by alternate public members and alternate legislative members in the proceedings of the committee; amending the definition of 'legislative employee' in the Legislative Ethics Act; and repealing a procedure for appointment of alternate legislative members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under

this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

*** Sec. 2.** AS 24.60.030(i) is amended to read:

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;**

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

*** Sec. 3.** AS 24.60.050(c) is amended to read:

(c) A legislator or legislative employee who participates in a program or receives a loan that is not exempt from disclosure under (a) of this section shall file with the committee by the date required under AS 24.60.105 a disclosure stating the amounts of the loans outstanding or benefits received during the preceding calendar

year from nonqualifying programs. If the committee requests additional information necessary to determine the propriety of participating in the program or receiving the loan, it shall be promptly provided. The committee shall **maintain the disclosure as a public record and promptly forward the information contained in the disclosure** [PROMPTLY COMPILE A LIST OF THE STATEMENTS INDICATING THE LOANS AND PROGRAMS AND AMOUNTS AND SEND IT] to the presiding officer of each house who shall have it published in the supplemental journals on or before the next regularly scheduled publication of ethics disclosures. If a legislator or legislative employee asks the committee to keep any part of the disclosure confidential and a quorum of the committee determines by vote of a majority of committee members that making the entire disclosure public would cause an unjustifiable invasion of personal privacy, the committee may elect to publish only the fact that a person has participated in the program and the amount of benefit that the unnamed person received. The committee shall maintain the disclosure of the name of the person as confidential and may only use the disclosure in a proceeding under AS 24.60.170. If the disclosure becomes part of the record of a proceeding under AS 24.60.170, the disclosure may be made public as provided in that section.

*** Sec. 4.** AS 24.60.060(a) is amended to read:

(a) A legislator**,** [OR] legislative employee**, or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

*** Sec. 5.** AS 24.60.080(a) is amended to read:

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250 or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a

lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event**,** [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event**, and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

*** Sec. 6.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this

subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a

legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

*** Sec. 7.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and occupation of the donor, a general description of the matter of legislative concern with respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the

Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

*** Sec. 8.** AS 24.60.105 is amended by adding a new subsection to read:

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate state or federal law, including the United States Constitution and the Constitution of the State of Alaska, or a rule, adopted formally by a trade or profession, that state or federal law requires the person to follow. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

*** Sec. 9.** AS 24.60.112 is amended to read:

Sec. 24.60.112. Applicability to volunteers and educational trainees. A **person who works more than 30 days as a** legislative volunteer or educational trainee shall be considered to be a legislative employee for purposes of compliance with AS 24.60.030 - 24.60.039, 24.60.060, 24.60.080, 24.60.085, **24.60.155,** 24.60.158 - 24.60.170, 24.60.176, and 24.60.178. If a person believes that a legislative volunteer or educational trainee has violated the provisions of one of those sections, the person may file a complaint under AS 24.60.170. The provisions of AS 24.60.170

apply to the proceeding.

* **Sec. 10.** AS 24.60.130(h) is amended to read:

(h) A member is disqualified from participating as a member in any proceeding before the committee involving a complaint against the member or an employee whose work is supervised by the member or an advisory opinion requested by the member. If a regular legislative member of the committee is disqualified under this subsection from participating in a proceeding involving a complaint, the member's alternate shall be designated under **AS 24.60.131** [(n) OF THIS SECTION].

* **Sec. 11.** AS 24.60.130(o) is amended to read:

(o) Notwithstanding (h) [AND (n)] of this section **and AS 24.60.131**, if a complaint before the committee alleges a violation of this chapter by a group of legislators that includes a legislative member of the committee and that member's alternate, the member and alternate member are disqualified from serving on the committee with regard to the complaint. If the two disqualified members of the committee are members of the majority organizational caucus, the presiding officer of the house in which the two disqualified members serve shall appoint from that house an alternate to serve with regard to the complaint. If one of the two disqualified legislative members of the committee is not a member of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate to serve with regard to the complaint. If a complaint alleges a violation of this chapter that includes all legislative members of the majority organizational caucus of one house, the presiding officer of that house shall appoint from the other house an alternate to serve with regard to the complaint. If the complaint alleges a violation of this chapter that includes all legislative members of a minority organizational caucus of one house, the leader of that minority organizational caucus shall appoint from the other house an alternate to serve with regard to the complaint.

* **Sec. 12.** AS 24.60 is amended by adding a new section to read:

Sec. 24.60.131. Alternate members. (a) When appointing members of the legislature to serve on the committee under AS 24.60.130(b), the speaker of the house of representatives or the president of the senate, as appropriate, shall appoint an

alternate member for each regular member. The alternate member shall have the same qualifications for appointment to the committee as the regular member for whom the alternate stands as alternate. The alternate member's appointment is subject to confirmation as required for appointment of the regular member.

(b) When selecting public members to serve on the committee under AS 24.60.130(b), the Chief Justice of the Alaska Supreme Court shall select one alternate public member. The alternate public member's selection is subject to ratification as required for selection of the regular public members.

(c) Subject to (d) of this section, if a regular member of the committee or a subcommittee is unable to participate in a proceeding other than a proceeding under AS 24.60.170, the chair of the committee or subcommittee that holds the proceeding shall designate the regular member's alternate to participate in place of the regular member at the proceeding, and the alternate shall participate for the duration of that proceeding unless the alternate is unable to participate.

(d) If a regular member of the committee or a subcommittee or an alternate member appointed under (a) or (b) of this section participates at the commencement of a proceeding under AS 24.60.170, the member shall participate for the duration of the proceeding unless the member is disqualified under AS 24.60.130(h) or is unable to continue participating. If the participating member is disqualified under AS 24.60.130(h) or becomes unable to participate, the chair of the committee or subcommittee that holds the proceeding shall designate the member's alternate to participate in place of the member for the duration of the proceeding unless the alternate is disqualified or is unable to participate.

(e) If both a regular legislative member and that member's alternate appointed under (a) of this section are not available to participate at the commencement of a proceeding under AS 24.60.170 because they are disqualified under AS 24.60.130(h), the presiding officer of the house in which the two members serve shall appoint from that house an alternate and designate that alternate to participate in the proceeding; however, if the two members who are not available to participate are not members of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate and

designate that alternate to participate in the proceeding.

(f) A designation under (c) - (e) of this section is a confidential proceeding under AS 24.60.170(*l*) unless the member who is replaced as a result of the designation waives confidentiality.

*** Sec. 13.** AS 24.60.155 is amended to read:

Sec. 24.60.155. Legislative ethics course. A person **who serves for more than 30 days as a legislative volunteer or educational trainee or** who is a legislator, legislative employee, or public member of the committee shall complete a legislative ethics course administered by the committee under AS 24.60.150(a)(4) within 10 days of the first day of the first regular session of each legislature. However, a person **who begins a period of service of more than 30 days as a volunteer or trainee or** who first takes office or begins employment after the 10th day of the first regular session of a legislature shall complete the course required by this section within 30 days after the person's first day of service and, thereafter, as required by this section. The committee may grant a person additional time to complete the course required by this section.

*** Sec. 14.** AS 24.60.990(a)(11) is amended to read:

(11) "legislative employee" means a person, other than a legislator, who is compensated by the legislative branch in return for regular or substantial personal services, regardless of the person's pay level or technical status as a full-time or part-time employee, independent contractor, or consultant; it includes public members and staff of the committee; it does not include individuals who **are hourly employees who** perform functions that are incidental to legislative functions, [INCLUDING SECURITY, MESSENGER, MAINTENANCE, AND PRINT SHOP EMPLOYEES,] and other employees designated by the committee;

*** Sec. 15.** AS 24.60.130(n) is repealed.

Coghill introduces ethics bill

The Associated Press
(02/18/11 22:16:02)

JUNEAU -- Lawmakers could participate in some partisan political activities while on state travel under a measure introduced by Sen. John Coghill.

The Republican hopes to provide clarity to an issue he says the legislative ethics committee, on which he serves, has grappled with for years. He expects a debate over what's ethical and what's fair, noting that some people believe incumbents have an inherent advantage.

He considers the issues separate. He says candidates have more fundraising options than sitting legislators.

There are exceptions to legislator politicking: Legislators cannot participate in partisan activities while on state travel if they fall during normal workday hours, on election day, within 30 days of an election in which the lawmaker is running, or are for fundraising.

The measure also would let lawmakers use legislative mailing lists for campaign purposes.

Bill would OK campaigning by lawmakers on state-paid trips

ETHICS: Chairman skeptical but likely to grant proposal a hearing.

By SEAN COCKERHAM
scockerham@adn.comThe Associated Press
(03/01/11 07:46:11)

A bill that would let lawmakers campaign while traveling on the state's dime and use legislative mailing lists for their re-election efforts is drawing questions.

"I knew the moment it was introduced that it would be controversial," said Anchorage Democratic Sen. Bill Wielechowski, who holds the bill in his committee.

Wielechowski said he's skeptical of the proposal. But he said he'll likely give it a hearing and let North Pole Republican Sen. John Coghill come and make the case.

Coghill, the sponsor of Senate Bill 89, said he wants people to hear him out and not jump to conclusions. "As long as a guy can give a reasoned answer for what he stands for, I think people are willing to give you the benefit of thoughtfulness," he said.

He described the ethics bill as a task handed to him by the Legislature's ethics committee and several other lawmakers. He said he doesn't mind because he has experience in working on ethics laws but is aware of the pitfalls.

"It's a ticklish issue... it has to be handled deliberately, purposefully and resolutely. I guess I got the short straw when it came to wander out on this one," he said.

POLITICS AND TRAVEL?

Senate Bill 89 deals with a range of ethics issues. Some aren't likely to cause much dispute, like requiring an alternate on the ethics committee who starts hearing a confidential case to hear it all the way through.

Wielechowski said he's most skeptical of the part of the bill that would let legislators campaign on state-paid travel. It became an issue last year when the Legislature's ethics committee voted to start letting legislators campaign while traveling at state expense, including raising money for their political races.

There was a backlash, and the ethics committee quickly reversed the decision.

Coghill's bill does not go as far as what the ethics committee originally tried to do. He doesn't want to let legislators do fundraising while they're on state-paid travel.

"It's always unethical to go home on the state dime and do campaign fundraising. It's very, very clear," Coghill said.

But he said legislators are both policy makers and politicians when they're traveling at state expense, and his bill would give them guidelines on what they're allowed to do. His bill would allow

legislators or their staffers who are on state-paid travel participate in partisan activity, including campaigning for their re-elections. But they couldn't do so between 8 a.m. and 5 p.m. on a workday -- except for meal breaks -- and they couldn't do so within 30 days of the election.

Coghill said it shouldn't be considered unethical to go from Juneau on state travel to his home district during the legislative session, meet with constituents in the day, and go to the Republican Party's Lincoln Day dinner at night. There also shouldn't be a problem with him going to talk with his constituents in Glennallen, and then letting supporters have a rally, he said.

"We've created a place where people can make ethical charges when we're really not doing unethical things," he said.

Coghill has a reputation as a straight shooter. But he could have a hard time convincing the State Affairs Committee, chaired by Wielechowski, that this is worth doing.

"I'm just very skeptical of allowing partisan activity while people are on state travel," Wielechowski said. "I don't know that it gets much more than a hearing, but I think we'll give (Coghill) the opportunity to make the case."

"IS IT REASONABLE?"

Wielechowski also singled out the part of the bill that says lawmakers can use their legislative mailing lists for campaigns. "My concern with that is just allowing state resources to be used for campaign purposes," he said.

The Legislature's ethics committee has already said it's OK to do it. Lawmakers generally aren't allowed to use legislative resources for their own personal political gain. But the ethics committee put out an advisory opinion in 2004 that said a database of constituent information, put together with the help of legislative staff members, could later be used for the legislator's re-election campaign.

The advisory opinion basically said it was OK because it was a minimal use of public assets for legislators to make copies of their legislative databases to use in their campaigns. The database is considered to be the confidential property of the legislator.

Senate Bill 89 would put the advisory opinion into law. Coghill said he doesn't have strong feelings about the issue, but thinks it's reasonable because of how lawmakers put together the mailing lists.

Coghill said legislators often put the lists together during their campaigns, while they are raising money and trying to drum up votes. They then bring the information with them to Juneau, he said, and add people who contact their offices. The lists are then used to send out newsletters, surveys, and the like.

He said it would be difficult to separate the names added to the list during the campaign and names that came up while in office, especially since many of the names are the same.

"I don't think it's an unethical thing to do. And whenever I'm looking at ethics law, I'm looking at what is the ethical question? And does it cross a line or is it reasonable?" Coghill said.

MEMORANDUM March 21, 2011

SUBJECT: Changes to CSSB 89( ), regarding designation of alternate legislative members in proceedings under AS 24.60.170 (Work Order No. 27-LS0452\E)

TO: Representative John Coghill
Attn: Rynnieva Moss

FROM: Dan Wayne
Legislative Counsel

Enclosed is a new version of CSSB 89( ) with deletion of "or unable to serve", on page 13, lines 28 - 29. In the same sentence, on page 13, line 27, I deleted "in" and inserted "at the commencement of". Also, on page 13, line 17, following "alternate", I inserted the word "member" in order to make the sentence beginning on that line read better.

Please let me know if there is anything else I can do to assist you.

SENATOR JOHN COGHILL

Sectional Version E

Senate Bill 89 Ethic Amendments

Section 1. Replaces "lawful gratuity" with the word "gift"; and adds new language allowing compassionate gifts. This section also allows a legislator to use his or her legislative mailing list for nonlegislative purposes. **Advisory Opinion 04-01**

Section 2. Draws a bright line for legislators and legislative employee to follow for assisting constituents with problems they encounter with state agencies. Once an issue has been appealed to an administrative hearing officer, the legislator or legislative employee may no longer make contact with the agency, unless the person is licensed in the state for such representation and the income from that representation is reported under AS 24.60.100. This section protects a legislator or legislative employee from inadvertent ex parte contact and allows contact if the legislator or legislative employee is a party or witness to the matter. **Advisory Opinion 08-03 and 05-01**

Section 3. This provision establishes a clear distinction as to when a legislator or legislative employee can participate in partisan activities and not be engaging in a prohibited conduct. **Advisory Opinion 10-01**

Section 4. This provision establishes a clear distinction as to when a legislator or legislative employee can participate in partisan activities that involve fundraising. **Advisory Opinion 10-01**

Section 5. This provision establishes how information that is not exempt from disclosure by a legislator or legislative employee will be retained and disclosed. ***Request of the Committee***

Section 6. Adds public members of the Select Committee on Legislative Ethics to the statute that prohibits disclosure of confidential information. ***Request of the Committee***

Section 7. Clarifies that a legislator or legislative employee may accept tickets for a Legislative Council sanctioned charity event or a gift from a sanctioned charity event from a lobbyist as long as it does not exceed $250.00 in value. ***Request of the Committee***

Section 8. Clarifies that persons who are not lobbyists can give a ticket or a gift in connection with a charitable event sanctioned by the Legislative Council to a legislator or legislative employee that has a value of $250.00 or more. However, the recipient of the ticket must disclose to the Select Committee on Legislative Ethics the value of the ticket that exceeds the $250.00 limit. Extends the reporting period to 60 days. ***Request of the Committee***

Section 9. Clarifies that if a legislator or legislative employee accepts tickets or a gift in connection with a charity event with a value of $250 or more must be reported within 60 days. ***Request of the Committee***

Section 10. Allows exceptions from filing a disclosure if it would violate the United States Constitution, the Constitution of the State of Alaska, or any other state or federal law. **Advisory Opinions 09-02 and 94-07**

Section 11. Requires legislative volunteers and educational trainees to complete the legislative ethics class. ***Request of the Committee***

Section 12. Adds alternate members to disqualification provisions. ***Request of the Committee***

Section 13. Adding reference to new section AS 24.60.131.pertaining to alternates to the statute providing that if both members are disqualified, the presiding officer may appoint another member. ***Request of the Committee***

Section 14. Completely rewrites the section for alternate members for better clarification of the process, adds language allowing for an alternate participating in the beginning of a proceeding to attending meetings dealing with that specific proceeding to the end of the proceeding, and to add a provision allowing the Chief Justice to appoint an alternate public member to the ethics committee. ***Request of the Committee***

Section 15. Adds legislative volunteer and educational trainee to the statue that requires people to complete the legislative ethics course. ***Request of the Committee***

Section 16. Defines legislative employee.

Section 17. Defines state travel.

Section 18. Repeals that section of law that Section 14 replaces dealing with alternate members of the Select Committee on Legislative Ethics.

CS FOR SENATE BILL NO. 89( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATOR COGHILL

A BILL

FOR AN ACT ENTITLED

"An Act clarifying that a legislator or legislative employee is allowed to accept certain compassionate gifts; allowing legislators and legislative employees to use legislative mailing lists for campaign purposes and nonlegislative purposes; allowing legislators and legislative employees who are representing persons in an administrative hearing to contact hearing officers and attempt to influence the outcome of the hearing if they are professionals licensed in the state, and allowing legislators and legislative employees who are not professionals licensed in the state to contact hearing officers for the purpose of influencing the outcome of the hearing in certain instances; allowing legislators and legislative employees, in certain circumstances, to participate in partisan political activity while on state travel; requiring the Select Committee on Legislative Ethics to maintain a public record of certain ethics disclosures made by legislators and legislative employees; prohibiting a public member of the Select Committee on Legislative Ethics

from disclosing confidential information without authorization; clarifying the ethics disclosure requirements for tickets to or gifts in connection with charity events; amending disclosure deadlines under the Legislative Ethics Act; relating to requests to refrain from disclosure under the Legislative Ethics Act; eliminating an exemption for certain legislative employees, volunteers, and interns from the requirement under the Legislative Ethics Act that legislative employees attend a legislative ethics course; establishing a seat for an alternate public member on the Select Committee on Legislative Ethics; clarifying the requirements related to participation by alternate public members and alternate legislative members in the proceedings of the committee; amending the definition of 'legislative employee' in the Legislative Ethics Act; and repealing a procedure for appointment of alternate legislative members."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 24.60.030(a) is amended to read:

(a) A legislator or legislative employee may not

(1) solicit, agree to accept, or accept a benefit other than official compensation for the performance of public duties; this paragraph may not be construed to prohibit lawful solicitation for and acceptance of campaign contributions, solicitation or acceptance of contributions for a charity event, as defined in AS 24.60.080(a)(2)(B), or the acceptance of a **gift** [LAWFUL GRATUITY] under **AS 24.60.075 or 24.60.080** [AS 24.60.080];

(2) use public funds, facilities, equipment, services, or another government asset or resource for a nonlegislative purpose, for involvement in or support of or opposition to partisan political activity, or for the private benefit of [EITHER] the legislator, legislative employee, or another person; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and

either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list for campaign purposes, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) the legislative council, notwithstanding AS 24.05.190, from designating a public facility for use by legislators and legislative employees for health or fitness purposes; when the council designates a facility to be used by legislators and legislative employees for health or fitness purposes, it shall adopt guidelines governing access to and use of the facility; the guidelines may establish times in which use of the facility is limited to specific groups;

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others;

(E) a legislator from use of legislative employees to prepare and send out seasonal greeting cards;

(F) a legislator from using state resources to transport computers or other office equipment owned by the legislator but primarily used for a state function;

(G) use by a legislator of photographs of that legislator;

(H) reasonable use of the Internet by a legislator or a legislative employee except if the use is for election campaign purposes;

(I) a legislator or legislative employee from soliciting, accepting, or receiving a gift on behalf of a recognized, nonpolitical charitable

organization in a state facility;

(J) a legislator from sending any communication in the form of a newsletter to the legislator's constituents, except a communication expressly advocating the election or defeat of a candidate or a newsletter or material in a newsletter that is clearly only for the private benefit of a legislator or a legislative employee; or

(K) full participation in a charity event approved in advance by the Alaska Legislative Council;

(3) knowingly seek, accept, use, allocate, grant, or award public funds for a purpose other than that approved by law, or make a false statement in connection with a claim, request, or application for compensation, reimbursement, or travel allowances from public funds;

(4) require a legislative employee to perform services for the private benefit of the legislator or employee at any time, or allow a legislative employee to perform services for the private benefit of a legislator or employee on government time; it is not a violation of this paragraph if the services were performed in an unusual or infrequent situation and the person's services were reasonably necessary to permit the legislator or legislative employee to perform official duties;

(5) use or authorize the use of state funds, facilities, equipment, services, or another government asset or resource for the purpose of political fund raising or campaigning; this paragraph does not prohibit

(A) limited use of state property and resources for personal purposes if the use does not interfere with the performance of public duties and either the cost or value related to the use is nominal or the legislator or legislative employee reimburses the state for the cost of the use;

(B) the use of **a legislator's legislative mailing list, or the use of** mailing lists, computer data, or other information lawfully obtained from a government agency and available to the general public for nonlegislative purposes;

(C) storing or maintaining, consistent with (b) of this section, election campaign records in a legislator's office:

(D) a legislator from using the legislator's private office in the capital city during a legislative session, and for the 10 days immediately before and the 10 days immediately after a legislative session, for nonlegislative purposes if the use does not interfere with the performance of public duties and if there is no cost to the state for the use of the space and equipment, other than utility costs and minimal wear and tear, or the legislator promptly reimburses the state for the cost; an office is considered a legislator's private office under this subparagraph if it is the primary space in the capital city reserved for use by the legislator, whether or not it is shared with others; or

(E) use by a legislator of photographs of that legislator.

*** Sec. 2.** AS 24.60.030(i) is amended to read:

(i) **A** [EXCEPT FOR SUPPLYING INFORMATION REQUESTED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, OR WHEN RESPONDING TO CONTACTS INITIATED BY THE HEARING OFFICER OR THE INDIVIDUAL, BOARD, OR COMMISSION WITH AUTHORITY TO MAKE THE FINAL DECISION IN THE CASE, A] legislator or legislative employee may not attempt to influence the outcome of an administrative hearing by directly or indirectly contacting or attempting to contact the hearing officer assigned to the hearing or the individual, board, or commission with authority to make the final decision in the **matter** [CASE] unless [THE]

(1) **the legislator or legislative employee is representing another person for compensation subject to AS 24.60.100 and as a professional who is licensed in the state;**

(2) the contact is made in the presence of all parties to the hearing or the parties' representatives **while the legislator or legislative employee is acting as a party or a witness in the matter or responding to a question asked of the legislator or legislative employee by the hearing officer, individual, board, or commission** and the contact is made a part of the record; or

(3) the contact is inadvertent and ex parte and the [(2)] fact and substance of the contact **are** [IS] promptly disclosed by the legislator or legislative

employee to all parties to the hearing and [THE CONTACT IS] made a part of the record.

* **Sec. 3.** AS 24.60.030 is amended by adding a new subsection to read:

(j) Notwithstanding the limitations under (a)(2) - (4) and (c) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity during the state travel, if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding a meal break;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

* **Sec. 4.** AS 24.60.031 is amended by adding a new subsection to read:

(d) Notwithstanding the limitations under (a) and (b) of this section and subject to other laws of the state or the United States, a legislator or legislative employee who is on state travel may participate in partisan political activity, including campaign activity, during the state travel if the legislator or the legislative employee does not use or authorize the use of state resources to pay for the activity and if the legislator or legislative employee does not participate in the activity

(1) during a normal workday between 8:00 a.m. and 5:00 p.m., excluding a meal break;

(2) on a state or municipal election day;

(3) during the 30 days immediately preceding an election in which the participating legislator or the legislator for whom the participating employee works is a candidate for elective office; or

(4) by fund raising for a political party or campaign.

* **Sec. 5.** AS 24.60.050(c) is amended to read:

(c) A legislator or legislative employee who participates in a program or receives a loan that is not exempt from disclosure under (a) of this section shall file with the committee by the date required under AS 24.60.105 a disclosure stating the amounts of the loans outstanding or benefits received during the preceding calendar year from nonqualifying programs. If the committee requests additional information necessary to determine the propriety of participating in the program or receiving the loan, it shall be promptly provided. The committee shall **maintain the disclosure as a public record and promptly forward the information contained in the disclosure** [PROMPTLY COMPILE A LIST OF THE STATEMENTS INDICATING THE LOANS AND PROGRAMS AND AMOUNTS AND SEND IT] to the presiding officer of each house who shall have it published in the supplemental journals on or before the next regularly scheduled publication of ethics disclosures. If a legislator or legislative employee asks the committee to keep any part of the disclosure confidential and a quorum of the committee determines by vote of a majority of committee members that making the entire disclosure public would cause an unjustifiable invasion of personal privacy, the committee may elect to publish only the fact that a person has participated in the program and the amount of benefit that the unnamed person received. The committee shall maintain the disclosure of the name of the person as confidential and may only use the disclosure in a proceeding under AS 24.60.170. If the disclosure becomes part of the record of a proceeding under AS 24.60.170, the disclosure may be made public as provided in that section.

* **Sec. 6.** AS 24.60.060(a) is amended to read:

(a) A legislator**,** [OR] legislative employee**, or public member of the committee** may not knowingly make an unauthorized disclosure of information that is made confidential by law and that the person acquired in the course of official duties. A person who violates this section is subject to a proceeding under AS 24.60.170 and may be subject to prosecution under AS 11.56.860 or another law.

* **Sec. 7.** AS 24.60.080(a) is amended to read:

(a) Except as otherwise provided in this section, a legislator or legislative employee may not

(1) solicit, accept, or receive, directly or indirectly, a gift worth $250

or more, whether in the form of money, services, a loan, travel, entertainment, hospitality, promise, or other form, or gifts from the same person worth less than $250 that in a calendar year aggregate to $250 or more in value;

(2) solicit, accept, or receive a gift with any monetary value from a lobbyist, an immediate family member of a lobbyist, or a person acting on behalf of a lobbyist, except

(A) food or beverage for immediate consumption;

(B) a contribution to a charity event**,** [FROM ANY PERSON AT ANY TIME, AND] tickets **to** [FOR] a charity event**, and** [AT ANY TIME, EXCEPT THAT TICKETS TO OR] gifts **to which the tickets may entitle the bearer; however, under this subparagraph a legislator or legislative employee may not solicit, accept, or receive from the same lobbyist, an immediate family member of the lobbyist, or a person acting on behalf of the lobbyist, tickets to a charity event, gifts to which the tickets may entitle the bearer, or both, that in a calendar year aggregate to $250 or more in value** [RECEIVED AT A CHARITY EVENT UNDER THIS SUBPARAGRAPH ARE SUBJECT TO THE CALENDAR YEAR LIMIT ON THE VALUE OF GIFTS RECEIVED BY A LEGISLATOR OR LEGISLATIVE EMPLOYEE IN (1) OF THIS SUBSECTION]; in this subparagraph, "charity event" means an event the proceeds of which go to a charitable organization with tax-free status under 26 U.S.C. 501(c)(3) and that the Alaska Legislative Council has approved in advance; the tickets may entitle the bearer to admission to the event, to entertainment, to food or beverages, or to other gifts or services **in connection with** [INVOLVED IN] the charity event;

(C) a gift that is unconnected with the recipient's legislative status and is from a member of the legislator's or legislative employee's immediate family;

(D) a gift delivered on the premises of a state facility and accepted on behalf of a recognized nonpolitical charitable organization; or

(E) a compassionate gift under AS 24.60.075.

* **Sec. 8.** AS 24.60.080(c) is amended to read:

(c) Notwithstanding (a)(1) of this section, it is not a violation of this section for a person who is a legislator or legislative employee to accept

(1) hospitality, other than hospitality described in (4) of this subsection,

(A) with incidental transportation at the residence of a person; however, a vacation home located outside the state is not considered a residence for the purposes of this subparagraph; or

(B) at a social event or meal;

(2) discounts that are available

(A) generally to the public or to a large class of persons to which the person belongs; or

(B) when on official state business, but only if receipt of the discount benefits the state;

(3) food or foodstuffs indigenous to the state that are shared generally as a cultural or social norm;

(4) travel and hospitality primarily for the purpose of obtaining information on matters of legislative concern;

(5) gifts from the immediate family of the person; in this paragraph, "immediate family" means

(A) the spouse of the person;

(B) the person's domestic partner;

(C) a child, including a stepchild and an adoptive child, of the person or of the person's domestic partner;

(D) a parent, sibling, grandparent, aunt, or uncle of the person;

(E) a parent, sibling, grandparent, aunt, or uncle of the person's spouse or the person's domestic partner; and

(F) a stepparent, stepsister, stepbrother, step-grandparent, step-aunt, or step-uncle of the person, the person's spouse, or the person's domestic partner;

(6) gifts that are not connected with the recipient's legislative status;

(7) a discount for all or part of a legislative session, including time immediately preceding or following the session, or other gift to welcome a legislator or legislative employee who is employed on the personal staff of a legislator or by a standing or special committee to the capital city or in recognition of the beginning of a legislative session if the gift or discount is available generally to all legislators and the personal staff of legislators and staff of standing and special committees; this paragraph does not apply to legislative employees who are employed by the Legislative Affairs Agency, the office of the chief clerk, the office of the senate secretary, the legislative budget and audit committee, the office of victims' rights, or the office of the ombudsman;

(8) a gift of legal services in a matter of legislative concern and a gift of other services related to the provision of legal services in a matter of legislative concern;

(9) a gift of transportation from a legislator or a legislative employee to a legislator or a legislative employee if the transportation takes place in the state on or in an aircraft, boat, motor vehicle, or other means of transport owned or under the control of the donor; this paragraph does not apply to travel described in (4) of this subsection or travel for political campaign purposes; or

(10) a contribution to a charity event**, a ticket to a charity event, or a gift in connection with a charity event** [FROM ANY PERSON AT ANY TIME]; in this paragraph, "charity event" has the meaning given in (a)(2)(B) of this section.

*** Sec. 9.** AS 24.60.080(d) is amended to read:

(d) A legislator or legislative employee who accepts a gift under (c)(4) **of this section that has a value of $250 or more or a ticket to a charity event or gift in connection with a charity event under (c)(10)** of this section that has a value of $250 or more shall disclose to the committee, within **60** [30] days after receipt of the gift, the name and occupation of the donor and the approximate value of the gift. A legislator or legislative employee who accepts a gift under (c)(8) of this section that the recipient expects will have a value of $250 or more in the calendar year shall disclose to the committee, within 30 days after receipt of the gift, the name and occupation of the donor, a general description of the matter of legislative concern with

respect to which the gift is made, and the approximate value of the gift. The committee shall maintain a public record of the disclosures it receives relating to gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section and shall forward the disclosures to the appropriate house for inclusion in the journal. The committee shall forward to the Alaska Public Offices Commission copies of the disclosures concerning gifts under (c)(4), (c)(8), **(c)(10),** and (i) of this section that it receives from legislators and legislative directors. A legislator or legislative employee who accepts a gift under (c)(6) of this section that has a value of $250 or more shall, within 30 days after receiving the gift, disclose to the committee the name and occupation of the donor and a description of the gift. The committee shall maintain disclosures relating to gifts under (c)(6) of this section as confidential records and may only use, or permit a committee employee or contractor to use, a disclosure under (c)(6) of this section in the investigation of a possible violation of this section or in a proceeding under AS 24.60.170. If the disclosure under (c)(6) of this section becomes part of the record of a proceeding under AS 24.60.170, the confidentiality provisions of that section apply to the disclosure.

*** Sec. 10.** AS 24.60.105 is amended by adding a new subsection to read:

(d) A person may submit a written request to refrain from making a disclosure that is required by this chapter if making the disclosure would violate the United States Constitution, the Constitution of the State of Alaska, or other state or federal law. The committee shall approve or deny the request, or require further justification from the person making the request. At the request of the committee or a person authorized to act on behalf of the committee, a person who seeks to refrain from making a disclosure under this subsection shall provide the committee with justification in writing, and the committee may review the written justification to determine whether it is sufficient.

*** Sec. 11.** AS 24.60.112 is amended to read:

Sec. 24.60.112. Applicability to volunteers and educational trainees. A legislative volunteer or educational trainee shall be considered to be a legislative employee for purposes of compliance with AS 24.60.030 - 24.60.039, 24.60.060, 24.60.080, 24.60.085, **24.60.155,** 24.60.158 - 24.60.170, 24.60.176, and 24.60.178. If

a person believes that a legislative volunteer or educational trainee has violated the provisions of one of those sections, the person may file a complaint under AS 24.60.170. The provisions of AS 24.60.170 apply to the proceeding.

* **Sec. 12.** AS 24.60.130(h) is amended to read:

(h) A member is disqualified from participating as a member in any proceeding before the committee involving a complaint against the member or an employee whose work is supervised by the member or an advisory opinion requested by the member. If a regular legislative member of the committee is disqualified under this subsection from participating in a proceeding involving a complaint, the member's alternate shall be designated under **AS 24.60.131** [(n) OF THIS SECTION].

* **Sec. 13.** AS 24.60.130(o) is amended to read:

(o) Notwithstanding (h) [AND (n)] of this section **and AS 24.60.131**, if a complaint before the committee alleges a violation of this chapter by a group of legislators that includes a legislative member of the committee and that member's alternate, the member and alternate member are disqualified from serving on the committee with regard to the complaint. If the two disqualified members of the committee are members of the majority organizational caucus, the presiding officer of the house in which the two disqualified members serve shall appoint from that house an alternate to serve with regard to the complaint. If one of the two disqualified legislative members of the committee is not a member of the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate to serve with regard to the complaint. If a complaint alleges a violation of this chapter that includes all legislative members of the majority organizational caucus of one house, the presiding officer of that house shall appoint from the other house an alternate to serve with regard to the complaint. If the complaint alleges a violation of this chapter that includes all legislative members of a minority organizational caucus of one house, the leader of that minority organizational caucus shall appoint from the other house an alternate to serve with regard to the complaint.

* **Sec. 14.** AS 24.60 is amended by adding a new section to read:

Sec. 24.60.131. Alternate members. (a) When appointing members of the

legislature to serve on the committee under AS 24.60.130(b), the speaker of the house of representatives or the president of the senate, as appropriate, shall appoint an alternate member for each regular member. The alternate member shall have the same qualifications for appointment to the committee as the regular member for whom the alternate stands as alternate. The alternate member's appointment is subject to confirmation as required for appointment of the regular member.

(b) When selecting public members to serve on the committee under AS 24.60.130(b), the Chief Justice of the Alaska Supreme Court shall select one alternate public member. The alternate public member's selection is subject to ratification as required for selection of the regular public members.

(c) Subject to (d) of this section, if a regular member of the committee or a subcommittee is unable to participate in a proceeding other than a proceeding under AS 24.60.170, the chair of the committee or subcommittee that holds the proceeding shall designate the regular member's alternate to participate in place of the regular member at the proceeding, and the alternate shall participate for the duration of that proceeding unless the alternate is unable to participate.

(d) If a regular member of the committee or a subcommittee or an alternate member appointed under (a) or (b) of this section participates at the commencement of a proceeding under AS 24.60.170, the member shall participate for the duration of the proceeding unless the member is disqualified under AS 24.60.130(h) or is unable to continue participating. If the participating member is disqualified under AS 24.60.130(h) or becomes unable to participate, the chair of the committee or subcommittee that holds the proceeding shall designate the member's alternate to participate in place of the member for the duration of the proceeding unless the alternate is disqualified or is unable to participate.

(e) If both a regular legislative member and that member's alternate appointed under (a) of this section are not available to participate at the commencement of a proceeding under AS 24.60.170 because they are disqualified under AS 24.60.130(h), the presiding officer of the house in which the two members serve shall appoint from that house an alternate and designate that alternate to participate in the proceeding; however, if the two members who are not available to participate are not members of

the majority organizational caucus, the leader of the minority organizational caucus with the greatest number of members shall appoint from that house an alternate and designate that alternate to participate in the proceeding.

(f) A designation under (c) - (e) of this section is a confidential proceeding under AS 24.60.170(*l*) unless the member who is replaced as a result of the designation waives confidentiality.

*** Sec. 15.** AS 24.60.155 is amended to read:

Sec. 24.60.155. Legislative ethics course. A person who is a legislator, legislative employee, **legislative volunteer, educational trainee,** or public member of the committee shall complete a legislative ethics course administered by the committee under AS 24.60.150(a)(4) within 10 days of the first day of the first regular session of each legislature. However, a person who first takes office, [OR] begins employment**, or begins service as a volunteer or trainee** after the 10th day of the first regular session of a legislature shall complete the course required by this section within 30 days after the person's first day of service and, thereafter, as required by this section. The committee may grant a person additional time to complete the course required by this section.

*** Sec. 16.** AS 24.60.990(a)(11) is amended to read:

(11) "legislative employee" means a person, other than a legislator, who is compensated by the legislative branch in return for regular or substantial personal services, regardless of the person's pay level or technical status as a full-time or part-time employee, independent contractor, or consultant; it includes public members and staff of the committee; it does not include individuals who **are hourly employees who** perform functions that are incidental to legislative functions, [INCLUDING SECURITY, MESSENGER, MAINTENANCE, AND PRINT SHOP EMPLOYEES,] and other employees designated by the committee;

*** Sec. 17.** AS 24.60.990(a) is amended by adding a new paragraph to read:

(17) "state travel" means travel with transportation or overnight lodging that is provided or paid for with state resources.

*** Sec. 18.** AS 24.60.130(n) is repealed.

SB 93

Specialty License Plates

Specialty license plates are sweeping the country. By January 21, 2011 Alaska legislators had introduced bills for Choose Life, LaoVeteran, National Rifle Association, and In God We Trust specialty license plates. The 26th Legislature approved firefighter, fraternal order[1] and Iditarod finisher license plates and made a change in the Children's Trust specialty plate funds in a total of 15 committee meetings, entailing 9 versions of bills, and requiring one concurrent resolution.

Each license plate request takes legislative attention away from more pressing state matters and creates monetary and staff costs of drafting, duplicating, distributing, posting, scheduling, and amending. Legislatively created fundraising plates require the Division of Motor Vehicles (DMV) to track and request for re-appropriation small accounts of money. Other plates require the DMV to verify a status (such as HB 92 "the owner must present evidence satisfactory to the department that the owner served in combat as required by this subsection") to complete a transaction. Two legislatively created plates from 1998 (dog mushing and arts) have never been issued.

There is a better way. About half of the states currently allow administrative approval for license plates. The Alaska Division of Motor Vehicles supports this bill, including the effective date.

SB 93

- Gives the Division of Motor Vehicles authority to develop a procedure for administrative review and award of specialty license plates.
- Requires DMV to develop a standard template so all specialty plates will be easily readable and recognizable for law enforcement.
- Creates standard regulations, fees and procedures that will apply to all specialty license plates.
- Will result in cost savings for the state as administrative responsibilities of confirming eligibility, collecting and accounting for funds for the non-profit, and developing the license plate artwork and design are transferred to the sponsoring organization. DMV processing of plate applications is streamlined as the applications will be submitted in batches by sponsoring organizations.
- Is revenue neutral. The $30/vehicle specialty registration fee covers the cost of producing and issuing the specialty plates.

---

[1] No fraternal orders have yet applied for the plates authorized in 2010.

SECTIONAL ANALYSIS
Senate Bill 93

SECTION 1. AS 28.10.181 (bb)

Allows the Department of Administration to develop and implement regulations to issue special request specialty license plates sponsored by Alaska organizations with IRS 501(c) tax exempt status, departments of the state and municipalities.

Directs the Department of Administration to design a standard plate design for all specialty plates.

Specifies the *regulations* must provide that the **entity requesting the license plates**:

- submit an application on a form provided by the department;
- pay a fee that is set by regulation;
- submit registration fees for at least 50 motor vehicles before the plates will be issued;
- may not be offensive in purpose, nature, activity, or name;
- may charge a fee in addition to any registration fees set by statute or regulation.

And that the *regulations*

- specify a minimum number of registrations and renewals of specialty plates;
- provide for cancellation of plates that do not meet the minimum; and
- allow a sponsoring entity at least six months notice before any proposed cancellation.

- establish procedures for vehicle owners to buy special request specialty license plates.

SECTION 2. AS 28.10.421 (d)

Sets the fee for the special request specialty license plates at $30 upon first issuance or replacement of plates and allows a sponsoring entity to charge a fee upon first issuance and renewal of the plates.

SECTION 3. AS 28.10.181 (bb)

Establishes the effective date of January 1, 2012.

SB 94: Second Verse of the Alaska State Song

Legislative Intent

Adopted by the Senate State Affairs Committee on March 22, 2011

It is the intent of the Alaska State Legislature that no additional funds be spent to re-print state publications simply to include the second verse of the Alaska State Song. Instead, re-printing of publications should occur on the schedule it would otherwise have occurred had the second verse not been adopted.

Senate Bill 94 Sponsor Statement

Senate Bill 94 would add a second verse to The Alaska's Flag Song. The late Carol Beery Davis wrote a beautiful second verse, which gives recognition to Alaska Natives and to Benny Benson, who designed the Alaskan flag.

Similar bills have been introduced in the past. Last year The Alaska's Flag Song was performed with both verses as the Senate gaveled in on the first day of session. Also last year, the Senator from District G introduced SB 43. It passed the Senate, but stalled in the House.

This year is the year to join me in supporting a long overdue addition of the second verse to the Alaska Flag Song. By passing this bill you will be recognizing history, our progress as a state and our first people.

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 94

Analysis

The fiscal impact of this legislation is indeterminate.

"Alaska's Flag"

Written by Marie Drake
Composed by Elinor Dusenbury

Adopted on February 23 1955.

Sheet Music | MIDI Tune | Realaudio Song

1st Verse of Alaska's Flag Song

Eight stars of gold on a field of blue,
Alaska's flag, may it mean to you,
The blue of the sea, the evening sky,
The mountain lakes and the flowers nearby,
The gold of the early sourdough's dreams,
The precious gold of the hills and streams,
The brilliant stars in the northern sky,
The "Bear," the "Dipper," and shining high,
The great North Star with its steady light,
O'er land and sea a beacon bright,
Alaska's flag to Alaskans dear,
The simple flag of a last frontier.

2nd Verse of Alaska's Flag Song
-- Words by Carol Beery Davis

A Native lad chose the Dipper's stars
For Alaska's flag that there be no bars
Among our culture. Let it be known
Through years the Native's past has grown
To share life's treasures, hand in hand,
To keep Alaska our Great-Land;
We love the northern midnight sky,
The mountains, lakes and streams nearby.
The great North Star with its steady light
Will guide all cultures, clear and bright,
With nature's flag to Alaskans dear,
The simple flag of the last frontier.

- *Source* : *Alaska Blue Book 1993-94*, 11th ed., Juneau, Department of Education, Division of State Libraries, Archives & Museums.
- Copyright for *Alaska's Flag* is held by the University of Alaska. For further

Origin of Song:

The words to the song Alaska's Flag were written by Marie Drake, The Territorial Legislature adopted Alaska's Flag as Alaska's official song in 1955.

"Alaska's Flag" written by Marie Drake a long-time employee of the Alaska Department of Education, and set to music composed by Elinor Dusenbury, who husband was commander of Chilkoot Barracks at Haines from 1933 to 1936 was adopted as the official state song in 1955, and was gifted to the University of Alaska in April 1960. Carol Beery Davis wrote the second verse to "Alaska's Flag" and gifted the words (protected by copyright) to the University of Alaska Foundation in February 1987.

Carol Beery Davis, an Alaskan pioneer and poet laureate, as the maker of the second verse. While the official Alaska state song recognizes and describes Alaska's flag, the words of Davis in the second verse of "Alaska's Flag", "A Native lad chose the Dipper's stars, For Alaska's flag that there be no bars", provides recognition of Bennie Benson who designed Alaska's official flag in 1927. Benny Benson described his design of the flag:

"The blue field is for the Alaska Sky and the forget-me-not, an Alaskan flower. The North Star is for the future of Alaska, the most northerly in the union. The Dipper is for the Great Bear - symbolizing strength."

Marie Drake:

Marie Drake, author of the words to *Alaska's Flag*, the state song, was born Feburary 11, 1888. In 1907 she married James Drake in Van Wert, Ohio, where she was engaged in social work with the Y.W.C.A. and the Red Cross. They came to Alaska when her husband was assigned to work with the Bureau of Public Roads. In 1917, Lester Henderson was appointed first commissioner of education, and he hired Marie Drake as his secretary. She remained with the Department for 28 years,

information contact the University Archivist at the Rasmuson Library, University of Alaska Fairbanks, Fairbanks, Alaska 99775-6808. • Verse 2 by Carol Beery Davis. 1986.	retiring July 1, 1945. Marie Drake assumed the post of assistant commissioner of education in 1934. She edited and wrote most of the material for the department's *School Bulletin*, that was circulated throughout the territorial school system. The poem that later provided the words for the official state song first appeared on the cover of the October 1935 *School Bulletin*. In recognition of her devotion to the young people of Alaska, Marie Drake received an honorary Doctor of Letters degree from the University of Alaska in 1958. She died March 5, 1963. • *Source : Alaska Blue Book 1993-94, 11th ed., Juneau, Department of Education, Division of State Libraries, Archives & Museums*

The Honorable Fran Ulmer
1700 Angus Way
Juneau, Alaska 99801

Dear Representative Ulmer:

Attached is a copy of Resolution 87-01 passed at the Denakkanaaga', Inc. Elders Conference, held June 2-4, 1987 in Northway, Alaska. There were about 300 elders and youth that attended this conference.

We believe this resolution speaks clearly how the Elders feel about the Second stanza of the "Alaska Flag Song".

We are asking for your support on behalf of the Athabascan Elders.

Sincerely,

Don Lee

SB 94
BACKGROUND
MATERIAL

Why a second verse for 'Alaska Flag Song'?

Editor's Note: A copy of the following letter to Betty Kjara, secretary of Pioneers of Alaska Auxiliary No. 8 in Fairbanks, was submitted for publication.

Dear Betty:

I have received your letter dated March 27, in which you objected to the adoption of the second verse of the "Alaska Flag Song."

I would like to explain to you why I introduced HB 117 and why I hope you will change your decision to oppose the bill.

No one loves the flag song any more than I do. For many years, I have sung it for groups, meetings, conventions, commencements and even for Gov. Bill Egan's memorial service here in Juneau. I offer the second verse out of deep respect for the first verse and for its recognition of Alaska's history. I believe the second verse complements the first verse and gives recognition not to one ethnic group, but to all Alaskans and their ability to work together in a unified and harmonious way.

The addition of a second verse has been discussed for many years by various groups. At one time, funds were inserted into the House's version of the budget to hold a contest for selecting a second verse. Carol Beery Davis was asked to write another verse to the flag song to recognize the contribution of Native Alaskans, who were here long before you or I, or even the Pioneers. She did so, and offered it as a gift to the State of Alaska. I was asked to support its adoption and to introduce a bill to make it officially recognized by the state. I did so, and it has passed the House.

In order to understand the special significance of this verse, you must know about Carol Beery Davis, a former poet laureate of Alaska. She is a 60-year resident of Juneau. Her husband, Trevor, was born here 94 years ago, and is the only living member of the original selection committee for the design of Alaska's flag, which selected Benny Benson's North Star and Big Dipper (to whom the second verse refers in lines 1 and 2). Carol has written dozens of books about Alaska, including "The Alaska Flag Song" book which is credited with helping to make the song so well-known. I have enclosed a copy of this book. She now personally [illegible] Duesenbury and Marie Drake, the two women who decided to write the song and offer it to the state, just as Carol has done.

owner, is still contributing to her loved state by offering this beautiful verse, a tribute to unity of all Alaskans:

"A Native lad chose the Dipper's stars
For Alaska's flag that there be no bars
Among our cultures..."

She is recognizing history and our progress as a state:

"Be it known
through years, the Natives' past has grown.
To share life's treasures, hand in hand,
To keep Alaska our Great Land."

She is focusing our attention on the natural beauty of our land and reminds us of the treasures of its beauty:

"We love the northern, midnight sky,
The mountains, lakes, and streams nearby.
The great North Star with its steady light
Will guide all cultures, clear and bright,
With nature's flag to Alaskans dear,
The simple flag of a last frontier."

It is hard for me to understand why anyone who has read these words could object to them. It is impossible for me to understand how anyone who knows who Carol Beery Davis is and the contributions she has made to art, music and literature in Alaska could object to her offering this beautiful gift.

Why did this legislator propose HB 117? Out of respect for a beautiful Alaskan lady who has offered a beautiful verse to a beautiful song about a great state.

Sincerely,
Rep. Fran Ulmer

SENATE CS FOR HOUSE BILL NO. 98(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES JOHNSON, Hawker, Keller, Costello, Chenault, Olson, Millett, Fairclough, Kerttula, Feige, Thomas, Peggy Wilson, Kawasaki, Johansen

SENATORS McGuire, Giessel, Meyer, Menard, Ellis, Wagoner, Egan, Dyson, Stevens

A BILL

FOR AN ACT ENTITLED

"An Act relating to display, folding, presentment, and retirement of the state flag."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 44.09.030 is amended by adding new subsections to read:

(d) When displayed horizontally in a public facility, the flag shall be positioned with the hoist on the left and the North Star in the upper right corner.

(e) When displayed vertically in a public facility, the flag shall be positioned with the hoist at the top and the North Star in the lower right corner.

* **Sec. 2.** AS 44.09 is amended by adding new sections to read:

Sec. 44.09.032. Folding and presenting the state flag. (a) When folding the state flag, the following procedure shall be followed, whenever possible:

(1) hold the flag waist-high with another person, so that the flag is parallel to the ground and the hoist is on the left;

(2) fold the flag lengthwise, with the open edge up;

(3) holding the edges securely, rotate the flag so that five stars are facing up;

(4) fold the flag lengthwise a second time, with the open edge up;

(5) holding the edges securely, rotate the flag so that two stars are facing up;

(6) fold the flag widthwise, with the North Star facing down and the hoist on the right;

(7) holding the edges securely, fold the flag widthwise a second time, with the North Star facing down and the hoist on the right;

(8) fold the flag widthwise a third time, with the North Star facing up.

(b) When presenting the folded flag to another person, the folded flag should be turned so that the North Star is nearest the receiver.

Sec. 44.09.034. Retirement of the state flag. An official flag of the state that is no longer a fitting emblem for display because it is worn, tattered, or otherwise damaged may be respectfully retired by fire in a ceremony or other dignified manner honoring the flag as a fitting emblem for the state. When practicable, retirement of the state flag should occur in a public ceremony under the direction of uniformed personnel representing a state or federal military service or a patriotic society. If a formal ceremony is not practicable, a private ceremony is acceptable.

* **Sec. 3.** AS 44.09.030(c) is repealed.

SENATOR BILL WIELECHOWSKI

Senate Bill 98

"An Act Relating to the use of biometric information"

Sponsor Statement

In 2004, the Alaska Legislature unanimously passed legislation outlawing the collection, analysis, or storage of a law-abiding citizen's genetic information without their express written consent. This legislation was drafted in response to rapidly evolving technology that holds great promise for fields such as medicine and law enforcement. However, this technology also holds the potential for misuse by those who would use a person's genetic data to obtain information about them that Alaskans would normally have a right to keep private.

Senate Bill 98 would update Alaska statutes to protect not only Alaskans' DNA, but all similar forms of biometric information. The term "biometric information" refers to any information about an individual based on their unique behavioral or physiological characteristics. The most commonly known forms of biometric information are a person's fingerprints and their DNA, but also includes such information as iris and retinal patterns, hand geometry, voice patterns, and facial characteristics.

Many potential uses of biometric information are still at the rudimentary stages of development. However, new technologies will soon be available that will be able to make use of this information with chilling consequences for individual privacy and civil liberties.

Examples of the potential misuse of biometric information include the collection of an individual's data by potential employers or insurers to weed out applicants that may have a genetic predisposition towards certain illnesses and the use of video surveillance enhanced by facial recognition technology to track citizens' movements without their knowledge.

Alaskans should bear in mind that one of the proposed requirements of the Federal REAL ID Act was that every Alaskan ID card contain a radio frequency identification (RFID) chip, which would allow a citizen's movements to be tracked without their knowledge.

Thankfully, the State of Alaska joined other states in refusing to submit to the REAL ID Act. The legislature should take a similar strong stand to protect Alaskans' biometric information and their constitutional right to privacy.

CS FOR SENATE BILL NO. 98(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS WIELECHOWSKI, Coghill, Ellis, Menard, McGuire, Giessel, Egan, Paskvan, Thomas

A BILL

FOR AN ACT ENTITLED

"An Act relating to biometric information."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18 is amended by adding a new chapter to read:

Chapter 14. Biometric Information.

Sec. 18.14.010. Biometric information consent. (a) A person may not retain or analyze, or disclose or distribute to another person, biometric information on an individual without first obtaining the informed and written consent of the individual.

(b) An individual may, at any time, revoke or amend the individual's consent provided under (a) of this section.

Sec. 18.14.020. Alternate identification. A person may not require an individual to provide biometric data to the person for the purpose of identifying the individual if the individual provides the person with a valid current

(1) United States passport; or

(2) identification card issued by a state in the United States or by a branch of the armed forces of the United States.

Sec. 18.14.030. Uniform consent form. The Department of Health and Social Services may by regulation adopt a uniform consent form to assist persons to meet the requirements for the consent required by AS 18.14.010. A person who retains or analyzes, or discloses or distributes to another person, biometric information, based on consent that is provided in a uniform consent form that has not been revoked, is exempt from civil liability under AS 18.14.060 and from criminal liability for the retention, analysis, disclosure, or distribution of the biometric information.

Sec. 18.14.040. General authorization. A general authorization for the release of medical records or medical information may not be construed to constitute the informed and written consent required by AS 18.14.010.

Sec. 18.14.050. Private right of action. An individual may bring a civil action against another person who violates AS 18.14.010 or 18.14.020. Except as provided by AS 18.14.030, a person who violates AS 18.14.010 is liable to the individual for actual damages and a penalty of $5,000, except that, if the violation resulted in profit or monetary gain to the person, the penalty is $100,000.

Sec. 18.14.060. Exemptions. This chapter does not apply to the collection, retention, analysis, disclosure, or distribution of

(1) biometric information for a law enforcement purpose, including the identification of perpetrators, the investigation of crimes, the identification of missing or unidentified persons, or the identification of human remains;

(2) biometric information when authorized by state or federal law;

(3) facial images by the Department of Administration for drivers' licenses issued under AS 28.15, for state identification cards issued under AS 18.65.310, for administering AS 28.15, or for administering AS 18.65.310; or

(4) facial images that are not used in a biometric system.

Sec. 18.14.090. Definitions. In this chapter,

(1) "biometric data" means fingerprints, handprints, voices, facial images, iris images, retinal images, vein scans, hand geometry, or finger geometry;

(2) "biometric information" means biometric data that is used in a biometric system for fingerprint recognition, hand geometry recognition, finger geometry recognition, voice recognition, facial recognition, iris scans, retinal scans, or

vein recognition;

(3) "biometric system" means an automated system capable of

(A) capturing biometric data from an individual's biometric information;

(B) extracting and processing the biometric data captured under (A) of this paragraph;

(C) storing the biometric data extracted under (B) of this paragraph;

(D) comparing the biometric data extracted under (B) of this paragraph with biometric data stored for the individual for use in future recognition of the individual; and

(E) determining how well the extracted and stored biometric data match when compared under (D) of this paragraph, and indicating whether an identification or verification of identity has been achieved;

(4) "facial recognition" means the use of an image of the visible physical structure of an individual's face for recognition purposes;

(5) "finger geometry recognition" means the use of the shape and dimensions of one or more fingers for recognition purposes;

(6) "fingerprint recognition" means the use of the physical structure of an individual's fingerprint for recognition purposes;

(7) "governmental entity" means a state agency, a municipality, and an agency of a municipality; in this paragraph, "state agency" means an agency of the executive, judicial, or legislative branch of state government;

(8) "hand geometry recognition" means the use of the physical structure of an individual's hand for recognition purposes;

(9) "iris scan" means the use of an image of the physical structure of an individual's iris for recognition purposes;

(10) "person" has the meaning given in AS 01.10.060, and includes a governmental entity;

(11) "retinal scan" means the use of the pattern of blood vessels in an individual's eye for recognition purposes;

(12) "vein recognition" means the use of the veins in an individual's palm print for recognition purposes.

MEMORANDUM March 14, 2011

SUBJECT: Sectional summary of SB 98 relating to biometric information (Work Order No. 27-LS0661\A)

TO: Senator Bill Wielechowski
Attn: Michelle Sydeman

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents

Section 1. Adds a new chapter, AS 18.14, relating to biometric information.

Sec. 18.14.010 prohibits retaining, analyzing, disclosing, or distributing an individual's biometric information without obtaining the individual's consent. Allows the individual to revoke or amend the consent.

Sec. 18.14.020 prohibits a person from requiring an individual to provide biometric data for identification if the individual provides certain other identification.

Sec. 18.14.030 authorizes the Department of Health and Social Services to adopt a uniform consent form for sec. 18.14.010. If a person uses an unrevoked uniform consent form for an individual's consent, exempts the person from civil liability under sec. 18.14.060 and criminal liability for retention, analysis, disclosure, or distribution of the individual's biometric information.

Sec. 18.14.040 states that a general authorization for the release of medical information does not constitute the consent required by sec. 18.14.010.

Sec. 18.14.050 provides an individual with a private right of action for violations of secs. 18.14.010 or 18.14.020. Establishes that the violator of sec. 18.14.010 is liable to the individual for actual damages and a penalty.

Sec. 18.14.060 lists the exemptions from the chapter.

Sec. 18.14.090 defines terms for the chapter.

If I may be of further assistance, please advise.

Explanation of Changes From Original to CS, Version "M"

- **Page 1, Line 13**: The "and" has been changed to an "or," allowing a person to only present one form of identification.
- **Page 2, Line 18 and 21:** The term "biometric information" has been added to clarify.
- **Page 2, Lines 22-25:** Exemptions were clarified for the issuance of drivers' licenses, ID cards, and pictures not entered into a biometric system.
- **Page 2, Line 28:** Vein scans, hand geometry, and finger geometry were added as definitions of biometric data.
- **Page 2, Line 30:** Finger geometry recognition was included as a definition of biometric information. Its corresponding definition was added on **Page 3, Lines 17 and 18**.
- **Page 3, Line 1:** The word "palm" was removed from "palm vein recognition" in the definition of biometric information.

SENATOR BILL WIELECHOWSKI

Biometrics Fact Sheet

- There is a growing trend for companies and organizations to use biometric data as a means of identifying individuals. By giving personal biometric information, like fingerprints, iris scans, or facial images, a person gives away highly personal, traceable information.

- Passports, identification cards, and social security cards can be used to travel abroad, identify oneself in court, and a plethora of other activities. These should be suitable checks of identification.

- Organizations that collect biometric data routinely sell that data to third parties, without our consent.

- There is no doubt biometric data can be extremely helpful in fields such as medicine and security, but we should never be forced to give up such personal identification. This bill does not ban biometrics, but bans their use without our consent.

ELECTRONIC FRONTIER FOUNDATION

Biometrics: Who's Watching You?

September 2003

Introduction

Among the many reactions to the September 11 tragedy has been a renewed attention to biometrics. The federal government has led the way with its new concern about border control. Other proposals include the use of biometrics with ID cards and in airports, e.g. video surveillance enhanced by facial-recognition technology.

The purpose of this document is to sketch out EFF's concerns about biometrics. In today's public arena, biometric technologies are being marketed as a "silver bullet" for terrorism; however, very little independent, objective scientific testing of biometrics has been done. Deploying biometric systems without sufficient attention to their dangers makes them likely to be used in a way dangerous to civil liberties. This document is very much a work in progress and we welcome comments.

What Are Biometrics?

Biometrics refers to the automatic identification or identity verification of living persons using their enduring physical or behavioral characteristics. Many body parts, personal characteristics and imaging methods have been suggested and used for biometric systems: fingers, hands, feet, faces, eyes, ears, teeth, veins, voices, signatures, typing styles, gaits and odors.

Our Major Concerns

- **Biometric technology is inherently individuating and interfaces easily to database technology, making privacy violations easier and more damaging.** If we are to deploy such systems, privacy must be designed into them from the beginning, as it is hard to retrofit complex systems for privacy.
- **Biometric systems are useless without a well-considered threat model.** Before deploying any such system on the national stage, we must have a realistic threat model, specifying the categories of people such systems are supposed to target, and the threat they pose in light of their abilities, resources, motivations and goals. Any such system will also need to map out clearly in advance how the system is to work, in both in its successes and in its failures.
- **Biometrics are no substitute for quality data about potential risks**. No matter how accurately a person is identified, identification alone reveals nothing about whether a person is a terrorist. Such information is completely external to any biometric ID system.
- **Biometric identification is only as good as the initial ID.** The quality of the initial "enrollment" or "registration" is crucial. Biometric systems are only as good as the initial identification, which in any foreseeable system will be based on exactly the document-based methods of identification upon which biometrics are supposed to be an improvement. A terrorist with a fake passport would be issued a US visa with his own biometric attached to the name on the phony passport. Unless the terrorist A) has already entered his biometrics into the database, and B) has garnered enough suspicion at the border to merit a full database search, biometrics won't stop him at the border.
- **Biometric identification is often overkill for the task at hand.** It is not necessary to identify a person (and to create a record of their presence at a certain place and time) if all you really want to know is whether they're entitled to do something or be somewhere. When in a bar, customers use IDs to prove they're old enough to drink, not to prove who they are, or to create a record of their presence.
- **Some biometric technologies are discriminatory.**A nontrivial percentage of the population cannot present suitable features to participate in certain biometric systems. Many people have fingers that simply do not "print well." Even if people with "bad prints" represent 1% of the population, this would mean massive inconvenience and suspicion for that minority. And scale matters. The INS, for example, handles about 1 billion distinct entries and exits every year. Even a seemingly low error rate of 0.1% means 1 million errors, each of which translates to INS resources lost following a false lead.
- **Biometric systems' accuracy is impossible to assess before deployment** Accuracy and error rates published by biometric technology vendors are not trustworthy, as biometric error rates are intrinsically manipulable. Biometric systems fail in two ways: false match (incorrectly matching a subject with someone else's reference sample) and false non-match (failing to match a subject with her own reference sample). There's a trade-off between these two types of error, and biometric systems may be "tuned" to favor one error type over another. When subjected to real-world testing in the proposed operating environment, biometric systems frequently fall short of the performance promised by vendors.
- **The cost of failure is high.** If you lose a credit card, you can cancel it and get a new one. If you lose a biometric, you've lost it for life. Any biometric system must be built to the highest levels of data security, including transmission that prevents interception, storage that prevents theft, and system-wide architecture to prevent both intrusion and compromise by corrupt or deceitful agents within the organization.

Despite these concerns, political pressure for increasing use of biometrics appears to be informed and driven more by marketing from the biometrics industry than by scientists. Much federal attention is devoted to deploying biometrics for border security. This is an easy sell,

because immigrants and foreigners are, politically speaking, easy targets. But once a system is created, new uses are usually found for it, and those uses will not likely stop at the border.

With biometric ID systems, as with national ID systems, we must be wary of getting the worst of both worlds: a system that enables greater social surveillance of the population in general, but does not provide increased protection against terrorists.

Some Current Biometric Initiatives

Sec. 403(c) of the **USA-PATRIOT Act** specifically requires the federal government to "develop and certify a technology standard that can be used to verify the identity of persons" applying for or seeking entry into the United States on a U.S. visa "for the purposes of conducting background checks, confirming identity, and ensuring that a person has not received a visa under a different name."

The recently enacted **Enhanced Border Security and Visa Entry Reform Act of 2002**, Sec. 303(b)(1), requires that only "machine-readable, tamper-resistant visas and other travel and entry documents that use biometric identifiers" shall be issued to aliens by October 26, 2004. The Immigration and Naturalization Service (INS) and the State Department currently are evaluating biometrics for use in U.S. border control pursuant to EBSVERA.

Even prior to September 11, however, large-scale civilian biometric identification systems were being pushed. Both the **Personal Responsibility and Work Opportunity Act of 1995** (PRWOA), a welfare reform law, and the **Immigration Control and Financial Responsibility Act of 1996** (ICFRA), an immigration reform law, called for the use of "technology" for identification purposes.

The PRWOA requires the states to implement an electronic benefits transfer program "using the most recent technology available . . . which may include personal identification numbers, photographic identification . . . and other measures to protect against fraud and abuse." This law covers, for example, the Food Stamps program.

The ICFRA requires the President to "develop and recommend . . . a plan for the establishment of a data system or alternative system . . . to verify eligibility for employment in the United States, and immigration status in the United States for purposes of eligibility for benefits under public assistance programs . . . or government benefits." This system "must be capable of reliably determining with respect to an individual whether . . . the individual is claiming the identity of another person."

The **Illegal Immigration Reform and Immigrant Responsibility Act of 1996** (IIRAIRA) requires the INS to include on alien border crossing cards "a biometric identifier (such as the fingerprint or handprint of the alien) that is machine readable." The State Department collects fingerprints and photographs of aliens for these cards.

The **Truck and Bus Safety and Regulatory Reform Act of 1988** (TBSRRA) requires "minimum uniform standards for the biometric identification of commercial drivers."

EFF's concerns about biometrics

Why be concerned about biometrics? Proponents argue that: A) biometrics themselves aren't dangerous because all the real dangers are associated with the database behind the biometric information, which is little different from problems of person-identifying information (PII) databases generally; B) biometrics actually promote privacy, e.g., by enabling more reliable identification and thus frustrating identity fraud.

But biometric systems have many components. Only by analyzing a system as a whole can one understand its costs and benefits. Moreover, we must understand the unspoken commitments any such system imposes.

Surveillance

The chronic, longitudinal capture of biometric data is useful for surveillance purposes. Our Surveillance Monitor page highlights some of these issues. Biometric systems entail repeat surveillance, requiring an initial capture and then later captures.

Another major issue relates to the "voluntariness" of capture. Some biometrics, like faces, voices, and fingerprints, are easily "grabbed." Other biometrics, at least under present technology, must be consciously "given." It is difficult, for instance, to capture a scan of a person's retina or to gather a hand geometry image without the subject's cooperation. Easily grabbed biometrics are a problem because people can't control when they're being put into the system or when they're being tracked. But even hard-to-grab biometrics involve a trust issue in the biometric capture device and the overall system architecture.

Databases

To be effective, a biometric system must compare captured biometric data to a biometric database. Our National ID System page highlights issues surrounding database abuse, which has both static and dynamic dimensions.

The static issues surrounding databases are mainly about safeguarding large and valuable collections of personally identifying information. If these databases are part of an important security system, then they (and the channels used to share PII) are natural targets for attack, theft, compromise, and malicious or fraudulent use.

The dynamic issues surrounding databases mainly concern the need to maintain reliable, up-to-date information. Databases that seek to maintain accurate residence information must be updated whenever one moves. Databases that are used to establish eligibility for benefits must be updated so as to exclude persons no longer eligible. The broader the function of the system, the more and broader the updating that is required, increasing the role of general social surveillance in the system.

It may seem that one of the issues that plagues token-based ID systems (like ID cards) -- the security or integrity of the token itself -- does not apply for biometric systems, because "you are your ID." But the question of the reliability of the token is really a question about trust. In an ID card system, the question is whether the system can trust the card. In biometric systems, the question is whether the individual can trust the system. If someone else captures your signature, fingerprint, or voice, for instance, what prevents it from being used by others? Any use of biometrics with a scanner run by someone else involves trusting someone's claim about what the scanner does and how the captured information will be used.

Vendors and scanner operators may say that they protect privacy in some way, perhaps by hashing the biometric data or designing the database to enforce a privacy policy. But the end user typically has no way to verify whether such technical protections are effective or implemented properly. End-users should be able to verify any such claims, and to leave the system completely if they are not satisfied. Exiting the system, of course, should at least include the expungement of the end-user's biometric data and records.

Linking

An oft-noted risk of biometric systems is the use of biometrics as a linking identifier. This risk, of course, depends to some extent on standardization. Consider, for instance, the use of the Social Security number as a linker across disparate databases. While the private sector would not have been able to develop anything like the SSN on its own, once the government created this identifier, it became a standard way of identifying individuals. Standardization therefore creates new privacy risks because information gathered for one purpose can be used for completely unrelated, unconsented-to purposes.

Currently, Automated Fingerprint ID Systems (AFIS) are heavily used by the government in connection with law enforcement, but there is at present little standardization within the AFIS industry. If law enforcement and private industry were to unify their fingerprint databases under one common standard, such as under a national ID system, this would potentially put one's entire life history in interoperating databases that are only a fingerprint away.

Tracking

By far the most significant negative aspect of biometric ID systems is their potential to locate and track people physically. While many surveillance systems seek to locate and track, biometric systems present the greatest danger precisely because they promise extremely high accuracy. Whether a specific biometric system actually poses a risk of such tracking depends on how it is designed.

Why should we care about perfect tracking? EFF believes that perfect tracking is inimical to a free society. A society in which everyone's actions are tracked is not, in principle, free. It may be a livable society, but would not be our society.

EFF believes that perfect surveillance, even without any deliberate abuse, would have an extraordinary chilling effect on artistic and scientific inventiveness and on political expression. This concern underlies constitutional protection for anonymity, both as an aspect of First Amendment freedoms of speech and association, and as an aspect of Fourth Amendment privacy.

Implemented improperly, biometric systems could:

- increase the visibility of individual behavior. This makes it easier for measures to be taken against individuals by agents of the government, by corporations, and by our peers.
- result in politically damaging and personally embarrassing disclosures, blackmail and extortion. This hurts democracy, because it reduces the willingness of competent people to participate in public life.
- increase the 'circumstantial evidence' available for criminal prosecution. This might dramatically affect the existing balance of plausible -sounding evidence available to prosecutors, and hence increase the incidence of wrongful conviction. Many criminal cases are decided by plea bargaining, a process that is sensitive to the perceived quality of evidence. Even ambiguous or spurious evidence generated by complex technical systems may be difficult for overburdened public defenders to challenge.
- enable the matching of people's behavior against pre-determined patterns. This could be used by the government to generate suspicion, or by the private sector to classify individuals into micro-markets, the better to manipulate consumer behavior.
- aid in repressing readily locatable and trackable individuals. While the public's concern is usually focused on the exercise of state power, these technologies may also greatly empower corporations. If proper privacy safeguards are not constructed into such systems, they would prove useful in dealing with such troublesome opponents as competitors, regulators, union organizers, whistleblowers, and lobbyists, as well as employees, consumer activists, customers and suppliers.

The Attributes of Biometric Systems

How Do Biometrics Compare to Other Types of ID?

Currently other than personally recognizing someone, or having a trusted third party personally swear to their identity, the only other technique for identifying a person is through the use of a "token." These tokens, which are in essence representations of the oath of a trusted third party, come in two basic forms:

- **Knowledge tokens**, such as passwords, secret PINs (Personal Identification Numbers), or knowledge of personal data (knowing one's mother's maiden name, e.g.), or
- **Physical tokens** such as ID cards, passports, chip cards, or plain old keys.

Token IDs offer certain advantages over biometric identification. Security against "false acceptance" of impostors can be raised by increasing the complexity of the token used for identification. Also, in the event of loss or compromise, the token, be it a password, PIN, key, or ID card, can be revoked, changed or reissued, a biometric measurement cannot.

The advantage of biometrics is that unlike tokens, biometrics cannot be lost, loaned, or forgotten. Token-based systems must verify that the presenter is the authorized user, not an unauthorized person who has come to possess the token.

Used carefully, biometrics may be combined with token-based systems to mitigate the vulnerability of ID tokens to unauthorized use.

Functions of Biometric Systems

One useful way of thinking about biometrics is that they are used for one of two purposes: A) To prove that you are who you say you are (positive ID), or B) To prove that you are not who you say you are not (negative ID).

In a positive ID situation, the subject asserts that she is Jane Doe and submits a "live" sample (a fingerprint, for example) to the system. The system then checks its database of previously enrolled or registered samples to see if the live sample matches the reference sample. A positive ID system is designed to prevent more than one person from using a single identity.

In a negative ID situation, John Roe claims *not* to be someone already known to the system. Here, the system checks its database to see that Roe is not on the watchlist of suspected criminals and terrorists, whose biometrics are already in the system. A negative ID system is designed to prevent one person from using more than one identity.

When biometrics are employed to effect negative identification, one need not be enrolled. The only persons who must be "in" the database are those whom the operator is trying to keep out or catch.

Biometrics alone cannot establish "true identity." A biometric system cannot prevent someone from furnishing fake credentials when they first enter the system. They can only prevent them from using another identity once enrolled.

Common Aspects of All Biometric Systems:

All biometric technology systems have certain aspects in common. All are dependent upon an accurate reference or "registration" sample. If a biometric system is to identify a person, it first must have this sample, positively linked to the subject, to compare against. Modern biometric identification systems, based on digital technology, analyze personal physical attributes at the time of registration and distill them into a series of numbers. Once this reference sample is in the system, future attempts to identify a person are based on a comparison of a "live" sample and the reference sample or samples.

A perfect system would recognize a person 100% of the time, and reject an impostor 100% of the time. However, biometric samples are gathered from people in environmental conditions that are uncontrollable, over equipment that may slowly be wearing out, and using technologies and methods that vary in their level of precision. Consequently, the accuracy of biometric systems is assessed in light of these confounding variables via its tendency to experience either a "false match" (also called a "false accept") or a "false non-match" ("false reject"). The point at which these two rates intersect is called the equal error rate or crossover point.

Biometric systems may be "tuned" to diverge from the equal error rate to provide a match threshhold that satisfies the designer's requirements. If a system compares a large number of persons against a small number of samples, and the consequence of a false match is low, (for example, at a border crossing or airport that is looking for a short list of criminals) a system biased towards a higher "false accept" or "false match" rate may be desirable. The advantage to biasing a system in this manner is that it is likely to err on the side of safety, and less likely to let a criminal slip through undetected. The disadvantage is that the system will falsely associate innocent people with criminals. If other safeguards are in place and the system operators understand the system's bias towards false match, the result can be a relatively trivial loss of convenience due to increased scrutiny (extra inspection of luggage, questioning, etc.) Biasing such a system towards a high "false non-match" or "false reject" rate will result in fewer passengers slowed down at the gate, but at the cost of possibly losing the sought-after criminals.

When assessing the utility or the cost of a biometric system, it's important to bear the common features of all such systems in mind. How is the reference sample to be gathered and catalogued? How it the live sample going to be gathered? Can a live sample be captured without the subject's knowledge and cooperation? What are the implications of all four possible outcomes (true match, true non-match, false match, false non-match)? What is the value of a successful system, and what is the cost, to all parties, should it fail?

Further, we should not assess failure simply from the perspective of the core biometric technology itself. Even an ideal system can be defeated easily if it is incorporated into an insecure or poorly-designed overall system architecture. Any biometric system, especially one that involves a component of telecommunication, **must** be very carefully designed to prevent the loss or interception of user biometrics. Any deployed system must incorporate safeguards to prevent the interception of biometric data while it is being communicated. If a user's biometric is intercepted, criminals may be able to replicate either the sample itself or the string of binary data produced by a successfully-matched sample. Armed with such intercepted biometric data, a criminal would be able to effect a potentially very damaging identity theft.

Types of Biometrics

A proper assessment is built not only on a general understanding of biometrics, but also on an understanding of specific technologies. An understanding of both biometrics in general and specific biometric technologies is a necessary condition for a solid understanding of the larger social implications of biometrics.

Signature

The biometric most familiar to us is the signature. Our ability to judge by sight if one signature matches another has made this a time-proven and legally-binding biometric. However, by sight alone, most of us cannot recognize the pressure of the pen on the paper or the speed and rhythms of its traverse of the page. Computers can do all these things, and quantify, analyze and compare each of these properties to make signature recognition a viable biometric technology. Being based on things that are not visible (pen pressure and velocity, for example), signature-based biometric technology, offers a distinct advantage over regular signature verification -- in addition to mimicking the letter forms, any potential forger has to fabricate a signature at the same speed, and with the same pen weight, as his victim.

Signature biometrics pose a couple of unique problems. The first is the comfort with which people are already willing to use their signature as a form of identification. While this high level of consumer acceptance is viewed as a strength by vendors of such systems, this bears with it a strong downside. Without proper notification, a person may sign an electronic signature pad and unwittingly also be surrendering a reference or live biometric sample. Since the custom of leaving a signature as one's "official mark" is based on the presumption of irreproducibility (i.e., that a forger would be hard-pressed to imitate a signature just by looking at it), people are willing to provide a signature without giving its potential for reproduction a second thought. However, electronic data is easy to copy and transmit. And so, a forger posing as a delivery man might fraudulently secure a signature biometric by presenting a victim with a "gift" box, requesting a signature to confirm delivery, and making off with the victim's biometric data.

The second unique property of signature biometrics is that unlike all other biometrics, which either establish an identity (identification) or confirm an identity (authentication), a signature can convey *intent* (authorization). In other words, a traditional signature on paper is taken both to authenticate the signator, and to convey the signator's legal authority. An electronic system that solicits a user's non-signature biometric must provide a separate step to convey the user's legal authorization for any binding transaction. A signature-based biometric system could mimic our current legally customary acceptance of a signature to simultaneously convey both identity and authority.

Keystroke Dynamics

The rhythms with which one types at a keyboard are sufficiently distinctive to form the basis of the biometric technology known as keystroke dynamics. While distinct, keystroke dynamics are not sufficiently unique to provide identification, but can be used to confirm a user's identity.

Keystroke dynamics, unlike other biometric technologies, is 100% software-based, requiring no sensor more sophisticated than a home computer. Because of this, deployment is occurring in fairly low-stakes, computer-centric applications, such as content filtering (Net Nanny owns BioPassword, the leading keystroke dynamics vendor) and digital rights management, in which passwords to download music are bolstered with by keystroke dynamic verification, to prevent password-sharing. As a general rule, any method involving home or office computers is inherently insecure, as these devices leave a lot more room for experimentation than devices like ATMs or entry systems, and the information they use tends to travel over unsecured communication lines.

Hand Geometry

Perhaps the most ubiquitous electronic biometric systems are hand geometry based. Hand-geometry-based systems require the subject to place his or her hand (usually the right hand) on a plate where it is photographically captured and measured. Made of 27 bones and a complex web of interconnected joints, muscles, and tendons, the human hand presents a sufficiently peculiar conformation of anatomical features to enable authentication, but is not considered sufficiently unique to provide full identification. Further, the geometry of the hand is variable over time, as hand shape may be altered due to injury, disease, aging, or dramatic weight swings. A simple hand-geometry system will measure length and thickness of digits, width of the palm at various points, and the radius of the palm. This results in a relatively simple identification that can be expressed in a very simple, compact string of data. Efforts have been made to improve the accuracy of hand geometry, including three-dimensional sampling (i.e., a second camera measuring the thickness of the hand from the side), and a patented

system (owned by the British concern, Neusciences) that measures the pattern of the veins of the hand. Neusciences claims that their system provides a high degree of accuracy and that the hand vein feature is unique and relatively invariable, changing little over a person's lifespan.

In deployment, traditional hand geometry systems have found acceptance in applications requiring verification of an identity, rather than a full proof or establishment of an identity. Airports, prisons, and factories have successfully employed hand-geometry-based systems to restrict access to runways, to prevent walk-out escapes during visits, and to ensure that time cards are being punched only by the worker, and not by that worker's pal on his or her behalf. In all these instances, the subject is attempting to prove or disprove his or her membership in a relatively small group of people (authorized runway personnel, prisoners/visiting family, factory workers). When stakes are high, these systems are not relied on exclusively to confirm identity; rather, they are used to provide an additional layer of security above and beyond that provided by existing security systems.

Since they must accommodate the largest of hands, any hand geometry or hand vein system must be somewhat bulky, and requires the user to perform an obtrusive task (placing his or her hand on the platen for sampling). Because of this obtrusiveness, hand-based biometrics represent less of a privacy threat than some other systems: subjects cannot have their biometric features sampled without their knowledge, and the sampling method is unambiguous in its intent.

Fingerprint

Fingerprinting is a highly familiar and well-established biometric science. The traditional use of fingerprinting, of course, has been as a forensic criminological technique, used to identify perpetrators by the fingerprints they leave behind them at crime scenes. Scientists compare a latent sample left at a crime scene against a known sample taken from a suspect. This comparison uses the unique features of any given fingerprint, including its overall shape, and the pattern of ridges, valleys, and their bifurcations and terminations, to establish the identity of the perpetrator.

In the context of modern biometrics, these features, called fingerprint minutiae, can be captured, analyzed, and compared electronically, with correlations drawn between a live sample and a reference sample, as with other biometric technologies. Fingerprints offer tremendous invariability, changing only in size with age, are highly resistant to modification or injury, and very difficult to "forge" in any useful way. Although the development of some sort of surreptitious sensor is not inconceivable, the reality is that sensors remain obtrusive, requiring a willful finger pressure to gather a useful sample. Unlike other systems, based on cameras and high-tech sensors, fingerprint sampling units are compact, rugged, and inexpensive, with commercially available systems from multiple vendors offering very good accuracy. Next-generation scanners can analyze below the surface of the skin, and can add pore pattern recognition in addition to the more obvious minutia of the fingerprint.

Facial Recognition

Facial recognition sprung into the national spotlight during the 2001 Super Bowl, when Tampa police scanned the faces of game fans without their knowledge for the purpose of spotting terrorists in the crowd. While this proved a public relations nightmare in January 2001, the use of this technology in New Orleans at the post-9/11 Super Bowl of 2002 generated little controversy. Facial recognition remains one of the more controversial biometric technologies because of its very *un*obtrusiveness. With good cameras and good lighting, a facial recognition system can sample faces from tremendous distances without the subject's knowledge or consent.

Most facial recognition technology works by one of two methods: facial geometry or eigenface comparison. Facial geometry analysis works by taking a known reference point (for example, the distance from eye to eye), and measuring the various features of the face in their distance and angles from this reference point. Eigenface comparison uses a palette of about 150 facial abstractions, and compares the captured face with these archetypal abstract faces. In laboratory settings, facial recognition results are excellent, but critics have questioned the effectiveness of the technology in real-world circumstances. Nevertheless, the accuracy of facial recognition has been good enough for casinos to have put the the technology to use since the late 1990s as a means to spot banned players. Facial recognition technology proponents claim good performance even against disguises, weight changes, aging, or changes in hairstyle or facial hair.

Eye biometrics: Iris/Retina

The human eye offers two features with excellent properties for identification. Both the iris (the colored part visible at the front of the eye) and the veins of the retina (the thin film of nerve endings inside the eyeball that capture light and send it back to your brain) provide patterns that can uniquely identify an individual. Retinal scanning is the older technology, and requires the subject to look into a reticle and focus on a visible target while the scan is completed. It's definitely one of the more intrusive biometric technologies, with some subjects reporting discomfort at the scanning method. Iris recognition has an advantage in ease of use, in that it merely requires the subject to look at a camera from a distance of three to ten inches. The iris scanner illuminates the iris with invisible infra-red light, which shows details on darker -colored eyes that are not visible to the naked eye. The pattern of lines and colors on the eye are, as with other biometrics, analyzed, digitized, and compared against a reference sample for verification.

Iridian Technologies, who hold the patents on iris recognition, claim that the iris is the most accurate and invariable of biometrics, and that their system is the most accurate form of biometric technology. Iridian's system also has the benefit of extremely swift comparisons. The compay claims that it can match an iris against a database of 100,000 reference samples in 2-3 seconds, whereas a fingerprint search against a comparable database might take 15 minutes.

Voice Verification

None of us finds it remarkable when a friend recognizes our voice on the telephone. However, what we find easy to do is still a very hard problem for computers, especially when their job is to identify someone positively. The prospect of accurate voice verification offers one great advantage, which is that it would allow a remote identification using the phone system, an infrastructure that's already been built and thus has zero client-side cost: no special reader needs to be installed in your home. Even without the phone system, the sampling apparatus, a microphone, remains far cheaper than competing, largely optically-based biometric technologies.

But voice recognition technology is still not good enough to be used as a front-line biometric technology. Simply put, voice verification systems have to account for a lot more variables than do other systems, starting with the inevitable compression of a voice captured by cheap microphones (especially those found on phone handsets), discriminating a voice from background noise and other sonic artifacts, and the human voice's tremendous variability, due to colds, aging, and simple tiredness. Also, just as a voice can be surreptitiously recorded over the telephone or face-to-face, a person's voice can be captured surreptitiously by a third party (either by tapping or bugging) and replayed, or a person's voice might be biometrically sampled remotely without consent during a fake door-to-door or telephone sales call. Because of these difficulties, commercial deployments of voice verification have been limited to "backup" status, systems in which there are other token-based methods of identification, with voice verification providing an added layer of protection.

Characterizing Different Biometrics

Different biometric features have characteristics that make them more or less useful for particular applications. Dr. James Wayman, director of the National Biometric Test Center at San Jose State University, categorizes biometric features in terms of five qualities:

- **Robustness**: repeatable, not subject to large changes.
- **Distinctiveness**: there are wide differences in the pattern among the population.
- **Accessibility**: easily presented to an imaging sensor.
- **Acceptability**: perceived as non-intrusive by the user.
- **Availability**: a user may present a number of independent measurable features.

Dr. Wayman explains these qualities by comparing fingerprinting to hand geometry.

> *"Fingerprints are extremely distinctive, but not very robust, sitting at the very end of the major appendages you use to explore the world. Damaging your fingerprints requires less than a minute of exposure to household cleaning chemicals. Many people have chronically dry skin and cannot present clear prints. Hands are very robust, but not very distinctive. To change your hand geometry, you'd have to hit your hand very hard with a hammer. However, many people (somewhat less than 1 in 100) have hands much like yours, so hand geometry is not very distinctive. Hands are easily presented without much training required, but most people initially misjudge the location of their fingerprints, assuming them to be on the tips of the fingers. Both methods require some "real-time" feedback to the user regarding proper presentation. Both fingerprints and the hand are accessible, being easily presented. In the 1990 Orkand study*, only 8% of customers at Department of Motor Vehicle offices who had just used a biometric device agreed that electronic fingerprinting "invades your privacy." Summarizing the results of a lengthy survey, the study rated the public acceptance of electronic fingerprinting at 96%. To our knowledge, there is no comparable polling of users regarding hand geometry, but we hypothesize that the figures would not be too different. With regard to availability, our studies have shown that a person can present at least 6 nearly-independent fingerprints, but only one hand geometry (your left hand may be a near mirror image of your right)."*
>

Characterizing Biometric Applications

Dr. Wayman suggests characterizing biometric applications in terms of seven variables:

- **Cooperative vs. Non-Cooperative** This refers to the behavior of the "threat" or would-be deceptive user. Is the "threat" trying to cooperate with the system? If the threat is trying to enter a restricted area, she either cooperates with the positive ID system to try to fool it into thinking she's allowed in, or deceptively tries not to cooperate with a negative ID system so as not to trigger the alarm. One implication of this variable is the scope of database search. In cooperative applications, users may first identify themselves with a card or PIN, so that the system need only match against the claimed identity's template. In non-cooperative applications, users can't be trusted to identify themselves correctly, so the entire database may need to be searched.
- **Overt vs. Covert** Is the user aware that the biometric sampling and identification is occurring?
- **Habituated vs. Non-Habituated** Is the intended user expected to be experienced in the use of the system?
- **Attended vs. Non-Attended** Will the intended user be supervised when using the system?
- **Standard vs. Non-Standard Environment** How controlled are the environmental conditions for operation?
- **Public vs. Private** Will users be customers (public) or employees (private)?
- **Open vs. Closed** Will the application be required to exchange biometric data with other systems or not?

Dr. Wayman explains that the positive biometric identification (hand geometry) of users of the Immigration and Naturalization Service's Passenger Accelerated Service System (INSPASS) for rapidly admitting frequent travelers into the United States:

> *"can be classified as a cooperative, overt, non-attended, non-habituated, standard environment, public, closed application. The system is cooperative because those wishing to defeat the system will attempt to be identified as someone already holding a pass. It will be overt because all will be aware that they are required to give a biometric measure as a condition of enrollment into this system. It will be non-attended and in a standard environment because collection of the biometric will occur near the passport inspection counter inside the airports, but not under the direct observation of an INS employee. It will be non-habituated because most international travelers use the system less than once per month. The system is public because enrollment is open to any frequent traveler into the United States. It is closed because INSPASS does not exchange biometric information with any other system." (emphases added)*

Characterizing Biometric ID Systems

Dr. Wayman suggests that biometric ID systems should be viewed in terms of a generic biometric system made up of five basic components or subsystems, depending on the application: data collection, transmission, signal processing (which comprises feature extraction, quality control, pattern matching), storage, and decision.

- **Data collection** Biometric systems involve at least two discrete data collection steps. First, any biometric system must contain a biometric characteristic deemed "true" or canonical from the system's viewpoint. The term "enrollment" or "registration" refers to the first entry of biometric data into the database. Second, the system must compare a later-submitted "sample" (often called a "live sample") to the sample in the database. (Scale is crucial to the enrollment step, sometimes for quite mundane reasons. In the context of biometric visa issuance by the State Department, for instance, the government has been looking at whether or not U.S. consulates around the world have room to handle the additional equipment and physical traffic needed for data collection.)
- **Transmission** Many biometric systems collect data at one location but store and/or process it at another. Such systems require data transmission.
- **Signal processing** Once a biometric is acquired, it must be prepared for comparison. There are three basic tasks here: feature extraction, quality control, and pattern matching. A fourth task in large-scale systems is pattern classification.
  - *Feature extraction* involves finding the true biometric pattern amid noise and signal degradation, preserving the critical information, and discarding redundant or unnecessary data. Dr. Wayman gives the example of a text-independent speaker-recognition system. A properly implemented system isolates "features that depend only on the speaker and not on the words being spoken." At the same time, the system focuses on features that do not change "even if the speaker has a cold or is not speaking directly into the microphone."
  - *Quality control* involves checking to see if the signal is of good quality. Ideally, it should be possible to make a quick determination so that another measure can be taken if the signal is inadequate.
  - *Pattern matching* involves comparing the live sample to the reference sample in the database. If the user claims to be Jane Doe, the pattern-matching process may only need to compare the sample to Jane Doe's stored template. In other situations, the sample must be compared to multiple templates. The pattern-matching process generates a quantitative "distance" measure of the comparison -- how close are they? Even for the same person, the distance is rarely if ever zero.
  - *Pattern classification* is a technique aimed at reducing the computational overhead of pattern matching. In large-scale systems, it can be computationally taxing to match each sample against all stored templates in the database. If biometric patterns can be categorized, then it may be possible to perform the match against only the stored templates in that category. This is sometimes referred to as "binning." A different technique with the same goal is "filtering," which involves partitioning the database based on information not contained in the biometric itself. If you know the person is a man, you don't need to check against women's biometrics. Both of these techniques introduce additional error possibilities; if binning or filtering is erroneous, then the true template is not used and a false non-match results.
- **Decision** This subsystem implements the biometric ID system's actual policy with regard to matching. In general, lowering the number of false non-matches raises the number of false matches, and vice versa. The signal processing subsystem yields a quantitative "distance" measure, but "how close or far is enough?" is a matter of policy. In a high-security application where the cost of a false acceptance could be high, system policy might prefer very few false acceptances and many more false rejections. In a commercial setting where the cost of a false acceptance could be small and treated as a cost of doing business, system policy might favor false acceptances in order not to falsely reject and thereby inconvenience large numbers of legitimate customers. The inevitable existence of these errors means that any biometric ID system must also have well-designed policies for exception handling.
- **Storage** Biometric reference samples must be stored somewhere for matching purposes. For systems only performing "one-to-one" matching, the database may be distributed on cards carried by each enrolled user. The user simply presents his or her biometric and the system checks to see if it matches the template stored on the card. Depending upon system policy, no central database need exist, although in this application a centralized database can be used to detect counterfeit cards or to reissue lost cards without re-collecting the biometric pattern.

  In other cases, centralized storage is necessary because the system must match the live sample to multiple templates. As the number of templates grows, speed becomes an increasingly significant issue. One technique is to partition the database (i.e., binning or filtering) so that any sample need only be matched to the templates in one partition. This increases system speed and decreases false

matches at the expense of increasing the false non-match rate owing to partitioning errors. System error rates thus change with increasing database size and ID systems do not linearly scale.

Full biometric patterns cannot be reconstructed from the stored reference samples if these are stored as templates, which reduce data richness dramatically. Templates themselves are often created using the system vendor's proprietary feature extraction algorithms. Whether stored templates themselves can be used to "spoof" the system internally is entirely dependent on the security of the system architecture.

Biometric ID systems may store not only the templates but also raw data. One reason to do so would be to allow changes to the system or to change system vendors without having to re-collect data from all enrolled users. Full raw data storage is a riskier practice in that new templates may be extracted from the data or the raw data itself may be used against the system.

The State of Scientific Testing of Biometric ID Systems

According to Dr. Wayman,

> *"Testing of biometric devices requires repeat visits with multiple human subjects. Further, the generally low error rates mean that many human subjects are required for statistical confidence. Consequently, biometric testing is extremely expensive, generally affordable only by government agencies. Few biometric technologies have undergone rigorous, developer/vendor-independent testing to establish robustness, distinctiveness, accessibility, acceptability and availability in 'real-world' (non-laboratory) applications."*

An in-depth discussion of the statistical methodology in testing biometric ID systems is beyond the scope of this discussion. We recommend Dr. Wayman's website to interested persons. Note, however, that it is very difficult to generalize from test results. At this time, scientists have no way of accurately estimating how large a test is needed to adequately characterize any biometric device in any application, even with advance knowledge of theoretical error rates.

What Is Privacy in the Context of Biometrics?

The issue of privacy is central to biometrics. Critics complain that the use of biometrics poses a substantial risk to privacy rights. Proponents claim that biometrics protect privacy. Evaluating these arguments requires, in the first instance, an understanding of what privacy means. In this chapter we explore the definition of privacy in general.

Working Definition of Privacy

We all might have strong subjective ideas about what privacy is. Yet, the word "privacy" is hard to define, in part because the meaning depends greatly on the situation, culture, environment, and moment. In the immediate aftermath of September 11, for example, many Americans welcomed more intrusive governmental measures to increase public safety, even though that meant their privacy could suffer. As one New Yorker put it, "I want Big Brother on my shoulder, looking out for me." Pre-September 11, a frequent question asked at "Introduction to Biometrics" seminars was, "What about the privacy concerns?" Post-September 11, the more frequently asked question became, "What about the security aspects?"

Privacy scholar Ruth Gavison sees privacy as consisting of three parts: secrecy, anonymity, and solitude. She offers what is perhaps the extreme privacy model: "Privacy is a limitation of others' access to an individual.... In perfect privacy no one has any information about X, no one pays any attention to X, and no one has physical access to X" (Gavison 1980, 428).

Robert Ellis Smith, the editor of *Privacy Journal*, defines privacy as "the desire by each of us for physical space where we can be free of interruption, intrusion, embarrassment, or accountability and the attempt to control the time and manner of disclosures of personal information about ourselves" (Smith 2000, 6/ Smith 2002, 1–8). This definition hints at three types of privacy recognized by U.S. courts: physical, decisional, and information privacy.

Based on her survey of the extensive privacy literature, however, Professor Lillian R. Bevier concluded that "privacy is a chameleon-like word, used denotatively to designate a range of wildly disparate interests—from confidentiality of personal information to reproductive autonomy—and connotatively to generate goodwill on behalf of whatever interest is being asserted in its name" (Bevier 1995, 458).

Most important from the standpoint of biometrics, privacy includes an aspect of autonomy—as various scholars have expressed it: our control over information about ourselves, control over who can sense us, or control over the intimacies of personal identity. This control over information about us, or what is termed "information privacy" (or "informational privacy"), lies at the heart of the privacy concerns raised by this new technological reality. Individuals have an interest in determining how, when, why, and to whom information about themselves, in the form of a biometric identifier, would be disclosed.

What Privacy Concerns Does the Use of Biometrics Implicate?

With this working definition of privacy in mind, we next discuss the privacy concerns implicated by the use of biometrics. These concerns relate to identification and invasiveness.

The Individual Gives Up a Biometric Identifier

To determine the specific privacy concerns implicated by biometrics, we must first focus on what exactly is disclosed when biometric data is collected. Regardless of whether an individual voluntarily provides a biometric identifier or is forced to surrender it as part of state action or government-required scheme, he is giving up information about himself. When biometrics, like fingerprinting, iris recognition, or retinal scanning is used, he discloses robust and distinctive information about his identity. When other biometrics, such as hand or finger geometry, are used, at a minimum, he discloses accurate information about who he is. Depending on the biometric, he is giving information about himself that could be used to identify him over large-scale databases.

Invasive Aspects of the Information

Beyond this fundamental disclosure, invasive implications might also be related to privacy concerns that stem from the biometric identification information disclosed. These invasive implications for privacy are essentially three-fold:

- The invasive effects of a secondary market, defined as disclosure of the biometric identification information to third parties
- Any invasive information that might be additionally obtained as part of the biometric identifier
- The invasiveness that might be associated with actual physical harm caused by the technology

Invasive Secondary Market Effects Once a biometric identifier is captured or collected from an individual in the primary market, and even if it is captured only once, the biometric identifier could easily be replicated, copied, and otherwise shared among countless public and private sector databases. This sharing in a secondary market could conceivably take place without the individual's knowledge or consent. Indeed, biometric identifiers could be bought and sold in a secondary market much the way names and addresses on mailing lists are currently bought and sold by data merchants.

An example illustrates the secondary market effect: I give my face and fingerprints to my local sports club so I can access the club and keep better track of my workouts. I do this by presenting my face to a camera whenever I enter and by touching my finger to the computer display on the treadmill and other equipment. I get a detailed monthly fitness report. The sports club conveniently enrolled both of my index fingers so I don't even have to remember which pointer

finger to use. After a while, I start receiving marketing information telling me to show up at the local grocery store, retail outlet, and so on, because I am already preregistered and biometrically enrolled in their systems. That's because, along with my facial photograph, the sports club kept my raw data, or file images, in addition to the fingerprint templates, and sold the information to others.

Later, while shopping in the mall, sales associates insist on selling me athletic gear, protein supplements, and diet aids because their facial recognition system identified me as a failed jock from the sports club. Later, the police are confronted with the grisly homicide of the sports club manager in his office, where the only evidence is a single latent print left on the murder weapon. After no matches are made against the FBI's criminal master file, the new sports club management readily agrees to turn over the file images of fingerprints of all its members, including mine, so the latent print can be searched against them.

Particularly with respect to the private sphere, where the conduct of private actors has traditionally been given a large degree of freedom of action from government interference, few current legal limits exist in the United States on the use of biometric information held by private actors. This observation is not meant to suggest that the federal or state governments would not be able to regulate the use of biometric information held by private actors; rather, it emphasizes what the present regulatory baseline is with respect to the regulation of biometric information: Until regulatory action has been taken by government, the use of biometrics is left to the market. The legal situation is very different in the European Union, where a comprehensive privacy protection framework exists.

Invasive Information Is Obtained In addition to the identification information associated with the biometric, invasive information threatening privacy could conceivably include three other types of concerns. First, biometric identifiers could be used extensively for law enforcement purposes, as raised in the sports club example. Fingerprints have long been used by law enforcement, and electronic finger images—or what are in effect the next generation of fingerprints—are presently being used by various law enforcement agencies as part of their databases, such as the FBI's Integrated Automated Fingerprint Identification System (IAFIS).

Second, it is possible (and this point needs to be stressed: *only* possible) that some biometrics might capture more than just mere identification information. Information about a person's health and medical history might also be incidentally obtained. Recent scientific research, while the subject of controversy, suggests that fingerprints might disclose such information about a person. For example, Dr. Howard Chen, in his work on dermatoglyphics, or the study of the patterns of the ridges of the skin on parts of the hands and feet, notes that "certain chromosomal disorders are known to be associated with characteristic dermatoglyphic abnormalities," specifically citing Down syndrome, Turner syndrome, and Klinefelter syndrome as chromosomal disorders that cause unusual fingerprint patterns in a person. Certain nonchromosomal disorders, such as chronic, intestinal pseudo-obstruction (CIP) (described in the next paragraph),

leukemia, breast cancer, and Rubella syndrome, have also been implicated by certain unusual fingerprint patterns.

Dr. Marvin M. Schuster, the recently retired director of the division of digestive diseases at Johns Hopkins Bayview Medical Center, has discovered a "mysterious relationship" between an uncommon fingerprint pattern, known as a digital arch, and a medical disorder called CIP that affects 50,000 people nationwide. Based on the results of a seven-year study, Dr. Schuster found that 54 percent of CIP patients have this rare digital arch fingerprint pattern. In comparison, arch fingerprints appear in only seven percent of the general population. Schuster's discovery suggests a genetic basis to the disease. Schuster explained that in the case of CIP, "the more digital arches there are in the fingerprint, the stronger the correlation [to the condition]. The majority of CIP patients possess at least one digital arch. This discovery offers an important clue in diagnosing CIP, and it suggests that the disorder is congenital. It could potentially save people with CIP from multiple needless operations" (Hancock and Hendricks 1996).

While still extremely controversial within the scientific communities, several researchers report a link between fingerprints and homosexuality. For example, psychologists at the University of Western Ontario report that homosexual males are more likely than their heterosexual counterparts to show asymmetry in their fingerprints. "What we found is a statistically significant difference between groups of heterosexual and homosexual men," researcher Doreen Kimura said (Associated Press 1994). While this research is far from conclusive, the availability of such information with its possible links to medical and related information again raises concern about privacy and can create misperceptions.

From examining the retina or iris, an expert can determine that a patient may be suffering from common afflictions such as diabetes, arteriosclerosis, and hypertension; furthermore, a medical professional can also detect unique diseases of the iris and the retina. Moreover, the onset of certain diseases (such as diabetes) and conditions (such as pregnancy) may cause the retinal pattern to change; are the changes enough to cause a previously enrolled user to be rejected by a system because the user's biometric is no longer recognized by the system? Although both the iris and retina contain medical information, it is by no means obvious that the biometric data taken of the iris or retina implicates privacy concerns related to the disclosure of medical information. A necessary area of further technical inquiry is whether the computerized code taken of the iris or retina actually contains any medical information or if the information captured is sufficient to be used for any type of diagnostic purpose.

Much research remains to be done; however, a biometric identifier with any possible links to medical information will raise lingering questions about the privacy aspects of the information disclosed. More important, the mere perception that such sensitive information may be disclosed could dissuade people from using potentially beneficial biometric systems.

Actual Physical Harm; Physical Invasiveness Part of the "urban legend" surrounding biometrics holds that retinal scanning "shoots a laser beam into the eye." This is not the case, but urban legends die hard. Anecdotally, certain aviators, who are extremely proud of their 20/20 vision, supposedly had a hard time accepting retinal scanning devices in an experimental program because at least some of them feared the devices would adversely affect their perfect vision. Other users feared that diseases, such as conjunctivitis, may result from having to come into close proximity with a binocular-like device that strangers had touched. Some users of biometrics have complained that hand geometry systems dry their hands. Such fears, even when unfounded, can negatively affect the system because dissatisfied users will go out of their way not to cooperate with the system; some may even actively engage in acts of sabotage to prevent its use.

Documented cases of biometrics causing actual harm to a person are difficult, if not impossible, to find, but many of the technologies are fairly new. And to date, no enterprising plaintiff's attorney has brought a class-action lawsuit for personal injury on this biometrics-induced harm basis. The bottom line is that any liability resulting from any proven actual physical harm caused by biometric systems would be addressed by the individual state's tort liability regimes. On a related note, eventually, the judiciary will also have the opportunity to decide the admissibility of biometric identification as scientific evidence using the prevailing standards articulated by the Supreme Court in *Daubert v. Merrell Dow Pharmaceuticals* in 1993.

Biometrics as Privacy's Foe: Criticisms of Biometrics

This section discusses the "foe" side of the coin: the criticisms of biometrics leading to loss of anonymity and autonomy and the "Big Brother" scenario, including the danger of function creep and degradation of the individual's reasonable expectation of privacy.

The Loss of Anonymity; the Loss of Autonomy

A basic criticism of biometrics is that we, as individuals, risk losing our anonymity and autonomy whenever biometric systems are deployed. Part of controlling information about ourselves includes our ability to keep other parties from knowing things about us, like who we are. While we all know that a determined party—whether the government or a private party—can learn our identity (and much more about us), the use of biometrics makes it clear that our identity is now fully established within seconds. As Roger Clarke explains, "The need to identify oneself may be intrinsically distasteful to some people.... They may regard it as demeaning, or implicit recognition that the organization with whom they are dealing exercises power over them" (Clarke 1994).

Robert Ellis Smith agrees, noting that, "In most cases, biometric technology is impersonal" (Smith 1996). At the same time, as the technology improves, its use may become more ubiquitous, and individuals may find that they are required to provide a biometric identifier in unexpected, unwelcome, or unforeseen circumstances. Moreover, you cannot simply "make up" a biometric as you can a name, an address, or a phone number. In this sense, perhaps, the loss of anonymity leads to an inevitable loss of individual autonomy.

Biometrics should not really be blamed for the fact that there is less individual anonymity in society today than in decades or centuries past, however. Rather, far larger economic, political, and technological forces have been at work. America's transformation from an agrarian to industrial to post-industrial service (or "information age") economy, combined with the massive growth of government since the New Deal of the 1930s, have put a greater premium on the need for information about individuals and organizations. At the same time, technical advances have made it much easier and more convenient to collect, compile, and keep extensive information on individuals. This information-centric trend takes place because in the Information Age information has great value as a commodity. The computer, the enabler of "info-centrism," has helped make information a valuable commodity because it can process large amounts of personal information from large numbers of people in little time and at low cost.

While a biometric identifier is an accurate identifier, it is not the first nor the only identifier used to match or locate information about a person. Names and numerical identifiers such as social security numbers, account numbers, and military service numbers have long been used to access files with personal information. Moreover, the impressive search capabilities of computer systems with their abilities to search, for example, the full text of stored documents, make identifiers far less important for locating information about an individual.

We also should not lose sight of the fact that there is usually a good reason why individual recognition in the form of identification or verification is needed. Balancing the equities involved and depending on the case, the benefits—to the individual as well as to society—of establishing a person's identity generally outweigh the costs of losing anonymity. For example, given the massive problem of missing and abused children, many citizens would eagerly support the idea of day care providers using biometrics to make certain that our children get released at the end of the day to a parent or guardian whose identity has been verified. However, reasonable people can disagree as to the cost-benefit analysis.

Similarly, to consider a "pocketbook" example, the world's financial community has long been concerned about growing problems of ATM fraud and unauthorized account access, estimated to cost $500 million a year, check fraud at least $2 billion, and credit card fraud about $1.5 billion per year. The financial services industry believes that a significant percentage of these losses could be eliminated by the use of biometrics, by ensuring that only the authorized account

Woodward, John D.; Orlans, Nicholas; Higgins, Peter T.. Biometrics.

May not be reproduced in any form without permission from the publisher, except fair uses permitted under U.S. or applicable copyright law.

holder could access the account. MasterCard, for example, has been evaluating various biometrics since 1995 and believes fingerprint technology is the best technology to reduce credit card fraud. According to Joel Lisker, the company's senior vice president of security and risk management, "We estimate that a fingerprint system, fully implemented, could save the financial services industry billions of dollars" (Haapaniemi 1998).

Critics give too much credit to biometrics' alleged ability to erode anonymity without giving enough attention to the market's ability to protect privacy in response. It is not obvious that more anonymity will be lost when biometrics are used. Public and private sector organizations already have the ability to gather substantial amounts of information about individuals by tracking, for example, credit card use, consumer spending, and demographic factors.

A parallel to the financial services industry might be helpful. Despite the existence of many comprehensive payment systems such as credit cards, which combine extreme ease of service with extensive record-keeping, many Americans still prefer to use cash for transactions—a form of payment that leaves virtually no record. An individual who wants anonymity might have to go to greater lengths to get it in the biometric world, but the ability of the marketplace to accommodate a person's desire for anonymity should not be so readily dismissed. Moreover, as explained next, the ability of biometrics to serve as privacy enhancing technologies should not be discounted.

The Biometric-Based "Big Brother" Scenario

Aside from the alliterative qualities the phrase possesses, critics of biometrics seem to inevitably link the technology to "Big Brother." Biometrics, in combination with impressive advancements in computer and related technologies, would, its critics argue, enable the State to monitor the actions and behavior of its citizenry. In this vein, concern has been expressed that biometric identifiers will be used routinely against citizens by law enforcement agencies. As Marc Rotenberg of the Electronic Privacy Information Center has succinctly explained, "Take someone's fingerprint and you have the ability to determine if you have a match for forensic purposes" (American Banker 1996).

This "Big Brother" concern, however, goes beyond normal police work. Every time an individual used her biometric identifier to conduct a transaction, a record would be made in a database that the government, using computer technology, could then match and use against the citizen—even in ways that are not authorized or meet with our disapproval. To borrow the reasoning of a 1973 report on national identity card proposals, the biometric identifier, in ways far more effective than a numerical identifier, "could serve as the skeleton for a national dossier system to maintain information on every citizen from cradle to grave" (U.S. Department of Health, Education and Welfare 1973).

Roger Clarke has perhaps offered the best worst-case *1984*-like scenario:

> Any high-integrity identifier [such as biometrics] represents a threat to civil liberties, because it represents the basis for a ubiquitous identification scheme, and such a scheme provides enormous power over the populace. All human behavior would become transparent to the State, and the scope for nonconformism and dissent would be muted to the point envisaged by the antiutopian novelists (Clarke 1994).

At least one example exists from U.S. history of supposedly confidential records being used in ways never likely intended. In November 1941, almost two weeks before the Japanese attack on Pearl Harbor, President Franklin D. Roosevelt ordered a comprehensive list made to include the names and addresses of all foreign-born and American-born Japanese living in the United States. To compile the list, staffers used 1930 and 1940 census data. Working without the benefit of computers, staffers compiled the list in one week. Following the attack, President Roosevelt issued Executive Order 9066, authorizing military personnel to detain and relocate persons of Japanese ancestry. By the spring of 1942, the U.S. government forced persons of Japanese descent, including U.S. citizens, to relocate from their homes on the West Coast and report to relocation centers. An estimated 120,000 people, many of whom were U.S. citizens, were held without judicial review. John Miller and Stephen Moore, two libertarian scholars, contend, "The history of government programs indicates that privacy rights are violated routinely whenever expediency dictates" (Miller and Moore 1995).

Function Creep

The biometric-based "Big Brother" scenario would not happen instantly. Rather, when first deployed, biometrics would be used for limited, clearly specified, sensible purposes—to combat fraud, to improve airport security, to protect our children, and so on. But consider what Justice Louis Brandeis (of "right to privacy" fame) warned in his famous *Olmstead v. United States* dissent of 1927:

> Experience should teach us to be most on our guard to protect liberty when the Government's purposes are beneficent. Men born to freedom are naturally alert to repel invasion of their liberty by evil-minded rulers. The greatest dangers to liberty lurk in insidious encroachment by men of zeal, well meaning but without understanding.

What would inevitably happen over time, according to civil libertarians, is a phenomenon known as "function creep" or "mission creep": identification systems incorporating biometrics would gradually spread to additional purposes not announced or not even intended when the identification systems were originally implemented.

The classic example of function creep is the use of the Social Security Number (SSN) in the United States. Originated in 1936, the SSN's sole purpose was to

Woodward, John D.; Orlans, Nicholas; Higgins, Peter T.. Biometrics.

facilitate record-keeping for determining the amount of Social Security taxes to credit to each contributor's account. In fact, the original Social Security cards containing the SSN bore the legend, "Not for Identification." By 1961, the Internal Revenue Service (IRS) began using the SSN for tax identification purposes. By 2002, countless transactions from credit to employment to insurance to many states' drivers licenses require a Social Security Number and countless private organizations ask for it even when it is not needed specifically for the transaction at hand. From "Not for Identification," the SSN has become virtual mandatory identification.

Moreover, given the consequences of function creep, the size, power, and scope of government will expand as all citizens get their biometric identifiers thrown into massive government databases by the "men [and women] of zeal, well-meaning but without understanding" about whom Justice Brandeis warned. In effect, an old Russian proverb aptly identifies the danger of biometrics for freedom-loving Americans: "If you are a mushroom, into the basket you must go."

Reduction of the Individual's Reasonable Expectation of Privacy

Just as function creep implies that biometrics will gradually (and innocently) grow to be used by zealous, well-meaning bureaucrats in numerous, creative ways in multiple forums, function creep will also enable the government to use the new technology of biometrics to reduce further over time the citizenry's reasonable expectations of privacy.

Analogies can be drawn from previous cases in which the government has used cutting-edge technology to intrude in an area in which the private actor had manifested a subjective expectation of privacy. For example, the Environmental Protection Agency (EPA), in an effort to investigate industrial pollution, used "the finest precision aerial camera available" mounted in an airplane flying in lawful airspace to take photographs of Dow Chemical Company's 2,000-acre Midland, Michigan, facilities. Fearful that industrial competitors might try to steal its trade secrets, Dow took elaborate precautions at its facility. Despite the precautions the company took to ensure its privacy, the Supreme Court, in a 5–4 vote handed down in 1985, found that Dow had no reasonable, legitimate, and objective expectation of privacy in the area the EPA had photographed. The dissent noted that, by basing its decision on the method of surveillance used by the government, as opposed to the company's reasonable expectation of privacy, the Court ensured that "privacy rights would be seriously at risk as technological advances become generally disseminated and available to society" (*Dow Chemical Co. v. United States*, 476 U.S. 227 (1986)).

Some contend that biometrics is precisely the kind of technological advance the *Dow* dissenters warned about. Citizens no longer would have a reasonable expectation of privacy any time they use a biometric identifier because the gov-

ernment's use of biometrics and computer matching would be merely utilizing commercially available technologies.

Cultural, Religious, and Philosophical Objections

Other criticisms of the use of biometrics originate on cultural, religious, and philosophical grounds. These objections might not be shared by large numbers of people, but to the extent those who advocate them have sincerely held beliefs, they merit discussion.

Cultural: Stigma and Dignity

Simon Davies of Privacy International notes that it is no accident that biometric systems are being tried out most aggressively with welfare recipients. The British scholar contends that they are in no position to resist the State-mandated intrusion. Interestingly, in the 1995 GAO Report on the use of biometrics to deter fraud in the nationwide Electronics Benefit Transfer (EBT) program, the U.S. Department of the Treasury expressed concern over how finger imaging would impact on the dignity of the recipients and called for more testing and study.

While stigma and dignity arguments tied to the less fortunate elements of society have a strong emotional appeal, the available empirical data from Connecticut suggests that the majority of entitlement recipients actually support the use of biometrics. Some have criticized such surveys as flawed because the recipients could be reluctant to provide their true opinions because of retaliation fears.

Religious Objections

Several religious groups criticize biometrics on the ground that individuals are forced to sacrifice a part of themselves to a godless monolith in the form of the State. For example, certain Christians interpret biometrics to be a "mark of the beast," an objection based on language in the New Testament's "Revelation":

> [The Beast] causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: And that no man might buy or sell, save that he had the mark, or the name of the beast, or the number of his name.... And his number is six hundred, threescore, and six (Revelation, 13:16–18).

Certain Christians consider biometrics to be the brand discussed in Revelation and biometric readers as the only means of viewing these brands. For example, stressing that "the Bible says the time is going to come when you cannot buy or sell except when a mark is placed on your head or forehead," fundamentalist Christian Pat Robertson has expressed doubts about biometrics and has noted how the technology is proceeding according to scripture. And at least one religious group has complained that the hand geometry devices used by California were making "the mark of the beast" on enrollees' hands.

FTC Fines ChoicePoint $15 Million for Security Breach

Los Angeles Times (LATWP News Service) (CA) - Thursday, January 26, 2006

Author: *Joseph Menn*

The Federal Trade Commission hit data broker ChoicePoint Inc. with the largest civil penalty in the agency's history Thursday for allowing sensitive information on 163,000 consumers to get into the hands of Los Angeles con artists last year.

The commission levied a $10 million penalty, on top of $5 million in restitution, making a total worth more than 10 percent of the company's profit last year. The agency declared that the company gave false assurances to the public about its security precautions while being so careless that it sold information to a purported business customer whose own ChoicePoint file identified a link to possible fraud.

Other con artists posing as customers applied for multiple accounts from the same publicly available fax machine, submitted revoked business licenses and in at least one case omitted the applicant's surname, according to the commission.

While some of the FTC's allegations were previously reported, many of the details were new, including complaints that the company failed to inquire after would-be customers applied with suspended articles of incorporation, mismatching addresses on supporting documents, and contact numbers belonging to residential or cellular phones.

Revealed because of a California disclosure law, the ChoicePoint breach launched a national debate about data security that has prompted new laws in more than a dozen states and 18 pieces of proposed federal legislation.

Most are aimed at making it harder for identity thieves to get Social Security numbers and other information that can be used to open credit accounts and make fraudulent purchases in the names of innocent consumers.

In announcing Thursday's settlement, FTC Chairwoman Deborah Platt Majoras said the commission wanted to serve notice to other businesses that consumer information must be protected.

Data security "must be a priority for financial and corporate America," she said. Signaling that the agency would continue to lead in the enforcement of identity theft, she said consumers should know that "we will make sure that your information is safeguarded and you don't have to worry that it will fall into the wrong hands and harm you."

The action generally won praise from consumer groups. Thursday's penalty "is a lot of money," even for a big company like ChoicePoint, said Chris Hoofnagle, West Coast director of the nonprofit Electronic Privacy Information Center. "It shows that the FTC is getting serious about security."

ChoicePoint still faces several private lawsuits over the data breach. The Securities and Exchange Commission also is investigating whether Chairman Derek Smith and another top executive improperly sold company shares before the breach became public.

The company was informed of the problem months earlier by investigators with the Los Angeles County Sheriff's Department. They arrested a Nigerian national, Olatunji Oluwatosin, who pleaded guilty last month to committing $2.5 million in fraud and is facing at least seven years in jail.

Beginning in January 2002, Oluwatosin used fake businesses with mail drops in Beverly Hills, Hollywood and elsewhere to set up ChoicePoint accounts and access personal information on more than 1,500 people, according to the district attorney's office. Search warrants served on ChoicePoint turned up a much wider fraud

problem.

The FTC cited ChoicePoint for violating the Fair Credit Reporting Act, which requires buyers of credit reports to have a proper purpose, and for violating basic fair-practices laws. It said ChoicePoint unfairly failed to protect consumer information and was deceptive when it made such statements as "Every ChoicePoint customer must successfully complete a rigorous credentialing process."

In legal papers filed with the settlement, the FTC said ChoicePoint improperly released nearly 10,000 credit reports and that about 800 cases of identity theft resulted. The $5 million in restitution will be distributed to those people and future victims of the data breach.

ChoicePoint didn't admit to the FTC assertions or to any wrongdoing in the settlement. It did agree to revamp its procedures in several ways, including instituting mandatory visits to many customers. It also must submit to security audits every two years through 2026.

By itself, the financial payout will do modest harm to ChoicePoint. Even after a charge for the penalty, the Alpharetta, Ga., company reported fourth-quarter earnings of $28 million Thursday on revenue of $258 million.

ChoicePoint shares dropped $3.35, or 7 percent, to $42.95 after the settlement was announced.

Citizens for Privacy in Alaska

"Our goal is to make illegal the practice of requiring innocent people to provide fingerprints or other biometrics as identification when they are willing to show their driver's license (State/military issued ID) or a United States passport."

We are very concerned with the rapid erosion of our privacy rights, and we urge you to introduce legislation to strengthen our biometric privacy laws this session. If someone can present a valid US Passport OR a driver's license (State issued ID) as identification, they should be exempt from any biometrics (fingerprints)-as-ID mandate *(note that criminal background checks will not be affected by this legislation. This legislation is specifically focused on biometrics-as-ID mandates).*

	STATUS: AGREED WITH THE GOAL?	FIRST & LAST NAME	ORGANIZATION	TITLE	CITY & STATE	PERSONAL STATEMENT
	SEE STATEMENT	Whitney Brewster	Alaska State Director, Dept of Motor Vehicals	Director	Anchorage, AK	"The Alaska State Department of Motor Vehicals has no interest in capturing Alaskans fingerprints, retinal or iris scans, palm veins or other biometric information."

SENATOR BILL WIELECHOWSKI

SB 98—Biometric Information: What Are Other States Doing?

What are other states doing regarding the collection of biometric data?

In 2008, our office requested a research report asking which states have legislation preventing the collection of a person's biometric data, such as a fingerprints or DNA, for purposes other than law enforcement.

We received a comprehensive list of states that have laws prohibiting genetic discrimination in employment, prohibiting employers from requesting or requiring genetic information, prohibiting employers from performing genetic testing, and similar situations. In all, the researcher identified through the NCSL employment laws in 36 jurisdictions.

When it comes to non-genetic biometric information, the researcher identified 33 states which have some form of legislation, which includes a wide range of topic from prohibiting the use of lie detectors by anyone except peace officers in California, to requiring the Commissioner of Health and Social Services to examine the use of biometric identifiers for recipients of public assistance.

Among some of the more notable laws are Indiana, which prohibits the collection of personal information, including voice prints, by state agencies to that which is relevant and necessary to accomplish a statutory purpose; and New Hampshire which prohibits the collection of "biometric data" in connection with motor vehicle licensing.

Other states, such as Oregon, require those who apply for a driver's license to submit to the collection of biometric data.

Essentially, all states which have laws regarding DNA tend to protect that information at least for employment purposes, but the states vary greatly when it comes to other biometric information.

What About the Federal Government?

You will also find on Page 2 of the document in your packet titled, "Biometrics: Who's Watching You?" there is a description of some of the federal initiatives involving the biometrics. The most recent of these is the USA Patriot Act, which requires the use of biometric technology to identify foreign visitors, and the Enhanced Border and Visa Entry Reform Act of 2002, which is specific to border crossings.

LEGISLATIVE RESEARCH REPORT

NOVEMBER 20, 2008

REPORT NUMBER 09.031

STATE LAWS REGARDING BIOMETRIC PRIVACY

PREPARED FOR SENATOR BILL WIELECHOWSKI

BY ROGER WITHINGTON, LEGISLATIVE ANALYST

You asked for information regarding privacy. Specifically, you wished to know what states, if any, have laws that prohibit the collection of a person's biometric data, such as a fingerprint or deoxyribonucleic acid (DNA), for purposes other than law enforcement.

As you may know, the term "biometrics" is used for the various ways humans can be identified through unique aspects of their bodies. Fingerprints are probably the most commonly known biometric identifier. Other biometric identifiers include hand prints, vein dimensions, iris designs, blood vessels on retinas, body odor, walking characteristics, voice patterns, facial features, and genetic profile.[1]

The National Conference of State Legislatures (NCSL) collects information on actions state legislatures have taken to safeguard a persons' genetic information.[2] One common theme in state law is to protect employees and job seekers from genetic screening and discrimination. In Table 1, we provide NCSL's summary of state employment laws that pertain to a person's genetic information. As you can see from Table 1, genetic nondiscrimination in employment laws is now in place in 35 jurisdictions. In addition, laws in 19 states prohibit an employer from requesting genetic information or a genetic test from an employee; laws in 26 states prohibit an employer from requiring genetic information or a genetic test from an employee; laws in 16 states prohibit an employer from performing a genetic test on an employee; laws in 11 states prohibit an employer from obtaining an employee's genetic information or genetic test result; and laws in 14 states specify penalties for genetic discrimination in employment. As examples, we include as Attachment A genetic nondiscrimination employment laws from Arkansas, Iowa, New Hampshire, Oklahoma, and Wisconsin.

---

[1] The Privacy Rights Clearinghouse, *http://www.privacyrights.org/ar/Privacy-IssuesList.htm*.

[2] NCSL's summary of state genetic privacy laws can be found at *http://www.ncsl.org/programs/health/genetics/prt.htm*. Alaska's Genetic Privacy law can be found at AS 18.13.010 through AS 18.13.100.

Table 1: State Genetic Privacy in Employment Laws	
Provisions	**State**
Genetic discrimination prohibited in hiring, firing, and/or terms, conditions or privileges of employment	Arizona, Arkansas, California, Connecticut, Delaware, District of Columbia, Hawaii, Idaho, Illinois, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Oklahoma, Oregon, Rhode Island, South Dakota, Texas, Utah, Vermont, Virginia, Washington, Wisconsin
Employer Prohibited From Requesting Genetic Information Genetic Test	Arkansas, Connecticut, Idaho, Iowa, Kansas, Louisiana, Maryland, Massachusetts, Minnesota, Nevada, New Hampshire, New York, Oklahoma, Oregon, Rhode Island, South Dakota, Utah, Virginia, Wisconsin
Employer Prohibited From Requiring Genetic Information Genetic Test	Arkansas, Connecticut, Hawaii, Idaho, Iowa, Kansas, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Nebraska, Nevada, New Hampshire, New York, Oklahoma, Oregon, Rhode Island, South Dakota, Texas, Utah, Vermont, Virginia, Washington, Wisconsin
Employer Prohibited From Performing Genetic Test	California, Iowa, Louisiana, Massachusetts, Michigan, Minnesota, Nevada, New Hampshire, New York, Oklahoma, Oregon, Rhode Island, South Dakota, Vermont, Virginia, Wisconsin
Employer Prohibited From Obtaining Genetic Information Genetic Test Result	Arkansas, Idaho, Kansas, Massachusetts, Michigan, Minnesota, New York, Oklahoma, Oregon, South Dakota, Utah
Specific Penalties for Genetic Discrimination in Employment	Arkansas, Idaho, Iowa, Minnesota, Missouri, New Hampshire, New Mexico, Oklahoma, Rhode Island, South Dakota, Utah, Vermont, Virginia, Wisconsin
Notes:	Current through November 2007. Arizona Revised Statutes, §41-1463; Arkansas Code Annotated, §11-5-401 to 405; California Code Annotated, Government Code §12926 and §12940; General Statutes of Connecticut, §46a-60; Delaware Code Annotated, §19-710 to 711; District of Columbia Code, §2-1401.01; Hawaii Revised Statutes, § 378-01 to 10; Idaho Code, §39-8301 to §39-8304; Illinois Compiled Statutes, §410-513/25 and §215 ILCS 5/356v; Iowa Code, §729.6; Kansas Statutes Annotated, §44-1002, §44-1009; Louisiana Statutes, §23:302, §23:303; Maine Revised Statutes, 5 §19301 and 5 §19302; Annotated Code of Maryland, Human Relations Commission §49B-15 to 16; Massachusetts General Laws, §151B; Michigan Compiled Laws, §37.1201, §37.1202; Minnesota Statutes, §181.974; Missouri Revised Statutes, §375.1300, §375.1306; Revised Statutes of Nebraska, §48-236; Nevada Revised Statutes, §613.345; New Hampshire Revised Statutes, §141-H; New Jersey Statutes, §10:5-5, §10:5-12; New Mexico Statutes, §24-21-1 to 7; New York Consolidated Laws, Executive Code §292, §296; General Statutes of North Carolina, §95-28.1A; Oklahoma Statutes, §36-3614.2; Oregon Revised Statutes, §659A.300 to 306; General Laws of Rhode Island, §28-6.7-1; South Dakota Compiled Laws, § 60-2-20; Texas Code, Labor Code 2§21-402; Utah Code, §26-45-103; Vermont Statutes, §18-9333; Code of Virginia, §40.1-28.7:1; Revised Code of Washington, §49.44.180; Wisconsin Statutes, §111.372.
Source:	National Conference of State Legislatures, *http://www.ncsl.org/programs/health/genetics/ndiscrim.htm*.

The state laws described above do not generally extend privacy protections to non-genetic based biometric identifiers such as fingerprints. We were unable to locate a comprehensive list of state laws that prohibit the collection of a person's non-genetic biometric data. In conjunction with NCSL, we searched the statutes of each state for laws that pertain, to some degree, to an individual's non-genetic biometric data and identified 33.

Most of the laws identified by our search are quite dissimilar; they range from preventing schools from collecting the biometric information of students without the written consent of the student's parent or guardian, to establishing inmate telephone systems within state prisons that can identify inmates through biometric identifiers. None of these laws, however, appear to pertain to your

issue of expressly prohibiting employers from collecting non-genetic biometric information from their employees or prospective employees.[3] We include each of these 33 laws as Attachment B; a brief summary of each of these laws is as follows.

Arizona Revised Statutes § 15-109: Prevents schools from collecting biometric information from a pupil unless the pupil's parent or guardian gives written permission.

California Codes, Civil Code § 52.7: Except as provided in law, a person shall not require, coerce, or compel any other individual to undergo the subcutaneous implanting of an identification device.

California Codes, Financial Code § 13082: Adding tactually discernible numerical keypad, such as fingerprint biometrics, to point-of-sale devices to aid visually impaired individuals.

California Codes, Penal Code § 637.3: With the exception of peace officers carrying out his or her official duties, no person or entity shall use any system which examines or records in any manner voice prints, or other voice stress patterns of another person to determine the truth or falsity of statements made by such other person without his or her express written consent given in advance of the examination.

California Codes, Penal Code § 4017.1: Except as provided in law, any person confined in a county jail, industrial farm, road camp, or city jail who is required or permitted by an order of the board of supervisors or city council to perform work, and any person while performing community service in lieu of a fine or custody or who is assigned to work furlough, may not be employed to perform any function that provides access to personal information of private individuals, including the following: addresses; telephone numbers; health insurance, taxpayer, school, or employee identification numbers; mothers' maiden names; demand deposit account, debit card, credit card, savings account, or checking account numbers, PINs, or passwords; social security numbers; places of employment; dates of birth; state or government-issued driver's license or identification numbers; alien registration numbers; government passport numbers; unique biometric data, such as fingerprints, facial scan identifiers, voice prints, retina or iris images, or other similar identifiers; unique electronic identification numbers; address or routing codes; and telecommunication identifying information or access devices.

Connecticut General Statutes § 17b-30: Requires the Commissioner of Social Services and the Commissioner of Motor Vehicles to examine available biometric identifier systems to be used by the state's temporary family assistance program and any other program determined by the Commissioner of Social Services.

---

[3] The list does not include laws that states have adopted in relation to the National Crime Prevention and Privacy Compact or laws that refer to biometrics information in specific identity theft laws. The National Crime Prevention and Privacy Compact Act is a federal law that establishes a method by which states can exchange criminal records for noncriminal justice purposes without charging each other for the information. The URL for the Federal Bureau of Investigation's National Crime Prevention and Privacy Compact Act website is *http://www.fbi.gov/hq/cjisd/web%20page/cc.htm.*

Florida Annotated Statutes § 311.125: Establishes the Uniform Port Access Credential Card, which is required of those individuals who work at Florida's seaports. This card must include at a minimum a digital full-face photograph, a digital fingerprint, a multilayered security process, a two-dimensional barcode with technology specifications that will allow the unique biometric identifiers to reside in the barcode, a unique identifying code or number, scanning capability to compare required identifiers with information on file in the central database.

Illinois Compiled Statutes 105 ILCS 5/10-20.40 and 105 ILCS 5/34-18.34: Establishes minimum policies for school districts that collect biometric information from students.

Illinois Compiled Statutes 740 ILCS 14/1 (2008), Biometric Information Privacy Act: Relates to the retention, destruction, and privacy of an individual's biometric information. Prohibits unauthorized disclosure and exempts such information from the Freedom of Information Act. Establishes that no provision be construed to conflict with the Criminal Identification Act; the Private Detective, Alarm, Security, Fingerprint Vendor, and Locksmith Act, or another similar act.

Indiana Statutes § 4-1-6-2: Limits the collection, maintenance, and use of personal information, including voice prints, by state agencies, to that which is relevant and necessary to accomplish a statutory purpose.

Indiana Statutes § 26-2-8-116: Allows electronic signature authentication and identification to be used for certain individuals, under certain circumstances.

Louisiana Revised Statutes 37:1182: Grants the Louisiana Board of Pharmacy the authority to require applicants for any pharmacological license, registration, certificate, permit, or any other designation, to provide the information necessary to verify an applicant's identity including birth certificates, passport documents, legal status documents, and any other biometric information deemed appropriate by the board.

Nebraska Revised Statutes § 87-802: Requires that individuals be notified in the event of a security breach that compromises their personal information. Personal information is defined as a name in combination with another identifying data element, including a fingerprint, voice print, or retina or iris image, or other unique physical representation.

Nevada Revised Statutes § 639.2353: Allows a prescription to be transmitted electronically without the health care practitioner's signature if it contains a facsimile signature, security code or other unique identifier; or a voice recognition system, biometric identification technique or other approved security system is used to identify the practitioner.

New Hampshire Revised Statutes 91-A:10: Prevents the state from releasing data sets that contain biometric identifiers.

New Hampshire Revised Statutes 260: 10-b: Prohibits the collection and retention of any biometric data in connection with motor vehicle registration, operation, and driver licensing. "Biometric data" includes voice data used for comparing live speech with a previously-created speech model of a person's voice.

New Jersey Statutes § 39:2A-29: Permits the New Jersey Motor Vehicle Commission to make technological improvements including the modernization of software and hardware, the addition of surveillance cameras, alarms, and access systems, and the use of biometrics.

North Carolina General Statutes § 130A-480: Prohibits the collection of biometric identifiers, including voice prints, within statute that directs the State Health Director to develop a "syndromic" surveillance program for hospital emergency departments in order to detect and investigate public health threats resulting from a terrorist incident or epidemic.

Ohio Revised Code 3701.75: Establishes standards for using electronic signatures in health care records. One standard requires that some electronic signature systems use either a two-level access control mechanism that assigns a unique identifier to each system user or a biometric access control device.

Oregon Revised Statutes § 807.024: Requires a person who applies for issuance, renewal or replacement of a driver license, driver permit or identification card to submit to collection of biometric data by the Department of Transportation for the purpose of establishing his or her identity.

Pennsylvania Statutes § 1802: Appointees, employees and prospective employees engaged in the service of the Commissions or the Board of Gaming shall submit to fingerprinting and photographing by the Pennsylvania State Police or by a local law enforcement agency.

South Carolina Code § 30-2-10: Requires that all state agencies, boards, commissions, institutions, departments, and other state entities develop privacy policies and procedures to ensure that the collection of personal information (including biometric identifiers) pertaining to the citizens of South Carolina is limited to such personal information required by any such entity to fulfill a legitimate public purpose.

Texas Statutes, Business and Commerce Code § 35.50: Provides that biometric identifiers may not be captured for commercial purposes except with prior notification and consent. Additionally provides that once captured, the biometric information may not be sold, leased, or otherwise disclosed unless the individual consents to the disclosure; the disclosure completes a financial transaction that the individual requests or authorizes; the disclosure is required or permitted by a federal or state statute; or the disclosure is made by or to a law enforcement agency for a law enforcement purpose.

Texas Statutes, Business and Commerce Code § 503.001: Defines a "biometric identifier" as a retina or iris scan, fingerprint, voiceprint, or record of hand or face geometry. This law establishes that a person may not capture a biometric identifier of an individual for commercial purposes unless the person informs the individual before capturing the biometric identifier, and receives the individual's consent to capture the biometric identifier.

Texas Statutes, Government Code § 495.025: The State requests proposals from private vendors for a contract to provide pay telephone service to eligible inmates confined in facilities operated by the department. The telephone system must have the capacity to use a biometric identifier of the inmate making the call.

Texas Statutes, Government Code § 531.1063: The Texas Health and Human Services Commission and the Texas Department of Human Services shall develop and implement a Medicaid Fraud Pilot Program. The program must include participant smart cards and biometric readers that reside at the point of contact with Medicaid providers, recipients, participating pharmacies, hospitals, and appropriate third-party participants; and a secure finger-imaging system that is compliant with the Health Insurance Portability and Accountability Act (HIPAA).

Texas Statutes, Government Code § 560.001: Provides that a government body in possession of a biometric identifier may not sell, lease, or otherwise disclose the information unless the individual consents to the disclosure; the disclosure completes a financial transaction that the individual requests or authorizes; the disclosure is required or permitted by a federal or state statute; or the disclosure is made by or to a law enforcement agency for a law enforcement purpose.

Texas Statutes, Transportation Code § 521.032: Establishes the Enhanced Driver's License or Personal Identification Certificate which requires the applicant to submit a biometric identifier as designated by the Department of Transportation.

Vermont Statutes 23 V.S.A. § 634: Prevents the Department of Motor Vehicles from implementing any procedures or processes for identifying applicants for licenses, learner permits, or non-driver identification cards that involve the use of biometric identifiers.

Virginia Code § 2.2-3801 through § 2.2-3809: Includes voice prints in the definition of personal information. Requires that state agencies collect, maintain, use, and disseminate only that personal information permitted or required by law. This law prohibits agencies from disseminating information to another system without specifying requirements for security and usage including access limitations, and receiving reasonable assurances that those requirements and limitations will be observed.

Revised Code of Washington § 46.20.037: This law requires implementation of a voluntary biometric matching system for driver's licenses and identification cards within two years of the full implementation of the Real ID Act. This law states that the biometric matching system is to be used only to verify the identity of an applicant for a renewal or duplicate driver's license or identification card by matching a biometric identifier submitted by the applicant against the biometric identifier submitted when the license was last issued.

West Virginia Code § 17B-2-12a: Vision screening conducted as part of driver's licensure shall not be used to collect any type of personal biometric identifying information.

Included in your request was a document entitled "The Alaskan Biometric Collection Act." As you may know, within this document the author notes that the University of Alaska, Fairbanks requires individuals taking the Certified Public Accountant (CPA) examination to submit to fingerprinting before and possibly during the examination. This fingerprint condition is, however, required by the American Institute of Certified Public Accountants (AICPA), the national, professional organization for all Certified Public Accountants which sets the auditing standards and the ethical standards for all CPAs; the National Association of State Boards of Accountancy (NASBA), which

serves as a forum for the boards of accountancy throughout the United States; and Prometric, which provides testing services for those seeking to take the CPA exam.[4] According to Ken Bishop, Senior Vice President for NASBA, no state prevents Prometric—or any of its subcontractors (the UAF is one of these subcontractors)—from obtaining fingerprint data from those taking the CPA exam.[5]

I hope you find this information to be useful. Please do not hesitate to contact us if you have questions or need additional information.

[4] The URL for the American Institute of Certified Public Accountants is *http://www.aicpa.org/*. The URL for the National Association of State Boards of Accountancy is *http://www.nasba.org*. The URL for Prometric is *http://www.prometric.com/*.

[5] Ken Bishop, Senior Vice President for NASBA, can be contacted at 615-312-3755. In addition, Mr. Bishop notes that Prometric doesn't capture or retain a copy of an individual's fingerprint. Prometric captures an algorithm, or a mathematical representation, based on a person's fingerprint.

Re: Senate Bill 98
ACLU Statement of Support

Chair Wielechowski, Vice-Chair Paskvan:

Thank you for the opportunity to submit a written statement of support for SB 98.

The American Civil Liberties Union of Alaska represents thousands of members and activists throughout the State of Alaska who seek to preserve and expand individual freedoms and civil liberties guaranteed under the United States and Alaska Constitutions.

From a constitutional rights and privacy perspective, **the ACLU of Alaska endorses protections for individuals' personal biometric information, and applauds the proactive introduction of this Bill to avoid violations of privacy before they occur**.

Need for Biometrics Legislation

Recent advances in genomics, bioinformatics and data mining are encouraging a worldwide proliferation of "gene banks" – large collections of

biological samples that usually include genetic information derived from those samples, as well as linked medical, family history or lifestyle information. The use of these biological repositories for genetics research could lead to advances in public health, such as the identification of genetic factors in diseases, or the development of diagnostic tests. ***On the other hand, they also create an avenue for privacy infringements, stigmatization and discrimination, and improper commercial exchange of personal data.***

The ACLU supports legislation to prevent privacy infringement and genetic discrimination. SB 98 can advance these goals.

Protections Against Coerced Consent

Given the ability to condition the provision of necessary services on the disclosure of personal information, we are also pleased to note that SB 98 is intended to protect against coerced "consent."

Given the sensitivity of biometric information, and the plethora of medical information obtainable from it, we endorse legislation that would protect Alaskans from improperly being compelled to waive their rights to protect their personal, private information.

Thank you again for the opportunity to share our support of this bill.

Sincerely,

Jeffrey Mittman
Executive Director
ACLU of Alaska

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 098 \A

Analysis

This bill impacts every state governmental entity that retains, analyzes, or distributes biometric information as described in the bill to ensure that the state agencies comply with the provisions of the bill. This is a new function and will require careful review of other state and federal laws to see if an exemption applies. The Department of Law will need to work with state agencies regarding consents or other authorizations for release of medical records to be sure they comply with the provisions of the bill. This bill requires a specific release of information to use biometric information, such as fingerprints, photos, etc... Also, this bill includes a private right of action if this statute is violated. With the private right of action section, it is not clear how this will affect the state in terms of defending actions brought. The state uses biometric information in a number of instances, such as occupational licensing, back ground checks, etc...

As such, the fiscal impact of this legislation cannot be accurately determined at this time.

SB 104 – MOBILE HOMES AS REAL PROPERTY

Sponsor Statement

Senate Bill 104 establishes procedures to convert manufactured homes to real property, through a defined process within the Division of Motor Vehicles. This change will give the owners of manufactured homes better access to traditional mortgage financing, which often features lower interest rates.

Currently, when a manufactured home is affixed to a permanent foundation on land owned by an individual, the vaguely defined title surrender procedure used by the Division of Motor Vehicles lacks a record notice. Without a record notice, homeowners are often left with unmarketable titles, and lenders hold unperfected security interests in the property, placing all parties in a real estate transaction – the buyer, the lender, and the seller - at risk.

Conversion will help increase home values for consumers, give security to lenders and provide fixed procedures for the DMV to follow. Nothing requires the conversion of a manufactured home in the legislation, leaving that choice to consumers.

Many Alaskans live in manufactured homes. This legislation treats residents that permanently affix a manufactured home to land they own the same as if their home was built on the property. I urge you to support this fair legislation.

MANUFACTURED HOUSING RESOURCE GUIDE

Titling Homes as Real Property

BACKGROUND

For 17 million Americans, the pathway to the American Dream of homeownership is through manufactured housing. Today's manufactured housing is a high-quality and affordable entry into asset and wealth building for many families. Assets are the foundation for promoting long-term economic opportunity for most Americans. They provide security during unexpected financial troubles. They foster long-term planning and the drive to set and reach dreams, such as going to college and starting a business. For the last few generations of Americans, homeownership has been the bedrock of household financial assets. Even during times of economic insecurity in the housing market, homeownership remains the primary source of wealth for many Americans and continues to be the American Dream.

One hurdle that keeps many owners of manufactured homes from enjoying the same benefits as owners of site-built homes is classification as personal property. Whether a home is classified as real or personal property significantly affects the home's asset-building potential, mostly due to financing and tax implications. In lending as well as state and local public policy, manufactured homes are often treated as if they are cars, even though they look as good, are built as well and last as long as traditionally built homes. They're often issued titles as motor vehicles, rather than real estate. They are commonly assessed with "blue book" values and are often taxed as personal property. This makes manufactured homes more expensive to finance and lowers resale values, reducing homeowners' opportunities to enjoy property appreciation and build equity.

About This Legislative Guide

This guide provides advocates and practitioners with the information they need to assess the benefits of converting manufactured homes from personal to real property and to develop strong policies that allow for the easy and voluntary conversion of homes to real property. It is intended to provide a detailed overview of the laws and regulations involved at the state and federal levels. This guide:

- Outlines the importance of real property designation in seven key areas;
- Analyzes current state statutes; and
- Provides recommendations for strong policies that allow for the classification of manufactured homes as real property.

MANUFACTURED HOMES ARE HOMES: THE IMPORTANCE OF REAL PROPERTY DESIGNATION

Black's Law Dictionary defines real property as "[l]and, and generally whatever is erected or growing upon or fixed to land." On the other hand, it defines personal property as "[i]n broad and general sense, everything that is the subject of ownership, not coming under the denomination of real estate."

Manufactured homes are traditionally titled as personal property, largely due to the modern manufactured home's mid-20th century roots in the travel trailer industry. Advances in building technology and increased government regulation have resulted in a quality home construction comparable to site-built homes. Legally, however, manufactured homes are still bound by many of the same norms as their travel trailer ancestors, including use of certificates of title, similar to an automobile.

Although some manufactured homes are designated real estate and despite their many similarities to site-built homes, most manufactured homes are still considered personal property, absent an affirmative action by the homeowner to change its designation. All too often, however, homeowners are not permitted to classify their homes as real property, even if they take affirmative action in an attempt to do so.

Each category has advantages and disadvantages (see chart on "The Importance of Designation as Real Property"), but homeowners generally benefit from classification as real property, particularly when financing the home. The real property designation generally provides more favorable status in terms of taxation and consumer protection. Although more than three-quarters of states have some statutory method for converting a manufactured home from personal property to real property, these existing conversion statutes are often inadequate. Following is a discussion of the implications of property designation status.

The Importance of Designation as Real Property: A Summary of Advantages and Disadvantages for Homeowners

Advantages of Real Property Classification	Disadvantages of Real Property Classification
Increased availability of favorable financing	Possible greater tax burden
More favorable titling options	Possible loss of some consumer protections
Equitable taxation	Limitations on bankruptcy cram down
Possibility of homestead exemptions	
Better consumer protections	
Stronger protections for heirs	
More vibrant resale market	
Equitable safeguards upon default	

Designation as real property affects owners of manufactured housing in seven key areas. These seven key areas affected touch each phase of the homeownership process from appraisals to financing, to taxation, to resale, and include:

1. Appraisals and Sales
2. Financing
3. Taxes and Tax Exemptions
4. Federal and State Consumer Protections
5. Protections for Spouses and Joint Ownership
6. Rights upon Default
7. Bankruptcy

1. Appraisals and Sales

Home appraisers and real estate agents must typically be licensed by the state. In some states, there are restrictions placed on these professions regarding real property, and sometimes appraisers are not permitted to appraise personal property. Even where there are regulations in place allowing real estate appraisers to appraise manufactured housing considered personal property, the confusing status of such housing is discouraging, even for seasoned appraisal professionals. Difficulties in obtaining an accurate appraisal also severely limit financing options for prospective purchasers and homeowners seeking refinancing, as most traditional mortgage lenders require an appraisal. Similarly, in some states real estate agents and brokers are prohibited from listing properties not classified as real property. This can be a tremendous disadvantage to owners of homes considered personal property, because it is difficult to sell a home without the assistance of an agent. These limitations not only hurt individual homeowners, but also harm the broader resale market for manufactured homes.

Imprecise conversion statutes make it harder for appraisers to appraise manufactured homes. It is evident that both homeowners and the industry would benefit from clear, easily monitored regulations that allow appraisers to more accurately determine the legal status and value of a home (Georgia and Alabama are two examples of states where appraisal boards have made efforts recently to clear up confusion that may arise after converting a manufactured home from personal to real property). Policies that allow clear and easy determination of a home's status as real property would make appraisals more accurate, lenders more comfortable with the knowledge that the home's status is settled, and homes easier to sell, as buyers would be assured of a home's status.

2. Financing

Most site-built homes are financed by a real estate mortgage, while manufactured homes classified as personal property are financed by chattel lending. Chattel is the legal term for personal property, as opposed to "real" property, which generally includes land and the structures attached to the land. Chattel loans, which include loans for televisions and automobiles, differ in many respects from mortgages. The key disadvantages to chattel financing of homes compared to conventional mortgage financing include shorter loan terms (typically 20 years instead of 30), higher interest rates (at least two to five percentage points higher) and a smaller pool of lenders from which to choose.

Permitting conversion of a manufactured home to real property can improve financing options, but it does not automatically permit the owner or purchaser to obtain conventional financing terms. However, designation of a manufactured home as personal property is almost certain to preclude favorable, conventional financing terms.

3. Taxes and Tax Exemptions

Although each state tax code is unique, states typically differentiate between real and personal property in several situations. Manufactured homes are almost universally considered personal property at the time of purchase, even if they are later converted to real property (unless the home is a used unit and was converted to real property by a previous owner.) As such, the buyer pays sales tax at purchase. In contrast, buyers of site-built homes usually pay excise or transfer taxes, which are calculated at a lower rate that factors in both the home purchase transaction and a sales tax on building materials. Because of this different tax structure, in states without a sales tax reduction or exemption for buyers of manufactured homes homebuyers are typically taxed at a far higher rate when buying a manufactured home The inequity is exacerbated when a home is sold as personal property and then converted to real property. In this case, the home is often taxed at a higher rate (i.e. as personal property) upon sale, but after conversion the homeowner's annual property tax bill is higher than it would have been, because real property is taxed at a higher annual rate than personal property tax rate.

This classification also affects the broader community by determining which government entity receives the tax payment. Real property taxes are typically paid to a local municipality, while in many jurisdictions taxes on personal property and sales tax revenue go to the state. There are significant revenue consequences for government entities when the classification of homes is changed; the fact that changing the classification of manufactured homes creates winners and losers in regard to tax revenue can make reform difficult.

Exempt or protected property, which may not be subject to taxation or may be unavailable to creditors seeking to enforce judgments, is also affected. A home's classification as real or personal property may also affect the owner's ability to claim the property as exempt. One such issue that many states have addressed is the homestead exemption. In many states, the homestead exemption applies to a manufactured home regardless of property classification. Thus, even if a manufactured home is treated as personal property for most purposes, it may qualify for the homestead exemption because of the liberal construction of homestead exemption laws in many states. However, in some states the applicability of the homestead exemption to manufactured homes has not been clearly established.

4. Federal and State Consumer Protections

Some federal and state consumer protection statutes apply only to real property, while others apply only to personal property. Although such distinctions can be explained by the separate evolution of laws dealing with goods and services and laws regulating real property transactions, the distinctions can lead to results that are inconsistent and at times inequitable. Such inconsistencies are especially apparent when looking at a manufactured home transaction, because the same home may be considered goods or real property. The distinction can have important consequences for the homeowner. While the home remains the same, the protections that apply depend upon the home's classification as real or personal property. A discussion of existing federal and state laws and their consequences for owners of manufactured homes follows.

- ***Federal Truth in Lending Act.*** The federal Truth in Lending Act (TILA) requires certain disclosures in any consumer credit transaction. It only applies to loans over $25,000 if the creditor takes a security interest in the borrower's principal dwelling. This is true for both real and personal property, and it covers manufactured homes. Thus, TILA covers credit secured by a manufactured home that is the consumer's principal dwelling regardless of whether the home is considered real or personal property.

- ***Federal Real Estate Settlement and Procedures Act.*** The federal Real Estate Settlement Procedures Act (RESPA) requires disclosures about closing costs (both before and at the time of settlement), and notices about escrow accounts, changes in loan servicing, and the right to obtain account information through a written request. It also prohibits kickbacks

and unearned fees for settlement services, charges for preparation of certain documents, and steering of borrowers to a particular title insurance company. Furthermore, it regulates the handling of escrow accounts. RESPA applies to all loans secured by a first or subordinate lien on one-to-four family residential real property. The loan must also be made by a federally insured lender or be federally related in a manner specified by the law. The U.S. Department of Housing and Urban Development (HUD) regulations interpreting RESPA limit the Act's coverage to certain mortgage loans and to real property.

The regulations do provide RESPA protection to certain owners of manufactured homes, as they include coverage for loans secured by real property upon which there is a manufactured home. However, the regulations do not explicitly state that any manufactured home classified as real property is covered by RESPA, an omission that calls for clarification. Loans on homes classified as personal property on leased land are clearly not covered by RESPA.

- ***The Federal Credit Practices Rule and the Federal Reserve Board's Regulation AA, Unfair or Deceptive Acts or Practices.*** The Federal Trade Commission (FTC) has authority to create rules that define and prevent unfair or deceptive acts or practices. One such rule is the Credit Practices Rule. It limits late charges and informs cosigners of their liability, while also prohibiting consumer credit contracts from containing confessions of judgment, wage assignments, and waivers of exemption. Although the rule explicitly excludes credit involving the purchase of real property, it is silent on other types of real estate loans (e.g. refinancing or lines of credit. Accordingly, although the rule clearly applies to credit involving the purchase of a home considered personal property, there is some ambiguity as to its application when a home is real property.

  The Credit Practices Rule does not apply to creditors outside of the FTC's authority, including banks, savings and loans, and credit unions. The regulators of these three types of entities have their own versions of the rule, however. The Federal Reserve Board (FRB) adopted a version of the Credit Practices Rule, and its guidelines defer how the dwelling is treated to state law, but if it is considered real property then the transaction would be exempt from this rule. The Office of Thrift Supervision (OTS) enacted an analogous rule that excludes real property and looks to state law to make that determination. The National Credit Union Administration (NCUA) enacted a similar rule applicable to credit unions and provides no exemption for real property loans.

- ***The Federal Fair Housing Act.*** The federal Fair Housing Act prohibits discrimination in the sale, rental or financing of homes. Analysis of the scope of the Act is difficult because different sections use different language to describe which transactions are covered. In most instances the Act applies to dwellings, which would certainly include manufactured homes, however one section ambiguously applies to dwellings and also to refinance loans secured by real estate. Although no cases appear on point, arguably the Act applies to the sale of all homes, but to refinancing of a manufactured home only if it is considered real property.

- ***The Federal Magnuson-Moss Warranty Act.*** The Magnuson-Moss Act regulates, simplifies and standardizes written warranties, implied warranties and service contracts. It applies only to personal property – not real property – and it covers the sale of both new and used goods. The Act has almost universal application to the sale of new manufactured homes, because even in states where a home may be converted to real property, it is generally classified as personal property at the time of sale.

- ***State Warranty Laws.*** Article 2 of the Uniform Commercial Code (UCC) sets forth warranty law for goods and has been enacted into law in every state but Louisiana. The UCC addresses both express and implied warranties and also sets forth consumer remedies for breach of warranty. Article 2 of the UCC defines goods as "all things (including specially manufactured goods) which are movable at the time of identification to the contract for sale." Although Article 9 of the UCC makes more specific reference to the definition of goods to be inclusive of manufactured homes, the Article 2 definition appears to be broad enough to cover new manufactured homes, because they are movable when manufactured, even if they are or will be permanently placed upon land or titled as real property. If a home is attached to land and sold as part of the land, however, it is less likely to fall within the scope of Article 2 of the UCC. In such instances common law warranties may apply, or courts may look to the UCC by analogy. Regardless, it is the permanent attachment to the land rather than the home's designation as real or personal property that will determine applicability.

- ***State Laws Prohibiting Unfair and Deceptive Acts and Practices.*** All 50 states have at least one enacted statute applicable to most consumer transactions designed to prevent deception and abuse, though not all apply to real property transactions. In some states real property is excluded because courts have ruled that real estate is not "goods or services," terminology used in many of the statutes. In other states, however, such language includes real property. Some statutes explicitly cover real property or all property. In other states, courts have found legislative intent to cover real property where the statute is silent about coverage of real estate. Even in states where the statute does not apply to the sale of real estate, services and personal property related to such transactions may be covered.

5. Protections for Spouses and Joint Ownership

At common law, "dower interest" protects a wife by not allowing her to be "disinherited" by her husband; a "curtsey interest" provides a similar protection for a husband. Both interests typically apply only to real property. Some states retain the dower and curtsey interest, but most states provide a similar protection for spouses and children through a concept known as an "elective share." States that use elective shares may still have protections for real property not available for personal property, such as a requirement that any conveyance of the homestead be authorized by both spouses, which may or may not include manufactured homes not considered real property. This has tremendous impact on families living in manufactured homes. If the home is titled in only one spouse's name, that spouse could transfer the home without obtaining any consent from the other spouse. Were the home real property, lenders involved in the closing would require that both spouses consent to the transfer.

Furthermore, there are different ways by which two or more people can jointly hold title to property. The co-owners may have an undivided interest in the property that each owner may transfer or bequeath, or the ownership may include a right of survivorship, which provides that upon the death of one owner, the other takes full title to the property, subject to the liabilities of the decedent. At common law, married couples may hold real property as "tenants by the entireties." Some states now allow both real and personal property to be held by the entireties, while other states have enacted special statutes extending the right to hold property as tenants by the entireties to manufactured homes. A tenancy by the entireties provides some advantages not available to other forms of co-ownership. Neither spouse can individually transfer or encumber the real property in a way that will affect the other spouse's right of survivorship in the whole property. Unlike other types of co-ownership, a creditor cannot attach or execute upon entireties property to collect a debt owed by only one of the property owners; entireties property can only be attached for joint debts. This is a significant disadvantage for owners of manufactured homes classified as personal property and not allowed to be held by the entireties.

6. Rights upon Default

The distinction between real property and personal property is especially important in the event of default. When a homeowner fails to make payments, the rights and responsibilities of the homeowner and lender depend upon the home's classification. If a home is personal property, the rights of the creditor and homeowner are governed by the UCC. Article 9 of the UCC applies to any contractual transaction that uses personal property as security. If a manufactured home is personal property and not affixed to real property, then it is governed only by Article 9 or other state laws dealing with repossession – not by state foreclosure law.

Such a home is generally subject to self-help repossession: a taking of the home by the lender without any oversight. Such repossession does not allow the homeowner to assert any claims or defenses that might stop the repossession and is also likely to involve the taking of the homeowner's household goods and belongings. The primary restriction that the UCC places on self-help repossession is that the creditor is liable to the consumer if he or she breaches the peace during the repossession.

If a home is real property, then in most states the creditor must use the foreclosure process when a homeowner defaults. In some states, foreclosure is a relatively balanced process, with judicial supervision, reasonable advance notice to the homeowner, and an opportunity for the homeowner to present defenses prior to foreclosure. Several states, however, allow nonjudicial foreclosure. In these states, a home (whether site-built or manufactured) can be sold by the creditor without any involvement of a judge and with minimal notice (as little as 14 or 15 days, respectively, in Virginia and Georgia, for example). While in the vast majority of states the foreclosure process provides more protections, in isolated cases when the homeowner lives in nonjudicial foreclosure states, classifying the homes as personal property may in fact provide more protections.

It is important to note that when a home is placed on real property the home may become a "fixture." UCC Article 9 defines fixtures as goods that have become so related to particular real property that an interest in them arises under real property law. When a home is a fixture, the lender may choose a UCC remedy or state foreclosure law, unless there is a law that specifies a procedure for converting a manufactured home to real property, which may specify the default remedy.

7. Bankruptcy

Bankruptcy Code Section 1322 enables bankruptcy courts to modify the rights of holders of most secured claims and may modify the payment amount, defer payments, or eliminate a creditor's lien. The modification may allow a consumer filing bankruptcy to keep a possession that secures a loan while reducing the monthly payment. This right to modify has limitations, including the limitation that applies to debts secured by real property that is the debtor's principal residence. This limitation means that owners of manufactured homes classified as real property will generally not be allowed to modify a first mortgage on their home. Although a homeowner whose home is not real property was previously eligible for such a modification, recent changes to bankruptcy law make it unclear whether the homeowner can modify a personal property loan on their primary residence.

For now, real property designation may be a disadvantage to some homeowners if courts continue to use the distinction between real and personal property to determine whether a loan is eligible for modification. Homeowners whose manufactured homes are classified as real property may not be able to modify debts secured by the home, whereas they would be eligible for a cram down if the home were personal property. However, several recently introduced bills propose permitting bankruptcy courts to modify the terms of real property loans on a borrower's principal residence, which would make the home's classification less important.

ANALYSIS OF STATE STATUTES THAT ALLOW CONVERSION FROM PERSONAL TO REAL PROPERTY

Approximately three-quarters of the states have statutes that set forth a procedure to convert a manufactured home from personal to real property and document that conversion. Generally, the procedure involves surrendering the certificate of title or manufacturer's certificate of origin and then filing an affidavit in the local county land records. Typically, the manufactured home must be permanently affixed to the land, a concept often specifically defined. Many states also require that the homeowner own the land in addition to the home. Other states allow a home to be converted to real property if it is permanently affixed to land that the owner is renting, typically requiring that the lease be for a minimum specified period of time.

Many state statutes that allow homes on rented land to be converted to real property were created to allow financing of manufactured homes under the Freddie Mac Leasehold Estate Mortgage Program. Fannie Mae manages a similar program that is being piloted in New Hampshire. Statutes that allow homes on rented land to be treated as real property have particular significance in resident-owned communities, and communities owned by nonprofits or community land trusts because in such situations, each homeowner rents a lot from the cooperative, nonprofit or land trust. Some statutes allow homes under these conditions to be treated as real estate.

Title purging after conversion to real estate is critical in order to avoid opportunities of fraud and provide lenders with the security of clear ownership by the homeowner. A state that does not have a title purging statute may still grant requests to cancel a manufactured home's certificate of title. For example, if a home has a certificate of title, a state motor vehicle department may grant a request to cancel the title upon a showing that the home is not capable of being operated on a public highway. Some states have administrative rules allowing cancellation of the title. Even without a title purging statute, a state motor vehicle department may agree to cancel a title if the owner shows that a home no longer meets the jurisdiction's definition of motor vehicle because it has been attached to the land. However, as discussed in a later section, the effect of title purging, by statute or otherwise, may not always be clear. A few states, such as New York, specifically forbid title purging.

Strengths of Existing State Conversion Laws

Cancellation of Certificate of Title. Conversion statutes in states that use a certificate of title for manufactured homes generally also prescribe procedures to make sure that the certificate of title is cancelled when the home is converted to real property. This is key, because the coexistence of two title documents – the certificate of title and the deed – enables an unscrupulous owner to sell the manufactured home twice, assigning the certificate of title to one buyer and conveying a deed to the other.

Protection of Secured Lenders. Most conversion statutes ensure the protection of secured parties. Before a state allows for the conversion of a manufactured home from personal to real property, they typically require the secured party to either release its security interest or accept a mortgage in substitution for the UCC security.

Opportunities to Strengthen Existing State Conversion Laws

Increase Clarity. The ultimate effect of using a state's conversion statute is not always clear. Some state statutes indicate that once a home is converted to real property, foreclosure law applies. Others achieve the same result by stating that the home, upon conversion, is subject to all laws that apply to real estate. Some conversion statutes say nothing about the implications of the conversion or state only some effect on the manner in which the home is taxed. Other statutes merely provide that upon completion of the requirements the title may be surrendered, without stating if all real estate laws apply to the home thereafter.

Adding to the confusion, a state's statute may be located among the state's manufactured home statutes or may be part of the state's motor vehicle, finance or tax laws. Although some courts have held that when a statute treats a manufactured home as real property for one purpose, such as taxation, it should be treated as real property for other purposes as well, such as bankruptcy. The lack of clarity in the statute can leave homeowners vulnerable.

In addition, some statutes lack clarity as to whether the statutory conversion procedure supplants common law methods of conversion. Such common law methods of conversion, rules created by precedent of previous court cases rather than statutes created by a legislature, typically involve actions of the homeowner that are sufficient to show that the home has become a part of the land on which it is sited.

Lenders wanting to sell their loans on the secondary mortgage market may insist that a home be converted to real property. Fannie Mae, for example, requires a manufactured home be legally classified as real property, and financing must be secured by a mortgage or deed of trust recorded in the jurisdiction's land records. In states where there is less clarity around conversion, a lender may be reluctant to extend conventional style financing. Therefore, clarity is critical in regulations for converting a manufactured home from personal to real property.

Ensure Reasonable Land Ownership and Lease Requirements. Many states permit a manufactured home to convert to real property only if the home and the land that home is placed upon are both owned by the same person. Although policymakers and practitioners may be unfamiliar with the idea of a home being real property even though it sits upon land owned by another, there are several common examples. Many commercial buildings are not owned by the same entity which owns the land, yet the buildings are generally classified as real property. Similarly, community land trust homes sit on land leased, not owned, by the homeowner, and often homes in such situations are classified as real property.

More recent statutes for the conversion of manufactured homes permit the home itself to become real property, even when placed on leased land. Unfortunately, many of these statutes place severe restrictions on such conversions. Typically, they require long-term leasehold interest by the homeowners, often between 20 and 35 years. While long-term leases do provide some protection to homeowners and secured lenders, this protection is not comprehensive. Even with a long-term lease, the homeowner may still be vulnerable to rent increases or other changes that might ultimately force the home off the land. Lease requirements also put landowners, with the power to permit or deny a long-term lease, in control of a homeowner's ability to classify the home as real property. Requiring such a lease to convert the home to real property places many owners of manufactured homes on leased land at a disadvantage without actually conferring the safeguards that the measure may seek to put in place.

A Special Note on State Automatic Conversion Laws

Many issues must be considered before creating a new conversion statute or modernizing existing statutes. A list of recommendations is available at the end of this legislative guide. However, advocates are cautioned to pay special attention to the issue of automatic conversion versus procedures for conversion – each has advantages and disadvantages. Most states that have enacted conversion statutes require that the homeowner take affirmative steps to convert the home to real property. Although conversion to real property may take place without any sort of bureaucratic procedure in states that continue to permit common law conversions, the number of such states is decreasing as more states make the statutory conversion process the sole means of conversion. Even states that continue to allow common law conversions generally require clear intentional acts on the part of the homeowner to convert the home to real property.

There is an alternative to such conversion requirements. A scant few states provide for automatic conversion to real property by virtue of physical actions of the homeowner, such as connection to utility service, rather than requiring procedural actions. Such approaches get rid of bureaucratic hurdles to real property designation, clearly benefiting homeowners who want their homes to be treated as real property.

There are, however, some potential disadvantages to an automatic conversion process. Automatic conversions may create confusion as to the status of the home. If conversion depends upon certain facts, such as whether the home sits upon a permanent foundation or is connected to utilities, it may be unclear to prospective buyers, lenders and even the homeowner whether the home is real or personal property. Making the determination may require verification of factual criteria that can give rise to disputes. A well-documented formal conversion process may avoid many of these issues. Alternatively, a conversion that occurs automatically upon the sale to the consumer would ease the burden of verifying that the home was, in fact, converted to real property.

An automatic conversion also removes the conversion option from the homeowner's control. Although homeowners will generally benefit from a real property designation, there may be situations in which the homeowner would benefit from maintaining a personal property designation. For example, in some states treatment as real property may entail a significant tax increase for the homeowner.

Even more disadvantageous to many homeowners is an unusual provision found in several conversion statutes that permits homes on leased land to become real property only if the home is financed through Fannie Mae, Freddie Mac, the Federal Housing Administration and other similar programs. Most of these statutes were enacted in response to Freddie Mac's program to make mortgage loans on manufactured homes atop leased land, which required that the home be real property. Such conversions statutes were designed to increase the likelihood of conventional financing for owners of manufactured homes, but it is not clear why the benefits of a real property designation should be denied to homeowners on leased land who already own their homes or are financing the home in some other way. Therefore, state conversion statues must be reasonable and not overly burdensome with regard to land ownership and lease requirements.

Call for Reasonable Permanent Foundation Requirements. A majority of states with a statutory method for converting manufactured homes to real property require that the home be placed upon a permanent foundation before conversion. This requirement may mirror the standard foundation required for installation of all manufactured homes in that state, while in other states this requirement is more stringent than standard installation requirements.

States differ as to foundation requirements. Some may permit footings and piers; others may require a more extensive and expensive foundation, such as a masonry wall for the entire perimeter of the home. In addition to cost, a requirement for a permanent foundation presents other difficulties. Few homeowners on leased land would invest in such a foundation without feeling secure in their right to remain on the land. In addition, many manufactured home community owners, and in some cases local government regulations, prohibit such extensive foundations in land-lease communities. Therefore, states should not impose requirements regarding a home's foundation beyond those required to site any manufactured home.

Remove Permission of Landowner Requirements. Of the states that do permit homes sited on leased land to become real property, some, unfortunately, require that the homeowner obtain the permission of the landowner (expressed as a clause in the lease) in order to reclassify the home. Requiring such permission is an unnecessary burden on the homeowner as a conversion of the home to real property need not affect landowner rights. The permission of the landowner may be seen as necessary to protect secured lenders, because lenders may fear that landowners will treat the home as a fixture and convey it with the land. However, such fraudulent activity can be prevented by clear cross-referencing between the land deed and the home deed. Therefore, state conversion laws should not require permission from the landowner, nor should they affect the landowner's interests.

Create User Friendly Conversion Statutes. In states with conversion statutes, courts commonly find that a home continues to be personal property until the statutory procedures are followed. Thus, even if a home is permanently affixed to the land, it may be considered personal property unless the owner surrendered the title and filed the proper papers to convert it to real property.

If the conversion is completed as part of a financing arrangement, it is likely that the conversion process will be properly followed, as the lender wishes to ensure that its security interest in the home is properly recorded and perfected. When a homeowner attempts conversion on his or her own, however, successful completion of the required procedures is less certain. Requirements may be relatively complex for a lay person, and homeowners may not be able to afford the services of an attorney to assist in the conversion process. Therefore, state conversion statues should be straight-forward and not require professional expertise.

RECOMMENDATIONS FOR STRONG LAWS TO PROMOTE MANUFACTURED HOMES AS REAL PROPERTY

- Conversion should be available regardless of who owns the land upon which the home is placed.
- Conversion should make the home real property for all purposes.
- Conversion should protect secured parties' interest in the home.
- Conversion should not require homes on rented land to have a specific lease term.
- Conversion should not impose requirements regarding the home's foundation beyond those required to site any manufactured home.
- Conversion should not affect the landowner's interests, if the home is on rented land, nor should it require the permission of the landowner.
- Conversion procedures should create a clear chain of ownership to facilitate title searches.
- Conversion procedures should be user-friendly and permit homeowners to convert their homes without hiring a professional for assistance.
- The Real Estate Settlement and Procedures Act should apply to all loan transactions secured by a manufactured home,

regardless of the home's classification as real or personal property.

- Conversion should provide a bright line rule for when a home is real property, to ensure predictable and consistent results.
- Conversion procedures should include the cancellation of certificates of title, in order to reduce the possibility of fraud.
- Protections against unfair and deceptive practices (state UDAP statutes) should apply to manufactured home sales and state homestead exemption laws should apply to manufactured homes, regardless of whether the home is real or personal property.
- Laws regarding appraisers and real estate agents should eliminate restrictions that impede their involvement in manufactured home sales, regardless of whether the home is real or personal property.
- Automatic treatment of homes as real property should be considered in states where manufactured and site-built homes are taxed at substantially the same rate.

ABOUT I'M HOME

I'M HOME, or Innovations in Manufactured Homes, is an initiative of CFED, a national nonprofit organization dedicated to expanding economic opportunities for all Americans. The I'M HOME network includes nonprofit and for-profit, national and local partners who together work toward ensuring that all homeowners, regardless of whether their home is manufactured or site-built, enjoy the same rights and privileges of homeownership, including asset building opportunities. For more information about I'M HOME, please visit www.cfed.org/go/imhome.

ABOUT THE NATIONAL CONSUMER LAW CENTER

The National Consumer Law Center (NCLC) is the nation's consumer law expert, helping consumers, their advocates and public policymakers use powerful and complex consumer laws on behalf of low-income and vulnerable Americans seeking economic justice. NCLC is the leading consumer legal advocate promoting legal protections for owners of manufactured homes. For more information about NCLC please visit www.consumerlaw.org.

Appendix A

EXISTING STATE CONVERSION STATUES

In the following summaries of state statutes that specify a procedure for the conversion of a manufactured home to real property, the terminology of the statutes as to manufactured or mobile homes is retained.

Alabama

A mobile home title may be cancelled if the home is affixed to real property owned by the homeowner – ownership of both the home and the land must be identical. The owner must submit an application to the state department of revenue, including a release of any liens noted on the title. If the mobile home is later detached from the land, the owner must reapply for a new certificate of title.[1] This statute is part of the state title law and does not state whether the home is treated as real property for foreclosure or other purposes after the title is cancelled.

Arizona

A mobile home permanently affixed, i.e., installed on real property owned by the homeowner,[2] and for which an affidavit of affixture is recorded, shall be assessed as real property for tax purposes.[3] A mobile located in a mobile home park will, along with the leasehold interest, be treated as real property if the homeowner files an affidavit of affixture with the county recorder and: (1) the home was installed on the real property with all wheels and axles removed in compliance with local and state installation standards; (2) the owner of the home entered into a lease of at least twenty years for the lot and the lease specifically permits the recording of an affidavit of affixture; and (3) a memorandum of lease, signed by both landlord and tenant, is recorded that lists specified information.[4] Regardless of whether the home is located in a park, the affidavit of affixture must identify the holder of any security interest in the home that is not terminated by the consent of the secured party, and any such interest survives recordation of the affidavit.[5] When an affidavit of affixture is recorded, the owner must surrender the certificate of title.[6] A lien on a mobile home for which an affidavit of affixture is recorded may be perfected either in the manner provided by law for real property or in the manner provided for fixtures.[7]

Arkansas

If a mobile or manufactured home is affixed to real estate, the title may be surrendered to the state department of finance and administration for cancellation. After cancellation, a security interest, lien, or encumbrance may be obtained in the same manner as for real property.[8]

California

If a manufactured or mobile home is affixed to a permanent foundation in compliance with state standards,[9] default and sale are governed by California's mortgage foreclosure laws.[10] The homeowner must own the land or have a minimum 35-year lease.[11] Any lienholders must consent to the attachment of the home to the land.[12] The owner must surrender the certificate of title, and a statement that the home was affixed to real property is to be recorded in the county land records.[13] Once these procedures are completed, the home is deemed a fixture and an improvement to the real property.[14] Default and sale are also governed by the state mortgage foreclosure laws if the creditor has a security interest in the land in addition to the home.[15]

Colorado

The owner of a manufactured home, once it is permanently affixed to the ground so that it can no longer be drawn over the public highways, may surrender the certificate of title and apply for purging of the title. The owner must also obtain the consent of the holders of any unreleased security interests in the home. The home then becomes real property, and subject to all laws that would apply to real estate.[16] Although the statute does not

explicitly state that the homeowner must also own the land upon which the home is placed, it appears that after conversion the home is taxed as part of the land upon which it sits, and so conversion would only be practical when the homeowner also owns the land. Although the statute does not address retitling, the Colorado Division of Motor Vehicles, Department of Revenue, currently permits a bonding procedure to allow homeowners to reestablish title.[17]

Connecticut

Title conveyances to manufactured homes are recorded on the land records with the town clerk's office of municipality.[18] While the document conveying title to homes on leased land must recite information about the land or park where the home is located,[19] it appears to allow conveyance of homes located upon land owned by the homeowner by deed, and such home would become part of the real property.[20]

Florida

The owner of a mobile home permanently affixed to land also owned by the homeowner, or in which the homeowner has a recorded leasehold interest of at least 30 years, may retire title to the home.[21] Before title is retired the following documents must be recorded in the official records of the clerk of court in the county where the home is located: (1) the original title to the home, including a statement by any recorded lienholder that the security interest has been released or will be upon retirement of title; (2) legal description of the real property, and if the homeowner's interest in the property is a leasehold, a copy of the lease; and (3) a sworn statement of the owner that he or she owns the home and the real property or leasehold interest. After the title is retired, the home is only conveyed by deed or real estate contract along with the property to which it is affixed.[22] A new title may be obtained if the home is to be removed from the land.[23]

Another Florida statute provides that if the mobile home is classified as personal property by a seller or lender at the time a security interest in the home was granted, it shall continue to be so classified for all purposes relating to the loan and security agreement.[24]

Georgia

A manufactured or mobile home is personal property unless: (1) the home is or is to be permanently affixed to real property and one or more persons with an ownership interest in the home also has an ownership interest in the real property; and (2) the owner and all holders of security interests sign and file a certificate of permanent location with the clerk of the local superior court and the state revenue commissioner. Once such a certificate is properly filed, the home is a part of the real property for all legal purposes, including foreclosure.[25]

Idaho

A manufactured home may constitute real property if the home is permanently affixed to a foundation and the running gear is removed. The home must be sited on land owned (or being purchased) by the homeowner or, if the home is being financed in accordance with a federal housing agency's guidelines, is leased by the homeowner. The homeowner must record with the county recorder a statement of intent to declare the home as real property, and must turn over the certificate of title. Upon exercise of this option, lending institutions may treat the home as real property.[26] Physical removal of the home from the land is then prohibited unless the owner applies to have a new certificate of title issued.[27]

Indiana

If a manufactured home is attached to real estate by a permanent foundation, the owner may submit the certificate of title and an affidavit to the bureau of motor vehicles.[28] The county recorder is then to record the affidavit in the county real estate records,[29] and the home is thereafter deemed to be an improvement to the real estate.[30]

Iowa

Iowa has separate provisions depending on whether or not the home is in a manufactured home community. If the home is located in a manufactured home community and installed on a permanent foundation, the owner may surrender the certificate of title to the county treasurer for the purpose of assuring eligibility for federal mortgage lending programs. The title cannot be surrendered if there are unreleased security interests. A foreclosure action on a manufactured home whose title has been surrendered must be conducted as a real estate foreclosure. The owner may reapply for a certificate of title at a later date.[31] If the home is not in a manufactured home community, it must be placed on a permanent foundation. If a security interest is noted on the title, the homeowner must tender a mortgage on the real estate to the creditor, or the secured party must consent to the conversion, in which case the secured party retains a security interest in the home that is separate from any interest in the land. This statute is a tax law that does not state whether foreclosure law applies after the home is converted to real property.[32]

Kansas

Whenever a manufactured or mobile home is permanently affixed to real property by placement upon a permanent foundation that cannot be removed intact from the land, the owner may apply to have the certificate of title eliminated. The application must include an affidavit signed by the owner and all parties having a security interest in the home. If the application is approved, it is filed in the county registry of deeds. Once the certificate of title is eliminated, ownership of the home is an incident of ownership of the land under governing real property law, and the home is subject to a lien only as part of the real property.[33]

Kentucky

When a manufactured home is or is to be permanently affixed to real estate, the owner may file an affidavit of conversion with, and surrender the certificate of title to, the county clerk, who is then to record the affidavit. The home is then deemed an improvement of the real estate.[34]

Louisiana

A manufactured home is considered immovable when a document describing the home and the land is recorded in the local parish records. The document must include a declaration by the owner of the home and any holder of a security interest in the home that the home is to remain permanently attached to the land. Once this document is recorded, the home is subject to all laws concerning immovable property.[35] However, the rights of the holder of a validly recorded chattel mortgage or a security interest perfected under Article 9 of the UCC are unaffected.[36] The owner may reverse the process so that the home is once again treated as movable property by filing another statement of intent and applying for a new certificate of title.[37]

Michigan

The owner of a mobile home affixed to real property in which the owner also has an ownership interest, may apply for cancellation of the certificate of title. To be considered affixed to the real property, the wheels, towing hitches and running gear must be removed and the home must be attached to a foundation or other support system. The application must include the written consent of each holder of a security interest to termination of the security interest and cancellation of the title. Once the title is cancelled, the mobile home is considered part of the realty and a lienholder may perfect a new security interest or lien on the mobile home only in the manner prescribed by the real estate laws.[38] The owner may reapply for a certificate of title at a later date.[39]

In 2003, the Sixth Circuit had held that security interests in manufactured homes in Michigan could be perfected only by recording them on the title, not by recording a traditional mortgage.[40] The legislature responded by amending its titling laws to recognize both methods.[41] It amended the statute again two years later to make this rule retroactive.[42]

Minnesota

When a manufactured home is affixed to real property, and financed by a mortgage on the real property, the owner of the home must surrender the certificate of title to the registrar of motor vehicles for cancellation. The department is then to issue a notice of surrender, which may be recorded in the county recorder's office or the registrar of titles. The statute provides that the manufactured home is then deemed to be an improvement to real property. The department may not cancel the certificate of title, however, if an unsatisfied security interest is noted on it.[43]

Mississippi

An owner of a manufactured or mobile home ,who also owns the land on which the home is located, has the option of declaring whether the home is to be classified as personal or real property. To be classified as real property, the wheels and axles must be removed and the home must be anchored and blocked in accord with rules adopted by the commissioner of insurance.[44] A certificate that the home has been classified as real property is then recorded in the county land records,[45] and the home's certificate of title may be sent to the state tax commission for cancellation.[46] The home is then treated as real property for purposes of *ad valorem* taxation, and a security interest in the home and land may be obtained through the use of a mortgage or deed of trust.[47]

Missouri

The owner of a manufactured home may convert it to real property by attaching it to a permanent foundation on real property that the owner of the home also owns, and removing or modifying the transportation apparatus so that it is impractical to reconvert it to be readily movable.[48] Unlike the other statutes summarized in this subsection, this statute does not provide for surrender of the title or recordation of a document in the county land records.

Montana

A manufactured home is considered an improvement to real property if the running gear is removed, the home is attached to a permanent foundation on land that is owned or being purchased by the owner of the home (or that is placed on the land with the permission of the landowner), and a statement of intent declaring the manufactured home as an improvement to real property is recorded with the county. The statement of intent must include, inter alia, a description of any security interests in the home and approval from all lienholders to eliminate the certificate of title. After these steps are completed, the manufactured home may not be removed from the land unless the owner files a statement of reversal of this declaration. A manufactured home that has been declared an improvement to real property must be treated by lending institutions in the same manner as any other improvement to real property.[49]

Nebraska

The title for a mobile or manufactured home may be canceled if it is affixed to real property in which the owner of the home has any ownership interest. The statute defines ownership interest as fee simple interest, or an interest as a lessee that continues for at least twenty years after the required affidavit. The title is surrendered for cancellation to the county clerk or designated official where the title is issued or to the Department of Motor Vehicles if title is issued by the department. Along with the title to be surrendered an affidavit of affixture on a form provided by the department must be submitted. The form requires among other things, the names and addresses of all owners of the home, a description of the home, the legal description of the real property, a statement that the home is affixed, and the written consent of each lien holder to release its lien and cancel the title. After the title is canceled and the affidavit recorded, the home is treated as part of the real property.[50] The statute also provides a method for returning the home to the status of personal property.[51]

Nevada

A mobile or manufactured home is eligible to become real property if it becomes permanently affixed to land. The owner of the home must either own the land or, if the home is being financed in accordance with the guidelines

of a federal housing program, lease it. The owner must record an affidavit of conversion in the county recorder's office, deliver a copy of the affidavit and all documents relating to the home to the manufactured housing division of the state department of business and industry, and pay the current year's personal property tax.[52] (But homes that are sited on lots outside mobile home parks in accordance with local zoning laws are automatically recorded as real property without the need for an affidavit.[53]) Once the home is converted to real property, it is deemed to be a fixture and an improvement to the real property.[54]

New Hampshire

A manufactured home placed on a site not owned by the homeowner but connected to utilities shall be deemed real estate for the purposes of transfer and shall be subject to attachment, liens, foreclosure and execution in the same manner as real estate.[55] However, security interests in manufactured housing may also be created and perfected under the U.C.C. as adopted by New Hampshire.[56] The statute does not address homes placed on land owned by the homeowner. Owners of manufactured homes in this situation must rely upon common law to determine if the home becomes real property. New Hampshire also has a statute which allows any lending institution to treat a manufactured home the same as realty for the purposes of securing loans to finance the home. When a lending institution exercises this option, no certificate of title is required, and all of the provisions of real estate law, including conveyances, deeds, and foreclosure, apply to the home. The home must be placed on a foundation or slab and hooked up to all conventional and necessary utility systems and must be intended to be used as a permanent dwelling unit.[57]

New Jersey

New Jersey requires that all manufactured homes not taxed as real property must have certificates of ownership (titles) issued by the Director of the Division of Motor Vehicles.[58] A manufactured home is taxed as real property when it is affixed to the land by a permanent foundation, or if by a nonpermanent foundation but connected to utility systems so as to render it habitable on a permanent basis.[59] However, a manufactured home installed in a park is not taxed as real property.[60] When a mobile or manufactured home is relocated from a park to land which the owner of the home also has an interest in or title to, the owner must file a notice with the Director of the Division of Motor Vehicles at least 10 days before the move. If the director accepts the notice as complete, the certificate of ownership is canceled on the date of relocation.[61]

North Carolina

A manufactured home qualifies as real property if it is a residential structure; the moving hitch, wheels, and axle have been removed; and the owner either owns the land on which it is located or has a lease of at least twenty years that expressly provides for disposition of the mobile home upon termination of the lease.[62] The owner of such a home may have the certificate of title cancelled by submitting it, along with an affidavit, to the division of motor vehicles.[63] If the certificate of title shows a security interest that has not been released, the division may not cancel the title without the written consent of all secured parties. The affidavit is then to be filed in the county registry of deeds. An owner who wishes to separate the home from the land after the title has been cancelled can apply for a new certificate of title. Once the certificate of title is cancelled and the affidavit is recorded, the manufactured home becomes an improvement to real property and any lien on the home shall be perfected and given priority in the manner provided for real property liens.[64]

Ohio

To be taxed as real property, a manufactured or mobile home must be affixed to a permanent foundation and be located on land that the owner of the home also owns.[65] The owner of a home, which will be taxed as real property, must surrender the certificate of title to the county auditor.[66] The owner must either satisfy any liens on the home, or, with the lienholder's consent, give the lienholder a mortgage on the home and land. Once surrendered, the title is to be deactivated, but it can be reactivated upon application by the homeowner. These statutes do not state what effect the deactivation of the title has outside the context of taxation, but a bankruptcy case holds that if a home was converted to real property through this procedure for taxation purposes it is also real property for purposes of bankruptcy law.[67]

Oregon

The owner of a manufactured structure, or the dealer selling it, may apply to the county assessor to have the structure recorded in the county deed records. The owner must either own the land on which the structure is located, or hold a recorded lease of twenty years or more that specifically permits the structure to be recorded in the county deed records. The owner must turn over any ownership document for cancellation. The deed records must list any unreleased security interest in the manufactured structure. Once recorded in the deed records, the manufactured structure is subject to the same provisions of law applicable to any other building, housing, or structure on the land, and may be sold separately from the land or leasehold estate only if the owner applies to have it removed from the deed records.[68]

Pennsylvania

Upon application, the department of transportation may cancel a certificate of title for a mobile home that is affixed to real property.[69] The home must be permanently mounted on a foundation.[70] The owner must complete a form and return it, along with the title, to the department of transportation.[71] If a lien appears on the certificate of title, the title will not be cancelled until the home owner submits satisfactory evidence that the lien has been recorded against the land.[72] After cancellation, the ownership interest in the mobile home, together with all liens and encumbrances on it, is transferred to and encumbers the real property.[73]

South Carolina

The owner of a manufactured home may affix the home to real property by installing it in accordance with the state installation standards, removing the wheels, axles, and towing hitch, and filing an affidavit for retirement of title.[74] The homeowner must either own the land on which it is located or have a leasehold estate of thirty-five years or more in the land. The local register of deeds or clerk of court must then record the affidavit as if it were a deed to real property. Upon completion of this process, the home is to be treated as real property for all purposes except condemnation.[75] The title certificate may be cancelled by presenting it to the division, along with a clocked and stamped copy of the affidavit.[76] Any party listed on the title certificate as having a security interest in the home must either lease the lien or consent to the cancellation of the title.[77] Once a manufactured home has been converted to real property in this manner, a manufactured home severance affidavit must be filed before it can be severed from the land.

South Dakota

If a mobile or manufactured home is fixed to real property, and the owner of the home also owns the land, the owner may request that the title to the home be surrendered.[78] If the owner wants to remove the home from the real property at a later time, the owner may apply to have a title reissued.[79] These statutes are part of the state motor vehicle titling laws and do not state the effect of surrendering the title.

Tennessee

If a manufactured home is affixed to real property, and the ownership of the home is identical to the ownership of the land, the owner may surrender the title to the state department of safety. The owner must submit an affidavit of affixation that, *inter alia*, certifies that all permits required by applicable governmental authorities have been obtained, the foundation system complies with the law and with the manufacturer's specifications, and the wheels and axles have been removed. All lienholders must have released their liens on the home. If the affidavit complies with all the statutory requirements, the county register of deeds is to record it. The home is then subject to taxation as an improvement to the land, but the statute does not specify the effect on foreclosure.[80]

Texas

A manufactured home can be treated as real property, if it is attached to land that the homeowner also owns, or which the homeowner is leasing under a long-term lease as defined by the state department of housing and community affairs.[81] To be attached to land it must be installed in compliance with state rules and connected to

a utility.[82] The owner must file an application for a statement of ownership and location with the department. In addition, each lienholder must either release the lien or give written consent to the conversion of the home to real property.[83] Within sixty days after the department issues a statement of ownership, the owner must file a certified copy in the real property records of the county in which the home is located and notify the department and the tax assessor-collector that the certified copy has been filed.[84] The home is then considered real property for all purposes.[85]

Another Texas statute provides that, if a consumer buys real property and a manufactured home at the same time, and certain other conditions are met, the creditor may elect to treat the home as if it were residential real property for all purposes in connection with the credit transaction.[86] If the creditor so elects, and discloses this election conspicuously to the consumer, then the transaction is considered to be a residential real property transaction for all purposes.[87]

Utah

A manufactured or mobile home is considered an improvement to real property if the homeowner also owns the land to which it is permanently affixed, or leases the land and is financing the home in accordance with federal housing agency guidelines. The owner must surrender the title and complete an affidavit that, *inter alia*, identifies any security interests in the home. The affidavit and the receipt for the surrender of the title are then recorded by the county recorder. The homeowner may acquire a new title upon removing the mobile home from the land. Since this statute is part of the state mortgage lending and servicing act, it is likely that it will govern whether foreclosure is the appropriate way for the lender to proceed in the event of default.[88]

Vermont

If a mobile home is financed while the home is permanently sited in a manner intended for continuous residential occupancy by the homeowner on land also owned by the homeowner, it shall be financed as a residence.[89] Otherwise a mobile home may be financed under 9 V.S.A. § 41a(b)(4) or 9 V.S.A. Pt. 3, Ch. 59, both of which regulate chattel loans.

Virginia

The owner of a manufactured home or house trailer that exceeds the size permitted for highway travel must apply for a title within thirty days after purchase. Once the wheels and other equipment that made the home mobile are removed and the home has been attached to realty, then the owner may return the title to the department of motor vehicles for cancellation. The home may then be transferred only as real estate. Any security interest perfected on the title continues despite the cancellation of the title.[90] A bankruptcy court has held that the determination of whether a mobile home is real or personal property must be made on a case-by-case basis and an owner's failure to comply with the statute, while it might be indicative of the owner's intent that home remain personal property, is not conclusive.[91]

Washington

The owner of a manufactured home that is affixed to land (i.e., installed in accordance with state installation standards[92]) may apply to have the title eliminated. The owner of the home must also own the land on which it is sited, have a lease of thirty-five years or more for the land, or be purchasing the land under a real estate contract.[93] The owner must submit the title and an application, which must identify any security interests, to the department of licensing for approval.[94] After approval, the title is to be cancelled and the approved application is to be recorded in the county real property records.[95] The statute provides that the manufactured home is then to be treated as real property as if it were a site-built structure,[96] except for purposes of taxation.[97] If the title has not been eliminated, the home is not real property.[98] The statute provides a procedure to obtain a new title if the home is to be removed from the land.[99]

West Virginia

The commissioner of motor vehicles may cancel a certificate of title for a mobile or manufactured home that is affixed to real property owned by the homeowner.[100] The homeowner must submit an application and the certificate of title. The cancellation certificate is then to be recorded in the county deed records. Upon recordation, the statute provides that the home is to be treated for all purposes as an appurtenance to the real estate to which it is affixed.[101]

Wisconsin

The owner of a manufactured home must obtain a certificate of title,[102] unless the homeowner is not a resident of Wisconsin[103] or the homeowner intends to make the home a fixture to land in which the homeowner has an ownership or leasehold interest.[104] The leasehold interest must be subject to Wisconsin's real property statutes which exclude leases for a term limited to one year or less.[105]

Wyoming

If a mobile home is installed on a permanent foundation and is taxable as real property,[106] and all liens have been paid, the certificate of title is to be surrendered to and cancelled by the county clerk.[107]

RE: SB-104 Manufactured Housing Conversion Procedure Process

Dear Senator French:

Wells Fargo is writing to support SB-104, the Manufactured Housing Conversion Procedure Process bill.

SB-104 will amend state law in Alaska to provide a formal method of eliminating the certificate of title to a manufactured home, converting the home to real property when the home is or will be permanently affixed to real property, and obtaining a new certificate of title when a home previously affixed to real property is severed.

Alaska's current statutes do not meet the eligibility requirements to sell a mortgage loan for a manufactured home to Fannie Mae or Freddie Mac, including the process to legally classify the home as real property and placing the lender in first lien position.

Wells Fargo has had to turn away business to potential borrowers because Alaska does not have a clear method of converting a factory built home to real property, especially older manufactured homes that come back on the market for resale.

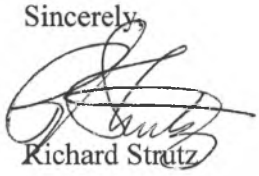
SB-104 would bring state definitions of manufactured homes into accordance with HUD definitions to create a system for title transfer and property conversion. Additionally, it would create a means for titling manufactured homes that have been affixed to property, but the title cannot be found.

We feel the bill will: (1) Help manufactured homeowners who have their manufactured home already affixed to real property be better able to gain access to credit and be able to more easily sell their homes; (2) Help manufactured homeowners in the state increase the value of their homes by allowing them to convert their manufactured homes to real property, including manufactured homes not covered by certificates of title or for which the certificates of title cannot be found; (3) Help lenders gain perfected security interests in manufactured homes; and (4) Help the Alaska Division of Motor Vehicles by putting

in place a formalized procedure for canceling a title when a manufactured home is put on a permanent foundation.

Thank you for the opportunity to provide comment on SB-104.

Sincerely,



Richard Stritz
Regional President

RE: SB-104 Manufactured Housing Conversion Procedure Process

Dear Senator French:

The Alaska Bankers Association consists of the following eight member banks: Alaska Pacific Bank, Denali State Bank, First Bank Ketchikan, First National Bank Alaska, KeyBank, Mt. McKinley Bank, Northrim Bank, and Wells Fargo Bank.

The Alaska Bankers Association supports SB-104, the Manufactured Housing Conversion Procedure Process bill.

SB-104 will amend state law in Alaska to provide a formal method of eliminating the certificate of title to a manufactured home, converting the home to real property when the home is or will be permanently affixed to real property, and obtaining a new certificate of title when a home previously affixed to real property is severed.

Alaska, unlike the vast majority of states, has no formal statutory procedure for converting a manufactured home to real property. Under current Alaska law including Alaska's Uniform Commercial Code, a security interest in a manufactured home permanently affixed to land can be perfected only by noting the secured party's interest on the home's certificate of title and recording a deed of trust with a fixtures clause and an appropriate description of the home. The need for legislation arises from the fact that the Alaska Division of Motor Vehicles ("DMV") will not issue a title for a manufactured home that is affixed to a permanent foundation, notwithstanding the requirements of the Uniform Commercial Code, and has created and administers a vaguely defined procedure with no record notice. The result for many Alaska manufactured homeowners is an unmarketable title to their home and for many lenders an unperfected security interest in their collateral.

In addition, Alaska's current statute does not meet the eligibility requirements to sell a mortgage for a manufactured home to Fannie Mae or Freddie Mac, including the process to legally classify the home as real property and placing the lender in first lien position. Alaska also does not have a clear method to convert a factory built home to real property, especially older manufactured homes that come back on the market for resale.

Alaska Bankers Association
P.O. Box 241489 • Anchorage, Alaska 99524-1489 • Ph. 907-261-3525 • Fax 907-562-1758

AK SB-104 will bring state definitions of manufactured housing into accordance with HUD definitions to create a system for title transfer and property conversion. Additionally, the bill will create a means for titling manufactured homes that have been affixed to property, but the title can't be found.

This bill is good for manufactured home owners and good for lenders that finance manufactured homes.

Thank you for the opportunity to provide comment on SB-104.

Sincerely,

ALASKA BANKERS ASSOCIATION

Joe Beedle
President

MEMORANDUM March 28, 2011

SUBJECT: Sectional summary for SB 104 relating to manufactured homes (Work Order No. 27-LS0467\I)

TO: Senator Hollis French
Attn: Andy Moderow

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. States the findings and purpose for the bill.

Section 2. Adds a new subsection to AS 06.05.207 of the banking code. Defines "real property" to include a manufactured home that has become real property under new sec. 34.85.010.

Section 3. Adds a new subsection to AS 06.15.250 of the mutual savings bank chapter. Defines "real property" to include a manufactured home that has become real property under new sec. 34.85.010.

Section 4. Amends AS 06.45.060(5)(A) of the credit union chapter to change "mobile home" to "manufactured home."

Section 5. Adds a new subsection to AS 06.45.060 of the credit union chapter to provide a definition of "manufactured home."

Section 6. Amends the definition of "mortgage loan" in AS 06.60.990(19) of the mortgage lending regulation chapter to include a manufactured home that has become real property under new sec. 34.85.010.

Section 7. Adds a new definition section to AS 09.45, the chapter relating to real property actions, to define "real property" to include a manufactured home that has become real property under new sec. 34.85.010 and to define "manufactured home."

Section 8. Amends AS 28.05.061(a), which relates to vehicle records, to list manufactured home documents as records that the Department of Administration is to file, maintain, and index.

Section 9. Adds new subsections to AS 28.05.061, which relates to vehicle records, to indicate what the department record must state for certain documents relating to manufactured homes. Defines "recording information" for AS 28.05.061.

Section 10. Amends AS 28.10.201(b) to reference a new subsection added by bill sec. 11 and to change "mobile home" to "manufactured home."

Section 11. Adds a new subsection to AS 28.10.201. Prohibits the department from issuing a certificate of title to a manufactured home if an application has been filed under secs. 28.10.262 - 28.10.264.

Section 12. Amends AS 28.10.211(c) to substitute "manufacturer's certificate of origin" for "manufacturer's statement of origin."

Section 13. Adds a new subsection to AS 28.10.211, relating to applications for vehicle titles. Allows the holder of a manufacturer's certificate of origin for a manufactured home to deliver the certificate to a person to facilitate the home's conveyance or encumbrance. The recipient holds it in trust.

Section 14. Adds a new subsection to AS 28.10.221, which relates to the refusal, suspension, or revocation of a vehicle title. Prohibits the department, with an exception for new sec. 28.10.263, from suspending or revoking a certificate of title to a manufactured home because the home is affixed to real property.

Section 15. Adds a new subsection to AS 28.10.261, which relates to evidence. Makes a manufactured home's certificate of title issued by the department prima facie evidence of what it says, even if the home is affixed to real property.

Section 16. Adds new sections to AS 28.10.

Sec. 28.10.262. Directs the department to cancel a manufacturer's certificate of origin to a manufactured home if an application is filed and certain other conditions are met. States that when a person satisfies this section, the manufactured home is not subject to AS 28.10.

Sec. 28.10.263. Directs the department to cancel a certificate of title to a manufactured home if an application is filed and certain other conditions are met. States that when a person satisfies this section, the manufactured home is not subject to AS 28.10.

Sec. 28.10.264. Directs the department, if an application is filed and certain other conditions are met, to confirm that the owner of a manufactured home has submitted an application that complies with (b) of this section and that the manufactured home is not subject to AS 28.10.

Sec. 28.10.265. Directs the department to issue a certificate of title for a manufactured home if an application is filed and certain other conditions are met. States that when a person satisfies this section, the manufactured home is subject to AS 28.10.

Sec. 28.10.266. Lists what an application under secs. 28.10.262 - 28.10.265 must provide.

Sec. 28.10.267. Establishes the requirements for the declaration required by sec. 28.10.266(11) for an application under sec. 28.10.264 or 28.10.265.

Sec. 28.10.268. Indicates the time when the requirements of secs. 28.10.262 - 28.10.264 are considered to be satisfied if an application under one of those sections is delivered to the department within 30 days after an affixation affidavit is recorded.

Sec. 28.10.269. Defines terms for AS 28.10.201 - 28.10.269.

Section 17. Adds new subsections to AS 28.10.371, which relates to liens and encumbrances on vehicles, to address certain situations involving liens on manufactured homes.

Section 18. Adds a new subsection to AS 28.10.381, which relates to liens and encumbrances on vehicles, to generally prohibit cancelling certificates while a lien or encumbrance is outstanding, and to state that the validity and priority of the liens and encumbrances continue.

Section 19. Adds a new subsection to AS 28.10.391, which relates to liens and encumbrances on vehicles, to indicate that the liens and encumbrances of converted manufactured homes are governed by real property law.

Section 20. Amends AS 28.10.661(2) to define "mobile home" as a "manufactured home" for the chapter.

Section 21. Adds a new paragraph to AS 28.10.661 to define "manufactured home" for the chapter.

Section 22. Amends AS 29.45.070, which relates to municipal taxation, to reflect the conversion to real property allowed by the new chapter in AS 34.85.

Section 23. Amends AS 34.03.360 of the state's uniform residential landlord and tenant act to add a definition of "mobile home."

Section 24. Amends AS 34.70.200(3) of the chapter dealing with disclosures in residential real property transfers to include as residential real property manufactured homes that have become real property under AS 34.85.010.

Section 25. Amends AS 34.80.090(6) of the chapter that deals with escrow transactions for residential real property to include converted manufactured homes as residential real property.

Section 26. Adds a new chapter relating to converting manufactured homes to real property.

Sec. 34.85.010. Lists the criteria for a manufactured home to become real property.

Sec. 34.85.020. Describes the effects of converting a manufactured home to real property.

Sec. 34.85.040. Describes how the ownership interest requirement of sec. 34.85.010 can be satisfied when the manufactured home owner does not own the real property where the home is located.

Sec. 34.85.060. Establishes what an affixation affidavit must provide.

Sec. 34.85.070. Describes what an owner's statement required for an affixation affidavit must state.

Sec. 34.85.080. Indicates that permanently affixing a manufactured home to real property or recording an affixation affidavit does not affect liens and encumbrances on the manufactured home unless certain conditions are met.

Sec. 34.85.090. Directs the recipient of a certified copy of an affidavit to deliver the copy to the department under secs. 28.10.262 - 28.10.264.

Sec. 34.85.100. States that, except as provided by certain statutes, an affixation affidavit is not necessary or effective to convey or encumber a manufactured home or to change the character of a manufactured home to real property. Indicates what a conveyance of land on which a manufactured home is located must recite. Voids an agreement that waives this section.

Sec. 34.85.110. Directs each person having an interest in the real property from which a converted manufactured home is severed to record a severance affidavit.

Sec. 34.85.120. Establishes what a severance affidavit must contain or be accompanied by.

Sec. 34.85.130. Directs the recipient of a certified copy of a severance affidavit to deliver the copy to the department under secs. 28.10.262 - 28.10.264.

Sec. 34.85.140. Requires an affixation affidavit and a severance affidavit to be acknowledged like real property conveyances and be in a recordable form. Directs the department to establish the forms for the affidavits.

Sec. 34.85.150. Establishes when a manufactured home is considered to be permanently affixed to real property.

Sec. 34.85.190. Defines terms for the new chapter.

Sec. 34.85.195. Gives the chapter a short title.

Section 27. Adds a new section to the state's chapter on the recording of real property documents. Directs the recorder to record an affixation affidavit and a severance affidavit if they meet specified requirements. Indicates what the recording officer must write on the recorded affidavit. Directs the recording officer to send a certified copy to the person designated in the affidavit.

Section 28. Amends the definition of "goods" in the Alaska Retail Installment Sales Act to include manufactured homes.

Section 29. Directs the Department of Administration to adopt regulations for this Act.

Section 30. Preserves rights and claims existing before January 1, 2012.

Section 31. Sets an immediate effective date for bill sec. 29, which authorizes the adoption of implementing regulations.

Section 32. Sets the effective date for all of the bill except bill sec. 29, which authorizes the adoption of implementing regulations.

If I may be of further assistance, please advise.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 121

Analysis

SB 121 allows future and current defined contribution PERS and TRS members an opportunity to choose between a defined contribution (DC) and a defined benefit (DB) plan. Current DC members will have a one-time opportunity to convert to the DB plan. The DC member's employee and employer contributions will be transferred to the DB plan along with the total service the employee has accrued. If the combined contributions is insufficient to purchase the employee's service, the remainder will be made up from the general fund. The general fund expenditure will occur in FY 13 during the first 60 days after the effective date of the bill that allows for DC members to convert to the DB plan.

Costs outlined below for the choice option assumes 60% of current defined contribution members will elect to convert to the DB plan and that 80% of future members will choose the DB plans either by choice or by default.

The first impact on contributions rates will occur in FY 15 considering the two-year delay in budgeting contribution payments. Results are based on the draft 2010 actuarial valuation.

Because this bill will increase employer normal costs, under SB 125 (2008), which caps employer contribution rates at 22% for PERS and 12.56% for TRS, employers will therefore contribute less to past service costs. The amount that employers are no longer paying will be paid by the general fund.

Dollars are in thousands

PERS DB Plan	**FY 13**	**FY 14**	**FY 15**	**FY16**	**FY 17**	**FY18**	**FY 19**
Increase in Normal Cost Amount	$0	N/A	$17,568	$25,629	$35,788	$46,977	$57,771
Gf Transfer to Pay Unfunded Past Service Cost	$91,724	N/A	$0	$0	$0	$0	$0
Total Increase in Annual Employer Contribution Amount	N/A	N/A	$17,568	$25,629	$35,788	$46,977	$57,771

RE: Fiscal Note for Senate Bill No. 121 – New Tier for PERS and TRS Healthcare - REVISED

Dear Jim:

As requested, we are providing the following information for a revised Fiscal Note on SB 121 which allows current Defined Contribution Retirement (DCR) members and future members to have a choice between the DCR Plan and the Defined Benefit (DB) Plan. Current DCR members or any future members that elect to go into the DB Plan will enter Tier V for PERS and Tier IV for TRS. These tiers will have the same pension benefits as the latest DB tier but they will have different healthcare benefits. Under the new tiers, members will receive system-paid healthcare benefits at Medicare eligible age (age 65) instead of at age 60. This bill affects the State of Alaska Public Employees' Retirement System Defined Benefit Plan (PERS DB) and the Teachers' Retirement System Defined Benefit Plan (TRS DB). We are assuming the proposed benefit changes would become effective as of July 1, 2012 and will first impact contribution rates during FY15 considering the two-year delay in budgeting contribution payments. Our results are based on the 2010 actuarial valuation results.

The table below shows the cost of the bill for Fiscal Years 2015 through 2019. Dollars are in thousands.

PERS DB Plan	**FY15**	**FY16**	**FY17**	**FY18**	**FY19**
Increase in Normal Cost Amount	$ 17,568	$ 25,629	$ 35,788	$ 46,977	$ 57,771
General Fund Transfer to Pay Unfunded Past Service Cost	$ 91,724	$ 0	$ 0	$ 0	$ 0
Total Increase in Annual Employer Contribution Amount	$ 109,292	$ 25,629	$ 35,788	$ 46,977	$ 57,771

TRS DB Plan	**FY15**	**FY16**	**FY17**	**FY18**	**FY19**
Increase in Normal Cost Amount	$ 2,285	$ 3,536	$ 4,993	$ 6,943	$ 8,764
General Fund Transfer to Pay Unfunded Past Service Cost	$ 32,688	$ 0	$ 0	$ 0	$ 0
Total Increase in Annual Employer Contribution Amount	$ 34,973	$ 3,536	$ 4,993	$ 6,943	$ 8,764

Total PERS and TRS	$ 144,265	$ 29,165	$ 40,781	$ 53,920	$ 66,535

Summary for Analysis Continuation Section of Fiscal Note

The data, assumptions, plan provisions and methods used for the costs are described in the actuarial valuation reports for PERS and TRS as of June 30, 2010. The assets are based on the June 30, 2010 information provided by Christina Maiquis. We have assumed that the bill will become effective July 1, 2012. We have also assumed that 60% of current DCR members will elect to convert to the DB Plan, and that 80% of future members will choose the DB Plans either by choice or by default. A description of Tier V benefits for PERS and Tier IV benefits for TRS was provided by Kathy Lea.

Please let us know if you need any further information.

Sincerely,

David H. Slishinsky

Mr. Aaron Jurgaitis, Buck Consultants
Mr. Colin Wein, Buck Consultants

1. This fiscal note reflects an increasing normal cost rate. The administration has been bemoaning the increases in the amount the state must pay to cover their part of increasing costs as a result of SB 125. So- they are already expecting an increase-

The increase that would be germane here is the increase that may or may not be generated by SB 121 ABOVE what is already projected.

What is the ' fiscal note' of the status quo going out into the future? And then what is the difference between the cost of the expected normal cost rate increases and the cost of our bill?

2. If you look at the transition costs $91.7 million to $32.7 million, the ratio is a little less than 3 to 1. The member ration is about 4 to 1 PERS over TRS and the payroll about 3.5 to 1 ($200 million versus $60 million). So how can it be that this fiscal note shows increases in normal cost amounts of an 8 to 1 ratio (FY 15 is $17.6 million PERS and $2.3 million TRS)

How can the increase in normal cost amounts in FY 15-19 be so much more dramatic in PERS than in TRS?

3. In reviewing a 2008 letter from Buck, it states that when an increased number of older members choose the DB plan, it increases the cost (pg. 1, paragraph 3). Now, with SB 121, Buck is saying an increased number of younger members increases it?

Is the State, Division of Retirement and Benefit, through Buck Consulting, comparing to status quo health care costs when we know increases are on the way, or are we looking at costs attributable to this bill?

4. Please explain to me how pushing out retirement to Medicare age eligibility did not significantly lower costs? (this is to see if they explain it the way Flick did in his 7:49 am e-mail today)

5. I hate to be suspicious but this legislation has been on the table for over 6 months. Now after substantial delays we get a late response that seems suspicious and over-inflated.

How Do we work with the administration to have them present legislation that provides retirement choice to public employees, realizing there is no social security safety net for them? To re-phrase how can we design a plan that is cost-neutral that allows public employees to complete a career of public service in Alaska and not be the training ground for other states to take our trained public employees out of Alaska by simply providing a dignified retirement?

NEA-Alaska President Barb Angaiak Urges Governor Parnell to Reconsider his Position on Pension

Anchorage, AK – February, 2, 2012. NEA-Alaska President Barb Angaiak released the following statement regarding Governor Parnell's pension comments in the *Juneau Empire* on February 2, 2012.

"I am very disappointed in Governor Parnell's refusal to consider returning to a defined benefit pension plan for state employees. I strongly urge Governor Parnell to reconsider. The legislation SB 121 is not a return to the old defined benefit system. SB 121 is a compromise that creates less of a benefit but provides retirement security at no additional cost to the state or other employers.

Just last week, hundreds of Alaskan teachers and support professionals were in Anchorage for NEA-Alaska's annual Delegate Assembly. Members were very vocal on the need to return to a defined benefit pension plan.

It was one young teacher who expressed it best. He was very clear that unless there is a return to a defined benefit pension plan for all teachers, Alaska will lose its best and brightest because they will not be able to afford to continue to teach in our great state.

The defined benefit pension plan issue does not just affect educators. It has serious ramifications on the stability of our teaching staff, which ultimately impacts all Alaskan students."

President Angaiak represents the organization's 13,000+ educators and education support professionals. NEA-Alaska is the state's largest union.

###

SB 121
Alaska Pensions

Retirement choices for the Last Frontier

New hires get a choice

- SB 121 creates a new defined benefit tier
  - New hires can choose a guaranteed benefit or to control their money
- The new tier is:
  - less costly
  - more predictable
- Those who serve Alaskans can choose the retirement plan that fits their service
  - State, city, and school district employees
    - Teachers, biologists, firefighters, programmers, auditors, police, social workers, nurses, correctional officers, highway maintenance workers

A balanced approach

- Each system has its strengths
  - Guaranteed benefits means knowing you'll have enough to retire
    - But you can't strike it rich
    - And it takes a long time to earn
  - Controlling your investments means you could 'beat the street'
    - And you can take it with you when you move
    - But there are no guarantees

Employees differ

- Commissioner
- Highway maintenance
- Research biologist
- Management biologist
- Teacher
- City manager
- Trooper
- Eligibility Tech
- Nurse
- Investment officer

All Alaskans Benefit

- A choice of retirement plans gives the state, cities, & schools the tools to recruit and retain
  - They can deliver the best value for public dollars
- When the national unemployment rate falls
  - How does Alaska remain competitive?
  - Keeping good employees and attracting better

What stays the same?

- The Defined Contribution system does not change.
- The DB safeguards remain in place
- DB pension benefits

What's different?

- It takes longer for new hires to earn retiree health insurance
  - Pegged to Medicare
- DB retirement eligibility similar to DC tiers.
- Lower cost
- One-time chance to convert

A responsible approach

- SB 121's new tier has costs comparable to the DC tiers
- SB 121 takes longer to earn retiree health insurance
  - And eliminates the most expensive years for most employees
- All the 2004 safeguards remain:
  - Review by a second actuary
  - Minimum salaries for elected officials
  - Alaska experience studies
  - ARM Board
  - No paying less than the cost

More for Alaskans' Money

- Professional investment managers
- No added costs for running two systems
- $800 million/year in DB benefits (state, federal, & private) are a shock absorber for the Alaska economy.
- Employees who prefer portability and control have the choice
- Cities, school districts, and the state have a great recruiting tool

SB 121: A good choice for Alaska

MEDIA ADVISORY FOR
RESPONSE TO GOVERNOR'S CONFUSING STATEMENTS ON PENSION BILL

Media Advisory for February 2, 2012

Contact: Joelle Hall, APPC
907-229-3445

Advocates of a bi-partisan Senate bill to give state employees the option of choosing a 401k style pension or a traditional defined benefit pension call on governor to explain his confusing opposition

Group questions Parnell's rhetoric as divisive and confusing

In an interview yesterday with the Juneau Empire, Governor Parnell said he opposes a bill designed to give state employees a choice between a 401k style retirement and a traditional defined benefit pension, even if it saves the state millions.

"Its disappointing and confusing that the governor would take a stance against a plan that will save the states millions on what appears to be a strictly ideological stance," said Vince Beltrami, president of the Alaska AFL-CIO. "It is perplexing in that the governor will enjoy a traditional pension himself because of his state service, but he's willing to block future public employees from receiving the same benefit. Add to this the fact that most of these employees will receive no social security. Its an insult to our valued public employees."

In 2006, under pressure from then Governor Frank Murkowski, the Alaska Legislature made a controversial move, passing a bill by only one vote that eliminated a traditional pension system for the state's public employees. Since closing the defined benefit pension system the unfunded liability has ballooned.

Not only did this move not fix the problem, it has created new ones. Alaska is now a training ground for Police Officers, Firefighters, Teachers and other public employees who now have no reason to stay in the only state that offers no defined benefit pension and no social security.

In a 2011 poll paid for by the Alaska Public Pension Coaltion, 75% of Alaskans favored new employees being included in the defined benefit pension system again.

The Alaska AFL CIO is a member of Alaska Public Pension Coalition and we urge Governor Parnell to review SB 121 again. SB121 is a common sense, fiscally responsible, compromise. It creates a shared risk system that gives Alaska the best of both worlds, portability for those that want it, and a guaranteed pension after decades of service. If the governor truly is concerned about doing what's right for the people of Alaska, he will put aside his ideological differences and join in supporting a truly bi-partisan effort to not only restore dignity to our valued public servants, but create the tool that will keep them here, serving Alaska.

Re: RPEA Testimony in Support of SB121

Dear Chair Wielechowski and Members of the Committee:

The Retired Public Employees of Alaska ("RPEA") once again thanks you and the Committee for the opportunity to present testimony in support of SB121, the reinstatement of a defined benefit pension option, at the public hearing held on January 26, 2012. As indicated by our witness and Legislative Director, Ted Moninski, the RPEA remains committed to ensuring an equitable and reliable pension opportunity for all public employees – past, present and future. As our testimony demonstrated, a return to a cost-neutral defined benefit pension option is not only in the best interests of employees and retirees; it is clearly in the best interest of Alaska – its citizens, its businesses and its economy.

As noted in our hearing presentation, the RPEA submits the attached written copy of its testimony and stands ready to assist the Committee and the Legislature in a full and favorable consideration of this important legislation.

Sincerely,

Robert J. Doll, President
Retired Public Employees of Alaska

RPEA Testimony for Senate State Affairs Committee Hearing re SB121
January 26, 2012

Good morning Mr. Chairman and members of the Committee. My name is Ted Moninski and I am here today to present the official position of the Retired Public Employees of Alaska, an organization of Alaska retirees that currently includes more than 2,000 active members. RPEA members have worked for public employers in every corner of the state and in virtually every service capacity. The RPEA offers its testimony today in support of SB121.

Both in the past, and again today, you have heard from a number of witnesses who have described the reasons why SB121 is good public policy and will enhance the public workforce both now and into the future. That testimony is compelling and the RPEA urges you to give it careful consideration. But, rather than repeat what you have already heard, the RPEA hopes to convince you that SB121 is also good for the state of Alaska – for all of its citizens, its businesses and its economy.

Historically, many Alaskans made the decision to leave the state after retirement. That trend is changing for public sector retirees in large part because of the availability of a monthly pension that is enhanced by the Alaska Cost of Living Allowance and Post Retirement Pension Adjustments – all features of Alaska's defined benefits plan. As a result, nearly two thirds of public employee retirees now remain in Alaska after retirement. All retirees purchase goods and services from Alaska businesses and now infuse an estimated $2 billion into the Alaska economy each year. This direct economic input sustains as many as 12 thousand private and public sector jobs on a year round basis. Because many retirees own their own homes, they also make a substantial contribution to the local tax base in the communities where they reside. These expenditures diversify and help stabilize the economy of Alaska. It is clearly in Alaska's best interest to incent employees to remain in Alaska after retirement.

It has been noted that most public employee retirees do not have access to federal Social Security pension benefits or have had those benefits substantially reduced as a result of their public service. Going forward, in the absence of both a reliable state pension and diminished access to Social Security, public employees who were hired after 2006 must rely on their savings, including their defined contributions plan. However, national studies show that more than two thirds of defined contribution plan participants cash out their assets when terminating employment, rather than rolling them over into another retirement plan. In such cases, retirees will have substantially diminished reserves for their retirement years. Many will not be able to afford to continue to live in Alaska and the very positive contributions made by retirees to Alaska's jobs and overall economy will be lost.

Beyond the many positive direct impacts retirees have in the Alaska economy, they also provide many other indirect benefits. For example retired citizens engage in both formal and informal volunteer work the value of which is estimated to be in the tens of millions of dollars. In addition, retirees often support family members, including adult children, enabling them to seek, find and retain meaningful employment in Alaska. One estimate of the value of retiree caregiving is close to $50 million annually. Again, providing an incentive for retirees to remain in Alaska is unquestionably in the public interest. For all of these reasons and others we do not have time to

address at this time, the RPEA urges your favorable consideration of SB121 to reinstate a defined benefit option for public employees.

The RPEA appreciates this opportunity to offer its comments and will make a written version of this testimony available to the Committee. I would be happy to answer any questions you might have.

Major Changes in SB 121

Substantive changes in Sen. L&C "R" version:

- The changes in the bill take effect 7/1/2013

- Employees currently in the DC plan who convert are not automatically entitled to credit for all the time they've worked.
    - The actuarial 'time value' of the DC account will be credited automatically.
    - The employee may choose to create an indebtedness to make up any shortage, up to the actual years of service.

- Retirees in the new Defined Benefit tiers will pay a share of the premiums for medical insurance. These will be the same as DC retirees:
    - If the retiree is eligible for Medicare, the retiree pays:
        - 30 percent with 10-15 years of service
        - 25 percent with 15-20 years of service
        - 20 percent with 20-25 years of service
        - 15 percent with 25-30 years of service
        - 10 percent with 30 or more years of service
    - If a teacher, peace officer, or firefighter works 25 years or more, the retiree pays the percentages above, *even if not eligible for Medicare.*
    - If a PERS employee who is not a peace officer or firefighter works 30 years or more, the retiree pays 10 percent of the premium *even if not eligible for Medicare.*

The CS also makes some technical and mechanical changes:

- The title is more descriptive of the bill.
- When an employee converts from one plan to another, the change is retroactive to the date of hire. (This does not change the service credit provisions in the bill.)
- Language was clarified to ensure survivors of Defined Benefit members are eligible for survivor benefits.
- References to the Alaska Retirement Management Board transferring funds were changed to the administrator (Department of Administration) to reflect current practice.
- Language requiring individual accounts to be transferred with "interest" was changed to "with investment earnings and losses" to avoid confusion with statutory interest rates under other retirement statutes.

27-LS0281\R
Wayne

CS FOR SENATE BILL NO. 121(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS EGAN, Menard, Paskvan, Davis, Kookesh, Wielechowski, Ellis, Thomas, French, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to new defined benefit tiers in the public employees' retirement system and the teachers' retirement system; providing certain employees an opportunity to choose between the defined benefit and defined contribution plans of the public employees' retirement system and the teachers' retirement system; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.25.009 is repealed and reenacted to read:

Sec. 14.25.009. Applicability of AS 14.25.009 - 14.25.220. (a) The provisions of AS 14.25.009 - 14.25.220 apply to teachers who are eligible to be members of the teachers' retirement system under AS 14.25.009 - 14.25.220 and are not members of the defined contribution retirement plan under AS 14.25.310 - 14.25.590.

(b) An employer that participates in the plan shall also participate in the defined contribution retirement plan under AS 14.25.310 - 14.25.590.

New Text Underlined [DELETED TEXT BRACKETED]

*** Sec. 2.** AS 14.25.040(a) is amended to read:

(a) Unless a teacher or member participates in a university retirement program under AS 14.40.661 - 14.40.799 or has elected under **AS 14.25.330 or former** AS 14.25.540 to participate in the plan established in AS 14.25.310 - 14.25.590, a teacher or member contracting for service with a participating employer is subject to AS 14.25.009 - 14.25.220.

*** Sec. 3.** AS 14.25.050(a) is amended to read:

(a) Except as provided in (c) **and (e)** of this section, beginning January 1, 1991, each member shall contribute to the plan an amount equal to 8.65 percent of the member's base salary accrued from July 1 to the following June 30. [THE EMPLOYER SHALL DEDUCT THE CONTRIBUTION FROM THE MEMBER'S SALARY AT THE END OF EACH PAYROLL PERIOD, AND THE CONTRIBUTION SHALL BE CREDITED BY THE PLAN TO THE MEMBER CONTRIBUTION ACCOUNT. THE CONTRIBUTIONS SHALL BE DEDUCTED FROM EMPLOYEE COMPENSATION BEFORE THE COMPUTATION OF APPLICABLE FEDERAL TAXES AND SHALL BE TREATED AS EMPLOYER CONTRIBUTIONS UNDER 26 U.S.C. 414(h)(2). A MEMBER MAY NOT HAVE THE OPTION OF MAKING THE PAYROLL DEDUCTION DIRECTLY IN CASH INSTEAD OF HAVING THE CONTRIBUTION PICKED UP BY THE EMPLOYER.]

*** Sec. 4.** AS 14.25.050 is amended by adding new subsections to read:

(e) Except as provided in (a) and (c) of this section, a member who first participates in the plan after June 30, 2006, shall contribute to the plan an amount equal to eight percent of the employee's base salary accrued from July 1 to the following June 30.

(f) The employer shall deduct the contributions under (a) and (e) of this section from the member's salary at the end of each payroll period, and the contributions shall be credited by the plan to the member contribution account. The contributions shall be deducted from employee compensation before the computation of applicable federal taxes and shall be treated as employer contributions under 26 U.S.C. 414(h)(2). A member may not have the option of making the payroll deduction

directly in cash instead of having the contribution picked up by the employer.

*** Sec. 5.** AS 14.25.130(c) is amended to read:

(c) Once each year during the first five years following appointment to disability under this section, and once every three-year period thereafter, the administrator may require a disabled member who **first became a member before July 1, 2006, and who** has not attained eligibility for normal retirement to undergo a medical or mental examination by a competent physician. The administrator shall suspend any disability benefit for a disabled member who refuses to undergo a physical or mental examination when requested under this section.

*** Sec. 6.** AS 14.25.130 is amended by adding new subsections to read:

(g) A person who first becomes a member after June 30, 2006, and who is receiving a benefit under this section shall undergo a medical examination as often as the administrator considers advisable, but not more frequently than once each year. The administrator shall determine the place of the examination and engage the physician or physicians. If, in the judgment of the administrator, the examination indicates that the disabled member is no longer incapacitated because of a total and apparently permanent occupational disability, the administrator may not issue further disability benefits to the member.

(h) A person who first becomes a member after June 30, 2006, and who is appointed to disability benefits shall apply to the division of vocational rehabilitation of the Department of Labor and Workforce Development within 30 days after the date disability benefits commence. The member shall be enrolled in a rehabilitation program if the member meets the eligibility requirements of the division of vocational rehabilitation. Unless the member demonstrates cause, benefits shall terminate at the end of the first month in which a disabled member

(1) fails to report to the division of vocational rehabilitation;

(2) is certified by the division of vocational rehabilitation as failing to cooperate in a vocational rehabilitation program;

(3) fails to interview for a job; or

(4) fails to accept a position offered.

*** Sec. 7.** AS 14.25.168(d) is amended to read:

(d) A benefit recipient**, or the surviving spouse of a benefit recipient, who first becomes a member before July 1, 2006,** may elect major medical insurance coverage in accordance with regulations and under the following conditions:

(1) a **benefit recipient** [PERSON] who has less than 25 years of membership service and who is younger than 60 years of age must pay an amount equal to the full monthly group premium for retiree major medical insurance coverage;

(2) a disabled member, a disabled member who is appointed to normal retirement, a person 60 years of age or older, or a person who has at least 25 years of membership service is not required to make premium payments.

* **Sec. 8.** AS 14.25.168 is amended by adding a new subsection to read:

(g) A benefit recipient, or the surviving spouse of a benefit recipient, who first becomes a member after June 30, 2006, may elect major medical insurance coverage in accordance with regulations and under the following conditions:

(1) if the participating member or surviving spouse is not eligible for Medicare, the cost of a monthly premium for retiree major medical insurance coverage elected under this section is equal to the full monthly group premium for retiree major medical insurance coverage;

(2) if the participating member or surviving spouse is eligible for Medicare, the cost of a monthly premium for retiree major medical insurance coverage is a percentage of the full monthly group premium, as follows:

(A) 30 percent if the member had 10 or more, but less than 15, years of service;

(B) 25 percent if the member had 15 or more, but less than 20, years of service;

(C) 20 percent if the member had 20 or more, but less than 25, years of service;

(3) the cost of a monthly premium paid by the member or the member's surviving spouse for retiree major medical insurance coverage is

(A) 15 percent of the full monthly group premium if the participating member has 25 or more years of service;

(B) 10 percent of the full monthly group premium if the

participating member has 30 or more years of service;

(4) a disabled member or a disabled member who is appointed to normal retirement is not required to make premium payments.

*** Sec. 9.** AS 14.25.310 is amended to read:

Sec. 14.25.310. Applicability of AS 14.25.310 - 14.25.590. The provisions of AS 14.25.310 - 14.25.590 apply only to

(1) teachers who first become members on or after July 1, 2006, **and before the effective date of this section who do not transfer to a defined benefit retirement plan under AS 14.25.009 - 14.25.220 or AS 39.35.095 - 39.35.680;**

(2) teachers described in AS 14.25.330 who elect under that section to become [TO MEMBERS WHO ARE EMPLOYED BY EMPLOYERS THAT DO NOT PARTICIPATE IN THE DEFINED BENEFIT RETIREMENT PLAN ESTABLISHED UNDER AS 14.25.009 - 14.25.220, TO FORMER MEMBERS UNDER AS 14.25.220, OR TO] members**; and**

(3) teachers who **transferred** [TRANSFER] into the defined contribution retirement plan under **former** AS 14.25.540.

*** Sec. 10.** AS 14.25.310 is amended by adding a new subsection to read:

(b) An employer that participates in the plan shall also participate in the defined benefit retirement plan under AS 14.25.009 - 14.25.220.

*** Sec. 11.** AS 14.25.330 is repealed and reenacted to read:

Sec. 14.25.330. Retirement plan election option. (a) A teacher who is first hired on or after the effective date of this section may make a one-time election to participate in the defined contribution retirement plan under AS 14.25.310 - 14.25.590 retroactive to the date of hire and may transfer to that plan employee contributions, if any, and employer contributions, if any, that have been made to the defined benefit retirement plan under AS 14.25.009 - 14.25.220. Before employer contributions are transferred under this subsection, the administrator shall recalculate them under AS 14.25.070.

(b) The election to participate in the defined contribution retirement plan under (a) of this section must be made within 90 days after the date of hire, and be made in writing on a form and in the manner prescribed by the administrator. Before

accepting an election to participate in the defined contribution retirement plan, the administrator shall, within 20 days after the administrator receives notification of the teacher's date of hire, provide the teacher eligible to make an election to participate in the defined contribution retirement plan under AS 14.25.310 - 14.25 590 with

(1) information, including calculations to illustrate the effect of moving the teacher's retirement plan from the defined benefit retirement plan to the defined contribution retirement plan; and

(2) other information clearly to inform the teacher of the potential consequences of the teacher's election.

(c) An election made under (a) of this section to participate in the defined contribution retirement plan is irrevocable. Retroactive to the date of hire, the teacher shall be enrolled as a member of the defined contribution retirement plan under AS 14.25.310 - 14.25.590, the member's participation in the plan shall be governed by the provisions for the defined contribution retirement plan, and the member's participation in the defined benefit retirement plan under AS 14.25.009 - 14.25.220 shall terminate. An election made by an eligible member who is married is not effective unless the election is signed by the member's spouse.

(d) When a member makes an election under (a) of this section, the administrator shall cause the total amount of the member's employee and employer contributions, with investment earnings and losses through the final day of the member's participation in the defined contribution retirement plan, to be actuarially calculated and transferred to the member's designated account in the defined contribution retirement plan. The board shall establish transfer procedures by regulation, but the actual transfer may not be later than 30 days after the date the administrator receives the member's election form under (b) of this section, unless the major financial markets for securities available for a transfer are seriously disrupted by an unforeseen event that also causes the suspension of trading on any national securities exchange in the country where the securities were issued. In that event, the 30-day period of time may be extended by a resolution of the board. Transfers are not commissionable or subject to other fees and may be in the form of securities or cash as determined by the board. Securities shall be valued on the date of receipt in the

member's account.

(e) An election made by an eligible member who is married is not effective unless the election is signed by the individual's spouse. An eligible member whose accounts are subject to a qualified domestic relations order may not make an election to participate in the defined contribution retirement plan under this section unless the qualified domestic relations order is amended or vacated and court-certified copies of the order are received by the administrator.

* **Sec. 12.** AS 39.35.095 is repealed and reenacted to read:

Sec. 39.35.095. Applicability of AS 39.35.095 - 39.35.680. (a) The provisions of AS 39.35.095 - 39.35.680 apply to public employees who are eligible to be members of the public employees' retirement system under AS 39.35.095 - 39.35.680 and are not members of the defined contribution retirement plan under AS 39.35.700 - 39.35.990.

(b) A public organization or a municipality or other political subdivision of the state that participates in the plan shall also participate in the defined contribution retirement plan under AS 39.35.700 - 39.35.900.

* **Sec. 13.** AS 39.35 is amended by adding a new section to read:

Sec. 39.35.128. Participation of elected officials of political subdivisions. (a) A person who is an elected official of a political subdivision of the state and who has not participated in the plan or waived participation in the plan before July 1, 2013, is a member of the plan if

(1) the political subdivision has elected under AS 39.35.600 - 39.35.650 to designate elected officials in the classifications of employees entitled to participate in the plan; and

(2) the elected official receives compensation from the political subdivision for services as an elected official in the amount of at least $2,001 a month.

(b) An elected official entitled to participate under this section, and who either has no previous service under the system with the political subdivision or is retired under the system, may file a waiver of participation in the plan with the administrator within 30 days after the later of July 1, 2013, or the date that the elected official's term of office begins. A waiver is irrevocable for the remainder of the elected official's

service as an elected official or employee of the political subdivision.

* **Sec. 14.** AS 39.35.160(a) is amended to read:

(a) **Subject to (e) of this section, beginning** [BEGINNING] January 1, 1987, each peace officer or firefighter shall contribute to the plan an amount equal to seven and one-half percent of the peace officer's or firefighter's compensation. Except as provided in **(d) and (e)** [(d)] of this section, beginning January 1, 1987, each other employee shall contribute to the plan an amount equal to six and three-quarters percent of the employee's compensation. [THE CONTRIBUTIONS SHALL BE DEDUCTED BY THE EMPLOYER AT THE END OF EACH PAYROLL PERIOD. THE CONTRIBUTIONS SHALL BE DEDUCTED FROM EMPLOYEE COMPENSATION BEFORE COMPUTATION OF APPLICABLE FEDERAL TAXES, AND THE CONTRIBUTIONS SHALL BE TREATED AS EMPLOYER CONTRIBUTIONS UNDER 26 U.S.C. 414(h)(2). A MEMBER MAY NOT HAVE THE OPTION OF MAKING THE PAYROLL DEDUCTION DIRECTLY INSTEAD OF HAVING THE CONTRIBUTION PICKED UP BY THE EMPLOYER.]

* **Sec. 15.** AS 39.35.160 is amended by adding new subsections to read:

(e) Except as provided in (a) and (d) of this section, an employee, including a peace officer or firefighter, who first participates in the plan after June 30, 2006, shall contribute to the plan an amount equal to eight percent of the employee's compensation.

(f) Contributions under (a) and (e) of this section shall be deducted by the employer at the end of each payroll period. The contributions shall be deducted from employee compensation before computation of applicable federal taxes, and the contributions shall be treated as employer contributions under 26 U.S.C. 414(h)(2). A member may not have the option of making the payroll deduction directly instead of having the contribution picked up by the employer.

* **Sec. 16.** AS 39.35.410(g) is amended to read:

(g) A disabled employee **who first became a member before July 1, 2006, and who is** receiving an occupational disability benefit shall undergo a medical examination as often as the administrator considers advisable but not more frequently than once each year. The administrator shall determine the place of the examination

and engage the physician or physicians. If, in the judgment of the administrator, the examination indicates that the retired employee is no longer incapacitated because of a total and apparently permanent occupational disability, the administrator may not issue further disability benefits to the employee.

* **Sec. 17.** AS 39.35.410 is amended by adding a new subsection to read:

(k) A person who first becomes a member after June 30, 2006, and who is appointed to disability benefits shall apply to the division of vocational rehabilitation within 30 days after the date disability benefits commence. The employee shall be enrolled in a rehabilitation program if the employee meets the eligibility requirements of the division of vocational rehabilitation. Unless the employee demonstrates cause, benefits shall terminate at the end of the first month in which a disabled employee

(1) fails to report to the division of vocational rehabilitation;

(2) is certified by the division of vocational rehabilitation as failing to cooperate in a vocational rehabilitation program;

(3) fails to interview for a job; or

(4) fails to accept a position offered.

* **Sec. 18.** AS 39.35.535(c) is amended to read:

(c) A benefit recipient may elect major medical insurance coverage in accordance with regulations and under the following conditions:

(1) a person**, or the surviving spouse of a person, who becomes a member before July 1, 2006**, other than a disabled member or a disabled member who is appointed to normal retirement, must pay an amount equal to the full monthly group premium for retiree major medical insurance coverage if the person is

(A) younger than 60 years of age and has less than

(i) 25 years of credited service as a peace officer under AS 39.35.360 and 39.35.370; or

(ii) 30 years of credited service under AS 39.35.360 and 39.35.370 that is not service as a peace officer; or

(B) of any age and has less than 10 years of credited service;

(2) a person**, or the surviving spouse of a person, who becomes a member before July 1, 2006,** is not required to make premium payments for retiree

major medical coverage if the person

(A) is a disabled member;

(B) is a disabled member who is appointed to normal retirement;

(C) is 60 years of age or older and has at least 10 years of credited service; or

(D) has at least

(i) 25 years of credited service as a peace officer under AS 39.35.360 and 39.35.370; or

(ii) 30 years of credited service under AS 39.35.360 and 39.35.370 not as a peace officer;

(3) a benefit recipient who first becomes a member after June 30, 2006, or a benefit recipient who is the surviving spouse of a person who first becomes a member after June 30, 2006, except as provided in (4) and (5) of this subsection, shall pay an amount equal to the full monthly group premium for retiree major medical insurance coverage; however, except as provided in (4) and (5) of this subsection, if the benefit recipient is eligible for Medicare, the cost of a monthly premium is a percentage of the full monthly group premium, as follows:

(A) 30 percent if the member has 10 or more, but less than 15, years of service;

(B) 25 percent if the member has 15 or more, but less than 20, years of service;

(C) 20 percent if the member has 20 or more, but less than 25, years of service;

(D) 15 percent if the member has 25 or more, but less than 30, years of service not as a peace officer;

(4) except as provided in (5) of this subsection, a benefit recipient who first becomes a member after June 30, 2006, or a benefit recipient who is the surviving spouse of a person who first becomes a member after June 30, 2006, shall pay a monthly premium that is

(A) 15 percent of the cost of a full monthly group premium

if the member has 25 or more, but less than 30, years of service as a peace officer; or

(B) 10 percent of the cost of a full monthly group premium if the member has 30 or more years of service;

(5) a benefit recipient who first becomes a member after June 30, 2006, is not required to make premium payments for retiree major medical coverage if the recipient

(A) is a disabled member; or

(B) is a disabled member who is appointed to normal retirement.

*** Sec. 19.** AS 39.35.620(k) is amended to read:

(k) Termination of an employer's participation in the plan does not bar future participation in the system by that employer if the employer is current with payments on amounts due under AS 39.35.625. [IF A PREVIOUSLY TERMINATED EMPLOYER RETURNS TO THE SYSTEM, THE EMPLOYER MAY ONLY PARTICIPATE IN THE PLAN ESTABLISHED UNDER AS 39.35.700 - 39.35.990. EMPLOYEES MAY BE CREDITED UNDER AS 39.35.700 - 39.35.990 ONLY WITH SERVICE SUBSEQUENT TO THE DATE OF RETURN.]

*** Sec. 20.** AS 39.35.680(18) is amended to read:

(18) "employer" means

(A) the State of Alaska;

(B) a political subdivision or public organization of the state that participates in the plan based on a resolution to participate in the plan that was approved by the administrator [ON OR BEFORE JULY 1, 2006]; or

(C) a political subdivision or public organization of the state that, as a result of consolidation or reorganization [THAT OCCURS ON OR AFTER JULY 1, 2006], assumes liability under the plan of a political subdivision or public organization described in (B) of this paragraph;

*** Sec. 21.** AS 39.35.700 is amended to read:

Sec. 39.35.700. Applicability of AS 39.35.700 - 39.35.990. The provisions of AS 39.35.700 - 39.35.990 apply only to

(1) members first hired on or after July 1, 2006, **and before the effective date of this section who do not transfer to a defined benefit retirement plan under AS 14.25.009 - 14.25.220 or AS 39.35.095 - 39.35.680;**

(2) public employees described in AS 39.35.720 who elect under that section to become [TO MEMBERS WHO ARE EMPLOYED BY EMPLOYERS THAT DO NOT PARTICIPATE IN THE DEFINED BENEFIT RETIREMENT PLAN ESTABLISHED UNDER AS 39.35.095 - 39.35.680, TO FORMER MEMBERS AS DEFINED IN AS 39.35.680, OR TO] members**; and**

(3) members who **transferred** [TRANSFER] into the defined contribution retirement plan under **former** AS 39.35.940.

*** Sec. 22.** AS 39.35.700 is amended by adding a new subsection to read:

(b) A public organization under AS 39.35.680 or a municipality or other political subdivision of the state that participates in the plan shall also participate in the defined benefit retirement plan under AS 39.35.095 - 39.35.680.

*** Sec. 23.** AS 39.35.720 is repealed and reenacted to read:

Sec. 39.35.720. Retirement plan election option. (a) A public employee who is first hired on or after the effective date of this section may make a one-time election to participate in the defined contribution retirement plan under AS 39.35.700 - 39.35.990 retroactive to the date of hire and may transfer to that plan employee contributions, if any, and employer contributions, if any, that have been made to the defined benefit retirement plan under AS 39.35.095 - 39.35.680. Before employer contributions are transferred under this subsection, the administrator shall recalculate them under AS 39.35.255.

(b) The election to participate in the defined contribution retirement plan under (a) of this section must be made within 90 days after the date of hire, and be made in writing on a form and in the manner prescribed by the administrator. Before accepting an election to participate in the defined contribution retirement plan under AS 39.35.700 - 39.35.990, the administrator shall, within 20 days after the administrator receives notice of the public employee's date of hire, provide the employee eligible to make an election to participate in the defined contribution retirement plan with

(1) information, including calculations to illustrate the effect of moving the employee's retirement plan from the defined benefit retirement plan to the defined contribution retirement plan; and

(2) other information to clearly inform the employee of the potential consequences of the employee's election.

(c) An election made under (a) of this section to participate in the defined contribution retirement plan is irrevocable. Retroactive to the date of hire, the employee shall be enrolled as a member of the defined contribution retirement plan under AS 39.35.700 - 39.35.990, the member's participation in the plan shall be governed by the provisions for the defined contribution retirement plan, and the member's participation in the defined benefit retirement plan under AS 39.35.095 - 39.35.680 shall terminate. An election made by an eligible member who is married is not effective unless the election is signed by the member's spouse.

(d) When a member makes an election under (a) of this section, the administrator shall cause the total amount of the member's employee and employer contributions, with investment earnings and losses through the final day of the member's participation in the defined contribution retirement plan, to be actuarially calculated and transferred to the member's designated account in the defined contribution retirement plan. The board shall establish transfer procedures by regulation, but the actual transfer may not be later than 30 days after the date the administrator receives the member's completed election form under (b) of this section, unless the major financial markets for securities available for a transfer are seriously disrupted by an unforeseen event that also causes the suspension of trading on any national securities exchange in the country where the securities were issued. In that event, the 30-day period of time may be extended by a resolution of the board. Transfers are not commissionable or subject to other fees and may be in the form of securities or cash as determined by the board. Securities shall be valued on the date of receipt in the member's account.

(e) An election made by an eligible member who is married is not effective unless the election is signed by the individual's spouse. An eligible member whose accounts are subject to a qualified domestic relations order may not make an election

to participate in the defined contribution retirement plan under this section unless the qualified domestic relations order is amended or vacated and court-certified copies of the order are received by the administrator.

* **Sec. 24.** AS 14.25.012(c), 14.25.540; AS 39.35.940, and 39.35.957(b) are repealed.

* **Sec. 25.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETIREMENT PLAN ELECTION CHOICE. (a) A teacher who was first hired after June 30, 2006, and before the effective date of this section and who is a member of the defined contribution plan of the teachers' retirement system under AS 14.25.310 - 14.25.590 may make a one-time election, within 90 days after the effective date of this section, to participate in the defined benefit retirement plan under AS 14.25.009 - 14.25.220 and to transfer all contributions, including employer contributions, that have been made or should be made to the defined contribution retirement plan for service the member completes before the effective date of the member's participation in the defined benefit retirement plan.

(b) A public employee who was first hired after June 30, 2006, and before the effective date of this section and who is a member of the defined contribution plan of the public employees' retirement system under AS 39.35.700 - 39.35.990 may make a one-time election, within 90 days after the effective date of this section, to participate in the defined benefit retirement plan under AS 39.35.095 - 39.35.680 and to transfer all contributions, including employer contributions, that have been made or should be made to the defined contribution retirement plan for any service the member completes before the effective date of the member's participation in the defined benefit retirement plan.

* **Sec. 26.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETIREMENT PLAN ELECTION PROCEDURE; REGULATIONS REQUIRED. (a) The election to participate in the defined benefit retirement plan under sec. 25 of this Act must be made in writing on forms and in the manner prescribed by the administrator. Before accepting an election to participate in the defined benefit retirement plan, the administrator shall provide the employee planning on making an election to participate in the defined benefit retirement plan with information, including calculations to illustrate the effect of moving the employee's retirement plan from the defined contribution retirement plan to the

defined benefit retirement plan as well as other information clearly to inform the employee of the potential consequences of the employee's election.

(b) An election made under sec. 25 of this Act to participate in the defined benefit retirement plan is irrevocable. On the effective date of the election, the participant shall be enrolled as a member of the defined benefit retirement plan, the member's participation in the plan shall be governed by the provisions for the defined benefit retirement plan, and the member's participation in the defined contribution retirement plan shall terminate. The participant's enrollment in the defined benefit retirement plan shall be effective retroactive to the date of hire. An election made by an eligible member who is married is not effective unless the election is signed by the individual's spouse.

(c) When a member makes a one-time election under sec. 25 of this Act, the administrator shall cause the total amount of the member's employee and employer contributions, with investment earnings and losses through the final day of the member's participation in the defined contribution retirement plan, to be actuarially calculated and, subject to (d) of this section, transferred to the pension fund in the defined benefit retirement plan. On the effective date of the member's participation in the defined benefit retirement plan, the member shall be credited with service in the defined benefit retirement plan that is equal to the member's service in years, including fractional years, recognized for computing benefits that may be due from the defined contribution retirement plan. The board shall establish transfer procedures by regulation, but the actual transfer may not be later than 30 days after the date the administrator receives the member's completed election forms under (a) of this section, unless the major financial markets for securities available for a transfer are seriously disrupted by an unforeseen event that also causes the suspension of trading on any national securities exchange in the country where the securities were issued. In that event, the 30-day period of time may be extended by a resolution of the board. Transfers are not commissionable or subject to other fees and may be in the form of securities or cash as determined by the board. Securities shall be valued on the date of receipt in the participant's account.

(d) If the value actuarially calculated under (c) of this section is insufficient to pay for a service credit equal to the participant's actual service, the administrator shall allow the participant to create an indebtedness up to the amount needed to eliminate the insufficiency;

however, if that value exceeds the amount needed to pay for a service credit equal to the participant's actual service, the administrator shall cause the excess to be paid to the participant as a rollover transfer to either an individual employee annuity account in the Department of Administration under the terms of AS 39.30.150 - 39.30.180 (Alaska Supplemental Annuity Plan) or, if the participant's employer does not participate in the Alaska Supplemental Annuity Plan, to an eligible retirement plan under AS 14.25.360(d) or AS 39.35.760(d). An excess under this subsection may not be used to purchase service credit in a retirement plan administered under AS 14.25 or AS 39.25.

(e) The provisions of this section are subject to the requirements of the Internal Revenue Code and the limitations under AS 14.25.010, 14.25.320(c) and (d), 14.25.490, AS 39.35.115, 39.35.678, 39.35.710(c) and (d), and 39.35.895.

(f) In this section,

(1) "administrator" means the commissioner of administration or the person designated by the commissioner of administration under AS 39.35.003 for a public employees' retirement plan and under AS 14.25.003 for a teachers' retirement plan;

(2) "board" means the Alaska Retirement Management Board established under AS 37.10.210;

(3) "defined benefit retirement plan" means the retirement plan established under

(A) AS 14.25.009 - 14.25.220 for a teacher; or

(B) AS 39.35.095 - 39.35.680 for a public employee;

(4) "defined contribution retirement plan" means the retirement plan established under

(A) AS 14.25.310 - 14.25.590 for a teacher; or

(B) AS 39.35.700 - 39.35.990 for a public employee;

(5) "Internal Revenue Code" the meaning given in AS 39.35.990.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ADOPTION OF REGULATIONS. The commissioner of administration shall adopt regulations necessary to implement the changes made by this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before the effective date of the law

implemented by the regulation.

* **Sec. 28.** Sections 26 and 27 of this Act take effect immediately under AS 01.10.070(c).

* **Sec. 29.** Except as provided in sec. 28 of this Act, this Act takes effect July 1, 2013.

SENATOR DENNIS EGAN

SB 121 – Alaska Pensions

Sponsor Statement

SB 121 lets teachers, Troopers, firefighters and other public employees choose one of two state retirement systems: an individual defined contribution retirement account, or earning a defined benefit pension.

A defined benefit pension takes time to earn, but rewards a record of public service by paying a guaranteed monthly benefit and, for long-term employees, health insurance. An individual defined contribution account is portable from one employer to another, and flexible in how it can be used, but makes no guarantees. SB 121 will let newly hired public servants in Alaska choose the one that fits best.

SB 121 creates a new more stable, more predictable defined benefit pension tier for teachers and public employees. A few years ago, Alaska beefed up oversight of the pension system. Now we have two actuaries analyzing the health of the pension trusts, there are more frequent experience studies and the law bars the practice of sometimes paying less than the cost of benefits. SB 121 keeps these smart reforms, making Alaska pensions stronger than ever.

And the defined benefit pensions for new employees under SB 121 will cost employers less than the pension tiers that came before, saving money for schools, cities, and the State of Alaska.

Alaska teachers and public employees don't earn Social Security, and many even lose Social Security benefits they earned in past jobs. So for most, a defined benefit pension makes sense. Other employees will choose individual defined contribution accounts because they prefer flexibility, portability, and control, or because their plans do not include long-term service in the public sector. SB 121 maintains their option to choose an individual account.

The teachers who educate our children, the police and firefighters who protect our families, and the public employees who serve our state and cities will be able to choose the benefit that best fits their service.

CONFIDENTIAL

Alaska Public Pension Coalition

Subject: Analysis of Egan Bill

Dear Coalition Partners:

We have analyzed the actuarial impact of the February 12, 2011 draft Bill from Senator Egan which would modify the retirement program for those now covered by the Defined Contribution Retirement (DCR) program.

The primary features of the bill are:

- Those hired on or after July 1, 2006 would receive the retirement, death and disability benefits currently provided by Tier 2 of TRS and Tier 3 of PERS, rather than the DCR benefits under Tier 3 of TRS and Tier 4 of PERS.
- Peace Officers and firefighters in PERS would contribute 7.50% of pay; other PERS members would contribute 6.75%; those in TRS would contribute 8.65%
- Those individuals would be eligible to receive retiree major medical coverage without having to pay premiums, under the following conditions:
    - For teachers, after June 30, 2011 new retirees are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 8 years of service.
    - For peace officers and firefighters, after June 30, 2011 new members are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
    - For other PERS members, after June 30, 2011 new members are eligible with 30 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.

This information is provided according to PTA's understanding and interpretation of the Work Draft legislation. Please advise us if our interpretation above is not consistent with your understanding. If so, our findings would differ.

The major implications of the bill as we see it are:

- Pension benefits will revert to the prior defined benefit plan tiers
- Retiree health benefits will be stronger than those under DCR, but not as strong as those provided under the latest tier DB plans. Retiree health care premiums are paid as illustrated by the following table:

	Teachers	Peace Officers & Firefighters	Other PERS
Latest Tier DB Plan Health Care Eligibility	Age 60 or 25 years	Age 60 or 25 years	Age 60 or 30 years
DCR Program Health Care Eligibility	Medicare Age [65]	Medicare Age [65]	Medicare Age [65]
Egan Bill Health Care Eligibility	Medicare Age [65] with 8 years or any age with 25 years	Medicare Age [65] with 10 years or any age with 25 years	Medicare Age [65] with 10 years or any age with 30 years

Cost Comparisons

The actuary for the Alaska Department of Administration Division of Retirement Benefits regularly reports on the financial condition of the Alaska Public Employees' Retirement System (PERS) and Alaska Teachers' Retirement System (TRS). These analyses are conducted primarily through an "actuarial valuation", which calculates the plans costs and liabilities. The actuary has calculated the Normal Cost under both the prior tier DB plans as well as under the DCR program. We have been asked to estimate the costs of the proposed program in the draft Egan bill. These cost estimates are being done without the benefit of the full actuarial data that would be used by the actuary. Consequently, their numbers will likely be different than ours, and more correct. We also understand that the actuarially assumed rate of investment return is being reduced from 8.25% to 8.00%. Our estimates are still based on 8.25%, so the "official" cost numbers will likely be slightly higher than ours.

The following tables develop our cost estimates and compare the three programs:

Teachers Retirement System	DB Plan Tier 2	DCR Plan Tier 3	Proposed Tier 4
Total Retirement Normal Cost	11.39%	NA	11.39%
Member Contributions	(8.65%)	(8.00%)	(8.65%)
Net Employer Retirement Normal Cost	2.74%	NA	2.74%
DC Employer Contribution Rate	NA	7.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	0.05%	NA
Medical Normal Cost Rate	5.33%	0.64%	4.52%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	8.07%	10.69%	7.26%
DCR Payroll during FY 2011	$59,750,000	$59,750,000	$59,750,000
Total Employer Cost on FY 2011 Basis	$4,800,000	$6,400,000	$4,300,000

Public Employees Retirement System – Peace Officers & Firefighters	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost	12.30%	NA	12.30%
Member Contributions	(7.50%)	(8.00%)	(7.50%)
Net Employer Retirement Normal Cost	4.80%	NA	4.80%
DC Employer Contribution Rate	NA	5.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	1.04%	NA
Medical Normal Cost Rate	5.90%	0.43%	5.35%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	10.70%	9.47%	10.15%
DCR Payroll during FY 2011	$21,192,000	$21,192,000	$21,192,000
Total Employer Cost on FY 2011 Basis	$2,300,000	$2,000,000	$2,200,000

Other Public Employees Retirement System Members	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost	9.58%	NA	9.58%
Member Contributions	(6.75%)	(8.00%)	(6.75%)
Net Employer Retirement Normal Cost	2.83%	NA	2.83%
DC Employer Contribution Rate	NA	5.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	0.16%	NA
Medical Normal Cost Rate	7.00%	0.56%	3.60%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	9.83%	8.72%	6.43%
DCR Payroll during FY 2011	$200,739,000	$200,739,000	$200,739,000
Total Employer Cost on FY 2011 Basis	$19,700,000	$17,500,000	$12,900,000

Some of these cost comparisons are very intriguing. Note that the costs for the Peace Officers and Firefighters are roughly comparable to the Tier 3 and Tier 4 costs. But the costs for Other PERS member is dramatically lower than either the Tier 3 or Tier 4 costs. This is because they are losing significantly on the medical premium payments, by no longer being able to retire at age 60 with premium payment made by the plan unless they have 30 years of service. I estimate that only about a third of these Other PERS members would have 30 years by the time they attain age 65, meaning that this benefit would have no value for most of them. That is the reason the medical normal cost rate is so much lower for Other PERS Tier 5 than for Other PERS Tier 3. It will be interesting to see what the "official" actuarial cost determination is.

Please also realize that the cost determinations above do not include any cost for the retroactive feature of the bill. I understand that those costs were estimated to be $37 million in 2009. We do not have the data necessary to make an estimate of the cost this year. Because of the market recovery, the cost might possibly have decreased since 2009.

Conclusions.

The proposed program would result in stronger pension benefits through the return of the Defined Benefit plan for members hired since 2006. It would provide improved health care plan benefits, but no future HRA contributions. Member contribution rates would decrease for PERS members and increase slightly for TRS members. As a result of all this, employer costs on a FY 2011 basis would increase by about $200,000 for PERS Peace Officer and Firefighter members, but would decrease substantially for TRS ($2.1 million) and Other PERS ($4.6 million) members. In total, employer costs would fall by about $6 million.

The PERS and TRS actuary will calculate more precise costs, based on complete data and their new actuarial assumptions. The costs above should be considered a starting point for analysis of the bill.

The work reflected herein was conducted by Pension Trustee Advisors under my direction. I look forward to discussing this with you further.

Sincerely,

William B. Fornia, FSA
President

ALASKA

NATIONAL INSTITUTE ON Retirement Security
Reliable Research. Sensible Solutions

Pensionomics:

Measuring the Economic Impact of State and Local Pension Plans

Key Findings

Benefits paid by state and local pension plans support a significant amount of economic activity in the state of Alaska.

Pension benefits received by retirees are spent in the local community. This spending ripples through the economy, as one person's spending becomes another person's income, creating a *multiplier effect*.

Expenditures stemming from state and local pensions supported...

- 6,270 jobs that paid $385.2 million in wages and salaries
- $1.0 billion in total economic output
- $155.5 million in federal, state, and local tax revenues

... in the state of Alaska

Each dollar paid out in pension benefits supported $1.25 in total economic activity in Alaska.

Each dollar "invested" by Alaska taxpayers in these plans supported $6.35 in total economic activity in the state.

Overview

Expenditures made by retirees of state and local government provide a steady economic stimulus to Alaska communities and the state economy. In 2006, 34,962 residents of Alaska received a total of $819.50 million in pension benefits from state and local pension plans, with $808.64 million paid from plans within the state and the remainder originating from plans in other states.

The average pension benefit received was $1,953 per month or $23,440 per year. These modest benefits provide retired teachers, public safety personnel and others who served the public during their working careers income to meet basic needs in retirement.

Impact on Jobs and Incomes

Retiree expenditures stemming from state and local pension plan benefits supported 6,270 jobs in the state. The total income to state residents supported by pension expenditures was $385.2 million.

Of this, the greatest share, $188.0 million, was comprised of employee compensation (wages and salaries). Proprietors' income (self-employment income) represented $33.6 million, and other property income (including payments from interest, rent, royalties, profits and dividends) totaled $163.6 million.

Economic Impact

State and local pension funds in Alaska and other states paid a total of $819.50 million in benefits to Alaska residents in 2006. Retirees' expenditures from these benefits supported a total of $1.0 billion in total economic output in the state, and $430.7 million in value added in the state.

$790.8 million in direct economic impacts were supported by retirees' expenditures on goods and services from businesses in the state. An additional $120.4 million in indirect economic impact resulted when these businesses purchased additional goods and services, generating additional income in the local economy. $112.8 million in induced impacts occurred when employees hired by businesses as a result of the direct and indirect impacts made expenditures, supporting even more additional income.

For more information on the data and methodology used for these estimates, please refer to *Pensionomics: Measuring the Economic Impact of State and Local Pension Plans* National Institute on Retirement Security: Washington DC. February 2009. www.nirsonline.org

Economic Multipliers

Taxpayer Contribution Factor*

$1.00
contributed by Alaska taxpayers to state and local pensions

$6.35
total economic activity

Each $1 in taxpayer contributions to Alaska's state and local pension plans supported $6.35 in total output in the state. This reflects the fact that taxpayer contributions are a minor source of financing for retirement benefits - investment earnings and employee contributions finance the lion's share.

Pension Benefit Multiplier

$1.00
pension benefits paid to retirees in Alaska

$1.25
total economic activity

Each $1 in state and local pension benefits paid to Alaska residents ultimately supported $1.25 in total output in the state. This "multiplier" incorporates the direct, indirect and induced impacts of retiree spending, as it ripples through the state economy.

* Caution should be used in interpreting this number, because the Census data used reflect the taxable status of contributions only; because employee contributions may be reported as taxpayer contributions, the multiplier here may be underestimated.

Impact on Tax Revenues

State and local pension payments made to Alaska residents supported a total of $155.5 million in revenue to federal, state and local governments. Taxes paid by retirees and beneficiaries directly out of pension payments totaled $28.7 million. Taxes attributable to direct, indirect and induced expenditures accounted for $126.8 million in tax revenue.

Federal Tax	87.5 million
State/Local Tax	67.8 million
Other Corporate Taxes	0.2 million
Total	**$155.5 million**

Economic Impacts by Industry Sector

The economic impact of state and local pension benefits was broadly felt across various industry sectors in the state. The ten industry sectors with the largest employment impacts are presented in the table below.

Industry	Employment Impact (# Jobs)	Value Added Impact ($ millions)	Income Impact ($ millions)	Output Impact ($ millions)
Health Care and Social Assistance	1,354	$75.0	$74.2	$119.1
Retail Trade	1,331	64.4	50.9	97.0
Accommodation and Food Services	839	26.7	23.8	50.0
Other Services (Except Public Administration)	479	14.2	13.3	27.1
Real Estate and Rental and Leasing	452	33.8	28.2	50.8
Professional, Scientific, and Technical Services	229	11.8	11.5	23.2
Arts, Entertainment, and Recreation	229	6.2	5.6	10.8
Finance and Insurance	227	24.2	23.3	43.9
Public Administration	196	10.1	10.1	20.7
Transportation and Warehousing	187	11.4	10.8	22.0

National Conference on Public Employee Retirement Systems

NCPERS Research Series

May 2007

The Top Ten Advantages of Maintaining Defined Benefit Pensions

Legislation has been proposed in several states to replace state and local government defined benefit (DB) retirement plans with defined contribution (DC) plans. At issue is not whether state and local employees should have access to DC plans—many already do in conjunction with their DB plans or else through supplemental DC-type plans, which play a useful role in providing additional tax-deferred retirement savings.[1] Rather the issue is whether defined benefit plans should be eliminated and replaced with defined contribution plans.

While recognizing that DC plans are useful in providing supplemental retirement benefits, this paper discusses the advantages of maintaining state and local DB plans and argues against replacing them with DC plans. Eliminating the DB plan and switching to a DC plan is likely to be a lose-lose situation for governments, their employees, and taxpayers for many reasons. After briefly describing how DB and DC plans work, this paper will discuss the following 10 advantages of retaining DB plans:

- Retaining a DB plan is likely to cost state and local governments less over the short term. The long-term cost savings of switching to a DC plan are uncertain at best.
- Almost all state and local DB plans provide disability and survivor benefits as well as retirement income. Switching to a DC plan would require employers to obtain these benefits from another source, likely at a higher cost.
- DB plans enhance the ability of state and local governments to attract qualified employees and retain them throughout their careers. Switching to a DC plan would limit this ability, possibly producing or exacerbating labor shortages in key service areas by increasing employee turnover rates. Higher turnover rates result in increased training costs and lower levels of productivity that can, in turn, result in the need for a larger total workforce.

How DC Plans Work 5

Advantages 6

Conclusion 14

Illustration by James Endicott © images.com

[1] Examples of DC-type plans available to state and local employees include governmental deferred compensation plans (also known as "457 plans") and 403(b) annuities. In addition, some state and local employees are also covered by 401(k) plans, if the plans were established before May 6, 1986. As reported by the Nationwide Retirement Education Institute in their 2004 report *America's Retirement Voice: Public Sector Retirement Yesterday, Today, and Tomorrow,* governmental 457 plans are in place for most large and mid-size cities and counties and all 50 states, covering approximately 3 million participants. According to a 2006 survey by the National Association of Government Defined Contribution Administrators (NAGDCA), 7.4 million governmental employees are eligible to participate in some form of defined contribution plan. This represents about half of current state and local government employees.

- DB plans help state and local governments manage their labor force by providing flexible incentives that encourage employees to work longer or retire earlier, depending on the circumstances. Switching to a DC plan would limit this flexibility and make these incentives more expensive for the employer.
- By pooling risk over a relatively large number of participants, DB plans lower the overall risk do to investment losses and participants outliving retirement benifits. Switching to a DC plan would require each individual to bear these risks alone, consequently requiring higher contributions than if the risks were pooled.
- DB plans earn higher investment returns and pay lower investment management fees, on average, than DC plans. Switching to a DC plan is likely to lower investment earnings used to finance retirement benefits and increase management costs, to the detriment of plan participants.
- DB plan investment earnings reduce future employer contributions. Switching to a DC plan would prevent state and local governments from reducing employer contributions through investment earnings, which currently fund over two-thirds of public retirement benefits.
- DB plans provide secure retirement benefits based on a person's salary and period of service. Switching to a DC plan is likely to result in lower and less secure retirement benefits for many long-term governmental employees, including firefighters, police officers, and teachers, who constitute over half of state and local government workers.[2] State and local employees who are without Social Security coverage would be put at even greater risk.
- DB plans help sustain state and local economies by providing adequate and steady retirement benefits for a significant portion of the workforce. Switching to a DC plan may slow state and local economies, since a large number of retirees would likely receive lower retirement benefits.
- DB plans provide benefits that help ensure an adequate standard of living throughout retirement. Switching to a DC plan likely would result in pressure on state and local governments to augment DC plan benefits and require increased financial assistance for retirees.

Background

State and local government retirement plans in the United States cover 14.1 million active employees (about 10 percent of the U.S. labor force) and 6.9 million retirees,[3] including teachers, police officers, firefighters, legislators, judges, and general employees. Ninety percent of state and local governmental employees are covered by defined benefit retirement plans.[4] Approximately 25 percent are not covered by Social Security, including close to half of public school teachers and about 70 percent of police officers and firefighters. State and local retirement plans paid annual benefits of $141 billion in 2005, averaging about $20,400 per retiree.[5] As of December 31, 2006, state and local plans had accumulated $3 trillion in assets, which were invested in a broadly diversified mix of equity and fixed-income securities.[6]

[2] U.S. Census Bureau, *Statistical Abstract of the United States 2004-2005* (Washington, DC: U.S. Government Printing Office, 2004), Table No. 454. Teachers, school employees, police officers, and firefighters constitute approximately 60 percent of state and local government employees.
[3] U.S. Census Bureau, *State and Local Government Employee-Retirement Systems,* Fiscal Year 2005, Table 5a. In addition to active employees and retirees, state and local plans also cover 3.8 million inactive members who are eligible for retirement benefits upon reaching retirement age. Chart I: Participants in State and Local Government DB Plans

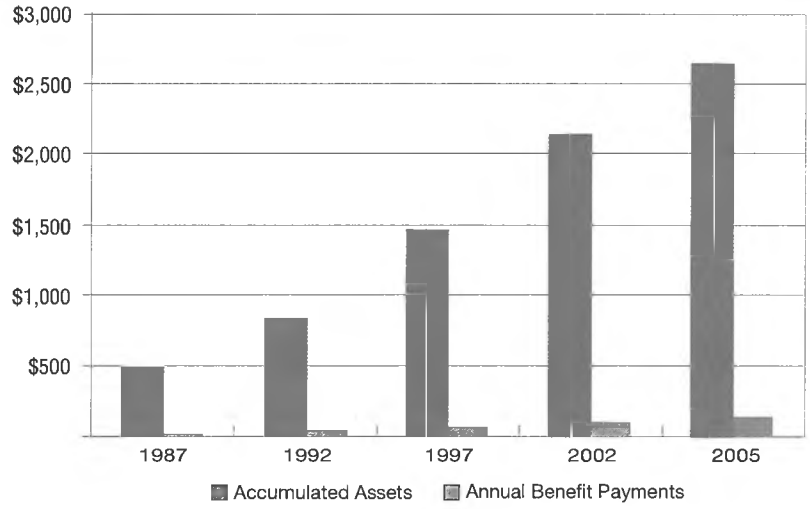
Source: U.S. Census Bureau, State and Local Government Employee-Retirement Systems, annual

Since the mid-1990s, legislation has been proposed in several states to replace state and local DB plans with DC plans. The pace of these proposals increased from 2003 through 2006, partly due to equity market downturns in 2000 through 2002 that resulted in increased contribution rates for many DB plans, both public and private. Proponents of the change argue that switching to a DC plan would lower the government's cost of providing retirement benefits, thereby reducing state and local taxes. They also argue that DC plans would benefit public employees by giving them higher benefits through DC plan investment earnings and by making it easier for employees to take their benefits with them when they change jobs.

As this paper shows, it is likely that switching to a DC plan would increase retirement costs over the short-term and possibly over the long-term as well. In addition, recent studies indicate that retirement benefits provided though DC plans are, on average, significantly lower than those provided through DB plans. Moreover, while DC plans are useful for providing supplemental, tax-deferred retirement savings, replacing DB plans with DC plans could cause severe, unintended consequences:

- Governments could lose a valuable tool for attracting and retaining qualified employees;
- Public employees could lose a significant amount of retirement income, potentially affecting state and local economies; and
- Legislators could face additional pressure to increase DC retirement benefits and provide additional financial assistance for public-sector retirees.

Chart 2: Accumulated Assets and Annual Benefit Payments of State and Local Government DB Plans



Source: U.S. Census Bureau, State and Local Government Employee-Retirement Systems, annual

How DB Plans Work

In a typical DB plan, employers promise to pay retirement benefits based on an employee's period of service and final average salary. A typical benefit formula for state and local general employees is 2 percent times final average salary times years of service.[7] Under this formula, an employee who works 20 years and retires with a final average salary of $40,000 would earn an annual benefit of $16,000.

Eligibility for the benefit (i.e., vesting) usually requires employees to work for a minimum period of time, typically 5 years.[8] Upon retirement, the benefit is provided as a series of monthly payments over the retiree's lifetime (and the surviving spouse's lifetime if this option is selected by the member who, in return, receives a reduced benefit). Most state and local employees are in DB plans that provide cost-of-living adjustments as protection against inflation. In addition, most also provide disability and pre-retirement death benefits.

DB plan benefits are financed by contributions from the employer (and most often from employees as well) and investment income. Employee contributions are usually established at a fixed rate of pay, averaging a little over 4 percent for general employees and almost 7 percent for public safety employees and teachers.[9] Employer contributions are calculated so

[7] The "2 percent" portion of this benefit formula is referred to as the "benefit multiplier." Benefit multipliers vary, depending on occupation and Social Security coverage. According to the NASRA/NCTR 2003 Public Fund Survey, the median benefit multiplier is 1.85 percent for state and local employees covered by Social Security and 2.20 percent for those not covered by Social Security.

[8] National Education Association, *Characteristics of Large Public Education Pension Plans* (Washington, DC: National Education Association, 2004). The 88 statewide plans surveyed cover 9.4 million active workers. Fifty-seven percent of the plans had vesting periods of five years.

[9] Public Pension Coordinating Council, *2000 Survey of State and Local Government Employee Retirement Systems*, April 2000, Table VII-7. Employee contributions as a percentage of payroll averaged 4.2 percent for general employees, 6.8 percent for teachers, and 6.9 percent for public safety employees.

that, over the long-run (50 years or more), annual contributions plus expected investment earnings are enough to pay the promised benefits plus administrative expenses. These calculations are done by actuaries and designed to maintain employer contribution rates at a level percent of payroll, by smoothing short-term investment fluctuations and using other actuarial techniques.[10] Plan assets are invested in professionally managed, broadly diversified portfolios, with investment fees paid by the plan or employer. Retirement benefits are paid from accumulated contributions and investment earnings.

For employers, a key advantage of DB plans is that investment earnings reduce future employer contributions. In other words, employer and employee contributions generate investment earnings that, in turn, are used to pay benefits that would otherwise have to be paid from future employer contributions. From 1986 through 2005, state and local DB plan investments earned $2.26 trillion, reducing the need for additional employer contributions and taxpayer revenues.[11]

A potential disadvantage of DB plans is that when investment earnings are less than expected, additional employer contributions are required. However, it should be noted that the $2.26 trillion earned by state and local investments over the past 20 years includes investment losses that occurred in 2000 through 2002, as well as in 1987 and 1994.

For employees, a key advantage of DB plans is that they provide secure and predictable retirement income over their lifetimes based on pre-retirement earnings. A key disadvantage is that employees who do not remain employed long enough to become vested often lose their DB plan benefits, although employee contributions are nearly always returned with interest.

How DC Plans Work

In a DC plan, employers provide employees with individual investment accounts and promise to contribute a certain amount to the accounts ranging from 3.5 percent to 8 percent (or more) of pay while the employee is employed. Employees can also contribute to their accounts and decide how the assets are invested, choosing from a number of funds representing major investment categories. Investment management fees are paid from the employee's account, reducing the funds available to pay benefits. At retirement, the employee's benefit is paid solely from the contributions and investment earnings that have accumulated in the individual's account.

For employers, one advantage of DC plans is that the employer's contribution rate is fixed and unaffected by downturns in investment markets. Moreover, the employer has no financial liability for the employees after they retire, even if the DC accounts are insufficient to provide an adequate retirement benefit. (While this may be an advantage for private-sector employers, it is a disadvantage for state and local governments—and taxpayers—who may have to pay increased public financial assistance as a result.)

A disadvantage for employers is that DC plans may not be a strong incentive for attracting and retaining qualified employees, especially if competing employers are offering DB

[10] These smoothing techniques work well when investment fluctuations are moderate and short-lived.
[11] U.S. Department of Commerce, U.S. Census Bureau, through 1996, *Finances of Employee-Retirement Systems of State and Local Governments*, Series GF, No. 2, annual; beginning 1997, *State and Local Government Employee-Retirement Systems*, annual.

plans. Moreover, if employees' account balances are inadequate to provide retirement benefits when the employees intend to retire, employers can end up with a number of active employees who are not performing at peak productivity (also known as being "retired in place"). Another disadvantage is that, since the employer's contribution rate is fixed in a DC plan, upturns in the investment markets do not reduce the employer's contribution rate, as they do in DB plans.

For employees, one advantage of DC plans is that the vesting period is typically shorter than for DB plans. Six months to two years is typical.[12] Moreover, DC accounts are more "portable"—that is, easier to transfer if the employee changes jobs. A major disadvantage is that DC accounts are subject to investment risk and may not be enough to sustain employees throughout their retirement. Another disadvantage is that a high percentage of employees cash-out and spend some or all of their DC accounts when they change jobs, significantly reducing the amounts available to pay retirement benefits.[13]

The remainder of this paper describes the advantages of retaining DB plans.

Advantage 1: Retaining a DB plan is likely to cost state and local governments less over the short term. The long-term cost savings of switching to a DC plan are uncertain at best.

- **DC plans are costly to establish and maintain.** A DC plan must be designed, vendors must be selected, its operation must be monitored, and employees must be informed about plan features and available investments. Staff time is spent throughout this process, and the sponsoring government must pay legal and consulting fees. If a third-party administrator is not hired to operate the plan, the government must do this as well. Even if a third-party administrator is hired, the government will still have operating costs related to the DC plan, possibly ranging in the millions of dollars.

    - For example, the budget for the State of Florida's DC plan, established in 2000, totaled $89 million from FY 2001 through FY 2004. This includes $55 million to educate Florida's 650,000 government employees about the new plan.[14] As of 2004, approximately 3 percent of DB participants had chosen to transfer to the DC plan.[15]

- **Pension benefits currently promised to state and local employees and retirees may not be abandoned. Switching to a DC plan does not reduce accrued DB plan benefits already earned.** Most governmental DB plan benefits are protected by the state's constitution or statutes that prevent accrued benefits from being reduced. Consequently, when an alternative DC plan is established, current DB plan members remain in the DB plan but may be given the option to transfer to the new DC plan. For current DB plan members who elect the DC plan, the value of the member's accrued DB benefit is often transferred to the DC plan.[16]

[12] However, some public-sector DC plans require 5 years of service (or more) for employees to completely vest in the employer's contributions.
[13] This is surprising since the cashed-out amounts are subject to income taxes. In many cases they are also subject to a 10 percent penalty tax on early distributions.
[14] Information provided by the Pension Protection Coalition, based on an analysis of the Florida Public Employee Optional Retirement Program's approved budgets and revenue collections. The analysis was done for the Coalition by the law firm of Olson, Hagel & Fishburn, LLP, January 18, 2005. The budgeted amounts exclude investment management fees paid by plan participants. Used with permission.
[15] Anya Sostek, "Pension Pendulum," *Governing Magazine*, March 2004: 28.
[16] If the member's accrued DB benefit is not transferred to the DC plan, it is maintained in the DB plan.

- **When given the option, most employees remain in the DB plan.** In most cases, only a small percent of employees elect to transfer from the DB plan to the DC plan.[17] To increase the number of employees who eventually enter the DC plan, some governments have restricted the DB plan to current employees and have required newly hired employees to join the DC plan.[18]

- **Even when new hires are required to join the DC plan, long-term cost savings for employers are uncertain and may take many years to realize.** When a DB plan is closed to new hires, it still covers current employees and retirees, and benefits continue to accrue to active employees as a result of their service. To the extent that plan assets are less than accrued liabilities, unfunded liabilities remain. For DB plans with unfunded liabilities, closing the DB plan to new hires will likely increase the employer's annual required contribution rate. Because new hires are not entering the plan, the cost of funding the liabilities is spread over a declining number of active members,[19] thereby increasing the employer's contribution rate as a percent of covered payroll. In addition, since a growing portion of plan assets must be used to pay benefits, a growing portion of assets will likely be held in short-term securities, thereby reducing investment returns.

    - For example, the Los Angeles County Employees Retirement Association (LACERA) estimated that the County's DB plan contribution rate would increase by 3.66 percent if employees hired after July 1, 2007, were required to join a DC plan. This would increase County contributions to the closed DB plan by $206 million in 2008. While the contributions would gradually decline over time, the County would have to wait until 2018 to see any savings in DB plan costs as a result of the change.[20]

- **In several cases, states have replaced (or have considered replacing) DC plans due to inadequacy of plan benefits or increased costs.**

    - In 1977, the North Dakota Public Employees Retirement System, originally established as a DC plan in 1966, was changed to a DB plan. Reasons given include the need to provide adequate retirement benefits and the need to attract and retain quality employees.[21]

    - In 2000, the State of Nebraska reviewed its two DC retirement plans for state and county workers and found that between 1983 and 1999 the DC plans' investment returns averaged only 6 percent compared with 11 percent for the state's DB plans. Recognizing these returns were inadequate to

[17] Sostek, 2004. Three percent of employees covered by the DB plan elected to join the new DC plan in Florida, 6 percent in Michigan, and 2.5 percent in Ohio.
[18] National Association of State Retirement Administrators, "Overview of Plan Types." Of the 14 state retirement systems discussed in this paper, only two (Michigan and West Virginia) required newly hired employees to join the DC plan. The remaining systems offered DC plans as a voluntary alternative to the DB plan or offered a new plan that combined DB and DC plan features. Available on the NASRA web site (www.nasra.org).
[19] Governmental Accounting Standards Board, Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers* (Norwalk, CT: Governmental Accounting Standards Board, 1994), p. 7. In situations where a DB plan is closed to new members, unfunded liabilities are amortized as a level percent of projected payroll, including projected decreases in the number of active plan members.

[21] North Dakota Legislative Council, Employee Benefits Program Committee, "Public Employees Retirement Programs – History," October 1998.

sustain retirement benefits, the state responded by creating a new hybrid plan for state and county workers, combining both DB and DC plan features.[22]

- In 2005, the West Virginia Legislature passed a law requiring teachers in the Teacher's Defined Contribution (TDC) Plan (created in 1991) to transfer into the State Teachers' Retirement System, a DB plan, effective upon approval by TDC plan members. According to the West Virginia Consolidated Public Retirement Board's actuary, the change would save the State $1.9 billion over the next 30 years, because lower employer contributions were required for the DB plan (4.3 percent of payroll) than for the DC plan (7.5 percent of payroll). State teacher representative also indicated the change would help prevent teachers from leaving their jobs.[23] In 2006, TDC plan members voted to merge with the DB plan. However, because the law required the transfer of vested DC assets, it was contested and overturned in circuit court.[24]

Advantage 2: Almost all state and local DB plans provide disability and survivor benefits as well as retirement income. Switching to a DC plan would require employers to obtain these benefits from another source, likely at a higher cost.

- **Almost all state and local DB plans provide disability and survivor benefits.** According to the U.S. Bureau of Labor Statistics, 97 percent of state and local government employees in DB plans have disability coverage through the plan and 93 percent may elect joint and survivor benefits.[25] These benefits are largely funded through contributions and investment earnings. Disability and survivor benefits are especially important for employees in hazardous occupations such as firefighters and police officers who may die or become disabled in the line of duty.

- **Few DC plans provide disability benefits. Moreover, DC plan survivor benefits are usually limited to the participant's account balance.** In the absence of a DB plan, employers would need to obtain disability and pre-retirement death benefits through commercial insurance or else would have to self-fund the benefits. Either of these options would result in additional administrative costs. If the benefits were obtained through commercial insurance, the employer's cost would also include the insurer's profit margin.

Advantage 3: DB plans enhance the ability of state and local governments to attract qualified employees and retain them throughout their careers. Switching to a DC plan would limit this ability, possibly producing or exacerbating labor shortages in key service areas by increasing employee turnover rates. Higher turnover rates result in increased training costs and lower levels of productivity that can, in turn, result in the need for a larger total workforce.

- **Employers offer retirement plans as a way to attract qualified employees and retain them so their skills and experience are used efficiently.** According to the Diversified

Investment Advisors' Report on Retirement Plans, most large employers see a tangible value in offering a defined benefit plan to their employees – despite the high costs sometimes associated with it. Fifty-eight percent of plan sponsors with 25,000 or more employees believe that their DB plans have a major impact on employee retention.[26]

- **DB plan provisions encourage employees to remain with an employer longer than DC plan provisions.** The vesting period for DB plans is typically longer (e.g., 5 years) than the vesting period for DC plans (e.g., 6 months to 2 years). Consequently, employees have a financial incentive to continue working for the employer at least until they vest. After that, DB plan benefit accruals based on continued service provide an additional financial incentive to remain.

- **Key governmental service areas, such as education and public safety, require skilled and dedicated employees to work in positions involving high levels of stress or physical activity or both.** Individuals with the skills and temperament to take on these roles usually have other opportunities in the labor market. DB plans provide strong incentives by rewarding long-term, dedicated service with a secure retirement.

Advantage 4: DB plans help state and local governments manage their labor force by providing flexible incentives that encourage employees to work longer or retire earlier, depending on circumstances. Switching to a DC plan would limit this flexibility and make these incentives more expensive for the employer.

- **Governments can use DB plan benefits as a way to manage their labor force by rewarding longer employment and encouraging retirement after a certain period of employment.** DB plan benefit formulas can be structured to provide incentives for longer employment by increasing the benefit multiplier after a certain period of service.

    - For example, the formula could provide benefits of 2.0 percent of final average earnings for the first 20 years of service and 2.2 percent for service over 20 years. To encourage retirement after a certain period of employment, DB benefit formulas can limit benefit accruals to a maximum percent of final average earnings or a maximum years of service. In this example, if the benefit accrual was limited to 62 percent of final average earnings, it would encourage employees to retire after 30 years of service. Other options, such as early retirement incentives (ERIs) and deferred retirement option plans (DROPs), are also available.

Advantage 5: By pooling risk over a relatively large number of participants, DB plans lower the overall risk do to investment losses and participants outliving retirement benifits. Switching to a DC plan would require each individual to bear these risks alone, consequently requiring higher contributions than if the risks were pooled.

- **DC plan participants must save enough to ensure they will not outlive their accumulated assets while protecting their funds against financial market fluctuations.** According to the Society of Actuaries RP-2000 mortality tables, 50 percent of U.S.

[26] "Majority of U.S. Companies That Offer a Pension Plan Say It Impacts Employee Retention," *Business Wire*, September 7, 2004.

males who reach age 65 will live to age 83, 10 percent will live to age 93, and about 1 percent will live to 100. Moreover, 50 percent of U.S. females who reach age 65 will live to age 85, 10 percent will live to age 96, and 2 percent will live to 100. To ensure their DC accounts will sustain them over their expected lifetimes, DC plan participants must save enough to ensure their benefits will be paid into their 90s.

- A 25 year old male would have to save 17 percent of his salary each year to age 65 in order to replace 75 percent of his pre-retirement income from age 65 to age 93 (assuming 7 percent annual investment returns). A 25 year old female would have to save 18 percent of her salary to assure 75 percent income replacement to age 96. However, if these longevity risks were pooled over a large enough group to allow the risks to be fully averaged, the required savings rate would fall to 13.6 percent of salary for both males and females.[27] Risk pooling is one of the main advantages of a DB plan.

- **In order to lower investment risk, DC plan participants usually shift a greater portion of their assets from stocks into bonds as they grow older. While this helps protect against equity market downturns, it also lowers likely investment return.** According to a 2004 Employee Benefit Research Institute study, 401(k) plan participants in their 20s invest 65 percent of their account balances in equities (including company stock) and 21 percent in fixed-income securities, on average. Participants in their 60s invest 49 percent in equities and 40 percent in fixed-income securities.[28] In contrast, large public retirement systems hold 60 percent of assets in equities, 29 percent in fixed-income securities, and the remaining 11 percent in other investments.[29] This pooling of assets allows DB plans to maintain a more diversified portfolio and helps to lower investment management fees.

- **By averaging longevity and investment risks over a large number of participants, DB plans lower the total costs of providing retirement benefits.** Instead of requiring contributions large enough to fund retirement benefits through each individual's maximum life expectancy, DB plans only need to fund benefits through the average life expectancy of the group. This lowers required contributions. Moreover, by spreading investment risk over a longer period, DB plans can maintain an investment mix that includes a higher percentage of equity investments. This increases likely investment returns, which further lower required contributions. In the example presented earlier in this section, if the pooling of funds could increase investment returns from 7 percent to 8 percent, then the required savings rate for the pooled participants would fall from 13.6 percent to 10.0 percent.[30]

Advantage 6: DB plans earn higher investment returns and pay lower investment management fees, on average, than DC plans. Switching to a DC plan is likely to lower investment earnings used to finance retirement benefits and increase management costs, to the detriment of plan members.

- **On average, investment returns for DC plans are lower than for DB plans, resulting in significantly lower investment earnings over an individual's lifetime.** According to Boston College economist Alicia Munnell, DB plans outperformed DC plans by one percentage point annually, on average, between 1988 and 2004.[31] For a person contributing $5,000 to a DC plan each year for 40 years, the difference between an 8.0 percent annual return and a 7.0 percent return amounts to a loss of over $279,000.[32] Other studies show that individual, non-professional investors may underperform the market by as much as 2.0 percent annually.[33] The difference between an 8.0 percent annual return and a 6.0 percent return amounts to a loss of over $521,000.[34]

- **Administration and investment costs for DC plans can be more than four times higher than for DB plans. In DC plans, these costs are borne directly by individual plan participants through deductions from their DC accounts.** According to the Investment Management Institute, the operating expense ratio for DB plans averaged 31 basis points in 2003 (31 cents per $100 of assets) compared with 96 to 175 basis points for DC plans.[35] According to the Illinois Municipal Retirement Fund, the total annual administrative and investment cost for their DB plan amounted to 44 basis points in 1999. Had they switched to a DC plan, total annual administrative and investment costs could have increased up to 225 basis points, or up to $250 million more than the annual administrative and investment costs paid by the DB plan.[36]

- **Employees direct their own investments in a DC plan, usually selecting from among several funds that reflect major investment categories. Generally, employees have limited investment experience or training.** According to a 2007 study by Watson Wyatt Worldwide, many DC plan participants "don't start saving soon enough, don't save enough, and don't follow sound investment principles in managing their retirement assets." The study also found that assets are more effectively managed in DB plans, in part because plan administrators work with consultants and professional asset managers to set and implement investment goals.[37]

- **DC plan participants often cash-out and spend some or all of their DC accounts when they switch jobs. As a result, the accounts contain less money to earn investment returns and to pay benefits at retirement.** According to Alicia Munnell, more than half of DC plan participants withdraw funds from their DC accounts when they change jobs, removing between one-quarter and one-third of their total DC plan assets before they reached retirement.[38]

Advantage 7: DB plan investment earnings help to reduce future employer contributions. Switching to a DC plan would prevent state and local governments from reducing future employer contributions as a result of investment earnings, which currently fund over two-thirds of public retirement benefits.

- **State and local governments have benefited from investment returns overall and many have used investment earnings to reduce employer contributions.** Over the long-term, an employer's cost of providing DB plan benefits depends on investment earnings. Although investment earnings can fluctuate sharply at times (as happened from 2000 through 2002), over the last 20 years state and local governments have substantially benefited from investment returns and have used the accumulated assets to lower employer contributions. As provided in governmental accounting standards, plan assets that are greater than plan liabilities are amortized to reduce employer contributions.[39] A 2002 survey of Michigan state and local government retirement systems shows that of 115 independent local government retirement plans surveyed, employer contributions for 102 (89 percent) were below the normal cost of benefits as a result of this amortization.[40]

- **Most of the money paid into state and local retirement plans comes from investment earnings.** Over the 20-year period from 1986 through 2005, state and local government investment earnings amounted to about $2.3 trillion, compared with employer contributions of $790 billion and employee contributions of $400 billion.[41] This means two out of every three dollars paid into state and local retirement plans over the last 20 years was received from investment earnings. According to a paper on state and local retirement plans prepared for the Wharton School's Pension Research Council: **"Setting aside all the other benefits to employers and employees of DB plans, contributions to public pension plans may be among the best investments a state or local government can make."**[42]

Advantage 8: DB plans provide secure retirement benefits that are based on a person's salary and period of service. Switching to a DC plan is likely to result in lower and less secure retirement benefits for many long-term governmental employees, including firefighters, police officers, and teachers, who constitute over half of state and local government workers. State and local employees who are without Social Security coverage would be put at even greater risk.

- **Retirement benefits paid from DC plans are significantly less than those paid from DB plans.** The U.S. Congressional Research Service found that, for current older workers, DC-type plans will provide annual benefits of less than $5,000 for half the workers.[43] This is one-quarter of the $20,400 average annual benefits currently paid by governmental DB plans to state and local workers.

- **If average state and local retirement benefits fell from $20,000 to $5,000, it would mean a loss of approximately $106 billion in annual U.S. personal income.**[44] This loss would be felt by state and local economies, since many retirees remain in the

[44] Author's calculation based on $141 billion in annual pension benefits paid by state and local government retirement plans in 2005.

same location when they retire. These pension benefits are also, in most cases, subject to federal and state income taxes, thus resulting in a loss of tax revenues. Tax loses would also be seen in reductions of state sales tax revenues.

- **The change would have an even greater effect on the 25 percent of state and local government employees who are not covered by Social Security, including about half of school teachers and about 70 percent of police officers and firefighters.** When first enacted in 1935, Social Security excluded state and local employees, due largely to constitutional questions about the federal government's right to tax state and local governments. In 1950, Congress amended Social Security to allow state and local governments to voluntarily elect coverage. By then, however, half of the largest state and local plans had already been established, including many plans for teachers and public safety employees.[45] These DB plans provide benefits that compensate for the lack of Social Security coverage. Replacing them with defined contribution plans would put members at even greater risk, since they would not have Social Security benefits to fall back on.

Advantage 9: DB plans help sustain state and local economies by providing adequate retirement benefits for a significant portion of the workforce. Switching to a DC plan would likely slow state and local economies, since a large number of retirees would likely receive lower retirement benefits.

- **Public DB plans have a substantial impact on state and local economies.** For example, a 2006 economic impact study by the Perryman Group found that the $5.4 billion in annual benefits paid by the Teacher Retirement System of Texas (TRS) to approximately 250,000 retired teachers and beneficiaries generates $9.9 billon in total economic activity within the state. Moreover, as a result of TRS's strong investment performance, the overall return on state (and therefore taxpayer) contributions is significant: every $1 of state funds contributed to TRS leads to $7.85 in total spending in the Texas economy."[46]

- **The overall economic value added by the investment income of state and local DB plans over what would otherwise have been earned in DC plans is estimated to be about $200 billion annually, or 2.0 percent of U.S. Gross Domestic Product.**[47] In essence, state and local retirement plans act as financial engines, using employer and employee contributions to generate investment income that, when paid as retirement benefits, bolsters state and local economies by $200 billion a year. State and local retirees purchase a wide range of goods and services with their retirement income. These purchases, in turn, promote employment and create additional economic demand, generating additional economic activity. As a result of this multiplier effect, the economic activity generated by the higher investment earnings amounts to 2.0 percent of U.S. Gross Domestic Product. As a growing number of state and local employees retire, this percentage will likely increase.

[47] Anderson and Brainard, p. 14.

Advantage 10: DB plans provide benefits that help to ensure an adequate standard of living throughout retirement.

Switching to a DC plan would likely result in pressure on state and local governments to augment DC plan benefits and require increased financial assistance for retirees.

- **If DC plan benefits are less than what is needed to ensure an adequate standard of living during retirement, continued pressure will be placed on state and local governments, legislators, and taxpayers as retirees outlive their retirement income.** Since DC benefits are not indexed to inflation, extended periods of even modest inflation will mean almost constant pressure for some form of additional financial support for retirees, who would make up a growing portion of the electorate. When DC plan benefit improvements are granted, they will be paid from current government revenues and will not be offset by investment earnings.

Conclusion

This paper addresses the question, "Should state and local government defined benefit plans be eliminated and replaced with defined contribution plans?" It concludes that such a move would have significant, long-term, detrimental effects on state and local governments, their employees, their economies, and ultimately the taxpayers.

In the final analysis, the real question is, "How can state and local governments efficiently provide secure, sufficient, and sustainable retirement benefits for their employees?" To answer this question, retirement benefits should be viewed in total, including benefits from Social Security, defined benefit plans, defined contribution plans, and individual savings. No single source alone is sufficient, but together they can be used to provide effective and efficiently funded retirement income. Eliminating defined benefit plans would only intensify future problems rather than provide solutions.

Instead, decisions should be based on a clear understanding of the goals that current plan design is intended to achieve for the various stakeholders, including the employer sponsoring the plan, plan participants, and taxpayers. Retirement plan design represents a significant public policy. Therefore, the plan sponsor contemplating changes must understand the policy implications of current plan design as well as any new proposals.

Success is most likely to happen after careful analysis. With proper analysis and an understanding of the needs of a changing population, fine-tuning the basic pension plan design can produce excellent results for all – sponsors, employees, retirees, and taxpayers.

NCPERS would like to thank the staff of Gabriel, Roeder, Smith & Company for their help in the preparation of this NCPERS Research Series publication.

April 13, 2011

The Honorable Bill Wielechowski, Chair
Senate State Affairs
State Capitol, Room 101
Juneau, AK 99801

Dear Senator Wielechowski:

Thank you for the opportunity to address the Senate State Affairs Committee during my confirmation hearing on Tuesday, April 5, 2011. Below is the response to the question that was raised during that session.

Q1: Given conservative assumptions about market performance and assuming typical step and cost of living increases, but not promotions, what would the balance of an employee's SBS account be as of July 1, 2036, assuming consistent step increases from an initial range 16, step A, over 30 years, for a PERS and TRS eligible employee?

A1: The SBS account balance for the employee after 30 years would be $427,312 (PERS only; TRS does not participate in SBS).

The total assets for a PERS employee under this scenario, assuming a conservative 4% investment return, would be about $880,000. This includes the defined contribution account balance accrued and invested with the same assumptions

I hope the question raised has been answered to your satisfaction. Please feel free to contact me at any time.

Sincerely,

Becky Hultberg

April 4, 2011

The Honorable Johnny Ellis, Chair
Senate Finance Sub-Committee
State Capitol, Room 119
Juneau, AK 99801-1182

Dear Senator Ellis:

Thank you for your letter dated March 1, 2011, requesting information on the State's defined –contribution retirement programs. Below are the responses to questions you raised in your letter with the exception of the questions related to health reimbursement accounts, which I hope to have to you by the close of business tomorrow.

Statewide Personnel Requirements: *(Please note: Workplace Alaska, the State's online recruitment system has limited reporting capabilities which impedes our ability to provide the requested information. However, from fiscal year 2008 forward, recruitment data is available through the Alaska Data Enterprise Reporting System (ALDER). For this reason, several questions were answered for 2008 through 2010 only.)*

Q1: What was the average number of qualified applicants for all active recruitments in each year from 2001 to 2010?

A1: Please see attachment A, column titled: Average Qualified Applicant Count.

Q2: What was the average duration of all active recruitments in each year from 2001 to 2010?

A2: Due to reporting limitations, this information is not available. However, it is estimated that the average duration is 15 calendar days.

Q3: How many active recruitments were filled by Alaska residents in each year from 2001 to 2010?

A3: Please see attachment A, columns titled: Alaska Resident Hire Count and Percent of Resident Hire.

Q4: How many active recruitments were filled by non-Alaska residents in each year from 2001 to 2010?

A4: Please see attachment A, columns titled: Non-Alaska Resident Hire Count and Percent of Non-Alaska Resident Hire.

Q5: How many active recruitments were filled by current or former State of Alaska (SOA) employees in each year from 2001 to 2010?

A5: See attachment A, columns titled: Current Employee Appointees and Percent Current Employee Appointees.

Due to reporting limitations, we are unable to identify the number of vacancies filled by former State of Alaska employees.

Q6: How many active recruitments were filled by individuals who were not current or former SOA employees in each year from 2001 to 2010?

A6: Please see attachment A, columns titled: Non-Employee Appointees and Percent Non-Employee Appointees.

The data provided includes all appointees who were not working for the State of Alaska at the time of appointment. Therefore, former State of Alaska employees are included.

Q7: How many active recruitments were outstanding more than six months in each year from 2001 to 2010?

A7: Due to reporting limitations, this information is not available.

Q8: How many active recruitments were closed without hire due to lack of a qualified candidate in each year from 2001 to 2010?

A8: Please see the attachment A, columns titled: No Hire Made and Percent of No Hire Made.

The data provided reflects all recruitments in which no hire was made. We are unable to identify only those for which the reason was lack of a qualified candidate. A few of the other reasons for which hires were not made during this time period include:

- Hiring freeze in 2006 and 2009
- Noncompetitive appointment of an injured worker, layoff, transfer or rehire
- Position was recruited for in more than one location (e.g., Juneau and Anchorage)
- Position was recruited for at more than one level (e.g., Engineering Assistant I and II)
- Selection was not made within 90 days from recruitment closing date
- Current incumbent rescinded resignation

Q9: How many active recruitments were altered or adjusted after initial posting, including elimination of Alaska residency requirements, a reduction of minimum qualifications, or a change in employment location or conditions, in each year from 2001 to 2010?

A9: Please see attachment A, columns titled: Number Modified and Percent Modified.

It must be noted that these numbers represent all job postings that have been modified. Modifications include but are not limited to:

- Extension of recruitment closing date per hiring manager request
- Extension of recruitment closing date due to service interruption
- Change in scope (e.g., departmental to Alaska resident or Alaska resident to all applicant)
- Error correction

These numbers do not represent modifications such as a reduction in the minimum qualifications or a change in location. Modifications of this nature require a new recruitment posting. The disposition of the original posting would be "no hire made."

Statewide Personnel Retention:

Q10: What was the average tenure of the defined-benefit eligible employees leaving State employment in each year from 2001 to 2010?

A10: See Attachment B, column titled: Average Tenure by Year

Q11 What was the average tenure of the defined-contribution eligible employees leaving State employment in each year from 2006 to 2010?

A11: See attachment B, column titled: Average Tenure by Year

Q12: How many defined-benefit eligible employees who voluntarily terminated their State employment note in their exit survey that dissatisfaction with their tier of retirement benefits was a contributing factor to their choice to leave State employment in each year from 2001 to 2010?

A12: See attachment C, columns titled: Defined Benefit (DB) Comments and Percent of DB Comments vs Exit Survey Responses.

Data is not available for a full fiscal year prior to fiscal year 2003 as the survey was not utilized.

Q13: How many defined-contribution eligible employees who voluntarily terminated their State employment note in their exit survey that dissatisfaction with their tier of retirement benefits was a contributing factor to their choice to leave State employment in each year from 2006 to 2010?

A13: See attachment C, columns titled: Defined Contribution (DC) Comments and Percent of DC Comments vs Exit Survey Responses

Cost of Recruitment and Hiring:

Q14: What was the average cost in FY2010 of an active recruitment process from posting to issuance and acceptance of an offer of employment?

A14: The State's current processes and systems do not capture this information as much of the cost is related to staff time.

Q15: What was the average cost in FY2010 of the hiring process from the issuance and acceptance of an offer of employment to the full integration of the employee in the job responsibilities (including hiring paperwork, training, stationery, personal supplies, and all other costs related to the new employee)?

A15: Again, the State's current processes and systems do not capture this information.

Retirement Account Balances, Fees & Sufficiency:

Q16: If an employee hired into a PERS-eligible position (16a) on July 1, 2006; what would the balance of her PERS account be as of December 31, 2010, if she worked continuously in that position, attained typical step and COLA increases, and elected default retirement contribution and management options?

A16: The default option in 2006, was a fully managed account option that is tailored specifically for each participant. Assuming the individual averaged a 4% return during the period July 1, 2006, and December 31, 2010, the gross contribution balance would be approximately $32,272.

Q17: What portions of that balance would be: employee contributions, employer contributions, and interest/earnings?

A17:
Employee Contributions:	$17,829
Employer Contributions:	$11,143
Investment Earnings:	$ 3,300
	$32,272

Q18: How much would have been paid in fees from that account?

A 18:
$35 flat fee per year	=$175.00
Recordkeeping fee	=$106.56
Managed Account Fee	=$429.12
Five Yr. Total	$710.68

Q19: Given conservative assumptions about market performance and assuming typical step and COLA increases (but not promotions), what would the balance of her account be as of July 1, 2036? i.e. 30-years of service.

Assuming consistent step increases from an initial range 16 step A over the 30-year period the total gross balance would be $462,072.93

$85/400,000

A19: What would the account balances be (as of December 31, 2010, and as of July 1, 2036) if the employee was TRS-eligible under the same circumstanced?

2010 Balance = $ 37,237.47
2036 Balance = $533,161.07

Q20: What is the average account balance of all members in PERS Tier IV as of December 31, 2010, and TRS III?

A20: As of December 31, 2010, the average account balance of all members were as follows:

PERS = $ 9,694
TRS = $15,864

Q21: How is the fee amount determined for managing the defined-contribution retirement accounts?

A21: Members of the defined contribution retirement plans are currently defaulted into an age-based target date fund as of the date initial contributions are received. The age-based target date fund provides exposure to a diversified mix of stocks, bonds and cash or money market securities for long-term investors. The Trust is designed to initially invest in a moderate to high risk manner and gradually invest more conservatively, with emphasis on capital preservations as the target date approaches. With the exception of the standard fund management and administrative fees that pertain to all the investment options provided by the Plan, there are no additional fees.

Members can elect a more personalized management of their account by electing either of two options provided by Great-West Retirement Services. In both options members must actively elect to participate in the advice services and they provide additional information, such as other assets outside of the plan, potential retirement benefits from all expected sources, risk tolerance level and estimated retirement date. With this information, a customize portfolio can be built.

Under the Advice option, the member signs up, then submits all the information above and then requests the advice. The advice can be accepted or denied. The member can come back and request advice as often during the year as they wish. The member's account is not monitored or changed unless the member requests advice and accepts the advice. The fee for this service is $25 per year.

Under the Managed Accounts option, the member signs up, submits all the same information and from that point their account is monitored and adjusted by Great-West with no further intervention required by the members. The fee for this service is 0.50% of the balance annually charged on a quarterly basis.

Q22: How does that compare with members in the defined-benefit retirement system?

A22: Defined Benefit employees receive benefits based upon a formula rather than an account balance. No fees are imposed on the individual member.

Q23: How many defined-benefit members not yet vested converted to defined contributions?

A23: 46 PERS and 11 TRS members who were not vested elected to convert from the defined benefit plan to the defined contribution plan. Five employers, including the State of Alaska, offered a conversion opportunity.

Q24: How much money did they take with them?

A24: $496,792.06 in employee contributions and $496,792.06 in matching employer contributions. $993,584.12 total contributions.

Q25: How many of them are still public employees in the State of Alaska?

A25: Seven PERS members and three TRS members are currently active employees.

Q26: How many defined-benefit eligible employees who left state employment cashed out their accounts before June 30, 2005, returned to work for the state or local governments in order to become re-vested in a defined-benefits plan before July 1, 2010?

A26: There are 2,486 people who refunded on or before June 30, 2005 that have returned to a PERS DB position before July 1, 2010.

Classification:

Q27: Please describe the methodology of the "point factor method" and the selection of a vendor.

A27: Point Factor Evaluation System uses defined compensable factors and levels within each factor to establish the value of a position. Factors represent the requirements, responsibilities, and conditions used to measure the relative value of a particular job. The importance of each compensable factor is indicated by its relative weight. Position (job) descriptions are compared to the definitions of the factor levels to determine the appropriate level for that position. The corresponding points for that level are awarded to the position and the points for all factors are combined to derive a total score. The total score determines the job class level and salary range of the position.

The selection of a vendor will follow the standard Request for Proposals process in accordance with AS 36.30.

Q28: Will you be requiring a full review of every job description and all associated audits?

A28: Converting to a point factor method will not require a full review of every job (position) description. It will be assumed that positions are allocated to the appropriate job class. It is the job class specification that will be reviewed against the factors. A job class specification includes the class definition, distinguishing characteristics, typical duties and responsibilities, and minimum qualifications. As is the current practice, individual position descriptions will be reviewed as necessary following implementation.

I hope the questions raised have been answered to your satisfaction. Please feel free to contact me at any time.

Sincerely,

Becky Hultberg

State of Alaska PERS and TRS

Benefit Comparison Between Latest Tier DB and DCR Benefits

Illustrations for SB 121

October 13, 2011

Assumptions

- Benefit amounts were projected for sample members based on average salary and career service for PERS and TRS
  - PERS Tier 3 DB benefit and Tier 4 DCR benefit for Peace Officers / Firefighters and Other members
  - TRS Tier 2 DB benefit and Tier 3 DCR benefit for all members
  - No Healthcare or SBS benefits were included
- Actuarial assumptions were made consistent with June 30, 2010 actuarial valuation reports
  - Life expectancy based on PERS/TRS mortality tables
  - DB benefits valued using 8% interest rate and 2% PRPA
  - DCR balances annuitized using 5% annuity conversion rate and 2% PRPA
  - DCR account balances projected with 7% rate of return for moderate investor, and 5% for conservative investor
  - Salaries were assumed to increase annually at 3.62%

RE: Fiscal Note for Senate Bill No. 121 – New Tier for PERS and TRS Healthcare - REVISED

Dear Jim:

As requested, we are providing the following information for a revised Fiscal Note on SB 121 which allows current Defined Contribution Retirement (DCR) members and future members to have a choice between the DCR Plan and the Defined Benefit (DB) Plan. Current DCR members or any future members that elect to go into the DB Plan will enter Tier V for PERS and Tier IV for TRS. These tiers will have the same pension benefits as the latest DB tier but they will have different healthcare benefits. Under the new tiers, members will receive system-paid healthcare benefits at Medicare eligible age (age 65) instead of at age 60. This bill affects the State of Alaska Public Employees' Retirement System Defined Benefit Plan (PERS DB) and the Teachers' Retirement System Defined Benefit Plan (TRS DB). We are assuming the proposed benefit changes would become effective as of July 1, 2012 and will first impact contribution rates during FY15 considering the two-year delay in budgeting contribution payments. Our results are based on the 2010 actuarial valuation results.

The table below shows the cost of the bill for Fiscal Years 2015 through 2019. Dollars are in thousands.

PERS DB Plan	**FY15**	**FY16**	**FY17**	**FY18**	**FY19**
Increase in Normal Cost Amount	$ 17,568	$ 25,629	$ 35,788	$ 46,977	$ 57,771
General Fund Transfer to Pay Unfunded Past Service Cost	$ 91,724	$ 0	$ 0	$ 0	$ 0
Total Increase in Annual Employer Contribution Amount	$ 109,292	$ 25,629	$ 35,788	$ 46,977	$ 57,771

TRS DB Plan	**FY15**	**FY16**	**FY17**	**FY18**	**FY19**
Increase in Normal Cost Amount	$ 2,285	$ 3,536	$ 4,993	$ 6,943	$ 8,764
General Fund Transfer to Pay Unfunded Past Service Cost	$ 32,688	$ 0	$ 0	$ 0	$ 0
Total Increase in Annual Employer Contribution Amount	$ 34,973	$ 3,536	$ 4,993	$ 6,943	$ 8,764
Total PERS and TRS	$ 144,265	$ 29,165	$ 40,781	$ 53,920	$ 66,535

1200 17th Street, Suite 1200 • Denver, CO 80202
720.359.7700 • 720.359.7701 (fax)

Summary for Analysis Continuation Section of Fiscal Note

The data, assumptions, plan provisions and methods used for the costs are described in the actuarial valuation reports for PERS and TRS as of June 30, 2010. The assets are based on the June 30, 2010 information provided by Christina Maiquis. We have assumed that the bill will become effective July 1, 2012. We have also assumed that 60% of current DCR members will elect to convert to the DB Plan, and that 80% of future members will choose the DB Plans either by choice or by default. A description of Tier V benefits for PERS and Tier IV benefits for TRS was provided by Kathy Lea.

Please let us know if you need any further information.

Sincerely,

David H. Slishinsky

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 121
2011 LEGISLATIVE SESSION

Analysis

SB 121 allows future and current defined contribution PERS and TRS members an opportunity to choose between a defined contribution (DC) and a defined benefit (DB) plan. Current DC members will have a one-time opportunity to convert to the DB plan. The DC member's employee and employer contributions will be transferred to the DB plan along with the total service the employee has accrued. If the combined contributions is insufficient to purchase the employee's service, the remainder will be made up from the general fund. The general fund expenditure will occur in FY 13 during the first 60 days after the effective date of the bill that allows for DC members to convert to the DB plan.

Costs outlined below for the choice option assumes 60% of current defined contribution members will elect to convert to the DB plan and that 80% of future members will choose the DB plans either by choice or by default.

The first impact on contributions rates will occur in FY 15 considering the two-year delay in budgeting contribution payments. Results are based on the draft 2010 actuarial valuation.

Because this bill will increase employer normal costs, under SB 125 (2008), which caps employer contribution rates at 22% for PERS and 12.56% for TRS, employers will therefore contribute less to past service costs. The amount that employers are no longer paying will be paid by the general fund.

Dollars are in thousands

PERS DB Plan	**FY 13**	**FY 14**	**FY 15**	**FY16**	**FY 17**	**FY18**	**FY 19**

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB121
2012 LEGISLATIVE SESSION

Analysis

SB 121 allows future and current defined contribution PERS and TRS members an opportunity to choose between a defined contribution (DC) and a defined benefit (DB) retirement plan at the time of hire. Current DC members will have a one-time opportunity to convert to the DB plan. If the DC member elects to convert, the member's employee and employer contributions will be transferred to the DB plan along with the total service the employee has accrued. If the combined contributions are insufficient to fully purchase the employee's service, the remainder due will be paid from the general fund. The general fund expenditure will occur in FY 13 during the first 60 days after the effective date of the bill when conversion can occur.

Costs outlined below for the choice option assumes 60% of current defined contribution members will elect to convert to the DB plan and that 80% of future members will choose the DB plans either by choice or by default.

The first impact on contribution rates will occur in FY15 considering the two year delay in the plan valuation process. Results are based on the 2010 actuarial valuation.

Employer rates are capped at 22% for PERS by AS 39.35.255 and at 12.56% for TRS by AS 14.25.070. Because this bill will increase employer normal costs, employers will contribute less to the past service costs of the systems. The increased past service costs will be borne by the State of Alaska general fund.

Dollars are in thousands.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB121
2012 LEGISLATIVE SESSION

Analysis

The Division of Retirement and Benefits will require two non-permanent employees to complete the preparation work to account for and produce the necessary documents and forms for the inception of the new tiers. Education to employers will be required to properly electronically report service and salaries of new employees and existing employees of the defined contribution plans who elect to convert to the new tier. Education to employees will be required for defined contribution employees to make an informed decision during the election period and for new members of the new tiers.

The division will be required to reprogram its existing system, the Combined Retirement System, which tracks all service and salaries reported by employers to the system, to accommodate the new provisions of the new tiers.

The estimated administrative costs to the division by fiscal year are as follows:

Dollars are in thousands

	FY13	FY14	FY15	FY16	FY17	FY18

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB121
2012 LEGISLATIVE SESSION

Analysis

SB 121 allows future and current defined contribution PERS and TRS members an opportunity to choose between a defined contribution (DC) and a defined benefit (DB) plan. Current DC members will have a one-time opportunity to convert to the DB plan. The DC member's employee and employer contributions will be transferred to the DB plan.

Assumptions:
60% of the current defined contribution plan will be elected by DC members to convert to the DB plan. 80% of future members will elect to be in the DB plan.
Rate of return assumed to be 8%
Management fees assumed at 35 basis points.

SB 121 – Making Promises and Keeping Promises

Department of Administration
Presentation to Senate State Affairs Committee
April 14, 2011

Making Promises

- Defined Benefit Plan Promises
  - Pension up to 67% of average salary
  - Annual cost of living increases
  - System-paid medical premiums
- Membership: 95,667

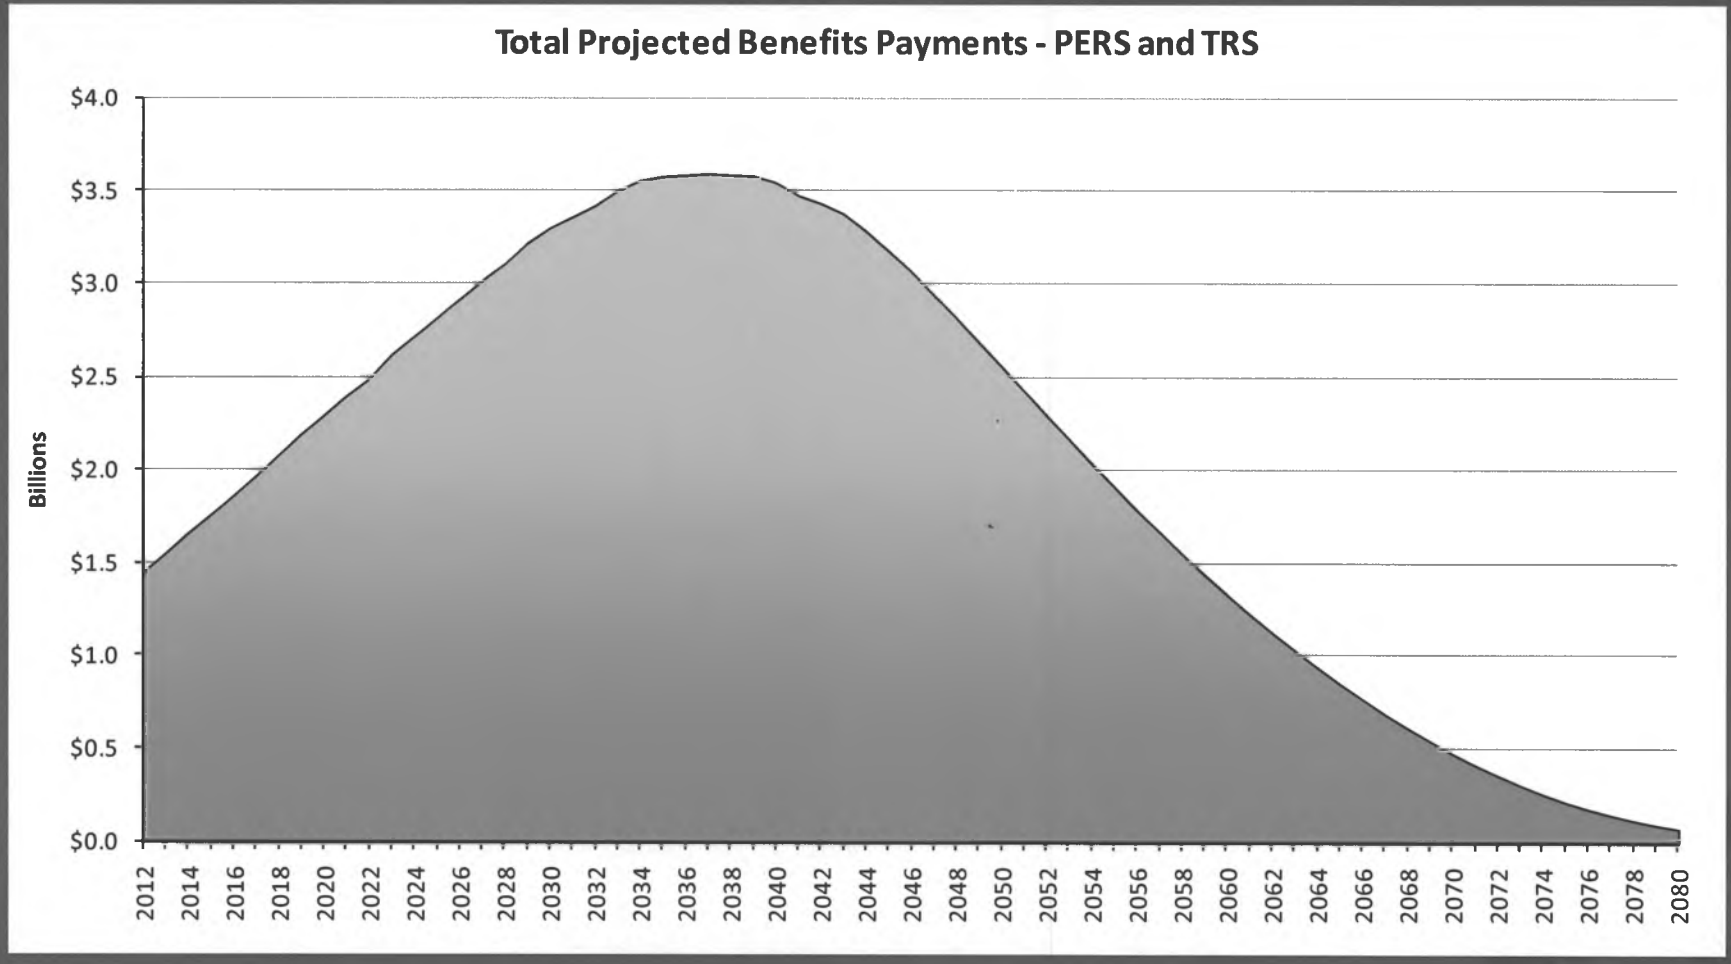
PERS	TRS
Tier I: 29,832	Tier I: 12,124
Tier II: 16,738	Tier II: 9,771
Tier III: 27,202	

Constitutional Obligation

- PERS/TRS DB Benefits will be paid until approximately 2080

- Benefit payments –
  -$1 billion per year from now until 2063
  -$3 billion per year from 2027-2046

PERS / TRS Hard Liabilities



Source: Buck Consultants

Increasing Cost of DB Plan Benefits

- People are living longer than expected
- People are retiring earlier than expected
- Health costs have substantially exceeded the rate of inflation

How We Plan to Keep Our Promises

- Continue to:
  - Invest $15.8 billion in assets
  - Collect 22% of payroll from PERS employers
  - Collect 12.5% of payroll from TRS employers
  - Collect 6.75% from PERS DB employees
  - Collect 8.65% from TRS DB employees
  - Request GF Contributions
  - Make all benefits payments when due

Current Difficulties

- Cost of promised benefits keeps increasing
- Unfunded liability now projected to exceed $11 billion
- PERS employer rate projected to increase from 30.75% in FY 12 to 32.83% for FY 13
- TRS employer rate projected to increase from 42.56% in FY 12 to 49.56% for FY 13
- Plan assets have been jeopardized by Great Recession and volatile markets

The Road Ahead

- Liabilities are projected to exceed $3 billion a year for the 20-year period 2027-2046
- Current assets are $16 billion with various streams of revenue
- New unfunded liabilities can develop at any time:
  - Mortality changes
  - Health care cost increases
  - Future investment loss

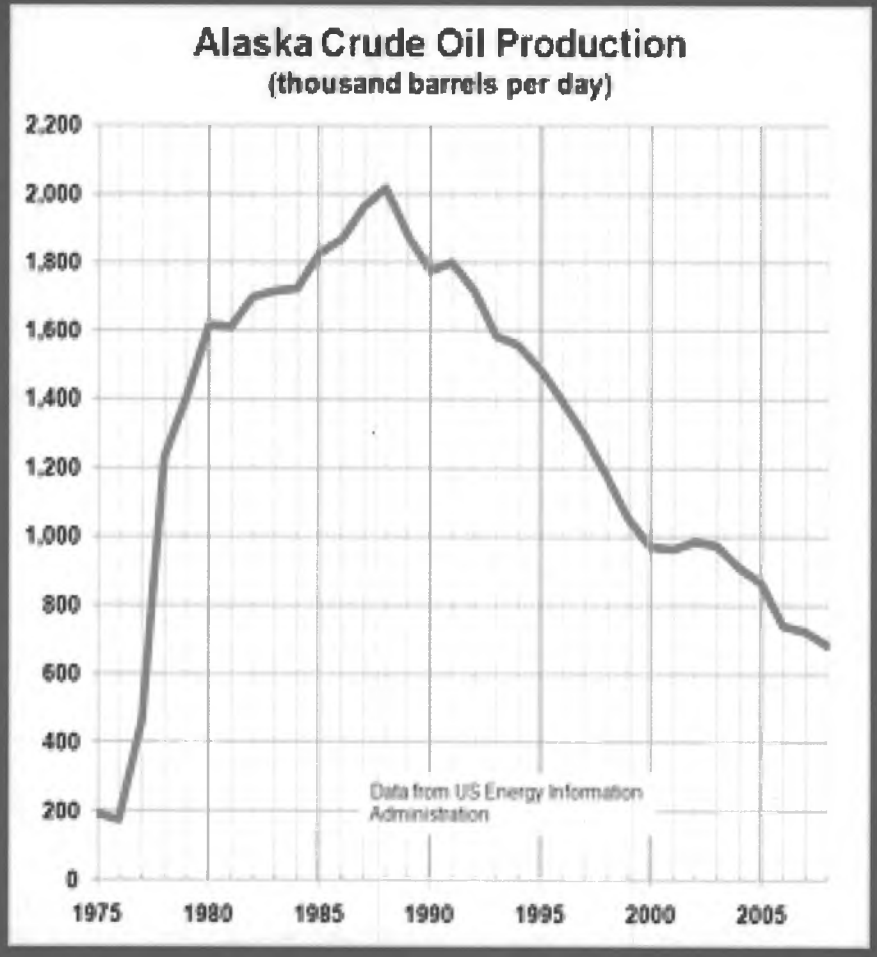
Pension Plans Need Backstops

- Alaska's experience from the 2000s
- Unfunded liabilities arise for a variety of reasons, negligent and non-negligent
- When unfunded liabilities have developed in the Alaska, by and large the GF has provided the solution

Making New Promises

- SB 121 makes new retirement promises to the next generation of state employees
- The State will need to keep those promises until at least 2080-2090
- $3 billion in annual benefit payments for current population will extend beyond 2047
- Where is the GF income in the future to backstop these new retirement promises?
  - Investment losses
  - Mortality changes
  - Increased health care costs

Can we make new promises that retirees and their families will be able to rely on in 2060-2090?



Does SB 121 Save Money?

- Employer contribution rates are set on combined DB/DC payroll
- Contribution rates will not decrease with SB 121
- State as an employer pays 5% for DC employees, 30.76% for DB employees
- DC account balances total approximately $300 million

Breaking Promises

- Retirement promises have been broken elsewhere
- Private employer retirement plan defaults prompted federal passage of ERISA in 1974
- Current threat of public pension defaults across the country
- Some states have broken promises and cut benefits to retirees
- Alaska has moral and constitutional obligation to keep its promises

Administration Position

- Keep the retirement promises we have made to date
- Don't make the problem worse
- Don't make new retirement promises that we cannot keep
- A revenue backstop is necessary to ensure new promises are kept; until Alaska's
  long term fiscal situation is solved
  this discussion is premature

SB 121
Technical Issues

TRS Issue

- Sec. 4 adds a requirement for SB 121 teachers who are disabled to apply for a vocational rehabilitation program. Inoperable provision.
- Sec. 21 requires current DC teachers to elect to transfer to the DB plan within 60 days of the effective date of legislation. Insufficient time period.

PERS Issues

- Sec. 14 removes current and future survivors from medical coverage due to new language “who becomes a member.” Survivors are not members.

PERS and TRS Issues

- Sec. 9 and 19 requires the PERS and TRS to provide a teacher or public employee with calculations to make a decision regarding participation in the DB or DC plan within 5 days of hire.
- Sec. 21 and 22 requires ARMB to ensure transfer of funds. Should be plan administrator.
- Sec. 22 requires any excess DC contributions to be paid to the member's SBS-AP account.

AMENDMENT #2

OFFERED IN THE SENATE

TO: CSSB 121(STA), Draft Version "R"

Page 4, line 10:

Delete "a new subsection"

Insert "new subsections"

Page 4, line 30, following "more":

Insert ", but less than 30,"

Page 5, following line 3:

Insert new subsections to read:

"(h) On or after July 1, 2018, and every five years thereafter, the administrator shall adjust the percentages under (g)(2) and (3) of this section as needed to maintain, but not to exceed, over the succeeding five years, an employer normal cost rate for the members and survivors who first became members after June 30, 2006, that does not exceed the combined total of the rates under AS 14.25.350(a), (b), (d), and (e) minus the employer normal cost rate attributable to the members who first became members after June 30, 2006, for benefits under AS 14.25.009 - 14.25.167. An adjustment made under this subsection shall remain in effect for five years. In making an adjustment under this subsection, the administrator shall maintain the five percent differences between (g)(2)(A), (B), and (C) of this section and the five percent differences between (g)(3)(A) and (B) of this section.

(i) When a member is appointed to retirement, the member obtains a vested right to the applicable percentage under (g)(2) or (3) of this section, as adjusted under (h) of this section, that is in effect when the member is appointed to retirement. A

member does not obtain a vested right to a percentage under (g)(2) or (3) of this section, as adjusted under (h) of this section, before the member is appointed to retirement."

Page 11, line 10, following "**retirement**":

Insert "**:**

(6) on or after July 1, 2018, and every five years thereafter, the administrator shall adjust the percentages under (3) and (4) of this subsection as needed to maintain, but not to exceed, over the succeeding five years, an employer normal cost rate for the members and survivors who first became members after June 30, 2006, that does not exceed the combined total of the rates under AS 39.35.750(a), (b), (d), and (e) minus the employer normal cost rate attributable to the members who first became members after June 30, 2006, for benefits under AS 39.35.095 - 39.35.530; an adjustment made under this paragraph shall remain in effect for five years; in making an adjustment under this paragraph, the administrator shall maintain the five percent differences between (3)(A), (B), (C), and (D) of this subsection and the five percent differences between (4)(A) and (B) of this subsection;

(7) when a member is appointed to retirement, the member obtains a vested right to the applicable percentage under (3) or (4) of this subsection, as adjusted under (6) of this subsection, that is in effect when the member is appointed to retirement; a member does not obtain a vested right to a percentage under (3) or (4) of this subsection, as adjusted under (6) of this subsection, before appointment to retirement."

Prepared as of February 1, 2012.

Major Changes in SB 121

Substantive changes in Sen. L&C "R" version:

- The changes in the bill take effect 7/1/2013

- Employees currently in the DC plan who convert are not automatically entitled to credit for all the time they've worked.
    - The actuarial 'time value' of the DC account will be credited automatically.
    - The employee may choose to create an indebtedness to make up any shortage, up to the actual years of service.

- Retirees in the new Defined Benefit tiers will pay a share of the premiums for medical insurance. These will be the same as DC retirees:
    - If the retiree is eligible for Medicare, the retiree pays:
        - 30 percent with 10-15 years of service
        - 25 percent with 15-20 years of service
        - 20 percent with 20-25 years of service
        - 15 percent with 25-30 years of service
        - 10 percent with 30 or more years of service
    - If a teacher, peace officer, or firefighter works 25 years or more, the retiree pays the percentages above, *even if not eligible for Medicare.*
    - If a PERS employee who is not a peace officer or firefighter works 30 years or more, the retiree pays 10 percent of the premium *even if not eligible for Medicare.*

The CS also makes some technical and mechanical changes:

- The title is more descriptive of the bill.
- When an employee converts from one plan to another, the change is retroactive to the date of hire. (This does not change the service credit provisions in the bill.)
- Language was clarified to ensure survivors of Defined Benefit members are eligible for survivor benefits.
- References to the Alaska Retirement Management Board transferring funds were changed to the administrator (Department of Administration) to reflect current practice.
- Language requiring individual accounts to be transferred with "interest" was changed to "with investment earnings and losses" to avoid confusion with statutory interest rates under other retirement statutes.

CS FOR SENATE BILL NO. 121(STA)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE STATE AFFAIRS COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS EGAN, Menard, Paskvan, Davis, Kookesh, Wielechowski, Ellis, Thomas, French, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act relating to new defined benefit tiers in the public employees' retirement system and the teachers' retirement system; providing certain employees an opportunity to choose between the defined benefit and defined contribution plans of the public employees' retirement system and the teachers' retirement system; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.25.009 is repealed and reenacted to read:

Sec. 14.25.009. Applicability of AS 14.25.009 - 14.25.220. (a) The provisions of AS 14.25.009 - 14.25.220 apply to teachers who are eligible to be members of the teachers' retirement system under AS 14.25.009 - 14.25.220 and are not members of the defined contribution retirement plan under AS 14.25.310 - 14.25.590.

(b) An employer that participates in the plan shall also participate in the defined contribution retirement plan under AS 14.25.310 - 14.25.590.

* **Sec. 2.** AS 14.25.040(a) is amended to read:

(a) Unless a teacher or member participates in a university retirement program under AS 14.40.661 - 14.40.799 or has elected under **AS 14.25.330 or former** AS 14.25.540 to participate in the plan established in AS 14.25.310 - 14.25.590, a teacher or member contracting for service with a participating employer is subject to AS 14.25.009 - 14.25.220.

* **Sec. 3.** AS 14.25.050(a) is amended to read:

(a) Except as provided in (c) **and (e)** of this section, beginning January 1, 1991, each member shall contribute to the plan an amount equal to 8.65 percent of the member's base salary accrued from July 1 to the following June 30. [THE EMPLOYER SHALL DEDUCT THE CONTRIBUTION FROM THE MEMBER'S SALARY AT THE END OF EACH PAYROLL PERIOD, AND THE CONTRIBUTION SHALL BE CREDITED BY THE PLAN TO THE MEMBER CONTRIBUTION ACCOUNT. THE CONTRIBUTIONS SHALL BE DEDUCTED FROM EMPLOYEE COMPENSATION BEFORE THE COMPUTATION OF APPLICABLE FEDERAL TAXES AND SHALL BE TREATED AS EMPLOYER CONTRIBUTIONS UNDER 26 U.S.C. 414(h)(2). A MEMBER MAY NOT HAVE THE OPTION OF MAKING THE PAYROLL DEDUCTION DIRECTLY IN CASH INSTEAD OF HAVING THE CONTRIBUTION PICKED UP BY THE EMPLOYER.]

* **Sec. 4.** AS 14.25.050 is amended by adding new subsections to read:

(e) Except as provided in (a) and (c) of this section, a member who first participates in the plan after June 30, 2006, shall contribute to the plan an amount equal to eight percent of the employee's base salary accrued from July 1 to the following June 30.

(f) The employer shall deduct the contributions under (a) and (e) of this section from the member's salary at the end of each payroll period, and the contributions shall be credited by the plan to the member contribution account. The contributions shall be deducted from employee compensation before the computation of applicable federal taxes and shall be treated as employer contributions under 26 U.S.C. 414(h)(2). A member may not have the option of making the payroll deduction

directly in cash instead of having the contribution picked up by the employer.

* **Sec. 5.** AS 14.25.130(c) is amended to read:

(c) Once each year during the first five years following appointment to disability under this section, and once every three-year period thereafter, the administrator may require a disabled member who **first became a member before July 1, 2006, and who** has not attained eligibility for normal retirement to undergo a medical or mental examination by a competent physician. The administrator shall suspend any disability benefit for a disabled member who refuses to undergo a physical or mental examination when requested under this section.

* **Sec. 6.** AS 14.25.130 is amended by adding new subsections to read:

(g) A person who first becomes a member after June 30, 2006, and who is receiving a benefit under this section shall undergo a medical examination as often as the administrator considers advisable, but not more frequently than once each year. The administrator shall determine the place of the examination and engage the physician or physicians. If, in the judgment of the administrator, the examination indicates that the disabled member is no longer incapacitated because of a total and apparently permanent occupational disability, the administrator may not issue further disability benefits to the member.

(h) A person who first becomes a member after June 30, 2006, and who is appointed to disability benefits shall apply to the division of vocational rehabilitation of the Department of Labor and Workforce Development within 30 days after the date disability benefits commence. The member shall be enrolled in a rehabilitation program if the member meets the eligibility requirements of the division of vocational rehabilitation. Unless the member demonstrates cause, benefits shall terminate at the end of the first month in which a disabled member

(1) fails to report to the division of vocational rehabilitation;

(2) is certified by the division of vocational rehabilitation as failing to cooperate in a vocational rehabilitation program;

(3) fails to interview for a job; or

(4) fails to accept a position offered.

* **Sec. 7.** AS 14.25.168(d) is amended to read:

(d) A benefit recipient**, or the surviving spouse of a benefit recipient, who first becomes a member before July 1, 2006,** may elect major medical insurance coverage in accordance with regulations and under the following conditions:

(1) a **benefit recipient** [PERSON] who has less than 25 years of membership service and who is younger than 60 years of age must pay an amount equal to the full monthly group premium for retiree major medical insurance coverage;

(2) a disabled member, a disabled member who is appointed to normal retirement, a person 60 years of age or older, or a person who has at least 25 years of membership service is not required to make premium payments.

*** Sec. 8.** AS 14.25.168 is amended by adding a new subsection to read:

(g) A benefit recipient, or the surviving spouse of a benefit recipient, who first becomes a member after June 30, 2006, may elect major medical insurance coverage in accordance with regulations and under the following conditions:

(1) if the participating member or surviving spouse is not eligible for Medicare, the cost of a monthly premium for retiree major medical insurance coverage elected under this section is equal to the full monthly group premium for retiree major medical insurance coverage;

(2) if the participating member or surviving spouse is eligible for Medicare, the cost of a monthly premium for retiree major medical insurance coverage is a percentage of the full monthly group premium, as follows:

(A) 30 percent if the member had 10 or more, but less than 15, years of service;

(B) 25 percent if the member had 15 or more, but less than 20, years of service;

(C) 20 percent if the member had 20 or more, but less than 25, years of service;

(3) the cost of a monthly premium paid by the member or the member's surviving spouse for retiree major medical insurance coverage is

(A) 15 percent of the full monthly group premium if the participating member has 25 or more years of service;

(B) 10 percent of the full monthly group premium if the

participating member has 30 or more years of service;

(4) a disabled member or a disabled member who is appointed to normal retirement is not required to make premium payments.

*** Sec. 9.** AS 14.25.310 is amended to read:

Sec. 14.25.310. Applicability of AS 14.25.310 - 14.25.590. The provisions of AS 14.25.310 - 14.25.590 apply only to

(1) teachers who first become members on or after July 1, 2006, **and before the effective date of this section who do not transfer to a defined benefit retirement plan under AS 14.25.009 - 14.25.220 or AS 39.35.095 - 39.35.680;**

(2) teachers described in AS 14.25.330 who elect under that section to become [TO MEMBERS WHO ARE EMPLOYED BY EMPLOYERS THAT DO NOT PARTICIPATE IN THE DEFINED BENEFIT RETIREMENT PLAN ESTABLISHED UNDER AS 14.25.009 - 14.25.220, TO FORMER MEMBERS UNDER AS 14.25.220, OR TO] members**; and**

(3) teachers who **transferred** [TRANSFER] into the defined contribution retirement plan under **former** AS 14.25.540.

*** Sec. 10.** AS 14.25.310 is amended by adding a new subsection to read:

(b) An employer that participates in the plan shall also participate in the defined benefit retirement plan under AS 14.25.009 - 14.25.220.

*** Sec. 11.** AS 14.25.330 is repealed and reenacted to read:

Sec. 14.25.330. Retirement plan election option. (a) A teacher who is first hired on or after the effective date of this section may make a one-time election to participate in the defined contribution retirement plan under AS 14.25.310 - 14.25.590 retroactive to the date of hire and may transfer to that plan employee contributions, if any, and employer contributions, if any, that have been made to the defined benefit retirement plan under AS 14.25.009 - 14.25.220. Before employer contributions are transferred under this subsection, the administrator shall recalculate them under AS 14.25.070.

(b) The election to participate in the defined contribution retirement plan under (a) of this section must be made within 90 days after the date of hire, and be made in writing on a form and in the manner prescribed by the administrator. Before

accepting an election to participate in the defined contribution retirement plan, the administrator shall, within 20 days after the administrator receives notification of the teacher's date of hire, provide the teacher eligible to make an election to participate in the defined contribution retirement plan under AS 14.25.310 - 14.25 590 with

(1) information, including calculations to illustrate the effect of moving the teacher's retirement plan from the defined benefit retirement plan to the defined contribution retirement plan; and

(2) other information clearly to inform the teacher of the potential consequences of the teacher's election.

(c) An election made under (a) of this section to participate in the defined contribution retirement plan is irrevocable. Retroactive to the date of hire, the teacher shall be enrolled as a member of the defined contribution retirement plan under AS 14.25.310 - 14.25.590, the member's participation in the plan shall be governed by the provisions for the defined contribution retirement plan, and the member's participation in the defined benefit retirement plan under AS 14.25.009 - 14.25.220 shall terminate. An election made by an eligible member who is married is not effective unless the election is signed by the member's spouse.

(d) When a member makes an election under (a) of this section, the administrator shall cause the total amount of the member's employee and employer contributions, with investment earnings and losses through the final day of the member's participation in the defined contribution retirement plan, to be actuarially calculated and transferred to the member's designated account in the defined contribution retirement plan. The board shall establish transfer procedures by regulation, but the actual transfer may not be later than 30 days after the date the administrator receives the member's election form under (b) of this section, unless the major financial markets for securities available for a transfer are seriously disrupted by an unforeseen event that also causes the suspension of trading on any national securities exchange in the country where the securities were issued. In that event, the 30-day period of time may be extended by a resolution of the board. Transfers are not commissionable or subject to other fees and may be in the form of securities or cash as determined by the board. Securities shall be valued on the date of receipt in the

member's account.

(e) An election made by an eligible member who is married is not effective unless the election is signed by the individual's spouse. An eligible member whose accounts are subject to a qualified domestic relations order may not make an election to participate in the defined contribution retirement plan under this section unless the qualified domestic relations order is amended or vacated and court-certified copies of the order are received by the administrator.

* **Sec. 12.** AS 39.35.095 is repealed and reenacted to read:

Sec. 39.35.095. Applicability of AS 39.35.095 - 39.35.680. (a) The provisions of AS 39.35.095 - 39.35.680 apply to public employees who are eligible to be members of the public employees' retirement system under AS 39.35.095 - 39.35.680 and are not members of the defined contribution retirement plan under AS 39.35.700 - 39.35.990.

(b) A public organization or a municipality or other political subdivision of the state that participates in the plan shall also participate in the defined contribution retirement plan under AS 39.35.700 - 39.35.900.

* **Sec. 13.** AS 39.35 is amended by adding a new section to read:

Sec. 39.35.128. Participation of elected officials of political subdivisions. (a) A person who is an elected official of a political subdivision of the state and who has not participated in the plan or waived participation in the plan before July 1, 2013, is a member of the plan if

(1) the political subdivision has elected under AS 39.35.600 - 39.35.650 to designate elected officials in the classifications of employees entitled to participate in the plan; and

(2) the elected official receives compensation from the political subdivision for services as an elected official in the amount of at least $2,001 a month.

(b) An elected official entitled to participate under this section, and who either has no previous service under the system with the political subdivision or is retired under the system, may file a waiver of participation in the plan with the administrator within 30 days after the later of July 1, 2013, or the date that the elected official's term of office begins. A waiver is irrevocable for the remainder of the elected official's

service as an elected official or employee of the political subdivision.

*** Sec. 14.** AS 39.35.160(a) is amended to read:

(a) **Subject to (e) of this section, beginning** [BEGINNING] January 1, 1987, each peace officer or firefighter shall contribute to the plan an amount equal to seven and one-half percent of the peace officer's or firefighter's compensation. Except as provided in **(d) and (e)** [(d)] of this section, beginning January 1, 1987, each other employee shall contribute to the plan an amount equal to six and three-quarters percent of the employee's compensation. [THE CONTRIBUTIONS SHALL BE DEDUCTED BY THE EMPLOYER AT THE END OF EACH PAYROLL PERIOD. THE CONTRIBUTIONS SHALL BE DEDUCTED FROM EMPLOYEE COMPENSATION BEFORE COMPUTATION OF APPLICABLE FEDERAL TAXES, AND THE CONTRIBUTIONS SHALL BE TREATED AS EMPLOYER CONTRIBUTIONS UNDER 26 U.S.C. 414(h)(2). A MEMBER MAY NOT HAVE THE OPTION OF MAKING THE PAYROLL DEDUCTION DIRECTLY INSTEAD OF HAVING THE CONTRIBUTION PICKED UP BY THE EMPLOYER.]

*** Sec. 15.** AS 39.35.160 is amended by adding new subsections to read:

(e) Except as provided in (a) and (d) of this section, an employee, including a peace officer or firefighter, who first participates in the plan after June 30, 2006, shall contribute to the plan an amount equal to eight percent of the employee's compensation.

(f) Contributions under (a) and (e) of this section shall be deducted by the employer at the end of each payroll period. The contributions shall be deducted from employee compensation before computation of applicable federal taxes, and the contributions shall be treated as employer contributions under 26 U.S.C. 414(h)(2). A member may not have the option of making the payroll deduction directly instead of having the contribution picked up by the employer.

*** Sec. 16.** AS 39.35.410(g) is amended to read:

(g) A disabled employee **who first became a member before July 1, 2006, and who is** receiving an occupational disability benefit shall undergo a medical examination as often as the administrator considers advisable but not more frequently than once each year. The administrator shall determine the place of the examination

and engage the physician or physicians. If, in the judgment of the administrator, the examination indicates that the retired employee is no longer incapacitated because of a total and apparently permanent occupational disability, the administrator may not issue further disability benefits to the employee.

*** Sec. 17.** AS 39.35.410 is amended by adding a new subsection to read:

(k) A person who first becomes a member after June 30, 2006, and who is appointed to disability benefits shall apply to the division of vocational rehabilitation within 30 days after the date disability benefits commence. The employee shall be enrolled in a rehabilitation program if the employee meets the eligibility requirements of the division of vocational rehabilitation. Unless the employee demonstrates cause, benefits shall terminate at the end of the first month in which a disabled employee

(1) fails to report to the division of vocational rehabilitation;

(2) is certified by the division of vocational rehabilitation as failing to cooperate in a vocational rehabilitation program;

(3) fails to interview for a job; or

(4) fails to accept a position offered.

*** Sec. 18.** AS 39.35.535(c) is amended to read:

(c) A benefit recipient may elect major medical insurance coverage in accordance with regulations and under the following conditions:

(1) a person**, or the surviving spouse of a person, who becomes a member before July 1, 2006**, other than a disabled member or a disabled member who is appointed to normal retirement, must pay an amount equal to the full monthly group premium for retiree major medical insurance coverage if the person is

(A) younger than 60 years of age and has less than

(i) 25 years of credited service as a peace officer under AS 39.35.360 and 39.35.370; or

(ii) 30 years of credited service under AS 39.35.360 and 39.35.370 that is not service as a peace officer; or

(B) of any age and has less than 10 years of credited service;

(2) a person**, or the surviving spouse of a person, who becomes a member before July 1, 2006,** is not required to make premium payments for retiree

major medical coverage if the person

(A) is a disabled member;

(B) is a disabled member who is appointed to normal retirement;

(C) is 60 years of age or older and has at least 10 years of credited service; or

(D) has at least

(i) 25 years of credited service as a peace officer under AS 39.35.360 and 39.35.370; or

(ii) 30 years of credited service under AS 39.35.360 and 39.35.370 not as a peace officer;

(3) a benefit recipient who first becomes a member after June 30, 2006, or a benefit recipient who is the surviving spouse of a person who first becomes a member after June 30, 2006, except as provided in (4) and (5) of this subsection, shall pay an amount equal to the full monthly group premium for retiree major medical insurance coverage; however, except as provided in (4) and (5) of this subsection, if the benefit recipient is eligible for Medicare, the cost of a monthly premium is a percentage of the full monthly group premium, as follows:

(A) 30 percent if the member has 10 or more, but less than 15, years of service;

(B) 25 percent if the member has 15 or more, but less than 20, years of service;

(C) 20 percent if the member has 20 or more, but less than 25, years of service;

(D) 15 percent if the member has 25 or more, but less than 30, years of service not as a peace officer;

(4) except as provided in (5) of this subsection, a benefit recipient who first becomes a member after June 30, 2006, or a benefit recipient who is the surviving spouse of a person who first becomes a member after June 30, 2006, shall pay a monthly premium that is

(A) 15 percent of the cost of a full monthly group premium

if the member has 25 or more, but less than 30, years of service as a peace officer; or

(B) 10 percent of the cost of a full monthly group premium if the member has 30 or more years of service;

(5) a benefit recipient who first becomes a member after June 30, 2006, is not required to make premium payments for retiree major medical coverage if the recipient

(A) is a disabled member; or

(B) is a disabled member who is appointed to normal retirement.

*** Sec. 19.** AS 39.35.620(k) is amended to read:

(k) Termination of an employer's participation in the plan does not bar future participation in the system by that employer if the employer is current with payments on amounts due under AS 39.35.625. [IF A PREVIOUSLY TERMINATED EMPLOYER RETURNS TO THE SYSTEM, THE EMPLOYER MAY ONLY PARTICIPATE IN THE PLAN ESTABLISHED UNDER AS 39.35.700 - 39.35.990. EMPLOYEES MAY BE CREDITED UNDER AS 39.35.700 - 39.35.990 ONLY WITH SERVICE SUBSEQUENT TO THE DATE OF RETURN.]

*** Sec. 20.** AS 39.35.680(18) is amended to read:

(18) "employer" means

(A) the State of Alaska;

(B) a political subdivision or public organization of the state that participates in the plan based on a resolution to participate in the plan that was approved by the administrator [ON OR BEFORE JULY 1, 2006]; or

(C) a political subdivision or public organization of the state that, as a result of consolidation or reorganization [THAT OCCURS ON OR AFTER JULY 1, 2006], assumes liability under the plan of a political subdivision or public organization described in (B) of this paragraph;

*** Sec. 21.** AS 39.35.700 is amended to read:

Sec. 39.35.700. Applicability of AS 39.35.700 - 39.35.990. The provisions of AS 39.35.700 - 39.35.990 apply only to

(1) members first hired on or after July 1, 2006, **and before the effective date of this section who do not transfer to a defined benefit retirement plan under AS 14.25.009 - 14.25.220 or AS 39.35.095 - 39.35.680;**

(2) public employees described in AS 39.35.720 who elect under that section to become [TO MEMBERS WHO ARE EMPLOYED BY EMPLOYERS THAT DO NOT PARTICIPATE IN THE DEFINED BENEFIT RETIREMENT PLAN ESTABLISHED UNDER AS 39.35.095 - 39.35.680, TO FORMER MEMBERS AS DEFINED IN AS 39.35.680, OR TO] members**; and**

(3) members who **transferred** [TRANSFER] into the defined contribution retirement plan under **former** AS 39.35.940.

*** Sec. 22.** AS 39.35.700 is amended by adding a new subsection to read:

(b) A public organization under AS 39.35.680 or a municipality or other political subdivision of the state that participates in the plan shall also participate in the defined benefit retirement plan under AS 39.35.095 - 39.35.680.

*** Sec. 23.** AS 39.35.720 is repealed and reenacted to read:

Sec. 39.35.720. Retirement plan election option. (a) A public employee who is first hired on or after the effective date of this section may make a one-time election to participate in the defined contribution retirement plan under AS 39.35.700 - 39.35.990 retroactive to the date of hire and may transfer to that plan employee contributions, if any, and employer contributions, if any, that have been made to the defined benefit retirement plan under AS 39.35.095 - 39.35.680. Before employer contributions are transferred under this subsection, the administrator shall recalculate them under AS 39.35.255.

(b) The election to participate in the defined contribution retirement plan under (a) of this section must be made within 90 days after the date of hire, and be made in writing on a form and in the manner prescribed by the administrator. Before accepting an election to participate in the defined contribution retirement plan under AS 39.35.700 - 39.35.990, the administrator shall, within 20 days after the administrator receives notice of the public employee's date of hire, provide the employee eligible to make an election to participate in the defined contribution retirement plan with

(1) information, including calculations to illustrate the effect of moving the employee's retirement plan from the defined benefit retirement plan to the defined contribution retirement plan; and

(2) other information to clearly inform the employee of the potential consequences of the employee's election.

(c) An election made under (a) of this section to participate in the defined contribution retirement plan is irrevocable. Retroactive to the date of hire, the employee shall be enrolled as a member of the defined contribution retirement plan under AS 39.35.700 - 39.35.990, the member's participation in the plan shall be governed by the provisions for the defined contribution retirement plan, and the member's participation in the defined benefit retirement plan under AS 39.35.095 - 39.35.680 shall terminate. An election made by an eligible member who is married is not effective unless the election is signed by the member's spouse.

(d) When a member makes an election under (a) of this section, the administrator shall cause the total amount of the member's employee and employer contributions, with investment earnings and losses through the final day of the member's participation in the defined contribution retirement plan, to be actuarially calculated and transferred to the member's designated account in the defined contribution retirement plan. The board shall establish transfer procedures by regulation, but the actual transfer may not be later than 30 days after the date the administrator receives the member's completed election form under (b) of this section, unless the major financial markets for securities available for a transfer are seriously disrupted by an unforeseen event that also causes the suspension of trading on any national securities exchange in the country where the securities were issued. In that event, the 30-day period of time may be extended by a resolution of the board. Transfers are not commissionable or subject to other fees and may be in the form of securities or cash as determined by the board. Securities shall be valued on the date of receipt in the member's account.

(e) An election made by an eligible member who is married is not effective unless the election is signed by the individual's spouse. An eligible member whose accounts are subject to a qualified domestic relations order may not make an election

to participate in the defined contribution retirement plan under this section unless the qualified domestic relations order is amended or vacated and court-certified copies of the order are received by the administrator.

* **Sec. 24.** AS 14.25.012(c), 14.25.540; AS 39.35.940, and 39.35.957(b) are repealed.

* **Sec. 25.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETIREMENT PLAN ELECTION CHOICE. (a) A teacher who was first hired after June 30, 2006, and before the effective date of this section and who is a member of the defined contribution plan of the teachers' retirement system under AS 14.25.310 - 14.25.590 may make a one-time election, within 90 days after the effective date of this section, to participate in the defined benefit retirement plan under AS 14.25.009 - 14.25.220 and to transfer all contributions, including employer contributions, that have been made or should be made to the defined contribution retirement plan for service the member completes before the effective date of the member's participation in the defined benefit retirement plan.

(b) A public employee who was first hired after June 30, 2006, and before the effective date of this section and who is a member of the defined contribution plan of the public employees' retirement system under AS 39.35.700 - 39.35.990 may make a one-time election, within 90 days after the effective date of this section, to participate in the defined benefit retirement plan under AS 39.35.095 - 39.35.680 and to transfer all contributions, including employer contributions, that have been made or should be made to the defined contribution retirement plan for any service the member completes before the effective date of the member's participation in the defined benefit retirement plan.

* **Sec. 26.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETIREMENT PLAN ELECTION PROCEDURE; REGULATIONS REQUIRED. (a) The election to participate in the defined benefit retirement plan under sec. 25 of this Act must be made in writing on forms and in the manner prescribed by the administrator. Before accepting an election to participate in the defined benefit retirement plan, the administrator shall provide the employee planning on making an election to participate in the defined benefit retirement plan with information, including calculations to illustrate the effect of moving the employee's retirement plan from the defined contribution retirement plan to the

defined benefit retirement plan as well as other information clearly to inform the employee of the potential consequences of the employee's election.

(b) An election made under sec. 25 of this Act to participate in the defined benefit retirement plan is irrevocable. On the effective date of the election, the participant shall be enrolled as a member of the defined benefit retirement plan, the member's participation in the plan shall be governed by the provisions for the defined benefit retirement plan, and the member's participation in the defined contribution retirement plan shall terminate. The participant's enrollment in the defined benefit retirement plan shall be effective retroactive to the date of hire. An election made by an eligible member who is married is not effective unless the election is signed by the individual's spouse.

(c) When a member makes a one-time election under sec. 25 of this Act, the administrator shall cause the total amount of the member's employee and employer contributions, with investment earnings and losses through the final day of the member's participation in the defined contribution retirement plan, to be actuarially calculated and, subject to (d) of this section, transferred to the pension fund in the defined benefit retirement plan. On the effective date of the member's participation in the defined benefit retirement plan, the member shall be credited with service in the defined benefit retirement plan that is equal to the member's service in years, including fractional years, recognized for computing benefits that may be due from the defined contribution retirement plan. The board shall establish transfer procedures by regulation, but the actual transfer may not be later than 30 days after the date the administrator receives the member's completed election forms under (a) of this section, unless the major financial markets for securities available for a transfer are seriously disrupted by an unforeseen event that also causes the suspension of trading on any national securities exchange in the country where the securities were issued. In that event, the 30-day period of time may be extended by a resolution of the board. Transfers are not commissionable or subject to other fees and may be in the form of securities or cash as determined by the board. Securities shall be valued on the date of receipt in the participant's account.

(d) If the value actuarially calculated under (c) of this section is insufficient to pay for a service credit equal to the participant's actual service, the administrator shall allow the participant to create an indebtedness up to the amount needed to eliminate the insufficiency;

however, if that value exceeds the amount needed to pay for a service credit equal to the participant's actual service, the administrator shall cause the excess to be paid to the participant as a rollover transfer to either an individual employee annuity account in the Department of Administration under the terms of AS 39.30.150 - 39.30.180 (Alaska Supplemental Annuity Plan) or, if the participant's employer does not participate in the Alaska Supplemental Annuity Plan, to an eligible retirement plan under AS 14.25.360(d) or AS 39.35.760(d). An excess under this subsection may not be used to purchase service credit in a retirement plan administered under AS 14.25 or AS 39.25.

(e) The provisions of this section are subject to the requirements of the Internal Revenue Code and the limitations under AS 14.25.010, 14.25.320(c) and (d), 14.25.490, AS 39.35.115, 39.35.678, 39.35.710(c) and (d), and 39.35.895.

(f) In this section,

(1) "administrator" means the commissioner of administration or the person designated by the commissioner of administration under AS 39.35.003 for a public employees' retirement plan and under AS 14.25.003 for a teachers' retirement plan;

(2) "board" means the Alaska Retirement Management Board established under AS 37.10.210;

(3) "defined benefit retirement plan" means the retirement plan established under

(A) AS 14.25.009 - 14.25.220 for a teacher; or

(B) AS 39.35.095 - 39.35.680 for a public employee;

(4) "defined contribution retirement plan" means the retirement plan established under

(A) AS 14.25.310 - 14.25.590 for a teacher; or

(B) AS 39.35.700 - 39.35.990 for a public employee;

(5) "Internal Revenue Code" the meaning given in AS 39.35.990.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ADOPTION OF REGULATIONS. The commissioner of administration shall adopt regulations necessary to implement the changes made by this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before the effective date of the law

implemented by the regulation.

*** Sec. 28.** Sections 26 and 27 of this Act take effect immediately under AS 01.10.070(c).

*** Sec. 29.** Except as provided in sec. 28 of this Act, this Act takes effect July 1, 2013.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB121

Analysis

SB 121 allows future and current defined contribution PERS and TRS members an opportunity to choose between a defined contribution (DC) and a defined benefit (DB) retirement plan at the time of hire. Current DC members will have a one-time opportunity to convert to the DB plan. If the DC member elects to convert, the member's employee and employer contributions will be transferred to the DB plan along with the total service the employee has accrued. If the combined contributions are insufficient to fully purchase the employee's service, the remainder due will be paid from the general fund. The general fund expenditure will occur in FY 13 during the first 60 days after the effective date of the bill when conversion can occur.

Costs outlined below for the choice option assumes 60% of current defined contribution members will elect to convert to the DB plan and that 80% of future members will choose the DB plans either by choice or by default.

The first impact on contribution rates will occur in FY15 considering the two year delay in the plan valuation process. Results are based on the 2010 actuarial valuation.

Employer rates are capped at 22% for PERS by AS 39.35.255 and at 12.56% for TRS by AS 14.25.070. Because this bill will increase employer normal costs, employers will contribute less to the past service costs of the systems. The increased past service costs will be borne by the State of Alaska general fund.

Dollars are in thousands.

PERS DB Plan	FY 13	FY 14	FY 15	FY16	FY 17	FY 18	FY19
Increase in Normal Cost Amount	$0.0	$0.0	$ 17,568	$ 25,629	$ 35,788	$ 46,977	$ 57,771
GF Transfer to Pay Unfunded Past Service Cost	$ 91,724	$0.0	$0	$0	$0	$0	$0
Total Increase in Annual Employer Contribution Amount	N/A	$0.0	$ 17,568	$ 25,629	$ 35,788	$ 46,977	$ 57,771

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB121
2012 LEGISLATIVE SESSION

Analysis

The Division of Retirement and Benefits will require two non-permanent employees to complete the preparation work to account for and produce the necessary documents and forms for the inception of the new tiers. Education to employers will be required to properly electronically report service and salaries of new employees and existing employees of the defined contribution plans who elect to convert to the new tier. Education to employees will be required for defined contribution employees to make an informed decision during the election period and for new members of the new tiers.

The division will be required to reprogram its existing system, the Combined Retirement System, which tracks all service and salaries reported by employers to the system, to accommodate the new provisions of the new tiers.

The estimated administrative costs to the division by fiscal year are as follows:

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB121
2012 LEGISLATIVE SESSION

Analysis

SB 121 allows future and current defined contribution PERS and TRS members an opportunity to choose between a defined contribution (DC) and a defined benefit (DB) plan. Current DC members will have a one-time opportunity to convert to the DB plan. The DC member's employee and employer contributions will be transferred to the DB plan.

Assumptions:
60% of the current defined contribution plan will be elected by DC members to convert to the DB plan. 80% of future members will elect to be in the DB plan.
Rate of return assumed to be 8%
Management fees assumed at 35 basis points.

SENATOR DENNIS EGAN

SB 121 – Alaska Pensions

Sponsor Statement

SB 121 lets teachers, Troopers, firefighters and other public employees choose one of two state retirement systems: an individual defined contribution retirement account, or earning a defined benefit pension.

A defined benefit pension takes time to earn, but rewards a record of public service by paying a guaranteed monthly benefit and, for long-term employees, health insurance. An individual defined contribution account is portable from one employer to another, and flexible in how it can be used, but makes no guarantees. SB 121 will let newly hired public servants in Alaska choose the one that fits best.

SB 121 creates a new more stable, more predictable defined benefit pension tier for teachers and public employees. A few years ago, Alaska beefed up oversight of the pension system. Now we have two actuaries analyzing the health of the pension trusts, there are more frequent experience studies and the law bars the practice of sometimes paying less than the cost of benefits. SB 121 keeps these smart reforms, making Alaska pensions stronger than ever.

And the defined benefit pensions for new employees under SB 121 will cost employers less than the pension tiers that came before, saving money for schools, cities, and the State of Alaska.

Alaska teachers and public employees don't earn Social Security, and many even lose Social Security benefits they earned in past jobs. So for most, a defined benefit pension makes sense. Other employees will choose individual defined contribution accounts because they prefer flexibility, portability, and control, or because their plans do not include long-term service in the public sector. SB 121 maintains their option to choose an individual account.

The teachers who educate our children, the police and firefighters who protect our families, and the public employees who serve our state and cities will be able to choose the benefit that best fits their service.

March 8, 2011

CONFIDENTIAL

Alaska Public Pension Coalition

Subject: Analysis of Egan Bill

Dear Coalition Partners:

We have analyzed the actuarial impact of the February 12, 2011 draft Bill from Senator Egan which would modify the retirement program for those now covered by the Defined Contribution Retirement (DCR) program.

The primary features of the bill are:

- Those hired on or after July 1, 2006 would receive the retirement, death and disability benefits currently provided by Tier 2 of TRS and Tier 3 of PERS, rather than the DCR benefits under Tier 3 of TRS and Tier 4 of PERS.
- Peace Officers and firefighters in PERS would contribute 7.50% of pay; other PERS members would contribute 6.75%; those in TRS would contribute 8.65%
- Those individuals would be eligible to receive retiree major medical coverage without having to pay premiums, under the following conditions:
    - For teachers, after June 30, 2011 new retirees are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 8 years of service.
    - For peace officers and firefighters, after June 30, 2011 new members are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
    - For other PERS members, after June 30, 2011 new members are eligible with 30 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.

This information is provided according to PTA's understanding and interpretation of the Work Draft legislation. Please advise us if our interpretation above is not consistent with your understanding. If so, our findings would differ.

The major implications of the bill as we see it are:

- Pension benefits will revert to the prior defined benefit plan tiers
- Retiree health benefits will be stronger than those under DCR, but not as strong as those provided under the latest tier DB plans. Retiree health care premiums are paid as illustrated by the following table:

	Teachers	Peace Officers & Firefighters	Other PERS
Latest Tier DB Plan Health Care Eligibility	Age 60 or 25 years	Age 60 or 25 years	Age 60 or 30 years
DCR Program Health Care Eligibility	Medicare Age [65]	Medicare Age [65]	Medicare Age [65]
Egan Bill Health Care Eligibility	Medicare Age [65] with 8 years or any age with 25 years	Medicare Age [65] with 10 years or any age with 25 years	Medicare Age [65] with 10 years or any age with 30 years

Cost Comparisons

The actuary for the Alaska Department of Administration Division of Retirement Benefits regularly reports on the financial condition of the Alaska Public Employees' Retirement System (PERS) and Alaska Teachers' Retirement System (TRS). These analyses are conducted primarily through an "actuarial valuation", which calculates the plans costs and liabilities. The actuary has calculated the Normal Cost under both the prior tier DB plans as well as under the DCR program. We have been asked to estimate the costs of the proposed program in the draft Egan bill. These cost estimates are being done without the benefit of the full actuarial data that would be used by the actuary. Consequently, their numbers will likely be different than ours, and more correct. We also understand that the actuarially assumed rate of investment return is being reduced from 8.25% to 8.00%. Our estimates are still based on 8.25%, so the "official" cost numbers will likely be slightly higher than ours.

The following tables develop our cost estimates and compare the three programs:

Teachers Retirement System	DB Plan Tier 2	DCR Plan Tier 3	Proposed Tier 4
Total Retirement Normal Cost	11.39%	NA	11.39%
Member Contributions	(8.65%)	(8.00%)	(8.65%)
Net Employer Retirement Normal Cost	2.74%	NA	2.74%
DC Employer Contribution Rate	NA	7.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	0.05%	NA
Medical Normal Cost Rate	5.33%	0.64%	4.52%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	8.07%	10.69%	7.26%
DCR Payroll during FY 2011	$59,750,000	$59,750,000	$59,750,000
Total Employer Cost on FY 2011 Basis	$4,800,000	$6,400,000	$4,300,000

Public Employees Retirement System – Peace Officers & Firefighters	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost	12.30%	NA	12.30%
Member Contributions	(7.50%)	(8.00%)	(7.50%)
Net Employer Retirement Normal Cost	4.80%	NA	4.80%
DC Employer Contribution Rate	NA	5.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	1.04%	NA
Medical Normal Cost Rate	5.90%	0.43%	5.35%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	10.70%	9.47%	10.15%
DCR Payroll during FY 2011	$21,192,000	$21,192,000	$21,192,000
Total Employer Cost on FY 2011 Basis	$2,300,000	$2,000,000	$2,200,000

Other Public Employees Retirement System Members	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost	9.58%	NA	9.58%
Member Contributions	(6.75%)	(8.00%)	(6.75%)
Net Employer Retirement Normal Cost	2.83%	NA	2.83%
DC Employer Contribution Rate	NA	5.00%	NA
Occupational Death and Disability Normal Cost Rate	NA	0.16%	NA
Medical Normal Cost Rate	7.00%	0.56%	3.60%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	9.83%	8.72%	6.43%
DCR Payroll during FY 2011	$200,739,000	$200,739,000	$200,739,000
Total Employer Cost on FY 2011 Basis	$19,700,000	$17,500,000	$12,900,000

Some of these cost comparisons are very intriguing. Note that the costs for the Peace Officers and Firefighters are roughly comparable to the Tier 3 and Tier 4 costs. But the costs for Other PERS member is dramatically lower than either the Tier 3 or Tier 4 costs. This is because they are losing significantly on the medical premium payments, by no longer being able to retire at age 60 with premium payment made by the plan unless they have 30 years of service. I estimate that only about a third of these Other PERS members would have 30 years by the time they attain age 65, meaning that this benefit would have no value for most of them. That is the reason the medical normal cost rate is so much lower for Other PERS Tier 5 than for Other PERS Tier 3. It will be interesting to see what the "official" actuarial cost determination is.

Please also realize that the cost determinations above do not include any cost for the retroactive feature of the bill. I understand that those costs were estimated to be $37 million in 2009. We do not have the data necessary to make an estimate of the cost this year. Because of the market recovery, the cost might possibly have decreased since 2009.

Conclusions.

The proposed program would result in stronger pension benefits through the return of the Defined Benefit plan for members hired since 2006. It would provide improved health care plan benefits, but no future HRA contributions. Member contribution rates would decrease for PERS members and increase slightly for TRS members. As a result of all this, employer costs on a FY 2011 basis would increase by about $200,000 for PERS Peace Officer and Firefighter members, but would decrease substantially for TRS ($2.1 million) and Other PERS ($4.6 million) members. In total, employer costs would fall by about $6 million.

The PERS and TRS actuary will calculate more precise costs, based on complete data and their new actuarial assumptions. The costs above should be considered a starting point for analysis of the bill.

The work reflected herein was conducted by Pension Trustee Advisors under my direction. I look forward to discussing this with you further.

Sincerely,

William B. Fornia, FSA
President

Vesting	Members vest with 8 years of service.	Members vest with 8 years of service.	100% vested in employee contributions from inception. Vested in employer contributions based on the following schedule: 25% after 2 years of service, 50% after 3 years, 75% after 4 years and 100% after five years.
Qualifications for Retirement	Normal retirement age is 55, with early retirement at age 50; teachers can retire at any age after 20 years of membership service.	Normal retirement age is 60, with early retirement at age 55; teachers can retire at any age after 20 years of membership service.	None for investment account. Taxes and penalties may apply if withdrawn before age 59 1/2. See requirements for Retirement Medical Coverage.
Benefit Calculation Formula	Benefit formula is 2% for the first 20 years **and all years of service prior to July 1, 1990**, 2.5% thereafter. Benefit calculation is determined on the average of the high three contract salaries.	Benefit formula is 2% for the first 20 years, 2.5% thereafter. Benefit calculation is determined on the average of the high three contract salaries.	DC account balance plus investment earnings.
Alaska Cost-of-living Increases (COLA)	An Alaska Cost-of-Living Allowance is payable to benefit recipients who remain domiciled in Alaska after retirement. The allowance is 10% of the base benefit.	An Alaska Cost-of-Living Allowance is payable to benefit recipients 65 or older or disability benefit recipients regardless of age who remain domiciled in Alaska after retirement. The allowance is 10% of the base benefit.	None provided.

More detailed information may be found on the Division website, www.state.ak.us/drb, *or in the TRS Information Handbook.*

Feature	Tier I July 1, 1955 – June 30, 1990	Tier II Entered on or after July 1, 1990	Tier III Entered on or after July 1, 2006
Post Retirement Pension Adjustments (PRPA) **(Inflation protection)**	PRPA increases granted on an ad hoc basis. If an ad hoc is not granted, tier I employees must be age 60 or over or receiving benefits for 8 years to qualify for the automatic PRPA. The automatic PRPA legislated in 1990 applied to all members regardless of hire date.	Automatic PRPA adjustments to disabled members, retirees 60 and over, and those who have received benefits for 8 years.	None provided.
Retirement Medical Coverage	Medical coverage is provided to all benefit recipients and their eligible dependents. The retiree medical plan premium is paid by the retirement system.	The retirement system pays the retiree medical plan premium for all disabilitants regardless of age, for retirees and survivors over age 60 and for retirees with at least 25 years of membership service. This coverage includes eligible dependents. Retirees and survivors under age 60, with less than 25 years of membership service must pay the full premium cost if they want coverage.	Access to medical coverage at Medicare eligible age with 10 years of service or at any age with 30 years of service. Must retire directly from the system. If not eligible for Medicare, must pay full premium. May use health reimbursement arrangement (HRA) account to pay premiums. Once the HRA is exhausted, member self- pays premiums. When eligible for Medicare, the percentage of premium paid by the retiree or surviving spouse is: 10-14 years of service - 30% 15-19 years - 25% 20-24 years - 20% 25-29 years - 15% 30 years or more - 10%
Disability Benefits	Disability benefits are 50% of base salary, plus 10% for each eligible dependent child up to a maximum of 4 children.	Disability benefits are 50% of base salary, plus 10% for each eligible dependent child up to a maximum of 4 children.	Must be a total and presumably permanent disability whose cause is directly related to performance of duties of the job or an on the job injury. Benefit is 40% of salary, earns service while on occupational disability. Employer continues to make all required contributions as if the member were working, plus the member's required contributions to the DC account, without deduction from the member's disability payment. Disability benefits cease when the member becomes eligible for normal retirement at Medicare eligible age and 10 years of service or at any age with 30 years of service. No medical insurance until eligible for normal retirement.

More detailed information may be found on the Division website, www.state.ak.us/drb, *or in the TRS Information Handbook.*

Gary Miller
20135 Cohen Dr
Juneau, AK 99801-8211

Subject: SB 121 - "An Act relating to the public employees' retirement system and the teachers' retirement system; and providing for an effective date."

Senator Bill Wielechowski – Room 101
Senator Joe Paskvan – Room 115
Senator Cathy Giessel – Room 7
Senator Albert Kookesh – Room 11
Senator Kevin Meyer – Room 103

Please vote yes on SB 121. I am tier I and retired and my son is tier III with nine and one-half years of working for the State of Alaska as an account. We know the importance of having a defined benefit retirement system where we will have a monthly income to the day that we die. The current defined contribution tiers do not protect workers for life after they retire.

I have a three year old grandson here in Juneau. When he is old enough to start working he won't have a secure retirement if he works for the State of Alaska, becomes a teacher or works for a municipality. I spent my entire working career working for the State of Alaska (27 years) and the City and Borough of Juneau (2 years). It is important for me that he be able to stay in Alaska and have public service as an option for a career.

Thank you.

Gary Miller

Wisconsin facing teacher exodus

By Scott Bauer

Associated Press / September 1, 2011

MADISON, Wis. - When students return today for the first day of school across Wisconsin, many familiar faces will be gone, as teachers chose retirement over coming back following the passage of a bill that would have forced them to pay more for benefits and taken away most of their collective bargaining rights.

Documents obtained by the Associated Press under the state's open records law show that about twice as many public school teachers decided to retire in the first half of this year as in each of the past two full years, part of a mass exit of public employees.

Their departures came after the bill passed but before the new law took effect. The bill, which was pushed by Governor Scott Walker and the Republican Legislature, led to weeks of protests at the Capitol.

The ensuing exodus of teachers and other state employees has spurred fears that the jobs might not be filled and that classroom leadership by veteran teachers will be lost.

Ginny Fleck, a German teacher from Green Bay with 30 years of experience, is among nearly 5,000 teachers who retired.

"It wouldn't make sense for me to teach one more year and basically lose $8,000," she said. Fleck, 69, decided to retire in February, even before the bill became law, in part because of the hit she would take to her $60,000 annual salary, and because of other changes the district was making.

In the first six months of 2011, overall public employee retirements were double that in all of either 2009 or 2010, according to data provided by the Wisconsin Retirement System. That includes 4,935 Wisconsin school district employees who started receiving retirement benefits, up from 2,527 teacher retirements in all of 2010 and 2,417 in 2009.

Teachers were not the only public employees heading for the exits. State agency retirements were particularly dramatic, nearly tripling from 747 in all of 2010 to 1,966 through June. Retirements from the University of Wisconsin System more than doubled, up from 480 last year to 1,091 this year. All told, 9,933 public workers had retired by the end of June, a 93 percent increase from 5,133 in 2010. The year before, there were 4,876 retirements.

The state Department of Administration said no decision has been made on how many of the government jobs will be filled.

"Each agency is looking at the vacancies created by retirements - case by case - and making decisions based on the needs of the agency, as well as with an eye toward keeping costs down for taxpayers," department spokeswoman Carla Vigue said.

Many public workers feel under attack by the measure, which required them to pay more for their health insurance and pension benefits and took away most of their ability to collectively bargain. Lawmakers pushed the changes as a way for schools and governments to deal with deep cuts necessitated by a state budget shortfall.

The Honorable Bill Wielechowski, Chair
Senate State Affairs
State Capitol, Room 101
Juneau, AK 99801

Re: Senate Bill 121

Dear Senator Wielechowski:

During the hearing for Senate Bill (SB) 121 before the Senate State Affairs Committee on April 14, 2011, questions were asked for which I promised a response. We apologize for the delay in responding. Various items had to be compiled and data verified before we could give a complete response. The questions and responses are as follows:

Q1: Is there any other state with a defined contribution plan only that also does not participate in Social Security?

A1: Thirteen states currently do not participate in Social Security. They are: Alaska, California, Colorado, Illinois, Louisiana, Maine, Nevada, Ohio, Connecticut, Massachusetts, Missouri, Rhode Island, and Texas. Currently all have defined benefit plans for public employees. However, Nevada has introduced legislation to change to a defined contribution hybrid plan for new employees.

We understand there are three counties in Texas that do not have a defined benefit plan or a defined contribution plan. The Galveston, Matagorda, and Brazoria counties opted out of Social Security in the early 1980's and replaced it with a hybrid plan that has a defined employer contribution coupled with a fixed annuity for the employee.

Q2: What are the total savings in state accounts? (i.e. Permanent Fund, etc.)

A2: The Permanent Fund, June 30, 2010, balance from the Annual Financial Report was $37 billion. The unaudited balance as of May 31, 2011 was $41 billion. From the State of Alaska Combined Annual Financial Report, Total Unrestricted Assets were $16.7 billion as of June 30, 2010.

Q3: What is the gross payroll for the Public Employees' Retirement System (PERS)?

A3: Gross payroll was approximately $1.4 billion for PERS in FY2010. Gross payroll for the

Teachers' Retirement System (TRS) was approximately $0.5 billion. *(Source: 2010 Draft Audit.)*

Q4: How much is paid towards the unfunded liability by employers?

A4: During FY2010 PERS employers paid 22% in employer contributions. Of that 22%, 12.54% went towards the unfunded liability, approximately $175.5 million. The General Fund pays almost all of the TRS unfunded liability.

Q5: What was the effect when the Mercer settlement was applied?

A5: The Mercer settlement was added to the Alaska Retiree Health Care Trust Fund (PERS and TRS) assets as of June 30, 2010 and therefore will be reflected in the actuarial rates for FY2013.

Q6: Isn't the problem basic math? Increase employer money in and employee money in.

A6: To address the continuing rise in employer costs the PERS was changed in 2008 from an agent multiple, employer plan, where each employer had their own rate calculated on their own experience, to a cost share plan with all employers paying the same rate. At that time, employer rates were established in statute at 22% for PERS and 12.56% for the TRS. The State of Alaska contributes the remaining contributions necessary to fully fund the systems for the year. Employee contributions are also set in statute at 7.25% for peace officer/firefighter members and 6.75% for all others.

The 2008 change had a dramatic impact for some PERS employers. For instance, the employer contribution rate for the City of Fairbanks dropped from 140% to 22%.

While employer contribution rates can be increased by legislation, employee contribution rates cannot be increased for any existing PERS or TRS members. Any changes to employee contributions can only apply to new employees entering the systems after the effective date of the change. *(Alaska Constitution, Article XII, Section 7)*

Q7: Has the State considered raising the retirement age in the retirement systems as a way to reduce costs?

A7: Due to the contractual protection clause toward retirement benefits found in Article XII, Section 7 of the Alaska Constitution, the State of Alaska cannot raise the retirement age of current retirees or current employees. To date, raising the retirement age of future employees has only informally been discussed. No actuarial study has been done on such a change.

Q8: Has the State reviewed the recruitment and retention data for the PERS/TRS Defined Contribution Retirement Plan?

A8: Comparing the current status of DCR Plan participants hired in the first two years of the plan to the current status of members of the last DB tiers hired in the last two years before the plans closed, shows that retention appears to be slightly better in the DCR plan, but generally the same.

The number of DCR Plan participants hired July 1, 2006 to June 30, 2008 as of April, 2011:

PERS:	7,595 total hired	3,724 currently active	49.03% retained
TRS:	1,718 total hired	983 currently active	57.22% retained

The number of DB Plan participants hired July 1, 2004 to June 30, 2006, retention as of April 19, 2011:

PERS Tier III:	8,402 total hired	3,763 currently active	44.79% retained
TRS Tier II:	1,779 total hired	952 currently active	53.51% retained

The State of Alaska Division of Personnel has reported the following retention percentages:

State of Alaska Executive Branch Rate of Employee Separation

2005	2006	2007	2008	2009	2010
15%	15%	16%	14%	12%	12%

CONFIDENTIAL

Alaska Public Pension Coalition

Subject: Analysis of Potential Pension Bills

Dear Coalition Partners:

We have analyzed the actuarial impact of the February 12, 2011 draft Bill from Senator Egan which would modify the retirement program for those now covered by the Defined Contribution Retirement (DCR) program, and two potential modifications to this initial draft.

The primary features of the bill are:

- Those hired on or after July 1, 2006 would receive the retirement, death and disability benefits currently provided by Tier 2 of TRS and Tier 3 of PERS, rather than the DCR benefits under Tier 3 of TRS and Tier 4 of PERS.
- Contributions for various members would increase:
    - Under the February 12 draft, Peace Officers and Firefighters in PERS would contribute 7.50% of pay; other PERS members would contribute 6.75%; those in TRS would contribute 8.65%
    - Under alternative I, Peace Officers and Firefighters in PERS would contribute 8.50% of pay; other PERS members would contribute 8.00%; those in TRS would contribute 9.00%
    - Under alternative II, Peace Officers and Firefighters in PERS would contribute 9.0% of pay; other PERS members would contribute 8.0%; those in TRS would contribute 10.0%
- Those individuals would be eligible to receive retiree major medical coverage without having to pay premiums, under the following conditions:
    - For teachers, after June 30, 2011 new retirees are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 8 years of service.
    - For peace officers and firefighters, after June 30, 2011 new members are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
    - For other PERS members, after June 30, 2011 new members are eligible with 30 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.

This information is provided according to PTA's understanding and interpretation of the Work Draft legislation. Please advise us if our interpretation above is not consistent with your understanding. If so, our findings would differ.

The major implications of the bill as we see it are:

- Pension benefits will revert to the prior defined benefit plan tiers
- Retiree health benefits will be stronger than those under DCR, but not as strong as those provided under the latest tier DB plans. Retiree health care premiums are paid as illustrated by the following table:

	Teachers	Peace Officers & Firefighters	Other PERS
Latest Tier DB Plan Health Care Eligibility	Age 60 or 25 years	Age 60 or 25 years	Age 60 or 30 years
DCR Program Health Care Eligibility	Medicare Age [65]	Medicare Age [65]	Medicare Age [65]
Egan Bill Health Care Eligibility	Medicare Age [65] with 8 years or any age with 25 years	Medicare Age [65] with 10 years or any age with 25 years	Medicare Age [65] with 10 years or any age with 30 years

Cost Comparisons

The actuary for the Alaska Department of Administration Division of Retirement Benefits regularly reports on the financial condition of the Alaska Public Employees' Retirement System (PERS) and Alaska Teachers' Retirement System (TRS). These analyses are conducted primarily through an "actuarial valuation", which calculates the plans costs and liabilities. The actuary has calculated the Normal Cost under both the prior tier DB plans as well as under the DCR program. We have been asked to estimate the costs of the proposed program in the draft Egan bill. These cost estimates are being done without the benefit of the full actuarial data that would be used by the actuary. Consequently, their numbers will likely be different than ours, and more correct.

We also have limited information to make a determination of the cost savings from additional employee contributions. An increased employee contribution does not generate a dollar for dollar reduction in employer contribution, because some employees terminate prior to retirement and receive a refund of their contributions. We also understand that the actuarially assumed rate of investment return is being reduced from 8.25% to 8.00%. Our estimates are still based on 8.25%, so the "official" cost numbers will likely be slightly higher than ours.

The following tables develop our cost estimates and compare the five programs:

Teachers Retirement System Estimated Cost Comparisons

Teachers Retirement System	DB Plan Tier 2	DCR Plan Tier 3	Proposed Tier 4 – Feb 12 Draft Bill	Proposed Tier 4 – Alternative I	Proposed Tier 4 – Alternative II
Total Retirement Normal Cost (including refunds)	11.39%	NA	11.39%	11.45%	11.62%
Member Contributions	(8.65%)	(8.00%)	(8.65%)	(9.00%)	(10.00%)
Net Employer Retirement Normal Cost	2.74%	NA	2.74%	2.45%	1.62%
DC Employer Contribution Rate	NA	7.00%	NA	NA	NA
Occupational Death and Disability Normal Cost Rate	NA	0.05%	NA	NA	NA
Medical Normal Cost Rate	5.33%	0.64%	4.52%	4.52%	4.52%
HRA Contribution Rate	NA	3.00%	NA	NA	NA
Total Employer Cost	8.07%	10.69%	7.26%	6.97%	6.14%
DCR Payroll during FY 2011	$59,750,000	$59,750,000	$59,750,000	$59,750,000	$59,750,000
Total Employer Cost on FY 2011 Basis	$4,800,000	$6,400,000	$4,300,000	$4,200,000	$3,700,000

PERS Police Officers & Firefighters Estimated Cost Comparisons

Public Employees Retirement System – Peace Officers & Firefighters	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5 – Feb 12 Draft Bill	Proposed Tier 5 – Alternative I	Proposed Tier 5 – Alternative II
Total Retirement Normal Cost (including refunds)	12.30%	NA	12.30%	12.36%	12.39%
Member Contributions	(7.50%)	(8.00%)	(7.50%)	(8.50%)	(9.00%)
Net Employer Retirement Normal Cost	4.80%	NA	4.80%	3.86%	3.39%
DC Employer Contribution Rate	NA	5.00%	NA	NA	NA
Occupational Death and Disability Normal Cost Rate	NA	1.04%	NA	NA	NA
Medical Normal Cost Rate	5.90%	0.43%	5.35%	5.35%	5.35%
HRA Contribution Rate	NA	3.00%	NA	NA	NA
Total Employer Cost	10.70%	9.47%	10.15%	9.21%	8.74%
DCR Payroll during FY 2011	$21,192,000	$21,192,000	$21,192,000	$21,192,000	$21,192,000
Total Employer Cost on FY 2011 Basis	$2,300,000	$2,000,000	$2,200,000	$2,000,000	$1,900,000

Other PERS Estimated Cost Comparisons

Other Public Employees Retirement System Members	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5 – Feb 12 Draft Bill	Proposed Tier 5 – Alternative I	Proposed Tier 5 – Alternative II
Total Retirement Normal Cost (including refunds)	9.58%	NA	9.58%	9.75%	9.75%
Member Contributions	(6.75%)	(8.00%)	(6.75%)	(8.00%)	(8.00%)
Net Employer Retirement Normal Cost	2.83%	NA	2.83%	1.75%	1.75%
DC Employer Contribution Rate	NA	5.00%	NA	NA	NA
Occupational Death and Disability Normal Cost Rate	NA	0.16%	NA	NA	NA
Medical Normal Cost Rate	7.00%	0.56%	3.60%	3.60%	3.60%
HRA Contribution Rate	NA	3.00%	NA	NA	NA
Total Employer Cost	9.83%	8.72%	6.43%	5.35%	5.35%
DCR Payroll during FY 2011	$200,739,000	$200,739,000	$200,739,000	$200,739,000	$200,739,000
Total Employer Cost on FY 2011 Basis	$19,700,000	$17,500,000	$12,900,000	$10,700,000	$10,700,000

Some of these cost comparisons are very intriguing. Note that the costs for the 7.50% plan for Peace Officers and Firefighters are roughly comparable to the Tier 3 and Tier 4 costs. But the costs for Other PERS member are dramatically lower than either the Tier 3 or Tier 4 costs. This is because they are losing significantly on the medical premium payments, by no longer being able to retire at age 60 with premium payment made by the plan unless they have 30 years of service. I estimate that only about a third of these Other PERS members would have 30 years by the time they attain age 65, meaning that this benefit would have no value for most of them. That is the reason the medical normal cost rate is so much lower for Other PERS Tier 5 than for Other PERS Tier 3. It will be interesting to see what the "official" actuarial cost determination is.

Please also realize that the cost determinations above do not include any cost for the retroactive feature of the bill. I understand that those costs were estimated to be $37 million in 2009. We do not have the data necessary to make an estimate of the cost this year. Because of the market recovery, the cost might possibly have decreased since 2009.

Conclusions

The proposed programs would result in stronger pension benefits through the return of the Defined Benefit plan for members hired since 2006. It would provide improved health care plan benefits, but no future HRA contributions. As a result of all this, employer costs on a FY 2011 basis could increase by about $200,000, or fall slightly, for PERS Peace Officer and Firefighter members, but would decrease substantially for TRS ($2.1 million to $2.7 million) and Other PERS ($4.6 million to nearly $7 million) members. In total, employer costs would fall by about $6 to $9 million, depending on the alternative chosen.

employer or employee costs?

The PERS and TRS actuary will calculate more precise costs, based on complete data and their new actuarial assumptions. The costs above should be considered a starting point for analysis of the bill.

The work reflected herein was conducted by Pension Trustee Advisors under my direction. I look forward to discussing this with you further.

Sincerely,

William B. Fornia, FSA
President

Alaska State Legislature

Please enter into the record my testimony to the Senate State Affairs
committee name

Committee on SB 121, dated 4-14-11
bill # / subject public hearing date

April 13, 2011
Thank you to the sponsors and cosponsors of SB 121. As many of you know, returning Alaska to a defined benefit retirement plan for teachers and public employee has been the number one legislative priority of NEA-Alaska since this ill conceived legislation was enacted beginning July of 2006.
As we approach the fifth full year of implementation, it is appropriate the Alaska legislature take a serious look at this issue. Questions the legislature should ask would be: 1) is the new defined contribution system saving money? 2) is the new defined contribution system resolving the unfunded liability? 3) is Alaska having difficulty recruiting and retaining teachers and public employees because of the defined contribution retirement system currently in place?
Many are more qualified than I am to answer the above questions. As a local president working with approximately one third of our teaching force on the Kenai Peninsula currently in the defined contribution system, I know the conversations that I have had with teachers. Conversations much like the one I had last week when a Tier III teacher who has family and connections within the district called me and asked, "What advantage is it for me and my family to remain in Alaska?" These are the type of questions many of our young, best, and brightest employees are asking as they look toward their future and financial stability for their families.
When SB 141 was passed, the "portability" of the defined contribution system was one of its selling points to many legislators. I ask now as I asked then, "Why is it good to encourage people to leave our state?" Our communities are very often built around our schools and school employees are a vital part of our communities. Police officers, firefighters, and other public employees also contribute to the sense of community many of us feel. To have a retirement system that encourages people to move seems counterproductive to building strong communities in Alaska.
Thank you for introducing this legislation this session and hopefully it will get serious attention in the next legislative session.
Sincerely,
LaDawn Druce
President of the Kenai Peninsula Education Association

Subject: SB 121

My wife and I are both tier I retirees. We both spent most of our working lives working for the State of Alaska and both of us worked for the City and Borough of Juneau for a few years. I worked as a computer programmer with the State and my wife worked as a registered nurse for both the State and the City and Borough of Juneau. Neither of us would do that today with a defined contribution system because it does not offer the security of retirement checks for life, only the hope that the money lasts longer than our lives do.

One of my sisters-in-law is also a tier I retiree who worked for the State of Alaska as a counselor. My son works for the State as an Accountant III and one of my nephews works for the State as an Administrative Officer II. They are very fortunate to have gotten into tier III where they have a defined benefit retirement.

So why is RPEA so supportive of this legislation? Many of us have grandchildren. Some day when they reach retirement, as we have, they will need a secure retirement that lasts as long as they live. With a defined contribution retirement system the options for our grandchildren to stay in Alaska are diminished. Working for the State of Alaska or a municipality or as a teacher would leave them with a gamble for a retirement instead of a secure retirement.

How are you going to keep our grandchildren in Alaska?

Thank you.

Gary Miller

A Better Bang for the Buck

The Economic Efficiencies of Defined Benefit Pension Plans

by Beth Almeida and William B. Fornia, FSA

August 2008

ABOUT THE AUTHORS

Beth Almeida is the Executive Director of the National Institute on Retirement Security. Before joining NIRS, she served as assistant director for strategic resources and as senior economist with the International Association of Machinists and Aerospace Workers (IAM) where she was instrumental in transitioning some 40,000 airline employees out of terminating or freezing pensions into the IAM's multi-employer defined benefit pension plan. Earlier in her career, Ms. Almeida led research initiatives at academic centers in Germany, France, and her home state of Massachusetts. She has authored numerous economic and pension publications and is a frequent speaker at academic and industry conferences, both in the US and abroad. Beth earned a bachelor's degree in international business from Lehigh University and a master's degree in economics from the University of Massachusetts Amherst.

William B. (Flick) Fornia is Senior Vice President, human resource consultant and actuary for Aon Consulting, specializing in public sector retirement plans. He has 29 years of actuarial and consulting experience, primarily in the areas of retiree pension and healthcare benefits. Mr. Fornia is an author and frequent speaker on all aspects of retirement programs including retiree healthcare plans, and the challenges of public sector defined contribution plans. Mr. Fornia earned a Bachelor of Arts in Mathematics at Whitman College. He is a Fellow of the Society of Actuaries, Enrolled Actuary, Member of the American Academy of Actuaries, and Fellow of the Conference of Consulting Actuaries. He currently serves on the American Academy of Actuaries Public Pensions Subcommittee, the Faculty of the Society of Actuaries Fellowship Admissions Course, and the Conference of Consulting Actuaries Committee on Professionalism.

ACKNOWLEDGEMENTS

The authors would like to thank Donald Fuerst, Ron Gebhardtsbauer, Phil Peterson, and Christian Weller for valuable comments on earlier drafts, helpful advice, and assistance. We also thank Ilana Boivie and Laura Vincent for their excellent research contributions in support of this report. Special thanks to Kelly Kenneally for helping to keep the project on track and in focus. The views in this report and any errors and omissions are those of the authors alone.

INTRODUCTION

Worries about retirement security abound. Families fear that they won't have enough to support an adequate retirement income as home values and financial markets plummet. Dwindling profit margins have employers looking to cut costs. And governments are concerned about delivering on the promises that they have made to their citizens and to their employees as tax revenues shrink amid a weakening economy.

In this environment, some have proposed replacing traditional defined benefit (DB) pensions with 401(k)-type defined contribution (DC) retirement savings plans in an effort to save money. But decision makers would be wise to look before they leap. To deliver the same level of retirement benefits, a DB plan can do the job at almost half the cost of a DC plan. Hence, DB plans should remain an integral part of retirement income security in an increasingly uncertain world because they offer employers and employees a better bang for the buck.

The value of traditional DB pensions to employees is generally recognized: they provide a secure, predictable retirement income that cannot be outlived. But less well known is the value of a DB pension to an employer. Due to their group nature, DB plans possess "built-in" savings, which make them highly efficient retirement income vehicles, capable of delivering retirement benefits at a low cost to the employer and employee. These savings derive from three principal sources.

First, DB plans better manage longevity risk, or the chance of running out of money in retirement. By pooling the longevity risks of large numbers of individuals, DB plans avoid the "oversaving" dilemma – that is, saving more than people need on average to avoid running out of cash – that is inherent in DC plans. Consequently, DB plans are able to do more with less.

Second, because DB plans, unlike the individuals in them, do not age, they are able to take advantage of the enhanced investment returns that come from a balanced portfolio throughout an individual's lifetime.

Third, DB plans, which are professionally managed, achieve greater investment returns as compared with DC plans that are made up of individual accounts. A retirement system that achieves higher investment returns can deliver any given level of benefit at a lower cost.

Because of these three factors, we find that a DB pension plan can offer the same retirement benefit at close to half the cost of a DC retirement savings plan. **Specifically, our analysis indicates that the cost to deliver the same level of retirement income to a group of employees is 46% lower in a DB plan than it is in a DC plan.** This is an important factor for policy makers to consider, especially with respect to public sector workforces, where tax dollars are an important source of funds for retirement benefits. DB plans are a more efficient use of taxpayer funds when offering retirement benefits to state and local government employees.

More specifically, this study finds that …

- Longevity risk pooling in a DB plan saves 15%,
- Maintenance of a balanced portfolio diversification in a DB plan saves 5%, and
- A DB plan's superior investment returns save 26%

… as compared with a typical DC plan.

TWO APPROACHES TO RETIREMENT: DB AND DC PLANS

Employers who offer retirement benefits can consider two basic approaches: a traditional defined benefit (DB) pension plan and a defined contribution (DC) retirement savings plan.[1] Each type of plan has certain distinguishing characteristics that influence their cost to employers and employees.[2]

How DB plans work

While employers have a good degree of flexibility in designing the features of a DB plan, there are some features all DB plans share.

DB plans are designed to provide employees with a predictable monthly benefit in retirement. The amount of the monthly pension is typically a function of the number of years an employee devotes to the job and the worker's pay – usually at the end of their career.[3] For example, the plan might provide a benefit in the amount of 1.5% of final average pay for each year worked. Thus, a worker whose final average salary was $50,000, and who had devoted 30 years to the job, would earn a monthly benefit of $1,875 ($22,500 per year), a sum that would "replace" 45% of his final average salary after he stops working. This plan design is attractive to employees because of the security it provides. Employees know in advance of making the decision to retire that they will have a steady, predictable income that will enable them to maintain a stable portion of their pre-retirement standard of living.

Benefits in DB plans are pre-funded. That is, employers (and, in the public sector, employees) make contributions to a common pension trust fund over the course of a worker's career. These funds are invested by professional asset managers whose activities are overseen by trustees and other fiduciaries. The earnings that build up in the fund, along with the dollars initially contributed, pay for the lifetime benefits a worker receives when he retires.

How DC plans work

DC plans function very differently than DB plans.

First, there is no implicit or explicit guarantee of retirement income in a DC plan. Rather, employers (and usually employees) contribute to the plan over the course of a worker's career. Whether the funds in the account will ultimately be sufficient to meet retirement income needs will depend on a number of factors, such as the level of employer and employee contributions to the plan, the investment returns earned on assets, whether loans are taken or funds are withdrawn prior to retirement, and the individual's lifespan.

DC plans are typically "participant directed," meaning that each individual employee can decide how much to save, how to invest the funds in the account, how to modify these investments over time, and at retirement, how to withdraw the funds.

While DC plan assets are also held in a pension trust, that trust is comprised of a large number of individual accounts. DC plans are typically "participant directed," meaning that each individual employee can decide how much to save, how to invest the funds in the account, how to modify these investments over time, and at retirement, how to withdraw the funds. Retirement experts typically advise individuals in DC plans to change their investment patterns over their lifecycle.

In other words, at younger ages, because retirement is a long way off, workers should allocate more funds to stocks, which have higher expected returns, but also higher risks. As one gets closer to retirement, experts suggest moving money away from stocks and into safer, but lower returning assets like bonds. This is to guard against a large drop in retirement savings on the eve of retirement, or in one's retirement years.

This high degree of participant direction makes DC plans very flexible in accommodating individuals' desires, decisions, and control. Employees, however, do not always follow the best expert advice when it comes to saving and investing for retirement.[4] Too many workers fail to contribute sufficient amounts to the plans, and individuals' lack of expertise in making investment decisions can subject individual accounts to extremely unbalanced portfolios with too little or too much invested in one particular asset, such as stocks, bonds, or cash. For example, one study found that more than half of all DC plan participants had either no funds invested in stocks—which exposes them to very low investment returns—or had almost all their assets allocated to stocks, making for a much more volatile portfolio.[5]

Another important difference between DC and DB plans becomes apparent at retirement. Unlike in DB plans, where workers are entitled to receive regular, monthly pension payments, in DC plans it is typically left to the retiree to decide how to spend one's retirement savings. Research suggests that many individuals struggle with this task, either drawing down funds too quickly and running out of money, or holding on to funds too tightly and enjoying a lower standard of living as a result.[6] In theory, employers that offer DC plans could provide annuity payout options, but in practice they rarely do.[7]

BOTH DB *AND* DC PLANS ARE IMPORTANT TO RETIREMENT SECURITY

Because individuals do not have perfect knowledge as to whether they will remain in a given job (and therefore in a given DB plan) until retirement, taking advantage of the opportunity to save in a supplemental DC plan can provide employees with useful diversification of retirement income sources.

DC plans are also flexible vehicles that can accommodate individual retirement income needs that can vary. For example, two otherwise identical workers might have different family situations, health needs, or simply different preferences and expectations about their retirement income needs. DC plans give workers the opportunity to save for retirement in a manner that reflects their individual situations.

This is why most retirement experts liken the ideal design of retirement income sources to a "three-legged stool," consisting of Social Security, a DB plan, and a supplemental DC savings plan. Indeed, researchers have found that workers who have access to all three sources of retirement income are in the best position to achieve a secure retirement.[8]

However, to the extent that retirement benefits for private sector employees constitute a cost to employers, and since benefits for public employees are supported by taxpayer contributions, designing retirement benefits in a fiscally responsible fashion is an important public policy goal. To that end, it is important for policymakers to recognize that the features that make DB plans highly attractive to employees – a predictable monthly retirement benefit, low fees and professional management of retirement assets – also provide significant savings for employers and taxpayers.

DB PLANS ARE MORE COST EFFECTIVE

The cost of either a DB or DC plan depends primarily, but not only, on the generosity of the benefits that it provides. Economists have found that DB plans are typically more generous than DC plans, and obviously, more generous benefits are more expensive.[9]

However, for any given level of benefit, a DB plan will cost less than a DC plan.[10] This makes DB plans, in the language of economists, *more efficient* since they stretch taxpayer, employer or employee dollars further in achieving any given level of retirement income.

This makes DB plans, in the language of economists, more efficient since they stretch taxpayer, employer or employee dollars further in achieving any given level of retirement income.

There are three primary reasons behind DB plans' cost advantage.

- First, because DB plans pool the longevity risks of large numbers of individuals, they avoid the "over-saving" dilemma inherent in DC plans. DB plans need only accumulate enough funds to provide benefits for the average life expectancy of the group. In contrast, individuals will need to set aside enough funds to last for the "maximum" life expectancy if they want to avoid the risk of running out of money in retirement. Since the maximum life expectancy can be substantially greater than the average life expectancy, a DC plan will have to set aside a lot more money than a DB plan to achieve the same level of monthly retirement income.
